

The Microlite20 RPG Collection

2017 Edition

A **Free** Collection of Roleplaying Games based on Microlite20 including the original Microlite20, expansions, variants, and complete games using the Microlite20 system.

The Microlite20 RPG Collection is a compilation of Microlite20 based games. This collection is available for **free** PDF download (and is available as a "Pay-What-You-Want" product on RPGNow/DriveThruRPG with a suggested price of \$0.00 for people who prefer that venue). Each individual game is copyrighted separately, is based on the Open Game License (because the original, Microlite20, is OGL), and is available for free. Each game is a separate entity with its own copyright and license. **The author of each individual game is solely responsible for his or her work -- no editing of individual games has been done.**

This is the third (2017) edition of The Microlite20 RPG Collection. Check the unofficial Microlite20 web site at <https://microlite20.org/> to see if there is a later edition available and for more information on Microlite20 and its variants.

This is a free publication of RetroRoleplaying.com.

Table of Contents

1.	Introduction	64.	Microlite5E [p 435]
2.	SECTION ONE	65.	MicroFive Core [p449]
3.	Microlite20 Purest Essence [p 9]	66.	M20 Fifth [p 453]
4.	SECTION TWO	67.	MULRAH [p 471]
5.	Microlite20 [p 29]	68.	Lite20 [p 483]
6.	Microlite20 GM's Guide [p 33]	69.	Mini20 [p 495]
7.	Microlite20 Expert Rules [p 37]	70.	Realms of Renown [p 519]
8.	Microlite20 Equipment List [p 41]	71.	Microlite77 [p 533]
9.	Microlite20 Fast Packs [p 45]	72.	Microlite20 OSS [p 539]
10.	Everything About Skills [p 47]	73.	Advanced Microlite20 OSS [p 545]
11.	Monster Building [p 53]	74.	Argo [p 553]
12.	Campaigns [p 55]	75.	M20 Hyborian Age [p 563]
13.	Mass Combat [p 59]	76.	Microlite Conan [p 567]
14.	Minor Variant Rules Collection [p 63]	77.	Prehistoric Microlite20 [p 569]
15.	Microlite20 Monster List [p 77]	78.	Microlite20 Bronze Age [p 577]
16.	Microlite20 Monster Quick Stats [p 81]	79.	Microlite Dark Sun [p 581]
17.	Microlite20 Arcane Spells [p 103]	80.	Omerian Tales [p 587]
18.	Microlite20 Divine Spells [p 104]	81.	Beacon [p 625]
19.	Microlite20 Apocrypha [p 107]	82.	WarEngine RPG [p 669]
20.	Microlite20 Psionics [p 113]	83.	Yamato M20 [p 671]
21.	M20 Psionics Rules [p 119]	84.	Challenges & Champions [p 695]
22.	M20 Age Level System [p 131]	85.	Microlite20 Elf Lords [p 733]
23.	Microlite20 Variant Rules [p 133]	86.	M20 Dark Heritage [p 737]
24.	Microlite20 Rune Magic [p 135]	87.	Microlite20 Resident Evil [p 765]
25.	Microlite20 Elemental Magic [p 139]	88.	Microlite20 Cthulhu [p 769]
26.	Microlite20 Vancian Magic [p 141]	89.	Microlite20 Vampires [p 773]
27.	Microlite20 Four by Five Magic [p 143]	90.	Microlite20 2012 [p 777]
28.	Microlite20 Martial Arts [p 147]	91.	SpyLite [p 781]
29.	Microlite20 Anthro Races [p 151]	92.	Giant Bug Invasion [p 801]
30.	Microlite20 Mutations [p 155]	93.	Cyberpunk [p 807]
31.	Microlite20 Mecha [p 159]	94.	SuperLite [p 811]
32.	Microlite20 Ultimate Mecha [163]	95.	Microlite20 Ultimate Costumes [p 829]
33.	Microlite20 Spacecraft [p 171]	96.	Tumbleweed [p 851]
34.	Wayfarer M20 Options [p 175]	97.	Gunsmoke & Goblins [p 857]
35.	Microlite20 Low Talents [p 191]	98.	Owl Hoot Trail [p 863]
36.	Microlite20 Variable d6 [p 193]	99.	Microlite Storytelling [p 885]
37.	Ultimate Fantasy [p 195]	100.	TileHack [p 889]
38.	Microlite20 True Sorcery [p 239]	101.	Dragoons [p 897]
39.	Microlite20 Tactical System [p 267]	102.	ZombiePocalypse [p 925]
40.	Microlite20 Companion [p 271]	103.	Microlite Tri-Stat [p 929]
41.	MicroCosmology [p 275]	104.	Relics & Ruins [p 933]
42.	SECTION THREE	105.	OmegaLite20 [p 839]
43.	Microlite20 Revised [p 281]	106.	RABID [p 957]
44.	SECTION FOUR	107.	Microlite20 Vermin [p 963]
45.	M20 SIWDCC [p 311]	108.	Where No Man Has Gone Before [p 971]
46.	Microlite20 House Rules [p 317]	109.	Galactic Methuselah [p 1041]
47.	MicroFantasy [p 321]	110.	FrontierLite [p 1045]
48.	Alter Microlite20 [p 337]	111.	M20 Star Wars [p 1047]
49.	Ultimate Ultramicrolite [p 341]	112.	Microlite20 Star Wars [p 1063]
50.	Nanolite20 [p 343]	113.	Scions of a Primordial Planet [p 1071]
51.	Microlite20 Modern [p 347]	114.	Micro MechWarrior [p 1079]
52.	M20 Modern: Expert [p 351]	115.	Stargate 1895 [p 1087]
53.	Microlite20 Ultimate Modern-Day [p 355]	116.	Blaster D20 Microlite [p 1105]
54.	M20 Hard Core Rules [p 373]	117.	Pendragon D20 Microlite [p 1121]
55.	Swords against Sorcery [p 381]	118.	Diabolical D20 Microlite [p 1131]
56.	M20 Heroic [p 389]	119.	TMKT [p 1145]
57.	Iron Heartbreakers [p 397]	120.	Microlite20 NG [p 1161]
58.	Microlite11 [p 409]	121.	PathfinderLite20 [p 1169]
59.	WildWalker's M20 4e [p 411]	122.	Microlite20 Edición Némesis [p 1213]
60.	Microlite20 Variant 4e [p 315]	123.	SECTION FIVE
61.	Microlite 4E [p 421]	124.	Character Sheets [p 1237]
62.	Micro Action Fantasy [p 423]	125.	Frahl The Ogre King [p 1253]
63.	Microlite20 5e [p 433]	126.	The Iron Skull [p 1255]

Donate to the RetroRoleplaying Cancer Fund and Get some PDF Goodies

Many Microlite gamers know that Randall Stukey (of RetroRoleplaying.com), the author of Microlite74 is trying to raise funds to pay the bills from his wife's oral cancer treatments and that he worked on the original Microlite74 as way to cope during her recovery from 6 weeks of radiation treatment. Randall and Donna are some of the 40 to 50 million people in the US who do not have health insurance nor did they qualify for government aid as they lived in Texas and have no children. Donna cancer treatments have cost over \$110,000. While some of this has been absorbed by hospital foundations and the like, they still owed a lot. To make matters worse, Donna was diagnosed with MS in 2014 – and the MS was apparently made much worse by the radiation treatments needed for her cancer. You can donate to the Retroroleplaying Cancer Fund (via PayPal) and help them pay their bills. The more money donated, the more time Randall has to work on games like the many he has released – and most of those available for free.

Everyone who donates any amount at all get a password giving them access to a number of special downloads. *Some* of the currently available downloads include:

- Pdf copies of the two issues of The Grimoire Randall published in the late 1970s (which Randall blogged about here: The Grimoire #1 (<http://blog.retroroleplaying.com/2009/05/grimoire-1-spring-1978-d-fanzine.html>) and The Grimoire #2 (<http://blog.retroroleplaying.com/2009/05/grimoire-2-summer-1979-d-fanzine.html>))
- pdf copy of The Second Grimoire of Pharesm the Bright-Eyed, a set of house rules for a BECMI campaign Randall ran at a game shop in the mid-1980s.
- A copy of the Player's Introduction to the Fourth Campaign Arn (from about 1984)
- Special editions of some of the Microlite7x games with better artwork and the occasional special game created for donors.
- Access to early versions of games in development

To get access to these downloads, help Randall pay the medical bills by sending a donation in any amount -- small or large -- to the RetroRoleplaying Cancer Fund via Paypal at this link:

https://www.paypal.com/cgi-bin/webscr?cmd=s-xclick&hosted_button_id=5599990

Please consider donating if you can! Even \$5 or \$10 helps. Thank you!

Introduction

What is Microlite20?

Do you remember when the gaming table was full of pizza and soda, not rulebooks, miniatures and dungeon tiles? Do you yearn for a role-playing game that doesn't require weight training to carry all the books? Do you want to be able to hold all the rules in your head - or in your back pocket? And do you still want to use all those lovely monsters, adventures and game worlds too?

So do we!! -- Greywulf

Microlite20 is a minimalist role-playing game designed to be usable with the majority of the OGL/d20 supplements, rules and adventures with little or no advance preparation. The basic rules for character generation, combat, magic and level advancement take up a single sheet of paper, meaning it is perfect for introducing role-playing to new players, gaming one-shot adventures or tailoring into your own game system.

History of Microlite20

Microlite20 was designed by Robin V. Stacey (aka Greywulf) in 2006. The purpose of the rules were to strip the OGL/D20 system down to its bare minimum so that the world's most popular fantasy system could be played quickly and without thousands of pages of rules, but still be usable with all the adventures, campaign settings, and supplements that had been published for the 3.x edition of the world's most popular fantasy RPG.

Amazingly, one page of basic rules (coupled with the Fantasy SRD for spells and monsters) really did allow for fast-playing games with just about every adventure and supplement published for the 3.x edition.

Microlite20 was an immediate hit with players who liked the 3.x edition of the world's most popular fantasy RPG but did not like the complex and time-consuming (both to GM for and to play out combats) beast it had become. Microlite20 was a rules-light way to play that brought fun back to many game tables.

The Microlite20 rules were entirely open game content. Only the names "Microlite20" and "Robin V. Stacey" were listed as product identity. Having the entire system open game content sparked a flurry of gamer creativity. Simple variant rules and basic expansions came first – for example, lists of limited spells and monsters so Microlite20 could be played without lugging the huge SRD around. However, customized rule sets and complete games based on Microlite20 soon followed. As later editions of the world's most popular fantasy game were published, people created Microlite20-based versions of those editions. Many of these variant Microlite20 games are collected in this book. That's how a one page game grew to a 1500 page book.

In the spring of 2010, Robin sold the rights to Microlite20 to Seth Drebitko. Seth has big plans for the

game but even without big plans, the Microlite20 community is still going strong, still producing new material and complete new games based on Microlite20.

What is this Book?

This book is a simple collection of Microlite20 PDFs combined into a single PDF file for easy downloading and printing. Most Microlite20 materials are published as individual PDF files. For the most part, this book is all these PDFs (and a few extras like this introductory material) combined into a single PDF with an open source program called PDFSAM. Some material that was never published in PDF format has been converted from text and word files to PDF and included.

As one might expect, there isn't a lot of organization. As 90% of the material was in fixed format PDF files, that's unfortunate, but only expected. Your compiler has attempted to put the various PDFs into useful order in seven sections, however.

The first section has only one set of rules: Microlite20 Purest Essence. This is Paul Lessack's beautifully laid-out version of Microlite20. It includes the basic rules and some of the expansions (e.g. equipment, spells and the full expert rules and the GM guide) included in the second section. Many people consider this best version of "core" Microlite20.

The second section includes the original Microlite20 rules, and many variant rules and expansions building upon the original rules.

The third section has the current (as of late September 2017) draft version of Seth Drebitko's Microlite20 Revised.

The fourth – and largest – section includes many complete games based on Microlite20. Some of these games aren't that different from the original, while others break quite a bit of new ground. Not all of these games are fantasy, you'll find Microlite20 based science fiction games, espionage games, after the holocaust games, superhero games, and western games. Some games are quite short, others are fairly long and detailed. There's even a game, Tilehack, that uses Scrabble tiles instead of dice. A revised and more complete version of Pathfinder Lite is not included in this collection because its artwork is licensed under Paizo's Community Use Policy. A free copy of this version can be downloaded from the Microlite20 Download Library at Microlite20.org web site.

The fifth section has a collection of Microlite20 character sheets, setting, and mini-adventures.

The sixth section includes some of the Microlite74, Microlite78, and Microlite81 games available. These games convert old TSR versions to the more "modern" Microlite20 rules base. The rules of the more important core games are included; however, the many

supplements and variants are not included to save space. How to obtain free copies of this additional material is explained at the start of this section.

The seventh section includes complete games with many pictures or background images. Two of these games try to add more information from the 3.x SRD to make more complete versions of Microlite20 that do not require referencing the 3.x SRD will playing Microlite20.

The Future of Microlite20

What does the future hold for Microlite20 gaming? I don't know for sure, but I suspect there will be many more additional rules options and complete Microlite20-based games. Microlite20 is so easy to work with that just about any GM can rework the system to make it "just perfect" for his or her favorite setting or homebrew campaign. With luck, there will be future (and even larger) edition of The Microlite20 RPG Collection – perhaps one with a Microlite20-based game you designed. Until then, there are a lot of interesting games to try in this third edition of The Microlite20 RPG Collection. Happy gaming!

Section 1:

Microlite20 Purest Essence

This fancy printing of Microlite20 incorporates the basic rules, the expert rules, the compact monster and spell lists, and the GM Guide in a nicely formatted package. It's really all you need to play. If you are at all familiar the 3.x Fantasy SRD, it's probably more than enough to run a fantasy campaign as a GM. While it is not the purest form of Microlite20 (see section 2 for that), it is the "purest essence" of the Fantasy SRD.

Microlite20

purest essence

*Robin V. Stacey, Darrell King
& Al Krombach*

This is a trimmed-down, subminiature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play.

The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD (monsters, spells, adventures and equipment) could be used without conversion.

Art Direction, Production & Layout: Paul Lesack

Characters

Stats

There are 3 stats : Strength (**STR**), Dexterity (**DEX**) and Mind (**MIND**).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (**STAT**-10)/2, round down.

Races

Humans get +1 to all skill rolls

Elves get +2 **MIND**

Dwarves get +2 **STR**

Halflings get +2 **DEX**

Classes

The classes are **Fighter, Rogue, Mage, Cleric**. Characters begin at Level 1.

Fighters

Wear any kind of armour and use shields. They have a +3 bonus to Physical and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on

Rogues

Can use light armour. They have a +3 bonus to Subterfuge. If they successfully Sneak (usually sub+DEX, but depends on situation) up on a foe they can add their Subterfuge skill rank to the damage of their first attack

Magi

Wear no armour. They can cast arcane spells, and gain a +3 bonus to Knowledge

Clerics

Can wear light or medium armour. They cast divine spells and gain +3 bonus to Communication. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + **MIND** Bonus) times per day.

Skills

There are just 4 skills : **Physical, Subterfuge, Knowledge and Communication**. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level + any bonus due to your class or race.
Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + **STR** bonus. Dodging a falling rock is Physical + **DEX** bonus. Finding a trap is Subterfuge + **MIND** bonus. Disabling a trap is Subterfuge + **DEX** bonus.

Note that there are no "saving throws" in this game; use Physical + **STR** or **DEX** bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all arcane spells in the SRD spell list.

Casting a spell of any kind costs Hit Points. The cost is:

1 + double the level of the spell being cast

Spell Level	HP Cost
0	1
1	3
2	5
3	7
4	9
5	11
6	13
7	15
8	17
9	19

This loss cannot be healed normally but is recovered after 8 hours rest. *There is no need to memorize spells in advance.*

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character. Select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) for all spells:

10 + Caster Level + Caster's MIND bonus

Combat

Hit Points = **STR** Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces **STR**. If that reaches 0, death.

Roll d20 + **DEX** bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc.

Melee attack bonus = **STR** bonus + Level

Missile attack bonus = **DEX** bonus + Level

Magic attack bonus = **MIND** bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's Armour Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage.

Fighters and Rogues can use **DEX** bonus + Level as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

Add **STR** bonus to Melee damage, x2 for 2-handed weapons. Armour Class (AC) = 10 + **DEX** bonus + Armour bonus.

Other Hazards

Falling

1d6 damage per 10', half damage on Phys+DEX save.

DC=depth fallen in feet

Spikes

add +1 point to falling damage per 10' fallen, max +10

Poison

Phys+STR save to avoid or for half, depending on poison.

Effect varies with poison type.

Extreme Heat & Cold

If not wearing suitable protection, Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Level Advancement

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds

- 1d6 to Hit Points
- 1 to all attack rolls
- 1 to all skills

If the level divides by three (i.e. level 3,6,9,etc.) add 1 point to **STR**, **DEX** or **MIND**.

Fighters gain +1 to their attack and damage rolls at levels 5,10,15,etc.

Clerics and Magi gain access to new spell levels at levels 3,5,7,9,etc.

Example:

The 1st level adventurers have just completed a dungeon adventure, and defeated 5 EL1 encounters, an EL2 trap and the EL3 leader. That's a total of EL10, so they all advance to level 2. They need to defeat another 20 Encounter Levels to reach Level 3.

Monsters

Animal (small) eg Badger

HD 1d8+2 (6 hp) AC 15 Claw +4 (1d2-1)

Ankheg

HD 3d10+12 (28 hp) AC 18 Bite +7 (2d6+7 plus 1d4 acid)

Bugbear

HD 3d8+3 (16 hp) AC 17 Morningstar +5 (1d8+2) or javelin +3 (1d6+2)

Choker

HD 3d8+3 (16 hp) AC 17 Tentacle +6 (1d3+3)

Deinonychous (Raptor)

HD 4d8+16 (34 hp) AC 16 Talons +6 (2d6+4)

Dire Rat

HD 1d8+1 (5 hp) AC 15 Bite +4 (1d4 plus to dodge for half)

Dwarf

HD 1d8+2 (6 hp) AC 16 Waraxe +3 (1d10+1) or shortbow +1 (1d6)

Earth Elemental (large)

HD 8d8+32 (68 hp) AC 18 Slam +12 (2d8+7)

Elf

HD 1d8 (4 hp) AC 15 Longsword +2 (1d8+1) or longbow +3 (1d8)

Gargoyle

HD 4d8+19 (37 hp) AC 16 Claw +6 (1d4+2)

Goblin

HD 1d8+1 (5 hp) AC 15 Morningstar +2 (1d6) or javelin +3 (1d4)

Griffon

HD 7d10+21 (59 hp) AC 17 Bite +11 (2d6+4)

Halfling

HD 1d8+1 (5 hp) AC 16 Shortsword +3 (1d6) or light crossbow +3 (1d6)

Hellhound

HD 4d8+4 (22 hp) AC 16 Bite +5 (1d8+1 plus 1d6 fire)

Hill Giant

HD 12d8+48 (102 hp) AC 20 Greatclub +16 (2d8+10) or rock +8 (2d6+7)

HD 2d12+3 (16 hp) AC 11 Slam +2 (1d6+1) or club +2 (1d6+1)

Skills

All creatures have a bonus to all skills equal to their number of Hit Dice. If the creature is intelligent, add +3 to one skill. Add stat bonuses to suit and as logic dictates. This is intentionally kept open -- if you need a sneaky bugbear, assign the +3 bonus to Subterfuge; if a warrior, give +3 to Physical; for a spell-caster assign the +3 to Knowledge or Communication and give levels of Mage or Cleric (see below).

Monster Advancement

To make a tougher monster, add more Hit Dice; each additional HD adds one to their skill and combat bonuses.

For each doubling of the Hit Dice, increase the dice size for attacks (ie, $d4 \rightarrow d6$, $d6 \rightarrow d8$, etc). Alternatively, add class levels to intelligent monsters. Start with the base Hit Dice and add levels of Fighter, Rogue, Mage or Cleric as required.

Create your own

Assign Hit Dice (d8 for most things, d12 for Dragons and Undead).

Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter, +3 bonus to one skill. Add stat bonuses to suit.

Sample Characters

Morris, Human Rogue-1

STR 12 (+1), DEX 15 (+2), MIND 12 (+1)
hp 13, AC 15 (Studded Leather), Paired Short-swords, +0/+0, d6+1
Subterfuge +5, all others @ +2

Kendrick, Dwarf Fighter-1

STR 16 (+3), DEX 13 (+1), MIND 11 (+0)
hp 17, AC 17 (Chainmail + shield), Longsword +5, d8+4
Physical +4, all others @ +1

hp 11, AC 18 (Chainmail), Morningstar +1, d8
Communication +4, all others @ +1
Spells: All 0 and 1st level divine spells.

Equipment List

Starting Wealth

The most common coin is the *gold piece* (gp). A gold piece is worth 10 silver pieces. Each silver piece is worth 10 copper pieces (cp). In addition to copper, silver, and gold coins there are also platinum pieces (pp), which are each worth 10 gp.

Exchange	cp	sp	gp	pp
Copper piece	1	1/10	1/100	1/1,000
Silver piece	10	1	1/10	1/100
Gold piece	100	10	1	1/10
Platinum piece	1,000	100	10	1

You begin with a certain amount of acquired wealth, determined by your character class.

Class	Amount
Fighter	150 gp
Rogue	125 gp
Mage	75 gp
Cleric	120 gp

The character uses this accumulated wealth to purchase his initial weapons, armor, and adventuring equipment, using the price lists on the tables below.

Weapons

Here is the format for weapon entries (given as column headings on the table below).

Cost: This value is the price for purchasing the weapon. The cost includes miscellaneous gear that goes with the weapon.

Damage: The damage column gives the damage dealt by the weapon on a successful hit.

Range Increment: Any attack at less than this distance is not penalized for range. However, each full range increment imposes a cumulative -2 penalty on the attack roll. A thrown weapon has a maximum range of five range increments. A projectile weapon can shoot out to ten range increments.

Armour & Shields

Here is the format for armour entries (given as column headings on the table below).

Cost: This value is the price for purchasing the armour.

AC Bonus: The column gives the Armour Class bonus provided by the armour.

Two-Handed Weapons

Shield, light steel	9gp	+1
Shield, heavy wooden	7gp	+2
Shield, heavy steel	20gp	+2
Shield, tower	30gp	+4

Adventuring Equipment

Back in the day, there were standard equipment packages, pre-compiled and pre-calculated, to help new players get started quickly. This document is inspired by those lists and provides a way for a player to quickly equip his or her PC or a GM to equip an NPC or Hireling on the fly. Additionally, these optional kits can be used to give a starting point from which to customize new characters.

50 Gold Pieces each

Choose a pack or roll 1d6 to select one randomly

Finally, add the following, based on your Class:

Cleric: Silver Holy symbol & 5 Gold Pieces

Fighter: Vial of Holy Water & 5 Gold Pieces

Mage: Spellbook & 2 Spell Pouches & 5 Gold Pieces

Rogue: Thieves Tools

Ghoul: HD 2d12 (13 hp), AC 14, Bite +2 (1d6+1 plus paralysis) or claws +0 (1d3 plus paralysis)

Gnoll: HD 2d8+2 (11 hp), AC 15, Battle-axe +3 (1d8+2) or shortbow +1 (1d6)

Goblin: HD 1d8+1 (5 hp), AC 15, Morningstar +2 (1d6) or javelin +3 (1d4)

Griffon: HD 7d10+21 (59 hp), AC 17, Bite +11 (2d6+4)

Halfling: HD 1d8+1 (5 hp), AC 16, Shortsword +3 (1d6) or light crossbow +3 (1d6)

Hellhound: HD 4d8+4 (22 hp), AC 16, Bite +5 (1d8+1 plus 1d6 fire)

Hill Giant: HD 12d8+48 (102 hp), AC 20, Greatclub +16 (2d8+10) or rock +8 (2d6+7)

Hobgoblin: HD 1d8+2 (6 hp), AC 15, Longsword +2 (1d8+1) or javelin +2 (1d6+1)

Human Commoner: HD 1d8+1 (5 hp), AC 12, Dagger +1 (1d6+1) or sling +1 (1d4)

Kobold: HD 1d8 (4 hp), AC 15, Spear +1 (1d6-1) or sling +3 (1d3)

Lizardfolk: HD 2d8+2 (11 hp), AC 15, Claw +2 (1d4+1) or club +2 (1d6+1) or javelin +1 (1d6+1)

Nymph: HD 6d6+6 (27 hp), AC 17, Dagger +6 (1d4) or stunning glance (unable to act for 2d4 rounds, DC 17 phys+STR to negate)

Ogre: HD 4d8+11 (29 hp), AC 16, Greatclub +8 (2d8+7) or javelin +1 (1d8+5)

Orc: HD 1d8+1 (5 hp), AC 13, Falchion +4 (2d4+4) or javelin +1 (1d6+3)

Otyugh: HD 6d8+9 (36 hp), AC 17, Tentacle +4 (1d6 plus disease)

Owlbear: HD 5d10+25 (52 hp), AC 15, Claw +9 (1d6+5)

Rust Monster: HD 5d8+5 (27 hp), AC 18, Antennae touch +3 (rust)

Shadow: HD 3d12 (19 hp), AC 13, Incorporeal touch +3 (1d6 Str)

Shambling Mound: HD 8d8+24 (60 hp), AC 20, Slam +11 (2d6+5), constrict (2d6+7)

Skeleton Warrior: HD 1d12 (6 hp), AC 15, Scimitar +1 (1d6+1) or claw +1 melee (1d4+1)

Stirge: HD 1d10 (5 hp), AC 16, Touch +7 (attach)

Stone Golem: HD 14d10+30 (107 hp), AC 26, Slam +18 (2d10+9)

Treant: HD 7d8+35 (66 hp), AC 20, Slam +12 (2d6+9)

Troll: HD 6d8+36 (63 hp), AC 16, Claw +9 (1d6+6)

Vampire: HD 4d12+3 (29 hp), AC 15, Slam +5 (1d6+4 plus energy drain -1 level, DC 14 phys+STR to negate) or blood drain (-1d4 STR)

Bermin

Monstrous Scorpion (tiny): HD ½d8+2 (4 hp), AC 14, Claw+2 (1d2-4) or sting -3 (1d2-4 plus poison)

Monstrous Scorpion (small): HD 1d8+2 (6 hp), AC 14, Claw+1 (1d3-1) or sting -4 (1d3-1 plus poison)

Monstrous Scorpion (large): HD 5d8+10 (32 hp), AC 16, Claw+6 (1d6+4) or sting +1 (1d6+2 plus poison)

Monstrous Scorpion (huge): HD 10d8+30 (75 hp), AC 20, Claw+11 (1d8+6) or sting +6 (2d4+3 plus poison)

Monstrous Spider (small): HD 1d8 (4 hp), AC 14, Bite +4 (1d4-2 plus poison)

Monstrous Spider (large): HD 4d8+4 (22 hp), AC 14, Bite +4 (1d8+3 plus poison)

Monstrous Spider (huge): HD 8d8+16 (52 hp), AC 16, Bite +9 (2d6+6 plus poison)

Werewolf

Human Form: HD 3d8+7 (20 hp), AC 17, Longsword +3 (1d8+1) or light crossbow +2 (1d8)

Wolf Form: HD 3d8+7 (20 hp), AC 16, Bite +5 (1d6+3)

Hybrid Form: HD 3d8+7 (20 hp), AC 16, Claw +4 (1d4+2)

Wight: HD 4d12 (26 hp), AC 15, Slam +3 (1d4+1 plus energy drain)

Wraith: HD 5d12 (32 hp), AC 15, Incorporeal touch +5 (1d4 plus -1d6 STR, DC 14 phys+STR to negate)

Wyvern: HD 7d12+14 (59 hp), AC 18, Sting +10 (1d6+4 plus poison) or Talon +10 (2d6+4) or Bite +10 (2d8+4)

Zombie: HD 2d12+3 (16 hp), AC 11, Slam +2 (1d6+1) or club +2 melee (1d6+1)

Expert Rules

This rule-set allows for introducing a few more options to your Microlite20 game, without necessarily increasing its complexity. Included are: a new skill, new races, new classes, and some other (hopefully) good stuff. It is not necessary to use Microlite20 Expert Rules

in its entirety; DMs are encouraged to “cherry pick” those specific items applicable to their own campaign.

Races

Gnomes get +1 to **DEX**, +1 to **MIND**

Half-orcs get +4 to **STR**, -2 to **MIND**

Half-elves get +1 to **DEX**, and +1 to any 2 Skills

Lizardmen get +2 to **STR**, +2 to **Dex**, -2 to **MIND**

Classes

Paladins

Wear any kind of armor and use shields. They have a +1 bonus to Physical and a +2 bonus to Communication. They are immune to diseases and apply a +1 bonus to all saving throws (this increases by +1 at 5th level and every 5 levels on). Paladins can detect evil within 60' at will and can heal up to 2hp per level per day by laying on hands. A character must be of Lawful Good alignment to be a Paladin.

Rangers

Can use light or medium armor and can use shields. They are +1 to hit and damage with ranged weapons and only incur a -1 to hit penalty when fighting with 2 weapons. They have a +3 bonus to Survival.

Illusionists

Wear no armor. They can cast Illusionist spells and gain a +2 bonus to Communication and a +1 bonus to Subterfuge. Characters must have a minimum DEX score of 13 to be Illusionists.

Druids

Wear any non-metal armor or shield. They cast Druid spells and gain +2 to Knowledge and +2 to Survival. Druids are immune to the spell-like effects of woodland fey. At 3rd level a Druid can pass without trace at will. At 7th level a Druid can assume the form of any small or medium sized animal up to 3 times per day. A Druid heals 2hp per level when changing back into his human form.

Bards

Wear light armor and can use bucklers. They gain a +2 bonus to Communication, Subterfuge, and Knowledge. A Bard can counter sound-based effects within a 30' radius. A Bard can use his song to charm person or remove fear up to 3 times (total) per day. Beginning at 6th level, a Bard casts spells as either a Druid or Illusionist (player's choice) of 5 levels lower.

Skills

Microlite20 Expert Rules adds a new, 5th skill: **Survival**.

Survival is used for things like tracking, foraging, setting or spotting snares, hunting, finding water or rare herbs, determining direction, and the like. Only *Rangers* and *Druids* are specialized with this skill.

Heroism

While *Microlite20* certainly simplifies your game by declining the use of the endless array of “Feats” available in the SRD, this can sometimes decrease *Microlite20*'s intended compatibility with some d20 adventures, with respects to power level. Heroism is intended to relieve some of that disparity.

Heroism is a bonus equal to 1 times the characters level (1 at 1st, 2 at 2nd, etc) and may be applied once per day to up to three of the following:

1. Attack Bonus
2. Damage
3. Saving Throw
4. Skill Check
5. Spell DC

Magic

Here are three ways for spell casters to add a little more variety to their repertoire. Each modifies a spell in a given way, and each doubles the casting time of the spell so modified (most spells become full round actions instead of standard actions, for example). Also, each requires an additional expenditure of hit points, added to the standard cost of the spell at the time it is cast.

Extending

Makes a spell last twice as long as it normally would. An Extended spell costs an additional 2hp.

Empowering

Makes a spell do 50% more damage than it normally would. An Empowered spell costs an additional 4hp.

Widening

Makes a spell's area of effect twice as big as it would normally be. A Widened spell costs an additional 6hp.

Spell Lists

0-Level Illusionist Spells

Arcane Mark: Inscribes a permanent personal rune (visible or invisible).

Dancing Lights: Creates torches or other lights for 1 minute.

Detect Illusion: Detects Illusions in a 60' radius for 1 minute per level.

Ghost Sound: Figment sounds for 1 round/level.

Prestidigitation: Performs minor tricks for 1 hour.

Read Magic: Read Scrolls and Spellbooks for 10/min per level.

1st-Level Illusionist Spells

Charm Person: Makes one person your friend for 1 hour per level.

Color Spray: Incapacitates creatures within a 15' cone.

Disguise Self: Changes your appearance for 10 minutes per level.

Hypnotism: Fascinates 2d4 HD of creatures for 2d4 rounds.

Silent Image: Creates minor illusion of your design.

Ventriloquism: Throws voice for 1 minute per level.

2nd-Level Illusionist Spells

Blur: Caster gains +4 to AC, cannot be Sneak Attacked for 1 minute per level.

Hideous Laughter: Subject loses actions for 1 round/level.

Hypnotic Pattern: Fascinates 2d4+level HD of creatures for concentration plus 2 rounds.

Invisibility: Subject is invisible for 1 minute/level or until it attacks.

Minor Image: As Silent Image plus some sound.

Mirror Image: Creates 1d4+1 decoys of caster for 1 minute per level.

3rd-Level Illusionist Spells

Daylight: 60' radius of daylight for 10 minute/level.

Deep Slumber: Puts 10HD of creatures to sleep for 1 minute per level.

Displacement: Attacks against the subject miss 50% of the time for 1 round/level.

Invisibility Sphere: Makes everyone within 10' invisible.

Major Image: As minor image, plus sound, smell, and thermal effects.

Suggestion: Compels subject to follow stated course of action for 1 hour/level or until completed.

4th-Level Illusionist Spells

Charm Monster: Make one monster believe it is your ally for 1 day/level.

Confusion: Subjects behave oddly for 1 round/level.

Invisibility, Greater: As invisibility, but subject can attack and stay invisible.

Minor Creation: Create one cloth or wood object.

Phantasmal Killer: Fearsome illusion kills subject or deals 3d6 damage.

Rainbow Pattern: Lights Fascinate 24HD of creatures for concentration plus 1rnd/level.

5th-Level Illusionist Spells

Break Enchantment: Frees subjects from enchantments, alterations, curses, and petrification.

Dominate Person: Controls subject telepathically for 1 day/level.

Major Creation: As minor creation, plus stone or metal.

Persistent Image: As major image, but no concentration required; 1 minute/level.

Seeming: Changes appearance of 1 person per 2 levels for 12 hours.

Sending: Delivers short message anywhere, instantly.

6th-Level Illusionist Spells

Mislead: Turns you invisible and creates illusory double.

Permanent Image: Permanent illusion with sight, sound, and smell controlled by concentration.

Programmed Image: As major image, triggered by specific event.

Shadow Walk: Step into shadow and travel rapidly; 50mph for 1 hour/level.

Suggestion, Mass: As suggestion, plus one subject per level.

True Seeing: Lets you see things as they truly are.

7th-Level Illusionist Spells

Invisibility, Mass: As invisibility, but affects all in range.

Phase Door: Creates invisible passage through wood and stone.

Power Word: Blind: Blinds creature with 200hp or less.

Prismatic Spray: 60' Cone-shaped burst of rays for variety of effects:

Project Image: Illusory double can talk and cast spells at medium range for 1 round/level.

Weird: As phantasmal killer, but affects all within 30'.

0-Level Druid Spells

Create Water: Creates 2 gallons/level of pure water.

Detect Magic: Detects spells and magic items within 60' for 1 minute per level.

Detect Poison: Detects poison in one creature or object.

Mending: Makes minor repairs on an object.

Read Magic: Read scrolls and spellbooks.

Resistance: Subject gains +1 on saving throws for 1 minute.

1st-Level Druid Spells

Entangle: Plants entangle everyone in 40' radius for 1 minute/level.

Faerie Fire: Outlines subjects with light for 1 minute/level, cancels blur, invisibility, etc.

Goodberry: 2d4 berries each cure 1 hp (max 8 hp/24 hours).

Obscuring Mist: Fog surrounds you, provides concealment for 1 minute/level

Produce Flame: 1d6 damage +1/level, touch or thrown.

Speak with Animals: You can communicate with animals for 1min/level.

2nd-Level Druid Spells

Barkskin: Grants +2 or higher bonus to AC for for 10min/level.

Gust of Wind: Blows away or knocks down smaller creatures.

Heat Metal: Makes metal so hot it damages those who touch it

Summon Swarm: Summons swarm of bats, rats, or spiders for concentration plus 2 rounds

Tree Shape: You look exactly like a tree for 1hour/level.

Warp Wood: Bends wood within 20' radius.

3rd-Level Druid Spells

Call Lightning: Calls down 3d6-damage lightning bolts from the sky once per round for 1min/level.

Protection from Energy: Absorb 12 points/level of damage from one kind of energy for 10min/level.

Speak with Plants: You can talk to normal plants and plant creatures for 1min/level.

Spike Growth: For 1hr/level, creatures in area take d4 damage per 5' movement, may be slowed.

Stone Shape: Sculpts stone into any shape.

Water Breathing: Subjects can breathe under water for 2 hours/level divided by number of subjects.

4th-Level Druid Spells

Air Walk: Subject treads on air for 10min/level

Anti-Plant Shell: Keeps animated plants at bay for 10min/level, 10' radius.

Ice Storm: Hail does 5d6 damage in cylinder 40' across

Reincarnate: Brings dead subject back in random body.

Repel Vermin: Insects, spiders, and other vermin stay 10' away for 10min/level.

Spike Stones: Creatures in area take 1d8 damage, may be slowed.

5th-Level Druid Spells

Awaken: Animal or Tree gains human intellect.

Baleful Polymorph: Transforms subject into harmless animal.

Call Lightning Storm: As call lightning, but does 5d6 per bolt.

Insect Plague: Up to 6 Locust Swarms attack creatures for 1min/level.

Transmute Rock to Mud: Transforms 2 10' cubes per level.

Wall of Fire: Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through wall deals 2d6 damage +1/level.

6th-Level Druid Spells

Fire Seeds: Creates Acorn Grenades (1d6 fire dmg/lvl divided among up to 4 seeds) that explode in a 10' radius and ignite combustibles.

LiveOak: Oak becomes treant guardian.

Move Earth: Digs trenches and builds hills, in an area up to 750' square and 10' deep.

Stone Tell: Talk to natural or worked stone for 1min/lvl.

Transport via Plants: Move instantly from one plant to another of its type anywhere.

Wall of Stone: Creates a wall of stone that can be shaped.

7th-Level Druid Spells

Changestaff: Your staff becomes a treant on command.

Control Weather: Changes weather in local area.

Earthquake: Intense tremor shakes 80' radius, collapsing ceilings, opening fissures, etc.

Finger of Death: Kills one subject.

Fire Storm: Does 1d6/lvl fire damage to 2 10' cubes per level.

Wind Walk: You and your allies turn vaporous and travel at up to 60mph for 1 hour/level.

Game Master's Guide

Disease

Diseases have various symptoms and are spread through a number of ways. Several typical diseases are summarized below.

The entries for diseases include the following information:

Name of the disease: Type, DC, incubation, damage.

Type lists the disease's method of delivery (contact, inhaled, or injury).

DC lists the phys+STR check DC needed to prevent infection.

Incubation lists the time before damage begins.

Damage lists the ability damage the character takes after incubation and each day afterward.

Cackle Fever: Inhaled, DC 16, 1 day, -1d6 MIND.

Filth Fever: Injury, DC 12, 1d3 days, -1d3 DEX and 1d3 STR.

Mindfire: Inhaled, DC 12, 1 day, -1d4 MIND.

Red Ache: Injury, DC 15, 1d3 days, -1d6 STR.

Shakes: Contact, DC 13, 1 day, -1d8 DEX.

Extreme Heat & Cold

If not wearing suitable protection, a character must make a Phys+STR check once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Falling Damage

A falling character takes 1d6 hp of damage per 10 feet fallen. If the character makes a successful Phys+DEX roll, he takes only half damage. The DC for the phys+DEX roll is equal to the depth fallen in feet.

In the event that the fall ends in an area laden with spikes or jagged rocks, add +1 hp of damage to falling damage per 10' fallen (with a maximum of +10 hp).

Poison

Characters can possibly take damage from a weapon that has been poisoned, be attacked by a creature whose natural attacks feature poison, consume poison hidden in food or drink, or be poisoned in some other way.

Several typical poisons are summarized below. The entries for poisons include the following information:

Name of the poison: Type, DC, damage, price.

Type lists the poison's method of delivery (contact, ingested, inhaled, or injury).

DC lists the phys+STR check DC needed to avoid the poison's damage.

Damage is expressed as "xdx/xdx." The first number is the initial damage, taken immediately upon failing the phys+STR check against the poison. The second number is the secondary damage, taken one minute after exposure to the poison if a second phys+STR check is failed. Ability damage is temporary unless marked with an asterisk(*), in which case the loss is permanent. Unconsciousness lasts 1d3 hours.

Price lists the cost for one dose of the poison. It can usually only be obtained through less-than-reputable sources, as the possession of poisons are commonly illegal.

Arsenic: Ingested, DC 13, -1 STR/-1d8 STR, 120 gp.

Blue Whinnis: Injury, DC 14, -1 STR/ unconsciousness, 120 gp.

Burnt Othur Fumes: Inhaled, DC 18, -1 STR*/-3d6 STR, 2,100 gp.

Deathblade: Injury, DC 20, -1d6 STR/-2d6 STR, 1,800 gp.

Insanity Mist: Inhaled, DC 15, -1d4 MIND/-2d6 MIND, 1,500 gp.

Nitharit: Contact, DC 13, 0/-3d6 STR, 650 gp. Oil of Taggit: Ingested, DC 15, 0/unconsciousness, 90 gp.

Malys Root Paste: Contact, DC 16, -1 DEX/-2d4 DEX, 500 gp.

Monstrous Scorpion (tiny): Injury, DC 12, -1 STR/-1 STR, 50 gp.

Monstrous Scorpion (small): Injury, DC 12, -1d2 STR/- 1d2 STR, 100 gp.

Monstrous Scorpion (large):

Injury, DC 14, -1d4 STR/- 1d4 STR, 200 gp.

Monstrous Scorpion (huge): Injury, DC 18, -1d6 STR/- 1d6 STR, 400 gp.

Monstrous Spider (tiny): Injury, DC 10, -1d2 STR/-1d2 STR, 85 gp.

Monstrous Spider (small): Injury, DC 10, -1d3 STR/- 1d3 STR, 125 gp.

Monstrous Spider (large): Injury, DC 13, -1d6 STR/-1d6 STR, 250 gp.

Monstrous Spider (huge): Injury, DC 16, -1d8 STR/-1d8 STR, 500 gp.

Sassone Leaf Residue: Contact, DC 16, -2d12 hp/-1d8 STR, 300 gp.

Sleep Poison: Injury, DC 13, unconsciousness/ unconsciousness for 2d4 hours, 75 gp.

Snake (medium viper): Injury, DC 11, -1d6 STR/-1d6 STR, 120 gp.

Snake (large viper): Injury, DC 11, -1d6 STR/-1d6 STR, 120 gp.

Snake (huge viper): Injury, DC 14, -1d6 STR/-1d6 STR, 250 gp.

Wyvern: Injury, DC 17, -2d6 STR/-2d6 STR, 3,000 gp.

Traps

Whether inside a dungeon or a nobleman's manor house, adventurers can often be hurt, or even killed, without ever encountering a monster of any kind, as many dungeons are filled with debilitating or lethal traps set to keep wayward hands off of fantastic treasures. Several typical traps of varying *Encounter Levels* are summarized below.

The entries for traps include the following information:

Type of trap: Attack (damage), Save DC, Search DC, Disable DC.

Type lists the trap used and the effect it has.

Attack shows the traps attack bonus or type of effect.

Damage shows the amount and type of damage the trap deals.

Save DC lists the phys+DEX check DC needed to either avoid the trap entirely, or to take only ½ the listed damage (if this is possible).

Search DC lists the DC for the know+MIND check necessary to find the trap without triggering it.

Disable DC lists the DC for the sub+DEX check necessary to disarm the trap safely.

EL1 Traps

Basic Arrow Trap: Atk +10 (1d6, arrow); Search know+MIND DC 20, Disable sub+DEX DC 20.

Camouflaged Pit Trap: 10 ft. deep (1d6, fall); Save DC 15 to avoid; Search DC 24, Disable DC 20.

Poison Dart Trap: Atk +8 (1d4 plus poison, dart); Search DC 20, Disable DC 18.

EL2 Traps

Burning Hands Trap: spell effect (1d4, fire); Save DC 11 for ½ damage; Search DC 26, Disable DC 26.

Large Net Trap: Atk +5 (—); Save DC 14 to avoid; Search DC 20, Disable DC 25.

Pit Trap: 40 ft. deep (4d6, fall); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL3 Traps

Fire Trap: spell effect (1d4+3, fire); Save DC 13 for ½ damage; Search DC 27, Disable DC 27.

Pit Trap: 60 ft. deep (6d6, fall); Save DC 20 to avoid; Search DC 20, Disable DC 20.

Poisoned Arrow Trap: Atk +12 (1d8 plus poison, arrow); Search DC 19, Disable DC 15.

EL4 Traps

Lightning Bolt Trap: spell effect (5d6, electricity); Save DC 14 for ½ damage; Search DC 28, Disable DC 28.

Spiked Pit Trap: 60 ft. deep (6d6, fall), Atk +10 (1d4 each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

Wall Scythe Trap: Atk +20 (2d4+8, scythe); Search DC 21, Disable DC 18.

EL5 Traps

Falling Block Trap: Atk +15 (6d6, slam); Search DC 25, Disable DC 17.

Fireball Trap: spell effect (1d4+7, fire); Save DC 16 for ½ damage; Search DC 29, Disable DC 29.

Poisoned Wall Spikes: Atk +16 (1d8+4 plus poison, spikes); Search DC 17, Disable DC 21.

EL6 Traps

Compacting Room Trap: walls move together (12d6, crush); Search DC 20, Disable DC 22.

Lightning Bolt Trap: spell effect (10d6, electricity); Save DC 14 for ½ damage; Search DC 28, Disable DC 28.

Spiked Pit Trap: 100 ft. deep (10d6, fall), Atk +10 (1d4+5 each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL7 Traps

Black Tentacles Trap: spell effect (tentacles) Atk +7 (1d6+4 each, 1d4+7 tentacles); Search DC 29, Disable DC 29.

Chain Lightning Trap: spell effect (11d6 to nearest target +5d6 each to up to 11 secondary targets, electricity); Save DC 19 for ½ damage; Search DC 31, Disable DC 31.

Well-camouflaged Pit Trap: 70 ft. deep (7d6, fall); Save DC 25 to avoid; Search DC 27, Disable DC 18.

EL8 Traps

Destruction Trap: spell effect (death); Save DC 20 (phys+STR) for 10d6 damage; Search DC 32, Disable DC 32.

Power Word Stun Trap: spell effect (stun 2d4 rounds); Search DC 32, Disable DC 32.

Well-camouflaged Pit Trap: 100 ft. deep (10d6, fall); Save DC 20 to avoid; Search DC 27, Disable DC 18.

EL9 Traps

Dropping Ceiling: ceiling moves down (12d6, crush); Search DC 20, Disable DC 16.

Incendiary Cloud Trap: spell effect (4d6/round for 15 rounds, fire); Save DC 22 for ½ damage; Search DC 33, Disable DC 33.

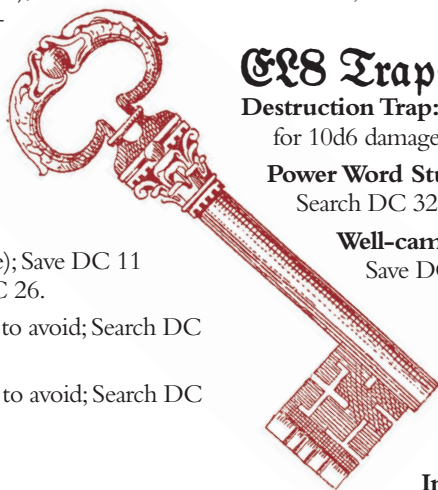

Wide-mouthed Spiked Pit with Poisoned Spikes: 70 ft. deep (7d6, fall), Atk +10 (1d4+5 plus poison each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL10 Traps

Crushing Room: walls move together (16d6, crush); Search DC 22, Disable DC 20.

Crushing Wall Trap: Atk automatic (18d6, crush); Search DC 20, Disable DC 25.

Energy Drain Trap: Atk +8 (2d4 negative levels for 24 hours); Save DC 23 to avoid; Search DC 34, Disable DC 34.

When in Doubt... Remember

Whenever the players want to try something that goes around, through, or above and beyond the rules as written, you can always use the "GM's Friend"...the 50% chance.

Have them roll whatever check seems most appropriate. A roll of 1-10 is a failure, a roll of 11-20 is a success. If you feel that the situation warrants that you favor them, assign a +2 bonus to their roll. If the situation determines that they be hindered, then assign a -2 penalty.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

15. COPYRIGHT NOTICE Open Game License v 1.0 Copyright 2000, Wizards of the Coast, Inc. System Reference Document Copyright 2000-2003, Wizards of the Coast, Inc.; Authors Jonathan Tweet, Monte Cook, Skip Williams, Rich Baker, Andy Collins, David Noonan, Rich Redman, Bruce R. Cordell, John D. Rateliff, Thomas Reid, James Wyatt, based on original material by E. Gary Gygax and Dave Arneson. Microlite20 © 2006, Robin V. Stacey (robin@greywolf.net)

This product is 100% Open Game Content except for Product Identity, as per the Open Game License above. Product Identity includes Microlite20 and Robin V. Stacey, Darrell King and Al Krombach.

Section 2:

Microlite20: Rules & Variants

This section includes the basic Microlite20 rules and many rules variants designed to work with those basic rules, although not necessarily all the variants at once. This section gives you the basic rules and many options you can use to build the light D20-based rules system you need for your campaign.

MICROLITE20

This is a trimmed-down, subminiature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD (monsters, spells, adventures and equipment) could be used without conversion.

Stats

There are 3 stats : Strength (STR), Dexterity (DEX) and Mind (MIND).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

Humans get +1 to all skill rolls

Elves get +2 MIND

Dwarves get +2 STR

Halflings get +2 DEX

Classes

The classes are Fighter, Rogue, Mage, Cleric. Characters begin at Level 1.

Fighters wear any kind of armour and use shields. They have a +3 bonus to Physical and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on

Rogues can use light armour. They have a +3 bonus to Subterfuge. If they successfully Sneak (usually sub+DEX, but depends on situation) up on a foe they can add their Subterfuge skill rank to the damage of their first attack

Magi wear no armour. They can cast arcane spells, and gain a +3 bonus to Knowledge

Clerics can wear light or medium armour. They cast divine spells and gain +3 bonus to Communication. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Skills

There are just 4 skills : Physical, Subterfuge, Knowledge and Communication. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level + any bonus due to your class or race.
Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Note that there are no "saving throws" in this game; use Physical + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all arcane spells in the SRD spell list.

Casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast:

Spell Level	0	1	2	3	4	5	6	7	8	9
HP Cost	1	3	5	7	9	11	13	15	17	19

This loss **cannot** be healed normally but is recovered after 8 hours rest. There is no need to memorize spells in advance.

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character. Select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) for all spells is
10 + Caster Level + Caster's MIND bonus

Combat

Hit Points = STR Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc.

Melee attack bonus = STR bonus + Level

Missile attack bonus = DEX bonus + Level

Magic attack bonus = MIND bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's Armour Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage.

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

Add STR bonus to Melee damage, x2 for 2-handed weapons.
Armour Class (AC) = 10 + DEX bonus + Armour bonus.

Other Hazards

Falling : 1d6 damage per 10', half damage on Phys+DEX save.
DC=depth fallen in feet

Spikes : add +1 point to falling damage per 10' fallen, max +10
Poison : Phys+STR save to avoid or for half, depending on poison.
Effect varies with poison type.

Extreme Heat & Cold : If not wearing suitable protection, Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Level Advancement

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds:
+1d6 to Hit Points
+1 to all attack rolls
+1 to all skills

If the level divides by three (i.e. level 3,6,9,etc.) add 1 point to STR, DEX or MIND.

Fighters gain +1 to their attack and damage rolls at levels 5,10,15,etc.

Clerics and Magi gain access to new spell levels at levels 3,5,7,9,etc.

Example

The 1st level adventurers have just completed a dungeon adventure, and defeated 5 EL1 encounters, an EL2 trap and the EL3 leader. That's a total of EL10, so they all advance to level 2. They need to defeat another 20 Encounter Levels to reach Level 3.

Monsters

Name	Hit Dice	Armour Class	Attack
Animal (small) eg Badger	HD 1d8+2 (6 hp)	AC 15	Claw +4 (1d2-1)
Ankheg	HD 3d10+12 (28 hp)	AC 18	Bite +7 (2d6+7 plus 1d4 acid)
Bugbear	HD 3d8+3 (16 hp)	AC 17	Morningstar +5 (1d8+2) or javelin +3 (1d6+2)
Choker	HD 3d8+3 (16 hp)	AC 17	Tentacle +6 (1d3+3)
Deinonychous (Raptor)	HD 4d8+16 (34 hp)	AC 16	Talons +6 (2d6+4)
Dire Rat	HD 1d8+1 (5 hp)	AC 15	Bite +4 (1d4 plus disease)
Dragon (young Red)	HD 13d12+39 (123 hp)	AC 21	Bite +20 (2d6+7) or breath 10d10 DC24 phys+DEX to dodge for half
Dwarf	HD 1d8+2 (6 hp)	AC 16	Waraxe +3 (1d10+1) or shortbow +1 (1d6)
Earth Elemental (large)	HD 8d8+32 (68 hp)	AC 18	Slam +12 (2d8+7)
Elf	HD 1d8 (4 hp)	AC 15	Longsword +2 (1d8+1) or longbow +3 (1d8)
Gargoyle	HD 4d8+19 (37 hp)	AC 16	Claw +6 (1d4+2)
Goblin	HD 1d8+1 (5 hp)	AC 15	Morningstar +2 (1d6) or javelin +3 (1d4)
Griffon	HD 7d10+21 (59 hp)	AC 17	Bite +11 (2d6+4)
Halfling	HD 1d8+1 (5 hp)	AC 16	Shortsword +3 (1d6) or light crossbow +3 (1d6)
Hellhound	HD 4d8+4 (22 hp)	AC 16	Bite +5 (1d8+1 plus 1d6 fire)
Hill Giant	HD 12d8+48 (102 hp)	AC 20	Greatclub +16 (2d8+10) or rock +8 (2d6+7)
Hobgoblin	HD 1d8+2 (6 hp)	AC 15	Longsword +2 (1d8+1) or javelin +2 (1d6+1)
Human Commoner	HD 1d8+1 (5 hp)	AC 12	Dagger +1 (1d6+1) or sling +1 (1d4)
Insect (small) eg Spider	HD 1d8 (4 hp)	AC 14	Bite +4 (1d4-2 plus poison)
Kobold	HD 1d8 (4 hp)	AC 15	Spear +1 (1d6-1) or sling +3 (1d3)
Ogre	HD 4d8+11 (29 hp)	AC 16	Greatclub +8 (2d8+7) or javelin +1 (1d8+5)
Orc	HD 1d8+1 (5 hp)	AC 13	Falchion +4 (2d4+4) or javelin +1 (1d6+3)
Owlbear	HD 5d10+25 (52 hp)	AC 15	Claw +9 (1d6+5)
Rust Monster	HD 5d8+5 (27 hp)	AC 18	Antennae touch +3 (rust)
Shadow	HD 3d12 (19 hp)	AC 13	Incorporeal touch +3 (1d6 Str)
Skeleton Warrior	HD 1d12 (6 hp)	AC 15	Scimitar +1 (1d6+1) or claw +1 melee (1d4+1)
Stirge	HD 1d10 (5 hp)	AC 16	Touch +7 (attach)
Stone Golem	HD 14d10+30 (107 hp)	AC 26	Slam +18 (2d10+9)
Troll	HD 6d8+36 (63 hp)	AC 16	Claw +9 (1d6+6)
Werewolf (hybrid form)	HD 3d8+7 (20 hp)	AC 16	Claw +4 (1d4+2)
Wight	HD 4d12 (26 hp)	AC 15	Slam +3 (1d4+1 plus energy drain)
Wolf	HD 2d8+4 (13 hp)	AC 14	Bite +3 (1d6+1)
Wyvern	HD 7d12+14 (59 hp)	AC 18	Sting +10 (1d6+4 plus poison) or Talon +10 (2d6+4) or Bite +10 (2d8+4)
Zombie	HD 2d12+3 (16 hp)	AC 11	Slam +2 (1d6+1) or club +2 (1d6+1)

Skills: All creatures have a bonus to all skills equal to their number of Hit Dice. If the creature is intelligent, add +3 to one skill. Add stat bonuses to suit and as logic dictates. This is intentionally kept open – if you need a sneaky bugbear, assign the +3 bonus to Subterfuge; if a warrior, give +3 to Physical; for a spell-caster assign the +3 to Knowledge or Communication and give levels of Mage or Cleric (see below).

Monster Advancement: To make a tougher monster, add more Hit Dice; each additional HD adds one to their skill and combat bonuses. For each doubling of the Hit Dice, increase the dice size for attacks (ie, d4->d6, d6->d8, etc).

Alternatively, add class levels to intelligent monsters. Start with the base Hit Dice and add levels of Fighter, Rogue, Mage or Cleric as required.

Create your own: Assign Hit Dice (d8 for most things, d12 for Dragons and Undead). Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter, +3 bonus to one skill. Add stat bonuses to suit.

Sample Characters**Morris, Human Rogue-1**

STR 12 (+1), DEX 15 (+2), MIND 12 (+1)
hp 13, AC 15 (Studded Leather), Paired Shortswords, +0/+0, d6+1
Subterfuge +5, all others @ +2

Kendrick, Dwarf Fighter-1

STR 16 (+3), DEX 13 (+1), MIND 11 (+0)
hp 17, AC 17 (Chainmail + shield), Longsword +5, d8+4
Physical +4, all others @ +1

Cholmer, Elven Mage-1

STR 12 (+1), DEX 13 (+1), MIND 16 (+3)
hp 13, AC 11 (Robes), Quarterstaff +2, d6+1
Knowledge +4, all others @ +1
Spells: All 0 and 1st level arcane spells.

Barnabas, Halfling Cleric-1

STR 10 (+0), DEX 16 (+3), MIND 13 (+1)
hp 11, AC 18 (Chainmail), Morningstar +1, d8
Communication +4, all others @ +1
Spells: All 0 and 1st level divine spells.

GAME MASTER'S GUIDE

DISEASE

Diseases have various symptoms and are spread through a number of ways. Several typical diseases are summarized below.

The entries for diseases include the following information:

Name of the disease: Type, DC, incubation, damage.

Type lists the disease's method of delivery (contact, inhaled, or injury). *DC* lists the phys+STR check DC needed to prevent infection. *Incubation* lists the time before damage begins. *Damage* lists the ability damage the character takes after incubation and each day afterward.

Cackle Fever: Inhaled, DC 16, 1 day, -1d6 MIND.

Filth Fever: Injury, DC 12, 1d3 days, -1d3 DEX and 1d3 STR.

Mindfire: Inhaled, DC 12, 1 day, -1d4 MIND.

Red Ache: Injury, DC 15, 1d3 days, -1d6 STR.

Shakes: Contact, DC 13, 1 day, -1d8 DEX.

EXTREME HEAT & COLD

If not wearing suitable protection, a character must make a Phys+STR check once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

FALLING DAMAGE

A falling character takes 1d6 hp of damage per 10 feet fallen. If the character makes a successful Phys+DEX roll, he takes only half damage. The DC for the phys+DEX roll is equal to the depth fallen in feet.

In the event that the fall ends in an area laden with spikes or jagged rocks, add +1 hp of damage to falling damage per 10' fallen (with a maximum of +10 hp).

POISON

Characters can possibly take damage from a weapon that has been poisoned, be attacked by a creature whose natural attacks feature poison, consume poison hidden in food or drink, or be poisoned in some other way. Several typical poisons are summarized below.

The entries for poisons include the following information:

Name of the poison: Type, DC, damage, price.

Type lists the poison's method of delivery (contact, ingested, inhaled, or injury). *DC* lists the phys+STR check DC needed to avoid the poison's damage. *Damage* is expressed as "xdx/xdx." The first number is the *initial damage*, taken immediately upon failing the

phys+STR check against the poison. The second number is the *secondary damage*, taken one minute after exposure to the poison if a second phys+STR check is failed. Ability damage is temporary unless marked with an asterisk(*), in which case the loss is permanent. Unconsciousness lasts 1d3 hours. Price lists the cost for one dose of the poison. It can usually only be obtained through less-than-reputable sources, as the possession of poisons are commonly illegal.

Arsenic: Ingested, DC 13, -1 STR/-1d8 STR, 120 gp.

Blue Whinnis: Injury, DC 14, -1 STR/unconsciousness, 120 gp.

Burnt Othur Fumes: Inhaled, DC 18, -1 STR*/-3d6 STR, 2,100 gp.

Deathblade: Injury, DC 20, -1d6 STR/-2d6 STR, 1,800 gp.

Insanity Mist: Inhaled, DC 15, -1d4 MIND/-2d6 MIND, 1,500 gp.

Nitharit: Contact, DC 13, 0/-3d6 STR, 650 gp.

Oil of Taggit: Ingested, DC 15, 0/unconsciousness, 90 gp.

Malys Root Paste: Contact, DC 16, -1 DEX/-2d4 DEX, 500 gp.

Monstrous Scorpion (tiny): Injury, DC 12, -1 STR/-1 STR, 50 gp.

Monstrous Scorpion (small): Injury, DC 12, -1d2 STR/-1d2 STR, 100 gp.

Monstrous Scorpion (large): Injury, DC 14, -1d4 STR/-1d4 STR, 200 gp.

Monstrous Scorpion (huge): Injury, DC 18, -1d6 STR/-1d6 STR, 400 gp.

Monstrous Spider (tiny): Injury, DC 10, -1d2 STR/-1d2 STR, 85 gp.

Monstrous Spider (small): Injury, DC 10, -1d3 STR/-1d3 STR, 125 gp.

Monstrous Spider (large): Injury, DC 13, -1d6 STR/-1d6 STR, 250 gp.

Monstrous Spider (huge): Injury, DC 16, -1d8 STR/-1d8 STR, 500 gp.

Sassone Leaf Residue: Contact, DC 16, -2d12 hp/-1d8 STR, 300 gp.

Sleep Poison: Injury, DC 13, unconsciousness/unconsciousness for 2d4 hours, 75 gp.

Snake (medium viper): Injury, DC 11, -1d6 STR/-1d6 STR, 120 gp.

Snake (large viper): Injury, DC 11, -1d6 STR/-1d6 STR, 120 gp.

Snake (huge viper): Injury, DC 14, -1d6 STR/-1d6 STR, 250 gp.

Wyvern: Injury, DC 17, -2d6 STR/-2d6 STR, 3,000 gp.

TRAPS

Whether inside a dungeon or a nobleman's manor house, adventurers can often be hurt, or even killed, without ever encountering a monster of any kind, as many dungeons are filled with debilitating or lethal traps set to keep wayward hands off of fantastic treasures. Several typical traps of varying Encounter Levels are summarized below.

The entries for traps include the following information:

Type of trap: Attack (damage), Save DC, Search DC, Disable DC.

Type lists the trap used and the effect it has. **Attack** shows the traps attack bonus or type of effect. **Damage** shows the amount and type of damage the trap deals. **Save DC** lists the phys+DEX check DC needed to either avoid the trap entirely, or to take only ½ the listed damage (if this is possible). **Search DC** lists the DC for the know+MIND check necessary to find the trap without triggering it. **Disable DC** lists the DC for the sub+DEX check necessary to disarm the trap safely.

EL1 Traps

Basic Arrow Trap: Atk +10 (1d6, arrow); Search know+MIND DC 20, Disable sub+DEX DC 20.

Camouflaged Pit Trap: 10 ft. deep (1d6, fall); Save DC 15 to avoid; Search DC 24, Disable DC 20.

Poison Dart Trap: Atk +8 (1d4 plus poison, dart); Search DC 20, Disable DC 18.

EL2 Traps

Burning Hands Trap: spell effect (1d4, fire); Save DC 11 for ½ damage; Search DC 26, Disable DC 26.

Large Net Trap: Atk +5 (—); Save DC 14 to avoid; Search DC 20, Disable DC 25.

Pit Trap: 40 ft. deep (4d6, fall); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL3 Traps

Fire Trap: spell effect (1d4+3, fire); Save DC 13 for ½ damage; Search DC 27, Disable DC 27.

Pit Trap: 60 ft. deep (6d6, fall); Save DC 20 to avoid; Search DC 20, Disable DC 20.

Poisoned Arrow Trap: Atk +12 (1d8 plus poison, arrow); Search DC 19, Disable DC 15.

EL4 Traps

Lightning Bolt Trap: spell effect (5d6, electricity); Save DC 14 for ½ damage; Search DC 28, Disable DC 28.

Spiked Pit Trap: 60 ft. deep (6d6, fall), Atk +10 (1d4 each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

Wall Scythe Trap: Atk +20 (2d4+8, scythe); Search DC 21, Disable DC 18.

EL5 Traps

Falling Block Trap: Atk +15 (6d6, slam); Search DC 25, Disable DC 17.

Fireball Trap: spell effect (1d4+7, fire); Save DC 16 for ½ damage; Search DC 29, Disable DC 29.

Poisoned Wall Spikes: Atk +16 (1d8+4 plus poison, spikes); Search DC 17, Disable DC 21.

EL6 Traps

Compacting Room Trap: walls move together (12d6, crush); Search DC 20, Disable DC 22.

Lightning Bolt Trap: spell effect (10d6, electricity); Save DC 14 for ½ damage; Search DC 28, Disable DC 28.

Spiked Pit Trap: 100 ft. deep (10d6, fall), Atk +10 (1d4+5 each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL7 Traps

Black Tentacles Trap: spell effect (tentacles) Atk +7 (1d6+4 each, 1d4+7 tentacles); Search DC 29, Disable DC 29.

Chain Lightning Trap: spell effect (11d6 to nearest target +5d6 each to up to 11 secondary targets, electricity); Save DC 19 for ½ damage; Search DC 31, Disable DC 31.

Well-camouflaged Pit Trap: 70 ft. deep (7d6, fall); Save DC 25 to avoid; Search DC 27, Disable DC 18.

EL8 Traps

Destruction Trap: spell effect (death); Save DC 20 (phys+STR) for 10d6 damage; Search DC 32, Disable DC 32.

Power Word Stun Trap: spell effect (stun 2d4 rounds); Search DC 32, Disable DC 32.

Well-camouflaged Pit Trap: 100 ft. deep (10d6, fall); Save DC 20 to avoid; Search DC 27, Disable DC 18.

EL9 Traps

Dropping Ceiling: ceiling moves down (12d6, crush); Search DC 20, Disable DC 16.

Incendiary Cloud Trap: spell effect (4d6/round for 15 rounds, fire); Save DC 22 for ½ damage; Search DC 33, Disable DC 33.

Wide-mouthed Spiked Pit with Poisoned Spikes: 70 ft. deep (7d6, fall), Atk +10 (1d4+5 plus poison each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL10 Traps

Crushing Room: walls move together (16d6, crush); Search DC 22, Disable DC 20.

Crushing Wall Trap: Atk automatic (18d6, crush); Search DC 20, Disable DC 25.

Energy Drain Trap: Atk +8 (2d4 negative levels for 24 hours); Save DC 23 to avoid; Search DC 34, Disable DC 34.

WHEN IN DOUBT...REMEMBER

Whenever the players want to try something that goes around, through, or above and beyond the rules as written, you can always use the "GM's Friend"...the 50% chance.

Have them roll whatever check seems most appropriate. A roll of 1-10 is a failure, a roll of 11-20 is a success. If you feel that the situation warrants that you favor them, assign a +2 bonus to their roll. If the situation determines that they be hindered, then assign a -2 penalty.

1. Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; (d) "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product Identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

Microlite20 Expert Rules

This rule-set allows for introducing a few more options to your Microlite20 game, without necessarily increasing its complexity. Included are: a new skill, new races, new classes, and some other (hopefully) good stuff. It is not necessary to use **Microlite20 Expert Rules** in its entirety; DMs are encouraged to “cherry pick” those specific items applicable to their own campaign. Requires the use of **Microlite20**.

Races

Gnomes get +1 to DEX, +1 to MIND

Half-orcs get +4 to STR, -2 to MIND

Half-elves get +1 to DEX, and +1 to any 2 Skills

Lizardmen get +2 to STR, +2 to Dex, -2 to MIND

Classes

Paladins wear any kind of armor and use shields. They have a +1 bonus to Physical and a +2 bonus to Communication. They are immune to diseases and apply a +1 bonus to all saving throws (this increases by +1 at 5th level and every 5 levels on). Paladins can *detect evil* within 60' at will and can heal up to 2hp per level per day by *laying on hands*. A character must be of Lawful Good alignment to be a Paladin.

Rangers can use light or medium armor and can use shields. They are +1 to hit and damage with ranged weapons and only incur a -1 to hit penalty when fighting with 2 weapons. They have a +3 bonus to Survival.

Illusionists wear no armor. They can cast Illusionist spells and gain a +2 bonus to Communication and a +1 bonus to Subterfuge. Characters must have a minimum DEX score of 13 to be Illusionists.

Druids wear any non-metal armor or shield. They cast Druid spells and gain +2 to Knowledge and +2 to Survival. Druids are immune to the spell-like effects of woodland fey. At 3rd level a Druid can *pass without trace* at will. At 7th level a Druid can assume the form of any small or medium sized animal up to 3 times per day. A Druid heals 2hp per level when changing back into his human form.

Bards wear light armor and can use bucklers. They gain a +2 bonus to Communication, Subterfuge, and Knowledge. A Bard can counter sound-based effects within a 30' radius. A Bard can use his song to *charm person* or *remove fear* up to 3 times (total) per day. Beginning at 6th level, a Bard casts spells as either a Druid or Illusionist (player's choice) of 5 levels lower.

Skills

Microlite20 Expert Rules adds a new, 5th skill: **Survival**. **Survival** is used for things like tracking, foraging, setting or spotting snares, hunting, finding water or rare herbs, determining direction, and the like. Only Rangers and Druids are specialized with this skill.

Heroism

While Microlite20 certainly simplifies your game by declining the use of the endless array of “Feats” available in the SRD, this can sometimes decrease Microlite20's intended compatibility with some d20 adventures, with respects to power level. **Heroism** is intended to relieve some of that disparity.

Heroism is a bonus equal to 1 times the characters level (1 at 1st, 2 at 2nd, etc) and may be applied once per day to up to three of the following:

1. Attack Bonus
2. Damage
3. Saving Throw
4. Skill Check
5. Spell DC

Magic

Here are three ways for spell casters to add a little more variety to their repertoire. Each modifies a spell in a given way, and each doubles the casting time of the spell so modified (most spells become full round actions instead of standard actions, for example). Also, each requires an additional expenditure of hit points, added to the standard cost of the spell at the time it is cast.

Extending makes a spell last twice as long as it normally would. An **Extended** spell costs an additional 2hp.

Empowering makes a spell do 50% more damage than it normally would. An **Empowered** spell costs an additional 4hp.

Widening makes a spell's area of effect twice as big as it would normally be. A **Widened** spell costs an additional 6hp.

More To Come...

Keep an eye out for the forthcoming **Microlite20 Unearthed**, which features two new races (Half-ogres and Pixies), four new classes (Cavalier, Barbarian, Monk, and Sorcerer) and more!

Microlite20 Expert Rules is by Al Krombach aka Grimstaff!

Microlite20 Illusionist Spells

0-Level Illusionist Spells

Arcane Mark: Inscribes a permanent personal rune (visible or invisible).

Dancing Lights: Creates torches or other lights for 1 minute.

Detect Illusion: Detects Illusions in a 60' radius for 1 minute per level.

Ghost Sound: Figment sounds for 1 round/level.

Prestidigitation: Performs minor tricks for 1 hour.

Read Magic: Read Scrolls and Spellbooks for 10/min per level.

1st-Level:

Charm Person: Makes one person your friend for 1 hour per level.

Color Spray: Incapacitates creatures within a 15' cone.

Disguise Self: Changes your appearance for 10 minutes per level.

Hypnotism: Fascinates 2d4 HD of creatures for 2d4 rounds.

Silent Image: Creates minor illusion of your design.

Ventriloquism: Throws voice for 1 minute per level.

2nd-Level:

Blur: Caster gains +4 to AC, cannot be Sneak Attacked for 1 minute per level.

Hideous Laughter: Subject loses actions for 1 round/level.

Hypnotic Pattern: Fascinates 2d4+level HD of creatures for concentration plus 2 rounds.

Invisibility: Subject is invisible for 1 minute/level or until it attacks.

Minor Image: As *Silent Image* plus some sound.

Mirror Image: Creates 1d4+1 decoys of caster for 1 minute per level.

3rd Level:

Daylight: 60' radius of daylight for 10 minute/level.

Deep Slumber: Puts 10HD of creatures to sleep for 1 minute per level.

Displacement: Attacks against the subject miss 50% of the time for 1 round/level.

Invisibility Sphere: Makes everyone within 10' invisible.

Major Image: As *minor image*, plus sound, smell, and thermal effects.

Suggestion: Compels subject to follow stated course of action for 1 hour/level or until completed.

4th Level:

Charm Monster: Make one monster believe it is your ally for 1 day/level.

Confusion: Subjects behave oddly for 1 round/level.

Invisibility, Greater: As invisibility, but subject can attack and stay invisible.

Minor Creation: Create one cloth or wood object.

Phantasmal Killer: Fearsome illusion kills subject or deals 3d6 damage.

Rainbow Pattern: Lights Fascinate 24HD of creatures for concentration plus 1rnd/level.

5th Level Spells

Break Enchantment: Frees subjects from enchantments, alterations, curses, and petrification.

Dominate Person: Controls subject telepathically for 1 day/level.

Major Creation: As *minor creation*, plus stone or metal.

Persistent Image: As *major image*, but no concentration required; 1 minute/level.

Seeming: Changes appearance of 1 person per 2 levels for 12 hours.

Sending: Delivers short message anywhere, instantly.

6th Level Spells

Mislead: Turns you invisible and creates illusory double.

Permanent Image: Permanent illusion with sight, sound, and smell controlled by concentration.

Programmed Image: As *major image*, triggered by specific event.

Shadow Walk: Step into shadow and travel rapidly; 50mph for 1 hour/level.

Suggestion, Mass: As *suggestion*, plus one subject per level.

True Seeing: Lets you see things as they truly are.

7th Level Spells

Invisibility, Mass: As *invisibility*, but affects all in range.

Phase Door: Creates invisible passage through wood and stone.

Power Word: Blind: Blinds creature with 200hp or less.

Prismatic Spray: 60' Cone-shaped burst of rays for variety of effects:

Project Image: Illusory double can talk and cast spells at medium range for 1 round/level.

Weird: As *phantasmal killer*, but affects all within 30'.

Microlite20 Druid Spells

0-Level Druid Spells

Create Water: Creates 2 gallons/level of pure water.
Detect Magic: Detects spells and magic items within 60' for 1 minute per level.
Detect Poison: Detects poison in one creature or object.
Mending: Makes minor repairs on an object.
Read Magic: Read scrolls and spellbooks.
Resistance: Subject gains +1 on saving throws for 1 minute.

1st Level Druid Spells

Entangle: Plants entangle everyone in 40' radius for 1 minute/level.
Faerie Fire: Outlines subjects with light for 1 minute/level, cancels *blur*, *invisibility*, etc.
Goodberry: 2d4 berries each cure 1 hp (max 8 hp/24 hours).
Obscuring Mist: Fog surrounds you, provides concealment for 1 minute/level
Produce Flame: 1d6 damage +1/level, touch or thrown.
Speak with Animals: You can communicate with animals for 1min/level.

2nd Level Druid Spells

Barkskin: Grants +2 or higher bonus to AC for 10min/level.
Gust of Wind: Blows away or knocks down smaller creatures.
Heat Metal: Makes metal so hot it damages those who touch it
Summon Swarm: Summons swarm of bats, rats, or spiders for concentration plus 2 rounds
Tree Shape: You look exactly like a tree for 1hour/level.
Warp Wood: Bends wood within 20' radius.

3rd Level Druid Spells

Call Lightning: Calls down 3d6-damage lightning bolts from the sky once per round for 1min/level.
Protection from Energy: Absorb 12 points/level of damage from one kind of energy for 10min/level.
Speak with Plants: You can talk to normal plants and plant creatures for 1min/level.
Spike Growth: For 1hr/level, creatures in area take d4 damage per 5' movement, may be slowed.
Stone Shape: Sculpt stone into any shape.
Water Breathing: Subjects can breath under water for 2hours/level divided by number of subjects.

4th Level Druid Spells

Air Walk: Subject treads on air for 10min/level

Anti-Plant Shell: Keeps animated plants at bay for 10min/level, 10' radius.

Ice Storm: Hail does 5d6 damage in cylinder 40' across

Reincarnate: Brings dead subject back in random body.

Repel Vermin: Insects, spiders, and other vermin stay 10' away for 10min/level.

Spike Stones: Creatures in area take 1d8 damage, may be slowed.

5th Level Druid Spells

Awaken: Animal or Tree gains human intellect.
Baleful Polymorph: Transforms subject into harmless animal.
Call Lightning Storm: As *call lightning*, but does 5d6 per bolt.
Insect Plague: Up to 6 Locust Swarms attack creatures for 1min/level.
Transmute Rock to Mud: Transforms 2 10' cubes per level.
Wall of Fire: Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through wall deals 2d6 damage +1/level.

6th Level Druid Spells

Fire Seeds: Creates Acorn Grenades (1d6 fire dmg/lvl divided among up to 4 seeds) that explode in a 10' radius and ignite combustibles.
LiveOak: Oak becomes Treant guardian.
Move Earth: Digs trenches and builds hills, in an area up to 750' square and 10' deep.
Stone Tell: Talk to natural or worked stone for 1min/lvl.
Transport via Plants: Move instantly from one plant to another of its type anywhere.
Wall of Stone: Creates a wall of stone that can be shaped.

7th Level Druid Spells

Changestaff: Your staff becomes a treant on command.
Control Weather: Changes weather in local area.
Earthquake: Intense tremor shakes 80' radius, collapsing ceilings, opening fissures, etc.
Finger of Death: Kills one subject.
Fire Storm: Does 1d6/lvl fire damage to 2 10' cubes per level.
Wind Walk: You and your allies turn vaporous and travel at up to 60mph for 1 hour/level.

Microlite20 Equipment List

STARTING WEALTH

The most common coin is the gold piece (gp). A gold piece is worth 10 silver pieces. Each silver piece is worth 10 copper pieces (cp). In addition to copper, silver, and gold coins, there are also platinum pieces (pp), which are each worth 10 gp.

Exchange	cp	sp	gp	pp
Copper piece	1	1/10	1/100	1/1,000
Silver piece	10	1	1/10	1/100
Gold piece	100	10	1	1/10
Platinum piece	1,000	100	10	1

You begin with a certain amount of acquired wealth, determined by your character class.

Class	Amount
Fighter	150 gp
Rogue	125 gp
Mage	75 gp
Cleric	120 gp

The character uses this accumulated wealth to purchase his initial weapons, armour, and adventuring equipment, using the price lists on the tables below.

WEAPONS

Here is the format for weapon entries (given as column headings on the table below).

Cost: This value is the price for purchasing the weapon. The cost includes miscellaneous gear that goes with the weapon.

Damage: The Damage column gives the damage dealt by the weapon on a successful hit.

Range Increment: Any attack at less than this distance is not penalized for range. However, each full range increment imposes a cumulative -2 penalty on the attack roll. A thrown weapon has a maximum range of five range increments. A projectile weapon can shoot out to ten range increments.

Weapon	Cost	Damage	Range
Unarmed Strike	—	1d3	—
<i>Light Weapons</i>			
Axe, throwing	8 gp	1d6	10 ft.
Dagger	2 gp	1d4	10 ft.
Hammer, light	1 gp	1d6	20 ft.
Handaxe	6 gp	1d4	—
Mace, light	5 gp	1d6	—
Pick, light	4 gp	1d4	—

Pick, heavy	8 gp	1d6	—
Rapier	20 gp	1d6	—
Scimitar	15 gp	1d6	—
Shortspear	1 gp	1d6	20 ft.
Sword, bastard	35 gp	1d10	—
Trident	15 gp	1d8	10 ft.
Waraxe, dwarven	30 gp	1d10	—
Warhammer	12 gp	1d8	—
Whip	1 gp	1d3	—

Two-Handed Weapons

Chain, spiked	25 gp	2d4	—
Falchion	75 gp	1d6	—
Flail, heavy	15 gp	1d8	—
Glaive	8 gp	1d8	—
Greataxe	20 gp	1d10	—
Greatclub	5 gp	1d8	—
Greatsword	50 gp	2d6	—
Guisarme	9 gp	2d4	—
Halberd	10 gp	1d10	—
Lance	10 gp	1d8	—
Longspear	5 gp	1d8	—
Quarterstaff	—	1d6	—
Scythe	18 gp	2d4	—
Spear	2 gp	1d8	20 ft.

Ranged Weapons

Crossbow, hand	100 gp	1d4	30 ft.
Crossbow, heavy	50 gp	1d10	120 ft.
Crossbow, light	35 gp	1d8	80 ft.
Dart	5 sp	1d4	20 ft.
Javelin	1 gp	1d6	30 ft.
Longbow	75 gp	1d8	100 ft.
Net	20 gp	—	10 ft.
Shortbow	30 gp	1d6	60 ft.
Sling	—	1d4	50 ft.

ARMOUR & SHIELDS

Here is the format for armour entries (given as column headings on the table below).

Cost: This value is the price for purchasing the armour.

AC Bonus: The column gives the Armour Class bonus provided by the armour.

Armour	Cost	AC Bonus
<i>Light Armour</i>		
Padded	2 gp	+1
Leather	10 gp	+2
Studded Leather	25 gp	+3
Chain Shirt	100 gp	+4
<i>Medium Armour</i>		
Hide	15 gp	+3
Scale Mail	50 gp	+4
Chainmail	150 gp	+5
Breastplate	200 gp	+5
<i>Heavy Armour</i>		
Splint Mail	200 gp	+6
Banded Mail	250 gp	+6
Half-plate	600 gp	+7
Full Plate	1,500 gp	+8

Shields

Buckler	15 gp	+1
Shield, light wooden	3 gp	+1
Shield, light steel	9 gp	+1
Shield, heavy wooden	7 gp	+2
Shield, heavy steel	20 gp	+2
Shield, tower	30 gp	+4

ADVENTURING EQUIPMENT

Here is the format for equipment entries (given as column headings on the table below).

Cost: This value is the price for purchasing the desired equipment.

Equipment

Cost

Adventuring Gear

Acid (flask)	10 gp
Antitoxin (vial)	50 gp

Microlite20 Fast Packs

Back in the day, there were standard equipment packages, pre-compiled and pre-calculated, to help new players get started quickly. This document is inspired by those lists and provides a way for a player to quickly equip his or her PC or a GM to equip an NPC or Hireling on the fly. Additionally, these optional kits can be used to give a starting point from which to customize new characters.

Ye Old Fast Packs

50 Gold Pieces each

Choose a pack or roll 1d6 to select one randomly

Pack A (1-2)	Pack B (3-4)	Pack C (5-6)
Backpack	Backpack	Backpack
Belt Pouch	Belt Pouch	Belt Pouch
Bedroll	Bedroll	Bedroll
Lantern (hooded)	10 Torches	Tent
10 Oil Flasks	4 Oil Flasks	10 Torches
Flint & Steel	Flint & Steel	5 Oil Flasks
Shovel	10 pieces of chalk	Flint & Steel
2 sets of Caltrops	10. Pole	50. Rope
Signal Whistle	Mirror	Grappling Hook
Waterskin	Crowbar	10. Pole
Iron Rations (4 days)	Waterskin	Waterskin
	Iron Rations (4 days)	Iron Rations (4 days)

Finally, add the following, based on your Class:

Cleric: Silver Holy symbol & 5 Gold Pieces

Fighter: Vial of Holy Water & 5 Gold Pieces

Mage: Spellbook & 2 Spell Pouches & 5 Gold Pieces

Rogue: Thieves Tools

Everything you need to know about the Microlite20 Skill System....

By **greywulf**

Created **05/15/2008 - 09:29**

...but were afraid to ask.

For all it's lack of size, Microlite20 does an admirable job of allowing GMs to run pretty much any published D&D adventure on the fly without having to resort to hefty conversion tables and the like. It uses the familiar d20 mechanic and terms which mirror those of D&D. Hit points, attack rolls and damage are the same, whichever game you're playing.

But there are a few notable differences. Some systems were completely altered, with Skills list having the largest revision. I'm going to give you an insight into the hows and whys of the Microlite20 Skill system, and show you why I think it's The Best Skill System Ever.

How it works

But first, a quick recap of the Microlite20 Skills rules. Here they are in their entirety:

Quote:

There are just 4 skills : Physical, Subterfuge, Knowledge and Communication. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level + any bonus due to your class or race.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Note that there are no ?saving throws? in this game; use Physical + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

One of the key differences between the d20 skill system and Microlite20 is that **the attribute modifier can change**. That's an important distinction; it makes the Microlite20 system much more powerful and flexible. It

means that just four skills can cover the entire D&D skillset, and more. [Here's a handy list](#) ^[1] of the D&D skills, converted into Microlite20 terms. I had originally shied away from putting together such a list as I felt it stifled Microlite20 in the same way that the D&D skill system stifled player creativity. More on that later.

One thing that is important to emphasize is that the attribute modifier can be different for different characters, ***even if they're doing the same task.***

For example, depending on the situation, Physical could be modified by the character's STR, DEX or MIND. When presented with a dungeon door that's barred from the inside, the rough-and-tough Fighter could try to charge it. That's a Phys+STR check against the toughness of the door (DC15, say). The Rogue could try to slide his sword through a crack in the door to push the bar out of the way. That would be a Phys+DEX check at DC10, and probably the best solution. On the other hand, a wily Mage would try to use leverage to lift the door from it's hinges - a Phys+MIND check at DC20 - a difficult check, but far from impossible.

Each character has used the Physical skill to achieve the same end result, but approaching the task differently merits a different attribute modifier. In general, that means each character would benefit most from playing to their own strengths - a character with a high MIND stat would benefit most from using cleverness to solve a problem, whereas a high STR Fighter's best muscle is..... well, his muscle :)

Setting the DC

As in the example above, the Difficulty Class can vary depending on how the player approaches the task.

When setting the DC, I think in terms of "What would Bob do?" - Bob being my imaginary 1st level commoner with no modifiers. Bob has straight 10s for all stats and no skill bonuses. He's the unheroic man on the street, and the benchmark by which heroes are measured.

In general, I recommend using only four DCs, especially at low levels:

DC	Level
10	Easy - 50/50 chance of Bob succeeding 1st time
15	Moderate - would succeed after several attempts
20	Difficult - would succeed only with luck on his side
25	Very Difficult - Bob needs some hefty modifiers and the Gods watching over him

I never use DC 5 - if it's that easy and out of combat, keep the game flowing by having the players succeed automatically. Anything that would be DC5 is automatically at least DC10 in combat anyhow. For example, crossing a crowded tavern without spilling your drink would be a DC5 Phys+DEX check. No roll needed. Crossing the same room during a bar fight would be DC15, at least!

It helps if there's always an easy way to solve a problem as in the example of the barred door above. While each character can find at least one solution to a problem and gain the benefit of their highest attribute, there's usually a path of least resistance to be found. All the players have to do is discover it!

At higher levels, encourage the players to come up with ever more heroic (and excessive!) solutions to problems. While a barred door might be a pause for thought to 1st level characters, by 10th level it's an

excuse for light relief. Your 10th level Fighter would have a +13 Phys and most likely automatically succeed at any DC15 Phys+STR checks - so encourage them to aim for DC20, at least: "I push the door down with my index finger and a grunt."

Modifiers and more

Modifiers are the GM's Best Friend. Even a plus or minus 2 can make a world of difference, especially at lower levels. If your Halfling Rogue is trying to persuade the City Guard to let them enter the Merchant's Quarter after dark (Comm+MIND, DC15), grant them a +2 because the guard recently won at dice and is in a good mood. Alternatively, give them a **minus** 2 because he lost but drop hints as to the guard's weakness.

Modifiers can make all the difference between success and failure. If the characters need to find a path through the Lizardmen Swamps (Know+MIND, DC20) then finding an old trail map (a +4 modifier!) might just save them from becoming Hooman Stew.

Encourage the players to work for those modifiers, and reward them for clever, creative thinking. It's what the game is all about, after all.

The Four Skills

Microlite20's four skills - Physical, Subterfuge, Knowledge and Communication - can be used to adjudicate pretty much any situation the game demands. When creating Microlite20 I toyed with more skills, and less (even zero) but these four hit the sweet spot for general play. Of course, if you want more, or want to chance these four, feel free!

Skills are also used to replace two of the three saving throws from D&D, with Phys+STR and Phys+DEX replacing Fort and Reflex Saves respectively. This gives Fighters their built-in boost to saves against Poison, etc, and Rogues (with their higher DEX) their improved Reflexes. It also means that the Phys skill is important to all players, regardless of class. Which leads us to.....

Why is Subterfuge so important?

This is a common question that's regularly repeated on the [ENWorld threads](#) ^[2], and the short answer is: it depends on your style of play.

It's true that the Subterfuge Skill covers a whole range of D&D skills, including Hide, Move Silently, Listen, Open Lock, Search and Spot. It's THE skill for Rogues, and will get regular use from all classes. That's because all of the Adventuring classes are a nasty, sneaky lot, and not to be trusted :)

If your games are revolve around Urban Adventuring or involve a lot of stealth, Subterfuge will see a lot of use. On the other hand, games involving a lot of dynamic action will more likely demand more Physical checks, and ones with lots of social interaction will require Communication. That's more of a matter of playstyle than anything.

For my money, I'd put Knowledge as a critical skill; a failed Know check at a critical moment could result in a TPK. Imagine failing a Know+MIND check and bringing the wrong magic weapons to bear against a Demon Lord.....

Fewer skills means more choice

Back in the days of Classic D&D, the players could do **anything**. With no straight-jacketed skill system to limit their choices, the players invented cool and clever solutions to problems. When faced with a 30' high statue with rubies for eyes they erected pulleys to lift and swing the rogue into place far above their heads. Try doing that in 3rd Edition D&D and the GM will be left scratching their head working out how to call for skill checks for **that**. The D&D skill system has become a list of what the characters can do, silently eliminating all other possibilities, and that's not a Good Thing.

Microlite20 is the best of both worlds; rather than provide a skills **list**, it provides a skills **framework**. This gives the players room to think of solutions rather than looking down a long list of skills to see what's most applicable to the task in hand.

Here's another example: Climbing. In D&D, that's a skill modified by STR. That's good if you're a Fighter, but not so good if you're a Wizard. In Microlite20, the character could use Phys+STR ("I pull myself up"), Phys+DEX ("I nimbly climb the cliff face"), Phys+MIND ("I take my time, working out the best route and carefully testing each handhold") or even Sub+STR ("I climb, quietly"). That adds much more flavour to the game and encourages each player to find their own, unique, solution.

Using existing D&D monsters

But what happens when you're running a published adventure, or using a Monster from the Monster Manual or SRD?

Simple; use them as is. It doesn't matter that the Orc makes a Listen check to see if it detects the PCs, or if the NPC fails a Spot check. The mechanics are the same (roll d20+modifiers against a DC), and the emphasis should always be on simplicity and speed of play. There's no need to convert **any** monsters or NPCs to Microlite20 before you use them. Just roll, and have fun!

Let's recap

The Microlite20 Skill System is your friend. It's flexible, and encourages imaginative play like no other. **And** it's mostly d20 compliant too.

What's not to love?

Microlite20 © Robin V. Stacey 2006-2008 [OGL](#) applies.

Microlite Monster Building

By **greywulf**

Created **05/16/2008 - 20:29**

If there's one thing that fills DMs with preparation dread, it's realizing you're going to have to Create The Monster. You've trawled through your Monster Manuals, searched the various RPG forums and cracked open your Tome of Horrors, and nothing quite matches your monster concept.

In 3rd Edition D&D, monster building is notoriously time-consuming, and even the shortcut solution of taking an existing monster and adapting it or adding class levels can easily take anything from 10 minutes to a full hour - per monster.

In comparison, Monster Building under Microlite20 is so fast, it's possible to do it **on the fly**, right at the game table - and I'm going to show you how, using our friend the Ninja Monkey above as an example.

Let's face it - Ninja Monkeys rock. Imagine hordes of Katana wielding tiny monkeys, and you're right into Cool Critter territory. Perhaps there's a secret Monkey Ninja training school in the hills and they assassinate people for peanuts or serve a Gorilla Samurai Lord. Whatever their origin, I guarantee your gameworld will be better off with Ninja Monkeys in there, somewhere. But first, we have to build them.

In D&D, one possible way to create your Ninja Monkeys would be to take the normal Monkey stats, **Awaken** it by applying the Awakened template then adding Ninja class levels. Even for an experienced DM, that's at least 20 minutes work, and most GMs will struggle to complete that task in under an hour. It's not for the faint-hearted. Those 20 minutes could have been spent creating an entire Microlite20 scenario, **including monsters**, but that's a blogpost for another day.

Here's the entire Monster-creation text for Microlite20:

Quote:

To create new monsters, assign Hit Dice (d8 for most things, d12 for Dragons and Undead). Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter, +3 bonus to one skill. Assign stats to suit. Equip and add abilities as required.

Let's start by setting the Hit Dice for our Ninja Monkeys. As these are tiny little monkeys, and (in my imaginary scenario) going to come up against 1st level PCs, let's give them 1HD.

Quick tip: to speed monster creation further, multiply the Hit Dice by 5 for hit points; multiply Hit Dice by 7 for Dragons and Undead

Remember that unlike Player Characters, Monsters and other NPCs ***don't*** add their STR total to their hit points. This is a special bonus for Real Heroes only. If you want a tougher Monster, increase their STR so they get an increase (equal to their STR bonus) to their hp per Hit Dice.

That gives the Ninja Monkeys 1HD, 5hp, +1 to hit with their Katana and +1 with all skills. As these are intelligent Ninjas (are there any other kind?), we'll allocate their +3 to Subterfuge. Let's give them STR 6, DEX 14 and MIND 12, allow them to use DEX (rather than STR) for their attack roll with their miniature Katanas, which do d6 damage. Factoring that in with the Hit Dice, we get:

Ninja Monkey, 1HD (3hp), AC12, +3 Katana (1d6-2)
Sub+4, all others @ +1
STR 6, DEX 14, MIND 12

And..... we're done. If the Ninja Monkeys have any special abilities or equipment, note them down but don't bother with setting uses/day, etc; if it's Dramatically Appropriate for a monster to use its abilities then use them. No Rules Needed! That's the Microlite20 way :)

So, to recap:

- Set the Hit Dice to get the hit points, chance to hit and skill levels
- If it's intelligent, add +3 to one skill
- Pick stats and adjust AC, hit points and damage
- Note and special abilities and equipment

If you want a more powerful Ninja Monkey (and who wouldn't?), just add Hit Dice, which increases hp, attack bonus and skills. Adjust Stats if it's logical to do so. Here's a 3HD Ninja Monkey:

Ninja Monkey, 3HD (12hp), AC12, +5 Katana (1d6-1)
Sub+6, all others @ +3
STR 8, DEX 14, MIND 12

Simple. See?

The Microlite Campaign

By **greywulf**

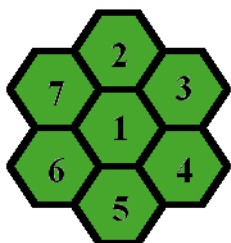

Created **06/17/2008 - 15:16**

AKA the lazy-gamer's guide to world building

Microlite is all about simplifying gaming to the point where the rules don't get in the way of the role-playing, while at the same time retaining usability from d20 adventures, supplements, etc.

From a campaign point of view, the simplest way to do this is to evolve the world as the game progresses. Plan ahead, but only as far as the next few steps - then stop.

Six sided gaming: Hex magic

One way to do this is to use a simple blank hex grid. Set the scale small - say, one hex = 3 miles - and put one adventure inside the centre hex. Populate it according to the needs of that adventure, then move on. Work around that one hex adding other adventures, all around roughly the same power level. Think about the kind of adventures you (as GM) enjoy playing, and the feel you want to impart.

By the end of this, you've got seven adventure settings and a solid core for the game world. It's likely you'll want to change something because of events in the first adventure, but that's fine. Perhaps the gamers enjoyed a section set in a forest, so you want to change one of the adjacent hexes to expand that locale. That's cool, as it means that the players are involved in the gameworld itself.

It's likely you will see links between adventures. Perhaps the Evil Bad Guy in one adventure is similar enough to one in another that the same villain could make a reprise. Interweave plot threads to make the players feel like they are a part of a larger story, and leave some hexes blank for future use. Some places - particularly cities and towns - will be reusable. Expand them as needed.

Finally, add in roads, rivers and other details.

As you progress, new ideas and a backstory will develop of it's own accord. The goblin raiders in one adventure will become scouts from a distant Goblin Empire; an NPC might come from a nearby city state, and

the Wight's Barrow will be a lost reminder of a long forgotten battle.

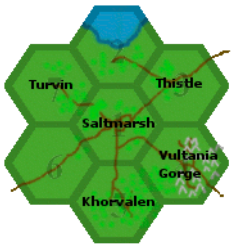

When the time is right, add more hexes and adventures. Re-visit and re-work previous locales. Perhaps that first dungeon the adventurers cleared out is now home to something more sinister, or the Elves in the Twisting Forest in hex 3 send out a call for help. Let the campaign setting evolve with the players to create a setting that feels alive.

Example

Grabbing a bunch of old **Dungeon** magazines and the hex grid above, it's time to create a new world. The game is going to start at first level, so I pull out the following adventures and drop them into the numbered hexes, making notes about the locales as I go:

- **Funeral Procession** (Dungeon 135) - Saltmarsh. Ideal for the (current) base of operations, and a likely scene of many adventures
- **Salvage Operation** (Dungeon 123) - Need coastline
- **Within the Circle** (Dungeon 130) - Thistle village, depot.
- **Home Under the Range** (Dungeon 134) - Vultania Gorge (Dwarf town), mountains
- **The Walking Dead** - An adventure of my own making. Zombie hordes wipe out a town and march toward Saltmarsh. Khorvalen town, forest.
- **Wingtipper's Revenge** (Dungeon 132) - Turvin village

The finished layout looks something like this, perfect for a starting campaign and rife for further adventure. Extra elements can be added and changed as required, but there's enough groundwork in place to begin with.

As the adventures develop, there's room to fill in the political blanks; factions and enemies will rise from the adventures themselves rather than premeditation. With such a clean slate, it's possible to turn the game in any direction with minimal effort.

Other genres

It's a simple matter to change the grid scale to suit the genre. For a world-hopping sci-fi game, each hex could represent a star system in the best **Traveller** style. For gritty urban fantasy or a modern game, each hex could be a single district in just one city.

Mass Combat Made Easy

By **greywulf**

Created **05/19/2008 - 19:27**

Most combat is carried out one-on-one, with each set of stats (HP, AC, combat bonuses, etc) applying to a single character or creature.

It can be extended by adding in Combat Scale. This takes the basic combat mechanics and uses them to apply to anything from Tactical Units to Destroyer-Class starships.

Combat Scale is a multiplier that shows the size of the unit relative to the norm. It is only applied to damage in combat between units of different size. Hit Points, AC and all other stats remain the same.

For example, a unit of 20 Goblin warriors will have CSx5 as per the table below. The combat stats are still HD1d8+1 (5hp), AC15, Morningstar +2 (1d6) or Javelin +3 (1d4). Against anything with the same Combat Scale (for example, a unit of 15 Elves), combat is resolved normally as if it was one goblin against one elf.

Number in Unit	Combat Scale
2-5	x3
6-10	x4
11-20	x5
21-40	x6
41-80	x7
81-160	x8
161-320	x9
321-640	x10
etc	

Combat Scale comes into play when battling against forces of a different size. It acts as a multiplier for damage taken, and also divides any damage given.

If the battle started between units of different CS, reduce the size of the Combat Scale as Hit Points as lost. For example, if the twenty Goblins above are reduced to 2hp, they have lost over half their unit, so are now CSx4. When down to just 1hp, they are CSx3 with just 5 goblins remaining.

If the Combat Scale becomes the same for all opponents, resolve combat normally; the playing field is now level.

Sci-Fi combat and more

The same system can be used to implement large scale science fiction battles where Combat Scale is used to reflect the widely different scale between starships.

Ship Type	Combat Scale	Example
One-man Fighter	x5	Tie Fighter, X-Wing
Starship	x10	Moya, Serenity
Cruiser	x20	Enterprise, Mecha Dropship
Destroyer	x40	Imperial Star Destroyer
etc		

For multiple ships, add the Combat Scale for the size of the ship to the CS from the number of Units. For example, 100 Fighters will be CSx13 (x5 + x8).

It's possible to use existing monster stats to create Fighters, Starships and even Destroyer-class behemoths with little difficulty. Simply select an appropriate creature from the Monster List and give it a type. Replace it's ranged weapon with a suitably sci-fi sounding name (or use the RandomSciFiWeaponGenerator), and you're done.

Ship Examples

- Goblin-class Fighter: HD1d8+1 (5hp), AC15, +1 Pulse Canon (1d6), CSx5
- Troll-class Cruiser: HD6d8+36 (63hp), AC16, +9 Distructor Beam Torpedo (1d6+6), CSx20 (includes Fast Auto-Repair system)
- Goblin-class Starship: HD1d8+1 (5hp), AC15, +1 Meson Canon (1d6), CSx10

Calculating EL

Experience is gained from taking part in a battle equal to the HD of the opponent, +1 for each CS higher than your own. For example, a member of the 20-strong Grey Company (CSx5) will earn 3EL in a battle against 35 Gnolls (a 2HD creature, CSx6).

Combat Examples

Orcs vs Elves

Twenty orcs enter a forest glade where they are beset upon by 15 elven archers. As their CS is the same, it's treated as a straight single combat. The elven archers fire their longbows (+3, 1d8), hitting for 3 points of damage. The Orcish unit is down to 2hp. As the combat started with both opponents having the same Combat Scale, there's no change to CS and combat continues. The Orcs rally and snarl, preparing to flush out the Elves with their barbed falchions. They charge into the bushes.

The elves calmly fire another volley, hitting for more 4 more hp - more than the Orcish unit can take. Silence falls in the clearing as orcish blood soaks into the grass????

Goblins vs lone warrior

Twenty goblins ambush a lone 5th level Fighter. Their CS is x5, so any damage dealt is multiplied by five before it's applied against his Hit Points. Similarly, any damage he does is divided by five. In the first round he hits well for 10 damage. That's divided by 5, to 2hp lost by the Goblin unit; They're down to 3hp - if they lose another hp they will drop down to CSx4 as they've lost more than half their hit points.

In reply, the Goblins hit, attacking with their Morningstars en masse. The Fighter is hit for 4hp, x5 due to their numbers. He takes 20hp of damage. Good luck to him!

Knights vs Red Dragon

The 500-strong Order of the Purple Flame stand ready against the Red Dragon. They are CSx10, while the Dragon - a single critter - is just CSx1, though formidable.

- 500 Knights: HD2d8+4 (14hp), AC18, Lance +7 (1d10+4) or Longsword +6 (1d8+2), CSx10
- Red Dragon: HD13x12+39 (123hp), AC21, Bite +20 (2d6+7) or Breath 10d10 DC24

The Dragon flies high above and breathes flame across their phalanx for 46hp damage. The knights dive for cover beneath their shields (phys+DEX to dodge DC24. They roll 25, barely making it). They take 1/2 damage - 23hp, divided by CSx10 for 2hp. The Knights are down to 12hp.

They ready their horses to charge as the Dragon lands, the thunder of 2,000 hooves causing the young Red to pause. They hit (rolled 18+7 = 25 vs. AC21), scoring 11 damage, CSx10 for a massive 110hp damage. The Red is down to 13hp against the small army, bleeding from the impact of many lances. It roars and lunges in anger, biting savagely. It hits easily (rolled 6+20 = 26 vs. AC18) for 17 damage, divided by 10 = 2hp. The Knights are down to 10hp. If they fall below 7hp they will be at half their numbers and down to CSx9.

They draw their Longswords and surround the downed Dragon, though their weapons to little more than scratch the drake's hide (6 + 8 = 14, a miss). The Dragon turns to bite again, and rolls a Natural 20. It's a critical, so the Knights take 19hp damage, CSx10 so 2hp lost. They're down to 8hp after watching a few more of their number be gobbled up.

Their longswords bit true (18 +6 = 24 vs. AC21), for 6hp damage, CSx10 for a total of 60hp against the drake. It's down, finally, though the Knights have lost 143 (500x4/14) of their number in the battle. The commend their souls in valour.

Knights vs Gnolls

The Knights of the Purple Flame, bolstered by their successes and reinforcements decide to tackle the Gnoll threat to the South. They ride out at full strength against the 300 Gnolls of Ghakak Khan.

- 500 Knights: HD2d8+4 (14hp), AC18, Lance +7 (1d10+4) or Longsword +6 (1d8+2), CSx10
- 300 Gnolls: HD2d8+2 (11hp), AC15, Battleaxe +3 (1d8+2) or shortbow +1 (1d6), CSx9

The Knights charge the Gnolls as the Gnolls fire shortbows into their midst. The Gnolls roll well ($18+1 = 19$) for 5 damage. $9/10$ th of it applies, which still rounds up to 5hp. The Knights are at 9hp as riders fall from their mounts.

The next round, the Knights hit hard (roll $14+7+2$ (from the charge) = 23, easily beating AC15) for 9hp, multiplied by $10/9$ th for 10hp. This leaves the Gnolls with just 2hp. Just 54 Gnolls remain standing ($300 \times 1/2$). The Gnolls route and the Knights are victorious!

Fighters vs Starship

A lone Griffon-class Starship, the 'Verdant Princess' is plying the spacelanes when it is attacked by pirates. They ambush from around an asteroid, 10 Stirge-class Fighters. The captain of the Starship, an Half-elven Merchant by the name of Kithillien Mahadrascapore has little choice but to turn and fight.

- Griffon-class Starship: HD7d10+21 (59hp), AC17, +11 Beam Laser (2d6+4), CSx10
- 10 Stirge-class Fighters, HD1d10 (5hp), AC16, +7 Breach and lock-on, CSx9

Kith instructs her 5 crewmembers to prepare for boarders. Stirge-class Fighters attack by attaching to the hull of their opponent, using cutting gear to inflict a point of damage each round. When 5hp of damage is done, there's a hole large enough to allow the pirates to board.

The Striges strike first, rolling poorly ($4+7=11$ vs AC17) and Kith's maneuvering has avoided them. She replies by cutting across them with her Beam Laser, easily catching them all in the blast ($12+11=32$ vs AC16) for $11\text{hp} \times 10/9 = 12\text{hp}$ damage. All that remains of the tiny Fighters is space-dust and Kith breathes a sigh of relief?..

?..which stops midgasp as a Hellhound-class Starship comes around the asteroid, it's markings clearly showing it belongs to Caleb Duo'nith, famed Drow Pirate - and her half-brother.

Microlite20 - Minor Rules Expansions and Variants

Collected from the old Microlite20 web site. Most were probably by Greywulf.

Special Moves

Roll an attack at -8 to hit against d20+your opponent's to-hit bonus. If you roll higher, you succeed. If not, combat continues. If you're using a weapon designed for the purpose (a sai to disarm, chain to trip, etc.) then roll attack -4 instead.

Fatiguing Damage

This rule adds a bit of consequence to taking damage (either via combat or spell casting).

- * When a character is reduced to 3/4 of their maximum Hit Points (rounded up) he/she is Fatigued.
- * When a character is reduced to 1/2 or fewer of their maximum Hit Points (rounded up) he/she is Exhausted.

Unlike normal Fatigued and Exhausted conditions, these conditions are only removed when the character is healed above the applicable Hit Point threshold. Normal rules for stacking Fatigue apply.

Example

A character reduced to "Fatigued" by damage who later suffers another level of Fatigue through physical exertion is thus Exhausted. The Exhausted condition is removed with normal rest, however the Fatigued condition remains until the character is healed above 3/4 of his/her maximum Hit Points.

Effects are the same as the d20 SRD:

Fatigued

A fatigued character can neither run nor charge and takes a -2 penalty to Strength and Dexterity. Doing anything that would normally cause fatigue causes the fatigued character to become exhausted. After 8 hours of complete rest, fatigued characters are no longer fatigued.

Exhausted

An exhausted character moves at half speed and takes a -6 penalty to Strength and Dexterity. After 1 hour of complete rest, an exhausted character becomes fatigued. A fatigued character becomes exhausted by doing something else that would normally cause fatigue.

Criticals

The Core Rules say: "Natural 20 is automatically a critical doing maximum damage."

But: Players love fantastic stuff to happen when they roll a natural 20 in combat. Various variants suggest themselves. This is what I like to do:

Print the Critical Hit Tables from the HARP Lite manual (get it from the HARP site in the free download section) around page 56. When players roll a natural 20, roll 1d100 on the appropriate critical hits table. Add 5x STR bonus (or DEX bonus if using a light weapon and preferring DEX) to the result.

Example: A thief with DEX 16 using his knife and rolling a natural 20 gets a 1d100+15 on the puncture critical table. (I suggest you don't use this table against players...)

Last session, the level 1 priest decided to walk out into the forest in the middle of the night, trying to talk to the trees. A Kappa (4 HD) surprises him. He flees back to the village. The kappa follows. The priest draws his bow, takes aim, and rolls a natural 20. I roll 1d100+15 because the priest has DEX 16. The result is an awesome 92+15=107!

"You impale foe in the lung—he'll die in 12 gurgling rounds. Foe takes 29 Hits, is stunned 12 rounds, bleeds 3 per round, and is at -20."

I'm sure my players will remember this event for a while to come!

Alternative

Let them roll a second attack. Repeat as long as a natural 20 comes up. This is simpler, but lacks the gory details.

Combat Bonus

In this variant a character's Base Attack Bonus provides a bonus to their Armor Class as well as to their Attacks. This variant works well with the Base Attack Bonus by class variant. If you use this variant consider counting an armor's Armor Class bonus as Damage Reduction instead.

Cleave

To speed up combat, replace the ability to make multiple attacks if your attack bonus is +6 or more with the following:

If the melee attack bonus is +6 and the attacker drops or slays a foe, he is granted one additional attack against another opponent in melee weapon striking distance that round. As long as the combatant is dropping foes, he can continue attacking others until one does not fall to the might of his weapon.

As suggested by EditorBFG, wording by WSmith (with minor editing by GreyWulf)

Skill Use Examples

Here are the skills from the d20 SRD and their Microlite20 equivalents:

Appraise - com+MIND

Balance - phys+DEX

Bluff - com+MIND

Climb - phys+DEX or STR, whichever is highest

Concentration - doesn't apply. GM's fiat applies

Craft - it's an out of game thing. No one ever crafts things in-game, so it's a redundant skill. Alternatively, know+DEX

Decipher Script - know+MIND or com+MIND

Diplomacy - com+MIND

Disable Device - sub+MIND or sub+DEX
 Disguise - sub+MIND
 Escape Artist - sub+DEX or sub+STR, depending on what you're escaping out of
 Forgery - com+DEX
 Gather Information - com+MIND
 Handle Animal - com+MIND or com+STR if the animal is bigger than you
 Heal - know+MIND
 Hide - sub+DEX
 Intimidate - could be phys+STR, or sub+MIND or com+STR. You choose
 Jump - phys+STR (long jump) or phys+DEX (high jump)
 Knowledge - know+MIND
 Listen - sub+MIND
 Move Silently - sub+DEX
 Open Lock - sub+DEX
 Perform - com+MIND, though it could be DEX if you're juggling, or STR if you're a weightlifter
 Profession - com+MIND, usually
 Ride - com+DEX
 Search - sub+MIND
 Sense Motive - com+MIND
 Sleight of Hand - sub+DEX
 Speak Language - doesn't apply. You either know the language or you don't. Alternatively, com+MIND to understand subtle nuances, I guess
 Spellcraft - MIND only
 Spot - sub+MIND
 Survival - phys+STR to survive, or sub+DEX or STR to hunt stuff.
 Swim - phys+STR
 Tumble - phys+DEX
 Use Magic Device - you can either use it, or you can't. GM fiat. Alternatively, MIND only
 Use Rope - no, never ever. Use Rope is a DEAD SKILL. This skill is dead. It has passed the mortal coil (of rope). Use phys+DEX if you must, but don't say I didn't warn you.

Combat Example

Simple one-on-one example

Here's our thief Alex (HP 19, Melee +4 for 1d10+3, AC 15) sneaking up on an Orc wearing studded leather and wielding a falchion (HP 1d8+1=3, Melee +1 for 2d4+4, AC 13).

Alex tries to sneak up to the Orc: Roll 1d20+sub+DEX. $1+5+2 = 8$. Not good. The Orc has to beat only 8 to spot him. He rolls 1d20+sub+MIND (1 from his 1 HD, 0 for MIND bonus) for $11+1 = 12$, easily noticing Alex's attempt to be a shadow.

But what do you expect when you roll a natural 1...

The Orc hits Alex: $1d20 (19) + 1 = 20$ which is bigger than AC 15. Damage is $2d4 (3) + 4 = 7$. Alex is now down to 12 HP.

Time for initiative rolls! Alex has $1d20 (10) + 2 = 12$, the orc has $1d20 (5)$. Alex is first and attacks with $1d20 (9) + 4 = 14$ which is higher than 13. He hits for $1d10 (7) + 3 = 10$ points of damage. This kills the orc.

Four against an Ogre

Ok, while eating breakfast this morning I tried the following Ogre fight against my players. These are real player characters, except for Yasu Odong, because I don't have his character sheet here, and I had to advance Yonkyu and Yasu Odong from 2nd level to 3rd.

Kyoshi, Fighter-3, 29hp, STR 16, DEX 12, MIND 8, AC 16, Masterwork Katana+8/+3 (1d10+7)

Myung, Rogue-3, 21hp, STR 12, DEX 18, MIND 9, AC 14, Wakizashi+7/+2 (1d6+1)

Yonkyu, Cleric-3, 23hp, STR 9, DEX 18, MIND 11, AC 14, Takujo+3 (1d6), Kyuu+7/+2 (1d8), Magic+3 ("The Archer")

Yasu Odong, Mage-3, 18hp, STR 5, DEX 11, MIND 14, Tanto+1 (1d4-2), Magic+5

vs.

Ogre, 29hp, AC 16, club+8 (2d8+7).

We're assuming no surprise, no ranged combat, no ambush, and thus I rule that attacks go in order of attack bonus. Since both the ogre and Kyoshi have +8, I rule that the Ogre goes first, then the exact order of players doesn't matter for the rest of the round.

Ogre rolls 10+8, does 12 damage to Kyoshi – down to 17.

Kyoshi rolls 17+8, does 10 damage to Ogre – down to 19.

Kyoshi rolls 2+3, misses.

Myung tries to hide, rolls 4 + sub (7) + DEX bonus (4) = 15

Ogre tries to spot, rolls 3 + HD (4) = 7, fails.

Yonkyu casts Bull's Strength on Kyoshi (giving him STR 20), uses 5hp – down to 18.

Yasu Odong casts Sleep on Ogre, rolls 10 + Magic Attack Bonus (5) = 15, uses 3hp – down to 15

Ogre tries to resist, rolls 15 + HD (4) = 19, succeeds.

Ogre rolls 8+8, does 17 damage to Kyoshi – down to 0!

Myung attacks from the shadows, rolls 12+7, does 5+7 damage – down to 7.

(In an alternate universe the sneak failed and he rolled 12 and 15, doing 5 and 6 damage, bringing the ogre down to 8.)

Yonkyu sees that the ogre is badly hurt and rolls 18, does 3 damage – down to 4.

Yasu Odong casts Sleep on Ogre, rolls 9 + Magic Attack Bonus (5) = 14, uses 3hp – down to 12

Ogre tries to resist, rolls 6 + HD (4) = 10, fails, and will fall asleep next round!

Ogre rolls 15+8, does 20 damage to Myung – down to 1!

Myung rolls 9+7, does 5 damage to ogre – killing it before sleep takes effect.

Party wins!

Yonkyu casts Cure Light Wounds twice on Kyoshi & Myung, costing him 12 hp total, healing 2d8+6 for each: 15 for Kyoshi and 14 for Myung.

Status:

Kyoshi @ 15/29hp

Myung @ 15/21hp

Yonkyu @ 11/23hp

Yasu Odong @ 12/18hp

58% of max.

Conclusion:

1. Not a point landing with the party ending at 58% instead of 75%.
2. Combat was interesting I think.
3. The ogre having the initiative did not decide the fight.

Character Creation Example

Let's create a thief! Name: Alex. Class: Rogue. Race: Human. Level: 1. That was easy.

Roll 4d6: 5, 5, 2, 4. Drop 2 for a total of 14. Assuming this is above average, let's assign this to DEX.

Roll another 4d6: 5, 2, 5, 6. Drop 2 for a total of 16. Damn! Should have used this for DEX. Doesn't matter, however. We'll use it for STR. This is going to be a master assassin!

Roll the last 4d6: 5, 5, 3, 3. Drop 3 for a total of 13. This must be my lucky day. Use it for MIND.

This gives us STR 16, DEX 14, MIND 13. STR bonus is +3, DEX bonus is +2, MIND bonus is +1 since we have to round down.

Skills are Level + 1 because we're human. And Sub is + 3 because we're a rogue. Thus: Phys 2, Sub 5, Know 2, Comm 2.

There's no magic to worry about. As for combat, we'll be wearing studded leather and a large weapon because we're so strong: A katana, which we could use as a two-handed weapon, if necessary!

Hitpoints is $STR + 1d6 (3) = 19$. Not bad for a rogue...

Armour Class is $10 + DEX \text{ bonus } (+2) + \text{armour bonus } (+3 \text{ for studded leather}) = 15$.

Melee attack bonus is $Level + STR \text{ bonus} = +4$.

Missile attack bonus is $Level + DEX \text{ bonus} = +3$.

Let's consider the katana like a bastard sword. Damage is thus $1d10 + STR \text{ bonus} = 1d10+3$.

Level Advancement Example

The 1st level adventurers have just completed a dungeon adventure, and defeated 5 EL1 encounters, an EL2 trap and the EL3 leader. That's a total of EL10, so they all advance to level 2. They need to defeat another 20 Encounter Levels to reach Level 3.

Sanity Checks

SAN checks are a popular element in the Call of Cthulhu role-playing game.

To implement them in Microlite20 use $MIND \times 5$ as your starting SAN, then run SAN checks as per the Call of Cthulhu rules.

This would work as a substitute:

If the character encounters something that is likely to threaten their sanity (a rotting corpse, a vampire, a dragon, Great Cthulhu, etc), the player rolls d100. If the result exceeds their current SAN, they roll another dice (usually a d6, though more - many more! - for particularly frightening sights) and deduct that amount from their SAN.

I suggest that if they lose 1/10th of their current SAN in one go they gain a temporary insanity, such as short-term catatonia, nightmares or a phobia. When their SAN reaches 0, they're hopelessly lost. SAN can be regained through therapy, rest and weak tea.

For example: Matt Warren, Occult P.I. has a MIND of 16, so his SAN is 80 at the start of the campaign. His first case involves a series of bodies that have been discovered with their lips and eyelids sewn shut with red thread. He's in the morgue, and on his first sight of the bodies makes a SAN check, getting a 92 for the result. He rolls a d6 and gets a 4, meaning his SAN is now 76.

And thus begins the slow descent into madness.....

Alternate Skill System

Higher level characters in Microlite20 tend to be very skilled even at things outside of their area of expertise. A +3 bonus to one skill at level 1 is a significant advantage. However, by level 20 (and beyond), that bonus is marginal.

To signify the different specialties of each class you can use the following system.

Clerics are at (Level + 3 + Mind Modifier) for Communication, and (Half-Level + Ability Modifier) for all other skills. The GM may rule that a Cleric uses (Level + MIND) for Knowledge when used for all things related to dogma-related.

Fighters are at (Level + 3 + Strength Modifier) for Physical, and (Half-Level + Ability Modifier) for all other skills. The GM may rule that a Fighter uses (Level + MIND) for Knowledge when applicable to martial areas.

Magi are at (Level + 3 + Mind Modifier) for Knowledge, and (Half-Level + Ability Modifier) for all other skills. The GM may rule that a Magi uses (Level + MIND) for Communication when dealing with other spell casters.

Rogues are at (Level + 3 + Dexterity Modifier) for Subterfuge and (Half-Level + Ability Modifier) for all other skills. The GM may rule that a Rogue uses (Level + MIND) for Knowledge when applicable to all things rogue-like.

When determining a skill that is at "half-level" always round down.

Adding Charisma

Adding CHA as a stat is as simple as writing it onto your character sheet and making an extra 4d6 roll during character generation.

The skill bonus can then be used in place of your MIND bonus for any interactions with intelligent creatures.

Examples

Bluffing past a guard - sub+CHA

Intimidating the barbarian leader with a show of might - phys+CHA

Convincing the elven court that you mean no harm to their forest - com+CHA

Haggling down a merchant - com+CHA

Alternative

You can still simulate charismatic leaders by having non-magi with a high MIND stat.

Multiclassing

To Multiclass in Microlite20 simply take an additional class at your next level break, subject to GM permission. It is not recommended for Games Masters to allow more than two class combinations however as this can lead to Powergaming Munchkinitis, a dreadful disease that afflicts some role-players.

Optionally, only allow a class change every third level (3,6,9,etc).

Certain class combinations can be used to simulate other base D&D classes:

Fighter + Cleric = Paladin

Rogue + Cleric = Bard

etc.

As an additional option, characters do not get the +3 bonus to the specialty skill of that class, only the first class a character takes receives this bonus. This should cut down on min/maxing and allow characters to branch into multiple classes freely.

Monks

Monks use no armour. They have a +3 bonus to Physical and can fight unarmed (kicks, punches, etc) doing d6 damage (STR bonus to damage still applies). Their unarmed damage increases every four levels starting at the fourth level as shown in the following table:

Level	1-3	4-7	8-11	12-15	16-19	20
Damage	1d6	1d8	1d10	2d6	2d8	2d10

Their attacks count as magical after 3rd level.

They gain an AC bonus equal to half their level (rounded up) provided they are wearing no more than loose fitting clothes.

Level	1-2	3-4	5-6	7-8	9-10
AC Bonus	+1	+2	+3	+4	+5

Ninjas are the same as Monks, but gain +3 to Sub instead of the +3 to Phys.

Monks can use DEX bonus + level instead of STR bonus + level as melee attack bonus if unarmed.

Additionally, the following may be applicable for some campaigns:

Monks make multiple attacks per round by taking -2 on the first attack, -4 on the second attack, and so on, as long as their melee attack bonus is positive.

Example: Mu Ehr is a 5th level monk with STR 12/+1 and DEX 18/+4. He uses DEX based Gong Fu to fight and thus has a melee bonus +9 for a single attack. When using a Flurry of Blows, he has four attacks at +7/+5/+3/+1. He deals 1d8+1 points of damage when he hits. His AC is 17.

His older brother Chen Dong is a 5th level monk with STR 17/+3 and DEX 15/+2. He uses STR based Iron Fist moves and has a melee bonus of +8. When using a Flurry of Blows, he has three attacks at +6/+4/+2 (there is no +0 attack). He deals 1d8+3 points of damage when he hits. His AC is 15.

Druids

A Druid is a Cleric who worships Nature and Nature spirits. Generate as a Cleric but use the Druid spell lists from the SRD. Druids avoid using metal where possible, preferring living or once-living materials (leather, wood, etc).

From third level a Druid can Wild Shape into any small animal (eg a fox or badger) once a day. Every three levels the number of uses increases by one (2/day at 6th, 3/day at 9th, etc). A Druid can use up 2 uses by Wild Shaping into a medium-sized animal (eg, a wolf), or 3 uses by Wild Shaping into a large animal (eg, a bear).

Base Attack Bonus

This variant makes certain classes better at fighting than others.

Clerics have a Base Attack Bonus equal to 1/2 of their level (rounded up).

Fighters have a Base Attack Bonus equal to their level.

Rogues have a Base Attack Bonus equal to 3/4 of their level (rounded up).

Magi have a Base Attack Bonus equal to 1/2 of their level (rounded up).

Halfbreeds

Halfbreed races are a common staple of fantasy.

Half-Orc +3STR, -1MIND

Half-Elf +1MIND, +1 comm

Mul (Half-Dwarf) +1STR, +1 phys

Quarterling (Half-Halfling) +1DEX, +1 sub

Half-Fiend +3MIND, -1STR or -1DEX

Half-Stone Elemental +3STR, -1DEX

Half-Air Elemental +3MIND, -1STR

Half-Water Elemental +3DEX, -1MIND

Half-Fire Elemental +3MIND, -1DEX

Magic Variants

Turn Undead Alternatives

As an alternative to the rules for Turning Undead presented in the Core Rules, consider the following two variants:

(from Deimodius)

The Undead Turning: Level Check variant (UA pg67) has the cleric make a level check against each undead up to a certain HD limit, and within the 60' range. The cleric's level check (like a Wizards level check) is $1d20 + \text{Cleric lvl} + \text{Cha mod}$. The DC to beat is $10 + \text{Monster HD} + \text{Turn Resistance (if any)} + \text{Cha mod}$. A cleric can affect a number of HD worth of creatures = to Effective Cleric lvl x 3. Any affected creatures are "frozen in place for 1 round as if paralysed" (even creatures with immunity to paralysis). The cleric can concentrate each round to prolong the effect up to 10 rounds. If the creature is attacked or takes damage, the effect is broken and the creature can act normally on it's next turn. UA also suggests that if you use this variant, undead with turn resistance of +4 or higher should get a turn resistance increase of an extra +2.

Beating the DC by 5 or more means the cleric can choose to turn or rebuke (if evil) the undead normally (rather than just freezing them). If the creature's HD is = to 1/2 the Cleric's lvl or lower, no check is needed (it automatically succeeds), the undead is destroyed, and it still counts towards total HD worth that can be affected.

For m20, I would see it working something like this:

Turn Check = $1d20 + \text{Clr lvl} + \text{MIND mod}$

DC = $10 + \text{creature HD} + \text{Turn Resistance} + \text{MIND mod}$

In the interests of speeding play, the PC makes only 1 turn check roll and it is applied to all undead within range from lowest to highest HD in order until all HD that cleric can affect are used. So a lvl 1 cleric can affect a total of 3 HD worth of undead with that one check.

As above, undead with HD equal to or less than 1/2 the cleric's lvl are automatically affected and are destroyed. HD of these undead are still part of total HD that can be affected.

The cost to use this ability is a loss of HP equal to the total HD the cleric affects (or chooses to affect).

(from Darrell)

Use an m20 version of the 'Positive Energy Burst' variant from Complete Divine. When the cleric says he's going to attempt a turn, every undead critter within 30 feet must make a "Will save" (Knowledge + MIND). If the critter fails the check, he takes 1d6 points of damage per the cleric's level.

Open Ended Magic System

This Magic System is inspired by Realms of Renown and provides a completely open framework for spell-casting. It is particularly well suited for use with Ultramicrolite20.

A spellcaster does not use a spell list, but manipulates raw magic to create any required effect. Because of the flexibility of the system however, it is recommended that the player note a few pre-prepared examples in advance to keep the game moving quickly.

To cast any spell the caster rolls his Magic Attack. If this system is being used with Ultramicrolite20 then use Know+MIND bonus as Magical Attack.

The DC depends on the type of spell.

Spell type	DC
Directly damaging	Target's AC
Mind affecting, unwilling target	10+opponent's MIND bonus
Willing target/Self	0
Inanimate object	10*

*Special materials and locations may be more or less susceptible to magical manipulation.

Each spell cast (failed or otherwise) that day increases the DC by +2.

If a d20 rolls a natural twenty, add and roll again. If further natural twenties are rolled, continue adding and rolling.

For every 5 points (or part thereof) above the DC the caster may add 1 point to damage, range, area of effect or duration. If they are unstated, then the defaults are used.

Spell Attribute	Default	Each point allocated adds....
Damage	0	1d6*
Range	Touch	30'
Area of effect	0	10' radius
Duration	Instant	1 round

*1 Hit in Ultramicrolite20

“Damage” could be positive energy to make it a healing spell instead recovering 1d6 damage per point. Transformation spells must exceed the hp of the target to be successful. Turning a 6hp commoner into a frog for a few rounds is simple; doing the same to a dragon is considerably more difficult, and will likely take several rounds and a lot of courage!

A spell lasts as long as the caster concentrates (performing no other action) or as long as it's stated duration.

Examples

Norris the Elder is a 5th Level Mage with MIND 16. His Magical Attack is (5+3) +8. Norris has been captured by Gnolls and wishes to teach the leader a lesson. From within his wooden cage he throws a fireball into the centre of the gnoll gathering, targeting the campfire (DC10) 20' away. He rolls $18+8 = 26$. That's 4 points to put in to the fireball, so one goes into Range, two into damage and one into Area of Effect. All Gnolls within 10' of the campfire take 2d6 damage and start patting out singed fur, howling in pain. Norris chuckles.

Norris is beaten badly for this stunt and is back in the cage, down to just 3hp. He casts Heal on himself (DC0, +2 as it's his second spell that day). He rolls $10+8 = 18$ which exceeds DC2 by 16 points. He allocates all four points to “damage” and heals 4d6hp. He's back to full health.

Deciding it's time to make a break for freedom, Norris tries to use magical force to break the back of the cage. The bars are strong wood (DC10+4 as this is his third spell today). Norris rolls a natural 20, then a 12 for a total of (20+12+8) 40. That gives him 5 points to play with. Wanting to do it slowly so as not to attract attention, he

puts one point into damage (1d6), 3 into rounds and the GM ok's 1 point being spent to keep everything silent. By the time the Gnolls notice the hole in the bars, Norris is long gone.

New Magic Items

While any magic item from the SRD or published adventures is usable with Microlite20, there is room for a few more which are unique to the system. These items work according to the rules given in Microlite20 and can be used in place of published treasure.

Cyrdwa's Torc

A plain silver circlet worn around the forehead. A grants +2 MIND and the ability to speak and read Elven while worn. Named after a famed Elven philosopher

Guildsmen's Gloves

These are long black gloves often worn hidden. Closely associated with a large thief's guild; if spotted being used by a non-member they will often take steps to retrieve them. They grant +2 DEX when worn.

Hill Giant Breastplate

A plain looking breastplate of dull steel, crudely shaped to look like rippling muscles. It grants the wearer the usual +5 AC, and also +2 STR. Anyone using this for a period of time begins to have strange, primitive dreams leading to a fear that it is cursed in some way.

Holy Symbols

A Cleric wielding a Holy Symbol of his faith gains a +4 bonus on checks to Turn Undead. A non-cleric can attempt to Turn Undead using the Holy Symbol. They make a single Magic Attack with a DC equal to the current Hit Points of the Undead, though do not gain the +4 bonus.

Spellstaves

A spell staff can look like any common staff, varying in size and style from a stout walking stick up to an ornate creation higher than the wielder's head. It's form is no measure of power, however, for the plainest staff often holds the most power. Spell staves come in two types - Magestuffs, and Mitres. As the name implies, a Magestaff is useful only to a Mage (it is a plain, non-magic staff in anyone else's hands), and a Mitre to a Cleric. In all other respects, their powers and method of creation are the same.

Spellstaves hold Hit Points that are usable for casting spells. These can be used in place of the caster's own Hit Points to power any spell, up to the limit of it's own resources. The caster can choose at the point of casting whether to fuel the spell using her own Hit Points, or those contained in the staff.

Spellstaves are infused with power in a special ceremony involving at least three spellcasters of the same type (Magi or Clerics) whose total level is equal to the number of Hit Points to be implanted in the staff. For example, three 5th Level Magi could implant a total of 15 HP into a staff in one ceremony. All participants must be willing. The loss of Hit Points is shared evenly between the participants, and recovered after 8 hours rest, as per the rules for spellcasting.

Spellstaves can be recharged at any time, and there is no known limit to the amount of Hit Points a spellstave can store. In legend, the Godking of Rhul was said to hold a Mitre donated by a grateful populace which held over a 10,000 Hit Points of power.

If a spellstave is broken it unleashes the stored magical energy in a single powerful blast. It does 1d6 damage per 5 Hit Points stored to a range of 10' per 5 HP. It is said that Rhul was once a green and verdant land, completely unlike the blasted desert it is today. One can only theorise what became of the Godking's Mitre.

Magic Points

As an alternative to using hit points (hp) to fuel spells, give magi and clerics a magic point (mp) pool equal to their maximum hit point total. Use these to cast spells. Magic points regenerate after eight hours of rest.

Example: Max is a mage-1. He has STR 10, 16hp and 16 magic points. He casts 5 magic missiles spell. This is a level 1 spell costing $2 \times 1 + 1 = 3$ points each, for a total of 15 magic points, leaving him with one magic point.

In an emergency, a mage or cleric can convert hit-points to magic-points at a rate of 2:1. The hit-points thus converted will regenerate after eight hours of rest, just like magic points. They cannot be healed any other way.

Example: Having cast 5 magic missiles, Max casts another one in desperation; he needs three magic points but has only one. He can invest four hit points to make up for the lacking two magic points. He's down to 12hp and 0mp. Best of luck, Max.

Magic Item Creation

Clerics and Wizards gain the ability to make magic items at certain class levels. This translates to being able to buy these items, but at half their usual purchase price. This represents the raw materials required to make the item. Making items requires equipment (a forge, etc), the right skills and time as per the existing item creation rules. Making magic items does not cost XP.

Here's when Wizards and Clerics can make stuff:

- 1 Scroll
- 3 Potion and Wondrous Item
- 5 Wand, Arms and Armor
- 9 Rod
- 12 Staff, Ring

(Basically the same as the feat prerequisites)

Kami Magic

This is an optional magic system that can co-exist with other magic systems. This is a system for clerics, since it involves intercession with the spiritual world and constrains the kind of magic that can be worked.

Kami are spirits; virtually everything has a spirit, from the table to plants to bugs. To effect simple spell, all the cleric has to do is reach into the spirit world and pull a kami's essence into the real world. Pulling a firefly kami into the real world might effect a light spell, for example.

Design considerations:

Strength

Great flexibility for players.

Balancing Forces

The kami present and thus the spells available are determined by the current environment. No long distance magic unless delivered by a weapon. Powerful spells can require negotiation and the doing of favors.

Similarities

RuneMagic, but dependent on the environment instead of on the known runes.

The dependence on the local spirits “available” to a would-be magic user is essential. No fireflies in a hall full of dancing drunkards. No exploding sulfur kami out in the woodlands without a burning torch or campfire nearby. In a way, it could work like controlling the fire spirit in the movie *Howl’s Moving Castle* (2004).

For more interesting applications, the essence of a kami can be bound to physical objects such as doors, animals, or weapons. Pulling a spider kami into the real world, binding it to an arrow, and hitting a target with it will do damage as normal and effect a fear spell involving webs and bugs and many spiders crawling out of the wound, into the victim’s face, and so on.

More powerful spells require more powerful spirits, which might request the doing of a favor before effecting spells. Evil effects might require evil kami which may be interested in cheating the cleric unless successfully threatened by even bigger bullies. This is why evil kami magic usually involves something akin to selling your soul to evil demons... Enlisting the help of well-meaning kami, on the other hand, might entail some questing on their behalf.

If high-powered magic is controlled via such negotiations, it should not be necessary to take alignment into account. Any kami will serve, if either forced (if weak) or convinced (if strong).

The effect of kami magic is usually one HD affected per spell level, one die of damage done per spell level, or similar. In dire need, it should be possible to invoke stronger spells, by negotiating with stronger kami, if the current environment is appropriate.

Clerics should prepare a list of commonly used kami & their effect when used (including their signature spells!) and refer to this list for quick reference during game play.

If you’re a cleric with very high DEX, you might want to play a Kami Archer. Almost all spells will be effected by binding kami to arrows and firing them at enemies. Any spell effected by binding a kami to an arrow and shooting the arrow at a target would be considered a signature spell. The binding to the arrow itself takes a single round for simple spells, and lasts for ten rounds, unless a separate binding spell is used. Thus, up to nine arrows can be prepared with simple spells and unleashed starting in the tenth round. Kamis can also be used to increase the range of arrows, fly around curves, etc.

Microlite20 MONSTER LIST

Skills: All creatures have a bonus to all skills (Physical, Subterfuge, Knowledge and Communication) equal to their number of Hit Dice. If the creature is intelligent, add +3 to one skill. Add stat bonuses to suit and as logic dictates. This is intentionally kept open – if you need a sneaky bugbear, assign the +3 bonus to Subterfuge; if a warrior, give +3 to Physical; for a spell-caster assign the +3 to Knowledge or Communication and give levels of Mage or Cleric (see below).

Monster Advancement: To make a tougher monster, add more Hit Dice; each additional HD adds one to their skill and combat bonuses. For each doubling of the Hit Dice, increase the dice size for attacks (ie, d4->d6, d6->d8, etc). Alternatively, add class levels to intelligent monsters. Start with the base Hit Dice and add levels of Fighter, Rogue, Mage or Cleric as required.

Create your own: Assign Hit Dice (d8 for most things, d12 for Dragons and Undead). Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter, +3 bonus to one skill. Add stat bonuses to suit.

Animal

Badger: HD 1d8+2 (6 hp), AC 15, Claw +4 (1d2-1)
Black Bear: HD 3d8+6 (19 hp), AC 13, Claw +6 (1d4+4) or bite +1 (1d6+2)
Brown Bear: HD 6d8+24 (51 hp), AC 15, Claw +11 (1d8+8) or bite +6 (2d6+4)
Bison: HD 5d8+15 (37 hp), AC 13, Gore +8 (1d8+9)
Boar: HD 3d8+12 (25 hp), AC 16, Gore +4 (1d8+3)
Cat: HD ½d8 (2 hp), AC 14, Claw +4 (1d2-4)
Crocodile: HD 3d8+9 (22 hp), AC 16, Bite +6 (1d8+6) or tail slap +6 (1d12+6)
Dog: HD 1d8+2 (6 hp), AC 15, Bite +2 (1d4+1)
Donkey: HD 2d8+2 (11 hp), AC 13, Bite +1 (1d2)
Eagle: HD 1d8+1 (5 hp), AC 14, Talons +3 (1d4)
Giant Crocodile: HD 7d8+28 (59 hp), AC 16, Bite +11 (2d8+12) or tail slap +11 (1d12+12)
Horse (heavy): HD 3d8+6 (19 hp), AC 13, Hoof -1 (1d6+1)
Horse (light): HD 3d8+6 (19 hp), AC 13, Hoof -2 (1d4+1)
Mule: HD 3d8+9 (22 hp), AC 13, Hoof +4 (1d4+3)
Pony: HD 3d8+6 (19 hp), AC 13, Hoof -1 (1d6+1)
Snake (constrictor): HD 3d8+6 (19 hp), AC 15, Bite +5 (1d3+4), constrict (1d3+4)
Snake (giant constrictor): HD 11d8+14 (63 hp), AC 15, Bite +13 (1d8+10), constrict (1d8+10)
Snake (small viper): HD 1d8 (4 hp), AC 17, Bite +4 (1d2-2 plus poison)
Snake (medium viper): HD 2d8 (9 hp), AC 16, Bite +4 (1d4-1 plus poison)
Snake (large viper): HD 3d8+6 (19 hp), AC 15, Bite +4 (1d4 plus poison)
Snake (huge viper): HD 6d8+6 (33 hp), AC 15, Bite +6 (1d6+4 plus poison)

War Dog: HD 2d8+4 (13 hp), AC 16, Bite +3 (1d6+3)
Warhorse (heavy): HD 4d8+12 (30 hp), AC 14, Hoof +6 (1d6+4)
Warhorse (light): HD 3d8+9 (22 hp), AC 14, Hoof +4 (1d4+3)
Warpony: HD 2d8+4 (13 hp), AC 13, Hoof +3 (1d3+2)
Wolf: HD 2d8+4 (13 hp), AC 14, Bite +3 (1d6+1)
Ankheg
HD 3d10+12 (28 hp), AC 18, Bite +7 (2d6+7 plus 1d4 acid)
Assassin Vine
HD 4d8+12 (30 hp), AC 15, Slam +7 (1d6+7), constrict (1d6+7)
Bugbear
HD 3d8+3 (16 hp), AC 17, Morningstar +5 (1d8+2) or javelin +3 (1d6+2)
Choker
HD 3d8+3 (16 hp), AC 17, Tentacle +6 (1d3+3)
Cockatrice
HD 5d10 (27 hp), AC 14, Bite +9 (1d4-2 plus petrification, DC 12 phys+STR to negate)
Dinosaur
Deinonychus: HD 4d8+16 (34 hp), AC 16, Talons +6 (2d6+4) or bite +1 (2d4+2)
Megaraptor: HD 8d8+43 (79 hp), AC 16, Talons +9 (2d8+5) or bite +4 (2d6+2)
Triceratops: HD 16d8+124 (196 hp), AC 18, Gore +20 (2d8+15)
Tyrannosaurus: HD 18d8+99 (180 hp), AC 14, Bite +20 (3d6+13)
Dire Animal
Dire Bear: HD 12d8+51 (105 hp), AC 17, Claw +19 (2d4+10) and bite +13 (2d8+5)
Dire Rat: HD 1d8+1 (5 hp), AC 15, Bite +4 (1d4 plus disease)
Dire Wolf: HD 6d8+18 (45 hp), AC 14, Bite +11 (1d8+10)
Dragon
Young Red: HD 13d12+39 (123 hp), AC 21, Bite +20 (2d6+7) or Breath 10d10 DC24 phys+DEX to dodge for half
Very Old Red: HD 31d12+248 (449 hp), AC 36, Bite +40 (4d6+13) or breath 18d10 fire, DC 33 phys+DEX to dodge for half
Adult Gold: HD 23d12+115 (264 hp), AC 30, Bite +32 (2d8+11) or breath 12d10 fire, DC 26 phys+DEX to dodge for half
Young Adult Silver: HD 19d12+79 (202 hp), AC 28, Bite +24 (2d6+6) or breath 10d8 cold, DC 23 phys+DEX to dodge for half
Dwarf
HD 1d8+2 (6 hp), AC 16, Waraxe +3 (1d10+1) or shortbow +1 (1d6)
Earth Elemental (large)
HD 8d8+32 (68 hp), AC 18, Slam +12 (2d8+7)
Elf
HD 1d8 (4 hp), AC 15, Longsword +2 (1d8+1) or longbow +3 (1d8)
Gargoyle
HD 4d8+19 (37 hp), AC 16, Claw +6 (1d4+2)

Gelatinous Cube

HD 4d10+32 (54 hp), AC 3, Slam +1 (1d6 +1d6 acid) plus engulf (paralysis + 1d6 acid/round, DC 13 phys+DEX to negate)

Ghoul

HD 2d12 (13 hp), AC 14, Bite +2 (1d6+1 plus paralysis) or claws +0 (1d3 plus paralysis)

Gnoll

HD 2d8+2 (11 hp), AC 15, Battleaxe +3 (1d8+2) or shortbow +1 (1d6)

Goblin

HD 1d8+1 (5 hp), AC 15, Morningstar +2 (1d6) or javelin +3 (1d4)

Griffon

HD 7d10+21 (59 hp), AC 17, Bite +11 (2d6+4)

Halfling

HD 1d8+1 (5 hp), AC 16, Shortsword +3 (1d6) or light crossbow +3 (1d6)

Hellhound

HD 4d8+4 (22 hp), AC 16, Bite +5 (1d8+1 plus 1d6 fire)

Hill Giant

HD 12d8+48 (102 hp), AC 20, Greatclub +16 (2d8+10) or rock +8 (2d6+7)

Hobgoblin

HD 1d8+2 (6 hp), AC 15, Longsword +2 (1d8+1) or javelin +2 (1d6+1)

Human Commoner

HD 1d8+1 (5 hp), AC 12, Dagger +1 (1d6+1) or sling +1 (1d4)

Kobold

HD 1d8 (4 hp), AC 15, Spear +1 (1d6-1) or sling +3 (1d3)

Lizardfolk

HD 2d8+2 (11 hp), AC 15, Claw +2 (1d4+1) or club +2 (1d6+1) or javelin +1 (1d6+1)

Nymph

HD 6d6+6 (27 hp), AC 17, Dagger +6 (1d4) or stunning glance (unable to act for 2d4 rounds, DC 17 phys+STR to negate)

Ogre

HD 4d8+11 (29 hp), AC 16, Greatclub +8 (2d8+7) or javelin +1 (1d8+5)

Orc

HD 1d8+1 (5 hp), AC 13, Falchion +4 (2d4+4) or javelin +1 (1d6+3)

Otyugh

HD 6d8+9 (36 hp), AC 17, Tentacle +4 (1d6 plus disease)

Owlbear

HD 5d10+25 (52 hp), AC 15, Claw +9 (1d6+5)

Rust Monster

HD 5d8+5 (27 hp), AC 18, Antennae touch +3 (rust)

Shadow

HD 3d12 (19 hp), AC 13, Incorporeal touch +3 (1d6 Str)

Shambling Mound

HD 8d8+24 (60 hp), AC 20, Slam +11 (2d6+5), constrict (2d6+7)

Skeleton Warrior

HD 1d12 (6 hp), AC 15, Scimitar +1 (1d6+1) or claw +1 melee (1d4+1)

Stirge

HD 1d10 (5 hp), AC 16, Touch +7 (attach)

Stone Golem

HD 14d10+30 (107 hp), AC 26, Slam +18 (2d10+9)

Treant

HD 7d8+35 (66 hp), AC 20, Slam +12 (2d6+9)

Troll

HD 6d8+36 (63 hp), AC 16, Claw +9 (1d6+6)

Vampire Spawn

HD 4d12+3 (29 hp), AC 15, Slam +5 (1d6+4 plus energy drain -1 level, DC 14 phys+STR to negate) or blood drain (-1d4 STR)

Vermin

Monstrous Scorpion (tiny): HD ½d8+2 (4 hp), AC 14, Claw+2 (1d2-4) or sting -3 (1d2-4 plus poison)

Monstrous Scorpion (small): HD 1d8+2 (6 hp), AC 14, Claw+1 (1d3-1) or sting -4 (1d3-1 plus poison)

Monstrous Scorpion (large): HD 5d8+10 (32 hp), AC 16, Claw+6 (1d6+4) or sting +1 (1d6+2 plus poison)

Monstrous Scorpion (huge): HD 10d8+30 (75 hp), AC 20, Claw+11 (1d8+6) or sting +6 (2d4+3 plus poison)

Monstrous Spider (tiny): HD ½d8 (2 hp), AC 15, Bite +5 (1d3-4 plus poison)

Monstrous Spider (small): HD 1d8 (4 hp), AC 14, Bite +4 (1d4-2 plus poison)

Monstrous Spider (large): HD 4d8+4 (22 hp), AC 14, Bite +4 (1d8+3 plus poison)

Monstrous Spider (huge): HD 8d8+16 (52 hp), AC 16, Bite +9 (2d6+6 plus poison)

Wererat

Human Form: HD 2d8+3 (12 hp), AC 15, Rapier +2 (1d6+1) or light crossbow +1 (1d8)

Dire Rat Form: HD 2d8+3 (12 hp), AC 17, Bite +6 (1d4+1 plus disease)

Hybrid Form: HD 2d8+3 (12 hp), AC 16, Rapier +5 (1d6+1) or light crossbow +4 (1d8)

Werewolf

Human Form: HD 3d8+7 (20 hp), AC 17, Longsword +3 (1d8+1) or light crossbow +2 (1d8)

Wolf Form: HD 3d8+7 (20 hp), AC 16, Bite +5 (1d6+3)

Hybrid Form: HD 3d8+7 (20 hp), AC 16, Claw +4 (1d4+2)

Wight

HD 4d12 (26 hp), AC 15, Slam +3 (1d4+1 plus energy drain)

Wraith

HD 5d12 (32 hp), AC 15, Incorporeal touch +5 (1d4 plus -1d6 STR, DC 14 phys+STR to negate)

Wyvern

HD 7d12+14 (59 hp), AC 18, Sting +10 (1d6+4 plus poison) or Talon +10 (2d6+4) or Bite +10 (2d8+4)

Zombie

HD 2d12+3 (16 hp), AC 11, Slam +2 (1d6+1) or club +2 melee (1d6+1)

1. Definitions: (a)"Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b)"Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) Distribute means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; (d)"Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

15. **Slay Living:** Touch attack kills subject.
16. **Spell Resistance:** Subject gains SR 12 + level.
17. **Summon Monster V:** Calls extraplanar creature to fight for you.
18. **Symbol of Pain:** Triggered rune wracks nearby creatures with pain (60'radius, -4 on all rolls for 1 hour).
19. **Symbol of Sleep:** Triggered rune puts nearby creatures under 10 HD into catatonic slumber for 3d6x10 minutes.
20. **True Seeing:** Lets you see all things as they really are including in darkness, invisible, polymorphed etc. but not mundane events like being physically hidden, in disguise etc.
21. **Unhallow:** Designates location as unholy for a year. Turning undead attempts suffer a -4 penalty and the area (40'radius) acts as a magic circle against good.
22. **Wall of Stone:** Creates a stone wall that can be shaped (5' square and 2 inches thick per level).

6TH-LEVEL CLERIC SPELLS

1. **Animate Objects:** Objects (1 per level within 100'+ 10'/ level) attack your foes for 1 round per level.
2. **Antilife Shell:** 10-ft. field hedges out living creatures for 10 minutes / level.
3. **Banishment:** Banishes 2 HD/level of extraplanar creatures within 25'+ 5'/ level back to their home plane.
4. **Bear's Endurance, Mass:** As *bear's endurance*, affects one subject/ level for 1 minute / level within 25'+ 5'/per 2 levels.
5. **Blade Barrier:** Wall of blades (20'long per level and 20'high) deals 1d6/level damage for 1 minute per level. A DEX + subterfuge roll halves the damage if passed.
6. **Bull's Strength, Mass:** As *bull's strength*, affects one subject/level within 25'+ 5'/ 2 levels, for 1 minute / level.

7. **Create Undead:** Create ghosts (levels 12 to 14), mummies (15-17), or mohrgs (18+) from a touched corpse.
8. **Cure Moderate Wounds, Mass:** Cures 2d8 damage +1/level for 1 creature / level.
9. **Eagle's Splendour, Mass:** As *eagle's splendour*, affects one subject/level.
10. **Find the Path:** Shows most direct way to a location.
11. **Forbiddance :** Blocks planar travel within a 60'cube within 100'+ 10'per level.
12. **Geas/Quest:** As *lesser geas*, plus it affects any creature of any HD and suffers 3d6 damage each day it does not attempt to fulfil quest.
13. **Glyph of Warding, Greater:** As *glyph of warding*, but up to 1d8 damage / level.
14. **Harm:** Deals 10-points/level damage to a touched target. A save halves this damage.
15. **Heal:** Cures 10 points/level of damage, all diseases and mental conditions on touched subject.
16. **Heroes' Feast:** Food for one creature/level. This cures all diseases, makes you immune to poison, adds 1 temporary HP / level and grants a +1 to all rolls. This lasts for 12 hours..
17. **Inflict Moderate Wounds, Mass:** Deals 2d8 damage +1/level to 1 creature / level within 25'+ 5'per 2 levels.
18. **Owl's Wisdom, Mass:** As *owl's wisdom*, affects one subject/level within 25'+ 5' / level for 1 minute / level.
19. **Planar Ally :** As *lesser planar ally*, but up to 12 HD.
20. **Summon Monster VI:** Calls extraplanar creature to fight for you.
21. **Symbol of Fear :** Triggered rune panics nearby creatures (1 per level, 60' radius) for 1 round per level.
22. **Symbol of Persuasion :** Triggered rune charms nearby creatures (1 per level,60' radius) for 1 hour per level.
23. **Undeath to Death :** Destroys 1d4 HD/level of undead within 40'radius (max 20d4).
24. **Wind Walk:** You and your allies (1 per 3 levels) turn vaporous and travel fast (60 mph for 1 hour per level).
25. **Word of Recall:** Teleports you back to designated place with any willing touched or touching others.

7TH-LEVEL CLERIC SPELLS

1. **Blasphemy:** Kills (if subject is 10 HD lower than caster) , paralyses (for 1d10 minutes if 5HD lower) , weakens (-2d6 STR for 2d4 rounds if 1 HD lower) or dazes (misses next round of actions) to all creatures within a 40 range and radius.
2. **Control Weather:** Changes weather in local area.
3. **Cure Serious Wounds, Mass:** Cures 3d8 damage +1/level for 1 creature / level within 25'+ 5'/ level.
4. **Destruction :** Kills subject and destroys remains instantly although a successful STR + physical roll reduces it to 10d6 damage.
5. **Dictum:** as Blasphemy except deafens instead of weakens.
6. **Ethereal Jaunt:** You become ethereal for 1 round/level.
7. **Holy Word:** as Blasphemy except it blinds instead of weakens.
8. **Inflict Serious Wounds, Mass:** Deals 3d8 damage +1/level to 1 creature / level within 25'+ 5'/ level.
9. **Refuge :** Alters item to transport its possessor to you upon speaking a command word and breaking item.
10. **Regenerate:** Subject's severed limbs grow back, cures 4d8 damage +1/level (max +35).
11. **Repulsion:** Creatures can't approach you within a range of 10'per level for 1 round per level.
12. **Restoration, Greater :** As *restoration*, plus restores all levels and ability scores.
13. **Resurrection :** Fully restore dead subject who cannot have been dead more than 10 years / level, cannot died of old age and loses a level or 1d4 STR if 1st level.
14. **Scrying, Greater:** As *scrying*, but 1 hour per level.
15. **Summon Monster VII:** Calls extraplanar creature to fight for you.
16. **Symbol of Stunning :** Triggered rune stuns nearby creatures within 60'radius for 1d6 rounds.
17. **Symbol of Weakness :** Triggered rune weakens nearby creatures by 3d6 STR (all

creatures without STR are reduced by 1d6 HD) for 10 minutes per level.

18. **Word of Chaos:** as Blasphemy except stuns (unable to take any action against another for 2d4 rounds) instead of weakens.

8TH-LEVEL CLERIC SPELLS

1. **Antimagic Field:** Negates all magic within 10 ft.
2. **Cloak of Chaos:** +4 to AC, +4 resistance, and SR 25 against spells from lawful creatures.
3. **Create Greater Undead:** Create shadows, wraiths, spectres, or devourers.
4. **Cure Critical Wounds, Mass:** Cures 4d8 damage +1/level for 1 creature / level within 25'+ 5' / level.
5. **Dimensional Lock:** Teleportation and interplanar travel blocked for one day/level.
6. **Discern Location:** Reveals exact location of creature or object.
7. **Earthquake:** Intense tremor shakes 80-ft.-radius.
8. **Fire Storm:** Deals 1d6/level fire damage at a range of 100'+ 10' / level with 2 10'cubes per level.
9. **Holy Aura:** as Cloak of Chaos except against evil creatures .
10. **Planar Ally, Greater :** As *lesser planar ally*, but up to 18 HD.
11. **Inflict Critical Wounds, Mass:** Deals 4d8 damage +1/level for 1 creature / level within 25'+ 5' / level.
12. **Shield of Law:** as Cloak of Chaos except against chaotic creatures.
13. **Spell Immunity, Greater:** As *spell immunity*, but up to 8th-level spells.
14. **Summon Monster VIII:** Calls extraplanar creature to fight for you.
15. **Symbol of Death:** Triggered rune slays nearby creatures (60'radius).
16. **Symbol of Insanity:** Triggered rune renders nearby creatures insane (60'radius).
17. **Unholy Aura:** as Cloak of Chaos except against good creatures.

9TH-LEVEL CLERIC SPELLS

1. **Astral Projection:** Projects you and companions onto Astral Plane.
2. **Energy Drain:** Subject gains 2d4 negative levels for 24 hours.
3. **Etherealness:** Travel to Ethereal Plane with companions.
4. **Gate:** Connects two planes for travel or summoning.
5. **Heal, Mass:** As *heal*, but ALL afflictions from 1 creature / level within 25'+ 5' / level.
6. **Implosion:** Kills one creature/round for 1 round / level with 25'+ 5' / 2 levels.
7. **Miracle:** Requests a deity's intercession (see game master).
8. **Soul Bind:** Traps newly dead soul to prevent *resurrection*, *true resurrection*, *miracle*, *wish* etc. within 1 round / level of creature dying and within 25'+ 5' / 2 levels.
9. **Storm of Vengeance:** Storm rains acid (1d6 damage), lightning (6 bolts, 10d6 damage, different targets), and hail (5d6 damage), deafens all within 360'radius and 400'+ 40' / level range.
10. **Summon Monster IX:** Calls extraplanar creature to fight for you.
11. **True Resurrection:** As *resurrection* but within 10 years per level of the creatures death and you must be able to identify exactly who the creature was. Remains are not needed.

And finally, a note about All **SUMMON MONSTER** spells.

- The summoning of a monster out of nothing to do your will lasts for 1 round / level.
- The monster has a number of HD equal the caster level that is required to cast the spell.
- The monster's AC equals 10 + (monster's HD / 2, round up)
- The monster inflicts damage equal to 1d8 plus half it's number of HD (round down)
- Each spell allows the caster to summon, instead of 1 monster from that spell, 1d3 monsters from the previous spell level or 1d4+1 monsters from the level below that.
- The monster always looks like a creature that reflects the caster's philosophies, beliefs and associations. I.E. an evil caster's monsters may look like demons, a naturalist caster's as a glowing animal and a pious caster's monsters appear as glowing balls of light.

Psionics

Psionics are powers of the mind – made manifest through intense concentration. This rule-set introduces new races, classes, a new skill, and, of course, psionic powers as well as psionic monsters and items.

RACES

Dromites are insect-like humanoids and get a +3 natural armor bonus to **AC**.

Druegars are dwarves of the deep and get a +2 to **STR**.

Elans, humanoid aberrations, get a +1 bonus to all **saves**.

Half-Giants get a +4 **STR** and –2 **DEX**.

CLASSES

Psion

Masters of the mind, they wear no armor. They can manifest Psion powers and gain a +2 to Knowledge and +2 Concentration.

Psychic Warrior

Disciples of the body and mind, they wear any kind of armor and use shields. They can manifest Psychic Warrior powers and gain a +2 to Physical and +2 to Concentration.

SKILLS

Concentration

Concentration is a new skill used for things like focusing on a task, ignoring distractions and pain, making **Will saves** (Concentration + **MIND**), etc. Only Psions and Psychic Warriors are specialized in this skill.

Focus

By meditating for a full round and making a successful Concentration + **MIND** check vs. DC 20, a psionic character can gain focus. This focus remains until it is expended. The focus can be expended to add 1d6 to a single roll.

STARTING WEALTH

You begin with a certain amount of wealth depending upon your psionic character class.

Class	Amount
Psion	75 gp
Psychic Warrior	125 gp

Fast Packs

Instead of starting wealth, you may wish to use the fast packs option. Both the Psion and Psychic Warrior use the Fighter's fast pack entry.

Microlite

This is a skimmed version of the Primary Fantasy SRD rules for psionics. It has been designed for the Microlite20 system by Robin V. Stacy, Darrell King & Al Krombach. Both are available at <http://www.microlite20.net/>.

POWERS

Psionic characters can manifest any of their powers, so long as the power level is equal or below ½ their class level, rounded down (unlike spellcasters, who round-up).

Manifesting Powers

Manifesting a power costs Hit Points. The base cost is:

Power Level	Base HP Cost
1	1
2	3
3	5
4	7
5	9
6	11
7	13
8	15
9	17

Unlike spells, all aspects of a power do not automatically scale with level. Instead, they are augmented with additional Hit Points (**HP**). The augmenting HP cost is noted under each power's entry in the SRD.

The combined hit point cost for manifesting and augmented a power cannot exceed the character's psionic class level. Thus, a 3rd level psychic could manifest a level one power by spending 1 hit point, and augment it by spending 2 additional hit points for a total hit point cost of 3.

The hit points lost through manifesting and augmenting powers cannot be healed normally. They are recovered after 8 hours of rest.

Temporary hit points cannot be used to manifest powers.

Power Difficulty Class

The Difficulty Class (**DC**) for all powers is:

$$10 + \text{Psionic Level} + \text{Psionic's MIND bonus}$$

Psionic vs. Magical Effects

Powers interact with spells and spells interact with powers in the same way a spell or normal spell-like ability interacts with another spell or spell-like ability. For example, detect magic detects psionics and dispel psionics dispels magic.

Power Lists

1ST LVL PSION POWERS

Charm, Psionic: Makes one person a friend. *Duration:* 1 hr./lvl. *Augment:* 4 extra HP raises duration to 1 day/lvl.

Control Object: Telekinetically animate a small object. *Duration:* Concentration, up to 1 rd./lvl. *Augment:* None.

Detect Psionics: Detect the presence of psionics. *Duration:* Concentration, up to 1 min./lvl. *Augment:* None.

Mindlink: Forge a limited mental bond with another creature. *Duration:* 10 min./lvl. *Augment:* Each extra HP links another creature.

Mind Thrust: Deal 1d10 damage. *Duration:* Instant. *Augment:* Each extra HP adds 1d10 to damage.

Precognition: Gain +2 insight bonus to one roll. *Duration:* 10 min./lvl. *Augment:* None.

2ND LVL PSION POWERS

Clairvoyant Sense: See and hear a distant location. *Duration:* 1 min./lvl. *Augment:* None.

Cloud Mind: You erase knowledge of your presence from target's mind. *Duration:* 1 min./lvl. *Augment:* None.

Ego Whip: Deal 1d4 **MIND** damage and daze for 1 rd. *Duration:* Instant. *Augment:* Every 4 extra HP increases damage by 1d4 points and save DC by 2.

Identify, Psionic: Learn the properties of a psionic item. *Duration:* Instant. *Augment:* None.

Read Thoughts: Detect the thoughts of creatures in range. *Duration:* Concentration, up to 1 min./lvl. *Augment:* None.

Sensitivity to Psychic Impressions: Find out about an area's past. *Duration:* Concentration, up to 10 min./lvl. *Augment:* None.

3RD LVL PSION POWERS

Body Adjustment: You heal 1d12 damage. *Duration:* Instant. *Augment:* Every 2 extra HP heals an extra 1d12.

Dispel Psionics: Cancel psionic powers and effects. *Duration:* Instant. *Augment:* Each extra HP raises dispel check by 2.

False Sensory Input: Subject sees what isn't there. *Duration:* Concentration, up to 1 min./lvl. *Augment:* Every 2 extra HP affects another target.

Fate Link: Link the fates of two targets. *Duration:* 10 min./lvl. *Augment:* Every 2 extra HP raises DC by 1.

Psionic Blast: Stun creatures in 30-ft. cone for 1 rd. *Duration:* Instant. *Augment:* Every 2 extra HP raises duration by 1 rd.

Telekinetic Force: Move an object (up to 250 lbs.) with your mind. *Duration:* Concentration, up to 1 rd./lvl. *Augment:* Each extra HP raises weight limit by 25 lbs.

4TH LVL PSION POWERS

Control Body: Take rudimentary control of foe's limbs. *Duration:* Concentration, up to 1 min./lvl. *Augment:* Every 2 extra HP affects a target one size larger.

Death Urge: Target tries to kill itself. *Duration:* 1 rd. *Augment:* Every 4 extra HP raises save DC by 2 and duration by 1 rd.

Dimension Door, Psionic: Teleport short distance. *Duration:* Instant. *Augment:* 6 extra HP to manifest as a bonus action.

Mindwipe: Wipe a part of target's mind to reduce target's current level by 2. *Duration:* 1 hr. *Augment:* Every 2 extra HP raises DC by 2. Every 3 extra HP reduces an extra level.

Schism: Split your mind into two independent entities. *Duration:* 1 rd./lvl. *Augment:* None.

Telekinetic Maneuver: Telekinetically bull rush, disarm, grapple, or trip your target. *Duration:* Concentration, up to 1 rd./lvl. *Augment:* Every 2 extra HP grants a +1 bonus to maneuver checks.

5TH LVL PSION POWERS

Mind Probe: You discover the subject's secret thoughts. *Duration:* 1 rd./lvl. *Augment:* None.

Psychic Crush: Crush subject's mind, reducing subject to -1 hit points. *Duration:* Instant. *Augment:* Every two extra hit points increases save damage by 1d6 (base 3d6).

Second Chance: Gain a reroll. *Duration:* 1 rd./lvl, until discharged. *Augment:* None.

Shatter Mind Blank: Cancels target's *mind blank*. *Duration:* Instant. *Augment:* None.

Teleport, Psionic: Instantly teleport up to 100 miles/lvl. *Duration:* Instant. *Augment:* None.

True Seeing, Psionic: See all things as they really are. *Duration:* 1 min./lvl. *Augment:* None.

6TH LVL PSION POWERS

Cloud Mind, Mass: Erase knowledge of your presence from the minds of one creature/lvl. *Duration:* 1 min./lvl. *Augment:* None.

Co-opt Concentration: Take control of foe's power. *Duration:* Concentration, up to 1 rd./lvl. *Augment:* None.

Crystallize: Turn subject permanently to crystal. *Duration:* Permanent. *Augment:* None.

Null Psionics Field: Create a field where psionic power does not function. *Duration:* 10 min./lvl. *Augment:* None.

Restoration, Psionic: Restores level and stats from drains. *Duration:* 11. *Augment:* None.

Temporal Acceleration: Your time frame accelerates for 1 rd. *Duration:* 1 rd. (apparent time). *Augment:* Every 4 extra HP raises duration by 1 rd.

7TH LEVEL PSION POWERS

Ethereal Jaunt, Psionic: Become ethereal for 1 rd./lvl. *Duration:* 1 rd./lvl. *Augment:* None.

Fission: You briefly duplicate yourself. *Duration:* 1 rd./lvl. *Augment:* None.

Insanity: Subject is permanently confused. *Duration:* Instant. *Augment:* Every 2 extra HP raises save DC by 1 and affects another creature.

Moment of Prescience, Psionic: You gain an insight bonus equal to your psionic character level on a single attack roll, check, or save. *Duration:* 1 rd./lvl, until discharged. *Augment:* None.

Reddopsi: Powers targeting you rebound back. *Duration:* 10 min./lvl. *Augment:* None.

8TH LEVEL PSION POWERS

Astral Seed: You plant the seed of your rebirth from the Astral Plane. You return from death (even disintegration) after 10 days. *Duration:* Instant. *Augment:* None.

Hypercognition: You can deduce almost anything. *Duration:* Instant. *Augment:* None.

Mind Blank, Psionic: Subject immune to mental/emotional effects, scrying, and remote viewing. *Duration:* 1 day. *Augment:* None.

Time Hop, Mass: Willing subjects hop forward in time. *Duration:* 1 hr./lvl. *Augment:* 6 extra HP to instantly manifest the power (even when it's not your turn).

9TH LEVEL PSION POWERS

Assimilate: Inflict 20d6 damage and incorporate creature (fully or partially) into your own body. *Duration:* Instant or 1 hr. *Augment:* None.

Etherealness, Psionic: You and 1 creature/3 levels become ethereal. *Duration:* 1 min./lvl. *Augment:* None.

Microcosm: One creature (100 hp or less) or group of creatures (each 30 hp or less, totaling to 300 hp maximum) is trapped forevermore in world of own imagination (no saving throw). *Duration:* Instant. *Augment:* Each extra HP raises the hit point limit of target by 10.

Timeless Body: Ignore all harmful, and helpful, effects for 1 rd. *Duration:* 1 rd. *Augment:* None.

1ST LVL PSYCHIC WARRIOR POWERS

Call Weaponry: Call a weapon “from thin air” into your hand. *Duration:* 1 min./lvl. *Augment:* Every 4 extra HP grants a +1 enhancement bonus to the weapon.

Catfall: Instantly save yourself from a fall (as if fall was 10 ft. shorter). *Duration:* Until landing or 1 rd./lvl. *Augment:* Each extra HP makes the fall a further 10 ft. shorter.

Detect Psionics: You detect the presence of psionics. *Duration:* Concentration, up to 1 min./lvl. *Augment:* None.

Prescience, Offensive: Gain +2 insight bonus on your damage rolls. *Duration:* 1 min./lvl. *Augment:* Every 3 extra HP raises damage bonus by +1. 6 extra HP to manifest power as a bonus action.

Synesthete: You receive one kind of sense when another sense is stimulated. *Duration:* 10 min./lvl. *Augment:* None.

Vigor: Gain 5 temporary hit points. *Duration:* 1 min./lvl. *Augment:* Each extra HP gives 5 extra hit points.

2ND LVL PSYCHIC WARRIOR POWERS

Animal Affinity: Gain +4 to one stat. *Duration:* 1 min./lvl. *Augment:* Every 5 extra HP enhances another stat.

Body Adjustment: Heal 1d12 damage. *Duration:* Instant. *Augment:* Every 2 extra HP heals an extra 1d12.

Detect Hostile Intent: Detect hostile creatures within 30 ft. *Duration:* 10 min./lvl. *Augment:* None.

Hustle: Instantly gain a move action. *Duration:* Current round. *Augment:* None.

Sustenance: You can go without food and water for one day. *Duration:* Instant. *Augment:* None.

Wall Walker: You can walk on walls and ceilings. *Duration:* 1 min./lvl. *Augment:* None.

3RD LVL PSYCHIC WARRIOR POWERS

Dimension Slide: Teleport within line of sight. *Duration:* Instant. *Augment:* 4 extra HP to manifest power as a bonus action.

Empathic Feedback: When hit in melee, your attacker takes equal damage or 5 points of damage (whichever is less). *Duration:* 10 min./lvl. *Augment:* Each extra HP raises the damage potential by 1.

Evade Burst: Instantly take no damage on a successful Reflex save. *Duration:* Instant. *Augment:* 4 extra HP to only take half damage even on a failed save.

Graft Weapon: Gain +1 competence bonus to attack and damage with weapon and cannot be disarmed. *Duration:* 24 hrs. *Augment:* None.

Mental Barrier: Instantly gain +4 deflection bonus to AC (even when it's not your turn). *Duration:* 1 rd. *Augment:* Each extra HP raises the duration by 1 rd. Every 4 extra HP raises the AC bonus by 1.

Ubiquitous Vision: You have all-around vision. *Duration:* 10 min./lvl. *Augment:* None.

4TH LVL PSYCHIC WARRIOR POWERS

Energy Adaptation: Gain resistance 10 (20 at 9th level and 30 at 13th level). All energy attack damage is reduced by that amount. *Duration:* 10 min./lvl. *Augment:* 4 extra HP to manifest power as a bonus action.

Freedom of Movement, Psionic: You cannot be held or rendered immobile. *Duration:* 10 min./lvl. *Augment:* None.

Immovability: You are almost impossible to move (+20 to STR checks) and gain damage resistance 15. All physical attack damage is reduced by that amount. *Duration:* Concentration. *Augment:* 8 extra HP to manifest power instantly (even when it's not your turn).

Steadfast Perception: Gain immunity to illusory effects and a +6 bonus on skill checks to find or notice anything. *Duration:* 10 min./lvl. *Augment:* None.

Weapon of Energy: Deal an extra 1d6 damage of specific energy type (plus 1d10 on critical hit). *Duration:* 1 rd./lvl. *Augment:* None.

5TH LVL PSYCHIC WARRIOR POWERS

Adapt Body: Your body automatically adapts to hostile environments. *Duration:* 1 hr./lvl. *Augment:* None.

Catapsi: Characters must make a Will save or pay an extra 4 hit points to manifest a power, and psi-like abilities require a full round to use. You are not affected. *Duration:* 1 rd./lvl. *Augment:* Every 4 extra HP raises range and radius by 5 ft. (base 30 ft.)

Metaconcert: Link with up to 9 participants to manifest powers from their hit points. Each link boosts DC of manifested powers by 1. Everyone linked gains a +1 bonus to save vs. powers. *Duration:* 1 min./lvl. *Augment:* Each extra HP raises duration by 1 min.

Psychofeedback: Boost STR or DEX score by an amount up to your psionic class level, but lower MIND by a respective amount. *Duration:* 1 rd./lvl. *Augment:* None.

6TH LVL PSYCHIC WARRIOR POWERS

Breath of the Black Dragon: Breathe a cone of acid for 11d6 damage. *Duration:* Instant. *Augment:* Each extra HP increases damage by 1d6.

Dispelling Buffer: The DC to dispel your power is increased by +5. *Duration:* 1 hr./level. *Augment:* None.

Mind Blank, Personal: You are immune to scrying and mental effects. *Duration:* 1 day. *Augment:* None.

Suspend Life: Go into suspended animation (1 day passes for each year). *Duration:* Permanent unless ended or dismissed. *Augment:* None.

Psionic Spell Lists

6TH LEVEL ARCANESPELL

Probe Thoughts: Read subject's memories, one question/rd.

8TH LEVEL DIVINE SPELL

Brain Spider: Hear thoughts of up to eight other creatures.

Psionic Items

Cognizance Crystals

Cognizance crystals can store hit points that psionic characters can use to manifest powers. It can store an odd number of hit points between 1 and 17. Once the hit points are used, the crystal can be recharged on a 1-to-1 basis.

Crystal Weapons

As a free action, crystal weapons can be charged with 2 HP to deal 2d6 extra damage. The weapon will keep the charge for 1 minute or until it scores a hit.

Power Stones

A power stone stores a power, which can be used only once. To manifest the power, a check must be made (Concentration + MIND vs. DC 15 + power level of the stored power). The power must be on the user's power list. The stored power is always manifested at minimum level required to manifest the power.

Psicrystals

A psicrystal contains a fragment of a psyche's personality. A psionic character can bond with a psicrystal and gain a minor benefit related to its personality.

Personality	Benefit
Bully	+3 on Physical checks
Heroic	+2 on Fortitude saves
Poised	+2 on Reflex saves
Resolved	+2 on Will saves
Sneaky	+3 on Subterfuge checks
Stubborn	+3 on Concentration checks

Psionic Monsters

Blue (small goblinoid)

HD 1d4+2 plus 4 (8 hp); AC 16; quarterstaff +0 (1d4-2) or light crossbow (1d6); *mind thrust*.

Brain Mole (tiny magical beast)

HD 1d10-2 (3 hp); AC 14; bite +5 (1d3-4); *detect psionics*, *mind thrust*; burrow.

Cerebrilith (large outsider)

HD 9d8+63 (103 hp); AC 25 (DR 10/good, acid/fire/cold resistance 10, immune to electricity, PR 20); bite +14 (1d8+6); *detect psionics*, *telepathy*, *ego whip*; summon cerebrilith (35%).

Crysmal (small elemental)

HD 6d8+6 (33 hp); AC 21 (DR 5/bludgeoning, electricity resistance 15, immune to fire and cold); sting +7 (1d3+3); *control object*, *detect psionics*, *mind thrust*, *psionic dimension door*; burrow.

Folugub (medium aberration)

HD 4d8+12 (30 hp); AC 18; tongue touch +6 (liquefy crystal) or bite +1 (2d4); scent.

Intellect Devourer (small aberration)

HD 6d8+15 (42 hp); AC 21 (DR 10/adamantine, electricity resistance 14, immune to fire, PR 23, vulnerable to protection from evil); claw +6 (1d3+1); *cloud mind*, *detect psionics*, *ego whip*, *body adjustment*; blindsight, body thief.

Neothelid (gargantuan aberration)

HD 25d8+200 (312 hp); AC 28 (DR 5, PR 25); tentacle rake +24 (2d6+10) or acid breath (14d10) or swallow whole (2d8+14 plus 2d6 acid); *telekinetic force*, *telekinetic maneuver*, *psionic teleport*, *mind thrust*; blindsight.

Udoroot (huge plant)

HD 6d8+18 (45 hp); AC 11 (cold/fire resistance 10, immune to electricity); *false sensory input*, *mind thrust*, *telekinetic force*, *body adjustment*, *mental barrier*; double manifest, blindsight.

Unbodied (medium incorporeal humanoid)

HD 4d8+4 (22 hp); AC 13; incorporeal touch +5 (1d6); psion powers; fly.

Damage resistance (DR) is subtracted from physical attack damage.

Resistance (acid, cold, electricity, fire, or sonic) is subtracted from energy attack damage.

Power resistance (PR) is the DC that a manifester must beat to affect the target (d20 + psionic character level vs. PR).

Blindsight is the ability to 'see' without vision.

Body thief is the ability to physical take over a body.

Double manifest is the ability to manifest 2 powers at once.

Touch attacks ignore AC from armor and shields.

Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; (d) "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content You Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

END OF LICENSE

M20 Psionic Rules

Classes

Psions can wear light armour, but usually prefer to wear none. They can use psionic powers, and gain a +3 bonus to Knowledge

Psionics

Psions can use any power with a power level equal or below 1/2 their class level, rounded up. They have access to almost all Psion powers in the SRD powers list. Powers that deal with power points are unavailable only because power points are not used. (See Alternate Rule if you wish to use these powers.)

Unless otherwise stated in the power description, powers that do damage work once. All other powers last 1 minute per psion level.

Using a power of any kind costs Hit Points. The cost is 1 + double the level of the power being cast:

Power Level	1	2	3	4	5	6	7	8	9
HP Cost	3	5	7	9	11	13	15	17	19

This loss **cannot** be healed normally but is recovered after 8 hours rest. Just because a character can use any power, doesn't mean that they should. Choose powers that suit the character. Select one 'signature' power per power level from 1st upward that they prefer to use over any other. These powers are easier to use due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) for all powers is
10 + Caster Level + Caster's MIND bonus

Combat

The Psionic attack bonus is the same as the Magic Attack Bonus

Alternate Rule for Power Points

Some players may wish to include all powers, including those that pertain to power points. In that case, the Power Point pool starts as the MIND stat +4 points. At each level, the Psion gains 4 more power points (no roll).

If a Psion uses a power that would reduce their Power Points below zero, those points come from the MIND stat. MIND points heal at a rate of 1 point per 24 hours. If MIND is reduced to zero, the psion becomes an undead wight.

Psion Powers

NOTE: Any power with a line through it either deals with power points or has not been translated for M20 yet. Some offensive powers have been weakened from what is listed in the SRD.

1st-Level Psi-Powers

<i>Astral Traveller</i>	Enable yourself or another to join an <i>astral caravan</i> -enabled trip.
<i>Attraction</i>	Subject has an attraction you specify.
<i>Biofeedback</i>	All attacks against you have damage reduced by 2 points
<i>Bite of the Wolf</i>	Gain bite attack for 1d8 damage.
<i>Bolt</i>	You create a few enhanced short-lived bolts, arrows, or bullets.
<i>Burst</i>	Move twice as fast for one round.
<i>Call to Mind</i>	Gain +4 bonus to a Knowledge skill check.
<i>Call Weaponry</i>	Create temporary weapon.
<i>Catfall</i>	Instantly save yourself from a fall. Lessens damage of fall by 10ft/level.
<i>Chameleon</i>	Gain +10 bonus on Subterfuge rolls that involve hiding.
<i>Claws of the Beast</i>	Your hands become deadly claws doing 1d6 damage.
<i>Compression</i>	You grow smaller.
<i>Conceal Thoughts</i>	You conceal your motives.
<i>Control Flames</i>	Take control of nearby open flame.
<i>Control Light</i>	Adjust ambient light levels.
<i>Create Sound</i>	Create the sound you desire.
<i>Crystal Shard</i>	Ranged touch attack for 1d6 points of damage.
<i>Daze, Psionic</i>	Humanoid creature of 4 HD or less loses next action.
<i>Deceleration</i>	Target's speed is halved.
<i>Déjà Vu</i>	Your target repeats his last action.
<i>Demoralize</i>	Enemies become shaken.
<i>Detect Psionics</i>	You detect the presence of psionics.
<i>Disable</i>	Subjects incorrectly believe they are disabled.
<i>Dissipating Touch</i>	Touch deals 1d6 damage.
<i>Distract</i>	Target gets –4 penalty on anything that requires concentration.
<i>Ecto Protection</i>	An astral construct gains bonus against <i>dismiss ectoplasm</i> .
<i>Elfsight</i>	Gain low-light vision, +2 bonus to search for items and notice secret doors.
<i>Empathy</i>	You know the subject's surface emotions.
<i>Empty Mind</i>	Gain +2 on Will saves until your next action.
<i>Energy Ray</i>	Deal 1d6 energy (cold, electricity, fire, or sonic) damage.
<i>Entangling Ectoplasm</i>	You entangle a foe in sticky goo.
<i>Expansion</i>	Become one size category larger.
<i>Far Hand</i>	Move small objects at a limited distance.

<i>Float</i>	Buoy yourself in water or other liquid.
<i>Force Screen</i>	Invisible disc acts as a +4 shield.
<i>Grease, Psionic</i>	Makes 10-ft. square or one object slippery.
<i>Grip of Iron</i>	Your iron grip gives +4 bonus to hit in unarmed combat and hold on to objects.
<i>Hammer</i>	Translucent hammer appears in hand that deals 1d8/round.
<i>Inertial Armour</i>	Tangible field of force provides you with +4 bonus to AC.
<i>Know Direction and Location</i>	You discover where you are and what direction you face.
<i>Matter Agitation</i>	You heat a creature or object. After three rounds, does 1d6 damage per round.
<i>Metaphysical Claw</i>	Your natural weapon gains +1 bonus.
<i>Metaphysical Weapon</i>	Weapon gains +1 bonus.
<i>Mind Thrust</i>	Deal 1d10 damage for one action.
<i>Missive</i>	Send a one-way telepathic message to subject.
<i>My Light</i>	Your eyes emit 20-ft. cone of light.
<i>Precognition, Defensive</i>	Gain +1 to AC and saving throws.
<i>Precognition, Offensive</i>	Gain +1 to all attack rolls.
<i>Prescience, Offensive</i>	Gain +2 on damage rolls.
<i>Prevenom Armour</i>	Your weapon is mildly venomous.
<i>Prevenom</i>	Your claws gain a poison coating.
<i>Sense Link</i>	You sense what the subject senses (single sense).
<i>Skate</i>	Subject slides skillfully along the ground.
<i>Stomp</i>	Subjects fall prone and take 1d4 damage.
<i>Synesthete</i>	You receive one kind of sense when another sense is stimulated.
<i>Telepathic Projection</i>	Alter the subject's mood.
<i>Thicken Skin</i>	Gain +1 to AC for 10 min./level. This is cumulative to other powers.
<i>Vigour</i>	Gain 5 temporary hit points.

2nd-Level Psi-Powers

<i>Animal Affinity</i>	Gain +4 enhancement to one ability.
<i>Body Adjustment</i>	Heal 1d12 damage.
<i>Body Equilibrium</i>	You can walk on nonsolid surfaces.
<i>Body Purification</i>	Restore 2 points of ability damage.
<i>Cloud Mind</i>	You erase knowledge of your presence from target's mind.
<i>Concealing Amorphia</i>	Quasi-real membrane grants you concealment.
<i>Concussion Blast</i>	Deal 1d6 force damage to target.
<i>Control Sound</i>	Create very specific sounds.
<i>Darkvision, Psionic</i>	See 60 ft. in total darkness.
<i>Detect Hostile Intent</i>	You can detect hostile creatures within 30 ft. of you.
<i>Dimension Swap</i>	You and an ally switch positions.

<i>Dissolving Touch</i>	Your touch deals 4d6 acid damage.
<i>Dissolving Weapon</i>	Your weapon deals 4d6 acid damage.
<i>Ego Whip</i>	Deal 1d4 MIND (or CHA) damage and daze for 1 round.
<i>Empathic Transfer</i>	Transfer another's wounds to yourself.
<i>Energy Adaptation, Specified</i>	Ignore 10 points of damage/round against one energy type.
<i>Energy Push</i>	Deal 2d6 damage and knock subject back.
<i>Energy Stun</i>	Deal 1d6 damage and stun target if it fails both saves.
<i>Feat Leech</i>	Gain ability to use any level power from another psion.
<i>Hustle</i>	Instantly gain a move action.
<i>Id Insinuation</i>	Swift tendrils of thought disrupt and confuse your target.
<i>Identify, Psionic</i>	Learn the properties of a psionic item.
<i>Inflct Pain</i>	Telepathic stab gives your foe -4 on attack rolls, or -2 if he makes the save.
<i>Knock, Psionic</i>	Opens locked or psionically sealed door.
<i>Levitate, Psionic</i>	You move up and down, forward and back via mental support.
<i>Mental Disruption</i>	Daze creatures within 10 feet for 1 round.
<i>Missive, Mass</i>	You send a one-way telepathic message to an area.
<i>Painful Strike</i>	Your natural weapons deal an extra 1d4 damage.
Prowess	Instantly gain another attack of opportunity.
<i>Psionic Lion's Charge</i>	You can make full attack in same round you charge.
<i>Psionic Lock</i>	Secure a door, chest, or portal.
<i>Psionic Scent</i>	Gain the scent ability (like a dog).
<i>Recall Agony</i>	Foe takes 2d6 damage.
<i>Sense Link, Forced</i>	Sense what subject senses.
<i>Share Pain</i>	Willing subject takes some of your damage.
<i>Strength of My Enemy</i>	On successful hit, take one point of STR from target and add it to your own. Lasts 1 round/level.
<i>Sustenance</i>	Go without food and water for one day.
<i>Swarm of Crystals</i>	Crystal shards are sprayed forth doing 3d4 slashing damage.
<i>Thought Shield</i>	Gain PR 13 against mind-affecting powers.
<i>Tongues, Psionic</i>	You can communicate with intelligent creatures.
<i>Wall Walker</i>	Grants ability to walk on walls and ceilings.

3rd-Level Psi-Powers

<i>Claws of the Vampire</i>	On successful melee attack, heal half of your claw's base damage.
<i>Concealing Amorpha, Greater</i>	Quasi-real membrane grants you total concealment. 1 round/level
<i>Danger Sense</i>	Gain +4 bonus against traps.
<i>Darkvision, Psionic</i>	See 60 ft. in total darkness.
<i>Dimension Slide</i>	Teleports you very short distance.

<i>Dismiss Ectoplasm</i>	Dissipates ectoplasmic targets and effects.
<i>Dispel Psionics</i>	Cancels psionic powers and effects.
<i>Duodimensional Claw</i>	Critical hit with claw occurs on a roll of 19 or 20, instead of 20.
<i>Ectoplasmic Form</i>	You gain benefits of being insubstantial and can fly slowly.
<i>Empathic Feedback</i>	When you are hit in melee, your attacker takes damage.
<i>Empathic Transfer, Hostile</i>	Your touch transfers your hurt to another.
<i>Energy Bolt</i>	Deal 5d6 energy damage in 120-ft. line.
<i>Energy Burst</i>	Deal 5d6 energy damage in 40-ft. burst.
<i>Energy Retort</i>	Ectoburst of energy automatically targets your attacker for 4d6 damage once each round.
<i>Energy Wall</i>	Create wall of your chosen energy type.
<i>Eradicate Invisibility</i>	Negate invisibility in 50-ft. burst.
<i>Escape Detection</i>	You become difficult to detect with clairsentience powers.
<i>Evade Burst</i>	You take no damage from a burst on a successful DEX save.
<i>Exhalation of the Black Dragon</i>	Your acid breath deals 1d6/level damage to a close target. (Max damage 7d6)
<i>Graft Weapon</i>	Your hand is replaced seamlessly by your weapon.
<i>Keen Edge, Psionic</i>	Doubles normal weapon's threat range.
<i>Mental Barrier</i>	Gain +4 deflection bonus to Defence until your next action.
<i>Mind Trap</i>	Drain 1d6 hit points from anyone who attacks you with a telepathy power.
<i>Psionic Blast</i>	Stun creatures in 30-ft. cone for 1 round.
<i>Share Pain, Forced</i>	Unwilling subject takes some of your damage.
<i>Solicit Psicrystal</i>	Your psicrystal takes over your concentration power.
<i>Telekinetic Force</i>	Move an object with the sustained force of your mind.
<i>Telekinetic Thrust</i>	Hurl objects with the force of your mind.
<i>Time Hop</i>	Subject hops forward in time 1 round/level.
<i>Touchsight</i>	Your telekinetic field tells you where everything is.
<i>Ubiquitous Vision</i>	You have all-around vision.
<i>Vampiric Blade</i>	On a successful melee attack, you heal half of your base weapon damage.

4th-Level Psi-Powers

<i>Aura Sight</i>	Reveals creatures, objects, powers, or spells of selected alignment axis.
<i>Claw of Energy</i>	Your claws deal additional energy damage.
<i>Correspond</i>	Hold mental conversation with another creature at any distance.
<i>Death Urge</i>	Implant a self-destructive compulsion.
<i>Detect Remote Viewing</i>	You know when others spy on you remotely.

<i>Dimension Door, Psionic</i>	Teleports you short distance.
<i>Divination, Psionic</i>	Provides useful advice for specific proposed action.
<i>Empathic Feedback</i>	When you are hit in melee, your attacker takes damage.
<i>Energy Adaptation</i>	Your body converts energy to harmless light.
<i>Freedom of Movement, Psionic</i>	You cannot be held or otherwise rendered immobile.
<i>Immovability</i>	You are almost impossible to move and gain DR 15/-.
<i>Inertial Barrier</i>	Gain DR 5/-.
<i>Intellect Fortress</i>	Those inside fortress take only half damage from all powers and psi-like abilities until your next action.
<i>Mindwipe</i>	Subject's recent experiences wiped away, target loses 2 levels for 24 hours.
<i>Personality Parasite</i>	Subject's mind creates self-antagonistic splinter personality for 1 round/level.
<i>Power Leech</i>	Drain 1d6 power points/round while you maintain concentration; you gain 1/round.
<i>Psychic Reformation</i>	Subject can choose skills, feats, and powers anew for previous levels.
<i>Psychic Vampire</i>	Touch attack drains 2 power points/level from foe.
<i>Steadfast Perception</i>	Gain immunity to illusory effects, +6 bonus on Spot and Search checks.
<i>Telekinetic Manoeuvre</i>	Telekinetically bull rush, disarm, grapple, or trip your target.
<i>Trace Teleport</i>	Learn destination of subject's <i>teleport</i> .
<i>Truevenom Weapon</i>	Your weapon is horribly poisonous.
<i>Truevenom</i>	Your natural weapons are covered in horrible poison.
<i>Wall of Ectoplasm</i>	You create a protective barrier.
<i>Weapon of Energy</i>	Weapon deals additional energy damage.

5th-Level Psi-Powers

<i>Adapt Body</i>	Your body automatically adapts to hostile environments.
<i>Catapsi</i>	Psychic static inhibits power manifestation.
<i>Ectoplasmic Shambler</i>	Foglike predator deals 1 point of damage/two levels each round to an area.
<i>Incarnate</i>	Make some powers permanent.
<i>Leech Field</i>	Leech power points each time you make a saving throw.
<i>Major Creation, Psionic</i>	As <i>psionic minor creation</i> , plus stone and metal.
<i>Metaconcert</i>	Mental concert of two or more increases the total power of the participants.
<i>Oak Body</i>	Your body becomes as hard as oak.
<i>Plane Shift, Psionic</i>	Travel to other planes.
<i>Power Resistance</i>	Grant PR equal to 12 + level. If PR + Level is higher than 1d20 + manifestor's level, the power has no effect.
<i>Psychic Crush</i>	Brutally crush subject's mental essence, reducing subject to -1 hit points.

<i>Psychofeedback</i>	Boost STR or DEX at the expense of another score.
<i>Shatter Mind Blank</i>	Cancels target's <i>mind blank</i> effect.
<i>Tower of Iron Will</i>	Grant PR 19 against mind-affecting powers to all creatures within 10 ft. until your next turn.
<i>True Seeing, Psionic</i>	See all things as they really are.

6th-Level Psi-Powers

<i>Aura Alteration</i>	Repairs psyche or makes subject seem to be something it is not.
<i>Breath of the Black Dragon</i>	Breathe acid for 6d6 damage.
<i>Cloud Mind, Mass</i>	Erase knowledge of your presence from the minds of one creature/level.
<i>Co-opt Concentration</i>	Take control of foe's concentration power.
<i>Contingency, Psionic</i>	Sets trigger condition for another power.
<i>Disintegrate, Psionic</i>	Turn one creature or object to dust.
<i>Dispelling Buffer</i>	You are buffered from one <i>dispel psionics</i> effect.
<i>Form of Doom</i>	You transform into a frightening tentacled beast.
<i>Fuse Flesh</i>	Fuse subject's flesh, creating a helpless mass.
<i>Mind Blank, Personal</i>	You are immune to scrying and mental effects.
<i>Overland Flight, Psionic</i>	You fly at a speed of 40 ft. and can hustle over long distances.
<i>Remote View Trap</i>	Deal 8d6 points electricity damage to those who seek to view you at a distance.
<i>Retrieve</i>	Teleport to your hand an item you can see.
<i>Suspend Life</i>	Put yourself in a state akin to suspended animation.
<i>Temporal Acceleration</i>	Your time frame accelerates for 1 round.

7th-Level Psi-Powers

<i>Decerebrate</i>	Remove portion of subject's brain stem.
<i>Divert Teleport</i>	Choose destination for another's <i>teleport</i> .
<i>Energy Conversion</i>	Offensively channel energy you've absorbed.
<i>Energy Wave</i>	Deal 7d6 damage of your chosen energy type in 120-ft. cone.
<i>Evade Burst</i>	You take no damage from a burst on a successful Reflex save.
<i>Insanity</i>	Subject is permanently <i>confused</i> .
<i>Mind Blank, Personal</i>	You are immune to scrying and mental effects.
<i>Moment of Prescience, Psionic</i>	You gain bonus equal to level on a single attack roll, check, or save.
<i>Oak Body</i>	Your body becomes as hard as oak.
<i>Phase Door, Psionic</i>	Invisible passage through wood or stone.
<i>Sequester, Psionic</i>	Subject invisible to sight and remote viewing; renders subject comatose.
<i>Ultrablast</i>	Deal 1d6/level damage in 15-ft. radius.

8th-Level Psi-Powers

<i>Bend Reality</i>	Alters reality within power limits.
<i>Iron Body, Psionic</i>	Your body becomes living iron.
<i>Matter Manipulation</i>	Increase or decrease an object's base hardness by 5.
<i>Mind Blank, Psionic</i>	Subject immune to mental/emotional effects, scrying, and remote viewing.
<i>Recall Death</i>	Subject dies or takes 5d6 damage.
<i>Shadow Body</i>	You become a living shadow (not the creature).
<i>Teleport, Psionic Greater</i>	As <i>psionic teleport</i> , but no range limit and no off-target arrival.
<i>True Metabolism</i>	You regenerate 10 hit points/round.

9th-Level Psi-Powers

<i>Affinity Field</i>	Effects that affect you also affect others.
<i>Apopsi</i>	You delete target's psionic powers.
<i>Assimilate</i>	Incorporate creature into your own body.
<i>Etherealness, Psionic</i>	Become ethereal for 1 min./level.
<i>Microcosm</i>	Creature or creature lives forever more in world of his own imagination.
<i>Reality Revision</i>	As <i>bend reality</i> , but fewer limits.
<i>Timeless Body</i>	Ignore all harmful, and helpful, effects for 1 round.

Psionic Items

This is not the last word in Psionic Items. Feel free to make your own.

Psionic Armour Abilities

These abilities can be applied to armour, shields, or any other protective gear.

Gleaming This kind of Armour is usually made of crystal, though it doesn't have to be. Gleams and flashes from the Armour give the wearer and his Armour a "fuzzy" appearance, granting the wearer concealment.

Power Resistance This kind of Armour or shield grants the wearer power resistance while it is worn. The power resistance can be 13, 15, 17, or 19, depending on the amount that was built into the Armour or shield.

Quickness This kind of Armour increases the wearer's speed by 5 feet. Thus, a character whose normal speed in Armour is 20 feet moves 25 feet in Armour of quickness.

Radiant The wearer of this kind of Armour gains resistance 10 against energy attacks (acid, cold, electricity, fire, or sonic). The Armour absorbs the first 10 points of damage dealt by any such attack, and this absorption causes it to radiate light for a number of rounds equal to the points of damage absorbed. This light is sufficient to illuminate a 60-foot-radius area.

If the Armour absorbs more damage while it is radiating light, the newer radiant effect overlaps (does not stack with) the effect that was already in place.

Ranged The wielder of a ranged shield can throw it in combat, with a range increment of 30 feet. While in the air, the shield is treated in all ways as a ranged weapon and cannot be blocked or grabbed except by those with appropriate feats. No matter the size of the wielder, a buckler or light shield deals 1d6 points of damage and a heavy one 1d8 points. (A tower shield cannot be created with this special ability.) The wielder's Strength modifier and the shield's enhancement bonus add to the base damage.

A ranged shield flies through the air back to the creature that threw it. It returns to the wielder just before the creature's next turn (and is therefore ready to use again in that turn). If the wielder can't catch it, or if the wielder has moved since throwing it, the shield drops to the ground in the square from which it was thrown.

Time Buttress This kind of shield gives the wielder a chance to avoid telling blows by using time itself as a shield. Once per day, the wielder can use timeless body as though manifesting the power.

Vanishing On command, this suit of Armour or shield renders its wearer and all the wearer's equipment invisible to the minds of others, as if he had manifested the power cloud mind. The wearer can use this ability twice per day.

Psionic Weapon Abilities These special abilities can be applied to weapons of all kinds, melee and ranged, as well as firearms, where applicable.

Bodyfeeder All feeder weapons have a special ability that functions only upon scoring a successful critical hit. A bodyfeeder weapon grants its wielder temporary hit points equal to the total damage dealt by a successful critical hit. These temporary hit points last for 10 minutes. Thus, if the wielder of a bodyfeeder weapon successfully scores a critical hit while the wielder still enjoys temporary hit points from a previous critical hit, the wielder gains only the better of the two values: either his current number of temporary hit points, or the new influx of temporary hit points, whichever is higher.

Collision Collision weapons psionically increase their own mass at the end point of each swing or shot. Such weapons deal an extra 5 points of damage on each successful strike, in addition to the weapon's enhancement bonus. Bows, crossbows, and slings bestow the extra damage upon their ammunition.

Coup de Grace Coup de grace weapons are exceptionally dangerous. On a successful critical hit, the foe must succeed on a DC 27 Will save or be paralyzed for 1 round. While this ability does work on creatures that are immune to extra damage from critical hits, it does not work on creatures without an Intelligence score. Bows, crossbows, and slings bestow this ability on their ammunition.

Dislocator The wielder of this kind of weapon can attempt to dislocate a designated foe up to three times per day. On a successful hit, the foe must succeed on a DC 17 Will save or be teleported 1–100 wasted. Bows, crossbows, and slings bestow this ability on their ammunition.

Dissipater This kind of weapon is devastating to creatures and objects composed of or originally formed from ectoplasm (such as astral constructs, walls of ectoplasm, creatures in ectoplasmic form, and items created using the metacreativity discipline). Against qualifying targets, a dissipater weapon ignores damage reduction and hardness, and treats all successful hits as critical hits.

Great Dislocator The wielder of this kind of weapon can attempt to greatly dislocate a designated foe up to three times per day. On a successful hit, the foe must succeed on a DC 20 Will save or be cast into a random alternate plane of existence. If the weapon misses, the use is wasted. Bows, crossbows, and slings bestow this ability upon their ammunition.

Lucky A lucky weapon offers a second chance at success. Once per day, the wielder can reroll a failed attack roll (whether a single attack or one in a series of multiple attacks) as a free action. The rerolled attack uses the same bonuses or penalties as the missed roll.

~~*Minderusher* Any psionic creature struck in combat by a minderusher weapon loses a number of power points equal to half the amount of hit point damage the weapon deals (only the base damage of the weapon contributes to the power point loss; additional damage from high Strength or other sources does not cause additional power point loss). A psionic creature that is out of power points (or has none) must succeed on a DC 17 Will save or take 1d2 points of Wisdom damage.~~

~~*Mindfeeder* All feeder weapons have a special ability that functions only upon scoring a successful critical hit. A mindfeeder weapon grants its wielder temporary power points equal to the total damage dealt by a successful critical hit. These temporary power points last for 10 minutes. The wielder gains power points even if the target has none (effectively, its hit point damage is converted to power points). Constructs and undead are not subject to mindfeeder weapons. As with temporary hit points, temporary power points do not stack with each other; they overlap. Thus, if a mindfeeder weapon successfully scores a critical hit while the wielder still enjoys temporary power points from a previous critical hit, the wielder gains only the better of the two values: either her current number of temporary power points, or the new influx of temporary power points, whichever is higher.~~

Power Storing A power storing weapon allows a manifester to store a single targeted power of up to 3rd level in the weapon. Any time the weapon strikes a creature and the creature takes damage from it, the weapon can immediately manifest the power on that creature as a swift action if the wielder desires.

Once the power is manifested, the weapon is empty, and a manifester can imbed any other targeted power of up to 5 power points into it. The weapon telepathically whispers to the wearer the name of the power currently stored within it. A randomly generated power storing weapon has a 50% chance to have a power stored in it already.

Psibane A psibane weapon is crafted to oppose psionic beings. When used against such creatures, its effective enhancement bonus is 2 higher than its actual enhancement bonus. It deals an extra 2d6 points of damage against psionic opponents. It bestows one negative level on any psionic creature attempting to wield it.

This negative level remains as long as the weapon is in hand and disappears when the weapon is no longer wielded. This negative level never results in actual level loss, but it cannot be overcome in any way while the weapon is wielded. Psibane bows, crossbows, and slings bestow this ability upon their ammunition.

Psi-Power Storing A psi-power storing weapon allows a you to store a single, targeted psi-power of up to 3rd level in the weapon. You do not have to have the ability to manifest psi-powers to use this weapon. Any time the weapon strikes a creature and the creature takes damage from it, the weapon can immediately manifest the psi-power on that creature as a free action if the wielder desires.

Once the psi-power has been manifested from the weapon, anyone who can manifest psipowers can channel any other targeted psi-power of up to 3rd level into it. The weapon telepathically imparts to the wielder the name of the psi-power currently stored within it, but not the specific effects of that psi-power. A randomly rolled psi-power storing weapon has a 50% chance to have a psi-power stored in it already.

Psychokinetic Upon command, a psychokinetic weapon glows from the inside with lethal psionic energy. The energy does not harm the hands that hold the weapon. Such a weapon deals an extra 1d4 points of damage on a successful hit. This extra damage is ectoplasmic in nature and is not affected by damage reduction. Bows, crossbows, and slings bestow this ability upon their ammunition.

Psychokinetic Burst This weapon functions as a psychokinetic weapon that also releases a blast of destructive psionic energy upon scoring a successful critical hit. In addition to the extra damage of the psychokinetic ability (see above), a psychokinetic burst weapon deals an extra 1d6 points of damage on a successful critical hit. This extra damage is ectoplasmic in nature and is not affected by damage reduction. Bows, crossbows, and slings bestow this ability upon their ammunition.

Soulbreaker This weapon has a special ability that functions only upon scoring a successful critical hit. On a successful critical hit, a soulbreaker weapon bestows one negative level on the foe. One day after being struck, if the negative levels have not been purged, the subject must succeed on a DC 18 Fortitude save for each negative level or lose a character level.

Sundering This kind of weapon allows a wielder to attack opponents' weapons.

Suppression An opponent or object struck by this kind of weapon is subject to a targeted *dispel psionics* power. The wielder makes a power check (1d20 + 5 + manifester level, maximum +15) against a DC of 11 + the manifester level of the power to be dispelled. Bows, crossbows, and slings bestow this ability upon their ammunition, but can do so only three times per day.

Teleporting This ability can be imbedded only in weapons that can be thrown. A teleporting weapon returns through the Astral Plane to the creature that threw it. It teleports into the throwing creature's empty hand in the round following the round when it was thrown, just before that creature's turn. It is therefore ready to use again on that turn.

Md20 Age Level system

Max population ages, and corresponding levels, in yellow

Ages to reach levels; Coming-of-age-ages in blue box

Lvl	EL's	Humans+HalfX	Elves/Dwarves	Halflings	Orcs	Gnomes
1	0	16	32	25	10	5
2	10	18	35	27	11	10
3	30	22	42	32	13	20
4	60	28	52	40	17	35
5	100	36	65	50	22	55
6	150	46	82	62	28	80
7	210	58	102	77	36	110
8	280	72	125	95	45	145
9	360	88	152	115	55	185
10	450	106	182	137	66	230
11	550	126	215	162	78	280
12	660	148	252	190	92	335
13	780	172	292	220	107	395

17	1360	288	485	365	180	685
18	1530	322	542	407	201	770
19	1710	358	602	452	223	860
20	1900	396	665	500	247	955
21	2100	436	732	550	272	1055

Characters and NPCs gain levels simply by doing their jobs for a number of years. Slackers get nothing. The main goal is to populate the game world with higher level NPCs and give a more realistic feel to the world. Maximum levels encountered are in the yellow boxes. Adventurers or NPCs doing more dangerous jobs might gain levels more quickly

Humans come of age at 16 and gain 5ELs per year

Dwarves and Halflings come of age at 32 and gain 3ELs per year

Halflings come of age at 25 and gain 4ELs per year

Orcs come of age at 10 and gain 8ELs per year

Gnomes come of age at 5 and gain 2ELs per year

STATISTICS

Strength (STR), Dexterity (DEX) and Mind (MIND).

Stat bonus (STATb) = (stat - 10)/2, round down.

Roll 4d6, discard lowest to generate stats.

Hit Points (HP) = STR + 1d6/level.

SKILLS

Physical (PHYS), Subterfuge (SUB), Knowledge (KNOW) and Communication (COM)

Skills start at 1 + class or race bonus.

Skill roll = d20 + SKILL + STATb, where SKILL and STAT are determined by DM based on what character is trying to accomplish.

RACES

Human: +1 to all stats

Elf: +2 MIND

Dwarf: +2 STR

Halfling: +2 DEX

CLASSES

Fighter

+3 PHYS, +1 Attack and Damage, +1/5 levels

-1 to minSTR for all weapons and armor, -1/5 levels

Cleave: If fighter kills an opponent in melee, can attack another a adjacent opponent. No more than fighter level attacks per round.

Cleric

+3 COM

Casts divine Spells (no hp penalty from Armour).

No spellbook needed, knows all divine spells.

Turn undead: Magic attack vs. current HP of monster, 10 over DC destroys monster.

Rogue

+3 SUB, +1 Dodge, +1/5 levels.

Sneak attack: Melee attack when opponent is unaware, SUB added to attack damage.

Mage

+3 KNOW, +1MAGa + 1/5 levels

Casts arcane Spells

Can select 1 favored spell/level which costs -1 HP/cast.

Multiclass

Choose a different class on level-up. +3 skill bonuses only at 1st character level. Class benefits based on number of levels in that class, not total character level.

MAGIC

Clerics can cast any Divine spell and Mages can cast any Arcane spell in their spellbook with a spell level equal to or below ½ their class level, rounded up.

Mages start knowing 5 0-level spells and 3 1st level spells. More spells can be gleaned from spellbooks or teachers.

Casting a spell of any kind costs HP equal to 1 + (spell level * 2). This loss cannot be healed normally, but is recovered after 6 hours of rest.

For spells that require a hit, roll Magic attack vs Dodge.

For spells that allow a save, DC is 10 + caster level + MINDb

Sacrifice

Human sacrifice can fuel ritual casting, freeing the mage/cleric from harm, or enhancing the spell. Willing victims contribute 4x their HP.

Rituals

Any spell can be cast as a ritual. 1hr/spell level casting time reduces spell cost 1 hp /spell level. Multiple practitioners can cooperate and either split the hp cost or make the spell more effective or last longer. Effect or duration increases x1 for each doubling of casters.

Magic items

Wands store HP for use by spellcasters, sometimes with restrictions for which spells can be cast or what type of magic. Wands can be crafted in rituals costing 5 HP + 50GP + 1 hour of time per HP of power stored. Example: ring of Feather Fall costs 30 hp + 1000gp.

Magic items can be crafted by rituals costing (10 x spell cost) HP and (1000 * spell level) GP for each spell effect on the item. Groups of casters or human sacrifice make extremely powerful items possible.

COMBAT

Attack

Melee attack (MELa) = level + STRb or DEXb *

Missile attack (MISa) = level + DEXb

Magic attack (MAGa) = level + MINDb

*DEXb can only be used for MELa only up to the amount the character's STR exceeds the weapon's minSTR.

Determine which attack is being used, and add attack bonus to d20 roll. If higher than your opponents DEF, it's a hit. Natural 20 is always a critical hit (see below).

Critical hit: natural attack roll of 20 always hits, does max damage AND ignores armor DR.

Defense

Defense (DEF) = Dodge + Block

Dodge = 10 + DEXb,

Block = STRb + Shield bonus

Block is 0 unless a shield is equipped, or an offhand weapon is equipped, but not used for attacking (in which case -2 penalty still applies for main weapon attack).

Characters cannot use DEX instead of STR for block.

If a character/creature is targeted by multiple assailants in one round, DEF -1/attack for each attack beyond the 1st.

Touch attacks are rolled against Dodge only.

Equipment modifiers

Weapons and armor have a minimum strength to use without penalties. Armor provides damage resistance against all physical attacks, and shields boost blocking defense.

DR: subtract this from each hit taken to get total damage sustained.

Min STR: Player's effective DEXb = (STR - minSTR) or DEXb, whichever is lower. Can easily be negative.

HP penalty: Additional HP cost per arcane spell cast while wearing this armor.

MinSTR: If STR is less than minSTR, reduce MELa by the difference

and

DEXb can be used as MELa modifier only up to STR - minSTR

DEXb penalty: reduce DEXb by this amount while shield is equipped.

Characters cannot cast arcane spells while using shield.

Damage

Add STRb to melee damage, x2 if two-handed.

If HP reaches 0, character falls unconscious and near death. Further damage directly reduces STR. If STR reaches 0, character dies.

ADVANCEMENT

Encounter Level (EL) = HD of defeated foe +1 for each doubling of the number of similar foes.
 Add EL for each encounter to a running total. When character has 10 x level in EL, he advances and resets the EL total.
 If the new level is a multiple of 3, player adds 1 point to their choice of STR, DEX or MIND.
 Player adds 1 to base skill of class, +1 to any other skill.
 Roll 1d6 and add to hitpoints.
 Mage can change favored spell choices for all levels.

EQUIPMENT STATISTICS

Armor

General rule of thumb: minSTR = DR+10, and +HP/Spell = DR.
 To maintain D&D flavor, introduce exceptions and simply modify price, eg: chain shirt (DR4 | minSTR13 | -HP3), should cost double Scale Mail (DR4 | minSTR14 | -HP4).

Example armor table for D&D type game:

Armor	Cost	DR	Min STR
Padded	2 gp	1	11
Leather	10 gp	2	12
Studded Leather	25 gp	3	13
Chain Shirt	100gp	4	13
Hide	15gp	3	14
Scale Mail	50gp	4	14
Chainmail	150gp	5	15
Breastplate	200gp	5	14
Splint Mail	200gp	6	16
Banded Mail	250gp	6	16
Half-plate	600gp	7	17
Full Plate	1,500gp	8	18

Weapons

General weapon classes:

Damage	minSTR	Hands
1d4	None	1
1d6	11	1
1d8	13	1
1d10	15	2
2d6	17	2

1 or 2 hand modifiers:

If 1d6 or 1d8 dam weapon is wielded with 2 hands, it's minSTR is the class below it.
 Similarly, if a 1d10 or 2d6 weapon is wielded with one hand, it's minSTR is raised by 2.
 Eg. A staff does 1d6 damage and is used in two hands: minSTR = none. A dwarven waraxe does 1d10 damage and is wielded in 1 hand: minSTR = 17.

Shields

General shield classes:

Size	Block bonus	DEXb penalty
Light	0	-1
Heavy	2	-2
Tower	4	-3

RUNE MAGIC

Runes are the written form of the language of the gods. No mortal can speak them aloud--the sound would shatter their bones and blast their sanity. They were first carved into the bark of the World Tree, Yggdrasil, at the dawn of time. Everything that exists is represented by its own rune—rune magic is the grammar of reality.

Before a spell can be cast, you must learn the appropriate runes, which are then inscribed on an object. Runecasters will often inscribe runes on small tiles, usually made of ivory or stone, but any durable material will do.

Casting spells requires arranging the runes in the proper order.

Preparing a spell with rune tiles requires drawing forth the ruins in the proper order and holding them in your fist, a process that takes 1 round per rune used in the spell + or – your Dex bonus (minimum 1).

Casting a prepared spell is a normal action. You can prepare a pouch which holds nothing but the runes in the proper order--in this case, it takes one round to grab the runes from the pouch and the next to cast it.

Once you cast a spell, you either need to have spare runes to recast or you need to pick them back up.

Creating a rune tile requires knowledge of the rune in question and one day of craftsmanship, ritual and meditation.

Typically, spells require an Object Rune and an Action Rune, modified by Effect and other Runes.

Examples:

Object Runes: Fire, Ice, Trees, Man, Wolf, Dragon, Wood.

Action Runes: Blast, Summon, Hex, Glamour.

Effect Runes: Lesser, Major, Greater

Duration Runes: Brief, Extended, Eternal

Area of Effect Runes: Broad, Wide, Vast

Typical spells would look like this:

*Major Summon Troll Extended
Lesser Vast Ice Blast
Lesser Hex Wood*

Building a spell requires taking enough runes from each category to create the effect desired. For example, if you want to blast an enemy with fire, you might use the Fire, Blast and Lesser runes. If you replaced Fire with Ice,

you'd do an ice attack.

Effect, Duration and Area of Effect Runes are always listed from lesser to greater--to know a higher level Effect Rune, you must know the lower level ones as well. When counting runes to determine effects, you always count the lower level Effect Runes as well. For example, Major Wood Blast would be 2 for Wood and Blast, plus 2 for Major (Lesser + Major), for a total of 4 runes used.

You can combine any runes you know in any way, as long as it makes sense to do so. For example, if you have Blast, Fire, Snake, Ice and Lesser to begin with, but learn Hex later on, you can do a Lesser Ice Hex. Lesser Snake Blast wouldn't really make sense, though, unless your GM likes the idea of using snakes as projectile weapons.

Runes can also be carved permanently into an object, such as a wall, armor, a weapon, even trees or human skin--such runes take longer, anywhere from an hour to several days per rune, depending on the complexity of the spell and hardness of the object. Such spells are frequently inscribed with the Eternal rune. If they aren't, the runes fade away after the spell duration runs out, sometimes taking the object with them.

This can, however, change the context of the Action Runes. Blast might become Imbue and would grant a bonus or penalty based on the Object Rune, for example. The section on Action Runes has more detail.

Duration Runes determine how long a spell will endure. A spell with no duration rune lasts for an instant. **Brief** spells last a combat round for every level of the character + plus their Mind bonus. **Extended** spells last an hour for every level of the caster + plus their Mind bonus. **Eternal** spells last until the caster decides to end them or they are dispelled (with an appropriate Hex, no duration required, with an Effect equal to or larger than the spell being dispelled).

Unique runes only affect one being and are very powerful and difficult to find. A being's true name is never the name they go by on a daily basis. In fact, most of the time they aren't even aware of it themselves. If a Unique rune is used and has any quantifiable effect, double it if appropriate--damage, save DC, bonuses, whatever.

Process

Step 1: Choose Runes

Step 2: Cast Spell

Some spells may require a Dex-based to-hit roll to target. This is pretty much up to the GM and the specific spell. Otherwise, assume the spell is automatically cast.

A save is allowed when--

- a spell causes damage without requiring a to-hit roll. A save in this case cuts the damage to half.
- the spell causes unwanted change in a target. A save in this case negates the change.

If the target's a living creature, choose the most appropriate stat bonus + the most appropriate skill (usually Phys or Know). Resistance DC is equal the caster's level + Mind bonus +3.

Range is mostly touch to throwing distance, depending on the effect of the rune. Mostly just go with what's visually appropriate.

Step 3: Fatigue

Spell points are treated similarly to Microlite20. When casting a spell, roll 1d6 + 1 for each rune used. For runes that require knowledge of previous Runes, count those previous runes as well (e.g. Greater effect would count as 3 runes total, not one). For every maxed out effect (e.g. Greater, Eternal and Vast) rune, add another 1d6 damage.

Action Runes

Note: There are many, many runes. If a player wants a specific effect and none of the runes below seem to cover it, feel free to create more. *For example: Njal wants to stitch a pattern in his money pouch to prevent thieves from taking his coin. He wants the pouch to shock anyone who touches it and doesn't not want the duration to ever wear out. Lightning, Blast(Imbue), Lesser and Eternal are appropriate runes. However, this doesn't cover everything--something is still needed to trigger the effect. The GM invents a Guard rune which signifies a trigger--if anybody but the owner touches the pouch, they get blasted.*

Blast

Blast can't be used by itself--it requires an object to determine the type of damage. With no Effect rune, it only does 1 point of damage.

You can optionally add an additional Object rune to limit damage to to one type of target--in that case, add another die of damage. Other types of targets are unaffected.

Sample Runes: Fire, Ice, Stone, Lightning, Pain

Effect Runes: Lesser (1d6 + 1pt/level damage), Major ((1/2 Level)d6 damage), Greater (1d6/level damage)

Alternatively, an effect rune may cause a useful effect in combat not quantifiable in damage, such as inflicting a penalty to hit or knocking an opponent down.

Area of Effect: Broad (a few people), Wide (a field), Vast (a forest)

Duration: Adding a duration rune will cause the object of the spell to remain for the duration. For example, fire may continue to burn in the area affected for the duration. Blocks of ice may stay around and be useful for cover instead of melting immediately, and so on.

Inscribed: Becomes "Imbue". Examples: Greater Fire Imbue Undead Eternal inscribed on a weapon will light on fire any undead who come in contact with the weapon. The weapon will remain enchanted forever. Lesser Pain Imbue Brief means the weapon will cause additional damage, but the effect will disappear after a few minutes of combat and the weapon will go back to being unenchanted.

Appropriate bonuses for an Imbued item would be +1 for Lesser, +3 major, +6 Greater.

In some cases, an Inscribed Blast can act like a normal Blast, such as when setting a trap.

Cure

Can't be used by itself--requires an object. With no Effect rune, it only cures 1 point of damage.

Sample Runes: Man, Beast, Plague, Poison

Effect Runes: Lesser (1d6 + 1pt/level damage), Major ((1/2 Level)d6 damage), Greater (1d6/level damage)

Duration is always permanent.

Inscribed: Becomes a form of Ward that wards off plagues, poisons or aids in recovery rate.

Glamour

Creates illusions.

Build another spell that performs the effect you're trying but substitute Glamor for the spell rune. For example Glamour(Blast) Fire Lesser Wide on a building would duplicate an illusory house fire. You don't necessarily have to have the spell rune to be able to imitate it.

Building an illusory house would be Glamour(Summon) Wood Major Wide

Effect Runes: Lesser (ghostly), Major (looks real, but insubstantial), Greater (full tactile illusions, doesn't do any damage or actually move anything, but otherwise very, very real).

Inscribed: Effect unchanged.

Hex

Changes some part of your environment, including creatures.

Runes: Specific to the element of what you're trying to affect: Metal, Magic, Wood, Stone, Fire, Ice. Type of creatures: dragons, beasts, humans, insects, lizards.

Effect Runes: Lesser (superficial change), Major (significant change), Greater (fundamental change)

Duration Runes: Brief (a few minutes), Extended (a few hours), Eternal (lasts until dispelled)

Example: Lesser Hex Wood Brief on a door- warps the door so it jams shut. After a few moments it unjams. Major Hex Wood Extended on a door - the door swings open and stays that way, despite all efforts to close it. The door goes back to normal after a few hours. Greater Hex Wood Eternal- the door disappears as if it has never existed and never comes back.

Major Hex Air Water Man Extended might allow a human to breathe underwater. Add Vast to that spell, and you can gift an entire village with water breathing. Lesser Hex Man Wolf Eternal would permanently give a human minor wolf characteristics, such as pointed ears and a fur coat.

Summonings

Summons and Dispel various creatures and objects. You must know the Rune of anything you summon. To summon someone specific, you must know their unique rune. A creature that has been summoned will arrive as fast as it can--attempting to Summon a camel, for example, while you're at the north pole is a fruitless endeavor.

Requires Summon Rune, Type Rune, Effect and Duration Rune.

This can also dispel summoned creatures (but not naturally occurring ones).

Type Runes: Type of creatures: dragons, beasts, humans, undead, insects, lizards, etc.

Effect Runes: The general rule of thumb for Effect is **Lesser** = minor benefit in combat. **Major** = considerable benefit in combat. **Greater** = extreme benefit in combat--this is calling in the cavalry.

Note that these effects are relative to your own power level: A Summon Lesser Dragon Extended at level 1 might summon a fire drake the size of a dog. The same spell cast at level 20 might bring in a wyrm the size of a house.

Ward

Offers protection from something. Usually provides either an AC bonus (+1 Lesser, +3 Major, +6 Greater) or creates a barrier. Can be inscribed or cast.

Runes: Specific to what you're warding against or creating the ward from. Air Ward, for example could be against air elementals or creating a barrier **from** air.

Effect Runes: Lesser (equal to strength to a wooden shield), Major (equal in strength to a metal shield), Greater (a fortified wall)

The Runecaster Class

Starts with 2+Mind bonus runes, of which at least 1 must be an Action and 1 must be an Object rune. Runecasters gain 1 additional rune per level.

Every level evenly divisible by 3, runecasters may choose one of their known runes and make it a favored rune. Favored runes are never counted when calculating fatigue. Effect runes can't be chosen as favored runes.

Runecasters' favored skill is Knowledge and they can use medium armor and any weapon.

Great Sacrifice. Sacrifice is at the core of the runecaster's religion and represents the lengths at which they will go for the quest for knowledge. This has three major ramifications:

Every time they gain a rune from leveling up, they gain one scar. Scars have no game effects. Just keep a running tally for flavor.

A runecaster can deliberately inflict HP damage to themselves to increase the effect of their magic. If they have more than 10 HP after successfully casting a spell, they can injure themselves in a dramatic and bloody way. Doing so immediately takes them down to 1 HP, but the spell's effects are doubled. They also gain one scar (as above), if they pass a DC 15 saving throw. If they fail the saving throw, they take a lasting injury (as below).

Knowledge. A runecaster can undertake a week long ritual for knowledge. At the end of which they either gain 5 normal runes or 1 unique rune. One of these runes is automatically a favored rune.

In exchange for this, at the end of the week long spirit journey, they will have only 1 hit point left and will be scarred in a game-impacting way, whether it be a missing eye, loss of a hand or foot, 2 points taken from Strength or Dex, whatever.

ELEMENTAL MAGIC

by Darth Cestual

Elemental spellcasters can cast any elemental spell, but choose 1 favored element; Air (A), Earth (E), Fire (F), or Water (W) as their domain. Domain spells are treated as Signature Spells as in Microlite20. Some spells fall under more than 1 domain. Non-designated spells are treated normally as spells of that level from M20. All Elemental spellcasters have Endure Elements: Exist comfortably in hot or cold environments, no protection from fire or cold damage as a free ability. These are not all the spells available, but have been limited to these selections in keeping with Microlite20. Duration based spells are assumed to last to the end of the scene, or 10 minutes per level, unless otherwise noted.

0 level Spells

Create Water: (W) creates 2 gallons/level of pure water (or ½ gallon in the Dark Sun setting)

Flare: (F) Dazzles on target (-1 on attack rolls)

Message: (A) whispered conversation at distance, 100ft+10ft/level

Resistance: (E) Subject gains +1 on saving throws

1st level Spells

Burning Hands: (F) 1d4/level fire damage (max 5d4)

Feather Fall: (A) Targets fall slowly, until landing or 1 round/level

Jump: (A) Subject gets bonus on Jump checks (+1/level)

Magic Stone: (E) Three stones gain +1 on attack, deal 1d6+1 damage

Obscuring Mist: (W) Fog surrounds you, 20ft height & radius

Produce Flame: (F) 1d6 damage +1/level, touch or thrown

2nd level Spells

Flame Blade: (F) Touch attack deals 1d8+1/two levels damage

Fog Cloud: (W) Fog obscures vision, 20ft high x 20ft radius, concealment, 20% miss over 5ft

Gust of Wind: (A) Blows away (1d6x5ft) and/or knocks down, 1d4 nonlethal/10ft

Pyrotechnics: (F) Turns fire into blinding light or choking smoke, -4 on rolls for 1d4 rounds

Soften Earth & Stone: (E) Turns stone to clay or dirt to sand or mud, 10cu ft/level

Sound Burst: (A) Deals 1d8/level sonic damage to subjects, may stun them, 50% chance

3rd level Spells

Fireball: (F) 1d6 damage/level, 20 ft radius

Fly: (A) Subject flies at speed of 60ft

Gaseous Form: (A) Subject becomes insubstantial and can fly slowly, 2mins/level

Meld into Stone: (E) You and your gear merge with stone

Stone Shape: (E) Sculpts stone into any shape, 10cu ft+1/level

Water Breathing: (W) Subjects can breathe underwater

4th level Spells

Fire Shield: (F) Creatures attacking you take 1d6/level fire damage, you're protected from heat or cold

Ice Storm: (W) Hail deals 5d6 damage 40ft area

Stoneskin: (E) Ignore 10 points of damage per attack

Wall of Fire: (F) Passing through wall deals 2d6 damage/level

Wall of Ice: (W) has 15 hp/level

Zone of Silence: (A) Keeps eavesdroppers from overhearing conversations

5th level Spells

Cloudkill: (A) Kills 3HD or less; 4-6 HD save or die, 6+ HD take Str damage
Cone of Cold: (W) 1d6/level cold damage
Control Winds: (A) Change wind direction and speed, 40ft x 40ft
Summon Monster V: Calls extraplanar creature (elemental only) to fight for you, 1HD/level
Transmute Mud to Rock: (E) transforms two 10ft cubes per level; reversible
Wall of Stone: (E) Creates a stone wall that can be shaped, 5sq ft/level, 15hp/level

6th level Spells

Find the Path: (E) Shows most direct way to a location
Shout, Greater: (A) Devastating yell deals 10d6 sonic damage, stuns creatures, damages objects
Freezing Sphere: (W) freezes water or deals cold damage
Flesh to Stone: (E) Turns subject into statue; reversible
Move Earth: (E) Digs trenches and builds hills, 10x10 cu ft/minute
Stone Tell: (E) Talk to natural or worked stone

7th level Spells

Acid Fog: (A or W) Fog deals acid damage, 20ft high x 20ft radius, 2d6 acid damage
Earthquake: (E) Intense tremor shakes 80ft radius
Control Weather: (A) Changes weather in local area, 2mi radius, 4d12 hours
Delayed Blast Fireball: (F) 1d6/level fire damage; you can postpone blast for 5 rounds
Fire Storm: (F) Deals 1d6/level fire damage, 20cu ft/level
Wind Walk: (A) You and you allies turn vaporous, 600ft/round, self+1 every 3 levels, 1hr/level

8th level Spells

Horrid Wilting: (W) Deals 1d6/level damage within 30ft, from dehydration
Incendiary Cloud: (F) Cloud deals 1d6/level fire damage, 20ft high x 20ft radius
Iron Body: (E) Your body become living iron, 1min/level, +6 Str, -6 Dex, +15 AC
Polar Ray: (W) 1d6/level cold damage
Shout, Greater: (A) 10d6 sonic damage, stuns creatures & damages objects
Whirlwind: (A) Cyclone deals damage and can pick up creatures, 10ft wide x 30 high, 3d6 damage

9th level spells

Elemental Swarm: Summons multiple elementals (cast as domain element only) 2d4 elementals

Proposal for Vancian Magic

By **chgowiz**

Created **12/02/2008 - 17:58**

Despite the definite lack of love for Vancian magicks in the game that we love to play, it remains a part of the lore and history of D&D and the SRD/D20 system that microlite20 and microlite74 are based from.

Greywulf's original vision of using an abstraction of HP to represent "life force" and using that life force to control and project the mystical forces for spells is an excellent mechanic. I did miss the concept of Vancian magic, though, and decided to incorporate Vancian magic into my own house rules for microlite74. I think this is easily extended to microlite20 as well, as it doesn't involve anything specific beyond magic being part of the setting.

Magic Users may opt to memorize spells instead of reading them out of their books and burning HP. Casting a spell does not cost them HP, but they lose the ability to recast that spell once it's cast. Such Magic Users are known as Wizards or Mages. Those Magic Users who use the spell books and HP to cast their magicks are known as Sorcerers or hedge wizards.

Mages must rest for 8 hours and spend 10 min per spell level to memorize each spell that was cast. They must have their spell books available to memorize the spells. Mages may not "duplicate" spells, once a spell is memorized, it is memorized once and used once. (That is why scrolls and wands may exist).

A Wizard may attempt to "hold onto" the magic in his mind as he is casting the spell, should he dare to exert his control over the mystical energy. Magic is a powerful and fickle thing, and those that attempt to master it often find themselves in harms way in trying to control such power. A player declares their intention to try and retain the spell when they are casting it. The DM rolls a d6 and uses the following chart:

- 1 - Spell is retained in memory.
- 2 - Spell is lost from memory but nothing bad happens.
- 3 - Spell is lost from memory and PC loses 1/2 of their HP total.
- 4 - Spell is lost from memory and PC loses 3/4 of their HP total.
- 5 - Spell is lost from memory and PC loses their HP total.
- 6 - Spell is lost from memory. PC loses their HP total plus (1d6 x lvl of caster) of damage. **

Note that results of 3 - 6 will apply the normal rules of m74 damage, that is if they were not at full HP, then they may be dropped to 0 and possibly lose some of their STR as well. A result of 6 when a mage has been in combat will more than likely kill them.

This gives the Magic User player a few options:

- If they want to be more involved in combat, they can become a Wizard/Mage which gives them more HP to rely on, but fewer magic options at lower levels. There's a real danger to trying to hang onto spells, but if a Wizard is desperate, they may be able to count on luck to help them.

- If they want to maximize their casting at the sacrifice of HP, they can opt to be a Sorcerer/Hedge Wizard, which may allow them to cast 2 spells at 1st level and still have an HP or two left to survive on. I hope that Sorcerer is paired up with some strong Fighting Men!

Characters gain the ability to memorize spells according to this chart:

1st/2nd/3rd/4th/5th/6th spell levels

1 1
2 2
3 2/1
4 2/2
5 3/2/1
6 3/2/2
7 4/3/2/1
8 4/3/2/2
9 4/4/3/2/1
10 4/4/3/2/2
11 4/4/4/3/2/1

(GMs who run games with characters above level 11 may continue to use the pattern of progression here or come up with their own.)

** NOTE - there are LOTS of possibilities of Bad Things that could happen to a mage who has an epic failure of attempting to retain the spell and rolling a 6. The DM could consider the complete loss of HP and some other randomly chosen side effect, like the PC aging 10 years, or becoming disfigured, or gaining some sort of "taint".

Four By Five Magic

By **greywulf**

Created **06/03/2008 - 10:27**

A variant magic system inspired by [FUDGE Four-by-Five magic](#) ^[1], Ars Magica, Harry Potter and the Belgariad.

Quote:

?My friend, magic is not stored in pretty book or scrolls. It is the power of the Will and the Word. Your Will take times to perfect and control; you follow your own path in it?s mastery. The Words can only be taught. There are only nine Words of Power, but they may take an age to fully comprehend their meaning. Often, the Will breaks before the Nine are found. Do you have the power. Well, do you boy??

Magic is nothing more than the speaking of two (or more) Words of Power in the Divine Tongue. These words take a lifetime to master all their subtle inflections and are far beyond the capabilities of most mere mortals; magic is the sole purlieu of the Magi. Multiclassing to, or from, the Magi class is impossible. Either you have the Gift and follow it to the end, or it is gone forever. To have the Gift is to be a Mage; to be a Mage is to possess the Gift.

Magi begin play at 1st level knowing three Words of Power - either Two Actions and One Realm, or Two Realms and One Action. They learn one new Word of Power every three levels (3,6,9,etc).

The Four Actions

- **Enhance** (augeo): Strengthen, Heal, Enlarge, Repair, Sharpen, etc.
- **Diminish** (infirmio): Weaken, Damage, Injure, Reduce, Break, Dull, Deteriorate, etc.
- **Communicate with** (defero): Sense, Read, Seek, Inform, Determine, Understand, etc.
- **Control** (tempero): Shape, Hold, Command, Form, Direct, Dictate, etc. Control is difficult to learn, and you may not learn Control spells until you have learned all of the other Actions

The Five Realms

- **Body** (corpus): Living body of sentient beings, animals, plants.
- **Mind** (mentis): That which normally inhabits and animates a body
- **Spirit** (animus): The essence or soul. Spirit is difficult to learn, and you may not learn Spirit spells

until you have learned at least three other Realms and three Actions

- **Energy** (navitas): Fire, water, air, magic, [electricity, etc.] - and, if the GM is willing, time.
- **Matter** (materia): Solid material with no mind - stone, metal, wood, leather, paper, [plastic, etc.]

Spells are cast by combining a Word with an Action and successfully making a Magical Attack (Level+MIND) check.

The DC for the check is dependant on the target of the spell.

Target	DC
Self	10
Willing	15
Inanimate organic	20
Unwilling	25
Inanimate inorganic	35

Each spell cast that day increases the DC by +2.

Spells that affect inanimate objects are generally permanent; an enlarged pebble will stay large, a broken belt will stay mended. Magically created fires, etc, will die down naturally. Living creatures will eventually revert back to their normal form, though any healed damage stays healed.

Every 5 (or part) points of success is equal to 1d8 effect. This can take the form of damage, healing or transformation; to turn one thing into another the total effect rolled must equal the difference between the two hit point totals. That's why it's so easy to turn commoners into toads, but Magi turn into dragons.

Examples

Maximus Verlinius, a Magi-1 knows the Words augeo, defero and navitas. his stats are STR10, DEX12 and MIND16. His Magical Attack is $1 + 3 = +4$. He suspects Todmore Fellhaven, his enemy, is in the next room, so casts defero navitas to detect any energy sources in the area. He rolls a 16, just reaching DC of 20. He senses the burning torch held by his enemy.

Maximus bursts into the room, shouting "Augeo navitas!", pointing at the torch. He rolls a natural 20, getting 24. The DC of the torch 22 (there's a +2 because it's his second spell today), so it explodes for maximum damage (a critical). Todmore takes 8 points of damage, staring in surprise at his opponent's sudden arrival.

Maximus' mentor is Creol Festerburn, a Magi-10 of great power. His stats are STR12, DEX10, MIND18. His Magic Attack is $10 + 4 = +14$. He knows the all of the Words of Action, plus navitas, specialising in fire-based magic.

Clutching a small coal in a brazier, Creol approaches the giant's lair. His apprentice stumbles over a tree branch, and the giant roars, appearing from the cave mouth. Creol utters a curse, then blows on the coal, whispering "Augeo navitas?". He rolls a 15 for a total of 29. That's 9 above the DC, so the flame from the coal erupts into a man-sized sheet of flame (2d8 of effect, total 5). Creol then shouts "Tempero Navitas!" and elemental eyes of coal appear in the flickering form. He rolled 18 for a total of 32, easily beating the DC of 22. 2d8 of effect rolls 12, higher than the previous 5, so the fire is under Creol's complete control.

The giant's roar stops mid stream as the fire elemental approaches to do battle.

Microlite20 Martial Arts

By **greywulf**

Created **06/19/2008 - 21:09**

Contributed by **Darth Cestual**

Martial Artists hone their minds and bodies into well crafted weapons. They are just as effective in combat whether armed or not. They can even focus their Chi, or life energy, to amazing effect.

Their unarmed strikes can be just as effective as crafted weapons, and advances as follows:

1d4 1st-3rd level, 1d6 4th-7th, 1d8 8th-11th, 1d10 12th-15th, 2d6 16th-19th, and 2d8 at 20th level, +Str bonus.

Martial artists can choose between lethal and non lethal damage. While class and style bonuses may appear to be lower than other M20 rule sets, it can be assumed that players can choose from any of the previously covered M20 races and therefore gain their appropriate bonuses as well. All martial artists can use Dex bonus + Level as their Melee attack bonus instead if wielding a light weapon, and can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. If the total bonus is +6 or more, a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2. Add Str bonus to melee damage, x2 for 2 handed weapons.

AC = 10 + Dex bonus + armor bonus

Classes

There are 4 classes of Martial Artist

Samurai: +1 Str- Knights, soldiers, and defenders of the weak. Samurai can wear armor, use shields, and are proficient in all weapons and armor.

Ninja: +1 Dex- Spies, assassins, and thieves, quick and deadly are their trademarks. Taking out an opponent quickly and quietly, and the ends always justify the means to the Ninja. They use light weapons and armor.

Sifu: +1 Mind- Teachers, wizened sages, simple beggars, or the unassuming drunkard that have vast knowledge and skills that are carefully guarded. They generally display their skills veiled as ?accidents? or ?clumsiness?. What they lack for in physical power and agility, they make up for with their knowledge of critical spots, pressure points, and mastery of their Chi. Sifus rarely use traditional weapons or armor and typically improvise weapons from whatever objects are available.

Monk: +1 All Skills- Those who hone their bodies and minds to seek peace and enlightenment enter the monasteries. Monks will usually seek a peaceful resolution to conflicts first, but when it becomes clear that it isn't an option, they are quite capable of defending themselves and those who can't. A monk will rarely kill if

they can help it, so when a monk renders an opponent to 0 HP, they are considered incapacitated, but not dead. Monks do not wear armor, and while able to use any weapon, they prefer simple weapons such as staves or go unarmed.

Martial Arts Styles

There are 4 Martial Arts Styles

Way of the Dragon: +1 Phys- Ferocious and powerful, Dragon style fighters are very tough but also hold a high regard for honor. They relish a good fight and the smell of battle, yet to challenge a clearly weaker opponent lacks any honor. They seek to challenge themselves and continually push their skills.

Way of the Serpent: +1 Sub- Serpent fighters rely upon stealth and deception and have little problem using trickery or poisons to defeat their opponents. Striking from shadows or catching enemies unaware are perfectly acceptable forms of fighting for them.

Way of the Tiger: +1 Know- Wisdom and cunning are the Tigers way, as they know the Mind is the most deadly of weapons. Tiger style fighters will study an opponent, even toy with them, until it's the proper time to strike.

Way of the Mantis: +1 Com- Mantis style fighters are patient. They often give opponents the opportunity to walk away, using negotiation or intimidation, but when they refuse, the Mantis fighter is quick to strike and deadly in efficiency.

Chi: A martial artist can draw upon their focused life energy, Hit Points, to boost their abilities. They can spend a max number of HP as Chi equal to their Mind bonus + level. 1HP = 1Chi. For example, a 1st level Ninja with a Mind bonus of +1 can use up to 2 points of Chi at any given time. So if the Ninja is using Chi Armor at a cost of 2 Chi, those points cannot be used elsewhere unless he releases the armor and frees up his Chi. However, the points may be split as long as the total is within the martial artists threshold.

Chi Techniques

Chi Armor: Increase AC by +4 for 1 hour, 2 Chi

Chi Blast: The martial artist can release pure Chi energy as a directed bolt that does their current unarmed strike dice level/Chi points used, or as an area effect that knocks back people and objects 10 meters/Chi point used.

Chi Jump: By using Chi, the martial artist can move faster than can be seen. 10 meters/Chi point.

Chi Strike: A martial artist can use Chi to add to a standard attack. +1 damage/Chi point

Fade: A tightly focused sheath of Chi bends light around the martial artist, allowing them to blend with shadows and even become invisible. +1 Sub when trying to hide/Chi point

Pressure Points: Understanding the way Chi flows through the body allows a martial artist to be able to alter that flow in others by striking key points on the body. On a Critical Hit, the martial artist may choose to temporarily paralyze the target until the end of the scene, or for 10 minutes. On the other hand, the martial

artist may manipulate Chi through pressure points to heal, transferring their Chi to another and healing for however many HP/Chi used.

Weapons

Acupuncture Needles: -1 Dex, every successful hit with a needle reduces the targets Dex by -1. When the targets Dex score reaches 0, they are paralyzed and immobile, and even if the needles are removed, the effects last for 1 hour after removal.

Axe: 1d6

Bo Staff: 1d6

Bow, Short: 1d6

Bow, Long: 1d8

Chakram: 1d4

Kama: 1d6

Katana: 1d8

Katar(punch dagger): 1d4

Naginata: 1d10

Nunchaku: 1d6

Sai: 1d4

Shuriken: 1

Siangham: 1d6

Microlite 20 Anthro Races

By **greywulf**

Created **06/06/2008 - 12:43**

Contributed by **Darth Cestual**.

This list is based on the Gamma World 4th edition Base Animal Stock list and by no means complete, but does provide a wide variety of animal PC options. The animals presented here are assumed to be medium sized, unless stated otherwise, be of a general humanoid/bipedal form, and able to use most weapons and tools used by other human/demihuman races. Animals with the Aquatic mutation are considered to be adapted for land dwelling, and capable of surviving both in and out of the water. Other natural abilities will be listed as per Microlite20 Mutations.

Alligator ; Scales +3 natural armor, 1d8 tail slap, 2d6 bite

Armadillo ; Carapace +6 natural armor, Low Light Vision 30m, 1d4 claw

Badger ; Low Light Vision 30m, 1d6 claw, burrow 1 meter/minute

Bat ; Wings- fly for 10min/level, Keen Ears +20 Listen (sub+Mind), 1d4 bite

Bear ; Keen Nose, Fur +2 natural armor, +5 vs cold, 1d8 claw, 1d6 bite

Boar ; 1d6 tusk x2 on a charge

Bull ; Horns 2d4 damage x2 on a charge, Tougher +2hp/level

Camel ; Amazing Fortitude vs hot dry climates, needs 1/2 as much water, 1d4 bite

Chameleon ; Chameleon Skin +20 Sub when wearing nothing, Regeneration heals 1hp/round

Cheetah ; 1d4 claw, 1d6 bite, Fleet Feet +2 Dex to movement, Haste 2 actions per turn

Cougar ; 1d6 claw, 1d6 bite, Keen Ears +20 Listen, Keen Nose, Low Light Vision 30m

Crab ; Aquatic, Exoskeleton +5 natural armor, Pincers 1d6+2

Deer ; 2d4 antlers (Horns) x2 on charge, Keen Ears +20 Listen

Duck ; Immunity Cold, Wings- fly for 10mins/level

Elephant ; 2d6 tusks x2 if charging, Bigger +1 size category, +2 Str, prehensile trunk (Extra Arm)

Fox ; +2 Dex, Keen Ears +20 Listen, Keen Nose, Low Light Vision 30m, Padded Feet +10 Sub when sneaking

Frog ; Aquatic, Spring Legs +30 Jump, 10m/level

Gorilla ; 1d6 bite, Tougher +2hp/level

Grasshopper ; Extra Arms 1 extra 2 handed attack or 1 handed + shield, Spring Legs +30 Jump
10meters/level

Hawk ; 1d6 claw, 1d4 bite, Wings fly for 10min/level, Keen Eyes +20 Spot (sub+Mind)

Horse ; 1d6 kick

Kangaroo ; Spring Legs +30 Jump 10meters/level

Monkey ; 1d4 bite, +2 Dex

Mosquito ; 1d4 bite +1 per round blood drain, Extra Arms 1 extra 2 handed attack or 1 handed + shield, Wings
fly for 10min/level

Octopus ; Aquatic, Chameleon Skin +20 Sub when wearing nothing, Extra Arms 1 extra 2 handed attack or 1
handed + shield

Ostrich ; 1d6 kick, Fleet Feet +2 Dex to movement

Otter ; 1d6 bite, Immunity Cold

Porcupine ; 1d4 bite, Quills 1d6 damage

Praying Mantis ; 1d8 claws, Extra Arms 1 extra 2 handed attack or 1 handed + shield, Chameleon Skin +20
Sub when wearing nothing

Raccoon ; 1d4 bite, Low Light Vision 30m

Rhinoceros ; 1d6+1 horn x2 when charging, Keen Nose, Bigger +1 size category, +2 Str

Sea Lion ; 1d4 bite, Keen Nose, can hold breath for 10+Str bonus/rounds

Shark ; 1d12 bite, Aquatic, Keen Nose, Rage +4 Str -2AC

Sheep, Bighorn ; 1d6+1 head butt x2 charging, Immunity Cold

Skunk ; 1d4 bite, Low Light Vision 30meters, Stench adjacent creatures suffer -2 on all rolls

Snake ; Poison Bite 1d6+1 bite+Poison see M20 GM Guide for type, Darkvision see in total darkness 20
meters, Tremorsense 10m

Spider ; Poison Bite 1d6+1 bite+Poison see M20 GM Guide for type, Extra Arms 1 extra 2 handed attack or 1
handed + shield, Climbing Hooks 10ft climb speed, Web (as the spell) fills 20ft radius spread with sticky
spiderwebs

Squirrel ; 1d4 bite, Climbing Hooks 10ft climb speed, Tail +4 Dex

Termite ; 1d6 bite, Extra Arms 1 extra 2 handed attack or 1 handed + shield, Exoskeleton +5 natural armor, can eat wood

Tiger ; 1d8 claw, 1d10 bite, Keen Nose, Low Light Vision 30meters

Turtle : Carapace +6 natural armor, can hold breath for 5 mins

Wasp ; 1d6+1 sting +Poison see M20 GM Guide for type, Extra Arms 1 extra 2 handed attack or 1 handed + shield, Wings fly for 10min/level

Weasel ; 1d6 bite, Low Light Vision 30meters

Wolf ; 1d6 bite, Keen Nose, Keen Ears +20 Listen, Fur +2 natural armor, +5 vs cold

Microlite20 Mutations

By **greywulf**

Created **06/02/2008 - 09:22**

Contributed by Darth Cestual

These mutations and rules are based on Omega World by Jonathan Tweet as presented in Dungeon #94/Polyhedron #153, with a few additions and modifications for M20 flavor and personal choices.

To determine a mutant's mutations, roll d% on the Random Defect List. Each mutation has a value. A mutant's total number of defects should not exceed their total in Stat Bonuses. For example, Waukeegan has Stat Bonuses Str +1, Dex +3, and Mind +0, therefore he cannot exceed 4 Mutation Defects. Once defects are selected, add up their total value and move on to the Random Mutation List, and roll d%. Players have the option of "flipping" the d% result, say if a 7 and a 5 are rolled, the player may choose between 57 and 75 in selecting their mutation. Each beneficial mutation has a cost. Players roll for beneficial mutations until they meet but not exceed the value accrued by their Random Defects. In general, mutations stack, so you can have fur (+2 natural armor) over your exoskeleton (+5 natural armor) for +7 natural armor, lucky mutant. But the GM can disallow abusive stacking. For example, if Acidic Bite was rolled twice, the acid damage could be doubled, but the bite damage would only increase "one step" from 1d6 to 2d4. Due to M20s streamlined design, some mutations will be mechanically similar, therefore it's up to the player to really role-play his defects and abilities and make them unique. GMs should remember to award players properly for their efforts.

Some mutations are free to use or always in effect while others must be activated to use. In keeping with Microlite20, "activated" (A) mutations drain Hit Points equal to their point cost, to emulate the drain using such power has on an individual. Mutations with duration effects last until the end of the scene, 10 minutes per level, or unless otherwise stated.

Random Mutation Defects

d% - Defect - Summary - Value

1-4 ; Distinctive Odor ; Smells horrible -2 Sub ; 1

5-6 ; Tongue Tied ; -4 Com ; 1

7-10 ; Wheezy ; Poor respiratory, becomes fatigued after 5 rounds of combat ; 2

11-14 ; Slow ; -5ft speed (-4 Phys involving movement) ; 2

15-16 ; Numbskull ; -4 Know ; 2

17-18 ; Dimwit ; -2 Mind ; 2

19 ; Sensitivity to Acid ; 2x damage from acid ; 2

20 ; Sensitivity to Cold ; 2x damage from cold ; 2

21 ; Sensitivity to Electricity ; 2x damage from electricity ; 2

22 ; Sensitivity to Fire ; 2x damage from fire ; 2

23 ; Sensitivity to Poison ; 2x damage from poison ; 2

24 ; Sensitivity to Radiation ; 2x damage from radiation ; 2
 25 ; Sensitivity to Sonics ; 2x damage from sonics ; 2
 26-29 ; Voracious ; Requires double rations ; 3
 30-33 ; Stiff Motion ; Can't enter combat in the 1st round ; 3
 34-35 ; Terrible Fortitude ; -10 on Fort saves (Str+Phys) ; 3
 36-37 ; Terrible Reflexes ; -10 on Reflex saves (Str+Dex) ; 3
 38-39 ; Terrible Willpower ; -10 on Will saves (Mind+level) ; 3
 40-43 ; Club Footed ; -8 Phys involving movement ; 4
 44-46 ; Poor Dual Brain ; 10% chance per melee round you lose your turn ; 4
 47-49 ; Frenzy ; 10% chance per melee of going berserk and attacking a random friend or foe ; 6
 50-53 ; Fits ; 10% chance per melee round to fall down flopping ; 7
 54-57 ; Smaller ; Cannot apply Str stat to hit points ; 7
 58-59 ; Weakling ; -4 to Str ; 7
 60-63 ; Obsessive Compulsive ; 50% chance of having to do some kind of ritualized routine before taking an action in combat or a skill check ; 8
 64-66 ; Weapon Incompetent ; May only use natural weapons ; 8
 67-68 ; Reduced Dexterity ; -4 Dex ; 8
 69-72 ; Yellow Streak ; 50% chance to run away from danger ; 9
 73-75 ; Bleeder ; -1 HP per round per wound until stopped ; 9
 76-79 ; Crude Hands ; -4 Dex with manipulation actions ; 10
 80-83 ; Fragile ; 2x damage from melee (not energy) ; 10
 84-86 ; Poor Vision ; Can pinpoint targets out to 10meters ; 12
 87-88 ; Glass Jaw ; 50% chance of being knocked out in melee ; 15
 89-90 ; No Arms ; Good afternoon Mr. Stumpy ; 20
 91-92 ; No Legs ; I save a fortune on shoes ; 20
 93-96 ; Eat it ; Roll again, take defect without adding its value ; ?
 97-00 ; OMGWTF ; Roll twice, taking defects without adding their value ; --

Random Mutations

d% ; Mutation ; Summary ; Cost

1 ; Amazing Fortitude ; +10 on Fort saves (Phys+Str) ; ; 1
 2 ; Amazing Reflexes ; +10 on Reflex saves (Phys+Dex) ; 1
 3 ; Amazing Will ; +10 on Will saves (Mind bonus+level) ; 1
 4 ; Blindsense ; Pinpoint(not ?see?)targets within 10meters ; 1
 5 ; Chameleon Skin ; +20 Sub when wearing nothing ; 1
 6 ; Climbing Hooks ; 10 ft climb speed ; 1
 7 ; Double Healing ; 2x effects from heals & recovery ; 1
 8 ; Fleet Feet ; +2 Dex to movement ; 1
 9 ; Immunity: Poison ; No effects from poisons ; 1
 10 ; Immunity: Psychic ; No effects from psychic attacks/aid ; 1
 11 ; Keen Ears ; +20 Listen (sub+Mind) ; 1
 12 ; Keen Eyes ; +20 Spot (sub+Mind) ; 1
 13 ; Keen Nose ; Can track by scent ; 1
 14 ; Low Light Vision ; Can see in all but total darkness 30meters ; 1

15 ; Padded Feet ; +10 Sub when sneaking ; 1
16 ; Resist Radiation ; +10 Fort (Str+Phys) vs Radiation ; 1
17 ; Aquatic ; Gills and webbed fingers/toes ; 1
18 ; Tail ; +4 Dex vs Balance, Jump, Swim ; 1
19 ; Tentacles ; 1d6 3 meter tentacles +1 Phys ; 1
20 ; Tremorsense ; Sense target through vibrations 10 meters ; 1
21 ; Uncanny Dodge ; 2x Dex bonus to AC ; 1
22 ; Blindsight ; Pinpoint (not ?see?) targets 10m per level ; 2
23-24 ; Claws ; 1d6 damage ; 2
25 ; Darkvision ; See in total darkness 20meters ; 2
26 ; Dual Brain ; +2 Mind, 2 Will saves ; 2
27 ; Empathy ; +2 Com ; 2
28-29 ; Fur ; +2 natural armor, +5 vs cold ; 2
30-31 ; Horns ; 2d4 damage, 2x on a charge ; 2
32 ; Leech Damage ; Touch. absorb & take 1d6 damage from target ; 2
33 ; Stench (A) ; Adjacent creatures suffer -2 on all rolls ; 2
34 ; Quills ; 1d6 damage ; 2
35 ; Spring Legs (A) ; +30 Jump, 10 meters per level range ; 2
36 ; Tougher ; +2 hp per level ; 2
37 ; Toxic Snot (A) ; See addendum, roll for type, 2d4 damage ; 2
38 ; Acidic Bite (A-acid) ; 1d6 bite + 1d6 acid ; 2
39 ; Carapace ; +6 natural armor, -2 Dex ; 3
40 ; Tank ; Double hit points ; 3
41 ; Haste (A) ; 2 actions per turn ; 3
42 ; Silver Tongue (A) ; +5 Com ; 3
43 ; Brainiac ; +3 Mind ; 3
44-45 ; Pinchers ; 1d6 damage ; 3
46-47 ; Regeneration ; Heal 1 hit point per round ; 3
48-49 ; Scales ; +3 natural armor ; 3
50 ; Shaper (A) ; Shape change 10 mins/level ; 3
51 ; Psionic: Telepathy (A); As per GW Psionics rules ; 3
52 ; Force Field (A) ; Absorbs 10 points of damage/level ; 3
53 ; Brain Trust ; +5 Mind ; 4
54-55 ; Light Warp (A) ; +20 Sub ; 4
56-57 ; Lightning Touch (A) ; 1d6+2 damage/level ; 4
58 ; Psionic: Psychic Shield (A); As per GW Psionics rules ; 4
59-60 ; Psychic Healing (A) ; Heal 1d6 damage/level to target ; 4
61-62 ; Rage (A) ; +4 Str, -2 AC ; 4
63 ; Teleport (A) ; 10 meters/level ; 5
64 ; Extra Arm ; 1 extra one handed attack or shield ; 5
65 ; Levitate Self (A) ; Self +100lbs per Mind bonus ; 5
66-67 ; Poison Bite (A-poison);1d6 damage + poison -see M20 GM guide ; 5
68-69 ; Psionic: Telekinesis (A) ; As per GW Psionics rules ; 5
70 ; Psionic: Precognition (A) ; As per GW Psionics rules ; 5
71 ; Wings (A) ; Fly for 10mins/level ; 5

72-73 ; Brain Bite (A) ; Psychic attack vs Will, 2d4 damage, close range ; 6
74-75 ; Mental Mirror ; Psychic effects reflected back, even beneficial ones ; 6
76 ; Displacement (A); 50% chance of being missed in combat ; 6
77 ; Exoskeleton ; +5 natural armor ; 6
78 ; Overmind ; +10 Mind ; 6
79 ; Heightened Dexterity ; +10 Dex ; 6
80 ; Beefcake ; +10 Str ; 6

Microlite20 Mecha

By **greywulf**

Created **06/30/2008 - 10:43**

Contributed by **Darth Cestual**.

Mecha are giant walking vehicles used in combat or heavy industrial work. Each basic mecha has a cockpit for the pilot, a basic sensor system, is of a vague humanoid shape, and is powered by one or more Power Cores as determined by the size of the vehicle. Keep in mind that Mecha stats do not directly relate to character stats, and should it be necessary, such as strafing a battlefield of infantry troops or rebels taking down an Imperial Walker, just roll for the mecha and multiply the result by 10.

Power Core

Every mecha draws energy from its Power Core which enables its weapons and other systems. Every mecha must have at least 1 Power Core, and each Core supplies 50 power points for its systems. Power pulled from the Core for system use drains points from the power pool, and are not regenerated until after a scene ends, or 1 point per minute to recharge. When a mechas Power Core reaches zero points, it is immobile and inoperable. There is a 10% chance (1 on a D10) that Core containment is lost and a Core Breach occurs, which means a Core Explosion is immanent. The Pilot or any crew will have 1d4 rounds to escape via Escape Pod or some other means. Backup Systems can allow a reroll of a Core Breach, or add an additional 1d6 rounds to escape. A Core Explosion completely destroys a ship and does 1d100 damage for a 100 meter radius per Power Core. Additional Cores can be installed beyond the mecha size standard, take up 2 slots, however mecha with multiple Cores cannot function properly without the full compliment, and thus cannot sacrifice a Power Core for additional slots.

Stats

Mecha have 3 Stats: Chassis, Handling, and Pilot. Stats are rolled as per the M20 core rules

Chassis = the strength of the mechas structural design and its hydraulics systems

Handling = how well the mechas servos and hydraulics perform under various conditions

Pilot = the skill of the individual controlling the mecha, (Mind), this stat can vary depending on who's driving, and the conditions required of the scene.

Configuration and Systems

Mecha come in 4 basic configurations: Assault, Industrial, Infiltrator, and Support

Assault: the standard combat model, +3 Armaments
Industrial: the standard construction model, +3 Engineering
Infiltrator: the standard reconnaissance model, +3 Sensors
Support: the standard service and repair model, +3 Interface

Mecha have 4 basic Systems: Armaments, Sensors, Engineering, and Interface. System ratings are determined the same way as Skills in the M20 core rules.

Armaments: the offensive & defensive capabilities of the mecha

Sensors: how well the mecha can process the information of its surrounding environment, as well as how to avoid other sensor systems

Engineering: how well maintained the mecha is kept by its mechanic and/or pit crew. A well engineered and maintained mecha can often push beyond its initial design performance.

Interface: how well a mecha's on board computers can interact with outside systems

Mecha Size

Mecha come in 4 basic sizes: Large, Huge, Gargantuan, and Colossal

Large: these size mecha are common as industrial loaders, urban infantry, starship boarding actions, and for civic police. Not much larger than a standard human, they are commonly referred to as power armor. They run on a single Power Core and have 6 slots for weapons and equipment. +2 Pilot

Huge: Designed as the standard battlefield infantry model, they are a good balance between production cost and effectiveness in the various theaters of war. They have 10 slots for weapons and equipment and run on 2 Power Cores. +2 Handling

Gargantuan: These massive machines of war are seen sparingly on the battlefield, typically used as mobile artillery. They are more commonly used in space combat campaigns against starships or other mecha. They have 15 slots for weapons and equipment and are powered by 3 Power Cores. +2 Chassis, -1 Handling

Colossal: These mecha are rare. Used planetside as primarily mobile weapon platforms and planetary defense against starships. Mecha of this size often have crews, with gunners and engineers aboard to free the pilot to focus on maneuvering such a massive vehicle. They have 20 slots for weapons and equipment and are powered by 4 Power Cores. +1 all systems, -2 Handling

Equipment

Additional Cockpit: 2 slots, can be used as a separate gunners control, engineering station, or for a passenger.

Additional Power Core: +50 power points, 2 slots

Advanced Comm System: 1 slot, +3 Interface, used in tactical relays, secure communiques, and jamming the enemies communication systems. 1 power point/round while in use

Advanced Diagnostics: 1 slot, restores 1d10 points of damage/hour, during which time the mecha cannot move or be in combat. +3 Interface

Advanced Sensor Array: +1 Sensors, 1 power point/round while in use

Afterburner: 1 slot, doubles the range of a Jump Pack and speed of Thrusters, but costs 2x power points of

the equipment used.

Armor, Duraplastic: +3 AC, 2 slots

Armor, Reactive Gel: +8 AC, 4 slots

Armor, Megatanium: +12 AC, -2 Handling, 8 slots

Back Up Systems: help prevent a Core Breach, 1 slot

Crane: +2 Chassis, +2 Handling, 4 slots, special lifting arm equipped with a cable and wench system

Energy Shield Generator: 2 slots, 2pts to activate, absorbs damage at 1 power point for every point of damage inflicted.

Escape Pod: 1 slot/cockpit, the mechas cockpit is fitted as an escape pod, if the mecha has multiple cockpits, they must be purchased separately.

Jump Pack: 2 slots, allows the mecha to make short rocket assisted jumps of up to 1 km, 2 power points per use, Large and Huge sizes only.

Life Support System: 1 slot, required use for aquatic or space bound mecha

Lifters: +2 Chassis, special lifting arms, 2 slots ea.

Nanorepair Unit: 1 slot, repairs 5HP damage/round, 1 power point/round

Neural Link: 1 slot, +2 Pilot, a direct link to the Pilots brain increases reaction time.

Reserve Power Supply: holds 20 points of reserve power, 1 slot, can only be recharged once all Power Cores are fully charged.

Space Worthy: 1 slot, a series of stabilizers and small maneuvering thrusters that enable a mecha to function in space.

Stealth Suite: 3 slots, +10 Sensors (to avoid detection) Large and Huge sizes only, the mecha has been refitted to have a very low detectable profile.

Structural Enhancement: +10HP/slot

Tactical Shield: +4 AC, 1 slot-attached to arm, retractable

Thermoptic Camouflage: 1 slot, +3 Sensors (to avoid detection), allows a mecha to blend in with its surroundings, 1 power point/round while in use

Thrusters: 4 slots, allows the mecha to fly 150m/round, 3 power points to **launch, +1 power point/round of maintained flight**

[b]Wings: 2 slots, +1 Handling while a mecha is in flight

Weapons / damage / power point cost / slots

Chain Guns: 1d6, 1 pt/shot, 2 slots

Combat Claws: (Large 1d6, Huge 1d8, Gargantuan 2d6, Colossal 2d10), no power cost, 1 slot ea.

Laser Cannon: 2d10, 2 points/shot, 2 slots

Mass Cannon: 2d12, 4 points/shot, 2 slots

Microwave Beam: 1d6, 1 point/shot, 1 slot

Missile Pods: 1d20, 4pts/launch, 2 slots ea. Fires a barrage of 20 1-point of damage small missiles, die roll indicates how many hit their mark.

Plasma Cannon: 1d20+2, 4 points/shot, 3 slots

Shockwave Pulse Emitter: 2d8+2, 4 points/shot, 2 slots, fires an electromagnetic pulse that fries electrical systems, sparks flammable materials, and sends living creatures flying an additional 10 meters per point of damage taken.

Recoilless Rifle: 2d6, 2 points/shot, 2 slots

Rocket Launcher: 1d8, 2 points/shot, 2 slots

Mecha Melee Weapons: Any of the core M20 melee weapons can be used ?mecha-sized? and can be sheathed internally taking up 1 slot for 1 handed weapons, and 2 slots for 2 handed weapons, or by not using any slots with the weapon holding to the outside of the mecha magnetically, however only a maximum of 4 slots can be used this way. Should the players/GM wish to make the melee weapons energy based, 1 handed weapons should burn 1 power point per round while active, and 2 handed weapons should burn 2 power points per round while active.

Transformable Mecha

Should the GM wish to have mecha or giant robots that transform into vehicles, just do it. ;)

But, if you feel the need, include on the Equipment list the Veriform Matrix: 1 slot, 2 power points per use, allows a mecha to engage a physical transformation changing it into a vehicle form or back. +2 Sub

MICROLITE 20 Mecha

By Andrew Domino (www.dominowriting.com/tabletop-gaming-3/microlite-20)

Last revised May 14, 2016

Creative Commons NonCommercial ShareAlike 3.0 Unported License

Based on the Microlite 20 Purest Essence rules, Mecha rules initially by Darth Cestual/greywulf

This is an adaptation of the Microlite 20 Purest Essence rules for the creation of mecha. A mecha is a giant robot or mechanized suit of armor used for heavy industrial work, or more often, combat, like a massive tank with arms and legs, though your mecha may instead have wheels, skis or some other mode of transport. These rules will enable you to create any kind of mecha, from a personal battle suit to a team of robots that combine together to form a super-robot, strong enough to destroy a planet.

You'll need Purest Essence for rules on how to play and other rules not listed here. Non-mecha creatures, like humans, animals and monsters, are called "ordinary characters" in these rules.

Piloted Or Independent?

No matter what kind of mecha you create, the first decision you'll have to make is: who's controlling the mecha?

A *piloted* mecha is one that has a human (or alien, elf, or some other creature) inside it. In a battle suit, the mecha is wrapped head-to-toe around the human's body. In a larger mecha, a human sits in a cockpit in its torso or head, directing the mecha's movements and weapons from that central point.

An *independent* mecha is actually a robot itself, with a computer brain controlling its thoughts and actions. It's even possible for a smaller mecha to pilot another mecha.

Choose piloted or independent when creating your mecha character. A pilot's statistics do not affect the mecha's attacks and other actions.

Power Core

Each mecha holds at least one "power core" — a compact engine and fuel compartment stored in a protected section of the mecha. It can be described any way you wish: a miniature nuclear

reactor, nanotech energy generators, gasoline engine, magical sphere of force, etc. Each power core provides 10 Power Points for the mecha to use in a battle, or about 10 minutes (outside combat) before it is fully drained. Power cores can be combined (a mecha with 3 power cores has 30 Power Points per turn). Some equipment calls for the mecha to spend Power Points, though movement and basic controls (lifting, connecting to an outside computer, etc.) do not require Power Points.

A power core will recharge 1 Power Point per minute outside combat, and must be recovered in combat (see below). If a mecha ends its turn with 0 (zero) Power Points or less, there is potential that the power core or cores may melt down or even explode. Roll 1d10: on a result of 1, the power core is unstable. The pilot and anyone else inside the mecha must leave immediately, before the power core is destroyed, causing damage equal to Size Grade d12 to all targets in a circle Size Grade x 10 feet (or 2 spaces) around the mecha. For example, a Size Grade III mecha that is destroyed causes 3d12 damage in a 30 foot (6 spaces) radius.

Stats And Level

Mecha have three stats, similar to ordinary characters. Roll 4d6, drop lowest die. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats. Alternately, assign the stat scores 16, 13 and 11 in any order. After each major adventure, or when the game master chooses, each mecha gains a **Level**. Every three levels (Level 3, 6, 9, etc.), add +1 to one of the mecha's stats in the form of upgrades. All mecha begin at Level 1.

Chassis: The stability and lifting capability of the mecha's structural design and its hydraulics systems. This is the equivalent of an ordinary character's Strength stat.

Handling: The mecha's ability to move and

target its weapons, using its electronics and servo controls. This is the equivalent of an ordinary character's Dexterity stat.

Pilot or Cortex: The skill of the person operating the mecha (for a piloted mecha), or the performance ability of the mecha's computing "brain" power (for an independent mecha). This is the equivalent of an ordinary character's Mind stat.

After adjusting stat scores for Size Grade (see below) and equipment, determine your stat bonuses by using (stat score -10) /2, round down. This math is done for you here.

<u>Stat Score</u>	<u>Stat Bonus</u>
3	-4
4 – 5	-3
6 – 7	-2
8 – 9	-1
10 – 11	+0
12 – 13	+1
14 – 15	+2
16 – 17	+3
18	+4

Operating Systems (OS)

Where standard characters have skills, mecha have operating systems. There are four.

Combat: The offensive and defensive capabilities of the mecha. Half this value (round up) is the mecha's Attack Bonus (see below). This is the equivalent of an ordinary character's combat abilities – melee/hand-to-hand, missile/ranged and magic/supernatural (if possible).

Engineering: How well-maintained the mecha is kept by its mechanic and/or pit crew. A well-engineered and maintained mecha can often push beyond its initial design performance controls. This is the equivalent of an ordinary character's Physical skill.

Sensors: How well the mecha can process the information on its surrounding environment, as well as how to avoid or disarm other sensor systems. This is the equivalent of an ordinary character's Subterfuge skill.

Interface: How well a mecha's on board computers can interact with outside systems. This is the equivalent of an ordinary character's Knowledge and Communication skills, as a mecha's computer both stores its records and can upload and download information.

Each character starts with four OS points to be assigned to any operating systems the player chooses. Any OS points not assigned are lost. Roll higher than the Difficulty Class given in the adventure to succeed.

Operating System rank = 1 + OS points + bonus offered by Configuration (see below) + any other bonuses. When a mecha gains a Level, add +1 to each of the mecha's operating systems in the form of upgrades.

Slots

A mecha doesn't need to purchase equipment, armor and weapons. Instead, it is built by filling "slots": segments on its structure made to host guns and ammunition, computer controls, readouts for the pilot, etc.

Each Size Grade (below) lists the number of slots the mecha will hold, and each item of equipment and armament lists the number of slots it requires to be installed. Any slots not filled go unused. If a mecha picks up a new item, it must clear one or more slots before it can be used by the mecha.

The mecha's cockpit, power core or cores and basic mechanical and electronic elements do not take up slots. Each item of equipment or armament can only be purchased once.

Size Grade

Size Grade I: These mecha are common as industrial loaders, urban infantry, starship boarding actions and for police and military "power armor." Not much larger than a standard human, Size Grade I is the equivalent of a medium or large size ordinary character.

An attack by a Size Grade I mecha on an ordinary character causes the listed amount of damage (a Size Grade I mecha's machine

guns cause 1d6 damage to a human).

An attack by an ordinary character on a Size Grade I mecha causes at most $\frac{1}{2}$ the listed amount of damage (round down — a human firing a 2d6 machine gun causes 1d6 damage to a Size Grade I mecha).

Power Cores: 1 (10 Power Points)
Slots Available: 5
Stat Score: +2 Pilot or Cortex

Size Grade II: Designed as the standard battlefield model, Size Grade II mecha are a good balance between production cost and effectiveness in the various theaters of war. Most shape-changing mecha, ones that can switch between a humanoid and vehicle, animal or object form, are also this size. Size Grade II is the equivalent of a huge or gargantuan size ordinary character.

An attack by a Size Grade II mecha on an ordinary character causes 5 times the listed amount of damage (a Size Grade II mecha's machine guns cause 5d6 damage to a human).

An attack by an ordinary character on a Size Grade II mecha causes at most 1d3 points of damage, no matter what the weapon's normal damage (a human firing a 2d6 machine gun causes 1d3 points of damage to a Size Grade II mecha).

Power Cores: 2 (20 Power Points)
Slots Available: 10
Stat Score: +2 Handling

Size Grade III: These massive machines of war are seen sparingly on the battlefield, typically used as mobile artillery. They are more commonly used in space combat campaigns against starships or other mecha. Combiners, shape-changing mecha that can connect together to form a larger mecha, are this size. Size Grade III is the equivalent of a gargantuan or colossal size ordinary character.

An attack by a Size Grade III mecha on an ordinary character causes 10 times the listed

amount of damage (a Size Grade III mecha's machine guns cause 10d6 damage to a human).

An attack by an ordinary character on a Size Grade III mecha cannot cause any damage at all, no matter what the weapon's normal damage (a human firing a 2d6 machine gun causes no damage to a Size Grade III mecha).

Power Cores: 3 (30 Power Points)
Slots Available: 15
Stat Score: +2 Chassis

Configuration

A mecha's configuration is its primary purpose in and out of combat. Each provides a bonus to one operating system and some other special ability. While Size Grade is equivalent to an ordinary character's race, Configuration is equivalent to an ordinary character's class.

Assault: Designed with weapons and armor for heavy combat use. Nicknamed the "soldier bot."

Operating System: +3 Combat

Special Ability: +1 free slot, which must be used for an armament (not non-combat equipment).

Industrial: Used for heavy lifting and carrying, in construction, terrain modification, etc. Nicknamed the "salaryman bot."

Operating System: +3 Engineering

Special Ability: +1 free slot, which must be used for an item of non-combat equipment (not armament).

Infiltrator: Used for reconnaissance. Often slightly smaller than similar mecha, these have sound and video dampeners to keep them concealed and protected from bigger, tougher mecha. Nicknamed the "scout bot."

Operating System: +3 Sensors

Special Ability: +2 to Armor Class. Add another +1 to Armor Class after three Levels (Level 3, 6, 9, etc.).

Support: Used as the standard service and repair model. Nicknamed the "scientist bot."

Operating System: +3 Interface

Special Ability: Each turn this mecha is in melee/hand-to-hand distance with another

mecha, it can repair +2d6 hit points to that mecha (or to itself). It requires 1 Power Point each time.

Combat Data

Armor Class: 10 + Handling stat bonus + Infiltrator special ability + any armor armament.

Hit Points: Chassis stat score + 5 (for Size Grade I) or +10 (for Size Grade II) or +20 (for Size Grade III). Add +2 hit points each time the character gains a Level. If a mecha's hit points fall to 0 (zero), damage is removed from Power Points (see above). A mecha can not be restored to more than its initial hit points.

Initiative: 1d20 + Handling stat bonus.

On its turn, a mecha can move once and take other actions, including attacks, using equipment, and attempting other rolls using operating systems. Each action, except for that first move, "costs" a certain number of Power Points. A mecha can keep acting until it ends its turn or runs out of Power Points.

Moving additional times in a turn uses 2 Power Points per time after the first. A Size Grade I mecha normally moves 30 feet (6 spaces on a standard battle map) per turn. A Size Grade II or III mecha normally moves 60 feet (12 spaces) per turn.

Attacks are: 1d20 + Attack Bonus vs Armor Class. **Attack Bonus** is equal to ½ Combat Operating System (round up), whether it is using a fist, a gun, or any other weapon, since they all rely on the mecha's design and functionality. This works even if a mecha is facing an ordinary character — it's the damage that is affected (see Size Grade, above). Power Points for the attack (listed by the armament) are spent before the attack is rolled. A mecha can make multiple attacks in a single turn, but each must use a different armament.

To perform another action, determine which stat and operating system will best fit the action. Spend 1 Power Point (or more, if the game master decides the action is especially complex or demands a lot of energy), then roll 1d20 + Stat Bonus + Operating System rank vs a

difficulty determined by the game master (often 10 or 15).

If a mecha does not move, attack or take any other action on its turn in combat, it will recover 1d6 Power Points.

Non-Combat Equipment

Additional Cockpit: This can be used as a separate gunner's control, engineering station, or for a passenger. Each turn, add +1d6 to one roll your mecha makes. You must decide which roll you will use this bonus for before you roll any dice. Slots used: 2, Power Points used: none

Additional Power Core: +10 power points. Slots used: 2, Power Points used: none

Advanced Comm Center: Used in tactical relays, scientific analysis and jamming enemy communication systems. +3 Interface when applied. Slots used: 1, Power Points used: 1 per turn this bonus is applied

Advanced Diagnostics: If a mecha does not move, attack or take any other action on its turn in combat, it will recover 1d12 Power Points, instead of the regular 1d6. Slots used: 1, Power Points used: none

Advanced Sensor Array: +3 Sensors when applied. Slots used: 1, Power Points used: 1 per turn this bonus is applied

Afterburner: This oversized engine doubles the range of a jump pack and the speed of thrusters (one afterburner will apply to either or both items). Slots used: 1, Power Points used: 2 Power Points per turn along with jump pack, 1 Power Point per turn along with thrusters.

Anti-Gravity Functionality: A series of stabilizers and small maneuvering thrusters that enable a mecha to function in space. It operates at the same speed and with the same operating system capability as it does on land. Slots used: 1, Power Points used: 1 per turn

Back-Up Systems: These redundant coolant and alarms help prevent a core breach. If you are rolling to see if a power core is unstable, roll 1d20 instead of 1d10. Slots used: 1, Power Points used: none

Gestalt Formatting: As its entire turn, a mecha can combine with other mecha to form part of a larger mecha, called a combiner (one Size Grade larger than itself – Size Grade III mecha cannot select this item). When combined, the mecha uses the best stat and operating system numbers of its individual mecha for each dice roll. The players of each mecha in the combined mecha must decide which of them will control the combiner mecha while together. Slots used: 1, Power Points used: 5 per combination action (coming together or separating).

Jump Pack: This system allows the mecha to make short rocket-assisted jumps of up to 1 kilometer (10 spaces in one turn). Size Grade III mecha cannot use this item. Slots used: 2, Power Points used: 2 per turn

Life Support System: The mecha is sealed and treated for aquatic or off-world operations. Slots used: 1, Power Points used: none

Lifters: Special lifting arms or crane with winch. +2 to Chassis stat score. Slots used: 2, Power Points used: none

Nanorepair Unit: The mecha can repair 3 hit points to itself, and can still take other actions on this turn. Slots used: 1, Power Points used: 3 per turn

Neural Link: A direct link to the pilot's brain increases reaction time. This item can only be used by piloted mecha. +2 to Pilot stat score. Slots used: 1, Power Points used: none

Remote: A small vehicle often used by the mecha to silently observe or move into dangerous situations. The remote can hold a small amount of material (it is not big enough to hold another mecha or an ordinary character). The remote cannot make attacks, but uses the mecha's AC if it is attacked. The mecha controls its remote. It can take one action per turn, in addition to the mecha's actions. Slots used: 2, Power Points used: 1 to launch the remote

Reserve Power Supply: A small generator holds reserve energy, providing the mecha with +5 Power Points. Slots used: 1, Power Points used: none

Shape-Changing Matrix: Allows a mecha to engage a physical transformation, changing it into a vehicle, robotic animal or object form and back. The shape-change takes

place instantaneously. In its alternate form, the mecha has all the capabilities of that vehicle, creature or object, and can still communicate in spoken language. +5 Sensors to appear as a "normal" vehicle, animal or object when in that form. Slots used: 1, Power Points used: 2 per shape-change (from mecha to other form or the reverse).

Structural Enhancement: The mecha is built to absorb additional damage, providing +5 initial hit points. Slots used: 1, Power Points used: none

Thermoptic Camouflage: Light refraction and camouflage paint enable a mecha to blend in with its surroundings. +10 Sensors, but only to avoid detection. Slots used: 1, Power Points used: 1 per turn

Thrusters: These rocket engines enable a mecha to fly through the air as fast as it can walk. Terrain will not affect the mecha's movement. It can still attack and be attacked by other mecha, but only with ranged weapons. Slots used: 2, Power Points used: 3 to launch, +1 point per turn to remain in the air until the next turn.

Wings: +5 to Combat, Engineering and Sensors, but only when in flight. Thrusters are required to actually begin and end flight. Slots used: 2, Power Points used: none

Armaments

Armor, Light Mecha: +2 Armor Class. A mecha can have only one type of armor (and a shield). Slots used: 2, Power Points used: none

Armor, Medium Mecha: +4 Armor Class. A mecha can have only one type of armor (and a shield). Slots used: 4, Power Points used: none

Armor, Heavy Mecha: +8 Armor Class. A mecha can have only one type of armor (and a shield). Slots used: 8, Power Points used: none

Tactical Shield: +1 Armor Class. Slots used: 1, Power Points used: none

Gladiator Enhancement: The mecha has specialized combat ability when fighting face to face. +1 to hit with a melee/hand-to-hand attack per Power Point spent. Slots

used: 1, Power Points used: 1 to 5 per turn this bonus is applied

Ion Cannon: No damage to hit points, but the enemy suffers a -1d6 penalty to all rolls on its next turn. Slots used: 2, Power Points used: 5 per attack.

Laser Blaster: 3d6 damage. Slots used: 2, Power Points used: 6 per attack.

Machine Guns: 1d6 damage. Slots used: 1, Power Points used: 4 per attack.

Mass Cannon: 2d12 damage. Slots used: 2, Power Points used: 6 per attack.

Mecha-Sized Hand Weapon: Size Grade I: 1d8, Size Grade II: 2d8, Size Grade III: 3d8 damage. Slots used: 1, Power Points used: 6 per attack. This weapon can be used in melee/hand-to-hand combat only. Choose a specific weapon, like axe, sword or club.

Missile Pods: 1d20 damage. Slots used: 2, Power Points used: 8 per attack. Fires a barrage of 20 small missiles. The die roll indicates how many hit their mark.

Plasma Cannon or Rail Gun: 2d10+5 damage.

Slots used: 3, Power Points used: 7 per attack.

Punch or Crush (landing on another mecha): Size Grade I: 1d6, Size Grade II: 2d6, Size Grade III: 3d6 damage. Slots used: none, Power Points used: 4 per attack. This weapon can be used in melee/hand-to-hand combat only.

Targeting System: The mecha has specialized combat ability with long-range attacks. +1 to hit with a missile/ranged attack per Power Point spent. Slots used: 1, Power Points used: 1 to 5 per turn this bonus is applied

Recoilless Rifle: 2d10 damage. Slots used: 2, Power Points used: 5 per attack.

Rocket Launcher: 1d8 damage. Slots used: 1, Power Points used: 5 per attack.

Shockwave Pulse Emitter: 2d8 damage. Slots used: 3, Power Points used: 7 per attack. It fires an electromagnetic pulse that fries electrical systems, sparks flammable materials, and sends targets flying an additional 10 feet (2 spaces) per point of damage suffered.

Microlite20 Spacecraft

By **greywulf**

Created **06/17/2008 - 08:39**

Contributed by **Darth Cestual**.

These are ship creation rules based around Microlite20 character creation rules. Please keep in mind that I have none of the D20 Future or any of the D20 Star Wars books,(as shame I know) so I've been kinda winging it basing my options on how M20 has developed thus far. So on that note, I wholeheartedly welcome other, more informed conversions for space goodies into M20.

Ship stats do NOT directly translate to character stats. Should it be needed, such as strafing a battlefield of infantry troops, or an orbital bombardment, roll the effects as normal, then multiply by 10.

A ship has 3 stats and 4 systems.

Stats:

Hull = the strength of a ships structural integrity

Thrust = the ships speed and maneuverability performance

Network = the efficiency of the various systems to keep a ship running

Systems:

Computer = the information resource on board as well as the processing power in investigating new phenomenon.

Sensors = the means the ship uses to examine the area around it as well as being able to avoid other sensory systems.

Armaments = a ships offensive and defensive capabilities.

Command = the efficiency of a ships captain and crew to maintain a ships systems as well as it's ability to communicate with other representatives beyond the ships crew.

Ships come in 4 basic classes and are outfitted to meet whatever configuration they need to fill. Each ship has a number of slots per ship type to allocate special systems such as Weapons, Defensive Systems, etc.

Classes:

Raven- small 1-2 person craft, examples are: stunt fighter, spy ship, advanced recon, personal transport.

Ravens are capable of maneuvering through an atmosphere and landing planetside. Ravens gain +2 Thrust, 6 slots, 1 Power Core

Falcon- 3-10 person crew, examples are: assault craft, cargo smuggler, supply shuttle, diplomatic transport.

Falcons are capable of maneuvering through an atmosphere and landing planetside. Falcons gain +2 Hull, 10 slots, 2 Power Cores standard

Albatross- 10-20 person crew, examples are: battleship, freighter, research vessel, refugee transport,

passenger liner. An Albatross is capable of maneuvering through an atmosphere and landing planetside. Albatross gains +2 Network, 20 slots, 3 Power Cores standard

Phoenix- up to 50+ crew compliment, examples are: Capital ships, carriers, heavy freighters, deep space exploratory vessels. A Phoenix is a space only craft and requires a shuttle or other means of transport planetside. Phoenix gains +1 all Systems, 50 slots, 4 Power Cores standard

Space Stations- if it's necessary for your game to stat up a Space Station, I'd suggest taking the stats for a Phoenix class ship and doubling/tripling/or quadrupling as appropriate.

Configurations:

Warship- gains +3 Armaments, military vessels designed for combat

Privateer- gains +3 Sensors, used by independent contractors, pirates, smugglers, and space gypsies.

Science Vessel- gains +3 Computer, for explorers, researchers, and medical ships

Transport- gains +3 Command, noted for cargo haulers, public/private charters, and supply ships

Power Core- Every ship draws energy from its Power Core which enables its weapons, defenses, drive systems, etc. Every ship must have at least 1 Power Core, and each Core supplies 50 power points for its systems. Power pulled from the Core for system use drains points from the power pool, and are not regenerated until after a scene ends, or 1 point per minute to recharge. When a ship's Power Core reaches zero points, it is dead in space. There is a 10% chance (1 on a D10) that Core containment is lost and a Core Breach occurs, which means a Core Explosion is imminent. The crew will have 1d20+5 rounds to escape via Escape Pods or some other means. Backup Systems can allow a reroll of a Core Breach, or add an additional 1d6 rounds to escape. A Core Explosion completely destroys a ship and does 1d100 damage for a 1 kilometer radius per Power Core. Additional Cores can be installed beyond the ship standard, take up 2 slots, Ships with multiple Power Cores may sacrifice the available power for 2 more slots, but must maintain at least 1 Power Core and power usage remains the same. For example a Phoenix class cargo vessel may opt to drop its 3 of its Cores for more storage space, but would not be able to jump to Hyperspace as it requires 100 points of power for a ship of that size to do so.

Weapons:

Weapon Mount- 2 slots

Lasers- low power beams of coherent light 1d4 damage, 1pt/shot

Rail Guns- magnetically accelerated slugs 1d6 damage, 2pts/shot

Torpedo Bay- 3 slots, 3pts/shot

Torpedoes- low yield, but very maneuverable rockets that can track a target 1d8 damage, +2 Armaments on attack

Photonic Torpedoes - high yield rockets that can track a target 2d8 damage, +1 Armaments on attack

Missile Launcher- 4 slots, 3pts/launch

Missiles- high yield rockets that can be outfitted with various warheads 2d10

Heavy Weapon Mounts- 4 slots, 4pts/shot

Particle Beams- pulsed beams of sub-atomic particles, 3d6 damage

Disruptors- energy beams that disrupt energy shields and power to systems for 1d4 rounds

Lances - high power energy beams, 1d20+5 damage, 5 slots, 5pts/shot

Defensive Systems

Armor- adds bonus to AC, 1 slot = +1 AC

Cloaking Device- avoids Sensor detection, (+20 Sensors) 1pt/round while active.

Energy Shields- absorbs damage, Shield Generator 2 slots, 2pts to activate, absorbs damage at 1 power point for every point of damage inflicted.

Escape Pods- allows up to 4 people per pod to escape a doomed ship. 2 slots

Evasive Maneuvers- pushing a ships maneuverability to it's limit, +1 Thrust/per point

Other Systems

Additional Power Core- +50 power points, 2 slots

Advanced Sensor Array- intense active multispectrum scan and analysis, adds +10 Sensors, 1 slot, 1point/round while in use.

Back Up Systems, help prevent a Core Breach, 1 slot

Cargo Bay- 4 slots, 1 ton of cargo/slot

Hyperdrive- allows interstellar travel, 2 slots, ?spinning up? the hyperdrive requires ½ the standard power supply for a ship of its size, Raven 25points, Falcon 50 points, Albatross 75 points, Phoenix 100 points

Matter Transporter- teleports people or cargo ship to ship or to and from planetside, 3 slots, 1point/100lbs transported.

Rec Room- 3 slots, be it a lounge, mess hall, or holodeck, a rested crew functions better, +1 Command

Research Lab- +5 Computer, 3 slots

Reserve Power Supply- holds 20 points of reserve power, 1 slot, can only be recharged once all Power Cores are fully charged.

Probes- automatic or remote guided sensor arrays that can be sent into hostile or unknown areas with little risk to the crew, +5 Sensors, may be used in place of Missile or Photonic Torpedo warheads, 1 slot

Robot- a non-sentient construct that can perform tasks and duties too dangerous for the crew, 1 slot, (A robotic PC may take this spot as part of the crew, freeing up the slot)

Robotic Arm; Cargo- 1 slots, used for moving cargo, debris, or docking with other ships

Robotic Arm; Combat- 2 slots, can be equipped with ranged or melee style weapons for ship to ship combat

Shuttle- Larger craft may hold smaller craft within their cargo bays, Ravens taking 4 slots and Falcons taking 8 slots, or they can attach to the mother ship on the outside for ½ their cost.

Storage Unit- 2 slots, 1 ton of cargo/slot

Tractor Beam- 3 slots, a projected EM field that can hold or move an object in space. 3 points to activate

Combat

Hit Points = Hull Stat + ship class, Raven= 10, Falcon= 20, Albatross= 30, Phoenix= 40

If HP reaches zero, the ship is destroyed and a Core Explosion occurs, see above.

Roll d20 + Thrust bonus for initiative order

Each ship can do one thing each turn; move, attack, beam down the away team...etc.

Diplomacy bonus = Network bonus + Command

Weapon attack bonus = Network bonus + Armaments

WAYFARER M20

Wayfarer M20 presents 6 sections that are designed to be used in conjunction with Microlite20 Core rules. Its primary design goal is to allow M20 to be played with as few pages of rules as possible, without the SRD, and without limiting content to a few short lists. It seeks to provide alternate, fast-moving, and detailed systems to break free of the tyranny of lists, and provide game masters with the tools they need to instantly create limitless variety of original material.

SRD compatible material can be created using Wayfarer M20 such as new and original races, classes, equipment, weapons, armor, spells, magic items, magic weapons, magic armor, wandering monsters, campaign monsters, improvised attacks, hazardous effects, treasure hoards, traps, poisons, diseases, and prestige classes.

The intent is not to create content that is *identical* to the SRD, which is impossible. Rather, the intent is to create *compatible* material. Meaning, that players will not notice a difference between a monster they fight from the SRD, and the monster behind them that was spawned from MonsterMill20.

A second goal of Wayfarer M20 is to include some of the innovations that have come to 3.X gaming in recent years. Much like Trailblazer and Pathfinder, Wayfarer M20 is Micro-3.75 Edition.

WAYFARER M20: TABLE OF CONTENTS

CORE SUPPLEMENT.....	1
MINIMERCHANT20.....	2
MICROMAGIC20.....	3&4
MONSTERMILL20.....	5
MASTERSMANUAL20.....	6
MATHMERGE20.....	7

The Appendices are provided in order to aid Game Masters and players with integrating Wayfarer M20 material into their M20 campaigns. The Wayfarer M20 material, combined with the Appendices, is all the material gaming groups should need besides dice, pencils, and a quest. The Class, Monster, and Spell/Item Record Sheets will help GMs quickly create unique content for their campaign, and store it away for future sessions.

WAYFARER M20: APPENDIX

1. Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; (d) "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10 Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12 Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13 Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14 Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

WAYFARER M20: CORE SUPPLEMENT

Wayfarer M20 presents additional Races and Classes that are both compatible with the M20 Core rules, and also reflect the design philosophy of the Core material. An alternate system for multiple Level-dependant attacks is presented that averages the same damage output per Level as the previous system, but increases speed of play. Other sections are a supplement to Core material.

Alternate Character Creation and Advancement

Standard Point Buy: Purchase Stat scores with the following system using 13 points.

Stat Score 8 9 10 11 12 13 14 15 16 17

Point Cost 0 1 2 3 4 5 6 8 10 13

Elite Array: Assign these scores as desired: 15 (+2), 11 (+0), 8 (-1).

Stat Based Level Advancement: Increase HP by STR score/3 (round down), rather than by d6. A number of skills increase by +1 equal to Mind score/5 (round down), rather than every skill increasing by +1.

Additional Races

Gnomes get +2 AC

Half-Elves get +1 to Feat bonuses

Half-Orcs get +2 melee and missile damage

Additional Classes

Barbarians can wear light or medium armor and use shields. They have a +3 bonus to Physical and may expend HP to go into a rage, suffering -2 AC. For every 2 HP expended, gain +1 to melee attack rolls, melee damage rolls, and ignore 1 point each time damage is taken. A Rage may expend a maximum of (Level +1) HP per encounter. Barbarians may also use their uncanny senses to add +1 to any roll once per day. This increases by +1 at 5th Level and every five levels on.

Bards can use light armor. They have a +3 bonus to any one chosen skill. They cast Arcane spells with a max Spell Level of $\frac{1}{3}$ Level (round down). Bards may choose to cast a spell as a Bardic Performance. The Performance takes a full turn, uses chosen skill rather than Level for magic checks, and lowers the spells' final level by 1.

Clerics can wear light or medium armor and use shields. They cast divine spells with a Spell Level equal or below $\frac{1}{2}$ their Class Level, and gain +3 bonus to Communication. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Druids can wear light and medium armor but may never use worked metal. They have a +3 bonus to Communication. May transform into any creature with HD less than or equal to Caster Level. Casts any nature related spell with a Spell Level equal or below $\frac{1}{2}$ their Class Level (rounded down). Spells are cast at +1 HP cost (no signature spells).

Fighters wear any kind of armor and use shields. They have a +3 bonus to Physical and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on.

Monks wear no armor but add both DEX and MIND bonuses to AC. They add +3 to Physical. Unarmed attacks deal d8 damage and are treated as light weapons. Add +1 to AC, 'saving throws,' and attack and damage rolls made with unarmed attacks and special monk weapons. This increases at 4th Level, and every four Levels on.

Paladins use any kind armor and use shields except tower shields. They have a +3 bonus to Communication. Their touch and melee attacks may cure or inflict 1 HP on allies or evil enemies for every 1 HP they exhaust. May cast Divine spells with a Spell Level equal to or below $\frac{1}{4}$ Caster Level (round down).

Rangers use light armor and shields. They have a +3 bonus to Subterfuge. They reduce total penalties from additional attacks by +1, increasing by +1 at 6th Level and every five Levels on. At 6th Level, may add a second bonus two-weapon/bow attack if they take a further -2 penalty on all attacks that round. May cast Divine spells with a Spell Level equal to or below $\frac{1}{4}$ Caster Level (round down).

Rogues can use light armor. They have a +3 bonus to Subterfuge. If they successfully Sneak (usually Sub+DEX, but depends on situation) against a foe they can add their Subterfuge skill rank to the damage of their first attack that round

Sorcerers/Magi wear no armor and gain a +3 bonus to Knowledge. They can cast arcane spells with a spell level equal or below $\frac{1}{2}$ their class level, rounded up.

Wizards wear no armor and add +3 to Knowledge. They cast Arcane spells with a Spell Level equal or below $\frac{1}{2}$ their Class Level, (rounded down, minimum 1st). May select 2 signature spells/Schools of Magic rather than 1.

Combat

Each round, a character may do 2 things: attack once and move 30 feet. Movement must be traded to make extra attacks. Attacking may be traded for a total of 120 feet of movement. Characters may also do something minor (like draw a weapon) for free each round.

Rather than the standard extra attack progression, at Level 6 characters may choose to make a bonus attack, but every attack you make that round is with a -2 penalty. Reduce all bonus attack penalties by +1 at Level 11 and 16.

Members of every class, except those with a max spell Level of $\frac{1}{2}$ Level, may use Dex bonus + Level as Melee attack bonus when wielding light weapons. They may also make an extra attack when using two light weapons or a bow, if they take a -2 penalty on all attack rolls that round.

Characters with a max Spell Level of $\frac{1}{2}$ may choose a signature spell per level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use. For campaigns with impromptu casting, choose a School, rather than 1 spell per level, that costs 1 HP less to use.

Saving Throws = Level + relevant ability bonus.

Feats

Feats are used to perform extraordinary tasks, and may be used twice per encounter. Feats may be used to add a bonus equal to $\frac{1}{2}$ the character's Level (round up) to any of the following: d20 roll, damage roll, AC, or spell DC. The GM might also allow you to expend a feat use to attempt a rule-bending action or cause hazardous effects.

WAYFARER M20: MINIMERCHANT20

MiniMerchant20 allows GM's create many of the items they need for a campaign. Weapons and protective items are able to be created from scratch. A means of generating magical gear is also presented.

Weapons and Protective Items

Each weapon is created by selecting features from its table. Each feature costs a number of points and the point total determines the item's cost. To create a Melee weapon, a Damage and a Size must be selected. To create a missile weapon a Damage, Range, and Re-fire must be selected. To create weapons from scratch determine the number of Points used to create the item. The weight of a weapon is equal to ¼ the number of points used to create it (round down, minimum 1). The weight of a protective item is ¼ its AC bonus (round down, minimum 1).

Melee Weapons			Missile Weapons				Protective Items
Weapons: gp Price = points*5			Weapons: gp Price = points*5				Armor: Price = (AC x 5) ²
Points	Damage	Size	Points	Damage	Range	Re-fire	Light +1; +2; +3
1	d4	2 Handed	1	d4	Short	Full Turn	Medium +4; +5; +6
2	d6	1 Handed	2	d6	Medium	Move Action	Heavy +7; +8
3	d8	+2 Maneuver	3	d8	Long	At-Will	
4	d10	Thrown	4	d10			Shields: Price = AC x 7
6	d12	Light/Double	6	d12			Standard +1; +2
*Maximum point value= 8			*Maximum point value= 8				Tower +4

Equipment

Most equipment is purchased in sets of items used for similar purposes. A basic set merely allows the character to participate in the corresponding activity (survive in the wild, investigate a ruin, etc). Each set of items comes with an appropriate means of carrying/packing the set. If a specific item is required, a d20 roll of 11 or more confirms that the character has the item in question at that time. Deluxe kits lower this roll's target to 5 or more and add a +2 to appropriate skill rolls. Characters may carry a weight equal to their STR score.

Equipment					
Set	Price	Weight	Set	Price	Weight
Wilderness Survival Pack	15 gp	5	Craftsman's Tools	5 gp	3
Deluxe Survival Pack	200 gp	10	Deluxe Craftsman's Tools	55 gp	10
Exploration Kit	20 gp	3	Healer's Supplies	100 gp	5
Deluxe Exploration Kit	150 gp	5	Deluxe Healer's Supplies	400 gp	10
Scholar's Bag	70 gp	3	Common Mount and Gear	90 gp	-
Deluxe Scholar's Bag	250 gp	5	War Mount and Gear	580 gp	-
Thieves' Implements	40 gp	3	Magic-Crafting Assortment	500 gp	10
Deluxe Thieves' Implements	130 gp	5	Unique Tool	50 gp	1

Mounts and Vehicles

Vehicle speed is expressed in five categories with accompanying modifiers: Stationary/Slow speed (0), Average speed (1), Fast (2), and Full (4). These modifiers apply positively to the vehicles' and passengers' defense and apply negatively to many passenger actions. Riders use the vehicle's speed rather than their own. A typical horse moves twice as fast as a humanoid.

Magic Items

Magic items can be brought over directly from the SRD. If this is done, modify DC's to fit M20 by adding ½ of the party's average Level (round up) to the DC from the SRD. They may also be made from MicroMagic20 spells. When adding magical properties to items of significant value, add the Cost presented below to the value of the regular item. Once creation of a magic item is complete, it may not be modified.

The DC for resisting a magic item is 10 + the Creator's Level + Creator's Mind bonus. There are 4 basic types of magic items: single charge, multiple charge, renewable use, and constant use.

Single Charge: contains single disposable charge, such as a potion or scroll. (Cost= Spell Level x Caster Level x 50gp).

Multiple Charge: contains many disposable charges, such as a wand. (Cost= Spell Level x Caster Level x number of charges x 50gp).

Renewable use: contains multiple charges that renew each day. (Cost= Spell Level squared x 2000gp/ (5/Charges per day)).

Constant use: effect is continuous, such as magical weapons or rings. (Cost= Spell Level squared x 2000gp).

If PCs create magic items, they must expend 1 Mind for every 250gp of cost (round down) rather than HP for each charge cast into the object, so this may take many days.

WAYFARER M20: MICROMAGIC20

Micromagic20 allows magic users to create and cast their own unique spells. Rather than rely on traditional spell lists, spells are created to fit the situation, using one of eight Schools of Magic. A School of Magic is a group of related spells that work in similar ways, have a shared starting point, and share a scale of progression. A School's table provides the information needed to create a unique spell, but GMs and players are encouraged to use additional template structures and spell descriptors. The tables provide mostly bare bones game-rule information about how powerful a spell can be, without providing specific details. Players and GMs are left to narrate any remaining information such as which creature is targeted, what the effect looks like, etc.

Reading the School of Magic Tables

Name: the name of the School of Magic that is represented on that table.

Ad-lib spell template: This fill-in-the-blank sentence is completed by selecting descriptors from the table below. The selected descriptors modify the final Spell Level (SL). Each School has a set of default descriptors which are in **bold** and indicate a 0-level spell for that School. For each category "step up" a descriptor improves, adjust the spell's final Level by +1. Decrease the spell's final level by -1 for each "step down."

Power source: A School of Magic is "Arcane," "Divine," or both "Arcane and Divine" in origin. This designation limits which Schools a particular class has access to.

Target(s): A spell may target certain subjects or an area of space. A spell's "area" may be a cylinder (10' radius, 30' high), cone (40' long), four 10' cubes, a ball (20' radius spread) or a 120' line.

Range: A spell's range indicates how far from you it can reach. A range of "zero" means the spell can only target the caster or something the caster touches. "close" range is about how far a character can move in one action, or 25'. "medium" range is about 4x close range, or 100'. "long" range is about 8x close range, or 400'.

Effect: A spell's effect describes how the spell influences its target. It is the most unique part of a School of Magic.

Qualifiers: A spell's qualifier further defines a spell's effect. Not every School of Magic has qualifiers.

Duration: How long a spell lasts. A spell with no duration has an instantaneous result with possible long-lasting consequences.

Additional Modifications

- To combine multiple spells into one, set all common descriptors identically, total combined spell Levels, and add +1.
- Cast spell as a free action by adding +4 to Spell Level.
- Delay spell effects up to 5 rounds by adding +3 to spell Level.
- Set a specific condition to trigger spell cast into creature or object by taking MIND rather than HP damage.
- Effect additional targets (up to Caster Level) dealing half damage or -4 DC by adding +3 to Spell Level.

Abjuration: "...to protect/shield a(n) [Target(s)] at [Range] range from [Effect] by [Qualifier] for [duration]."					Arcane & Divine
	Target(s)	Range	Effect	Qualifier	Duration
+6				by deflecting [Effect] back to its origin	+6
+5				by granting immunity	+5
+4				-	+4
+3				+8 to saves; DR; dispelling [Effect]	+3
+2		long		+ 4 to saves; damage reduction	1 hr./Lv

-1		zero		1 round	-1

Examples

- Tholozan the Cleric wants to protect himself from fire while exploring the Dungeon of Flame and decides to cast a Level 3 Abjuration spell in preparation. He explains what he wants to the GM, reviews the Abjuration School and announces, "Tholozan casts a Spell Level 3 Abjuration to protect [a creature]^{+0 Sp.Lv.} at [zero]^{+0 Sp.Lv.} range from a [type of damage: fire]^{-1 Sp.Lv.} by [+4 damage reduction]^{+2 Sp.Lv.} for [1hr./Lv.]^{+2 Sp.Lv.}." He expends the required HP and the spell takes effect.
- Tiamat the Mage wants to destroy a pack of trolls with a cone of acidic vapor with a 5th Level spell. He explains what he wants to the GM, and decides, "Tiamat casts a Level 5 Evocation to blast this [cone shaped area]^{+1 Sp.Lv.} at [close]^{+0 Sp.Lv.} range to deal [2(SL)d6]^{+1 Sp.Lv.} [+6]^{+3 Sp.Lv.} damage." The Level 5 spell deals 10d6+6 damage to the trolls that fail the save.

WAYFARER M20: MONSTERMILL20

MonsterMill20 presents two systems for developing M20 monsters quickly, and with a little more detail than the "Create your own" section of the Core rules. While it was designed for monsters, these systems can be used to create unique NPCs and even quick characters. These values represent the complete monster, thus equipment is relegated to flavor or posthumous treasure. Simply perform each step in order.

Creating Wandering Monsters

1. Choose the monster's Encounter Level (EL). A good EL is usually same as player's Level.
2. Choose a HD/Spells pairing (may cast any spell within chosen School(s), or have a special ability that acts like a particular spell created from that School of Magic. Max Spell Level = $\frac{1}{2}$ Lv.).

HP= Roll HDx EL.

AC= 8 + max HD face value

Attack and Skills= EL

Weapon= 2HD dice, +1d at EL 6, 11, and 16.

Feats= Per Player Characters

Wandering Monster Example: The (EL 8) Die Six Monster. HD 8d6 (24 hp); AC 14; Weapon +8 (3d6); Casts Abjuration, Divination, Enchantment, and Transmutation Schools of spells with a max Spell Level of 2.

HD	Spell Schools/-like Abilities
d4	all arcane
d6	all divine
d8	4 'Arcane & Divine'
d10	1 'Arcane & Divine'
d12	None

Creating Animals

To create mundane animals, simply use the Wandering Monster rules and exclude magical abilities. Next, choose the HD according to the animal's size and its EL according to its ferocity (max EL 8). Make any needed adjustments from there.

Creating Campaign/Adventure Monsters

1. Develop the monster's concept, including how it will use its magical ability. Note that this can represent cast-able spells or spell-like abilities for non-casting monsters. So, a monster could have the ability to fly with no cost to HF, or the ability to cast Transmutation School spells, allowing it to fly, at the normal cost of HP.
2. Determine monster's Level/EL. A single monster with the same Level as the characters is a good wandering monster challenge.
3. Use the Monster Creation Table below. Every monster has a default setting indicated by the bracketed descriptors. For every value that is shifted up, another value must be shifted down.
4. Decide if a template is to be used. These create different versions of the same monster, based on its role in the adventure.
5. Allocate Feat bonus or usage. (explained below).
6. Calculate Monster's HP, AC, Weapon Die, Magic known, Max Spell Level, Stats, and Attack and Skills.

Monster Creation				
Hit Die	AC/Armor	Weapon Dice	Schools of Magic/-like Abilities	Max Spell Level
d4	10/none	2d4	0 Spells or Schools	$\frac{1}{5}$ EL (round down)
d6	13/light	2d6	2 'Arcane & Divine' Schools	$\frac{1}{3}$ EL (round up)
[d8]	[16/medium]	[2d8]	[4 'Arcane & Divine' Schools]	[\frac{1}{2} EL (round up)]
d10	19/heavy	2d10	all Divine Schools	
d12	22/hvy.+ shields	2d12	all Arcane Schools	
d12+1	25/hvy.+ t. shields	2(d12+1)	all Divine & + 1 Arcane Schools	
d12+2	28/enhanced	2(d12+2)	All 8 Schools	

HP= Roll: EL x HD

d20 rolls= EL.

AC, Schools of Magic, and Max Spell Level= Per table.

Damage= Weapon Dice. +1 Die at Level 6, 11, & 16. Monsters gain extra damage dice rather than extra attacks. Note that this determines how much damage a melee or ranged attack does, not necessarily what weapon the monster is wielding, or 'how many' times it hits a Character.

Monster Creation Example: Mothman HD 8d10 (40 hp); AC 19; Claws +8 (3d6); Skills +8; Feat bonus +4

It finds people, curses them, and then flies away. Transmutation Ability: may fly for up to 1 day without rest. Casts Enchantment spells (Max Spell Level = 4). (Descriptor shifts: HD +1, AC +1, WD -1 SoM -1, MSL +0).

Feat Bonuses

The monster's Feat bonus is $\frac{1}{2}$ Level (round up) and may be used 2 ways: 1. used 2 times per encounter during play, just like a PC's feat bonus; 2. exchanged permanently during creation to additionally increase attack rolls, skill rolls, spell DCs, damage rolls, AC or damage reduction.

Stat Bonuses

Stat bonuses have already been factored into the monsters' makeup. But, if needed, a monster's primary ability bonus= $\frac{1}{2}$ Level (round up). Their second and third most important stats are primary bonus -1 and -3 respectively. Full ability score= [bonus]x2+10.

Monster Role Templates

Cohort: HP=1, EL awarded toward Level advancement is $\frac{1}{4}$ original.

Captain: Double HP; +2 AC; +1 Damage Dice; EL awarded is 2x.

Lone Boss: +2 AC; +2 Damage Dice; Multiply HP and EL awarded by the number of players.

NPCs and Quick Characters

These rules may be used to create NPCs as well as characters for a one-shot adventure. Bear in mind that part of creating them is selecting the AC and Weapon Dice of the character. If you allow the NPC or PC to collect new gear, consider using the values selected for weapons and armor function as a cap that may not be exceeded.

WAYFARER M20: MASTERSMANUAL20

MastersManual20 provides tools for quickly improvising results for unexpected player attack actions, environmental hazards and other bits GMs commonly need for running and planning adventures. The goal is for the GM to spend less time planning and more time playing creatively with the group. It also presents a guide to create unique traps and Afflictions, without having to rely on exhaustive lists.

Improvised Hazardous Effects

The table below can be used to adjudicate improvised attacks and/or hazards. The DC to inflict a hazardous effect is the target's Level or EL+ the DC modifier. Add the targeted monster's EL to the DC modifier to see how difficult it is to inflict the adjacent damage or condition. To attempt both damage and condition effect, add a second corresponding DC modifier. Either all of the effects are imposed, or none of them. Targets have a chance to end their condition at the end of every turn (DC= roll to impose effect).

Improvised Hazardous Effects		
DC Mod	Damage*	Condition
EL + 10	1	AC and Saves -2
EL + 14	2d4	-2 to d20 rolls
EL + 16	2d6	Do only 1 thing per round (target's choice)
EL + 18	2d8	Cannot move or cannot attack (attacker's choice)
EL + 20	2d10	Skip turn (except for saving throw)
EL + 22	2d12	Totally helpless (except for saving throw)

*+1 die at EL/Level 6, 11, and 16

Treasure

Grant treasure based on the EL of the encounter. The value, in gold pieces, for each EL is below.

EL1:100xd6, EL2:200xd6, EL3:300xd6, EL4:300xd6, EL5:400xd6, EL6:600xd6, EL7:800xd6, EL8:1000xd6, EL9:1000xd6, EL10:2000xd6, EL11:2000xd6, EL12:3000xd6, EL13:4000xd6, EL14:5000xd6, EL15:6000xd6, EL16:8000xd6, EL17:10000xd6, EL18:10000xd6, EL19:20000xd6, EL20:20000xd6

Traps

To create traps, simply use MicroMagic20 spells for effects. Use the Spell Level as its EL and experience award. Use the spells DC for finding and disarming the trap.

Afflictions: Poison and Disease

Afflictions, such as poison and disease, are similar to Hazardous Effects except they do ability damage to a Stat rather than HP damage. ½ of the Affliction's EL is added to the experience pool upon completing the encounter. Afflictions have an interval, the amount of time between exposure and each saving throw. One saving throw is made to avoid the initial threat (2 dice of damage). Each additional dice of damage (if any) has its own saving throw, made at each interval.

Intervals= 1 round (inhaled and injury poison); 1 minute (ingested or contact poison); or 1 day (disease)

Save DC = EL + DC modifier.

Price= DC multiplied by maximum adjacent initial damage, multiplied by half of the maximum additional damage (for one dose).

Craft DC= Save DC, may be modified by crafter. Spend 3/4 market price in materials.

Example: EL8 (d4) Venom. Interval: (Injury) 2d4 STR damage 1st round, 1d4 STR damage 2nd round; Save DC 22; Price 704gp (22x8x4); Craft DC 22

Converting DC's from the SRD to M20

Modify DC's to fit M20 by adding ½ of the party's average Level (round up) to the DC from the SRD.

Prestige Classes

The best Prestige Classes are created for specific players and campaigns. For M20, Prestige classes have a minimum skill requirement, narrow the character's area of expertise, and provide additional options and benefits in that area of expertise. Many of the Prestige Classes from the SRD are too crunchy for M20, however, some M20 versions of Prestige classes are provided below.

Arcane Archer Requirements: Physical 9; *May not utilize any class benefit while using heavy armor, shields, or weapon other than a bow.* May cast Arcane spells into loosed arrows which trigger upon impact. Spells used for this purpose are treated as having a +2 Spell Level. May add MIND instead of DEX to bow attack rolls.

Arcane Trickster Requirements: Subterfuge or Knowledge 11. *May not utilize any class benefit while using medium armor or shields and until Subterfuge is used in the encounter.* Feature: May cast Arcane spells but at +1 spell level. May sneak attack but must add level, rather than Subterfuge, to damage. All other class features are void.

Archmage Requirements: Knowledge 16. *May not utilize any class benefit unless casting an Arcane spell. May not use signature spells.* Feature: May expend 4 hp to lower a spell's final level by 1.

Assassin Requirements: Subterfuge 8. *May not utilize any class benefit against an enemy that were not unaware.* Feature: May study a victim for 3 rounds before making an assassination attack roll (d20+ DEX+ MIND+ Subterfuge). If hit, the victim makes a saving throw vs. the assassination attack roll: success= takes damage+ Sub; failure= death or temporary paralysis (Assassin's choice).

Blackguard Requirements: Communication 9. *May not utilize any class benefit unless doing the will of an evil outsider.* Feature: May use any weapon, armor,

or shield. May cast Divine Spells with a spell level equal or below ¼ their class level rounded up.

Duelist Requirement: Physical 9. *May not utilize any class benefits while wearing armor or using a shield and unless wielding a light melee weapon.* Feature: Add physical skill bonus -8 to AC and DEX+ Phys rolls.

Dwarven Defender Requirement: Physical 9. *May not utilize any class benefit unless adjacent to an enemy.* Feature: May choose to take defensive stances during an encounter. Once the stance is taken, add ½ Level (round up) to AC and ignore 1 point whenever damage is taken. When your position changes, take a -1 to all STR rolls for the rest of the encounter.

Eldritch Knight Requirements: Knowledge 9. *Class features may not add to weapon damage.* Feature: May wear at least light armor and shields and cast Arcane Spells. Spells are cast at +1 Spell Level.

Hierophant Requirement: Communication +16. *May not any class benefit unless casting a Divine spell. May not use signature spells.* Feature: May expend 4 hp to lower a spell's final level by 1.

Mystic Theurge Requirement: *Communication or Knowledge +9. May not utilize any class benefit unless casting a spell. May not use signature spells.* Feature: May cast Arcane and Divine Spells, but at +1 Spell level

WAYFARER M20: MATHMERGE20

MathMerge20 presents the ability to compare the apples of class features to the oranges EL and Character Level. It assumes that Core M20 and the SRD are balanced both internally, and with each other. MathMerge20 allows GM's to create new material such as races and classes, as well as provide a means of double-checking balance for house rules.

The Master List

The process began by giving 1 skill point an arbitrary value of "1," justifying the valuation of other features from that fixed point of reference, double checking progress by assuming general balance between the 4 M20 Core classes, multiplying every value by a factor (so that the total of every feature, across 20 Levels of play is roughly equal to 20.0 for each class), then rounding for convenience.

Feature	EL+/-	Justification	
1 Ability Score Point	0.20	Race section of SRD sets Ability Score bonuses and Skills at a 2:1 value ratio	
Skill Point (+1 Phys.)	0.10	As Above	
Skill Progression	0.13	Assumes a Player will only utilize 33% of the possible ways to use a skill bonus.	
Class Skill (+3)	0.30	3 times the valuation of 1 skill point.	
Typed Attack Bonus	0.10	Seems as important as a +1 to a Skill	
Base Attack Bonus	0.30	3 times the Typed Bonus value (for Melee, Missile, and Magi.	
Add d6 to Max Hit Points	0.33	Valued at 1/3 total value of +1 Attacks and +1 Skills.	
Add 1 to Max Hit Points	0.10	As +d6 Hit Points, but divided by 3.5 and truncated.	
+1 Typed Damage	0.10	As Hit Points (+1 to all damage rolls would be 0.30)	
Extra Attacks	0.30	80% of 3.5 since extra attacks reduce chance of dealing d6 damage.	
Two Weapon Fighting	0.30	As Extra Attacks.	
Signature Spells	0.20	As if it saves 2 HP/day	
Light Armor Use*	0.30	Max AC Bonus for that type of Armor/2 (as it must be worn)	* SRD/M20 Core Armor values are: Light: 0.40 Medium: 0.50 Heavy: 0.75
Medium Armor Use*	0.60	As above	
Heavy Armor Use *	0.80	As above	
Shields Use	0.20	As above, but divide by 2, as it takes a hand to gain benefit.	
Tower Shields Use	0.40	As above	
+1 AC Bonus	0.20	Twice as valuable as armor proficiency that allows for the same bonus.	
Weapon Finesse	0.10	Adds an average of +1 to Melee attack rolls	
Sneak Attack (Lv. 1)	0.20	Value of 4 damage divided by 2, due to requisite skill roll	
Sneak Attack Upgrades	0.10	Value of 1 damage divided by 2, as above.	
Turn Undead (Lv. 1)	0.10	one third the value of a "Arcane and Divine" spell school (x10 for each Spell Level)	
Total Magi Spells/SL	0.27	Average Fighter and Rogue values, and value Magi spells to make Magi meet this value	
Total Cleric Spells/SL	0.21	As Magi spells but -1 "Arcane and Divine" School	
One Spell Level of an "Arcane AND Divine" School	0.03	Divide Magi spell value by 9, such that Evoc. and Ills. spells are worth double the 5 A&D spells.	
One Spell Level of an "Arcane OR Divine" School	0.06	As above, valuing "Necromancy & Healing" equal with Evocation and Illusion Schools.	

Creating a New Class

This is only a guide to help GMs make judgment calls and probably cannot be used in a mechanical way with every player. To create a class from scratch, decide on an over-arching concept for the class, then select class features, and class feature upgrades that will occur over all 20 Levels.

There are 3 types of class features including: Base class features, One-time features, and Re-occurring features. Each class feature has an EL value. When you total up all the EL values of all the class features the character will gain over all 20 Levels of play, the total should be about EL 20.

First, apply base class features. The class base is what all characters in M20 have in common. If you alter a base class feature, you are altering something in the M20 rules that appears somewhere besides the class description. These features are Ability Score/Stat Increases, Attack Bonuses, Extra Attacks, HD (D6), Skill Progression, and +3 Skill Bonus. The total of all of these features combined is 17.0 EL. All the other distinctive features, both One-time, and Re-occurring, will constitute the remaining 3.0 EL.

Second, choose the One-time features, starting with any armor and shield proficiencies. Limit additional One-time features such as Two Weapon Fighting so that a character is not over powered at Level 1. When you total all the Level 1 features for M20's Fighter, the total EL is 1.95. Many think the Fighter is too powerful early on, so consider capping Level 1 features to 1.75 EL.

Third, select how often class features improvement will occur. The EL of each class feature is multiplied by its number of occurrences. For instance, "Ability Score Increases" are a basic class feature and one is granted every three Levels. This means the character gets 1 point to add to one ability score on Level 3, 6, 9, 12, 15, and 18, a total number of 6 occurrences. Class features can improve on any schedule, some common examples are detailed below.

Tip: Whether or not it is best to rigidly enforce the numerical caps mentioned above is largely a matter of style. For example, the Core M20 classes often total higher than 20 EL. However, they also contain a lot of features that players end up under-utilizing. The caps will be most useful for managing players who tend to character-optimize, to reduce the risk of a class becoming too powerful.

New Character Features

There are 2 basic ways to create a class feature. 1: find a similar class feature on the MathMerge20 list and approximate the EL for the new feature. 2: Treat the feature like a spell-like ability. Spell-like abilities cost the same EL as it's School of Magic, but they do not require HP loss to activate, instead they may be activated at will. So a new class feature that acted like a 0-Level spell from the Divination School would cost 0.04 EL. To improve it like a Level 1 spell would cost another 0.04 EL.

Creating a New Race

Races can be created much like classes. All races begin with stats determined by rolling 4d6 and dropping the lowest die. A race has a number of features equal to 0.40 EL, but these features do not actually effect the total EL of a character or monster.

Appendix: MICROLITE20 REDACTION

This is a trimmed-down, subminiature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD (monsters, spells, adventures and equipment) could be used without conversion.

Stats

There are 3 stats : Strength (STR), Dexterity (DEX) and Mind (MIND).

Roll 4d6, drop lowest die. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

Humans get +1 to all skill rolls

Elves get +2 MIND

Dwarves get +2 STR

Halflings get +2 DEX

Classes

The classes are Fighter, Rogue, Mage, Cleric. Characters begin at Level 1.

Fighters wear any kind of armour and use shields. They have a +3 bonus to Physical and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on

Rogues can use light armour. They have a +3 bonus to Subterfuge. If they successfully Sneak (usually sub+DEX, but depends on situation) against a foe they can add their Subterfuge skill rank to the damage of their first attack that round

Magi wear no armour. They can cast arcane spells, and gain a +3 bonus to Knowledge

Clerics can wear light or medium armour and use shields. They cast divine spells and gain +3 bonus to Communication. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Skills

There are just 4 skills : Physical, Subterfuge, Knowledge and Communication. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level + any bonus due to your class or race.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + STR bonus.

Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Note that there are no "saving throws" in this game; use Physical + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all arcane spells in the SRD spell list.

Casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast:

Spell Level 0 1 2 3 4 5 6 7 8 9

HP Cost 1 3 5 7 9 11 13 15 17 19

This loss **cannot** be healed normally but is recovered after 8 hours rest. There is no need to memorize spells in advance.

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character. Select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) for all spells is 10 + Caster Level + Caster's MIND bonus

Combat

Hit Points = STR Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Roll d20 + DEX bonus for initiative order. ~~Everyone can do one thing each turn; move, attack, cast a spell, etc.~~

Melee attack bonus = STR bonus + Level

Missile attack bonus = DEX bonus + Level

Magic attack bonus = MIND bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's Armour Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage.

~~Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a 2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.~~

~~If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10, and a fourth at -15 if the total bonus is +16 or more. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2. No more than four attacks can be made in a round, regardless of bonus (five if two weapons are used).~~

Add STR bonus to Melee damage, x2 for 2-handed weapons.

Armour Class (AC) = 10 + DEX bonus + Armour bonus.

Other Hazards

~~Falling : 1d6 damage per 10', half damage on Phys+DEX save. DC=depth fallen in feet~~

~~Spikes : add +1 point to falling damage per 10' fallen, max +10~~

~~Poison : Phys+STR save to avoid or for half, depending on poison.~~

~~Effect varies with poison type.~~

~~Extreme Heat & Cold : If not wearing suitable protection, Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.~~

Level Advancement

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds:

+1d6 to Hit Points

+1 to all attack rolls

+1 to all skills

If the level divides by three (i.e. level 3,6,9,etc.) add 1 point to STR, DEX or MIND.

Fighters gain +1 to their attack and damage rolls at levels

5,10,15,etc.

Clerics and Magi gain access to new spell levels at levels 3,5,7,9,etc.

Example

The 1st level adventurers have just completed a dungeon adventure, and defeated 5 EL1 encounters, an EL2 trap and the EL3 leader.

That's a total of EL10, so they all advance to level 2. They need to defeat another 20 Encounter Levels to reach Level 3.

Monsters

Name	Hit Dice	Armour Class	Attack
Animal (small) eg Badger	HD 1d8+2 (6 hp)	AC 15	Claw +4 (1d2-1)
Ankheg	HD 3d10+12 (28 hp)	AC 18	Bite +7 (2d6+7 plus 1d4 acid)
Bugbear	HD 3d8+3 (16 hp)	AC 17	Morningstar +5 (1d8+2) or javelin +3 (1d6+2)
Choker	HD 3d8+3 (16 hp)	AC 17	Tentacle +6 (1d3+3)
Deinonychus (Raptor)	HD 4d8+16 (34 hp)	AC 16	Talons +6 (2d6+4)
Dire Rat	HD 1d8+1 (5 hp)	AC 15	Bite +4 (1d4 plus disease)
Dragon (young Red)	HD 13d12+39 (123 hp)	AC 21	Bite +20 (2d6+7) or breath 10d10 DC24 phys+DEX to dodge for half
Dwarf	HD 1d8+2 (6 hp)	AC 16	Waraxe +3 (1d10+1) or shortbow +1 (1d6)
Earth Elemental (large)	HD 8d8+32 (68 hp)	AC 18	Slam +12 (2d8+7)
Elf	HD 1d8 (4 hp)	AC 15	Longsword +2 (1d8+1) or longbow +3 (1d8)
Gargoyle	HD 4d8+19 (37 hp)	AC 16	Claw +6 (1d4+2)
Goblin	HD 1d8+1 (5 hp)	AC 15	Morningstar +2 (1d6) or javelin +3 (1d4)
Griffon	HD 7d10+21 (59 hp)	AC 17	Bite +11 (2d6+4)
Halfling	HD 1d8+1 (5 hp)	AC 16	Shortsword +3 (1d6) or light crossbow +3 (1d6)
Hellhound	HD 4d8+4 (22 hp)	AC 16	Bite +5 (1d8+1 plus 1d6 fire)
Hill Giant	HD 12d8+48 (102 hp)	AC 20	Greatclub +16 (2d8+10) or rock +8 (2d6+7)
Hobgoblin	HD 1d8+2 (6 hp)	AC 15	Longsword +2 (1d8+1) or javelin +2 (1d6+1)
Human Commoner	HD 1d8+1 (5 hp)	AC 12	Dagger +1 (1d6+1) or sling +1 (1d4)
Insect (small), e.g. Spider	HD 1d8 (4 hp)	AC 14	Bite +4 (1d4-2 plus poison)
Kobold	HD 1d8 (4 hp)	AC 15	Spear +1 (1d6-1) or sling +3 (1d3)
Ogre	HD 4d8+11 (29 hp)	AC 16	Greatclub +8 (2d8+7) or javelin +1 (1d8+5)
Orc	HD 1d8+1 (5 hp)	AC 13	Falchion +4 (2d4+4) or javelin +1 (1d6+3)
Owlbear	HD 5d10+25 (52 hp)	AC 15	Claw +9 (1d6+5)
Rust Monster	HD 5d8+5 (27 hp)	AC 18	Antennae touch +3 (rust)
Shadow	HD 3d12 (19 hp)	AC 13	Incorporeal touch +3 (1d6 Str)

Stirge	HD 1d10 (5 hp)	AC 16	Touch +7 (attach)
Stone Golem	HD 14d10+30 (107 hp)	AC 26	Slam +18 (2d10+9)
Troll	HD 6d8+36 (63 hp)	AC 16	Claw +9 (1d6+6)
Werewolf (hybrid form)	HD 3d8+7 (20 hp)	AC 16	Claw +4 (1d4+2)
Wight	HD 4d12 (26 hp)	AC 15	Slam +3 (1d4+1 plus energy drain)
Wolf	HD 2d8+4 (13 hp)	AC 14	Bite +3 (1d6+1)
Wyvern	HD 7d12+14 (59 hp)	AC 18	Sting +10 (1d6+4 plus poison) or Talon +10 (2d6+4) or Bite +10 (2d8+4)
Zombie	HD 2d12+3 (16 hp)	AC 11	Slam +2 (1d6+1) or club +2 (1d6+1)

Skills: All creatures have a bonus to all skills equal to their number of Hit Dice. If the creature is intelligent, add +3 to one skill. Add stat bonuses to suit and as logic dictates. This is intentionally kept open – if you need a sneaky bugbear, assign the +3 bonus to Subterfuge; if a warrior, give +3 to Physical; for a spell-caster assign the +3 to Knowledge or Communication and give levels of Mage or Cleric (see below).

Monster Advancement: To make a tougher monster, add more Hit Dice; each additional HD adds one to their skill and combat bonuses. For each doubling of the Hit Dice, increase the dice size for attacks (ie, d4->d6, d6->d8, etc).

Alternatively, add class levels to intelligent monsters. Start with the base Hit Dice and add levels of Fighter, Rogue, Mage or Cleric as required.

Create your own: Assign Hit Dice (d8 for most things, d12 for Dragons and Undead). Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter, +3 bonus to one skill. Add stat bonuses to suit.

Sample Characters

Morris, Human Rogue-1

STR 12 (+1), DEX 15 (+2), MIND 12 (+1)
hp 13, AC 15 (Studded Leather), Paired Shortswords, +0/+0, d6+1
Subterfuge +5, all others @ +2

Kendrick, Dwarf Fighter-1

STR 16 (+3), DEX 13 (+1), MIND 11 (+0)
hp 17, AC 17 (Chainmail + shield), Longsword +5, d8+4
Physical +4, all others @ +1

Cholmer, Elven Mage-1

STR 12 (+1), DEX 13 (+1), MIND 16 (+3)
hp 13, AC 11 (Robes), Quarterstaff +2, d6+1
Knowledge +4, all others @ +1
Spells: All 0 and 1st level arcane spells.

Barnabas, Halfling Cleric-1

STR 10 (+0), DEX 16 (+3), MIND 13 (+1)
hp 11, AC 18 (Chainmail), Morningstar +1, d8
Communication +4, all others @ +1
Spells: All 0 and 1st level divine spells.

Microlite20 Low Talents

Alternate Talent and Weapon Rules

This is an alternate approach to character and equipment creation that provides extra variety without the need for pre-generated lists of skills, talents or weapons. It can be used in addition to the standard four-skill system or as a replacement.

Talents are slightly narrower than the four broad skills (Physical, Knowledge, Subterfuge, Communication) and tend to provide a much lower bonus. Each talent requires a minimum MIND score to learn; most provide a +1 to skill in a specific situation, but some may increase damage by +1, reduce damage by 1, or allow the character to perform otherwise inaccessible actions.

Base minimum MIND for talents is 8, or 9 for the simple professions. For talents that provide a +1 bonus, add +2 to minimum MIND if it covers actions either difficult even under perfect conditions or completely outside an average character's experience/training. Also add +1 to MIND for every additional feature or adjective the talent adds to a character's description; the features and adjectives must all fit together in one skill or type of action. Special limitations on the talent can reduce minimum MIND by -1, but don't lower it below 8.

Talents with +2 bonuses are possible, but have the +1 version as a prerequisite. Thus, the Healer talent (+1 hit point restored on successful skill roll) is a prerequisite for Expert Healer (+2 hit points restored,) which in turn is a prerequisite for Master Healer (+3 hit points restored.)

Alternative Shortcut: if you know the expected DC of the action you want a talent for, divide it by 5 and add 4 to get a minimum MIND score required.

Starting Talents, Option 1: Characters begin with a number of talents equal to their MIND modifier. **Option 2:** Characters begin with a number of talents equal to half their MIND score.

Adding Talents: Characters either gain one new talent every other level, or can spend xp needed to rise another level on adding 1 talent instead.

Optional Spell Rules

If the GM wants to limit the number of spells characters can use, they can be treated as talents. Minimum MIND to learn a spell is twice the spell's level (minimum MIND 8.) Two spells count as one talent.

Optional Flexible Class Rules

If the GM wants to allow spell-using Fighters or Wizards armed with swords, make the following changes to the talent and spell rules above:

- **Fighters** and **Rogues** start with MIND/2 talents (per Option 1.) They can trade three talents for two spells.
- **Wizards** and **Clerics** start with MIND/4 talents. They can trade one talent for four spells.

Instead of the listed starting weapons, use broad weapon talents (sword, ax/mace, polearm: MIND 7; bow, whip, bolas: MIND 8.) Fighters/Rogues pay triple for spells; Wizards/Clerics pay double for weapon/physical talents.

Optional Weapon Rules

To avoid creating equipment lists, weapons can be designed like talents. They have minimum STR scores needed to use: base minimum STR for weapons (other than small ones barely bigger than a hand) is 9. Every adjective, ability or improvement (+1 point of damage, hard to break, physical abilities like entanglement for flails) adds +1 to the minimum STR needed.

Base one-hand weapon damage = 1d6, or 1d6-2 for small weapons like daggers.

Base two-hand weapon damage = 2d6

Extended reach (long, longer, longest): +1 damage, +2 STR per range; these are two-handed weapons, but they can be used one-handed if character has twice the minimum STR needed. Each range allows a character to attack an opponent 1 step further away than the previous range, so a character with a long weapon can step outside the reach of an opponent with an ordinary sword or club while still being able to attack.

"Cheap Coin" Cost (silver, in a gold-based currency) of weapons made of common material (wood, leather, bone) equals minimum STR (1 coin for small weapons,) +1 per adjective. Also use minimum STR for **"Common Coin" Cost** (gold, in a gold-based currency) of weapons made of common metals like iron. Double or triple cost for other metals, with higher multipliers for rare materials (silver weapons = 10 x iron cost, for example.)

Costs for two-handed weapons are based on minimum STR to use one-handed.

Microlite20 "Variable d6" Resolution

This is a d6-only substitute for attack and skill rolls in Microlite20. Instead of beating a target number using $d20 + \text{modifiers}$, roll less than or equal to $\text{skill} + \text{STR}$, DEX , or MIND . Most Physical actions use DEX , but feats of strength use STR . Mental actions use MIND . Roll $3d6$ for most actions; if the total is less than or equal to $\text{stat} + \text{skill}$, the action succeeds. Add dice for more difficult actions, remove dice for easier actions (1 die for each element in the current situation.)

Special modifiers:

- difficult even under perfect conditions: +2 dice;
- outside a character's experience/training: +2 dice.

Don't roll for:

- easy tasks (no chance of failure)
- impossible tasks (8+ dice.)

Criticals (optional): For rolls of more than 2 dice, count 1s and 6s: all 1s = double or special effect; more than half 6s: reduce effect by 1 on success, suffer 1 die penalty if failed.

Optional Strength and Speed Adjustments

Use $\text{STR}/10$ or $\text{DEX}/10$ as a strength or speed rating in contests (breaking free of bearhug, moving out of opponent's reach.) The difference, dropping fractions, is the number of dice of difficulty to add to the weaker/slower contestant's roll.

Optional Combat and Movement Rules

- **Parry/Dodge:** skip attack to increase difficulty of opponent's attack.
- **Maneuver around opponent or outside of reach:** roll 3 dice vs. DEX ; max distance movable equals difference in speed ($\text{DEX}/10$).
- **Throw Weapons:** $\text{DEX} + \text{skill} - 1$ point per step of distance from target.
- **Missile Weapons:** $\text{DEX} + \text{skill} - 1$ point per 4-step increment.
- **Hand-to-Hand combat:** $\text{DEX} + \text{skill}$ to grapple unless opponent wants to grapple, too; while grappled, barehand or small weapon attacks are at -2 dice (no need for attack roll for most ordinary attacks, just roll damage.)
- **Pin, Crush, or Strangle:** $\text{STR} + \text{skill}$ roll in hand-to-hand combat. Adds +2 dice to opponent's DEX rolls unless opponent breaks free with STR .

DC Quick Conversion

DC 20 is a $3d6$ vs. $\text{stat} + \text{skill}$ roll. Roll 1 more die for every +5 DC up to DC 40. Roll against $\text{stat} + \text{skill} - 1$ point per +1 DC over 40.

MICROLITE 20

Fantasy Expansion: Character Creation Options

By Andrew Domino (www.dominowriting.com/games.html), last revised April 15, 2014

Creative Commons NonCommercial ShareAlike 3.0 Unported License

Based on the Microlite 20 Purest Essence rules

including ideas from Seth Drebitko, Greywulf, dymond, weeot, KeithCampbell and others
on the Microlite 20 forums and elsewhere

The following is a number of optional methods for creating and playing Microlite 20 fantasy characters (though in many cases they apply to any Microlite 20 game, regardless of genre). Any of these can be used in addition to or in place of the rules listed in the Microlite 20 Purest Essence document. These rules options are meant to help you create a fun and easy-to-play game the way you want it. They blend fantasy RPG rules for specific tactical measurements, with free-form rules for “making it up as you go,” and with a comprehensive set of rules that many gamers already know.

Choose as many options as you wish, as long as the other players and game master are using them too, or at least as long as they approve of the changes you’re making to your character. Make the game your own – use the options you like, change the options you sort of like, and ignore the options you don’t like.

It’s assumed that characters are using Strength (STR), Dexterity (DEX), Mind (MIND), Physical, Subterfuge, Knowledge, Communication and Survival. Most other RPG skills are covered by these five skills. For example, Technology is part of the Knowledge skill, and Perception is part of the Subterfuge skill. In the same way, other stats are just a mix of a stat and skill. Charisma is MIND + Communication, and Endurance is STR + Physical, for example.

STATS

Quick Stats

To generate a character even faster, assign stat scores of 16, 13 and 11 to STR, DEX and MIND any way you wish. You can increase a stat score by decreasing another stat score by the same amount.

Kjell the Bear is a classic all-muscle, no brains fighter. I assign 16 to his Strength, 13 to Dexterity and 11 to Mind. Because I want to “max out” his Strength stat score, I boost it by two to 18, and to make up for that increase, I drop his Mind stat score by two. His stat scores are now STR 18, DEX 13, and MIND 9.

Stat Points

Characters start with 40 stat points to assign to the three stat scores. Each has a minimum of 3 and a maximum of 18. Any stat points not spent are lost. For a “grittier” game, try 30 stat points, and for a more heroic game, try 45 or even 50 stat points.

Stat Bonus Chart

After adjusting stat scores for race and class, determine your stat bonuses by using (stat score -10) /2, round down. This math is done for you here.

<u>Stat Score</u>	<u>Stat Bonus</u>
3	-4
4 – 5	-3
6 – 7	-2
8 – 9	-1
10 – 11	+0
12 – 13	+1
14 – 15	+2
16 – 17	+3
18	+4

Adding New Stats

Though the three stats of Microlite 20 cover everything a character does, some game masters or game settings may call for changing or adding stats (like the popular choices of Charisma and Perception). To add a new stat after a character has been created, simply roll 1d6 +10 to determine the stat score.

PERSONALITY CHARACTERISTICS

While it's always up to a player to determine how his or her character performs in the game, giving mechanical rewards for personality traits can help some players do more than wait for the next fight. Using this option, each character begins with a personality characteristic, or two if the game master agrees. In many cases, one characteristic represents the character's behavior toward others, and another represents how they really are inside, and among close friends.

This option can also be used for the classic alignment systems found in many RPGs. For example, a character's personality characteristics might be "neutral" and "good."

The game master can also assign a personality characteristic to a character whenever he or she finds it appropriate, though characters shouldn't have more than three or four total. All characteristics must be approved by the game master before the character begins play (to prevent a party of loners, for example).

When the character does something significant that aligns with one of his or her characteristics (as determined by the game master), he or she gains a check mark. A character will usually gain no more than one to three check marks in any one game session, even with multiple characteristics.

At the end of each game session (each night of playing, not necessarily when the adventure is over), roll 1d6 for each check mark. On a result of 5 or 6, each player gains experience equal to the amount it would get for an encounter of the party's level. On a result of 4 or less, no experience is gained. All check marks are erased before the next game session. This way, personality characteristics that would otherwise be a hindrance to the party can still contribute to the game by earning experience, assuming they are played out during the session.

Twenty-five personality characteristics are listed below. Use these as examples to create your own.

Aggressive (intimidating, competitive): You enjoy picking fights and bullying others around. Even if you aren't physically intimidating, you still do

whatever you can to win. As the saying goes, "Winning isn't everything, it's the only thing."

Earn a check mark when you start any kind of competition (from an argument to actual combat).

Arrogant (prideful): You know you're right, and if someone else has a good idea, you still find a way to make yourself the center of attention. You know you're better than others, but sometimes having someone else around can be useful.

Earn a check mark when you are able to make yourself the center of attention.

Brooding (morose, gloomy): You feel your special abilities make you an outcast in society. No one truly understands you, and though they may try to sympathize, you truly are all alone.

Earn a check mark when you accomplish something using an ability, power or talent no one else in the party has.

Cautious (shy): You like to make sure everything is in order before you take action, and prefer to let other people take the lead. You have no problem joining in, but you'd prefer to never have to be in charge.

Earn a check mark when you get through combat without making an attack, or when an action you have planned out ahead of time works perfectly.

Comic (wisecracking): You're here to have a good time. You think of funny things to say all the time, and even when you know it's not appropriate you can't help yourself. You're a lot of fun to be around, at least for most people.

Earn a check mark when you make the other players (and/or characters) laugh out loud.

Creative (artistic): You live to design, build and perform. You like creating beautiful things (however you define beauty) because something flawless or original makes the world a better place.

Earn a check mark when you create something new (a weapon, a work of art, etc.)

Dilettante (partier): Life is short; party hard. You want to experience everything you possibly can, because you never know when it could all disappear. You're a lot of fun to be around — life is meaningless, so why think too much about it?

Earn a check mark when you have a good time in a social situation (make new acquaintances, become the “life of the party,” etc.).

Diplomatic: You prefer talking to fighting. You don’t necessarily have a problem with combat, but you’re skilled at getting two sides to come to an agreement — it usually turns out better for you and your allies than a fight would.

Earn a check mark when you are able to act as the negotiator between two sides and mediate a successful agreement.

Focused (driven, single-minded): You are disciplined to accomplish a certain goal, even if it’s a goal that’s impossible, like bringing all criminals to justice, or creating harmony between all people. You often make for a good leader, though you’re not always the easiest person to be around. Select a goal when you choose this characteristic.

Earn a check mark when you refuse someone or something because it would distract you from your chosen goal.

Giving (kind, martyr): You always try to help others, because the world needs more goodness and hope. You’ll hold the line against those who deliberately perform evil acts for no reason (often, adventuring parties cause damage and destruction, but it’s usually in the name of good). You’re the one others depend on to help them through tough times.

Earn a check mark when you successfully protect or help someone else (aside from minor healing).

Honorable (lawful, virtuous): Many adventurers follow moral codes of some kind, but for you, honor is life. You don’t lie unless there is absolutely no other way to get out of a situation, and are uncomfortable when others cheat or steal. You don’t insist others live the way you do, just that they understand the rules you have set for yourself, and respect you enough to not try and encourage you to break them.

Earn a check mark when you follow your code of honor, at a time when doing so makes things more difficult for the party.

Impulsive (curious, eager): You always want to know what’s ahead, what’s around the next corner. You like trying new things that get your adrenaline going — stunts, dangerous situations, anything that shakes yourself and others out of

boring, every day existence. Sometimes you’re crazy and wild, always doing the unexpected either because you can’t help yourself or because you truly are out of your mind.

Earn a check mark when you get into a daring situation that surprises others, especially if you rush in without any preparation (combat doesn’t count).

Inspiring (noble): Those who know you turn to you for advice or to lead the way. Those who don’t know you respect you (even your enemies), and you work at all times to make life better for yourself and your kind.

Earn a check mark when you accomplish a task that helps a larger group you belong to (not your adventuring party, but your race, nation, organization, etc.).

Intellectual (scholarly, scientific): The world can be explained with rigid rules; you just haven’t learned them all yet. You love solving puzzles and figuring out problems. Sometimes you may alienate others, by spending your time in your own head rather than talking with people.

Earn a check mark when you solve a complicated problem.

Judgmental (by-the-book): You like to be in charge, and look down at others who don’t live their lives your way. For you, everything must be perfect — your manner of dress, your behavior, and the world: it’s either with you or against you. You like making things run smoothly, making you a good leader, if others can handle your opinions of them.

Earn a check mark when you accomplish a task without a single mistake, injury, obstacle or point of confusion.

Loner (deviant, rebel): You simply don’t fit in, whether by choice or because others have made you that way. You don’t dwell on your outsider status, but live like a “lone wolf,” often hitting the road and not making many close friends. Some loners enjoy their independence, so much so they have a problem with any leadership, and like to make things difficult even when it won’t help their cause.

Earn a check mark when you succeed at a task without anyone’s help, or when you cause significant trouble without retaliation.

Loyal (zealous, fanatic): You are true to your friends or a certain group (the target of your loyalty), even when they're making mistakes. You would never do anything that would harm or betray your target. The only thing that matters to you is your target's well-being and success — you'll sacrifice yourself and work hard to advance your cause. Select a single friend, adventuring party, or group to which you are loyal.

Earn a check mark when you aid your target, especially if it's in a way that does you personal harm.

Mysterious: Your true self is hidden — maybe even you don't know who you are, and where you came from. You speak in riddles and disguise your origins, which puzzles others. It may also conceal your true skills and powers.

Earn a check mark when someone else makes an untrue assumption about you that gives you an advantage.

Naïve (innocent, childlike): You may be a child, a sheltered adult, or an outsider being exposed to the real world for the first time. You aren't stupid, and learn from your mistakes. Even when an error turns you bitter or teaches you responsibility, you still feel optimistic in new situations.

Earn a check mark when you learn something after trying a task for the first time.

Responsible (reliable): You can teach and protect others who can't help themselves. You don't like to see others get hurt; you'd rather they learned from your experiences, or never have to learn what you've learned the hard way.

Earn a check mark when you are able to protect or help someone who can't help themselves.

Sarcastic (cynical): The world is a tough place, and you're better off criticizing everything about it, keeping it at arm's length. You try hard, but even when you don't ask for much you can't get it. You know how things "really" work, and just have to laugh when you see others try and fail — like you knew they would. Sometimes it's a grim statement on the world; other times it's a witty, biting comment.

Earn a check mark when you point out a mistake or flaw in yourself or others that led to tragedy.

Suave (convincing, smooth): You don't like to work hard, so you've developed the ability to make

others do it for you. You might be good at fast-talking others into doing your job, or seducing a lover, or pulling a tricky con that makes you a lot of money.

Earn a check mark when you trick someone else into doing your bidding.

Tortured (haunted): Your past has come back to trouble your present. Something horrible happened to you once, and it has affected everything that's happened to you since. You feel guilty and shamed, and work every day to try and clear your conscience. You're afraid it may never be clear. Select an action in your past (before you started play) that led to your current state when you choose this characteristic.

Earn a check mark when you do something because it helps calm your tortured mind.

Whiny (petulant, long-suffering): You suffer, either honestly because it helps take the burden from others or (more commonly) because you've led an easy life, and don't like doing anything difficult. Sometimes whining irritates others so much you get your way after all. But don't do it too often, or everyone will start to ignore you.

Earn a check mark when you get your way after whining about your situation.

Wise (deep, thoughtful): You know a great deal and have reached a point in life where you're ready to pass that knowledge along to others. You may meditate serenely, or be smart about dozens of things and want to teach others. In your experience, ignorance is the greatest evil, and the light of knowledge will lead the way to a better life.

Earn a check mark when you learn someone has done good because of something you taught him or her.

Kjell has the personality characteristic of "Responsible." He's big and dumb as a man can come, but he's always first in line when an enemy is threatening his friends. During a game session, I say that Kjell charges to the forefront of a skirmish, where an orc is about to draw his sword on young human children. The game master awards me a check mark. At the end of the game session, I roll 1d6 and get a 5. Kjell and all the other heroes earn experience points for good role playing — and I also earned experience for slaying that vile orc during the game.

RACES

Race Points

Instead of selecting a race and taking the listed benefit, each character begins with TWO Race Points, to be spent on the following. Any Race Points not spent are lost. Since your race will not normally change, you will never gain more Race Points.

- 1 Race Point for +1 to one stat score (stat scores can go above 18)
- 1 Race Point for +1 to two different skills
- 1 Race Point for a special ability. Several are listed below, along with the race which most commonly has that special ability. You can select any special ability, no matter what race you decide to make your character.

Battle Fury (half-orc): When making a melee/hand-to-hand attack, if you roll the maximum amount of damage on at least one of your damage dice (for example, an 8 when rolling 2d8), roll an additional 1d6 to determine damage. If you roll a 6 on that die, do not roll again. If you are using critical hit rules, figure the battle fury damage before applying the effects of the critical hit. You can use this ability a number of times per day equal to your STR bonus.

Magical Step (elf): Once per battle, instead of your regular move, you can teleport to any open spot you can see from your current location, within 50 feet (10 spaces).

Many Talents (human): When you use this ability, roll 1d6 along with the 1d20 you normally roll when attacking or making a stat + skill roll. Add the results together to find your final die result for the attack or action. You can use this ability 3 times per day.

Minor Arcana (gnome): Choose one first level spell when creating the character (for gnomes, this is typically the illusionist spell Silent Image). You can use this spell without having to spend hit points 3 times per day.

Resist Fear (halfling): On a MIND + Surv roll to resist fear and terror, add +3 to your roll.

Stand Fast (dwarf): If an enemy attempts to knock you down or push you in any direction, make a STR + Phys +3 roll (DC is enemy's STR + Phys). On a success, the enemy's attempt fails, and you stay in place.

SRD Races And Race Points

The races found in the SRD use race points in the following way.

- *Dwarf*: +2 Strength
- *Elf*: +2 Mind
- *Gnome*: +1 Dexterity, +1 Mind
- *Half-Elf*: +1 Mind, +1 to any two skills
- *Halfling*: +2 Dexterity
- *Half-Orc*: +1 Strength, +1 to Physical, +1 to any other skill
- *Human*: +1 to any four skills

Kjell the Bear is a human, but I like the Stand Fast special ability, so I spend one Race Point on that. My other Race Point is spent on a +1 to Strength, boosting that stat score to 19. His stat bonus is still +4.

CLASSES

Class Points

Instead of selecting a class with pre-determined abilities, you can select the abilities you want for your character. See Page 18.

Divine Domains

You have the special powers granted by a deity or another mystical force. You must be able to cast divine or nature-based spells (like a cleric or druid) to use this option. See Page 28.

Patron Deity

You are a servant of one particular god, goddess or philosophy, and gain several abilities unique to that deity. See Page 29.

Schools Of Magic

You are a specialist magic-user, especially talented with one specific type of spell at the expense of another. See Page 30.

Sorcerous Bloodlines

You have the gifts of one sorcerous bloodline, though you do not have to be a sorcerer or even a spell-casting class to use this option. See Page 31.

SKILLS

Spending Skill Points

In the basic Microlite 20 rules, every character has some degree of talent with every skill. But characters in fiction often have just a few areas of expertise — that's why they team up.

In the Purest Essence rules, skill rank is simply character level + class bonus. Replacing the character level part of the skill rank with skill points lets characters emphasize a few skills instead of being evenly good at everything.

Determine the character's skill points = total number of skills x level. You can assign these skill points to skills any way you wish, with a limit of level +5 skill points in any one skill. Skills without skill points have a skill rank of 0 (zero). Any skill points not assigned are lost. The character gains additional skill points equal to the number of skills the character has each time he or she gains a level.

The character will also gain a total +3 class bonus for one or more skills. This is added to skill points to determine skill rank, and doesn't count against the skill point limit. Remember, your final skill rank will be: skill points + class bonus.

Variants To Skill Points: Characters who gain a level earn skill points, as described in this option, and a +1 to each skill for each character level (or only at first level). This variant gives characters very high skill ranks as they gain levels, which fits the fantasy genre: it's rare that a hero fails at what he's trying to do. It also brings characters more in line with SRD characters that have feats and other benefits that boost skills.

Alternately, when a skill has a rank of 10 or more, it "costs" 2 skill points to improve it by one rank, as advanced levels of training require more from a student.

Chance Of Failure: To keep characters from being perfect at everything, the game master may want to include a chance of failure: A d20 roll of 1 automatically fails a stat + skill roll, even if the character's skill rank is high enough to succeed at the action.

Kjell has the standard five skills of a Microlite 20 fantasy character. At first level, he has (5 x 1 = 5)

five skill points to spend on skills, and he can have at most six points in any one skill. I assign three points to Physical, one to Communication, since he's good at intimidating people, and the last skill point to Survival. As a fighter, Kjell gains a +3 class bonus to Physical, which doesn't count against his limit of six skill points in a single skill. His final skill ranks are: Physical 6, Subterfuge 0, Knowledge 0, Communication 1 and Survival 1.

When he reaches second level, Kjell earns another five skill points, and assigns two to Physical, one to Subterfuge, and two to Communication. He doesn't get any other bonuses to skills, so his new skill ranks are: Physical 8, Subterfuge 1, Knowledge 0, Communication 3 and Survival 1. He can have at most 7 points in any one skill (level 2 +5), but the +3 his class gave him for the Physical skill does not count against that limit.

If I was starting Kjell as a fifth level character, he would have 5 skills x level 5 = 25 skill points, and have a +3 total bonus for one or more skills due to his class. His maximum skill rank (not counting his class skill bonus) would be 10.

Trained Skills

For more variety in skill ranks between characters, choose one skill to be the character's trained skill. If you choose a pre-designed class, it's the skill that is assigned the +3 class bonus (or one skill that gains part of that bonus — player's choice, but once selected the skill cannot be changed). If you choose a rogue-type class, you have Subterfuge as your trained skill, and also choose a second trained skill (you can't choose Subterfuge twice). All other skills are untrained.

Physical + Subterfuge:

Duellist, Street Tough, etc.

Knowledge + Subterfuge:

Demolitions, Trap-Builder, etc.

Communication + Subterfuge:

Diplomat, Spy, etc.

Survival + Subterfuge:

Commando, Highwayman, etc.

Using this option, your character does not receive a +3 class bonus. Instead, at level 1, you start with 3 skill points for each trained skill, and 1 skill point for each untrained skill. Starting with level 2, you gain +1 per level in trained skills, and +1 at each even-numbered level in untrained skills. Every five levels

(5, 10, 15, etc.) you can make one untrained skill into a trained skill. You still add your level to your skill points determine your final skill rank.

Kjell's traveling companion is Galan, a classic halfling rogue who trained under the finest trap-defusers in the kingdom. At first level, Galan has the trained skills of Subterfuge and Knowledge, which provide 3 skill points each (for a skill rank of 4 in each). Physical, Communication and Survival have 1 skill point a piece (for a skill rank of 2 in each). When he reaches second level, Galan will add +1 to each of his skills, since he gains +1 to trained skills each level, and +1 to untrained skills at even-numbered levels. At third level, Galan will add +1 to only Subterfuge and Knowledge, his trained skills.

Aptitudes

The five skills Microlite 20 characters have cover nearly any activity a character might try. For characters who are especially talented in specific areas, they can select aptitudes (also called affinities). An aptitude gives the character an additional +2 when that aptitude applies to a skill use, or a character can reroll the skill attempt when an aptitude applies to a skill use. Decide whether the character's aptitudes provide a bonus or a reroll when selecting aptitudes.

For example, a character with the aptitude "Tracking," which is related to the Survival skill, gains +2 to MIND + Surv rolls when he is attempting to track, but not when he is attempting something else using the Survival skill and STR, DEX or MIND.

A character can have up to three aptitudes. If you choose fewer than three, you begin with +2 hit points for each aptitude you do not select, or you can reroll any die roll you make once per game session, with one reroll per aptitude you do not select. All characters in the game should use this option if it is used, since it makes characters slightly more powerful than others of their type.

Suggested aptitudes include:

Physical: Climb, Endurance, Lift, etc.

Subterfuge: Move Silently, Pick Locks, Pick Pockets

Knowledge: Arcana, Dungeoneering, History

Communication: Bluff, Intimidate, Persuasion

Survival: Animal Empathy, Poisons, Tracking

I've decided that Kjell is good at intimidation, and I'll give him a strong constitution, durable enough to withstand disease and poison, at least to a degree. He has the aptitudes intimidation (Communication) and resist disease/poison (Physical). I don't have a good idea for a third aptitude, so instead I get one reroll per game session.

Heroism Points

Heroism points represent a character's determination and their importance to the plans of the gods or the forces of fate. A character has a number of Heroism points equal to his or her level x 2 (or simply equal to level, for a less heroic game).

Heroism points can be used to add to any attack, damage or stat + skill roll at a rate of +1 per 1 Heroism point spent. You can only spend up to your level in Heroism points on one single roll (for example, a level 10 character can only spend up to 10 Heroism points, for a +10 bonus).

Heroism points do not need to be spent all at once, but when they are completely spent, they are gone for the rest of game session. A character's Heroism points are restored to their starting amount at the beginning of a game session. Alternately, the game master may restore 1 or more Heroism points on a die roll of 20 and/or if the character does something especially entertaining (funny, exciting, or appropriate to the character's personality).

Role Playing Description

If you're interested in telling a story and bringing a fantasy world to life, but some of the players are only focused on the amount of damage they cause and suffer, provide a small bonus (+1 or +2) to stat + skill rolls or attack bonuses that add "flavor" to the story. "I shoot at the orc" or "I try to pick the lock" would not provide a bonus, but "I quickly peek around the corner and loose an arrow before the orc can react" or "I juggle through my picks, remembering when my thieves guild master first taught me to jimmy a lock" might provide a description bonus.

EQUIPMENT

Modern Money

One gold piece is equivalent to \$20 modern U.S. dollars, but good luck finding a bank that will do the conversion either way!

Fourth Edition-Style Equipment

Instead of spending gold pieces, simply select one of each of the following. One weapon, armor or other item has a +1 bonus to attacks and damage, Armor Class, or appropriate stat + skill rolls.

- Melee weapon
- Ranged weapon (and 20 ammunition, if needed)
- Armor
- Shield, if a fighter-type class and using a one-handed weapon as main weapon
- Adventurer's kit (backpack, bedroll, flint and steel, belt pouch, 2 torches, 10 days trail rations, 50 feet hempen rope, waterskin)
- Simple clothing, which has no armor bonus
- Class-appropriate gear (spellbook for wizard, holy symbol for cleric, thieves tools for rogue, etc.)
- 1d6 + 10 gold pieces (or 3d8)

Galan begins with a short sword, a light crossbow and 20 bolts, leather armor, an adventurer's kit, simple clothing, thieves tools, and 12 gp. One item becomes a +1 item, and I'll make it his short sword. It provides a +1 to hit and damage.

Ammunition: Arrows And Bolts

In most situations, it can be assumed that characters have enough ammunition available to them that they'll never run out in battle. The price of the ammunition can be ignored when buying a new bow or crossbow, though special ammunition (like magic arrows or bolts with unusual heads) should be purchased separately. Alternately, on a missile/ranged attack roll of 1, the game master may rule that the weapon is "empty," or alternately has just enough ammunition for one more attack — then it's out of commission for the rest of the battle.

Generic Equipment

If detailed lists of weapons and armor aren't what you're looking for, try generic equipment. Each has

the same set of statistics found in Microlite 20 Purest Essence. Maximum range for thrown weapons is 30 feet; it is 100 feet for ranged weapons.

Weapon Type	Cost	Damage
Unarmed	Free	1d3
Light	5 gp	1d6
One-Handed	15 gp	1d8
Two-Handed	20 gp	1d10
Thrown	1 gp	1d4
Ranged	40 gp	1d8

Armor Type	Cost	Armor Bonus
Light	10 gp	+2
Medium	50 gp	+4
Heavy	250 gp	+6
Light Shield	10 gp	additional +1
Heavy Shield	15 gp	additional +2

"Chainmail Bikini"

What's more 'microlite' than a skimpy suit of armor? Add ¼ the cost of the armor (round up) to its price, to pay for squeezing all that protection into just a few inches of loincloth or chest covering. Add ½ the character's Comm bonus (round up) to AC, because the more beautiful you are, the more distracted your enemies will be. Any kind of armor can be "bikini-ized" — traditionally, the armor is a chain shirt or hide, but the term "breastplate" has real meaning with this option!

Armor	Type "bikini-ized"	Cost	Bonus *
		* +½ Comm bonus (round up)	
Light	Padded	3 gp	+1
	Leather	13 gp	+2
	Studded Leather	32 gp	+3
	Chain Shirt	125 gp	+4
Medium	Hide	19 gp	+3
	Scale Mail	63 gp	+4
	Chainmail	188 gp	+5
	Breastplate	250 gp	+5
Heavy	Splint Mail	250 gp	+6
	Banded Mail	313 gp	+6
	Half-Plate	750 gp	+7
	Full Plate	1875 gp	+8

Kjell and Galan both look hideous in "bikini-ized" armor, so they'll skip this option.

Armor As Damage Resistance

In some RPGs, armor makes a character harder to hit, and reduces the amount of damage they suffer when they are hit. To determine the armor's damage resistance, divide the armor's normal armor

bonus by 2 (round down). To determine the armor's new armor bonus, subtract the DR from the normal armor bonus.

<u>A</u> rmor	<u>T</u> ype	<u>AC</u> bonus	<u>DR</u>
Light	Padded	+1	0 (zero)
	Leather	+1	1
	Studded Leather	+2	1
	Chain Shirt	+2	2
Medium	Hide	+2	1
	Scale Mail	+2	2
	Chainmail	+3	2
	Breastplate	+3	2
Heavy	Splint Mail	+3	3
	Banded Mail	+3	3
	Half-Plate	+4	3
	Full Plate	+4	4

Black Powder Weapons

In some game settings, firearms are available, and while they are deadly, they are also slow to load. If the game master allows black powder weapons in your game, use the information listed below. Any magical or other effects that apply to crossbows or normal bows apply to black powder firearms as well.

If the maximum is rolled on a black powder weapon's damage die (for example, 8 for a pistol), roll again and add the new result to the total. Keep rolling until the maximum is not rolled. A black powder weapon can only be fired once before it has to be reloaded, which takes a character's entire turn.

<u>W</u> eapon	<u>C</u> ost	<u>D</u> amage	<u>R</u> ange
Pistol	250 gp	1d8	50 feet
Rifle	500 gp	1d10	150 feet

COMBAT

Initiative

To determine which character or monster takes the first turn in combat, each character rolls 1d20 + DEX bonus. If there is a tie between two or more initiative results, the character or monster with the highest DEX score acts earlier.

On a combat turn, a character can take TWO actions, usually [1] move and [2] move again, make an attack, cast a spell, attempt another activity (requiring a stat + skill check), etc. Movement of 5 feet or less, drawing a weapon, speaking or similar activities are “free” and do not count as an action.

Kjell and an orc are ready for battle, weapons drawn. I roll 1d20 + 1 (for his DEX of 13) and have the higher result, so I go first.

Using Attack Bonuses

It should be clear from the type of attack a character is making which attack bonus should be used (for example, a sword would use melee/hand-to-hand, while a bow would use missile/ranged). In the SRD, spells call for “ranged touch attacks,” but in Microlite 20, they should use the magic/supernatural attack bonus instead. The spellcaster may still need to physically touch the target of an attack, if the spell’s description demands it. Most spells, however, don’t require a die roll to take effect.

Critical Hits And Misses

A roll of 20 on the d20 is a critical hit, while a roll of 1 on the d20 is a critical miss on an attack roll. There are dozens of special rules for rolling a critical in various RPGs, but the simplest is that a critical hit causes double damage (determine the weapon’s total damage for the attack and double it), while a critical miss hits the attacker or one of his or her allies instead of its target.

Massive Damage

If a single attack causes 50 points of damage or more, the victim of the attack immediately makes a STR bonus + Phys roll vs DC 15. If the roll fails, the character is instantly killed. If the roll is a success, the damage takes effect normally.

Thanks to a magic cape, Galan has 10 points of fire resistance. But a red dragon blasts him for 53 points of damage. I roll 17 on a STR + Phys roll,

enough to avoid the massive damage penalty. He still suffers 43 points of damage – he’s not killed, just very seriously burned.

Non-Violent Combat

The emphasis on combat rules shows how important swordplay and spell-slinging is to the Microlite 20 game. That level of detail can be brought to any sort of confrontation simply by renaming a few things.

In non-violent combat, the opponents aren’t trying to kill one another. Instead of making a roll of attack bonus vs. Armor Class, each combatant makes a stat + skill roll, using the same pair of stat bonuses and skills. If the attacker’s result is equal or higher, he or she causes “damage” equal to 1d6 + stat bonus of the stat used in the combat. That damage is removed from a set of imaginary hit points, equal to the stat score of the stat used in the combat. When those imaginary hit points fall to 0 (zero) or less, the combat is over, and the loser is defeated (knocked unconscious, humiliated, etc). These imaginary hit points are not related to the character’s actual hit points in any way. They cannot be healed, and all damage to imaginary hit points disappears when the combat is over.

For example, a boxing match would use STR + Phys rolls, and the STR stat score for imaginary hit points. A war of insults or an attempt to fast-talk a mark might use MIND + Comm rolls, and the MIND stat score for imaginary hit points.

Social Combat: In a game where characters rely more on their talents for intrigue, seduction and intimidation, the complex combat rules of standard Microlite 20 may not be appropriate. In that case, the game master and players may decide to revise the stats, combining Strength and Dexterity into Body (BOD) and splitting Mind into Mind (MIND), representing knowledge, and Charisma (CHA), representing social skills.

Attack bonuses remain the same, though both the melee/hand-to-hand and missile/ranged attack bonuses will be determined using BOD bonus + level. In the same way, other characteristics like hit points and special abilities will use the new stats. Stat + skill rolls also change to fit the new stats: A backflip over a charging bull is BOD + Subt, while calming an angry mob is CHA + Comm, and flashing a winning smile may be CHA + Phys.

Galan is trying to earn a few coins by entering a contest of skill for tricksters. He plans to show off his talent for mundane illusions like card tricks and the old rabbit-out-of-a-hat bit. The game master decides the contest is a non-violent combat, and will use DEX + Subt. Galan has a DEX of 18, giving him 18 imaginary hit points for this combat. His opponent also has a DEX of 18. Galan wins initiative, and rolls 19 (11 on 1d20 + 4 for DEX bonus + 4 for Subt skill rank). His opponent scores 12, so Galan's first trick is more impressive than the other guy's. I roll 4 on 1d6 and add his DEX bonus for a total "damage" of 8. Now the opponent's imaginary hit points are 10. After a few more moments of trickery, the opponent's imaginary hit points fall to 0 (zero), and the judges announce that Galan has won the contest.

Signature Move

Many heroes have a favorite maneuver or fighting style. As you play your character, you may develop a signature move, one that the character tries to perform each time he or she is in combat. Using this option, the game master may award a +2 bonus on the character's first attack that uses the signature move. An enemy that is successfully injured by an attack using a signature move can also be worth 10 percent more experience points (round up). This bonus can be awarded once per battle.

A signature move may be determined while creating a character, but it is often discovered during play. A character can only have one signature move at a time. Signature moves may include climbing high and diving toward an enemy, giving a chilling battle cry, staring down a foe before drawing a weapon, leading the charge into battle, always head-butting enemies with unarmed attacks, singing or playing a personal "theme song" (in a silly game), etc.

Kjell and Galan are back to back as the orcs approach. Kjell draws his sword and growls. Galan does what he always does: pulls a dagger and tosses it lightly from hand to hand, smiling all the while. Then he suddenly whips the dagger toward the nearest orc. I gain a +2 bonus on the attack, because Galan performed his signature move.

Damage Marks

For a game that spends less time on detailed combat and more on telling a story, ignore hit points and determining specific damage from an attack. Instead, each successful attack causes an opponent to gain one "Damage Mark" (indicate this on the

character sheet or with tokens like coins or poker chips). When the character has suffered four Damage Marks, he or she is out of action for the rest of the battle, and returns at full health (no Damage Marks) immediately afterward.

Minor enemies may only be able to take one Damage Mark, while major villains or powerful heroes may be able to take 6, 10 or more. This option is good to simulate a variety of impediments to characters, not only cuts and bruises but also being bound in a net, stumbling over an obstacle, being intimidated by an enemy's challenge, etc.

During a battle, Kjell is surprised by a gang of hobgoblins, who tie him up in their enchanted ropes. One whacks him over the head with a club, and he is unconscious. Using the traditional hit point rules, it would take the hobgoblins several turns to whittle down Kjell's hit points, but using the Damage Marks option, the ropes and the club each cause one Damage Mark. His exact health status doesn't matter; what makes the story exciting now is that Kjell has been captured and brought before the hobgoblin king.

Knockback

Some attacks are so powerful, they can send an enemy flying backward. If a damage die shows its highest result (for example, a 6 on a d6), the opponent loses hit points from the attack, then moves backward in a straight line 10 feet (2 spaces) per die showing its highest result. Terrain effects are ignored, since the opponent is actually flying or stumbling back, but if the opponent strikes a solid object like a wall or tree, he or she takes 1d6 damage and must make a DEX + Phys roll (vs DC 10) or fall down. If the opponent strikes another character or creature, both must make a roll to avoid falling.

A wizard hurls a lightning bolt at Kjell, for 2d6 damage. The game master rolls a 6 on each die. Kjell takes 12 points of damage and is knocked backward 4 spaces. He slams into a rock wall for another 3 points of damage and a major headache.

Armor Class Adjustments

In the Purest Essence rules, AC = 10 + DEX bonus + armor bonus (from purchased armor and racial and class benefits). To represent characters who keep out of danger thanks to quick thinking and fast reflexes instead of suits of metal, the game master may rule that characters carrying a shield, other

than a buckler, or wearing any armor except light armor (padded, leather, studded leather, chain shirt) cannot apply DEX bonus to AC.

Characters wearing no armor or light armor and/or holding a buckler can still use DEX bonus to determine AC. If this option is used, it should apply to all heroes and enemies in the game, not just characters who would benefit from it.

As a general guideline, armor and shield bonuses adding up to +5 or more do not allow the character to add his or her DEX bonus to AC.

For high-powered games, the game master may want to also award every character a bonus to AC equal to ½ level (round up).

Galan has a DEX bonus of +4, and wears leather armor (+2 armor bonus) for a total AC of 16. Kjell has chainmail armor (+5 armor bonus), and so he can't use his DEX bonus to calculate his AC. So his final Armor Class is 15. Kjell is slightly easier to hit, but much harder to take down (he has more hit points than Galan). He can also wear heavier armor than Galan, ultimately providing a higher armor bonus.

Alternate Defenses

Microlite 20 keeps combat simple with a single defense for all attacks, Armor Class. To add more variety to combat, use the four types of defense introduced in Fourth Edition.

Armor Class: 10 + DEX bonus + armor bonus

Use for weapon attacks
(swords, arrows, maces, etc.).

Fortitude Save: 10 + (STR bonus x 2)

Use for endurance
(swimming, resisting poison, etc.).

Reflex Save: 10 + (DEX bonus x 2)

Use for dodging area effect attacks
(dart traps, dragon breath, etc.).

Will Save: 10 + (MIND bonus x 2)

Use for resisting magical effects
(spells, psionics, etc.)

Galan's Reflex Save is 18 (as his DEX bonus is +4), while his AC is only 15. If a dragon breathes fire at him, he's better at dodging away from the blast than he is at trying to twist out of the way, hoping his armor is tough enough.

Descending Armor Class

Players of early versions of The World's Most Popular Role Playing Game have created fantastic monsters, treasures and rules sets that can easily be used in Microlite 20. While most aspects of the rules work the same, older games use a descending armor class, where a lower AC is better. To convert it to Microlite 20, simply subtract the listed AC from 19, if the listed AC is 9 or less. If it is 10 or more, use the AC as listed. For example, a bugbear has a descending armor class of 5, and a Microlite 20 AC of 14. A hero wearing plate mail might have a descending armor class of -2, which converts to a Microlite 20 AC of 21.

Splintering Shields

Shields are used to add to a character's Armor Class, but they can also be "sacrificed" to prevent injury. Instead of taking any damage from a single successful melee/hand-to-hand attack made by an enemy, the shield's armor bonus can be reduced by -1. If it falls to +0, the shield is destroyed is no longer useful. Missile/ranged and magic/supernatural attacks are not affected by this rule.

Kjell carries a heavy wooden shield (with a +2 armor bonus) into battle against a bandit carrying a war hammer. The bandit hits Kjell for 10 points of damage, but Kjell puts his shield in the way just in time. He takes no damage, but his AC is reduced by 1 (since the shield's armor bonus is now +1).

Mob Fighting

It's dramatic and exciting to have heroes battle hordes of orcs or legions of evil soldiers all at once, but in many RPGs it's difficult to keep track of each in combat. An easy solution is to use the exact same characteristics for a monster or enemy as the game master would use in a one-on-one battle, but state that each member of the mob has only one hit point.

For example, the Purest Essence rules list an average goblin as having 5 hit points. Using this option, a hero could instead fight five goblins, each with one hit point. When it's the goblin mob's turn to attack, all five goblins would attack and cause damage as one (since they are minimal threats on their own, it would take multiple successful hits to truly injure an adventurer). If the hero defeats the mob, he or she gains experience equal to defeating a single normal goblin.

In the same way, a single attack against the mob represents several sword slashes, or a few quick arrow shots, enough to take out several members of the mob at the same time. Using this option, the rules don't really change, but a description of the action can change significantly.

Sanity

A fantasy adventurer's life is full of horrific visions – terrible monsters like dragons and demons, mind-bending magic, and bizarre images that violate the laws of reality. In some game worlds, the strangest sights and thoughts can destroy a hero's sanity.

Each character begins with a Sanity Rating (San) of MIND stat score (not bonus) x 5. Whenever the game master rules that the character has witnessed something that could damage his or her sanity, roll 1d% (1d100). If the result is less than or equal to the character's current San, the character can handle the weirdness and is not affected. If the result is greater than the character's current San, the character's psyche diminishes a little bit. Roll a die based on the intensity of the event, and subtract the result from the character's current San. If your character's San falls to 0 (zero) or less, the character has gone completely insane and is no longer available as an adventuring hero.

If the die is a d8, d10 or d12, and the roll is the maximum for that type of die (for example, a 10 on 1d10), the character may also develop a temporary insanity, like nightmares, a phobia or catatonia. It's up to the game master to determine exactly what the temporary insanity is, if any, and how long it lasts. Effects with a Sanity loss of 1d4 or 1d6 are not traumatic enough to trigger insanity.

<u>Sample Image/Event</u>	<u>San Rating Loss</u>
Animal-Like Monster (hell hound, owlbear, etc.)	1d4
Cult Ritual	1d10
Cultist	1d4
Death	None
Demon, Devil or Undead	1d8 or 1d10
Dragon	1d6 or 1d10
Evil Priest or Magic-User	1d8
Evil Spell	1d6 to 1d12
Giant Monster (giant, troll, large dragon, etc.)	1d10
Gruesome Death	1d4
Humanoid Monster (elf, human, orc, etc.)	None
Supernatural Fear Effect	1d8

Recovery: A MIND + Comm roll (usually vs DC 15) can restore 1d6 San points to a character in the form of "psychology," but only once per day. As with hit points, a character's Sanity Rating can only be restored to its starting amount. A character will never gain more San by advancing in level. The Sanity game option is often used in settings with little magic and few unusual creatures, and often leads inexorably to a character's total insanity.

Kjell, with his MIND stat score of 9, has a Sanity Rating of 45. During an adventure, he vanquishes a horde of skeletons during a search for an evil priest. Destroying skeletons is the kind of thing Kjell does all the time, so the game master decides that won't affect his Sanity Rating at all. However, when Kjell reaches the cultists, they're about to sacrifice a young villager to their dark gods. Each cultist wears a mask made of bone and carries a sacrificial knife decorated with demonic runes. It's more concentrated evil than Kjell the Bear has ever seen in his life.

A cult ritual is a 1d10 San loss. I roll a 10, so Kjell's San falls to 35. The game master also rules that Kjell gains a temporary insanity: he loses his next turn staring blindly into space, as his mind tries to come to grips with the eternal forces that war among themselves in the cosmos.

Corruption

Dark magic and horrible choices offer incredible power, but at a dangerous cost. A character choosing to invite corruption can roll one or more d10 along with any other dice used in any roll (stat + skill, attack, damage, etc). The d10s can be rolled along with other dice, or after the original result is determined. Each d10 used by the character provides 1 Corruption Point. Other evil activities, like willfully harming innocents or wearing magic rings forged by dark gods, may also provide Corruption Points.

When a character's Corruption Points equal the character's MIND stat score (not bonus), the character has been corrupted by evil and becomes a terrible monster. The game master may decide the character is no longer playable, gains physical signs of evil (like mutations or an unpleasant aura) or has some other penalty. A character cannot lose Corruption Points unless he or she is killed and resurrected (at which time the character comes back to life with no Corruption Points), though accomplishing a significant mission for a divine

power of good and light may also reduce Corruption Points.

In a fit of rage, Kjell slaughters an entire gnoll encampment, including the elderly and the children. He picks up 2 Corruption Points, and rolls 2d10 along with his normal weapon dice when damaging each gnoll in the camp.

Healing

While magic always provides healing, characters with more than 0 (zero) hit points at the end of a battle may be able to regain 1d4 hit points +1 per three levels (level 3, 6, 9, etc.) immediately in the form of bandages and catching their breath. This type of healing can only be done once after each battle. A character will regain all of its hit points after a night's rest, even if the character has a turn on watch.

After a battle, Galan and Kjell stop and cover up their cuts and bruises with the healing herbs in the forest. Each rolls 1d4 and recovers a few hit points.

Duration

In most cases, an attack represents not just one swing of an axe or even one shot from a bow, but time enough to cross swords, loose a handful of arrows, leave a few nicks on the enemy's armor, and even hiss threats (for the villains) or call out challenges to fight with honor (for the heroes).

In an "old school"-style game, abilities and spells are measured in segments of real time, like minutes and days. A "new school"-style game calls for measurements in segments of game time, at least when using abilities and spells in combat. It's up to the game master to determine exactly how long a duration will last, but here are some guidelines:

- 1 minute is equivalent to 1 turn.
- 1 hour is equivalent to 1 battle.
- 1 day is equivalent to 1 game session.

At the beginning of a combat encounter, a wizard ally casts the Mage Armor spell on Kjell. His AC increases by +4 for one hour per level. If the wizard is a first level character, the spell lasts the length of the fight (one battle), but if the wizard is second level, the spell lasts for two battles, or one hour, whichever is shorter.

A third level druid casting Protection From Energy, which absorbs damage for 10 minutes per level,

would be able to absorb damage for 30 minutes. In combat, a spell that lasts 30 minutes would last 30 turns – longer than the typical battle, but not long enough to last an entire day. The game master might say that spell might last for three battles (since the druid is third level).

Morale

Combat in fantasy RPGs is fun, but it can go on too long, especially if characters have used all their special abilities, and can't think of another creative way to use the battlefield environment to their advantage. The game master may rule that enemies flee a battle once more than ½ the total number of enemies in a battle are defeated, or if the major enemy of the battle (if there is one) is defeated. Mindless creatures (like skeletons) and player characters never flee using this morale option.

Alternately, morale can be decided by the roll of the dice. Roll 1d6 for each individual enemy that meets the requirements for fleeing above – if more than half the total foes the major enemy is defeated.

If the enemy's Encounter Level is equal to or less than the average level of the adventuring party (round down), the enemy will flee on a roll of 4 or more. If the enemy's Encounter Level is greater than the average level of the adventuring party, the enemy will flee on a roll of 6.

An enemy that flees turns to face as far away from the most immediate threat as possible, then spends its next turn in combat running away, or attempting to surrender, if it cannot escape the battlefield. On the turn after it flees, the enemy is considered to have dropped out of the combat (run away or surrendered), and counts as having been defeated, when collecting experience points and treasure.

Kjell wades into battle with a band of five goblins. He takes out two quickly, but it takes another turn before a third goes down. Since there's less than half the group left, it's time to check morale. The game master rolls a d6 for each goblin, with results of 1 and 3.

The last two goblins glance at one another and decide to flee. They both turn away from Kjell and start running. On his next turn, Kjell draws his bow and is able to pin down a fourth goblin. The final one is able to escape, though Kjell gets credit for defeating him too (that goblin won't threaten another well-armed adventurer any time soon!).

Speeding Up Combat

There are a few simple methods to pick up the pace of battles and get into another exciting fight, or continue telling the story. One option is simply to divide each enemy's listed hit points in half (round down).

Another is standard damage amounts: instead of rolling weapon damage for each enemy, simply assume it does the average amount of damage for its weapon (round up). For example, in the Purest Essence rules, a large monstrous spider causes 1d8+3 damage plus poison. The lowest damage the spider can cause is 4 and the highest is 11 for an average of 8, rounded up. Each time a large monstrous spider hits, it causes 8 points of damage, instead of having to roll and determine damage after each attack. The spider's poison also applies, like it does in the regular Microlite 20 rules.

A third method is to have each player (and the game master) roll 3 d20s at the beginning of a battle and write down those numbers, after determining initiative order. Instead of making a new attack roll each turn during combat, the player selects one of the d20 results he or she wrote down and uses it as his or her attack roll result for that turn. If the battle continues after all the d20 results have been used, the player simply rolls 3 d20s again. Players have to work with the numbers they have, which may lead to more tactical use of the battlefield and the abilities of allies.

Miniatures And Battle Maps

If you have miniature figures (about 1 inch or 25 to 28 mm tall) to represent the characters and their enemies, you'll need a ruler or a battle map covered in spaces (squares, hexes or 1 inch measurements). One space equals 5 feet or 2 yards, and the average character and monster moves 6 spaces per turn,

even diagonally. This is the character's Speed or movement rate.

Small characters (like halflings or gnomes) move 5 spaces per turn, while characters wearing heavy armor (splint mail, banded mail, half-plate, full plate) move 1 space less each turn. On older-style maps, where one space equals 10 feet, the average character moves 3 spaces per turn.

Characters can move through the same space as another character or enemy, but cannot end movement in the same space as another figure. Rubble, darkness, heavy growth and other difficult terrain "costs" 2 spaces of movement per space moved by the character. Moving up and down is the same as moving horizontally (a character does not have to "spend" extra movement to climb or fly). Moving just 1 space is considered a "free" action, as long as the character does not move any farther that turn.

If there's a question whether a character could see an enemy to hit it, draw an imaginary straight line from the center of the attacker's space to the center of the target's space (or one of its spaces, if it takes up more than one space on the map). If there is no major obstacle or enemy in the path, the character can make the attack. Allies of the attacker do not block its path. Characters can attack through windows and other partial obstacles at a -2 penalty to hit.

To avoid calculating attack ranges each turn, melee attacks must be made against an enemy in a space adjacent to the character. Thrown and short-range weapon attacks can be made against an enemy up to 10 spaces away. Long-range weapon attacks can be made against an enemy up to 25 spaces away.

LEVEL ADVANCEMENT

By Encounter

Instead of adding up Encounter Levels, simply award characters a new level after 9 encounters that are appropriately challenging (i.e. a small gang of kobolds is no match for a group of level 10 heroes). Remember that each battle is an encounter – but so is a trap, a monster that’s defeated without fighting and even high-stakes skill situations (for example, a simple roll to find the right trail probably isn’t an encounter, but a roll to negotiate peace between warring kingdoms probably is).

Experience For Treasure

In many fantasy adventures, characters quickly collect thousands of gold pieces, dozens of gems and handfuls of magic items. Most of it simply goes unspent. With this option, each character can spend 10 percent of its total treasure earned on that adventure (round up) on “upkeep” (repairing damaged items, restocking spell components, food, lodging, etc.) and personal effects (a tithe to the local house of worship for a cleric, a drinking contest for a dwarf, a tribute to the thieves guild for a rogue, etc.). If all characters in the party do so, they gain experience equal to an Encounter Level of their own level. This can only be done once after each adventure.

After slaying a dragon, Kjell and Galan spend 10 percent of their treasure to repair their armor, eat fine meals, and enjoy wine, women and song until their next journey into the wilderness. That leaves them with less money to buy new weapons and magic items, but they decide it was worth it.

Training

In the standard Microlite 20 rules, characters gain skill ranks, hit points, attack bonuses and stat improvements automatically when they gain levels. With this option, characters must spend time and money with weapon masters, powerful mages and expert thieves to earn their advancements.

Whenever a character is ready to earn a new level, roll 1d4 + the character’s current level. That is the number of weeks the character must spend in training. Multiply that number by 25; that is the number of gold pieces the character must spend to hire trainers, rent practice space, etc. At the end of the training period, the character gains the maximum hit points possible as well as skill, attack

and other bonuses and abilities the character is entitled to. In addition, choose one of the character’s stats (STR, DEX or MIND) and roll the appropriate die according to the stat score: An existing score of 3 to 9 needs a 6 on 1d6 to increase by +1; 10 to 15 needs an 8 on 1d8; 16 needs 12 on 1d12; and 17 needs 20 on 1d20. A stat score of 18 or better can’t be improved with training.

Kjell is ready to move to level 2, but he needs to practice with the captain of the guard first. I roll 1d4 and add his current level of 1 for a total of 3. It will take him three weeks to train, and cost (25 x 3) 75 gold pieces to pay for the captain’s time, and also to hire a sage to improve his book-learning. As Kjell’s STR is already 18, I decide to try and boost his MIND stat. It is currently 9, so I roll 1d6, hoping for a result of 6. I get a 4 – Kjell hasn’t learned enough yet; he’ll have to come back to the sage after his next adventure.

Immaterial Rewards

Heroes often collect powerful magical treasures and piles of coins, but they can just as easily gain other kinds of rewards after gaining levels and completing adventures, like membership in exclusive groups, noble titles, land and followers, etc. Most of these types of rewards offer a bonus to stat + skill or attack rolls, or a similar improvement, in exchange for participation in the group’s activities or for managing the land.

For example, the Royal Society of Explorers might give a +1 per level to MIND + Know rolls to learn about the history and terrain of a particular kingdom, but it also comes with the responsibility to give a report on a previously unexplored place to the Society once per year.

Becoming Baron of the Iron Mountains might give a character access to the magical ironstone, providing an additional +1 die of damage with any metal weapon (an ironstone longsword does 2d8 damage). However, the Baron also has to hire and pay miners to search the Iron Mountains for ironstone.

Class Hit Points

In the standard Microlite 20 rules, all characters gain +1d6 hit points when gaining a level. Alternately, give fighter-types +1d10 hit points per level, cleric- and rogue-types +1d6 hit points per level, and wizard-types +1d4 hit points per level instead. Reroll any die result of 1.

Galan is a warrior with a few other skills, so he's not as tough as Kjell. He rolls 1d6 when he gains hit points.

Fast Hit Points

Instead of rolling a die for hit points each level, simply use STR stat score (not bonus), +4 hit points per level. For an "old school" experience, give fighter-types +6 hit points per level, cleric- and rogue-types +4 hit points per level, and wizard-types +2 hit points per level instead.

Kjell's Strength stat score is 19, and as a "retro" character, he gets +6 hit points at first level for a total of 25 hit points.

Adventuring Years

Characters in games using this option age fairly regularly. One campaign, or three to five major adventures, counts as one "adventuring year," with the rest of the time spent on personal business (family, study, faith, training, etc.) or being held up because of mundane travel time or bad weather.

Before the next "adventuring year" begins, increase the character's age by 1 (which may affect stats and skills), and gain income equal to 3d6 x character level x 5 gold pieces in the form of property, wages, winnings (gambling, practicing theiving skills, etc.), taxes (for a character in a governmental position), etc. Also roll 1d20 on the events table below – this is especially appropriate for settings where characters are not just wandering adventurers, but the representatives of noble houses or lineages of magic.

<u>Roll</u>	<u>Event</u>
1 to 2	Death in the family/group of friends
3 to 5	Marriage among family/friends
6 to 8	Birth to someone in family/friends
9 to 11	Personal failure (crops did not grow, robbed, etc.)
12 to 15	Personal success (promotion, gained renown for an achievement, etc.)
16 to 20	No event this year

CLASS POINTS

With this character creation option, you don't select a traditional RPG class for your character, but instead select the talents that fit your concept for your character. Feel free to create new class abilities, using the examples below as guidelines. Many race features, class abilities and feats from other RPGs can easily become class abilities using this class points option. Note that several combat abilities from the Purest Essence rules are not available to characters without spending class points (Brute Force, Multiple Attacks, Weapon Finesse).

Armor: Using this option, your character must have the Medium and/or Heavy Armor And Shields abilities to gain Armor Class bonuses for wearing some types of armor (see below). All characters can wear light armor (padded, leather, studded leather, chain shirt), and carry buckler shields.

Skill: Choose one skill. You begin with a +3 class bonus to that skill. Alternately, you can assign +2 to one skill and +1 to another, or +1 to three skills. Choose one skill to be your character's "class skill."

Class Points: You begin with **FOUR** Class Points. Any Class Points that are not spent are lost. Every third level (3, 6, 9, 12, etc.), you gain an additional Class Point, which can be saved or spent right away.

Spend 1 Class Point For...

Animal Companion or Mount: Choose a normal, "real world" animal with hit dice up to your level +1. It remains loyal to you and will perform tasks and fight for you to the best of its ability, but will not fight until death. When you increase in level, your animal companion or mount does as well. At level 10, you can take a fantasy creature (like a griffon or dragon, but not an orc or elf) as a companion or mount.

Because your companion or mount is magically linked to you, or is at least trained to respond to your every movement, it provides you with benefits. You gain +1 to one skill. As an optional rule, instead of providing an extra attack for a character each turn in combat and requiring the player to keep track of both a hero and an animal, the companion or mount instead provides +1 to one type of attack the character makes (melee/hand-to-hand, missile/ranged, or magic/supernatural) — choose the type of attack when selecting this ability. If the character successfully does damage with that type of attack, add 1d6 (for a smaller creature like a wolf) or 1d10 (for a larger creature like a warhorse) to the character's damage each time.

Attack Bonus: Select one kind of attack — melee/hand-to-hand, missile/ranged, or magic/supernatural. You gain +1 to attack and damage rolls with that type of attack. This bonus increases by +1 every five levels (+2 at level 5, +3 at level 10, +4 at level 15, etc.). You

can spend Class Points for an attack bonus on one, two or all three types of attack.

Brute Force: Add your STR bonus to all damage with Melee/Hand-To-Hand attacks using a one-handed weapon, and STR bonus x 2 with Melee/Hand-To-Hand attacks using a two-handed weapon.

Cleave: If you make a melee/hand-to-hand attack against an enemy and drop it to 0 (zero) hit points or less this turn, you may make an immediate single melee/hand-to-hand attack against another enemy, if possible. Alternately, you can use this ability with missile/ranged or magic/supernatural attacks instead (choose one type of attack when selecting the ability).

Cohesion: You follow a leader into combat, or pair up with another hero for a special "double team" technique. Once per battle, select another character. When that character ends its move, you immediately move to any open space or area adjacent to that character as a "free" action. This ability is best used in a game that uses miniatures and battle maps.

Connections: You can call on a friend or business acquaintance for a piece of special equipment, information or safe entry into a city or other area. It's up to the game master to decide exactly what the results of your request are. Your connections can be called upon a number of times per adventure equal to your MIND bonus + ½ level (round down).

Empowering Spells or Psionics: You can give any spell or power this metamagic adjustment by spending 4 extra hit points on the spell or power. This spell or power causes 50 percent more damage (round up).

Extending Spells or Psionics: You can give any spell or power this metamagic adjustment by spending 2 extra hit points on the spell or power. It has twice the listed duration.

Good Fortune: You can add dice to any one roll you make (attack, stat + skill, damage, etc.), depending on your level. This can be done a number of times per day equal to your level. Level 1 to 3: 1d6; level 4 to 7: 1d8; level 8 to 11: 1d10; level 12 to 15: 2d6; level 16 to 19: 2d8; level 20: 2d10

Heavy Armor And Shields: You can wear heavy armor (splint mail, banded mail, half-plate, full plate) and use shields. You must have the Medium Armor ability before selecting this class ability.

Improved Heroism: You gain additional Heroism points equal to your highest stat bonus, if using the Heroism option (see above).

Improved Initiative: Use DEX bonus +4 to determine your character's Initiative.

Lay On Hands: You can heal a die's worth of hit points, depending on your level. This healing can be applied to any number of allies, but not yourself. This can be done a number of times equal to your MIND bonus + ½ level (round up) per day. Level 1 to 3: 1d3; level 4 to 7: 1d6; level 8 to 11: 1d8; level 12 to 15: 1d10; level 16 to 19: 1d12; level 20: 1d20

Leadership: On this character's turn, the hero can name one type of die roll (use of a particular skill, a type of attack, damage, etc.). All allies of the character, but not the character with this ability, gain a bonus to that die roll equal to ½ level (round up) until the character with Leadership's next turn. This ability can be used a number of turns per day equal to MIND bonus, though the turns do not have to be in a row.

Lesser Spell List: You cast spells from the illusionist or druid spell list, or you can cast spells from the arcane or divine spell lists, but only spell levels 0 to 4. Choose one list when selecting this ability.

Medium Armor: You can wear medium armor (hide, scale mail, chainmail, breastplate).

Monster Knowledge: Select one kind of monster, like orc, dragon, or even evil human. You gain a

bonus to attack and damage that kind of monster equal to ½ your level (round up).

Multiple Attacks: If your attack bonus is +6 or more, you can make an additional attack of that type with a -5 penalty. If the total bonus is +11 or more, a third attack can be made at -10, and so on. All attacks must be made on the same turn and count as the same single action. For example, a character with a missile/ranged attack bonus of +12 and this ability can make three attacks per turn, at +12, +7 and +2 to hit. You must select this ability once for each type of attack (melee/hand-to-hand, missile/ranged, or magic/supernatural).

Performance: You can use music, oratory or other performance to cause magical effects, usually by making a MIND + Comm roll. You can do this MIND bonus times per day, +1 time per level, but only one effect at a time. The effects are:

Countersong: Cancel one sound-based effect against an ally.

Fascinate: One target suffers -4 to any perception-type roll for a number of turns equal to your MIND bonus.

Inspire Courage: All allies within hearing distance gain +1 to attack and damage, +1 for every 5 levels (level 5, 10, 15, etc.) until your next turn.

Enhance Skill: All allies within hearing distance gain +1 to all stat + skill rolls, +1 for every 5 levels (level 5, 10, 15, etc.) until your next turn.

Quick Thinker: Roll 1d20 + MIND bonus instead of DEX bonus to determine your character's Initiative. This is useful for characters that prefer supernatural attacks, like spell casters and psionics.

Reputation: Choose a word or phrase that describes how you are treated by others (like "fearsome," "valiant" or "studious"). Gain +5 to stat + skill rolls when the reputation can be used (for example, to intimidate an enemy, or to research information). It's up to the game master to decide when a reputation can provide its bonus. You can spend more than one Class Point on this ability, choosing one word or phrase each time.

Resistance: Choose an energy type, like fire, cold, poison, electricity, etc. Subtract an amount of damage of that type equal to your level from the number of hit points you lose when hit. For example, a fireball that causes 10 points of damage instead causes 7 points of damage if you have Resistance (Fire) 3. You can spend more

than one Class Point on this ability, once per energy type.

Smite: Choose a target you have just rolled a successful hit against. Add your level x 2 to the damage. You can do this MIND bonus times per day +1 time every three levels (level 3, 6, 9, 12, etc.).

Speed Boost: Move an additional 5 feet (1 space on a battle map) each turn. You can spend more than one Class Point on this ability.

Spontaneous Healing: Subtract hit points as if you had cast a spell of any level you can normally cast. Instead of casting the spell, however, you cure 1d6 + spell level hit points for one ally, but not yourself. If you have the Turn Undead ability, you can trade in one use of Turn Undead to cure 1d6 + 2 hit points. You must have the ability to cast spells or the Turn Undead ability to select this ability.

Strikeback: If an opponent attacks you and only you and misses, you can make an immediate “free” attack against that opponent. This ability can only be used once per battle, succeed or fail.

Taunt: Your insults and boasts can distract your foes. Instead of making a normal attack, roll MIND + Comm vs an opponent’s MIND + Comm. On a success, the opponent suffers -2 to all rolls (stat + skill, initiative, attacks, damage, etc.) for the remainder of the battle. The opponent must be able to hear and understand you. It is also likely to turn its attention to you, angry at you for tricking and teasing it.

Trapfinding: You gain a +5 bonus to spot mechanical and magical traps and secret doors (using MIND + Subt), and a +3 bonus to disable traps of any kind.

Turn Undead: Make a magic/supernatural attack against an undead opponent (DC is the current hit points of the undead). On a success, the undead must turn around and move away from you on its next turn. If the DC is exceeded by 10, the undead is destroyed. This can be used successfully MIND bonus + ½ level (round down) times per day. This ability can be used for a different type of creature, like cold-based monsters or demons, instead of undead. Choose the type of creature that can be turned when selecting this class ability.

Twin Shot: You can make two missile/ranged attacks per turn, each at -2 to hit. Both attacks must be made on the same turn and count as the same single action.

Two Weapon Fighting: You can make two melee/hand-to-hand attacks per turn, each at -2 to hit. Each attack must be made with a separate weapon (or two unarmed attacks). Both attacks must be made on the same turn and count as the same single action.

Unarmed Damage: Your unarmed attacks cause extra damage, instead of the standard 1d3, depending on your level. Level 1 to 3: 1d6; level 4 to 7: 1d8; level 8 to 11: 1d10; level 12 to 15: 2d6; level 16 to 19: 2d8; level 20: 2d10

Wall Climb: You can move straight up walls and on narrow spans without losing your balance. On a DEX + Subt roll to climb or keep your balance, add +5 to the result. You are not slowed down when moving along a wall or across any other similar area.

Wealth: Determine your character’s starting amount of gold as normal, then triple the result. After an adventure, when treasure is determined, figure out how much you earn, then multiply that total by 1.5 (round up). That’s the amount you actually earn, after all your investments, businesses and holdings are added to your adventuring income. For example, a character who gets 100 gp from a treasure hoard and another 20 gp from a grateful lord has not 120 gp for the adventure, but 120 x 1.5 = 180 gp.

Weapon Finesse: Your melee attack bonus is equal to DEX bonus + level, instead of STR bonus + level. You must be wielding a light weapon, rapier or whip to use this ability.

Widening Spells or Psionics: You can give any spell or power this metamagic adjustment by spending 6 extra hit points on the spell or power. This spell or power’s area of effect is twice as large as normal.

Wild Empathy: You have skill with nature, and are not affected by non-magical plant life (thorns, vines, etc.). You cannot be tracked on any terrain if you do not want to be, and you gain a +5 bonus to calm normal, “real world” animals (this is usually a MIND + Comm or MIND + Surv roll).

Wild Magic: Each time you cast a spell, roll 1d6.

1: Something is wrong, and the magic itself goes wild. The spell affects the spell caster instead of its intended target, or one ally of the game master’s choice.

2: The spell is a strong drain on the spell caster. Lose 1 additional hit point.

- 3 or 4: No special effects. The spell works normally.
- 5: Magical power flows out of the spell caster and back into him. Regain 1 hit point spent for casting this spell.
- 6: The forces of magic strengthen the spell. Choose a metamagic adjustment for your spell (empowering, extending or widening are all listed in this class abilities list).

Wuxia Defenses: As long as you are wearing no armor of any kind, you gain +1 to AC, +1 every three levels (level 3, 6, 9, 12, etc.).

Spend 2 Class Points For...

Anti-Magic Aura: Spells don't work for you or on you. Magic weapons and supernatural abilities like lycanthropy and dragon breath still cause their normal effects on you, but no spell, including magic healing, affects you if it is cast on you or in your vicinity (like a magic wall).

Divine Magic: You can use divine spells as if you were a cleric, as described in the Microlite 20 Purest Essence rules.

Magic Blast: You can fire a bolt of mystic energy, causing 1d8 damage +1 every three levels (level 3, 6, 9, 12, etc.). Use your Magic/Supernatural Attack Bonus to make this attack. This attack can be attempted a number of times per day equal to your MIND bonus +1, succeed or fail. The Magic Blast is not a spell, but a supernatural ability, so it does not require the user to spend his or her hit points.

Minor Psionics: You can use psionic powers as if you were a psion or psychic warrior, as described in the Microlite 20 psionics rules. However, you are limited to power levels 1, 2 and 3. Choose the combat (psychic warrior) or general (psion) powers when creating your character. When the psionics rules call for the Concentration skill, use the Physical skill (for combat psionic characters) or the Knowledge skill (for general psionic characters) instead.

Rage: Gain +2 to melee/hand-to-hand attacks and damage, +2 to STR bonus (not stat score), and -2 to AC for a number of turns in a row equal to twice your STR bonus (before the Rage bonus is applied), though you can end a rage early. You can shift into a rage a number of times per day equal to your STR bonus.

Shape Change: You can transform into a specific wild animal, and only that specific animal (so you always have the same markings, fur coloration, etc.), a number of turns per day equal to your MIND bonus +2. Alternately, a character with this ability might receive one small animal shape change per level divided by 3 (round down). So a level 6 character with this ability could change into any small animal (fox, badger, sparrow, etc.) twice per day for a number of turns equal to MIND bonus each time. The character can trade 2 smalls for 1 medium (like a wolf or eagle), or 3 smalls for 1 large (like a bear or shark).

You do not gain hit points for shape-changing using this special ability, but use the abilities and bonuses of the creature instead of your own while in animal form. You cannot speak, use equipment or other abilities of your original form when in animal form. Changing shape is a "free" action.

Sneak Attack: If you successfully sneak up on a foe or target an enemy with a missile/ranged attack without their knowledge (DEX + Subt vs DC of MIND + Subt), add your Subt skill rank to the damage of your first attack against that enemy.

Weird Science: Choose one or more spells from any spell list of up to 4th level. You can instill those spells into a device, which can be used a number of times per day equal to 3 + ½ your level (round up) without spending hit points. The device costs 4 hours and 100 gp per spell level to construct. It is free for you to use, but it requires a MIND + Know roll (DC 15 + number of spells in the device) for anyone else to use. The spells in the device work exactly like the spells would as if cast normally.

Spend 3 Class Points For...

Arcane Magic: You can use arcane spells as if you were a magi, as described in the Microlite 20 Purest Essence rules.

Psionics: You can use psionic powers as if you were a psion or psychic warrior, as described in the Microlite 20 psionics rules. Choose the combat (psychic warrior) or general (psion) powers when creating your character. When the psionics rules call for the Concentration skill, use the Physical skill (for combat psionic characters) or the Knowledge skill (for general psionic characters) instead.

MICROLITE CONDITIONS

Many of the fantasy RPGs that inspired the Microlite 20 rules have a long series of conditions that affect characters and monsters at certain times (usually, as the effects of abilities or spells). In the spirit of the Microlite 20 rules, you can use the rules below in place of the condition information in an SRD. These rules don't cover every situation, but are enough to keep the game going quickly and smoothly. Outside of combat, 1 turn while affected by a condition is equivalent to 1 minute.

The word "character" refers to any being affected by a condition. A condition ends when the game master rules that it does (alternately, roll STR + Surv vs DC 15 at the end of your turn. On a success, one condition of your choice ends immediately).

Aid Another: All characters attempting the same type of activity attempt a stat + skill check. Each one with success adds +1 to the character who got the highest result to determine if the party succeeded at the action. For example, four heroes trying to search a room each roll MIND + Subt vs DC 10. They get rolls of 12, 18, 9 and 13. Three successes (the 18, 13 and 12) mean the characters that rolled 13 and 12 each add +1 to the character with the highest result (the 18) for a final stat + skill check result of 20.

Attack Of Opportunity: If a character is next to an enemy and does something other than move to a space not adjacent to that enemy, take a "free" action, and/or make a melee/hand-to-hand attack on its turn, the enemy can make a single melee/hand-to-hand attack (or a magic/supernatural attack, if the game master allows) against the character, which does not count as part of the enemy's turn. This condition is best used in a game using miniatures and a map board.

Bleeding: See *ongoing damage* (below).

Blinded: The character cannot see (to read, discern colors, etc.). It suffers -5 to Armor Class, attack rolls and other situations that require sight. If another character uses one of its actions to help describe a situation to the blinded character, the penalty is reduced to -2.

Blown Away: A character thrown by a gust of wind or as the effects of a blast moves 1d6 x 10 feet directly away from the source of the blast.

Broken: An object that is broken will not function until it is repaired. A missile/ranged weapon that is broken will not work, though its ammunition will still be useable. If a magic item is given the broken condition, roll 1d6: On a 1 to 3, the item is actually broken. On a 4 to 6, the magic keeps the item together. The rusted

condition is exactly the same, though it only affects items that are more than half made of metal.

Called Shot: The character makes an attack with a -2 attack penalty (for a small target like a human's arm or leg) or a -4 attack penalty (for a very small target like a human's head or the weapon in its hand).

Charge: Both of the character's actions on this turn are movements, but the second movement action must take the character adjacent to an enemy. The character can immediately make a melee/hand-to-hand attack, with a +2 attack bonus. The entire second movement action must be in a straight line, though the first movement action can be in any direction.

Combat Advantage: See *flat-footed* (below).

Confused: At the beginning of its turn, before taking any actions, roll 1d4 for the character.

- 1: The character can act normally.
- 2: The character stays in place, babbling incoherently. It takes no actions this turn.
- 3: The character causes 1d8 + STR bonus damage to itself somehow. It takes no actions this turn.
- 4: The character must attack a random ally this turn, but can still move normally.

Cover: Light cover (half-covered by a wall, in sparse woods, etc.) provides a -2 penalty to hit the character. Heavy cover (dense fog, looking out an arrow slit, behind a pile of rocks, etc.) provides a -5 penalty to hit.

Cowering: The character is filled with fear, suffering -2 to Armor Class.

Damage Resistance: Subtract the listed Damage Resistance number from the amount of damage suffered by a character. What remains is the number of hit points the character loses.

Dazed: The character takes no actions this turn.

Dazzled: The character is momentarily blinded, suffering -1 to Armor Class, attack rolls and other situations that require sight for this turn.

Dead: The character's hit points have fallen to -10 or less. The character can be resurrected or reincarnated, as long as more than half its body is available, to a maximum of 1 day after death per character level of the victim.

Deafened: The character cannot hear. It suffers -5 to Initiative and other situations that require hearing.

Disabled: The character can only take one action per turn, not two.

Dying: If a character has -1 or fewer hit points, it loses -1 additional hit point at the beginning of each of its turns. This cannot be avoided in any way. It is also *unconscious* (see below). Another character can make a MIND + Surv or MIND + Know roll (DC 10 + number of negative hit points) to stabilize the character, preventing any more negative hit point loss. The character requires other healing to add hit points.

Energy Drained: See *level drained* (below).

Entangled: The character is wrapped in some sort of obstacle, and must make a DEX + Phys roll to escape (usually vs DC 10 or 15). It can take only one action this turn, though it can be a move, an attack or anything else. This action is at a -2 penalty. The character's other action must be to attempt to escape the entanglement, by making an "escape" roll, using a spell, or something else.

Exhausted: The character suffers a -1 to all rolls (attacks, stat and skill checks, damage, etc.).

Fascinated: The character stays in place, and takes no actions this turn. Any obvious threats to the character immediately end the fascination.

Fatigued: See *exhausted* (above).

Flanking: Two allies who are standing on opposite sides of a character each gain +2 to hit that character.

Flat-Footed: Enemies gain a +2 attack bonus against the character this turn.

Frightened: The character is terrified, suffering -4 to Armor Class and -1 to attack and stat + skill checks. It must attempt to attack or escape the source of its fear at some point during its turn.

Grappled: At the start of its turn, the character who is being grabbed must make a STR + Phys roll vs the grabber's STR + Phys roll to escape

the grapple. That counts as either one of the character's actions on this turn. On a failure, the grabber automatically succeeds at a melee/hand-to-hand attack against the character who is grabbed (this is a "free" action for the grabber).

Helpless: See *dazed* (above).

Incorporeal: The character has a +2 Armor Class bonus, but only against non-spell attacks (do not add this bonus against magic weapons).

Invisible: Opponents must make a MIND + Subt (DC 15 + invisible character's level) to see the character. Invisible characters still make sounds, leave footprints, etc.

Level Drained: The character suffers -1 to all rolls (attacks, stat + skill checks, damage, etc.) per level drained. It also loses 2 of its total hit points permanently per level drained, and 2 current hit points per level drained.

Nauseated: See *disabled* (above).

Ongoing Damage: A character suffering continuous damage (like being on fire) suffers that damage at the start of its turn, before it takes any actions.

Panicked: See *frightened* (above).

Paralyzed: The character can take no actions this turn, and though it must remain in place, it can still breathe and see normally (unless it is encased in ice, turned to stone, etc.). It gains a +2 to Armor Class while paralyzed, if appropriate (a character turned to stone would gain the bonus, while a character who simply could not move would not).

Petrified: See *paralyzed* (above).

Pinned: See *grappled* (above).

Poisoned: The character suffers the initial results of the poison like a normal attack. At the beginning of its next turn, before taking any actions, the character immediately suffers the listed secondary poison damage.

Prone: While on the ground, the prone character suffers a -2 penalty to Initiative, Armor Class and melee/hand-to-hand and missile/ranged attacks, but not magic/supernatural attacks. The character must spend one movement action on its turn to stand back up.

Rusted: See *broken* (above).

Shaken: See *cowering* (above).

Sickened: See *disabled* (above).

Slowed: The character's speed is reduced by half (round down). It can only make one movement action per turn (i.e., it cannot run).

Stable: The character has -1 or fewer hit points, but is not losing more hit points (see *dying*, above).

Staggered: See disabled (above).

Stunned: See *dazed* (above).

Trip: Make a DEX + Phys vs DEX + Phys roll to knock a character *prone* (see above).

Turned: Immediately after being turned, the character must move as far from the character that turned it as possible (its speed). Fleeing a turn is a "free" action, but the turned character can take no actions on its next game turn. After that, the condition ends.

Unconscious: The character has 0 (zero) or fewer hit points, or is otherwise out of action. The character immediately falls *prone* (see above) where it stands, and can take no actions until it is awakened (a "free" action for an adjacent character – friend or enemy).

SPELL LISTS

If your class allows you to cast magic spells, your character can use any spell the game master makes available. For example, in the Purest Essence rules, characters can only cast spells of a level equal to or less than half their class level (round up). To get your spell caster ready to play right away, select one of the following spell lists, and consider those spells your “signature spells” (they cost 1 less hit point to cast).

Battle Cleric Spells

First Level: Divine Favor
Second Level: Cure Moderate Wounds
Third Level: Searing Light
Fourth Level: Freedom Of Movement
Fifth Level: Flame Strike
Sixth Level: Harm
Seventh Level: Destruction
Eighth Level: Fire Storm
Ninth Level: Implosion

Supporting Cleric Spells

First Level: Bless
Second Level: Aid
Third Level: Prayer
Fourth Level: Restoration
Fifth Level: Raise Dead
Sixth Level: Heal
Seventh Level: Regenerate
Eighth Level: Holy Aura
Ninth Level: Mass Heal

Druid Spells

First Level: Entangle
Second Level: Barkskin
Third Level: Spike Growth
Fourth Level: Reincarnate
Fifth Level: Call Lightning Storm
Sixth Level: Transport Via Plants
Seventh Level: Control Weather

Illusionist Spells

First Level: Charm Person
Second Level: Invisibility
Third Level: Suggestion
Fourth Level: Confusion
Fifth Level: Seeming
Sixth Level: True Seeing
Seventh Level: Prismatic Spray

Mystic Wizard Spells

First Level: Sleep
Second Level: Knock
Third Level: Fly
Fourth Level: Polymorph
Fifth Level: Teleport
Sixth Level: Antimagic Field
Seventh Level: Plane Shift
Eighth Level: Irresistable Dance
Ninth Level: Gate

War Wizard Spells

First Level: Magic Missile
Second Level: Acid Arrow
Third Level: Fireball
Fourth Level: Black Tentacles
Fifth Level: Feeblemind
Sixth Level: Chain Lightning
Seventh Level: Finger Of Death
Eighth Level: Power Word Stun
Ninth Level: Meteor Swarm

A player at my table has never been part of a role playing game before. He wants to try a wizard, and while he understands his character can use any arcane spell, he doesn't want to have to hunt through pages and pages of spell information to play the game. He selects the “mystic wizard” spell list, and uses just those spells for his first game. The Sleep spell, as his first level favored spell from his spell list, only costs 2 hit points, while the Shocking Grasp spell, also a first level spell, would cost the standard 3 hit points.

STARTER SPELLS

If you want to start playing as a wizard or cleric without having to consult a book or web site for a set of spells, use this option. These spells are completely described below, though they assume the spell caster is level 1. In some games, a first-level spell caster may not be able to use level 2 spells (ask the game master).

ARCANE SPELLS

Detect Magic

Level 0 spell – costs 1 hit point to cast

With your palms face out, you turn in a circle. Things made of magic glow with a soft multicolored light.

All magical materials (items, spells and creatures) up to 60 feet (12 spaces) away that the spell caster can see light up. The more magical the materials are, the brighter the glow, though it never hurts the eyes. Only the spell caster can see the magical glow. It lasts 1 minute (out of combat) or turn (in combat). It ends immediately if the spell caster puts his or her hands down.

Light

Level 0 spell – costs 1 hit point to cast

You transform a stone into a torch.

The spell caster must touch an object. It lights up with the same amount of light as a torch, allowing everyone to see 20 feet (4 spaces) in every direction. The light gives off no heat. It shines with the same light until the spell caster touches the object again to cancel the spell, or until the spell caster casts the spell on another object. The spell will cancel a Level 0 magical darkness.

Magic Missile

Level 1 spell – cost 2 hit points to cast (signature spell)

A small dart of blue-white light streaks out of your finger toward a foe.

Choose one target, as long as the spell caster can see at least part of its body. The missile automatically hits, causing 1d4 +1 damage.

Sleep

Level 1 spell – cost 3 hit points to cast

As sand sifts between your fingers, your foes relax into slumber where they stand.

A single creature with 4 hit dice or levels, four creatures of 1 hit die or level each, or some combination in between adding up to 4 hit dice or levels immediately fall asleep, if they can fall asleep. The creatures must be no more than 110 feet (22 spaces) away from the spell caster. Each creature can roll MIND + Phys vs the spell caster's MIND bonus +11. On a success, the creatures do not fall asleep. It takes an action to wake up a sleeping creature, though injuring it will wake it immediately.

Acid Arrow

Level 2 spell – costs 4 hit points to cast (signature spell)

You don't need a bow to fire this green arrow, which burns with acid when it strikes an enemy.

Choose a target and roll a magic/supernatural attack. On a hit, the arrow causes 2d4 damage.

DIVINE SPELLS

Create Water

Level 0 spell – costs 1 hit point to cast

Cool, clear water pours from the thin air.

The spell creates 2 gallons of clean, drinkable water. The spell caster must have a container to hold the water, or the spell will simply drop water on the spell caster's head for a few moments, as if it was raining. The water disappears after one day if not consumed. Water cannot be created inside a creature (to drown it, for example).

Guidance

Level 0 spell – costs 1 hit point to cast

The gods give you a hint.

Choose a single attack or stat + skill check roll of the spell caster's or another character's. Add +1 to the roll. The bonus must be applied on the next turn after the spell is cast.

Cure Light Wounds

Level 1 spell – cost 2 hit points to cast (signature spell)

A white light spreads over a hero's wounds, as they shrink and disappear.

By touching a living creature, the spell caster can immediately restore 1d8 +1 hit points to it. If the creature is unconscious, it will also return to consciousness.

Undead creatures that are touched (with a successful melee/hand-to-hand attack) suffer 1d8 +1 damage instead. Undead creatures can roll MIND + Phys vs the spell caster's MIND bonus +11 to suffer half the amount of damage rolled (round down).

Bless

Level 1 spell – cost 3 hit points to cast

In the name of the gods, your skill in battle improves.

All allies within 50 feet (10 spaces) of the spell caster gain +1 to attack rolls and MIND + Surv rolls to resist fear. It lasts 1 minute (out of combat) or turn (in combat).

Cure Moderate Wounds

Level 2 spell – costs 4 hit points to cast (signature spell)

Deadly injuries become only a memory.

By touching a living creature, the spell caster can immediately restore 2d8 +1 hit points to it. If the creature is unconscious, it will also return to consciousness.

Undead creatures that are touched (with a successful melee/hand-to-hand attack) suffer 2d8 +1 damage instead. Undead creatures can roll MIND + Phys vs the spell caster's MIND bonus +11 to suffer half the amount of damage rolled (round down).

DIVINE DOMAINS

You can select one or more domains from any SRD. You gain the domain's power, and treat all the spells in the domain as signature spells. Cleric-type classes can select a maximum of 3 domains, while characters of other classes can only select 1 domain. Domains must be appropriate to the character concept. You must be able to use divine or nature-based magic, like a cleric or druid to gain a domain.

In exchange for a single domain, a character has a penalty of -2 to a roll for hit points at each level (minimum hit points gained when advancing a level is 1). If a character has the Turn Undead ability, the character can instead choose to permanently have 2 less uses of the Turn Undead ability each day.

Several example domains are below. Each uses information from the Pathfinder SRD (www.d20pfsrd.com). The domain's power is the SRD first level power, and the spells are the same. Details on those spells are available in the SRD.

Destruction

Power: *Destructive Smite*

Each time you use this power, all your melee attacks on a turn have a bonus to damage equal to ½ your level (round up). You can use this power a number of times a day equal to your MIND bonus +3.

Spells

First Level: True Strike
Second Level: Shatter
Third Level: Rage
Fourth Level: Inflict Critical Wounds
Fifth Level: Shout
Sixth Level: Harm
Seventh Level: Disintegrate
Eighth Level: Earthquake
Ninth Level: Implosion

Luck

Power: *Lucky Touch*

You can touch an ally to provide him or her with a bit of luck. Until it is your turn again, any time the target rolls any dice, he or she can roll the dice a second time and use the better result. You can use this power a number of times a day equal to your MIND bonus +3.

Spells

First Level: True Strike
Second Level: Aid
Third Level: Protection From Energy
Fourth Level: Freedom Of Movement
Fifth Level: Break Enchantment
Sixth Level: Mislead
Seventh Level: Spell Turning
Eighth Level: Moment Of Prescience
Ninth Level: Miracle

Sun

Power: *Sun's Blessing*

Whenever you attack an undead creature, add your level to the amount of damage you cause. You can also add your level to any die roll you make to turn an undead creature.

Spells

First Level: Endure Elements
Second Level: Heat Metal
Third Level: Searing Light
Fourth Level: Fire Shield
Fifth Level: Flame Strike
Sixth Level: Fire Seeds
Seventh Level: Sunbeam
Eighth Level: Sunburst
Ninth Level: Prismatic Sphere

Travel

Power: *Agile Feet*

You can move more quickly for a short time. On your next turn, you take no penalties and are not slowed when moving through difficult terrain. You also move 5 feet (1 square) more than normal. You can use this power a number of times a day equal to your MIND bonus +3.

Spells

First Level: Longstrider
Second Level: Locate Object
Third Level: Fly
Fourth Level: Dimension Door
Fifth Level: Teleport
Sixth Level: Find The Path
Seventh Level: Greater Teleport
Eighth Level: Phase Door
Ninth Level: Astral Projection

PATRON DEITY

Instead of gaining the +3 total skill bonus granted by your class, choose a god, goddess or philosophy from those available in your game world (ask the game master). Your deity will grant a +1 to one skill and a minor granted power. Each deity also has a favored weapon, and as a servant of that deity, you begin your adventuring career with a non-magical version of that weapon for free.

Any character can select a patron deity using this option, though it is most often clerics and paladins that do so (they're also called "specialty priests"). Several example generic deities are listed below; feel free to create your own deities. Since characters of any class can have a patron, a deity's granted power should be useful to more than spell casters.

Crusader God

Skill Bonus: +1 to Physical

Favored Weapon: Longsword

Granted Power: Strength Of Arms — Once per day, if you make a melee/hand-to-hand attack roll and dislike the result, you can reroll the attack roll and add +4 to the result.

God of the Dwarves (NOTE: You must be a dwarf to select this patron)

Skill Bonus: +1 to Physical

Favored Weapon: Axe (any)

Granted Power: Stone Knowledge — With just a glance, you can see the weak points in a block of stone. You automatically succeed at any attempt to inspect stone and rock for secret doors or similar purposes.

God of Death (NOTE: You must be an evil character to select this patron)

Skill Bonus: +1 to Subterfuge

Favored Weapon: Scythe

Granted Power: Closer To The Grave — When you roll damage dice for any melee/hand-to-hand attack, any die result of 1 automatically becomes 2.

Goddess of the Elves (NOTE: You must be an elf to select this patron)

Skill Bonus: +1 to Knowledge

Favored Weapon: Longbow

Granted Power: Ancient Wisdom — Once per day, if you make stat + skill roll and dislike the result, you can reroll that stat + skill roll and add +4 to the result.

Inner Harmony

Skill Bonus: +1 to Knowledge

Favored Weapon: Quarterstaff

Granted Power: Discipline — Once per day, you can double your skill ranks in a skill before making a stat + skill roll using that skill. Those "doubled" skill ranks disappear immediately after the die roll, succeed or fail.

Goddess of the Moon and Shadow

Skill Bonus: +1 to Subterfuge

Favored Weapon: Dagger

Granted Power: Stealth — On a stat + skill roll to do something without being noticed (hide, steal a small item, etc.), add +1 to your roll.

God of Storms

Skill Bonus: +1 to Physical

Favored Weapon: Hammer (any)

Granted Power: Thunder And Lightning — Once per day as a "free" action, you can call down a storm of divine power on an enemy. It hits automatically, causing an amount of damage depending on your level. Level 1 to 3: 1d6; level 4 to 7: 1d8; level 8 to 11: 1d10; level 12 to 15: 2d6; level 16 to 19: 2d8; level 20: 2d10

God of the Sun and Goodness

Skill Bonus: +1 to Communication

Favored Weapon: Heavy Mace

Granted Power: Purity — Each time you regain hit points (by magical healing, drinking a healing potion, etc.), you gain an additional +1 hit point.

As the army of the undead marched past his village, Dandos swore his life to the god of the sun, asking for power in return for a life of servitude. Dandos is my character, and I select the human race and cleric class for him. Instead of taking the cleric class bonus of +3 to Communication, I give him the abilities of a patron deity: +1 to Communication and the Purity granted power. He also starts with a heavy mace, alongside the weapons he buys to take adventuring.

SCHOOLS OF MAGIC

In each SRD, spells are separated into “schools,” or types of spell. Using this option, select two schools for your character. One school is your character’s mastered school: Each spell you cast costs 2 fewer hit points to cast, to a minimum of 0 (zero) hit points (some spells may cost 3 hit points less, if they are your signature spells). The other school you select is your forbidden school: You may never cast a spell belonging to that school.

In the SRD, spells are in broad schools by type of effect, like Conjuration, Enchantment and Transmutation. Fewer spells are listed in the Purest Essence rules, so if you are using spells only from that document, you may need to create your own schools of magic – for example, cold spells or inter-planar spells. Two schools of magic, using the Purest Essence arcane spell lists, are found below.

Fire And Lightning School

Level 0: Light

Level 1: Shocking Grasp

Level 2: Flaming Sphere

Level 3: Fireball, Lightning Bolt

Level 6: Chain Lightning

Level 7: Delayed Blast Fireball

Level 8: Incendiary Cloud

Level 9: Power Word Kill

Transportation School

Level 0: Mage Hand

Level 1: Floating Disk

Level 2: Levitate, Spider Climb

Level 3: Fly

Level 4: Dimension Door

Level 5: Teleport

Level 7: Ethereal Jaunt, Plane Shift

Level 9: Astral Projection, Etherealness, Gate

Bretasenth the sorcerer wants to burn things, so he selects Fire And Lightning as his mastered school. Now he can cast the first level spell Shocking Grasp at the price of just 1 hit point, instead of the 3 it usually costs spell casters.

SORCEROUS BLOODLINES

You can select one bloodline from any SRD, and gain its powers. In exchange for a bloodline, a character has a penalty of -2 to a roll for hit points at each level (minimum hit points gained when advancing a level is 1). Any character can select a bloodline, though most offer at least one power that can only be used by spell casters.

Several example bloodlines are below. Each uses information from the Pathfinder SRD (www.d20pfsrd.com). The bloodline's powers are found in the SRD as the bloodline arcana and the first listed power.

Aberrant

Extended Magic: Whenever you cast a spell of level 3 or lower, increase the duration of the spell by 50 percent.

Acidic Ray: You can fire an acidic ray as a missile/ranged attack up to 30 feet away. The ray causes 1d6 damage +1 for every even-numbered level. You can use this power a number of times a day equal to your MIND bonus +3.

Arcane

Familiar: You gain a small creature or an enchanted item, which provides magical enhancement to you as long as it is within your line of sight. Your familiar can be any shape you desire. Select one skill; you gain a +2 bonus to that skill. You can also use spells through the familiar, as if it was part of your body (for example, you can use a spell, requiring you to touch another character, from a distance by using the spell through your familiar, which could be a creature like a bat or bird, or even a bow with magical arrows).

Metamagic Adept: You can apply any one metamagic ability to a spell you are about to cast without it costing you extra hit points. The empowering, extending or widening are listed in the "Class Points" section of this document, but other abilities are available in the SRD as feats. You can use this power a number of times a day equal to your MIND bonus +3.

Draconic

Breath Weapon Magic: When you select this bloodline, also select an energy type: cold, fire, electricity, acid or poison. Whenever you cast a spell which causes damage with that energy type, the spell causes +1 point of damage per die you roll.

Claws: You can grow claws from your fingers and toes as a free action. These claws are natural weapons, causing 1d4 + STR bonus damage. You can attack twice in a turn with these claws.

Infernal

Charm Magic: Whenever you cast a spell that influences a person's behavior, increase the DC of the spell by +2.

Corrupting Touch: You can touch (make a melee/hand-to-hand attack) an enemy and cause it to become corrupted, suffering a -2 penalty to all die rolls for a number of turns equal to ½ your level (round up). You can attempt this power a number of times a day equal to your MIND bonus +3.

I choose the Arcane bloodline for my very traditional RPG-style wizard, Arianne. She carries an enchanted staff, which is not only a magic weapon (using the regular magic item rules), but is also her familiar. Arianne's spells radiate out of the head of her staff, and it provides a +2 to her Knowledge skill as well. She also can use metamagic abilities without it costing her extra hit points.

However, having a sorcerous bloodline means I roll 1d6 - 2 when determining how many hit points Arianne gains each level. If I was using a rule where I gained a fixed number of hit points, the penalty still applies. For example, if characters add 4 hp per level, Arianne would instead gain only 2.

Fantasy Character Creation, Domino Writing Style

Follow the steps below to quickly create a character using the Purest Essence rules and some of the options in this document. The completed character will be finished in about 15 to 20 minutes, have several special abilities and distinct characteristics, but won't be so complex that a beginner is overwhelmed by special rules. Assume the character is level 1.

1. STATS: Use the Quick Stats option on Page 1 (assign 16, 13, 11 to the stat scores). Do not determine stat bonuses.

2. RACE: Select a race from Fantasy Expansion: The Big Book Of Races & Classes on Page 33. Adjust stat scores and/or skill ranks, and record special abilities, if you select them. Now that stat scores are final, determine stat bonuses (stat score -10 /2).

3. CLASS: Select a class from Fantasy Expansion: The Big Book Of Races & Classes on Page 39. Note the class skill bonus and record special abilities.

4. SKILLS: Use the Spending Skill Points option on Page 6 (skill points = number of skills x level). Adjust skill ranks for race and class skill bonuses.

5. EQUIPMENT: Use the Fourth Edition-Style Equipment option on Page 8 (one weapon, armor or other item has a +1 bonus to attacks and damage, Armor Class, or appropriate stat + skill rolls).

- Melee weapon
- Ranged weapon and 20 ammunition
- Armor (possibly shield also)
- Adventurer's kit
- Simple clothing
- Class-appropriate gear
- 1d6 + 10 gold pieces

6. COMBAT: Determine the following. Note that special abilities and equipment may adjust these numbers.

- Armor Class (use the Armor Class Adjustments option on Page 11): 10 + DEX bonus + Armor AC bonus
- Attack Bonuses: Stat bonus + Level
- Initiative (use the Initiative option on Page 10): Equal to DEX bonus
- Speed (use the Miniatures And Battle Maps option on Page 15): 6 or 5, depending on race
- Total Hit Points (use the Fast Hit Points option on Page 17): STR stat score + 4

7. SPELLS: Choose, if allowed for the character's class.

8. LEVEL UP: Adjust abilities, hit points, skill ranks, stat scores and stat bonuses if the character has a level higher than 1.

MICROLITE 20

Fantasy Expansion: The Big Book Of Races & Classes

This document uses the Race Points (see Page 5) and Class Points (see Page 18) options to create new races and classes for you to choose for your heroes. You'll need the Microlite 20 Purest Essence rules to use this expansion.

While the races, classes and “flavor text” is written with a generic fantasy RPG setting in mind, these character types can be used in Microlite 20 Modern-Day (as species and as alternatives to character focus), or many other Microlite 20 games.

RACES

There are two options for choosing the race's benefits to starting characters: either a bonus to a stat score or scores and/or skills, or a +1 bonus to a stat score and one or more minor special abilities. If selecting a race's abilities, the character gains all of the listed abilities that the player wishes to have. Some races have slightly more powerful abilities than others, so the game master may choose to boost a race's abilities to bring it more in line with other characters in the party. However, race is often less important than class to a character, so the minor racial abilities will rarely seriously affect a game.

The character will be able to interact with others like a human (stand on two legs, speak fluently, breathe air, be roughly the same size and shape as a human, etc.), but will look like a typical member of its species, unless the player chooses differently. Each race can be described any way the player likes. For example, a cat-folk hero could be a tiger-man, a half-lion/half-human, or even an elf magically enhanced with panther-like traits. Feel free to create new races and abilities, using the examples below as guidelines.

Ape-Folk: +1 Dexterity, +1 Mind OR +1 Mind and *Agility*: On a DEX + Phys roll to jump or climb, add +3 to your roll.
Swing Into Action: If you leap into combat from a high place (like a tree branch or the top of a vehicle) or use a rope, vine or other item to swing into a battle, add +3 to your first attack roll.
Tool User: On a MIND + Know roll to figure out how a device works, add +3 to your roll. The device must already exist to use this bonus; you cannot use it to help build a new device.

Cat-Folk: +2 Dexterity OR +1 Dexterity and *Agility*: On a DEX + Phys roll to jump or climb, add +3 to your roll.
Claws: You have a set of claws in your fingers you can instantly reveal or hide. They cause 1d4 +1 damage.
Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Dog-Folk: +1 Strength, +1 Mind OR +1 Mind and *Pack Hunting*: If you and at least one ally are attacking the same opponent, add +1 to your attack roll.
Scent: On a MIND + Know roll to smell something or to track a target, add +3 to your roll.

Duck-Folk: +2 Dexterity **OR** +1 Dexterity and
Flight: You can fly as fast as you walk on dry land.

Hot Temper: Once per day, you gain +2 to melee/hand-to-hand attacks and damage, and -2 to AC for a number of turns in a row equal to your STR bonus. You yell and leap about while affected by your hot temper, and are hard to understand.

Dwarf: +2 Strength **OR** +1 Strength and
Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Stand Fast: If an enemy attempts to knock you down or push you in any direction, make a STR + Phys +3 roll (DC is enemy's STR + Phys). On a success, the enemy's attempt fails, and you stay in place.

Elephant-Folk: +2 Strength **OR** +1 Strength and
Stampede: If you try to knock down an enemy or shove an opponent out of the way, roll STR + Phys and add +3.

Tusks: You can make a melee/hand-to-hand attack with your tusks, causing 1d8 damage.

Elf, Drow: +2 Dexterity **OR** +1 Dexterity and
Poison: All of your attacks using weapons cause an additional 1 point of poison damage.

Spider-Kin: You will never be attacked by a spider-type monster, and can even ride them with a DEX + Surv roll.

Elf, Fairytale: +1 Dexterity, +1 Mind **OR** +1 Dexterity and

Crafty: Your people are the absolute masters of one kind of craft — baking cookies, cobbling shoes, creating winter holiday gifts, etc. Select a craft when you choose this ability. As long as you have access to the appropriate materials and a suitable amount of time, you can create a non-living item of your selected craft (you cannot create monsters, for example). It cannot be used in combat, but otherwise your creation will always be the best of its type: the tastiest cookies, the most durable shoes, etc. You also have a +3 bonus to any stat + skill roll related to your craft (for example, MIND +

Know to identify which ingredients are in a cookie).

Small: You are smaller than the average human, which may affect your movement rate and other abilities.

Elf, High: +2 Mind **OR** +1 Mind and
Magical Step: Once per battle, instead of your regular move, you can teleport to any open spot you can see from your current location, within 50 feet (10 spaces).

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Elf, Wood: This race can also be used for may queens (plant-folk). +2 Dexterity **OR** +1 Dexterity and

Wilderness Mastery: When in a natural, tree-filled location like a forest or jungle (but not mountains or oceans), add +3 to any stat + skill roll that involves nature, like DEX + Subt to hide in the trees, or MIND + Surv to track an enemy. This bonus is not applied to attack rolls.

Fish-Folk: This race can also be used for merfolk (mermen and mermaids). +2 Dexterity **OR** +1 Dexterity and

Underwater: You can swim as fast as you walk on dry land, and can breathe underwater without special gear.

Water Native: Add +3 to any roll to move silently, run or escape capture (usually DEX + Subt), but only when you are in water.

Frog-Folk: +2 Dexterity **OR** +1 Dexterity and
Hop: If you are attempting to leap a long distance, add +3 to your DEX + Phys roll.

Small: You are smaller than the average human, which may affect your movement rate and other abilities.

Tongue Lashing: You can make a melee/hand-to-hand attack with your tongue, causing your opponent to be distracted and lose its next turn. This ability can only be used 2 times per day, succeed or fail.

Underwater: You can swim as fast as you walk on dry land, and can breathe underwater without special gear.

Ghost or Revenant: +1 Dexterity, +1 Mind OR +1 Mind and

Ethereal: You have +2 AC against attacks not specifically designed to harm ethereal creatures like ghosts (do not add this bonus against magic weapons). You can pass through obstacles, including other creatures, without being slowed in any way.

Gnome, Rock: These abilities can also be used for faeries, like pixies, sprites, redcaps and leprechauns. +1 Dexterity, +1 Mind OR +1 Dexterity and

Minor Arcana: Choose one first level spell from any spell list when creating the character (for gnomes, this is typically the illusionist spell Silent Image). You can use this spell without having to spend hit points 3 times per day.

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Small: You are smaller than the average human, which may affect your movement rate and other abilities.

Pixie fairies can also fly as fast as they can walk on dry land.

Gnome, Tinker: This race can also represent heroic goblins or dragon-like kobolds. +2 Mind OR +1 Mind and

Small: You are smaller than the average human, which may affect your movement rate and other abilities.

Tinker: You have a +3 bonus to create or disassemble non-living items (traps, vehicles, weapons, etc.). Creating an item is usually MIND + Know, while disassembling one is usually MIND + Subt.

Half-Angel: +2 Mind OR +1 Mind and

Divine Providence: If you fail an attack or stat + skill roll, immediately roll it a second time, including the same modifiers as you used on the first roll. This ability can be attempted a number of times equal to your MIND bonus each day, succeed or fail. A single roll can only be rerolled once.

Half-Demon or Half-Devil: +1 Strength, +1 Mind OR +1 Mind and

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Wicked Aura: On a MIND + Comm or STR + Comm roll to cause fear and terror, or a MIND + Comm roll to supernaturally charm and convince someone to agree with you, add +3 to your roll. This ability can be attempted a number of times equal to your MIND bonus each day, succeed or fail.

Half-Dragon: +1 Dexterity, +1 to any two skills OR +1 Dexterity and

Breath Weapon: You have a breath weapon missile/ranged attack (range 10 x 10-foot or 2 x 2-space cone or square) causing 1d6 damage +1 every three levels (level 3, 6, 9, etc.) to each enemy in the area. Choose the type of damage for this special ability when creating the character: cold, fire, poison, lightning, or acid. You can use this ability once per battle, succeed or fail.

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Half-Elemental: Choose one element when creating the character, either air, earth, fire or water. +1 Strength and +1 Dexterity OR +1 Dexterity and

Elemental Strike: All of your attacks in one battle cause an additional +1d4 damage (+1d8 for Fire Half-Elementals). This ability can only be used in one battle per day.

Elemental Power: You gain special abilities depending on your elemental type.

Air Half-Elemental: *Sprint:* You move an additional 5 feet (1 space) each turn.

Earth Half-Elemental: *Stand Fast:* If an enemy attempts to knock you down or push you in any direction, make a STR + Phys +3 roll (DC is enemy's STR + Phys). On a success, the enemy's attempt fails, and you stay in place.

Fire Half-Elemental: Your Elemental Strike attacks cause +1d8 instead of +1d4 damage

Water Half-Elemental: *Slippery:* On a DEX + Subt roll to escape capture, add +3 to your roll; and *Underwater:* You can swim as fast

as you walk on dry land, and can breathe underwater without special gear.

Half-Giant: +2 Strength **OR** +1 Strength and *Stamina:* Add +1 to your Armor Class, and double the number of hit points you gain each level (for example, if you roll a 3, you gain 6 hit points).

Half-Orc: +1 Strength, +1 to Physical, +1 to any other skill **OR** +1 Strength and *Battle Fury:* When making a melee/hand-to-hand attack, if you roll the maximum amount of damage on at least one of your damage dice (for example, an 8 when rolling 2d8), roll an additional 1d6 to determine damage. If you roll a 6 on that die, do not roll again. If you are using critical hit rules, figure the battle fury damage before applying the effects of the critical hit. You can use this ability a number of times per day equal to your STR bonus.

Halfling: +2 Dexterity **OR** +1 Dexterity and *Resist Fear:* On a MIND + Surv roll to resist fear and terror, add +3 to your roll. *Small:* You are smaller than the average human, which may affect your movement rate and other abilities. *Throwing:* You also have a +1 to missile/ranged attack rolls, but only with thrown weapons.

Hawk-Folk: +2 Dexterity **OR** +1 Dexterity and *Flight:* You can fly as fast as you walk on dry land. *Keen Eyesight:* If you are attempting to spot something hidden or find something that is very tiny (usually MIND + Subt or MIND + Tech), add +3 to your roll. *Talons:* You can make a melee/hand-to-hand attack with your claws, causing 1d4 damage.

Horse-Folk: +2 Strength **OR** +1 Strength and *Enduring:* Add +3 to any STR + Phys roll to resist or overcome an environmental hazard, like intense heat or a heavy weight. This bonus does not apply when attempting to avoid attacks made by an opponent. *Sprint:* You move an additional 5 feet (1 space) each turn.

Human: +1 to any four skills **OR** +2 to any two skills and

Many Talents: When you use this ability, roll 1d6 along with the 1d20 you normally roll when attacking or making a stat + skill roll. Add the results together to find your final die result for the attack or action. You can use this ability successfully 3 times per day.

Insect-Folk: +1 Strength, +1 Dexterity **OR** +1 Dexterity and

Chitin: Add +1 to your AC.

Flight: You can fly as fast as you walk on dry land.

Hive Mind: If you are helping another character accomplish a task outside of combat (using a stat + skill roll), add +3 to your roll. You can use this ability MIND bonus x 2 times per day.

Lizard-Folk: +2 Dexterity **OR** +1 Dexterity and

Bite: You can bite, using your melee/hand-to-hand attack bonus, causing 1d4 damage.

Slippery: On a DEX + Subt roll to escape capture, add +3 to your roll.

Sprint: You move an additional 5 feet (1 space) each turn.

Underwater: You can swim as fast as you walk on dry land, and can breathe underwater without special gear.

Logical Thinker: You are extremely intellectual, and rarely show your emotions. +2 Mind **OR** +1 Mind and

Emotional Control: Add +3 to any attempt to resist being psychologically or supernaturally influenced (intimidated, frightened, tricked by an illusion, mentally controlled, etc.). This is usually MIND + Know.

Lycanthrope or Were-Creature: +1 Strength, +1 Dexterity **OR** +1 Dexterity and

Alternate Form: You can transform into a specific type of wild animal, and only that type of animal, a number of turns per day equal to your STR bonus. You do not gain hit points for changing into your alternate form using this special ability, but use the statistics and bonuses of the creature instead of your own while in animal form.

You cannot speak, use equipment or other abilities of your original form when in animal form.

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Mechanical Construct: +2 Strength **OR** +1 Strength and

Durable: You have Damage Resistance of 2 (you lose 2 fewer hit points each time you take damage, except when casting spells).

Machine: You do not need to eat, drink, sleep or breathe. You are immune to poisons, diseases and toxins intended for non-mechanical creatures.

Minotaur: +2 Strength **OR** +1 Strength and

Bull Rush: When you charge, you can make an attack with your horns, causing 2d4 damage.

Horns: You also can make a standard melee/hand-to-hand attack with your horns, causing 1d6 damage.

Rat-Folk: +2 Dexterity **OR** +1 Dexterity and

Scurry: Add +3 to any roll to move silently, hide or escape without being caught (usually DEX + Subt).

Small: You are smaller than the average human, which may affect your movement rate and other abilities.

Sprint: You move an additional 5 feet (1 space) each turn.

Sasquatch: This represents any strong, hairy beast-man. +2 Strength **OR** +1 Strength and

Bear Hug: Make a STR + Phys roll to grab an opponent. Each turn you hold on to that opponent, as your attack for that turn, you can squeeze the enemy for 1d4 + STR bonus damage. This bear hug attack hits automatically.

Muscle: Add +3 to any STR + Phys roll to use raw muscle, like bending bars or lifting gates.

Super-Soldier: A genetically enhanced ultimate warrior. +1 Strength, +1 Dexterity **OR** +1 Strength and

Powerhouse: Add +1 to your AC, and an additional +1 every 5 levels (+2 total at level 5, +3 total at level 10, etc.).

Weapon Training: Choose one specific type of weapon (like rifle, axe or punch). You have a +1 to attack and damage, but only with that type of weapon.

Troll or Ogre: +2 Strength **OR** +1 Strength and

Hideous: On a MIND + Comm or STR + Comm roll to cause fear and terror, add +3 to your roll. You are hated and feared everywhere you go, except among others of your kind.

Regeneration: At the beginning of each of your turns, you recover up to 2 hit points if you have lost any.

Turtle-Folk: +1 Strength, +1 Mind **OR** +1 Strength and

Shell: Add +3 to your AC.

Underwater: You can swim as fast as you walk on dry land, and can breathe underwater without special gear.

Tyrannosaur-Folk: +2 Strength **OR** +1 Strength and

Super-Predator: You can make a melee/hand-to-hand attack with your bite, causing 1d10 damage. On a damage die roll result of 10, roll again, and add the new result to the amount of damage you cause. If you roll 10 a second time, do not roll a third time.

Tough: Add +1 to your AC.

Vampire or Dhampyr: +1 Strength, +1 Mind **OR** +1 Strength and

Bloodsucking: You have a bite melee/hand-to-hand attack causing STR bonus damage. You immediately heal hit points equal to the amount of damage the attack causes. You must successfully grab the opponent (STR + Phys vs enemy's STR + Phys roll) to make this attack.

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Vampire, Tortured Soul: +1 Strength, +1 Dexterity OR +1 Dexterity and

Leap: If you are attempting to leap a long distance, add +3 to your DEX + Phys roll.

Melodramatic: Add +3 to any attempt to supernaturally charm, calm or entrance another person or creature (usually MIND + Comm). You cannot use this ability to make another person or creature angry or upset. In direct sunlight, you may also sparkle like your body is covered in diamonds.

Vulture-Folk: +1 Dexterity, +1 Mind OR +1 Mind and

Flight: You can fly as fast as you walk on dry land.

Scheming: If you are trying to talk someone into doing something, or convincing others to agree with you (usually MIND + Subt or MIND + Comm), add +3 to your roll.

The Wise: +2 Mind OR +1 Mind and

Deep Wisdom: Your contributions to a conversation are always respected. Add +3 to any stat + skill die roll using the Knowledge or Communication skills. You can use this ability successfully MIND bonus x 2 times per day.

CLASSES

Each class provides a bonus to one or more skills, to a total bonus of +3. Two to four class abilities are also listed for each. Feel free to create new classes, using the examples below as guidelines.

Class Types: Several times in the Microlite 20 Purest Essence rules, the four basic classes of cleric, fighter, wizard or magi, and rogue or thief are referred to. For example, a rogue-type character might begin with thieves tools as part of his or her equipment. If your character selects one of the classes below, the Class Type listing will indicate which type most aligns with that class, if needed. The classes can even be simplified further, into the two types of spellcaster (cleric and wizard) and warrior (fighter and rogue).

Alchemist: A brewer of potions and creator of explosives – sometimes intentionally.

Class Type: Wizard

+3 Knowledge, Empowering Spells, Quick Thinker, Weird Science

Animal Master: Animal masters are skilled warriors on their own, but they work best as a team with their favorite animal companion. An animal master may have grown up a feral child, never knowing his or her own kind, or maybe his or her true self lives alongside the wild creatures of the world.

Class Type: Fighter

+1 Physical, +2 Subterfuge, Animal Companion, Improved Initiative, Speed Boost, Wild Empathy

Anti-Paladin: Dark warriors or death knights use the forces of evil to their advantage, striking out with sword and corrupt energy while staying protected behind heavy armor.

Class Type: Fighter

+3 Physical, Heavy Armor And Shields, Magic Blast, Medium Armor

Arcane Warrior: Also called a fighter-mage or spellsword, arcane warriors blend spells and steel into one deadly combination.

Class Type: Wizard

+3 Physical, Attack Bonus: Melee/Hand-To-Hand, Arcane Magic

Archer: All of an archer's training has been for one goal: To slay all his or her foes with a perfectly placed arrow.

Class Type: Rogue

+3 Subterfuge, Attack Bonus: Missile/Ranged, Cleave (Missile/Ranged), Smite, Twin Shot

Assassin: Cloaked in black, assassins are hired killers – but even those trained in the ways of death can use their skills in the service of good.

Class Type: Rogue

+3 Subterfuge, Monster Knowledge, Sneak Attack, Wall Climb

Barbarian: Often wearing little more than a loincloth or a chainmail shirt, the savage barbarian carries a massive sword or axe, and shifts into a berserker fury when in battle.

Class Type: Fighter

+3 Physical, Brute Force, Medium Armor, Rage

Bard: A performer who can channel magic into his or her music, speeches or other art.

Class Type: Rogue

+3 Communication, Good Fortune, Medium Armor, Monster Knowledge, Performance

Cleric: A priest of the gods and goddesses of light and goodness. A cleric's choice of deity may influence the spells he or she can cast.

Class Type: Cleric

+3 Communication, Divine Magic, Medium Armor, Turn Undead

Druid: A priest of the wilderness, the druid doesn't worship the gods but the spirits of nature itself.

Class Type: Cleric

+3 Survival, Lesser Spell List: Druid, Shape Change, Wild Empathy

Elementalist: A master of one of the great forces of nature (air, fire, earth or water). His or her Animal Companion is a small elemental, a being composed of wind, flame, rock or waves. Select an elemental type when choosing this class. The elementalist's Monster Knowledge class ability is used against elementals and other creatures of the opposite type (air vs earth or fire vs water).

Class Type: Cleric

+3 Knowledge, Animal Companion, Lesser Spell List: Druid, Monster Knowledge, Resistance (elemental type)

Executioner: The greatest, most brutal weapons find a home in the executioner's hands. They slice and crush with force few other creatures can match.

Class Type: Fighter

+3 Physical, Attack Bonus: Melee/Hand-To-Hand, Brute Force, Cleave (Melee/Hand-To-Hand), Smite

Fighter: With a sword in one hand and a shield in the other, a fighter might be a mercenary, a royal guard, a gladiator, or simply a young warrior. He or she prefers to move into combat and attack face-to-face with as many foes as possible.

Class Type: Fighter

+3 Physical, Attack Bonus: Melee/Hand-To-Hand, Cleave (Melee/Hand-To-Hand), Heavy Armor And Shields, Medium Armor

Gadgeteer: An inventor who prefers devices of steam and clockwork to magic and swords. Many adventuring gadgeteers are quick to create a tool that fires a bolt of electric energy (the Magic Blast class ability).

Class Type: Wizard

+3 Knowledge, Magic Blast, Weird Science

Godslayer: It's fact that the gods exist, but to the humans, elves, dwarves and others who call themselves godslayers, those divine forces are nothing more than really powerful monsters – enemies they seek to eliminate.

Class Type: Fighter

+1 Physical, +2 Knowledge, Anti-Magic Aura, Heavy Armor And Shields, Medium Armor

Gunslinger: Quick on the trigger with a black powder pistol (or a crossbow), the gunslinger is at his best in a showdown on a lonely, dusty street or when clearing a dungeon room of enemies.

Class Type: Fighter

+1 Physical, +2 Subterfuge, Attack Bonus: Missile/Ranged, Improved Initiative, Medium Armor, Twin Shot

Healer: Most heroes like to wade into battle, but a few prefer the ways of peace, and would rather provide healing to their needy allies.

Class Type: Cleric

+2 Knowledge, +1 Communication, Improved Initiative, Lay On Hands, Reputation (Calm And Friendly), Speed Boost

Illusionist: A magician who prefers to trick his foes, instead of attacking them directly.

Class Type: Wizard

+1 Subterfuge, +2 Knowledge, Extending Spells, Lesser Spell List: Illusionist, Monster Knowledge, Widening Spells

Invoker: While clerics represent the gods, invokers are living avatars of the gods, channeling their divine power directly onto the battlefield. They are also called oracles.

Class Type: Cleric

+3 Communication, Divine Magic, Medium Armor, Smite

Jester: This adventurer can be a jolly companion – or a killer clown.

Class Type: Rogue

+1 Subterfuge, +2 Communication, Good Fortune, Performance, Reputation (Amusing), Wuxia Defenses

Knight: Also called a cavalier, a knight takes the fight to the enemy and is most effective on horseback.

Class Type: Fighter

+3 Physical, Attack Bonus: Melee/Hand-To-Hand, Heavy Armor And Shields, Medium Armor, Mount

Merchant: A merchant knows the value of gold, and wants it so much, he'll risk his life for it. He has friends in high society and low places, and cash for the times his friends can't help.

Class Type: Rogue

+1 Knowledge, +2 Communication, Connections, Leadership, Medium Armor, Wealth

Monk: A martial arts master who prefers simple weapons like his own two hands to elaborate armor and deep magic.

Class Type: Fighter

+3 Physical, Attack Bonus: Melee/Hand-To-Hand, Two Weapon Fighting, Unarmed Damage, Wuxia Defenses

Mystic: No adventurer has more knowledge and talent with the realm of magic than the mystic.

Class Type: Wizard

+3 Knowledge, Arcane Magic, Lesser Spell List: Divine

Necromancer: The magic of death is not only for the forces of evil; it's also used by heroes looking to keep the undead under control, and even those hoping to improve the lives of those who are suffering.

Class Type: Wizard

+3 Knowledge, Arcane Magic, Turn Undead

Ninja: A silent killer and master of invisibility.

Class Type: Rogue

+3 Subterfuge, Improved Initiative, Sneak Attack, Wuxia Defenses

Noble: Even the royal and the rich enjoy adventuring from time to time, using their resources, and their ability to talk their way out of any situation (the Performance class ability), to their advantage.

Class Type: Rogue

+1 Subterfuge, +2 Knowledge, Connections, Performance, Reputation (Dignified), Wealth

Paladin: A living symbol of justice, the paladin wears heavy armor and strikes with the blessing of his or her deity.

Class Type: Fighter

+3 Physical, Heavy Armor And Shields, Lay On Hands, Medium Armor, Smite

Psion: This adventurer concentrates on using his or her natural mental abilities.

Class Type: Wizard

+3 Knowledge, Extending Psionics, Psionics

Psychic Warrior: A swordsman who combines a blade of crystal or light with powers of the mind.

Class Type: Cleric

+3 Physical, Attack Bonus: Melee/Hand-To-Hand, Psionics

Ranger: A hunter and survivalist, talented with the blade and the bow.

Class Type: Rogue

+3 Survival, Attack Bonus: Missile/Ranged, Medium Armor, Monster Knowledge, Wild Empathy

Rogue: A thief, pickpocket and trap-springer.

Class Type: Rogue

+3 Subterfuge, Improved Initiative, Sneak Attack, Trapfinding

Rune Warrior: A rune warrior's magic is found in the form of elaborate symbols drawn on armor, weapons and even skin.

Class Type: Fighter

+2 Physical, +1 Knowledge, Brute Force, Heavy Armor And Shields, Lesser Spell List: Arcane, Medium Armor

Samurai: A fighter whose life means nothing without honor. He aspires to wear the full suit of armor that is hallmark of a warrior tradition.

Class Type: Fighter

+3 Physical, Brute Force, Cleave (Melee/Hand-To-Hand), Medium Armor, Reputation (Honorable)

Scholar: The adventuring scholar is a non-spellcaster who uses his book learning to aid him in battle. He or she can Lay On Hands, applying knowledge of anatomy to the victim to heal its wounds. Some scholars are secular researchers of history and legend, while others are religious folk who want to do good in a deity's name even without the magic that fuels a cleric.

Class Type: Rogue

+3 Knowledge, Lay On Hands, Medium Armor, Monster Knowledge, Wild Empathy

Shaman: A shaman uses the magic of nature and the gods to help his or her people, and to make the wilderness a safer place for the faithful.

Class Type: Cleric

+3 Communication, Animal Companion, Divine Magic, Lesser Spell List: Druid

Sorcerer: A sorcerer is born with the innate ability to use magic, and often turns it toward battle, causing damage and enhancing attacks. Because they can cast spells without training, others may regard them as strange or frightening.

Class Type: Wizard

+3 Knowledge, Arcane Magic, Attack Bonus: Magic/Supernatural

Summoner: Some spellcasters find their arcane power in a bond with a single mighty magical creature, or in the ability to call forth legions of otherworldly beasts. Summoners that connect with demons and devils are called diabolists, and summoners who channel the wisdom and strength of their ancestors are called wise men or wise women. The Animal Companion ability can be used for any single type of summoned creature, not just an animal (choose when selecting the ability).

Class Type: Wizard

+3 Knowledge, Animal Companion, Arcane Magic

Swashbuckler: With a fine blade in one hand and a glass of fine wine in the other, swashbucklers bring refinement and a sense of humor to adventuring.

Class Type: Rogue

+1 Physical, +2 Subterfuge, Attack Bonus: Melee/Hand-To-Hand, Reputation (Dashing), Weapon Finesse, Wealth

Timelost Scientist: The scientist's own inventions sent him spiraling through dimensions, where knowledge of chemistry and medicine – and devices he's created himself – has made him the center of attention.

Class Type: Wizard

+3 Knowledge, Good Fortune, Reputation (Intelligent), Weird Science

Timelost Warrior: A quirk of magic or science has transported the soldier from a modern-day war zone or a future military force to a world of fantasy.

Class Type: Fighter

+2 Physical, +1 Knowledge, Attack Bonus: Missile/Ranged, Leadership, Medium Armor, Twin Shot

Twin Blade: Twin blades have a sharp edge in each hand. They become whirlwinds of steel, charging into the fray with daggers, axes or whatever deadly tool they're best with.

Class Type: Fighter

+3 Physical, Attack Bonus: Melee/Hand-To-Hand, Improved Initiative, Medium Armor, Two Weapon Fighting

Wanderer: The wanderer is a master of the wilderness, both mundane and magical.

Class Type: Rogue

+1 Subterfuge, +2 Survival, Lesser Spell List: Druid, Medium Armor, Speed Boost, Wild Empathy

Warlock: Few adventurers can embrace the forces of evil and remain on the side of light, but warlocks are able to use dark magic to their own ends. They are also called witches.

Class Type: Wizard

+1 Subterfuge, +2 Knowledge, Lesser Spell List: Arcane, Magic Blast, Quick Thinker

Warlord: As leader of a squad of soldiers or adventurers, warlords can hold their own in a world of spellcasters thanks to their stubborn refusal to bow to the power of magic.

Class Type: Fighter

+2 Physical, +1 Communication, Anti-Magic Aura, Leadership, Medium Armor

Wild Mage: Wild mages blend spells with strange rituals to open their minds to all kinds of magic, light and dark, twisted and pure.

Class Type: Wizard

+3 Knowledge, Arcane Magic, Wild Magic

Wizard: A master of magic, learned from spell books and ancient runes.

Class Type: Wizard

+3 Knowledge, Arcane Magic, Empowering Spells

Wrathbringer: Also called inquisitors, wrathbringers seek out evil in all its corrupting forms, and use magic and might to destroy it.

Class Type: Cleric

+3 Physical, Attack Bonus: Melee/Hand-To-Hand, Lesser Spell List: Divine, Medium Armor, Turn Undead

Microlite True Sorcery

by PsychoSama

Step 1

Choose a spell and determine the desired effect.

Step 2

Determine the spell effect's DC including all augmentations (see Augmentations below as well as individual spell descriptions).

Step 3

Determine casting time, which is done by subtracting your Magical Attack and Spell Mastery bonus from the modified Magical Attack DC of the effect and consulting the 'Casting Times' table.

Step 4

Cast the spell effect by spending the indicated number of actions.

Step 5

Roll a Magical Attack check against the spell effect's DC. If you succeed, proceed to Step 6. If you fail, skip Step 6 and proceed to Step 7.

Step 6

Resolve spell's effect and proceed to Step 7.

Step 7

Roll the spell's drain and deduct your current spell energy from the total (minimum of 1). Take the remaining drain as vitality damage.

To cast a spell or use magic skills, you must have spell energy. Every time your level of Spell Mastery increases, you add points to your spell energy pool. In order to cast a spell, you must have at least 1 point of spell energy. If you reduce your spell energy to 0, you may not cast any spells until you regain at least 1 point of energy.

You may spend points of spell energy from your pool to enhance your spell effects. By expending 1 point of spell energy, you may add +10 to your Magical Attack check, but you take additional drain as shown on the Spell Energy Expenditures and Results table. See Drain, following.

Spent spell energy returns at a rate of 1 point per day.

Your Spell Energy is your MIND + Spell Mastery Bonus.

Your Spell Mastery limits the amount of spell energy you can use to enhance the casting of your effects. As indicated on the Spell Energy Expenditures and Results table, you must have at least one level of spell mastery to use spell energy to boost effects. All spells require some personal energy to use and so any spell effect cast at the base levels deals 1d8 points of vitality damage called drain.

Spell energy's primary purpose is to reduce the amount of drain suffered as a result of casting spells. In this way, your spell energy pool works like damage reduction. The drain of a spell is reduced by an amount equal to your available spell energy. Thus, if you have 5 points of spell energy and cast a spell with 6 drain, you only take 1 point of vitality damage (6 drain minus 5 spell energy = 1 drain or 1 point

of nonlethal damage). Spell energy can reduce drain to 1, but not below 1, so you had had 6 points of spell energy in the example, you still would have taken 1 point of Vitality damage. You cannot cast magic if you have 0 vitality points. If the roll is higher than your Vitality, your spell automatically fails.

Augmented effects applied to create different or more powerful spell effects increase the drain. To determine the amount of additional drain a spell's augmented effects deals, divide the total modified Magical Attack DC by 5 and round down. This value is added to the base spell effect's drain.

So, a spell effect whose DC is increased to 56 by augmentation deals $1d8 + 11$ points of vitality damage (56 divided by 5 and rounded down equals 11).

Spell Mastery

Spellcasters measure their power in accordance to their number of Spell Mastery ranks from zero (for non-Casters) through five. Only the most powerful mages ever reach five levels of Spell Mastery.

Spell Mastery has several effects on a Spellcaster's ability to manipulate magic.

Bonus to Magical Attack: Spell Mastery awards an insight bonus to Magical Attack rolls.

Modifies Casting Time: Spell Mastery modifies the casting time for spell effects.

Maximum Spell Energy Expenditures: A spellcaster's Spell Mastery limits the amount of spell energy she can expend each round.

EFFECTS OF SPELL MASTERY

Spell Mastery Level	Attack Bonus	Max Expenditure
0	+0	0
1	+2	1
2	+4	2
3	+8	3
4	+16	4
5	+32	Any

SPELL ENERGY EXPENDITURES AND RESULTS

Energy Expended	Attack Bonus	Additional Drain	Spell Mastery level
0	-	-	0
1	+10	+1d8	1
2	+20	+2d8	2
3	+30	+3d8	3
4	+40	+4d8	4
5	+50	+5d8	5

To determine the casting time of a particular spell effect, subtract your Magical Attack modifier from the spell effect's DC and then consult the Casting Times table.

If a spell's casting time is measured in increments greater than a round, you must commit yourself fully to casting the effect or the spell effect automatically fails, dealing the spell's normal drain.

CASTING TIMES

Final DC	Casting Time
0 or Less	1 free action
1-5	1 standard action
6-10	2 standard actions
11-15	3 standard actions
16-20	5 standard actions
21-30	10 standard actions

31-40	1 minute
41-50	2 minutes
51-60	3 minutes
61-70	5 minutes
71-80	10 minutes
81-90	20 minutes
91-100	1 hour
+10	+1 hour

Taking Extra Time

Although the casting times for spells are already significant, you may wish to take more time to cast an effect to ensure it goes off without a hitch. Taking longer to cast a spell effect confers a bonus to your Magical Attack that depends on your level of mastery. Where the Taking Extra Time Table indicates a “degree,” you increase the unit of time from action to rounds to minutes to 10-minute intervals, to hours, to days, and so on. Thus a spell effect that ordinarily requires 4 actions to cast would require 4 full round actions to cast by increasing the degree one step, 4 minutes for two steps, 40 minutes for three steps, and 4 hours for four steps. Non-Spell casters automatically apply one degree of extra time to all attempted spells.

TAKING EXTRA TIME

Extra Time	Dabbler	Student	First	Second	Third	Fouth
1 degree	+0	+2	+4	+8	+16	+32
2 degrees	+0	+6	+12	+24	+48	+96
3 degrees	+0	+14	+28	+56	+112	+224
4 degrees	+0	+30	+60	+120	+240	+480

Note: You derive no additional benefit from taking more actions to cast a spell effect

Magical Attack Check

Like any attack, you roll your Magical Attack + modifiers against the modified spell DC. If you’re not rushed, endangered, or otherwise threatened, you may take 10 on your skill check. You may not take 20. Instead, see the Taking Extra Time Table, which in itself can be combined with taking 10.

Critical Success: The roll of a natural 20 grants you a second roll, the result of which is then added to the first.

Caster Level

Your spell caster level affects the Difficulty Class needed to resist the spell effects you cast. The DC equals 10 + one-half your caster level + your Mind modifier.

Spell Failure

If you ever try to cast a spell effect in conditions where the characteristics of the spell cannot be made to conform, the casting fails and the spell effect is wasted. Spell effects also fail if your concentration is broken or if you fail your Magical Attack Roll. Whenever a spell effect fails, you take the drain as normal.

Result

Once you know which creatures (or objects or areas) are affected, and whether those creatures have made successful saving throws (if any were allowed), you can apply whatever results a spell effect entails.

All spell descriptions use the following format.

Name

The first line of every spell description gives the name by which the spell is generally known.

Description

This line describes the general features of the spell's base effect.

Base DC

This is the base Magical Attack DC to cast the spell at its minimum effect.

Components

All spells require at least one external component: a simple fetish, a magical incantation, a series of gestures with the hands, physical movement like dancing, and so on. Components can also include. A spell's components are listed under this line of its description. You may add additional components to reduce a spell's casting time and DC

Verbal Component

A verbal component is a spoken incantation. To provide a verbal component, you must be able to speak in a strong voice. You may not use a verbal component anytime you are gagged or otherwise silenced. If deafened, you have a 20% chance of spoiling any spell effect requiring a verbal component you try to cast.

Somatic Component

A somatic component is a measured and precise movement of the hands, feet, or body. Some somatic components are a series of physical movements, while others may be intricate dances. If you're restrained in any way, you can't use a spell requiring a somatic component.

Focus Component

A focus is an object you use to channel your spells. It is not consumed when you cast the spell and you can use it repeatedly. Assume that your character starts with the basic focuses for the spells they use. If you lose this focus, you must fashion or trade for a new one. Acquiring a new focus is relatively simple (costing a number of tokens equal to the Base DC, or know+DEX roll against the base DC of the spell), but it must be keyed. To key a focus, simply expend a point of spell energy. Thereafter, the focus is permanently keyed.

Expendable Component

You can use certain expendable materials to help focus your concentration on producing desired spell effects. Just about any material can work, so long as you and the GM agree on its symbolic relevance; for instance, a spell that improves your ability to jump might incorporate a living frog, but if no frog can be found, a dead grasshopper can be just as effective. As opposed to focus components, the materials of expendable components usually are common.

As part of the casting, the expendable component is rendered somehow unusable: the grasshopper's body turns to dust, a rose blossom loses its petals, etc. If the destruction would be out of proportion to the desired spell effect then the GM should forbid the use of this component. The expendable component bonus to Magical Attack depends on the spell's minimum magnitude requirement, as follows:

Mastery Level	Bonus
0	+1
1	+2
2	+3
3	+4
4	+5
5	+6

Range

A spell effect's range is the the maximum distance at which you can designate the spell's point of origin. See the Augmentations section for details on range.

Aiming

You determine whom the spell effect affects or from where it originates, depending on the spell effect. This entry defines the spell effect's target (or targets), its effect, or its area, as appropriate. See Augmentations for details on effects.

Duration

A spell's duration entry tells you how long the magical energy of the spell effect lasts.

Saving Throw

Usually a harmful spell effect allows a target to make a saving throw to avoid some or all of the effect. The saving throw entry in a spell description defines which type of saving throw the spell allows and describes how saving throws against the spell work. The DC to save against any spell effect equals 10 + half the character's caster level + the caster's MIND.

Base Effect

This portion of a spell description details what the spell does and how it works without modifications. If one of the previous entries in the description included "see text," this is where the explanation is found.

Augmentation

This section demonstrates ways to augment spells in special ways, listing any special means for augmenting a spell effect and what augmentations are available from those described below. You automatically know how to use these additional functions when you gain the spell through the Talent feat.

Special Spell Effects

This entry describes uses of spell effects that can be somewhat different from the standard uses of a spell. Some are more powerful than the standard uses, and only come into play for spellcasters with five levels of Spell Mastery. If the spell description doesn't mention a special spell effect, the spell does not have one.

Continuous Effects

By selecting a spell with a Talent feat, you may gain additional bonuses to skills, saving throws, or some other aspect of your person. This section details the ongoing bonuses derived from taking the spell.

Augmentations

Spells in this system represent alterations to or departures from reality. The further from the accepted rules of reality, the harder it is to generate the spell's effects. However, unlike other systems, under the True Sorcery rules you have full control over your spells, molding magical energies to conform to your wishes. You can alter spell effects' damage, range, duration, and several other factors providing an enormous array of possibilities for magical spells.

Each spell includes a listing of which augmentations are available from which you can create your spell effects. In some cases, spells include specific augmentations applicable only to those spells. Each augmentation increases the Magical Attack DC required to successfully cast the spell effect; hence, too many modifications may make the spell impossible to cast. On the other hand, these augmentations allow mighty spellcasters to create powerful spell effects capable of shattering armies, changing the weather over an entire region, or calling the foulest forces from the depths of Hell.

Augmenting spells increases the drain. To determine total drain, divide the total Spell DC by 5. Add the result to the 1d8 drain roll.

Augmentations fall into five categories. First is damage, allowing you to increase the base damage for spell effects dealing hit point damage or ability damage. Second, is area of effect and targets, which you use to expand the effects of a spell. Third is range, whereby you augment the effective distance of a spell effect. Duration is fourth, allowing you to extend the effects of a spell. Finally, components is fifth, letting you reduce the Magical Attack DC by adding additional requirements to cast the spell. Specific details are as follows

Damage

You can modify an effect's damage in many ways. Use the following augmentations to modify a spell effects damage.

Hit Point Damage

Augmentation	DC Mod	Example
Increase die type	+5	Increase the damage die from 1d4 to 1d6 (max 1d12)
Add damage die	+5	Increase the damage dice from 1d4 to 2d4

Other Variables

Augmentation	DC Modifier	Effect
Empower the spell effect increase by one-half	+20	All variable, numeric effects
Maximize the spell effect are maximized	+40	All variable, numeric effects

Area of Effect and Targets

You can change a spell's effect from target to an area, add additional targets to the first, or modify an effect's area. Use the following augmentations to increase the area or target of a spell.

Augmentation	DC Modifier
Add one target	+4
Change target to area (2m)	+4
Add one 2m square	+2
Change from target to any area 1	+5
Change from ray to any area (1)	+5
Add area to ranged (2)	+4
Change from any area to ray	-2
Change from any area to any area	+4
Burst/Spread area of effect per 2m radius	+5
Cloud area of effect per 2m radius or height	+6
Cone area of effect per 2m	+6
Cylinder per 2m radius or height	+8
Emanation per 5-ft. radius	+2
Line of effect per 4m.	+5
Per 2m square (3)	+2
Direct the spell within range (4)	+20

(1) The spell automatically has the base area of the type selected: 5-ft.-radius burst or spread, a 5 ft.-radius cloud, etc.

(2) The spell's area takes effect at any point you can see and within range.

- (3) Each target square must be adjacent to at least one other target square.
- (4) This augmentation allows you to redirect a spell with a duration to affect new targets by changing the targeting location.

Range

Most base spell effects express range as personal, touch, or in meters. Use the following augmentations to extend the range of a spell.

Augmentation	DC Modifier
Change from personal to touch	+10
Change from touch to ranged *	+4
Change from ranged to touch	-4
Per 4m	+1
Per 20m	+5
Per 40m	+10
Increase to line of sight	+80

*Usually this modification takes the form of a ray (base range of 2m).

Duration

Most spell effects have an instantaneous or 1-round duration. You may increase the duration of spells from 1 round to 1 minute, 1 day or longer.

Augmentation	DC Modifier
Change from instantaneous to 1 round	+20 (1)
Per additional round	+1
Change from round to minute	+9
Per additional minute	+1
Change from minute to hour	+20
Per additional hour	+2
Change from hour to day	+50
Per additional day	+5, + 1 spell energy (2)
Contingent	+50% final DC, + 1 spell energy (3)

- 1 If you augment a damage-dealing spell effect to increase the duration from instantaneous to a duration of 1 round or longer, the damaging force is fixed and deals damage each round to creatures and objects in the area of effect.
- 2 It costs 1 point of spell energy per day.
- 3 The spell effect takes effect when an established condition is met. The contingency lasts 1 day until discharged.

Refreshing Existing Spells

If you successfully cast an effect with a duration of 1 day or more, you can spend an additional point of spell energy before the effect runs out to extend the duration for one additional increment (e.g., a spell with a 1-day duration could be extended by 1 day per point of spell energy spent, while one with a 1-week duration could be extended by 1 week per point of spell energy). This allows you to maintain several spell effects at once, although you're reduced in power.

Extra Components

Spellcasters say prayers, wave wands, dance or perform other physical gestures all in the effort to produce a magical effect. These are called spell components. All spells require at least one component for the base effect.

You may add additional components to help cast a spell, gaining a bonus to Magical Attack checks. You may only have one of each type of component: one verbal, one somatic, one fetish, and one expendable.

Additional Components	Attack Bonus
Add verbal or somatic component	+5 each
Add focus component	+10
Add expendable component	*

*See Expendable Components Table

Subtracting Components

Although all spells include components, you may remove one or more components from a spell. Each component removed increases the Magical Attack DC by +10 regardless of the component removed.

Subtracting Components	DC Modifier
Subtract one component	+10
Subtract two components	+18
Subtract three components	+26

Note: Subtracting components reduces the Magical Attack DC, while adding extra components gives a bonus to the caster's Magical Attack.

Other Reductions

In addition to adding components to a spell effect, you can derive benefits from other environmental effects, such as magic fields or simply working with other casters.

Ritual Casting

Casting magic in a group, as a ritual adds potency to a magical spell. To be cast as a ritual a spell must take at least five minutes to cast. Only when casting ritual magic do the effects of Cooperative and Proximity Magic come into effect.

Cooperative Magic

Multiple spellcasters can work together to cooperatively cast a spell. Low-level spellcasters of the same magnitude who work together are more likely to achieve the required casting DC than are low-level spellcasters going it alone. To do so, select one of your number as the leader of the group, typically the character with the highest Magical Attack.

Each additional caster must succeed on a Magical Attack roll against one-half the desired spell effect's DC. Supporting spellcasters may use additional components to aid in their checks. Every supporting caster who succeeds adds her Spell Mastery bonus +1 to the primary caster's. Each spellcaster must devote the same number of total rounds to the casting of the spell. When spellcasters of different levels of mastery cast spells together, there are slightly different effects as described under Proximity Magic.

Proximity Magic

When spellcasters of different level of cast a spell together, the powerful spellcasters helps those of a lesser Spell Mastery reach new spellcasting heights. When a spellcaster of a lower magnitude stands close to one of a

higher level of Spell Mastery, the lower-level spellcaster gains a bonus to their Magical Attack as indicated on the Proximity Magic table. Spellcasters benefiting from proximity magic still suffer drain as normal.

Proximity Magic Table

Difference in Spell Mastery	Example	Attack Bonus
One step	1 to 2	+2
Two steps	0 to 2	+4
Three steps	1 to 4	+8
Four steps	1 to 5	+16
Four steps	0 to 5	+32

BLENDING SPELLS

While the options contained within each spell enable you to construct a variety of effects to suit a particular situation, you can also merge one or more spells you know to create more effects.

Blending spells is, in many ways, like casting two or more spells at once. In effect, you tie a second (or third or fourth) spell effect on the first, creating some new and potent effect but increasing the final spell effect's Magical Attack DC. To blend two or more spells, follow these steps.

Step One:

Determine Spells to Blend

You may blend any number of spells you know. The spell with the highest prerequisite is considered the base spell; all other spells added to the base spell essentially piggyback off the first spell. The unmodified Magical Attack DC to cast a blended spell equals the DC of the base spell + 2 per additional spell you intend to add.

Step Two:

Determine Base Effects

Determine the range, duration, area, damage (if applicable) of the base spell, increasing the DC as normal.

Step Three:

Determine Blended Effects

Match all range and area parameters of the spell effects to be blended to those of the base spell.

However, increases to the Magical Attack DC are one-half of normal (minimum of +1 to DC). Then apply any other augmentations desired, but don't halve these DC increases.

Step Four:

Determine DC, add Components, Determine Casting Time

Sum all DC modifiers, add components, and determine casting time as normal.

Step Five:

Cast and Resolve the Spell Effect

Cast the spell by making a Magical Attack against the final DC and resolve all effects as normal.

Prophecy

Afflict

You can bestow curses.

Base DC: 5

Component: Verbal; Range: Touch; Target: Living creature touched; Duration: 1 round; Saving Throw: MIND negates; Spell Resistance: Yes.

Base Effect

You afflict a target you touch with a mild curse, imposing a –1 morale penalty on attack rolls, checks, and saving throws for the duration of the effect. Upon casting the effect, you are charged with the ability to curse until you successfully touch a target or until the duration expires.

Augmented Effects

You can apply the following augmentations to Afflict: Area/Target, Components, Duration, Range.

You may expand the effects of Afflict to apply the penalty to caster level checks or spell resistance, which increases the base Magical Attack DC by +5. Alternatively, you can substitute a penalty to caster level checks or spell resistance by eliminating one of the spell's base effects (the penalty to attack rolls, checks, or saving throws). And for each additional –1 penalty assessed on either the target's attack rolls, checks, saving throws, caster level, or spell resistance increase the base Magical Attack DC by +5.

For example, you could add a –1 penalty to spell resistance but drop the penalty to saving throws (+5 DC for the spell resistance penalty, offset by dropping the saving throw penalty), then increase the penalty on attack rolls, checks and spell resistance to –2 (+5 DC each, for a total of +15 DC), with a net +15 Magical Attack DC bonus.

By increasing the Magical Attack DC by +10, you can afflict one of the target's senses: sight, smell, hearing, taste, touch, or a special sense the target possesses. If the target fails its saving throw, the sense selected does not function for the spell's duration, with all attendant penalties applicable for losing the specified sense. By increasing the Magical Attack DC by +30, you can give a target a disease (see Disease in the DMG). The saving throw changes to $\text{phys} + \text{STR}$ in this case.

You can also impose a –1 penalty on one of a target's ability scores by increasing the Magical Attack DC by +15. For each additional –1 penalty to that ability score, increase the DC by an additional +10; to cause a –1 penalty to two different ability scores requires +15 DC each. You cannot reduce any of the target's ability scores below –4.

Air Lore

You can invoke a light breeze.

Base DC: 15

Component: Somatic; Range: 6m; Effect: Line-shaped gust of moderate wind; Duration: 1 round; Saving Throw: $\text{phys} + \text{STR}$ negates; Spell Resistance: Yes.

Base Effect

This spell creates a blast of air (up to 32 kph) originating from you and affecting all creatures in its path. The force of the winds has a 50% chance of extinguishing candles, torches, and similar unprotected flames. It causes protected flames, such as those of lanterns, to flicker and has a 25% chance to extinguish those lights.

In addition to the effects noted, Air Lore can do anything a sudden blast of wind would be expected to do: create a spray of sand or dust, fan a large fire, overturn delicate awnings or hangings, rock a small boat, or blow gases or vapors to the edge of its range.

Augmented Effects

You can apply the following augmentations to Air Lore: Area/ Target, Components, Duration, Range.

You can increase the potency of the winds created through Air Lore. For each increase of wind force, you increase the DC by +5. Wind force has effects as follows.

Strong Wind: Gust automatically extinguishes unprotected flames (candles, torches, and the like). Strong winds impose a –2 penalty on ranged attack rolls and on Listen checks.

Severe Wind: In addition to automatically extinguishing any unprotected flames, winds of this magnitude cause protected flames (such as those of lanterns) to dance wildly, with a 50% chance of being extinguished. Ranged weapon attacks and Listen checks are at a –4 penalty.

Windstorm: Powerful enough to bring down branches if not whole trees, windstorms automatically extinguish unprotected flames and have a 75% chance of blowing out protected flames. Ranged weapon attacks are impossible, and even siege weapons have a –4 penalty on attack rolls. Listen checks are at a –8 penalty due to the howling of the wind.

Hurricane-Force Wind: All flames are extinguished. Ranged attacks are impossible (except with siege weapons, which have a –8 penalty on attack rolls). Listen checks are impossible: All characters can hear is the roaring of the wind. Hurricane-force winds often fell trees.

You cannot move a creature beyond the limit of the spell effect's range, although you may increase the spell's range as normal.

Alternatively, by increasing the Magical Attack DC by +50, you can create a tornado with Air Lore. All flames within 60 meters of the tornado are automatically extinguished and all ranged attacks (even with siege weapons) are impossible. Listen checks automatically fail.

Select a square within range (as determined by the spell effect's augmentations). All characters within 12 meters (or more, if augmented) of that square must succeed on a phys+STR save against the spell's DC or be sucked inside the tornado. Any who come in contact with the tornado (either through being sucked inside or entering the selected square) are picked up and whirled around for 1d10 rounds (extending the duration further increases the DC by +1 per additional round), taking 6d6 points of damage per round until they are violently expelled (falling damage may apply).

While a tornado's rotational speed can be as great as 480 kph, the funnel itself moves forward at an average of 48 kph (roughly 100 meters per round) for 1d10 rounds (or until the augmented spell effect ends). A tornado uproots trees, destroys buildings, and causes other similar forms of major destruction.

Large or smaller creatures in the area of tornado-strength winds are blown away. Huge creatures are knocked down, and Gargantuan and Colossal creatures are checked.

Wind Force Effect	Wind Speed phys+STR DC	Ranged Attacks (1)	Creature Size(2)	Wind	
Light	0–16 kph	–/–	Any	None	–
Moderate	17–32 kph	–/–	Any	None	–
Strong	33–48 kph	–2/–	Tiny or smaller	Knocked down	
Severe	49–80 kph	–4/–	Small or larger	None	
away	15		Tiny	Blown	
down			Small	Knocked	
			Medium	Checked	
Windstorm	81–120 kph	Impossible/–4	Large or larger	None	
away	18		Small or smaller	Blown	
down			Medium	Knocked	
			Large or Huge	Checked	
			Gargantuan or Colossal		
Hurricane	121–280 kph	Impossible/–8	Medium or smaller	Blown	
away	20		Large	Knocked	
down			Huge	Checked	
			Gargantuan or Colossal		
Tornado	281–480 kph	Impossible/Impossible	Large or smaller	Blown	
away	30		Huge	Knocked	
down			Gargantuan or Colossal		
				Checked	

1 The first section is for standard projectiles, the second for oversized, such as large, magically propelled stones and siege weaponry.

2 Flying or airborne creatures are treated as one size category smaller than their actual size.

Checked: Creatures are unable to move forward against the force of the wind. Flying creatures are blown back 1d6×2 meters.

Knocked Down: Creatures are knocked prone by the force of the wind. Flying creatures are instead blown back 1d6×4 meters.

Blown Away: Creatures on the ground are knocked prone and rolled 1d4×4 meters, taking 1d4 points of nonlethal damage per 4 meters. Flying creatures are blown back 2d6×4 meters and take 2d6 points of nonlethal damage due to battering and buffeting.

Banish

You can force a spirit from the material world.

Base DC: 25

Components: Verbal, Somatic; Range: Touch; Target: Extraplanar creature touched; Duration: Instantaneous; Saving Throw: Will negates (see text); Spell Resistance: Yes.

Base Effect

You can banish up to 4 Levels of hostile spirit from the material world. A spirit leaves the material world if it fails a special MIND save (DC = spell's save DC – Spirit's Level + your caster level). If the spell is successful, the creature is instantly whisked away.

Augmented Effects

You can apply the following augmentations to Banish: Area/Target, Components, Range. For each additional 2 levels of spirit banished, increase the Magical Attack DC by +5.

Beguile [Mind-Affecting]

You can disrupt the thoughts and actions of another.

Base DC 15.

Component: Verbal; Range: Touch; Target: Living creature touched; Duration: 1 round; Saving Throw: MIND+level negates; Spell Resistance: Yes.

Base Effect

You cause the target to become confused, making it unable to determine independently what it will do. Roll on the following table at the beginning of the subject's next turn round to see what it does in that round.

1d10 Behavior

1 Attack you with melee or ranged weapons (or close with you if attack is not possible).

2 Act normally.

3–4 Do nothing but babble incoherently.

5–6 Flee from you at top possible speed.

7–10 Attack nearest creature.

A confused creature that cannot carry out the indicated action does nothing but babble incoherently. Attackers are not at any special advantage when attacking a confused character. Any confused creature

that is attacked automatically attacks its attackers on its next turn, as long as it is still confused when its turn comes. Note: A confused creature won't make attacks of opportunity against any creature that it isn't already devoted to attacking, either because of its most recent action or because it has just been attacked.

Augmented Effects

You can apply the following augmentations to Beguile: Area/Target, Components, Duration, Range.

By increasing the Magical Attack DC by +20, you can choose the target's behavior (from those listed above) for 1 round. If you extend the duration of the spell, you must increase the DC by +20 for every round you wish to determine its actions.

Alternatively, by increasing the DC +10, by you can calm the emotions of the target, reducing strong emotions (both positive, such as joy, and negative, such anger) to a neutral state. The target cannot take violent actions (although it can defend herself) or do anything destructive, but any aggressive action against or damage dealt to it immediately breaks the spell.

This spell automatically suppresses (but does not dispel) any magical morale bonuses. It also suppresses any fear effects and removes the confused condition from all targets. While the spell effect lasts, a suppressed spell or effect has no effect. When the spell effect ends, the original spell or effect takes hold of the target again, provided that its duration has not expired in the meantime.

If this spell effect is augmented to cover more than one target creature, attacking any one breaks the spell on all of them.

Create Energy

You can create Fire or Sonic energy.

Base DC 10(Fire)/20(Sonic)

Components: Verbal, Somatic; Range: 4m; Area: 2m.- radius burst; Duration: Instantaneous; Saving Throw: phys+Dex half; Spell Resistance: Yes.

Base Effect

You have one form of this Spell in accordance with your Elemental Type.

You point your finger and determine the range (distance and height) at which the created energy is to burst. A bolt of elemental energy is fired from the palm, and unless it impacts on a material body or solid barrier prior to attaining the prescribed range, blossoms into the created energy at that point -- an early impact results in an early detonation. If you attempt to send the bolt through a narrow passage, you must "hit" the opening with a second Magical Attack made against the Target's Defense, or else the bead strikes the barrier and detonates prematurely.

All creatures in the area of the detonation take 1d4 points of damage. Unattended objects caught in the area of the created energy take damage as normal for the energy: fire ignites combustibles, cold freezes liquids, sonic can shatter fine or delicate items and so on.

Note: If you create an energy type, the created energy vanishes at the end of the spell effect's duration. Incidental effects, such as fires or billowing smoke started from Create Energy (fire) do not vanish at the end of the duration.

Augmented Effects

You can apply the following augmentations to Create Energy: Area/Target, Components, Damage,

Range.

Dispel

You can counter spell effects.

Base DC: 10.

Component: Verbal; Range: 4m; Target: One creature, object, or spell; Duration: Instantaneous; Saving Throw: None; Spell Resistance: No.

Base Effect

Use this spell to end ongoing spells (or at least their effects) that have been cast on a creature, object, or area, or to temporarily suppress the magical abilities of a magic item. A dispelled spell effect ends as if its duration had expired. Dispel can defeat the most powerful spell effect in place. Dispel can dispel the ongoing effects of supernatural abilities as well as spell effects, and it affects spell-like effects just as it affects spell effects. You make a dispel check against the spell effect or against each ongoing spell effect currently in effect on the object or creature. A dispel check is 1d20+1 against a DC of 11 + the target effect's caster level.

If targeting an object or creature that is under the effects of an ongoing spell effect, make a dispel check to end the spell effect affecting the object or creature.

If the object targeted is a magic item, make a dispel check against half the Magical Attack DC to create the item. If successful, all the item's magical properties are suppressed for 1d4 rounds, after which the item recovers on its own. A suppressed item becomes nonmagical for the duration of the effect. A magic item's physical properties are unchanged.

Augmented Effects

You can apply the following augmentations to Dispel: Area/ Target, Components, Range.

For each additional +1 on the dispel check, increase the Magical Attack DC by +2. In addition, for each additional spell effect to be dispelled, increase the Magical Attack DC by +10.

Earth Lore

You can soften earth and stone.

Base DC: 15

Component: Verbal; Range: Touch; Area: 2m square area; Duration: Instantaneous; Saving Throw: None; Spell Resistance: No.

Base Effect

This spell effect causes all natural, undressed earth or stone in the spell effect's area to soften: wet earth becomes thick mud, dry earth becomes loose sand or dirt, and stone becomes soft clay easily moldable or chopped. You affect a 2-meter-square area to a depth of 30 to 120 centimeters, depending on the toughness or resilience of the ground at that spot. You cannot affect magical, enchanted, dressed, or worked stone.

A creature in mud must succeed on a Reflex save or be caught for 1d2 rounds. A creature that succeeds on its save can move through the mud at half speed, but it cannot run or charge. A creature that fails its save sinks until hip- or chest-deep, suffers a –2 penalty on attack rolls and AC, and has its move reduced to 2 meters. Brush thrown atop the mud can support creatures able to climb on top of it. Creatures tall enough to walk on the bottom can wade through the area at a speed of 2 meters. Loose dirt is not as troublesome as mud, but all creatures in the area can move at only half their normal speed and cannot

run or charge over the surface. Stone softened into clay doesn't hinder movement, but it does allow characters to cut, shape, or excavate areas they may not have been able to affect before.

Augmented Effects

You can apply the following augmentations to Earth Lore: Area/Target, Components, Duration, Range.

If you increase the area, and target a cavern ceiling, you can cause a moderate collapse or landslide as the loosened material peels away from the face of the roof and falls. A moderate amount of structural damage can be dealt to a manufactured structure by softening the ground beneath it, causing it to settle. However, the basic effects of Earth Lore usually only damage the structure, not destroy it.

If you increase the Magical Attack DC by +20, you can change uncut or unworked rock into an equal volume of mud. The depth of the mud created cannot exceed 4 meters. If cast upon the ceiling of a cavern or tunnel, the mud falls to the floor and spreads out in a pool at a depth of 2 meters. The falling mud and the ensuing cave-in deal 8d6 points of bludgeoning damage to anyone caught directly beneath the area or half damage to those who succeed on Reflex saves. Those in the mud then must make a separate Reflex save to determine how the mud affects their movements (as above). You may turn an equal area of mud back to soft sandstone for the same DC increase.

By increasing the DC by +5, you can form an existing volume of earth or clay into any shape that suits your purpose. While it is possible to make crude coffers, doors, pots, and so forth, fine detail is not possible unless you succeed on an appropriate Craft skill check (e.g., potter, sculptor). There is a 30% chance that any shape including moving parts simply does not work. An additional +10 DC increase allows you to shape stone in the same way.

You can increase the Magical Attack DC by +30 to cause the affected area to shape itself into long, sharp points that blend into the background, impeding progress and dealing damage to any moving through the area. Any creature moving on foot into or through the spell effect's area moves at half speed, and each creature moving through the area takes 1d8 points of piercing damage for each 2 meters of movement through the spiked area.

Any creature that takes damage from this spell must also succeed on a Reflex save to avoid injuries to its feet and legs. A failed save causes the creature's speed to be reduced to half normal for 24 hours or until the injured creature receives a Healing Lore spell effect. Another character can remove the penalty by taking 10 minutes to dress the injuries and succeeding on a Heal check against the spell's save DC. Treat such injuries as caltrop wounds for the purposes of Resistance checks.

By increasing the Magical Attack DC by +50, you can move dirt (clay, loam, sand), possibly collapsing embankments, moving hillocks, shifting dunes, and so forth. However, in no event can rock formations be collapsed or moved. This spell does not violently break the surface of the ground. Instead, it creates wavelike crests and troughs, with the earth reacting with glacier-like fluidity until the desired result is achieved. Trees, structures, rock formations, and such are mostly unaffected except for changes in elevation and relative topography. The spell cannot be used for tunneling. Its primary use is for digging or filling moats or for adjusting terrain contours before a battle.

By increasing the DC by +100, you cause an intense but highly localized tremor to rip the ground. The shock knocks creatures down, collapses structures, opens cracks in the ground, and more. The effect lasts for 1 round (unless the duration is augmented), during which time creatures on the ground can't move or attack. A spellcaster on the ground must make a DC 25 Concentration check or the Magical Attack DC of any spell effects she casts increase by +4. The earthquake affects all terrain, vegetation, structures, and creatures in the area.

The specific effect of this augmentation depends on the nature of the terrain where it is cast.

- Cave, Cavern, or Tunnel: The spell collapses the roof, dealing 8d6 points of damage to any creature caught under the cave-in (Reflex vs. DC 15 halves) and pinning that creature beneath the rubble (see below). If cast on the roof of a very large cavern, it could also endanger those outside the actual area but below the falling debris.

Cliffs: Cause a cliff to crumble, creating a landslide that travels horizontally as far as it fell vertically. Any creature in the path takes 8d6 points of bludgeoning damage (phys+DEX DC 15 half) and is pinned beneath the rubble (see below).

Open Ground: Each creature standing in the area must make a DC 15 phys+DEX save or fall down. Fissures open in the earth, and every creature on the ground has a 25% chance to fall into one (Reflex DC 20 to avoid a fissure). At the end of the spell, all fissures grind shut, killing any creatures still trapped within.

Structure: Any structure standing on open ground takes 100 points of damage: enough to collapse a typical wooden or light stone building, but not a structure built of reinforced masonry. Hardness does not reduce this damage, nor is it halved as damage dealt to objects normally is. Any creature caught inside a collapsing structure takes 8d6 points of damage (phys+DEX DC 15 halves) and is pinned beneath the rubble (see below).

River, Lake, or Marsh: Fissures open underneath the water, draining away the water from that area and forming muddy ground. Soggy marsh or swampland becomes quicksand for the duration of the spell, sucking down creatures and structures. Each creature in the area must make a DC 15 Reflex save or sink down in the mud and quicksand (see above for movement rules). At the end of the spell effect's duration, the rest of the body of water rushes in to replace the drained water, possibly drowning those caught in the muck. The mud's affects on movement are the same as for rock transformed into mud as described above.

Pinned Beneath Rubble: Any creature pinned beneath rubble takes 1d6 points of vitality damage per minute while pinned. A character with zero Vitality must take a DC 15 STR check or falls unconscious. If a pinned character falls unconscious, she must make a DC 15 STR check or take 1d6 points of damage each minute thereafter until freed or dead.

Enchant

You can manipulate a person's mind.

Base DC: 5

Component: Verbal; Range: Touch; Target: One living creature; Duration: 1 round; Saving Throw: Will negates; Spell Resistance: Yes.

Base Effect

You may affect one Level 1 living creature touched. If the creature fails a MIND+level save, it takes a –2 penalty on Listen and Spot checks and a –1 penalty on MIND+Level saves against sleep effects while so affected.

Augmented Effects

You can apply the following augmentations to Enchant: Area/ Target, Components, Duration, Range.

If you augment the range, you affect a target creature with range rather than creating a ray effect. You may increase the HD you can affect by increasing the Magical Attack DC by +5 for every Level above

1. By increasing the DC by +5 you can put a humanoid or animal with 1 Level to sleep for 1 round. For every additional Level of creature to be put to sleep, increase the Magical Attack DC by an additional +5. You can extend the duration of the sleep effect as normal. A target put to sleep in this way can be awoken

by being slapped or being dealt at least 1 point of damage. Otherwise, the subject is helpless until the effect ends.

You can increase the DC by +10 to cloud the mind of a Level 1 humanoid or animal so it can take no actions for the duration (though it is not considered helpless). You may increase the number of Hit Dice you can affect by increasing the Magical Attack DC by +5 per additional Level.

Enhance Person

You can improve a target's natural talents.

Base DC: 20.

Component: Verbal; Range: Touch; Target: One humanoid touched; Duration: 1 round; Saving Throw: Fort negates (harmless); Spell Resistance: Yes (harmless).

Base Effect

Enhance Person confers one of the following benefits:

+1 enhancement bonus to one of the target's ability scores (the target must have an ability score for this spell effect to work).

+1 competence bonus to any skill

+1 enhancement bonus to the target's natural armor bonus.

+1 competence bonus to the target's attack rolls.

+2 enhancement bonus to a saving throw.

+2 meter enhancement bonus to the target's base land speed.

The addition of 1 temporary Vitality point.

Augmented Effects

You can apply the following augmentations to Enhance Person: Area/Target, Components, Duration, Range.

You can apply more than one effect granted by this spell. Each instance increases the Magical Attack DC by +10.

You can increase the bonus of the ability score benefit by increasing the DC by +20 for each additional +1 bonus increment.

You can increase the skill bonus by increasing the DC by +2 for each additional +1 bonus increment.

You can apply the effects of this spell to an additional skill by increasing the Magical Attack DC by +10; further augmentation is priced separately. You can increase the attack roll bonus by increasing the DC by +10 for each additional +1 bonus to attack rolls.

You can increase the natural armor bonus by increasing the DC by +10 for each additional +1 bonus to natural armor. You can increase the bonus of the saving throw benefit by increasing the DC by +10 for each additional +1 bonus to the selected saving throw. In addition, you may affect more than one save with Enhance Person by purchasing each additional type as an additional effect as described above and then increasing each separately.

You can increase the bonus to a target's speed by an additional +2 meters for every +5 you add to the Magical Attack DC.

You can add an additional temporary Vitality point for each +3 increase to the Magical Attack DC.

Fatigue

You can sap a target's stamina.

Base DC: 15.

Components: Verbal, Somatic; Range: Touch; Target: Creature touched; Duration: 1 round; Saving Throw: Fortitude negates; Spell Resistance: Yes.

Base Effect

Your touch tires a target. The subject is immediately fatigued for the spell effect's duration. This spell has no effect on a creature that is already fatigued. Unlike normal fatigue, the effect ends as soon as the spell's duration expires. Multiple uses of this spell stack, with a second casting and a failed save resulting in two fatigued conditions (exhausted).

Augmented Effects

You can apply the following augmentations to Fatigue: Area/ Target, Components, Duration, Range.

Fear

You can inspire terror in an enemy.

Base DC 15.

Component: Verbal; Range: 4m; Target: One living creature; Duration: 1 round; Saving Throw: Will negates; Spell Resistance: Yes.

Base Effect

This spell effect fills a single subject with a feeling of horrible dread that causes it to become shaken.

Augmented Effects

You can apply the following augmentations to Fear: Area/Target, Components, Duration, Range.

You can increase the level of fear in the target to frightened by increasing the Magical Attack DC by +15, or panicked by increasing the Magical Attack DC by +30.

Fire Lore

You can control the burn rate of a fire.

Base DC 15.

Component: Somatic; Range: 4m; Target: One fire source, up to a 2m cube; Duration: Instantaneous; Saving Throw: See text; Spell Resistance: Yes and no, see text.

Base Effect

You may cause a fire to be extinguished or reduced to embers, or to flare up and expand to twice its size. You can cause a fire source to burst in a bright flash. If creatures adjacent to the fire source fail a phys+STR save, they are dazzled for 1 round. Sightless creatures are immune to this effect.

Augmented Effects

You can apply the following augmentations to Fire Lore: Area/Target, Components, Range.

You can expand the area of the target fire by an additional 2m cube by increasing the Magical Attack DC by +6.

You can expand the intensity of the flash effects of Fire Lore by increasing the Magical Attack DC by +10. All adjacent sighted creatures become blinded for 1d4 rounds unless they succeed on a Fortitude save.

By increasing the Magical Attack DC by +15, you can create writhing streams of billowing smoke instead. The smoke spreads 2 meters in all directions and lasts for 1 round. All creatures within the cloud that fail a Fortitude save take –4 penalties to Strength and Dexterity that continue for 1 round after they leave. You may augment the duration and area of the cloud as normal.

Foresee

You can bestow a flash of insight that reveals the future.

Base DC 5.

Component: Somatic; Range: Touch; Target: Creature touched; Duration: 1 round or until discharged; Saving Throw: Will negates (harmless); Spell Resistance: Yes (harmless).

Base Effect

Foresee allows a touched creature to gain a flash of insight into the future. The subject of the effect gains a +1 competence bonus on any of the following: a single attack roll, saving throw, or skill check. The subject must choose to use the bonus before making the roll to which it applies.

Augmented Effects

You can apply the following augmentations to Foresee: Area/Target, Components, Duration, Range.

You can augment the effects of Foresee by an additional +1 competence bonus by the Magical Attack DC by an additional +2 for every extra point.

You can have the bonus apply to more than one roll (such as attack roll and saving throw) by increasing the Magical Attack DC by +5.

Healing Lore

You can repair injuries.

Base DC 15.

Component: Somatic; Range: Touch; Target: Creature touched; Duration: Instantaneous; Saving Throw: Will half (harmless); Spell Resistance: Yes (harmless).

Base Effect

You lay hands upon a target creature and use magic to repair injuries. You can heal 1 point of Wound or Vitality damage.

Augmented Effects

You can apply the following augmentations to Healing Lore: Area/Target, Components, Damage (Special, see following), Range.

You can use Healing Lore to diagnose a subject's physical condition by increasing the Magical Attack DC by +10. This spell effect reveals the subject's mental state (e.g., nauseated, panicked, stunned, confused), her physical state (wounded and to what extent, disabled, staggered, unconscious, dying), and

any physical afflictions she's suffering (e.g., poison or disease). It doesn't reveal magical afflictions (e.g., curses).

To augment the Healing Lore spell effects, use the following Magical Attack DC modifiers.

Augmentation DC	Modifier	Example
Increase to d3	+5	Increase from 1 point to 1d3 points
Increase die type	+5	Increase the cure die from 1d3 to 1d4
Per additional die	+5	Increase the cure die from 1d3 to 2d3

Increasing the Magical Attack DC by +30 allows you to remove either any poisons or any diseases from the target.

A more common use of Healing Lore is cosmetic maintenance. By increasing the DC by +5, you can remove any common physical ailments, such as a rotten tooth, an ingrown toenail, a hangnail, acne, minor cuts, abrasions, bruises (none of which are actual damage), and so on.

Projectile

You can shape matter defensively and offensively.

Base DC 10

Component: Verbal; Range: Personal or 4m.; Target/Effect: You or create a stone projectile; Duration: 1 round or instantaneous (hammer); Saving Throw: Will negates (harmless) (shield only); Spell Resistance: Yes.

Base Effect

You can create an large, shield-sized, mobile disk of stone or ice that hovers in front of you. The disk provides a +2 deflection bonus to Defense. Alternately you may make a Magical Attack roll with a DC of the attackers Initiative to place the barrier can be placed in front of the attack to block it entirely. A stone barrier has DR8 and can withstand 15 points of damage per 3cm thickness before it is destroyed. An ice barrier has a DR4 (0 against Fire) and can withstand 8 points of damage per 3cm thickness before it is destroyed. All remaining damage is transferred to the caster. You may only use a barrier to block the attacks from one enemy at a time.

Alternatively, you can create a projectile Stone or Ice you can then use as a ranged weapon with a base range of 4 meters. You must succeed on a ranged touch attack to hit the target. If you succeed, you deal 1 points of damage.

Augmented Effects

You can apply the following augmentations to Force: Area/Target, Components, Damage, Duration, Range.

For every Magical DC increase of +7, you increase the deflection bonus by +1.

For every Magical DC increase of +12, you increase the thickness by 3cm.

If you change the effect of the weapon of force to a 2m radius burst (+5 DC), you do not need to roll to hit. Targets halve damage on a successful phys+STR save.

Protection

You can surround yourself with a protective aura.

Base DC 5.

Component: Somatic; Range: Personal; Target: You; Duration: 1 round; Saving Throw: Will negates (harmless); Spell Resistance: Yes (harmless).

Base Effect Protection creates a protective aura around you, granting a +1 insight bonus to your Armor Class.

Augmented Effects

You can apply the following augmentations to Protection: Area/Target, Components, Duration, Range. For each additional point of insight bonus to your AC, increase the Magical Attack DC by +5.

By increasing the Magical Attack DC by +5, you can withstand the effects of heat as hot as 140 degrees Fahrenheit or cold as chill as -50 degrees without having to make Fortitude saves. This doesn't provide any protection against direct fire or cold damage.

Resolve

You can remove a magical effect affecting a creature.

Base DC: 15.

Component: Focus; Range: Touch; Target: Creature touched; Duration: Instantaneous; Saving Throw: Fortitude negates (harmless); Spell Resistance: Yes (harmless).

Base Effect

You remove a -1 penalty imposed by magic on a skill, ability score, attack roll, check, or saving throw. If the target has a higher penalty, you reduce it by 1.

Augmented Effects

You can apply the following augmentations to Resolve: Area/ Target, Components, Range.

For every additional +10 to the Magical Attack DC, you can remove an additional -1 penalty.

You can also reduce or remove fear conditions by increasing the DC by +10 for each step reduced (such as from panicked to frightened, or frightened to shaken, or shaken to no fear condition).

For an increase of +8, you can suppress a curse for 1 day. By increasing the Magical Attack DC by +20, you can permanently remove any curses affecting the touched creature.

For an increase of +20, you can restore senses removed by magic, but only by magic.

You can further empower this spell effect by increasing the DC by +30 to immediately remove any mind-affecting effects, all penalties imposed by Afflict, and any fear conditions.

Reveal

You can see distant locations or hear distant sounds.

Base DC: 15.

Component: Focus; Range: 2m.; Effect: Magical sensor; Duration: 1 round; Saving Throw: Will negates; Spell Resistance: Yes.

Base Effect

You can see some distant location or hear the sounds at some distant location almost as if you were there. You must decide at the time of casting the effect whether you can see or hear. The spell effect creates a fixed invisible sensor over the top of the target that can be dispelled. Lead sheeting or magical protection blocks the spell, and you sense that the spell is blocked.

Augmented Effects

You can apply the following augmentations to Reveal: Components, Duration, Area/Effect (see text), Range (see text).

You can expand the area of the sensor reveal by augmenting the Area through normal means.

It's easier to extend the range of reveal. You can increase the range to 2 kilometers by increasing the Magical Attack DC by +20. Each additional two kilometer increment beyond the first increases the DC by +5.

To both hear and see, increase the Magical Attack DC by +10. If you prefer to create a mobile sensor (speed 48 meters) you control, increase the Magical Attack DC by +15. To allow magically enhanced senses to work through Reveal, increase the Magical Attack DC by +20.

To cast any spell effect from the sensor whose range is touch or greater, increase the Magical Attack DC by +30; however, you must maintain a line of effect between yourself and the sensor at all times. If the line of effect is obstructed, the spell ends. To free yourself of the line of effect restriction for casting spells through the sensor, multiply the Magical Attack DC by $\times 3$.

By increasing the Magical Attack DC by +30, you may look in on the location of a specific creature, instead of a specific location. In order to do this, you must possess a personal item of the individual (one you've had for at least a week) or possess an edge (see Edges, page 23).

Note: A magical sensor can be detected with a successful DC 25 Detect Magic check.

Sense

You can heighten your senses.

Base DC 5.

Component: Focus; Range: Personal; Target: You; Duration: 1 round; Saving Throw: Will negates (harmless); Spell Resistance: Yes (harmless).

Base Effect

You gain a +1 bonus to Listen and Spot checks.

Augmented Effects

You can apply the following augmentations to Sense: Area/ Target, Components, Duration, Range.

You can increase the bonus to Listen and Spot checks by increasing the Magical Attack DC by +2 for each additional +1 bonus. By increasing the Magical Attack DC by +15, the bonus also applies to Search checks.

By increasing the Magical Attack DC by +5, you instead determine the direction of north from your current position.

Alternatively, if you increase the Magical Attack DC by +5, you can see twice as far as a normal in situations of low or dim lighting. If you increase the DC by +15, you can see 24 meters even in total nonmagical darkness, albeit in black and white.

Sense can also allow you to see magical auras within 48 meters. The effect is similar to that of the Detect Magic ability, but you do not have to concentrate and you discern aura location and power more quickly. By increasing the Magical Attack DC by +20, you know the location and power of all magical auras within your sight. An aura's power depends on the item or spell effect's caster level, as noted in the description of the Detect Magic skill description (see page 8). If the items or creatures bearing the auras are in line of sight, you can make Detect Magic skill checks to determine the spell involved in each. Make one check per aura (DC 15 + one-half caster level). If you concentrate on a specific creature within 48 meters of you as a standard action, you can determine how much available spell energy she has remaining.

By increasing the Magical Attack DC by +20, you can use Sense to detect secret doors, compartments, caches, simple pits, deadfalls, and snares, as well as traps constructed of natural materials. Typically, Sense only reveals passages, doors, or other openings specifically designed to escape detection. It also detects natural hazards like quicksand, deadfalls, and sinkholes. Sense reveals the presence or absence of such hazards or concealed spaces. If you extend the duration of this augmented effect, you can learn more information, depending on how long the spell effect lasts.

2nd Round: Number of secret doors and the location of each and number of hazards and the location of each. If a secret door or hazard is outside your line of sight, then you discern its direction but not its exact location.

Each Additional Round: The mechanism or trigger for one particular secret portal or hazard closely examined by you. Each round, you can turn to detect secret doors, snares, pits, and other hazards in a new area. The spell effect can penetrate barriers, but 1 meter of wood or dirt or 30 centimeters of stone.

You can set up a warning system that alerts you if Tiny or larger creatures come within a 2-meter-radius of you. At the time of casting, you can exempt certain individuals or types of creatures from the spell's effects. The warning takes the form of a sharp mental "ping," sufficient to wake you up, but not enough to disrupt your concentration, that indicates the direction of the intrusion but no other details. This increases the Magical Attack DC by +5.

To set up a warning system that alerts you if magic is used in that same area, or if attempts to scry you from a distance or to use sensing magic are directed at you, increases the DC by +30. If you increase the DC by +50, the warnings can give you a visual image of the spy and an accurate sense of her direction and distance from you,

but only if you succeed at an opposed caster level check (1d20 + caster level).

By increasing the DC by +50, you can determine the proximity of a particular object. You must think of either a general type of object (e.g., a staircase) or a specific example of an object (e.g., your own missing money pouch) during the casting. The spell effect can penetrate barriers, but 1 meter of wood or dirt, 30 centimeters of stone, 3 centimeters of common metal, or a thin sheet of lead blocks it.

Shape Matter

You can change the shape of matter.

Base DC: 25

Components: Verbal, Somatic; Range: 0m; Effect: Up to 8 meters of nonliving, nonmagical matter; Duration: Instantaneous; Saving Throw: None; Spell Resistance: No.

Base Effect

You summon a “block” of matter up to 8 cubic meters (2m x 2m x 2m) in volume. You may shape this as you like. You must succeed at an appropriate skill check to make a complex item. The material you summon depends on the applicable elemental skill. Water Elementalists may summon Water from a near-by source while Earth elementalists may summon earth from the ground below them.

Augmented Effects

You can apply the following augmentations to Create Matter: Area/Target, Components, Range. For each additional block (8 cubic meters) of matter summoned, increase the Magical Attack DC by +2. You can also conjure different types of materials based. For Ice, increase the DC by +15. For Stone, increase the DC by +25.

Sound Lore

You can send and receive messages at a distance.

Base DC: 5

Components: Verbal, Somatic; Range: 4m; Target: One creature; Duration: 1 round; Saving Throw: None; Spell Resistance: No.

Base Effect

You can whisper a message and receive a whispered reply without being overheard. You point your finger at the creature you want to receive the message and then whisper your message. Assuming the message isn't blocked (1 meter of wood or dirt, 30 centimeters of stone, 3 centimeters of common metal, or a thin sheet of lead blocks it the target creature hears the message and (if there's sufficient time) can whisper a reply that you hear.

The message does not have to travel in a straight line. It can circumvent a barrier if there is an open path between you and the subject, and the path's entire length lies within the spell effect's range.

The spell doesn't transcend language barriers.

Augmented Effects

You can apply the following augmentations to Sound Lore: Area/Target, Components, Duration, Range.

If you increase the Magical Attack DC by +50, you can whisper your message to (and receive a response from) a target creature with which you are familiar, without regard to distance or line of effect. An additional DC increase of +25 allows your message to reach the recipient across planar barriers. Or you can deliver your message to a target area (for a DC increase of +15), with the whispered words heard by anyone standing in a 10-ft. radius of the target location; if there's no one in the area, the message is whispered to the empty air. Anyone receiving the message can whisper a reply that you will hear, so long as both message and reply fit within the spell effect's duration.

By increasing the DC by +5, you can make your voice (or any sound that you can normally make vocally) seem to issue from someplace else within a 4-meter radius. Anyone who hears the sound and rolls a successful Will save recognizes it as illusory (but still hears it).

You can use Sound Lore to mask the sounds of movement, conferring a +1 bonus to Move Silently checks by increasing the Magical Attack DC by +15. For each additional +1 bonus, increase the DC by an additional +2. To plunge a 2-meter square area into silence, increase the DC by +30. You can increase the area normally.

If you increase the DC by +20, you can surround yourself with a 2-meter-radius emanation of silence, such that those within the emanation can converse normally, yet no one outside can hear your voices (a successful Spot check to read lips can reveal what's said inside the area) or any other noises from within, including language-dependent or sonic spell effects. This effect is centered on you and moves with you. Anyone who enters the area immediately becomes subject to the spell effect, and those who leave are no longer affected.

Spirit Lore

You can communicate with the dead.

Base DC 30.

Component: Focus; Range: 5 ft.; Target: The Spirit World; Duration: 1 round; Saving Throw: Will negates (see text);

Spell Resistance: No.

Base Effect

You contact the spirits of the dead and ask a question that can be answered by "yes," "no," or other brief responses. The corpse always answers honestly; in cases where a one-word answer would be misleading, a short phrase (five words or less) may be given as an answer instead. "Unclear" and "I don't know" are legitimate answers, because the dead are not omniscient. Spirits contacted in this manner are able to structure their answers to further their own purposes and to suit their own personalities; the answers they give are true, but not necessarily the whole truth. You must ask the question within 1 round of casting, otherwise the effect is wasted. The corpse gets a Mind+Level save to resist the spell effect.

Augmented Effects

You can apply the following augmentations to Spirit Lore: Area/Target, Components, Duration, Range.

You may ask additional questions. Each question beyond the first increases the Magical Attack DC by +10. If a question is asked a second time with subtle differences, the answer is likely to be repetitive. If you lag, discuss the answers, or go off to do anything else, the spell effect ends.

Water Lore

You can squeeze water from the air.

Base DC: 15

Component: Verbal; Range: 10 ft.; Effect: 4 liters of water; Duration: Instantaneous (or 1 round for all augmented effects); Saving Throw: None; Spell Resistance: No.

Base Effect

You draw wholesome, drinkable water, just like clean rainwater, from the atmosphere. You cannot create water within a creature; you may create it in a container or over a large area, creating rain, if desired. Water weighs 1 kilogram per liter. One cubic meter of water contains 1,000 liters.

Augmented Effects

You can apply the following augmentations to Water Lore: Area/Target, Components, Range.

You can create additional water at a rate of 2 liters for every +1 added to the Magical Attack DC.

You can cause the water created to form a misty vapor in a 2-meter radius centered on you. It is stationary once created. The vapor obscures all sight beyond 2 meters. A creature within 2 meters has concealment (attacks have a 20% miss chance). Creatures farther away have total concealment (50% miss chance, and the attacker cannot use sight to locate the target). A light wind (17+ kph) disperses the fog in 4 rounds. A strong wind (33+ mph) disperses the fog in 1 round. A Create Energy (fire) effect burns away the fog in the explosive or fiery spell's area. This effect does not function underwater. This effect increases the spell effect's Magical Attack DC by +5. You can expand the area from personal to a cloud through the normal rules for augmentation.

You can cause water or similar liquid to reduce its depth by as much as 1 meter per Magical Attack DC increase of +10 (to a minimum depth of 3 cm). The water lowers within a square depression whose sides are up to caster level \times 4 meters long. In extremely large and deep bodies of water, such as a deep ocean, the spell creates a whirlpool that sweeps ships and similar craft downward, putting them at risk and rendering them unable to leave by normal movement for the duration of the spell. When cast on water-based creatures, this spell causes a slowing effect.

You can cause water or similar liquid to rise in height, just as above. Boats raised in this way slide down the sides of the hump that the spell creates. If the area affected by the spell includes riverbanks, a beach, or other land nearby, the water can spill over onto dry land.

With either version, you may reduce one horizontal dimension by half and double the other horizontal dimension.

Microlite20 Tactical System

by Corvus

I have thought a long time about a system for tactical movement, that doesn't need any miniatures or tile maps nor is too simplistic to be of no tactical importance. Thus I came up with my own system. To make the things clear beforehand, this is not truly in the spirit of M20, as it adds rules to the game that aren't absolutely essential but may be exactly that what enables M20 to be the base for a more sophisticated game (or serve as a base for a Microlite 4E).

What is needed (ruleswise):

- A "speed" rating, that corresponds to the real movement rate of a combatant and that is on same scale as other abilities that are used to make checks in this system. For M20 this is something along the lines of a +2 to +6 bonus to a check.
- A distinction between movement-related and non-movement-related actions. To put it into D&D terms: Standard and Movement actions. Every combatant is entitled to one of each during his combat turn.
- A way to determine how many pieces of cover and higher ground are available. Usually this is set by the Game Master.
- A distinction between melee and ranged weapons.

What gaming materials are needed?

While I have been trying to reduce the amount of materials needed, it is feasible to use some tokens for

- cover and higher ground (just to know how many of each are available)
- combat advantages (explained later)
- (only if you like) for the players and the enemies (e.g. chess pieces)

What is the basic idea behind it?

The basic idea behind making the tactical movement abstract is that there are only few positions in combat that make a difference for the combatant from a tactical point of view. Thus this system only looks at potentially interesting positions in combat, while the rest is simply ignored. Furthermore, it is assumed that all combatants are constantly moving around, while the general distance between them stays roughly the same. As it stands now, the price for this abstraction is that it becomes hard to explain why a combatant can move across the whole battlefield in one turn.

What are those "tactically important positions"?

This movement system distinguishes between four "tactically important positions": *engaged* in melee, *disengaged*, behind *cover* and on *higher ground*. Everything else is of no further interest. The following table gives a short summary of the advantages of each position.

Position	Advantage(s)
<i>engaged</i> :	able to (be) attack(ed by) enemies with melee weapons; Line of Sight only to other combatants in the same combat.
<i>disengaged</i> :	able to (be) attack(ed by) enemies with ranged weapons; Line of Sight to all other combatants not behind cover.

cover: +4 AC, Line of Sight only to allies

higher ground: +4 AC vs ranged attacks, +4 on ranged attacks, Line of Sight to everyone not behind cover (and vice versa)

How does it work?

Combat time is divided into rounds, each round representing 6 seconds of time passing in the game world. During each combat round, every combatant gets one turn, during that he can take one *movement* and one *standard* action. When all combatants have taken their turns, a new round begins.

Some movement actions require a speed check. The DC for this check is given in the figure "DC".

Unless determined otherwise by the DM, all combatants begin the combat *disengaged*.

Movement Actions:

Move:

You move around the battlefield, trying to reach your destination as fast as possible.

~~+4 bonus on your next speed check.~~ You receive 2 movement tokens.

Engage:

DC: 10 + the speed of enemy you are trying to engage

You charge into battle, facing your foe in bloody hand-to-hand combat.

Success: you are now engaged in melee combat with the target. This enables you to make attacks against the target with melee weapons.

Failure: you become *disengaged* and receive one movement token.

Disengage:

DC: 10 + the speed of enemy with the lowest speed score you are in combat with + 1 for every enemy after the first

You retreat from combat, getting some distance between you and the enemy's weapons.

Success: you are now disengaged. If there is any unoccupied cover or higher ground, you may move to that location. You lose all combat advantage tokens.

Failure: you stay in the combat and up to three enemies in the same combat get to make a free attack against you. You get one movement token.

Tactical Movement:

DC: 10 + the speed of enemy with the lowest speed score you are in combat with + 1 for every enemy after the first or see text

You try to get into a position that grants you an advantage over your enemy.

Success: you gain one *combat advantage token* if you are in combat. If you are not in combat, you may move behind cover (DC 12) or onto higher ground (DC 15).

Failure: you lose one *combat advantage token*. If you were trying to move behind cover or onto higher ground you stay in current position become *disengaged*.

Special Movement:

You mount or dismount a animal or vehicle or ascend/descend to/from aerial combat

Standard Actions:

Attack:

Make an attack against an enemy within your weapon's range. If you engaged during this round, you can only attack the enemy you just engaged. While in a combat you can only make melee attacks against enemies in the combat you are in. Ranged attacks can only be targeted against combatants that are not in the same combat as you are and that you have line of sight to.

Combat Maneuver:

Make an attack roll against an enemy. Instead of dealing damage you gain two combat advantage tokens. If you are using a ranged weapon for a combat maneuver you only gain one combat advantage token in case of a success.

Special rules:

Cover: if a combatant behind cover is engaged, he gets to make a free attack against the attacker (but only once during that round). After that turn, that combat is considered a normal combat and provides no cover bonuses to anyone, until that location has been left. A combatant can get line of sight to all other combatants not behind full cover (and vice versa) by not fully using the cover (*half cover*). At the beginning of a turn or when getting behind cover initially, the combatant has to announce in which way he uses the cover. While using only *half cover* the AC bonus is reduced to +2.

Combat Advantage Tokens: a combatant can spend a combat advantage token before he makes an attack roll in order to get a +2 bonus on that roll. A token can also be spent before an enemy makes an attack roll in order to receive a +2 AC bonus against that attack.

Movement Tokens: when making a speed check for a movement action, a combatant receives a +2 bonus to that check for every movement token he has. If the check is successful, that combatant loses all movement tokens.

Mounted Combatants: Mounted combatants use the speed of their mount for all movement. Mount and rider always move at the same time, as long as they are unseparated. A mount is treated as a normal combatant in all other respects.

Airborne Combatants: as long as an airborne combatant is in the air, he is considered to be on higher ground and can only be engaged by other flying combatants. An airborne combatant engaging an enemy on the ground automatically disengages at the beginning of his next turn.

Table: Line of Sight

Position	Can see	Can be seen by
<i>engaged</i>	enemies not on higher ground or behind full/half cover; allies behind full cover	enemies not behind full cover; allies behind full cover.
<i>disengaged or behind half cover</i>	enemies not behind full cover; allies behind full cover.	enemies not behind full cover; allies behind full cover.
<i>behind full cover</i>	allies only	allies only
<i>on higher ground</i>	enemies not behind full cover; allies behind full cover.	everybody, except enemies behind full cover.

Class Combat Advantages:

Every class gets a unique way to spend a combat advantage token.

Fighters: after a successful attack roll you may spend a combat advantage token to receive a +4 bonus to the damage roll.

Rogues: before making a speed check, you may spend a combat advantage token to receive a +4 bonus to that check.

Magi: you can spend any amount of combat advantage tokens as a standard action in order to deal 2 points of damage per token spent to a combatant that you have line of sight to.

Clerics: you can spend any amount of combat advantage tokens as a standard action in order to heal a combatant you have line of sight to for 2 points per token spent. You cannot use this ability on yourself.

MICROLITE20 COMPANION RULES

Welcome to the Microlite20 Companion rules. In this document you will find even more fun, optional goodies for your Microlite gaming!

Races

Goblins get a +4 to DEX, and a -2 to MIND

Half-ogres get a +6 to STR, and a -2 to MIND

Pixies get a -6 to STR, and a +4 to DEX

Classes

Assassins wear light armor and don't use shields. They have a +2 bonus to Physical and a +2 bonus to Subterfuge. Assassins can sneak attack like Rogues. However, if they can study their target for three rounds before making a successful sneak attack, the target must make a STR + Physical save or die. If the target succeeds at the save, the damage is applied to his STR. The Assassin may take other actions as long as his attention remains on his target.

Barbarians wear light or medium armor and use shields. They have a +2 bonus to Physical and a +2 bonus to Survival. Barbarians are primarily known for their rages. When a barbarian rages, he gains a +2 bonus to his melee attacks and 2 additional hit points per level. However, when enraged, a barbarian has a -2 penalty to his armor class. Barbarians may rage once per level per day and the rage lasts until the end of the encounter.

Cavaliers wear any type of armor and use shields. They have a +2 bonus to Physical and a +2 bonus to Communication. Cavaliers are mounted warriors and as such they get a +2 bonus to their melee attacks and a +2 bonus to damage when using the following weapons from horseback: light hammer, handaxe, light mace, light pick, scimitar, lance, and spear.

Warlocks wear light armor and may not use shields. They have a +2 bonus to Subterfuge and a +2 bonus to Knowledge. While they are spellcasters, they, or an ancestor, made a pact with an otherworldly being. That pact allows them to use invocations that increase in power as the warlock progresses. Invocations come in three types: least, lesser, and greater. Least invocations cost 3hp to cast and are available at 1st level, lesser invocations cost 6 hp and are available at 6th level, and greater invocations cost 9hp and are available at 11th level. Also at 1st level, the warlock receives the ability to cast an eldritch blast with a range of 60 feet that does 1d6 points of damage. At 6th level the damage increases to 3d6, and at 11th level it increases to 5d6.

Rules

Attribute Increases

In the Microlite20 Core Rules, starting at third level characters can increase an attribute by 1. This could lead to players increasing their character's attributes to outrageous extremes. The suggested solution to this is to cap the increase at the character's race's maximum. For example, elves have a maximum Mind of 20, therefore an elf can only increase his Mind attribute to 20.

Critical Hits

Here is an alternate way to handle critical hits. When a character is hit with a natural 20 or when his hit point total reaches zero, any damage is applied directly to the character's Strength. Be advised, this will make the game far more deadly especially at lower levels.

Dual-classing

Game masters may wish to allow characters to function in two classes, IE Fighter/Mage, or Rogue/Illusionist. If so, just use common sense when deciding which classes could dual-class. However, it will take 15 experience points per level to advance instead of 10.

Mounted Combat

As noted above, Cavaliers are specialists in mounted combat. However, any character can fight from horseback. A few things to keep in mind are that two-handed weapons, longbows, and heavy crossbows cannot be used mounted. Non-Cavaliers attempting to fight mounted have a -2 penalty to their attack rolls. Characters who are dual-classed as Cavaliers fight as Cavaliers when mounted.

Warlock Invocations

Least Invocations

Beguiling Influence: Gain a +2 bonus on Subterfuge checks.

Dark One's Luck: Gain a +2 bonus on your next save.

Devil's Sight: See normally in darkness or magical darkness.

Leaps and Bounds: Gain a +2 bonus on Physical checks.

Miasmic Cloud: Create a cloud of mist that grants concealment and fatigues those who enter.

See the Unseen: Gain *true seeing* as the spell.

Spiderwalk: Gain *spider climb* as the spell and you are immune to webs.

Summon Swarm: Gain *summon swarm* as the spell.

Lesser Invocations

Charm: Cause one creature to regard you as a friend.

The Dead Walk: Create undead as the spell *animate dead*.

Fell Flight: Use *fly* as the spell.

Flee the Scene: Use *dimension door* as the spell.

Hungry Darkness: Create shadows filled with a swarm of bats.

Voracious Dispelling: Use *dispel magic* as the spell, causing 1d8 damage to creatures whose effects are dispelled.

Walk Unseen: Use *invisibility* (self only) as the spell.

Greater Invocations

Chilling Tentacles: Use *black tentacles* as the spell, and does 1d6 cold damage to creatures in the area.

Enervating Shadow: Gain total concealment in dark areas and impose a -2 Strength penalty on adjacent living creatures.

Tenacious Plague: Use *insect plague* as the spell, but the summoned locust swarm deals damage as a magic weapon.

Wall of Perilous Flame: Create a *wall of flame* as the spell.

MICROCOSMOLOGY20

By Roberto Kingsley

The ordinary world of elves and men are not the only ones that exist. Experienced adventurers and wise sages know that there are other worlds out there – places brimming with adventures that common folk can hardly dream of. These are the lands that exotic creatures like elementals or angels come from, and where gods make their homes. There are many possible planar cosmologies, and the GM should choose one that fits their campaign. A sample cosmology, which the GM is free to expand or ignore and guidelines to go with it are presented below.

PLANAR PHYSICS

Planes are assumed to have similar physical properties (i.e. breathable air, normal gravity, time moves at the same rate, etc.) to the mortal world (or Prime) unless otherwise stated. Every plane has two major properties that describe their conditions: terrain type and physical traits. Terrain type describes the predominant terrain in the plane (i.e. desert, jungle, mountain, etc.). Other terrain types still occur, but with less frequency. Physical traits are where the plane's local physics differ from those of the Prime. Physical traits are most often presented as spells from the SRD and intervals of time. This is meant to describe how often that spell effect affects travelers on the plane. (The caster level for spells is the minimum required to cast the spell unless otherwise stated. For save DC's assume the ability score of the caster is 10+spell level.)

As an optional rule, the effective caster level of certain spells cast on a plane may be increased or decreased by one. For example, on the plane of water, water-related spells would be at +1 to effective caster level, and fire-related spells might be cast at -1 to effective caster level.

Natives to a plane are assumed to be able to survive local conditions, even if they are from a race or species that would normally have trouble surviving on that plane.

TRAVELING THE PLANES

Aside from high level magic, there are a few ways travel from plane to plane. A GM should decide how common they want travelling the planes to be, and place travel methods based on that.

- Portals: Doorways from plane to plane. Sometimes some sort of “key” is needed, which could be an actual key, or some sort of special action, circumstance or object.
- Planar Minglings: This is what happens when two planes get too close and start bleeding into each other. The traits of one plane might start to look like the traits of another plane. This can happen naturally, or as part of a terraforming plot that ends in a plane annexing the part of reality where the mingling occurred. While this option isn't technically travel, it is a way for the GM to make the planes the center of a plot on the Prime.
- The Wandering Inn of the Glorious Toad: An extraplanar inn, set randomly popping through the planes by an perpetually hungover toad god in the basement centuries ago. It can appear literally anywhere. An itinerary with the next three planes of call and estimated times of arrival and departure is on the wall behind the bar, and a silver bell next to it tolls an hour before the inn vanishes, and again five minutes beforehand.

- **Sails of Skysailing (200,000 gp):** When placed on an ordinary sailing vessel, these sails allow a ship piloted by a spellcaster to travel the cosmic byways to other planets and planes. Skysailing vessels have two speeds: cosmic and terrestrial. Cosmic speed is unimaginably fast, and can take you to another planet or plane in 2d20 days, and to another solar system in 2d20 weeks. Terrestrial speed is the same as the ship's speed in water with good wind. Any vessel that comes close to another vessel or any large mass is forced into terrestrial speed. (This means that piracy and similar plots are common on the cosmic byways.)
- **Cubic Gate (164,000 gp):** A cubic gate is a small cube carved from cornelian whose sides are attuned six different planes (including the Prime.) Pressing a side once opens a portal (only one at a time) to a random location on that plane (through which natives might come through if left open. 10% chance/minute.) Pressing a side twice transports the wielder and all adjacent creatures to a random location on that plane.

SAMPLE COSMOLOGY

In this cosmology there are six planes besides the Prime. The four elemental planes and the plane of positive energy (or aether) and plane of negative energy (or nether.) In this cosmology, good- and lawful neutral-aligned entities come from the plane of positive energy (which also doubles as the astral plane, the plane in which all other planes exist), and evil- and chaotic neutral-aligned entities come from the plane of negative energy (which also doubles as the plane of shadow and ethereal plane.) True neutral entities exist on every plane.

In addition to these major planes (which are infinite in size), there are also minor planes called demiplanes which are finite in size, and exist as pocket planes within the other planes (especially in the aether and nether.) Demiplanes are a chance for the GM to be creative and make fantasy adventures in locations that wouldn't fit anywhere else.

<u>Plane of Fire</u> Terrain: Desert Physical Traits: Burning Hands (1/round)	<u>Plane of Water</u> Terrain: Ocean Physical Traits: -	<u>Plane of Earth</u> Terrain: Mountain Physical Traits: -
<u>Plane of Air</u> Terrain: Mountain Physical Traits: Fly (Constant)	<u>Plane of Positive Energy</u> Terrain: Forest Physical Traits: Cure Light Wounds (1/round), Restoration (1/hour), Heal (1/day), Cloudkill (1/minute spent at full hp on the plane)	<u>Plane of Negative Energy</u> Terrain: Tundra Physical Traits: Inflict Light Wounds (1/round), Enervation (1/hour)

SURVIVING THE PLANES

Some planes, like the plane of fire and negative energy above are somewhat hostile to planar travellers. Here are a few items that may help to survive the planes:

Ring of Native Shape (32,000 gp): This ring allows the user to take on the shape of a creature native to a plane. They get resist [element] 20, +2 natural armor, and darkvision 60 ft.

Elixir of Naturalization (500 gp): These potions are made for specific planes, and allow the drinker to survive for an hour on the plane they were made for.

Section 3:

Microlite20 Revised

This section has the latest draft of Seth Drebitko's *Microlite20 Revised*. Seth has been working on a revision of *Microlite20* since he took over the game in 2010. While it is still a work in progress, the current draft at the time of publication of this volume is quite playable. Note that *Microlite20 Revised* is not necessarily 100% compatible with everything published for the original *Microlite20*.

Microlite20 Revised

Written by: Seth Drebitko

Intro

Microlite20 Revised is an update of the original rules lite rpg. Classic d20 gaming has been distilled down to a simple fast game.

Where Next?

Join our [Epic Mailing List](#) to receive updates as this document changes. Subscribers will also get Setting-Specific M20 bundles—a group of rules tailored to specific settings, just for you.

Additionally, the [Microlite20.net](#) site has articles and a community forum to help kick start your gaming.

How to help!

The easiest ways to help support M20 is sharing and playing the game and participating in the community. We're making an effort to improve Microlite20 over time and community interaction is key to that.

Aside from community interaction you can help support M20 as a patron at [Microlite20.net/patron](#) and get some sweet perks!

Character Creation

Each player will create a character whose persona they will assume through the game. The very first thing you will want to do is discuss with the Game Master (GM) the optional rules (if any) that your group will be using. While the focus of the game concept stage of things was to clarify the general environment and situation that the game would be starting in, this stage of things will define the characters relation to that. This will be an opportunity for the GM to weave elements of the players background into the setting and plot.

While it is ok that not every detail about a character has to be known by every player, it is good to discuss the basics of characters together. By doing this you'll be able to make sure that a more cohesive party.

Character Creation is composed of four parts: Race, Class, Attributes, and Skills.

Attributes

Attributes represent the overall physical and mental qualities of an individual. They define the raw potential an individual has regardless of actual skill.

There are 3 Attributes:

- Strength (STR)
- Dexterity (DEX)
- Mind (MIND)

To assign Attributes roll 4d6 (four six-sided dice) and drop the lowest die. Total the remaining three dice and allocate to one of the Attributes; repeat for the remaining attributes.

Ex.

1. Roll 4d6.
2. Results 3, 2, 4, 6.
3. Drop the lowest value (2).
4. Add the remaining values $3 + 4 + 6 = 13$.
5. Assign this value to one of your Attributes (e.g., STR)
6. Repeat for the remaining Attributes (DEX, MIND)

Attribute Bonuses

Each attribute has a bonus associated that will be used to resolve actions in game. To determine each attributes bonus, do the following:

Attribute bonus = (Attribute - 10)/2, round down.

When performing calculations always round down.

Sub-Attributes

Certain Attributes a character has are represented as derivatives of various qualities they possess. The calculations to determine these are listed below.

- Hit Points (HP) = STR Attribute + 6
- Armor Class (AC) = DEX bonus + 10 + Modifiers from equipment or abilities.
- Melee attack bonus = STR bonus + Level
- Ranged attack bonus = DEX bonus + Level
- Magic attack bonus = MIND bonus + Level

Skills

While Attributes represent the natural aptitude of characters, Skills represent the training and knowledge you have gathered over time. Standard microlite20 uses 4 Skills to resolve actions.

- Physical
- Subterfuge
- Knowledge
- Communication

Skill rank = your Level + any bonus due to your class or race.

Races

Choosing a race provides some variety and flavor to characters' backgrounds, as well as mechanically defining it. Brief descriptions of races are given to spark ideas, but should not be taken as the required depiction.

Humans

Humans in fantasy settings tend to be populous; shortest lived (compared to the other races), unpredictable, and suspicious of other races.

- +1 to all skill rolls

Elves

Elves tend to be described as tall and slender with pointy ears; Elves have a strong affinity with Nature's fauna and flora. They are often depicted as long lived; sometimes thousands of years or even immortal.

Despite their long age they are usually presented as having very low birth rates, and typically in some sort of decline from a former glory.

- +2 MIND

Dwarves

The Dwarven are expert artisans in a variety of fields. Dwarves are frequently mistaken as short, stocky Humans. They are renowned for their elaborate and large beards (including their females). Typically depicted as having mountain and/or underground civilizations near the resources need for their crafts.

- +2 STR

Halflings

A short human like race, with no particularly distinguishing physical features: some fiction depicts them as having unusually hairy feet. Culturally they are commonly shown as either a close-knit farming culture or traveling gypsy folk.

- +2 DEX

Classes

Classes (like races) further define characters from each other. Your class will help guide some of the role that you fulfill in the group. Each player will choose one class that they start at level 1 in: unless otherwise decided by the group.

Fighters

The classic strong man of groups. Often these main line combatants will take on leadership roles within a party, acting to protect the more vulnerable members of their party.

- Wear any kind of armor and use shields.
- They have a +3 bonus to Physical
- Add +1 to all attack and damage rolls.
- This increases by +1 at 5th level and every five levels on

Rogues

Rogues while commonly thought of as brigands and cut purses, they are often the operators of groups as they commonly have the personal connections; often these connections are the result of payback for favors previously performed by the Rogue. Rogues tend to have technical skills that other characters may lack.

- Can use light armor.
- They have a +3 bonus to Subterfuge.
- If they successfully Sneak (usually Sub + DEX, but depends on situation) up on a foe they can add their Subterfuge rank to the damage of their first attack

Magi

You are a practitioner of magic. Typically, this involves study of the arcane arts, but in some settings you may merely be naturally gifted.

- Wear no armor.
- They have +3 bonus to Knowledge
- They can cast Magi Spells.

Clerics

Clerics wield power on behalf of some divine or spiritual force. Though the tenants of their faith may vary between traditions, it is common that adherence to a faith/spirituality is required to maintain power.

- Can wear light or medium armor.
- They have +3 bonus to Communication.
- They cast Divine Spells.
- Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Actions

When taking an action, the GM (Game Master) will determine a Difficulty Class (DC) based on how hard the task seems to be. If the player's skill roll is greater than that difficulty they succeed at the action. If an action seems trivial, or the stakes are not very high (or interesting) for the action it is sometimes better to just not roll.

Skill roll = d20 + Skill rank + Attribute bonus that is most + misc. modifiers

Difficulty (DC)	Example (Skill Used)
Average (10)	Hear an approaching guard
Tough (15)	Rig a wagon wheel to fall off
Challenging (20)	Swim in stormy water
Formidable (25)	Open an average lock
Heroic (30)	Leap across a 30-foot chasm
Nearly impossible (40)	Track a squad of orcs across hard ground after 24 hours of rainfall

Ex.

- *Climbing would use Physical + STR bonus.*
- *Dodging a falling rock is Physical + DEX bonus.*
- *Finding a trap is Subterfuge + MIND bonus.*
- *Disabling a trap is Subterfuge + DEX bonus.*

Hazards

Hazards typically represent some form of danger that an environment presents to the Player Characters (PCs). This could be a manufactured trap, or even natural environments. Generally, hazards should involve some kind of skill test for the characters to ignore (or mitigate to some degree) the effects of the hazard. The effects of a hazard can range from general effects (reduced speed, visibility etc.) or even potentially damaging.

Saving Throw

When characters come in danger that they must avoid (whether physical, mental or social) they may make a saving throw.

D20 + Attribute Bonus + 1/2 Level

Combat

Not every situation can be resolved peacefully. When physical conflict is necessary, it's time for combat. Combat has a specific set of steps that are narrated, in order, until the conflict is resolved. At the beginning of a combat players will determine initiative order and act per

- Initiative: roll d20+DEX bonus.

- If this results in a tie, the player with the highest base DEX breaks the tie.
- Players can do 1 thing on their turn
 - Move: a human can move about 30 ft. slowly in a round, or about 60 ft. at a running pace
 - Attack: described below
 - Cast Spell: described in the Magic section.
 - Perform a non-combat task
- When the last person acts if combat is continuing turn order starts again, otherwise normal play resumes.

Attacking

Characters attack similar to how they take actions:

- Choose appropriate attack bonus + 1d20 + misc. bonuses or negatives
 - Natural 20 is automatically a critical hit doing maximum damage
- If the total bonus is greater than the AC of the target your attack succeeds
 - Occasionally being touched by the source of the attack alone may be the goal. When this is the case the rules will refer to a Touch Attack, which ignores armor bonuses to AC

If the base attack bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10.

Ex. if the total bonus is +12, three attacks can be made at +12/+7/+2.

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon.

Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. In addition, they receive 1 additional attack that turn.

Damage

If an attack succeeds a character takes damage.

Determine Damage

- Melee damage = STR + weapon damage
 - STR x 2 for two handed weapons
- Ranged damage = weapon damage
 - Thrown weapons add users STR
- Subtract the damage from the victims HP
 - If HP reach 0, unconscious and near death

- Further damage directly reduces STR. If that reaches 0, death

It is important to remember that HP is an abstract narrative representation of a characters overall health. In cinematic terms imagine the gradual reduction of HP to represent the characters luck and stamina. Once real STR damage starts to be dealt this is probably the point where real damage will be described.

Keep this in mind when describing injury as it is unlikely that the failed save against a boulder trap or being stabbed with a sword half a dozen times would not phase a character. Instead describe how the character is tiring through the flurry of blows they are fighting off, or how or how they were not overtaken by a rockslide but knocked aside as they couldn't leap full out of the way.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all spells on their respective class lists.

Bending the fabric of reality is dangerous business, and thus costs HPs each time a spell is cast. The cost is: 1 + double the level of the spell being cast

Spell Level	HP Cost
0	1
1	3
2	5
3	7
4	9
5	11
6	13
7	15
8	17
9	19

This loss cannot be healed normally but is recovered after 8 hours rest. It is recommended that you remove the damage from the characters HP as normal, but also track the amount specifically spent on magic: this lets you know the maximum you can be healed.

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character. Select one 'signature' spell per spell level from 1st upward that they prefer to use over any other.

These spells are easier to cast due to familiarity, costing 1 less HP to use.

If a spell has no listed casting check required, it is assumed to automatically succeed. Additionally, some spells allow the target the chance to negate some or all the spells effect.

The Difficulty Class (DC) for all spells is 10 + Caster Level + Caster's MIND bonus.

Character Advancement

Equipment

Starting Wealth

The most common coin is the gold piece (gp). A gold piece is worth 10 silver pieces. Each silver piece is worth 10 copper pieces (cp). In addition to copper, silver, and gold coins there are also platinum pieces (pp), which are each worth 10 gp.

Exchange	cp	sp	gp	pp
Copper piece	1	1/10	1/100	1/1,000
Silver piece	10	1	1/10	1/100
Gold piece	100	10	1	1/10
Platinum piece	1,000	100	10	1

You begin with a certain amount of acquired wealth, determined by your character class.

Class	Amount
Fighter	150 gp
Rogue	125 gp
Mage	75 gp
Cleric	120 gp

The character uses this accumulated wealth to purchase his initial weapons, armor, and adventuring equipment, using the price lists on the tables below.

Weapons

Here is the format for weapon entries (given as column headings on the table below).

- **Cost:** this value is the price for purchasing the weapon. The cost includes miscellaneous gear that goes with the weapon.
- **Damage:** gives the damage dealt by the weapon on a successful hit.
- **Range increment:** Any attack at less than this distance is not penalized for range. However, each full range increment imposes a cumulative –2 penalty on the attack roll. A thrown weapon has a maximum range of five range increments. A projectile weapon can shoot out to ten range increments.

Two-Handed Weapons

Weapon	Cost (gp)	Damage	Range (ft.)
Chain, spiked	25	2d4	–
Falchion	75	1d6	–
Flail, heavy	15	1d8	–
Glaive	8	1d8	–
Great axe	20	1d10	–
Great club	5	1d8	–
Great sword	50	2d6	–
Guisarme	9	2d4	–
Halberd	10	1d10	–
Lance	10	1d8	–
Long spear	5	1d8	–
Quarterstaff	-	1d6	–
Scythe	18	2d4	–
Spear	2	1d8	20

Light Weapons

Weapon	Cost (gp)	Damage	Range (ft.)
Unarmed	-	1d3	–
Axe, throwing	8	1d6	10
Dagger	2	1d4	10
Hammer, light	1	1d6	20

Weapon	Cost (gp)	Damage	Range (ft.)
Hand axe	6	1d4	–
Mace, light	5	1d6	–
Pick, light	4	1d4	–
Sap	1	1d6	–
Sickle	6	1d6	–
Sword, short	10	1d6	–

One-Handed Weapons

Weapon	Cost (gp)	Damage	Range (ft.)
Battleaxe	10	1d8	–
Club	-	1d6	10
Flail	8	1d8	–
Long sword	15	1d8	–
Mace, heavy	12	1d8	–

Armor

Here is the format for armor entries (given as column headings on the table below).

- Cost: This value is the price for purchasing the armor.
- AC Bonus: The column gives the Armor Class bonus provided by the armor.

Light Armor

Armor	Cost (gp)	AC Bonus
Padded	2	+1
Leather	10	+2
Studded Leather	25	+3
Chain Shirt	100	+4

Medium Armor

Armor	Cost (gp)	AC Bonus
Hide	15	+3
Scale Mail	50	+4
Chainmail	150	+5

Breastplate	200	+5
-------------	-----	----

Heavy Armor

Armor	Cost (gp)	AC Bonus
Splint Mail	200	+6
Banded Mail	250	+6
Half-plate	600	+7
Full Plate	1,500	+8

Shields

Shields	Cost (gp)	AC Bonus
Buckler	15	+1
Shield, Light Wooden	3	+1
Shield, Light Steel	9	+1
Shield, Heavy Wooden	7	+2
Shield, Heavy Steel	20	+2
Tower	30	+4

Adventuring Gear

Back in the day, there were standard equipment packages, pre-compiled and pre-calculated, to help new players get started quickly. This document is inspired by those lists and provides a way for players to quickly equip his or her PC or a GM to equip an NPC or Hireling on the fly. Additionally, these optional kits can be used to give a starting point from which to customize new characters.

50 Gold Pieces each.

Choose a pack or roll 1d6 to select one randomly.

Pack A (1–2)	Pack B (4–5)	Pack C (5–6)
<ul style="list-style-type: none"> Backpack Bedroll Belt Pouch 2 sets of Caltrops Flint and Steel Lantern (hooded) 10 Oil Flasks Trail Rations (1 week) Shovel Signal Whistle Waterskin 	<ul style="list-style-type: none"> Backpack Bedroll Belt Pouch 10 pieces of Chalk Crowbar Flint and Steel Small Steel Mirror 4 Oil Flasks 10' Pole Trail Rations (1 week) 10 Torches 	<ul style="list-style-type: none"> Backpack Bedroll Belt Pouch Flint and Steel Grappling Hook 5 Oil Flasks 10' Pole Trail Rations (1 week) 50' Rope Tent 10 Torches

Class Spell Lists

Cleric Spells

0 – Level Spells: Orisons

Create Water

Range: 25 ft. + 5 ft./2 levels

Effects: creates 2 gallons/level of pure water. Water weighs about 8 pounds per gallon. One cubic foot of water contains roughly 8 gallons and weighs about 60 pounds

Guidance

Range: touch

Effects: +1 on one attack roll, saving throw, or skill check.

Duration: lasts for 1 min. or until discharged.

Light

Range: touch

Effect: object shines like a torch (about 20 ft. of full light and 20 extra dim ft. of light)

Duration: 10 min./level

Purify Food and Drink

Range: 10ft.

Effects: purifies 1 cu. ft./level of food or water.

Resistance

Range: touch

Effects: subject gains +1 on saving throws.

Duration: 1 minute.

Virtue

Range: touch

Effects: subject gains 1 temporary hp.

Duration: 1 minute.

1st – Level Spells

Bless

Range: 50 ft.

Effects: allies gain +1 on attack rolls and communication + MIND checks against fear

Duration: 1 min./level.

Bless Water

Range: touch

Effects: makes holy water.

Cure Light Wounds

Range: touch

Cures 1d8 damage +1/ level (max +5).

Divine Favor

Range: personal

Effect: you gain +1 per three levels (max +3) on attack and damage rolls.

Duration: 1 minute.

Magic Stone

Range: touch

Effects: three stones gain +1 on attack, deal 1d6 +1 damage.

Duration: lasts for 30 minutes or until discharged.

Shield of Faith

Range: touch

Effects: aura grants +2 or higher AC bonus.

Duration: 1 min./level.

2nd – Level Spells

Aid

Range: touch

Effects: +1 on attack rolls and saves against fear, 1d8 temporary hp +1/level (max +10).

Duration: 1 min./level.

Cure Moderate Wounds

Range: touch

Effects: cures 2d8 damage +1/level (max +10).

Delay Poison

Range: touch

Effects: stops poison from harming subject.

Duration: 1 hour/level

Gentle Repose

Range: touch

Effects: preserves one corpse.

Duration: 1 day/level

Remove Paralysis

Range: 25 ft. + 5 ft./2 levels

Effects: frees up to 4 targets from paralysis or slow effect.

Restoration, Lesser

Range: touch

Effects: dispels magical ability penalty or repairs 1d4 ability damage.

3rd – Level Spells

Create Food and Water

Range: 25 ft. + 5 ft./2 levels

Effects: feeds three humans (or one horse)/ level. The food is fairly bland and generally unappealing.

Duration: food only remains good for 24 hours before perishing.

Cure Serious Wounds

Range: touch

Effects: Cures 3d8 damage +1/level (max +15).

Prayer

Range: 40 ft. radius centered on casting

Effects: allies get a +1 bonus on most rolls, enemies take a –1 penalty

Duration: 1 round/level.

Remove Disease

Range: touch

Effects: cures all diseases affecting subject.

Searing Light

Range: 100 ft. + 10 ft./level

Effects: Ray deals 1d8/two levels damage, or 1d8/level against undead.

Speak with Dead

Range: 10 ft.

Effects: corpse answers one question/two levels.

Duration: lasts for 1 min./level.

4th – Level Spells

Cure Critical Wounds

Range: touch

Effects: Cures 4d8 damage +1/level (max +20).

Discern Lies

Range: 25 ft. + 5 ft./2 levels

Effects: reveals deliberate falsehoods of 1 target/ 2 levels

Duration: concentration, up to 1 round/level

Saving Throw: MIND + level negates

Freedom of Movement

Range: personal or touch

Effects: subject moves normally despite impediments

Duration: 10 min./level

Neutralize Poison

Range: touch

Effects: immunizes subject against poison

Duration: 10 min./level

Restoration

Range: touch

Effects: dispels magical ability penalty or repairs 1d4 permanent ability damage, and 1 negative level. Any temporary ability damage is completely restored.

Tongues

Range: touch

Effects: speak any language

Duration: 10 min./level

5th – Level Spells

Atonement

Range: touch

Effects: removes burden of misdeeds from subject.

Commune

Range: Personal

Effects: ask yes/no question of other planar entity, 1 question/caster level. Chance of correct answer 5%/caster level, maximum 95%.

Duration: concentration trance

Cure Light Wounds, Mass

Range: 25 ft. + 5 ft./2 levels, 1 target per 2 levels

Effects: cures 1d8 damage +1/ level

Flame Strike

Range: 100 ft. + 10 ft./level, 10-ft. radius, 40 ft. high

Effects: Smite foes with divine re (1d6/level damage).

Saving Throw: can attempt to dodge for half damage

Raise Dead

Range: touch

Effects: restores life to subject who died as long as one day/level ago.

True Seeing

Range: touch

Effects: lets you see all things as they really are

Duration: 1 min./level

6th – Level Spells

Banishment

Range: 25 ft. + 5 ft./2 levels

Effects: banishes 2 HD/level of extra planar creatures.

Saving Throw: MIND negates

Cure Moderate Wounds, Mass

Range: 25 ft. + 5 ft./2 levels, 1 target per 2 levels

Harm

Range: touch

Effects: deals 10 points/level damage to target.

Saving Throw: MIND + level for half damage

Heal

Range: Touch

Effects: cures 10 points/level of damage, all diseases and mental conditions. Also clears ability damage, and conditions like temporary blindness and poison.

Heroes' Feast

Range: 25 ft. + 5 ft./2 levels

Effects: food for one creature/level cures disease and grants +1 combat bonus

Duration: the food spoils after an hour. All bonuses from the food last 12 hours.

Quest

Range: 25 ft. + 5ft./level

Effects: commands any creature, binding it to a special task.

Duration: 1 day/level or until discharged

7th – Level Spells

Cure Serious Wounds, Mass

Range: 25 ft. + 5 ft./2 levels, 1 target per 2 levels

Effects: cures 3d8 damage +1/ level

Destruction

Range: 25 ft. + 5 ft./2 levels

Effects: kills subject and destroys remains.

Saving Throw: STR + level save to take only 10d6 damage

Ethereal Jaunt

Range: personal

Effects: you become ethereal until the end of the spell. Ethereal beings are invisible and can pass through solid objects, but force energy effects still affect them.

Duration: 1 round/level

Regenerate

Range: touch

Effects: subject's severed limbs grow back, cures 4d8 damage +1/level

Restoration, Greater

Range: touch

Effects: dispels magical ability penalty or repairs 1d4 permanent ability damage, and all negative levels. Any temporary ability score damage is completely restored.

Resurrection

Range: touch

Effects: fully restores a dead subject from a small portion of the corpse, with 1 negative level.

8th – Level Spells

Antimagic Field

Range: 10 ft area around caster

Effects: negates magic within field

Duration: 10 min./ level

Cure Critical Wounds, Mass

Range: 25 ft. + 5 ft./2 levels, 1 target per 2 levels

Effects: Cures 4d8 damage +1/ level

Dimensional Lock

Range: 100 ft. + 10 ft./level in 20ft radius

Effects: teleportation and inter planar travel blocked

Duration: one day/level

Discern Location

Range: unlimited

Effects: reveals exact location of creature or object. To find a creature with the spell, you must have seen the creature or have some item that once belonged to it. To find an object, you must have touched it at least once.

Fire Storm

Range: 100 ft. + 10 ft./level, two 10-ft. cubes per level

Effects: deals 1d6/level fire damage.

Saving Throw: those caught in the area can try to dodge for half damage

Holy Aura

Range: one creature/level in a 20-ft.-radius burst centered on you

Effects: +4 to AC, +4 bonus to saves

9th – Level Spells

Astral Projection

Range: personal plus 1 touched target/2 levels

Effects: you and willing targets enter a comatose state and project your spirit forms to another plane. If you discharge the spell and your allies are not with you in astral form you abandon them in that state.

Duration: until disenchanting.

Etherealness

Range: personal

Effects: you become ethereal until the end of the spell. Ethereal beings are invisible and can pass through solid objects, but force energy effects still affect them.

Duration: 1 minute/level

Gate

Range: 100 ft. + 10 ft./level

Effect: Connects two planes for travel or summoning

Duration: concentration for up to 1 round/level

Heal, Mass

Range: 25 ft. + 5 ft./2 levels, 30 ft radius

Effects: heals creatures in the area 250 hp

Implosion

Range: 25 ft. + 5 ft./2 levels

Effects: kills one creature/round

Duration: 4 rounds or until concentration ends.

Saving Throw: STR + level negates.

Soul Bind

Range: 25 ft. + 5 ft./2 levels

Effects: traps newly dead soul to prevent resurrection.

Magi Spells

0 – Level Spells: Cantrips

Arcane Mark

Range: touch

Effect: inscribes a permanent personal rune (visible or invisible).

Duration: permanent

Detect Magic

Range: 60 ft

Effect: detects spells and magic items.

Duration: 1 min./level or until concentration ends.

Ghost Sound

Range: 25 ft. + ft./2 levels

Effect: illusionary sounds.

Duration: 1 round/level

Light

Range: touch

Effect: object shines like a torch (about 20 ft. of full light and 20 extra dim ft. of light)

Duration: 10 min./level

Mage Hand

Range: 25 ft. + 5 ft./2 levels

Effect: 5-pound telekinesis.

Duration: lasts until concentration ends.

Prestidigitation

Range: 10 ft.

Effects: can perform minor business tricks for the duration of the spell.

Duration: 1 hour

Read Magic

Range: caster

Effects: read scrolls and spell books

Duration: 10 min./level.

1st – Level Spells

Feather Fall

Range: 25 ft. + 5 ft./2 levels

Effects: objects or creatures fall slowly

Duration: 1 round/level or until landing

Floating Disk

Range: 25 ft. + 5 ft./2 levels

Effect: creates 3-ft.-diameter horizontal disk that holds 100 lb./level.

Duration: lasts for 1 hour/level.

Mage Armor

Range: touch

Effects: gives subject +4 armor bonus.

Duration: 1 hour/level.

Magic Missile

Range: 100 ft. + 10 ft./level

Effects: 1d4+1 damage; +1 missile per two levels above 1st (max 5). No saves or attack rolls required.

Shocking Grasp

Range: touch Attack (+3 if opponent wearing conductive armor)

Effects: touch delivers 1d6/ level electricity damage (max 5d6).

Sleep

Range: 100 ft. + 10 ft./level, 10 ft radius.

Effects: puts 4 HD of creatures into magical slumber.

Duration: 1 min./level.

Saving Throw: mentally negate the compulsion.

2nd – Level Spells

Acid Arrow

Range: touch attack, 400 ft. + 40 ft./level

Effects: 2d4 damage

Duration: 1 round +1 round/three levels.

Flaming Sphere

Range: 100 ft. + 10 ft./level

Effects: creates 5 ft. rolling ball of fire that the average person running could avoid, deals 2d6 damage upon touch.

Duration: lasts 1 round/level.

Saving Throw: level + DEX to move out of the spheres way.

Invisibility

Range: touch

Effects: subject is invisible, but attacking drops invisibility

Duration: 1 min./level or until it attacks.

Knock

Range: 100 ft. + 10 ft./level

Effects: opens locked or magically sealed locks.

Levitate

Range: 25 ft. + 5 ft./2 levels

Effects: subject moves up and down at your direction at a slow walking pace.

Duration: 1 min./level.

Spider Climb

Range: touch

Effects: grants ability to walk on walls and ceilings at a slow walking pace.

Duration: 10 min./level

3rd – Level Spells

Clairaudience/Clairvoyance

Range: 400 ft. + 40 ft./level

Effects: hear or see a known place at a distance. The more familiar you are the more clear the scene appears. You are unaware of your surrounding during the process.

Duration: 1 min./level, or until concentration ends.

Dispel Magic

Range: 100 ft. + 10 ft./level, 20 ft. radius.

Effects: cancels magical spells and effects. Make a magic attack roll, with the DC being equal to 11 + target spell level

Fireball

Range: 400 ft. + 40 ft./level, 20 ft. radius

Effects: 1d6 damage per level

Saving Throw: the spell can be dodged to avoid half the explosions damage.

Fly

Range: touch

Effects: subject flies at speed of 60 ft.

Duration: 1 min./level

Lightning Bolt

Range: 120 ft

Effects: electricity deals 1d6/level damage.

Saving Throw: targets can try to dodge out of the way for half damage.

Vampiric Touch

Range: touch attack

Effects: deals 1d6/two levels damage; caster gains damage as hp which last for 1 hour.

4th – Level Spells

Animate Dead

Range: touch

Effects: creates level X2 HD of undead skeletons or zombies. You can control only 4 HD worth of undead creatures per caster level.

Arcane Eye

Range: sight (unlimited distance after casting)

Effects: invisible floating eye moves 30 ft./round and relays visual information to caster. Can only be moved or seen through while the caster fully concentrates.

Duration: 1 min./level.

Black Tentacles

Range: 100 ft. + 10 ft./level

Effects: tentacles grapple all within 20 ft. area. Targets take 1d6+4 crushing damage each turn.

Duration: 1 round/level.

Saving Throw: each round Target Melee Attack vs Casters magic attack to escape.

Dimension Door

Range: 400 ft. + 40 ft./level

Effects: you and one additional willing Medium or smaller creature (carrying gear or objects up to its maximum load) or its equivalent per three caster levels.

Polymorph

Range: touch

Effects: you change the willing subject into another form of living creature. The assumed form can't have more Hit Dice than your caster level (or the subject's HD, whichever is lower), to a maximum of 15 HD at 15th level.

Duration: 1 min./level

Stoneskin

Range: touch

Ignore 10 points of damage per attack.

Duration: 10 min./level or until discharged.

5th – Level Spells

Cloudkill

Range: 100 ft. + 10 ft./level

Effects: cloud spreads in 20-ft. radius, 20 ft. high that drifts in the wind. Kills anything with less than 5 HD,

stronger creatures may be poisoned. Otherwise, it is obscures like a thick fog.

Duration: 1 min./level

Saving Throw: targets of more than 5 HD make a STR + Level saving throw. If they fail they take 1d4 STR damage directly per turn in the cloud.

Contact Other Plane

Range: personal

Effects: ask yes/no question of other planar entity, 1 question/caster level. Chance of correct answer 5%/caster level, maximum 95%.

Duration: concentration trance

Feeblemind

Range: 100 ft. + 10 ft./level

Effects: subject's MIND score drops to 1.

Duration: until dispelled

Saving Throw: MIND + level negates

Passwall

Range: touch

Effects: 5 ft. by 8 ft. opening, 10 ft. deep plus 5 ft. deep per three additional levels

Duration: 1 hour/level

Permanency

Range: equals the spell being made permanent

Effects: this spell makes the effect of another spell permanent -- unless a Magic-user of twice the caster's level dispels it. No more than one permanency is ordinarily possible on any one object, and no more than two upon a creature. GM discretion required: many spells should not be subject to being made permanent.

Teleport

Range: self, 100 miles/level

Effects: instantly transports you to a location you know exactly.

6th – Level Spells

Antimagic Field

Range: 10 ft area around caster

Effects: negates magic within field

Duration: 10 min./ level

Chain Lightning

Range: 400 ft. + 40 ft./level

Effects: 1d6/level damage; 1 secondary bolt/level each deals half damage to target(s) within 30ft.

Saving Throw: targets can try to dodge out of the way for half damage.

Contingency

Range: personal

Effects: Sets trigger condition for another spell.

Duration: 1 day/level or until discharged.

Cure Moderate Wounds, Mass

Range: 25 ft. + 5 ft./2 levels, 1 target per 2 levels

Effects: Cures 2d8 damage +1/ level

Disintegrate

Range: 100 ft. + 10 ft./level, requires ranged touch attack.

Effects: destroys one creature or object.

Saving Throw: target can make STR + level save to take only 2d6/level damage

Geas

Range: 25 ft. + 5ft./level

Effects: commands any creature, binding it to a special task.

Duration: 1 day/level or until discharged

Saving Throw: Mind + level to negate

True Seeing

Range: touch

Effects: lets you see all things as they really are

Duration: 1 min./level.

7th – Level Spells

Delayed Blast Fireball

Range: 400 ft. + 40 ft./level, 20 ft. radius

Effects: 1d6 damage per level

Duration: postpone spell for 5 rounds, or until dismissed

Saving Throw: the spell can be dodged to avoid half the explosions damage.

Ethereal Jaunt

Range: personal

Effects: you become ethereal until the end of the spell. Ethereal beings are invisible and can pass through solid objects, but force energy effects still affect them.

Duration: 1 round/level

Finger of Death

Range: 25 ft. + 5 ft./2 levels

Effects: kills one subject.

Saving Throw: STR + level to avoid death and take only 3d6 + 1/level damage.

Plane Shift

Range: touch

Effects: as many as eight subjects travel to another plane.

Power Word Blind

Range: 25 ft. + 5 ft./2 level

Effects: blinds creature with 200 hp

Duration: 1d4+1 minutes (permanent if creature has less than 50 hp)

Spell Turning

Range: personal

Effects: reflect 1d4+6 spell levels back at caster. If the roll does not exceed the spell level then the total rolled is added as a bonus against the spells DC.

Duration: 10 min./level or until expended.

8th – Level Spells

Clone

Range: touch

Effects: over 2d4 months a duplicate is grown that awakens when original dies.

Horrid Wilting

Range: personal 30 ft. Radius

Effects: deals 1d6/ level damage to everyone within the radius

Incendiary Cloud

Range: 100 ft. + 10 ft./level, cloud spreads in 20-ft. radius, 20 ft. high

Effects: 4d6 points of fire damage. Drifts 10ft per round with the wind. Full concentration allows the caster to move the cloud 60ft per round in any desired direction.

Duration: 1 round/level

Saving Throw: targets caught in the cloud can try to dodge the cloud taking only half damage.

Irresistible Dance

Range: touch

Effects: forces subject to dance for 1d4+1 rounds. The effect imposes a -4 penalty to Armor Class and a -10 penalty.

Duration: 1d4+1 rounds

Power Word Stun

Range: 25 ft. + 5 ft./2 levels

Effects: stuns characters with HP equal or below 150.

Duration: character's under 50 HP stunned for 4d4 rounds otherwise 2d4 rounds.

Trap the Soul

Range: 25 ft. + 5 ft./2 levels

Effects: trap the soul of a being in a gem.

Duration: permanent

Saving Throw: MIND + level to resist

9th – Level Spells

Astral Projection

Range: personal plus 1 touched target/2 levels

Effects: you and willing targets enter a comatose state and project your spirit forms to another plane. If you discharge the spell and your allies are not with you in astral form you abandon them in that state.

Duration: until disenchanting.

Etherealness

Range: personal

Effects: you become ethereal until the end of the spell. Ethereal beings are invisible and can pass through solid objects, but force energy effects still affect them.

Duration: 1 minute/level

Gate

Range: 100 ft. + 10 ft./level

Effect: Connects two planes for travel or summoning

Duration: concentration for up to 1 round/level

Meteor Swarm

Range: 400 ft. + 40 ft./level, 40-ft.-radius spreads per sphere

Effects: four exploding spheres each deal 6d6 fire damage.

Saving Throw: victims can try to dodge out of the way to reduce damage by half.

Power Word Kill

Range: 25 ft. + 5 ft./2 levels

Effects: kills one creature with 100 hp or less.

Soul Bind

Range: 25 ft. + 5 ft./2 levels

Effects: traps newly dead soul to prevent resurrection.

Hazards

Natural Hazards

Extreme Heat & Cold

If not wearing suitable protection, a character must make a Phys+STR check once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Falling Damage

A falling character takes 1d6 hp of damage per 10 feet fallen. If the character makes a successful Phys+DEX roll, he takes only half damage. The DC for the phys+DEX roll is equal to the depth fallen in feet.

In the event that the fall ends in an area laden with spikes or jagged rocks, add +1 hp of damage to falling damage per 10' fallen (with a maximum of +10 hp).

Electricity Damage

Jolt	Effects: -1d6 STR. Shakes	1d4
Low Voltage	Type: Contact DC: 13	2d6
Medium Voltage	Incubation: 1 day	4d6
High Voltage	Effects: -1d8 DEX.	8d6

Disease

Diseases are fantastically interesting, and incredibly unique across the spectrum. Preferably a single unified system shouldn't exist, and each disease will get addressed individually as needed. For simplicity sake a handful of generic disease have been given below for quick use.

- Name
- Type lists the disease's method of delivery (contact, inhaled, or injury).
- DC lists the phys + STR check DC needed to prevent infection.
- Incubation lists the time before damage begins.
- Effects lists the ability damage the character takes after incubation and each day afterward.

Cackle Fever

Type: Inhaled

DC: 16

Incubation: 1 day

Effects: -1d6 MIND.

Filth Fever

Type: Injury

DC: 12

Incubation: 1d3 days

Effects: -1d3 DEX and 1d3 STR.

Mind rake

Type: Inhaled

DC: 12

Incubation: 1 day

Effects: -1d4 MIND.

Red Ache

Type: Injury

DC: 15

Incubation: 1d3 days

Effects: -1d6 STR.
Shakes

Type: Contact
DC: 13

Incubation: 1 day

Effects: -1d8 DEX.
Shakes

Traps

Whether inside a dungeon or a nobleman's manor house, adventurers can often be hurt, or even killed, without ever encountering a monster of any kind, as many dungeons are filled with debilitating or lethal traps set to keep wayward hands off of fantastic treasures. Several typical traps of varying Encounter Levels are summarized below.

The entries for traps include the following information:

- Name
- Effect shows the traps attack bonus or type of effect.
- Attack: some traps launch projectiles or other direct action against the PCs. This value represents an attack value that is rolled against the victims AC.

- Save DC lists the phys+DEX check DC needed to either avoid the trap entirely, or to take only 1/2 the listed damage (if this is possible).
- Search DC lists the DC for a know+MIND check necessary to and the trap without triggering it.
- Disable DC lists the DC for the sub+DEX check necessary to disarm the trap safely.

Poison

Characters can possibly take damage from a weapon that has been poisoned, be attacked by a creature whose natural attacks feature poison, consume poison hidden in food or drink, or be poisoned in some other way.

The entries for poisons include the following information:

- Name of the poison: Type, DC, damage, price.
- Type lists the poison's method of delivery (contact, ingested, inhaled, or injury).
- DC lists the phys+STR check DC needed to avoid the poison's damage.
- Effect is expressed as "xdx/xdx." The first number is the initial damage, taken immediately upon failing the phys+STR check against the poison. The second number is the secondary damage, taken one minute after exposure to the poison if a second phys+STR check is failed. Ability damage is temporary unless marked with an asterisk (*), in which case the loss is permanent. Unconsciousness lasts 1d3 hours.
- Cost lists the cost for one dose of the poison. It can usually only be obtained through less-than-reputable sources, as the possession of poisons are commonly illegal.

Several typical poisons are summarized below.

Arsenic

Type: Ingested

DC: 13

Effect: -1 STR/-1d8 STR

Cost: 120 gp.

Blue Whinnis

Type: Injury

DC: 14

Effect: -1 STR/ unconsciousness

Cost: 120 gp.

Section 4:

Microlite20 Based Games

This section, the largest in the Rules Collection, includes a large number of complete games based on the Microlite20 system. Some of these games are just a few pages, others are longer, but all are much, much less complex than most D20-based games because they are built on the Microlite20 system. You will find games for a variety of genres in this section, showing that Microlite20 is not limited to just fantasy RPGs.

M20 SIWDCC Rules v1.0

by Andy Collier <http://www.greensrpree.ca>

M20 SIWDCC is one variant among many of the Microlite20 utralite gaming system. It reinstates the traditional 6 ability scores used in the SRD and incorporates some aspects of OSR gaming. This document is written for an audience assumed to be familiar with role playing in general and the SRD in particular. Additional monsters, spells and magic items can be sourced from SRD documents.

Much of this document was built upon Microlite20 OSS 1.0 (Randall S. Stukey (<http://www.retroplaying.com/>)) and M20 Hard Core Rules v1.02 (Alex Schröder.)

Stats

<u>There are six stats</u>	<u>e.g. of modifiers:</u>
Strength (STR)	lifting things, melee damage
Intelligence (INT)	knowledge, divine magic defense
Wisdom (WIS)	intuition, arcane magic defense
Dexterity (DEX)	dodging, missile attack bonus
Constitution (CON)	health, hit point bonus
Charisma (CHA)	persona, charm person defense

Roll 3d6 for each stat. Stat bonus = (Stat-10)/2, round down.

Classes

Fighters wear any kind of armor or weapon and may use shields.

Physical Combat Bonus is level/2, round up.

Magical Combat Bonus is level/4, round up.

They add +1 to all damage (not attack) rolls. This increases by +1 at 5th level and every five levels thereafter.

Magic-Users wear no armor and can only use daggers or staves as weapons.

Physical Combat Bonus is level/4, round up.

Magical Combat Bonus is level/2, round up.

They cast arcane spells.

They can create arcane scrolls usable by magic-users and rogues at their casting level once per week at a cost of 25gp/scroll.

Clerics can wear light or medium armor and use shields, but cannot use edged weapons.

Physical Combat Bonus is level/4, round up.

Magical Combat Bonus is level/2, round up.

They cast divine spells.

A Cleric can Turn Undead with a successful Divine Magic Attack. DC is 10 + twice the Hit Dice of the undead. One undead flees per point over the roll

Rogues can wear light armor only with no shields and use any weapon but two-handed ones.

Physical Combat Bonus is level/3, round up.

Magical Combat Bonus is level/3, round up.

They can cast arcane spells from scrolls.

They add +1 to all attack (not damage) rolls. This increases by +1 at 5th level and every five levels thereafter.

They get a +2 to any DEX based skill checks on top of regular DEX bonus.

Races

Dwarves get CON +1, WIS +1 and DEX -1, and can see in the dark. Dwarves speak Dwarvish. Dwarves cannot be magic-users.

Elves get DEX +1, INT +1 and CON -1, and can see in the dark. Elves speak Elvish. Elves cannot be clerics.

Halflings get DEX +1, CHA +1 and STR -1, and can see in the dark. Halflings speak Elvish and Dwarvish. Halflings cannot be fighters.

Humans get +1 to any two stats and may take any class.

All character races speak the common tongue, their racial tongue (if any) and one additional language per every point of INT bonus.

Combat

Hit Points = 6 + 1d6/Level+CON bonus. If HP reach 0, the character is unconscious and near death. Further damage directly reduces CON. If that reaches 0, the character has died.

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 you are surprised and may not act.

Initiative: is determined at the beginning of combat by rolling 1d6 + DEX bonus. Combatants act in initiative order.

Everyone can do one thing each turn; move, attack, cast a spell, etc.

Melee Attack bonus = physical combat bonus + STR bonus + Rogue bonus.

Missile Attack bonus = physical combat bonus + DEX bonus + Rogue bonus.

Armour Class (AC) = 10 + DEX bonus + armor bonus.

Armor bonus:

+2 for light armour (leather, hide, etc...)

+4 for medium armour (chainmail, scale, etc...)

+6 for heavy armour (platemail)

+1 for a shield.

Better armor is heavy, noisy, and it slows you down.

Add attack bonus to d20 roll. If equal or higher than your opponent's AC, it's a hit. A natural 20 always hits and does maximum damage; a 1 always misses.

Damage is 1d6 + Fighter bonus. Add STR bonus for melee attacks, twice that for two handed weapons, -1 damage for small weapons.

Resting for 30 minutes recovers all hit points lost. One day of rest recovers one point of CON.

Skills/Saving Throws

There are no named skills or saving throws per se, all random actions should be resolved through combat rolls, stat checks or the following general skill check:

Primary Skill Roll: 1D20 + Stat Bonus + Class Level if the character is attempting something directly related to their class or background.

Secondary Skill Roll: 1D20 + Stat Bonus + (Class Level/2, round up) if the character is attempting something only loosely related to their class or background.

Minor Skill Roll: 1D20 + Stat Bonus + (Class Level/3, round down) if the character is attempting something not really related to their class or background.

When the GM calls for a skill roll, he will declare the type of skill roll, which stat the skill roll falls under, and any situational modifiers and the player will make a skill roll.

Roll higher than the GM assigned Difficulty Class to succeed:

Easy	10	Legendary	30
Moderate	15	Improbable	35
Difficult	20	Unbelievable	40
Extremely Difficult	25		

Magic

Every spell has a Spell Level. The maximum Spell Level for a spellcaster is Level/2, rounded up (Level/3, rounded up for rogues casting spells from scrolls.) Casting a spell of any kind cost hit points (HP), except if they are cast from scrolls. Magic items that allow anyone to cast spells (e.g. a sword that allows the user to cast light) does cost the caster HP. The cost is 1 + double the level of the spell being cast.

There is no need to memorize spells in advance. Spellcasters can pick a favorite spell on every Spell Level. These spells are easier to cast due to familiarity, costing 1 less HP to use.

Spell Level	0	1	2	3	4	5	6
HP Cost	1	3	5	7	9	11	13
HP Cost if favorite	0	2	4	6	8	10	12
Min. Caster Level	1	1	3	5	7	9	11

Arcane Magic Attack bonus = magical combat bonus + INT bonus.

Divine Magic Attack bonus = magical combat bonus + WIS bonus.

Arcane Magic defense = 10 + WIS bonus + appropriate stat bonus (DEX for magic missile, STR for hold person, CON for petrify, etc...)

Divine Magic defense = 10 + INT bonus + appropriate stat bonus (CON for cause light wounds, WIS for curse, Cha for charm, etc...)

Add attack bonus to d20 roll. If equal or higher than your opponent's defense, the spell works. A natural 20 results in the maximum effect. Damage dealing effects still deal half damage on a failed attack.

Beyond the attached spell list it is of course possible to research further arcane spells and to ask a patron deity for further divine favors. Take a look at the SRD for inspiration. Spells can be reversed.

Equipment

Suggested starting packs for new characters:

Pack A	Pack B	Pack C
backpack	backpack	backpack
bedroll	bedroll	bedroll
hooded lantern	10 torches	tent
5 oil flasks	5 oil flasks	10 torches
flint & steel	flint & steel	flint & steel
shovel	chalk	hammer
2 sets of caltrops	10 ft. pole	10 iron spikes
signal whistle	mirror	grappling hook
pen & paper	crowbar	50 ft. rope
waterskin	waterskin	waterskin
iron rations (4days)	iron rations (4days)	iron rations (4days)
small knife	small knife	small knife

Finally, add the following, based on your Class:

Fighter: medium armor (AC +4), a one handed weapon + shield, or a two handed weapon, and 5 gold pieces

Wizard: A scroll with a 1st level spell, either a dagger or a staff, and 5 gold pieces

Cleric: Silver holy symbol, light armor (AC +2), a one handed weapon + shield, and 5 gold pieces

Rogue: Lockpicking tools or a scroll with a 1st level arcane spell, light armour, one handed weapon + dagger or missile weapon + dagger, and 5 gold pieces.

Encumbrance: Characters can carry 12 items in addition to backpack, clothes, armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (e.g. 5 flasks, 20 arrows, 50 gems, 100 gold pieces, or small amounts of a combination of these items) count as a single item. Add one item per point of STR bonus.

Prices: Don't worry about the price of mundane stuff later in the game as long as characters spent money "in totally frivolous ways".

Level Advancement

Experience Points (XP) = Hit Dice of defeated monsters.

Add +1 for each doubling of the number of foes. e.g.:

1 kobold (a 1 hit die monster) = 1 XP

2 kobolds = 2 XP

4 kobolds = 3 XP

8 kobolds = 4 XP etc.

Characters also earn a GM-assigned amount of experience points for defeating traps, solving puzzles, excellent roleplaying, and the like (usually from 1 to 5 XP).

Individual characters can also earn experience points from spending money found in treasures in totally frivolous ways. A character earns 1 XP for every 100gp so spent.

When the total XP = 20 × your current level, you've advanced to the next level. Reset the total XP to 0 after advancing.

If the level divides by four (i.e. level 4, 8, 12, etc.) add 1 point to any ability (player's choice).

Arcane Spells

0-Level Spells

Arcane Mark: Permanently inscribes or identifies a personal rune (visible or invisible).

Detect Magic: Detects spells and magic items.

Ghost Sound: Figment sounds for minutes.

Light: Object shines like a torch for hours.

Mage Hand: 5-pound telekinesis while concentrating.

1 s t -Level Spells

Alarm: Wards an area for hours.

Cause Fear: One creature of 5 HD or less flees.

Charm Person: Makes one person your friend for a day.

Comprehend Languages: You understand all spoken and written languages.

Grease: Makes area or one object slippery.

Magic Missile: 1d4+1 damage; +1 missile per two levels above 1st (max 5).

Sleep: Puts 4 HD of creatures into magical slumber.

Spider Climb: You can walk on walls and ceilings.

Ventriloquism: Throws voice.

2 nd -Level Spells

Acid Arrow: 2d4 damage for 1 round +1 round/three levels.

Command Undead: Undead creature obeys your commands.

Detect Thoughts: Allows "listening" to surface thoughts.

Draw Runes: Stores a spell that you cast in a rune you draw to be released using a simple trigger you specify. The rune has to drawn using rare ingredients.

Fly: Subject flies quickly and quietly.

Hold Person: Paralyzes one humanoid.

Invisibility: Subject is invisible until it attacks.

See Invisibility: Reveals invisible creatures or objects.

Web: Fills area with sticky spiderwebs.

3 rd -Level Spells

Dispell Magic: Cancels magical spells and effects.

Fireball: 1d6 damage per level, 20-ft. radius.

Gentle Repose: Preserves one corpse.

Haste: Allies move faster and get a second melee attack. This lasts for one round only.

Major Image: Image plus sound, smell and thermal effects.

Summon Monster: Calls extraplanar creature to fight for you.

Tongues: You speak and understand any language.

Wind Walk: Targets turn to dust and fly in a gust of wind.

4 th -Level Spells

Animate Dead: Creates undead skeletons and zombies.

Charm Monster: Makes monster believe it is your ally for a day.

Create Magic Item: Permanently enchant masterwork items including arms and armor with effects that are thematically linked to a spell you cast. The entire procedure takes a day. The item has to be custom made using rare ingredients.

Illusory Wall: Creates a permanent wall, floor, or ceiling that looks real, but anything can pass through.

Scrying: Spies on subject from a distance.

Shadow Walk: Take subjects into shadow to travel rapidly.

Shout: Deafens all within cone and deals 5d6 sonic damage.

Stone Shape: Sculpts stone into any shape.

5 th -Level Spells

Cone of Cold: 1d6/level cold damage.

Dominate Person: Controls humanoid telepathically.

Magic Jar: Enables possession of another creature.

Permanency: Makes certain spells permanent. The entire procedure takes a day.

Planar Binding: Traps extraplanar creature of 6 HD or less until it performs a task.

Polymorph: Transforms subject into harmless animal.

Seeming: Changes appearance of one person per two levels.

Telepathic Bond: Link lets allies communicate.

Teleport: Instantly transports subjects hundreds of miles.

6 th -Level Spells

Create Golem: Creates constructs made of dead material. The entire procedure takes a day.

Create Undead: Creates ghouls, ghosts, mummies, or mohrgs.

Disintegrate: Makes one creature or object vanish.

Dream World: Creates a permanent portal to a new pocket dimension.

Geas: Commands subject for a year and a day.

Petrify: Turns subject creature into statue.

Plane Shift: Subjects travel to another plane.

True Seeing: Lets you see all things as they really are.

Divine Spells

0-Level Spells

Cure Minor Wounds: Cures 1 point of damage.

Detect Poison: Detects poison in one creature or object.

1 s t -Level Spells

Brew Potion: Store a spell you cast in a potion to be released when quaffed.

Bless: Allies gain +1 on attack rolls.

Cure Light Wounds: Cures 1d8 damage +1/level (max +5).

Shield: AC +2 +1/6 level.

2 nd -Level Spells

Augury: Learns whether an action will be good or bad.

Cure Moderate Wounds: Cures 2d8 damage +1/level (max +10).

Zone of Truth: Subjects within range cannot lie.

3 rd -Level Spells

Cure Serious Wounds: Cures 3d8 damage +1/level (max +15).

Remove Curse: Frees object or person from curse.

Speak with Dead: Corpse answers one question/two levels.

4 th -Level Spells

Cure Critical Wounds: Cures 4d8 damage +1/level (max +20).

Neutralize Poison: Immunizes subject against poison, detoxifies venom in or on subject.

Restoration: Restores level and stat drains.

5 th -Level Spells

Mass Cure Light Wounds: Cures 1d8 damage +1/level for many creatures.

Raise Dead: Restores life to subject who died as long as one day/level ago.

Hallow: Designates location as holy.

Commune: Deity answers one yes-or-no question/level.

Monsters

Creation:

Pick a name

Assign a level, hit dice = level

Hit points = 1d6 per level

Magic defense = 10 + level

All attack bonuses = level

Damage = 1d6 for ordinary claws, bites, and weapons, 2d6 for large maws, giant clubs, 3d6 for dragon bites and the like

AC = armor equivalent

Pick special abilities as the level increases.

Special attacks act like magic attacks against an appropriate defense.

ANT, GIANT: AC: 16 HD: 3d6 AT: bite +3 (1d6) S: acid (2d6)

BASILISK: AC: 15 HD: 6d6 AT: bite +6 (1d6) S: petrifies onlookers

BLACK PUDDING: AC: 13 HD: 10d6 AT: slam +10 (2d6) S: immune to everything but fire, divides when hit

BLINK DOG: AC: 14 HD: 4d6 AT: bite +4 (1d6) S: teleports

BUGBEAR: AC: 14 HD: 3d6 AT: weapon +3 (1d6) S: surprise foes on a 1-3

CENTAUR: AC: 14 HD: 4d6 AT: 2 kicks +4 (1d6), weapon +4 (1d6)

CENTPEDE, GIANT: AC: 16 HD: 6d6 AT: bite +6 (2d6) S: poison (1d6 DEX)

CHIMERA: AC: 15 HD: 9d6 AT: 2 claws +9 (1d6), goat gore +9 (1d6), lion bite +9 (1d6), dragon bite +9 (2d6) S: breathes fire (3d6), flies

COCKATRICE: AC: 13 HD: 5d6 AT: bite +5 (1d6) S: petrifying bite

DJINN: AC: 14 HD: 7d6 AT: slam +7 (2d6) S: flies, whirlwind, creation of things, create illusions, invisibility, immune to mundane weapons

DOPPELGANGER: AC: 14 HD: 4d6 AT: claw +4 (1d6) S: imitate humanoids, immune to sleep and charm

DRAGON, BLACK: AC: 17 HD: 7d6 AT: 2 claws +7 (1d6), bite +7 (1d6) S: breathes line of acid (7d6)

DRAGON, BLUE: AC: 19 HD: 9d6 AT: 2 claws +9 (1d6), bite +9 (3d6) S: breathes line of lightning (9d6)

DRAGON, GREEN: AC: 18 HD: 8d6 AT: 2 claws +8 (1d6), bite +8 (3d6) S: breathes cloud of chlorine gas (8d6)

DRAGON, RED: AC: 20 HD: 10d6 AT: 2 claws +10 (1d6), bite (4d6) S: breathes cone of fire (10d6)

DRAGON, WHITE: AC: 16 HD: 6d6 AT: 2 claws +6 (1d6), bite +6 (2d6) S: breathes cone of cold (6d6)

DRYAD: AC: 14 HD: 2d6 AT: no S: charm

EFREET: AC: 16 HD: 10d6 AT: slam +10 (2d6) S: flies, wall of fire, creation of things, create illusions, invisibility, immune to mundane weapons

ELEMENTAL, AIR: AC: 19 HD: 12d6 AT: slam +12 (2d6) S: whirlwind, extra damage against foes in the air

ELEMENTAL, EARTH: AC: 19 HD: 12d6 AT: slam +12 (2d6) S: tear down stone, extra damage against foes standing on the ground (1d6)

ELEMENTAL, FIRE: AC: 19 HD: 12d6 AT: slam +12 (2d6) S: ignite materials

ELEMENTAL, WATER: AC: 19 HD: 12d6 AT: slam +12 (2d6) S: overturn boats, extra damage against swimming foes (1d6)

GARGOYLE: AC: 14 HD: 4d6 AT: 2 claws +4 (1d6), bite +4 (1d6), horns +4 (1d6) S: fly

GELATINOUS CUBE: AC: 11 HD: 4d6 AT: slam +4 (2d6) S: touch paralyzes, immune to lightning and cold, surprise foes on a 1-4

GHOUL: AC: 13 HD: 2d6 AT: 2 claws +2 (1d6), bite +2 (1d6) S: touch paralyzes, humans slain by ghouls rise again as ghouls in 24h

GIANT, CLOUD: AC: 15 HD: 12d6 AT: Morningstar +12 (4d6) or +12 hurl rocks (3d6) S: only surprised on a 1.

GIANT, FIRE: AC: 15 HD: 11d6 AT: sword +11 (5d6) or +11 hurl rocks (3d6) S: immune to fire

GIANT, FROST: AC: 15 HD: 10d6 AT: great axe +10 (4d6) or +11 hurl rocks (3d6) S: immune to cold

GIANT, HILL: AC: 15 HD: 8d6 AT: spear +8 (2d6)

GIANT, STONE: AC: 15 HD: 9d6 AT: stone club +9 (3d6) or +9 hurl rocks (3d6)

GIANT, STORM: AC: 17 HD: 15d6 AT: great sword +15 (8d6) S: call thunderstorm in 10min, then call lightning (15d6)

GNOLL: AC: 14 HD: 2d6 AT: weapon +2 (1d6)

GOBLIN: AC: 13 HD: 1d6 AT: weapon +1 (1d6) S: -1 to hit in sunlight

GOLEM: AC: 18 HD: 9d6 AT: 2 slams +9 (2d6) S: hit only by magic weapons, immune to magic, healed by lightning

GORGON: AC: 17 HD: 8d6 AT: gore +8 (2d6) S: breathes petrifying gas

GREY OOZE: AC: 11 HD: 3d6 AT: slam +3 (2d6) S: acid destroys armor in one round, deals automatic damage after the first hit, immune to fire and cold

GRIFFON: AC: 14 HD: 7d6 AT: 2 claws +7 (1d6), bite +7 (2d6) S: flies

HARPY: AC: 12 HD: 3d6 AT: 2 talons +3 (1d6), weapon +3 (1d6) S: flies, siren-song

HELL HOUND: AC: 15 HD: 5d6 AT: bite +5 (1d6) S: breathe fire (5d6)

HIPPOGRIF: AC: 14 HD: 3d6 AT: 2 claws +3 (1d6), bite +3 (1d6) S: flies

HOBGOBLIN: AC: 13 HD: 1d6 AT: weapon +1 (1d6)

KOBOLD: AC: 12 HD: 1d6 AT: weapon (1d6)

LIZARDMAN: AC: 15 HD: 2d6 AT: weapon (1d6)

LYCANTHROPE, WEREBEAR: AC: 17 HD: 6d6 AT: 2 claws +6 (2d6), bite +7 (2d6) S: lycanthropy, extra 2d6 dam. if both claws hit

LYCANTHROPE, WEREBOAR: AC: 15 HD: 4d6 AT: tusk +6 (2d6) S: lycanthropy, attack +6 instead of +4 because of rage

LYCANTHROPE, WERERAT: AC: 12 HD: 3d6 AT: bite +3 (1d6) S: lycanthropy, surprise foes on a 1-4

LYCANTHROPE, WERETIGER: AC: 16 HD: 5d6 AT: 2 claws +5 (1d6), bite +5 (2d6) S: lycanthropy, surprise foes on a 1-4

LYCANTHROPE, WEREWOLF: AC: 14 HD: 4d6 AT: bite +4 (2d6) S: lycanthropy

MANTICORE: AC: 15 HD: 6d6 AT: 2 claws +6 (1d6), bite +6 (2d6) S: flies, six tail spikes +6 (1d6) per round, 24 spikes in total

MEDUSA: AC: 11 HD: 4d6 AT: weapon +4 (1d6) S: onlookers turns to stone, averting eyes reduces to hit by 4 and grants +2 to medusa attacks

MERMAN: AC: 13 HD: 1d6 AT: weapon +1 (1d6) S: breathe water, swim

MINOTAUR: AC: 13 HD: 6d6 AT: Head gore +6 (1d6), weapon +6 (1d6)

MUMMY: AC: 16 HD: 5d6 AT: slam (2d6) S: mummy rot curse if hit (no more healing), hit only by magic weapons, spells, and fire, immune to charm, sleep, and hold spells

NIXIE: AC: 12 HD: 1d6 AT: weapon (1d6) S: swims, charm

OCHRE JELLY: AC: 11 HD: 5d6 AT: acid strike +5 (2d6) S: a hit destroys organic material, lightning and weapon damage divides jelly into three jellies, each doing +2 (1d6) damage

OGRE: AC: 14 HD: 4d6 AT: weapon +4 (2d6)

ORC: AC: 13 HD: 1d6 AT: weapon +1 (1d6)

OWLBEAR: AC: 14 HD: 5d6 AT: 2 claws +5 (1d6), bite +5 (1d6) S: hug for additional 2d6 if both claws hit

PEGASUS: AC: 13 HD: 2d6 AT: 2 hooves +2 (1d6) S: flies

PURPLE WORM: AC: 13 HD: 15d6 AT: bite +15 (2d6), sting (1d6) S: poison sting (1d6 STR), swallows whole on a natural 20, swallowed creatures take 3d6 automatic damage every round

ROC: AC: 17 HD: 12d6 AT: 2 claws +12 (1d6), bite +12 (3d6)

SALAMANDER: AC: 17 HD: 8d6 AT: 2 claws +8 (1d6), bite +8 (1d6) S: heat does 1d6 to nearby creatures, immune to fire, hit only by magic weapons

SHADOW: AC: 12 HD: 2d6 AT: touch (1d46) S: drains 1 STR per hit, hit only by magical weapons, immune to charm and sleep spells, surprise foes on a 1-5, creatures reduced to 0 STR will rise 24h later as a shadow

SKELETON: AC: 12 HD: 1d6 AT: weapon +1 (1d6) S: immune to charm and sleep spells

SPECTER: AC: 17 HD: 6d6 AT: touch +6 (1d6) S: immune to charm, sleep and hold spells, drains 2 levels per hit, creatures reduced to 0 levels will rise 24h later as a specter

STIRGE: AC: 12 HD: 1d6 AT: sting +1 (1d6) S: attaches on a hit and will deal 1d6 automatically damage every round

TOAD, GIANT: AC: 12 HD: 2d6 AT: bite +2 (1d6) S: surprise foes on a 1-3, swallows small creatures whole on a natural 20, swallowed creatures take 1d6 automatic damage every round, long tongue

TROLL: AC: 15 HD: 6d6 AT: 2 claws (1d6), bite +6 (2d6) S: regenerate 3 per round

VAMPIRE: AC: 17 HD: 9d6 AT: bite +9 (1d6) S: immune to charm, sleep and hold spells, hit only by magical weapons, regenerate 3 per round, drains 2 levels per hit, gaseous form at will, shape change into bat, charm gaze, avoids garlic and mirrors, immobilized and apparently dead if a stake is driven through its heart, drowns under water in one round

WIGHT: AC: 14 HD: 3d6 AT: claw +3 (1d6) S: immune to charm and sleep spells, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise some days later as a wight

WILL-O-THE-WISP: AC: 27 HD: 9d6 AT: 1 shock +9 (1d6+4)

WOLF: AC: 12 HD: 2d6 AT: bite +2 (1d6)

WORG: AC: 13 HD: 4d6 AT: 1 bite +4 (2d6)

WRAITH: AC: 16 HD: 4d6 AT: touch +4 (1d6) S: immune to charm, sleep, and hold spells, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise 24h later as a wraith

WYVERN: AC: 16 HD: 7d6 AT: bite +7 (2d6), sting +7 (1d6) S: poison sting (1d6 STR), flies

ZOMBIE: AC: 11 HD: 2d6 AT: claw +2 (1d6) S: immune to charm and sleep spells, always lose initiative

House Rules v1.2

Stats

There are 3 stats: Strength (**STR**), Dexterity (**DEX**) and Mind (**MIND**).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

There are 7 different races; humans, dwarves, elves, gnomes, half-elves, half-orcs and halflings.

Humans

The most adaptable of all races, humans are come in all shapes and colors.

Racial traits

- +3 to all skills at first level

Dwarves

Dwarves are grumpy and hardworking and are known of being good miners, warriors and beer-drinkers. They distrusts everyone and hates orcs and goblinoids.

Racial traits

- +2 to STR
- +2 on saving throws against poison and magic
- +4 to AC against giant type monsters
- darkvision

Elves

The fair elves are poetic and love the nature. They are polite to everyone that don't live up to the standard of being an elf.

Racial traits

- +2 to DEX
- +2 on ranged attacks
- +2 on search rolls, automatically rolls to find secret doors
- low-light vision

Gnomes

Gnomes are curious inventors and animal-friends who love a good joke. They mix well with dwarves and halflings, but are suspicious of the taller races.

Racial traits

- +2 to MIND
- +2 on saving throws against illusions
- +1 to AC because they are small
- low-light vision

Half-elves

Never really at home among humans or elves, half-elves sometimes feel like outsiders. They have the ambitions of a human and the artistic nature of the elf.

Racial traits

- +2 on search rolls
- +3 to Communication
- low-light vision

Half-orcs

Half-orcs are short-tempered who rather act than ponder and rather fight than argue. They have a hard time to get accepted by other races.

Racial traits

- +4 to STR
- -2 to MIND
- darkvision

Halflings

A curious, almost reckless race, halflings are known to spend gold as quickly as they find it. Rich halflings are known for their large collections of curiosities.

Racial traits

- +2 to DEX
- +3 to Subterfuge
- +2 on saving throws against fear
- +1 to AC because they are small

Description

To determine age, height, weight and starting gold of the character, use the Description rules in the SRD or PHB.

Classes

There are 8 classes; bards, clerics, druids, fighters, paladins, rangers, rogues and wizards.

Bards

The Bard is a performer whose music works magic - a wanderer, a tale-teller, and a jack-of-all trades.

The Bard...

- can wear light armor
- can use a light shield
- can use light or medium weapons
- gains a +2 bonus to Communication, Subterfuge, and Knowledge.
- Class-skill is Knowledge.
- A Bard can counter sound-based effects within a 30' radius with a Magic attack roll instead of making a save roll. This applies to all affected creatures hearing the Bard within the range and allows additional saving rolls – using the Bards Magic attack roll.
- A Bard can use his song to charm a person or remove fear up to 3 times (total) per day. DC equals 10 + Bards level + MIND bonus.
- At 6th level, a Bard casts spells as a Wizard of 5 levels lower. HP Cost for each spell is multiplied with 5. DC is adjusted with -5.
- HD is d6.
- Base Attack Bonus is 3/4 Level.

Clerics

The Cleric is a master of divine magic and a capable warrior as well.

The Cleric...

- can wear light or medium armour
- can use shields
- can use light, medium or heavy weapons
- can cast divine spells
- gains +3 bonus to Communication.
- Class-skill is Communication.
- can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.
- HD is d8.
- Base Attack Bonus is 3/4 Level.

Druids

The Druid is one who draws energy from the natural world to cast divine spells and gain strange magical powers.

The Druid...

- can wear non-metal light or medium armor
- can use shields
- can use non-metal light, medium or heavy

weapons.

- can cast Druid spells
- gains +2 to Knowledge checks.
- Class-skill is Knowledge.
- are immune to the spell-like effects of woodland fey.
- can at 3rd level can pass without trace at will.
- can at 7th level assume the form of any small or medium sized animal up to 3 times per day. A Druid heals 2hp per level when changing back into his human form.
- HD is d8.
- Base Attack Bonus is 3/4 Level.

Fighters

The Fighter is a warrior with exceptional combat capability and unequalled skill with weapons.

The Fighter...

- can wear and use any kind of armour, shields and weapons.
- have a +3 bonus to Physical.
- Class-skill is Physical.
- HD is d10.
- Base Attack Bonus equals the Level.

Paladins

The Paladin is a champion of justice and destroyer of evil, protected and strengthened by an arrow of divine powers.

The Paladin...

- can wear and use any kind of armour, shields and weapons.
- have a +1 bonus to Physical and a +2 bonus to Communication checks.
- Class-skill is Communication.
- are immune to diseases
- apply a +1 bonus to all saving throws (this increases by +1 at 5th level and every 5 levels on).
- can detect evil within 60' at will and can heal up to 2hp per level per day by laying on hands.
- must be of Lawful Good alignment
- HD is d10.
- Base Attack Bonus equals the Level.

Rangers

The Ranger is a cunning, skilled warrior of the wilderness.

The Ranger...

- can use light or medium armor
- can use shields
- can use light, medium and heavy weapons.
- have +1 to hit and damage with ranged

weapons

- only incur a -1 to hit penalty when fighting with 2 weapons.
- have a +1 bonus to Physical
- have a +2 bonus to Subterfuge.
- Class-skill is Subterfuge.
- At first level and every fifth level after, the Ranger chooses a favored enemy. The ranger gets a +2 bonus to all rolls against the favored enemy.
- At 4th level rangers casts divine spells as a cleric of 3 levels lower. HP Cost for each spell is multiplied with 3. DC is adjusted with -3.
- HD is d8.
- Base Attack Bonus equals the Level.

Rogues

The Rogue is a tricky, skillful scout and spy who wins the battle by stealth rather than brute force.

The Rogue...

- can use light armour
- can use light shields
- can use light and medium weapons.
- have a +3 bonus to Subterfuge.
- Class-skill is Subterfuge.
- If they successfully Sneak (usually sub+DEX, but depends on situation) against a foe they can add their Subterfuge skill rank to the damage of their first attack that round.
- HD is d6.
- Base Attack Bonus is 3/4 Level.

Wizards

The Wizard is a potent spellcaster schooled in the arcane arts.

The Wizard...

- cannot wear armour or shields
- can only use clubs, daggers, heavy and light crossbows, or quarterstaves
- can cast arcane spells
- gains a +3 bonus to Knowledge.
- Class-skill is Knowledge.
- HD is d4.
- Base Attack Bonus is 1/2 Level.

Skills

There are just 4 skills: Physical, Subterfuge, Knowledge and Communication. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level or 1/2 level depending on class + any bonus due to your class or race.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers.

Converted D20 Skills

Appraise	comm+MIND
Balance	phys+DEX
Bluff	comm+MIND
Climb	phys+DEX or STR, whichever is highest
Concentration	doesn't apply. GM's fiat applies
Craft	it's an out of game thing. No one /ever/ crafts things in-game, so it's a redundant skill. Alternatively, know+DEX
Decipher Script	know+MIND or comm+MIND
Diplomacy	comm+MIND
Disable Device	subt+MIND or subt+DEX
Disguise	subt+MIND
Escape Artist	subt+DEX or subt+STR, depending on what you're escaping out of
Forgery	comm+DEX
Gather Information	comm+MIND
Handle Animal	comm+MIND or comm+STR if the animal is bigger than you
Heal	know+MIND
Hide	subt+DEX
Intimidate	could be phys+STR, or subt+MIND or comm+STR. DM's choice
Jump	phys+STR (long jump) or phys+DEX (high jump)
Knowledge	know+MIND
Listen	subt+MIND
Move Silently	subt+DEX
Open Lock	subt+DEX
Perform	comm+MIND, though it could be DEX if you're juggling, or STR if you're a weightlifter
Profession	comm+MIND, usually
Ride	comm+DEX
Search	subt+MIND
Sense Motive	comm+MIND
Sleight of Hand	subt+DEX
Speak Language	doesn't apply. You either know the language or you don't. Alternatively, comm+MIND to understand subtle nuances
Spellcraft	MIND only
Spot	subt+MIND
Survival	phys+STR to survive, or subt+DEX or STR to hunt.
Swim	phys+STR
Tumble	phys+DEX
Use Magic Device	you can either use it, or you can't. GM fiat. Alternatively, MIND only
Use Rope	no used

Saving Throws

Fortitude	=	Physical + STR bonus
Reflex	=	Physical + DEX bonus
Will	=	MIND bonus + level

Hit Points

Hit Points = 1HD + STR bonus each Level. Starting HP is always maximum.

Damage

- If HP reach 0, the PC is still mobile, but cannot attack and only move at half speed.

Harsh actions deals 1 point of damage.

- If HP reach -1 to -9, the PC is unconscious. The PC still loses 1 HP/round. 10% chance to stabilize.
- If HP reach -10, the PC is dead.

For convenience, monster and other opponents are considered dead when reaching 0 HP.

Magic

Wizards and Bards can cast arcane spells, and Clerics and Druids can cast divine spells, with a spell level equal or below 1/2 their class level, rounded up. Use the spell lists in the SRD. All spells are available and known.

Casting a spell of any kind costs Hit Points (subdual). The cost is 1 + double the level of the spell being cast:

Spell Level	0	1	2	3	4	5	6	7	8	9
HP Cost	1	3	5	7	9	11	13	15	17	19

This loss cannot be healed normally but is recovered after 8 hours rest. There is no need to memorize spells in advance. Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character.

The Difficulty Class (DC) for all spells is 10 + Caster Level + Caster's MIND bonus.

Select one "signature" spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

Combat

Roll d20 + DEX bonus for initiative order.

Each round, you can perform an action (draw weapon, make one attack, cast a spell etc.) and a move action (move your speed, stand up etc.), or you can perform a full-round action (double move or full attack). You can also perform one or more free actions (speak or drop an item).

Melee attack bonus	STR bonus + Level
Missile attack bonus	DEX bonus + Level
Magic attack bonus	MIND bonus + Level
Armor Class (AC)	10 + DEX bonus + Armor bonus

Add attack bonus to d20 roll. If higher than your opponent's Armour Class (AC), it's a hit.

Add STR bonus to Melee damage, x2 for 2-handed weapons.

Characters of Fighter and Rogue classes can wield 2 light weapons and make a *Full Attack* with both if they take a -2 penalty on all attack rolls. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

If the total BAB is +6 or more a second attack can be made with a -5 penalty in a *Full Attack*. If the total BAB is +11 or more a third attack can be made at -10, and a fourth at -15 if the BAB is +16 or more. For example, if the BAB is +12, three attacks can be made at +12/+7/+2. No more than four attacks can be made in a round, regardless of BAB (five if two weapons are used).

Movement

All have a speed of 30 feet (6 squares), or 20 feet (4 squares) in medium or heavy armor per combat round.

Critical Hits

Natural 20 = Maximum damage

Double 20 = Double maximum damage

Triple 20 = Instant death to opponent

Fumble

Natural 1 = Loses next action

Double 1 = Loses next action, max damage to self

Triple 1 = Instant death to self

Level Advancement

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in and multiply with 100. When the total = 1000 x your current level, you've advanced to the next level.

For convenience, use the XP table in the PHB.

Level Gains

- +1HD + STR bonus to Hit Points
- +Level to the Class Skill
- +1/2 Level to all other skills
- re-calculate BAB and change the attacks accordingly
- if the level divides by three (i.e. level 3,6,9,etc.) add 1 point to one Stat.

M I C R O F A N T A S Y

Character Creation

STATS

There are 3 STATS; STR, DEX and MIND.

Each has an initial value between 3 and 18.

If the STAT value is over 11 then the STAT has a bonus = $(\text{STAT} - 10)/2$ (round down)

If the STAT value is less than 9 then the STAT has a penalty = $(10 - \text{STAT})/2$ (round down)

RACES

There are 4 RACES.

The differences between the races are determined by bonuses to their skill rolls.

- HUMAN (+1 to ALL skill rolls)
- ELF (+2 to all MIND rolls)
- DWARF (+2 to all STR rolls)
- HALFLINGS (+2 to all DEX rolls)

CLASSES

There are 4 CLASSES.

- FIGHTER. Adds +1 to his melee and missile ATTACK rolls AND the damage they inflict. This increases by an additional +1 to both at levels 5, 10, 15 and 20. The fighter also adds his level to his HP total.
- ROGUE. Can SNEAK ATTACK (see COMBAT).
- MAGI. Can cast arcane spells. (See MAGIC book)
- CLERIC. Can cast divine spells. (See MAGIC book) Can attempt to TURN un-dead at will.

SKILLS

There are 4 SKILLS; Physical, Subterfuge, Knowledge and Communication.

Each has a SKILL RANK.

$\text{SKILL RANK} = \text{Level} + \text{class bonus}$.

CLASS SKILL BONUS

- Fighter +3 physical
- Rogue +3 subterfuge
- Magi +3 knowledge
- Cleric + 3 communication.

Success in an attempt at an action requires a SKILL ROLL.

Roll higher than the given Difficulty Class (DC) of an action to succeed.

A natural 20 roll always succeeds. A natural 1 roll always fails.

$\text{SKILL ROLL} = \text{d20} + \text{skill rank} + \text{STAT bonus}$

HIT POINTS

Each character has HIT POINTS (HP) = $\text{STR} + (1\text{D}6 \text{ per level})$.

ARMOUR CLASS (AC)

AC class bonus assumes the character is wearing class appropriate protection in the form of armour and / or shields.

- Unarmoured AC = $10 + \text{DEX bonus or penalty}$
- Armoured AC = $10 + \text{DEX bonus or penalty} + \text{class bonus}$

AC CLASS BONUS

- Fighter +6
- Cleric +4
- Rogue +2
- Magi +0

EQUIPMENT

A character is assumed to own and use a backpack, sack or multi pocketed costume to carry his personal items.

This does not count as an item and allows the character to carry a number of items equal to his STR value.

He can only carry half that amount (round up) without a backpack etc.

100 coins counts as 1 item and bulky or heavy items can count as 2 or more items.

A character begins with 7 initial items. These are:

- Hand weapon
- Missile weapon with 10 missiles
- Class appropriate armour.
- 4 mundane items

EQUIPMENT SWAP

A character can change his initial equipment as follows:

- A fighter can swap a hand weapon for 2-handed weapon.
- A fighter or dwarf can swap his missile
- Weapon for a crossbow.
- A fighter or elf can swap his missile
- Weapon for a longbow.
- A Fighter or Rogue can swap his hand
- Weapon for a light weapon.
- A fighter or rogue can swap a mundane item for an extra 10 pieces of missile weapon ammunition.
- A rogue can swap a missile weapon for 5 throwing missiles.

LEVEL ADVANCEMENT

At each new level, the character:

- Adds +1d6 to Hit Points
- Adds +1 to all attack rolls
- Adds +1 to all skills.
- Add 1 point to STR, DEX or MIND, if the level divides by 3 (i.e. level 3, 6, 9, 12, 15, 18 etc.) .

- Fighters gain +1 to their attack and damage rolls at levels 5, 10, 15 etc.
- At levels 3,5,7,9,etc., Clerics and Magi gain access to new spell levels and new spells.
- At each new level, the character can choose a new item of equipment and swap an old item of equipment for a new item.

Combat

INITIATIVE

Each combatant makes an initiative roll at the start of a combat.

Actions are taken in order from the highest score to the lowest.

Each combatant can take 1 action per round.

INITIATIVE ROLL = $d20 + \text{level} + \text{DEX bonus}$.

TO HIT

In order to hit an opponent you must make a successful attack roll.

Add attack bonus to d20 roll and roll higher than opponent's AC to hit.

- MELEE ATTACK ROLL = $d20 + \text{melee attack bonus}$.
- MISSILE ATTACK ROLL = $d20 + \text{missile attack bonus}$
- MAGIC ATTACK = $d20 + \text{MIND bonus} + \text{level}$ (see MAGIC book)

A missile weapon must be within range of the target.

In general, a move action takes a character from one range to another.

- Thrown weapon: Short range
- Short bow/slings: Medium range
- Longbow/crossbow: Long range

If the total attack bonus is +6 or more a second attack can be made with a -5 penalty in MELEE ONLY.

If the total bonus is +11 or more a third attack can be made at -10 penalties.

For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

- MELEE ATTACK BONUS = STR bonus + Level
- MISSILE ATTACK BONUS = DEX bonus + Level

If a hit is scored, roll for damage and subtract from opponent's HP.

The damage listed below assumes the usage of an ordinary hand weapon such as a sword, axe or mace.

Melee Damage = $1d8 + \text{STR bonus}$.

Missile Damage = $1d8 + \text{DEX bonus}$.

DIFFERENT ATTACKS

- LIGHT WEAPONS inflict 1d6 damage, use DEX bonus instead of STR bonus to hit and do not add STR bonus to damage.
- TWO HANDED WEAPONS inflict 1d10 damage. They are unwieldily and do not add STR bonus to hit but add TWICE the STR bonus to damage.
- UNARMED COMBAT inflicts 1d4 damage. A to-hit roll of 1 inflicts 1d4 damage on the attacker.
- IMPROVISED WEAPONS will break and are useless on a natural attack roll of 1 or 20.
- THROWN WEAPONS only cause 1d4 damage. ROGUES can make additional attacks with thrown weapons as if using a melee weapons.
- LONG BOWS are unwieldily and do not add DEX bonus to hit but add TWICE the DEX bonus to damage.
- CROSSBOWS but require a full round to reload between shots but double the damage that is rolled (not the DEX bonus).

SNEAK ATTACK

A rogue can attempt a SNEAK attack on any opponent if (a) he is higher in the initiative order and (b) it's his first attack that combat against that opponent.

He must make a DEX + subterfuge roll with a DC = $10 + \text{opponent's level or TL}$ (see MONSTER book) + subterfuge

bonus.

Success sees any attacks that hit that round inflicting additional damage equal to his subterfuge bonus.

SPECIAL MANOUVRES

A character may attempt a special manoeuvre such as disarming an opponent, knocking him prone, escaping from combat, breaking past an opponent etc.

Success requires that:

- A. The player declares the action and it's intended result,
- B. He then makes a single, successful attack with a -4 penalty that round
- C. The opponent must fail a DEX or STR (whichever is higher)+ physical roll using the hit roll as DC.

RECOVERY

If HP is reduced to 0 or less the character is mortally wounded, can take no actions and will die within a number of rounds equal to his STR unless he is healed.

Normally HP heals at a rate equal to the character's level but only with a full day's rest, otherwise only 1 HP per day is healed.

Adventuring

FALLING DAMAGE

A fall results in 1d6 hp of damage per 3 metres (10') fallen.

Spikes or jagged rocks add 1 hp of damage per 3 metres (10') fallen (maximum +10).

DROWNING/SUFFOCATION

Every round that a character spends underwater or amid a gas-cloud, he must make a STR + physical roll or suffer 1d6 damage.

The DC = 10 + 1 per round.

EXTREME HEAT AND COLD.

If not wearing suitable protection, a character must make a Physical +STR check once every 10 minutes.

The DC = 10, +1 per previous check.

1d6 damage is taken on each failed save.

HUNGER AND THIRST

Without food to eat a character must make a Physical + STR check at the end of every day (DC = 10, +1 per additional day) taking 1d6 damage for each failed save.

The same applies if the character is without water except that the penalty increases exponentially (+1 the first day, +3 the second day, +6 the third day and so on).

POISON

Any contact with poison requires a physical + STR DC roll.

If the roll is failed the character takes 1d6 immediate damage.

For a number of additional rounds equal to the amount that the roll was failed by (A natural 1 doubles this), the character must make an additional DC at the start of each round or suffer 1d6 damage.

He also suffers a penalty to ALL d20 rolls (except DC rolls to avoid this poison's additional effects) equal to the amount the roll was failed by.

DISEASE

Any contact with disease requires a physical + STR DC roll. If the DC is failed the character has contracted the disease.

The disease incubates for 1d4 days before symptoms develop.

Symptoms last for a number of days = the amount the physical + STR roll was failed by.

A natural 1 doubles this amount.

While symptoms persist the character (A) suffers a penalty to all D20 rolls equal the number of days the disease will last for (except DC rolls to avoid this disease's additional effects) AND (B) if a daily physical + STR roll fails, loses 1d6 HP permanently.

TRAPS

Each trap has an EL.

To save against a triggered trap requires a physical + DEX roll against a DC = 10 + (EL x 2).

Damage from a trap = 1d6 per EL, although a successful save halves this.

A ROGUE (and only a ROGUE) may attempt to search for AND disable a suspected trap. This requires TWO separate subterfuge + DEX rolls and takes 2d6 rounds.

A trap will have a percentage chance of re-setting itself equal to it EL.

If a trap has any additional features (poison, paralysis etc) simply use the trap's EL as a guide to effects.

DARKNESS

Total darkness gives a -8 penalty to all actions. Monsters with Dark Vision ignore this.

Poor light results in a -4 penalty to all actions. All other monsters only suffer -2 penalty because of their low-light vision.

Monsters with Tremor-Sense, Blind-Sight, Blind Sense or Scent ignore both.

CHARACTER ADVANCEMENT

Add up the Encounter Levels (EL) of every encounter you take part in.

When the total = 10 times your current level multiplied by the number of characters, you've advanced to the next level.

Reset the total to 0 after advancing.

EL = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes.

Eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Monsters

To shape a monster for ICROFANTASY requires the monster's Total Level, Type and the monster's special abilities only.

TOTAL LEVEL

The defining factor with any monster is it's TOTAL LEVEL (TL).

TL = the monster's HD + character level.

A monster with a character level has all of those class's abilities.

A monster's TL attributes are as follows:

- HP = 1d8 per TL. (1d12 for dragons, undead, constructs and oozes).
- AC = 10 + TL.
- Saves and Melee/missile attack bonus = TL
- DC to avoid effects of special attacks or overcome special defences = 10 + TL.
- SKILL bonus = TL (+3 to one skill if intelligent).
- Attack Damage = 1d6 + (1d6 per 5 TL) + TL.

Tougher monsters simply require more HD or (if intelligent) class levels.

If a monster inflicts two types of damage (EG slam/constrict, bite/fire, claw/bite etc.), the damage that is listed second is only inflicted if (a) the first attack hits AND (b) the player FAILS a physical + STR or DEX (whichever higher) roll.

The DC = 10+TL. It is possible to avoid a secondary effect if circumstances allow (IE a character cannot be trampled if he is above an opponent)

SPECIAL ABILITIES

Un-dead, constructs and ooze are immune to all spells that require a MAGIC roll to save against or avoid its effects.

The following special abilities work as follows:

- ABILITY SCORE LOSS = STR + physical save or lose STAT points = half TL (round up). STAT points recovered at rate of 1/day.
- ABILITY DRAIN = as ability score loss but permanent.
- ANTIMAGIC = prevents spell casting around it unless a MAGIC attack roll is made.
- BREATH WEAPON = every 1d4 rounds and effects everyone within range. A successful save halves the damage.
- CHARM/COMPULSION = requires a MIND + level save to avoid. Lasts 1 day or until saved against. A new save can be attempted if asked/commanded to kill, steal, commit arson etc.
- ENERGY DRAIN = HP damage is permanent unless a STR + physical save is made.
- FEAR/FRIGHTFUL = if HD or level is lower than monsters, MAGIC attack roll required to take action against monster that round. A single success overcomes this.
- GAZE = close eyes (treat as total darkness) of avoid effect or make save each round to avoid effect.
- IMMUNITY = failed save roll results in ½ damage. Successful save = no damage.
- INCORPOREAL = any ODD "to-hit" roll misses.
- POISON = a physical + STR roll is required in a round were damage is taken but only 1 roll is required. The DC = 10 + monster's TL.
- RAYS = missile attack. -5 for second ray attack, -10 for third etc.
- REGENERATION = the monster heals this amount of damage at the start of each round. Ordinarily fire and acid damage ignores this.
- RUST = this monster's touch destroys armour or weapon immediately unless a DEX + subterfuge roll is made.
- SPELL RESISTANCE = requires a MAGIC attack against 10 + TL for spell to work against monster.

- SWALLOW WHOLE = the monster can swallow a being no bigger than half it's size if it rolls a natural 20 to hit. Inside, the swallowed being must make a STR + physical save per round or take damage. The creature that makes a save can attempt to cut himself out if he has a blade and can make a second save to do so.
- TURN RESISTANCE = assume HP = 6 higher per point.
- VULNERABLE = successful save takes half damage, failed save takes double damage
- All other abilities = as is.

TREASURE

Monsters can be given treasure following the SRD tables or as determined appropriate by the referee.

Alternatively the value of treasure in coinage a monster has equals $10 \times \text{TL}^2$.

Half of this will be as items.

SAMPLE MONSTERS

A monster's attributes are listed as follows:

Name (TL) / HD / AC + DC / attack / initiative, save and skill bonus (+3 if intelligent or appropriate) / damage / special

DIRE RAT (TL 1) / 1d8 / 11 / +1 / +1 (+4 subterfuge) / 1d6+1/ disease, scent

BUGBEAR (TL3) / 3d8 / 13 / +3 / +3 (+6 physical) / 1d6+3 /

TROLL (TL 6) / 6d8 / 16 / +6,+1 / +6 (+9 physical) / 2d6+6 / claw/bite, regeneration (5), scent. HELL HOUND (TL 4) / 4d8 / 14 / +4 / +4 / 1d6+4 / bite/fire, breath weapon (short range), dark vision, immune to fire, vulnerable to cold.

HILL GIANT (TL 12) / 12d8 / 22 / +12,+7,+2 / +12 (+15 physical) / 3d6+12 / rock throwing (extreme range)

RAKSHASA (TL 7) / 7d8 / 17 / +7,+2 / +7 (+10 knowledge) / 2d6+7 / detect thoughts (as spell, MIND + level to negate), spells (a Rakshasa always casts spells as a Magi of a level equal to it's TL), change shape (at will and for as long as desired), dark vision, spell resistance, damage reduction (15) bypassed by piercing weapons.

TYRANNOSAUR (TL 18) / 18d8 / 28 / +18,+13,+8,+3 / +18 (+21 physical) / 4d6+18 / swallow whole, scent

Magic

SPELLS AND SPELLCASTING

Magi can cast any arcane spell and clerics can cast any divine spell from the SRD spell list.

The maximum spell level that a magi or cleric can cast is equal to $\frac{1}{2}$ their character level (round up).

Both classes know all the spells available of all the spell levels he can cast.

MAGIC POINTS (MP)

The casting of any spell requires the spending of a number of magic points (MP).

A spell caster has a maximum number of MP equal to his maximum number of HP at that level.

Casting a spell requires the spending of a number of MP equal to 1 + double the spell level.

If all MP are spent, then the caster may spend HP instead at a ratio of 2HP-to-1MP.

If a spell caster takes HP damage, he also loses that amount of MP at the same time.

MP are recovered in full after eight hours rest.

A MAGIC attack roll is made and the rolled total is the amount recovered to the maximum initial amount.

A roll of 20 has all MP recovered, while a roll of 1 sees no MP recovered.

If rest is not possible or available, MP are recovered at a rate of 1 per day.

SPELL'S DC

The DC to resist a spell's effects = 10 + the caster's level + caster's MIND bonus.

SIGNATURE SPELLS

Each caster has one "signature" spell per spell level.

The MP cost of casting this spell equals 1 + the spell's level.

TURNING UN-DEAD

A cleric's TURNING ability against un-dead requires the cleric to spend 1d4 MP per attempt.

A MAGIC ATTACK roll is made against a DC = an un-dead's CURRENT HP.

The roll is compared to each individual undead HP within 100'.

Turned un-dead cannot approach within 100' of the cleric for 1 hour per cleric level.

A roll of 20 turns all un-dead. If the totalled roll would have turned the un-dead anyway then the un-dead is destroyed.

A roll of 1 means the cleric cannot attempt to turn un-dead for another 24 hours.

SPELL SAVES

Any spell that inflicts damage should allow a save to half the damage. Any spell that has a negative effect on the character should have a save to prevent this from happening.

A save is normally:

- STR + physical if the character has to ENDURE a physical effect
- DEX + subterfuge if the character has to AVOID a physical effect
- MIND + level if the character has to RESIST a magical effect.

USING SPELLS DIFFERENTLY

If the caster wishes to use a spell in a different but possible manner, such as using a Magic Missile spell to blow out a lock on door, then the caster can do so by making an MAGIC attack roll against a $DC = 10 + (\text{spell level} \times 2)$.

COUNTER SPELLS

A caster may wish to counter-spell a spell cast by another caster either as it is cast or in order to cancel a spell with a durational effect.

This requires a MAGIC attack using the DC of the original caster to resist the spell's effects.

Regardless of success or failure, it costs the counter-casting magi or cleric an amount of MP as if he had cast the original spell himself.

Arcane Spell Book

0-LEVEL ARCANES SPELLS: CANTRIPS

- Arcane Mark: Inscribe a permanent personal rune (visible or invisible).
- Detect Magic: Detects spells and magic items within 60 ft. for up to 1 min./level or until concentration ends.
- Ghost Sound: Figment sounds for 1 round/level. Light: Object shines like a torch for 10 min./level.
- Mage Hand: 5-pound telekinesis. Lasts until concentration ends.
- Prestidigitation: Performs minor tricks for 1 hour.
- Read Magic: Read scrolls and spell books for 10 min./level.

1ST-LEVEL ARCANES SPELLS

- Feather Fall: Objects or creatures fall slowly for 1 round/level or until landing.
- Floating Disk: Creates 3-ft.-diameter horizontal disk that holds 100 lb./level. Lasts for 1 hour/level.
- Mage Armour: Gives subject +4 armour bonus for 1 hour/level.
- Magic Missile: 1d4+1 damage; +1 missile per two levels above 1st (max 5).
- Sleep: Puts 4 HD of creatures into magical slumber for 1 min./level.
- Shocking Grasp: Touch delivers 1d6/level electricity damage (max 5d6).

2ND-LEVEL ARCANES SPELLS

- Acid Arrow: Ranged touch attack; 2d4 damage for 1 round +1 round/three levels.
- Flaming Sphere: Creates rolling ball of fire, 2d6 damage, and lasts 1 round/level.
- Invisibility: Subject is invisible for 1 min./level or until it attacks. 10 min./level.
- Knock: Opens locked or magically sealed door.
- Levitate: Subject moves up and down at your direction for 1 min./level.

- Spider Climb: Grants ability to walk on walls and ceilings for 10 min./level.

3RD-LEVEL ARCANES SPELLS

- Clairaudience/Clairvoyance: Hear or see at a distance for 1 min./level.
- Dispel Magic: Cancels magical spells and effects.
- Fireball: 1d6 damage per level, 20-ft. radius.
- Fly: Subject flies at speed of 60 ft. for 1 min./level.
- Lightning Bolt: Electricity deals 1d6/level damage.
- Vampiric Touch: Touch deals 1d6/two levels damage; caster gains damage as hp that last for 1 hour.

4TH-LEVEL ARCANES SPELLS

- Animate Dead: Creates level X2 HD of undead skeletons or zombies.
- Arcane Eye: Invisible floating eye moves 30 ft./round for 1 min./level.
- Black Tentacles: Tentacles grapple all within 20 ft. spread for 1 round/level.
- Dimension Door: Teleports you short distance.
- Polymorph: Gives one willing subject a new form for 1 min./level.
- Stoneskin: Ignore 10 points of damage per attack. Lasts for 10 min./level or until discharged.

5TH-LEVEL ARCANES SPELLS

- Cloudkill: Kills 3 HD or less; 4-6 HD save or die, 6+ HD take STR damage. Lasts for 1 min./level.
- Contact Other Plane: Lets you ask one question of extraplanar entity. Lasts until concentration ends.
- Feeblemind: Subject's MIND score drops to 1.
- Passwall: Creates passage through wood or stone wall for 1 hour/level.
- Permanency: Makes certain spells permanent.
- Teleport: Instantly transports you as far as 100 miles/level.

6TH-LEVEL ARCANES SPELLS

- Antimagic Field: Negates magic within 10 ft. for 10 min./level.
- Chain Lightning: 1d6/level damage; 1 secondary bolt/level each deals half

damage.

- Contingency: Sets trigger condition for another spell. Lasts for 1 day/level or until discharged.
- Disintegrate: Destroys one creature or object.
- Geas: Commands any creature, binding it to a specific task. Lasts for 1 day/level or until discharged.
- True Seeing: Lets you see all things as they really are for 1 min./level.

7TH-LEVEL ARCANE SPELLS

- Delayed Blast Fireball: 1d6/level fire damage; you can postpone blast for 5 rounds.
- Ethereal Jaunt: You become ethereal for 1 round/level.
- Finger of Death: Kills one subject.
- Plane Shift: As many as eight subjects travel to another plane.
- Power Word Blind: Blinds creature with 200 hp or less for 1d4+1 minutes (permanent if creature has less than 50 hp).
- Spell Turning: Reflect 1d4+6 spell levels back at caster for 10 min./level or until expended.

8TH-LEVEL ARCANE SPELLS

- Clone: Duplicate awakens when original dies.
- Horrid Wilting: Deals 1d6/level damage within 30 ft.
- Incendiary Cloud: Cloud deals 4d6 fire damage/round for 1 round/level.
- Irresistible Dance: Forces subject to dance for 1d4+1 rounds.
- Power Word Stun: Stuns creature with 150 hp or less for 2d4 rounds.
- Trap the Soul: Imprisons subject within gem.

9TH-LEVEL ARCANE SPELLS

- Astral Projection: Projects you and companions onto Astral Plane.
- Etherealness: Travel to Ethereal Plane with companions for 1 min./level.
- Gate: Connects two planes for travel or summoning. Open for 1 round/level.
- Meteor Swarm: Four exploding spheres each deal 6d6 fire damage.
- Power Word Kill: Kills one creature

with 100 hp or less.

- Soul Bind: Traps newly dead soul to prevent resurrection.

Divine Spell Book

0-LEVEL DIVINE SPELLS: ORISONS

- Create Water: Creates 2 gallons/level of pure water.
- Guidance: +1 on one attack roll, saving throw, or skill check. Lasts for 1 min. or until discharged.
- Light: Object shines like a torch for 10 min./level.
- Purify Food and Drink: Purifies 1 cu. ft./level of food or water.
- Resistance: Subject gains +1 on saving throws for 1 minute.
- Virtue: Subject gains 1 temporary hp for 1 minute.

1ST-LEVEL DIVINE SPELLS

- Bless: Allies gain +1 on attack rolls and communication MIND checks against fear for 1 min./level.
- Bless Water: Makes holy water.
- Cure Light Wounds: Cures 1d8 damage +1/level (max +5).
- Divine Favour: You gain +1 per three levels on attack and damage rolls for 1 minute.
- Magic Stone: Three stones gain +1 on attack, deal 1d6 +1 damage. Lasts for 30 minutes or until discharged.
- Shield of Faith: Aura grants +2 or higher AC bonus for 1 min./level.

2ND-LEVEL DIVINE SPELLS

- Aid: +1 on attack rolls and saves against fear, 1d8 temporary hp +1/level (max +10).
- Cure Moderate Wounds: Cures 2d8 damage +1/level (max +10).
- Delay Poison: Stops poison from harming subject for 1 hour/level.
- Gentle Repose: Preserves one corpse.
- Remove Paralysis: Frees one or more creatures from paralysis or slow effect.
- Restoration, Lesser: Dispels magical ability penalty or repairs 1d4 ability damage.

3RD-LEVEL DIVINE SPELLS

- Create Food and Water: Feeds three humans (or one horse)/level.
- Cure Serious Wounds: Cures 3d8

damage +1/level (max +15).

- Prayer: Allies get a +1 bonus on most rolls; enemies take a -1 penalty for 1 round/level.
- Remove Disease: Cures all diseases affecting subject.
- Searing Light: Ray deals 1d8/two levels damage, or 1d8/level against undead.
- Speak with Dead: Corpse answers one question/two levels. Lasts for 1 min./level.

4TH-LEVEL DIVINE SPELLS

- Cure Critical Wounds: Cures 4d8 damage +1/level (max +20).
- Discern Lies: Reveals deliberate falsehoods for 1 round/level or until concentration ends.
- Freedom of Movement: Subject moves normally despite impediments for 10 min./level.
- Neutralize Poison: Immunizes subject against poison for 10 min./level, detoxifies venom in or on subject.
- Restoration: Restores level and ability score drains.
- Tongues: Speak any language for 10 min./level.

5TH-LEVEL DIVINE SPELLS

- Atonement: Removes burden of misdeeds from subject.
- Commune: Deity answers one yes-or-no question/level. Lasts for 1 round/level.
- Cure Light Wounds, Mass: Cures 1d8 damage +1/level for many creatures.
- Flame Strike: Smite foes with divine fire (1d6/level damage).
- Raise Dead: Restores life to subject who died as long as one day/level ago.
- True Seeing: Lets you see all things as they really are for 1min./level.

6TH-LEVEL DIVINE SPELLS

- Banishment: Banishes 2 HD/level of extraplanar creatures.
- Cure Moderate Wounds, Mass: Cures 2d8 damage +1/level for many creatures.
- Harm: Deals 10 points/level damage to target.
- Heal: Cures 10 points/level of damage,

- all diseases and mental conditions.
- Heroes' Feast: Food for one creature/level cures disease and grants +1 combat bonus for 12 hours. Lasts for 1 hour.
- Quest: Commands any creature, binding it to a specific task. Lasts for 1 day/level or until discharged.

7TH-LEVEL DIVINE SPELLS

- Cure Serious Wounds, Mass: Cures 3d8 damage +1/level for many creatures.
- Destruction: Kills subject and destroys remains.
- Ethereal Jaunt: You become ethereal for 1 round/level.
- Regenerate: Subject's severed limbs grow back, cures 4d8 damage +1/level (max +35).
- Restoration, Greater: As restoration, plus restores all levels and ability scores.
- Resurrection: Fully restores a dead subject from a small portion of the corpse.

8TH-LEVEL DIVINE SPELLS

- Antimagic Field: Negates magic within 10 ft. for 10 min./level.
- Cure Critical Wounds, Mass: Cures 4d8 damage +1/level for many creatures.
- Dimensional Lock: Teleportation and interplanar travel blocked for 1 day/level.
- Discern Location: Reveals exact loc of create or object.
- Fire Storm: Deals 1d6/level fire damage.
- Holy Aura: +4 to AC, +4 resistance, and SR 25 against evil spells for 1 round/level.

9th-Level Divine Spells

- Astral Projection: Projects you and companions onto Astral Plane.
- Etherealness: Travel to Ethereal Plane with companions for 1 min./level.
- Gate: Connects two planes for travel or summoning. Open for 1 round/level.
- Heal, Mass: As heal, but with several subjects.

- Implosion: Kills one creature/round for 4 rounds or until concentration ends.
- Soul Bind: Traps newly dead soul to prevent resurrection.

ALTER MICROLITE20 v0. 7

Alter Microlite20 by Lucas "Atmo" Leonardo Vieira Belo , Copyright 2010 (zephos2@gmail.com). This game was based on "Microlite20 RPG Collection Spring 2010 Revised". For more Microlite20 awesomeness, head over to the Microlite20 website at <http://www.koboldenterprises.com>. Copyright of all images to owners, whoever they may be.

Stats

There are 4 stats : Strength (STR), Dexterity (DEX), Mind (MIND) and Charisma (CHA).

Strength: physical strength and toughness.

Dexterity: hand-eye coordination and quickness.

Mind: intelligence and wisdom.

Charisma: personal appeal, charm and presence.

Roll 1d6 and allocate to one of the stats. Repeat for remaining stats.

OR

Use the numbers 4, 3, 2 and 2 to assign stats.

Races

Human: +1 to any four skills **OR** +2 to any two skills and *Many Talents*: When you use this ability, roll 1d6 along with the 1d20 you normally roll when attacking or making a stat + skill roll. Add the results together to find your final die result for the attack or action. You can use this ability successfully 3 times per day.

Lycanthrope or Were-Creature: +1 Strength, +1 Dexterity **OR** +1 Dexterity and

Alternate Form: You can transform into a specific type of wild animal, and only that type of animal, a number of turns per day equal to your STR bonus. You do not gain hit points for changing into your alternate form using this special ability, but use the statistics and bonuses of the creature instead of your own while in animal form. You cannot speak, use equipment or other abilities of your original form when in animal form.

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Tribal: +2 Dexterity **OR** +1 Dexterity and

Wilderness Mastery: When in a natural, tree-filled location like a forest or jungle (but not mountains or oceans), add +3 to any stat + skill roll that involves nature, like DEX + Subt to hide in the trees, or MIND + Surv to track an enemy. This bonus is not applied to attack rolls.

Dwarf: +2 Strength **OR** +1 Strength and

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Stand Fast: If an enemy attempts to knock you down or push you in any direction, make a STR + Phys +3 roll (DC is enemy's STR + Phys). On a success, the enemy's attempt fails, and you stay in place.

Elf: +2 Dexterity **OR** +1 Dexterity and

Poison: All of your attacks using weapons cause an additional 1 point of poison damage.

Spider-Kin: You will never be attacked by a spider-type monster, and can even ride them with a DEX + Surv roll.

Cat-Folk: +2 Dexterity **OR** +1 Dexterity and

Agility: On a DEX + Phys roll to leap or climb, add +3 to your roll.

Claws: You have a set of claws in your fingers you can instantly reveal or hide. They cause 1d4 +1 damage.

Night Vision: You have magic night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Golem: +2 Strength **OR** +1 Strength and

Durable: You have a natural Armor of 3.

Succubus: +2 Charisma **OR** +1 Charisma and

Flight: You can fly as fast as you walk on dry land.

Sex Healing: You immediately heal hit points equal to your level while having sexual relations.

Classes

Fighters wear any kind of armour and use shields. They have Physical, Fighting and Dodge as Primary Skills and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on.

Rogues can use light armour. They have Subterfuge, Archery

and Dodge as Primary Skills. If they successfully Sneak (usually sub+DEX, but depends on situation) up on a foe they can add their Subterfuge skill rank to the damage of their first attack.

Magi wear no armour. They can cast spells, and gain Knowledge as Primary Skill.

Advanced Classes

When Characters reaches level 3 they can choose a specialization. Every Advanced Class have unique abilities, so don't forget to try various team combinations.

Fighter Classes:

Blacksmiths can create elemental weapons even during a combat, but its duration is reduced. When used in combat, the weapon duration is equal to Character level. Using a atelier and good materials, the Blacksmith can produce various types of weapons with normal duration.

Brawlers can fight with their bare fists, delivering a good amount of damage without weapons. Use Dual Wield rule when fighting, each hand hitting with 1d6 damage.

Knights can double their Armor bonus when protecting someone helpless or unarmed, once per scene.

Berserkers can enter in a frenzied state, increasing their melee damage by 2d6 and reducing their Armor to 0. Make a MIND+level test with DC equal to 10 + level to calm down; otherwise, they will attack whoever looks alive. They can be manipulated with ease in this state.

Rogue Classes:

Shinobi/Kunoichi can use their Shadow Arts to assassinate whoever they want or must. They trade Archery for Fighting as Primary Skill and can cast some spells. They can't alter magic.

Snipers can hit targets from afar with their long-range weapon, with doubled range. Their Sneak tests would apply if they don't are in target's vision range.

Magie Classes:

Singers can use Musical Magic, covering support and healing magic. Singers can also manipulate wind to create instrumental music. They can't alter magic.

Wizards can create special items. Essentially, Wizards/Witches are creators of magical artifacts. Additionally, Detect Magic may be cast at-will.

Necromancers can use Death Magic, create undead from dead bodies, modify living beings with parts from other creatures or become a undead (lich). Essentially, Necromancer are scientists.

Skills

Physical, Subterfuge, Knowledge, Communication and Survival. Roll higher than the given Difficulty Class to succeed.

Physical: covers any activity where the body plays a part in deciding the outcome such as jumping, bashing, swimming, etc.

Subterfuge: i stealth, deception, or thievery such as hiding, moving silently or picking a lock.

Knowledge: i everything from geography and history to environment and can be used to identify monsters, recognize religious symbols or heal someone.

Communication: interacting with the GM's characters or monsters when you are trying to be diplomatic, convincing or proving a point.

Survival: tracking, foraging (in the woods or a city), hunting, determining direction or anything that helps a character to survive in their surroundings.

Fighting: armed or non-armed combat techniques.

Archery: ranged combat techniques.

Dodge: avoid incoming attacks.

Primary Skill rank = your level + any bonus due to your class or race.

Other Skills rank = half level + any bonus due to your class or race.

Skill roll = 1d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers.

Difficulty	DC	Example
Very easy	0	Notice something large in plain sight.

Easy	5	Climb a knotted rope.
Average	10	Hear an approaching guard.
Tough	15	Rig a wagon wheel to fall off.
Challenging	20	Swim in stormy water.
Formidable	25	Open an average lock.
Heroic	30	Leap across a 9 meters chasm.
Epic	40	Track a squad of orcs across hard ground after 24 hours of rainfall.

For example, Climbing would use Physical + STR. Dodging a falling rock is Physical + DEX. Finding a trap is Subterfuge + MIND. Disabling a trap is Subterfuge + DEX.

Note that there are no "saving throws" in this game; use your Level + STR or DEX for Fortitude (poison) and Reflex (avoid big things, like breath) saves. Saving against magic (Will save) is usually MIND + your level.

Magic

Casting a spell of any kind costs Skill Points. The cost is the level of the spell being cast. To determine the spell levels that the character is capable to cast, divide his level by 2, round up. The Difficulty Class (DC) for all spells is **15 + Caster Level**.

Alter spells is easy, but some rules need to be follow:

Extending makes a spell last twice as long as it normally would. Cost: +2 SP.

Empowering makes a spell do 50% more damage than it normally would. Cost: +3 SP.

Widening makes a spell's area of effect twice as big as it would normally be. Cost: +4 SP.

Silenced spells don't require words to be cast. Cost: +1 SP.

Still spells don't need gesture to be cast. Cost: +1 SP.

Remember: everyone needs to study new spells to learn them.

Combat

Hit Points (HP) = 10 + STR + 1d6+4 if Fighter, 1d6+2 if Rogue or 1d6 if Mage. If HP reach 0, unconscious and near death. Further damage directly reduces BP.

Body Points (BP) = 20. If you aren't bandaged or otherwise healed by the end of combat, you must roll STR+Phys versus DC 10+level or die. If you success in the save, you recover to 1 HP after a few hours. If a dying character is struck again, he dies instantly.

Special Points (SP) = MIND + 1d6 if Fighter, 1d6 if Rogue or 1d6+4 if Mage.

Initiative: Roll 1d20 + DEX bonus. Everyone can do one thing each turn; move, attack, cast a spell, etc. Every turn lasts 5 seconds.

Cover: If you duck behind an object, you can gain +2 to +10 to your Dodge against ranged attacks, depending on the extent of the cover (light cover = +2 all the way to nearly complete = +10). Half this Dodge bonus may also apply to saves if the GM allows it.

Attacking: Add combat skill bonus to 1d20 roll (Fighting if melee, Archery if distance or Magic if magic). If higher than your opponent's Dodge, it's a hit. Natural 20 is automatically a critical doing *double damage*.

Dual Wield: Fighters and Rogues can use DEX bonus + Level as

Fighting skill if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

Add STR bonus to Melee damage, x2 for 2-handed weapons.

Dodge (D) = 10 + DEX + Dodge skill. Used to avoid incoming melee or missile hits.

Armor (A) = protection equipment bonus. Used to reduce physical damage taken.

Weapons Damage

Light weapons = 1d6 damage.

One-handed weapons = 2d6 damage.

Two-handed weapons = 3d6 damage.

Armor Protection

Light armor = 2 Armor bonus.

Medium armor = 4 Armor bonus and -2 to all Dodge skills.

Heavy armor = 8 Armor bonus and -4 to all Dodge skills.

Other Hazards

Falling : 1d6 damage per 10', half damage on Phys+DEX save.

DC=depth fallen in feet

Spikes : add +1 point to falling damage per 10' fallen, max +10

Poison : Phys+STR save to avoid or for half, depending on poison. Effect varies with poison type.

Extreme Heat & Cold : If not wearing suitable protection, Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Level Advancement

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds:

Fighter:

HP = 1d6+4+STR

SP = 1d6+MIND

Rogue:

HP = 1d6+2+STR

SP = 1d6+MIND

Mage:

HP = 1d6+STR

SP = 1d6+4+MIND

If the level divides by three (i.e. level 3, 6, 9, etc.) add 1 point to STR, DEX, MIND or CHA.

Fighters gain +1 to their attack and damage rolls at levels 5, 10, 15, etc.

Magi and Shinobi/Kunoichi gain access to new spell levels at levels 2, 4, 6, 8, etc.

General Spells

1st -Level Spells

Detect Magic: Detects spells and magic items.
Light: Object shines like a torch for 1 hour.
Cause Fear: One creature of 5 HD or less flees for 10 minutes.
Comprehend Languages: You understand all spoken and written languages for 1 minute.
Magic Missile: 1d6 damage; +1 missile per level above 1st (max 5).
Sleep: Puts 4 HD of creatures into magical slumber for 1 minute.
Charm Person: Makes one person your friend for 1 day.

2nd -Level Spells

Invisibility: Subject is invisible until it attacks.
See Invisibility: Reveals invisible creatures or objects.
Web: Fills area with sticky spiderwebs.
Grease: Makes area or one object slippery for 1 hour.
Detect Thoughts: Allows "listening" to surface thoughts.
Hold Person: Paralyzes one humanoid for 1 minute.

3rd -Level Spells

Summon Monster: Calls extraplanar creature to fight for you.
Remove Curse: Frees object or person from curse.
Zone of Truth: Subjects within range cannot lie for 5 minutes.
Elemental Shield: Reduces chosen elemental damage in 10 points for 10 turns.

4th -Level Spells

Magic Rocket: 5d6 damage for 1 rocket.
Vanish: Turn large objects invisible for 1 day.
Barrier: Creates a magical barrier with 30 HP; enemy melee damage is blocked by this barrier, breaking when 0 HP.
Charm Monster: Makes monster believe it is your ally for 1 day.

5th -Level Spells

Polymorph: Transforms subject into harmless animal.
Seeming: Changes appearance of one person per two levels.
Telepathic Bond: Link lets allies communicate for 1 hour.

6th -Level Spells

Petrify: Turns subject creature into statue.
True Seeing: Lets you see all things as they really are. 50 XP must be spent to cast this spell.
Dominate Person: Controls humanoid telepathically.

Necromancer Spells

1st -Level Spells

Deathwatch: See who is injured, dead or undead.

2nd -Level Spells

Command Undead: Undead creature obeys your commands.
Animate Dead: Creates undead skeletons and zombies.

3rd -Level Spells

Gentle Repose: Preserves one corpse.
Speak with Dead: Corpse answers one question/two levels.

4th -Level Spells

Soul Bind: Traps newly dead soul to prevent resurrection.

5th -Level Spells

Disintegrate: Makes one creature or object vanish.

6th -Level Spells

Raise Dead: Restores life to subject who died as long as 1 day/level ago.

7th -Level Spells

Clone: Duplicate awakens when original dies.

Wizard/Witch Spells

1st -Level Spells

Create Scroll: Store a spell you cast in a scroll to be released when read.

2nd -Level Spells

Brew Potion: Store a spell you cast in a potion to be released when quaffed.

3rd -Level Spells

Create Golem: Creates constructs made of dead material. The entire procedure takes a day. HD of Golem is equal to caster's level.

4th -Level Spells

Create Magic Item: Permanently enchant masterwork items including arms and armor with effects that are thematically

linked to a spell you cast. The entire procedure takes a day. The item has to be custom made using rare ingredients.

Permanency: Makes certain spells permanent. The entire procedure takes a day.

5th -Level Spells

Planar Binding: Traps extraplanar creature of 6 HD or less until it performs a task.

Teleport: Instantly transports subjects hundreds of miles.

6th -Level Spells

Dream World: Creates a permanent portal to a new pocket dimension.

Plane Shift: Subjects travel to another plane.

Astral Projection: Projects you and companions into Astral Plane.

Singer Spells

1st -Level Spells

Bless: Allies gain +1 on attack rolls for 10 turns.

Cure: Cures 1d6/level damage (max 5d6).

Shield: Armor +1/4 levels for 10 turns.

2nd -Level Spells

Ghost Instrument: Control wind to make instrumental sounds with the help of an summoned instrument.

Haste: Allies move faster and get a second melee attack. This lasts for 1 turn only.

Shout: Deafens all within 10m*5m cone and deals 5d6 sonic damage.

3rd -Level Spells

Dispel Magic: Cancels magical spells and effects.

Major Bless: Allies gain +5 on attack rolls for 10 turns.

Major Cure: Cures 1d6/level damage (max 10d6).

Major Shield: Armor +1/level for 5 turns.

4th -Level Spells

Greater Shout: Deafens all within 20m*10m cone and deals 8d6 sonic damage.

5th -Level Spells

Restoration: Restores level and stat drains.

6th -Level Spells

Raise Dead: Restores life to subject who died as long as 1 day/level ago.

Shinobi/Kunoichi Spells

1st -Level Spells

Detect Poison: Detects poison in one creature or object.

2nd -Level Spells

Spider Climb: You can walk on walls and ceilings for 1 minute.

3rd -Level Spells

Wind Walk: Targets turn to dust/sakura petals/whatever and fly in a gust of wind.

4th -Level Spells

Scrying: Spies on subject from a distance.

5th -Level Spells

Neutralize Poison: Immunizes subject against poison, detoxifies venom in or on subject.

6th -Level Spells

Shadow Walk: Take subjects into shadow to travel rapidly for 1 minute.

UltraMicrolite 20

By greywulf 7/28/08, Last revised by Andrew Domino at Domino Writing (9/13/15)

This is Microlite 20 boiled down even further. It's suitable for gaming while out walking or when you've forgotten your gamebooks. If you don't have 1d20, use 3d6 to get close enough.

There are 4 stats: STRENGTH (how tough you are), DEXTERITY (how quick you are), MIND (how smart you are) and CHARISMA (how charming you are).

- Decide which one you're *extremely* good at; it has a bonus (rating) of 3. Decide which stat you're *very* good at; it has a bonus of 2. You're *pretty* good at the other two stats; each has a bonus of 1.

There are 4 skills: Physical (trying), Subterfuge (tricking), Communication (talking) and Knowledge (thinking).

- Pick the skill you're *best* at; it has a bonus of 4. The other skills have a bonus of 1.

There are two types of Wounds: Each character starts with 3 Body Wounds and 3 Social Wounds.

Actions are resolved by rolling 1d20 + relevant skill bonus + relevant stat bonus. Roll equal or higher than the given Difficulty Class (DC) or higher than the opponent's roll to succeed. DC is usually 10 (average action) or 15 (challenging action). Describe what your character is doing in an entertaining way, and add +1 or +2 to your action roll.

Combat is an action roll using Physical + STRENGTH bonus (for melee/hand-to-hand), Physical + DEXTERITY bonus (for missile/ranged), Knowledge + MIND bonus (for magic/supernatural) or Communication + CHARISMA bonus (for social combat). Roll 1d20 without bonuses to determine initiative. Some weapons provide an additional bonus to the attack roll:

- +1 Weapon In Each Hand (melee/hand-to-hand or missile/ranged)
- +2 Big Sword (melee/hand-to-hand) or Automatic Pistol (missile/ranged)
- +4 Shotgun or Automatic Rifle (missile/ranged)

Make an action roll for the defender using the same pair of skill and stat bonuses to determine the DC for the attack. If armor would help the defender, it adds the listed bonus:

- +1 Leather
- +3 Chainmail or Bulletproof Vest
- +5 Plate Mail or Riot Gear

Damage: If the attacker's roll is greater than or equal to the defender's DC, the attack hits, and the defender loses 1 Body Wound (caused by swords, guns, fire, psychic blasts, etc.), or 1 Social Wound (caused by insults, intimidation, etc.). Normally you cannot recover Wounds until after combat.

If you fall to 0 (zero) Body Wounds, you're unconscious. Roll Physical + STR bonus (DC 15) to recover from the battle without serious injury; if you fail this roll, you may have an impressive battle scar, one missing eye, or even a severe fear of some horrifying type of creature. After a combat encounter, you reset to 3 Body Wounds. Larger critters can take more hits before dying. In the same way, mooks (easily defeated foes) may be able to take one hit each.

If you fall to 0 (zero) Social Wounds, you're outwitted. You lose the combat and it's up to the winner to decide what happens. Immediately after the combat encounter, you reset to 3 social wounds.

Advancement: When your character has accomplished a major goal in the story, add +1 to any two skills.

For example, a hero draws a pistol and shoots at a guard. He rolls Physical + DEXTERITY bonuses (+2 for his pistol) against the guard's Physical + DEXTERITY bonuses and fails. The guard loses no Body Wounds.

Another hero tries to sweet-talk her way past a nightclub bouncer to get inside. She rolls Communication + CHARISMA bonuses against the bouncer's Communication + CHARISMA bonuses and succeeds. The bouncer "suffers" one Social Wound — he's falling for her smooth lines.

Nanolite20

by Ewookie

PRIMARY ATTRIBUTES

STR - Strength (Strength/Constitution)

COR - Coordination (Dexterity/Agility)

AWR - Awareness (Intelligence/Wisdom/Intuition)

Starting characters have scores of 0 in each attribute. They are given 3 points to distribute between the 3 Primary Attributes.

SECONDARY ATTRIBUTES

DR - Defense Rating (AC) = $10 + \text{COR or AWR} + \text{armor bonus}$

PEP - Physical Endurance Points (HP) = $5(\text{STR}) + 15$

MEP - Mental Endurance Points = $5(\text{AWR}) + 15$

CHARACTER PATHS

Fighter - Fighters fight. Nuff said.

They may use any armor or weapon at hand.

Rogue - Rogues are skilled and cunning.

They can only use 1-handed melee weapons.

They can use any ranged weapon.

They can only use light armors and shields.

Mystic - Mystics cast spells. Nuff said.

They can only use 1-handed melee weapons or staves.

They can only use light armors and shields.

SKILLS

There are 4 basic skills : Physical, Subterfuge, Knowledge and Communication.

Roll higher than the given Difficulty Rating to succeed.

Skill rank = your level + any bonus due to your class or race.

Skill roll = $d20 + \text{skill rank} + \text{whatever stat is most applicable to the use}$
+ situation modifiers

For example, Climbing would use Physical + STR. Dodging a falling rock is Physical + COR or AWR. Finding a trap is Subterfuge + AWR. Disabling a trap is Subterfuge + COR.

Fortitude = Physical + STR

Reflex = Physical + COR or AWR

Will = AWR + level

Each class has class-specific skills:

Fighter Feats

Fighters can expend 1 PEP beforehand to modify their attack and Physical skill rolls by 1. This is stackable. They may expend 2 PEP to make an extra attack or force a successful attacker to re-roll their attack. Also, they can expend MEP to heal PEP by the same amount.

Rogue Tricks

Rogues can expend 1 PEP beforehand to modify their attack and Subterfuge skill rolls by 1. This is stackable. They may expend 2 PEP to make an extra attack or force a successful attacker to re-roll their attack. They may expend MEP to cast spells from scrolls or modify their Knowledge and Communication skill rolls. Also, they can expend MEP to heal PEP by the same amount.

Mystic Spells

Mystics can only expend PEP to recoup MEP. Mystics expend MEP to cast or enhance their spells.

The MEP cost to cast a spells is as follows:

Spell MEP Cost = Spell Level + 1

COMBAT

Melee Combat

One-handed Weapons

Attack =

$(1d20* + \text{COR} + \text{attacker's level} + \text{weapon's average damage})$

- Target's DR

*If 1d20 = 20, then roll 1d20 again and add to previous d20 rolls

If Attack > 0, then Damage inflicted on target = Attack

If Attack <= 0, then the attack failed

Two-handed Weapons

Attack =

$(1d20* + \text{STR} + \text{attacker's level} + \text{weapon's average damage})$

- Target's DR

*If 1d20 = 20, then roll 1d20 again and add to previous d20 rolls

If $\text{Attack} > 0$, then Damage inflicted on target = Attack

If $\text{Attack} \leq 0$, then the attack failed

Ranged Combat

Attack =

$(1d20 * + \text{COR} + \text{attacker's level} + \text{weapon's average damage})$

- Target's DR

*If $1d20 = 20$, then roll $1d20$ again and add to previous d20 rolls

If $\text{Attack} > 0$, then Damage inflicted on target = Attack

If $\text{Attack} \leq 0$, then the attack failed

Magic Combat

Target must make a Magical Defense Check (MDC) vs. the Difficulty Rating (DR) of the spell.

$\text{DR} = \text{Caster's Level} - \text{Spell's Level} + \text{Caster's AWR} + 10$

$\text{MDC} = 1d20 + \text{AWR} + \text{level}$

Physical Damage is subtracted from PEP while PEP is greater than zero. When PEP reaches zero, the character loses all STR and COR bonuses. Subsequent damage is subtracted from MEP. When MEP and PEP reach zero, the character is dead. If MEP reaches zero but $\text{PEP} > 0$, the character is unconscious, cannot make any actions, and their DR = only their armor bonus.

PEP regens at 2 PEP/day. Healing spells, potions, etc. only affect PEP.

MEP regens at 1 MEP/hour of sleep. Sleep is the only method of restoring MEP for Fighters and Rogues.

ADVANCEMENT

$\text{Target XP} = \text{current level} * 100$

When the target XP is reached, level or one stat may be raised by 1 point. However, the total of all stats must be ≤ 12 and no stat can be > 5 . If the player chooses to raise a stat instead of their level, current XP is reset to 0 and their level stays the same. If they choose to increase their level, they receive 5 Endurance Points to allot to PEP or MEP. They can split these points between PEP or MEP however they choose or they invest all 5 points in one or the other.

Microlite20 Modern

The Modern version of Microlite20 is designed to be as close to the Modern SRD, but adapted to work with the Microlite20 Core Rules.

Basics

Stats, Races, Magic, Combat, Name and Starting Equipment, Other Hazards and Level Advancement are as per the Microlite20 Core Rules modified as appropriate for your campaign.

Classes

Microlite20 character classes actually have two parts: Heroic Class and Starting Occupation. Characters begin at Level 1.

The Heroic Classes are the broad and basic definition of the characters abilities. Think of it as their natural gifts. Select one of the Heroic Classes as follows:

Strong Hero gain +1 to Physical.

Smart Hero gain +1 to Knowledge.

Cunning Hero gain +1 to Subterfuge.

Charismatic Hero gain +1 to Communication.

Starting Occupations are more detailed and specialized aspects of the character's abilities. They represent what the character has learned. Select one of the Starting Occupations as follows:

Academic

Skill Bonus: Knowledge +2

Adventurer

Skill Bonus: Physical +2

Athlete

Skill Bonus: Physical +2

Blue Collar

Skill Bonus: Physical +2

Celebrity

Skill Bonus: Communication +2

Creative

Skill Bonus: Knowledge +1 and Physical +1

Criminal

Skill Bonus: Subterfuge +2

Dilettante

Skill Bonus: Physical +1 and Subterfuge +1

Doctor

Skill Bonus: Knowledge +2

Emergency Services

Skill Bonus: Knowledge +1 and Physical +1

Entrepreneur

Skill Bonus: Knowledge +1 and Subterfuge +1

Investigative

Skill Bonus: Communication +1 and Knowledge +1

Law Enforcement

Skill Bonus: Physical +1 and Subterfuge +1

Military

Skill Bonus: Physical +2

Religious

Skill Bonus: Communication +1 and Knowledge +1

Rural

Skill Bonus: Physical +2

Student

Skill Bonus: Knowledge +2

Technician

Skill Bonus: Knowledge +2

White Collar

Skill Bonus: Communication +1 and Knowledge +1

Combat

The rules for combat are the same as Microlite20 Core Rules, except for the following:

The bonus given to Fighters and Rogues in Microlite20 Core Rules is available to characters in Modern with the following Starting Occupations: Criminal, Law Enforcement and Military. Firearms use the Missile Attack Bonus rule found in Microlite20 Core Rules.

Burst Fire: an automatic firearm can fire a small burst at a single opponent. For a -4 penalty to the attack roll, the shooter gets double the dice for damage (a firearm that does 2d6 would do 4d6 with burst fire).

Autofire: an automatic firearm can spray fire into a 10 foot by 10 foot area with bullets; the attack must hit an effective AC 10 with a -4 penalty. If they make the roll, anyone in the area must make a Dexterity Check (DC 15) or be hit.

Thrown Explosives: These weapons (usually grenades) requires the attacker to make a Missile Attack (no penalty) targeting a particular 5 foot by 5 foot area, which is a DC 10 roll. Anyone caught within the blast radius (see the explosives details in the SRD) can make a Dexterity Check (DC is listed with the explosive) and only take half damage.

Action Points

The player characters, being heroes, can accomplish amazing feats. Action Points aid them in this by adding an additional die to their die rolls.

When a player makes a roll for an attack, a skill check, or a stat check and is not satisfied by the result they can spend the point and roll a d6, add it to the total before the GM says if they succeeded on their 1st roll. They may spend only one point per round.

A character starts with 5 Action Points. As they spend them, they don't replenish until they reach their next level. Each level attained grants 5 + one-half their level, rounded down more points. When they reach 8th level, when spending a point they get to roll 2d6 and take the better of the two rolls; at 15th level, they get 3d6, take the best of the three die.

Explosive	Damage	Burst Radius	Dex DC

Creatures

Name	Hit Dice	AC	Attack
Ape	4d8+8 (26 HP)	14	Claw +7 (1d6+5), Bite +2 (1d6+2)
Baboon	1d8+1 (5 HP)	13	Bite +2 (1d6+3)
Bat	¼ d8 (1 HP)	16	
Bear, Black	3d8+6 (19 HP)	13	Claw +6 (1d4+4), Bite +1 (1d6+2)
Bear, Brown	6d8+24 (51 HP)	15	Claw +11 (1d8+8), Bite +6 (2d8+4)
Bear, Polar	8d8+32 (68 HP)	15	Claw +13 (1d8+8), Bite +8 (2d8+4)
Boar	3d8+9 (22 HP)	16	Gore +4, (1d8+3)
Camel	3d8+6 (19 HP)	13	Bite +5 (1d4+6)
Cheetah	3d8+6 (19 HP)	15	Bite +6 (1d6+3), Claw +1 (1d2+1)
Crocodile, Medium Size	3d8+9 (22 HP)	14	Bite +6 (1d8+6), Tail Slap +6 (1d12+6)
Crocodile, Huge Size	7d8+28 (59 HP)	16	Bite +11 (2d8+12), Tail Slap +11 (1d12+12)
Dog, Small Size	1d8+2 (6 HP)	14	Bite +2 (1d4+1)
Dog, Medium Size	2d8+4 (13 HP)	14	Bite +3 (1d6+3)
Donkey	2d8+2 (11 HP)	13	Bite +1 (1d2)
Eagle	1d8+1 (5 HP)	14	Claw +3 (1d3), Bite -2 (1d4)
Elephant	11d8+55 (104 HP)	15	Gore +16 (2d8+15), Slam +16 (2d6+10), Stomp +11 (2d6+5)
Hawk	1d8 (4 HP)	17	Claw +5 (1d4-2)
Herd Animal	5d8+15 (37 HP)	13	Butt +6 (1d8+6), Trample +6 (1d12)
Horse	3d8+6 (19 HP)	13	Hoof +2 (1d4+1)
Leopard	3d8+6 (19 HP)	15	Bite +6 (1d6+3), Claw +1 (1d3+1)
Lion	5d8+10 (32 HP)	15	Bite +2 (1d8+2), Claw +7 (1d4+5)
Octopus	2d8 (9 HP)	16	Tentacle Rakes +5 (0), Bite +0 (1d3)
Octopus, Giant	8d8+8 (44 HP)	18	Tentacle Rakes +10 (1d4+5), Bite +5 (1d8+2)
Monkey	1d8 (4 HP)	14	Bite +4 (1d3-4)
Owl	½ d8 (2 HP)	17	Claw +5 (1d2-2)
Rhinoceros	8d8+40 (76 HP)	16	Gore +13 (2d6+12)
Shark, Medium Size	3d8+3 (16 HP)	15	Bite +4 (1d6+1)
Shark, Huge Size	10d8+20 (65 HP)	15	Bite +10 (2d6+7)
Tiger	6d8+18 (45 HP)	14	Claw +9 (1d8+6), Bite +4 (2d6+3)
Whale, Orca	9d8+45 (85 HP)	16	Bite +12 (2d6+12)
Wolf	2d8+4 (13 HP)	14	Bite +3 (1d6+1)
Wolverine	3d8+12 (25 HP)	14	Bite -1 (1d6+1), Claw +4 (1d4+2)

Skills: The rules for Creature Skills are the same as Microlite20 Core Rules, except: all non-intelligent creatures have a bonus to Physical and Subterfuge skills equal to their number of hit dice.

Advancement: The rules for Creature Advancement are the same as Microlite20 Core Rules, except: for Supporting Cast, each increase in Hit Dice adds 3 skill points to divide up amongst their skills as desired.

Create your own: The rules for creating your own creatures are the same as Microlite20 Core Rules.

1. Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; (d) "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10 Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12 Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13 Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14 Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

M20 Modern: Expert

By Weeot

This is another attempt at a M20 modern rules set. It is fully compatible with, and utilizes, both M20 Core and Expert rules, with a few additions. It is designed to be totally compatible with both Modern SRD and Fantasy SRD. M20 Core, Expert, and Modern characters are equally matched.

Stats

There are 4 stats: Strength, Dexterity, Mind, and Charisma. They are calculated normally.

Races

Humans are the most common race in modern-setting games and they retain their +1 bonus to all skills.

Classes

There are 4 Heroic classes. Each of them is able to use Light armor.

Strong Hero +2 Strength each Strong Level 1, 3, 6, 9, etc.

Fast Hero +2 Dexterity each Fast Level 1, 3, 5, 9, etc.

Mindful Hero +2 Mind each Mindful Level 1, 3, 5, 9, etc.

Charismatic Hero +2 Charisma each Charismatic Level 1, 3, 5, 9, etc.

Multi-Classing

Characters are specialized by a combining different Heroic Classes and an Occupation. Heroic classes may be changed every 3rd Level, thus allowing a character to be a Strong hero first, add becoming a Fast hero upon Level 3, and return to being Strong again at Level 6. Track of how many levels are taken in each Heroic class and total them to determine Character Level (referred to merely as "Level" in Core and Expert rules).

Occupation

Select an occupation from the following list. Occupations may not be changed. Academic, Adventurer, Athlete, Blue Collar, Celebrity, Creative, Criminal, Dilettante, Doctor, Emergency Services, Entrepreneur, Investigative, Law Enforcement, Military, Religious, Rural, Student, Technician, White Collar.

Add either +3 to one skill or +2 to two skills. Furthermore, you may add +1 to any d20 checks relevant to your character's occupation (subject to GM's approval). This bonus increases by +1 at level 5, 10, 15, and 20. (GM Note: Attack bonuses should be limited to very specific mundane or improvised weapons.)

Skills

Rather than using Survival as the extra skill from Expert rules, replace it with Urbana. Urbana describes one's ability to use information-age technology, drive automobiles, etc.

Heroism

Use it.

Combat

AC is different in the modern world because most people do not wear armor.

AC 10+DEX+Armor+1/2 Character Level.

Massive Damage Threshold: If more damage is taken than amount of Strength score by any one attack, make Strength DC 15 save. If failed then HP reaches 0 and near death.

Remember that Modern heroes are not Core heroes, and as such do not gain the combat advantages of those classes. Thus using two light weapons incurs a -4 penalty rather than a -2, and Modern heroes may not use DEX to make melee attacks.

Burst Fire: -6 to hit; double damage dice.

Automatic Fire: Targets a 10ft square. DC 14 to hit. Occupants take weapon's damage DEX save (DC 15) halves.

Wealth

Starting= 2d4+1.

Every character has a Wealth bonus that reflects his or her buying power. A character's Wealth bonus serves as the basis of the character's Wealth check, which is used to purchase equipment

and services for the character. Determine how buying and selling items raises or lowers your Wealth bonus by comparing it with the Purchase DC.

1–10 greater than Wealth bonus	1 pt
11–15 greater than Wealth bonus	1d6 pts
16+ greater than Wealth Bonus.	2d6 pts

However, making a transaction with an item of Purchase DC 15+ will always modify your wealth by at least 1. This stacks with loss/gain resulting from the table above.

Wealth Check: d20 + Wealth vs. Purchase DC.

Selling equipment valued less than or equal to current wealth bonus (and less than 15) does not raise Wealth. The sale value is equal to the object's purchase DC (as if purchased new) minus 3.

Equipment

Use the Modern SRD equipment tables.

Vehicles

Vehicles are much like other equipment in that they provide modifiers to character rolls. They have a Maneuver (modifies operation checks), Defense (vehicle's AC), Hardness/HP (Damage reduction and Hit Points), and Purchase DC (Cost). Vehicle speed is expressed in five categories with accompanying modifiers: Stationary and Slow Speed (0), Medium Speed (1), Fast Speed (2), and All-out (4). These modifiers apply positively to the vehicles defense and apply negatively to many passenger actions.

Other Hazards

Hit by a vehicle: d20 x speed modifier. DEX save halves.

Car Wreck: Vehicle damage = 2d20 x speed modifier, occupants take 1/4 damage. DEX save halves. +/- 1 or 2 d20s for vehicles smaller or larger than typical passenger vehicles.

Medium Voltage Electricity: 4d6.

Optional Rules

Advanced Class

Characters may take re-flavored Core and Expert classes as Advanced Classes. In order to do so, a character must be at least Character Level 3 and do not gain the Skill bonus provided by that class. Use the number of levels taken in the Advanced class to determine benefits granted by that class. Characters may not change to another Heroic or Advanced class until just before they would receive a benefit from that class (Fighters: 5, 10, 15; Magi/Cleric: 2, 4, 6, etc). Armor restrictions must be observed while benefiting from advanced class features. Advanced Classes are totaled with Heroic Classes to determine Character Level.

Alternate Saving Throw

Roll+Stat Mod+1/2 Character Level

Bows

Compound Bows deal d8+2, Master Work Compound Bows add to damage as well.

Rangers

Only allow them to change class after Ranger Level 4 is completed (like a Fighter).

Page 42

May expend a heroism use with no numerical effects to take rule-breaking actions after an appropriate DC. DC, 10, 15 or 20 + Level. Suggested damage: Low= 2d4, Medium= 2d8, High= 2d12. Add an additional die for every five levels after Lv. 1. (6, 11, 16)

Passenger Car Maneuver: -1 Harness/HP: 5/30 Defense: 8 Purchase DC: 30	Truck/ Van/ SUV Maneuver: -2 Harness/HP: 5/36 Defense: 8 Purchase DC: 35	Motorcycle Maneuver: +2 Harness/HP: 5/20 Defense: 10 Purchase DC: 26	Tank Maneuver: -4 Harness/HP: 20/64 Defense: 6 Purchase DC: 47
--	--	--	--

15 COPYRIGHT NOTICE

Open Game License v 1.0 Copyright 2000, Wizards of the Coast, Inc.

Microlite 20 Modern-Day

By Andrew Domino (www.dominowriting.com/games.html), last revised April 15, 2014
Creative Commons NonCommercial ShareAlike 3.0 Unported License
Based on the Microlite 20 Purest Essence rules

This is an adaptation of the Microlite 20 Purest Essence rules for characters in any time period. Primarily, it is designed for contemporary adventures, where characters can be police, soldiers, computer experts, wilderness explorers, pilots, rock stars, cowboys and even supernatural heroes like modern sorcerers and vampire detectives. These rules are designed for a cinematic game, one that simulates the larger-than-life adventures and heroes seen in movies, TV shows, novels and comic books.

STATS

There are 3 stats: Strength (STR), Dexterity (DEX) and Mind (MIND).

Roll 4d6, drop lowest die. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

After adjusting stat scores for character focus (see below), determine your stat bonuses by using (stat score -10) /2, round down. This math is done for you here.

<u>Stat Score</u>	<u>Stat Bonus</u>
3	-4
4 – 5	-3
6 – 7	-2
8 – 9	-1
10 – 11	+0
12 – 13	+1
14 – 15	+2
16 – 17	+3
18	+4

Quick Stats (optional): To generate a character even faster, assign stat scores of 16, 13 and 11 to Strength, Dexterity and Mind any way you wish. You can increase a stat score by decreasing another stat score by the same amount.

CHARACTER FOCUS

This replaces both race and class in Microlite 20 Purest Essence. Choose a character focus, gain the listed stat and skill benefits, and select one of the special abilities – whichever one best fits your image of the character. At first level, also choose a second special ability. This ability can be from the same character focus, or any other character focus. Several modern-day class templates with suggested special abilities are listed at end of this document.

Every third level (3, 6, 9, 12, 15, 18), you gain another special ability from any character focus list, and one or more of your previous special abilities may improve as described below.

It's assumed all characters are human. To have a character of another race, see the section on Species, below.

Charisma: You are a diplomat, political leader, spy, con artist, entertainer, etc.

+1 MIND, +1 to any two skills (except Communication), +3 Comm

- *Charming:* You can make friends with anyone, especially those who find you appealing.

You gain a bonus equal to $\frac{1}{2}$ your level (round up) whenever you try to recruit someone to your side, calm down an aggressive opponent, gather information, deceive someone into thinking you're an ally, forge an agreement with someone, etc. Most of these actions are MIND + Comm or MIND + Subt.

- *Connections:* You can call on a friend or business acquaintance for a piece of special equipment, information or safe entry into a city or other area.

It's up to the game master to decide exactly what the results of your request are. Your connections can be called upon a number of times per day equal to your MIND bonus +1. Gain +1 use of this ability every time you gain another special ability.

- *Encourage:* You know just what to say to rally your allies in battle or stir up a crowd in protest.

All of your allies (but not you) gain a bonus to all skill, attack, damage and other rolls equal to $\frac{1}{2}$ your level (round up), for the next round. This can be done a number of times per day equal to your MIND bonus, +1 every time you gain another special ability.

- *Resources:* You are good with cash and credit – yours or other peoples'.

Add +1 to your financial status (see below). If you need a particular item not listed on your character sheet during an adventure (and the game master allows it), roll 1d6. On a result of 2 or better, you have a good-quality, working version of the item. On a result of 1, you don't have the item after all.

- *Taunt:* With insults and challenges, you enrage your enemies, making them lose control before they attack you.

Instead of making a normal attack, roll MIND + Comm vs an opponent's MIND + Comm. On a success, the opponent suffers -2 to all rolls

(stat + skill, initiative, attacks, damage, etc.) for the remainder of the battle. You can taunt, succeed or fail, a number of times per day equal to your MIND bonus, +1 every time you gain another special ability.

Intellect: You are a scholar, occult expert, scientist, surgeon, computer technician, researcher, engineer, etc.

+2 MIND, +3 Know or +3 Tech

- *First Aid:* You have a background as a doctor or other healer, and can keep your allies alive when it's needed most.

You or one ally you are in physical contact with will immediately recover a number of hit points equal to $\frac{1}{2}$ your level (round up). This can be done a number of times per day equal to your MIND bonus, +1 every time you gain another special ability.

- *Magic:* You can use ancient books and mystical studies to cast spells, or you have access to psychic powers, or even gifts from a supernatural background.

You have spell points equal to your MIND bonus + $\frac{1}{2}$ your level (round up), +2 every time you gain another special ability. You can cast any spell from any spell list your game master makes available. Each spell costs a number of spell points equal to its spell level (for example, the third-level arcane spell Fireball costs 3 spell points to cast, and causes 1d6 damage for each character level you have). You regain all your spell points after a night's sleep. You cannot cast the same spell a second time until you have "recharged" your spell points.

- *Minor Super Power:* You have a superhuman abilities, though not enough to consider yourself a comic-book style costumed adventurer.

Choose one or two super powers appropriate to the game setting (typical powers include hypnosis, time travel and exceptional toughness). You can use those powers at any time the game master allows. Attacks cause 1d6 + level damage, and other powers add your level to appropriate stat + skill rolls, Armor Class or other effects. If you are using Microlite 20 Costumes, each power must have

a base cost of 10 or 15 Power Points, and has a power rank equal to the character's level.

- *Research*: You know a little bit about everything, and with just a few hours time, you can learn anything you don't already know.

You can add $\frac{1}{2}$ your level (round up) to any skill ranks you have in a skill when making a non-combat roll using a skill. This can be done a number of times per day equal to twice your MIND bonus, +1 every time you gain another special ability.

- *Technical*: You're good at putting things together – and taking them apart.

You have a bonus equal to your $\frac{1}{2}$ your level (round up) + 2 to create or disassemble non-living items (traps, vehicles, weapons, computer programs, etc.). Creating an item is usually MIND + Tech (or MIND + Know), while disassembling one is usually MIND + Tech.

- *Terrain Expertise*: You know your way around any city, or in the great untamed wilderness.

Choose a terrain type, like urban, forest, mountains, jungle, arctic, etc. You have a bonus equal to your $\frac{1}{2}$ your level (round up) to any stat + skill roll (but not attack roll) in that terrain type. Each time you gain another special ability, you can select another terrain type or gain +1 to a terrain type you have already selected.

Might: You are a soldier, mercenary, professional athlete, heavy weapons specialist, survival expert, etc.

+2 STR, +3 Phys

- *Armor Training*: You can wear a heavy suit of armor and still be prepared for any kind of fight.

You do not lose your DEX bonus to AC when wearing heavy armor (AC bonus of +5 or more). You also gain an extra +1 to AC, +1 each time you gain another special ability.

- *Berzerk*: You may not look like a maniac, but you can fly into a rage when you're in battle, or when someone says the wrong thing.

Gain +2 to melee attacks and damage, +2 to STR bonus, and -2 to AC for a number of rounds in a row equal to your STR bonus (before the

berzerk bonus is applied), though you can end a berzerk session early. You can shift into berzerk mode a number of times per day equal to your regular STR bonus, +1 every time you gain another special ability.

- *Combat Style*: You are an expert warrior, skilled with dozens of weapons.

Select one type of attack (melee/hand-to-hand, missile/ranged or magic/supernatural). Add +1 to all attack and damage rolls when making that type of attack. This improves by +1 every time you gain another special ability. Optionally, instead of improving the attack bonus when you gain another special ability, you can select a different type of attack and improve its bonus by +1.

- *Driver*: You are at home behind the wheel of a car, a plane, a boat or a starship.

You have a bonus equal to your $\frac{1}{2}$ your level (round up) + 2 to drive or pilot a vehicle, and a bonus equal to $\frac{1}{2}$ your level (round up) to identify what's wrong with a broken vehicle, and to fix it.

- *Heavy Hitter*: You do damage with weapons... a lot of damage.

Select one type of attack (melee/hand-to-hand, missile/ranged or magic/supernatural). Whenever you roll damage dice on a successful attack of that type and a die shows its highest result (for example, 6 on 1d6), roll that die again and add the new result to the total. If it shows the highest result again, do not roll a third time. In addition, reroll any damage die that has a result of 1 until it does not show 1.

- *Intimidate*: You have a fearsome appearance, a disturbing grin or maybe just a bad reputation.

You are immune to fear effects, and add $\frac{1}{2}$ your level (round up) to any rolls you make to intimidate or generate fear in opponents (usually STR + Phys, MIND + Subt or STR + Comm).

- *Tough*: You are hard to kill.

Add +1 to your AC, and double the number of hit points you gain each level (for example, if you roll a 3, you gain 6 hit points). Add another +1 to your AC each time you gain another special ability.

- *Two-Weapon Fighting*: You have a pair of weapons you can use in harmony. You can make two attacks on the same turn. Each has a -3 attack penalty (decrease the penalty by 1 each time you gain another special ability, to -2, -1, and finally no penalty). You must have two of the same weapon, one in each hand, to use this ability.

Stealth: You are a killer, martial artist, thief, runner, gymnast, stunt performer, etc.

+2 DEX, +3 Subt

- *Assassinate*: You can strike a deadly blow when an opponent doesn't see you coming. If you successfully sneak up on a foe or target an enemy with a missile/ranged attack without their knowledge (DEX + Subt vs DC of MIND + Subt), add your Subt skill rank to the damage of your first attack.
- *Dodge*: You can twist and turn to be out of the way of an attack. If you are successfully hit by an enemy, immediately make a DEX + Phys roll (vs DC of enemy's attack roll result, including bonuses). On a success, you suffer no damage. This can be attempted, succeed or fail, a number of times per day equal to your DEX bonus + ½ level (round up), +1 every time you gain another special ability.
- *Fencing*: You rely on quickness when facing an enemy one-on-one. Your melee/hand-to-hand attack bonus when using light, one-handed weapons is determined by DEX bonus + level, not STR bonus + level.
- *Hunt Down*: Your instincts and social skills help you track your prey – beast or bad guy. Name a specific target (like "John Smith," "the dog that bit me," "the 30-year-old man seen

talking to drug smugglers in this photo," etc.). You can only select one target per day, and a target cannot be named while you or the target is in combat. You gain a +2 to attack rolls and stat + skill rolls intended for the target and the target alone (like MIND + Comm to ask around about the target's whereabouts, or DEX + Subt to follow the target silently). Add another +1 to your Hunt Down ability each time you gain another special ability.

- *Lucky*: You always seem to be in the right place at the right time. You can automatically change any of your die roll results to a 20 (except a damage roll), as if you rolled a natural 20 for purposes of critical success or critical hit. You can also automatically change any die roll made by an opponent to a 1 (except a damage roll). You must declare you are using your lucky ability, and if it is luck for you or unluck for someone else, immediately after the die is rolled. This can be done 3 times per day, +1 every time you gain another special ability.
- *Martial Arts Training*: You have a mastery of unarmed combat techniques like karate, judo, tae kwon do, etc. Your punches, kicks and other natural weapon attacks cause 1d6 + ½ level (round up) damage. You also gain an extra +1 to AC, +1 each time you gain another special ability.
- *Quick Draw*: You have fast reaction time, and can be armed and dangerous in just moments. You have a +2 bonus to your Initiative, +1 each time you gain another special ability.
- *Sneak*: You are quiet as a whisper and as light on your feet as a shadow. You add ½ your level (round up) to any rolls you make to sneak, hide, or even spot others who are trying to sneak. This is usually DEX + Subt or MIND + Subt.

SPECIES (Optional)

To create a character of a non-human species, simply remove the stat bonus listed by a character focus (and the +1 to any two skills except for Communication, listed by the Charisma character focus) and select a species. It provides a +1 to one stat score, which can take the stat score above 18, and a special ability of some kind.

The character will be able to interact with others like a human (stand on two legs, speak fluently, breathe air, be roughly the same size and shape as a human, etc.), but will look like a typical member of its species, unless the player chooses differently. Several species common in fiction are listed below. Use these as examples when creating new species.

Logical Thinker: +1 Mind, Emotional Control special ability: Add +3 to any attempt to resist being psychologically or supernaturally influenced (intimidated, frightened, tricked by an illusion, mentally controlled, etc.). This is usually MIND + Know.

Lycanthrope (were-creature): +1 Dexterity, Alternate Form special ability: You can transform into a specific type of wild animal, and only that type of animal, a number of turns per day equal to your STR bonus. You do not gain hit points for changing into your alternate form using this special ability, but use the statistics and bonuses of the creature instead of your own while in animal form. You cannot speak, use equipment or other abilities of your original form when in animal form.

Robot: +1 Strength, Durable special ability: You have DR of 2 (you lose 2 fewer hit points each time you take damage). You do not need to eat, drink, sleep or breathe. You are immune to poisons, diseases and toxins intended for non-mechanical creatures.

Vampire: +1 Strength, Bloodsucking special ability: You have a bite melee/hand-to-hand attack causing STR bonus damage. You immediately heal hit points equal to the amount of damage the attack causes. You must successfully grab

the opponent (STR + Phys vs enemy's STR + Phys roll) to make this attack.

Cat-Folk: +1 Dexterity, Claws special ability: You have a set of claws in your fingers you can instantly reveal or hide. They cause 1d4 +1 damage. On a DEX + Phys roll to leap or climb, add +3 to your roll. You also have night vision, and can see in the dark as clearly and as far as you can see in the daytime.

Dog-Folk: +1 Mind, Pack Hunting special ability: On a MIND + Know roll to smell something or to track a target, add +3 to your roll. If you and at least one ally are attacking the same enemy, add +1 to your attack roll.

Fish-Folk: +1 Dexterity, Water Native special ability: Add +3 to any roll to move silently, run or escape capture (usually DEX + Subt), but only when you are in water. You can also swim as fast as you walk on dry land, and can breathe underwater without special gear.

Hawk-Folk: +1 Dexterity, Keen Eyesight special ability: If you are attempting to spot something hidden or find something that is very tiny (usually MIND + Subt or MIND + Tech), add +3 to your roll. You can also fly as fast as you walk on dry land.

SKILLS

Each character starts with five skill points to be assigned to any skills the player chooses. Any skill points not assigned are lost. Roll higher than the Difficulty Class given in the adventure to succeed. Each time the character gains a level, the character gains another five skill points.

- Physical (Phys): athletics and acrobatics.
- Subterfuge (Subt): sleight of hand and stealth.
- Knowledge (Know): science and research.
- Communication (Comm): diplomacy and connections.
- Technology (Tech): computer programming and equipment construction/repair.

Skill rank = skill points + any character focus skill bonuses + any other bonuses. A skill's total rank cannot be more than your level +5.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers. For example, climbing would use STR bonus + Physical. Dodging a falling rock is DEX bonus + Physical. Finding a trap is MIND bonus + Subterfuge. Disabling a trap is DEX bonus + Technology. Fast-talking a guard is MIND bonus + Communication.

APTITUDES (Optional)

The five skills Microlite 20 characters have cover nearly any activity a character might try. For characters who are especially talented in specific areas, they can select aptitudes (also called affinities). An aptitude gives the character an additional +2 when that aptitude applies to a skill use, or a character can reroll the skill attempt when an aptitude applies to a skill use. Decide whether the character's aptitudes provide a bonus or a reroll when selecting aptitudes.

For example, a character with the aptitude "Tracking," which is related to the Knowledge skill, gains +2 to MIND + Know rolls when he is attempting to track, but not when he is attempting something else using the Knowledge skill and STR, DEX or MIND.

A character can have up to three aptitudes. If you choose fewer than three, you begin with +2 hit points for each aptitude you do not select, or you can reroll any die roll you make once per game session, with one reroll per aptitude you do not select.

Suggested aptitudes include:

Physical: Climb, Endurance, Lift, etc.

Subterfuge: Drive, Move Silently, Read Lips, etc.

Knowledge: Chemistry, History, Tracking, etc.

Communication: Bluff, Intimidate, Persuasion, etc.

Technology: Computers, Device Inventing, Vehicle Repair, etc.

HEROISM (Optional)

Heroism points represent a character's determination, fighting spirit, and even a little luck. A character has a number of Heroism points equal to his or her level x 2.

Heroism points can be used to add to any attack, damage or stat + skill roll at a rate of +1 per 1 Heroism point spent. You can only spend up to your level in Heroism points on one single roll (for example, a level 10 character can only spend up to 10 Heroism points, for a +10 bonus). Heroism points do not need to be spent all at once, but when they are completely spent, they are gone for the rest of game session. A character's Heroism points are restored to their starting amount at the beginning of a game session.

COMBAT

Initiative: Equal to DEX bonus. Each hero can make two actions on a turn, usually move 30 feet (6 spaces) for a human-sized character and make one attack, use one skill, or perform one other activity.

Hit Points: STR stat (not bonus) +1d6 per level (or +4 per level). If hit points fall to 0 (zero), the character is unconscious. A character will regain consciousness with at least 1 hit point. A character will die at -10 hit points.

After a battle, each hero recovers a number of hit points equal to STR bonus, and regains consciousness. More hit points have to be regained via rest or medicine. A character regains a number of hit points equal to level after a full night's sleep.

Armor Class: 10 + DEX bonus + natural armor AC bonus + purchased armor AC bonus. If a character wears heavy armor (AC bonus of +5 or more), the character does not gain DEX bonus to AC. Heavy armor is indicated in the equipment list on Page 14.

Attack Bonuses

Melee/Hand-To-Hand Attack Bonus: STR bonus + level

Missile/Ranged Attack Bonus: DEX bonus + level

Magic/Supernatural Attack Bonus: MIND bonus + level

A die result of 20 is automatically a hit, no matter what the opponent's Armor Class is. It is also a critical hit, causing double damage.

Likewise, a die result of 1 is automatically a miss, no matter what the attacker's attack bonus is. It is also a critical failure, causing the weapon to fail (break or jam) or the attack to hit a friend.

Automatic Firearms: Characters that use automatic weapons (marked with an asterisk * on the equipment list starting on Page 12) don't need to keep track of each and every bullet they fire. Instead, automatic pistols have an abstract "ammo count" of 2, and automatic rifles have an "ammo count" of 4. Each type of attack a weapon makes costs some amount of this "ammo cost," and when the weapon reaches an ammo count of 0 (zero), it can only make single shots until the battle ends. It's assumed that characters always have enough ammunition to reload their weapons after a battle.

Single Shot: Ammo Count Used: 0. Causes weapon's listed damage.

Burst Fire: Ammo Count Used: 1. The attack has a -4 penalty to hit, but causes double damage (quadruple damage on a critical hit).

Full-Auto Spray: Ammo Count Used: 2. Choose a line 15 feet across (or a line of 3 adjacent spaces). Roll to hit once, with a -4 penalty to hit, and check the result against each opponent's Armor Class. Each one that is hit suffers the weapon's listed damage. Automatic pistols cannot use this attack.

NON-VIOLENT COMBAT (Optional)

The emphasis on combat rules shows how important violence is to the Microlite 20 game. That level of detail can be brought to any sort of confrontation simply by renaming a few things.

In non-violent combat, the opponents aren't trying to kill one another. Instead of making a roll of attack bonus vs. Armor Class, each combatant makes a stat + skill roll, using the same pair of stat bonuses and skills. If the attacker's result is equal or higher, he or she causes "damage" equal to 1d6 + stat bonus of the stat used in the combat. That damage is removed from a set of imaginary hit points, equal to the stat score of the stat used in the combat. When those imaginary hit points fall to 0 (zero) or less, the combat is over, and the loser is defeated (knocked unconscious, humiliated, etc). These imaginary hit points are not related to the character's actual hit points in any way. They cannot be healed, and all damage to imaginary hit points disappears when the combat is over.

For example, a boxing match would use STR + Phys rolls, and the STR stat score for imaginary hit points. A war of insults or an attempt to fast-talk a mark might use MIND + Comm rolls, and the MIND stat score for imaginary hit points.

Social Combat: In a game where characters rely more on their talents for intrigue, seduction and intimidation, the complex combat rules of standard Microlite 20 may not be appropriate. In that case, the game master and players may decide to revise the stats, combining Strength and Dexterity into Body (BOD) and splitting Mind into Mind (MIND), representing knowledge, and Charisma (CHA), representing social skills.

Attack bonuses remain the same, though both the melee/hand-to-hand and missile/ranged attack bonuses will be determined using BOD bonus + level. In the same way, other characteristics like hit points and special abilities will use the new stats. Stat + skill rolls also change to fit the new stats: A backflip over a charging bull is BOD + Subt, while calming an angry mob is CHA + Comm, and flashing a winning smile may be CHA + Phys.

LEVEL ADVANCEMENT

Instead of adding up experience points, simply count encounters. After nine encounters appropriately challenging for the characters (game master's decision), the characters advance one level, gain 1d6 (or +4) more hit points and 5 more skill points. If the level is a multiple of three (i.e. level 3, 6, 9, etc.), add +1 point to STR, DEX or MIND. Don't forget to adjust special abilities, attack bonuses, heroism, armor class, and other character information when level and stat scores improve.

Remember that each battle is an encounter — but so is a trap, an enemy that's defeated without fighting and even high-stakes skill situations (for example, a simple roll to find the right trail probably isn't an encounter, but a roll to negotiate a billion-dollar corporate takeover probably is).

MINIATURES AND BATTLE MAPS

If you have miniature figures (about 1 inch to 2 inches, or 25 to 28 mm tall) to represent the characters and their enemies, you'll need a ruler or a battle map covered in spaces (squares or hexes 1 inch or 1 ½ inches in size). Alternately, you can simply measure distances using a ruler, considering each inch a "space."

One space equals 5 feet or 2 yards, and the average character and monster moves 6 spaces per turn, even diagonally. Figures can move through the same space as another character or enemy, but cannot end movement in the same space as another figure. Rubble, darkness, heavy growth and other difficult terrain "costs" 2 spaces of movement for each space the figure moves into.

If there's a question whether a character could see an enemy to hit it, draw an imaginary straight line from the center of the attacker's space to the center of the target's space (or one of its spaces, if it takes up more than one space on the map). If there is no large obstacle or enemy in the path, the character can make the attack. Allies of the attacker do not block its path, nor do obstacles filling less than half a space in the path. Characters can attack through windows and other partial obstacles at a -2 penalty to hit.

Simplified Attacks (Optional): To avoid calculating attack ranges each turn, melee attacks must be made against an enemy in a space adjacent to the character. Thrown and short-range weapon attacks can be made against an enemy up to 10 spaces away. Long-range weapon attacks can be made against an enemy up to 25 spaces away.

MONEY AND EQUIPMENT

Financial Status: Instead of tracking cash, credit and investments, the game master will assign each character a financial status. Characters can normally afford any equipment the game master allows, but to buy expensive or rare equipment, the character will need to make a MIND + Comm roll (to haggle with a seller) or a MIND + Know roll (to find the money in a savings plan). Add the financial status bonus listed below to these die rolls.

Not Important: +7

This character is from a society that does not care about money, like an alien race, or has the ability to create money at any time.

Multimillionaire: +5

This character is head of a major multinational corporation or foundation, or is a member of a nation's royal family, and has almost unlimited access to funds and technology. He or she has multiple residences and forms of transportation.

Wealthy: +2

This character is a self-made millionaire or celebrity. He or she has a large house and expensive transportation (like a carriage or luxury car).

Sponsored: +3

This character works for a government agency, army or other organization that takes care of living expenses and gear.

Comfortable: +0

This character has a steady day job that brings in decent pay, or some other way of making ends meet without much worry. The character can occasionally afford a major expense. He or she has a house and access to typical transportation for the time period (horse, automobile or starship).

Struggling: -2

The character has difficulty finding enough money to pay the bills at the end of the month, and has to skip some basic necessities from time to time. The character has very little money, few items and may be homeless or nomadic. The character depends on friends and family for support. He or she has a small residence (such as a wooden hut or apartment), and an inexpensive means of transportation (mule, bicycle, old car, etc.).

The following are lists of many common weapons, armor and other equipment a character is likely to have. It's assumed a character also has appropriate ammunition and other materials needed to maintain and use weapons and armor. A character can select any of these items, as long as the game master approves; any item that the game master decides are especially rare or expensive may require a financial status roll.

Eras: Game settings are divided into four general time periods. Characters usually cannot use equipment from an era later than their own, but can use any from earlier eras, if it is commonly available.

Ancient Era: This includes the earliest recorded time, to the Middle Ages, to the widespread use of guns. Prehistoric and ancient Greece and Rome settings are in the "early ancient era," while traditional fantasy, medieval and Renaissance adventures take place during the "late ancient era."

Historical Era: This includes the age of exploration, to the Industrial Revolution, to World War II. Settings like swashbucklers (pirates and musketeers), the Wild West and Victorian Europe take place during the "early historical era," while stories of the world wars and pulp novels take place during the "late historical era."

Modern Era: This includes adventures in the time after the second World War, to the present day, to the very near future. Modern era adventures may include espionage, police work, military activity, supernatural conspiracy or alien investigation. Near-future adventures often include inner-city war zones, time travel and computer intrigue. The time between World War II and the rise of the personal computer (the early 1980s) is the "early modern era." Adventures after that time with only a small amount of fantastical technology – the present day or very near future – are in the "late modern era."

Future Era: Science fiction worlds of after-the-disaster survival or intergalactic travel. Space opera settings have a multitude of alien races, laser weapons and starships capable of moving between planets. Post-apocalypse settings feature high-tech weapons, mutated warrior tribes and desolate landscapes.

Physical Weapons

Punch: 1d2 + STR bonus damage

This can also represent attacks from a head-butt, knee, fangs, claws, wings, spikes or quills.

Kick: 1d3 + STR bonus damage

This can also represent attacks from a large animal bite, horns, a tail or antlers.

<u>Melee Weapons</u>	<u>Damage</u>	<u>Era When It First Appears</u>
-----------------------------	----------------------	---

Battle Axe:	1d8	Ancient
-------------	-----	---------

A large single or twin-bladed chopping weapon.

Caltrops:	1d4	Ancient
-----------	-----	---------

Small triangular spikes which leave one tip pointed upright, no matter how they land. These weapons are often left on the ground to injure an enemy's feet or tires.

Club:	1d6	Ancient
-------	-----	---------

A one-handed metal, plastic or wooden bar; blackjack, police baton, hand hammer or baseball bat.

Flail:	1d8	Ancient
--------	-----	---------

A spike-covered iron ball or solid rod connected to a hand grip by a small length of chain.

Great Sword:	1d10	Ancient
--------------	------	---------

A long, heavy two-handed steel blade swung by the most powerful warriors; claymore.

Hatchet:	1d4	Ancient
----------	-----	---------

A small, one-bladed stone or steel axe; pick, cleaver or tomahawk. This weapon is balanced for throwing.

Katana:	1d10	Ancient
---------	------	---------

The valuable and deadly sword of the martial arts warrior, often carried with a smaller second blade called a wakizashi (use as a long sword).

Knife: 1d4 Ancient
 The standard small close-combat weapon; a hunting tool, dagger, bayonet, dirk, kris or vibro-knife. This weapon is balanced for throwing.

Long Sword: 1d8 Ancient
 The standard one-handed steel sword, half the height of the average human; broad or bastard sword.

Mace: 1d8 Ancient
 A solid cudgel with a spiked or reinforced head; morning-star.

Makeshift Hand Weapon: 1d4 + STR bonus Ancient
 Any small item like brass knuckles, lengths of chain, switchblade knives, shards of broken glass, rocks and even chairs. This weapon is balanced for throwing.

Net: see note Ancient
 When wrapped around enemies, a net interferes with movement; lasso. This weapon is balanced for throwing. Note: A character hit by a net loses a turn, then can make a DEX + Phys roll each turn to escape as the only action the character can take on that turn.

Nunchaku: 1d6 Ancient
 A small pair of rods connected by a string or chain and lashed at enemies, or used to entangle weapons.

Pike: 1d8 Ancient
 Used mostly as a banner, pikes are extended-length spears; jousting lance.

Polearm: 2d4 Ancient
 A large curved blade attached to the end of a staff; scythe, bisento or halberd.

Sai: 1d4 Ancient
 Three-pronged short knives used in pairs to both attack and parry. This weapon is balanced for throwing.

Scimitar: 1d6 Ancient
 A curved-blade sword; kopesh.

Short Sword: 1d6 Ancient
 A short, sharp chopping weapon, often made of bronze or iron; pirate cutlass, sickle, machete, gladius or cinquedeas.

Spear: 1d6 Ancient
 A short staff with a sharp metal or stone tip; trident or harpoon. This weapon is balanced for throwing (often called a javelin).

Staff: 1d6 Ancient
 A pole slightly taller than the average human and often made of wood or steel; quarterstaff or bo.

War Hammer: 1d8 Ancient
 A giant mallet used to crush enemies; maul.

Whip: 1d3 Ancient
 A long, thin strand of leather or monofilament wire (in the future era) used to lash at foes from a distance, entangle weapons or swing into action.

Cavalry Saber: 1d6 Historical
 The thin, single-edged steel blade used by military commanders from the Victorian age to modern times, more as a symbol of rank than a weapon.

Fencing Sword: 1d6 Historical
 The narrow, delicately crafted blade used in duels; epee, rapier or sabre.

Chainsaw: 3d6 Modern
 An industrial-strength blade swung randomly at enemies.

Taser: 1d3 (see note) Modern
 A hand-held unit which fires high-voltage blasts of electricity through wires. Note: After taking damage, a character hit by this attack must roll STR + Phys vs DC 15 or be paralyzed for 1d4 turns/minutes.

Laser Sword: 2d8 Future
 A blade surrounded by (or made of) laser energy.

Stun Baton: 1d3 (see note) Future

A small rod which discharges energy on contact. Note: After taking damage, a character hit by this attack must roll STR + Phys vs DC 15 or be paralyzed for 1d6 turns/minutes.

<u>Ranged Weapons</u>	<u>Damage</u>	<u>Era When It First Appears</u>
-----------------------	---------------	----------------------------------

Blow Gun:	1d2	Ancient
-----------	-----	---------

A small, thin tube which uses air power to fire spiked darts a short distance.

Bola:	1d6	Ancient
-------	-----	---------

Triple weights connected by a line, whirled around the head and used to entangle a foe. This weapon is balanced for throwing.

Boomerang:	1d4	Ancient
------------	-----	---------

A curved or circular blade which returns to the thrower after striking a target. This weapon is balanced for throwing.

Crossbow, Large:	1d10	Ancient
------------------	------	---------

A full-size weapon which requires two hands to use and a pause to reload.

Crossbow, Small:	1d4	Ancient
------------------	-----	---------

A wrist-mounted or one-handed bow which is fired like a gun.

Longbow:	1d8	Ancient
----------	-----	---------

A bow made from natural fibers (wood and sinew or plant material) which can be used while riding or to hit an enemy from a great distance.

Shuriken:	1	Ancient
-----------	---	---------

Small hurled “throwing stars.” This weapon is balanced for throwing.

Sling:	1d4	Ancient
--------	-----	---------

A weapon which hurls a small item (usually a stone) after being whirled around the head.

Slingshot:	1d4	Ancient
------------	-----	---------

A Y-shaped handle which supports an elastic sling and fire small stones.

Carbine:	2d8	Historical
----------	-----	------------

The breechloading buffalo rifle used in the American Civil War (.44 Sharps, .44 Winchester, etc.).

Derringer:	1d6	Historical
------------	-----	------------

A very small pistol which can fire only one shot, but is easy to conceal.

Double-Barreled Shotgun:	2d8	Historical
--------------------------	-----	------------

The 12-gauge range rider’s weapon found in Wild West settings, with a break-open stock.

Dueling Pistol:	1d8	Historical
-----------------	-----	------------

A small, wide-barreled gun; used for duels in the time of the American Revolutionary War.

Flame-thrower:	3d6	Historical
----------------	-----	------------

A fuel-filled backpack and a high-pressure hose which fires blasts of fire that continue to burn; napalm.

Gas Gun:	see note	Historical
----------	----------	------------

This pistol fires gas bursts from canisters; flare gun. Note: the damage of this weapon depends on the type of gas canister placed into the weapon.

Grenade:	3d6	Historical
----------	-----	------------

A fragmentation explosive that injures by concussion and shrapnel. This weapon is balanced for throwing. This weapon causes damage in a 10 foot (2 space) circle.

Infantry Rifle:	2d8	Historical
-----------------	-----	------------

The basic bolt-action soldier’s armament in both of the World Wars.

Large Pistol * :	2d6	Historical
------------------	-----	------------

A large, semi-automatic weapon used by military officials and individuals in intense combat situations. Most are .357, .44 or .45 caliber (.45 A.C.P., .44 Magnum, Glock 17, Desert Eagle, etc.).

Musket:	1d10	Historical
---------	------	------------

The black powder rifle used during the time of the American Revolutionary War; blunderbuss, flintlock.

Machine Pistol:	2d6	Historical
-----------------	-----	------------

The personal firearm carried by officers in the World Wars (Mauser, .22 caliber, etc.).

Matchlock Rifle: 1d10 Historical
The earliest gun, with a wide barrel and flame-lit firing mechanism; harquebus. This weapon may be found in the late Ancient Era.

Tommy Gun *: 2d8 Historical
A rapid fire sub-machine gun made popular by the gangsters of the 1920s.

Air Rifle: 1d10 Modern
A small pellet-firing weapon; BB gun, .22 single-shot rifle.

Assault Rifle *: 2d8 Modern
The standard-issue automatic rifle used by modern military forces and militias (M-16, AK-47, etc.).

Composite Bow: 1d8 Modern
A contemporary recurve bow, made of fiberglass and equipped with sights and an adjustable draw.

Hunting Rifle: 2d10 Modern
The standard target-shooting rifle; sniper weapon (Winchester .30-06, .308, etc.).

Mini-Gun *: 3d8 Modern
A rapid-fire weapon that can only be carried by the strongest warriors (STR 16 or more).

(Regular) Pistol *: 2d6 Modern
A handgun with a clip- or revolver-style cartridge, used as the modern law enforcement sidearm. Most are .38, 9 mm or 7.65 mm caliber (.38 special, Walther PPK, etc.).

Rocket Launcher: 10d6 Modern
A shoulder-mounted weapon that launches small explosive missiles; bazooka.

Sub-Machine Gun *: 2d6 Modern
An easily concealed rapid-fire gun (Uzi, Mac-10, etc.).

12-Gauge Shotgun: 2d8 Modern
A modern pump-action weapon, sometimes sawed-off to conceal it.

Tranquilizer Gun: see note Modern
A weapon which fires darts full of a “sleep” toxin potent enough to knock a target unconscious. Note: a character hit by this weapon immediately makes a STR + Phys roll vs DC 20 or falls asleep for 1d10 turns/minutes.

Ion Gun: see note Future
A weapon used to disable electronic devices. Note: non-electronic targets are not hurt by this weapon, but electronic targets are shut down until they are repaired.

Laser Pistol *: 2d6 Future
A handgun which fires concentrated shots of laser energy; raygun, phaser or blaster.

Laser Rifle: 2d8 Future
A larger form of the laser pistol; the standard science fiction military weapon.

Needler: 2d4 Future
A small firearm which throws narrow metal shards or short pulses of laser energy.

Pulse Rifle: 2d10 Future
A weapon which fires massive bursts of laser energy.

Rail Gun: 3d10 Future
A hand-held cannon which fires large projectiles at a very high velocity; “tank killer” or BFG.

Stun Gun: 1d4 Future
A special gun which dizzies targets with each successful hit. Note: After taking damage, a character hit by this attack must roll STR + Phys vs DC 15 or be paralyzed for 1d6 turns/minutes.

Other Weapons Damage Era When It First Appears

Acid: 1d6 Ancient
Capsules of a burning fluid which can dissolve metal and flesh; disease-bearing vials.

Bomb: 4d6 Ancient
A one-time explosive triggered by pressure, a timer or a tripwire; must be set up to use.

Poison: 1d6 (see note) Ancient
 A debilitating gas or liquid often applied to weapons or food. The effects last until the poison is counteracted, the affected body parts are healed or the target is killed. Serious poisons can kill instantly. Note: after applying damage, the target of this attack must roll STR + Phys vs DC 15 or more, or suffer another 1d6 damage on the target's next turn.

Dynamite: 2d6 Historical
 A single stick of TNT. This weapon is balanced for throwing.

Smokescreen: see note Historical
 Note: This gas produces smoke which obscures all normal sight for 1d8 turns/minutes. Can be used in a gas gun.

Nerve Gas: see note Modern
 A gas which stings the nervous system; mace spray. Can be used in a gas gun. Note: the target of this attack will be blind for 1d4 turns.

Sleep Drug: see note Modern
 Targets who inhale this gas or powder fall unconscious for a short time. Can be used in a gas gun. Note: a character hit by this weapon immediately makes a STR + Phys roll vs DC 20 or falls asleep for 1d6 turns/minutes.

Tear Gas: see note Modern
 A lung-burning smoke used by police to break up riots. Note: a character hit by this weapon immediately makes a STR + Phys roll vs DC 15 or suffers -1 to all die rolls for 1d6 turns/minutes.

Armor AC Bonus Era When It First Appears

Leather: +2 Ancient
 A layer of toughened leather or heavy fur, sometimes strengthened with metal studs. Often biker leather jackets, military "bomber jackets" and even protective sports gear in the modern and future eras.
 Note: this armor does not protect against bullets or lasers.

Chainmail: +5 (Heavy) Ancient
 Standard medieval body armor — a coat of small, interlinked steel rings worn over a sturdy cloth layer. Also bronze plate armor.
 Note: this armor does not protect against bullets or lasers.

Full Plate: +8 (Heavy) Ancient
 A series of flat steel pieces overlapping one another, worn by medieval warriors.
 Note: this armor does not protect against lasers, but does protect against bullets.

Shield: +2 Ancient
 A special torso-length wood, steel, plastic or energy-based armor plate which is carried separately.
 Note: shields in the ancient and historical eras do not protect against bullets or lasers, and shields in the modern era do not protect against lasers, but do protect against bullets.

Gas Mask: see note Historical
 A special face covering that protects against gas attacks. Note: fully protects against weapons that require a target to breathe in a harmful gas, but does not offer any other protection.

Bulletproof Vest: +3 Modern
 A lightweight coat worn under normal clothing and used to stop bullets; flak jacket.
 Note: this armor does not protect against lasers, but does protect against bullets.

Military: +5 (Heavy) Modern
 Standard contemporary body armor — a flexible body suit of plastic plates inside padded clothing.

Riot Gear: +7 (Heavy) Modern
 Super-heavy armor made of multi-layered durable metal and plastic materials, used by elite combat forces. Found in the modern era as the highest level of protection and in the future era as standard military armor.

Power: +10 (Heavy) Future
 The hard-core science fiction computerized full-body, environmentally sealed battle suit.

Adventuring Gear Era When It First Appears

Bag:	Ancient
	Canvas, vinyl or leather backpack or sack used to carry treasure, additional items, etc.
Camp Gear:	Ancient
	Typical wilderness basics — small stove, rations, tent, sleeping bag or blanket, etc.
Grappling Hook:	Ancient
	A three-pronged metal hook with a wire cable or heavy rope used for support when climbing.
Light Source:	Ancient
	A reusable light source such as a flashlight, lantern or torch; also materials needed for light (batteries or flint and steel).
Lock Picking Kit:	Ancient
	A set of small tools used for picking locks (+1 to rolls to pick locks).
Rope:	Ancient
	25 feet of coiled, inch-thick hemp rope.
Survival Gear:	Ancient
	Basic emergency equipment — small knife/flare gun (not a weapon), matches or flint and steel, compass, miniature first aid kit, fishing line, etc.
Disguise Kit:	Historical
	Makeup, clothing and language guides to help make false identities convincing (+1 to rolls to disguise). May also include fake identification and full-face masks (in the modern era).
First Aid Kit:	Historical
	Used for instant medical care. Provides temporary support until trained professionals are on the scene (+1 to rolls to treat injury).

Adventuring Gear Era When It First Appears

Hand-held Communicator:	Historical
	A two-way voice transmitter/receiver; a “walkie talkie” or miniaturized in a wristwatch, earpiece or similar gadget.
Toolkit:	Historical
	Set of basic tools used to repair machines and equipment (+1 to rolls to repair items).
Binoculars:	Modern
	Used for extended vision (3 times normal sight). May appear in earlier eras as a spyglass.
Computer System:	Modern
	A small personal computer, complete with communications software and standard operating programs for its purpose. May be desktop, laptop or hand-held device (like a phone). May be attached to a larger organization’s network.
Homing Beacon:	Modern
	Small tracking devices that can be hidden on targets. Includes hand-held unit used to monitor tracking devices.
Infra-Red Goggles:	Modern
	A special pair of glasses that provide vision in the infra-red spectrum (heat vision or “night sight”).
Re-breather:	Modern
	Headgear that contains temporary oxygen supply, about 15 minutes worth.
Surveillance System:	Modern
	A wired microphone and hidden digital video and still camera used in remote investigation.
Weapon Targeting:	Modern
	High-tech sights and/or scope used to increase accuracy with bows, rifles and pistols (+1 to hit with weapon the targeting gear is attached to).

CLASS TEMPLATES

Characters of every type can be found in historical, modern and near-future fiction, but they often fit into a few general “templates.” Each includes a suggested character focus and several special abilities that fit the template, as well as an appropriate financial status, and common equipment used by characters of that type.

Activists are political leaders, business managers, royal authorities, even musicians and artists – anyone knowledgeable about the world around them, and trained in the art of diplomacy, the ability to convince others their cause is best for the good of everyone. Always ready to explore new ideas and to make their opinions be heard, activists are idealistic and determined. They have an intense desire to make things better for the whole of their world, by making political moves or by using their artistic talents to bring attention to an issue.

Character Focus: Charisma

Special Abilities: Connections, Encourage, Research

Financial Status: Working with the government brings financial reward (Wealthy), while protesting business and political leaders is more about doing what’s right than what’s profitable (Struggling).

Equipment: Activists aren’t fighters, instead relying on their powers of persuasion to get others to bend to their will. They dress the part very well, however, in a suit or a performer’s costume.

Investigators are often charming and clever, and always athletic and quick-thinking. They bend the rules to get what they want – and some take that mission a step farther, above the law. Much of the work of an investigator involves discovering things others have tried to hide, and not everyone they talk to is always willing to cooperate. But an investigator wouldn’t dream of leaving the life far behind; nothing else provides the same kind of thrill.

Investigators are detectives, thieves, secret agents, journalists, explorers – anyone who wants to know all the secrets.

Character Focus: Stealth

Special Abilities: Connections, Hunt Down, Lucky, Research, Sneak

Financial Status: Pursuit of the truth often doesn’t leave much time for making money (Comfortable), though some investigators are happy to spend as much as they can, as long as they don’t have to pay for it (Sponsored).

Equipment: Loose, easy-to-move-in clothing; a small, easily concealed weapon such as a knife or handgun; and a large amount of cash for bribes and unpaid debts.

Scholars are researches and inventive geniuses, skilled in various areas of obscure knowledge, and gadgets from a simple lock to a complex supercomputer. A scholar will often involve him or herself in dangerous, experimental technology or attempt to break into heavily guarded offices to learn private information – and to prove he or she can do it. Scholars are not known for their social skills; many are more comfortable surrounded by tools and machines than in crowds of people.

Doctors, mechanics, inventors, computer hackers, occultists and almost anyone with a scientific mind can be a scholar.

Character Focus: Intellect

Special Abilities: First Aid, Research, Technical

Financial Status: Technical know-how is worth money, no matter where or when you’re living (Comfortable or Wealthy).

Equipment: Scholars carry the tools of their research, and some survival gear when in the field.

Soldiers are good to have as allies and terrifying to have as enemies. Whether driven by money, a desire to redeem themselves for a criminal past or simply a feeling that their brute strength and quickness are best meant for a life of adventuring, soldiers spend their time defending others, practicing their skills and making sure their next fight is their opponent's last.

Soldiers aren't always part of a military organization: knights in shining armor, martial artists, police officers, sharpshooters, mercenaries, bodyguards, gladiators, tournament fighters, bouncers, outdoor guides and even pilots have the skills and talents of soldiers.

Character Focus: Might

Special Abilities: Assassinate, Combat Style (any), Driver, Quick Draw, Tough

Financial Status: Warriors are usually always willing to fight, both because they constantly need money and because it's what they're best at (Comfortable), though some soldiers are members of well-supported military organizations (Sponsored).

Equipment: Soldiers prefer not to be weighed down by a large number of possessions, relying instead on pure force to protect them with what they need. Soldiers often specialize in some kind of weapon – a sword, a gun or their own two fists.

Supernaturals have exotic powers – magic spells, gifts from divine sources, psychic talents of the mind, or simply heroic abilities that break the laws of physics. They can change the very essence of reality – and use that power in many ways. They can strike fear in the hearts of “mundanes” (non-adventurers without supernatural powers), use their gifts to battle evil forces, or turn their powers to helping those less fortunate, by solving crimes, healing the injured, or making new discoveries.

Character Focus: Intellect

Special Abilities: Charming, Intimidate, Lucky, Magic, Minor Super Power, Research

Financial Status: Those with mystic powers come from all walks of life (any status).

Equipment: Many who have supernatural abilities wear ordinary clothing to hide their talents, while a few embrace their gifts, and highlight how strange and rare they are. They often have a signature weapon or tool that they use as often as they can, since it reflects their uniqueness as much as their powers do.

M20 Hard Core Rules v1.02

Stats

There are three stats: Strength (STR), Dexterity (DEX) and Mind (MIND). Roll 3d6 for each stat.

Stat bonus = (Stat-10)/2, round down.

All character races speak the common tongue. Other intelligent beings speak their own languages. Some may speak one additional language per point of MIND over 10.

Characters begin at Level 1.

Classes

Fighters add +1 to attack and damage rolls. Every four levels starting at four (4, 8, 12, etc.) add another +1 to attack and damage rolls.

Wizards cast arcane spells.

Clerics cast divine spells.

Races

Dwarves get STR +2.

Elves get MIND +2.

Halflings get DEX +2.

Humans get +1 to any two stats.

Combat

Hit Points = STR stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 you are surprised and may not act.

Initiative is determined at the beginning of combat by rolling 1d6 + DEX bonus. Combatants act in initiative order.

Everyone can do one thing each turn; move, attack, cast a spell, etc.

Attack bonus = Level + fighter bonus. Add DEX bonus for ranged attacks.

Armour Class (AC) = 10 + DEX bonus + armor bonus. Armor bonus is +2 for leather, +4 for chainmail, +6 for platemail, and +1 for a shield. Better armor is heavy, noisy, and it slows you down.

Add attack bonus to d20 roll. If equal or higher than your opponent's AC, it's a hit. A natural 20 always hits and does maximum damage; a 1 always misses.

Damage is 1d6 + fighter bonus. Add STR bonus for melee attacks, twice that for two handed weapons.

Resting for 30 minutes recovers all hit points lost. One day of rest recovers one point of STR.

Magic

Every spell has a Spell Level. The maximum Spell Level for a spellcaster is Level/2, rounded up. Casting a spell of any kind costs Hit Points (HP). The cost is 1 + double the level of the spell being cast. Wizards casting in armor pay additional HP equal to their armor bonus. There is no need to memorize spells in advance. Spellcasters can pick a favorite spell on every Spell Level starting at 1st level. These spells are easier to cast due to familiarity, costing 1 less HP to use.

Spell Level	0	1	2	3	4	5	6
HP Cost	1	3	5	7	9	11	13
HP Cost if favorite		2	4	6	8	10	12
Min. Caster Level		1	3	5	7	9	11

Magic attack bonus = Level + MIND bonus.

Magic defense = 10 + Level + appropriate stat bonus

Add attack bonus to d20 roll. If equal or higher than your opponent's defense, the spell works. A natural 20 results in the maximum effect. Damage dealing effects still deal half damage on a failed attack.

Starting Equipment

Suggested starting packs for new characters:

Pack A	Pack B	Pack C
backpack	backpack	backpack
bedroll	bedroll	bedroll
hooded lantern	10 torches	tent
10 oil flasks	10 oil flasks	10 torches
flint & steel	flint & steel	flint & steel
shovel	chalk	hammer
2 sets of caltrops	10 ft. pole	10 iron spikes
signal whistle	mirror	grappling hook
pen & paper	crowbar	50 ft. rope
waterskin	waterskin	waterskin
iron rations for four days	iron rations for four days	iron rations for four days

Finally, add the following, based on your Class:

Fighter: Vial of holy water, studded leather armor (AC +3), a one handed weapon + shield, or a two handed weapon, and 5 gold pieces

Wizard: Three books on strange topics of your choosing, either a dagger, a crystal ball, or a cane, and 5 gold pieces

Cleric: Silver holy symbol, leather armor (AC +2), a one handed weapon + shield, and 5 gold pieces

Encumbrance

Characters can carry twelve items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item.

Prices

Don't worry about the price of mundane stuff later in the game as long as characters spent money „in totally frivolous ways“.

Level Advancement

Experience Points (XP) = Hit Dice of defeated monsters.

Add +1 for each doubling of the number of foes. e.g.: 1 kobold (a 1 hit die monster) = 1 XP. 2 kobolds = 2 XP. 4 kobolds = 3 XP, 8 kobolds = 4 XP etc.

Characters also earn a GM-assigned amount of experience points for defeating traps, solving puzzles, excellent roleplaying, and the like (usually from 1 to 5 XP).

Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, etc.). A character earns 1 XP for every 100gp so spent.

Add up the Experience Points (XP) of every successful encounter you take part in plus any earned from GM specials and treasure spent. When the total = 20 × your current level, you've advanced to the next level. Reset the total XP to 0 after advancing.

If the level divides by four (i.e. level 4, 8, 12, etc.) add 1 point to STR, DEX or MIND (player's choice).

If the level divides by four (i.e. level 4, 8, 12, etc.) fighters add +1 to attack and damage rolls as mentioned above.

Clerics gain access to new spell levels at levels 3, 5, 7, and 9. Wizards gain access to new spell levels at levels 3, 5, 7, 9, and 11.

Arcane Spells

0-Level Spells

Arcane Mark: Permanently inscribes or identifies a personal rune (visible or invisible).

Detect Magic: Detects spells and magic items.

Ghost Sound: Figment sounds for minutes.

Light: Object shines like a torch for hours.

Mage Hand: 5-pound telekinesis while concentrating.

1st-Level Spells

Alarm: Wards an area for hours.

Cause Fear: One creature of 5 HD or less flees.

Charm Person: Makes one person your friend for a day.

Comprehend Languages: You understand all spoken and written languages.

Grease: Makes area or one object slippery.

Magic Missile: 1d4+1 damage; +1 missile per two levels above 1st (max 5).

Sleep: Puts 4 HD of creatures into magical slumber.

Spider Climb: You can walk on walls and ceilings.

Ventriloquism: Throws voice.

2nd-Level Spells

Acid Arrow: 2d4 damage for 1 round +1 round/three levels.

Command Undead: Undead creature obeys your commands.

Detect Thoughts: Allows “listening” to surface thoughts.

Draw Runes: Stores a spell that you cast in a rune you draw to be released using a simple trigger you specify. The rune has to be drawn using rare ingredients.

Fly: Subject flies quickly and quietly.

Hold Person: Paralyzes one humanoid.

Invisibility: Subject is invisible until it attacks.

See Invisibility: Reveals invisible creatures or objects.

Web: Fills area with sticky spiderwebs.

3rd-Level Spells

Dispel Magic: Cancels magical spells and effects.

Fireball: 1d6 damage per level, 20-ft. radius.

Gentle Repose: Preserves one corpse.

Haste: Allies move faster and get a second melee attack. This lasts for one round only.

M20 Hard Core Rules v1.02

Major Image: Image plus sound, smell and thermal effects.

Summon Monster: Calls extraplanar creature to fight for you.

Tongues: You speak and understand any language.

Wind Walk: Targets turn to dust and fly in a gust of wind.

4th-Level Spells

Animate Dead: Creates undead skeletons and zombies.

Charm Monster: Makes monster believe it is your ally for a day.

Create Magic Item: Permanently enchant masterwork items including arms and armor with effects that are thematically linked to a spell you cast. The entire procedure takes a day. The item has to be custom made using rare ingredients.

Illusory Wall: Creates a permanent wall, floor, or ceiling that looks real, but anything can pass through.

Scrying: Spies on subject from a distance.

Shadow Walk: Take subjects into shadow to travel rapidly.

Shout: Deafens all within cone and deals 5d6 sonic damage.

Stone Shape: Sculpts stone into any shape.

5th-Level Spells

Cone of Cold: 1d6/level cold damage.

Dominate Person: Controls humanoid telepathically.

Magic Jar: Enables possession of another creature.

Permanency: Makes certain spells permanent. The entire procedure takes a day.

Planar Binding: Traps extraplanar creature of 6 HD or less until it performs a task.

Polymorph: Transforms subject into harmless animal.

Seeming: Changes appearance of one person per two levels.

Telepathic Bond: Link lets allies communicate.

Teleport: Instantly transports subjects hundreds of miles.

6th-Level Spells

Create Golem: Creates constructs made of dead material. The entire procedure takes a day.

Create Undead: Creates ghouls, ghosts, mummies, or mohrgs.

Disintegrate: Makes one creature or object vanish.

Dream World: Creates a permanent portal to a new pocket dimension.

Geas: Commands subject for a year and a day.

Petrify: Turns subject creature into statue.

Plane Shift: Subjects travel to another plane.

True Seeing: Lets you see all things as they really are.

Divine Spells

0-Level Spells

Cure Minor Wounds: Cures 1 point of damage.

Detect Poison: Detects poison in one creature or object.

1st-Level Spells

Brew Potion: Store a spell you cast in a potion to be released when quaffed.

Bless: Allies gain +1 on attack rolls.

Cure Light Wounds: Cures 1d8 damage +1/level (max +5).

Shield: AC +2 +1/6 level.

2nd-Level Spells

Augury: Learns whether an action will be good or bad.

Cure Moderate Wounds: Cures 2d8 damage +1/level (max +10).

Zone of Truth: Subjects within range cannot lie.

3rd-Level Spells

Cure Serious Wounds: Cures 3d8 damage +1/level (max +15).

Remove Curse: Frees object or person from curse.

Speak with Dead: Corpse answers one question/two levels.

4th-Level Spells

Cure Critical Wounds: Cures 4d8 damage +1/level (max +20).

Neutralize Poison: Immunizes subject against poison, detoxifies venom in or on subject.

Restoration: Restores level and stat drains.

5th-Level Spells

Mass Cure Light Wounds: Cures 1d8 damage +1/level for many creatures.

Raise Dead: Restores life to subject who died as long as one day/level ago.

Hallow: Designates location as holy.

Commune: Deity answers one yes-or-no question/level.

Reversible Spells

Spells are reversible if possible.

New Spells

It is of course possible to research further arcane spells and to ask a patron diety for further divine favors. Take a look at the SRD for inspiration.

Monsters

Creation: Pick a name, assign a level, hit dice = level, hit points = 1d6 per level, magic defense = 10 + level, all attack bonuses = level, damage = 1d6 for ordinary claws, bites, and weapons, 2d6 for large maws, giant clubs, 3d6 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases.

Special attacks act like magic attacks against an appropriate defense.

Monsters and non-player characters don't have stats.

ANT, GIANT: AC: 16 HD: 3d6 AT: bite +3 (1d6) S: acid (2d6)

BASILISK: AC: 15 HD: 6d6 AT: bite +6 (1d6) S: petrifies onlookers

BLACK PUDDING: AC: 13 HD: 10d6 AT: slam +10 (2d6) S: immune to everything but fire, divides when hit

BLINK DOG: AC: 14 HD: 4d6 AT: bite +4 (1d6) S: teleports

BUGBEAR: AC: 14 HD: 3d6 AT: weapon +3 (1d6) S: surprise foes on a 1-3

CENTAUR: AC: 14 HD: 4d6 AT: 2 kicks +4 (1d6), weapon +4 (1d6)

CENTIPEDE, GIANT: AC: 16 HD: 6d6 AT: bite +6 (2d6) S: poison (1d6 DEX)

CHIMERA: AC: 15 HD: 9d6 AT: 2 claws +9 (1d6), goat gore +9 (1d6), lion bite +9 (1d6), dragon bite +9 (2d6) S: breathes fire (3d6), flies

COCKATRICE: AC: 13 HD: 5d6 AT: bite +5 (1d6) S: petrifying bite

DJINN: AC: 14 HD: 7d6 AT: slam +7 (2d6) S: flies, whirlwind, creation of things, create illusions, invisibility, immune to mundane weapons

DOPPELGANGER: AC: 14 HD: 4d6 AT: claw +4 (1d6) S: immitate humanoids, immune to sleep and charm

DRAGON, BLACK: AC: 17 HD: 7d6 AT: 2 claws +7 (1d6), bite+7 (1d6) S: breathes line of acid (7d6)

DRAGON, BLUE: AC: 19 HD: 9d6 AT: 2 claws+9 (1d6), bite+9 (3d6) S: breathes line of lightning (9d6)

DRAGON, GREEN: AC: 18 HD: 8d6 AT: 2 claws +8 (1d6), bite +8 (3d6) S: breathes cloud of chlorine gas (8d6)

DRAGON, RED: AC: 20 HD: 10d6 AT: 2 claws +10 (1d6), bite (4d6) S: breathes cone of fire (10d6)

DRAGON, WHITE: AC: 16 HD: 6d6 AT: 2 claws +6 (1d6), bite +6 (2d6) S: breathes cone of cold (6d6)

DRYAD: AC: 14 HD: 2d6 AT: no S: charm

EFREET: AC: 16 HD: 10d6 AT: slam +10 (2d6) S: flies, wall of fire, creation of things, create illusions, invisibility, immune to mundane weapons

ELEMENTAL, AIR: AC: 19 HD: 12d6 AT: slam +12 (2d6) S: whirlwind, extra damage against foes in the air

ELEMENTAL, EARTH: AC: 19 HD: 12d6 AT: slam +12 (2d6) S: tear down stone, extra damage against foes standing on the ground (1d6)

ELEMENTAL, FIRE: AC: 19 HD: 12d6 AT: slam +12 (2d6) S: ignite materials

ELEMENTAL, WATER: AC: 19 HD: 12d6 AT: slam +12 (2d6) S: overturn boats, extra damage against swimming foes (1d6)

GARGOYLE: AC: 14 HD: 4d6 AT: 2 claws +4 (1d6), bite +4 (1d6), horns +4 (1d6) S: fly

GELATINOUS CUBE: AC: 11 HD: 4d6 AT: slam +4 (2d6) S: touch paralyzes, immune to lightning and cold, surprise foes on a 1-4

GHOUL: AC: 13 HD: 2d6 AT: 2 claws +2 (1d6), bite +2 (1d6) S: touch paralyzes, humans slain by ghouls rise again as ghouls in 24h

GIANT, CLOUD: AC: 15 HD: 12d6 AT: morningstar +12 (4d6) or +12 hurl rocks (3d6) S: only surprised on a 1.

GIANT, FIRE: AC: 15 HD: 11d6 AT: sword +11 (5d6) or +11 hurl rocks (3d6) S: immune to fire

GIANT, FROST: AC: 15 HD: 10d6 AT: greataxe +10 (4d6) or +11 hurl rocks (3d6) S: immune to cold

GIANT, HILL: AC: 15 HD: 8d6 AT: spear +8 (2d6)

GIANT, STONE: AC: 15 HD: 9d6 AT: stone club +9 (3d6) or +9 hurl rocks (3d6)

GIANT, STORM: AC: 17 HD: 15d6 AT: greatsword +15 (8d6) S: call thunderstorm in 10min, then call lightning (15d6)

GNOLL: AC: 14 HD: 2d6 AT: weapon +2 (1d6)

M20 Hard Core Rules v1.02

GOBLIN: AC: 13 HD: 1d6 AT: weapon +1 (1d6) S: -1 to hit in sunlight

GOLEM: AC: 18 HD: 9d6 AT: 2 slams +9 (2d6) S: hit only by magic weapons, immune to magic, healed by lightning

GORGON: AC: 17 HD: 8d6 AT: gore +8 (2d6) S: breathes petrifying gas

GREY OOZE: AC: 11 HD: 3d6 AT: slam +3 (2d6) S: acid destroys armor in one round, deals automatic damage after the first hit, immune to fire and cold

GRIFFON: AC: 14 HD: 7d6 AT: 2 claws +7 (1d6), bite+7 (2d6) S: flies

HARPY: AC: 12 HD: 3d6 AT: 2 talons +3 (1d6), weapon +3 (1d6) S: flies, siren-song

HELL HOUND: AC: 15 HD: 5d6 AT: bite +5 (1d6) S: breathe fire (5d6)

HIPPOGRIFF: AC: 14 HD: 3d6 AT: 2 claws +3 (1d6), bite +3 (1d6) S: flies

HOBGOBLIN: AC: 13 HD: 1d6 AT: weapon +1 (1d6)

KOBOLD: AC: 12 HD: 1d6 AT: weapon (1d6)

LIZARDMAN: AC: 15 HD: 2d6 AT: weapon (1d6)

LYCANTHROPE, WEREBEAR: AC: 17 HD: 6d6 AT: 2 claws +6 (2d6), bite +7 (2d6) S: lycanthropy, extra 2d6 damage if both claws hit

LYCANTHROPE, WEREBOAR: AC: 15 HD: 4d6 AT: tusk +6 (2d6) S: lycanthropy, attack +6 instead of +4 because of rage

LYCANTHROPE, WERERAT: AC: 12 HD: 3d6 AT: bite +3 (1d6) S: lycanthropy, surprise foes on a 1-4

LYCANTHROPE, WERETIGER: AC: 16 HD: 5d6 AT: 2 claws +5 (1d6), bite +5 (2d6) S: lycanthropy, surprise foes on a 1-4

LYCANTHROPE, WEREWOLF: AC: 14 HD: 4d6 AT: bite +4 (2d6) S: lycanthropy

MANTICORE: AC: 15 HD: 6d6 AT: 2 claws +6 (1d6), bite +6 (2d6) S: flies, six tail spikes +6 (1d6) per round, 24 spikes in total

MEDUSA: AC: 11 HD: 4d6 AT: weapon +4 (1d6) S: onlookers turns to stone, averting eyes reduces to-hit by 4 and grants +2 to medusa attacks

MERMAN: AC: 13 HD: 1d6 AT: weapon +1 (1d6) S: breathe water, swim

MINOTAUR: AC: 13 HD: 6d6 AT: Head gore +6 (1d6), weapon +6 (1d6)

MUMMY: AC: 16 HD: 5d6 AT: slam (2d6) S: mummy rot curse if hit (no more healing), hit only by magic weapons, spells, and fire, immune to charm, sleep, and hold spells

NIXIE: AC: 12 HD: 1d6 AT: weapon (1d6) S: swims, charm

OCHRE JELLY: AC: 11 HD: 5d6 AT: acid strike +5 (2d6) S: a hit destroys organic material, lightning and weapon damage divides jelly into three jellies, each doing +2 (1d6) damage

OGRE: AC: 14 HD: 4d6 AT: weapon +4 (2d6)

ORC: AC: 13 HD: 1d6 AT: weapon +1 (1d6)

OWLBEAR: AC: 14 HD: 5d6 AT: 2 claws +5 (1d6), bite+5 (1d6) S: hug for additional 2d6 if both claws hit

PEGASUS: AC: 13 HD: 2d6 AT: 2 hooves +2 (1d6) S: flies

PURPLE WORM: AC: 13 HD: 15d6 AT: bite+15 (2d6), sting (1d6) S: poison sting (1d6 STR), swallows whole on a natural 20, swallowed creatures take 3d6 automatic damage every round

ROC: AC: 17 HD: 12d6 AT: 2 claws +12 (1d6), bite +12 (3d6)

SALAMANDER: AC: 17 HD: 8d6 AT: 2 claws +8 (1d6), bite +8 (1d6) S: heat does 1d6 to nearby creatures, immune to fire, hit only by magic weapons

SHADOW: AC: 12 HD: 2d6 AT: touch (1d46) S: drains 1 STR per hit, hit only by magical weapons, immune to charm and sleep spells, surprise foes on a 1-5, creatures reduced to 0 STR will rise 24h later as a shadow

SKELETON: AC: 12 HD: 1d6 AT: weapon +1 (1d6) S: immune to charm and sleep spells

SPECTER: AC: 17 HD: 6d6 AT: touch +6 (1d6) S: immune to charm, sleep and hold spells, drains 2 levels per hit, creatures reduced to 0 levels will rise 24h later as a specter

STIRGE: AC: 12 HD: 1d6 AT: sting +1 (1d6) S: attaches on a hit and will deal 1d6 automatically damage every round

TOAD, GIANT: AC: 12 HD: 2d6 AT: bite +2 (1d6) S: surprise foes on a 1-3, swallows small creatures whole on a natural 20, swallowed creatures take 1d6 automatic damage every round, long tongue

TROLL: AC 15 HD: 6d6 AT: 2 claws (1d6), bite +6 (2d6) S: regenerate 3 per round

VAMPIRE: AC: 17 HD: 9d6 AT: bite +9 (1d6) S: immune to charm, sleep and hold spells, hit only by magical weapons, regenerate 3 per round, drains 2 levels per hit, gaseous form at will, shape change into bat, charm gaze, avoids garlic and mirrors, immobilized and apparently dead if a stake is driven through its heart, drowns under water in one round

M20 Hard Core Rules v1.02

WIGHT: AC: 14 HD: 3d6 AT: claw +3 (1d6) S: immune to charm and sleep spells, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise some days later as a wight

WILL-O-THE-WISP: AC: 27 HD: 9d6 AT: 1 shock+9 (1d6+4)

WOLF: AC: 12 HD: 2d6 AT: bite +2 (1d6)

WORG: AC: 13 HD: 4d6 AT: 1 bite +4 (2d6)

WRAITH: AC: 16 HD: 4d6 AT: touch +4 (1d6) S: immune to charm, sleep, and hold spells, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise 24h later as a wraith

WYVERN: AC: 16 HD: 7d6 AT: bite +7 (2d6), sting +7 (1d6) S: poison sting (1d6 STR), flies

ZOMBIE: AC: 11 HD: 2d6 AT: claw +2 (1d6) S: immune to charm and sleep spells, always loose initiative

This list is a bit short on fey & sylvan creatures (unicorns, treants), underwater creatures (sharks, sea devils), and outsiders (demons, devils, angels).

Swords against Sorcery

A Microlite 20 distribution - Pacificon 2008 Edition - 8/26/08 draft

Introduction

Swords against Sorcery ("SvS") is a distribution (mash-up, blend, whatever) of the Microlite20 game ("M20"). This is a trimmed-down, subminiature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD (monsters, spells, adventures and equipment) could be used without conversion.

Stats

There are three stats : Strength (STR), Dexterity (DEX) and Mind (MIND). Roll 4d6 for each stat, dropping the die of your choice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.
Hit Points = STR Stat + 1d6/Level.

All characters speak common tongue, as well as their native language; humans speak common natively. Characters may speak one additional language per point of MIND over 10.

Characters begin at Level 1, with 0 experience points.

Races

Dwarves get STR +2.
Elves get MIND +2.
Halflings get DEX +2.
Humans get +1 to any two stats.

Classes

Fighters add +1 to all attack and damage rolls. Every five levels starting at five (5, 10, 15, etc.) add another +1 to attack and damage rolls. They receive a +3 on Physical skill rolls.

Wizards cast arcane spells, and read arcane scrolls and spellbooks. They receive a +3 on all Knowledge skill rolls.

Clerics cast divine spells. A Cleric can Turn Undead (2 + Level + MIND Bonus) times per day. They receive a +3 on all Communication skill rolls.

Skills

There are 5 skills : Physical, Subterfuge, Knowledge, Communication, Survival. Roll higher than the given Difficulty Class to succeed.

Skill rank = level + class and race bonuses.
Skill roll = d20 + skill rank + stat bonus + situation modifiers.

Starting characters can spend 3 points on skills - including class-bonused skills - but no skill can be higher than +4 at start.

Magic

Every spell has a Spell Level. The maximum Spell Level for a spellcaster is Level/2, rounded up. Casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast:

Spell Level	0	1	2	3	4	5	6
HP Cost	1	3	5	7	9	11	13
HP if favorite		2	4	6	8	10	12
Min. Caster Level	1	3	5	7	9	11	

Wizards casting in armor pay additional HP equal to their armor bonus. There is no need to memorize spells in advance. Spellcasters can pick a favorite spell on every Spell Level starting at 1st level. These spells are easier to cast due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) for all spells is
10 + Caster Level + Caster's MIND bonus

Note that there are no separate "saving throws" in this game: use STR bonus + your level for Fortitude saves and use DEX bonus + your level for Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Gear

Weapons

Unarmed = 1d4
Light Weapons = 1d6
Medium Weapons = 1d8
Heavy Weapons = 1d10

Armor

Light = +2 AC
 Medium = +4 AC
 Heavy = +6 AC

Shields

Light = +1 AC
 Heavy = +2 AC

Surprise

At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 you are surprised and may not act.

Combat

Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc.

Melee attack bonus = STR bonus + Level
 Missile attack bonus = DEX bonus + Level
 Magic attack bonus = MIND bonus + Level
 Armor Class (AC) = 10 + DEX bonus + Armor bonus
 Add attack bonus to d20 roll. If higher than your opponent's Armor Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage. A 1 is always a miss.

Damage

Damage = d6 or weapon + fighter bonus. Add + STR bonus if a melee attack; x2 for 2-handed weapons.

If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Resting for 30 minutes recovers all hit points lost. One day of rest recovers one point of STR.

**Level Advancement**

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

If the level divides by four (i.e. level 4, 8, 12, etc.) add 1 point to STR, DEX or MIND (player's choice).

Fighters gain +1 to their attack and damage rolls at levels 5,10,15,etc.

Clerics and Magi gain access to new spell levels at levels 3,5,7,9,etc.

Arcane Spells

Wizards can cast any arcane spell they learn. Learning an arcane spell means copying it by hand into one's spell book. A wizard can only learn a spell equal or below 1/2 their class level, rounded up. Wizards start with three first levels arcane spells in his spell book and can add more spells by finding (or buying) them on scrolls or books and copying them into his spell book.

0-Level Spells

Arcane Mark: Permanently inscribes a personal rune (visible or invisible).

Detect Magic: Detects spells and magic items.

Ghost Sound: Figment sounds for minutes.

Light: Object shines like a torch for hours.

Mage Hand: 5-pound telekinesis while concentrating.

1st-Level Spells

Alarm: Wards an area for hours.

Cause Fear: One creature of 5 HD or less flees.

Charm Person: Makes one person your friend for a day.

Comprehend Languages: You understand all spoken and written languages.

Grease: Makes area or one object slippery.

Magic Missile: 1d4+1 damage; +1 missile per two levels above 1st (max 5).

Read Magic: Allow target to read arcane scrolls and spellbooks. Duration 1 minute per level.

Scribe Scroll: Store a spell that you cast on a scroll to be released by reading it. This requires a use of Read Magic beforehand.

Sleep: Puts 4 HD of creatures into magical slumber.

Spider Climb: Grants ability to walk on walls and ceilings.

Ventriloquism: Throws voice.

2nd-Level Spells

Acid Arrow: 2d4 damage for 1 round +1 round/three levels.

Command Undead: Undead creature obeys your commands.

Detect Thoughts: Allows "listening" to surface thoughts.

Draw Runes: Stores a spell that you cast in a rune you draw to be released using a simple trigger you specify.

Fly: Subject flies at speed of 60 ft.

Hold Person: Paralyzes one humanoid.

Invisibility: Subject is invisible until it attacks.

See Invisibility: Reveals invisible creatures or objects.

Web: Fills area with sticky spiderwebs.

3rd-Level Spells

Craft Wand: Store a spell that you cast into a wand to be released using a command word.

Dispel Magic: Cancels magical spells and effects.

Fireball: 1d6 damage per level, 20-ft. radius.

Gentle Repose: Preserves one corpse.

Haste: One creature/level moves faster or gets a second melee attack.

Major Image: Image plus sound, smell and thermal effects.

Summon Monster: Calls extraplanar creature to fight for you.

Tongues: Speak any language.

WindWalk: Targets turn to dust and fly in a gust of wind.

4th-Level Spells

Animate Dead: Creates undead skeletons and zombies.

Charm Monster: Makes monster believe it is your ally for a day.

Create Wondrous Item: Permanently enchant masterwork items including arms and armor with effects that are thematically linked to a spell you cast.

Illusory Wall: Creates a permanent wall, floor, or ceiling that looks real, but anything can pass through.

Scrying: Spies on subject from a distance.

ShadowWalk: Take subjects into shadow to travel rapidly.

Shout: Deafens all within cone and deals 5d6 sonic damage.

Stone Shape: Sculpts stone into any shape.

5th-Level Spells

Cone of Cold: 1d6/level cold damage.

Dominate Person: Controls humanoid telepathically.

Magic Jar: Enables possession of another creature.

Permanency: Makes certain spells permanent.

Planar Binding: Traps extraplanar creature of 6 HD or less until it performs a task.

Polymorph: Transforms subject into harmless animal.

Seeming: Changes appearance of one person per two levels.

Telepathic Bond: Link lets allies communicate.

Teleport: Instantly transports subjects hundreds of miles.

6th-Level Spells

Create Golem: Creates constructs made of dead material.

Create Undead: Creates ghouls, ghosts, mummies, or mohrgs.

Disintegrate: Makes one creature or object vanish.

DreamWorld: Creates a permanent portal to a new pocket dimension.

Geas: Commands subject.

Petrify: Turns subject creature into statue.

Plane Shift: Subjects travel to another plane.

True Seeing: Lets you see all things as they really are.

Divine Spells

Clerics may cast any divine spell, with a spell level equal or below 1/2 their class level, rounded up. Clerics do not need spell books and automatically have access to all divine spells of a level they can cast (use of certain spells may be forbidden by the cleric's deity, however). Clerics can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed.

0-Level Spells

Cure Minor Wounds: Cures 1 point of damage.

Detect Poison: Detects poison in one creature or object.

1st-Level Spells

Brew Potion: Store a spell you cast in a potion to be released when quaffed.

Bless: Allies gain +1 on attack rolls and saves against fear.

Cure Light Wounds: Cures 1d8 damage +1/level (max +5).

Shield: AC +2 +1/6 level.

2nd-Level Spells

Augury: Learns whether an action will be good or bad.

Cure Moderate Wounds: Cures 2d8 damage +1/level (max +10).

Zone of Truth: Subjects within range cannot lie.

3rd-Level Spells
Cure Serious Wounds: Cures 3d8 damage +1/level (max +15).

Remove Curse: Frees object or person from curse.

Speak with Dead: Corpse answers one question/two levels.

4th-Level Spells

Cure Critical Wounds: Cures 4d8 damage +1/level (max +20).

Neutralize Poison: Immunizes subject against poison, detoxifies venom in or on subject.

Restoration: Restores level and stat drains.

5th-Level Spells

Mass Cure Light Wounds: Cures 1d8 damage +1/level for many creatures.

Raise Dead: Restores life to subject who died as long as one day/level ago.

Hallow: Designates location as holy.

Commune: Deity answers one yes-or-no question/level.

Reversible Spells

Spells are reversible if possible.

New Spells

It is of course possible to research further arcane spells and to ask a patron deity for further divine favors. Take a look at the SRD for inspiration.

Scrolls

There are arcane and divine scrolls. Arcane scrolls are created by wizards, and can only be read by wizards or those under a Read Magic spell. They cost wizards no hp to cast; those using Read Magic must pay the hp cost as if the scroll spell was a favorite spell.

Divine scrolls are created by clerics. They can be cast by any able to read by anyone, and cost no hp to cast.

Monsters

Creation: Pick a name, assign a level, hit dice = level, hit points = 1d6 per level, magic defense = 10 + level, all attack bonuses = level, damage = 1d6 for ordinary claws, bites, and weapons, 2d6 for large maws, giant clubs, 3d6 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases.

Special attacks act like magic attacks against an appropriate defense. Monsters and non-player characters don't have stats.

ANT, GIANT: AC: 16 HD: 3d6 AT: bite +3 (1d6) S: acid (2d6)

BASILISK: AC: 15 HD: 6d6 AT: bite +6 (1d6) S: petrifies onlookers

BLACK PUDDING: AC: 13 HD: 10d6 AT: slam +10 (2d6) S: immune to everything but fire, divides when hit

BLINK DOG: AC: 14 HD: 4d6 AT: bite +4 (1d6) S: teleports

BUGBEAR: AC: 14 HD: 3d6 AT: weapon +3 (1d6) S: surprise foes on a 1-3

CENTAUR: AC: 14 HD: 4d6 AT: 2 kicks +4 (1d6), weapon +4 (1d6)

CENTPEDE, GIANT: AC: 16 HD: 6d6 AT: bite +6 (2d6) S: poison (1d6 DEX)

CHIMERA: AC: 15 HD: 9d6 AT: 2 claws +9 (1d6), goat gore +9 (1d6), lion bite +9 (1d6), dragon bite +9 (2d6) S: breathes fire (3d6), flies

COCKATRICE: AC: 13 HD: 5d6 AT: bite +5 (1d6) S: petrifying bite

DJINN: AC: 14 HD: 7d6 AT: slam +7 (2d6) S: flies, whirlwind, creation of things, create illusions, invisibility, immune to mundane weapons

bite +3 (1d6) S: lycanthropy, surprise foes on a 1-4

LYCANTHROPE, WERETIGER: AC: 16 HD: 5d6 AT: 2 claws +5 (1d6), bite +5 (2d6) S: lycanthropy, surprise foes on a 1-4

LYCANTHROPE, WEREWOLF: AC: 14 HD: 4d6 AT: bite +4 (2d6) S: lycanthropy

MANTICORE: AC: 15 HD: 6d6 AT: 2 claws +6 (1d6), bite +6 (2d6) S: flies, six tail spikes +6 (1d6) per round, 24 spikes in total

MEDUSA: AC: 11 HD: 4d6 AT: weapon +4 (1d6) S: onlookers turns to stone, averting eyes reduces to-hit by 4 and grants +2 to medusa attacks

MERMAN: AC: 13 HD: 1d6 AT: weapon +1 (1d6) S: breathe water, swim

MINOTAUR: AC: 13 HD: 6d6 AT: Head gore +6 (1d6), weapon +6 (1d6)

MUMMY: AC: 16 HD: 5d6 AT: slam (2d6) S: mummy rot curse if hit (no more healing), hit only by magic weapons, spells, and fire, immune to charm, sleep, and hold spells

NIXIE: AC: 12 HD: 1d6 AT: weapon (1d6) S: swims, charm

OCHRE JELLY: AC: 11 HD: 5d6 AT: acid strike +5 (2d6) S: a hit destroys organic material, lightning and weapon damage divides jelly into three jellies, each doing +2 (1d6) damage

OGRE: AC: 14 HD: 4d6 AT: weapon +4 (2d6)

ORC: AC: 13 HD: 1d6 AT: weapon +1 (1d6)

OWLBEAR: AC: 14 HD: 5d6 AT: 2 claws +5 (1d6), bite +5 (1d6) S: hug for additional 2d6 if both claws hit

PEGASUS: AC: 13 HD: 2d6 AT: 2 hooves +2 (1d6) S: flies

PURPLE WORM: AC: 13 HD: 15d6 AT: bite +15 (2d6), sting (1d6) S: poison sting (1d6 STR), swallows whole on a natural 20, swallowed creatures take 3d6 automatic damage every round

ROC: AC: 17 HD: 12d6 AT: 2 claws +12 (1d6), bite +12 (3d6)

SALAMANDER: AC: 17 HD: 8d6 AT: 2 claws +8 (1d6), bite +8 (1d6) S: heat does 1d6 to nearby creatures, immune to fire, hit only by magic weapons

SHADOW: AC: 12 HD: 2d6 AT: touch (1d46) S: drains 1 STR per hit, hit only by magical weapons, immune to charm and sleep spells, surprise foes on a 1-5, creatures reduced to 0 STR will rise 24h later as a shadow

SKELETON: AC: 12 HD: 1d6 AT: weapon +1 (1d6) S: immune to charm and sleep spells

SPECTER: AC: 17 HD: 6d8 AT: touch +6 (1d6) S: immune to charm, sleep and hold spells, drains 2 levels per hit, creatures reduced to 0 levels

will rise 24h later as a specter

STIRGE: AC: 12 HD: 1d6 AT: sting +1 (1d6) S: attaches on a hit and will deal 1d6 automatically damage every round

TOAD, GIANT: AC: 12 HD: 2d6 AT: bite +2 (1d6) S: surprise foes on a 1-3, swallows small creatures whole on a natural 20, swallowed creatures take 1d6 automatic damage every round, long tongue

TROLL: AC: 15 HD: 6d6 AT: 2 claws (1d6), bite +6 (2d6) S: regenerate 3 per round

VAMPIRE: AC: 17 HD: 9d8 AT: bite +9 (1d6) S: immune to charm, sleep and hold spells, hit only by magical weapons, regenerate 3 per round, drains 2 levels per hit, gaseous form at will, shape change into bat, charm gaze, avoids garlic and mirrors, immobilized and apparently dead if a stake is driven through its heart, drowns under water in one round

WIGHT: AC: 14 HD: 3d8 AT: claw +3 (1d6) S: immune to charm and sleep spells, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise some days later as a wight

WILL-O-THE-WISP: AC: 27 HD: 9d6 AT: 1 shock +9 (1d6+4)

WOLF: AC: 12 HD: 2d6 AT: bite +2 (1d6)

WORG: AC: 13 HD: 4d6 AT: 1 bite +4 (2d6)

WRAITH: AC: 16 HD: 4d6 AT: touch +4 (1d6) S: immune to charm, sleep, and hold spells, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise 24h later as a wraith

WYVERN: AC: 16 HD: 7d6 AT: bite +7 (2d6), sting +7 (1d6) S: poison sting (1d6 STR), flies

ZOMBIE: AC: 11 HD: 2d6 AT: claw +2 (1d6) S: immune to charm and sleep spells, always loose initiative.

1. Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor; (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

M20 Heroic – A Microlite20 Variant

Definition: Player Characters (PCs)

A PC is any character controlled by a player that is not the Game Master (GM). Player Characters have the following numeric traits (followed by a definition):

Abilities

Strength Score (Str): measures a character's physical strength.

Dexterity Score (Dex): measures a character's agility and nimbleness.

Intelligence Score (Int): measures a character's ability to think and reason.

Charisma Score (Cha): measures a character's strength of will and personality.

A **modifier** for each ability, used for calculating the other traits.

Combat Statistics

Attack Bonus (AB): chance to damage an enemy with a weapon.

Magic Bonus (MB): chance to successfully use magic.

Defence Bonus (DB): chance to avoid being damaged by a weapon.

Damage Bonus (DMG): increases the damage you cause with successful weapon attacks.

Hit Points (HP): vitality, endurance and morale; do not represent physical condition.

Wound Points (WP): physical condition, life force

Movement Speed (SPD): the number of squares you can move during your turn in combat.

Resistances

Fortitude Bonus (Fort): chance to resist effects targeting the body's toughness (e.g. poison).

Reflex Bonus (Ref): chance to resist effects targeting the body's reflexes.

Perception Bonus (Per): chance to notice something or being aware of something.

Willpower Bonus (Will): chance to resist effects targeting the mind.

Advancement

Level (LVL): used to measure the character's overall power compared to other creatures in the world.

Experience (XP): used to determine when the character's level increases.

Definition: Character class

A character's class provides hints for the player how to act out their characters as well as it modifies some of the character's traits. Every class description features the following entries that detail how a character's traits are modified.

Primary Ability: this ability score automatically increases by +1 every 3 levels (3rd, 6th, 9th, etc).

Attack: added to the character's **AB**

Magic: added to the character's **MB** ("none" means the character's **MB** stays 0)

Resistance: added to the character's **Resistances**

Equipment: determines the starting equipment for the character.

Special: special rules for the character class are mentioned here

Definition: Ability Score Modifiers & Special Rules

Characters with ability modifiers above +0 automatically become subject to the special rules detailed in the following table:

Modifier	Strength	Dexterity	Intelligence	Charisma
+1	Wear light armour without a penalty to attack and defence rolls.	Wield shields without a penalty to attack and defence rolls.	Read/Write and speak a foreign language.	+2 bonus to checks made to convince people.
+2	Wear medium armour without a penalty to attack and defence rolls.	You receive a +1 bonus to your SPD while wearing only light or no armour.	Choose a topic. +4 bonus to checks made regarding that topic.	+2 bonus to checks made to lie / detect lies.
+3	Wear heavy armour without a penalty to attack and defence rolls.	The penalty for attacking with two melee weapons decreases by 2.	You occasionally receive clues from the GM.	You don't suffer penalties for interacting with people of foreign cultures.
+4	+4 DMG with melee weapons.	+4 DMG with ranged weapons.	Select one special rule from another class. You benefit from this rule from now on.	+8 bonus to hp
+5	You may move enemies of up to your size 1 square after a successful melee attack.	You may move before and after making an attack (but you cannot exceed your SPD).	Casting magic spells costs you 1 hp less.	You attract 1d6 followers per level (the GM determines which).
+6 or higher	You may reroll any damage roll in melee once.	You may reroll any attack roll once.	You may reroll any magic roll once.	Allies that can hear and see you receive a +1 bonus to all rolls.

Definition: Check

A check is one roll of a twenty-sided die where the result can be modified for different reasons. A check serves to determine whether an action is successful or not. In order to do that, the modified result of the die roll is compared to a number, the so called **Difficulty Class** (DC). If the modified result of the die roll is **greater than** or **equal to** the DC, the action is successful, else it failed.

The DC and modifiers for a check are set by the GM. As a general rule, a character receives a +2 bonus to a check for every beneficial circumstance or detail the player gives while describing the action the character tries to perform. Any hindering circumstance may incur a -2 penalty to the check (again, the GM decides whether a penalty applies). The following table gives a guideline on how to set check DCs.

DC	Description
10	A normal task, an average person has a good chance to succeed
15	A hard task, requires some time and the right tools for average people
20	A very hard task, only the skilled have a real chance to succeed
25	A heroic task, a lot of luck and skill is required
30	An epic task, only a true master, maybe with divine help can succeed

Definition: Roll

A roll is used to determine a certain number, often a DC. The result of the roll equals 1d20 + bonus indicated by the name. Examples: A defence roll is the result of 1d20 and the character's defence bonus. A reflex roll is the result of 1d20 and the character's reflex bonus.

Definition: Attacks and Defence

An attack requires a successful attack roll to deal damage. An attack roll is a check using a character's **AB** as a modifier. The creature targeted by the attack makes a defence roll, with the result being used as the DC for the attack roll.

If the attack is successful, the attacker rolls for damage, as indicated by the weapon he uses and adds his damage bonus. The creature targeted by the attack loses that much hp. If the creature has 0 or less hit points, it loses one wound point for every 5 points of damage dealt.

Definition: Armour

Armour is protective gear worn on the body in order to decrease the chance to take damage. Thus armour increases a character's DB while worn. Depending on the type of armour worn, the character may suffer some penalties. Shields a free hand to be used and can be worn together with armour. The effects of armour and shields stack.

Type	Defence Bonus	Maximum Speed	Penalty
light armour	+2	unaffected	-2
medium armour	+5	5	-4
heavy armour	+8	4	-6
small shield	+1	unaffected	-1
large shield	+2	unaffected	-2

Type: the type of the armour.

Defence Bonus: this figure is added to the character's DB while wearing the armour / shield.

Maximum Speed: the character's speed is reduced to this figure while wearing the armour.

Penalty: the penalty is applied to all attack, defence and magic rolls and to all checks related to physical activity such as climbing or sneaking.

Definition: Weapon

A weapon determines the amount of damage the character deals with a successful attack. Weapons with a range of 1 square are called melee weapons. Weapons with a greater range are called ranged weapons. Shields cannot be used while employing a two-handed weapon.

Type	Damage	Range
light	1d6	1
one-handed	1d6+2	1
two-handed	2d6	1
one-handed missile	1d6	15
two-handed missile	1d6+2	30
throwing	1d6+2	5

Type: the type of the weapon.

Damage: the amount of damage the weapon deals on a successful attack.

Range: how many squares the target of the attack can be away; ranged weapons can also target creatures farther away (up to double range), but the attacker receives a -2 penalty to his attack roll when doing so.

Character Classes

Fighter

Primary Ability: Strength **Attack:** +5 **Magic:** +0 **Resistance:** Fort +3, Ref +2, Will +1

Equipment:

- ◇ one-handed melee weapon and large shield **or** two-handed melee weapon
- ◇ any kind of armour
- ◇ any missile or throwing weapon

Special:

Toughness: the total penalty for lost wp is decreased by your Str modifier.

Stalwart: when targeted by an opposed effect, you may immediately spend 5 hp to increase your resistance bonus by +5.

Power Attack: before making an attack roll you can spend a number of hit points up to your level. Your DMG increases by that number for this attack.

Scout

Primary Ability: Dexterity **Attack:** +3 **Magic:** +3 **Resistance:** Ref +3, Per +2, Fort +1

Equipment:

- ◇ one-handed melee weapon and small shield **or** two light weapons
- ◇ light or medium armour
- ◇ any missile weapon and a throwing weapon

Special:

Fleet of Foot: add your Dex modifier to your SPD.

Critical Hit: your DMG increases by +10 against enemies with 0 or less hp.

Skirmishing: by spending 2 hp you can actively move one square without provoking an opportunity attack. You cannot exceed your SPD this way.

Mage

Primary Ability: Intelligence **Attack:** +0 **Magic:** +5 **Resistance:** Will +3, Per +2, Fort +1

Equipment:

- ◇ light melee weapon
- ◇ any missile weapon

Special:

Arcane Reach: Spellcasting-effects have a range of at least 6 without requiring you to apply any modifiers or spending additional hit points.

Spellmaster: you add your DMG to the damage caused by effects of the *Spellcasting* special rule.

Spellcasting: can make magic checks (1d20 + MB) to use the following effects as a special ability:

- Drain (Fort): the target loses 1d6 hit points. For every 5 or 6 you roll you restore 1 hp.
- Wound (Fort): roll 1d6. For every 5 or 6 you roll the target loses one wp.
- Damage (Ref): the target receives 1d6+1 points of damage.
- Entangle (Ref): the target's SPD is reduced by 1d3 until the end of the round.
- Telekinesis (Fort): Move the target 1d3 squares in any direction.

Leader

Primary Ability: Charisma **Attack:** +0 **Magic:** +5 **Resistance:** Will +3, Per +2, Ref +1

Equipment:

- ◇ one-handed melee weapon or light melee and light missile weapon
- ◇ light armour or small shield

Special:

Inspiring Presence: War Cry-effects affect at least a 5x5 area without requiring you to apply any modifiers or spending additional hit points.

Icon: you add your DMG to the number of hp restored by effects of the *War Cries* special rule.

War Cries: can make magic checks (1d20 + MB) to use the following effects as a special ability:

- Raise Morale: the target recovers 1d3+1 hit points.
- Weaken (Will): the damage of the target's next attack is reduced by 1d6.
- Fear (Will): move the target 1d3+1 squares away from you and your allies.
- Bolster : the target's DMG increases by 1d3+1 until the end of the round.
- Awe (Will): the target suffers a 1d3 penalty to all attack and defence rolls until the end of the next round.

Creating A Character

- 1) Your character's *ability scores* (Str, Dex, Int, Cha) all start at 10. You have 5 points to freely distribute among them and you may lower one ability score by 2 to get 2 additional points (but you can only lower one ability score). Your character starts at level 1 with 0 experience points.
- 2) Calculate the character's *ability modifiers*. An ability's modifier is used to calculate the other traits of your character later. The *ability modifier* equals the associated ability's $(\text{score} - 10) / 2$. Any fractions are rounded down.
- 3) Now the remaining traits are calculated (note any results from this step on a piece of scrap paper, as they are likely to be modified in the next step). Refer to the following table to figure out all remaining traits:

Trait	Calculation
AB	LVL + class bonus
MB	LVL + class bonus
DB	LVL + Dex modifier
DMG	LVL + Int modifier
HP	1d6 + 4 + Cha modifier
WP	5 + Str modifier
Fort	LVL + Str modifier + class bonus
Ref	LVL + Dex modifier + class bonus
Per	LVL + Int modifier + class bonus
Will	LVL + Cha modifier + class bonus

- 4) Select the character's class. This choice is very important as it determines how you play the game, especially in combat. A class only defines how the character performs in combat with rules; everything else can be invented or interpreted by you and GM. While the class for example might be called Mage here you still decide whether it describes a eerie and terrifying necromancer, a magician using fire to lay waste to anything that angers him or a benevolent healer that simply tries to make the world a better place. Upon this description all interaction with this character out of combat is based and also what this character is capable of that is not described with rules here. There may be no rules here for raising an army of rattling skeleton warriors or creating a fire that only scorches liars and thieves, but after all imagining and reacting to actions like this is what makes the game fun and encourages you to use your creativity!
- 5) Update any figures from step 3) that have changed and note them down on your character sheet together with your starting equipment. Ask the GM for additional equipment your character may get. It is also a good idea to think about the character's background and history now and tell the other players about it. Think of three adjectives describing your character; these are his *motivators* – they keep him going on and summarize his personality. You can describe your character in more detail – you are encouraged to do so – but your character can only have three motivators nevertheless.
- 6) Start Playing!

Playing the Game: Motivators and Conviction

In the beginning of the game your character has 1 conviction point (CP). Conviction points can be used any time to maximize the result of any single die. You receive a conviction point whenever your character acts according to his motivators. You can never have more conviction points than three plus half your level (rounded down). The GM may allow other uses for conviction.

Playing the Game: Character Advancement

For every combat won, your character receives 10 experience points, for every lost combat he receives 5. Remember that a combat counts as “won” when the enemies are overcome, no matter what means were used. Additionally the GM can award experience points to a character for excellent roleplaying, personal sacrifices and outstanding actions, but never more than 30 x the average character LVL of the party in total per session.

A character's LVL increases by one whenever he has collected 100 points of experience. Remember to recalculate any character traits that are level dependent such as the attack bonus and the resistances. When reaching a new level, the character's maximum number of hp increases by 1d6 + Cha modifier. When reaching a level that is divisible by (2nd, 4th, 6th, etc.) you may increase any ability **score** by 1. When reaching 10th level, your character may choose one special rule from another class to benefit from now on.

Playing the Game: Using Magic and Special Abilities

For simplicity's sake, the term "magic" in this document also describes any other special abilities of a character, for example the use of rhetoric to determine the actions of other people. Probably any ability that requires a large amount of training and concentration can be handled with the rules presented here. Using such abilities requires the expenditure of hit points, representing the strain the characters put on themselves and fatigue in general. The process of using a magic special ability is composed of three parts: **Effect**, **Modifier** and **Execution**.

The **Effect** is either determined by the class (if it has an obvious combat use) or by the player (for all other effects). Combat related effects always have a range of 1, target an 1x1 area and last 1 round. Effects don't distinguish between friend or foe – any creature in the area is affected, including your allies.

Most effects specify a **save** – the **Resistance** of the targeted character used for the DC during the execution phase. Such effects are called **opposed effects**. Targets that are willing are automatically affected.

Modifiers change the details of an effect, for example how far the target can be away. Applying modifiers to an effect costs you additional hit points and can increase the difficulty of using the special ability. The same modifier can be applied more than once, unless noted otherwise, though you can only apply as many as your LVL modifiers to a single use of a special ability. The modifiers shown here can always be applied to an effect, though you may use additional or other modifiers depending on your class. The modifiers listed here (the so called **standard modifiers**) cost 2 hp each to apply. Casting a spell / using a special ability **always costs at least 2hp**.

During the **Execution** the user pays the necessary hp before he makes the check to see whether the effect is applied successfully. Which character trait is used for making the check is given in the special ability's description (for combat related effects only).

Summary of using a special ability:

1. Choose the desired *Effect*
2. Choose any modifiers you want to apply
3. Choose the target of the special ability
4. Pay the hp cost for the modifiers and make the check specified by the effect; if the effect specifies a save the DC for the check equals 10 + the target's resistance bonus. If that is not the case, use the table below for finding the DC. The effect only affects its targets if this check is successful.

Standard modifiers:

- *Range*: the range increases by 2.
- *Area*: the length of the square targeted by the effect increases by 1.
- *Duration*: the duration of the effect increases by 1 (the effect is applied once each round it lasts).
- *Targets*: the spell targets one additional individual creature instead of an area.
- *Power*: if the effect specifies a save, the target suffers a -1 penalty to its resistance bonus.
- *Efficiency*: every numeric variable (including die) in the effect increases by 1.

Determining the DC for non-opposed effects

The check DC for non-opposed effects (e.g. out-of-combat effects or spells) depends on the amount of hit points spent to modify the effect.

HP spent	DC
2 - 6	10
7 - 12	15
13 - 18	20
19 - 24	25
25 - 30	30
31 - 36	35
37+	40

Playing the Game: Combat

Combat is one of the most complex topics in any role-playing game, so this chapter is quite rules-heavy. A combat is defined as any situation where characters are in danger of getting wounded or losing their lives due to a conscious effort taken by other creatures (also called "enemies"). In this chapter the term **party** refers to the player characters and **enemies** to any creatures that try to oppose them. Individual characters and creatures take one **turn** each and after all members of the party and the enemy have had their turns, a new **round** begins. Add the perception bonuses on both sides together. The side with the higher sum decides who is attacking. The attacking side is called **aggressor** whereas the other side is called the **defender**.

A combat round represents 6 seconds of time passing for the characters. During combat, distance is measured in **squares**. Use any size for a square you are comfortable with, though 5ft (1,5m) is recommended.

Combat Sequence:

1. Begin of the **round**.
2. All **aggressors** take their turns in any order
3. All **defenders** take their turns in any order
4. End of the **round**.

This sequence is repeated until one side is unable to continue the combat, surrenders or manages to escape.

During his turn a character can perform each of the following **actions** once, in any order:

- **Move:** Move up to your SPD in squares or retrieve an item from your backpack.
- **Standard:** Make an attack or use an item.
- **Minor:** shout an order, activate an item, drop to the ground, stand up, etc..

You can always perform an additional move action instead of a standard action.

Movement can be **active** or **passive**. Active movement is the movement you make during your turn with a move action and the number of squares moved can never exceed your SPD. Passive movement is any movement caused by special effects or generally spoken any forced movement. Squares moved passively are never counted against your SPD, i.e. you can move an infinite number of squares passively. Movement through **difficult terrain** costs two squares per square of difficult terrain crossed (e.g. moving through 5 squares of difficult terrain requires at least a SPD of 10). A creature **cannot end its movement in a square occupied by an enemy**. The standard **SPD** for **human sized** creatures is **6**.

Opportunity Attacks:

All squares a character can attack with an equipped melee weapon are called the character's **threat range**. Whenever an enemy moves out of a character's threat range (actively or passively), that character gets to make a an attack against that enemy (**opportunity attack**). Any character can only perform one opportunity attack per round.

Fighting with two weapons:

Characters wielding two weapons can make two attacks instead of one when taking a standard action. When making two attacks the character receives a -4 penalty to both attack rolls (-2 if one weapon is light).

Losing HP and WP:

A loss of hp represents small scratches, fading endurance or morale. After combat, characters can regain 1d6+Cha modifier hp for every two full levels they possess by taking a short rest of 5 minutes. This can only be done once after each combat; after that they regain their Cha modifier in hit points (but at least 1 hp) every 10 minutes of time passed.

Losing wound points means the character is physically harmed and in danger of losing his life. For every wound point lost, the character receives a -1 penalty to all rolls. Any character that has lost more wound points than his Str modifier can only move actively at half SPD. A character that has 0 wound points remaining is dead. Wound points recover at a rate of one per week.

Running the Game: Environmental Hazards

The player characters are likely to visit environments that are dangerous enough to pose a threat by themselves. The rules described here serve to determine the effects the environment has on the player characters and can be used by the GM to make terrain and climate play an more important role, requiring the players to plan and to be creative. Additionally these rules can be used to represent creature special attacks.

There are two types of hazards:

- ◇ **lethal** hazards deal **wp** and **hp** damage.
- ◇ **non-lethal** hazards deal **only hp** damage. If a character has no hp left he starts losing wp as from a normal attack (1 per 10 hp lost)

The damage done by a hazard of either type can belong to any of the following categories:

- ◇ **continuous** damage is applied in certain time intervals. The victim is entitled to a resistance check at every interval to avoid taking damage.
- ◇ **instant** damage is applied only once. The victim is entitled to a resistance check to avoid taking damage.
- ◇ **escalating** damage works like continuous damage, but the resistance check DC increases by +1 for every previous check.

Characters are subject to continuous and escalating damage as long as they find themselves in the dangerous area, or, if a specific duration duration is given, until that duration has expired.

The GM is free to increase the difficulty of any hazard, but should not increase it by more than the average character level in the party.

Examples:

Poison: lethal, continuous (every round; 2 rounds), Damage 1 wp + 1d6 hp, Fort DC 15

Suffocation: non-lethal, escalating (every round), Damage 1d6 hp, Fort DC 15

Extreme Temperature: non-lethal, escalating (every 10 minutes), Damage 2d6 hp, Fort DC 15

Trap: lethal, instant, Damage 1wp (2d6 hp on a successful resistance check), Ref DC 10

Loose Terrain: lethal, instant, Damage 1d6 wp + 1d6 hp, Ref DC 10 or Per DC 15

Losing the Way: non-lethal, escalating (every hour), Damage 4d6 hp, Per DC 10

Madness: non-lethal, escalating (every day), Damage 8d6 hp, Will DC 15

Hallucinations: lethal, escalating (every day), Damage 1 wp + 2d6 hp, Will DC 15 or Per DC 10

Running The Game: Enemies

The statistics of enemies are determined by the average character level of the PCs. All enemies share the same hit points, attack and defense bonuses and resistances. In addition to that, an enemy can have one or more special rules from the list below. A creature's damage is determined either by its size for natural weapons such as claws or by the weapon it uses. When creating a battle for the player characters the sum of the levels of all enemies should not exceed the sum of the PCs' levels.

Creature Statistics (to be modified by the table below):

HP: any creature receives 1d6 hp per level. **AB & DB:** +1 per level

Resistances: +level+3 for one resistance, +level for the other resistances

SPD: double for quadrupedal creatures of small or larger size.

Size Category	Height / Space	SPD	WP	DMG	HP per level	AB / DB
Fine	15cm / 0,125	1	0	1	-3	+8
Diminutive	30cm / 0,25	2	0	1d2	-2	+4
Tiny	60 cm / 0,5	3	0	1d3	-1	+2
Small	1,2m / 1	4	1	1d4	+0	+1
Medium	2,4m / 1	6	1	1d6	+0	+0
Large	4,8m / 2	8	1	1d8	+0	-1
Huge	9,6m / 3	10	2	1d10	+1	-2
Gargantuan	19,2m / 4	12	3	1d12	+2	-4
Colossal	38,4m / 6	14	4	2d6+2	+3	-8

Creature Special Abilities (choose one):

Regeneration: Regain 1 WP every minute (10 rounds).

Unbreakable: Damage received is decreased by 2.

Mindless: +20 bonus to Will; cannot make *attacks of opportunity*.

Charger: +10 damage with melee attacks after moving full SPD before the attack.

Swift: Suffer only half damage from attacks of opportunity.

Fly: able to move through the air and end movement in a square occupied by a non-flying creature. +2 bonus to damage rolls against non-flying creatures.

Leader: +2 bonus to attack and damage roll for all allied creatures within 18 squares.

IRON HEARTBREAKERS 1.51

By John Bell

This is a rules-light adaptation of d20 fantasy heartbreakers. PCs have very limited access to magic and must rely on their swords, armour and cleverness to survive.

Attributes

Characters have three attributes: **Strength (STR)**, **Dexterity (DEX)**, and **Mind (MIND)**. Each attribute has an associated modifier.

To generate a character's attributes, roll 4d6 and drop the lowest die. Assign it to one of the character's attributes. Repeat this for each attribute.

A character's attribute modifier is calculated by the following formula: $(\text{Attribute} - 10)/2$. Round towards zero if a fraction results.

Characters have a number of **Hit Points (HP)** equal to their STR modifier + 1d6 per level. If their HP total reaches 0 they are dead.

Backgrounds

Each character has a background: Where they came from before they became an adventurer. Pick one for your character:

City-Dweller +2 to Knowledge +1 to DEF

Farmer + 2 to Athletics +1d6 HP

Noble +2 to Interaction +1 to MAB and RAB

Tribesman +2 to Skulduggery +2 to damage

Fighting Style

Each character has a fighting style. Pick one for your character. Characters normally start at level 1 of their fighting style.

Bruisers wear any kind of armour and use shields. They have a +2 bonus to Athletics. They add their STR modifier again to all damage rolls. This increases by +1 at 5th level and every five levels on. They can add their STR modifier to their armour's DR. This increases by +1 at 5th level and every five levels on.

Sneaks wear light armour. They have a +2 bonus to Skulduggery or to Interaction. They can add their DEX modifier again to their AC. This increases by +1 at 5th level and every five levels on. If they successfully sneak up on a foe they can add their DEX modifier to their attack roll and their Skulduggery skill rank to the damage of their next attack. If they successfully distract, bluff or feint a foe, they can add their DEX modifier to their attack roll and their Interaction skill rank to the damage of their next attack.

Tacticians wear light or medium armour and use shields. They have a +2 bonus to both Knowledge and Interaction. They add their MIND modifier to all attack rolls. This increases by +1 at 5th level and every five levels on.

Skills

There are four skills: **Athletics**, **Interaction**, **Knowledge**, and **Skulduggery**.

Athletics governs climbing, jumping, running and swimming as well as lifting and moving heavy objects.

Interaction governs persuasion, oratory, lying, intimidation, insight into another's motives or behaviour and other means of manipulation and expression.

Knowledge governs a character's education, reasoning, memory for trivia and common knowledge of the world around them.

Skulduggery governs sneaking, hiding, and larcenous talents such as picking locks and concealing objects on the body.

Your **Skill Rank** in each skill is equal to your level plus any modifiers you have for your background and/or class.

Characters make skill rolls by rolling a d20 and adding their skill rank and the modifier of an appropriate stat. They try to roll over a **Difficulty Class (DC)** assigned by the DM.

A DC of average difficulty is 15 + level of the challenge.

Characters may also need to oppose other characters with their skills. They each make a skill roll. Whoever gets higher wins. Ties reroll. Monsters may add their attack bonus instead of their attribute modifier and skill rank.

PCs may need to make saving throws to resist the effects of poisons, spells, diseases, and other environmental hazards.

Resist Physical Effect (Fortitude) = Level + STR modifier

Dodge Effect (Reflexes) = Level + DEX modifier

Resist Mental Effect (Will) = Level + MIND modifier

The DC for saving throws against spells cast by monsters is equal to 15 + the caster's level unless otherwise listed in the monster entry.

Combat

Roll for initiative at the start of combat. Each PC and monster rolls a d20 and adds their DEX modifier. Higher results go before lower results.

Each combatant gets one action a round. A round is approximately 6 seconds long.

In a round, a PC can move a number of metres equal to his Dexterity attribute, or they can move a number of metres equal to half their Dexterity attribute and perform an action (attacking, digging something out of their pack, etc.).

Attacking: Roll a d20 and add the appropriate attack bonus. If you roll equal to or higher than your opponent's DEF you have hit them. On a natural 20, you automatically hit and do double damage.

Your **Melee Attack Bonus (MAB)** is equal to your level + STR modifier

Your **Ranged Attack Bonus (RAB)** is equal to your level + DEX modifier

Your **Defence (DEF)** is equal to your level + 10 + DEX modifier + Shield bonus (if any)

If characters wield light weapons, they may use their DEX modifier in place of their STR bonus for their MAB.

Characters can wield two weapons. They take a -2 penalty on every attack they make while wielding them, but can make one extra attack each round with the second weapon.

Characters may execute manoeuvres like tripping, disarming, targeting a weak point, etc. on their foes by beating them in opposed attack rolls. Ties are rerolled. These may add bonuses to hit or to damage on attacks or otherwise affect their opponents at the discretion of the DM.

i.e. A Tactician wants to trip his opponent. Both roll d20 + their MAB with the higher result winning. If the Tactician wins, he successfully trips his opponent. If he fails, his attack does not succeed.

Damage and Health

After you hit successfully, roll weapon damage + STR modifier. If you are wielding a melee weapon in two hands, it is weapon damage + (STR modifier x 2).

Defenders roll their **Damage Resistance** for their armour. They subtract their roll from the damage. If a positive number is left after DR is subtracted from damage, lose that many HP.

i.e. An attacker attacks and deals 12 points of damage. You roll DR and get 9. You take 3 points of damage. An attacker attacks and deals 7 points of damage. You roll DR and get 9. You do not take any damage.

Characters heal a number of HP equal to their level + their STR modifier each day (minimum 1).

Hazards

Characters take 1d6 points of damage for each ten feet they fall. They can make an Athletics + DEX modifier check with a DC equal to the number of feet they fell to not be damaged.

Poisons can be resisted with a level + STR modifier check. Some poisons will still deal partial damage even on a successful save. Most poisons deal damage and have effects like unconsciousness, nausea or disorientation.

If PCs are not wearing protection while exposed to extreme climates, they must make a level + STR modifier check (DC 15 +1 per each previous check) every ten minutes or take 1d6 damage.

While swimming in adverse conditions, a PC must make an Athletics + STR modifier check (DC 10 + 1 per every previous check) every minute or start drowning. Drowning is 1d6 points of damage every thirty seconds (5 rounds) until the PC can make the check or someone can pull them out.

Equipment List

Exchange Rates

1 platinum piece equals 10 gold pieces equals 100 silver pieces equals 1000 copper pieces.

Starting Money

All characters begin with 100 gold pieces. They may spend this on equipment. They may keep any money left over from this process for when play begins.

Weapons

The **Cost** entry of a weapon includes the minor equipment required to maintain it as well as a scabbard, holster or sling to carry it.

The **Damage** entry is the damage it deals on a successful hit.

The **Range** increment of a weapon is the number of metres it can be fired or thrown without penalty. For each full increment beyond the first, the attack suffers a -2 penalty. Thrown weapons can be thrown up to five range increments. Bows and other missile weapons can be fired up to 10 range increments.

i.e. A dagger can be thrown up to 5m without penalty. If it was thrown 8m, the attack would take a -2. If it was thrown 10m, the attack would take a -2. If it were thrown 14m, the attack would be a -4. A dagger cannot be thrown more than 25m.

Weapons	Cost	Damage	Range
---------	------	--------	-------

Light Weapons

Dagger	1 gp	1d4	5m
Rapier	20 gp	1d8	-
Short Sword	10 gp	1d6	-
Throwing Axe	5 gp	1d6	5m
Unarmed Strike	-	1d3	-
Whip	2 gp	1d4	-

One-Handed Weapons

Arming Sword	10 gp	1d8	-
Battle Axe	30 gp	1d10	-
Bastard Sword	30 gp	1d10	-
Flail	10 gp	1d8	-
Mace / Club	5 gp	1d6	-
Lance	15 gp	1d10	-
Short Spear	5 gp	1d6	5m
War Hammer	30 gp	1d10	-

Two-Handed Weapons

Great Axe	40 gp	2d10	-
Great Club	25 gp	1d20	-
Greatsword	40 gp	3d6	-
Halberd	25 gp	2d8	-
Longspear	5 gp	2d6	-
Poleaxe	40 gp	2d10	-
Quarterstaff	5 gp	1d8	-

Ranged Weapons

Hunting Bow	30 gp	1d8	25m
Javelin	2 gp	1d8	15m
Recurve bow	75 gp	1d10	50m
Net	1 gp	-	5m
Sling	1 gp	1d6	25m

Armour Type	Cost	Damage Resistance
-------------	------	-------------------

Light Armour

Leather Overcoat	5 gp	1d2
Studded Leather Jack	25 gp	1d4

Medium Armour

Chain Hauberk	35 gp	1d6
Scale Mail	50 gp	1d8

Heavy Armour

Half-Plate	250 gp	1d10
Plate Mail	1000 gp	2d6

Shield Type	Cost	Defense Bonus
-------------	------	---------------

Buckler	2 gp	+1 vs. melee attacks only
Light Shield	5 gp	+1
Heavy Shield	25 gp	+2

Converting Monster Entries

Monster abilities that are expressed in feet should be converted to metres, rounding down. Monster abilities that are expressed in 5' squares should be rounded up to 2m squares.

Monsters without attributes listed in their entries should use their attack bonus in its place.

Monsters with d12 Hit Dice have DR equal to their HD. Monsters with d8 Hit Dice have no DR except from armour.

A monster's DEF is equal to its AC.

A monster's STR is the higher of its Strength and Constitution scores. A monster's DEX is its Dexterity score. A monster's MIND is the highest of its Wisdom, Intelligence or Charisma scores.

Advancement

All monsters have an **Encounter Level (EL)** equal to their Hit Die. Double the EL each time the number of monsters doubles. e.g. 2 EL 1 monsters are an EL 2 encounter; four are EL 3.

Add the EL of each encounter you survive together. When the total number of ELs is equal to your current level x 10, you advance to the next level.

Every time a character gains a level he gains:

+1d6 HP

All the bonuses based on his level (MAB, RAB, Skill Rank) go up by 1.

If the character has just achieved a level that is divisible by 5, their class gives them an additional bonus.

If the character has just achieved a level that is divisible by 3, they may add 1 point to their STR, DEX or MIND

Version Notes

- 1.1 Healing rules added. Minor rewrites for clarity throughout.
- 1.2 Spell system removed. Sorcerer class removed. Additional bonuses for races. Additional abilities for Sneak class, additional armour proficiency (medium) for Tactician. The word "modifier" replaces "bonus" everywhere in the text except for MAB and RAB. "Armour Class" replaced by "Defense". "Converting Monsters" becomes its own section. Shrunk the size of the license's font down.
- 1.3 Rewrote attribute section for clarity. Renamed "Races" to "Backgrounds". Removed armour and weapons to separate equipment section.
- 1.4 Changed the names of the skills for clarity. Introduced movement rules. Defined the length of a round. Clarified DM's purview in combat in the combat section. Saving Throws are now all level + modifier. Additional material about distances in the Convert Monster section. Opposed skill rolls added.
- 1.5 Bonuses for backgrounds and classes reduced to +2s from +3s. "Classes" renamed "Fighting Styles". Brief skill descriptions included. Last vestiges of the tyrannical reign of the "Physical" skill removed from Hazards section. Added the equipment list into the main text. Fixed minor spelling and grammatical errors. Changed how HP are calculated. Removed Reserve Points. Added opposed attack rolls for maneuvers.
- 1.51 Some minor clarifications and terminology changes.

Microlite11

Microlite20 is a trimmed-down, subminiature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD (monsters, spells, adventures and equipment) could be used without conversion. Microlite11 replaces Microlite20's standard Race + Class system with a Point-Buy system for creating customized characters or new Races and Classes.

Stats

There are 3 stats: Strength (STR), Dexterity (DEX) and Mind (MIND)

Stat bonus = (STAT-10)/2, round down.

For character creation, there are two methods for determining stats. The GM may optionally allow trading stat points for Character Points at a ratio of 2:1.

1. **Random:** Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.
2. **Point Trade:** Each stat starts at 11. Trade points from one stat to another up/down to minimums/maximums set by the GM.

Traits

Characters begin at Level 1 and have 11 Character Points with which any combination of the following 11 traits (cost in parentheses) may be bought. Every level gives you 1 more Character Point to spend.

1. **Arcane Magic (3):** Cast 0th-level Arcane Spells. Access to higher Spell Levels requires the investment of an additional Character Point per Spell Level. Cannot use if the caster is wearing armor.
2. **Class (6):** Classes in are character templates of preselected Traits and Skills.
3. **Combat Bonus (2):** +1 to hit and damage.
4. **Divine Power (2):** Cast 0th-level Divine Spells. Access to higher Spell Levels requires the investment of an additional Character Point per Spell Level.
5. **Heavy Armor (1):** Capably wear Heavy Armor.
6. **Light Weapons Proficiency (1):** Use DEX instead of STR when using light weapons. Wield and attack with 2 light weapons in a round with -2 penalty on all attack rolls. Rapiers are light weapons, but you cannot wield two at the same time.
7. **Race (4):** Each race comes with a 4 Character Points' worth of stat bonuses, Abilities, or Skills, predetermined by the GM or the game rules.
8. **Skill (1):** +1 on the skill of your choice.
9. **Sneak Attack (2)** adds your Character's Subterfuge skill rank to the damage of her first attack, if she successfully Sneaks (usually sub+DEX, but depends on situation) up on a foe. Impossible if wearing a shield or medium/heavy armor.
10. **Stat Bonus (2):** Add +1 to the stat of your choice.
11. **Turn Undead (1):** Repel undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Some games will require that specific traits are purchased. For example, the standard Microlite20 configuration requires each character pick a Race (4) and a Class (7), thereby using up all 11 Character Points.

Skills

There are just 4 skills: Physical, Subterfuge, Knowledge, Communication. Roll higher than the given Difficulty Class to succeed. Character Points invested in Skills are called Skill Points.

Skill Rank = Your level x 1/3 Skill Points + Skill Points + Racial Bonus

Skill roll = d20 + skill rank + applicable stat bonus + situation modifiers

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

There are no "saving throws" in this game; use Physical + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Combat

Hit Points = STR Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc.

Melee attack bonus = STR bonus + Level

Missile attack bonus = DEX bonus + Level

Magic attack bonus = MIND bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's armor Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage.

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon.

If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

Add STR bonus to Melee damage, x2 for 2-handed weapons.

Armor Class (AC) = 10 + DEX bonus + armor bonus (+2 Light, +4 Medium, +6 Heavy, +1 Shield). By default, all characters can wear light or medium armor and use a shield.

Healing: All characters recover hit points lost due to wounds at a rate equal to one-half their level (round up) per one night of rest. If a character has lost Strength due to wounds, she recovers Strength instead of HP at a rate equal to her Strength bonus per full day rest.

Magic

Casting a spell of any kind costs Hit Points. The cost is twice the level of the spell being cast plus up to 3 Hit Points, depending upon the Mana Level the caster's current location. This loss **cannot** be healed normally but is recovered after 8 hours rest. There is no need to memorize spells in advance.

Just because a character can cast any spell doesn't mean that they should. Choose spells that suit the character. Select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) for all spells is 10 + Caster Level + Caster's MIND bonus.

Other Hazards

Falling : 1d6 damage per 10', half damage on Phys+DEX save. DC=depth fallen in feet
Spikes : add +1 point to falling damage per 10' fallen, max +10

Poison : Phys+STR save to avoid or for half, depending on poison. Effect varies with poison type.

Extreme Heat & Cold : If not wearing suitable protection, Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Level Advancement

Experience Points (XP) = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = XP1. 2 kobolds = XP2. 4 kobolds = XP3, etc.

Individual characters can also earn 1 experience point for every 100 gold pieces found in treasures (or taken from monsters) and then spent in "frivolous" ways (e.g., wine, women, song, donations to a temple without getting anything in return, generic "training," etc.)

Add up the Experience Points (XPs) of every encounter you take part in and treasure spent. When the total = 20 x your current level, advance to the next level. Reset the total to 0 after advancing.

Equipment

Characters start with one of three Fast Packs plus 25 to 100 gold pieces or additional items based on their class.

Microlite11

Microlite20 is a trimmed-down, subminiature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD (monsters, spells, adventures and equipment) could be used without conversion. Microlite11 replaces Microlite20's standard Race + Class system with a Point-Buy system for creating customized characters or new Races and Classes.

Races & Classes (Optional)

Microlite20's adaptation of the Primary Fantasy SRD requires that characters be built with both a Race and a Class. For Races, it gives +1 to all Skills to Humans, +2 MIND to Elves, +2 STR to Dwarves, and +2 DEX to Halflings. Classes are as follows and function exactly as they do in the original Microlite20, except for one minor edit to the Rogue.

- **Fighter:** Combat Bonus, Light Weapons Proficiency, Heavy Armor, +3 Physical; 2 Character Points reinvested in Combat Bonus every 5th level.
- **Rogue:** Light Weapons Proficiency, Sneak Attack, +3 Subterfuge, +1 to other Skill
- **Mage:** Arcane Magic (0th, 1st), +3 Knowledge; 1 Character Point invested in a new Spell Level every other level.
- **Cleric:** Divine Spells (0th, 1st), Turn Undead, +3 Communication; 1 Character Point invested in a new Spell Level every other level.

OPEN GAME LICENSE Version 1.0a

WildWalker's M20-4e V1.2

Stats

There are 3 stats: Fortitude (FORT) (Replaces Strength and Constitution), Reflexes (REF) (Replaces Intelligence and Dexterity) and Willpower (WILL) (Replaces Wisdom and Charisma).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

Humans get +1 to all skill rolls

Fey get +2 MIND

Ffolk get +2 DEX

Feyborne: Fiendish, Celestial, Divine, Fire, Air, Earth, Water, Metal, Nature, Dragon

Wolves get +2 DEX, Natural Weapons*

Ravens get +2 DEX, "raven strength**", Flight

Bears get +4 FORT, -2 DEX, Natural Weapons*

Squirrels get +4 DEX and "squirrel strength**"

*Natural Weapons are considered Unarmed attacks and do 1d8 damage. Races with Natural Weapon, gain an additional +2 to AC when not wearing armor.

**"raven strength" and "squirrel strength" means that the character can not lift and carry more than what a raven or a squirrel might be considered able to carry. The trade off is that they are extremely small and can go places that other characters might not due to their size.

Classes

The classes are:

Warriors can wear any kind of armour and use any shields. Warriors add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on. Warriors have a +3 bonus to Physical.

Warriors can "Mark" an opponent they are in combat with. A Marked opponent gets -1 to their attack rolls against anyone except that Warrior as long as they are Marked. The penalty increases by 1 at 5th level, and by another 1 every 5 levels after. An opponent can only have one "Mark" at a time. Once per encounter, against a Marked target, a Warriors may add their level to the damage from one roll. Once per day, against a Marked target, they may add twice their level.

Rogues can use light armour and a light shield. Rogues have a +3 bonus to Subterfuge.

Rogues can Sneak Attack foes. A Rogue that successfully Sneaks (usually Sub+REF, but depends on situation) up on a foe has Combat Advantage and can add their Subterfuge skill rank to the damage of their attack. Once per encounter, if they have Combat Advantage, a Rogue may add their level to the damage. Once per day, if they have Combat Advantage, they may add twice their level.

Warriors and Rogues can fight unarmed (kicks, punches, etc) doing d6 damage. Their unarmed damage increases by one dice type (d6->d8, d8->d10, etc) every 5 levels. If they are wearing no more than loose fitting clothes their unarmed attack counts as a light weapon and they gain a +2 mobility bonus to AC. If they are wearing armor their unarmed attack does not count as a light weapon and they gain no extra AC bonus.

Warriors and Rogues can also trade their regular weapon damage for Exploits. Exploits are special attacks, that mechanically work like Mage Spells, but replace the damage of a weapon with the damage or effect of the Exploit. A Warriors or Rogues can spend up to their level number of hit points on a single Exploit but only if they have an appropriate weapon. Unarmed attacks can be an appropriate weapon for some Exploits. Warriors (but not Rogues) can perform an equivalent Exploit to the Healing Word Spells but the hit point cost is twice what it would be for a Mage. The Healing Word Exploit does not require a weapon or implement.

Warriors and Rogues can use a number of hit points per day equal to their level to power Exploits. These hit points heal normally. After that, hit points lost to activate Exploits cannot be healed normally and "Second Wind" and Heroism won't heal the loss either. The loss is only fully recovered after an extended (6-8 hours) rest.

Mages can wear up to light armor. They can cast Spells and perform Rituals. Mages have a +3 bonus to Knowledge.

Mages can use a number of hit points per day equal to their level to power Spells. These hit points heal normally. After that, hit points use to cast Spells cannot be healed normally and "Second Wind" and Heroism won't heal the loss either. The loss is only fully recovered after an extended (6-8 hours) rest. Mages can spend up to their level number of hit points on a single Spell only if they have an appropriate attuned Implement (Wand, Staff or Athame). Other wise they can only cast basic Spells.

Exploits and Spells

The first basic combat Spell/Exploit is a Bolt. The basic Bolt affects one Target, is a hand to hand attack and costs no hit points. The basic Bolt can do three different levels off effect depending on the choices of the Player.

- Effect 1 does 1d6 damage.
- Effect 2 does 1d4 damage and causes a Condition until the end of the Player's next turn.
- Effect 3 causes a Condition on the Target until the Target makes a Saving Throw.
- For 1 hit point a Bolt can be made a ranged attack with a range of Short. For 2 hit points a Bolt can be given a range of Medium. For 3 hit points a Bolt can be given a range of Long.
- For 1 hit point two effects can be added together. For 2 hit point three effects can be added together. For 4 hit points four effects can be added together.

The second basic combat Spell/Exploit is a Burst. The basic Burst affects all Targets in its area and costs 1 hit point. The basic burst can do two levels of effect.

- Effect 1 does 1d6 damage to all Targets in the Area. The area of the basic Burst is the square it is cast on plus a radius of 1 (9 squares total). Target gets a Saving Throw for half damage.
- Effect 2 causes a Condition on the Target. The area of the basic Burst is the square it is cast on plus a radius of 1 (9 squares total). The condition lasts until the end of the Player's next turn or until the Target makes a Saving Throw, whichever comes later.
- For 1 hit point the origin square can be immune to the effect of a Burst.
- For 1 hit point a Burst can be made a ranged attack with a range of Short. For 2 hit points a Burst can be given a range of Medium. For 3 hit points a Burst can be given a range of Long.
- For 1 hit point two effects can be added together. For 2 hit points three effects can be added together. For 4 hit points four effects can be added together.
- For 1 hit point the radius can be increased by 1 (20 squares total). For 2 hit points the radius can be increased by 2 (36 squares total). For 4 hit points the radius can be increased by 3 (49 squares total).

Combat Spell/Exploit damage increases by one dice type (d4->d6, d6->d8, etc) every four levels.

A Healing Word is a Spell/Exploit that gives the target another Second Wind in combat. Each Healing Word Spell will only work on a given target once per day. The basic healing Spell/Exploit is the Minor Healing Word.

- * Minor Healing Word costs 1 hit point for Mages and 2 hit points for Warriors.
- * Lesser Healing Word costs 2 hit points for Mages and 4 hit points for Warriors.
- * Greater Healing Word costs 4 hit points for Mages and 2 hit points for Warriors.
- * Major Healing Word costs 8 hit points for Mages and 16 hit points for Warriors.

Heroism

Every Player Character has a number of d6 Heroism dice, equal to their level, which can be added to the following rolls once per encounter: Attack, Damage, Skill, Hit Points. They can be added, 1 die per roll, before, during or after a roll. At level 11+ you can add 2 die per roll. At level 21+ you can add 3 die per roll. A Mage can not use Heroism on any Spell effects unless he is using an attuned Implement.

Any Player can give their Character's Heroism dice to another Player's Character instead of using them on themselves.

Skills

There are 3 standard skills: Physical, Subterfuge and Knowledge.

Roll higher than the given Difficulty Class to succeed.

Skill rank = 1 + 1/2 your level (round down) + any bonus due to your class or race.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example:

Climbing would use Physical + FORT bonus.

Dodging a falling rock is Physical + REF bonus.

Finding a trap is Subterfuge + WILL bonus.

Disabling a trap is Subterfuge + REF bonus.

Use Physical + FORT or REF bonus for Fortitude and Reflex saves.

Level Advancement

Every level add +5 to Hit Points

If the level divides by two (2,4,6...) add +1 to all attack rolls and +1 to all skills

If the level divides by three (i.e. level 3,6,9,etc.) add 1 point to FORT, REF or WILL and +1 to one skill and +1 to Level Bonus for AC.

All melee and missile damage (but not Spell and Exploit damage) is doubled at level 21 and beyond and are considered magical attacks.

Combat

Hit Points = FORT Stat+ (REF Stat OR WILL Stat)+ (5 x Level). If HPs reach 0 Character is unconscious and near death. Further damage directly reduces FORT. If that reaches 0, Character dies.

Armour Class (AC) = 10 + REF bonus + (Armour bonus OR Level bonus).

Melee Attack Bonus = FORT bonus + Level

Missile Attack Bonus = REF bonus + Level

Magic Attack Bonus = WILL bonus + Level

Roll d20 + REF bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc. For melee or missile attacks, if your d20 roll plus Attack Bonus is higher than the target's AC (10+ REF + Armor or Lvl Bns), you hit.

For magic attacks you must beat the target's level+ the appropriate bonus (REF for rays or bolts, WILL for illusions, charms, or mental effects, FORT for alterations like flesh to stone).

A natural 20 automatically hits and does maximum damage regardless of the opponent's defences.

A Natural 1 is always a miss.

Warriors and Rogues using a light weapon can use their REF bonus instead of FORT when attacking. They can also wield 2 light weapons and attack twice in a round (at the same time in combat order), but with a -2 to all attack rolls that round. If only one attack is made, the second weapon can be used to parry, granting +1 AC. Rapiers count as a light weapon, but two rapiers cannot be used at the same time. The hand to hand attacks of the Unarmed Warrior and Unarmed Rogue count as light weapons. Hand to hand attacks for Mages and Commoners do 1d4 damage and do not count as light weapons.

Second Wind

Once per Encounter, between Encounters, a character can get a "Second Wind". This will heal 5+Con Bonus+Character Level number of Hit Points. Use of a "Second Wind" on an unconscious character automatically brings that character back to 1 Hit Point and then heals them normally. Healing Words can give a Character another "Second Wind". Each "level" of Healing Word will only work on a Character once per day. Healing Words can be used at any time.

Combat Advantage and Conditions

A character has Combat Advantage (CA) if their target is incapacitated, confused, blinded, unable to see them, or the character is behind them. Rogues can get CA on a successful Sneak. A character with CA gets +2 to hit that target and adds their best Stat bonus to Melee damage in ADDITION to any other bonuses. (Yes this means that a Rogue Sneak Attack is absolutely frightening...) Exploits and Spells can create Conditions. A Target affected by a Condition, gets -2 to all rolls for each Condition until they make a Saving Throw but that Condition does not necessarily provide CA to an opponent.

Saving Throws

Roll d20 at the end of your turn, if you get 11 or more, you are no longer affected by any Condition (including Unconsciousness).

Other Hazards

Falling: 1d6 damage per 10', half damage on successful save.

Spikes: add +1 point to falling damage per 10' fallen, max +10

Poison: Save to avoid or for half, depending on poison. Effect varies with poison type.

Extreme Heat & Cold: If not wearing suitable protection, roll to save once every 10 minutes, taking 1d6 damage on each failed save.

MICROLITE20 Variant untitled

Stats

Str, Con, Dex, Int, Wis, Cha

Point Buy (10 points)

All stats start at 0

Score	Cost
0	0
1	1
2	2
3	4
4	8
5	16

You can reduce a score to -1 to add one extra point to the pool. Reducing a score from -1 to -4 adds an additional 1 point to the pool.

Rolling for Stats

roll 1d8 per stat, divide by two, round down. If you rolled a 1, flip a coin. Heads the stat is 0. Tails the stat is -1.

Assign each stat to one attribute

or

roll 4d6 per stat, drop lowest. Subtract 10 from the sum, divide by two. Assign to a stat.

Races

Humans +1 to one stat
+1 to all NAD

Eladrin +1 Dex, Int
+1 will
Once per encounter, teleport 25 feet.

Elves +1 Dex, Wis.
Moves 35 feet.
Can reroll one attack roll per encounter, must use second roll.

Half Elves +1 con, cha
+1 to one NAD
Once per day, can reroll one attack roll, must use second roll.

Dwarves +1 Con, Wis.
Moves 25 feet,
can carry heavy load
unaffected by bulky armor.
Forced movement is reduced by 5 feet.

Halflings +1 Dex, Cha
Uses small weapons (Reduce damage die by one)
Once per encounter, force enemy to reroll an attack, must use second roll.

Tiefling +1 int, cha
Fire Resist equal to 5 + 1/2 level

Classes

Fighters +2 fortitude
Base HP: 15 HP gained per level: 6
wear any kind of armor and use shields.
Can mark enemy, if enemy is adjacent to you, make a basic attack against the enemy if the marked enemy attacks an ally or if move/shift away.

Paladins +1 fortitude, reflex, will
Base HP: 15 HP gained per level: 6

Use any kind of armor and use shields.

Can mark enemy, deal 1/2 level (min 3) + cha radiant damage if marked enemy attacks an ally.

Lay on Hands - (Can use [Wis] times a day) one ally gains HP equal to 1/4 their total HP

Rogues +2 reflex

Base HP: 12 HP gained per level: 5

can use light armor.

Use dex for attack and damage rolls with daggers.

+1 to attack rolls with daggers

Once per round, when attack from behind, +2d6 damage. At level 11 becomes +3d6, at level 21 becomes +5d6.

You may choose to allow rogues to sneak attack when they successfully sneak (dex + subt check) or when they have combat advantage (as per the D&D 4e rules) instead.

Wizards +2 will

Base HP: 10 HP gained per level: 4

Wear no armour.

Use int for attacking with spells.

Can cast wizard spells.

Clerics +2 will

Base HP: 12 HP gained per level: 5

can wear light or medium armor.

They cast cleric spells.

Use wisdom for cleric spell attacks.

Can cast minor healing twice per encounter, heals 1/4 of target's health.

Turn Undead once per encounter. (Burst 10 feet) (25 feet at level 11, 40 at level 21)

Wisdom vs. Will

1d10 + wis, push undead 10 feet per tier. The number of d10s increases by 1 every 5 levels.

Skills

There are just 4 skills : Physical, Subterfuge, Knowledge and Communication.

Skill mod = level + appropriate skill + appropriate stat

Skill check = d20 + skill mod + situational modifiers

For example, Climbing would use Physical + str. Dodging a falling rock is Physical + dex. Finding a trap is Subterfuge + wis. Disabling a trap is Subterfuge + dex.

When creating your character, divide 4 points among these 4 skills in any manner you see fit.

Skill DCs for someone untrained with no real knack.

Easy: level + 5

Medium: level + 10

Hard: level + 15

Magic

Two methods

You may choose that spellcasters should not choose certain spells but rather describe what they cast, you can refer to the damage by level table (In the GM's guide). If using this method, the DM can decide an appropriate effect and spellcasters should be given damage points. When using this method, spells should use the spellcaster's class' primary stat for attack rolls and target an appropriate defense.

Spellcasters can cast spells that they know. Upon character creation, choose two level 0 spells you can cast at any time. Everytime a spellcaster levels, they choose a single spell of their level. You can only cast a number of spells per day equal to your twice your level. Neither cantrips nor Level 0 spells do not count toward this number. High-power spells count as casting 3 spells. If using the D&D 4e books for the spell lists, at-will spells count as level 0 spells, daily spells count as high-power spells. If using this method, spellcasters do not get damage points. Attack spells use the listed stat and target the listed defense and should be rolled to see if they hit.

Health

HP: 10 + Class' Base HP + 2*Con

Each level gain HP based on your class. Also, if you increase your constitution at that level, remember that your HP increases by 2.

Defenses

AC with heavy armor: $10 + \text{level} + \text{armor}$

AC with light armor: $10 + \text{level} + \text{armor} + \text{higher of Dex or Int}$

Fortitude: $10 + \text{level} + \text{higher of Str or Con}$

Ref: $10 + \text{level} + \text{higher of Dex or Int}$

Will: $10 + \text{level} + \text{higher of Wis or Cha}$

Combat

Attacking

♦ For each creature you are attacking, make an Attack Roll

♦ If your attack roll is higher than the enemy's appropriate defense, you hit. Roll for damage.

Attack Roll

$d20 + \text{level} + \text{Appropriate Stat} + \text{Weapon Prof} + \text{situational modifiers} + \text{misc. bonuses and penalties}$

If you roll a natural 20 on an attack roll, you automatically do maximum damage and extra damage equal to your level. Any other damage from class abilities such as sneak attack is also maxed.

Weapon Damage Roll

$1[W] + \text{appropriate stat}$

When making both attack and damage rolls, Melee attacks usually use strength as the appropriate stat, ranged attacks usually use dex.

Different classes may use different stats for their attack and damage rolls, for example, rogues use dexterity for melee attacks with light blades and ranged attacks, Swordmages use int for both melee and ranged attacks.

Actions

Two methods. In both methods, players can do things that take almost no time for free, such as talking or dropping a weapon.

Everyone can do one thing on their turn; move, attack, cast a spell, etc.

Players can make a minor action, move action, and standard action on their turn. A minor action is something like marking or drinking a potion, a move action involves movement, and a standard action is something like attacking or casting a spell.

You can make one action per round when it isn't your turn, but only when a power or ability lets you. Being granted a free action doesn't count for this.

Opportunity Attack: When an enemy who is adjacent to you moves away or when an enemy makes a ranged attack when adjacent to you, make a melee basic attack against that enemy.

Marking

Marked enemies take a -2 penalty to attacks when attacking a creature that isn't who marked them.

Heroic Surge

Characters have heroism points equal to their level to use every day. Players must choose how many heroism points and what they are doing with each one before making an attack roll.

Characters can expend a heroism point to increase the number of die rolled of a single attack.

Expending a heroism point can also let the character inflict appropriate conditions to the enemy. For example, the player may wish to jab the enemy's leg, expending a damage point might slow the enemy (save ends). Most conditions added should be save ends, though particularly powerful conditions such as blindness may be until the end of the player's next turn. The key to deciding these effects is determining what is appropriate based on how the player described their actions. As a player levels, they should be able to have conditions become more prevalent. At level one, a player may only be able to throw sand in someone's eyes, blinding them for a single turn. However, at level 30, a player might be able to bombard an enemy with the light of their god, blinding them (save ends).

One can also use heroism points to increase an attack roll, saving throw, or skill check by 2. Should these be able to be assigned after attacking, saving, or making the check or not?

Saving Throws

Savings throws are made to end negative ongoing conditions. At the end of your turn, roll a d20 for each negative ongoing condition. A roll of 10 or greater ends the condition.

Other Hazards

Falling : 1d10 damage per 10', reduce by 1/2 of Phys+DEX check.

Spikes : extra d6 damage

Extreme Heat & Cold : If not wearing suitable protection, Phys+STR check once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Creating Spells

When a spellcaster casts a spell, the spell is likely to have effects other than simply damage. The three main categories for spell-types are high damage to a single target, medium damage to multiple targets, control, and healing.

High Damage single target

The most seen example of these spells are fire spells. These spells most often target the reflex defense, but choose a defence that makes sense for the attack. Use 1d10 + Appropriate stat to assign damage. To convey an even more powerful attack, a spellcaster should use heroism points to further increase the damage.

Medium Damage to multiple targets

A burst of fire that engulfs a 15' x 15' area would be an example of this. These attacks also often target the reflex defense. The wider the area, the lower the damage should be. For a 15' x 15' area, using 1d6 + Appropriate stat, to each enemy is appropriate damage. Decreasing to a 10' x 10' area would increase the damage to 1d8 + appropriate stat, and further decreasing it to a 5' x 5' area would make the attack a high damage single target attack with 1d10 + Appropriate stat. If the player wished to attack a 20' x 20' area, using 1d4 + appropriate stat would work. If a player wishes to increase the area beyond that, they can choose to expend a damage point to increase the area by an additional 10' x 10'. Expending a damage point can also add things such as burning, (creature takes 5 ongoing fire damage (save ends) to each creature targeted).

Control Spells

These spells are often cold spells, lightning spells, or illusions. These spells often attack a single target, but are certainly not limited by that. Feel free to use heroism points to increase the radius. If you wanted your ice ray to freeze the enemy, it might slow the enemy until the end of your next turn. However, these spells do less damage, you should use 1d6 + appropriate mod to assign damage for these spells. If you want to make the effect more powerful, such as dazing the enemy, you can use a heroism point. These might increase the spell to daze until the end of your next turn and increase damage to 2d6 + appropriate mod. At a higher level you might summon a hand of ice that grabs the enemy, immobilizing the enemy and dealing constant damage.

Healing

These spells are often the domain of clerics. By using heroism points, clerics are able to offer various types of healing to their party member's. Using one heroism surge allows the target to heal 1/4 of their maximum health.

	High Damage, Single Target	Medium damage, multiple targets	Control, single target
Base	1d10 + appropriate stat	1d6 + appropriate stat	1d6 + appropriate stat
Heroism Surge	Increase number of dice rolled	Increase area in both directions by 5 ft or increase dice size	Increase potency of effect or dice size

Level Advancement

At levels 4,8, 14,18, 24,28, increase a stat by 1.

If you increase your constitution, remember that doing say would increase your max HP by 2.

Monster Generation

HP: 10 + 6*level

AC: level + 14
NAD: level + 12
Attack bonus vs. AC: level +5
Attack bonus vs. NAD: level +3
Damage: Coming soon

You should then increase and decrease the stats to fit your specific monster. For example, zombies should have very low reflex and low will. Dragons might have $20 + 10 \times \text{level}$ health. You may wish to increase the defenses of your bosses and give them more health. Archers might do more damage but have little health. Things that attack multiple creatures should have their attack bonus reduced by 2.

Microlite 4E

STATS

There are 3 Primary Statistics: Strength, Dexterity and Mind. Characters are allowed a 16,14 and a 10 to assign as they wish. These initial points may be exchanged point for point so long as initial scores do not go above 18. Initial Primary Statistics will also be modified by Race and Class bonuses.

Stat bonus = (Stat -10)/2, round down

SKILLS

There are just four skills: Physical, Subterfuge, Knowledge and Communication. Roll higher than the Difficulty Class given in the adventure to succeed. If the adventure calls for the use of another skill, the DM must decide which of the four skills listed here will apply.

POWERS

This replaces the rules for magic, the rogue's sneak attack and the cleric's turn undead attack in the standard Microlite 20 rules. Classes do not have any of the special abilities listed in the standard Microlite 20 rules, as they are included as class features in 4e. You may want a copy of the 4e books with your character's race and class to use the following rules. However, a Power Builder is included below if you prefer to design your own powers. A character has access to all powers at his character level and below, but they cost hit points to use. **You can heal damage caused by using powers.**

- * At-will powers cost 2 x power's level +1 hit points to use.
- * Encounter powers cost 2 x power's level +3 hit points to use, and you can only use them once per encounter.
- * Daily powers cost 2 x power's level +6 hit points to use, and you can only use them once per day.
- * Racial and class features earned at level 1 cost 1 hit point each to use (or they can be free, for a character with more raw capability than a standard character made with the SRD).
- * Basic attacks, or at-will powers that can be used as basic attacks, can be used for free.
- * Paragon Path features have the same hit point cost as an at-will power of the equivalent level.
- * Epic Destiny features have the same hit point cost as an encounter power of the equivalent level.

ACTION POINTS

These can be added to Microlite20 4e characters as written in the 4e rules, or simply say that characters can "spend Action Points" as a standard action where they don't do anything — by trading in their action for that turn, they are "spending" a non-existent Action Point.

HEALING SURGES

Whenever a character has the opportunity to use (or lose) a healing surge, it automatically takes place using the listed values. For example, if a power says another character can use a healing surge, that character immediately rolls 2d6 and adds the indicated number depending on its level, to determine the hit points it gains. This can be done any number of times — there is no limit to a character's number of healing surges per day.

Character Level	Surge Value
1 to 5	2d6 +2
6 to 10	2d6 +10
11 to 15	2d6 +20
16 to 20	2d6 +25
21 to 25	2d6 +35
26 to 29	2d6 +40

HEROISM

Heroism is a bonus equal to the character's level, and can be used for one, two or all three of the these situations: Attack Bonus, Damage, Stat + Skill Check. The heroism bonus does not need to be spent all at once, but when it is completely spent, it is gone for the rest of the day

LEVEL ADVANCEMENT

After nine encounters — remember, these do not have to be combat situations you win! — the PCs advance one level, gain 6 more hit points, +1 to attack rolls, +1 to all skills, and gain access to more powers. If the level is a multiple of three (i.e. level 3, 6, 9, etc.), add 1 point to STR, DEX or MIND.

COMBAT

* **Hit Points** = (STR stat x 2) + (6 hit points per level). If HP reach 0, the character is unconscious and near death. Further damage directly reduces STR. If that reaches 0, then the character dies.

* **Initiative**: Roll d20 + DEX bonus for initiative order. Everyone can take TWO actions each turn (or three, if spending an Action Point): move, make a basic attack, use a power (but only one power per turn), etc. A 5-foot step/shift, drawing a weapon, speaking or similar activities are "free" and do not count as an action.

* **Melee/Hand-To-Hand** attack bonus = STR bonus + Level

* **Missile/Ranged** attack bonus = DEX bonus + Level

* **Magic/Supernatural** attack bonus = MIND bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's Armor Class (AC) or other defense, it's a hit.

* **Armor Class (AC)** = 10 + DEX bonus + Armor bonus.

* **Fortitude Defense** = 10 + Melee/Hand-To-Hand attack bonus

* **Reflex Defense** = 10 + Missile/Ranged attack bonus

* **Will Defense** = 10 + Magic/Supernatural attack bonus

***Natural 20 is automatically a critical doing maximum damage.**

***Add STR bonus to Melee/Hand-To-Hand damage, x 2 for two-handed weapons.**

RACE TEMPLATES

Each race provides +2 in bonuses to skills and/or stats as indicated. New races can be added using these as examples. No other racial abilities are included when choosing a race, though race features and powers can be used during the game (see Powers, below).

- * Humans get +1 to all skills
- * Elves, Eladrin, Deva and similar "magical" races get +2 MIND
- * Dwarves, Dragonborn, Half-Orcs, Warforged and similar "tough" races get +2 STR
- * Halflings and similar "quick" races get +2 DEX
- * Half-Elves get +2 to any stat or +1 to all skills
- * Gnomes, Tiefling, Drow and similar "cunning" races get +1 MIND and +1 DEX

CLASS TEMPLATES

In Microlite 4e, you choose a class for your specific powers and features, and that class also determines your character's role. The role provides the benefits listed below. Characters begin at level 1. All roles get 4 skill points to distribute as they wish, plus the indicated skill bonus. All characters also begin with 120 gold pieces to purchase weapons, armor, magic items and adventuring gear. They begin with basic clothing (no AC bonus) for free.

Soldier - Frontline melee defender: High defenses and hit points; moderate offense

Features: 9 Healing Surges, +1 Str, +1 Dex, Any weapon/shield/armor, +1 bonus to the Physical skill.

Combat Challenge: Soldier can "mark" an enemy after engaging it in melee combat. Marked enemies take -2 penalty to any attack that does not include the Soldier as a target.

Punishing Attack: When a marked enemy makes an attack that does not include the Soldier as a target, or tries to move away from the soldier, the soldier may make a free attack against that enemy.

Brute - Frontline melee combatant; immovable force of destruction

Features: 10 Healing Surges, +2 Str, Any weapon/shield/armour.

Brute Strength: Brute is considered one size category larger for the purposes of forced movement and carrying capacity.

Battle Rage: When the Brute drops to 1/2 of their total HP value, they deal +1w damage on all attacks. At 1/4 HP, they deal +2w on all attacks.

Skirmisher - Swift moving melee/ranged commando.

Features: 6 Healing Surges, +1 Str, +1 Dex, Any weapon, light shield medium armour, +1 bonus to the Physical skill.

Darting Attack: When the skirmisher makes a successful attack role, he/she may shift as a free action.

Blade Dash: The skirmisher deals extra damage equal to the amount of squares (or every 5ft.) that they moved before making the attack.

Lurker - Cunning melee/ranged assassin that capitalizes on the enemy's weaknesses

Features: 6 Healing Surges, +2 Dex, 1H weapon, no shield, light armour, +3 bonus to the Subterfuge skill.

Opportunist: The lurker gains a +4 bonus to hit enemies that grant combat advantage, instead of the normal +2.

Stealth Attack: When the lurker is hidden or otherwise obscured from an enemy, they can spend a minor action to "study" an enemy, after which they deal an extra +1w damage. This effect can accumulate over multiple rounds.

Arbalester - Ranged combat specialist that is skilled at bombarding enemies with damaging attacks.

Features: 6 Healing Surges, +1 Dex, +1 Mind, 1H weapon, light shield, light armour.

Sharpshooter: When the arbalester takes an aim action, the bonus to hit increases to +4, rather than +2 and deals an extra +1w damage on a hit.

Rapid Shot: When the arbalester reduces a target to 0hp with an attack, they may make an immediate attack against a second target.

Controller - Ranged combatant that specializes in hindering enemies through area effects and attacks.

Features: 6 Healing Surges, +2 Mind, 1H weapon, no shield/armour, +3 bonus to the Knowledge skill

Oppressive Attack: Enemies suffer a -2 penalty to savings throw to effects caused by the controller's attacks.

Battle Shaping: Controllers may sacrifice damage to attack extra targets. For every -2 penalty to damage, the controller may include 1 extra target as part of an attack.

Leader - Support specialist who excels at healing and buffing allies.

Features: 7 Healing Surges, +1 Str, +1 Mind, Any weapon/shield/armour, +3 bonus to the Communication skill.

Healing Word: The leader may spend a point of heroism to allow an ally to take a second wind, even if that ally has already taken one during the encounter. This does not cost the targeted ally any heroism.

Inspiring Aura: Allies adjacent to the leader, gain a +1 bonus to attacks, saves and skill checks.

POWER BUILDER

There are 4 power skeletons. 1 for each attack type. Each attack gains a power source keyword (Martial, Divine,...) and an accessory keyword (Weapon, Implement).

Melee

Standard Action, Melee Weapon
Target: One Creature

Attack: Primary Attribute Modifier (PAM) vs AC
Hit: 1W + PAM damage

Ranged

Standard Action, Ranged Weapon
Target: One Creature
Attack: Primary Attribute Modifier (PAM) vs AC
Hit: 1W + PAM damage

Close

Standard Action, Close Burst 1
Target: Each creature in burst
Attack: Primary Attribute Modifier (PAM) vs AC
Hit: 1W + PAM damage

Area

Standard Action, Area burst 1 within 10 squares
Target: Each creature is burst
Attack: Primary Attribute Modifier (PAM) vs Reflex
Hit: 1d6 + PAM damage

2) Each power type has a different power modifier sum. Power modifiers may be taken more than once and the effects are cumulative.

At-will powers: 1
Encounter powers: 2 in heroic, 5 in paragon, 7 in epic
Daily power: 4 in heroic, 7 in paragon, 9 in epic

Sample Power Modifiers

- 2: No PAM damage on Hit
- 1: Add damage type (fire, necrotic, poison)
- 1: Remove Weapon or Implement Keyword
- 0: Attack targets Fortitude or Will instead of Reflex
- 0: Ranged 5 instead of Ranged weapon
- 0: Hit deal 1d6 damage instead of 1W
- 0: Add damage type (cold, electric, thunder)
- 1: Blast or Wall instead of burst
- 1: Hit also pushes the target 1 square
- 1: Hit also knocks the target prone
- 1: Hit deals an additional 1W
- 1: Hit or Miss also causes minor ailment (dazed, slowed, grants combat advantage) until the end of your next turn
- 1: Hit or Miss causes ongoing damage 5
- 1: Hit or Miss grants target -2 penalty to one defense or attack rolls until end of your next turn
- 1: Hit or Miss grants target -SAM penalty to one defense or attack rolls until end of your next turn
- 1: Increase damage dice one size
- 1: Increase burst or area size by 2
- 1: Increase Range by 5 squares
- 1: Ailment lasts until save ends instead or end of turn
- 1: Hit deals Secondary Attribute damage
- 1: Add damage type (radiant, acid, psychic)
- 1: Attack is Reliable
- 1: +2 to the attack roll
- 1: Attack deal half damage on Miss
- 2: Attack targets Reflex instead of AC
- 2: Hit or Miss also causes major ailment (stunned, immobilized, blinded) until the end of your next turn
- 2: Additional 1W attack after primary attack

Micro Action Fantasy

by JDSorenson

CORE SYSTEM

This is the first and most important rule to remember is that anything a character wishes to accomplish can be ruled by rolling 1d20 + modifiers and comparing the result to a target number. If the result meets or exceeds this number, then the attempt is a success. If the result falls below the target number, then the attempt is a failure.

There are three different types of modifiers, each with a slightly different effect:

Static Bonuses: These usually come from constant sources such as Level, Class, Race, etc. Static Modifiers stack with each other, as well as Temporary Bonuses and Penalties.

Temporary Bonuses: These usually come from Powers and situational effects. Temporary modifiers stack with Static Modifiers, but not with each other. A larger Temporary bonus always supersedes a smaller one.

Penalties: These also typically come from Powers and situational effects, but they are subtracted from the character's total bonuses. Penalties do not stack with each other. A larger Penalty always supersedes a smaller one.

CHALLENGES

There are two basic types of challenges in the game, combat challenges wherein characters are in direct conflict with foes; and skill challenges wherein character's are at odds with NPC's and the environment.

Both are resolved by rolling D20 + modifiers vs. a target number, but the type of challenge determines the actual target number.

In combat challenges, combatants primarily roll against their opponents defenses, adding the appropriate combat stat, depending on the type of action being attempted. Combat challenges take place over a series of combat rounds (each of which lasting approximately 10 seconds of "in-game" time), and last until one side or the other is defeated (all combatants reduced to 0 Endurance Points) or until one side concedes to the other (surrendering or fleeing).

In skill challenges, characters are attempting to prevail against the environment, circumstances, or NPC's. These can be simple, requiring only 1 successful roll to determine success or failure; or they can be complex, requiring several rolls over the course of multiple narrative rounds (each of these lasts an amount of time that is appropriate to the context of the challenge) to determine success or failure.

Instead of combat stats, skill challenges use character's skills to modify the rolls, the target numbers of which are known as "Difficulty Class", which is determined by the relative difficulty of the action being attempted.

The basic outline of difficulty classes are as follows:

CHALLENGE : DIFFICULTY CLASS

Trivial	5
Easy	10
Challenging	15
Hard	20
Very Hard	25
Legendary	30
Nigh Impossible	35

Generally speaking, character's should not have to roll to accomplish tasks for which there is virtually no chance for failure. As player characters increase in level, so do their skill values. This means that challenging (DC 15) tasks for a 1st level character will be trivial for a high level character.

ADVANCEMENT

Characters and challenges in Micro Action Fantasy have levels, which are abstract measures of power and influence in the game world.

As PC's overcome challenges, they gain experience points relative to the difficulty of the challenge. When a character gains experience equal to 20 + his/her current level, they gain a new level and all of the benefits that come with it.

Generally speaking, challenges that are roughly equal to the character's grant 2 experience points (XP), whereas those well below the character's level grant 1 XP and those above the character's level grant 3 XP. Challenges that are completely trivial to the character's grant 0 XP, and challenges that are significantly above the level of the PC's grant 4 XP.

Details on awarding experience will be further expanded upon in the GM's guide.

At each level up, characters receive additional hit points (According to the character's level)

At each even level, character's gain a +1 static bonus to attacks, defenses and skill checks.

At levels 3, 7, 13, 17, 23 and 27 characters gain new attack powers.

At levels 5, 9, 15, 19, 25 and 29 characters gain new support powers.

At levels 11 and 21 each of the character's base attributes increase by 1.

Character's receive a level dependent static bonus to attacks, defenses, and skill checks equal to their level/2 (rounded down).

BASE ATTRIBUTES

Each character has a set of base attributes that define his/her level of natural talent in certain areas. As the character gains levels, their natural talent eventually takes a back seat to the bonuses gain through experience and training, but at the start of the characters career, they must rely on their inborn gifts.

Might: This measures a character's overall level of strength, stamina and physical power. Might is important for melee attacks and damage, as well as spell-casting damage. Might also determines a character's base Fortitude defense.

Grace: This measures a character's overall level of agility, speed and precision. Grace is important for melee attacks, as well as ranged attacks and damage. Grace determines a character's base Reflex and Armor defenses.

Cunning: This measures a character's wits, as well as their perception and intellect. Cunning is important for ranged weapon attacks and damage, as well as spell-casting attacks. Cunning also determines a character's base Intuition defense.

Will: This measures a character's presence, charisma and resolve. Will is important for spell-casting attacks and damage. Will also determines a character's Willpower defense.

Player's generate their character's starting attributes by assigning numbers within a standard array (3, 2, 1, and 0) based on their character's priority. These values are further modified by the player's choice of class.

Example:

Dick decides that he wants to create a hulking berserker character called "Beefsteak the Barbarian". At character creation, he decides that Beefsteak will be amazingly strong, pretty obstinate, somewhat swift, and of average intelligence. He assigns his array as follows:

Beefsteak
Might 3
Grace 1
Cunning 0
Will 2

Dick chooses the Brute class, which grants a +2 bonus to Might, and +1 bonus to Will. Now, his starting stats look like:

Beefsteak
Might 5
Grace 1
Cunning 0
Will 3

Jane however, decides that she wants to create a powerful fire wizard called "Frites". She assigns Frite's scores as follows:

Frites
Might 0
Grace 1
Cunning 2

Will 3

Jane then chooses the controller class, which grants a +2 bonus to Cunning, and a +1 bonus to Will. Frites final scores look like:

Frites

Might 0

Grace 1

Cunning 4

Will 4

DERIVED STATS

Derived stats are character statistics which are determined, in part, by a character's base attributes.

Melee Attack Bonus = $\text{STAT (Might + Grace/2)} + \text{Weapon Bonus} + \text{Level/2}$

Melee Damage Bonus = $\text{STAT (Might + Will/2)} + \text{Weapon Bonus} + \text{Level/2}$

Ranged Attack Bonus = $\text{STAT (Grace + Cunning/2)} + \text{Weapon Bonus} + \text{Level/2}$

Ranged Damage Bonus = $\text{STAT (Grace + Might/2)} + \text{Weapon bonus} + \text{Level/2}$

Magic Attack Bonus = $\text{STAT (Cunning + Will/2)} + \text{Implement Bonus} + \text{Level/2}$

Magic Damage Bonus = $\text{STAT (Will + Might/2)} + \text{Implement Bonus} + \text{Level/2}$

Armor Defense (vs. Melee and Ranged weapon attacks) = $\text{Armor Type} + \text{STAT (Might + Grace; Light Armor only)} + \text{Shield} + \text{Level/2}$

Fortitude Defense (vs. Poison; Disease; Movement Effects, etc.) = $\text{Might} + \text{Level/2}$

Reflex Defense (vs. Elemental effects; Terrain; Trip Attacks, etc.) = $\text{Grace} + \text{Level/2}$

Intuition Defense (vs. Traps; Stealth Attacks; Illusions; etc.) = $\text{Cunning} + \text{Level/2}$

Willpower Defense (vs. Mind-control effects; Intimidation, etc.) = $\text{Will} + \text{Level/2}$

Speed: Character's have three modes of movement derived from their base speed value, which is determined primarily by Race and Size.

March (=Base Speed): Moving at this rate provokes Counterattacks when the character disengages from a foe.

Shift (=Base Speed/2): Moving at this rate does not provoke Counterattacks.

Sprint (=Base Speed x 2): Moving at this rate provokes Counterattacks when disengaging from a foe. Also, the character grants Combat Advantage to foes during a Sprint, and for 1 round after.

Size: A character's base attributes are actually relative to their size. A character's Size Category is determined by their choice of Race.

*Size category modifiers are relative to the size of a character's opponent they only apply to targets larger or

smaller than the acting character.

*Character's that are size Small and below can occupy the same square as another creature. When they are engaged in melee, they have Total Cover instead of Partial Cover.

Perception – This is determined primarily by a character's Race.

Normal Vision: -2 penalty in Dim Illumination/-4 penalty in Total Darkness

Low-Light Vision: No penalty in Dim Illumination/-2 penalty in Total Darkness

Darkvision: No penalties in Dim Illumination or Total Darkness

Initiative – Characters gain a static bonus to initiative equal to Cunning + Class Bonus + Level/2.

SKILLS

Skills represent a character's ability to overcome challenges that require more than mere force of arms. Skills are broken down into a short list of broad competencies, the effects of which change as different attributes are applied to them. Below is a short, and by no means comprehensive list of what different attributes + skills can accomplish:

Athletics: A character's ability to perform feats of physical prowess and other endure strenuous activity over a period of time.

Athletics + Might: Climbing, Swimming, Lifting, Jumping, etc.

Athletics + Grace: Balancing, Tumbling, Acrobatics, Contortionism, etc.

Athletics + Cunning: Giving chase; Sizing up competition, etc.

Athletics + Will: Endurance; Running

Communication: A character's ability to read and persuade others.

Communication + Might: Physical intimidation

Communication + Grace: Dancing

Communication + Cunning: Manipulation; Sense Motive

Communication + Will: Diplomacy, Persuasion; Inspiring others

Lore: A character's ability to retain and access academic knowledge and other information.

Lore + Might: Muscle memory

Lore + Grace: Picking locks; Disabling devices

Lore + Cunning: Science; History; Myths and Legends

Lore + Will: Inspiration and Epiphanies

Magic: A character's ability to understand and channel magical forces

Might + Magic: Endure long periods of channeling without ill effect

Grace + Magic: Engage in subtle uses of magic

Cunning + Magic: Reveal knowledge about monsters or the Planes

Will + Magic: Summoning and shaping raw magical forces

Subterfuge: A character's ability to engage in stealth and skullduggery.

Might + Subterfuge: Knocking a guard out, garroting an unsuspecting target.

Grace + Subterfuge: Hiding in shadows, moving silently

Cunning + Subterfuge: Picking locks or disabling traps; Shadowing a target

Will + Subterfuge: Bluffing; Gambling

Survival: A character's ability to navigate and survive in the wild.

Might + Survival: Rock climbing; Enduring harsh weather

Grace + Survival: Moving silently in the forest

Cunning + Survival: Tracking prey

Will + Survival: Taming animals

There may be some overlap wherein the same task can be covered by a number of different ATTRIBUTE + SKILL combinations, and that's okay. No problem has only a single solution. Player's should be encouraged to think of creative uses of their skills, as long as their proposed solutions have at least some sort of rationale behind them.

If a player proposes an attribute + skill combination that has absolutely nothing to do with the challenge at hand, then the GM should nix the idea and ask the player to come up with something else.

If a player proposes an attribute + skill combination that has only a tenuous association with the challenge at hand, then have them roll for a higher DC.

If a player proposes an attribute + skill combination that makes perfect sense within the context of the challenge, then the GM should allow it.

At character creation, each character can assign one skill at +3, two skills at +2, and three skills at +1. These initial values are further modified by Race. Characters also add Level/2 rounded down to their skill bonuses.

SKILL CHALLENGES

A simple skill challenge is just a d20 roll + STAT + SKILL vs. a Difficulty Class assigned by the GM to determine success or failure.

The DC for skill checks is usually based on the circumstances, environment and context of the challenge. Rolling against a monster or NPC is a matter of the subjects level:

<u>NPC/MONSTER LEVEL</u>	<u>DC</u>
Heroic (1 - 10)	15
Elite Heroic (1 -10)	20
Paragon (11 - 20)	20
Elite Paragon (11 -20)	25
Epic (21 - 30)	25

Elite Epic (21 - 30)	30
Epic +	35

A complex skill challenge involves several skill rolls, by one or more characters, over the course of several narrative rounds. The goal in a complex skill challenge is to accumulate a number of skill rolls within a certain number of rounds, as determined by the challenges complexity.

<u>COMPLEXITY LEVEL</u>	<u>SUCCESSSES NEEDED</u>	<u>WITHIN</u>
1	1 Per Player	6 Rounds
2	2 Per Player	5 Rounds
3	3 Per Player	4 Rounds

Narrative rounds begin when the PC's are presented with a challenge and one character takes the initiative and makes a skill roll. The action then travels clockwise around the table and each character can propose an action and make a roll, or pass on to the next person.

A narrative round passes when all players have had a chance to act, and the action comes back around to the first player who had acted. Narrative rounds don't take place over a set amount of time like combat rounds, instead taking as much time as appropriate to the situation. So in one challenge, players could be scrambling to disable a complex trap that will kill them all within minutes, but in another players could be in separate parts of a city, each using their unique talents to track down an arcane bomb that will destroy an entire section of the city.

During a complex skill challenge, when a player makes a successful skill check, the DC for the next player's skill roll decreases by one step (so a Legendary DC of 30 becomes a Hard DC of 25 for the next player).

When a player rolls a skill check that does not succeed, the DC for the next player increases by one step (so that Legendary DC of 30 becomes a Nigh Impossible DC of 35). Also, the failing Skill + Stat combination cannot be used by the party for the duration of the challenge.

On the GM's turn during the complex skill challenge, he/she can make a Complication Roll. The GM rolls d20 + The level of the challenge. If this beats the DC that the last player had rolled against, then the GM negates one of the Player's successes and increases the next player's target DC by one step.

Rituals

Rituals are a special kind of complex skill challenge that take place when the PC's attempt to create big, complicated, powerful, world-altering effects through magic. These primarily involve use of the Magic Skill and any other skills that the GM deems appropriate to the nature of the intended effect.

For instance, travel based rituals could involve the Magic Skill, Lore, Athletics and Survival

Exploration based rituals could involve Magic, Subterfuge, Athletics or Lore

Divination Rituals could involve Magic, Subterfuge, Lore and Communication

Since the effects of Rituals are potentially limitless, the cost is greater to PC's. For every round that a PC attempts, they lose one point of Heroism that can't be regained until that character takes an Extended Rest.

Also, the GM should think of an appropriate complication to arise from a failed challenge. A teleportation ritual gone awry could leave the PC's leagues off course and stranded in a desert. Or a botched attempt to commune with a friendly extraplanar creature could instead summon an angry demon.

Otherwise, a ritual skill challenge follows the same rules as a complex skill challenge.

RACES

Elves: An ancient race of magical beings that are native to the Faerie Realm.

Size: Medium; Speed: 7

Faerie Blood: Elves gain a +2 static bonus to Magic skill rolls.

Ancient Will: Elves gain a +2 Static bonus to saves vs. mental effects

Faerie Step: Elves have the ability to walk between worlds, disappearing from the Prime Materia and walking through the Faerie Realm to reappear where enemies least suspect. You can spend a point of heroism and teleport up to your movement rate to any point to which you have Line of Sight. At the Paragon Tier; you can also take one adjacent ally along with you. At the Epic Tier, you can take all adjacent allies. This is a minor action.

Dwarves: Ancient race that dwell in great kingdoms built beneath the mountains. Dwarves are often the first line of defense against otherworldly terrors that nest beneath the earth.

Size: Medium; Speed 5

Stout: When a Dwarf is subjected to a forced movement effect, the number of squares the dwarf is moved decreases by 1.

Iron Hide: Dwarves suffer no penalty to movement or skills when wearing Heavy Armor.

Dwarven Resilience: Dwarves are remarkably durable and resilient. On your turn, you can spend a point of heroism to immediately gain 5 temporary Endurance Points. At the Paragon Tier, this ability grants 10 Temporary Endurance Points. At Epic, this ability grants 15 Temporary Endurance Points. This ability requires a minor action to activate and temp EP gained from Dwarven Resilience stack with temp EP from other sources.

Kobolds: Quick, cunning and mischievous creatures that tend to dwell with other races in large metropolitan areas.

Size: Small; Speed 5

Larcenous: Kobolds gain a +2 Static Bonus to all Subterfuge rolls.

Shifty: Whenever a Kobold is missed with an attack, they may shift up to their Shift Rate as an Immediate Reaction.

Uncanny Luck: Kobolds have a strange and uncanny ability to avoid danger. When you are hit with a successful attack roll, you may spend a point of Heroism to force the enemy to re-roll the attack as an Immediate Action.

The attacker must take the lower of the two rolls. At Level 11, the re-roll takes a -2 penalty. At Level 21, This roll takes a -4 penalty.

Beastmen: An offshoot of humanity that chose to stay in the wild untamed lands while the rest of humanity was building temples and cities.

Size: Medium; Speed: 7

Natural Affinity: Beastmen gain a +2 Static Bonus to all Survival Rolls.

Keen Senses: Beastmen gain a +2 Static Bonus to initiative and can act normally during any surprise round.

Wild Spirit: Due to their atavistic nature, Beastmen can tap into deep reserves of energy to overcome challenges. When you spend a point of heroism, you gain a +2 temporary modifier to attacks and skill checks. At 11th Level, this bonus becomes +4, and at 21st Level it becomes +6. Each the the bonus granted by this ability is applied to a roll, it decreases by 1, and lasts until the total becomes 0. Activating this ability requires a minor action.

Draconians: Dragon-like humanoids that were created by Dragonkind to tend their empire while they lay in long hibernation.

Size: Medium; Speed: 6

Lorekeepers: Draconians gain a +2 Static Bonus to all Lore checks

Death Before Dishonor: When a Draconian is injured, they gain a +1 Static Bonus to attack and damage rolls.

When they are Wounded, this bonus becomes +2.

Dragon Breath: Like their draconic cousins, Draconians have a natural ability to attack foes with their devastating breath weapons. Choose one damage type (Fire, Cold, Lightning, Thunder, Posion or Acid), You can spend a point of Heroism to make an area 3 attack at close range. This attack deals 1d6 damage of the specified type. At 11th level, this attack does 2d8 damage, and at 21st level this attack does 4d10 damage. This ability requires a minor action to activate.

Tieflings: Heirs to a long dead empire ruled by devils and fiends. Tieflings are humans of fiendish origins who rose against their masters and liberated themselves from slavery and oppression.

Size: Medium; Speed: 6

Hell Born: Tieflings gain resistance to fire damage equal to 5 + Level/2 (rounded down).

Tempter: Tieflings gain a +2 Static Bonus to all Communication rolls.

Hellfire Rebuke: When a Tiefling is hit with an attack, they can channel their anger into a retaliatory flash of fire and brimstone. You can spend a point of heroism to deal 1d6 fire and poison damage to an enemy who hits you with an attack as an immediate action. At 11th level, this attack deals 2d8fire and poison damage. At 21st level, this attack deals 4d10 fire and poison damage.

Orcs: Savage humanoids who revel in battle and brutality. Though some are civilized and live among other races, they are still brutish and quick to anger.

Size: Medium; Speed: 6

Fierce Competitor: Orcs gain a +2 Static Bonus to all Athletics Rolls.

Blood-Thirsty: Orcs gain a +2 Static Bonus to attack and damage rolls vs. Injured or Wounded targets.

Savage Blow: Orcs are adept at making brutal, decisive attacks against their enemies. You can spend a point of Heroism to deal an additional 1D to all attacks. This is a free action and the bonus lasts until you miss an enemy with an attack. At 11th level, this bonus becomes 2D, and at 21st level it becomes 3D.

Human: Humans are the most populous and industrious of all the races.

Size: Medium; Speed: 6

Industrious: +1 static bonus to all skill rolls

Perseverant: +1 static bonus to all saves

Heroic Destiny: Humans have no special powers inherent to their race, but still have great potential as heroes. They gain +2 points of heroism at character generation.

Stats

There are 4 stats : Strength (STR), Dexterity (DEX), Mind (MIND), and Spirit (SPI).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

or Assign the following numbers to your three stats: +2, +1, +0, -1.

Races

Humans get +1 to three Stats of their choice

Elves get +2 MIND or +2 DEX and have advantage on saving throws against being charmed.

Dwarves get +2 STR or +2 SPI have advantage on saving throws against poison.

Halflings get +2 DEX or +2 SPI have advantage on saving throws against being frightened.

Half-Elves get +1 to MIND and +1 to DEX and have advantage on saving throws against being charmed.

Half-Orcs get +3 to STR but -1 to DEX and have advantage on attempts to intimidate.

Classes

The classes are Fighter, Rogue, Mage, Cleric.

Fighters wear any kind of armour and use shields.

They add their proficiency bonus to Physical and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on.

Rogues can use light armour. They add their proficiency bonus to Subterfuge. If they successfully Sneak (usually sub+DEX, but depends on situation) up on a foe they can add their Subterfuge skill rank to the damage of their first attack.

Magi wear no armour. They can cast arcane spells, and add their proficiency bonus to Knowledge.

Clerics can wear light or medium armour. They cast divine spells and add their proficiency bonus to Communication. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points

of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Skills

There are just 4 skills : Physical, Subterfuge, Knowledge and Communication. Roll higher than the given Difficulty Class to succeed.

Skill roll = d20 + proficiency bonus + whatever stat bonus is most applicable to the use + situation modifiers.

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Persuading a guard to let you in would be Communication + MIND bonus.

Note that there are no "saving throws" in this game; use Physical + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually SPI bonus + proficiency bonus.

The proficiency bonus increases to +3 at 5th level, +4 at 9th level, +5 at 13th level, and +6 at 17th level.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all arcane spells in the SRD spell list.

Casting a spell of any kind requires a skill roll.

Arcane magic requires a Knowledge + MIND roll, and divine magic requires a Knowledge + SPI roll.

The DC is 5 + spell level attempted. A success means the spell goes off as normal without problems.

Rolling under this number means the spell still goes off, but the caster gains a point of "strain," a cumulative -1 to future spellcasting attempts until a short rest is completed. With a roll of 1, the spellcaster gains a point of strain and cannot cast

that spell again until he has completed a long rest.

Combat

Hit Points = STR Stat + Physical bonus + 1d6/level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc.

Melee attack bonus = STR bonus + proficiency bonus

Missile attack bonus = DEX bonus + proficiency bonus

Magic attack bonus = MIND or SPI bonus + proficiency bonus

Add attack bonus to d20 roll. If higher than your opponent's Armour Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage. Fighters and Rogues can use DEX bonus + proficiency bonus as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

Add STR bonus to melee damage, x2 for 2-handed weapons.

Armor class (AC) = 10 + Dex bonus + armor bonus.

Advantage and Disadvantage

Some circumstances provide *advantage* or *disadvantage*. When you have advantage on a roll, you roll 2d20 and take the better of the two results, and you have disadvantage you roll 2d20 and take the lesser of the two results.

The DM will determine circumstances that can cause advantage or disadvantage, but here are some examples.

Advantage

Opponent is stunned

Ally is assisting you in a task

Opponent is unaware of your location

Disadvantage

Attempting ranged attack against adjacent opponent

Opponent is hidden

Attacking from prone

Level Advancement

Each level adds: +1d6 to Hit Points

If the level divides by three (i.e. level 3,6,9,etc.) add 1 point to STR, DEX or MIND

Fighters gain +1 to their attack and damage rolls at levels divisible by 5.

Clerics and Magi gain access to new spell levels at 3rd level, then every other level beyond 3rd.

Multiclassing

A character can decide, at one point, to begin following a new path, changing his class. Characters may have up to two classes (for example, Fighter/Cleric, or Ranger/Rogue). A multiclass character's Character Level is the sum of the levels in both her classes (a Fighter 2 / Cleric 1 is a level 3 character).

When a character earns the right to go up a level, the player chooses which class to advance or, if the character is single-classed, the player may choose a second class, which begins at level 1.

Advancement is determined by Character Level, but spell descriptions and abilities which reference "level" mean "specific class level".

Microlite5E

Second Release

Microlite20 was written by Robin V Stacey in 2006 with the goal of being:

... a trimmed-down, subminiature version of [Dungeons & Dragons third edition] that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of [D&D] (monsters, spells, adventures and equipment) could be used without conversion.

Microlite5E is my attempt to do the same for Dungeons & Dragons fifth edition. It should make character creation very quick and reduce the number of fiddly bits that a player has to keep track of. Characters should be balanced with existing fifth edition characters and be able to complete normal fifth edition adventures.

Changes: Microlite5E keeps all class features, but simplifies weapon and armour choices, replaces skills with broader proficiencies, reduces races to a single feature, prompts an optimal ability modifier array and discards ability scores to use modifiers only.

It also comes with a two-page monster creation system that should make *DMG*-legal monsters.

Creating a character

Step one: Choose your class

At this stage, just note down which class you've chosen. You'll write down the features of that class later.

Write “+4” in the key ability of your class and “+3” in the secondary ability. Where two are given, choose one.

Class	Primary Ability	Secondary Ability
<i>Barbarian</i>	STR	CON
<i>Bard</i>	CHA	DEX
<i>Cleric</i>	WIS	STR, CON
<i>Druid</i>	WIS	CON
<i>Fighter</i>	STR (melee), DEX (ranged)	CON
<i>Monk</i>	DEX	WIS
<i>Paladin</i>	STR	CHA
<i>Ranger</i>	DEX (ranged), STR (two-weapon)	WIS
<i>Rogue</i>	DEX	INT, CHA
<i>Sorcerer</i>	CHA	CON
<i>Warlock</i>	CHA	CON
<i>Wizard</i>	INT	CON, DEX

Step two: Choose your race

The name of your race is the name of your first skill. For example, a dwarf has the Dwarf skill, which he or she can use to identify stonework, recall dwarflife and determine how far underground he or she is.

You also have advantage on saving throws applicable to your race. For example, dwarves get advantage to dodge boulders flung by giants and elves get advantage to resist sleep and ghoul paralysis.

You also get one racial feature.

Dwarf: +1 hit point per level. Resist poison.

High elf: You know one arcane cantrip.

Wood elf: No natural thing will restrain you. In addition, ignore difficult terrain from natural sources. In addition, you can hide in any lightly-obscuring natural surrounding.

Dark elf: You can be dazzled by sudden bright light, giving you disadvantage in those circumstances. You can cast *darkness* 1/day.

Halfling (Small size): You can hide behind any creature one size or more larger than you. Resist poison.

Human: 3/day, advantage on a roll of your choice.

Red dragonborn: 1/encounter, DEX save*; fail:2d6 (3d6 at 6th, 4d6 at 11th, 5d6 at 16th); success: half damage, 1d4+1 targets (DM chooses one, you choose the rest)

Forest gnome (Small size): You can talk to Small and smaller animals. You know the *minor illusion* cantrip.

Rock gnome (Small size): If you have tools and time, you can create Tiny clockwork devices.

Orc: Diehard 1/day (when you are reduced to 0 HP or below, set your HP to 1).

Tiefling: *Hellish rebuke* 1/day. Resist fire.

Aasimar: *Healing word* 1/day. Resist necrotic and radiant.

Duergar: *Enlarge/reduce* (enlarge only) 1/day.

Shadowfolk: *Disguise self* 1/day.

Frogfolk (Small size): *Jump* 1/encounter. Breathe underwater.

Gremlin (Small size): Automatically tell how any mechanical or magical device works and what it does.

Blue goblin (Small size): You never need to eat, drink or breathe.

Changeling: Your claws are always one-handed melee weapons that do 1d10 damage.

Dhampir: *Detect evil and good* at will

* All saves that you force creatures to make via your racial or class features use the same DC, which is your spell DC.

Step three: Abilities

From your class selection, two of your six abilities will be assigned. You can distribute +2, +1, +0 and -1 among the other four abilities.

Step four: Class, again

Write down your class features, etc., on your character sheet.

You are proficient in a skill called your class name. For example, a barbarian has the Barbarian skill, which he or she can use to survive sub-zero temperatures, scare puny mortals, etc.

You get the class's class features, as usual, including spells.

Armour indicates the heaviest armour you can wear; you can also wear lighter armours.

Class	HP at 1 st	HP at each additional	HD	Proficient in	Armour
Barbarian	12+CON	+7+CON	d12/level	CON, STR	Medium, shield
Bard	8+CON	+5+CON	d8/level	DEX, CHA	Light
Cleric	8+CON	+5+CON	d8/level	WIS, CHA	Medium, shield
Druid	8+CON	+5+CON	d8/level	INT, WIS	Medium, shield
Fighter	10+CON	+6+CON	d10/level	STR, CON	Heavy, shield
Monk	8+CON	+5+CON	d8/level	STR, DEX	None
Paladin	10+CON	+6+CON	d10/level	WIS, CHA	Heavy, shield
Ranger	10+CON	+6+CON	d10/level	STR, DEX	Medium, shield
Rogue	8+CON	+5+CON	d8/level	DEX, INT	Light
Sorcerer	6+CON	+4+CON	d6/level	CON, CHA	None
Warlock	8+CON	+5+CON	d8/level	WIS, CHA	Light
Wizard	6+CON	+4+CON	d6/level	INT, WIS	None

Weapon damage by class

Class	Light	One-handed melee	Two-handed melee	Ranged
Barbarian	1d8	1d8	2d6	1d8
Bard	1d6	1d8	1d10	1d8
Cleric	1d4	1d6	1d10	1d6
Druid	1d4	1d6	1d10	1d4
Fighter	1d8	1d10	1d12	1d8
Monk*	1d6	1d8	1d12	1d6
Paladin	1d6	1d8	1d12	1d8
Ranger	1d6	1d8	2d6	1d10
Rogue	1d6	1d8	2d6	1d8
Sorcerer	1d4	1d6	1d8	1d6
Warlock	1d4	1d6	1d10	1d6
Wizard	1d4	1d6	1d8	1d6

* The monk treats unarmed strikes as one-handed melee weapons, as well as light weapons and dual wielding weapons (if the monk has both hands free).

Equipment

If you prefer, you can just go with the equipment choices in the *Player's Handbook*.

Every character begins with an equipment pack of their choice (page 151 of the *Player's Handbook*). They also start with the following:

Class	Weapons	Focus	Shield	Armour	Other
Barbarian	3				
Bard	2	Musical instrument		Light	
Cleric	2	Holy symbol	Y	Light or medium	
Druid	1	Druidic focus	Y	Light	
Fighter	3		Y	Light or medium	
Monk	2				
Paladin	2	Holy symbol	Y	Light or medium	
Ranger	3			Light or medium	
Rogue	3			Light	Thieves' tools
Sorcerer	2	Arcane focus or spell component pouch			
Warlock	3	Arcane focus or spell component pouch			
Wizard	1	Arcane focus or spell component pouch			Spellbook

Shield: You can swap your shield for another weapon choice, if you prefer.

Focus: A focus allows you to cast your spells. If you want to mix it up, and have a musical cleric (a cantor) who casts with a lute or a herbologist druid who casts with a spell component pouch, that is very cool.

Weapons: Each choice allows you to choose another light weapon, one-handed melee weapon, two-handed melee weapon or ranged weapon. Note that ranged weapons come with ammunition and you might get multiple weapons if you choose light weapons.

Examples:

Light: Four javelins, 20 darts, two handaxes, two daggers, a shortsword

One-handed melee: A rapier, a scimitar, a longsword, mace, warhammer

Two-handed melee: A greataxe, a greatsword, a longsword, a halberd

Ranged: A crossbow with 20 bolts, a longbow with 20 arrows

Step five: Background

Choose a background from the list in the *Players Handbook*. You are proficient in a skill called your background name. For example, the Outlander skill could be rolled to track, to forage provisions, to hide in the wilderness, etc.

You also have the background feature.

You also get the background's starting equipment.

Step six: Stats

Proficiency bonus: +2 (at first level)

Spells DCs: 8 + proficiency bonus + your primary ability. While called “spells DC”, this is actually the DC for any save that you force a creature to make through the use of your racial or class features.

Spell attacks: 1d20 + proficiency bonus + your primary ability

Attacks

Light weapons include thrown weapons and improvised weapons. They are one-handed.

Ranged weapons are always two-handed.

Your options for hands are therefore:

Option	Dominant hand	Other hand
Empty hands*	Nothing	Nothing
Empty Hand casting*	Focus	Nothing
Einhandler*	One-handed weapon or light weapon	Nothing
“Spells-and-sword”	One-handed weapon or light weapon	Focus
“Sword-and-board”	One-handed weapon or light weapon	Shield
“Shield-and-sorcery”	Focus	Shield
Two-hander	Two-handed weapon	Nothing
Ranged	Ranged weapon	Nothing
Dual wield	One-handed weapon or light weapon	Light weapon or one-handed weapon

* Suboptimal. Always better to dual wield. The one exception is if you plan to grapple. Even then, you can drop your weapon just before grappling.

Melee attacks: $1d20 + STR + \text{proficiency bonus (if you're proficient in that weapon)}$.

Add your STR to damage.

Alternatively, if attacking with a light weapon in melee, you may substitute DEX for STR, for attacks and damage.

Ranged attacks: $1d20 + DEX + \text{proficiency bonus (if you're proficient in that weapon)}$.

Add your DEX to damage.

Alternatively, if attacking with a light weapon at range (i.e. you are throwing it), you may substitute STR for DEX, for attacks and damage. You still do your light weapon damage, not your ranged weapon damage.

Dual wielding: If you dual wield, use your “two-handed melee” damage if you are attacking in melee. If you attack at range, use your “ranged” damage (you can only dual-wield light weapons at range, since they can be thrown).

If dual-wielding with one or two light weapons, you can choose whether to add your STR or your DEX to the damage.

Flurry of blows: Before you make an attack with your action, you can declare a flurry of blows. Your attack only does half damage (round down). However, you can make a second attack with your bonus action. This attack also only does half damage (round down).

If dual-wielding light weapons, it is possible with a flurry of blows to make one attack in melee and one at a range.

Armours

AC (in no armour): $10 + DEX$

AC (in light armour): $12 + DEX + 2$ (if shield, if proficient with shield)

AC (in medium armour): $14 + DEX (\text{max. } +2) + 2$ (if shield, if proficient with shield)

AC (in heavy armour): $17 + 2$ (if shield, if proficient with shield). Requires STR +2 or more. Also, gives disadvantage on all stealth checks.

Combat Advice

In general, you should wear the heaviest armour that you are proficient in. Clear exceptions are:

- If your DEX is +3, you should wear light armour instead of medium (heavy armour is still better if you have that option).
- If your DEX is +5, you should wear light armour instead of heavy.

What to roll

For most challenges, roll:

1d20 + the relevant ability + proficiency bonus (if your race, class or background are relevant)

DC 10 (easy), 15 (moderate), 20 (hard)

For saves, roll:

1d20 + the relevant ability + proficiency bonus (if you're proficient in the appropriate save)

DC 10 (easy), 15 (moderate), 20 (hard)

Remember you get advantage on saving throws that your race should be good at.

Levelling up

Your proficiency bonus increases by +1 at levels 5, 9, 13 and 17.

At levels 4, 8, 12, 16 and 19, follow the table:

Level	Ability Score
4	One of your non-primary, non-secondary abilities increases by 1.
8	Your primary ability increases to +5.
12	Your secondary ability increases to +4.
16	One of your non-primary, non-secondary abilities increases by 1.
19	Your secondary ability increases to +5.

Character Creation Examples

Walkthrough

Step One: I've heard interesting things about the 5th edition bard, so I choose that class.

CHA +4, DEX +3.

Step Two: I like the idea of an orc, angrily banging on his elfskin drums.

Diehard 1/day

Step Three: What kind of orc doesn't have terrific hardiness and forcefulness? I'll go CON +2, STR +1. Orcs are a little stupider than they are rash, I think, so I'll go WIS +0, INT -1.

Step Four: Back to my class, bard. I copy down my class features from the *Player's Handbook*, including spells. I also note down the HP and so on from the Microlite5E document.

Spellcasting (2 cantrips, 4 spells known, 2 1st-level spell slots), bardic inspiration (d6) (CHA/day; i.e. 4/day)

HP 8+CON (i.e., 10), HD d8, proficiency with DEX and CHA saves, proficiency with light armour

Damage: light, 1d6; 1H, 1d8; 2H, 1d10; ranged, 1d8

Phew, that's a lot to take in. I'll go with the quick build defaults for spells:

dancing lights, vicious mockery (cantrips); *charm person, detect magic, healing word, thunderwave* (1st-level).

I also get equipment:

pack (diplomat's), light weapon (two daggers), one-handed melee weapon (rapier), musical instrument – drums, light armour (leather).

Step Five: I have to choose a background suitable for my orc bard. I think Criminal is a nice touch. As with Orc and Bard, Criminal is a “skill” for me – when it is appropriate to a roll, I add my proficiency bonus.

I also get the equipment listed in the *Player's Handbook*

crowbar, set of dark common clothes (including a hood!), belt pouch (15gp).

I also get the background feature.

Criminal Contact

Step Six: This is the most daunting part, but I conclude:

Spells DC: 14 (8 + 2 + CHA)

Spell attacks: 1d20+6

AC: 15

Attacks with my rapier: +3 (2 + STR), damage: 1d8+1
Attacks with my dagger: +5 (2 + DEX), damage: 1d6+3
Rapier and dagger: +5 (2 + DEX), damage: 1d10+3 (melee)

I know which one I'll be going with.

And that's it! Here's my completed character:

Criminal Orc Bard.

STR +1, DEX +3, CON +2, INT -1, WIS +0, CHA +4.

HP 10, **HD** 1d8, **AC** 15 (light), **Saves** proficient DEX and CHA (+2), advantage on Orc
Rapier and dagger +5 (1d10+3), **dagger** +5 (1d6+3)

Skills Orc, Bard, Criminal

SQ Diehard 1/day; bardic inspiration (d6, 4/day); Criminal Contact

Spells (cantrips) *dancing lights, vicious mockery (2/day, 1st-level) charm person, detect magic, healing word, thunderwave*

Equipment rapier, diplomat's pack, elfskin drums, leather armour, two daggers, crowbar, set of dark common clothes (including a hood!), belt pouch (15gp).

Example characters

Entertainer Forest Gnome Warlock (Fey Pact).

STR -1, DEX +2, CON +3, INT +1, WIS +0, CHA +4.

HP 11, **HD** 1d8, **AC** 14 (light), **Saves** proficient WIS and CHA (+2), advantage on Forest Gnome

Light crossbow +4 (1d6+2), **dagger** +4 (1d4+2)

Skills Forest Gnome, Warlock, Entertainer

SQ cantrips (*chill touch, minor illusion, mage hand*); talk to Small animals; fey presence (1/encounter); By Popular Demand

Spells (2/encounter, 1st-level) *faerie fire, sleep*

Equipment arcane focus, scholar's pack, leather armour, spear, two daggers, lute, love letter, costume, belt pouch (15gp)

Charlatan Orc Paladin.

STR +4, DEX +0, CON +1, INT -1, WIS +2, CHA +3.

HP 11, **HD** 1d10, **AC** 19 (heavy, shield), **Saves** proficient WIS and CHA (+2), advantage on Orc

Longsword +6 (1d8+4), **javelin** +6 (1d6+4)

Skills Orc, Paladin, Charlatan; disadvantage on stealth

SQ divine sense (4/day); diehard (1/day); lay on hands; False Identity

Equipment longsword, shield, x5 javelins, priest's pack, chain mail, holy symbol, set of fine clothes, disguise kit, set of weighted dice, belt pouch (15gp)

Sage Tiefling Monk.

STR +1, DEX +4, CON +2, INT +0, WIS +3, CHA -1.

HP 10, **HD** 1d8, **AC** 17, **Saves** proficient STR and DEX (+2), advantage on Tiefling
Two unarmed +6 (1d12+4), **dart** +6 (1d6+4)

Skills Tiefling, Monk, Sage

SQ unarmoured defence, martial artist, *hellish rebuke* 1/day, resist fire; Researcher

Equipment shortsword, 10 darts, dungeoneer's pack, a bottle of black ink, a quill, a small knife, a letter from a dead colleague posing a question you have not yet been able to answer, a set of common clothes, belt pouch (10gp)

Monster Creation

Choose a Challenge Rating

Challenge Rating	Proficiency Bonus	Hit Points	Armour Class	DPR Points	Attack Bonus
1	+2	80	11	12	+1
2	+2	95	11	18	+1
3	+2	110	11	24	+2
4	+2	125	12	30	+3
5	+3	140	13	36	+4
6	+3	155	13	42	+4
7	+3	170	13	48	+4
8	+3	185	14	54	+5
9	+4	200	14	60	+5
10	+4	215	15	66	+5
11	+4	230	15	72	+6
12	+4	245	15	78	+6
13	+5	260	16	84	+6
14	+5	275	16	90	+6
15	+5	290	16	96	+6
16	+5	305	16	102	+7
17	+6	320	17	108	+8
18	+6	335	17	114	+8
19	+6	350	17	120	+8
20	+6	380	17	135	+8
21	+7	425	17	153	+9
22	+7	470	17	171	+9
23	+7	515	17	189	+9
24	+7	560	17	207	+10
25	+8	605	17	225	+10
26	+8	650	17	243	+10
27	+8	695	17	261	+11
28	+8	740	17	279	+11
29	+9	785	17	297	+11
30	+9	830	17	315	+12

Choose an approach

Offensive: +4 attacks and save DCs. Proficient in one of CON, DEX or WIS. Proficient in one of STR, INT, CHA.

Defensive: +4 AC. Proficient in one of CON, DEX or WIS. Proficient in one of STR, INT, CHA.

Balanced: +1 AC. +1 attacks and save DCs. Proficient in two of CON, DEX or WIS. Proficient in two of STR, INT, CHA.

Flying: +2 attacks and save DCs. Flight. Proficient in one of CON, DEX or WIS. Proficient in one of STR, INT, CHA.

Ability modifiers

Distribute +4, +3, +2, +1, +0 and -2 among Strength modifier, Dexterity modifier, Constitution modifier, Intelligence modifier, Wisdom modifier and Charisma modifier. Treat the monster as proficient in a skill that is simply the monster's name, so black dragons are proficient in all Black Dragon checks and stone giants are proficient in all Stone Giant checks.

(ALT: +4 for best, -2 for worst, +1 for all others?)

Powers

Choose an array. "DPR" is the number of DPR points that you have. So if you have 12 DPR points, a power that has "2 DPR" does 24 damage and one that has "0.5 DPR" does 6 damage.

Dragon: Breath weapon (once every 1d4+1 rounds as an action, 60-foot cone, DEX save to avoid damage, damage = DPR). Bite (basic melee attack, damage = $\frac{1}{2}$ DPR).

Demon: Aura (all creatures within 5 feet take 0.3 DPR at the beginning of their turns). Trident (basic melee attack, damage = 0.6 DPR). Hellfire cannon (basic ranged attack, damage = 0.6 DPR).

Elemental: Death Throes (all creatures within 30 feet make a CON save or take 0.6 DPR when this monster dies). Smash (basic melee attack, damage = 0.6 DPR).

Beast: Multiattack (make one Claw attack and one Bite attack as an action). Claw (basic melee attack, damage = 0.5 DPR). Bite (basic melee attack, damage = 0.5 DPR).

Robot: Mind Surge (once every 3 rounds as an action, a single creature within 100 feet makes a WIS save or takes 0.7 DPR). Laser Beam (a single creature within 100 feet takes 0.35 DPR automatically). Circular Saw (basic melee attack, damage = 0.35 DPR).

Giant: Punch (basic melee attack, damage = 1 DPR). Boulder (basic ranged attack, damage = 1 DPR).

Resistances

If the monster has a substantial number of resistances or a small number of immunities, multiply its hit points by the following values: 0.5 (Challenge Rating 1-4), 0.7 (CR 5-10), 0.8 (CR 11-16), 1 (CR 17 and up).

Modules

Languages

You know Common, your racial language, and a number of additional languages equal to your INT bonus. If you have INT -1, you do not know Common – only your racial language.

Custom Skills

Instead of getting your background, your race and your class as your three skills, you can choose three skills, one based on each of your background, your race and your class.

For example, instead of Human you might choose Raised by Wolves or Of the Steppe People; instead of Elf, Refugee of Rivendell or Elven Noble.

Feats

Instead of getting an ability score increase at level 4, 8, 12, 16 or 19, you choose one feat. This pauses the track for one step, so if you chose a feat at level 4, you get the level 4 ability boost at level 8. If you chose a feat then too, you'd only get the level 4 ability boost at level 12.

If a feat gives an ability bonus, *ignore it*. Instead, choose a second feat that also gives an ability bonus (ignore that ability bonus too).

Ability Score Flexibility

Instead of having your primary ability set to +4 and your secondary to +3, you can choose how to distribute your +4, +3, +2, +1, +0 and -1. Your primary ability is still your primary ability, even if you set it to -1.

In that case, use the following table.

Level	Ability Score
4	One of your non-primary, non-secondary abilities increases by 1.
8	Your primary ability increases by 1.
12	Your secondary ability increases by 1.
16	One of your non-primary, non-secondary abilities increases by 1.
19	Your secondary ability increases by 1.

MicroFive Core

Mechanics

Roll d20 + modifiers \geq Difficulty Check number

Use other dice as directed by the GM to determine the effects of your roll.

Modifiers

Modifiers are determined by Stats, Proficiency, or class ability.

Stat modifiers are determined by $(\text{Stat} - 10) / 2$ rounding down.

The proficiency bonus is determined by $\text{Level} / 3$ rounding up.

Class ability modifiers vary, see class descriptions for details.

Types of Rolls

The GM may ask for a ability check, attack roll, skill roll, or saving throw. You may also have advantage or disadvantage on a roll.

On an ability check, the GM will name a stat for the roll. Success is determined as $\text{d20} + \text{stat modifier} \geq \text{the DC given by the GM}$. In general, success means that you have accomplished something.

A saving throw is the same as an ability check, but success means that you have avoided something negative.

On an skill roll, the GM will name a skill and a stat for the roll. If the character has proficiency in the named skill, the proficiency bonus will be used in the roll. Success is determined as $\text{d20} + \text{proficiency bonus (if applicable)} + \text{attribute modifier} \geq \text{DC given by the GM}$.

An attack roll is the same as a skill roll, but a weapon is named instead of a skill. If the character has proficiency for that weapon, the proficiency bonus will be used in the roll. Certain classes also provide an additional modifiers for specific rolls. Success is determined as $\text{d20} + \text{proficiency bonus (if applicable)} + \text{class modifier (if applicable)} + \text{attribute modifier} \geq \text{the DC given by the GM}$.

The GM may also say that the character has advantage or disadvantage on any kind of roll. For advantage, roll 2d20 and take the highest result. For disadvantage, roll 2d20 and take the lowest result. All modifiers stay the same.

Stats

There are 4 stats:

Body (BODY) measures physical power and endurance

Dexterity (DEX) measures agility

Mind (MIND) measures reasoning and memory

Soul (SOUL) measures perception, insight, and force of personality

To determine stats, roll 3d6 four times. Assign each result to a stat.

Skills

There are four skills:

* Communication pertains to any action that involves instructing, persuading, or communicating with others.

* Knowledge pertains to actions that involve recall of information or correct application of information.

- * Subterfuge pertains to actions that involve trickery, stealth, or deception.
- * Physical pertains to actions that involve using the physical body like leaping, climbing, or feats of strength.

Races

Choose a race for your character. Your choice of race will modify stats.

Dragonborn get +2 BODY +1 SOUL
 Dwarves get +2 BODY +1 SOUL
 Elves get +2 DEX and +1 MIND
 Gnomes get +2 MIND +1 BODY
 Halflings get +2 DEX +1 SOUL
 Humans gain +1 to all stats

Classes

Choose a class for your character. Your choice will provide three special abilities.

Cleric: Spellcasting, Turn Undead, Proficiency for all Communication skill rolls.
 Fighter: Fighting Style, Second Wind, Proficiency for all Physical skill rolls.
 Magi: Spellcasting, Arcane Recovery, Proficiency for all Knowledge skill rolls.
 Rogue: Sneak Attack, Thieves' Tools, Proficiency for all Subterfuge skill rolls.

Class Abilities

Arcane Recovery allows a spellcasting character to recover a number of mana points equal to their level after a short rest.

Fighting Style allows bonuses in combat, choose one of the styles below:

- +2 to all Missile Attack rolls
- +1 to Armor Class
- +2 damage for a one-handed weapon
- Re-roll 1s or 2s when rolling for damage from a two-handed weapon
- Deflect a blow aimed at an ally - the attacker rolls at a disadvantage

Second Wind allows the character to regain 1d6 + level hit points once a day.

Sneak Attack allows the character to add 1d6 damage to a successful attack after a successful subterfuge + DEX skill roll.

Spellcasting allows a character to manipulate magic. The spell save DC for the target of a Divine spell is 8 + proficiency bonus + SOUL modifier. The spell save DC for the target of an Arcane spell is 8 + proficiency bonus + MIND modifier.

Thieves' Tools allow a character to use their proficiency bonus to disarm traps or pick locks.

Turn Undead allows a character to turn or destroy undead creatures on a successful for each one that fails a SOUL saving throw. The DC for the saving throw is 8 + proficiency bonus + character level.

Magic

Magi may cast any Arcane spell whose spell level is character level / 2 or lower, rounding up. Clerics may any Divine spell whose spell level is character level / 2 or lower, rounding up.

Casting a spell costs hit points. The cost to cast a spell is (2 * Spell Level) + 1 hit points. This loss can only be recovered after a long rest and not by any form of healing. Only Magi can use Arcane recover mana points equal to their character level after a short rest.

Spellcaster can choose one spell to be a signature spell. Its cost is reduced by 1 hit point.

Actions

On a character's turn he or she can do one and only one thing; attack, move, cast a spell, use a class ability, use a skill, etc.

Combat

Hit points = BODY stat + 1d6 / level. If HP reach 0, the character is unconscious and near death. Any further damage directly reduces the BODY stat. If BODY reaches 0, the character is dead.

Initiative is determined by a Dexterity ability check. The character or opponent with the highest result goes first. The next highest goes second, and so on.

Melee attack rolls use d20 + proficiency bonus (if applicable) + class modifier (if applicable) + BODY modifier

Missile attack rolls use d20 + proficiency bonus (if applicable) + class modifier (if applicable) + DEX modifier

Arcane spell attack rolls use d20 + proficiency bonus (if applicable) + class modifier (if applicable) + MIND modifier

Divine spell attack rolls use d20 + proficiency bonus (if applicable) + class modifier (if applicable) + SOUL modifier

If the result is higher than the DC provided by the GM, the attack is successful and damage is determined.

If the proficiency bonus + stat modifier is six or more, the character can make a second attack with a -5 modifier to the attack roll. If the proficiency bonus + stat modifier is eleven or more, the character can also make a third attack with a -10 modifier to the attack roll. Note that any modifiers from class abilities are not included.

Level Advancement

Every trap, monster, or other challenge has a Challenge Rating set by the GM. The GM will add up the Challenge Ratings for all encounters. If the total is equal to or more than the character's level, that character advances one level. Alternately, the GM may choose to advance all characters up a level every other game session.

Each level adds 1d6 hit + BODY modifier hit points

The proficiency bonus is re-calculated based on the new character level.

If the character level is evenly divided by four, the character can increase one stat by +2 or two stats by +1. No stat can be improved higher than 20.

Example: The 1st level adventurers have completed a game session, overcoming five CR 1 monsters, a CR 2 trap, and a CR 3 monster. The total of all the Challenge Ratings is 10, so all adventurers advance to level 2. To advance to level 3, the adventurers will need to overcome a total of 20 Challenge Ratings in one or more game sessions.

Legal Information

Permission to copy, modify and distribute the files collectively known as the System Reference Document 5.0 ("SRD5") is granted solely through the use of the Open Gaming License, Version 1.0a. This material is being released using the Open Gaming License Version 1.0a and you should read and understand the terms of that license before using this material. The text of the Open Gaming License itself is not Open Game Content. Instructions on using the License are provided within the License itself. The following items are designated Product Identity, as defined in Section 1(e) of the Open Game License Version 1.0a, and are subject to the conditions set forth in Section 7 of the OGL, and are not Open Content: Dungeons & Dragons, D&D, Player's Handbook, Dungeon Master, Monster Manual, d20 System, Wizards of the Coast, d20 (when used as a trademark), Forgotten Realms, Faerûn, proper names (including those used in the names of spells or items), places, Underdark, Red Wizard of Thay, the City of Union, Heroic Domains of Ysgard, Ever-- Changing Chaos of Limbo, Windswept Depths of Pandemonium, Infinite Layers of the Abyss, Tarterian Depths of Carceri, Gray Waste of Hades, Bleak Eternity of Gehenna, Nine Hells of Baator, Infernal Battlefield of Acheron, Clockwork Nirvana of Mechanus, Peaceable Kingdoms of Arcadia, Seven Mounting Heavens of Celestia, Twin Paradises of Bytopia, Blessed Fields of Elysium, Wilderness of the Beastlands, Olympian Glades of Arborea, Concordant Domain of the Outlands, Sigil, Lady of Pain, Book of Exalted Deeds, Book of Vile Darkness, beholder, gauth, carrion crawler, tanar'ri, baatezu, displacer beast, githyanki, githzerai, mind flayer, illithid, umber hulk, yuan--ti. All of the rest of the SRD5 is Open Game Content as described in Section 1(d) of the License. The terms of the Open Gaming License Version 1.0a are as follows: OPEN GAME LICENSE Version 1.0a The following text is the property of Wizards of the Coast, Inc. and is Copyright 2000 Wizards of the Coast, Inc ("Wizards"). WHAT IS THIS?

This is a trimmed-down, subminiature version of the Fifth Edition of the World's Most Popular Role-playing game (see license for more info) that has been designed to be quick and easy to play.

The goal was to create a simpler game, but one where all of the resources of the Fifth Edition (monsters, spells, adventures and equipment) could be used without conversion.

GETTING STARTED

Get a group of 2-6 people together with some dice, paper, and pencils. One player is the **Game Master (GM)**, who runs all of the **non-player characters (NPCs)**, describes the environment, and determines the outcome of rolls. The rest of the players make one **character**.

Agree upon a **game concept**, and then each player creates a **character concept** that fits. The game is largely played through a dialogue, the players describe their character's attempted actions and the GM calls for what rolls or rules are necessary.

A group of characters is usually called a **party** or a **group**. Your party will interact with each other, the NPCs, and the universe, all under the guidance of the GM, the dice, and the rules.

All you need to play are these rules, a set of polyhedral dice, and something to take notes on. Every player should at least have a passing understanding of the rules, and the GM should know enough to make characters and run the basics.

POLYHEDRAL DICE

This game uses dice with 4, 8, 10, 12 and 20 sides in addition to the usual six-sided dice. The usual notation for dice is XdY, which means roll X dice with Y sides. (2d6 is two six-sided dice, 1d12 is one twelve-sided dice.) If you do not have a set of polyhedral dice, the following approximations with d6's will get you close enough in a pinch:

d4	d8	d10	d12	d20
d6-1, or d6 (reroll 5/6)	d6+1	d6+2	2d6	3d6 (16-18 crits)

EXPLANATORY NOTES

M20 Fifth will be easiest to understand if you are already familiar with RPGs. For the unfamiliar reader, the following brief explanations are offered:

Stats (aka Ability Scores) and **Skills**: Numerical representations of a character's raw physical/mental abilities and training in specific areas, respectively. Corresponds to a bonus, which is added to rolls.

Race: The fantasy species a character belongs to.

Class: A collection of talents and abilities that describe a character's profession or role as an adventurer.

Level: Has two different meanings, that shouldn't be confused.

Character level is a reflection of a character's general growth as a result of earning **experience points (XP)** from overcoming obstacles. **Spell level** is the measure of a spell's relative power.

CHARACTERS

STATS

There are 3 stats : Strength (**STR**), Dexterity (**DEX**) and Mind (**MIND**).

Roll 4d6, drop lowest die. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Alternatively you may use the array of 15, 12, 8.

Stat bonus = (STAT-10)/2, round down.

RACES

Humans: +1 to all Stats

Magical Races (e.g. Elves, Gnomes): +2 MIND

Tough Races (e.g. Dwarves, Half-Orcs, Dragonborn): +2 STR

Quick Races (e.g. Halflings): +2 DEX

CLASSES

The classes are **Fighter, Rogue, Mage and Cleric**. Characters start at level 1 with a **proficiency bonus** of +2.

FIGHTER

Skill and Save Proficiencies: Physical, STR Saves

Armor Proficiencies: All armor, Shield

Improved Stamina: +3 to HP per level. When taking short rests, add 3 hp per rest dice spent.

Multiple Attacks: You gain an additional attack at 5th level, and again at 11th and 20th level.

Extended Crit Range: At level 3 you crit on a 19-20. At level 15 you crit on an 18-20.

Extra Ability Score Increase: At level 14, you get an extra ability score increase.

Starting Equipment: chain mail (+6 AC heavy armor), shield, one weapon (and ammunition if applicable), 10 gp, a fast pack (see Equipment)

ROGUE

Skill and Save Proficiencies: Subterfuge, DEX saves

Armor Proficiencies: Light armor

Sneak Attack: Whenever you have advantage, or your target is distracted by melee combat with another foe you may add [half level, rounded up]d6 to your damage.

Cunning Action: As a bonus action, you may make a Subterfuge check or Dash.

Starting Equipment: leather armor (+1 AC light armor), one weapon (and ammunition if applicable), thieves tools, 15 gp, a fast pack (see Equipment)

MAGE

Skill and Save Proficiencies: Knowledge, MIND Saves

Armor Proficiencies: No armor

Signature Spell: Choose one spell (or one action-realm combination if using Words of Power.) Casting this spell costs 1 MP less.

Arcane Spellcasting: See Magic for more information.

Starting Equipment: spellbook, wand, 10 gp, a fast pack (see Equipment)

CLERIC

Skill and Save Proficiencies: Communication, MIND Saves

Armor Proficiencies: Medium Armor, Shield

Divine Spellcasting: See Magic for more information.

Channel Divinity: You have the ability to channel positive energy once per short/long rest to Turn Undead or Preserve Life. At level 6 this becomes twice per rest, and at level 18 this becomes three times per rest. To **Turn Undead** the cleric brandishes their holy symbol forcing all undead within 30 feet to make a MIND save (DC 8 + cleric's MIND bonus + cleric's proficiency) or flee. If the undead roll a 1 on their save, they are immediately destroyed. **Preserve Life** restores [5 * level] hp divided to taste among allies within 30 feet.

Starting Equipment: scale mail (+4 AC medium armor), shield, holy symbol, mace (one-handed weapon), 15 gp, a fast pack (see Equipment)

BACKGROUNDS

Every character should also choose a background, which grants them proficiency in one skill, and grounds them in the world. Every background provides a great starting point for role-playing. Perhaps a criminal has underworld contacts, perhaps a soldier can still get respect among patriotic peasants, perhaps a sage can easily find obscure information in books when they need to.

- **Communication Backgrounds**: Acolyte, Noble, Folk Hero, etc.
- **Subterfuge Backgrounds**: Criminal, Urchin, Charlatan, etc.
- **Knowledge Backgrounds**: Sage, Hermit, etc.
- **Physical Backgrounds**: Soldier, Sailor, etc.

Optional Rule (Specialization): If a character has a background which grants a proficiency which they already get from their class, they may add twice their proficiency bonus to d20 rolls.

SKILLS AND SAVING THROWS

There are just 4 skills : **Physical, Subterfuge, Knowledge and Communication**. Roll equal to or higher than the given Difficulty Class (DC) or opposed roll to succeed.

Skill/Saving Throw roll = d20 + stat bonus + (proficiency bonus)

For example, Climbing would use STR + Physical bonus. Dodging a falling rock is DEX + Physical bonus. Finding a trap is MIND + Subterfuge bonus. Disabling a trap is DEX + Subterfuge bonus.

COMMON DC's

- **Very easy:** 5
- **Easy:** 10
- **Moderate:** 15
- **Hard:** 20
- **Very hard:** 25
- **Nearly impossible:** 30

ADVANTAGE AND DISADVANTAGE

Whenever a character has increased or decreased odds of succeeding on a d20 roll, the GM may elect to give that character Advantage or Disadvantage. This involves rolling twice and taking the better or worse of the two rolls respectively.

MAGIC

All casters have Magic Points (MP) equal to their max HP. They may cast spells of a level equal to $\frac{1}{2}$ their class level, rounded up. Use the spells from Appendix B, or the spell system described in Appendix C. Alternatively, let casters know 6 spells of any spell level they have access to from the Fifth Edition Basic Rules.

Concentration: Certain spells require concentration. While concentrating on a spell, a caster may not cast other concentration spells. If a caster is hit while concentrating on a spell, they must make a DC 10 or half the damage taken (whichever is higher) MIND save or the spell fizzles.

Casting a spell of any kind requires magic points. The cost is:
1 + double the level of the spell being cast

Spell Level	MP Cost
1	3
2	5
3	7
4	9
5	11
6	13
7	15
8	17
9	19

The DC for saving throws to resist a caster's spell is:
8 + MIND bonus + proficiency bonus

OPTIONAL RULES

- **Blood Magic:** Instead of having MP equal to their HP, a caster has MP equal to half their HP. In addition, a caster may choose convert their HP to MP at a rate of 2 HP per 1 MP.
- **Ritual Casting:** A caster may cast any spell without expending MP if they take an additional 10 minutes casting the spell.

CANTRIPS

A caster starts with knowledge of [MIND bonus] cantrips, which may be any combination of damaging and utility cantrips. A cantrip is a spell that can be cast again and again without any MP cost.

DAMAGING CANTRIPS

You may make a damaging cantrip using the table below - a damaging cantrip may add up to at most 9 points and must have a range, damage and method. At levels 5, 11 and 17 they do an additional dice of damage. (If a cantrip has separate beams, instead of additional dice of damage at these levels, you get an additional beam which can target separate creatures.)

Points	Range	Damage	Method	Additional Effects
1	Touch	1d4	Magic Attack	Seperate beams
2	10'	1d6	DEX save	Pull 10' closer to you
3	30'	1d8	MIND save	
4	60'	1d10		
5	120'	1d12		

Optional Rule (Damage Type): In addition to the effects mentioned on the table, choose any one damage type your cantrip qualifies for based on its range:

- Touch: Lightning (Advantage if target wearing metal armor)
- 10 ft or less: Poison
- 30 ft or less: Piercing
- 60 ft or less: Radiant, Psychic, Acid
- 120 ft or less: Necrotic, Force, Fire

UTILITY CANTRIPS

Instead of damaging cantrips, you may choose one of the following utility cantrips:

Prestidigitation: Perform minor tricks for 1 hour.

Ghost Sound: Figment sounds for 1 minute.

Mage Hand: 5-pound telekinesis. Lasts until concentration ends.

Light: Object shines like a torch for 1 hour.

Guidance: Subject gets +1d4 on one skill check. Lasts for one minute or until discharged.

Resistance: Subject gets +1d4 on one saving throw. Lasts for one minute or until discharged.

COMBAT

Hit Points = $(1d8 + \text{STR bonus})/\text{Level}$. If HP reaches 0, unconscious and near death. Every round, make unmodified d20 rolls to avoid death. DC 10, must get three successes before three failures.

Roll d20 + DEX bonus for initiative order. Everyone can move (30 ft.) and perform an action each turn. Actions include: additional movement (dashing), casting a spell and attacking. In addition, a single bonus action may be taken if granted by a class feature, spell or other ability.

Melee attack bonus = STR bonus + proficiency bonus
Missile attack bonus = DEX bonus + proficiency bonus
Magic attack bonus = MIND bonus + proficiency bonus

Add attack bonus to d20 roll. If equal to or higher than your opponent's Armour Class (AC), it's a hit. Natural 20 is automatically a critical hit doing double damage.

Add STR bonus to melee damage, and DEX bonus to missile damage.

Armour Class (AC) = 10 + Armour bonus + (DEX bonus).

OPTIONAL RULES

- **Finesse:** Fighters and Rogues can use DEX bonus + proficiency bonus as Melee attack bonus and damage instead if wielding a light weapon.
- **Dual Wielding:** Fighters and Rogues can wield 2 light weapons and may use an action to attack with their main weapon, and a bonus action to attack with their offhand weapon. Don't add your ability modifier to the damage on the second weapon.
- **Great Weapon Fighting:** When a Fighter or Rogue is wielding a two-handed weapon, they may re-roll 1 and 2 results on their damage dice, but you must use the new roll.

NATURAL HEALING

Characters have rest dice equal to their level.

A **short rest** is one hour long, and a character may spend rest dice to regain $1d8 + \text{STR bonus}$ hit points per dice. Casters regain [double level] magic points on a short rest.

A **long rest** is 8 hours long. A character regains all hit points and magic points, and half of their total rest dice. Casters regain all magic points on a long rest.

IMPROVISED HAZARDS AND TRAPS

Use the below information to improvise damage for things like being pushed into a campfire or falling into lava.

Examples:

- 3d6 - being pushed into a campfire, falling 30 feet
- 6d6 - suffering a cave-in, falling 60 feet
- 28d6 - falling into lava

Character Level	Minor	Major	Deadly
1-4	2d6	3d6	6d6
5-10	3d6	6d6	16d6
11-16	6d6	16d6	28d6
17-20	16d6	28d6	38d6

ADVANCEMENT

After every encounter, add up the Challenge Rating (CR) of every monster, trap, etc. that was overcome. When the total = $10 \times$ your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Hit Points: $1d8 + \text{STR bonus}$ per level

Proficiency Bonus: 1-4: +2; 5-8: +3; 10-12: +4; 13-16: +5; 17-20: +6

Ability Score Increases (Casters): 4, 8, 12, 16, 19

Ability Score Increases (Non-Casters): 4, 8, 10, 12, 16, 19

When a character receives an ability score increase, they either gain +2 to one stat or +1 to two stats (max 20.)

BESTIARY

Skills and Saving Throws: Treat a monster's bonus for all skills and saving throws as their attack bonus. Alternatively, assign stats to taste and use stat bonus + (proficiency bonus) as their skill bonus.

STATBLOCK EXPLANATION

HD: hit dice, **hp:** hit points, **CR:** (Challenge Rating) a monster of challenge rating X, should be a decent challenge for a four person party of level X, **attack name +X/+X/...:** perform *attack name* multiple times using +X as attack bonus, **(damage [average damage], effect name saving throw [effect]), special attack name saving throw (damage/effect), save halves:** does half damage on a successful save.

Animal, small [eg Weasel] (CR 0): HD 1d4+1 (3 hp), AC 10, bite +2 ([1])

Ankheg (CR 2): HD 6d10+6 (39 hp), AC 14, bite +5 (2d6+3, acid 1d6 [12]) or acid spray DC 13 DEX (3d6 [10], save halves)

Bugbear (CR 1): HD 5d8+5 (27 hp), AC 16, morningstar +4 (2d8+2 [11]) or javelin +4 (1d6+2 [5])

Choker (CR 1/2): HD 3d6+3 (13 hp), AC 15, tentacle +4 (1d6+3 [5], grappled [escape DC 14]) or constrict +4 (1d8+2 [6])

Deinonychus (Raptor) (CR 1): HD 3d8+3 (17 hp), AC 15, claw +4/+4 (1d8+1 [6])

Dire Rat (CR 1/8): HD 2d6 (7 hp), AC 12, bite +4 (1d4+2 [4])

Earth Elemental (CR 5): HD 12d10+60 (126 hp), AC 17, slam +8/+8 (2d8+5 [14]), damage resistance (half damage from non-magical weapons)

Gargoyle (CR 2): HD 7d8+21 (52 hp), AC 15, claws +4/+4 (1d6+2 [5]), damage resistance (half damage from non-magical weapons)

Gelatinous Cube (CR 2): HD 8d10+40 (84 hp), AC 6, engulf DC 12 DEX (3d6 [10], trapped and suffocating taking 6d6 [21]/turn), transparent (requires DC 15 MIND + Subterfuge bonus to see)

Goblin (CR 1/4): HD 2d6 (7 hp), AC 15, scimitar +4 (1d6+2 [5]) or shortbow +4 (1d6+2 [5])

Griffon (CR 2): HD 7d10+21 (59 hp), AC 12, claws +6/+6 (2d6+3 [10])

Hell Hound (CR 3): HD 7d8+14 (45 hp), AC 15, bite +5 (1d8+3, fire 2d6 [14]) or fire breath DC 12 DEX (6d6 [21], save halves)

Hill Giant (CR 5): HD 10d12+40 (105 hp), AC 13, greatclub +8/+8 (3d8+5 [18]) or rock +8 (3d10+5 [21])

Hobgoblin (CR 1/2): HD 2d8+2 (11 hp), AC 18, longsword +3 (1d8+8 [12]) or longbow +3 (1d8+8 [12])

Human Commoner (CR 0): HD 1d8 (4 hp), AC 10, club +2 (1d4 [2])

Insect, small [eg Spider] (CR 0): HD 1d4+1 (1 hp), AC 12, bite +4 ([1], poison DC 9 STR 1d4 [2])

Kobold (CR 1/8): HD 2d6-2 (5 hp), AC 12, dagger +6 (1d4+2 [4]) or sling +6 (1d4+2 [4])

Ogre (CR 2): HD 7d10+21 (59 hp), AC 11, greatclub +6 (2d8+4 [13]) or javelin +6 (2d6+4 [11])

Orc (CR 1/2): HD 2d8+6 (15 hp), AC 13, greataxe +5 (1d12+3 [9]) or javelin +5 (1d6+3 [6])

Owlbear (CR 3): HD 7d10+21 (59 hp), AC 13, claws +7/+7 (2d8+3 [12])

Rust Monster (CR 1/2): HD 5d8+5 (27 hp), AC 14, bite +3 (1d8+1 [5], rust DC 11 DEX)

Shadow (CR 1/2): HD 3d8+3 (16 hp), AC 12, strength drain +4 (2d6+2 [9], -1d4 STR), damage resistance (half damage from non-magical weapons)

Skeleton (CR 1/4): HD 2d8+4 (13 hp), AC 13, shortsword +4 (1d6+2 [5]) or shortbow +4 (1d6+2 [5])

Stirge (CR 1/8): HD 1d4 (2 hp), AC 14, blood drain +5 (1d4+3 [5], attach [5 dmg/turn])

Stone Golem (CR 10): HD 17d10+85 (178 hp), AC 17, slam +10/+10 (3d8+6 [19]) or slow DC 17 MIND save (speed halved, one attack a turn), damage immunity (only hurt by adamantine weapons or magic)

Troll (CR 5): HD 8d10+40 (84 hp), AC 15, claw +7/+7/+7 (2d6+3 [10]), regenerate (+10 hp/turn, acid/fire negate)

Vampire Spawn (CR 5): HD 16d8+48 (120 hp), AC 15, bite +6/+6 (2d6+3 [10], life absorb DC 15 STR [reduce max HP by dmg taken, increase own HP by half dmg]), damage resistance (half damage from non-magical weapons), vampire weaknesses (cause 20 dmg/turn)

Werewolf (hybrid form) (CR 3): HD 9d8+18 (58 hp), AC 12, bite +4/+4 (1d8+2 [6], lycanthropy DC 12 STR), damage immunity (only hurt by silver weapons or magic)

Wight (CR 3): HD 6d8+18 (45 hp), AC 14, slam +4/+4 (1d6+2 [5], life drain DC 13 STR [reduce max HP by dmg taken]) or longbow +4/+4 (1d8+2 [6])

Wolf (CR 1/4): HD 2d8+2 (11 hp), AC 13, bite +4 (2d4+2 [7], knock prone DC 11 STR)

Wyvern (CR 6): HD 13d10+39 (110 hp), AC 13, stinger +7/+7 (2d6+4 [11], poison DC 14 STR [24 dmg, save halves])

Zombie (CR 1/4): HD 3d8+9 (22 hp), AC 8, slam +3 (1d6+1 [4]), undead fortitude (instead of dying, zombie lives on a DC [5+dmg just taken] STR save)

EQUIPMENT

CURRENCY

The most common coin is the gold piece (gp). A gold piece is worth 10 silver pieces (sp). Each silver piece is worth 10 copper pieces (cp). A platinum piece (pp) is worth 10 gp.

Exchange	cp	sp	gp	pp
Copper piece	1	1/10	1/100	1/1,000
Silver piece	10	1	1/10	1/100
Gold piece	100	10	1	1/10
Platinum piece	1,000	100	10	1

ARMOR

The cost of armor equals AC bonus times 5, squared.

- **Light Armor:** +1, +2 add DEX bonus
- **Medium Armor:** +3, +4, +5 add DEX bonus (max 2)
- **Heavy Armor:** +6, +7, +8 no DEX bonus, disadvantage on Subterfuge checks involving stealth
- **Shield** (10 gp): +2

Barding for horses costs 4 times as much as human armor, and weighs twice as much.

WEAPONS

Either use weapons from the Basic Rules of Fifth Edition, or use the table below to improvise weapons.

WEAPON DAMAGE BY CLASS (WEAPON COST)

Class	Light (2 gp)	1-handed (10 gp)	2-handed (40 gp)	Ranged (†)
Fighter	1d8	1d10	1d12	1d8
Rogue	1d6	1d8	2d6	1d8
Mage	1d4	1d6	1d8	1d6
Cleric	1d4	1d6	1d10	1d6

† Ranged weapon cost: 50 gp (ammunition-based weapon), 1 gp (20 ammunition) / 1 gp (thrown weapon)

OTHER EQUIPMENT

To figure out a reasonable price for equipment use the following table (for example, a bedroll would cost 10 gp, since it's two syllables):

Kind of Item	Cost
Common Items	1 cp x number of syllables
Adventuring/Camping Gear	5 gp x number of syllables
Specialist Tools, Animals	10 gp x number of syllables
Luxury Items	25 gp x number of syllables
Lethal items, Dangerous Animals	100 gp x number of syllables

FAST PACKS

Choose a pack, or roll 1d6 to select one randomly.

- **Pack A** (1-2): backpack, belt pouch, bedroll, hooded lantern, 10 oil flasks, flint & steel, shovel, 2 sets of caltrops, signal whistle, waterskin, iron rations (4 days)
- **Pack B** (3-4): backpack, belt pouch, bedroll, 10 torches, 4 oil flasks, flint & steel, 10 pieces of chalk, 10' pole, mirror, crowbar, waterskin, iron rations (4 days)
- **Pack C** (5-6): backpack, belt pouch, bedroll, tent, 10 torches, 5 oil flasks, flint & steel, 50' rope, grappling hook, 10' pole, waterskin, iron rations (4 days)

GM ADVICE: WHEN IN DOUBT... REMEMBER

Whenever the players want to try something that goes around, through, or above and beyond the rules as written, you can always use the "GM's Friend"... the 50% chance. Have them roll whatever check seems most appropriate.

A roll of 1-10 is a failure, a roll of 11-20 is a success. If you feel that the situation warrants that you favor them, assign advantage to their roll. If the situation determines that they be hindered, then assign disadvantage.

APPENDIX A: ADDITIONAL COMBAT OPTIONS

The combat system of M20 Fifth is designed to be as simple and streamlined as possible, but if more complexity is desired the following options are offered:

- **Surprise:** If a creature fails to perceive (MIND + Sub) another creature hiding (DEX + Sub) before a battle, they start combat surprised. A surprised creature is unable to move, take actions or reactions until the first round of combat is finished.
- **Reactions:** A character can make one reaction per round when it is not their turn. Typical reactions include:
 - **Opportunity Attacks:** When an opponent tries to leave your reach without taking the Disengage action (see below), you may make a single attack against them.
 - **Cast Certain Spells:** Spells like Feather Fall from Appendix B or Counterspell from the Fifth Edition Basic Rules can be cast as a reaction instead of an action.
- **Disengage:** A character may take a disengage action in order to safely retreat without provoking an opportunity attack from opponents.
- **Dodge:** A character may take a dodge action, granting disadvantage on all attacks until their next turn.
- **Ready an Action:** Instead of acting on your turn, you may ready an action. Readyng an action delays your action until you use a reaction to trigger it later in the round.
- **Knocking a Creature Out:** When an attacker reduces a foe to 0 hit points with a melee attack, the attacker may choose to knock the creature out instead of dealing a lethal blow.
- **Maneuvers:** Maneuvers are special actions that a character can take instead of just attacking. The most common maneuvers are:
 - **Grappling:** Against a target no more than twice your height, you may replace one attack with a grapple. Make a STR + Phys roll opposed by an opponent's STR + Phys or DEX + Phys roll (their choice). If you succeed, the opponent is grappled, reducing their speed to 0, and your speed to half. Escaping the grapple requires an action and another set of opposed rolls.
 - **Shove:** You may shove a creature in order to knock them prone (adv. for melee, disadv. for ranged, half of movement to stand up), or push them away from you. Make a STR + Phys roll opposed by an opponent's STR + Phys or DEX + Phys roll (their choice).
- **Cover:** Cover adds to the AC and DEX saves of a creature, as follows:
 - **Half Cover:** +2
 - **3/4 Cover:** +5
 - **Full Cover:** untargetable by attacks and (most) spells

APPENDIX B: SPELL LISTS

Saving Throws and Scaling: Unless a spell specifically mentions using a spell attack or not granting a saving throw, the target of a spell may resist by making an appropriate STR/DEX/MIND save. If a spell does damage, then successfully saving causes that spell to do half the damage it would have.

Many spells end with something like "+Xd6 per spell level above Yth." What this means is that the spell is Yth level spell, but if it is cast in a (Y+1)th level spell slot or higher it has some sort of scaling effect.

ARCANE SPELLS

1ST-LEVEL ARCANE SPELLS

- **Charm Person:** Makes one person your friend for 1 hour.
- **Feather Fall:** 5 creatures fall slowly for 1 minute or until landing.
- **Floating Disk:** Creates 3-ft.-diameter horizontal disk that holds 500 lb. and lasts for 1 hour.
- **Mage Armor:** Gives subject AC of 13 + DEX for 8 hours.
- **Magic Missile:** No saving throw; Launches three magic darts each dealing 1d4+1 damage; +1 missile per spell level above 1st.
- **Sleep:** Puts 5 HD of creatures into magical slumber for 1 min. +2HD of creatures for every spell level above 1st.

2ND-LEVEL ARCANE SPELLS

- **Acid Arrow:** Ranged spell attack; 4d4 damage immediately, 2d4 at end of next turn; +1d4 immediately and +1d4 at the end of next turn per spell level above 2nd.
- **Flaming Sphere:** Creates rolling ball of fire controlled with a bonus action, 2d6 damage, lasts 1 minute; +1d6 per spell level above 2nd.
- **Invisibility:** Subject is invisible for 1 hour (concentration) or until it attacks.
- **Knock:** Opens locked or magically sealed door.
- **Levitate:** Subject moves up and down at your direction for 10 minutes (concentration.)
- **Spider Climb:** Grants ability to walk on walls and ceilings for 1 hour (concentration.)

3RD-LEVEL ARCANE SPELLS

- **Clairvoyance:** Hear or see at a distance for 10 minutes (concentration.)
- **Dispel Magic:** Cancels magical spells and effects.
- **Fireball:** 8d6 damage, 20-ft. Radius; +1d6 damage per spell level above 3rd.
- **Fly:** Subject flies at speed of 60 ft. for 10 minutes (concentration.) +1 target per spell level above 3rd.
- **Vampiric Touch:** For 1 minute (concentration), caster's touch, deals 3d6 damage on a successful melee spell attack; caster gains half damage as hp; +1d6 per spell level above 3rd.
- **Animate Dead:** Create undead skeleton or zombie from a corpse, controlled as bonus action; +2 undead per spell level above 3rd level.

4TH-LEVEL ARCANE SPELLS

- **Arcane Eye:** See through invisible floating eye that moves 30 ft./round for 1 hour (concentration.)

- **Black Tentacles:** Tentacles grapple all within 20 ft. spread for 1 minute (concentration), dealing 3d6 damage per round.
- **Dimension Door:** Teleports you short distance.
- **Ice Storm:** Summons a 20 foot radius ice storm that deals 6d8 damage, and halves movement for one round. +1d8 damage per spell level above 4th.
- **Polymorph:** Gives one creature a new form for 1 hour (concentration.)
- **Stoneskin:** Take half damage from nonmagical attacks. Lasts 1 hour (concentration.)

5TH-LEVEL ARCANES SPELLS

- **Cloudkill:** Deals 5d8 damage to 20-foot-radius; +1d8 per spell level above 5th. Lasts 10 minutes (concentration)
- **Contact Other Plane:** Lets you ask five questions of extraplanar entity.
- **Geas:** Commands any creature, binding it to a specific task. Lasts for 1 day/level or until discharged.
- **Hold Monster:** Paralyze target creature for 1 minute (concentration.) +1 target per spell level above 5th.
- **Passwall:** Creates passage through wood or stone wall for 1 hour.
- **Teleportation Circle:** Creates a temporary portal that leads to a permanent teleportation circle on the same plane.

6TH-LEVEL ARCANES SPELLS

- **Chain Lightning:** A lightning bolt leaps through four nearby targets, doing 10d8 damage; +1 target per spell level above 6th.
- **Contingency:** Sets trigger condition for another spell. Lasts for 10 days or until discharged.
- **Disintegrate:** Deals 10d6 + 40 damage, if target is reduced to 0 hp it is disintegrated; +3d6 damage per spell level above 6th.
- **Irresistible Dance:** Forces subject to dance for 1d4+1 rounds.
- **Sunbeam:** For 1 minute (concentration), a 60 foot beam deals 6d8 damage per round, and blinds victims.
- **True Seeing:** Lets you see all things as they really are for 1 hour.

7TH-LEVEL ARCANES SPELLS

- **Delayed Blast Fireball:** 12d6 damage; you can postpone blast for 5 rounds (concentration); +1d6 per spell level above 7th.
- **Etherealness:** Travel to Ethereal Plane for 8 hours. +3 companions per spell level above 7th.
- **Finger of Death:** Target takes 7d8 + 30 damage. If target is killed by spell, they rise the next turn as a zombie under your control.
- **Plane Shift:** As many as eight subjects travel to another plane.
- **Reverse Gravity:** Reverses gravity in a 50 ft. radius for 1 minute (concentration.)
- **Teleport:** Instantly transports you and up to eight creatures as far as 100 miles/level.

8TH-LEVEL ARCANES SPELLS

- **Antimagic Field:** Negates magic within 10 ft. for 1 hour (concentration.)
- **Clone:** Duplicate awakens when original dies.
- **Feeblemind:** Subject's MIND score drops to 1 and they take 4d6 damage.

- **Horrid Wilting:** Deals 10d6 damage within 30 ft.
- **Incendiary Cloud:** Cloud deals 10d6 damage/round for 1 minute (concentration.)
- **Power Word Stun:** Stuns creature with 150 hp or less for 2d4 rounds.

9TH-LEVEL ARCANES SPELLS

- **Astral Projection:** Projects you and companions onto Astral Plane.
- **Gate:** Connects two planes for travel or summoning. Open for 1 round/level.
- **Meteor Swarm:** Four exploding spheres each deal 40d6 damage.
- **Power Word Kill:** Kills one creature with 100 hp or less.
- **Time Stop:** Time slows down allowing you to take 1d4+1 turns in a row.
- **Weird:** Fearsome illusion deals 4d10 damage/round to subjects in 30 ft. radius.

DIVINE SPELLS

1ST-LEVEL DIVINE SPELLS

- **Bless:** 3 allies can add 1d4 on every attack roll or saving throw for one minute (concentration.) +1 ally for every spell level above 1st.
- **Create or Destroy Water:** Create/destroy 10 gallons of water in open container; or create rain/destroy fog in 30-ft cube; +2 gallons/+5 cubic feet per spell level above 1st.
- **Cure Wounds:** One creature healed 1d8 + MIND modifier HP; +1d8 HP for every spell level above 1st.
- **Detect Magic:** Know presence of magic within 30 ft for 10 minutes (concentration.) An action can be used to see aura and determine what kind of magic it is.
- **Inflict Wounds:** Spell attack; 3d10 damage; +1d10 damage per spell level above 1st.
- **Shield of Faith:** One creature gains +2 AC bonus for 10 minutes (concentration.)

2ND-LEVEL DIVINE SPELLS

- **Aid:** 3 allies increase HP and max HP by 5 for 8 hours; +5 HP/max HP for every spell level above 2nd.
- **Enhance Ability:** 1 ally gains advantage on ability checks of your choice for 1 hour (concentration.) +1 ally for every spell level above 2nd.
- **Gentle Repose:** Preserves one corpse.
- **Hold Person:** 1 humanoid is paralyzed for 1 minute (concentration.) +1 humanoid for every spell level above 2nd.
- **Lesser Restoration:** Cure disease or end blindness, deafness, paralysis, or poison.
- **Protection from Poison:** One creature is cured of poison, and for one hour takes half damage from poison damage and has advantage on saving throws against being poisoned.

3RD-LEVEL DIVINE SPELLS

- **Clairvoyance:** See or hear a familiar place for 10 minutes (concentration.)
- **Create Food and Water:** Feeds fifteen humanoids (or five horses).

- **Dispel Magic:** Automatically dispel spells of 3rd level or lower, or higher level spells with DC 10 + spell's level. +1 spell level automatically dispelled for every spell level above 3rd.
- **Revivify:** Restore 1 HP to someone who was dead for less than a minute.
- **Speak with Dead:** Corpse answers five questions.
- **Tongues:** One creature speaks any language for 1 hour.

4TH-LEVEL DIVINE SPELLS

- **Banishment:** Banishes 1 creature back to its home plane (if extraplanar) or a harmless demiplane (if native) for 1 min. (concentration.) Extraplanar creature is permanently banished if spell lasts full minute. +1 creature for every spell level above 4th.
- **Death Ward:** The next time creature drops to 0 HP, it drops to 1 HP instead.
- **Divination:** You ask your god one question about a specific goal, event or activity to occur within the next 7 days and receive a truthful reply in the form of a short phrase, cryptic rhyme or an omen.
- **Freedom of Movement:** Subject moves normally despite impediments for 1 hour.
- **Locate Creature:** Learn direction to closest named or described kind or specific creature within 1000 ft. for 1 hour (concentration.)
- **Stone Shape:** Form 5 cubic feet of stone into any shape.

5TH-LEVEL DIVINE SPELLS

- **Commune:** Deity answers three yes-or-no questions.
- **Flame Strike:** All creatures in a 10 ft. radius take 8d6 damage. +1d6 damage for every spell level above 5th.
- **Geas:** Commands any creature, binding it to perform a specific task for 30 days or take 5d10 damage. x10 duration for every spell level above 5th.
- **Greater Restoration:** Reduce exhaustion or end charm, petrify, curse, stat or max HP reduction.
- **Mass Cure Wounds:** 6 creatures within 30-ft rad heal 3d8+spellcasting ability modifier in HP. +1d8 for every spell level above 5th.
- **Raise Dead:** Restore 1 HP to someone who was dead for less than 10 days.

6TH-LEVEL DIVINE SPELLS

- **Forbiddance:** No planar travel in a 40,000 sq ft. radius may take place. In addition creatures of a specified type (celestial, elemental, fey, fiend, undead) take take 5d10 damage when entering area or starting turn in it.
- **Harm:** Deals 14d6 damage to target.
- **Heal:** Cures 70 HP, all diseases, blindness and deafness. +10 HP for every spell level above 6th.
- **Heroes' Feast:** Food for 13 creatures bestows +2d10 HP and max HP, cures disease and poison, grants immunity to poison and frightened, and grants advantage on MIND saves. Lasts for 1 day.
- **True Seeing:** Lets you see all things as they really are for 1 hour.
- **Word of Recall:** Teleports you and 5 allies to the church or temple of your deity that you most recently visited.

7TH-LEVEL DIVINE SPELLS

- **Divine Word:** All enemies in earshot are banished to their home plane (if extraplanar), or suffer an effect dependent upon their current HP (50- HP, deafened for [50 minus current HP] minutes; 30- HP, blinded, deafened and stunned 1 hour; 20- HP, killed instantly.)
- **Etherealness:** 1 creature becomes ethereal. +1 creature for every spell level above 7th.
- **Fire Storm:** In ten 10-ft. Cubes all creatures take 7d10 fire damage. Unattended objects catch fire.
- **Plane Shift:** You and 8 willing creatures teleport to another plane. Alternatively, on a spell attack a hostile creature is teleported to the plane of your choice.
- **Regenerate:** Subject's severed limbs grow back, and regenerates 4d8 + 15 HP per round for 1 hour.
- **Resurrection:** Restore 1 HP to someone who was dead for less than a century.

8TH-LEVEL DIVINE SPELLS

- **Antimagic Field:** Negates magic within 10 ft. for 1 hour (concentration.)
- **Control Weather:** Change current weather for 8 hours (concentration.)
- **Earthquake:** Cause an earthquake in a 100-ft radius, damaging structures and creating dangerous fissures. If any large structure falls, it causes 5d6 bludgeoning damage.
- **Holy Aura:** In a 30 ft. radius, allies have advantage on saving throws, enemies have disadvantage on attacks and fiends and undead are blinded.

9TH-LEVEL DIVINE SPELLS

- **Astral Projection:** Projects you and 8 companions onto Astral Plane.
- **Gate:** Connects two planes for travel or summoning. Open for 1 minute (concentration.)
- **Mass Heal:** Heal up to 700 hp to any creatures in range (divided to taste); also cured of all diseases, blindness and deafness.
- **True Resurrection:** Resurrects a creature, that has died in last 200 years, with new body.

APPENDIX C: WORDS OF POWER SPELL SYSTEM

All magic requires saying two words of power: an action and a realm. Every 1st level caster starts out knowing three words of power, but must know at least one action and one realm. They learn new Words of Power every three levels (3, 6, 9, etc.)

OPTIONAL RULES

- **White and Black Magic:** Clerics draw their power from white magic, and may not use their magic to directly harm an individual. Mages draw their power from black magic and may not directly heal an individual.
- **Elemental Specialization:** At the start of a day, a caster who knows the Energy realm must choose one particular type of damage (acid, fire, etc.) For that day, they may only use the Energy realm with relation to that type of damage. Alternatively, make a caster choose a damage type upon learning Energy - their magic is only capable of interacting with that type of energy.

THE FOUR ACTIONS

- **Enhance** (augeo): Strengthen, Heal, Enlarge, Repair, Sharpen, etc.
- **Diminish** (infirmio): Weaken, Damage, Injure, Reduce, Break, Dull, Deteriorate, etc.
- **Communicate With** (defero): Sense, Read, Seek, Inform, Determine, Understand, etc.
- **Control** (tempero): Shape, Hold, Command, Form, Direct, Dictate, etc. (Control can only be learned after all other actions have been learned.)

THE FIVE REALMS

- **Body** (corpus): Bodies of living things, plants.
- **Mind** (mentus): The thinking, feeling and conscious part of an entity.
- **Spirit** (animus): Essence or soul (Spirit can only be learned after you have at least three Realms and three Actions.)
- **Energy** (navitas): Fire, liquid water, air, magic, electricity, and (optionally) time.
- **Matter** (materia): Solid, mindless material like stone, ice, metal, wood, leather, paper, etc.

If the caster is just trying to damage another creature, the caster makes a magic attack vs. AC. Otherwise, the creature must make a saving throw vs. the caster's spell DC. (The appropriate saving throw is decided by the GM. For example, dodging a fireball might be DEX, while resisting the effects of mind control might be MIND.)

Damage and healing starts at 3d6 at spell level 1, and increases by 3d6 every spell level.

For **other effects** besides simple damage and healing, roll damage starting at 2d6 at spell level 1, and increasing by 2d6 every spell level.

- If the target fails their saving throw, and their current HP is less than the damage rolled, they are instantly affected by the spell but take no damage.
- If the target fails their saving throw, and their current HP is greater than the damage rolled then they take the damage rolled but are not affected by the spell.
- If the target succeeds on their saving throw, they take half the damage rolled.

Positive effects used on willing targets bypass the need for saving throws, and immediately take effect. A creature can only be transformed into something of equal or lesser CR/level to themselves.

Duration: Spells that affect inanimate objects are generally permanent; an enlarged pebble will stay large, a broken belt will stay mended. Magically created fires, etc, will die down naturally. Living creatures will remain affected by a spell for 1 round per spell level of the spell that affected them. A caster may concentrate on a spell in order to keep the spell active longer. While concentrating, a caster may not cast any spells besides simple damage and healing spells or cantrips.

APPENDIX D: MAGIC ITEMS

To quickly make magic items, decide between a **spell item** which reproduces a spell from Appendices B or C, or a **bonus item** which provides a +1 to +3 bonus to attack and damage rolls (weapons), or AC (armor and shields.) All bonus items, and some spell items require **attunement slots**, which each character has 3 of.

There are three kinds of spell items:

- **Consumables:** Single use items such as potions or scrolls.
- **Renewable use** (Attunement): Contains charges that renew daily. Usually 3 charges a day, or 4 hours of effect per day.
- **Constant use** (Attunement): Provides a continuous effect.

Use the following guidelines when distributing items or estimating their price should the party try to sell them:

Rarity	Minimum Level	Value†	Spell Levels	Armor	Weapon
Common	1st	100 gp	Cantrip, 1st	-	-
Uncommon	1st	500 gp	2nd-3rd	-	+1
Rare	5th	5000 gp	4th-5th	+1	+2
Very Rare	11th	50,000 gp	6th-8th	+2	+3
Legendary	17th	500,000 gp	9th	+3	-

† Divide by 2 for renewable use, and 10 for consumables.

APPENDIX E: QUICK AND DIRTY MONSTERS

To make monsters on the fly, use the below rules:

- Choose monster's Challenge Rating.
 - HP**= (5 x CR)d8 or 20 x CR
 - AC**= 12 + prof. bonus (max 19)
 - Save DC**= 12 + prof. bonus
 - DPR** (Damage Per Round)= 8 + (6 x CR)
 - Atk. Bonus**= 3 + prof. bonus
 - Prof. Bonus**= Treat CR as level, and use proficiency bonus indicated in Advancement.
- Adjust offensive (save DC, DPR, atk. bonus) and defensive stats (AC, HP) as desired. Treat the monster as having a higher CR for offensive or defensive stats. For every one CR you move up, you should move down one CR in the opposite kind of stat.
- Choose a monster template. ("X DPR dmg", means "do X times DPR damage".)
 - Aberration**: multiattack (two tentacles), tentacle (0.5 DPR dmg, STR save or paralyzed. If target is paralyzed and damage reduces target to 0 HP, target's brain is eaten.)
 - Beast**: multiattack (claw and bite), claw (0.5 DPR dmg), bite (0.5 DPR dmg)
 - Draconic**: breath weapon (DPR dmg, DEX save to avoid), bite (0.5 DPR dmg)
 - Elemental**: smash (0.6 DPR dmg), death throes (when creature dies, make STR save or take 0.6 DPR dmg)
 - Fey**: multiattack (two attacks), shillelagh/shortbow (0.5 DPR dmg), fey charm (MIND save or become friend for 24 hours), invisibility (lasts until it attacks or uses fey charm)
 - Fiendish**: aura (at start of turn, 0.3 DPR dmg to all within 5 feet), trident (0.6 DPR dmg), fireball (0.6 DPR dmg)
 - Giant**: punch (DPR dmg), boulder (DPR dmg)
 - Undead**: multiattack (life drain and slam), life drain (0.4 DPR, STR save or reduce victim's max HP by dmg taken), slam (0.5 DPR)
 - Vermin**: bite/sting (DPR damage, STR save or poisoned causing disadvantage on attacks), web/goop (DEX save or restrained)
- Add any special abilities desired. (e.g. Flight or spellcasting.)
- Add resistances (half damage from specific source) and immunities (not affected by specific source.) If you add many resistances or a few immunities, multiply hit points by the following values: CR 1-4 (0.5), CR 5-8 (0.7), CR 11-16 (0.8) CR 17+ (1)
 - Physical damage types**: Slashing, piercing, bludgeoning.
 - Magic damage types**: acid, fire, cold, poison, necrotic, radiant, lightning, psychic, thunder and force
 - Condition immunities**: paralyzed, poisoned, charmed, etc.

APPENDIX F: BOSS MONSTERS

A boss monster can do things that ordinary creatures can't. Using its **legendary resistance** it can treat a failed saving throw as a success a certain number of times a day, and using its **legendary actions** it can act at the end of another creature's turn a certain number of times per round. The actions it can take in this way are as follows:

- Costs 1 Action**: Make a Single Attack, Move, Cast a Cantrip
- Costs 2 Actions**: Use a Special Ability, Cast a Spell, Multiattack

To turn an ordinary monster into a boss monster, pick a tier below (rounding CR down for initial CR 1/2 and lower):

Tier	Legendary Actions/round and Resistance/day	Hit Point Increase	CR Increase
Elite	1	+20	+1
Boss	2	+30	+2
Legendary	3	+40	+3
Epic	4	+50	+4

APPENDIX G: SCALING MONSTERS

To scale monsters from the Bestiary, or the Fifth Edition Basic rules, simply determine what you want the new CR to be, and then use the below adjustments:

- Prof. Bonus** = Treat CR as level, and use proficiency bonus indicated in Advancement.
- ΔCR = New CR - Old CR
- HP** = +20 HP x ΔCR
- DPR** = +6 dmg x ΔCR (remember to split for multiattacks)
- ΔPB = New Prof. Bonus - Old Prof. Bonus.
- AC** = + ΔPB (max 19)
- Save DC** = + ΔPB
- Atk. Bonus** = + ΔPB

Deadly abilities: When scaling down creatures with fairly deadly abilities, it is also suggested that the severity of the condition is reduced. For example a medusa's petrifying gaze might just become a paralyzing gaze for a CR 1 medusa.

Multiattack: When scaling up, if the DPR increase ever (roughly) equals one of a creature's attacks consider giving the creature multiattack instead of just making their single attack twice as strong. When scaling down, if the DPR decrease ever (roughly) equals one of a creature's attacks, consider removing one of their attacks from their multiattack (or completely removing multiattack if the creature only has two attacks.)

APPENDIX H: QUICK LOOT TABLES

(Taken from [this table](#) by Justin McGuire. Used with permission.)

Use the below steps to create a treasure horde belonging to a large group of creatures, or a single powerful creature.

1) ROLL 1D6, OR PICK HOARDER TYPE

1d6	Hoard Type	Contents
1	The Sentimental	75 gold, 1 piece of art
2	The Dilettante	75 gold, 5 gems, 3 pieces of art
3	The Traveler	100 gold, 20 gems
4	The Art Collector/ Archaeologist	100 gold, 12 pieces of art
5	The Banker	500 gold
6	The Old Horder	300 gold, 15 gems, 6 pieces of art

2) MAKE ADJUSTMENTS BASED ON OWNER

Monsters CR 0-4, commoner families, and simple merchants:

- Gems are worth 10 gold (*Blue Quartz, Malachite, Tiger eye*)
- Art Items are worth 25 gold (*bone dice, gold bracelet, small mirror*)

Monsters CR 5-10, nobles, and popular businesses:

- Multiply gold by 10
- Gems are worth 100 gold (*Amber, Coral, Jade*)
- Art Items are worth 250 gold (*box of turquoise animal figurines, silk robe, silver necklace*)

Monsters CR 11-16, kings, and great wizards:

- Multiply gold by 100
- Gems are worth 1000 gold (*Emerald, Opal, Sapphire*)
- Art Items are worth 2500 gold (*gold music box, old painting, eyepatch with mock sapphire eye*)

Monsters CR 17+, liches, and old dragons

- Multiply gold by 1000
- Double the number of gems, and each one is worth 5000 gold (*Diamond, Jacinth, Ruby*)
- Triple the number of art items, and each one is worth 7500 gold (*gold child-sized sarcophagus, jade and gold dragonchess set, jeweled gold crown*)

APPENDIX I: RANDOM DUNGEON GENERATION

If you don't have much time to prepare a dungeon in advance, use the following procedure:

- Get a sheet of graph paper. (Non-graph paper will do in a pinch.)
- Grab a handful of d6s.
- Roll the dice all at once and let them land where they will on the paper. (It may help to have a box to keep the dice constrained to the paper.)
- Everywhere a d6 lands is a room. (Assign room dimensions to taste.) The number of exits from that room is based on the value of the d6:
 - 1-2: 1 exit; 3-4: 2 exits; 5-6: 3 exits.
- Add hallways connecting the rooms to taste.
- Contents:** In order to determine what to fill a room with, roll a d6:
 - 1: Empty, 2: Empty save for treasure, 3: Monster, 4: Monster and treasure, 5: Trap, 6: Special.
- Quest Goal:** Roll a d8:
 - 1. Capture, 2. Retrieve, 3. Defeat, 4. Discover, 5. Destroy, 6. Escape, 7. Find, 8. Negotiate, 9. Obtain, 10. Protect, 11. Rescue, 12. Survive
- Twists:** To keep things interesting roll up 1-3 twists that take place in the dungeon. To roll a twist, roll 2d6:
 - 1-2: NPC..., 3. Organization..., 4. Physical Event, 5. Emotional Event..., 6. Item...
 - 1: ...appears, 2: ...alters the location, 3: ...helps the party, 4-5: ...hinders the party, 6: ...changes the goal
- NPCs:** Roll the following for a random NPC.
 - Personality** (d8): 1. Cranky, 2. Jock, 3. Lazy, 4. Peppy, 5. Smug, 6. Snooty, 7. Sweet, 8. Roll twice.
 - Area of Expertise** (d4): 1. Communication, 2. Subterfuge, 3. Knowledge, 4. Physical
 - Social role** (d6): 1-3: Productivity, 4-5: Military, 6: Sovereignty
 - Motivation** (d8): 1. Love, 2. Hate, 3. Greed, 4. Ambition, 5. Fear, 6. Need, 7. Idealism, 8. Cynicism
 - Names**
 - Male prefix** (d12): 1. Alab, 2. And, 3. Bed, 4. Dun, 5. Edw, 6. Gond, 7. Mord, 8. Per, 9. Rod, 10. Theod, 11. Trist, 12. Uth
 - Male suffix** (d12): 1. ane, 2. ard, 3. astyr, 4. istair, 5. ore, 6. oryan, 7. yctor, 8. yn, 9. ynak, 10. yrick, 11. yval, 12. ywyr
 - Female prefix** (d12): 1. Barb, 2. Bellad, 3. Carol, 4. Chryst, 5. El, 6. Elyz, 7. Evel, 8. Gwyn, 9. Morg, 10. Vann, 11. Vyct, 12. Ys
 - Female suffix** (d12): 1. abyth, 2. anna, 3. ara, 4. ausa, 5. ayne, 6. olda, 7. ona, 8. orya, 9. yna, 10. yrrya, 11. yssa, 12. yvyra
 - Nickname** (d12): 1. the killer, 2. the unwashed, 3. the muse, 4. the red, 5. the needy, 6. the geezer, 7. the hunchback, 8. the knave, 9. the village idiot, 10. the pauper, 11. the mad, 12. of (location)

APPENDIX J: ADDITIONAL CLASSES

These are additional classes you might consider using in your game. They have slightly more complex mechanics than the core classes. If using these classes, using Appendix A is also recommended.

BARBARIAN

Skill and Save Proficiencies: Physical, STR

Armor Proficiencies: Shield

Unarmored Defense: Your AC equals 10 + your DEX bonus + your STR bonus.

Fast Movement: The distance of your move action is 40 ft.

Multiple Attacks: You gain an additional attack at 5th level.

Rage Damage: Your rage damage is +2. At 9th level this increases to +3, and at 16th to +4.

Rage: You may enter a 1 minute long feral rage as a bonus action, [prof. bonus] times a day. While raging you gain advantage on STR-based skill checks and STR saves, you add your rage damage to melee attack damage, and you gain damage resistance (half damage) to bludgeoning, piercing and slashing damage. In addition, you can't be frightened or charmed while raging. At 3rd level, you gain the ability to enter an **exhausting frenzy**, allowing you to make attacks as a bonus action for the duration of the rage, and upon exiting your rage giving you disadvantage on all rolls until you take a long rest.

Reckless Attack: You can choose to attack recklessly, giving you advantage on attacks but giving your opponents advantage on attacks against you until the start of your next turn.

Brutal Critical: At 9th level your critical hits do x3 damage instead of x2.

Starting Equipment: one weapon, 10 gp, a fast pack (see Equipment)

Ability Score Increases: As Caster

Improvised Weapon Damage: As Fighter

BARD

Skill and Save Proficiencies: Communication, DEX or MIND Saves (pick one)

Armor Proficiencies: Light Armor, Shields

Arcane or Divine Spellcasting (choose one): As cleric or mage, or pick six Bard spells of any level you can cast from the Fifth Edition Basic rules or SRD.

Bardic Inspiration: [MIND bonus] times per short/long rest, your stirring music inspires an ally, who can add a d6 to an ability check, skill check or saving throw of their choice (before or after the roll) in the next 10 minutes. The die becomes a d8 at 5th level, a d10 at 10th level, and a d12 at 15th level.

Jack of All Trades: You add half of your proficiency bonus to skill checks you are not proficient in.

Song of Rest: Your soothing music helps revitalize any allies who can hear you during a short rest, allowing them to regain an extra 1d6 hit points. The die becomes a d8 at 9th level, a d10 at 13th level, and a d12 at 17th level.

Starting Equipment: leather armor (+1 AC light armor), a musical instrument, one weapon (and ammunition if applicable), 15 gp, a fast pack (see Equipment)

Ability Score Increases: As Caster

Improvised Weapon Damage: As Rogue

DRUID

Skill and Save Proficiencies: Communication or Knowledge (pick one), MIND Saves

Armor Proficiencies: Medium Armor, Shields (druids will not wear armor or use shields made of metal)

Divine Spellcasting: As cleric, or pick six Druid spells of any level you can cast from the Fifth Edition Basic rules or SRD.

Wild Shape: Twice per short/long rest, you can magically assume the shape of a beast that you have seen before, whose max CR is determined by your level. Your game statistics (except for MIND) are completely replaced by the beast. The transformation lasts until you choose to end it with a bonus action, the beast's HP reaches 0, or [half level, rounded down] hours have passed.

Level	Max. CR	Limitations	Examples
1st	0	No flying or swimming speed	Weasel
2nd	1/4	No flying or swimming speed	Wolf
4th	1/2	No flying speed	Crocodile
8th	1	-	Giant Eagle

Starting Equipment: leather armor (+1 AC light armor), wooden shield, mistletoe wand, one weapon (and ammunition if applicable), 5 gp, a fast pack (see Equipment)

Ability Score Increases: As Caster

Improvised Weapon Damage: As Cleric

MONK

Skill and Save Proficiencies: Physical or Knowledge (pick one), STR or DEX Saves (pick one)

Armor Proficiencies: None

Unarmored Defense: Your AC equals 10 + your DEX bonus + your MIND bonus.

Unarmored Movement: The distance of your move action is 40 ft. At 6th level it becomes 45 ft., 10th - 50 ft., 14th - 55 ft., and 18th - 60 ft. In addition, at 9th level you can move up vertical surfaces and across liquids without falling as long as you are moving.

Multiple Attacks: You gain an additional attack at 5th level.

Martial Arts: Your unarmed attack does d4 damage, and counts as magic for the purposes of bypassing resistances and immunities. At 5th this becomes a d6, 11th a d8, and 17th a d10.

Flurry of Blows: You may use a bonus action to make two unarmed strikes. [Half level, rounded down] times per day, you may choose to add one of the following effects (DC 8 + prof. + MIND bonus to resist) if your attack hits: shove, grapple, stun (5th level), death (17th level).

Honed Body and Mind: Your training provides a number of benefits. At 4th level you get **Slow Fall**, allowing you to use a reaction to take no damage from a long fall. At 7th level your **Stillness of Mind** allows you to take an action to end a charm or fear effect on yourself. At 14th level your **Diamond Soul** grants you proficiency in every save category.

Starting Equipment: a quarterstaff, 10 darts, 5 gp, a fast pack (see Equipment)

- **Ability Score Increases:** As Caster
- **Improvised Weapon Damage:** As Rogue

PALADIN

Skill and Save Proficiencies: Physical or Communication (pick one), MIND Saves (pick one)

Armor Proficiencies: All armor, Shield

Multiple Attacks: You gain an additional attack at 5th level.

Partial Divine Spellcasting: As cleric, but with half as many magic points and only able to cast spell levels equal to 1/4 level, rounded up. As an alternative to the divine spell list pick six Paladin spells of any level you can cast from the Fifth Edition Basic rules or SRD.

Divine Sense: [MIND bonus + 1] times per short rest, you can sense nearby celestials, fiends and undead.

Divine Smite: When you hit a creature with a melee attack, you may expend magic points as if casting a spell to deal extra damage to a target. A 1st-level spell does 2d8 damage, and every spell level above that does an extra 1d8. Fiends and undead take an extra 1d8 damage on top of that.

Lay on Hands: Each long rest you get a [5 * level] hit point pool of healing power, which you can divide to taste and channel into creatures by touching them. 5 hit points from the pool can be traded in for the ability to cure one disease or poison afflicting a creature.

Starting Equipment: chain mail (+6 AC heavy armor), shield, one weapon (and ammunition if applicable), 25 gp, a fast pack (see Equipment)

Ability Score Increases: As Caster

Improvised Weapon Damage: As Fighter

RANGER

Skill and Save Proficiencies: Physical or Knowledge (pick one), STR or DEX Saves (pick one)

Armor Proficiencies: Medium Armor, Shields

Multiple Attacks: You gain an additional attack at 5th level.

At 11th level, you can use your action to make ranged attacks against any number of creatures within 10 feet of a point you can see within your weapon's range.

Superiority Dice (SD): A ranger has four superiority dice (d8) that can be spent on maneuvers, recovering on a short rest. At 9th level the dice become d10s, at 17th d12s. You also gain a superiority dice at 9th and 17th level.

Ranger Maneuvers: You have the ability to spend SD on special maneuvers. Save DCs are DC 8 + STR or DEX (your choice) + proficiency. For **attack maneuvers** describe a desired outcome (e.g. disarming foe, feinting, goading an enemy) while making an attack. If the attack hits, add SD to damage and the foe makes an appropriate saving throw or the desired outcome happens. For **reaction maneuvers** describe a reaction you are taking (e.g. parry, riposte) and the DM rules what you add/subtract your SD to (usually AC, attack, damage or enemy health) requiring an appropriate saving throw if deemed necessary.

Primeval Awareness: You can communicate simple ideas with animals, and read their basic mood and intent.

Healing Poultices: Every day you can make [Wisdom bonus] herbal poultices, which you can spend a minute applying to a creature to heal them [half level, rounded up]d6 hit points. Unused poultices expire after the day is over.

Colossus Slayer: Once per turn, when you hit a creature with a weapon attack, you deal an extra 1d8 damage.

Hunter's Defense: At 7th level when a creature hits you with an attack, you gain +4 bonus to AC against subsequent attacks from the same creature until your next turn. At 15th level, you can use your reaction to halve the damage from an attack you can see coming.

Starting Equipment: scale mail (+4 medium armor), one weapon (and ammunition if applicable), 10 gp, a fast pack (see Equipment)

Ability Score Increases: As Caster

Improvised Weapon Damage: As Fighter

OPEN GAME LICENSE

VERSION 1.0A

1. Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; (d) "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product Identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement. Not for resale. Permission granted to print or photocopy this document for personal use only.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

MULRAH: Microlite20 with Utilities Leveraging Role-playing Advancements Heuristically

MULRAH is a role-playing game that plugs indie-style rules (boxed text) into a modified Microlite20 (unboxed text), fully compatible with the Primary Fantasy SRD rules (see license).

Core Rules

Core Mechanic: Whenever the outcome of an action is uncertain, a player will roll a 20-sided die (d20) against a Difficulty Class (DC) or an opponent also rolling a d20. If the roll exceeds the DC or the opponent's roll, then the character's action succeeds.

Player Characters (PCs) start at **Level 1** with **3 Stats**, a **Skill Expertise**, a **Trait**, and **2 Keys**.

Setting-Steeped Character Creation has players build their Characters as the GM describes the recent history of the setting. During each historical period the GM demarcates, players describe what their character was doing and pick one of 4 aspects (Skill Expertise, Trait, 2 Keys) their Character gained as a result of their activities.

Stats include Strength (STR), Dexterity (DEX) and Mind (MIND). To determine, roll 2d4-4, assign to a Stat, and then repeat. (To convert from the Primary Fantasy SRD rules, use the relevant Ability Score's bonus. From older versions, Stat = (Relevant Ability Score - 10)/2.) Secondary Stats are Hit Points (HP = 10 + (STR + 3) x Level) and Armor Class (AC = 10 + DEX + Armor Bonus).

Skills are the basis for non-combat rolls and include Physical, Subterfuge, Knowledge, Communication, and Survival. Each PC starts with Expertise in one Skill, providing a +4 bonus.

- **Skill Rank** = 4 if Expert + Bonus from Leveling (see below)
- **Skill Roll** = d20 + Skill Rank + applicable Stat + situation mods
- **Saving Throws:** Skill Rolls replace "saving throws." Use Physical + STR or DEX for Fortitude and Reflex saves. Saving against magic (Will) is usually MIND + Level.

Setting Stakes has the GM and the player agree on possible outcomes *before* making any Skill Roll. Usually, the successful outcome is simply whatever the player is trying to do, but failure will require a little more thought and should always be interesting. For example, failing a roll to climb a wall could mean the Character takes damage from falling or loses her grappling hook, but still makes it to the top.

Traits include various bonuses and abilities. Characters each get a Trait.

- **Brute Force:** +1 to hit and damage; add +1 to either every other Level. Can use heavy armor. (Optional: Mark an opponent, who is at -1 to attacks against other foes.)
- **Sneak Attack** adds your Character's Subterfuge Skill Rank to the damage of her first attack, if she successfully Sneaks up on a foe (usually sub+DEX, but depends on situation). Impossible if wearing a shield or medium/heavy armor.
- **Dextrous Shot:** +1 to hit and damage with ranged weapons; only -1 using multiple weapons.

Keys are goals for which characters gain Experience Points (XP) when they accomplish them. Each Character has two Keys and may (optionally) change one every 5th Level. Three Keys inspired by various editions of the Primary Fantasy SRD are below. See Sweet20 for more.

- **The Key of Glittering Gold** gives 1 XP for every 100 gp the Character gains, divided by his Level.

- **The Key of Bloodlust** garners 1 XP for every battle won and 2 XP for defeating someone of higher Level or Hit Dice (HD).
- **Keys of Alignment** (Law vs. Chaos, Good vs. Evil) act like the Key of Bloodlust but earn double the XP for defeating foes of the opposite Alignment and none for those of the same Alignment.

Level Advancement occurs when the XP equals 20. Reset XP to 0 after advancing. With a new Level, gain (STR+3) HP. Every 3 Levels, a Character gains a Leveling Bonus, which allows them to add +1 to all Skills, +1 to a Stat, *or* gain Expertise (+4) in one Skill.

Optional Leveling Bonuses (Starting at 6th Level)

- **Rerolls:** Reroll up to three times per game session.
- **Heroic Surge:** Once per encounter, a Character can add his Level to any roll; once per day, he can add twice his Level.

Combat

For each round, each Character takes one action (move, attack, cast a spell, etc.) when it is her turn. Attack Bonus determines Initiative.

- **Melee** Attack Bonus = STR + Level; vs opponent's AC
- **Missile** Attack Bonus = DEX + Level; vs opponent's AC
- **Magic** Attack Bonus = MIND + Level; vs opponent's Will or AC

Multiple Attacks: If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

Light Weapons: When unarmed or using light weapons, you may use DEX instead of STR and attack with 2 weapons (or unarmed) in a round with -2 penalty on all attack rolls. Rapiers are light weapons, but you cannot wield two at once.

Damage: Add STR to Melee damage, x2 for 2-handed weapons. Natural 20 on an Attack Roll does double damage. If HP reach 0, unconscious and near death. -(10 + STRx2) HP = death.

Healing: All characters recover HP lost due to wounds at a rate equal to 1/2 their level (round up) per night of rest.

Final Stand kicks in at the player's request when her Character reaches 0 HP. Upon regaining consciousness, her Character remains at 1 HP until a final, climactic encounter that the player chooses as her Character's "final stand." During this encounter, the Character instantly regains all HP and doubles all roll bonuses. At the end of the encounter, the player must retire the Character in whatever manner she sees fit.

Balancing Combat & Non-Combat

Optional rules for Skill Challenges and Simple Combat add complexity to non-combat situations and simplify combat, respectively.

Skill Challenges are used when the whole party works toward a common goal. Success requires that players accumulate (2 + 2 x Complexity) successful Skill Rolls before 3 failed rolls. GM selects Complexity (1 to 5). DC = EL + Base (5 - Easy, 10 - Medium, 15 - Hard). **The Key of Challenge** provides 1/2 XP per Complexity (round up).

Simple Combat: Players announce their Character's goals for the entire combat. By default their opponents will try to incapacitate the PCs, unless weakened to 1/4 HP (or total HD for groups), at which point they will surrender or flee. Then, each individual Character and group of

similar opponents make one Attack Roll (d20) that is extrapolated across the entire combat with bonuses based on the type of attack (see below). Damage in Simple Combat equals 1/2 the maximum die roll (rounded down) plus any bonuses. The GM describes the extrapolated outcome, which stands unless the players opt for the full, turn-based combat described previously. XP from Simple Combat is halved.

Base Fantasy Setting Module

The rules below provide a baseline for a fantasy game and are common to both the default Microlite20 setting and the World Beyond.

Magical Traits allow Characters to use magic and may be selected instead of a Combat Trait in magical settings. The DC for undoing or resisting any spell is 10 + Caster Level + MIND. *Doubling the duration of a spell costs an additional 2 HP, adding 50% to its damage costs another 4 HP, and doubling its area of effect costs 6 HP.*

Divine Magics (Trait) provide access to Divine Spells of 1/2 the caster's Level and Turning Undead. Each spell costs HP = 1 + 2 x the Spell's Level, a loss that is healed completely **only** after 8 hours rest. A player-chosen "signature spell" for each Spell Level above 0th costs 1 less HP. Turn Undead requires a successful Magic Attack and can be used (2 + Level + MIND) times per day. DC is the current HPs of the Undead, destroyed if DC exceeded by 10. Casters cannot use two weapons at once.

Classes are pre-determined combinations of Traits, Skill Expertises, and 30 gp of Equipment.

- **Fighter:** Brute Force, Physical; Vial of Holy Water, 5 gp
- **Rogue:** Sneak Attack, Subterfuge; Thieves Tools
- **Ranger:** Dextrous Shot, Survival; Healer's Kit, -20 gp
- **Cleric:** Divine Spells, Communication; Silver Holy Symbol, 5 gp

Equipment is selected by picking a Fast Pack Card and additional items from the Equipment list with 1d4 x 25 gold pieces. Characters can wear light/medium armor and use a shield. Armor bonuses: Light (Leather) +2 AC, Medium (Chain) +4 AC, Heavy (Plate) +6 AC, Shield +1 AC.

Fantasy Setting Module 1: The World Beyond

All PCs in the World Beyond must select a Race, Religion, and Nationality. Any combination is possible, but some are more common than others. Races besides Humans and Goblins are rare and at -1 to Skills.

- **Humans** have spread their religion through out most of Ytarria. Three Christian nations (Megalos, Caithness, Cardiel, and Araterre) and two Muslim nations--al-Wazif (Sunni) and al-Haz (Shi'ite)--exist. Judaism is the third most common religion, but Jews are spread among the six kingdoms. The Megalan Empire's closest rival is al-Wazif, with Cardiel being a much-disputed realm with a diverse, relatively egalitarian society. Caithness is a sparsely populated frontier with weak mana (and thus no magical characters) to the West, and Araterre is an island nation of seafarers to the South.
- **Goblins** (-2 STR, +1 DEX, +1 MIND, +1 Skills) are the second most populous Race on Yrth and comprise a substantial portion of the mercantile class in most cities, particularly in southern Megalos (Yibyorak and Sho'joor). Most have assimilated to the prevailing religion of the surrounding Humans (Christianity, Islam, Judaism), but a rare few follow cult deities of their former world.
- **Twadyn/"Gnomes"** and **Halflings** (+1 DEX) are surface-dwelling herders or farmers. They live peacefully alongside Humans and Goblins, usually in rural areas. Many have difficulty distinguishing

between the Elder Race of Gnomes and Halfling newcomers. The former tends to live near their Dwarven cousins in Zarak and worship the ancient elemental deities Hubabeh (Air) and Hsaragg (Water), while the latter hail from the slightly warmer, weed-growing climates of Megalos, where Christianity is prevalent.

- **Reptile-Men** (+2 STR, -1 MIND) are most prevalent in the Steppes of Arachine but can be found in any plain or swamp area. Little is known of the religious ways of most Reptile Men. Descendants of those who assimilated with Human nomads in the early days of Islam live alongside Humans in the Muslim nations.

4x4 Magic is based on an alternative magic system from the Microlite20 website. All spells are cast by combining two Words of Power, one from the Four Actions and one from the Four Realms, and making a successful Magic Attack (Level+MIND) against a DC of the opponent's Will (Level+MIND) or AC + 5 per Spell Level. A willing target, the caster himself, and human-sized inanimate objects have a DC of 10, which can vary by size, mass, or other factor.

A spell's Level determines the extent of its effect and its impact on the caster. A 1st Level Spell has 1d6 (HP, 10', etc.) extent of impact, which doubles for every additional Spell Level. Making an effect permanent adds 25 to the DC. A spell causes (1 + 2 x Spell Level) HP damage to the caster, which is recovered only through 8 hours of rest.

The Four Actions

- **Enhance:** Strengthen, Heal, Enlarge, Repair, Sharpen, etc.
- **Diminish:** Weaken, Damage, Injure, Reduce, Break, etc.
- **Communicate with:** Sense, Read, Seek, Understand, etc.
- **Control:** Shape, Hold, Command, Form, Direct, Dictate, etc. All other Actions are pre-requisites for Control.

The Four Realms (Deity)

- **Life** (Hsaragg): Living body of humanoids, animals, plants; water.
- **Mind** (Hu-Babeh): That which normally inhabits/animates a body
- **Energy** (Mulrah): Fire, magic, (electricity, etc.), time.
- **Matter** (Dyn-Diyn): Solid material with no mind - stone, metal, wood, leather, paper, (plastic, etc.)

Pagan/Dark Magics (Trait) provide access to the 4x4 magic system, but cannot be used while wearing armor. Pagan priests are tolerated but looked down upon in most regions. They know their deity's Word of Power and one Action word at 1st Level. They can learn an additional Action word or gain a +5 bonus to a Word they already know at 3rd, 6th, and 10th Levels, at which point their progress stops, unless they become a Wizard of Grimshire. Practitioners of Dark Magic may learn a new Realm instead of a new Action, but are shunned or persecuted in nearly every society.

Alchemy (Trait) is a Goblin method of accessing Arcane Spells. With a successful roll of d20+Level+MIND vs a DC of 10 + 5 x Spell Level, an Alchemist can create potions for spells of a Spell Level up to 1/2 the Alchemist's Level. These potions can be used up to 24 hours after their creation; creating a potion with no expiration adds 20 to the DC. Each subsequent potion created in a day adds +2 to the DC.

Classes are optional in the World Beyond. Players may select a Class below or pick a different combination of a Trait, a Skill Expertise, and 30 gp of Equipment.

- **Alchemist:** Alchemy, Knowledge; Alchemist's Ingredients
- **Pagan Priest:** Pagan Magics, Communication; Holy Symbol, 5 gp
- **Witch/Warlock:** Dark Magics, Knowledge; Wand, staff, or similar.

Fantasy Setting Module 2: Microlite20 Expert

The default Microlite20 setting provides rules for Mages who use Arcane Magic and uses four Races (Humans, Dwarves, Elves, Halflings). The rules below include these options as well as those from the Expert Rules.

Magical Traits

- **Arcane Magic** works the same as Divine Magics but provides access to Arcane Spells and cannot be used while wearing armor.
- **Illusionist Magic** works the same as Arcane Magic, except for Illusionist Spells.
- **Druid Magic** provides use of Druid Spells but armor cannot have metal. Instead of the Turn Undead ability, Druid Magic provides its users with immunity to woodland fey, the ability to Pass Without Trace at 3rd Level, and shapeshifting to a small/medium animal up to 3 times per day at 7th Level. When shapeshifting back to original form, the user can heal 2 HP per level.
- **Bardic Song** provides use of Druid/Illusionist Spells to a Character reaching the 6th Level as if she were 1st Level. It also counters sound-based effects within a 30 ft. radius and Charm Person or Remove Fear 3 times per day.
- **Blessed Warrior:** Immunity to disease, +1 to all Saving Throws per 5 Levels, Detect Evil within 60 ft., heal 2 HP per Level per day.

Races: -1 Skill Rank in all Skills for Non-Humans, Elves +1 MIND, Dwarves +1 STR, Halflings +1 DEX; Gnomes +1 DEX or MIND; Half-Orcs +2 STR and -1 MIND; Half-Elves +1 DEX or +1 Skills; Lizard-Men +1 STR, +1 DEX, -1 MIND.

Classes are required in standard Microlite20.

- **Mage:** Arcane Magic, Knowledge
- **Paladin:** Blessed Warrior, Communication
- **Illusionist:** Illusionist Magic, Communication
- **Druid:** Druid Magic, Survival
- **Bard:** Bardic Song, Communication and Subterfuge/Knowledge

1. Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product Identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content; (h) "You" or "Your" means the licensee in terms of this agreement.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title,

the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

MULRAH: Microlite20 with Utilities Leveraging Role-playing Advancements Heuristically

MULRAH is a role-playing game that plugs indie-style rules (boxed text) into a modified Microlite20 (unboxed text), fully compatible with the Primary Fantasy SRD rules (see license). Optional rules/setting Modules can be grafted onto the Core Rules. Brackets [] indicate Endnotes.

Core Rules

Core Mechanic: Whenever the outcome of a task or conflict is uncertain, a player will roll a 20-sided die (d20) plus modifiers against a Difficulty Class (DC) for a Task or an opponent's d20 in a Conflict. Exceeding the DC or the opponent's roll(s) indicates success. Modifiers usually include the relevant Stat, bonuses from Skills/Abilities/Aspects, and situational bonuses/penalties, all described below.

Player Characters (PCs) start at **Level 1** with **3 Stats**, a **Skill Expertise**, **2 Abilities**, **1 Aspect** (optional), and **2 Keys**.

Setting-Based Character Creation has players build their Characters as the GM describes the recent history of the setting. During each historical period the GM demarcates, players describe what their character was doing and pick one of 5 traits (Skill Expertise, 2 Abilities, 2 Keys) their Character gained as a result of their activities.

Stats are Strength (STR), Dexterity (DEX) and Mind (MIND). Roll 2d4-4, assign to a Stat, and then repeat [1]. Secondary Stats are:

- **Hit Points (HP)** = d8 + STR per Level. If HP reach 0, the Character falls unconscious and must make a Fortitude Save every round to avoid death. HP lost due to wounds recovers at a rate equal to 1/2 Character Level (round up) per night of rest.

- **Sanity Points (SP)** = 8 + MIND + Level/2. Whenever a Character has a horrific experience, he must roll lower than his SP on a d20 or lose a SP. When SP reach 0, he goes permanently insane.

Final Stand kicks in at the player's request when her Character reaches 0 HP. Upon regaining consciousness, her Character remains at 1 HP and recedes, unable to attack or be harmed, into the background. In a final, climactic encounter that the player chooses as her Character's "final stand," the Character instantly regains all HP and doubles all roll bonuses. At the end of the encounter, the Character must retire.

Skills provide a +4 bonus to any related Tasks. Each Character can have one Skill, reflecting his background. Players are free to create a Skill based on any profession, craft, or upbringing, but the following four are the default starting points, each with a handful of associated Skills from the Primary Fantasy SRD and other sources. [2] Tally failures in each Skill, and, at the end of each session, roll a d20 against the accumulated tally. If the roll is less than or equal to the tally, then the Character has learned from the failures and gains +1 in that Skill; reset tally.

MULRAH Skill	Primary SRD or Other Skills (Stat)
Knowledge	Appraise (MIND), Decipher Script (MIND), Knowledge (MIND; pick type), Literacy (MIND), Research (MIND)
Survival	Handle Animal (MIND/STR), Heal (MIND), Ride (DEX), Swim (STR), Survival (MIND)
Physical	Balance (DEX), Climb (DEX/STR), Jump (DEX/STR), Swim (STR), Tumble (DEX)
Subterfuge	Disable Device (MIND/DEX), Escape Artist (DEX/STR), Forgery (DEX), Gambling (MIND) Open Lock (DEX), Sleight of Hand (DEX)

Story-oriented or "old school" groups may wish to ignore rolling dice to determine the outcome of discrete Tasks, focusing instead on Conflicts (below) or player skill (e.g., describing exactly how and where you are

looking for traps rather than just rolling for it), respectively. If you are using Skills, the following two options can substantially enhance their enactment in the game.

- **Stakes:** Failing at a Task leads to d6 Damage or a Mild Wound (see below) *but not necessarily failure of the task itself*. A Natural 1 causes double Damage or a Moderate Wound. Failing a roll to climb a wall could mean the Character takes damage or loses her grappling hook, but still makes it to the top.
- **Skill Challenges** are useful for engaging the entire party in striving toward a common goal. Success requires that players complete (2 + 2 x Complexity) Tasks successfully before failing 3 times. GM selects Complexity (1 to 5). DC = EL + Base (5 - Easy, 10 - Medium, 15 - Hard).

Conflicts begin whenever one Character attempts to avoid, influence, change, or harm another Character. The group agrees upon what the Conflict will decide; these are the Stakes. Some Conflicts are best approached with prior Preparation (sneaking, scouting). Many Conflicts then start with Talking (bluffing, persuading, taunting, etc.), but can also start with or **Escalate** into Physical conflict (intimidating, shoving, punching, etc.) or even Combat (fighting with weapons). To resolve a Conflict, the opposing sides roll a d20, add relevant Stats, Abilities (see below), and situational modifiers. Unless one side chooses to Escalate or begin Pain (see below), the higher total wins the Stakes, and ties go against the instigator.

Conflicts between two or more characters are resolved with a quick d20 roll for each side (not each character), plus the relevant Stat and Ability (see below) of the lead character as well any situational modifiers based on help from other characters, the environment, etc. The side with the higher total wins, and ties go against the instigator. This applies to any kind of conflict (avoiding, talking, physical, combat). The lead character of a side that loses by 4 or more must take a Consequence (see below) and, when appropriate, Damage to Hit Points (based on (the weapon type + STR - opponent's Armor Bonus) x 2 for 2-handed weapons or if snuck up on). Conflicts can be extended in two ways:

- 1 **Escalation:** Any character can shift from one type of four types of conflict to another. All d20s are immediately rerolled, and this character becomes the instigator. The types of Conflict include Preparation (sneaking, scouting), Talking (bluffing, persuading, taunting, etc.), Physical conflict (intimidating, shoving, punching, etc.), and Combat (fighting with weapons).
- 2 **Pain:** Only at a player's (not the GM's) request, a Conflict can be handled in a task-by-task manner. In this case, each individual rolls a d20 for each action, modified as above but compared to a static target number of 10 + the opponent's relevant modifiers. Success costs the opponent a Consequence *or*, when appropriate, damage to Hit Points.

Abilities provide bonuses during Conflicts and improve as a Character Levels. Players select two Abilities for each Character by combining a Conflict Type with a Style. A Character who takes the exact same Ability twice can either have the bonuses stack or gain an extra action per Round, as long as that action is related to the Ability.

Conflict Type: Any Character participate in any type of Conflict, but each Character has one or two areas in which she excels.

1. **Stealth:** Notice, avoid, or otherwise minimize the risk of a Conflict before it begins; includes Disguise, Hide, Listen, Move Silently, Spot, Search, etc.
2. **Communication:** Talk through a Conflict; includes Diplomacy, Intimidation, persuasion, taunting, etc.

3. **Brawling:** Fighting without weapons; includes brawling, kicking, punching, wrestling, etc.
4. **Combat:** Fighting with weapons; includes swords, knives, bows, shields, etc.

Style indicates the type of bonus the Character gets.

- **Aggressor:** Add Level to all Attacks.
- **Defender:** Add Level to all Defense.
- **Specialist:** Select a specific discipline within the Conflict Type (e.g., Taunting, Kung Fu, Crossbows, etc.) and add Level to both Attacks and Defense only when engaged in this specific Conflict.
- **Opportunist:** Reroll up to Level/2 times per game session.
- **Hero:** Add Level to any roll once per Conflict; add twice Level to any roll once per game session.

Aspects are non-mechanical parts of a Character that a player wants to influence the story. An epithet, quote, relationship, possession, or anything else can be an Aspect. Characters start with one Aspect in the 1st Level and can gain more with Leveling Bonuses. For each Aspect, a player gets a Story Point (perhaps measured with a poker chip or other counter) at the beginning of each session. At any time during the session, the player may invoke an Aspect prior to any die roll by describing how it comes into play and spending a Story Point, thereby gaining a +4 to the roll. The GM or any other player may also invoke that Character's Aspect (s). If the player refuses, then she must spend a Story Point; if she accepts, then she gains a Story Point.

Consequences are types of Aspects and can be taken (up to four at once) instead of any major hit to HP or SP. Alternatively, they can be a -1 to a Stat of the player's choice.

- **1st Consequence** = Mild Wound or Short-Term Insanity. can absorb loss of up to 1/4 HP or SP, fades upon winning a Conflict.
- **2nd Consequence** = Moderate Wound or Long-Term Insanity, can absorb loss of up to 1/2 HP or SP, fades with a night's rest.
- **3rd Consequence** = Severe Wound or Long-Term Insanity, requiring 2d6-4 weeks to heal; 0 = 6 days, -1 = 5 days, -2 = 4 days, -3 = 3 days; can absorb loss up to 3/4 HP or SP.
- **4th Consequence** = Permanent Wound or Indefinite Insanity, only removed with magic or other extraordinary measure.

Keys are goals for which characters gain Experience Points (XP) when they accomplish them. Each Character has two Keys and may (optionally) change one every 5th Level. Three Keys inspired by various editions of the Primary Fantasy SRD are below. See Sweet20 for more.

- **The Key of Glittering Gold** gives 1 XP for every 100 gp the Character gains, divided by his Level.
 - **The Key of Conquest** garners 1 XP for each HD or Level of opponent defeated plus 1 XP for each doubling of foes. Divide sum by Character's Level.
 - **Keys of Alignment** (Law vs. Chaos, Good vs. Evil) act like the Key of Bloodlust but earn double the XP for defeating foes of the opposite Alignment and none for those of the same Alignment.
- **The Key of Conflict** provides 1 XP for every Consequence taken over the course of a session.
 - **The Key of Challenge** provides 1 XP for every Complexity Level in each Skill Challenge the PCs overcome.

Level Advancement occurs when the XP equals 15 [4]. Reset XP to 0 after advancing. With a new Level, gain (d8+STR) HP. Every 3 Levels, a Character gains a **Leveling Bonus**, which allows him to add +1 to a Stat or gain a new Aspect. A Character can save her Leveling Bonuses and then use two of them (at 6th, 12th, etc. Level) to gain a new Ability, essentially "multi-classing."

Magic

Divine Magics (Ability) provide access to Divine Spells of 1/2 the caster's Level and Turning Undead. Each spell costs HP = 1 + 2 x the Spell's Level, a loss that can be healed **only** after 8 hours rest. A player-chosen "signature spell" for each Spell Level above 0th costs 1 less HP. Turn Undead requires a successful Magic Attack and can be used (2 + Level + MIND) times per day. DC is the current HPs of the Undead, destroyed if DC exceeded by 10. Casters cannot use two weapons at once.

Alchemy (Ability) is a Goblin method of accessing Arcane Spells. With access to water, Alchemist's Ingredients (5 gp per use per Level), and a successful roll of d20+Level+MIND vs a DC of 10 + 5 x Spell Level, an Alchemist can create potions for spells of a Spell Level up to 1/2 the Alchemist's Level. These potions can be used up to 24 hours after their creation; creating a potion with no expiration adds 25 to the DC. Each subsequent potion created in a day adds +2 to the DC. Gain +2 bonus to potion creation every 3rd Level. Goblins only.

The World Beyond

All PCs in the World Beyond must select a Race, Religion, and Nationality. Races besides Humans/Goblins are rare and at -1 to Skills.

- **Humans** have spread their religion through out most of Ytarria. Three Christian nations (Megalos, Caithness, Cardiel, and Araterre) and two Muslim nations--al-Wazif (Sunni) and al-Haz (Shi'ite)--exist. Judaism is the third most common religion, but Jews are spread among the six kingdoms. The Megalan Empire's closest rival is al-Wazif, with Cardiel being a much-disputed realm with a diverse, relatively egalitarian society. Caithness is a sparsely populated frontier with weak mana (and thus no magical characters) to the West, and Araterre is an island nation of seafarers to the South.
- **Goblins** (-2 STR, +1 DEX, +1 MIND, +1 Skills) are the second most populous Race on Yrth and comprise a substantial portion of the mercantile class in most cities, particularly in southern Megalos (Yibyorak and Sho'joor). Most have assimilated to the prevailing religion of the surrounding Humans (Christianity, Islam, Judaism), but a rare few follow cult deities of their former world.
- **Twadyn/"Gnomes" and Halflings** (+1 DEX) are surface-dwelling herders or farmers. They live peacefully alongside Humans and Goblins, usually in rural areas. Many have difficulty distinguishing between the Elder Race of Gnomes and Halfling newcomers. The former tends to live near their Dwarven cousins in Zarak and worship the ancient elemental deities Hubabeh (Air) and Hsaragg (Water), while the latter hail from the slightly warmer, weed-growing climates of Megalos, where Christianity is prevalent.
- **Reptile-Men** (+2 STR, -1 MIND) are most prevalent in the Steppes of Arachine but can be found in any plain or swamp area. Little is known of the religious ways of most Reptile Men. Descendants of those who assimilated with Human nomads in the early days of Islam live alongside Humans in the Muslim nations.

Endnotes

1. To convert from the Primary Fantasy SRD rules, use the relevant Ability Score's bonus. From older versions, Stat = (Relevant Ability Score - 10)/2.
2. Note that MULRAH splits Microlite20's Subterfuge Skill between the Subterfuge Skill and the Stealth Ability. Microlite20's Communication Skill is now an Ability.
3. In MULRAH, anybody can try to sneak up on someone, but only those with Stealth will have any real success.
4. This amount is calibrated to the XP amounts (divided by 100) in Erin Smale's "Building the Perfect Class." All Characters have the same progression of Hit Points (d8 per Level = 2 XP) and weapon/armor restrictions; none progress in "Saving Throws" or Combat outside of Abilities. Abilities are essentially a Combat Progression of +1/Level, worth 4 XP, slightly more than Smale's Special I/II abilities. Thieves' Skills, which include about twice the number of skills as a MULRAH Skill, are worth 4 XP in Smale's calculation, so MULRAH Skills count for just 2 XP. Leveling Bonuses are worth 4 XP.

OPEN GAME LICENSE Version 1.0a

1. Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.
2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.
3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.
4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.
5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.
6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.
7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.
8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.
9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.
10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.
11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.
12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.
13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.
14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

MULRAH: Microlite20 with Utilities Leveraging Role-playing Advancements Heuristically

MULRAH is a role-playing game that plugs indie-style rules into a modified Microlite20, fully compatible with the Primary Fantasy SRD rules (see license). Brackets [] indicate Notes.

The Basics

Apart from the optional rules (boxed text), most of this section is similar to Microlite20. Stats and Skill are a little different, and how Characters get Experience Points (XP) has a name (Keys) and can vary. With a couple adjustments, you could play MULRAH with these rules alone.

Core Mechanic: Whenever the outcome of a task is uncertain, a player will roll a 20-sided die (d20) plus modifiers (Stats, Skills) against a Difficulty Class (DC). Exceeding the DC indicates success.

Player Characters (PCs) start at **Level 1** with **3 Stats**, **Hit Points (HP)**, a **Skill Expertise**, and **2 Keys**.

Stats are **Strength (STR)**, **Dexterity (DEX)** and **Mind (MIND)**. Roll 2d4-4, assign to a Stat, and then repeat [1]. $HP = d8 + STR$ per Level. If HP reach 0, the Character falls unconscious and must roll lower than $10 + 2 \times STR$ every round to avoid death. HP lost due to wounds recovers at a rate equal to $1/2$ Character Level (round up) per night rest.

Skills [5] provide a +4 bonus to any related Task. Each Character can have one Skill, reflecting his background. Players are free to create a Skill based on any profession, craft, or upbringing, but the following four are the default starting points, each with a handful of associated Skills from the Primary Fantasy SRD and other sources. [2]

MULRAH Skill	Primary SRD or Other Skills (Stat)
Knowledge	Appraise (MIND), Decipher Script (MIND), Knowledge (MIND; pick type), Literacy (MIND), Research (MIND)
Survival	Handle Animal (MIND/STR), Heal (MIND), Ride (DEX), Swim (STR), Survival (MIND)
Physical	Balance (DEX), Climb (DEX/STR), Jump (DEX/STR), Swim (STR), Tumble (DEX)
Subterfuge	Disable Device (MIND/DEX), Escape Artist (DEX/STR), Forgery (DEX), Gambling (MIND) Open Lock (DEX), Sleight of Hand (DEX)

Optional Rules for Skills

Improving Skills: Tally failures in each Skill, and, at the end of each session, roll a d20 against the accumulated tally. If the roll is less than or equal to the tally, then the Character has learned from the failures, gains +1 in that Skill, and resets the tally.

Stakes: Failing at a Task leads to d6 loss to HP per increment of failure or a Minor Consequence (see below) *but not necessarily failure of the task itself*. Failing a roll to climb a wall could mean the Character takes damage or loses her grappling hook, but still makes it to the top.

Skill Challenges are useful for engaging the entire party in a common goal. Success requires that players complete $(2 + 2 \times \text{Complexity})$ Tasks successfully before failing 3 times. GM selects Complexity (1 to 5). $DC = EL + \text{Base}$ (5 - Easy, 10 - Medium, 15 - Hard).

Level Advancement occurs when XP equals 15 [4]. Reset XP to 0 after advancing. With a new Level, gain $(d8+STR)$ HP. Every 5 Levels, a Character gains a **Leveling Bonus**, which allows him to add +1 to a Stat or gain a new Aspect (see below). A Character can save her Leveling Bonuses and then use two of them (at 10th, 20th, etc. Level) to gain a new Ability (see below), essentially "multi-classing."

Keys are goals for which characters gain XP. By default, each Character has the **Key of Conquest**, which garners 1 XP per Hit Dice (HD) or Levels of opponent defeated plus 1 XP for each doubling of foes. Divide sum by Character's Level. Each Character may also pick an additional Key from the list of optional ones below. See Sweet20 for more.

- **The Key of Glittering Gold** gives 1 XP for every 100 gp the Character gains, divided by his Level.
- **Keys of Alignment** (Law vs. Chaos, Good vs. Evil) act like the Key of Conquest but earn double the XP for defeating foes of the opposite Alignment and none for those of the same Alignment.
- **The Key of Conflict** provides 1 XP for every Consequence (see below) taken over the course of a session.
- **The Key of Challenge** provides 1 XP for every Complexity Level in each Skill Challenge the PCs overcome.

Conflicts

Conflict is where many "indie" games diverge heavily from traditional RPGs, and MULRAH is no different. In Microlite20, Combat is the primary form of Conflict and has its own set of rules. In MULRAH, Combat is just one type of Conflict and is governed (mostly) by the same overarching rules that resolve other forms of Conflict.

Conflict Resolution: Conflicts begin whenever one Character attempts to avoid, influence, change, or harm another Character. The players and GM agree upon what the Conflict will decide; these are the Stakes. Conflicts are resolved with a single d20 roll for each side (*not* each character), plus the lead character's relevant Stat and Ability (see below) as well as situational modifiers. The side with the higher total wins; ties go against the instigator. One fourth the difference determines the number of Minor **Consequences** (see below) the losing side must take as a result of the Conflict.

Types of Conflict: Conflicts can happen in one of four levels.

1. **Stealth:** Notice, avoid, or otherwise minimize the risk of a Conflict before it begins; includes Disguise, Hide, Listen, Move Silently, Spot, Search, steal, etc.
2. **Communication:** Talk through a Conflict; includes Diplomacy, Intimidation, haggling, persuasion, taunting, etc.
3. **Brawling:** Physically fighting without the intent to incapacitate; includes shoving, wrestling, hitting sword hilts, etc.
4. **Combat:** Fighting with intent to incapacitate; includes stabbing with the blade of a sword, shooting a gun, etc. When setting Stakes for Combat, each Character must "ante up" HPs in order to participate in the Conflict. These HPs are added to the rolls and modifiers for each side. The losing side automatically loses all HPs wagered, while the winning side also loses wagered HPs, less the amount by which they won the Conflict.

Extending Conflicts may need to happen if the PCs aren't getting their way or feel a specific Conflict needs to go into more detail. There are two ways to do this:

1. **Escalation:** Any character can shift from one of four types of conflict to another (see above). All d20s are immediately rerolled, and this character becomes the instigator.
2. **Pain:** Only at a player's (not the GM's) request, a Conflict can be handled in a task-by-task manner. In this case, each individual rolls a d20 for each action (**Attack**), modified as above but compared to a static target number of $10 +$ the opponent's relevant Stat and Abilities (**Defense**). Success costs the opponent a Consequence or, in the case of Combat, damage to HP as determined by the type of weapon less the victim's Armor Bonus.

Abilities provide bonuses during Conflicts and improve as a Character Levels. Players select two Abilities for each Character by combining a Conflict Type (above) with a Style (below). A Character who takes the exact same Ability twice can either have the bonuses stack or gain an extra action per Round, as long as that action is related to the Ability. **Style** indicates the type of bonus the Character gets.

- **Aggressor:** Add Level to all Attacks.
- **Defender:** Add Level to all Defense.

- **Specialist:** Select a specific discipline within the Conflict Type (e. g., Taunting, Kung Fu, Crossbows, etc.) and add Level to both Attacks and Defense only when engaged in this specific Conflict.
- **Opportunist:** Reroll up to Level/2 times per game session.
- **Hero:** Add Level to any roll once per Conflict; add twice Level to any roll once per game session.

Consequences result from Conflicts or can be taken (up to four at once) instead of any major hit to HP or SP. They can be either a -1 to a Stat of the player's choice or a temporary Aspect, if Aspects are being used.

- **1st Consequence** = Mild Wound or Short-Term Insanity. can absorb loss of up to 1/4 HP or SP, fades upon winning a Conflict.
- **2nd Consequence** = Moderate Wound or Long-Term Insanity, can absorb loss of up to 1/2 HP or SP, fades with a night's rest.
- **3rd Consequence** = Severe Wound or Long-Term Insanity, requiring 2d6-4 weeks to heal; 0 = 6 days, -1 = 5 days, -2 = 4 days, -3 = 3 days; can absorb loss up to 3/4 HP or SP.
- **4th Consequence** = Permanent Wound or Indefinite Insanity, only removed with magic or other extraordinary measure.

Other Optional Rules

Aspects are non-mechanical parts of a Character that a player wants to influence the story. An epithet, quote, relationship, possession, or anything else can be an Aspect. Characters start with one Aspect in the 1st Level and can gain more with Leveling Bonuses. For each Aspect, a player gets a Story Point (measured with a poker chip or other counter) at the beginning of each session. At any time during the session, the player may invoke an Aspect prior to any die roll by describing how it comes into play and spending a Story Point, thereby gaining a +4 to the roll. The GM or any other player may also invoke that Character's Aspect(s). If the player refuses, then she must spend a Story Point; if she accepts, then she gains a Story Point.

Sanity Points (SP) = 8 + MIND + Level/2. Whenever a Character has a horrific experience, he must roll lower than his SP on a d20 or lose a SP. When SP reach 0, he goes permanently insane.

Final Stand kicks in at the player's request when her Character reaches 0 HP. Upon regaining consciousness, her Character remains at 1 HP and recedes, unable to attack or be harmed, into the background. In a final, climactic encounter that the player chooses as her Character's "final stand," the Character instantly regains all HP and doubles all roll bonuses. At the end of the encounter, the Character must retire.

Setting-Based Character Creation has players build their Characters as the GM describes the recent history of the setting. During each of six historical periods the GM demarcates, players relate what their character was doing during that time and pick one trait (Skill Expertise, 2 Keys, 2 Abilities, or Aspect) their Character gained as a result.

The World Beyond

The World Beyond is a sample fantasy setting for MULRAH. Goblins and Reptile Men replace Elves and Dwarves, and Alchemy replaces Arcane Magic. All PCs in the World Beyond must select a Race, Religion, and Nationality. Races besides Humans/Goblins are rare and at -1 to Skills.

- **Humans** have spread their religion through out most of Ytarria. Three Christian nations (Megalos, Caithness, Cardiel, and Araterre) and two Muslim nations--al-Wazif (Sunni) and al-Haz (Shi'ite)--exist. Judaism is the third most common religion, but Jews are spread among the six kingdoms. The Megalan Empire's closest rival is al-Wazif, with Cardiel being a much-disputed realm with a diverse, relatively egalitarian society. Caithness is a sparsely populated frontier with weak mana (and thus no magical characters) to the West. Araterre is an island nation of seafarers to the South.
- **Goblins** (-2 STR, +1 DEX, +1 MIND, +1 Skills) are the second most populous Race on Yrth and comprise a substantial portion of the mercantile class in most cities, particularly in southern Megalos (Yibyorak and Sho'joor). Most have assimilated to the prevailing religion of the surrounding Humans (Christianity, Islam, Judaism), but a rare few follow cult deities of their former world.
- **Twadyn/"Gnomes" and Halflings** (+1 DEX) are surface-dwelling herders or farmers. They live peacefully alongside Humans and Goblins, usually in rural areas. Many have difficulty distinguishing between the Elder Race of Gnomes and Halfling newcomers. The former tends to live near their Dwarven cousins in Zarak and worship the ancient elemental deities Hubabeh (Air) and Hsaragg (Water), while the latter hail from the slightly warmer, weed-growing climates of Megalos, where Christianity is prevalent.
- **Reptile-Men** (+2 STR, -1 MIND) are most prevalent in the Steppes of Arachine but can be found in any plain or swamp area. Little is known of the religious ways of most Reptile Men. Descendants of those who assimilated with Human nomads in the early days of Islam live alongside Humans in the Muslim nations.

Magic exists in the World Beyond in two forms.

- **Divine Magics (Ability)** provide access to Divine Spells of 1/2 the caster's Level and Turning Undead. Each spell costs HP = 1 + 2 x the Spell's Level, a loss that can be healed **only** after 8 hours rest. A player-chosen "signature spell" for each Spell Level above 0th costs 1 less HP. Turn Undead requires a successful Magic Attack and can be used (2 + Level + MIND) times per day. DC is the current HPs of the Undead, destroyed if DC exceeded by 10. Casters cannot use 2 weapons at once.
- **Alchemy (Ability)** is a Goblin method of accessing Arcane Spells. With access to water, Alchemist's Ingredients (5 gp per use per Level), and a successful roll of d20+Level+MIND vs a DC of 10 + 5 x Spell Level, an Alchemist can create potions for spells of a Spell Level up to 1/2 the Alchemist's Level. These potions can be used up to 24 hours after creation; a potion with no expiration adds 25 to the DC. Each subsequent potion created in a day adds +2 to the DC.

Classes are simply pre-determined combinations of Skills and Abilities and are entirely optional in the World Beyond. They are noted here to demonstrate equivalencies between MULRAH and Microlite20.

- **Fighter:** Physical, Combat (Any 2)
- **Cleric:** Knowledge, Divine Magic, Communication
- **Rogue:** Subterfuge, Stealth, Combat (Specialist: Light Weapons)
- **Alchemist:** Knowledge, Alchemy, Stealth or Communication
- **Ranger:** Survival, Brawling, Combat (Specialist: Bows)
- **Paladin:** Physical, Divine Magic, Combat
- **Druid:** Survival, Divine Magic, Stealth
- **Bard:** Knowledge or Subterfuge, Communication (Any 2)

Notes

1. To convert from the Primary Fantasy SRD rules, use the relevant Ability Score's bonus. From older versions, Stat = (Relevant Ability Score - 10)/2.
2. Note that MULRAH splits Microlite20's Subterfuge Skill between the Subterfuge Skill and the Stealth Ability. Microlite20's Communication Skill is now an Ability.
3. In MULRAH, anybody can try to sneak up on someone, but only those with Stealth will have any real success.
4. This amount is calibrated to the XP amounts (divided by 100) in Erin Smale's "Building the Perfect Class." All Characters have the same progression of Hit Points (d8 per Level = 2 XP) and weapon/armor restrictions; none progress in "Saving Throws" or Combat outside of Abilities. Abilities are essentially a Combat Progression of +1/Level, worth 4 XP, slightly more than Smale's Special I/II abilities. Thieves' Skills, which include about twice the number of skills as a MULRAH Skill, are worth 4 XP in Smale's calculation, so MULRAH Skills count for just 2 XP. Leveling Bonuses are worth 4 XP.
5. As they stand, Skills are relatively unimportant, and story-oriented or "old school" groups may wish to ignore them altogether. The former group will want to focus instead on Conflicts while the latter will look for player skill (e.g., describing exactly how and where you are looking for traps rather than just rolling for it) to navigate these situations. They remain in the Core Rules because of the numerous optional modern rules that can make using them unique and fun.

OPEN GAME LICENSE Version 1.0a

Lite20

Welcome to Lite20! This is a trimmed-down version of the SRD rules that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of the SRD (monsters, spells, adventures and equipment) could be used without conversion.

Stats

There are 3 stats - Strength, Dexterity and Mind. These are abbreviated as STR, DEX and MIND.

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

Humans: +1 to all skill rolls. Move 30'/per round or 20'/round in heavy armor.

Dwarves: +2 STR. Move 20'/per round even in heavy armor. Have darkvision and stonemasonry (+2 racial bonus on Knowledge checks to notice unusual stonework).

Halflings: +2 DEX. Move 20'/per round or 15'/round in heavy armor. A halfling gains a +1 size bonus to Armor Class and a +4 size bonus on Subterfuge checks to hide in outdoor environments and +2 morale bonus to saves against fear effects.

Elves: +2 MIND. Move 30'/per round or 20'/round in heavy armor. Have darkvision and immunity to magic sleep effects and ghoul paralysis.

Gnomes: +2 STR. Move 20'/per round or 15'/round in heavy armor. A gnome gains a +1 size bonus to Armor Class, +2 bonus to saving throws against illusions and a +4 size bonus on Subterfuge checks to hide in underground environments. Once per day a gnome may speak with burrowing animals (duration 1 minute).

Half-Elves: +1 MIND. Move 30'/per round or 20'/round in heavy armor. Have immunity to magic sleep effects.

Classes

The classes are Fighter, Rogue, Sorcerer, Cleric. All characters begin at Level 1 with an attack bonus of +1.

Fighters can wear any kind of armor and use shields. Every 6 levels the fighter gains an additional attack (e.g., at 6th level the fighter may attack twice in one combat round). They have a +3 bonus to Physical skill checks. They use d10 for hit dice. They gain a +1 attack bonus (AB) to all attack rolls. This bonus increases by +1 per level.

Special Ability: If you deal a creature enough damage to kill a creature in a single blow, you get an immediate, extra melee attack against another creature within reach. No movement is allowed.

Rogues can use light armor. They have a +3 bonus to Subterfuge. They use d6 for hit dice. Rogues gain a +1 attack bonus (AB) every 4 levels.

Special Ability: May Find/Remove Traps, Move Silently, Hide in Shadows, and Pick Pockets with a

successful Subterfuge check.

Special Ability: A rogue may sneak attack for extra damage with a light weapon. The attack deals an extra 1d6 damage at 1st level, and increases by an additional 1d6 damage for every two rogue levels thereafter.

Sorcerers wear no armor. May only use Daggers. They can cast arcane spells, and gain a +3 bonus to Knowledge. They use d4 for hit dice. Sorcerers gain a +1 attack bonus (AB) every 6 levels. Sorcerers gain 1d6 + Mind bonus spell points each level.

Special Ability: Sorcerers can double the power of the spell they are casting. All variable, numeric effects of an empowered spell are doubled. The spell point cost of an empowered spell is triple.

Clerics can wear light or medium armor and use shields. They can cast divine spells. They gain +3 bonus to Communication. They use d8 for hit dice. Clerics gain a +1 attack bonus (AB) every 4 levels. Clerics gain 1d6 + Mind bonus spell points each level.

Special Ability: Clerics may turn away or destroy undead creatures. Turning is a Communication check vs the Turn Undead DC.

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you can not wield two rapiers at the same time.

Hit Points

At 1st level all characters add their Strength score to their hit points. When a character's hit points reach zero or less, the character has died.

Darkvision

Darkvision is the ability to see even in total darkness. It is black and white only but otherwise like normal sight but does not grant one the ability to see in magical darkness.

Skills

There are 4 skills - Physical, Subterfuge, Knowledge and Communication. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level + any bonus due to your class.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus. Turning Undead is Communication + MIND bonus.

Examples

Appraise – COM+MIND bonus

Balance - PHYS+DEX bonus

Bluff - COM+MIND bonus

Climb - PHYS+DEX bonus or STR bonus, whichever is highest

Decipher Script - KNOW+MIND bonus or COM+MIND bonus

Diplomacy - COM+MIND bonus

Disable Device - SUB+MIND bonus or SUB+DEX bonus

Disguise - SUB+MIND bonus

Escape Artist - SUB+DEX bonus or SUB+STR bonus, depending on how the character is held

Forgery - COM+MIND bonus

Handle Animal - COM+MIND bonus or COM+STR bonus if the animal is bigger than you

Heal - KNOW+MIND bonus

Hide - SUB+DEX bonus

Intimidate - could be PHYS+STR bonus, or SUB+MIND bonus or COM+STR bonus. This is dependent upon the situation.

Jump - PHYS+STR bonus (long jump) or PHYS+DEX bonus (high jump)

Knowledge - KNOW+MIND bonus

Listen - SUB+MIND bonus

Move Silently - SUB+DEX bonus, may not be possible in armor heavier than leather

Perform - COM+MIND bonus, though it could be DEX bonus if you're juggling, or STR bonus if you're a weightlifter

Profession - usually COM+MIND bonus

Ride - COM+DEX bonus

Search - SUB+MIND bonus

Sense Motive - COM+MIND bonus

Spellcraft - COM+MIND bonus

Spot - SUB+MIND bonus

Survival - PHYS+STR bonus to survive, or SUB+DEX bonus or STR bonus to hunt or to track in the wilderness.

Swim - PHYS+STR bonus

Tumble - PHYS+DEX bonus

Warhorse, light	150 gp
Warpony	100 gp
Saddle, Military	20 gp
Saddle, Pack	5 gp
Saddle, Riding	10 gp
Saddlebags	4 gp

Level Advancement

Each level adds additional Hit Points as per hit dice of the character class and +1 to all skills. Clerics and Sorcerers gain access to new spell levels at levels 3,5,7,9,etc.

All characters gain a level as per the Experience Table below:

Level	XP	Level	XP
1st	0	11th	480000
2nd	2000	12th	600000
3rd	4000	13th	720000
4th	8000	14th	840000
5th	16000	15th	960000
6th	32000	16th	1080000
7th	64000	17th	1200000
8th	128000	18th	1320000
9th	240000	19th	1440000

Spells

Sorcerers can cast any arcane (sorcerer) spell, and Clerics can cast any divine (clerical) spell, with a spell level equal or below 1/2 their class level, rounded up.

A spell is a formula for collecting and using magical energies. The caster controls these energies with a memorized set of words and hand motions: the spell. Only clerics and sorcerers can learn these formulas, and thus only they can cast spells.

Casting a spell of any kind costs Spell Points. The cost is 1 + the level of the spell being cast. Spell Points are recovered after 8 hours rest. There is no need to memorize spells in advance.

Note: Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character, and select two 'signature' spells that they prefer to use over any others. The GM can opt to make these spells easier to cast due to familiarity, costing 1 less Spell Point to use.

Saving Throws

Generally, when a creature or player character is subject to an unusual or magical attack, they get a saving throw to avoid or reduce the effect. A saving throw is usually a d20 roll plus Will saving throw bonus. However, spells with a large area of effect use a d20 roll plus Reflex saving throw bonus instead to reduce the damage to one-half. To successfully save, the roll must be better than 10 + spell level + caster Mind bonus.

Spell Attributes

Damage, range, area of effect and duration of a given spell is handled by the following table when not in the spell description. The GM is the final arbiter of all spell effects.

Spell Attribute	Default	Each point allocated adds....
Damage	0	1d4* per spell point used
Range	Touch	30' per spell point used
Area of effect	0	10' radius per spell point used
Duration	Instant	1 round per spell point used

*Damage dice can be incremented (e.g., from a d4 to a d6 or from a d6 to a d8, etc.) by spending an additional spell point per die to be rolled.

Spell List

Order of Presentation: In the spell lists and the spell descriptions that follow them, the spells are presented in alphabetical order by name except for those belonging to certain spell chains.

When a spell's name begins with "lesser," "greater," or "mass," the spell description is alphabetized under the second word of the spell name instead.

Hit Dice: The term "Hit Dice" is used synonymously with "character levels" for effects that affect a number of Hit Dice of creatures. Creatures with Hit Dice only from their race, not from classes, have character levels equal to their Hit Dice.

Caster Level: A spell's power often depends on caster level, which is defined as the caster's class level for the purpose of casting a particular spell. A creature with no classes has a caster level equal to its Hit Dice unless otherwise specified. The word "level" in the spell lists that follow always refers to caster level.

Reversible Spells: Spells marked with a "*" in the spell name can be cast to have the reverse effect as listed in the spell description. Casting a spell this way may be considered an evil act.

Cleric Spells

0-Level Cleric Spells

Create Water: Creates 2 gallons/level of pure water.

Cure Minor Wounds*: Cures 1 point of damage.

Detect Magic: Detects spells and magic items within 60 ft.

Detect Poison: Detects poison in one creature or object.

CHARACTER CREATION

STATS

There are four stats : Strength (STR), Dexterity (DEX), Charisma (CHA) and Mind (MIND).

- You can either divide 42 points amongst them, or
- Assign the following scores: 14,12,10,8 or
- Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

No Stat may have a score of less than 1. Stat modifiers are based on stat value:

Stat Value	Modifier
1	-5
2	-4
4-3	-3
6-5	-2
7-8	-1
9-11	
12-13	+1
14-15	+2
16-17	+3
18-19	+4
Additional +2	Additional +1

RACES

Bugbear get +6 STR, +2 DEX, -4MIND, -4 CHA , +2 natural armor AC– Favored Class: Rogue. Large. Effective Level +3

Dwarves get +2 STR , -2 CHA – Favored Class: Fighter

Elves get +2 MIND , -2 STR – Favored Class: Mage

Gnomes get +2 CHA, -2 STR – Favored Class: Rogue, can cast Pregiditation and Ghost Sound regardless of class. Small. Effective Level +1

Goblin get +2 DEX, -1 STR and –1 CHA – Favored Class: Rogue. Small

Half-Dwarf get +1STR, -1 CHA – Favored Class: Fighter

Half-Elf get +1MIND, -1 STR – Favored Class: Any

Half-Orc get +2STR, -1MIND, -1 CHA – Favored Class: Fighter

Halflings get +2 DEX, -2 STR – Favored Class: Rogue. Small

Humans get +1 to all skill rolls and one extra Feat. – Favored Class: Any

Hobgoblin get +2 STR, +2 DEX, -2MIND, -2 CHA – Favored Class: Fighter

Lizardmen get +2 STR, -2 MIND, +1 natural armor AC, claws 1d6 damage – Favored class: Cleric. Effective Level +2

Kobold get -2STR, +2 DEX – Favored Class: Mage. Small

Ogre get +10STR, -2 DEX, -4MIND, -4 CHA , +1 natural AC– Favored Class: Fighter. Large. Effective Level +4

Orc get +4STR, -2MIND, -2 CHA – Favored Class: Fighter

Troll get +12 STR, +2 DEX, -6MIND, -8 CHA , +3 natural armor AC, claws 1d6, regenerates 3 hp per round unless hit by fire or acid– Favored Class: Fighter. Large. Effective Level +5

All non humans can see in the dark.

CLASSES

The classes are Fighter, Rogue, Mage, Cleric, Monks. Characters begin at Level 1. All characters are trained in Light weapons.

Fighters

Weapons training: All

Armour training: All

Shield Training: All

Primary Skill: Physical

Secondary Skill: Subterfuge and Communication

Tertiary Skill: Knowledge

Special abilities: +1 to all damage rolls. This increases by +1at 5th level and every five levels.

Fighters receive 1 extra hit Points at each level.

Requirement: STR 10+

Rogues

Weapons training: Light, One handed and Basic Ranged weapons.

Armour training: Light

Shield Training: None

Primary Skill: Subterfuge

Secondary Skill: Physical, Knowledge and Communication

Tertiary Skill: None

Special: Rogues receive a +1 to all rolls to Search, Disable and Save against Traps. This increases by +1 at 5th level and every five class levels.

If they successfully Sneak (usually sub + DEX, but depends on situation) up on a foe they can add 1d6 of damage to their first attack, this increases by 1d6 at 5th level and every five levels.

Rogues can employ restricted magic items by rolling Knowledge + Mind versus a difficulty of 20.

Requirement: DEX 10+.

Magi

Weapons training: Light and Basic Ranged weapons

Armour training: None

Shield Training: None

Primary Skill: Knowledge

Secondary Skill: Subterfuge and Communication

Tertiary Skill: Physical

Special: They can cast arcane spells.

Requirement: MIND 10+

Clerics

Weapons training: Light and Basic Ranged weapons

Armour training: Light

Shield Training: None

Clerics must choose either One handed weapons, Shield Training or Medium Armour

Primary Skill: Communication

Secondary Skill: Physical and Knowledge

Tertiary Skill: Subterfuge

Special:

Good Clerics: A Cleric can Turn Undead with a successful CHA+Knowledge. DC is 10+ Hit Dice of the Undead. Success inflicts (class Level)d6 of damage to the undead. This can be used (2 + class Level + CHA Bonus) times per day.

Evil Clerics: A Cleric can Bolster Undead with a successful CHA+Knowledge. DC is 10+ Hit Dice of the Undead. Success grants an extra (class Level)d6 Hit Points. This can be used (2 + class Level + CHA Bonus) times per day.

Druids: avoid using metal where possible, preferring living or once-living materials (leather, wood, etc).

From third level a Druid can Wild Shape into any small animal (eg a fox or badger) once a day. Every three class levels the number of uses increases by one (2/day at 6th, 3/day at 9th, etc). A Druid can use up to 2 uses by Wild Shaping into a medium-sized animal (eg, a wolf), or 3 uses by Wild Shaping into a large animal (eg, a bear).

Druids can Turn AND Bolster Animals exactly like Clerics can Turn or Bolster Undead.

Requirement: CHA 10+

Monks

Weapons training: Light, One and Two-handed Weapons and Basic Ranged weapons

Armour training: None

Shield Training: No

Primary Skill: Physical

Secondary Skill: Subterfuge, Knowledge and Communication

Tertiary Skill: None

Special: Can fight unarmed (kicks, punches, etc) doing d6 damage (STR bonus to damage still applies).

Their unarmed damage increases every four class levels starting at the fourth level as shown in the following table:

Level	1-3	4-7	8-11	12-15	16-19	20
Damage	1d6	1d8	1d10	2d6	2d8	2d10

Their attacks count as magical after 3rd level.

They gain an AC bonus equal to half their class level (rounded up) provided they are wearing no more than loose fitting clothes.

Level	1-2	3-4	5-6	7-8	9-10	11-15	16-19	20
AC Bonus	+1	+2	+3	+4	+5	+6	+7	+8

At choice Monks can use DEX bonus instead of STR bonus as melee attack bonus if unarmed.

Monks can make one extra attack per round by taking -2 on all attack rolls for that round.

Requirement: DEX, MIND and CHA 10+

SKILLS

There are just 4 skills :

Physical, Subterfuge, Knowledge and Communication.

Roll higher than the given Difficulty Class to succeed.

Skill rank :

For Primary skills: your level + 3+any bonus due to your class,feats or race.

For Secondary skills: your level + any bonus due to your class,feats or race.

For Tertiary skills: (your level/2-rounded down)+ any bonus due to your class, feats or race.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Wearing Armour –or shields- can influence Dex or Str based Tests applying a negative modifier equal to it's AC modifier.

Note that there are no "saving throws" in this game; use Physical + STR or DEX bonus for Fortitude and Reflex saves. Saving against mind magic is usually Knowledge+MIND bonus.

Appraise - com+MIND

Balance - phys+DEX

Bluff - com+CHA

Climb - phys+DEX or STR, whichever is highest

Craft - know+DEX

Decipher Script - know+MIND or com+MIND

Diplomacy - com+CHA

Disable Device - sub+MIND or sub+DEX

Disguise - sub+CHA

Escape Artist - sub+DEX or sub+STR, depending on what you're escaping out of

Forgery - com+DEX

Gather Information - com+CHA

Handle Animal - com+CHA or com+STR if the animal is bigger than you

Heal - know+MIND

Hide - sub+DEX

Intimidate - could be phys+STR, or sub+MIND or com+STR. You choose

Jump - phys+STR (long jump) or phys+DEX (high jump)

Knowledge - know+MIND

Listen - sub+MIND

Move Silently - sub+DEX

Open Lock - sub+DEX

Perform - com+CHA, though it could be DEX if you're juggling, or STR if you're a weightlifter

Profession - com+MIND, usually

Ride - com+DEX

Search - sub+MIND

Sense Motive - com+MIND

Sleight of Hand - sub+DEX

Speak Language - doesn't apply. You either know the language or you don't. Alternatively, com+MIND to understand subtle nuances.

Spellcraft - know+MIND

Spot - sub+MIND

Survival - phys+STR to survive, or sub+DEX or STR to hunt stuff.

Swim - phys+STR

Tumble - phys+DEX

Use Rope - Use phys+DEX.

WHEN IN DOUBT ...REMEMBER

Whenever the players want to try something that goes around, through, or above and beyond the rules as written, you can always use the 'GM's Friend'...the 50% chance. Have them roll whatever check seems most appropriate. A roll of 1-10 is a failure, a roll

of 11-20 is a success. If you feel that the situation warrants that you favor them, assign a +2 bonus to their roll. If the situation determines that they be hindered, then assign a -2 penalty.

FEATS

Acquiring Feats: Characters do not “buy” feats, they simply select 1(or 2 if human) feat(s) at 1st Level, and then again every third character level (1st, 3rd, 6th, 9th, 12th, 15th and 18th levels).

Fighters may take “Fighter” Feats, as Magi may take “Magi” feats, Monks may take “Monk” feats, Rogues may take “Rogue” Feats, and Clerics may take “Cleric” feats.

(A)=Any, (F)=Fighter, (R)=Rogue, (Mk)=Monks, (M)=Magi, (C)=Cleric

(Pre:)=Prerequisite Required for Feat

Abjuration: (M/C) The character gets a +2 to all Counter-spelling rolls. Also the character spends 1 HP less for spell countering actions.

Acrobatic: (A) +2 Bonus on Jump and Tumble Checks

Agile: (A) +2 Bonus on Balance and Escape Artist

Alertness: (A) +2 Spot and Listen Checks

Animal Affinity: (A) +2 Handle Animal

Athletic: (A) +2 Climb and Swim Checks

Blind Fight: (F/R/Mk) No penalty vs. invisible or in darkness

Brew Potion (M/C) (Pre: Must be 3rd class Level or above) May brew potion for personal effect spells (i.e. Bless, Resistance, Feather Fall, Mage Armor). Cost: Spell Level X Caster class Level X 50 gp. Any character may use potions. Potions require one day of work per dose.

Bull Rush: (F/C/Mk) (Pre: Str. 13, Power Attack) Push an opponent back 5’.

Circle magic: (M/C) A spell-caster may form a magical circle with spell-casters of same type and ethos having the Circle magic feat: all circle members must be within 5’ of each other and can do nothing else while taking part to the circle for the circle to work. Any distraction or attack that deals damage will break the circle.

The highest level member is designed circle leader. No circle can contain more members than 4 plus the Circle leader Charisma bonus.

While the circle is active the leader will be able to cast and counter any spell known to any circle member and can use other member’s Spell points to cast spells or use Counter-magic.

Forming a Circle requires a full action, nothing else can be done that round.

Create bonus item: (M/C) (Pre: Must be 6th class Level or above) May create an item granting a bonus: to AC, damage, attack rolls, skills or attributes.

Armours and shields grant bonuses to AC, weapons grant bonuses to Attack and damage rolls.

Cloaks, boots and rings can grant bonuses to AC, skills and attributes.

Each item can grant a bonus to a single thing, no item can grant a bonus higher than (maximum spell level usable by the character/2 rounded up), no character can receive a bonus on the same thing by different items.

Cost: bonus X item base cost X 300gp

Creating an item requires one week of work per +1 granted.

Bonus items are open to all classes.

Cleave: (F/C/Mk) (Pre: Str. 13, Power Attack) If you kill a creature and have a second opponent within 5’, you may make a free attack.

Deceitful: (R) +2 to Forgery or Disguise

Dodge: (F/R/C/Mk) +1 AC against any opponent you choose.

Enchant charged item: (M/C) (Pre: Must be 9th class Level or above) May create a charged item of any spell you know, and Cast without loss of HP. Only M/C can use charged items, and only of same type.

Cost: Spell Level X Caster class Level X 100gp X Charge Or Spell Level X Caster class Level X 1000gp X Daily uses

Recharging an existing item costs half as much per charge.

Creating an item requires one week of work, recharging takes simply one day.

Items open to all classes require twice the costs and times.

Enduring spell (M/C)(Pre: Spellcaster level 6th): Increases spell duration by 1 step with an extra cost of Hit Points equal to spell level.

Extra Turning: (C) Turn undead four times more per day.

Extended Spell(M/C)(Pre: Spellcaster level 6th): Increases spell range by 1 step with an extra cost of Hit Points equal to spell level.

Far Shot: (A) (Pre: Point Blank Shot) Any projectile weapon's range increases by ½ again.

Favored Enemy: (F) The character may select a type of creature and gains a +3 bonus on Bluff, Listen, Sense Motive, Spot, and Survival checks when using these skill applications against creatures of this type. Likewise, he gets a +3 bonus on weapon damage rolls against such creatures.

Find Familiar: (M/C) Character selects an animal to become its familiar. The animal may not have more HD than the character's level/2 rounded up.

The animal adds the Character level to its Hit Points.

The Master and Familiar can communicate telepathically within 1.5 km, all spells cast by the master affecting self, automatically affect the familiar as well if within 5 feet.

The master can cast spells through the familiar if within telepathic contact range.

If the familiar dies, the Master must roll Phys+STR vs 15 or take 1d6 of damage per Hit Dice of the familiar.

Frenzy: (F) The character can fly into a rage a number of times per day equal to half its level round down. In a rage, the character temporarily gains a +4 bonus to Strength, and a +2 bonus on saves against mind-affecting magic, but he takes a -2 penalty to Armor Class.

Frenzied characters do not employ missile weapons but instead charge in melee the nearest eligible target.

The increase in Strength affects both attack and damage rolls and hit points, but these hit points go away at the end of the rage when his Strength score drops back to normal. While raging, a character cannot use the Subterfuge, Knowledge and Communication skills (except for Escape Artist or Intimidate actions), or any abilities that require patience or concentration, nor can he cast spells or activate magic items that require a command word, a trigger (such as a wand), or spell completion (such as a scroll) to function.

He can use any feat he has except Improved Defense, item creation feats, and magic feats. A fit of rage lasts for a number of rounds equal to 3 + the character's (newly improved) Strength modifier. A character may prematurely end his rage.

At the end of the rage, the character loses the rage modifiers and restrictions and becomes fatigued (-2 penalty to Strength, -2 penalty to Dexterity, can't charge or run) for the duration of the current encounter.

Great Cleave: (F/C/Mk) (Pre: Str. 13, Power Attack, Cleave) If you kill one creature, you can continue using Cleave as long as each successive attack results in a kill.

Heavy Armour: (A) (Pre: Medium Armour) The character is trained in the use of Heavy armour.

Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Heroic Spirit: (A) The character gets 3 reserve points for free.

Improved Critical: (A) Any character now gets a Critical Hit on any roll of 19-20, doing Max Damage.

Improved Defense: (A) Any character now may take a -4 to all attack rolls to add a +4 to its AC. May not be used in conjunction with Power Attack.

Improved Initiative: (A) Any character gets a +4 to Initiative

Improved Turning: (C) Clerics can turn undead as if they were one level higher.

Investigator: (A) You get a +2 to Gather Information and Search Checks

Lightning Reflexes: (F/R/C/Mk) +2 to Phys + STR or DEX bonus.

Light Armour: (A) The character is trained in the use of Light armour.

Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Magical Aptitude: (M/C) You take 1HP less damage when you cast a spell, or 2HP less when casting signature spell.

Manyslot: (F/C/R) (Pre: Dex 17, Point Blank Shot, Rapid Shot) You may fire two arrows at any single opponent, at –4 Penalty to hit. Damage remains the same. Gain one additional arrow at same Penalty every time you take this Feat.

Marksmen: (A) The character is trained in the use of marksman weapons.
Using a weapon for which the character has no training inflicts a -4 to the attack roll.

Medium Armour: (A) (Pre: Light Armour) The character is trained in the use of Medium armour.
Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Mounted Archery: (F) (Pre: Mounted Combat) Penalty for Ranged Weapon is halved, from –4 to –2.

Mounted Combat: (F) Once per round, if your mount is hit, you can negate the hit. The Ride check must be higher than opponent's Attack Roll.

Negotiator: (A) +2 to Diplomacy and Sense Motive Checks.

Nimble Fingers: (R) +2 to Open Locks and Disable Device

One handed weapons: (A) The character is trained in the use of One handed weapons.
Using a weapon for which the character has no training inflicts a -4 to the attack roll.

Personal Improvement: (A) The character may add 1 point to STR, DEX, CHA or MIND.

Persuasive: (A) +2 to Bluff and Intimidate

Point Blank Shot: (F/C/R) +1 Attack and Damage if target is within 30 Ft.

Power Attack: (F/C/Mk) (Pre: Str. 13) Subtract up to 4 from your "To Hit" Roll. Add this to your Damage, if you hit.
May not be used in conjunction with Improved Defense.

Power Spell: (M/C) The character's spells are considered as two levels higher to determine saving throws difficulty. The spell-caster gets a +2 to the rolls for resisting counter-spells

Quick Draw: (F/C/R/Mk) You can draw and strike in the same round.

Rapid Reload: (F/C/R) You can reload a crossbow and fire in a single round, instead of reload one round, and fire the next.

Rapid Shot: (F/C/R) (Pre: Dex 13, Point Blank Shot) One extra shot per round, second shot at –2 to hit.

Ride-By Attack: (F) (Pre: Mounted Combat) You can move, attack, and move again in a round.

Run: (A) You can outrun almost any opponent. Your run action allow you to move five times the base speed.

Scribe Scroll: (M/C) May create a scroll of any spell you know, and Cast without loss of HP. Cost: Spell Level X Caster Level X 25gp. Only M/C can use scrolls, and only of same type. Scrolls require one day of work per spell.
Scrolls open to all classes require twice the costs and times.

Shield Training: (A) The character is trained in the use of Shields.
Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Stealthy: (A) +2 Bonus to Move Silently and Hide Skills.

Track: (F/R) You can Track creatures and characters across most terrain.

Surface Track DC
V. Soft Ground 5
Firm Ground 15
Soft Ground 10
Hard Ground 20

GMs may modify DC as conditions require. Things to consider: Size of target, time, weather, time of day.

Trample: (F) (Pre: Mounted Combat) When you overrun an opponent, it cannot avoid the attack. Mount may attack with hoof or paw, rider's next attack is at +4 as target is prone.

Tough: (A) You get 3 extra hit points.

Two handed weapons: (A) (Pre: One-handed weapons) The character is trained in the use of Two handed weapons. Using a weapon for which the character has no training inflicts a -4 to the attack roll.

Two-Weapon Fighting: (F/C/R/Mk) (Pre: Dex. 15) You get to attack with two weapons with no penalty for second weapon

Weapon of Choice: (F) (Pre: 5th Fighter Level) You get +1 to attack and +2 to damage when using a specific weapon of your choice.

RESERVE

Each character has a Reserve equal to its 3 plus its character level. Reserve is spent at the following rates:

Action	Cost
Add 1d6 to a check	1
Remove 1d6 damage	1
Take an extra action on your turn	2

When you reach a new level of experience your Reserve Points total is reset back to equal 3 plus your level. Any unused Reserve Points are lost.

MAGIC

Magi cast or learn arcane spells, and Clerics cast divine spells, with a Spell level equal or below 1/2 their class level, rounded UP.

Any magic using characters can only learn and cast spells of a Level up to (Class attribute-10).

Casting a spell of any kind costs Hit Points. The cost is 1+ double the level of the spell being cast:

Spell Level	0	1	2	3	4	5	6	7	8	9
Cost	1	3	5	7	9	11	13	15	17	19

Hit points lost to magic use can not be healed by magic, and are recovered only through a full night of rest.

Clerics can cast all spells from the list, Magi must first memorize spells to cast them, a magi can keep in memory up to MIND+Mage Level Spells.

Memorization takes 10 minutes per spell and a spell book containing the spell to be memorized. Memorized spells can be dismissed at will to be replaced by other spells.

First level Magi start with a spell book including all 0 level spells and two first level spells.

New spells can be gained by other character's spell books or from scrolls, copying a spell requires use of the Read magic spell.

Scrolls get used up in the copying process.

First level Clerics can cast any 0 and 1st level spells, new spells are automatically gained on appropriate levels.

All Magi and Clerics should select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) to resist all spells is 10 + Spell-caster's class Level + Caster's MIND/CHA bonus.

Whenever "level" is part of a formula used to determine a spell's effects, always use the appropriate spell-casting class level and not character level

All Spells have the following characteristics:

Range: determines how far away the target of the spell can be from the caster and still be affected by it. Ranges are:

Self (affecting only the caster)

Touch (Target must be touched)

Near (within 10 yards)

Short (up to 100 yards)

Far (target must be in sight of the caster)

Special (target can be affected by the spell wherever he is as long as the caster has some sort of physical connection to the target like blood, hair or personal item)

Duration: How long the spell lasts:

Instant (only a moment, although it's effects could be permanent)

Concentration (as long as the caster concentrates on the spell doing nothing else, usually no more than 20 minutes)

Short (up to 1 Hour)

Hours (up to 6 hours)

Day (a whole day)

Week (a whole week)

Feat (till a specific condition set by the spell or the caster is met).

Save: How saving against the spell works:

None (No save possible)

Half (Saving denies half effect)

Full (Saving denies all effects)

Counter magic: A spell-caster that decides to wait may use it's own spell points and knowledge to counter and nullify another spell-caster's spell instead of taking an action.

The spell to be countered, Dispel Magic or Anti-Magic Field must be accessible to the countering spell-caster (of an accessible level for clerics, memorized as well for Magic-Users) who must spend a number of Hit Points equal to those necessary to cast a spell of the same level of the one to be countered.

Both spell-casters roll 1d20, add to this their Mind (or Charisma) bonus and their level: access to dispel magic adds +3 to the roll, while access to Anti-Magic Shell adds an extra +6.

Higher roll wins: if the countering spell-caster wins the contest the spell is successfully countered, if the other caster wins it's spell goes off as planned.

ARCANE SPELLS

0-level arcane spells (canttrips)

Arcane Mark (Touch/Instant/None): Inscribes a permanent personal rune (visible or invisible).
Dancing Lights (Short/Concentration/None): Creates illusory lights or torches.
Detect Magic (Self/Concentration/None): Detects spells and magic items within 60 ft..
Ghost Sound (Short/Concentration/None): Creates figment sounds.
Light (Touch/Short/None): Object shines like a torch.
Mage Hand (Near/Concentration/None): 5-pound telekinesis.
Prestidigitation (Near/Concentration/None): Performs minor tricks.
Read Magic (Self/Concentration/None): Read scrolls and spell books. Needed to decipher Scrolls and Spell books by other wizards.

1st-level arcane spells

Charm (Near/Hours/Full): Makes the target creature friendly.
Feather Fall (Self/Feat/None): Objects or creatures fall slowly until landing.
Floating Disk (Near/Hours/None): Creates 3-ft.-diameter horizontal disk that holds 100 lb./level.
Mage Armor (Self/Hours/None): Gives subject +4 armor bonus.
Message (Far/Concentration/None): Allows to send and receive silent messages.
Magic Missile (Far/Instant/None): 1d4+1 damage at one target; +1 missile per two levels above 1st (max 5).
Sleep (Near/Hours/None): Puts 4 HD of creatures into magical slumber.
Shocking Grasp (Touch/Instant/None): Touch attack delivers 1d6/level electricity damage (max 5d6).

2nd-level arcane spells

Acid Arrow (Short/Instant/None): Ranged Touch attack 2d4 damage for 1 round +1 round/three levels.
Flaming Sphere (Near/Concentration/Half): Creates rolling ball of fire, 2d6 damage, moves 10 feet/round.
Invisibility (Self/Short/None): Subject is invisible until it attacks.
Knock (Near/Instant/None): Opens locked or magically sealed door.
Levitate (Near/Concentration/None): Subject moves up and down.
Spider Climb (Self/Concentration/None): Grants ability to walk on walls and ceilings.

3rd-level arcane spells

Clairaudience/Clairvoyance (Special/Concentration/None): Hear or see at a distance.
Dispel Magic (Near/Instant/None): Cancels magical spells and effects.
Fireball (Short/Instant/Half): 1d6 damage per level, within Near range of strike area.
Fly (Self/Short/None): Subject flies at speed of 60 ft.
Lightning Bolt (Far/Instant/Half): Electricity deals 1d6/level damage.
Vampiric Touch (Touch/Instant/None): Touch attack deals 1d6/two levels damage; caster gains damage as hp which last for 1 hour.

4th-level arcane spells

Animate Dead (Near/Hours/None): Creates level X2 HD of undead skeletons or zombies.
Arcane Eye (Near/Concentration/None): Invisible floating eye moves 30 ft./round.
Black Tentacles (Near/Short/Full): Tentacles grapple all within 20 ft. Spread.
Dimension Door (Self/Instant/None): Teleports you up to 500 feet.
Polymorph (Near/Hours/Full): Gives one willing subject a new form.
Stoneskin (Self/Hours/None): Ignore 10 points of damage per attack. Lasts until discharged or spell ends.

5th-level arcane spells

Cloudkill (Near/Short/None-Full): Kills 3 HD or less; 4-6 HD save or die, 6+ HD take level d6 damage.
Contact Other Plane (Special/Concentration/None): Lets you ask one question of extraplanar entity.
Feeblemind (Near/Hours/Full): Subject's MIND score drops to 1.
Passwall (Near/Hours/None): Creates passage through wood or stone wall.
Permanency (Near/Special/None): Makes certain spells permanent.
Teleport (Self/Instant/None): Instantly transports you as far as 100 miles/level.

6th-level arcane spells

Antimagic Field (Self/Short/None): Negates magic within 10 ft..
Chain Lightning (Far/Instant/Half): 1d6/level damage; 1 secondary bolt/level each deals half damage.
Contingency (Near/Feat/None): Sets trigger condition for another spell. Lasts until discharged.
Disintegrate (Near/Instant/Full): Destroys one creature or object.
Geas (Near/Days/Full): Commands any creature, binding it to a specific task.
True Seeing (Self/Concentration/None): Lets you see all things as they really are.

7th-level arcane spells

Delayed Blast Fireball (Touch/Feat/Half): 1d6/level fire damage; you can postpone blast for 5 rounds.

Ethereal Jaunt (Self/Short/None): You become ethereal.

Finger of Death (Near/Instant/Full): Kills one subject.

Plane Shift (Near/Instant/None): As many as eight subjects travel to another plane.

Power Word Blind (Near/Instant/None): Blinds creature with 200 hp or less for 1d4+1 minutes (permanent if creature has less than 50 hp).

Spell Turning (Self/Hours/None): Reflect 1d4+6 spell levels back at caster duration or until expended.

8th-level arcane spells

Clone (Near/Special/None): Duplicate awakens when original dies.

Horrid Wilting (Near/Instant/None): Deals 1d6/level damage within range.

Incendiary Cloud (Near/Short/Half): Cloud deals 4d6 fire damage/round.

Irresistible Dance (Near/Short/None): Forces subject to dance for 1d4+1 rounds.

Power Word Stun (Near/Instant/None): Stuns creature with 150 hp or less for 2d4 rounds.

Trap the Soul (Near/Permanent/None): Imprisons subject within gem.

9th-level arcane spells

Astral Projection (Near/Hours/None): Projects you and companions onto Astral Plane.

Etherealness (Near/Hours/None): Travel to Ethereal Plane with companions.

Gate (Near/Concentration/None): Connects two planes for travel or summoning.

Meteor Swarm (Far/Instant/Half): Four exploding spheres each deal 6d6 fire damage within 30ft.

Power Word Kill (Near/Instant/None): Kills one creature with 100 hp or less.

Soul Bind (Near/Permanent/None): Traps newly dead soul to prevent resurrection.

DIVINE SPELLS

0-level divine spells (orisons)

Create Water (Near/Permanent/None): Creates 2 gallons/level of pure water.

Detect Poison (Self/Concentration/None): Detects poison in one creature or item within 60ft.

Guidance (Near/Feat/None): +1 on one attack roll, saving throw, or skill check.

Light (Touch/Concentration/None): Object shines like a torch.

Purify Food and Drink (Near/Permanent/None): Purifies 1cu. ft./level of food or water.

Resistance (Touch/Hours/None): Subject gains +1 on saving throws.

Virtue (Touch/Instant/None): Subject gains 1 hp.

1st-level divine spells

Bless (Near/Concentration/None): Allies gain +1 on attack rolls and communication + MIND checks against fear.

Bless Water (Near/Permanent/None): Makes holy water.

Cure Light Wounds (Touch/Instant/None): Cures 1d8 damage +1/level (max +5).

Divine Favor (Self/Short/None): You gain +1 per three levels on attack and damage rolls.

Magic Stone (Touch/Short/None): Three stones gain +1 on attack, deal 1d6 +1 damage. Lasts until discharged or expiration.

Sanctuary (Touch/Short/None): The target can not attack nor be attacked.

Shield of Faith (Touch/Short/None): Aura grants +2 or higher AC bonus.

2nd-level divine spells

Aid (Self/Short/None): +1 on attack rolls and saves against fear, 1d8 temporary hp +1/level (max +10).

Cure Moderate Wounds (Touch/Instant/None): Cures 2d8 damage +1/level (max +10).

Delay Poison (Touch/Hours/None): Stops poison from harming subject for duration of the spell.

Gentle Repose (Touch/Hours/None): Preserves one corpse.

Remove Paralysis (Touch/Instant/None): Frees one or more creatures from paralysis or slow effect.

Restoration, Lesser (Touch/Instant/None): Dispels magical ability penalty or repairs 1d4 ability damage.

3rd-level divine spells

Create Food and Water (Near/Instant/None): Feeds three humans (or one horse)/level.

Cure Serious Wounds (Touch/Instant/None): Cures 3d8 damage +1/level (max +15).

Prayer (Near/Short/None): Allies get a +1 bonus on most rolls, enemies take a -1 penalty.

Remove Disease (Touch/Instant/None): Cures all diseases affecting subject.

Searing Light (Near/Instant/Half): Ray deals 1d8/two levels damage, or 1d8/level against undead.

Speak with Dead (Near/Feat/None): Corpse answers 2 questions/level.

4th-level divine spells

Cure Critical Wounds (Touch/Instant/None): Cures 4d8 damage +1/level (max +20).

Discern Lies (Near/Concentration/Full): Reveals deliberate falsehoods.

Freedom of Movement (Touch/Short/None): Subject moves normally despite impediments.

Neutralize Poison (Touch/Short-Instant/None): Immunizes subject against poison or detoxifies venom in or on subject.

Restoration (Touch/Instant/None): Restores level and ability score drains.

Tongues (Self/Short/None): Speak any language.

5th-level divine spells

Atonement (Near/Instant/None): Removes burden of misdeeds from subject.

Commune (Self/Feat/None): Deity answers one yes-or-no question/level.

Cure Light Wounds, Mass (Near/Instant/None): Cures 1d8 damage +1/level to all within range.

Flame Strike (Far/Instant/Half): Smite foes with divine fire (1d6/level damage).

Raise Dead (Near/Instant/None): Restores life to subject who died as long as one day/level ago.

True Seeing (Self/Concentration/None): Lets you see all things as they really are.

6th-level divine spells

Banishment (Near/Instant/None): Banishes 2 HD/level of extraplanar creatures.

Cure Moderate Wounds, Mass (Near/Instant/None): Cures 2d8 damage +1/level to all within range.

Harm (Near/Instant/Half): Deals 10 points/level damage to target.

Heal (Near/Instant/None): Cures 10 points/level of damage, all diseases and mental conditions.

Heroes' Feast (Near/Day/None): Food for one creature/level cures disease and grants +1 combat bonus.

Quest (Near/Feat/Full): Commands any creature, binding it to a specific task. Lasts until discharged.

7th-level divine spells

Cure Serious Wounds, Mass (Near/Instant/None): Cures 3d8 damage +1/level to all within range.

Destruction (Near/Instant/Full): Kills subject and destroys remains.

Ethereal Jaunt (Near/Short/None): You become ethereal.

Regenerate (Touch/Instant/None): Subject's severed limbs grow back, cures 4d8 damage +1/level.

Restoration, Greater (Touch/Instant/None): As restoration, plus restores all levels and ability scores.

Resurrection (Touch/Instant/None): Fully restores a dead subject from a small portion of the corpse.

8th-level divine spells

Antimagic Field (Self/Short/None): Negates magic within 10 ft. for 10 min./level.

Cure Critical Wounds, Mass (Near/Instant/None): Cures 4d8 damage +1/level to all within range.

Dimensional Lock (Near/Weak/None): Teleportation and interplanar travel blocked.

Discern Location (Special/Instant/None): Reveals exact location of creature or object.

Fire Storm (Far/Instant/Half): Deals 1d6/level fire damage to all within Near range.

Holy Aura (Touch/Short/None): +4 to AC, +4 resistance, and immunity to all evil spells.

9th-level divine spells

Astral Projection (Near/Hours/None): Projects you and companions onto Astral Plane.

Etherealness (Near/Hours/None): Travel to Ethereal Plane with companions.

Gate (Near/Short/None): Connects two planes for travel or summoning.

Heal, Mass (Near/Instant/None): As heal, to all within range.

Implosion (Near/Concentration/Full): Kills one creature/round until concentration ends.

Soul Bind (Near/Permanent/None): Traps newly dead soul to prevent resurrection.

COMBAT

Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc. One turn lasts about five seconds.

Melee attack bonus = STR bonus + Physical

Missile attack bonus = DEX bonus + Physical

Armour Class (AC) = 10 + DEX bonus + Armour bonus.

Both Armor class and attack rolls are modified by the creatures Size:

Size	AC and Attack bonus
Tiny	+2
Small	+1
Medium	+0
Large	-1
Huge	-2

Touch attacks ignore the AC bonus due to armour and shields, but not those due to spells or enchantment bonuses on items.

Add attack bonus to d20 roll. If higher than your opponent's Armour Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage.

Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Using a weapon for which the character has no training inflicts a -4 to the attack roll.

Add STR bonus to Melee damage.

If HP reach 0, unconscious and near death.

Further damage directly reduces STR. If that reaches 0, death.

If the total melee attack bonus is +6 or more a second attack can be made in the same action with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2. A fourth attack is possible at -15 if the total bonus is still positive, four attacks is the maximum possible number of attacks without magic, special abilities or two weapons combat.

Fighters and Rogues can use DEX bonus as Melee attack bonus instead of STR if wielding a light weapon.

Fighters and Rogues can wield 2 light weapons and attack with both in a round gaining an extra attack at base bonus if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

Unarmed attacks deal 1d2 damage points.

Defending: a character can forfeit the chance to attack and spend the turn defending, add the character's Physical skill. Fighters may add their Weapon of choice bonus as well if wielding their weapon of choice.

Natural healing: Hit points are recovered at the rate of 1d4 per day of rest.

Movement: each character can act and move a number of feet per round depending on its size:

Size	Base speed
Tiny	10
Small	20
Medium	30
Large	40
Huge	50

As a full round action a character can **Run** moving four times as fast.

Encumbrance: Each character can carry a number of item Slots equal to Str.

Small items count as 1 slot, Medium items count as two slots, Large items count as four slots. Worn armor does not add to this total, carried armor does. Carried characters count as many slots as their Str.

Characters wearing Heavy armor have base speed halved.

LEVEL ADVANCEMENT

Encounter Level equal to Level or Hit Dice plus Effective Level modifiers of defeated monsters, or the given EL for the trap, situation, etc.

Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in.

When the total equals 10 x your current character level-plus Effective Level modifiers for some races-, you've advanced to the next level. If your character is multi-classing and does not have it's race favourite class as one of its classes, it must gain 12xcurrent character level to advance.

Reset the total to 0 after advancing.

Each level adds:

+1d6 to Hit Points

+1 to Primary and Secondary skills of chosen class

+1 to Tertiary skill on even class level of chosen class

At character levels 3,6,9,12, 15 and 18 the character may learn a feat allowed to the class it is taking a level in.

To Multiclass in Mini20 simply take an additional class at your next level break, subject to GM permission and the meeting of class requirements. Gaining first level in a new class gets the character all weapons training, skill bonus and special abilities of the new class.

It is not recommended for Games Masters to allow more than two class combinations however as this can lead unbalanced games.

Characters Multiclassing to first level mage do not get a spell book for free.

EXAMPLE

The 1st level adventurers have just completed a dungeon and defeated an EL2 trap, 16 kobolds (EL 5) and the EL3 leader.

That's a total of EL10, so they all advance to level 2.

They need to defeat another 20 Encounter Levels to reach 3rd Level.

SAMPLE CHARACTER

Amindel - 1st level Mage Elf

Attributes: Str 8 (-1), Mind 15 (+2), Dex 12 (+1), Cha 10

Attack Melee: +0, **Missile:** +2 **AC:** 11

Skills: Phys +0, Know +4, Sub +1, Comm+1

Reserve: 4

Special Abilities: Dark vision

Feats: Find Familiar, Light weapons

Hit Points: 12

Equipment: Dagger, short sword, clothes, spell book

Known Spells: all 0 level spells, Mage Armour, Magic Missile

Amindel - 4th level Mage/ 2nd level Rogue Elf

Attributes: Str 8 (-1), Mind 15 (+2), Dex 12 (+1), Cha 10

Attack Melee: +4, **Missile:** +6 **AC:** 14

Skills: Phys +4, Know +9, Sub +9, Comm+6

Reserve: 9

Special Abilities: Dark vision, Back stab +1d6, +1 to Save/Disable/Search Traps, Use Magic items

Feats: Find Familiar, Light and one-handed weapons, Light armours, Dodge, Magical Aptitude.

Hit Points: 35

Equipment: Dagger, Short sword, clothes, Leather armour, spell book

Known Spells: all 0, 1st and 2nd level spells

Amindel - 6th level Mage/ 5th level Rogue Elf

Attributes: Str 8 (-1), Mind 16 (+3), Dex 12 (+1), Cha 10

Reserve: 14

Special Abilities: Dark vision, Back stab +2d6, +2 to Save/Disable/Search Traps, Use Magic items

Feats: Find Familiar, Light and one-handed weapons, Light armours, Dodge, Magical Aptitude, Personal Improvement.

Hit Points: 55

Equipment: Dagger, Short sword, clothes, Leather armour, spell book

Known Spells: all 0, 1st and 2nd level spells, Fireball and Dispel Magic

EQUIPMENT LIST

The most common coin is the gold piece (gp).

A gold piece is worth 10 silver pieces. Each silver piece is worth 10 copper pieces (cp). In addition to copper, silver, and gold coins, there are also platinum pieces (pp), which are each worth 10 gp.

You begin with a certain amount of acquired wealth, determined by your character class.

Class Amount

Fighter 150 gp

Rogue 125 gp

Mage 75 gp

Monks 30 gp

Cleric 120 gp

The character uses this accumulated wealth to purchase his initial weapons, armour, and adventuring equipment, using the price lists on the tables below.

WEAPONS

Here is the format for weapon entries (given as column headings on the table below).

Cost: This value is the price for purchasing the weapon. The cost includes miscellaneous gear that goes with the weapon.

Damage: The Damage column gives the damage dealt by the weapon on a successful hit.

Range Increment: Any attack at less than this distance is not penalized for range.

However, each full range increment imposes a cumulative -2 penalty on the attack roll. A thrown weapon has a maximum range of five range increments. A projectile weapon can shoot out to ten range increments.

Note that crossbows require one round to reload.

Weapon	Cost	Damage	Range
Unarmed Strike	-	1d3	-
<i>Light Weapons</i>			
Axe, throwing	8 gp	1d6	10 ft.
Dagger	2 gp	1d4	10 ft.
Hammer, light	1gp	1d6	20 ft.
Handaxe	6 gp	1d4	-
Mace, light	5 gp	1d6	-
Pick, light	4 gp	1d4	-
Sap	1gp	1d6	-
Sickle	6 gp	1d6	-
Sword, short	10 gp	1d6	-
<i>One-Handed Weapons</i>			
Battleaxe	10 gp	1d8	-
Club	-	1d6	10 ft.

Sling	-	1d4	50 ft.
<i>Marksman</i>			
Longbow	75 gp	1d8	100 ft.
Crossbow, heavy	50 gp	1d10	120 ft.
Net	20 gp	-	10 ft.

ARMOUR & SHIELDS

Here is the format for armour entries (given as column headings on the table below).

Cost: This value is the price for purchasing the armour.

AC Bonus: The column gives the Armour Class bonus provided by the armour.

Armour	Cost	AC Bonus
<i>Light Armour</i>		
Padded	2 gp	+1
Leather	10 gp	+2
Studded Leather	25 gp	+3
Chain Shirt	100 gp	+4
<i>Medium Armour</i>		
Hide	15 gp	+3
Scale Mail	50 gp	+4
Chainmail	150 gp	+5
Breastplate	200 gp	+5
<i>Heavy Armour</i>		
Splint Mail	200 gp	+6
Banded Mail	250 gp	+6
Half-plate	600 gp	+7
Full Plate	1500 gp	+8
<i>Shields</i>		
	Cost	AC Bonus
Buckler	15 sp	+1
Shield, light wooden	3 gp	+1
Shield, light steel	9 gp	+1
Shield, heavy wooden	7 gp	+2
Shield, heavy steel	20 gp	+2
Shield, tower	30 gp	+4

ADVENTURING EQUIPMENT

Here is the format for equipment entries (given as column headings on the table below).

Cost: This value is the price for purchasing the desired equipment.

Equipment	Cost
<i>Adventuring Gear</i>	
Acid (flask)	10 gp
Antitoxin (vial)	50 gp
Artisan's Tools	5 gp
Backpack (empty)	2 gp
Barrel (empty)	2 gp
Basket (empty)	4 SP
Bedroll	1SP
Bell	1gp
Blanket, winter	5 SP
Block and Tackle	5 gp
Bottle, wine, glass (empty)	2 gp

Bucket (empty)	5 SP
Caltrops	1gp
Candle	1CP
Canvas (sq. yd.)	1SP
Case, map or scroll	1gp
Chain (10 ft.)	30 g
Chalk, 1 piece	1CP
Chest (empty)	2 gp
Craftsman's Tools	5 gp
Crowbar	2 gp
Disguise Kit	50 gp

Horse, light	75 gp
Pony	30 gp
Saddle, military	20 gp
Saddle, pack	5 gp
Saddle, riding	10 gp
Saddlebags	4 gp
Stabling (per day)	5 SP
Warhorse, heavy	400 gp
Warhorse, light	150 gp
Warpony	100 gp

FAST PACKS

This chapter provides a way for a player to quickly equip his or her PC or a GM to equip an NPC or Hireling on the fly. Additionally, these optional kits can be used to give a starting point from which to customize new characters.

Choose a pack or roll 1d6 to select one randomly, cost is 50 Gold Pieces each.

Finally, add the following, based on your Class:

Cleric: Silver Holy symbol & 5 Gold Pieces

Fighter: Vial of Holy Water & 5 Gold Pieces

Mage: Spell book & 2 Spell Pouches & 5 Gold Pieces

Rogue: Thieves Tools

Pack A (1-2)

Backpack
Belt Pouch
Bedroll
Lantern (hooded)
10 Oil Flasks
Flint & Steel
Shovel
2 sets of Caltrops
Signal Whistle
Waterskin
Iron Rations (4 days)

Pack B (3-4)

Backpack
Belt Pouch
Bedroll
10 Torches
4 Oil Flasks
10 pieces of chalk Flint & Steel
10ft Pole
Mirror
Crowbar
Waterskin
Iron Rations (4 days)

Pack C (5-6)

Backpack
Belt Pouch
Bedroll
Tent
10 Torches
5 Oil Flasks
50ft Rope
Flint & Steel
Grappling Hook
10ft Pole
Waterskin
Iron Rations (4 days)

GAME MASTER'S GUIDE

DISEASE

Diseases have various symptoms and are spread through a number of ways. Several typical diseases are summarized below. The entries for diseases include the following information:

Name of the disease: Type, DC, incubation, damage.

Type lists the disease's method of delivery (contact, inhaled, or injury). DC lists the phys+STR check DC needed to prevent infection. Incubation lists the time before damage begins. Damage lists the ability damage the character takes after incubation and each day afterward.

Cackle Fever: Inhaled, DC 16, 1day, -1d6 MIND.

Filth Fever: Injury, DC 12, 1d3 days, -1d3 DEX and 1d3 STR.

Mindfire: Inhaled, DC 12, 1day, -1d4 MIND.

Red Ache: Injury, DC 15, 1d3 days, -1d6 STR.

Shakes: Contact, DC 13, 1day, -1d8 DEX.

EXTREME HEAT & COLD

If not wearing suitable protection, a character must make a Phys+STR check once every 10 minutes (DC 15, +1per previous check), taking 1d6 damage on each failed save.

FALLING DAMAGE

A falling character takes 1d6 hp of damage per 10 feet fallen. If the character makes a successful Phys+DEX roll, he takes only half damage. The DC for the phys+DEX roll is equal to the depth fallen in feet.

In the event that the fall ends in an area laden with spikes or jagged rocks, add +1hp of damage to falling damage per 10' fallen (with a maximum of +10 hp).

POISON

Characters can possibly take damage from a weapon that has been poisoned, be attacked by a creature whose natural attacks feature poison, consume poison hidden in food or drink, or be poisoned in some other way. Several typical poisons are summarized below.

The entries for poisons include the following information:

Name of the poison: Type, DC, damage, price.

Type lists the poison's method of delivery (contact, ingested, inhaled, or injury). DC lists the phys+STR check DC needed to avoid the poison's damage.

Damage is expressed as "xdx/xdx." The first number is the initial damage, taken immediately upon failing the phys+STR check against the poison.

The second number is the secondary damage, taken one minute after exposure to the poison if a second phys+STR check is failed. Ability damage is temporary unless marked with an asterisk(*), in which case the loss is permanent.

Unconsciousness lasts 1d3 hours.

Price lists the cost for one dose of the poison. It can usually only be obtained through less- than-reputable sources, as the possession of poisons are commomly illegal.

Arsenic: Ingested, DC 13, -1 STR/-1d8 STR, 120 gp.

Blue Whinnis: Injury, DC 14, -1 STR/ unconsciousness, 120 gp.

Burnt Othur Fumes: Inhaled, DC 18, -1 STR*/-3d6 STR, 2,100 gp.

Deathblade: Injury, DC 20, -1d6 STR/-2d6 STR, 1,800 gp.

Insanity Mist: Inhaled, DC 15, -1d4 MIND/-2d6 MIND, 1,500 gp.

Nitharit: Contact, DC 13, 01-3d6 STR, 650 gp.

Oil of Taggit: Ingested, DC 15, O/unconsciousness, 90 gp.

Malys Root Paste: Contact, DC 16, -1 DEX/-2d4 DEX, 500 gp.

Monstrous Scorpion (tiny): Injury, DC 12, -1 STR/-1 STR, 50 gp.

Monstrous Scorpion (small): Injury, DC 12, -1d2 STR/-1d2 STR, 100 gp.
Monstrous Scorpion (large): Injury, DC 14, -1d4 STR/-1d4 STR, 200 gp.
Monstrous Scorpion (huge): Injury, DC 18, -1d6 STR/-1d6 STR, 400 gp.
Monstrous Spider (tiny): Injury, DC 10, -1d2 STR/- 1d2 STR, 85 gp.
Monstrous Spider (small): Injury, DC 10, -1d3 STR/- 1d3 STR, 125 gp.
Monstrous Spider (large): Injury, DC 13, -1d6 STR/- 1d6 STR, 250 gp.
Monstrous Spider (huge): Injury, DC 16, -1d8 STR/- 1d8 STR, 500 gp.
Sassone Leaf Residue: Contact, DC 16, -2d12 hp/- 1d8 STR, 300 gp.
Sleep Poison: Injury, DC 13, unconsciousness/ unconsciousness for 2d4 hours, 75 gp.
Snake (medium viper): Injury, DC 11, -1d6 STR/- 1d6 STR, 120 gp.
Snake (large viper): Injury, DC 11, -1d6 STR/-1d6 STR, 120 gp.
Snake (huge viper): Injury, DC 14, -1d6 STR/-1d6 STR, 250 gp.
Wyvern: Injury, DC 17, -2d6 STR/-2d6 STR, 3,000 gp.

TRAPS

Whether inside a dungeon or a nobleman's manor house, adventurers can often be hurt, or even killed, without ever encountering a monster of any kind, as many dungeons are filled with debilitating or lethal traps set to keep wayward hands off of fantastic treasures. Several typical traps of varying Encounter Levels are summarized below.

The entries for traps include the following information:

Type of trap: Attack (damage), Save DC, Search DC, Disable DC.

Type lists the trap used and the effect it has. Attack shows the traps attack bonus or type of effect.

Damage shows the amount and type of damage the trap deals.

Save DC lists the phys+DEX check DC needed to either avoid the trap entirely, or to take only 1/2 the listed damage (if this is possible).

Search DC lists the DC for the know+MIND check necessary to find the trap without triggering it. Disable DC lists the DC for the sub+DEX check necessary to disarm the trap safely.

EL1 Traps

Basic Arrow Trap: Atk +10 (1d6, arrow); Search know+MIND DC 20, Disable sub+DEX DC 20.

Camouflaged Pit Trap: 10 ft. deep (1d6, fall); Save DC 15 to avoid; Search DC 24, Disable DC 20.

Poison Dart Trap: Atk +8 (1d4 plus poison, dart); Search DC 20, Disable DC 18.

EL2 Traps

Burning Hands Trap: spell effect (1d4, fire); Save DC 11 for 1/2 damage; Search DC 26, Disable DC 26.

Large Net Trap: Atk +5 (-); Save DC 14 to avoid; Search DC 20, Disable DC 25.

Pit Trap: 40 ft. deep (4d6, fall); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL3 Traps

Fire Trap: spell effect (1d4+3, fire); Save DC 13 for 1/2 damage; Search DC 27, Disable DC 27.

Pit Trap: 60 ft. deep (6d6, fall); Save DC 20 to avoid; Search DC 20, Disable DC 20.

Poisoned Arrow Trap: Atk +12 (1d8 plus poison, arrow); Search DC 19, Disable DC 15.

EL4 Traps

Lightning Bolt Trap: spell effect (5d6, electricity); Save DC 14 for 1/2 damage; Search DC 28, Disable DC 28.

Spiked Pit Trap: 60 ft. deep (6d6, fall), Atk +10 (1d4 each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

Wall Scythe Trap: Atk +20 (2d4+8, scythe); Search DC 21, Disable DC 18.

EL5 Traps

Falling Block Trap: Atk +15 (6d6, slam); Search DC 25, Disable DC 17.

Fireball Trap: spell effect (1d4+7, fire); Save DC 16 for 1/2 damage; Search DC 29, Disable DC 29.

Poisoned Wall Spikes: Atk +16 (1d8+4 plus poison, spikes); Search DC 17, Disable DC 21.

EL6 Traps

Compacting Room Trap: walls move together (12d6, crush); Search DC 20, Disable DC 22.

Lightning Bolt Trap: spell effect (10d6, electricity); Save DC 14 for 1/2 damage; Search DC 28, Disable DC 28.

Spiked Pit Trap: 100 ft. deep (10d6, fall), Atk +10 (1d4+5 each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL7 Traps

Black Tentacles Trap: spell effect (tentacles) Atk +7 (1d6+4 each, 1d4+7 tentacles); Search DC 29, Disable DC 29.

Chain Lightning Trap: spell effect (11d6 to nearest target +5d6 each to up to 11 secondary targets, electricity); Save DC 19 for 1/2 damage; Search DC 31, Disable DC 31.

Well-camouflaged Pit Trap: 70 ft. deep (7d6, fall); Save DC 25 to avoid; Search DC 27, Disable DC 18.

EL8 Traps

Destruction Trap: spell effect (death); Save DC 20 (phys+STR) for 10d6 damage; Search DC 32, Disable DC 32.

Power Word Stun Trap: spell effect (stun 2d4 rounds); Search DC 32, Disable DC 32.

Well-camouflaged Pit Trap: 100 ft. deep (10d6, fall); Save DC 20 to avoid; Search DC 27, Disable DC 18.

EL9 Traps

Dropping Ceiling: ceiling moves down (12d6, crush); Search DC 20, Disable DC 16.

Incendiary Cloud Trap: spell effect (4d6/round for 15 rounds, fire); Save DC 22 for 1/2 damage; Search DC 33, Disable DC 33.

Wide-mouthed Spiked Pit with Poisoned Spikes: 70 ft. deep (7d6, fall), Atk +10 (1d4+5 plus poison each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL10 Traps

Crushing Room: walls move together (16d6, crush); Search DC 22, Disable DC 20.

Crushing Wall Trap: Atk automatic (18d6, crush); Search DC 20, Disable DC 25.

Energy Drain Trap: Atk +8 (2d4 negative levels for 24 hours); Save DC 23 to avoid; Search DC 34, Disable DC 34.

MONSTER LIST

Skills: All unintelligent creatures have Physical as Primary Skill, Subterfuge and Communication as Secondary skills and Knowledge as Tertiary skill such creatures have a level equal to their number of Hit Dice. If the creature is intelligent, decide skill bonuses and Level/Hit Dice by class assigned to the monster.

Add stat bonuses to suit and as logic dictates.

Monster Advancement: To make a tougher monster, add more Hit Dice; each additional HD/Level adds to their skills.

For each doubling of the Hit Dice, increase the dice size for natural attacks (ie, d4->d6, d6->d8, etc) and AC by 2 points.

Create your own: Assign Hit Dice/Level. Skill levels are based either on class or standard monster skills. Add stat bonuses to suit.

Animal

Badger: HD 1 (6 hp), AC 15, Claw +4 (1d2-1) - Size S

Black Bear: HD 3 (19 hp), AC 13, Claw +6 (1d4+4) or bite +1(1d6+2) - Size L

Brown Bear: HD 6 (51 hp), AC 15, Claw +11 (1d8+8) or bite +6 (2d6+4) - Size L

Bison: HD 4 (37 hp), AC 13, Gore +8 (1d8+9) - Size L

Boar: HD 3 (25 hp), AC 16, Gore +4 (1d8+3) - Size M

Cat: HD 0 (2 hp), AC 14, Claw +4 (1d2-4) - Size T

Crocodile: HD 3 (22 hp), AC 16, Bite +6 (1d8+6) or tail slap +6 (1d12+6) - Size M

Dog: HD 1 (6 hp), AC 15, Bite +2 (1d4+1) - Size S

Donkey: HD 2, AC 13, Bite +1(1d2) - Size L

Eagle: HD 1 (5 hp), AC 14, Talons +3 (1d4), flies - Size S – EL +1

Giant Crocodile: HD 7 (59 hp), AC 16, Bite +11(2d8+12) or tail slap +11(1d12+12) - Size L

Horse (heavy): HD 2 (19 hp), AC 13, Hoof -1 (1d6+1) - Size L

Horse (light): HD 2 (19 hp), AC 13, Hoof -2 (1d4+ 1) - Size L

Mule: HD 1, AC 13, Hoof +4 (1d4+3) - Size M

Pony: HD 1 (19 hp), AC 13, Hoof -1 (1d6+1) - Size M

Snake (constrictor): HD 3 (19 hp), AC 15, Bite +5 (1d3+4), constrict (1d3+4) - Size M

Snake (giant constrictor): HD 11, AC 15, Bite +13 (1d8+10), constrict (1d8+10) - Size L

Snake (small viper): HD 1, AC 17, Bite +4 (1d2-2 plus poison) - Size T – EL +1

Snake (medium viper): HD 1, AC 16, Bite +4 (1d4-1 plus poison) - Size T – EL +1

Snake (large viper): HD 3 (19 hp), AC 15, Bite +4 (1d4 plus poison) - Size M – EL +1

Snake (huge viper): HD 6, AC 15, Bite +6 (1d6+4 plus poison) - Size L – EL +1

War Dog: HD 2, AC 16, Bite +3 (1d6+3) - Size S

Warhorse (heavy): HD 4, AC 14, Hoof +6 (1d6+4) - Size L

Warhorse (light): HD 3, AC 14, Hoof +4 (1d4+3) - Size L

Warpony: HD 2, AC 13, Hoof +3 (1d3+2) - Size M

Wolf: HD 2, AC 14, Bite +3 (1d6+1) - Size M

Ankheg Effective Level +1

HD 3, AC 18, Bite +7 (2d6+7 plus 1d4 acid) - Size L

Assassin Vine

HD 4, AC 15, Slam +7 (1d6+7), constrict (1d6+7) - Size M

Choker

HD 3, AC 17, Tentacle +6 (1d3+3) - Size L

Cockatrice Effective Level +2

HD 5, AC 14, Bite +9 (1d4-2 plus petrification, DC 12 phys+STR to negate), flies- Size H

Dinosaur

Deinonychus: HD 4, AC 16, Talons +6 (2d6+4) or bite +1(2d4+2) - Size L

Megaraptor: HD 8, AC 16, Talons +9 (2d8+5) or bite +4 (2d6+2) - Size H

Triceratops: HD 16, AC 18, Gore +20 (2d8+15) - Size H

Tyrannosaurus: HD 18, AC 14, Bite +20 (3d6+13) - Size H

Dire Animal

Dire Bear: HD 12, AC 17, Claw +19 (2d4+10) and bite +13 (2d8+5) - Size H

Dire Rat: HD 1, AC 15, Bite +4 (1d4 plus disease) - Size M – EL +1

Dire Wolf: HD 6, AC 14, Bite +11 (1d8+10) - Size L

Dragon Effective Level +2

Very Old: HD 31, AC 36, Bite +40 (4d6+13) or breath 18d10 fire, DC 33 phys+DEX to dodge for half, flies - Size H

Adult: HD 23, AC 30, Bite +32 (2d8+11) or breath 12d10 fire, DC 26 phys+DEX to dodge for half, flies- Size H

Young Adult: HD 19, AC 28, Bite +24 (2d6+6) or breath 10d8 cold, DC 23 phys+DEX to dodge for half, flies - Size H

Young: HD 13, AC 21, Bite +20 (2d6+7) or Breath 10d10 DC24 phys+DEX to dodge for half, flies
- Size L

Earth Elemental (large)

HD 8, AC 18, Slam +12 (2d8+7) -Size L

Gargoyle Effective Level +2

HD 4, AC 16, Claw +6 (1d4+2), immune to non magical attacks, flies –Size M

Gelatinous Cube Effective Level +2

HD 4, AC 3, Slam +1(1d6 +1d6 acid) plus engulf (paralysis + 1d6 acid/round, DC 13 phys+DEX to negate) –Size L

Ghoul Effective Level +1

HD 2, AC 14, Bite +2 (1d6+1 plus paralysis) or claws +0 (1d3 plus paralysis) –Size M

Griffon

HD 7, AC 17, Bite +11(2d6+4), flies- Size L

Hellhound Effective Level +1

HD 4, AC 16, Bite +5 (1d8+1 plus 1d6 fire) - Size L

Hill Giant

HD 12, AC 20, Greatclub +16 (2d8+10) or rock +8 (2d6+7) - Size H

Nymph Effective Level +2

HD 2, AC 17, Dagger +6 (1d4) or stunning glance (unable to act for 2d4 rounds, DC 17 phys+STR to negate) – Size M

Otyugh Effective Level +1

HD 6, AC 17, Tentacle +4 (1d6 plus disease) – Size L

Owlbear

HD 5, AC 15, Claw +9 (1d6+5) – Size L

Rust Monster Effective Level +1

HD 5, AC 18, Antennae touch +3 (rust)- Size M

Shadow Effective Level +2

HD 3, AC 13, Incorporeal touch +3 (1d6 Str) , immune to non magical attacks or non silver weapons- Size M

Shambling Mound

HD 8, AC 20, Slam +11(2d6+5), constrict (2d6+7) – Size L

Skeleton Warrior

HD 1, AC 15, Scimitar +1(1d6+1) or claw +1melee (1d4+1) – Size M

Stirge Effective Level +1

HD 1, AC 16, Touch +7 (attach),flies - Size T

Stone Golem

HD 14, AC 26, Slam +18 (2d10+9) – Size H

Treant Effective Level +1

HD 7, AC 20, Slam +12 (2d6+9) – Size M, May animate 1d6 trees having same stat as himself

Vampire Spawn Effective Level +2

HD 4, AC 15, Slam +5 (1d6+4 plus energy drain -1 level, DC 14 phys+STR to negate) or blood drain (-1d4 STR) - Size M

Vermin Effective Level +1

Monstrous Scorpion (tiny): HD 0, AC 14, Claw+2 (1d2-4) or sting -3 (1d2-4 plus poison)

Monstrous Scorpion (small): HD 1, AC 14, Claw+1 (1d3-1) or sting -4 (1d3-1 plus poison)

Monstrous Scorpion (large): HD 5, AC 16, Claw+6 (1d6+4) or sting +1(1d6+2 plus poison)

Monstrous Scorpion (huge): HD 10, AC 20, Claw+11 (1d8+6) or sting +6 (2d4+3 plus poison)

Monstrous Spider (tiny): HD 0, AC 15, Bite +5 (1d3-4 plus poison)

Monstrous Spider (small): HD 1, AC 14, Bite +4 (1d4-2 plus poison)

Monstrous Spider (large): HD 4, AC 14, Bite +4 (1d8+3 plus poison)

Monstrous Spider (huge): HD 8, AC 16, Bite +9 (2d6+6 plus poison)

Wererat Effective Level +2

Human Form: HD 1, AC 15, Rapier +2 (1d6+1) or light crossbow +1(1d8) - Size M

Dire Rat Form: HD 2, AC 17, Bite +6 (1d4+1 plus disease), immune to non magical attacks or non silver weapons - Size S

Hybrid Form: HD 3, AC 16, Rapier +5 (1d6+1) or light crossbow +4 (1d8), immune to non magical attacks or non silver weapons - Size M

Werewolf Effective Level +2

Human Form: HD 1, AC 17, Longsword +3 (1d8+1) or light crossbow +2 (1d8) - Size M

Wolf Form: HD 3d8+7 (20 hp), AC 16, Bite +5 (1d6+3), immune to non magical attacks or non silver weapons- Size M

Hybrid Form: HD 3d8+7 (20 hp), AC 16, Claw +4 (1d4+2), immune to non magical attacks or non silver weapons- Size M

Wight Effective Level +3

HD 4d12 (26 hp), AC 15, Slam +3 (1d4+1 plus energy drain), immune to non magical attacks -Size M

Wraith Effective Level +3

HD 5d12 (32 hp), AC 15, Incorporeal touch +5 (1d4 plus -1d6 STR, DC 14 phys+STR to negate), immune to non magical attacks- Size M

Wyvern Effective Level +2

HD 7d12+14 (59 hp), AC 18, Sting +10 (1d6+4 plus poison) or Talon +10 (2d6+4) or Bite +10 (2d8+4), flies -Size H

Zombie

HD 2d12+3 (16 hp), AC 11, Slam +2 (1d6+1) or club +2 melee (1d6+1) -Size M

Realms of Renown

An UltraMicrolite20 game

Images by Larry Elmore @ <http://www.larryelmore.com>

“Realms of Renown is a fantasy game where you can be anyone, a heroic dwarven warrior, wandering nomad, mysterious enchantress or marauding ogre mage. The action is fast, there are no complicated rules, and being the GM (Game Master) doesn’t leave you at wit’s end. In Realms of Renown the rules flow together allowing players to concentrate on adventuring and the GM on weaving a tale around the characters.”

Creating your Character

What do you have in mind, perhaps the heroic warrior, a swashbuckling rogue or a mysterious crone? Form an image in your mind of what you would like your character to be like. Such as, will he or she be wearing heavy armor or something light to stay nimble? Will they want to be able to fight out in the open or something a bit subtler? Do you plan on having your character wield a certain weapon? Characters are made up of an assortment of three stats that are assigned a number to indicate strength or weakness in that area. Now that you have a mental picture of your character the first thing is to learn how stats affect your character.

Stats

Strength – STR

Dexterity – DEX

Mind – MIND.

These stats can have scores that range from -1 to 6 which determine how easy or difficult it will be to perform various actions. To help figure out what stat should get what score read through the rest of the “*Stats*” section and then read the “*Actions*” section to get an idea of how stats might affect things you want your character to be good at. If you’re still not entirely sure you can change them later in the character creation process. Okay, so back to the three stats...

Strength – The sheer muscle power and combat training of your character.

- Adds to melee attack rolls.
- Allows a character to use better armor.
- Allows a character to do more damage.

Dexterity – Is a measure of one’s quickness and agility.

- Adds to armor class.
- Adds to ranged attack rolls.
- Allows a character to use dexterity for offense as well as defense.

Mind – The total intellect, wisdom and common sense of your character.

- Adds to defense against mind spell attacks.
- Allows a character to use Wands and Scrolls.
- Allows a character to cast more spells per day.

Images by Larry Elmore @ <http://larryelmore.com>

Take your three stats; STR, DEX, and MIND and share a total of five points between them, you can reduce one stat to -1 to get an extra point. These will be your stat bonuses.

Stat	Strength	Dexterity	Mind
-1	-	-	-
0	-	-	-
+1	Use a shield	Use light armor	Use scrolls/wands
+2	Use medium armor	Use DEX bonus for attacks	-5 per spell per day*
+3	Use heavy armor	Can make 2 attacks at -2 each	-4 per spell per day*
+4	2 “hits” damage with a two-handed weapon.	Sneak attack	-3 per spell per day*
+5	Cleave	Pick locks/disable traps	-2 per spell per day*
+6	Power Attack	Death blow	-1 per spell per day*

* See “*Magic*”

Strength

1. Use a shield – Character can use shields, bonus to armor class +2.
2. Use medium armor – Character can wear medium armor, bonus to armor class +3.
3. Use heavy armor – Character can wear heavy armor, bonus to armor class +5.
4. 2 “hits” damage with a two-handed weapon – Character does 2 “hits” of damage on a successful attack when wielding a two-handed weapon.
5. Cleave – A character that kills an enemy may make an immediate additional attack on an enemy within melee range.
6. Power attack – A character may give up some of or their entire attack bonus from Strength and put it towards damage instead.

Dexterity

1. Use light armor – Character can wear light armor, bonus to armor class +1.
2. Use DEX bonus for attacks – A character may use their DEX bonus for melee attacks.
3. Can make 2 attacks at -2 each – A character can make 2 attacks in one round at a penalty of -2 to each attack roll.
4. Sneak attack – A character that approaches an enemy unseen may deal double damage on their first attack.
5. Pick locks/disable traps – The character has the knowledge to locate traps, disarm them, and to pick locks.
6. Death blow – A character that approaches an enemy unseen may make a death blow. A successful attack drops the enemy to 0 “hits”.

Mind

1. Use scrolls/wands – The character may use scrolls and wands.
2. -5/-4/-3/-2/-1 per spell per day – Penalty per spell cast that day. See “*Magic*”.

Where are Character Classes?

There are no set classes but you are welcome to a title or trade that you could refer to your character as having. This will make it easier for other players to get an idea of who you are. The table below shows some examples of different types of character titles, or trades, separated by groups into what a character of a strong certain stat may pursue.

Characters of Strength	Characters of Mind	Characters of Dexterity
Adventurer	Abbot	Assassin
Barbarian	Acolyte	Bandit
Brigand	Archmage	Bard
Cavalier	Chronicler	Blackguard
Cavalrymen	Cleric	Friar
Crusader	Conjurer	Guide
Explorer	Crone	Hermit/Hermitess
Footman	Curate	Initiate
Gladiator	Druid	Journeyman
Guard	Enchanter/Enchantress	Knave
Holy Warrior	Hag	Longbowman
Knight	Hedge Wizard	Minstrel
Man/Woman-at-Arms	Heretic	Monk
Martyr	Illusionist	Ninja
Mercenary	Mage	Outlaw
Militiaman	Missionary	Pathfinder
Nomad	Necromancer	Pirate
Paladin	Pilgrim	Ranger/Rangeress
Patron	Priest/Priestess	Robber
Raider	Seer	Rogue
Rebel	Shaman	Scout
Renegade	Sorcerer	Smuggler
Ronin	Spellbinder	Spy
Samurai	Thaumaturge	Thief
Seaman	Theurgist	Traveler
Soldier	Warlock	Troubadour
Squire	Witch	Wayfarer
Warmonger		

Remember, these are not guidelines just ideas. Feel free to make up your own or use one from above. You might even combine words to form something unique, such as, A Holy Heretic, “The Naïve Knave”, An Elemental Enchantress, or “The White Wayfarer”.

Actions

Actions are things such as bashing doors, climbing, disguise, hiding, gathering information, jumping, listening, sneaking, etc. the list goes on and on. A character can try anything. Anytime a character wishes to perform an action an Action Roll is made versus the Difficulty Class (DC) of the action performed. The GM decides which stat is appropriate to the action being performed and how difficult it will be for the action to succeed. For instance, climbing would use STR bonus, dodging a falling rock is DEX bonus, finding a trap is MIND bonus and disabling a trap uses the DEX bonus.

Actions are resolved by rolling 1d20 + relevant stat bonus (1d20 means roll a twenty-sided dice one time). Roll equal or higher than the given Difficulty Class (DC) or higher than the opponent's skill roll to succeed.

Action is...	DC
Simple	2
Easy	5
Average	10
Hard	15
Extremely difficult	20

Your GM may use these DC numbers or a DC number in-between depending on the situation. A GM may also discuss a DC with the person wishing to perform the action to get their point of view on the chances of success and then both agree mutually on a DC.

Example- Hadsui wishes to roll under a portcullis before it comes down. The GM decides that dexterity would be the relevant stat and that it would be a hard, DC 15, action. The player counters saying that since a fellow party member defeated one of the opponents helping to lower the portcullis that it is now coming down at a slower speed. The GM agrees and negotiates a DC12. The player would take a 1d20 roll and add their character's dexterity bonus and try to roll equal to or higher than the DC12 for success. A player may also decide the chances are too risky and pass on the idea.

Combat

Image by Larry Elmore @ <http://www.larryelmore.com>

How Combat Works

First of all, to begin combat, everyone rolls a 1d20 + DEX bonus, including the GM for the party's opponents. This determines who acts first and in what order, highest number first. Combat is divided into rounds and each character and opponent gets a chance to act in the round. Once everyone, both party members and opponents, has had a turn than that "round" is considered over and the person who attacked first, back at the very beginning of it all, gets to go again which starts another round.. These rounds account for about 6 seconds of time.

Swinging a weapon or shooting a bow is done by rolling a 1d20 and adding the characters STR bonus for melee attacks, swords and daggers, or DEX bonus for ranged attacks, bows and slings. See "**Magic**" for spell attacks. This number must beat the target's armor class to be successful. A successful attack normally deals 1 hit worth of damage.

A character's armor class is $10 + \text{DEX bonus} + \text{Armor} + \text{Spell bonus (if any)}$. Light armor is +1, medium armor is +3, and heavy is +5. A shield can add a further +2.

A character's health is tracked by "hits". A character has 3 hits + STR bonus to start. Being attacked and exceeding your number of hits leaves you unconscious. If you are

knocked unconscious roll a 1d20 + STR bonus, needing a DC15 or better to survive. Larger critters can take more hits before dying but that's up to the GM.

In order to accommodate monk or ninja type characters bare-handed fighting may be used by considering all hits to be "non-lethal". When an opponent is reduced to 0 hits they make their DC15 survival roll but instead of death occurring on a failed roll the opponent simply does not regain consciousness. In the next round the character may deliver a "death blow" which is pretty self explanatory.

Overwhelming the opponent happens when there is more than one person attacking the same target in the same round. Each attacker beyond the first against the same target in the same round adds +1 to their attack rolls for each attacker before them. So, a second attack on the same target in the same round by a party member would be at +1, a third attack at +2, etc.

Characters move 40' in light or no armor, 30' in medium armor and 20' in heavy armor.

Image by Larry Elmore @ <http://larryelmore.com>

Magic

Image by Larry Elmore @ <http://www.larryelmore.com>

Characters cast spells by drawing from the energy around them or by petitioning their god, and then channeling this power through their body and releasing it as a spell. Magic can take any form the caster wishes. To cast a spell a mage makes a magic roll, $1d20 + \text{MIND}$ bonus. If a $d20$ rolls a natural twenty, add and roll again. If further natural twenties are rolled, continue adding and rolling. For every 5 points of the magic roll the caster may add 1 to either; effect (damage, healing, stat buff, etc.), duration (rounds), or area of effect (1 point per 5' radius). A spell will always have at least 1 point of effect if the magic roll is not 0 or below. A caster can target any 5' square, himself, or any one opponent in sight (within reason) without using any points from the magic roll.

Example, a wandering priest wishes to cast a healing spell. He makes a magic roll and gets a 14 then adds his +2 MIND bonus = 16. For every 5 points of the magic roll the priest gets 1 point of effect, or healing in this case, so he may heal 3 hits of damage.

Casting spells takes a toll on the caster and each spell beyond the first cast that day adds a cumulative penalty to the magic roll depending on the caster's MIND stat. See the "**Stats**" section under MIND. A character may rest for 8 hours to refresh.

To attack an opponent with a spell the caster must beat the target's armor class if making a physical attack, such as a magical flaming arrow. If making an attack on the opponent's mind then the caster must beat the opponent's $1d20 + \text{MIND}$ roll. If the character casts a spell that effects an area, such as a ball of fire, he does not need to beat any opponent's defense.

When a character casts a spell that affects an area, such as a ball of fire, the character must decide how to divide the magic roll between area of effect and damage.

Example, a mage casts a ball of fire with a d20 magic roll of 14 and his MIND bonus of +3 = 17. For every 5 points of the magic roll the mage may get 1 square radius of effect away from the original target square or 1 point of damage. He must decide if he wants 1 square radius of area affected away from the target square and his opponents to take 2 hits of damage, or, 2 squares radius of area affected away from the target square and 1 hit to each person caught in the effect area.

If a caster tries casting a spell that requires more than 1 point to produce the desired result due to effect, duration, and/or area of effect, like a ball of fire which has damage and area of effect, but the caster does not get a magic roll that gives more than 1 point to assign then the spell is considered to only effect the targeted 5' square or it's targeted opponent. If the spell was to have an effect and duration, such as a strength spell on a party member, then the party member's strength receives the 1 point, +1 to strength, and the duration is instantaneous meaning as soon as the party member uses their strength stat the spell expires.

Resurrection. It is possible for a character with magic ability to raise a fellow party member however it is an extremely dangerous undertaking with possibly serious consequences and you really should seek a professional. A caster makes a magic roll and for every 5 points of the magic roll the dead character receives 1 point to put back towards his/her stats, minimum of 1 point as long as the magic roll is 1 or more, and life is restored with 0 hits remaining but conscious. A bad magic roll can leave a character a shell of their former self, albeit alive, but unable to ever reach their original stat points.

Spell examples;

Strength; effect – boosts the targets strength stat +1 for each point used, **duration** – instantaneous (target loses boost as soon as STR stat is used) or 1 round per 1 point used, **area of effect** – target.

Magic Energy Missile; effect – deals 1 “hit” of damage per point used, **duration** – instantaneous, **area of effect** – target.

Move Earth; effect – causes an area of earth, ground, stone, etc. to disappear and reappear at the caster's choice, **duration** – instantaneous, **area of effect** – one 5x5x5' area, plus one additional 5x5x5' area for each point used (additional 5x5x5' areas may be below the first).

Fear; effect – targets must make a d20 + MIND bonus higher than the caster's magic roll or flee for duration, **duration** – 1 round per point used, **area of effect** – 1 square or target, +5' radius per point used.

A character's spell can take any form they can think of as long as effect, duration and area of effect are figured. An “instantaneous” duration does not cost the caster any points nor does area of effect when targeting one 5' square or one target.

GM Info

Other Hazards

Drowning: A character can hold their breath for 5 rounds per point of STR.

Falling: Damage is 1 hit per 10', half on DEX saving throw (round up). DC=depth fallen in feet.

Spikes: Add 1 hit to falling damage.

Poison: STR saving throw to avoid or for half damage, depending on poison.

Heat & Cold: If not wearing suitable protection, STR save once every 10 minutes (DC 15, +1 per previous check), taking 1 hit of damage on each failed save.

Renown

As characters adventure around the realms they become more and more well-known as news of incredible feats done by great heroes travels fast and fame soon follows. Foul deeds done by the not-so-good also garners lots of attention and word spreads quickly to watch for the newest threat to the good people of the land.

Renown is gained from defeating one's opponents and successfully performing difficult actions. GM's may choose to assign titles to characters who achieve high levels of Renown, such as Lord, Master Thief, Grand Wizard, Priest, etc.

Points for Renown are completely up to the GM. Below is a table that may be used for giving out Renown. Renown for successfully performing actions is given to the character that performed the action while Renown for defeating a monster is divided amongst the party.

Monsters Stats Total	Renown	Monsters Stats Total	Renown
0-3	25	13-15	200
4-6	50	16-18	300
7-9	100	19-21	400
10-12	150	22-24	600

Action DC	Renown	Action DC	Renown
15-19	25	23	200
20	50	24	300
21	100	25	400
22	150	26	600

MICROLITE 77

Microlite77 is inspired in part by the game Microlite20, and is, like Microlite20, a trimmed-down version of the Primary Fantasy SRD. Microlite77 is intended to emulate the playing-style of the classic roleplaying game published in 1977.

I would like to thank everyone whose work has inspired or contributed to this work: E. Gary Gygax, Dave Arneson, Randall Stukey, Robin V. Stacey, Ryan Dancey, and especially, **J. Eric Holmes**

HOW TO CREATE A CHARACTER

To begin, roll three six-sided dice and total them. The number rolled is assigned to one of your ability scores. Repeat this process until each ability score has a number from 3-18. There are six basic ability scores (strength, constitution, dexterity, intelligence, wisdom, and charisma).

Strength is obviously important to fighting men, and as such it is considered the *prime requisite* for members of the 'fighting man' class (including dwarves and halflings). There are bonuses to experience for fighting men with strength scores of over 13, so any character with a strength score 13-18 should think about joining that class.

Dexterity represents a character's speed and accuracy. A character with high dexterity is easily able to fire the first shot, strike the first blow. Dexterity is the *prime requisite* for thieves and elves, and grants experience bonuses to thieves and elves with dexterity scores of 13+. no character may become a halfling if his dexterity score is 9 or less, as halflings tend to be noted for their dexterity with weapons.

Constitution is a combination of physical health and willpower to endure. It influences a character's ability to survive paralyzation or being raised from death. Dwarves and halflings tend to be remarkably hardy, so no character may become a member of the dwarf or halfling class who has constitution scores of 9 or less.

Intelligence is the *prime requisite* for the magic-user and elf classes, and so grants experience bonuses to magic-users and elves with intelligence scores of 13+. High intelligence scores allow you to learn more languages.

Wisdom is the *prime requisite* for the cleric class, and so grants experience bonuses to them for scores of 13+.

Charisma is a combination of charm, sexual appeal, and bearing. A character with a high charisma score will be able to convince more people to follow him and aid him in his endeavors, and they will be more loyal to him. A character's charisma score may also determine things such as whether a

female character is killed by goblins, or held captive, or whether a male character gets killed by a vampiress or turned into a vampire as well.

The ability scores may be abbreviated as (STR, DEX, CON, INT, WIS, CHA).

Elves have two prime requisites. Add the bonuses or penalties together before adding them to the experience total (an elf with +5% for intelligence and +10% for dexterity would gain 115 whenever he would gain 100, not 115.5).

Table of ability score effects

prime requisite score of 15 or more	add 10% to experience
prime requisite score of 13-14	add 5% to experience
prime requisite score of 7-8	subtract 10% from experience
prime requisite score of 6 or less	subtract 20% from experience

constitution 18	add 3 to each hit die
-----------------	-----------------------

constitution 17	add 2 to each hit die
-----------------	-----------------------

constitution 15-16	add 1 to each hit die
--------------------	-----------------------

constitution 6 or less	subtract 1 from each hit die (hit die still has a minimum of 1 after adjustment)
------------------------	--

dexterity 13+	all ranged attacks are at +1
---------------	------------------------------

dexterity 8-	all ranged attacks are at -1
--------------	------------------------------

adjusting ability scores to be more advantageous

if you wish, you can raise one ability score in exchange for lowering others. This recognizes that someone may spend more time exercising one skill and less time another, depending on what interests them.

If you are a magic-user or a cleric, you may lower your strength score and raise your prime requisite on a 3-for-1 basis.

Magic-users can lower their wisdom and raise their prime requisite on a two-for-1 basis,

Fighting-men, clerics, halflings, and dwarves can lower intelligence and raise prime requisite on a two-for-1 basis.

Fighting-men, halflings, and dwarves can lower wisdom and raise prime requisite on a three-for-1 basis.

Thieves can raise dexterity, if the reduce intelligence by 2 and wisdom by 1 for each point dexterity is increased.

No ability score can be lowered below 9 in this way.

CHARACTER CLASSES

Fighting-men -- Dwarves, halflings, and humans who choose the fighting-man class gain the following abilities: fighting-men can use all weapons and armor, including magic weapons and armor (halflings can only use weapons and armor if they have been 'cut down' to fit their size. Dwarves

MICROLITE 77

may require similar adjustments for armors such as plate). Each time they gain a level, they roll an 8-sided die for hit points (halflings, however, always roll a d6).

and maces are allowed, but swords and arrows are not.) Clerics roll a six-sided die for hit points each time they advance a level. Cleric saving throws are as follows:

Saving Throws for Halflings, Dwarves, And Human Fighting-men are as follows:

	Spell or magic staff	magic wand	death ray or poison	petrifi- cation	dragon breath
Humans:	16	13	12	14	15
Dwarves/Halflings:	14	11	10	12	14

Spell or magic staff	magic wand	death ray or poison	petrifi- cation	dragon breath
15	12	11	14	16

The number of first level Divine Spells a cleric can use each day is listed below:

Fighting-men advance to level 2 once they have gained 2000 experience, and to level 3 once they have gained a total of 4000 experience.

Cleric, level 1	0
Cleric, level 2	1
Cleric, level 3	2

OPTIONAL: Fighting-men of level 4-9

fighting-men can advance up to level 9 (advancing with each doubling of their experience total) gaining the following abilities.

At level 4, fighting-men add 2 to all attack rolls and saving throws. They also add 1 to their melee damage rolls if they have a strength score of 13 or higher (optional)

At level 7, fighting-men add an additional 3 to all attack rolls, and add 4 to saving saving throws (does not stack with previous saving throw bonus).

If the DM approves, each 100,000 experience points gained past this simply adds 3 hit points (unmodified by constitution) to their hit point total. Halflings add only 2.

a cleric can also turn undead creatures, as shown here.

If there is a number shown, then the cleric has successfully turned the undead if he rolls equal to or higher than that number on 2d6. If there is a 'T' shown, then the undead are always turned. If the attempt at turning is successful, then he rolls 2d6 again to see how many hit dice of undead are turned. Successfully turned undead will not harm the cleric, and will flee from him as quickly as possible.

Special Abilities and Restrictions for Halflings and Dwarves:

Dwarves have infra-red vision, and can see in the dark up to 60 feet if no normal light source is nearby. Dwarves are highly resistant to magic, as shown by their better saving throws against magical effects. Dwarves can note quirks in stonework such as slanting passages, traps, recent or unstable construction, shifting walls, etc. about one-third of the time. Dwarves can speak the common, dwarven, kobold, gnomish, and goblin languages.

Dwarves can advance no higher than level 7.

Halflings are extremely hard to see outdoors, being highly skilled at blending in to trees and bushes (90% chance to avoid notice when outdoors). Halflings have the same uncanny resistance to magic as dwarves. Halflings get +1 to all ranged attacks. Halflings can only advance to level 4.

Clerics – humans who choose to devote their lives to the service of a god, or perhaps simply spend their lives devoted to the fighting of evil, may be granted the ability to invoke Divine Magic. Clerics may wear armor, including magic armor, and may use any BLUNT weapons (cudgels, slings,

Clerics advance to level 2 once they have gained 1500 experience, and to level 3 once they have gained a total of 3000 experience.

OPTIONAL: Clerics of level 4-9

clerics can advance up to level 9 (advancing with each doubling of their experience total) gaining the following abilities.

At level 5, clerics add 2 to all attack rolls and saving throws.

At level 9, clerics add an additional 3 to attack rolls and saving throws.

Their spell-casting ability advances as follows (the second number shown is the number of second level divine spells per day, the third number shown is the number of third level spells per day, etc.):

MICROLITE 77

Cleric, level 4 2/1
Cleric, level 5 2/2
Cleric, level 6 2/2/1
Cleric, level 7 2/2/2
Cleric, level 8 3/2/2/1
Cleric, level 9 3/3/2/2

their ability to turn undead increases as follows:

instead he learns them himself and writes them down in his spell book. In order to learn a spell, the magic-user spends time studying his spell book or spell books and meditating on the words of magic written within. This takes at least one day. As soon as the spell is cast, it fades from the magic-user's mind, and he must spend more time studying before he can cast it again. Always assume that more than a day passes between one adventure and the next, so that the magic-user may enter the next dungeon with as many spells as possible prepared. A magic-user also does not necessarily get to choose which spells are in his spell book to be memorized- this is determined randomly according to this chart:

once a cleric reaches 9th level, each 100,000 experience points gained just adds 2 to their hit point total.

Magic-users – humans who choose to follow the path of magic, and twist the arcane energies of the universe to their will, may someday achieve that goal and become known as magic-users. Magic-users are must not wear armor (they lose their spell-casting ability whenever they are wearing armor) and are unable to use any weapons other than daggers. They can use almost all magical items, but may still not use magical armor or weapons other than magical daggers. Magic-users roll a four-sided die for hit points each level. Magic-user saving throws are as follows:

Spell or magic staff	magic wand	death ray or poison	petrification	dragon breath
15	14	13	13	16

Magic-users can cast arcane spells, as shown below:

Magic-user, level 1 1
Magic-user, level 2 2
Magic-user, level 3 2/1

A magic-user must be able to speak the words of arcane power and gesture with his hands in order to cast a spell, so a magic-user bound, gagged, or both is unable to cast magic. Some spells may also require substances, for example, a corresponding element must be present in order to summon an elemental. A magic-user must be able to concentrate fully on his spell in order for it to work properly, so he can not cast a spell while running or engaged in melee. Unlike clerics, a magic-user's spells are not granted to him by divine means,

Intelligence of magic-	% chance to know any given spell	minimum/maximum spells known per level	
3-4	20 %	2	3
5-7	30 %	2	4
8-9	40 %	3	5
10-12	50 %	4	6
13-14	65 %	5	8
15-16	75 %	6	10
17	85 %	7	all
18	95 %	8	all

For an example, Kelvis the apprentice is a first level magic-user who has not gone on any adventures yet. He has an intelligence score of 14. there is no way he could have learned and copied **all** the first level spells into his spell book, so he determines which ones **are** within his reach in this way: say he wants to learn the spell 'magic missile'. He rolls two ten-sided dice, assigning one to the ones column, and one to the tens column. If the total is less than 65, then he learns the spell and copies it into his spell book. Whether he fails or succeeds, he must then choose a different spell to try for. Once he has reached his maximum number of spells known, he will stop, regardless of whether he has gone through the whole list of first level spells. If he goes through the whole list without reaching his minimum number of spells known, then he goes through it again until he reaches his maximum or comes to the end of the spell list. Is he **still** has fewer spells than his minimum, then he will go through the list again, and so forth.

One way for a magic-user to stretch his number of spells per day is to write some of his spells down on scrolls. Scrolls are

MICROLITE 77

written in magic runes that fade off the page as they are read. Creating a scroll takes 100 gold pieces worth of precious metals and one week of work for each level of the spell being made into a scroll. A magic-user can only make scrolls out of spells he already has in his spell books. Reading a scroll causes the scroll's spell to take effect immediately, but does not count against a magic user's number of spells per day. Other classes cannot use scrolls, except for scrolls of 'protection' and thieves of 4th level or above.

Magic-users advance to level 2 once they have gained 2500 experience, and to level 3 once they have gained 5000 experience, total.

OPTIONAL: magic-users of level 4-9

magic-users can advance up to level 9, advancing in level each time they double their experience total. At level 6, magic-users add 2 to all attack rolls and saving throws.

Their spell-casting ability increases as follows:

Magic-user, level 4	2/2
Magic-user, level 5	2/2/1
Magic-user, level 6	2/2/2
Magic-user, level 7	3/2/2/1
Magic-user, level 8	3/3/2/2
Magic-user, level 9	3/3/3/2/1

once a magic-user has advanced to 9th level, each 100,000 experience points gained simply adds 1 to their hit point total.

Thieves – are humans with special abilities of subterfuge and stealth. Thieves become better at their abilities as they increase in level. Thieves are not truly good, being usually neutral or evil, and chaotic thieves may be as likely to steal from their own party as from enemies. As such, thieves are usually untrusted once their class is known. Thieves can wear no armor heavier than leather armor, and cannot use shields. Thieves can, however, use all weapons, excepting magic weapons other than magic swords or daggers. Thieves' saving throws are as follows:

Spell or	magic	death	ray	petrifi-	dragon
magic staff	wand	or poison	cation	breath	
16	13	12	14	15	

Thieves' abilities progress according to this chart:

thieves advance to level 2 once they have gained a total of 1200 experience, and to level 3 once they double this total to 2400.

OPTIONAL: thieves of level 4-9

thieves can advance to level 9, advancing in level with each doubling of their experience total.

Thieves of 4th level and above add 1 to their armor class, if their dexterity score is 13 or higher (optional)

Thieves of 4th level and above can read magic scrolls and books (they cannot actually learn the spells in the books) and can read 80 % of languages that they do not automatically know.

At 5th level, thieves add 2 to all attack rolls and saving throws. At 9th level, they add an additional 3 to attack rolls and saving throws.

Their special abilities advance as follows:

Once the thief has reached 9th level, each 100,000 experience gained adds 1 to their hit point total.

Elves – elves can notice secret doors about one-third of the time. They have infra-red vision, like dwarves, and can see 60 feet in the dark if there is no light source nearby.

They are immune to the paralyzing touch of ghouls. They speak the common, elvish, orcish, gnoll, and hobgoblin languages.

Elves progress as fighting-men and magic-users at the same time; each game they divide their gained experience between the two classes, so they gain the abilities of both, but progress half as fast as other characters. they can use all weapons , armor, and magical weapons (but not magical armor) and cast spells. Elves roll d6 for hit points. Elves use the magic-user saving throw table.

MICROLITE 77

OPTIONAL: elves of higher levels

Elves have a maximum level of 4 in fighting-man, and 6 in magic-user. Even once they have reached their level cap in one class, they still divide experience between the two classes (simply losing all experience given to the capped class), which can be a large disadvantage at high levels. Once they have reached their level cap in both classes, each 100,000 experience beyond that grants them +2 to their hit point total.

OPTIONAL: *dual-class halflings*

instead of advancing as fighting-men, halflings may simultaneously advance as fighting-men and thieves, in much the same way that elves advance as fighting-men and magic-users. Halflings advancing in this way use their regular saving throw table. They have both strength, and dexterity as prime requisites, and they have a level cap of 4 as a fighting-man, 6 as a thief. Beyond that, each 100,000 experience adds 2 to their hit point total.

Ask for your DM's approval before using this option.

Microlite20 OSS (Old School Style) is a trimmed-down, subminiature version of the Primary Fantasy SRD 3.5 rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD 3.5 (monsters, spells, adventures and equipment) could be used without conversion. Microlite20 OSS is a Microlite20 variant designed for old school style play with a modern game system and nearly any 3.5 fantasy adventure module or setting you can pull off your shelf.

The Rules

Stats

There are 3 stats : Strength (STR), Dexterity (DEX) and Mind (MIND).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

Humans get +1 to all "skill" rolls

Elves get +2 MIND

Dwarves get +2 STR

Halflings get +2 DEX

Classes

The classes are Fighter, Rogue, Mage, Cleric. Characters begin at Level 1.

Fighters wear any kind of armor and use shields. They add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on.

Rogues can use light armor. If they successfully Sneak up on a foe they can add their level to the damage of their first attack.

Magi wear no armor. They can cast arcane spells.

Clerics can wear light or medium armor. They cast divine spells. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Backgrounds

Characters may select, with the approval of the GM, a one or two-word background that represents a broad base of skills and knowledge, e.g. Farmer, Merchant, Desert Nomad, Noble, Shaman, Templar, Thyatian Mercenary, Ritualist, etc. Backgrounds need not be related to the PCs class, e.g. a player who creates a deeply religious fighter skilled in the arts of vision interpretation, divination and oration might pick 'Prophet' as a background. Backgrounds may not duplicate a class.

The GM will consider the character's background just as he would the character's class when deciding if a character will succeed with an action. For example, a character with an "Engineer" background should have a much better chance of damming a creek or building a bridge over it than a character with a "Courtier" background.

Skills

There are no specific skills in Microlite20 OSS. Instead players are expected to think like adventurers, tell the GM what they are doing and the GM decides if it will succeed in the situation, taking into account the character's class and background. If the GM decides a random success chance is truly needed, he may resolve the situation with a roll of his choice or he may call for one of the following rolls (human characters always add +1 to their roll):

Primary Skill Roll: 1D20 + Stat Bonus + Class Level if the character is attempting something directly related to their class or background.

Secondary Skill Roll: 1D20 + Stat Bonus + (Class Level/2, round

up) if the character is attempting something only loosely related to their class or background.

Minor Skill Roll: 1d20 + Stat Bonus + (Class Level/3, round down) if the character is attempting something not really related to their class or background.

When the GM calls for a skill roll, he will declare the type of skill roll, which stat the skill roll falls under, and any situational modifiers and the player will make a skill roll.

Roll higher than the GM assigned Difficulty Class to succeed.

Unless the GM rules otherwise, a natural roll of 20 always succeeds for a Primary Skill Roll. Suggested Difficulty Classes with Easy defined as a 50/50 chance of an average person succeeding on the first try: Easy - 10, Moderate - 15, Difficult - 20, Extremely Difficult - 25, Legendary - 30, Improbable - 35, Unbelievable - 40.

Note that there are no "saving throws" in this game; use level + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all spells from the appropriate spell list in the SRD.

Casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast:

Spell Level	0	1	2	3	4	5	6	7	8	9
HP Cost	1	3	5	7	9	11	13	15	17	19

This loss **cannot** be healed by magic but is recovered after 8 hours rest. There is no need to memorize spells in advance.

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character. Select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

For purposes of things like saves and dispelling, the Difficulty Class (DC) for all spells is:

10 + Caster Level + Caster's MIND bonus

Combat

Hit Points = STR Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death. A character heals either 1 STR point or twice his level hit points per full day of total rest. A night of rest will allow a character to recover 1 Hit Point from damage and all Hit Points used to cast spells. STR lost to damage must be recovered before hit points from damage can be recovered.

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 a side is surprised and may not act at all in the first round.

Initiative: Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc. The GM may choose to allow some combined actions, like a charge attack, to be one thing. Anyone not surprised and with a ready weapon who is not already involved in a melee combat gets a free attack on opponents trying to move past them.

Melee attack bonus = STR bonus + Level
Missile attack bonus = DEX bonus + Level
Magic attack bonus = MIND bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's Armor Class (AC), it's a hit. A Natural 20 is an automatic hit and if the roll would normally hit, the hit is a critical doing maximum

damage. A natural 1 always misses.

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead of wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

There are no "iterative attacks" in Microlite20 OSS. However, if the total melee attack bonus is +6 and the attacker drops or slays a foe, he is granted one additional attack against another opponent in melee weapon striking distance that round. As long as the combatant is dropping foes, he can continue attacking others until one does not fall to the might of his weapon.

Add STR bonus to Melee damage, x2 for 2-handed weapons.
Armor Class (AC) = 10 + DEX bonus + Armor bonus.

Other Hazards

Falling: 1d6 damage per 10', half damage on DEX save. DC=depth fallen in feet

Spikes: add +1 point to falling damage per 10' fallen, max +10

Poison: STR save to avoid or for half, depending on poison.

Effect varies with poison type.

Extreme Heat & Cold: If not wearing suitable protection, STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Level Advancement

Characters get Experience Points (XP) when their party defeats monsters. (Note that monsters can be defeated without being killed.) Experience Points (XP) = Hit Dice of defeated monsters. Add +1 for each doubling of the number of foes. e.g.: 1 kobold (a 1 hit die monster) = 1 XP. 2 kobolds = 2 XP. 4 kobolds = 3 XP, 8 kobolds = 4 XP etc. Add +1 or +2 XP (GM's discretion) if the foes have dangerous special abilities. Characters who do not participate in the encounter in some way do not get XP for it.

Characters also earn a GM-assigned amount of experience points for defeating traps, solving puzzles, excellent roleplaying, and the like. The GM should assign XP depending on the situation (usually from 1 to 5 XP). Characters can also lose up to 5 XP for generally ignoring their alignment or other very poor roleplaying.

Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, generic "training," etc.). A character earns 1 XP for each 100gp so spent.

Add up the Experience Points (XP) of every successful encounter you take part in plus any earned from GM specials and treasure spent. When the total is equal to 25 x your next level, you've advanced to the next level. Reset the total XP to 0 after advancing.

Each level adds:
+1d6 to Hit Points
+1 to all attack rolls

If the level divides by three (i.e. level 3,6,9,etc.) add 1 point to STR, DEX or MIND.

Fighters gain +1 to their attack and damage rolls at levels 5,10,15,etc.

Clerics and Magi gain access to new spell levels at levels 3,5,7,9,etc.

Example: Four newly minted second level adventurers have just completed a dungeon adventure. They each have 36 XP and need 75 XP to reach third level. Their expedition was extremely

successful. They defeated 22 XP worth of monsters and earned 7 XP from traps and other GM specials for a total of 29 XP each. The party's cleric earned 4 XP for great roleplaying while risking her life to save the party from an angry spirit. The party also found and recovered 2900gp in treasure from the dungeon. That's 725gp each. The cleric decides to donate the entire sum to her temple, and earn 7 more XP. This gives her 40 XP for a total of 76 XP. She advances to 3rd level and resets her XP to 0. The other party members earned 29 XP each for a total of 65 XP each. They remain 2nd level.

Monsters

Use the monster descriptions from the SRD, ignoring unneeded stats, feats, etc. To create new monsters quickly: Pick a name, assign a level, hit dice = level, hit points = 1d8 per level, magic save = 10 + level, all attack bonuses = level, damage = 1d8 for ordinary claws, bites, and weapons, 2d8 for large maws, giant clubs, 3d8 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases. Special attacks act like magic attacks against an appropriate defense. Intelligent monsters may have classes at the GM's option. If needed, assign stats to suit. Equip and add abilities as required.

Monster Reactions: Some monsters (like skeletons guarding a tomb) may always attack. In cases where the reaction of the monsters to the party is not obvious, the GM may opt to make a reaction roll for the monsters by rolling 2d6 and adding the MIND bonus (and any other appropriate modifiers) to the roll and consulting this table.

Adjusted Reaction Roll	Result
2 or less	Very Unfavorable
3-6	Unfavorable
7	Neutral/Uncertain
8-11	Favorable
12 or more	Very Favorable

Interpretation of the results is left to the GM, however, these general principles may prove helpful. Very Unfavorable means the monsters will most likely attack unless the odds are overwhelmingly against them. They will not help the characters. Unfavorable means the monsters are hostile and might attack unless they are given a good reason not to. They will not help the characters. Neutral means the monsters are unsure of the party. They are not likely to attack immediately, but are not friendly or helpful. Favorable means the monsters are willing to listen and are open to negotiation. They might be willing to be slightly helpful. Very Favorable means the monsters like the characters and are willing to be somewhat helpful and are open to working with the party to mutual advantage.

Special Thanks to Our Sponsors

Donate to the RetroRoleplaying Cancer Fund and Get some PDF Goodies

Many Microlite20 gamers know that Randall Stukey (of RetroRoleplaying.com), the author of Microlite74, is trying to raise funds to pay the bills from his wife's oral cancer treatments. Randall and Donna are some of the 40 to 50 million people in the US who do not have health insurance nor did they qualify for government aid as they live in Texas and have no children. Donna (successful so far) cancer treatments have cost over \$110,000. While some of this has been absorbed by hospital foundations and the like, they still owe a lot of it. You can donate to the RetroRoleplaying Cancer Fund (via PayPal) and help them pay their bills.

Everyone who donates any amount at all get a password giving them access to a number of special downloads. Some of the currently available downloads include the following (See <http://www.retroroleplaying.com/content/retroroleplaying-cancer-fund-special-downloads> for more information).

- Pdf copies of the two issues of The Grimoire Randall published in the late 1970s (which Randall blogged about here: The Grimoire #1 and The Grimoire #2)
- pdf copy of The Second Grimoire of Pharesm the Bright-Eyed, a set of house rules for a BECM1 campaign Randall ran at a game shop in the mid-1980s.
- A copy of the Player's Introduction to the Fourth Campaign Arn (from about 1984).
- Microlite74 2.0 Special Edition -- a 60-page PDF designed to be printed in booklet format from Adobe Acrobat -- with artwork is by Håkan Ackegård and incorporating the rules from the supplement, giving you all the rules currently available for Microlite74 in one booklet. The text has been reformatted into a single column in a large enough font to easily read.

A copy of the Microlite75 Special Edition will also be available to donors as soon as the games are completed and Special Editions for donors are produced. To get access to these downloads, help Randall pay the cancer bills by sending a donation in any amount -- small or large -- to the RetroRoleplaying Cancer Fund via Paypal link below.

Notes on "Old School" Play

While Microlite20 OSS is designed using tried and true "D20" systems filtered through the Microlite20 rules, it is designed for a completely different style of play than many players who started to play in the last 20 years or so may be used to. This section will give a brief overview of "old school" play.

What is "Old School" Play?

There are two major styles of roleplaying games. The first (and older) style says "Here is the situation. Pretend you are there as your character, what do you want to do?" This style has been superseded over the years with a style that says "Here is the situation. Based on your character's stats, abilities, skills, etc. as listed on his character sheet and your knowledge of the many detailed rules of the game, what is the best course of action to solve the situation?" Old school play strongly favors the first style and frowns on too much of the second.

Here are some major points where old school play is different:

No Skills: Unlike most modern RPGs, there aren't any skills in Microlite20 OSS, not even the streamlined four or five skills of Microlite20. Players are intended to have their characters act like adventurers. So don't search your character sheet or the rules for the perfect solution in Microlite20 OSS. Instead, you just tell the GM what your character is trying to do. If you need to keep a door open or shut, you might tell the GM your character is using a spike to keep the door open or closed. A ten foot pole is your friend for checking for traps. Searching a room means looking in and under objects, not rolling a skill check. While this may seem strange at first, you will quickly learn to appreciate the freedom it gives you. No longer are you limited to the skills and feats on your character sheet, you can try anything your character should be capable of trying. You might not succeed, but the rules generally will not stop you from trying.

No Assumption of "Game Balance": Old style game sessions aren't about carefully balanced characters (who are all able to shine equally at all times) who only run into situations carefully designed by the GM to be beatable by the characters presently in the party and to provide treasure that fits their current level. Instead, part of player skill is learning to evaluate situations so situations well over the party's current abilities or which will waste the party's resources for little gain can be avoided. Don't assume that you can beat every monster that you encounter, running away from monsters too tough to handle can mean the difference between character survival and character death. You can also get creative in how you defeat monsters. Perhaps those goblins you bypassed could be talked into (or tricked into) attacking that giant you know you can't beat, perhaps killing it for you or at least softening it up so your party has a chance of defeating it and living to tell the tale. Also remember that treasure can be turned into XP, even if you can't kill the monsters, perhaps you can still acquire some of their treasure. Part of the skill of playing "old school" style is coming up with creative solutions when a direct attack is likely to fail.

It's Not All About Combat: Many modern fantasy RPGs have made combat the star of the system, combats in these systems are time-consuming and very crunchy with rules for everything. Microlite20 avoids this by having a fast-playing abstract combat system. Microlite20 OSS takes this one step further, combat isn't intended to be the main source of fun in the game. The game is as much about exploration and treasuring finding as it is about combat. Sure, you are going to have to fight things to explore and find treasure, but always remember that combat may not be the best or safest way to handle every situation. Think before you rush into combat. After all, it's not the only way to earn a good pile of experience -- and monsters don't have to be killed to be

defeated (and get XP for them).

Forget “Rules Mastery”: Player skill in “old school” style games isn’t about mastering the game rules so you can solve any problem by knowing the right combination of rules from 20 different rule books. Microlite20 is designed to be rules light and Microlite20 OSS tries to stress this even more by encouraging GMs to make rulings on the spot taking into account specific circumstances instead of trying to hunt up special cases in the SRD or a stack of optional rule books. It’s faster and helps players immerse themselves in their character and the game world instead of in rule books. Both players and GMs should remember that these rules are a tool for the GM. If something herein does not work right in your campaign, change it. The object is to have fun, not be a slave to rules or to players who think being a rules-lawyer is the way to get ahead. In many roleplaying games, the Rules As Written (RAW) are often considered sacrosanct or at least somehow better than those a GM can come up with himself. This is not true of Microlite20 OSS.

Styles of “Old School” Play

If you read some “old school” blogs, forums, and web sites, you might get the impression that there is only one “old school” style of play: a style with expendable player characters who spend all their time in dungeons designed in the style of the *old Tomb of Horrors* module where a party is only one slipup away from death. This style of play is often shown in early modules.

What most people forget is that these early modules were designed for tournament play where the party that lasted longest and made it deepest into the dungeon was the winner. While a few gaming groups did run their regular campaigns like this and enjoy it, most people did not enjoy such games and the GMs who ran them were often referred to as “Killer GMs” (who often found themselves without players). Instead most home campaigns were a mixture of the following four styles – some campaigns stressing one or two over the others.

Power-Gaming: Many players start out playing in this style. Many soon get bored with it and add more and more of other styles. A power-gaming campaign is all about character power. They are known by their class, level, special items, and amazing powers and deeds. (“I killed the Demon King with my 15th Level Fighter/Magic-User/Druid. It only took two hits from Thor’s Hammer to knock him out. Then I cut off his head with my vorpal blade.”) There is often a lot of player competition for the most powerful character in campaigns that stress power-gaming. A lot of people look down on this style, but it can be a lot of fun to play a pure power-game in a group of players who all like the style.

Wargaming: This was probably the style old school rules were originally written for. The wargaming style of play is a competition between the player group and the GM. The GM sets up tactical battles, puzzles, and the like and the players solve them for treasure and experience. Fudging die rolls and ignoring rules (either for or against the players) is frowned upon as it detracts from the challenge and fun of the adventure. Characters in pure wargaming campaigns often were expendable and had little personality or goals (beyond staying live and getting rich) as a character with such might be tempted to do things dysfunctional to survival. Published tournament dungeons like *Tomb of Horrors* could be considered examples of extreme forms of this still. Once the RPG hobby became known outside of the minis and board wargaming community, pure forms of the wargaming style quickly became uncommon.

Role-Playing: A pure role-playing campaign is almost the opposite of a pure wargaming campaign. Player skill, tactics, and rules aren’t really important. What is important is the player’s character and that character’s life in the game. In a pure role-playing campaign, players create the personality of their

characters in great detail and players generally have a large emotional investment in them and do not consider their characters expendable. Players tend to have their characters act within their personalities and within the beliefs they’re supposed to hold – even when doing so is not the best thing to do at the time within the game. The object is to live your character’s life in the campaign world. You “win” by having your character achieve his goals, goals which may or may not have anything to do with the game’s goals of exploring and accumulating treasure and experience points. The modern computer game *The Sims* is an example of this style of play.

Story-Telling: While all campaigns tell a story after-the-fact (that is, you can tell a story based on the characters’ actions in the game), in a story-telling campaign, the GM has worked out a story in advance and the player characters are the protagonists. The campaign world usually has a detailed background and back story behind it. Knowing this background may be more important than knowing the rules. Some pure story telling campaigns are little more than single-line railroads where the characters play their almost pre-scripted parts in the story. In other cases, things are more free-form with story flow and events created by interactions between the GM’s basic outline of story events and the actions of individual characters during the campaign. Some people consider the more pure forms of story-telling campaigns boring straight-jackets while others love the idea of being a major part of a real story.

These four major styles of play appeared early in the history of role-playing games. They were first mentioned in a general circulation publication in Glenn Blacow’s article “Aspects of Adventure Gaming” in *Different Worlds* #10 (the October 1980 issue).

The important thing to take from this section isn’t the four styles or their labels (as there are other systems for describing this with their own labels), but the idea that there were many different styles of “old school” play back in the “old school” days – not just the single style stressed in “old school” blogs, forums, and web sites. Don’t let those sites make you believe that you aren’t playing old school right if your campaign isn’t strongly in the wargaming camp. Most successful campaigns back in “old school” days were a mixture of all four major styles – and a heaping helping of minor styles.

Advice for the New Old School Gamemaster

If you are comfortable running a rules-light game like standard Microlite20, you’ll probably have no trouble running Microlite20 OSS as you have already learned to run a game without having hundreds of pages of rules detailing how to handle every situation that might possibly arise in the game. You’ve already learned to just make a ruling that you think fits the situation and keep the game moving.

The greatest change between Microlite20 and Microlite20 OSS is the removal of all character skills. If you are used to just allowing players to just say “I’m searching the room. What do I find?” and make a search skill roll or just say “I’ll try to persuade the baron to loan us a catapult.” and make a persuade skill roll, running without skill rolls is going to require as much change to your thinking as it will to your players’ thinking.

First, you need to get your players to tell you what their characters are actually doing in the campaign world, instead of talking in terms of what skill they are using. Then you need to learn to listen to what they say and decide if their description of what they are doing a) would most likely solve the problem, b) wouldn’t have a chance of solving the problem, c) might not immediately solve the problem but would provide more info that would help solve the problem, or d) would not definitely solve the problem but has a fair chance of doing so. Only d would require a die roll.

Let's take checking a chest for traps as an example. Get the players to describe in general terms how they are going to check the chest for traps. Note general terms are enough, the idea is to see what the characters are doing, not to require them to describe every single muscle and eye movement they make. Having to "click on one exact pixel on the screen" to succeed is boring and frustrating in a computer game, the verbal equivalent of it is even more frustrating in a tabletop game. Don't fall into the trap of doing it as it turns players off fast.

Let's say a player says "I'll look the chest quickly over for obvious traps, paying special to the keyhole, clasp, and anything that looks out of the ordinary. I'm not touching it yet."

If the chest had a poison needle near the clasp or some holes for poison gas or needles to shoot out of, this should be enough for the character to notice it without a roll, even if he isn't a Rogue or the like. However, if the chest is set to explode (or shoot daggers out of the opening when opened, such a search is not going to discover the trap – again no matter what the character's class or background as such a trap isn't visible from the outside. If you are feeling generous, you might have a Rogue make roll and if she makes it tell her player that while she doesn't see a trap, something still doesn't seem right about the chest.

If the character had said he was then poking the chest with a pole instead of rushing to open it, he might hear something strange if the chest had the above-mentioned dagger trap. Of course, unless he is a Rogue or has some strange background, chances are he would not associate the noise with a trap, but rather just that there was something loose in the chest. Again, you might give a Rogue a roll, especially an experienced Rogue.

As this example shows, it really isn't hard – unless you choose to make it hard. It's just different. After a few session both you and your players will find that it really isn't as hard as it looks.

Some players, however, really want die rolls. Because of previous bad experiences with poor GMs, they just can't trust the GM enough to handle some decisions being made without die rolls. If your players are like this, you can use "skill" rolls as a safety net. The players will still have to describe what their character does to solve the problem just as above. Once the player describes what his character is doing, the GM calls for a class/background based "skill" roll as described in the skills section of these rules. The results are determined by your opinion as GM of the action described and the skill roll. There are basically two situations:

In the first case, you feel that the player has a good plan that should likely succeed. Therefore it will succeed regardless of the result of the roll, but how well it succeeds is determined by the skill roll. A failed skill roll is a minimal success, the character succeeds, but just barely. A successful skill roll means the character's plan succeeds without any major hitches.

In the second case, either the player obviously knows less than his character does about the situation or just comes up with a bad idea that you feel is unlikely to work. You let the skill roll decide the result. A failed roll means the plan fails, while a successful roll means the plan somehow worked after all, but probably not perfectly.

Players who refuse to even try to come up with some type of rational statement about what their character is actually doing but just want to let the skill roll decide automatically fail.

Free Rules-Lite Games * Old School Play with Modern Mechanics

Advanced Microlite20 OSS (Old School Style) is a trimmed-down, subminiature version of the Primary Fantasy SRD 3.5 rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD 3.5 (monsters, spells, adventures and equipment) could be used without conversion. Advanced Microlite20 OSS is a Microlite20 variant designed for old school style play with a modern game system and nearly any fantasy adventure module or setting you can pull off your shelf.

The Rules

Stats

There are 3 stats : Strength (STR), Dexterity (DEX) and Mind (MIND).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

Humans get +1 bonus to all skills

Elves get +2 MIND

Dwarves get +2 STR

Halflings get +2 DEX

Gnomes get +1 to DEX, +1 to MIND

Half-orcs get +4 to STR, -2 to MIND

Half-elves get +1 to DEX, and +1 to MIND

Lizardmen get +1 to STR, +1 to DEX, -2 to MIND

Classes

The classes are Fighter, Rogue, Mage, Cleric, Paladin, Ranger, Druid, Bard. Characters begin at Level 1. Fighters, Paladins, and Rangers are considered "Fighting Classes."

Fighters wear any kind of armor and use shields. They have a +3 bonus to the Physical skill and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on.

Rogues can use light armor. They have a +3 bonus to the Subterfuge skill. If they successfully Sneak up on a foe they can add their level to the damage of their first attack.

Magi wear no armor. They have a +3 bonus to the Knowledge skill and can cast arcane spells.

Clerics can wear light or medium armor. They have a +3 bonus to the Communication skill and cast divine spells. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Paladins wear any kind of armor and use shields. They have a +1 bonus to the Physical skill and a +2 bonus to the Communication skill. They are immune to diseases and apply a +1 bonus to all saving throws (this increases by +1 at 5th level and every 5 levels on). Paladins can detect evil within 60' at will and can heal up to 2hp per level per day by laying on hands. A character must be of Lawful Good alignment to be a Paladin.

Rangers can use light or medium armor and can use shields. They have a +3 bonus to the Survival skill. They are +1 to hit and damage with ranged weapons (increases by +1 at 5th level and every five levels on.) and only incur a -1 to hit penalty when fighting with 2 weapons.

Druids wear any non-metal armor or shield. They have a +1 bonus to the Knowledge skill and a +2 bonus to the Survival skill. They cast Druid spells. Druids are immune to the spell-like effects of woodland fey. At 3rd level a Druid can pass without trace at will. At 7th level a Druid can assume the form of any small or medium sized animal up to 3 times per day. A Druid heals 2hp per level when changing back into his human form.

Bards wear light armor and can use bucklers. They have a +1 bonus to the Communication, Subterfuge, and Knowledge skills. A Bard can counter sound-based effects within a 30' radius. A Bard

can use his song to charm person or remove fear up to 3 times (total) per day. Beginning at 6th level, a Bard casts spells as a Druid of 5 levels lower.

Backgrounds

Characters may select, with the approval of the GM, a one or two-word background that represents a broad base of skills and knowledge, e.g. Farmer, Merchant, Desert Nomad, Noble, Shaman, Templar, Thyatian Mercenary, Ritualist, etc. Backgrounds need not be related to the PCs class, e.g. a player who creates a deeply religious fighter skilled in the arts of vision interpretation, divination and oration might pick 'Prophet' as a background. Backgrounds may not duplicate a class.

The GM will consider the character's background just as he would the character's class when deciding if a character will succeed with an action. For example, a character with an "Engineer" background should have a much better chance of damming a creek or building a bridge over it than a character with a "Courtier" background.

Skills

There are five general skills in Advanced Microlite20 OSS: Physical, Subterfuge, Knowledge, Communication, and Survival. Each skill has a skill bonus (starting at +0). These skills are not used directly by the players in most cases. Instead players are expected to think like adventurers, tell the GM what they are doing and the GM decides if it will succeed in the situation, taking into account the character's class and background. If the GM decides a random success chance is truly needed, he may resolve the situation with a roll of his choice or he may call for one of the following skill-based rolls:

Primary Skill Roll: 1D20 + Skill Bonus + Stat Bonus + Class Level if the character is attempting something directly related to their class or background.

Secondary Skill Roll: 1D20 + Skill Bonus + Stat Bonus + (Class Level/2, round up) if the character is attempting something only loosely related to their class or background.

Minor Skill Roll: 1d20 + Skill Bonus + Stat Bonus + (Class Level/3, round down) if the character is attempting something not really related to their class or background.

When the GM calls for a skill roll, he will declare the type of skill roll, which skill and stat the roll will use, and any situational modifiers and the player will make a skill roll.

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Roll higher than the GM assigned Difficulty Class to succeed. Unless the GM rules otherwise, a natural roll of 20 always succeeds for a Primary Skill Roll. Suggested Difficulty Classes with Easy defined as a 50/50 chance of an average person succeeding on the first try: Easy - 10, Moderate - 15, Difficult - 20, Extremely Difficult - 25, Legendary - 30, Improbable - 35, Unbelievable - 40.

Note that there are no "saving throws" in this game; use level + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Talents: At level 2 (and every 2 levels thereafter), characters may select one narrow area of skill where they are better than average: something they are "Good at." This talent should be either something directly related to their class or background -- or something they have spent game time and/or money learning. If the player wishes (and the GM approves), instead of selecting a new talent a talent the character is already "Good at" be improved to "Expert at" at a later even-numbered level and a talent the character is "Expert at" may be improved a final time to "Master at" at yet a later even-numbered level. The GM will consider the

character's talents just as he would the character's class and background when deciding if a character will succeed with an action. Numerical benefits for talents will only be needed when the GM decides a skill success roll is required, +2 per level is a good place to start for most talents (i.e. Good at +2, Expert at +4, Master at: +6).

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all spells from the appropriate spell list in the SRD.

Casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast:

Spell Level	0	1	2	3	4	5	6	7	8	9
HP Cost	1	3	5	7	9	11	13	15	17	19

This loss **cannot** be healed by magic but is recovered after 8 hours rest. There is no need to memorize spells in advance.

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character. Select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

For purposes of things like saves and dispelling, the Difficulty Class (DC) for all spells is:

10 + Caster Level + Caster's MIND bonus

Combat Casting: In combat, if a character is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles. This costs the caster 1 HP per level of the spell he was attempting to cast and the caster loses his action for the round. The character may expend an action point on Heroic Effort to avoid these effects and cast the spell as if the character had not been hit.

Metamagic: Spellcasters may select one metamagic ability from this list at levels 3 and 6. A metamagiced spell is cast at a higher HP cost: the standard HP cost for the spell plus the HP cost for all metamagic being applied to the spell. The GM has the final say as to what metamagic effects do or do not make sense to use with a particular spell. Multiple metamagic effects can be applied to a single spell; however, each metamagic effect after the first adds an additional +1 to the HP cost of the spell.

Empower Spell - All variable, numeric effects of an empowered spell are increased by one-half. Saving throws and opposed rolls are not affected, nor are spells without random variables. An empowered spell adds +4 to the HP cost of the base spell.

Enlarge Spell - You can alter a spell with a range of close, medium, or long to increase its range by 100%. Spells whose ranges are not defined by distance, as well as spells whose ranges are not close, medium, or long, are not affected. An enlarged spell adds +2 to the HP cost of the base spell.

Extend Spell - An extended spell lasts twice as long as normal. A spell with a duration of concentration, instantaneous, or permanent is not affected. An extended spell adds +2 to the HP cost of the base spell.

Widen Spell - You can alter an area shaped spell to increase its area. Any numeric measurements of the spell's area increase by 100%. A widened spell adds +6 to the HP cost of the base spell.

Combat

Hit Points = STR Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death. A character heals either 1 STR point or twice his level hit

points per full day of total rest. A night of rest will allow a character to recover 1 Hit Point from damage and all Hit Points used to cast spells. STR lost to damage must be recovered before hit points from damage can be recovered.

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 a side is surprised and may not act at all in the first round.

Initiative: Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc. The GM may choose to allow some combined actions, like a charge attack, to be one thing.

Melee attack bonus = STR bonus + Level
Missile attack bonus = DEX bonus + Level
Magic attack bonus = MIND bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's Armor Class (AC), it's a hit. A Natural 20 is an automatic hit and if the roll would normally hit, the hit is a critical doing maximum damage. A natural 1 always misses.

Fighters, Rangers, and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

There are no "iterative attacks" in Advanced Microlite20 OSS. However, for fighting classes if the total melee attack bonus is +6 and the attacker drops or slays a foe, he is granted one additional attack against another opponent in melee weapon striking distance that round. As long as the Fighter, Paladin, or Ranger is dropping foes, he can continue attacking others until one does not fall to the might of his weapon.

Add STR bonus to Melee damage, x2 for 2-handed weapons.
Armor Class (AC) = 10 + DEX bonus + Armor bonus.

Special Combat Situations:

Opportunity Attacks: Anyone not surprised and with a ready weapon who is not already involved in a melee combat gets a free attack on opponents trying to move past them - this attack is in addition to their normal attack for the round. If the attack is successful, the opponents takes damage and can move no further that round.

Ranged Attack into Melee: Shooting or throwing into a crowded melee is not a good idea, there's a 50% chance you'll hit a friend instead of an opponent. Fighting classes may take -4 to hit to avoid hitting a friend.

Dodge: A character who is not making an Active or Full Attack may forgo his next attack at any time and dodge out of the way. Roll 1d20 + DEX bonus + Physical Combat Bonus. The total is the character's effective AC until his next attack. If it's lower than his real AC, well, the character zigged when he should've zagged. The GM may modify the roll by +2 or -2 (or more) to reflect the terrain and cover of the area.

Aid Another: A character who can make a melee attack on an opponent engaging an ally in melee combat can help that character attack or defend by distracting or interfering with an opponent. Make an attack roll against AC 10. If successful, the ally gains either a +2 (+1 at levels 5, 10, 15, etc. for fighting classes) bonus on his next attack roll against that opponent or a +2 (+1 at levels 5, 10, 15, etc. for fighting classes) bonus to AC against that opponent's next attack (aiding character's choice), as long as that attack comes before the beginning of the aiding

character's next turn. Multiple characters can aid the same ally.

Grapple: A character can make a grapple attack on an adjacent target. A successful attack roll means they are then grappled with their target. When grappled, both the attacker and the defender's AC becomes 10 and neither can make move actions. When grappled, the defender can't make normal actions and must make opposed rolls (1d20 + PCB) against the attacker to attempt to break free. As long as the defender is grappled the attacker can make automatic unarmed attacks on the defender.

Knockout Blow: A character can attempt an armed melee attack against an adjacent creature to stun them. On a successful hit the target is stunned one minute for every point the attacker rolled higher than their defense. Rogues add their level in minutes to this time.

Morale: While a few monsters, such as mindless creatures, are fearless and will fight to the death, most monsters have a strong desire to survive and will not continue to fight when the battle is going against them. They will instead seek to retreat, to flee, or even to surrender. The GM decides when monsters abandon the battle and retreat, based on the situation and the monster's intelligence.

Other Hazards

Falling: 1d6 damage per 10', half damage on DEX save. DC=depth fallen in feet

Spikes: add +1 point to falling damage per 10' fallen, max +10

Poison: STR save to avoid or for half, depending on poison.

Effect varies with poison type.

Extreme Heat & Cold: If not wearing suitable protection, STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Action Points

All characters have 1 action point per character level. Actions points may be used to simulate a heroic effort by a character or to simulate a lucky break. Action Points recover 1 per day of total rest in safe surroundings.

Heroic Effort: Each action point spent on heroic effort allows the player to roll a 1d6 and adjust any single die roll affecting the character or made as a result of the character's actions in the character's favor by the amount rolled. The action point must be expended before the die roll to be adjusted is made. An action point may also be spend on Heroic Effort to allow a spell-caster to continue to cast a spell if hit during casting.

Luck: Spending one action point for luck will cause a minor bit of good luck to come the character's way. Spending two action points for good luck will cause a major bit of good luck to come the character's way. In both cases, the GM decides exactly what the good luck is, but it should be helpful in a minor/major way to the character's immediate situation.

Second Chance: Spending one action point allows the player to reroll any roll he just made, but he must accept the result of the new roll even if it is lower. Exception: Using a second chance for a failed "save-or-die" roll changes the result to the minimum needed for success.

Shake Off Fatigue: Recover half your lost hit points instantly. This counts as an action.

Strike Now: The character can take his action right now instead of waiting for his normal strike speed position to come up. This cannot be used to cast a spell over 3rd level or if the character has taken a defensive Combat Stance for the round (Full Defense or Active Defense).

Level Advancement

Characters get Experience Points (XP) when their party defeats

monsters. (Note that monsters can be defeated without being killed.) Experience Points (XP) = Hit Dice of defeated monsters. Add +1 for each doubling of the number of foes. e.g.: 1 kobold (a 1 hit die monster) = 1 XP. 2 kobolds = 2 XP. 4 kobolds = 3 XP, 8 kobolds = 4 XP etc. Add +1 or +2 XP (GM's discretion) if the foes have dangerous special abilities. Characters who do not participate in the encounter in some way do not get XP for it.

Characters also earn a GM-assigned amount of experience points for defeating traps, solving puzzles, excellent roleplaying, and the like. The GM should assign XP depending on the situation (usually from 1 to 5 XP). Characters can also lose up to 5 XP for generally ignoring their alignment or other very poor roleplaying.

Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, generic "training," etc.). A character earns 1 XP for each 100gp so spent.

Add up the Experience Points (XP) of every successful encounter you take part in plus any earned from GM specials and treasure spent. When the total is equal to 25 x your next level, you've advanced to the next level. Reset the total XP to 0 after advancing.

Each level adds:

+1d6 to Hit Points

+1 to all attack rolls

+1 to a single skill bonus (player choice)

If the level divides by three (i.e. level 3,6,9,etc.) add 1 point to STR, DEX or MIND.

If the level divides by two (i.e. level 2, 4, 6, 8, etc.) select a new Talent.

Fighters gain +1 to their attack and damage rolls at levels 5, 10, 15, etc. Paladins gain +1 to their saving rolls at levels 5, 10, 15, etc. Rangers gain +1 to their attack and damage rolls with ranged weapons at levels 5, 10, 15, etc.

Clerics and Magi gain access to new spell levels at levels 3,5,7,9,etc.

Example: Four newly minted second level adventurers have just completed a dungeon adventure. They each have 36 XP and need 75 XP to reach third level. Their expedition was extremely successful. They defeated 22 XP worth of monsters and earned 7 XP from traps and other GM specials for a total of 29 XP each. The party's cleric earned 4 XP for great roleplaying while risking her life to save the party from an angry spirit. The party also found and recovered 2900gp in treasure from the dungeon. That's 725gp each. The cleric decides to donate the entire sum to her temple, and earn 7 more XP. This gives her 40 XP for a total of 76 XP. She advances to 3rd level and resets her XP to 0. The other party members earned 29 XP each for a total of 65 XP each. They remain 2nd level.

Monsters

Use the monster descriptions from the SRD, ignoring unneeded stats, feats, etc. To create new monsters quickly: Pick a name, assign a level, hit dice = level, hit points = 1d8 per level, magic save = 10 + level, all attack bonuses = level, damage = 1d8 for ordinary claws, bites, and weapons, 2d8 for large maws, giant clubs, 3d8 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases. Special attacks act like magic attacks against an appropriate defense. Intelligent monsters may have classes at the GM's option. If needed, assign stats to suit. Equip and add abilities as required.

Monster Reactions: Some monsters (like skeletons guarding a

tomb) may always attack. In cases where the reaction of the monsters to the party is not obvious, the GM may opt to make a reaction roll for the monsters by rolling 2d6 and adding the MIND bonus (and any other appropriate modifiers) to the roll and consulting this table.

Adjusted Reaction Roll	Result
2 or less	Very Unfavorable
3-6	Unfavorable
7	Neutral/Uncertain
8-11	Favorable
12 or more	Very Favorable

Interpretation of the results is left to the GM, however, these general principles may prove helpful. Very Unfavorable means the monsters will most likely attack unless the odds are overwhelmingly against them. They will not help the characters. Unfavorable means the monsters are hostile and might attack unless they are given a good reason not to. They will not help the characters. Neutral means the monsters are unsure of the party. They are not likely to attack immediately, but are not friendly or helpful. Favorable means the monsters are willing to listen and are open to negotiation. They might be willing to be slightly helpful. Very Favorable means the monsters like the characters and are willing to be somewhat helpful and are open to working with the party to mutual advantage.

Special Thanks to Our Sponsors

The author would like to thank the following individuals who sponsored the production of Advanced Microlite20 OSS and Microlite75 by making donations to the RetroRoleplaying Cancer Fund to help pay the huge cancer bills treating my wife's Stage 3 Oral Cancer without insurance ran up.

Bronze Sponsors

Kristian Collins, Kevin Donovan, Robert Fisher, John Gaunt, Dennis Kadera, Michael McMenamin, Shane Morales, Ronald Pehr, The Reliquary, Martin Thomas, Richard Tongue

Silver Sponsors

Matthew Cooper, Marcelo Paschoalin, Scott Sandy

Gold Sponsors

Harry Duncan, www.miniaturewargaming.com

Donate to the RetroRoleplaying Cancer Fund and Get some PDF Goodies

Many Microlite20 gamers know that Randall Stukey (of RetroRoleplaying.com), the author of Microlite74, is trying to raise funds to pay the bills from his wife's oral cancer treatments. Randall and Donna are some of the 40 to 50 million people in the US who do not have health insurance nor did they qualify for government aid as they live in Texas and have no children. Donna (successful so far) cancer treatments have cost over \$110,000. While some of this has been absorbed by hospital foundations and the like, they still owe a lot of it. You can donate to the RetroRoleplaying Cancer Fund (via PayPal) and help them pay their bills. Everyone who donates any amount at all get a password giving them access to a number of special downloads. Some of the currently available downloads include the following (See <http://www.retroroleplaying.com/content/retroroleplaying-cancer-fund-special-downloads> for more information).

- Pdf copies of the two issues of The Grimoire Randall published in the late 1970s (which Randall blogged about here: The Grimoire #1 and The Grimoire #2)
- pdf copy of The Second Grimoire of Pharesm the Bright-Eyed, a set of house rules for a BECMI campaign Randall ran at a game shop in the mid-1980s.
- A copy of the Player's Introduction to the Fourth Campaign Arn (from about 1984).
- Microlite74 2.0 Special Edition -- a 60-page PDF designed to be printed in booklet format from Adobe Acrobat -- with artwork is by Håkan Ackegård and incorporating the rules from the supplement, giving you all the rules currently available for Microlite74 in one booklet. The text has been reformatted into a single column in a large enough font to easily read.

A copy of the Microlite75 Special Edition and the Advanced Microlite20 OSS Special Edition will also be available to donors as soon as the games are completed and Special Editions for donors are produced. To get access to these downloads, help Randall pay the cancer bills by sending a donation in any amount -- small or large -- to the RetroRoleplaying Cancer Fund via Paypal link below.

Notes on "Old School" Play

While Advanced Microlite20 OSS is designed using tried and true "D20" systems filtered through the Microlite20 rules, it is designed for a completely different style of play than many players who started to play in the last 20 years or so may be used to. This section will give a brief overview of "old school" play.

What is "Old School" Play?

There are two major styles of roleplaying games. The first (and older) style says "Here is the situation. Pretend you are there as your character, what do you want to do?" This style has been superseded over the years with a style that says "Here is the situation. Based on your character's stats, abilities, skills, etc. as listed on his character sheet and your knowledge of the many detailed rules of the game, what is the best course of action to solve the situation?" Old school play strongly favors the first style and frowns on too much of the second.

Here are some major points where old school play is different:

Skills Rolls Downplayed: Unlike most modern RPGs, skill rolls are downplayed in Advanced Microlite20 OSS. While the streamlined five skills of Microlite20 are used, players only make skill rolls when the GM determines that a random result is needed. Instead, players are intended to have their characters act like adventurers, just telling the GM what they are trying to do. The GM will decide (based on the character's class, background, skills, talents and the players description of what the character is trying to do) if the attempt succeeds or fails. The GM may ask for a particular skill roll if he thinks a random result is needed. So don't search your character sheet or the rules for the perfect solution in Advanced Microlite20 OSS. Instead, you just tell the GM what your character is trying to do. If you need to keep a door open or shut, you might tell the GM your character is using a spike to keep the door open or closed. A ten foot pole is your friend for checking for traps. Searching a room means looking in and under objects, not rolling a skill check. While this may seem strange at first, you will quickly learn to appreciate the freedom it gives you. No longer are you limited to the skills and feats on your character sheet, you can try anything your character should be capable of trying. You might not succeed, but the rules generally will not stop you from trying.

No Assumption of "Game Balance": Old style game sessions aren't about carefully balanced characters (who are all able to shine equally at all times) who only run into situations carefully designed by the GM to be beatable by the characters presently in the party and to provide treasure that fits their current level. Instead, part of player skill is learning to evaluate situations so situations well over the party's current abilities or which will waste the party's resources for little gain can be avoided. Don't assume that you can beat every monster that you encounter, running away from monsters too tough to handle can mean the difference between character survival and character death. You can also get creative in how you defeat monsters. Perhaps those goblins you bypassed could be talked into (or tricked into) attacking that giant you know you can't beat, perhaps killing it for you or at least softening it up so your party has a chance of defeating it and living to tell the tale. Also remember that treasure can be turned into XP, even if you can't kill the monsters, perhaps you can still acquire some of their treasure. Part of the skill of playing "old school" style is coming up with creative solutions when a direct attack is likely to fail.

It's Not All About Combat: Many modern fantasy RPGs have made combat the star of the system, combats in these systems are time-consuming and very crunchy with rules for everything. Microlite20 avoids this by having a fast-playing abstract combat system. Advanced Microlite20 OSS takes this one step further, combat isn't intended to be the main source of fun in the game. The game is as much about exploration and treasuring finding as

it is about combat. Sure, you are going to have to fight things to explore and find treasure, but always remember that combat may not be the best or safest way to handle every situation. Think before you rush into combat. After all, it's not the only way to earn a good pile of experience – and monsters don't have to be killed to be defeated (and get XP for them).

Forget "Rules Mastery": Player skill in "old school" style games isn't about mastering the game rules so you can solve any problem by knowing the right combination of rules from 20 different rule books. Microlite20 is designed to be rules light and Advanced Microlite20 OSS tries to stress this even more by encouraging GMs to make rulings on the spot taking into account specific circumstances instead of trying to hunt up special cases in the SRD or a stack of optional rule books. It's faster and helps players immerse themselves in their character and the game world instead of in rule books. Both players and GMs should remember that these rules are a tool for the GM. If something herein does not work right in your campaign, change it. The object is to have fun, not be a slave to rules or to players who think being a rules-lawyer is the way to get ahead. In many roleplaying games, the Rules As Written (RAW) are often considered sacrosanct or at least somehow better than those a GM can come up with himself. This is not true of Microlite20 OSS.

Styles of "Old School" Play

If you read some "old school" blogs, forums, and web sites, you might get the impression that there is only one "old school" style of play: a style with expendable player characters who spend all their time in dungeons designed in the style of the old "Tomb of Horrors" module where an adventuring party is only one slipup away from death. This style of play is often shown in early modules.

What most people forget is that these early modules were designed for tournament play where the party that lasted longest and made it deepest into the dungeon was the winner. While a few gaming groups did run their regular campaigns like this and enjoy it, most people did not enjoy such games and the GMs who ran them were often referred to as "Killer GMs" (who often found themselves without players). Instead most home campaigns were a mixture of the following four styles – some campaigns stressing one or two over the others.

Power-Gaming: Many players start out playing in this style. Many soon get bored with it and add more and more of other styles. A power-gaming campaign is all about character power. They are known by their class, level, special items, and amazing powers and deeds. ("I killed the Demon King with my 15th Level Fighter/Magic-User/Druid. It only took two hits from Thor's Hammer to knock him out. Then I cut off his head with my vorpal blade.") There is often a lot of player competition for the most powerful character in campaigns that stress power-gaming. A lot of people look down on this style, but it can be a lot of fun to play a pure power-game in a group of players who all like the style.

Wargaming: This was probably the style old school rules were originally written for. The wargaming style of play is a competition between the player group and the GM. The GM sets up tactical battles, puzzles, and the like and the players solve them for treasure and experience. Fudging die rolls and ignoring rules (either for or against the players) is frowned upon as it detracts from the challenge and fun of the adventure. Characters in pure wargaming campaigns often were expendable and had little personality or goals (beyond staying live and getting rich) as a character with such might be tempted to do things dysfunctional to survival. Published tournament dungeons like Tomb of Horrors could be considered examples of extreme forms of this still. Once the RPG hobby became known outside of the minis and board wargaming community, pure forms of the wargaming style quickly became uncommon.

Role-Playing: A pure role-playing campaign is almost the opposite of a pure wargaming campaign. Player skill, tactics, and rules aren't really important. What is important is the player's character and that character's life in the game. In a pure role-playing campaign, players create the personality of their characters in great detail and players generally have a large emotional investment in them and do not consider their characters expendable. Players tend to have their characters act within their personalities and within the beliefs they're supposed to hold – even when doing so is not the best thing to do at the time within the game. The object is to live your character's life in the campaign world. You "win" by having your character achieve his goals, goals which may or may not have anything to do with the game's goals of exploring and accumulating treasure and experience points. The modern computer game *The Sims* is an example of this style of play.

Story-Telling: While all campaigns tell a story after-the-fact (that is, you can tell a story based on the characters' actions in the game), in a story-telling campaign, the GM has worked out a story in advance and the player characters are the protagonists. The campaign world usually has a detailed background and back story behind it. Knowing this background may be more important than knowing the rules. Some pure story telling campaigns are little more than single-line railroads where the characters play their almost pre-scripted parts in the story. In other cases, things are more free-form with story flow and events created by interactions between the GM's basic outline of story events and the actions of individual characters during the campaign. Some people consider the more pure forms of story-telling campaigns boring straight-jackets while others love the idea of being a major part of a real story.

These four major styles of play appeared early in the history of role-playing games. They were first mentioned in a general circulation publication in Glenn Blacow's article "Aspects of Adventure Gaming" in *Different Worlds* #10 (the October 1980 issue).

The important thing to take from this section isn't the four styles or their labels (as there are other systems for describing this with their own labels), but the idea that there were many different styles of "old school" play back in the "old school" days – not just the single style stressed in "old school" blogs, forums, and web sites. Don't let those sites make you believe that you aren't playing old school right if your campaign isn't strongly in the wargaming camp. Most successful campaigns back in "old school" days were a mixture of all four major styles – and a heaping helping of minor styles.

Advice for the New Old School Gamemaster

If you are comfortable running a rules-light game like standard Microlite20, you'll probably have no trouble running Advanced Microlite20 OSS as you have already learned to run a game without having hundreds of pages of rules detailing how to handle every situation that might possibly arise in the game. You've already learned to just make a ruling that you think fits the situation and keep the game moving.

The greatest change between Microlite20 and Advanced Microlite20 OSS is the modification of character skills. If you are used to just allowing players to just say "I'm searching the room. What do I find?" and make a search skill roll or just say "I'll try to persuade the baron to loan us a catapult." and make a persuade skill roll, running without skill rolls is going to require as much change to your thinking as it will to your players' thinking.

First, you need to get your players to tell you what their characters are actually doing in the campaign world, instead of talking in terms of what skill they are using. Then you need to learn to listen to what they say and decide if their description of what they are doing a) would most likely solve the problem, b)

wouldn't have a chance of solving the problem, c) might not immediately solve the problem but would provide more info that would help solve the problem, or d) would not definitely solve the problem but has a fair chance of doing so. Only d would require a die roll.

Let's take checking a chest for traps as an example. Get the players to describe in general terms how they are going to check the chest for traps. Note general terms are enough, the idea is to see what the characters are doing, not to require them to describe every single muscle and eye movement they make. Having to "click on one exact pixel on the screen" to succeed is boring and frustrating in a computer game, the verbal equivalent of it is even more frustrating in a tabletop game. Don't fall into the trap of doing it as it turns players off fast.

Let's say a player says "I'll look the chest quickly over for obvious traps, paying special to the keyhole, clasp, and anything that looks out of the ordinary. I'm not touching it yet."

If the chest had a poison needle near the clasp or some holes for poison gas or needles to shoot out of, this should be enough for the character to notice it without a roll, even if he isn't a Rogue or the like. However, if the chest is set to explode (or shoot daggers out of the opening when opened, such a search is not going to discover the trap – again no matter what the character's class or background as such a trap isn't visible from the outside. If you are feeling generous, you might have a Rogue make a Subterfuge skill roll and if she makes it tell her player that while she doesn't see a trap, something still doesn't seem right about the chest.

If the character had said he was then poking the chest with a pole instead of rushing to open it, he might hear something strange if the chest had the above-mentioned dagger trap. Of course, unless he is a Rogue or has some strange background, chances are he would not associate the noise with a trap, but rather just that there was something loose in the chest. Again, you might give a Rogue a roll, especially an experienced Rogue.

As this example shows, it really isn't hard – unless you choose to make it hard. It's just different. After a few sessions both you and your players will find that it really isn't as hard as it looks.

Some players, however, really want die rolls. Because of previous bad experiences with poor GMs, they just can't trust the GM enough to handle some decisions being made without die rolls. If your players are like this, you can use "skill" rolls as a safety net. The players will still have to describe what their character does to solve the problem just as above. Once the player describes what his character is doing, the GM calls for a class/background based "skill" roll as described in the skills section of these rules. The results are determined by your opinion as GM of the action described and the skill roll. There are basically two situations:

In the first case, you feel that the player has a good plan that should likely succeed. Therefore it will succeed regardless of the result of the roll, but how well it succeeds is determined by the skill roll. A failed skill roll is a minimal success; the character succeeds, but just barely. A successful skill roll means the character's plan succeeds without any major hitches.

In the second case, either the player obviously knows less than his character does about the situation or just comes up with a bad idea that you feel is unlikely to work. You let the skill roll decide the result. A failed roll means the plan fails, while a successful roll means the plan somehow worked after all, but probably not perfectly.

Players who refuse to even try to come up with some type of rational statement about what their character is actually doing but just want to let the skill roll decide automatically fail.

Free Rules-Lite Games * Old School Play with Modern Mechanics

Argo

by Mike Berkey (michael.berkey@gmail.com), Copyright 2010. For more Microlite20 awesomeness, head over to the Microlite20 website at <http://www.microlite20.net>.

It is the dawn of history. Your characters are heroes of ancient Greece, who sail the waters of the Aegean, trek through the vast stretches of unknown land beyond the few points of light comprising the first civilizations. This is not the history of our world, it is a world where magic exists and the gods still walk the Earth.

Direct influences are movies such as the old Ray Harryhausen sword and sandal epics and games such as *Titan Quest*, *God Of War* or *Mazes and Minotaurs*.

Warning, this does make some use of the SRD, because retyping lists really sucks. The design goal is to make a somewhat different-flavored D&D that remains compatible with the SRD, but plays fast...with a much smaller barrier to entry for newbies.

Stats

Argo uses four stats: **Strength, Dexterity, Intelligence, and Charisma.**

Roll 4d6, dropping the lowest die. Total the remaining 3 dice and allocate to one of the stats. Repeat for the remaining stats.

Your stat bonuses are **(STAT-10)/2, rounded down.**

Races

Human. Humans get one extra Mastery ability (for a total of 2 at first level).

You also have the option of declaring yourself to be of an **epic bloodline**. In exchange for another Mastery ability (for a total of 3 at first level), the gods decide to take an interest in you because of your ancestry. This is rarely a good thing.

In exchange for the extra ability, whenever you roll a natural 1 on a d20, roll d6: 1 Wandering monsters show up, 2 Everyone in the party takes a -1 to all rolls for the next hour, 3 An important item disappears from a random party member's inventory, 4 Something nearby catches on fire, springs a leak or otherwise takes damage, 5 The weather takes a turn for the worse, 6 Roll twice.

Additional Mastery picks at level 1 must be different—you can not stack them initially.

Primordial. "Primordials" represent a broad category of creatures that borrow elements of animals or magical creatures and blend them with human stature and intelligence. Satyrs, Centaurs, Harpies, Nymphs, they all fall under this category. Describe what you are, then give +2 to one stat. Another stat is penalized by -2 and you gain a special ability.

Talk over the specifics with your GM—examples could be flight, the ability to put foes to sleep by playing the pipes, thick scaly hide, +2 to an ability score, claws, the ability to breathe underwater, etc.

If you take another -2 penalty on top of that, you can have 2 special abilities.

Examples:

Centaur. +4 Str, -2 Dex, -2 Cha. Centaurs have four legs. They are fast, more stable than bipedal creatures and can carry more.

Naiad. +2 Cha, -2 Str. Naiads can breathe underwater and swim with preternatural ability.

Satyr. +2 Dex, -2 Int. These goat-legged creatures can play the pan flute, causing a magical drowsiness in all who listen (victim's Int+Know vs the Satyr's Cha+Subt, takes a few minutes to have any effect). At the GM's option, this ability can cause more varied effects as the Satyr grows in experience.

Note that these are only suggestions. It's perfectly acceptable for 3 different versions of the same "race" to appear in the same party, if their respective players want to emphasize different aspects. One Satyr could be Dexterity-intensive, while another could be Charisma-based, for example.

Classes

	Hit Points	Mastery
Hero	10+Str bonus/level	War
Rogue	8+Str bonus/level	Trickery
Sorcerer	6+Str bonus/level	Elemental, Nature, or Prophet
NPC	4+Str bonus/level	None

Heroes are warriors, masters of hand to hand combat. Play a Hero if you want to go toe to toe with your enemies and find glory in battle.

Rogues are cunning, masters of deceit. Be a Rogue if you want to outwit your enemies, like Odysseus.

Sorcerers are masters of magic. Be a Sorcerer if you want to control the forces of nature, the elements or find wisdom in the flows of time.

NPC's are non-adventurers. The village black smith, the local priest, the scholar who teaches in the town square—they do not have access to Masteries but can choose as many Trained Skills as they need to perform their jobs adequately. This is not a player character class—it is simply listed here for completeness.

Hit point totals in this version of Microlite start out smaller, but inflate faster. They are also not randomly rolled. Monsters, however, have random hit dice, as per the standard d20 SRD.

Skills

There are four skills : **Communication**, **Knowledge**, **Physical**, and **Subterfuge**.

Communication skill covers interaction with other people and creatures. Bluffing, seduction, diplomacy, bribery, out-and-out lying, it's all here.

Knowledge is your grasp of the occult, how the world works, philosophy, history and the ways of the gods.

Physical. If it's something physical that you do, this skill probably covers it. Jumping, riding a horse, climbing and so on.

Subterfuge. Skulduggery, sneaking around, disarming traps and other such things.

Trained Skill. Each character must choose 1 skill they are best at (called your **"Trained Skill"**). Your rank in that skill will be at your level+3. All other skills will be at half your level, rounded down, plus one ((Level/2)+1).

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

Roll equal to or higher than the given Difficulty Class to succeed. Difficulty Class (or DC) is a number chosen by the GM to represent the difficulty of a skill roll. It ranges from 10 on the low end (dead easy) to 30 – 40 on the high end (nearly impossible). An average DC would be around 20.

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + INT bonus. Disabling a trap is Subterfuge + DEX bonus.

Note that there are no "saving throws" in this game; use Physical + STR or DEX for Fortitude and Reflex saves. Will saves are usually Know or Subt + INT. Whenever a "saving throw" is referenced, this is what it is referring to.

Taking 10. When your character is not under direct pressure or otherwise being distracted, you can "take 10". Instead of rolling d20 for the skill roll, treat the result as 10 and calculate the skill check accordingly.

Taking 20. If the task in question allows the leisure of repeated attempts and you have plenty of time—at least 5 – 10 times more than usually required to perform a skill and are not under direct pressure or otherwise being distracted, you can "take 20". Instead of rolling d20 for the skill roll, treat the result as a 20.

Masteries

Masteries represent special skills and class abilities. Every time you advance a level, choose one ability from the list. Many abilities can be taken several times—if it stacks, it will say so in the description.

Every 4th level, you can choose from any Mastery, including your own, if none of the other Mastery's abilities appeal to you. This replaces your normal level pick.

Companions, henchmen and followers will be created and statted out by the GM.

Elemental

- **Cast Air Spells**
- **Cast Earth Spells**
- **Cast Fire Spells**
- **Cast Water Spells**
- **Elemental Companion.** Can be any creature within reason—just describe it. Tiny elementals, miniature dragons, and small demons are all appropriate. It will be half your level, rounded down. If taken again, your companion's level will increase to your own.
- **Existing companion** gains a special ability (fire breathing, another exceptional movement ability, spellcasting, etc).
- **Forceful.** Once per day, reroll any spell result, picking the more favorable of the two rolls. Can only be taken once.
- **Gain** +1 to saves vs the elements, with a maximum of +5.
- **Gain** DR 1 vs elemental damage, with a maximum DR of 5.
- **Gain** +5 SP, can only be taken once.

Nature

- **Cast Animal Spells**
- **Cast Healing Spells**
- **Cast Plant Spells**
- **Cast Sun Spells**
- **Animal Companion.** Can be any animal within reason. It will be half your level, rounded down. If taken again, your companion's level will increase to your own.
- **An additional companion** if you already have one.
- **Gain an enhanced sense.** Sharp hearing, keen eyes, can track by smell, see in the dark, whatever you like, with GM approval.
- **Immune to diseases and poisons.**
- **Intuition.** An innate ability to sense trouble in the air. Once per adventure per level, you can make a Int + Subt roll vs DC 15. If successful,

you get a hunch that everything is all right, or you get a bad feeling about a specific situation, based on the GM's best guess relating to the circumstances. In addition, all initiative rolls for the character will be at +1.

- **Shapeshift into medium or small creatures.**
- **Shapeshift** is extended to Large creatures.
- **Shapeshift** is extended to Tiny creatures.
- **Vital.** +1 hp per level, takable once. Increases are retroactive.

Prophet

- **Cast Good (or Evil) Spells**
- **Cast Knowledge Spells**
- **Cast Law (or Chaos) Spells**
- **Cast Luck Spells**
- **Cast Trickery**
- **Cast War**
- **Foresight.** Reroll any failed skill check, once per day. Can be taken again, up to two times, for a maximum of 3 uses per day.
- **Powerful.** Gain +1 per level to your Spell Point total, takable once. Increases are retroactive.
- **Soothsayer.** Gain +1 to your Communication skill, up to a maximum of +5.
- **Wise.** Gain +1 to your Knowledge skill, up to a maximum of +5.

Trickery

- **Agile.** +1 to AC in situations where the character can move freely, up to a maximum of +5.
- **Backstab.** +2d6 damage if the character can sneak up behind a target, maximum of +10d6.
- **Crafty.** One of your other skills is now Trained.
- **Deceitful.** Gain +1 to your Subterfuge skill, up to a maximum of +5.
- **Luck.** Once per day, you can reroll any damage taken, taking the lesser value. This can be taken again two more times, each time giving an extra use.
- **Traps.** You can set traps, if given enough time. If the enemy fails to notice them (Int + Subt vs Int + Subt), they either take 1d6 damage per level (10d6 max) or are temporarily set back in some nonfatal way (1 round/level or -1/level to some appropriate roll or ability score).
- **Tricky.** There's a +5 DC penalty for enemies to detect a Trap. Can be taken twice.

- **Henchman.** The henchman will be half your level, rounded down.
- **Gain 2 extra henchmen** if you already have one.

War

- **Armor Mastery.** When wearing armor, the character gains DR 1, with a maximum DR of 3.
- **Flurry.** Can perform a flurry of attacks. A flurry allows you to gain an additional attack per round in exchange for a -2 to hit on all attacks per round. Choosing this repeatedly gives you an additional attack at an additional -2 penalty on all attacks (e.g. 2 attacks at -2, 3 attacks at -4 and 4 attacks at -6). 4 attacks per round is the maximum. You can opt to attack fewer times than you are capable of in order to be more accurate.
- **Shield Mastery.** +1 AC when using a shield, with a maximum +3 bonus on top of the shield's bonus.
- **Tough.** Gain 5 hp, can be taken repeatedly.
- **Vigorous.** Gain +1 to your Physical skill, up to a maximum of +5.
- **Weapon Mastery.** +1 to hit and damage with a maximum bonus of +5.
- **Gain a follower.** This follower will be half your level, rounded down.
- **Gain 2 extra followers** if you already have one.

Magic

Once you choose a Cast ability, you immediately gain a bank of spell points equal to 4 SP/Level, plus or minus your Int bonus (or penalty). Your intelligence bonus is NOT added per level, it's a one time bonus (or penalty).

Spell points are spent when casting spells, at the following rate:

Spell Level	1	2	3	4	5	6	7	8	9
SP Cost	1	3	5	7	9	11	13	15	17

Any SP spent are recovered after a full night of rest.

Which spells can be cast depend on what abilities you've chosen from your Mastery list. Each ability corresponds to the list of Domain spells in the SRD under Clerical spell lists. So, if you can cast Fire and Water spells, then you may choose any of the 18 spells listed under the Fire and Water domain lists in the SRD. You do not get domain powers.

Choosing another "Cast" expands your spell selection, but not does not give you additional SP per day.

You can cast a maximum spell level equal to one half your level, rounded up, or your Intelligence modifier, whichever is higher.

Spells are subject to GM approval—for example, if the text says you can summon and control high level monsters and you're still low level, then the GM can rule that the monsters that do show up are fairly weak...or he can make the spell unreliable in other ways.

Combat

If HP reaches 0, you are unconscious and dying. If you aren't bandaged or otherwise healed by the end of combat, you must roll Str+Phys vs DC 20 or die. If you make the save, you recover to 1 hp after a few hours. If a dying character is struck again, he dies instantly. Hit points heal naturally at the rate of 1 point per level per day, double that if under full bed rest with medical attention.

A combat round lasts 6 seconds. The order in which characters and NPC's act is called "initiative order".

Roll d20 + DEX bonus for initiative order. Highest total acts first, then next highest, etc. Only roll once, on the first round of combat—the order stays the same for subsequent rounds.

Everyone can do one thing each round: move, attack, dodge, etc.

Melee attack bonus = STR bonus + Level
Ranged attack bonus = DEX bonus + Level
Armor Class (AC) = 10 + armor + DEX bonus + other bonuses.

Add attack bonus to d20 roll. **If equal to or higher than your opponent's Armour Class (AC), it's a hit.** Natural 20 is automatically a critical, doing maximum damage.

Rogues and Heroes can use DEX bonus + Level as their Melee attack bonus instead if wielding a light weapon.

This version of Microlite20 does not use iterative attacks. All additional attacks that do occur (from a Hero's flurry, for example) do so more or less simultaneously.

Add STR bonus to Melee damage, x2 for 2-handed weapons.

Cover. If you duck behind an object, you can gain +2 to +10 to your AC against ranged attacks, depending on the extent of the cover (light cover = +2 all the way to nearly complete = +10). Half this AC bonus may also apply to saves if the GM allows it.

Dodge. You can forgo your next attack at any time and dodge out of the way. Roll Dex + Phys. The total is your effective AC until your next attack comes up. If it's lower than your real AC, well, you zipped when you should've zagged.

The GM may modify your check by +2 or -2 (or more) to reflect the amount of cover in the area and how the local terrain affects your mobility.

Grab. Make a hit roll on your target. If successful, the target and attacker make opposed Phys+Str rolls. If the attacker wins, the target is grappled and loses his Dex bonus to AC (if positive). If the target wins, the grapple fails. Every time the target's action comes up he can make another opposed roll to either throw off the grapple or reverse the grapple.

Every time the attacker's action comes up, he can do something, such as inflict unarmed damage, strip an item from them, or move or throw the target somewhere (potentially also doing unarmed damage). It's the GM's judgment call if an action is reasonable or not.

Ranged Combat. Shooting an arrow into a crowded melee is not a good idea—if you don't take a -4 to hit, there's a 50% chance you'll hit a friendly instead of an opponent.

Ranged Penalties. If your target is relatively close, there is no penalty to hit for range. If it's mid-range for the weapon you're using (judgment call), take a -2. If it's farther out than that, the GM will assign a -4 to -10 penalty to hit, depending on his judgment of how far away the target is.

Smash. The player can take a -4 penalty to hit and deliver a powerful blow to his enemy, causing an additional die of damage. For a -8 penalty, they can cause two additional dice. If the weapon is not magical and causes more than twice its maximum damage (e.g. 8x2 = 16 for a spear), then it causes the listed damage and shatters.

Two weapons. You can wield two light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. It's up to the GM what counts as a light weapon. This does stack with a flurry.

Other Hazards

Falling: 1d6 damage per 10', half damage on Phys+DEX save. DC=depth fallen in feet, maximum DC 30, maximum damage 20d6.

Extreme Heat & Cold: If not wearing suitable protection, Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Lava: 2d6 damage per round exposed; much more if completely immersed. Damage continues until lava is removed or quenched.

Poison: Phys+STR save to avoid or for half, depending on poison. Effect varies with poison type.

Spikes: add +1 point to falling damage per 10' fallen, max +10.

Level Advancement

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. e.g.: 1 skeleton = EL1. 2 skeletons = EL2. 4 skeletons = EL3, etc.

Add up the Encounter Levels (EL's) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds:

- +The class's listed Hit Points (plus or minus Strength bonuses)
- +1 to all attack rolls
- +1 to your Trained skill(s)
- +1/2 to all other skills

Example: The 1st level adventurers have just completed a mission, and defeated 5 EL1 encounters, an EL2 trap and the EL3 leader. That's a total of EL10, so they all advance to level 2. They need to defeat another 20 Encounter Levels to reach Level 3.

If the level divides by four (i.e. level 4, 8, 12, etc.) add 1 point to STR, DEX, INT or CHA.

A new Mastery pick is gained every level. Every 4th level this Mastery pick can be from any Mastery list.

Equipment

For simplicity's sake, wealth is tracked as per the SRD.

1 gold piece = 10 silver pieces = 100 copper pieces.

Barter is also fairly common and is handled by opposed Cha + Comm rolls. Every 1 point the roll is won by adjusts the resulting price by 5%, to a maximum of 50% or 150% of the cost, depending.

Hero 150 gp
 Rogue 125 gp
 Sorcerer 75 gp

Weapons	Damage	Cost	Ammo Cost	Notes
Axe, Battle	d8	20 gp		
Axe, Hand	d6	6 gp		Ranged
Club	d6	5 gp		
Dagger	d4	2 gp		Ranged
Dart	d4	5 sp		Ranged
Javelin	d6	1 gp		Ranged
Net	--	20 gp		Ranged, Entangles*
Short Bow	d6	30 gp	1 gp per 20	Ranged, Two-handed
Short Sword	d6	10 gp		
Sling	d4	2 sp	1 sp per 10	Ranged
Spear/Trident	d8	15 gp		Ranged
Staff	d6	2 sp		Two-handed
Sword	d8	15 gp		
Unarmed Strike	d3	--		

* Entangles the opponent if he fails a Str + Phys check versus your Str + Phys.

Armor	Rating	Cost
Leather Armor	+2	30 gp
Scale Armor	+3	80 gp
Cuirass	+4	180 gp
Helmet	+1	20 gp
Shield	+1	10 gp
Shield, Tower*	+4	30 gp

* When using a tower shield, all attack rolls are at -2 due to the weight of the shield. However, the shield can count as cover, especially when used as part of a phalanx.

Cuirass and Leather Armor do not stack. Helmets and Shields, however, can be worn without armor, adding their respective bonuses.

Other Equipment:

For the sake of simplicity, equipment and services are per the SRD, with GM approval.

Magic Items:

Magical equipment exists in this setting, but is almost always either legendary (e.g. "The Mask Of Agamemnon") or of divine origin. There is no generic nameless "Sword +1", or if it does, it has a name like "Telus' Last Stand" and has a story behind it.

In any case, magical items can not be bought as part of the character creation process and if they do appear on the market, they tend to be rather expensive and sought after.

Potions work as per the SRD and are relatively common. The existence of other types of magic such as scrolls is up to the GM.

Example items:

The Sandals of Apollo. When worn, the player can fly at a fast running pace with no fatigue for up to 30 minutes per day.

Xenophon's Edge. A short sword +2 with unusual script along the blade. When a critical strike is achieved, the writing briefly glows and cures 1d6 hit points of damage to the wielder.

Foes

Templates:

Colossal. Turns a "normal" monster, creature or NPC into something several times as big.

- Double HD (or add 8, if greater)
- -4 initiative if based on a monster or creature, -2 if based on a PC race
- Double number of damage dice
- Add +5 damage to their melee attacks
- Add an additional +5 hp per hit die
- If any of their special attacks allow a save, increase the save DC by +5.
- If Strength is important, add another +10 to their total (already figured into previous bonuses)

Colossal versions of creatures often have special attacks involving throwing objects, grabbing victims or stomping on them.

Extra hit dice count for attack bonuses and hit points, but do not otherwise count as experience levels if the creature originally had class levels.

Example: Cyclopes. Hero-3, Colossal. 3 levels PC class + 8 HD. Str 26 (+8), Dex 10, Int 6 (-2), Cha 6 (-2). HP 154 (54 for Hero, plus another 8d8+64 for the colossal HD bonus, average result used). AC 15 (+4 Cuirass, +1 Shield). Initiative -2. Club +19 (2d6+8) or Fists +19 (2d3+8). Physical +6, all other skills at +2. Armor Mastery DR 2, Flurry. Has a quiver of magic javelins that cast a 6th level lightning bolt when used. Using a

javelin expends it.

Another example: Colossal Snake, Giant Constrictor. 22d8+69 (168 HP), AC 15, Initiative -1, Bite +24 (2d8+15) or Tail Lash +22 (2d8+15, target must roll Str+Phys vs DC 17 or go flying several yards and fall down). If the bite hits, it can Grab at Str 35. It then squeezes for 2d8+15 per round.

Construct. Greek mythology and (more importantly) the modern retellings of Greek mythology brim with wondrous mechanical constructs—metal soldiers, mechanical bronze bulls, clockwork owls and all other sorts of wonders.

Take a creature, NPC or monster as a base.

- Base hit die type becomes d10
- Add 2 hp per hit die or level
- Increase damage to the next higher die type
- Add +2 damage to their melee attacks
- Increase Strength by +4, if important (already figured into previous bonuses)
- If man-sized, add DR 1/magical weapons
- If bigger than man-sized, DR 3/magical weapons
- If gigantic, DR 10/magical weapons

Constructs can't heal—they can only be repaired and they are unaffected by poison, disease or mind-affecting magics. They are also slower than their biological counterparts, moving half as fast.

Reduce initiative to -1 if larger than man-sized, otherwise +0. They may also be vulnerable to rusting or corrosion, depending on what material they are made from.

Sample Creatures:

Bear. 6d8+24 (51 hp), AC 15, Initiative +1, Claw +11 (1d8+8) or Claw +11/+11 (1d8+8)/Bite +6 (2d8+4). If a claw hits can attempt to Grab with Str 27.

Boar. 3d8+12 (25 hp), AC 16, Initiative +0, Gore +4 (1d8+3).

Bull. 5d8+15 (37 hp), AC 13, Initiative +0, Gore +8 (1d8+9).

Chimera. 9d10+27 (76 hp), AC 19, Initiative +1, Bite +12 (2d6+4) or Dragon Head Bite +12 (2d6+4)/Snake-Tail Bite +12 (1d8+4)/Goat Head Gore +12 (1d8+4)/Claw +10 (1d6+2)/Claw +10 (1d6+2).

Has a breath weapon that can be used every 1d4 rounds for 3d8 damage—Dex + Phys vs DC 17 to save for half. For type of breath weapon, roll d6: 1-2 Cone of fire, 2 Bolt of lightning, 3 Poisonous spray, 4 Blast of cold, 5 Gout of acid. Also has keen senses and can fly clumsily.

Dog. 1d8+2 (6 hp), AC 15, Initiative +3, Bite +2 (1d4+1).

Golem, Bronze. 18d10+30 (129 hp), AC 28, Initiative -1, Slam +23 (2d10+11) or Slam +21/+21 (2d10+11) or Roar, DR 15/magic weapons.

Immune to most spells that allow spell resistance, metal body makes it vulnerable in unpredictable ways to earth spells. Electricity slows it for a few rounds and fire heals it. Roar can be used once per encounter, anybody within immediate ear shot must roll Str+Phys vs DC 20 or be stunned for 1d6 rounds. Can also throw boulders for 2d10+11 damage, +18 to hit.

Golem, Stone. 14d10+30 (107 hp), AC 26, Initiative -1, Slam +18 (2d10+9) or Slam +16/+16 (2d10+9), DR 10/magic weapons. Immune to most spells that allow spell resistance, stone body makes it vulnerable in unpredictable ways to earth spells.

Horse, Light. 3d8+6 (19 hp), AC 13, Initiative +1, Hoof -2 (1d4+1) or Hoof -2/-2 (1d4+1).

Kraken. 20d10+180 (290 hp), AC 20, Initiative +4, Tentacle +28 (2d8+12) or Tentacle +26/+26 (2d8+12). DR 1 (rubbery hide).

Can opt to do a Str 34 Grab with either tentacle. If grabbed, the Kraken will either crush for 2d8+12 with the tentacle or transfer the victim to one of its 6 shorter arms. These can maintain the hold and crush for 1d6+6. The kraken can also attack the victim with its mouth for 4d6+6. Tentacles have 20 hp if attacked directly, arms have 10.

Can also use sea-related weather magic, control weaker sea creatures and spray an enormous obscuring ink cloud over an area.

Lion. 5d8+10 (32 hp), AC 15, Initiative +3, Claw +7 (1d4+5) or Claw +7/+7 (1d4+5) and Bite +2 (1d8+2). If the bite hits, it can Grab at Str 21. When grappling, it can Rake +6 (1d4+2).

Manticore. 6d10+24 (57 hp), AC 17, Initiative +2, Claw +10 (2d4+5) or Claw +10/+10 (2d4+5)/Bite +8 (1d8+2) or Volley of 6 Spikes +8 (1d8+2, roll separately for each spike).

Medusa. 6d8+6 (33 hp), AC 15, Initiative +2, By weapon +8 (base weapon damage, no Str bonus). In addition to weapon attack, can also attack with Snakes +8 (1d4 plus poison). Str+Phys vs DC 15 to avoid poison. If failed, 2d6 Str damage, which heals at a rate of 1/day.

Also has a petrifying gaze, roll Str, Int or Dex plus Phys, Subt or Know (whichever's higher, depending on how the player describes their attempts to avoid the attack) vs DC 18 to avoid. Failure means being turned to stone permanently.

Pegasus. 4d10+12 (34 hp), AC 14, Initiative +2, Hoof +7 (1d6+4) or Hoof +7/+7 (1d6+4)/Bite +2 (1d3+2). Can fly.

Rat, Giant. 1d8+1 (5 hp), AC 15, Initiative +3, Bite +4 (1d4 plus disease). Str+Phys vs DC 11 to avoid disease. If failed, 1d3 days later, character develops a nasty fever.

Shark, Large. 7d8+7 (38 hp), AC 15, Initiative +6, Bite +7 (1d8+4).

Skeleton Warrior. 1d12 (6 hp), AC 15, Initiative +5, Rusty Sword +1 (1d6+1). DR 5/bludgeoning.

Snake, Giant Constrictor. 11d8+14 (63 HP), AC 15, Initiative +3, Bite +13 (1d8+10). If the bite hits, it can Grab at Str 25. It then squeezes for 1d8+10 per round.

Snake, Viper. 1d8 (4 HP), AC 17, Initiative +7, Bite +4 (1d2-2 plus poison). Str+Phys vs DC 10 to avoid poison. If failed, 1d6 Str damage, which heals at a rate of 1/day.

Spider, Large. 1d8 (4 hp), AC 14, Initiative +1, Bite +4 (1d4-2 plus poison). Str+Phys vs DC 10 to avoid poison. If failed, 1d3 Str damage, which heals at a rate of 1/day. Often lurks in webs which can ensnare weaker opponents.

Wasp, Giant. 5d8+10 (32 hp), AC 14, Initiative +1, Sting +6 (1d3+6 plus poison). Str+Phys vs DC 14 to avoid poison. Poison does 1d6 Dex damage, which heals at a rate of 1/day

Wolf. 2d8+4 (13 hp), AC 14, Initiative +2, Bite +3 (1d6+1).

Other appropriate creatures to convert from the SRD would be various animals and vermin, particularly of a giant or dire variety. Dinosaurs could also be very appropriate if you're planning on going with a more Ray Harryhausen tone.

Supporting Cast

Satyrs, Centaurs, human bandits and such are usually built the same way as characters, using the NPC class. Exceptional types such as main villains are built exactly as player characters.

Sample NPC's:

Child. NPC-1. Str 6 (-2), Dex 10, Int 8, Cha 10 (+1). HP 2. AC 12. Fists +1 (1d3-2). All skills at +1.

Farmer. NPC-1. Str 12 (+1), Dex 10, Int 10, Cha 10. HP 5. AC 10. Club +2 (1d6+1) or Fists +2 (1d3+1). Physical +4, all other skills at +1.

Guard. NPC-2. Str 14 (+2), Dex 10, Int 10. Cha 10. HP 12. AC 14 (+2 Leather, +1 Helmet, +1 Shield). Spear +4 (1d6+2). Physical +5, all other skills at +1.

Noble, Typical. NPC-4. Str 12 (+1), Dex 10, Int 14 (+2), Cha 14 (+2). HP 20. AC 15 (+4 Cuirass, +1 Helmet). Sword +5 (1d6+1). Communication +7, all other skills at +3.

Princess. NPC-4. Str 8 (-1), Dex 12 (+1), Int 10, Cha 16 (+3). HP 12. AC 11. Dagger +3 (1d4-1). Communication +7, all other skills at +3.

Oracle. Prophet-4. Str 6 (-2), Dex 12 (+1), Int 16 (+3), Cha 12 (+1). HP 16. SP 19. AC 11. Communication +7, Knowledge +10, all other skills at +3. Cast Knowledge, Cast Magic, Wise (x3). Blind.

Veteran. NPC-8. Str 16 (+3), Dex 14 (+2), Int 12 (+1), Cha 8 (-1). HP 56. AC 18 (+4 Cuirass, +1 Helmet, +1 Shield). Sword +11 (1d6+3) or Spear +11 (1d8+3). Physical +11, all other skills at +5.

M20 HYBORIAN AGE

Stats

There are 3 stats : Strength (STR), Dexterity (DEX) and Mind (MIND). Scholars have a fourth stat, Sanity (SAN), set at 0.

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

Hyborians get +1 to all skill rolls.

Barbarians get +2 to STR

Picts and Zamorians get +2 to DEX

Eastern Nomads get +1 to DEX, +1 to Physical and +1 to all attack rolls with Bows

Stygians get +1 to MIND, +1 to Knowledge and +1 to Subterfuge

City Dwellers get +1 to MIND, +1 to Subterfuge, +1 to Communication

Classes

The classes are Fighter, Rogue, Scholar and Noble. Characters begin at Level 1.

Fighters wear any kind of armour and use shields. They have a +3 bonus to Physical and add +1 to all attack and damage rolls.

This increases by +1 at 5th level and every five levels afterwards

Rogues can use light armour. They have a +3 bonus to Subterfuge. If they successfully Sneak (usually sub+DEX, but depends on situation) up on a foe they can add their Subterfuge skill rank to the damage of their first attack

Scholars wear no armour. They gain a +3 bonus to Knowledge. A scholar can choose to learn a magic spell with every new level, provided he is given access to training, or ancient books of horrible truths. A scholar can instead choose to gain an extra +1 to Knowledge. A Scholar is given one spell at the outset of the game. A Scholar that is a priest for a benign deity (such as Mitra) should pick Exorcism as his first spell, and then use his spell slots to increase his Knowledge.

Nobles can wear any kind of armour and use shields. They gain a +3 bonus to Communication. They also gain the ability to Lead a number of followers up to their Level + Communication rating. The Noble gives an order, and those who he Leads who decide to follow his order gets a +1 bonus to their roll. All else being equal, NPCs will follow his orders.

Skills

There are just 4 skills : Physical, Subterfuge, Knowledge and Communication. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level + any bonus due to your class or race.

Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Note that there are no "saving throws" in this game; use Physical + STR for Fortitude saves, Physical+ DEX for Reflex saves. , and Level + MIND for saves against magic or Will saves.

Magic

Scholars acquire spells one at a time. There are only two ways for a scholar to access new spells: discover a scroll or learn a spell from another scholar. There are no new spells created, only the discovery of ancient spells. At 1st level, a scholar has two spells. For every level advanced, a scholar may learn one new spell.

Casting a spell of any kind costs Hit Points. The cost is listed with the spell. A scholar may use the hit points of a sacrificial victim instead of his or her own. The victim must have enough hit points to pay for the entire spell.

This loss **cannot** be healed normally but is recovered after 8

hours rest. There is no need to memorize spells in advance.

The Difficulty Class (DC) for all spells is

10 + Caster Level + Caster's MIND bonus

Failed spells subtract 1d6 points from a Scholar's SAN. When SAN reaches -30 or more, the character is hopelessly insane.

Alchemy

Alchemy is the art of creating sorcerer items. To create an item requires 7 consecutive days of success against the DC for a given item. The greater the success in an attempt, the more days of success are rolled. Each attempt costs 3 hp.

Example: Rah-Imren the sorcerer is preparing Yellow Lotus Resin, a weak healing salve. He is a 5th level Scholar with a +6 Mind bonus. Preparing Yellow Lotus Resin is the easiest alchemical item to make at DC 15.

First attempt: Rah-Imren rolls 8. $8 (\text{roll } 1d20) + 5 (\text{Caster Level}) + 6 (\text{Mind Bonus}) = 19$. Success! Days of Success equals 19 (result of roll) - 15 (DC of Resin) which is 4. $4 / 2 = 2$. 2 Days of Success.

Cost 3 hp.

Second attempt: Rah-Imren rolls 15. $15 + 5 + 6 = 26$. Success!! Days of Success: $26 - 15 = 11$. $11 / 2 = 5$ (ignore fractions). 5 Days of Success for a total of 7 days of Success.

Cost: Additional 3 hp for a total cost of 6 hp.

If a scholar fails at any point, the days of success reduce to zero and he/she must start over or attempt it another time. Unlike magic, failure does not cost a Scholar Sanity points.

Combat

Hit Points = STR Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Roll d20 + DEX bonus for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, dodge, parry, etc.

Melee attack bonus = STR bonus + Level

Missile attack bonus = DEX bonus + Level

Magic attack bonus = MIND bonus + Level

Dodge defence bonus = STR bonus + Level

Parry defence bonus = DEX bonus + Level

Defence rating is 10 + STR + Level. (Dodge) or 10 + DEX + level (Parry). A Light Shield adds +1 to a Parry bonus, a Heavy Shield adds +2 to Parry bonus. Shields do not add anything to a Dodge defence bonus.

Add attack bonus to d20 roll. If higher than your opponent's Defence Rating, it's a hit. Natural 20 is automatically a critical doing maximum base damage. If an attack is a hit, roll for damage and subtract the Armor Rating from that roll. The result is subtracted from the victim's hit points.

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

Add STR bonus to Melee damage, x2 for 2-handed weapons.

Other Hazards

Falling : 1d6 damage per 10', half damage on Phys+DEX save.

DC=depth fallen in feet

Spikes : add +1 point to falling damage per 10' fallen, max +10

Poison : Phys+STR save to avoid or for half, depending on poison.

Effect varies with poison type.

Extreme Heat & Cold : If not wearing suitable protection,

M20 HYBORIAN AGE

Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Level Advancement

Characters get Experience Points (XP) when their party defeats monsters. Experience Points (XP) = Hit Dice of defeated monsters. Add +1 for each doubling of the number of foes. e.g.: 1 kobold (a 1 hit die monster) = 1 XP. 2 kobolds = 2 XP. 4 kobolds = 3 XP, 8 kobolds = 4 XP etc.

Characters also earn a GM-assigned amount of experience points for defeating traps, solving puzzles, excellent roleplaying, and the like. The GM should assign XP depending on the situation (usually from 1 to 5 XP).

Add up the Experience Points (XP) of every successful encounter you take part in plus any earned from GM specials. When the total = 20 x your current level, you've advanced to the next level. Reset the total XP to 0 after advancing.

Each level adds:
+1d6 to Hit Points
+1 to all attack rolls

If the level divides by four (i.e. level 4, 8, 12, etc.) add 1 point to STR, DEX or MIND (player's choice).

Fighters gain +1 to their attack and damage rolls at levels 5, 10, 15, etc.

When a scholar advances a level, they may add one more spell to their repertoire. It is possible for a scholar to possess more spells than he or she can use.

Example: Three first level adventurers have just completed a quest to Stygia to harvest black lotus. They each need 20 XP to reach third level. Their expedition was extremely successful. They defeated 10 XP worth of monsters and earned 6 XP from traps and other GM specials for a total of 16 XP each. The party's scholar earned 4 XP for great roleplaying while distracting an enemy scholar so that the party's fighter could rescue a captive and for the successful creation of black lotus juice. The party's fighter received 2 XP for great roleplaying in using cunning instead of brawn in an encounter. The party's noble received a 2 XP for great roleplaying to using his influence to recruit a team to search for lotus. Each character has more than 20XP, so each advances one level to Level 2.

Spell List

****Spells are being developed. This is a placeholder for the future spell list. ****

Level 0

Petty Curse: -1 on next action

Exorcism: Lift Petty Curse or Curse

Manipulate: Move tiny object up to a foot (open door, tip bowl etc)

Hunch: +1 to next roll to detect or avoid danger, trap or ambush within an hour

Fascinate: Can trap the attention of victim for one round, give a -1 to any roll to notice anything but the caster

Level 1

Curse: -1 on STR, DEX or MIND bonus for the rest of the day

Speak to Animal: Can ask an animal one question. Response is limited by animals intelligence.

Level 2

Spying Bird: Cast on a small bird, the caster can direct its flight, and see through its eyes for 1 hour.

Level 3

Foresight: Bulletpoint overview of next room/scene/important event from GM.

Ward against Entities: A secret sign written on a hard surface that stops entities from Beyond

Level 4

Summon Lesser Entity: Each type of entity (demon, thing from beyond) is summoned through an individual spell.

Banish Lesser Entity: Each type of entity is banished through an individual spell

Level 5

Control Lesser Entity: Unless controlled, an entity will follow its own nature

Level 6

Summon Greater Entity: Each entity (demon, thing from beyond) is summoned through an individual spell.

Banish Greater Entity: Each entity is banished through an individual spell

Level 7

Control Greater Entity: Unless controlled, an entity will follow its own nature

Deadly Curse: The victim will lose 1hp per hour until dead

Level 8

Lift Curse: lifts any curse, including lycanthropy, madness and wasting diseases.

Level 9

Summon Divine Entity: Summon a Great One

Alchemical Items

****Alchemical Items are being developed. This is a placeholder for the future list. ****

DC 15

Yellow Resin

DC 20

Black Lotus Powder

DC 25

Black Lotus Wine

Creating Items

The GM guide will provide the system to create alchemical items and spells.

Monsters

Monsters will appear on a separate list.

[End of License]

This product is 100% Open Game Content except for Product Identity, as per the Open Game License above. Product Identity includes Microlite20 and Robin V. Stacey.

Microlite Conan: This is a trimmed down version of Mongoose Publishings Conan d20 game, using the excellent Microlite d20 format. You will need the Core Rules of Microlite to play Microlite Conan. Some design choices differ from those made in the original Conan game.

Stats: See the Core Rules. **Skills:** as in the Core Rules, plus the Survival Skill from the Expert Rules.

Cultures:

Hyborians get +1 to all skill rolls.

Barbarians get +1 to STR, +1 to Survival and +1 to Physical

Picts and **Zamorians** get +2 to DEX

Eastern Nomads get +1 to DEX, +1 to Survival and +1 to all attack rolls with Bows

Stygians get +1 to MIND, +1 to Knowledge and +1 to Subterfuge

City Dwellers get +1 to MIND, +1 to Subterfuge, +1 to Communication

Classes: The classes are Fighter, Scholar, Rogue, Ranger and Noble. **Fighters** and **Rogues** are identical to their Core Rules versions except that fighters also gain a +1 bonus to Parry every 5th level, rogues gain the same bonus to Dodge. There are no armour restrictions.

Scholars gain a +3 bonus to Knowledge. A scholar can choose to learn a magic spell with every new level, provided he is given access to training, or ancient books of horrible truths. A scholar can instead choose to gain an extra +1 to Knowledge. A Scholar is given one spell at the outset of the game. A Scholar that is a priest for a benign deity (such as Mitra) should pick Exorcism as his first spell, and then use his spell slots to increase his Knowledge

Rangers gain a +3 bonus to survival and combat bonuses as Fighters. They also gain a +1 bonus to Dodge like Rogues.

Nobles gain a +3 bonus to Communication. They also gain the ability to Lead a number of followers up to their Level + Communication rating. The Noble gives an order, and those whom he Leads who decide to follow his order gets a +1 bonus to their roll for that action. All else being equal, NPCs will follow his orders. Nobles gain bonuses to parry only just like Fighters.

Magic: Magic spells cost HP as per the Core Rules. There are only Arcane Spells, no Divine ones. Spells must be learnt one by one. A Scholar can learn a new spell every time he advances a level. Instead of paying the HP cost of casting a spell, a Scholar can conduct a human sacrifice to pay for the spell. The amount of HP cost that can be covered in this way is capped by the full HP total of the victim as well as the number of rounds spent conducting the sacrificial ritual. To cover a Level 2 spell, 5 rounds must be spent sacrificing an HP 5 victim.

Combat: as in the Core Rules except there is no armour class. The difficulty to hit is calculated as 10 + DEX bonus (Dodge), or 10 + STR bonus + Shield bonus (Parry). Parry can only be used if the opponent carries a weapon and/or shield. A suit of armour carries a damage reduction score, which is subtracted from the damage roll.

Level advancement: Same as in the Core Rules, but the GM is encouraged to attribute experience to the players based on the adventure and their performance taken as a whole. Scholars gain access to new spell levels just like Magi and Clerics in the Core Rules. Nobles gain a new title/nom de guerre at level 5,10,15,20 and an associated premium representing 20% of his current cash assets. Parry and Dodge gains are made every 5th level, Parry for Fighters and Nobles, Parry and Dodge for Rangers and Dodge only for Rogues. At every level, the character can increase four skills by one each.

Equipment

Currency: 1 gold piece is worth 10 silver pieces, 1 silver piece is worth 10 copper pieces.

Starting Wealth:

Fighter	125gp	Scholar	175gp
Rogue	100gp	Noble	350gp

Weapons:	Dmg	Cost	Shields:	Bonus	Cost
Unarmed	1d4	n/a	Light Shield	+1	7gp
Light Weapons	1d6	12gp	Heavy Shield	+2	25gp
Medium Weapons	1d6+2	20gp			
Heavy Weapons	1d6+3	50gp	Armour:	DR	Cost
Thrown Weapons	1d6	6gp	Light Armour	1	75gp
Bows	1d6+2	30gp	Medium Armour	2	150gp
			Heavy Armour	3	750gp

Adventuring Equipment and Mounts and Related Gear:

See the Microlite20 Equipment list.

Clothing:

Adjectives like “Dry” or “Warm” indicates what kind of weather conditions they are good for.

Simple Clothing	Cost	Luxury Clothing	Cost
Loincloth	1cp	Citizen's Outfit	20gp
Plain Hyborian Clothes	2sp	Noble's Outfit	75gp
Plain Eastern Robes	2sp	Ornate Noble's Outfit	100gp
Cool Nomad's Robes	4sp	Exotic Robes	150gp
Dry Woodsman's Clothes	5sp	Royal Outfit	300gp
Nordheimer's Warm Furs	8g		

Alchemical Concoctions:	Cost
Black Lotus: Poison - Causes 2d6 damage	100gp/dose
Purple Lotus: +1 MIND for 24 hours, then -1 for 24 hours	50gp/dose
Yellow Lotus: Induces sleep, and hallucinations	50gp/dose
Explosive Powder: Missile attack, 1d6 damage	20gp/dose

Prehistoric Microlite20

by PsychoSama

Think "Land of the Lost".

Stats:

There are 3 stats: Strength (STR), Dexterity (DEX) and Mind (MIND).

Share a total of three points between them. You can reduce one stat to -1 to get an extra point. These are your stat bonuses.

Race:

All characters in this game are of the same race, but because of the level of sexual dimorphism males and females have slightly different statistics.

Males get +1 to STR

Females get +1 to DEX

Both Genders have retractable claws capable of 1d4 damage, and get DR1 due to their tough hides.

Classes:

The classes are Warrior, Expert, and Caster. All characters receive three skill points to assign as they wish. Characters begin at Level 1.

Warriors add +1 to all attack and damage rolls. This increases by +1 at third level and every three levels thereafter.

Experts receive a free skill point and an additional skill point every other proceeding level.

Casters are capable of using either Shamanistic or Elemental magic and spell gains one level of Spell Mastery at first level and every four levels following.

Skills:

There are only 4 skills: Physical, Subterfuge, Knowledge, and Communication. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level + any bonus due to your class or race.

Skill roll = d20 + skill rank + whichever stat is most applicable to the use.

Please note that all rolls in the game can be further affected by situational modifiers and magical effects.

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Hiding from a predator is Subterfuge + MIND bonus. Setting a trap is Subterfuge + DEX bonus.

Note that there are no "saving throws" in this game; use Physical + STR or DEX for Fortitude and Reflex saves.

Saving against magic (Will save) is usually MIND + your level.

To reduce the chances of failure on certain skill checks by assuming an average die roll result (10 on a d20 roll). You can't take 10 if distracted or threatened, such as during combat.

To assume that a character makes sufficient retries to obtain the maximum possible check result (as if a 20 were rolled on d20). Taking 20 takes as much time as making twenty separate skill checks (usually at least 2 minutes). Taking 20 assumes that the character fails many times before succeeding, and thus can't be used if failure carries negative consequences.

Spirit Points

The lives of the player characters are directly affected by the spirit world. Spirit Points represent the investment in time and energy that the spirits have placed in them, as well as their connection to the memory and skills of their past incarnations. Spirit points represent this by adding an additional die to their die rolls. When a player makes a roll for an attack, a skill check, or a stat check and is not satisfied by the result they can spend the point and roll a d6, add it to the total before the GM says if they succeeded on their 1st roll. They may spend only one point per round.

A character starts with 3d6 Spirit Points. As they spend them, they don't replenish on their own. Each level attained grants d6 points. Additional points may be gained by showing ones respect to the spirits through, rite, ritual, and religious observance. When they reach 8th level, when spending a point they get to roll 2d6 and take the better of the two rolls; at 15th level, they get 3d6, take the best of the three die.

Combat

A character has both wounds and vitality. Wounds represent their actual physical ability to absorb damage. Vitality represents both fortune in battle and the ability to press on unaffected despite minor injury or a close call. Wounds = STR X 2 + 10. Vitality Points = 2 + 4/Level. If Vitality reaches 0, the Character is injured. Further damage directly reduces Wounds.

The first time a character takes wound damage—even a single point—he becomes fatigued. A fatigued character can't run or charge and takes a -2 penalty to both Strength and Dexterity until he has rested or the damage has been healed. Additional wound damage doesn't make the character exhausted.

In addition, any time an attack deals wound damage to a character, he roll must roll Physical + STR v. 5 + number of wound points lost from the attack or be stunned for 1d4 rounds. During that time, any other character can take help the stunned character recover; doing so ends the stunned condition. If Wounds go below 0, the character is knocked unconscious and is dying. If a character reaches a number of wounds equal to the negative of their WP, they are dead.

Roll d20 + DEX for initiative order. Everyone can do one thing each turn; move, attack, cast a spell, etc.

Melee attack bonus = STR + Level.

Missile attack bonus = DEX + Level.

Magic attack bonus = MIND + Level.

Add attack bonus to d20 roll. If higher than your opponent's Defense, it's a hit. Then, subtract the target's Damage Resistance (DR) from the base damage to determine final damage. A natural 20 is a critical hit that strikes automatically, dealing damage directly to wounds.

Add STR to Melee damage, x2 for 2-handed weapons.

Defense = 10 + DEX + Defense Bonus + Enchantment Bonus.

Damage Resistance = Natural Armor + Worn Armor + Enchantment Bonus.

If a character successfully Sneaks (usually sub+DEX, but depends on situation) against a foe they can Sneak Attack, adding their Subterfuge skill rank to the damage of their attack. This ability may not be used with Magical Attacks.

A character may choose to make a Called Shot, adding their enemies DR to its Defense. If they hit, their blow does direct damage, ignoring DR. This ability may not be used with Magical Attacks.

A character may make a Called Shot Sneak Attack if they desire.

A character may choose to grapple with an enemy instead of attacking them. To grapple a character must roll a successful melee attack. If they succeed then test Physical + STR. If they succeed they've latched onto the enemy. To shake a grappling enemy a character may roll a contested Physical + STR roll.

A character in a grapple may not add their DEX bonus to their Defense nor may they move without first breaking the grapple.

To damage an enemy when grappled, roll a contested Grapple test. The Attacker takes a -4 unless noted and may only use light or natural weapons. If the attacker fails the roll, they do not do damage. If they succeed they do normal damage.

Magic

A Caster does not use a spell list, but manipulates raw magic to create any required effect. Because of the flexibility of the system however, it is recommended that the player note a few pre-prepared examples in advance to keep the game moving quickly.

To cast any spell the caster rolls his Magic Attack.

The Difficulty Class (DC) for casting all spells is Number of Spell Attributes - Ranks of Spell Mastery x 3 + Type of Spell

Code:

Spell Type	DC
Direct Damaging	Target's Defense
Stat affecting, Unwilling Target	10 + Affected Stat
Mind affecting, Unwilling Target	10 + Target's MIND
Self/ Willing Target	0

Inanimate Object 10*

*Special materials and locations may be more or less susceptible to magical manipulation.

Each spell cast (failed or otherwise) increases the DC by +2. An extended period of uninterrupted rest will reset the DC.

If a d20 rolls a natural twenty, add and roll again. If further natural twenties are rolled, continue adding and rolling.

For every 5 points (or part thereof) above the DC the caster may add 1 Attribute Level to damage, range, area of effect or duration. If they are unstated, then the defaults are used.

The Difficulty Class (DC) for resisting all spells is 10 + Caster Level + Caster's MIND + situation modifiers.

Please note that costs may be modified based on description of the spell and its effects. The below is only a general guideline. All spells and effects are subject to GM approval.

Code:

Spell Attribute	Default	Effect
Damage	0	Add 1d6
Heal/VP	0	Add 1d6
Heal/WP	0	Add 1
Stat/Skill Mod	0	Add 1 Stat\Skill Bonus\Penalty
Range	Touch	10 meters increase
Area of Effect	Target	4 meter radius increase
Duration/Combat	Instant	1 Round
Duration/Stat Mod	20 minutes	Add 20 minutes

There are two forms of Magic: Elemental and Shamanism. Elemental magic manipulates the elements to cause physical effects. Shamanistic magic manipulates the spirit world to cause metaphysical effects. A character may not use both forms of magic.

Level Advancement

Encounter Level = Hit Dice of defeated monsters (plus one step due to VP/Wounds) or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds:

+4 to Vitality Points

+1 to all attack rolls

+1 to all skills

If the level divides by three (i.e. level 3,6,9,etc.) add +1 to their defense bonus. If the level divides by five (i.e.

level 5,10,15,etc.) add 1 point to STR, DEX or MIND. Apply class based

Bestiary

Tyrant (Tyrannosaurs Rex with Spinosaurus features)

STR: +10 DEX: +1 MIND: -5

Huge Level 12 (60/60), DEF 14, DR 5, Bite (3d6+20) or Claw (1d8+5)

+5 to rolls to Resist/Dodge Fire Damage

Dragon

STR: +6 DEX: 0 MIND: -5

Huge Level 10 (50/44), DEF 11, DR 4, Bite (2d6+12) or Fire Breath (6d10) DC24 phys+DEX to dodge for half Flier

Sabrefang (Gorgonopsid Inostrancevia)

Large STR: +5 DEX: +2 MIND: -5

Level 6 (30/20), DEF 13, DR 4, Bite (2d6+10)

Terror Bird

STR: +4 DEX: +4 MIND: -5

Large Level 6 (30/18), DEF 15, DR 3, Bite (2d6+8)

Razorclaw (Deinonychus)

STR +3 DEX: +5 MIND: -5

Medium Level 3 (15/16), DEF 17, DR3, Rake (2d6+6) Claws (1d6+3) or Bite (1d6+2)

Razorclaws may only use their Rake ability while in a Grapple and suffer no penalty to attack

Swarmie (Compsognathus)

STR: 0 DEX: +4 MIND: -5

Tiny Level 1/4 (1/4), DEF 16, DR 0, Bite (1d3)

Prowler (Small Theriodont)

STR: +1 DEX: +1 MIND: -5

Small Level 1/2 (3/12), DEF 12, DR1, Bite (1d4+2)

Creeper (Small Cynodont Scavenger)

STR: -3 DEX: +2 MIND: -5

Tiny Level 1/8 (1/2), DEF 14, DR 0, Bite (1d3-3)

Vipertooth (Euchambersia)

STR: +2 DEX: +1 MIND: -5

Small Level 2 (10/12), DEF 12, DR 1, Bite (1d4+2 plus Poison)

Ogre

STR: +3 DEX -1 MIND -2

Large Level 3, DEF 9, DR 3, Claws (1d8+3) or Great Club (1d6+6)

Wrecker (Ankylosaurus)

STR: +10 DEX: -2 MIND: -5

Huge Level 9 (40/60), DEF 9, DR 16, Tail Slap (2d6+20)

Digger (Diictodon)

STR: -2 DEX: 0 MIND: -5

Tiny Level 1/4 (1/3), DEF12, DR0, Bite (1d4-2)

Bull Digger (Lystrosaurus)

STR: +2 DEX: 0 MIND: -5

Level 1 (5/14), DEF10, DR3, Bite (1d6+4)

Tusker (Placerias)

STR: +5 DEX: 0 MIND: -5

Level 4 (20/14), DEF 10, DR 5, Bite (1d8+10)

Boomer (Parasaurolophus)

STR: +3 DEX: 0 MIND: -5

Level 4 (20/32), DEF 9, DR 3, Slam (1d6+3) or Sonic Attack (stunned for d6 rounds, Mind + Level to resist DC 16)

Behemoth (Argentinosaurus)

STR: +16 DEX: -2 MIND -5

Gargantuan Level 16 (80/168), DEF 9, DR 4, Tail Slam (1d8+32), Kick (1d8+16)

Gargant (Sauroposeidon)

STR: +14 DEX: -2 MIND -5

Gargantuan Level 14 (70/152), DEF 8, DR 4, Tail Slam (1d8+28), Kick (1d8+14)

Shieldhorn (Triceratops)

STR: +6 DEX: 0 MIND: -5

Huge Level 8 (40/44), DEF 10, DR 4/11 (Front), Gore (3d6+12)

Spiketail (Stegosaurus)

STR: +5 DEX: 0 MIND: -5

Huge Level 8 (40/40), DEF 10, DR 8, Tail Spikes (2d6+10)

Devil Fish (Hyneria)

STR: +3 DEX: +2 MIND: -5

Large Level 5 (25/16), DEF 12, DR 3, Bite (1d8+6)

Bonehead (Pachycephalosaurus)

STR: +4 DEX: 0 MIND: -5

Large Level 4 (20/18), DEF 10, DR 3, Head Butt (1d6) or Charge (2d6+8)

Runner (Gallimimus)

STR: +2 DEX: +2 MIND: -5

Large Level 2 (10/16), DEF 11, DR 2, Bite (1d3+1) or Kick (1d6+1)

Greatwing (Quetzalcoatlus)

STR: +2 DEX: +2 MIND: -5

Large Level 4 (20/14), DEF 12, DR 0, Bite (2d6+4) or Claws (1d6+1)

Flier

Redfang Spider (Giant Mesothelae)

STR: -2 DEX: +3 MIND: N/A

Tiny Level 1/2 (2/4), DEF 15, DR 1, Bite (1d4-3 plus Poison)

Buzzer (Meganeura)

STR: 0 DEX: +2 MIND: N/A

Tiny Level 1/4 (1/3), DEF 14, DR +2, Bite (1d3)

Flier

Groundcomber (Arthropleura)

STR: +2 DEX: +1 MIND: N/A

Medium Level 4 (20/14), DEF 11, DR 7, Bite (1d8+2) or Irritant Spit (3d6*)

*Vitality damage only. Target may roll phys+DEX v. DC 16 for half. Target must Roll phys+STR v DC 15 or be blinded for 2d6 rounds.

Supercroc (Deinosuchus)

STR: +7 DEX: -1 MIND: -5

Huge Level 10 (50/50), DEF 12, DR 7, Bite (2d6+14)

Bigmouth Salamander (Rhinesuchus/Koolasuchus mix)

STR: +4 DEX: +1 MIND: -5

Large Level 4 (20/18), DEF 11, DR 1, Bite (1d8+4)

Microlite20 Bronze Age

by Kaiisaxo

Those campaigns are set in the bronze age/age of myth, as such they feature nymphs, gods and the like, however they reflect a bigger setting with particular rules for the supernatural that go beyond magic and extend further, this homebrew uses Purest Essence with the following changes:

Stats

No changes.

Skills

All 4 skills form the core rules.

Survival form the Expert rules.

3 New skills, Domain, Harmonizer & Mind Link, those are only available to selected classes or races.

Magic

Magic is cast using Mana Points (MP) instead of HP, for starters MP are equal to Mind + 1d6, MP does only increase by 1d6 every 5 levels (at levels 6, 11, 16, etc). MP spent is regained every 8 hours by an amount equal to the user Level. If MP reaches 0 = faint and near death and every additional decreases Mind instead if Mind reaches 0 = Death.

Only Arcane Spells and Illusionist Spells available.

Arcane spells are excluded form the Illusionist Spell list

Classes

From the core rules: All classes but Cleric

From the expert rules: Illussionist and Ranger (Renamed Hunter)

New classes: Layman and Archer.

Races

From the core rules: Humans (renamed mortals) only.

From the Expert Rules: None.

New races: Nypmh, Nymphling, Immortal, Demigod and Inhuman.

Equipment

Everything in the core list that isn't made of Iron, Steel, Glass, Silk or Paper. Also no Mails (Chainmail, Splint Mail, etc.), no Halberds, No Crossbows, no mirrors, no lanterns or anything starting with "Holy-".

Changes to costs: All gold and silver costs are reduced to 1/10th it's value on the core rules (To account for a couple of millennia worth of inflation)

Changes to starting wealth: Fighter starts with 15gp, rogue with 125 sp, mage with 75 sp, Illusionist with 8gp, Hunter with 13 gp, Archer with 14 gp, Layman with 95 sp.

Changes to armor: Breast Plate gives +4, Half-Plate gives +5 and Full Plate gives +6 AC.

Now that I've enumerated the changes, I'll go more indeep with the new skills, races and classes.

Races

Races marked as restricted can't be used without GM's Consent

Nymph. Get +2 to Mind, +10 to HP, -5 to STR, MP increases by 1d6 every level also STR can't go beyond 15, Get's Mind Link, Can't be Mage class.

Immortal. Get a -3 to Dex, +2 to Mind, +10 to MP, +2 to STR, HP increases by 2d6 every level, MP increases by 2 every level, Dex Can't go beyond 21, Requires 15 additional EL to advance Level. Gets Domain skill. Can't Be Layman, Mage or Illussionist class (Restricted Race)

Nymphling (Half Nymph). Get +1 Mind -2 to STR, +5 to HP, MP increases by 1d6 every third level (3,6,9,etc)

Demigod. Get +1 Str or +1 Dex, +1 to 1 skill, every third level has a 20% chance to unlock Domain Skill(roll d20 + Mind bonus, Target number 17)

Inhuman. Get +6 Str, -3 Dex, -2 Mind, + 3 to Survival. Can't be Layman, Illussionist, Fighter or Archer. Can't Handle ranged weapons. (Restricted Race)

Classes.

New classes:

Layman.- Wear lighth armour, Get a +4 to Communication and +1 to Subterfuge, Get a -1 penalty to Damage Rolls, Every Fifth level have a 50% Chance of learning either 1 Spell of 4 levels lower, Mind Link (Roll d20 + Mind, Target number 11), or Harmonizer (Roll d20 + Mind link. Target Number 16). (As soon as 1 arcane spell is learned, Mind link and Harmonizer can't be learned anymore, as soon as Mind Link or Harmonizer is learned, no arcane spells can be learned. The user must choose between trying to learn a Spell, Mindlink or Harmonizer)

Archer.- Wear Light or medium Armor, Get +1 to Knowledge, Get a +3 to all Missile attack rolls, range penalty is -1 instead of -2.

Changes to existing clases

Mage.- In addition to everything else in the core and expert rules, they also get +1 MP every level.

Illussionist.- In addition to everything else in the core and expert rules, they also get +1 MP every level,

Illusionists get Mind Link at level 10 and get a 10% chance (Roll d20 + Mind Link, target Number 18) to learn Harmonizer every fifth level after that.

Skills

Domain. - Supernatural skill, must be obtained, when first obtained select a concept, by rolling d20 + Domain + the proper modifier (target 15 + user level) the user gets to influence an item, animal or person that falls under that concept. The user pays as much MP as the roll + Modifiers regardless of success or failure. (If attacking use a d12 + Domain for the damage roll).

Mind Link. Supernatural skill, must be obtained, when used the user pays as much MP as the roll + modifiers (regardless of success), this is used to do stuff like mind reading, telepathy, empathy (transfer damage from target to user), dreamwalking, astral walking, remote sight and foresight. Can't be used to hurt people or to interact with inanimate things.

Harmonizer. supernatural skill, must be obtained, when used the user pays as much MP as the roll + modifiers (regardless of success), this can be used to affect the environment or attack with sound. Can only be used by singing (use Str bonus), playing an instrument (use Dex Bonus) or in conjunction with Mind Link (Use Mind Bonus + Mind Link). (If attacking use a d6 for the damage roll regardless of level, no modifiers allowed). People with Harmonizer can't learn Arcane spells, people knowing arcane spells can't obtain Harmonizer

Microlite Dark Sun

This document provides conversions of material from the Dark Sun campaign setting into Microlite20 terms to allow Dark Sun campaigns to be run using the Microlite20 rules. It provides a ready list of conversions for previously-published material, making modifications where necessary.

Microlite Dark Sun is a fan project and derives no profit. This document is not a challenge to the original or current copyright holders. Conversions by Andrew Modro.

Welcome to Athas

Return now to Athas, the world of the Dark Sun. Face the perils and witness the savage beauty of this strange and deadly world of desert wastelands and mighty sorcerer-kings. Adventure awaits!

This document draws its content from both the original 2nd Edition Advanced Dungeons & Dragons campaign setting and the 3.5e update presented in *Dragon* and *Dungeon* magazines. It is a blend of both versions, and as such has its own unique presentation of some of the ideas.

To make the best use of *Microlite Dark Sun*, you will need access to either the original or revised 2e AD&D campaign setting box sets, or the *Dungeon* and *Dragon* issues with the 3.5e update. Material from both editions can be easily converted for further expansion; this document presents the basics of Dark Sun in Microlite20 format.

Character Creation

Athasian characters begin play at 3rd level instead of 1st. This means they may have three levels in one class, or two levels in one class and one level in another class (see Multiclassing). Their initial hit point totals are STR + 3d6.

Athasian characters roll 5d4 for stats instead of using the basic 4d6 drop-lowest method. This gives an average score of 12.5, with a minimum of 5 and a maximum of 20. The GM may wish to use the 4d6 method instead.

All characters that begin with classes which do not manifest psionic powers begin play with one 0-level power as a "wild talent" chosen from the Psion power list. Psions and Psychic Warriors do not get these "wild talent" powers. "Wild talent" powers cost 1 HP to use as normal.

Skills

The skills used in Microlite Dark Sun are Physical, Subterfuge, Knowledge, Communication, Survival*, and Concentration**

* - From *Microlite20 Expert*

** - From *Microlite20 Psionics*

Races of Athas

The races of Athas are not the same as other fantasy worlds. The available races and their stat modifiers are:

Humans get +1 to all skill rolls.

Dwarves get +2 STR.

Elves get +1 MIND and +1 DEX.

Halflings get +1 DEX and +2 Survival.

Half-elves get +1 DEX and +1 to any 2 Skills.

Half-giants get +4 STR and -2 DEX.

Muls get +1 STR, +1 Physical and +1 Survival.

Thri-kreen get +1 DEX, +1 Physical and +1 Survival.

Classes of Athas

The available classes in Microlite Dark Sun are as follows:

Fighters as in Microlite20. Athasian gladiators are represented by this class.

Rogues as in Microlite20.

Magi must be either *Preservers* or *Defilers* (q.v.).

Clerics as in Microlite 20, but they must choose an Element. They cast divine spells from the Cosmos List as well as those from the list of their chosen Element. They Turn Undead as in Microlite20, and may turn Elementals of the Element opposing theirs in the same way; Elementals are never destroyed. Turning an Elemental uses one of the cleric's Turn Undead attempts.

Rangers as in Microlite20 Expert.

Druids as in Microlite20 Expert.

Bards as in Microlite20 Expert, except they must choose *Illusionist* spells. Bards are automatically considered *Preservers* for the purpose of their arcane magic.

Psions as in Microlite20 Psionics.

Psychic Warriors as in Microlite20 Psionics.

Preservers are the same as Magi in Microlite20 and may use the magic enhancement rules from Microlite20 Expert.

Defilers are as Magi in Microlite20, except they *Defile* (see *Defiling*) to rip magical energy from living things around them, and use this extra energy to pay for magical enhancements as in Microlite20 Expert. Defilers *must* defile to use enhancements.

Templars can wear any kind of armor. They cast divine spells from the Templar Spell List, granted to them by the sorcerer-king they swore to serve and obey. Templars do not turn undead. They gain spells at the same rate as clerics.

Multiclassing

Characters may have up to two classes (for example, Fighter/Cleric, or Preserver/Rogue).

A multiclass character's Character Level is the sum of the levels in both her classes. For example, a Fighter 2 / Cleric 1 is a level 3 character. When a character earns the right to go up a level, the player chooses which class to advance. If the character is single-classed, the player may choose a second class, which begins at level 1.

Advancement is determined by Character Level, but spell descriptions which reference "level" mean "caster level" for arcane and divine spells, and "manifestor level" for psionic powers.

A multiclass fighter's class-based combat bonus is based on his fighter class level.

Defiling

Athasian arcane magic uses life energy drawn from the mage's surroundings. Preservers are careful to use only what they need, to ensure that the lifeforms around them remain healthy. Defilers, on the other hand, rip this energy out of nearby living things without care, causing great damage.

Defiling destroys vegetation around the mage. The amount of destruction depends on how much energy the mage has drawn to cast the spell, and how much vegetation exists nearby,

by the following chart:

Vegetation	Radius
Forest, garden	1 foot x HP drawn
Grassland, farm, mud flat	2 feet x HP drawn
Oasis, scrub, inactive farm	10 feet x HP drawn
Badland, mountain	20 feet x HP drawn
Barren, sand, salt flat	30 feet x HP drawn

Cleric Spell Lists

These spell lists include some spells from the d20 SRD, instead of or in addition to those used by the base Microlite20 rules.

Cosmos Spell List

Level 0

Create Element
Detect Magic
Guidance
Purify Food and Drink
Resistance

Level 8

Antimagic Field
Discern Location
Earthquake
Fire Storm
Symbol of Death
Symbol of Insanity

Level 9

Energy Drain
Foresight
Implosion
Power Word Kill
Soul Bind
Storm of Vengeance

Currency

Metal coins are very rare on Athas. Instead,

Dark Sun campaigns use these pieces of currency:

Ceramic Piece: Same as 1 GP. Ceramic pieces can be broken into 10 individual "bits" for use as smaller denominations.

Bit: Same as 1 SP . 10 bits can be used together as one Ceramic Piece.

Weapon Materials

Bone weapons are crafted from the skeletons of large beasts. While dangerous, they are not as sturdy as metal weapons. Bone weapons are -2 to attack and damage (minimum 1).

Bronze weapons are sturdier than stone and bone, but the softer metal is still inferior to steel. Weapons of bronze are -1 to attack and damage (minimum 1). They cost 5 times the listed amount.

Stone weapons are -2 to attack and damage (minimum 1). Stone ammunition for slings has no penalty.

Wood bludgeoning weapons other than club, quarterstaff, sap, and great club are -3 to attack and damage.

Blood obsidian is a quasi-magical material created by volcanoes that arise from defiler magic. It has a +1 bonus to damage. This bonus does not stack with other bonuses. Blood obsidian weapons cost an extra 2000 more ceramic pieces than the listed price.

Weapon Equivalents

The following weapons unique to Athas use these listed stats from the d20 SRD.

Alhulak: heavy flail
Carrikal: battleaxe
Dragon's Paw: orc double axe
Puchik: punching dagger
Tortoise Blade: small shield with shield spike
Trikal: Halberd

Armor List

Light Armor

Padded: 5 cp, +1
Bark: 5 cp, +2
Cord: 15 cp, +2
Leather: 10 cp, +2

Bone: 20 cp, +3
Wood: 15 cp, +3
Studded leather: 125 cp, +3
Leather scale: 35 cp, +3

Medium Armor

Shell: 25 cp, +3
Hide: 15 cp, +3
Bronze breastplate: 200 cp, +4

Heavy Armor

Chitin: 100 cp, +5
Bronze half-plate: 600 cp, +6

Shields

Buckler: 15 cp, +1
Buckler, beetle*: 6,600 cp, +2
Light, wooden: 3 cp, +1
Light, bronze: 9 cp, +1
Heavy, wooden: 7 cp, +2
Heavy, bronze: 20 cp, +2
Tower: 30 cp, +4

* Command word makes beetle fly around owner, providing +3 AC against ranged attacks only while in flight. Buckler Beetle stats: HD 1d8 (4 hp), AC 24, Bite -1 (1d3-5)

Bestiary

Baazrag

HD 2d8+4 (13 hp), AC 17, Bite +2 (1d6+1, wounding)

Baazrag, Boneclaw

HD 6d8+18 (45 hp), AC 18, Bite +9 (1d8+8)

Belgoi

HD 4d8 (18 hp), AC 13, Claw +4 (1d4+1 plus 1d3 STR), psi-like abilities (manifest level 5th): at-will--mindlink; 1/day--ego whip, psionic blast

Cilops

HD 8d8+32 (68 hp), AC 17, Mandibles +11 (1d8+6 plus poison [STR+Phys DC 18, initial 1d4 DEX, secondary paralysis 2d4 minutes]), psi-like abilities (manifest level 3rd): at-will--detect psionics; 1/day--sensitivity to psychic impressions

Cinderbrute (Elemental)

HD 1d8+2 (6 hp), AC 14, Iron Warhammer +2 (1d6+1 and 1d4 fire)

Cloudscout (Elemental)

HD 1d8+1 (4 hp), AC 14, Iron dagger +1 melee (1d3) or +3 ranged (1d3)

Critic Lizard

HD 1/2 d8 (2 hp), AC 15, Bite +3 melee (1d4-3), psi-like abilities (manifest level 1st): 3/day--detect psionics

Crodlu

HD 4d8+16 (34 hp), AC 16, Claw +6 (1d6+4) or Bite +6 (1d6+2)

Crodlu (Heavy)

HD 6d8+30 (57 hp), AC 18, Claw +8 (1d6+5) or Bite +8 (1d8+2)

Dune Reaper (Drone)

HD 8d10+24 (68 hp), AC 17, Claw +15 (1d8+7)

Dune Reaper (Warrior)

HD 12d10+48 (114 hp), AC 23, Claw +20 (1d8+9), psi-like abilities (manifest level 11th): at-will--read thoughts; 3/day--ego whip; 1/day--mass cloud mind, psychic crush

Earthdelver (Elemental)

HD 1d8+2 (6 hp), AC 17, Claw +3 (1d2), +1 to attack & damage if both it and foe touch the ground

Erdlu

HD 3d8+6 (19 hp), AC 17, Beak +4 (1d6+2)

Firesnake (Elemental)

HD 1d8 (4 hp), AC 16, Bite +3 (1d3-1) or Burn (DEX+Phys DC 10 or catch fire for 1d4 rounds).

Floater

HD 1d10 (5 hp), AC 14, Tentacles +4 (1d3-3 plus poison [STR+Phys DC 10, initial 1d4 DEX, secondary paralysis 1d4x10 minutes]), psi-like abilities (manifest level 1st): 3/day--detect psionics, ego whip

Fordorran

HD 6d10+18 (51 hp), AC 17, Claw +8 (1d8+4), Stench (within 10 feet, STR+Phys DC 18 or sickened), psi-like abilities (manifest level 6th): 3/day--mind thrust, psionic blast, ego whip

Gaj

HD 11d8+77 (126 hp), AC 26, Mandibles +16 (2d6+13), Probe Drain (after successful grapple, as mind probe plus 1d4 MIND damage), psi-like abilities: at-will--detect psionics, mindlink, read thoughts, psionic blast; 3/day--control body, psychic crush

Gith

HD 1d8+1 (5 hp), AC 14, Bronze Carrikal +1 (1d8+1) or Claw +2 (1d4+2), psi-like abilities (manifest level 1st): 3/day--control object, precognition

Hurrum, Speckled

HD 1/2 d8+2 (4 hp), AC 15, Bite +2 (1d2-4)

Inix

HD 8d8+40 (76 hp), AC 16, Bite +13 (1d8+8) or Tail Slap +13 (1d6+4)

Jankx

HD 1/2 d8 (2 hp), AC 16, Claw +4 (1d2-3 plus poison [STR+Phys DC 10, initial & secondary paralysis 1d4 STR])

Jhakar

HD 3d8+15 (28 hp), AC 17, Bite +4 (1d6+2)

Kank

3d8+9 (22 hp), AC 15, Pincer +4 (1d6+4 plus poison [STR+Phys DC 13, initial & secondary paralysis 1d4 rounds])

Kes'trekel

HD 1d8 (4 hp), AC 16, Talon +5 (1d4-2)

Lirr

HD 5d10+10 (37 hp), AC 16, Bite +10 (1d8+5) or Roar (MIND+Concentration DC 14 or stunned 1 round; every 1d4+1 rounds)

Mastyrial

HD 12d8+48 (102 hp), AC 22, Claw +14 (1d8+6) or Tail +14 (1d6+3 plus poison [STR+Phys DC 20, initial & secondary 1d8 DEX])

Mekillot

HD 11d8+55 (104 hp), AC 18, Bite +16 (2d6+15) or Tongue +16 (1d8+15)

Mulworm

HD 1/4 d8 (1hp), AC 16, Bite +1 (1d2-5 plus disease [STR+Phys DC 10, incubation 1d3 days, damage 1d3 DEX, 1d3 Communication])

Pterrax

HD 6d8+18 (45 hp), AC 16, Bite +8 (1d6+4)

Rainrunner (Elemental)

HD 1d8+2, AC 15, Slam +1 (1d4+1) or Drench (quench nonmagical flame, or magical fire as dispel magic)

Ramphor

HD 1/4 d8 (2 hp), AC 15, Beak +4 (1d3-5)

Rasclinn

HD 3d10+9 (25 hp), AC 18, Bite +5 (1d6+3), psi-like abilities (manifest level 3rd): 3/day--ego whip, control object

Razorwing

HD 4d8+20 (38 hp), AC 17, Wing +5 (1d6+3), psi-like abilities (manifest level 4th): at-will--detect psionics

Sand Howler

HP 8d10+32 (76 hp), AC 17, Bite +15 (1d10+12) or Claw +15 (1d6+8)

Sandknight (Elemental)

HD 1d8+1 (5 hp), AC 18, Blood Obsidian Greatsword +4 (1d10+4)

Seskarran

"OMERIAN TALES—CORE RULES"
(FOR D20 FANTASY)
BY CHARLES J. EICHMAN (AKA "HONESTIAGO")

What is "Omeria?"

Omeria is the New World. Brave travellers from the old world are arriving every day to stake their claim. Humankind, led by brave trailblazer Gajildius Omer, are forging a path through the Verdant Triangle -- from the shores of Cawton Estuary, through the dark Spires of Charr, to the mist – shrouded forests of Elderhold. In this milieu, the PCs are among the very first adventurers to set foot on this new continent—or so they believe. Their mission? To see what's out there. In play and flavour, *Omerian Tales* is meant to simulate a gritty, low to medium Fantasy world of great challenge and great reward. The Player Characters (PCs) will start out hardier, but will have to work hard and long to achieve the same status as the typical milieu. On the positive side, this is a world without heroes. The legends the characters create will form the basis of the world's future history. The PCs have the clean slate of an unexplored wilderness in which to romp, where they will "discover" exotic creatures like Eves, Dwarves and Halflings.

System features

OMERIAN TALES is a variant of the Microlite-d20 system. Among the differences: *Omerian Tales* does not include "classes," but rather has "roles." *OT* also includes a different damage mechanic, a different magic system, a different levelling system, and a "luck" component called "Karma." Finally, and perhaps most importantly, there is only one player character "race" in *Omerian Tales* – Human. The campaign world is intended to be played exclusively by human characters, at least until the other typical fantasy races have been encountered, and the story somewhat evolved. Indeed, the first encounters between Men and Elves, Dwarves, Halflings, and so on, may not go at all the way one might expect. In addition to the usual denizens of the fantasy milieu, there is also a race of indigenous "dogmen," the Gnoll, whose reaction to the new folk seems to vary from tribe to tribe. With but a few firmly established cities, a grand swath of unexplored land, and a host of unknown forces inhabiting them, the PCs have a great and imposing task before them – tame the new world!

System Mechanic

OMERIAN TALES uses a Difficulty Check (DC) system similar to the d20 system. Basically, the player rolls a d20 against an assigned difficulty. He adds in one Ability bonus (called a "Stat") and a Skill Bonus from an applicable pool: $d20 + \text{Ability Score (AS)} + \text{Skill Rank (SR)}$, plus any additional modifiers due to situation. If the roll equals or exceeds the DC, the character succeeds in his action. Some typical DC's:

Dodge falling rocks (DC 15, DEX+Physical)
Read ancient runes (DC 20, INT+Knowledge)
Negotiate a good price (DC15, CHA+Communications)
Notice a secret door (DC20, WIS+Perception)

Abilities

The 6 abilities in *Omerian Tales* are: Strength (STR), Dexterity (DEX) Constitution (CON) and Intelligence (INT), Wisdom (WIS) and Charisma (CHA). Ability

Scores are the bonuses/minuses with each ability. They range from a +5, maximum, to a minimum of -5. All Characters start with '0' in each ability. Abilities are then adjusted by background, role, and discretionary point allocation. Starting PCs get 3 points to allocate to Abilities. Additional points can be added to starting Abilities by dropping other abilities on a 1-for-1 basis (EX: A PC could take a -1 INT to raise another ability). No ability can ever be lowered below -5.

Skills

All skills start at 0 ranks. Characters increase their skill mainly through levelling. The maximum rank a character may have in any single skill is +10. Characters may not have negative skill ranks. Starting skill points are determined by a character's background, role and discretionary points: 2 for Warriors, 3 for Mystics and 4 for Specialists

Communications: used for interactions, diplomacy, persuasion, and so forth.

Knowledge: A general measure of the PCs education, memory and academic training.

Perception: This is the character's general alertness, or ability to notice things out of the ordinary.

Physical: used for defense, swimming, running, leaping, etc.

Subterfuge: Used to physically hide, deceive and sneak around, basically.

"OMERIAN TALES—CORE RULES"
(FOR D20 FANTASY)
BY CHARLES J. EICHMAN (AKA "HONESTIAGO")

KARMA (KAR)

KARMA, which represents "forces that work in the character's favour." In other games, it's called Luck, Conviction, Hero Points or Action Points. A PC's starting KAR is 3+CHA. A PC cannot start the game with less than 1 KAR point. A PC's KAR pool is finite. Each time a KAR point is used, it is gone for good. KAR points are gained in the following ways:

- Leveling (+1 every even number level)
- Accomplishing a major story goal (beating a boss; freeing the slaves; saving the town, "saving the day;" etc.)
- Acting according to character (see "Character Ethos," below) The group plays an entire session, overcoming real and dangerous threats without using any KAR (group award; GM's discretion)

Using KARMA: KAR is used to perform heroic feats. In game mechanics:

- A +10 bonus to any single die roll (1 KAR, must choose this *before* rolling the die)
- Avoid certain death (2-4 KAR, depending on certainty).
- OPTIONAL: get a straight answer from the GM (1-3 KAR [USE WISELY, GM]).

Use of KAR is entirely at the GM's discretion. If the GM feels KAR use will ruin the story, he can disallow its use. The terms of KAR use should be discussed prior to adventuring, so that everyone understands the limits of KAR.

Mana

Mana represents a PC's "Magic Potential." It can only be used by PCs in the "Mystic" role, and is used to activate their spells. A character's starting Mana is equal to 1, plus his INT. For more on Mana and how to cast spells, see "Using Magic," below.

Max Armor (MaxArm) and Weapons (MaxWpn)

There are three types of armor and weapons: Light, Medium and Heavy. The armor and weaponry a PC is allowed to use is determined by the character's role (see below).

Intiative

Signifies how rapidly a character reacts in combat. A PC's initiative modifier is his DEX+Physical rating

Defense

Determines how hard a character is to hit. A PC's base defense rating is 10+Physical. This can be modified through magic, training, and, of course, armor.

Melee Attack

This number is added to hit rolls using hand-to-hand or hand-held weapons. When making a Melee Attack, add this number to the PC's STR to hit.

Missile Attack

This number is added to hit rolls using hand-to-hand

or hand-held weapons. When making a ranged attack add this number to the PC's Dex to hit.

ARMOUR and WEAPONS

There are 3 types of armour in the game: Light (+1/+2), Medium (+3/+4), and Heavy (+5/+6). Shields provide an additional +1 protection.

Subterfuge penalty: wearing armour penalizes any attempts at stealth at a rate equal to the armour's protection.

• **Crit Absorption:** Armour absorbs crits. Basically, armour has Body Points. The armour's BP's are equal to its protection score. When a character is critted, the armour, rather than the PC's body, absorbs the blow. The downside to this is that each time the armour absorbs a crit, it is compromised, and loses two steps of protection. EX: A character wearing Scale +3, receives a crit. The armour absorbs the crit, leaving the PC unscathed. His armour, however, suffers a "BP" of damage. It is now Scale +1, until repaired by a craftsman. The armor still retains the same penalties, just as if it had never been damaged.

• **Weapons:** Weapons are light, medium, or heavy. Exceptional and/or weapons may have bonuses of +1 (awell above average craftsmanship) to +5 (very rare or unique). Certain weapon might also grant bonuses based on a variation of the weapon itself (composite bows; daggers made specifically for throwing, etc.; a very sharp sword, etc.)

COMBAT OPTIONS

Players have a variety of options they can use in combat to increase their chances to hit, to damage, or to avoid being hit.

"Extra Effort": PCs made add "oomph" to their attacks by "burning" up to 5-STA to gain +s to hit and damage equal to the points burned. The STA can be regained through normal rest or healing. Characters may boost their defense in the same manner, burning a point of STA for each additional point of defense. The STA must be burnt at the beginning of the round.

"Called Shots": A PC may also try to hit a creature in a "critical area" by taking a penalty to hit in exchange for additional damage. Subtract up to 10 from your to hit roll to earn a bonus damage equal to the amount of penalty you paid (EX: take a -5 to hit to get a +5 to damage; this is called a "CS5"). CS10's automatically Crit,s even if the die roll is not a 20. CS's must be announced prior to striking. A character making a CS can make only ONE attack in the round (the CS itself).

Multiple Melee Attacks: Characters can get two melee attacks a round by wielding up to a medium, one-handed weapon in each hand. The character accepts a -3 to each attack (sacrificing accuracy for speed). Each attack is made separately, and occurs during the character's turn in the round.

"OMERIAN TALES—CORE RULES"
(FOR D20 FANTASY)
BY CHARLES J. EICHMAN (AKA "HONESTIAGO")

Multiple Missile Attacks: Characters may make up to two missile attacks a round at a -2 for each attack (sacrificing accuracy for speed).

Body Points and Stamina

Characters in OMERIAN TALES have two "damage" pools called Body Points (BP's) and Stamina (STA). BP's represent structural damage the character can incur. STA measures a character's endurance and/or willpower. Starting points are determined as follows:

Starting Body Points=3+CON. Each BP is worth 3 STA. Partial loss of a BP is the same as losing the BP itself (BP's have no fractions, in other words).

Starting Stamina =6+CON+d6

Incurring Damage: Most damage is applied to STA. When conducting combat, treat all non-critical hits as normal damage to STA (treat STA just like Hit Points, in other words). BP damage only occurs on a critical hit (a '20' on the d20 roll) at a rate of at least 1 BP per critical hit (some attacks or weapons may crit for more than one BP). Regular STA damage still applies to a crit.

Reaching 0 Stamina (0 HP's): If STA reaches 0, a character is considered "winded." He then functions at -2 to all checks, abilities and AC until he recovers some stamina. Additional damage incurred while "winded" goes straight to BP's on a 3 STA=1 BP scale.

Unconsciousness: The PC suffers a -1 to all checks, abilities and AC for each BP lost. At the end of each round in which a BP is lost, the character must make a WILL check using (d20+CON+Physical)-(negative modifiers) versus DC15. If the roll fails, the PC falls unconscious for 1 round per point of failure. Any attacks on unconscious characters are considered to be crits. If the PC makes the check, he is considered upright, and need not make another check until he loses an additional BP.

Dying: Critical failure on a WILL check means the Character is dying, or "bleeding" at 5 STA/rnd until stabilized.

Stabilization: To prevent a character from bleeding to death, they must be "stabilized." Stabilizing a character requires a healing spell or potion (automatically stabilizes), or application of first aid (d20+WIS+Knowledge-BP's lost) versus DC=15. Once a PC is stabilized, all bleeding stops.

Death: Characters are considered dead when they lose all their BP's. When all BP's are lost, any additional damage to the PC's corpse goes against the his STR Ability on a 1-for-1 basis. When a PC's STR is zero or below, the character is unrecoverable.

Healing: Healing spells and potions heal BP's and STA, in that order. Any damage healed by a spell first goes to BP's lost, then STA lost. Remember that 1 BP=3 STA. First aid checks can only stabilize a

dying character. Characters recover lost BP's at a rate of 1 per week of complete rest. STA is regained at 2 STA per 10 minutes rest. Restful sleep doubles this rate. Increased comfort can triple it or better.

Monster BP's and STA

Monsters use HP's for STA, and as a rule monsters do not have BP's. The GM may allow Monster BP's, however, to leader-types, or particularly challenging creatures. The base BP for monsters is the monster level (or Hit Dice). The GM may increase or decrease BP's as he sees fit.

"CritKills"

The GM may, at his option, allow player crits to be automatic creature kills, if the character's level is equal to or exceeds the creature being hit. This rule can speed up combat immensely, at the risk of making some encounters too easy. If this rule is used, the GM is encouraged to make some creatures immune to "Crit Kill." Creatures already dead (zombies, skeletons, etc) are, of course, already immune. An optional use of this rule could be to allow the creature a check to avoid the crit kill at: d20+creature level versus DC 15.

PC Roles

Starting PCs choose from among three roles: Warrior, Mystic or Specialist. Each role has certain bonuses and weapons/armor requirements, as follows:

- **WARRIORS:** +1 to STR or CON; +1 Physical; +1 to one of the following: Melee Attack, Missile Attack, Defense; may use any armor and any weapon; 2 skill points.
- **MYSTICS:** +1 INT or WIS; +2 Knowledge or Charisma; may use light weapons; may use all Spell disciplines; may not wear armor or use shields; 3 skill points.
- **SPECIALISTS:** +1 to any ability; +2 to any skill; may use medium weapons and medium armor; 4 skill points.

PC Backgrounds

All PCs hail from *The Alkaghi League*, also known as, "The Old World." Alkaghi is a very loose trade confederation in the "Eastern Hemisphere." Though all PCs are human, this doesn't mean they're the same.

Altheria (The Kingdom of Altheria) Thanks to its mercantile instincts and ability to get along with the other countries, Altheria it is presently home to the wealthiest people in the land. Altherians tend to be a bit too proud of this heritage at times, leading some to resent them. Few, however, outright despise Altherians. Jealousy? Yes. Hatred? No (not usually). Altherians are well-educated, and get +1 INT. They are natural merchants and diplomats (+1 Communications). Altheria is the starting point for almost all voyages to the new world. Altherians usually travel to the new world for opportunity and fame. Since they also have the most representatives there, PCs might also be joining family members in colonizing the new world.

"OMERIAN TALES—CORE RULES"
(FOR D20 FANTASY)
BY CHARLES J. EICHMAN (AKA "HONESTIAGO")

Lathloria The emerald island of Lathloria freed itself from Altherian rule less than 50 years ago. Since then it has risen swiftly in power, thanks mainly to the presence of its great and powerful order of Druids, who rule the realm in council. Though sharing a common heritage with Altherians, Lathlorians set themselves apart by their demeanor and mindset. Though typically fierce, red-maned warriors when called upon, they are typically a people of great mirth and zest for life. They have a strong devotion to simplicity, and value the earth for its gifts. Lathlorians get a +1 WIS. They are naturally gregarious and tough (+1 Physical). Lathlorians tend to be homebodies. They would almost have to be forced to leave for the new world.

Kzet (pronounced 'zet'). Kzetans hail from a desert continent located in the southeastern part of the league. The environment is extremely harsh, and there are very few major cities (the vast and sprawling major trading port of Emir Atann, where a PC is most likely to come from, being one of them). Kzetan life is tribal, and there are far too many tribes to count. Though they mix freely and easily with each other, there isn't a Kzetan alive who does not jump at the chance to outdo his friends and neighbors. Abroad, Kzetans are mostly well-liked for their personalities, yet distrusted for their reputations. Few would ever immediately trust them with anything of real worth. All Kzetans are nimble, and get +1 DEX. All Kzetans start as naturally alert and stealthy (+1 Perception). Kzetans come from a nomadic heritage that values individual achievement, so it is not unusual for a Kzetan to travel to the New World so that he could return home to brag about it.

Amon Amon is a cold, harsh environment, home to great and powerful, fair-haired warriors intent on testing their mettle against the elements and their enemies. Amonites have no real friends. Only alliances of convenience. They are regular raiders of the Hormunese and the Gamnans. They patrol the shores of North Alkaghi and its great inland sea in longboats, a vestige of an ancient seafaring heritage that sprouted the rumor that Amon was the first to send ships to the new world, centuries before the current crop of Altherian-sponsored voyages. All Amonites are hardy, and get +2 STR. Their lack of formal education garners them a -1 INT, however. Their great physical stature also grants them a +1 Physical. Amonite sensibilities normally preclude them from engaging in rogue-like pursuits, like *Thievery* (they tend to slay thieves on detection). Amonites often travel to the new world hoping to accomplish feats worthy of song and remembrance. Their reputation as inland sailors often translates well to the open sea.

Gamna This hardy, stocky race of craftsmen are a collection of individual tribes, bound together by cultural memory and a code of ethnic devotion. Though there is a constant struggle over resources, Gamnans rarely take arms against each other, preferring to test their mettle against Hormu, Amon, and sometimes, Izur. Gamnans are tough, and get +1 CON. Their physical prowess also grants them a +1 Physical. They are admirers of metalcraft and

precious gems (hard to find in Gamna, but fairly abundant in the Izurian foothills). Gamnans who travel to the new world may do so out of a sense of curiosity, or as a way to obtain riches more quickly. They are often in demand for their outstanding crafting abilities. It is said that, if there is something to be made, a Gamnan is the one to make it.

Hormu Hormu is the land "no one can rule." It is filled with tribes of vicious humans and strange creatures. It is also filled with precious metals and gemstones, and so is a popular destination for those looking to make a fortune at a price. The Hormu (sometimes called Hormunese) come from innumerable tribes and settlements on the rocky frontier. They are a mongrel race whose lineage is indecipherable. Very few Hormunese live to a ripe old age. All Hormu get a +1 STR and +1 CON, but suffer a -1 CHA due to their barbarous ways. The Hormu's barbarism excludes them from using any magic at all. That same barbarism leads them to be shunned and sometimes even reviled by others. For this reason, the Hormu maintain a low profile (+1 Subterfuge). A Hormunese obtaining passage to the new world is rare indeed, though the reasons to leave Hormu are abundant.

"OMERIAN TALES—CORE RULES"

(FOR D20 FANTASY)

BY CHARLES J. EICHMAN (AKA "HONESTIAGO")

Izur (The Izurian Empire) The magic-infused Izurians hail from a hilly, lush green forest land located in the eastern portion of Alkaghi. They are a martial race, with a stratified caste system run by warrior-kings who serve the Emperor of Izur, who is believed to be descended from the Sun God, Izu (whom a vast majority of Izurians hold as the one, true God). The intelligent, alert Izurians get +1 to INT, and a +1 to Perception. Izurians tend to be bound by a rigid code of honor, which, while making them fast friends with those they know, can also make them difficult to get along with, given their set views. Few Izurians leave their homeland. Those who do so most often are on a quest to restore lost honour.

Savagia

Though the name sounds like a land of fishnet-wearing sirens, Savagia is actually an vast, overgrown morass of an island. Located southwest of Alkaghi, it is a realm populated with fell creatures, awful disease and hidden dangers. It is also filled with gemstones, which is why people go there from time to time (especially the Amonites and Gamnans).

Delrithia, The Merchant Kingdom

Delrithia is a chain of islands due west of ALKAGHI. It has a powerful navy, which controls the flow of ships between the old world and new. One detours around Delrithia at their own peril. The northern seas are icy and dangerous, with unpredictable, harsh winds. Many a ship braving this path has been forced

to make landfall among of a number of inhospitable islands, with predictable results. The route south is even worse, home to warm-water serpents, a pair of pirate kingdoms, the isle of Savagia, and the legendary "Vortices," remnants of ancient magic that manifest as great whirlpools, waiting to suck down ships into the depths. The Delrithian Kingdom is Renaissance-like, well-known for its use of gunpowder weapons, the secret and components of which are not allowed to be sold to non-Delrithians (on pain of death). A player wishing to run a Delrithian PC should pattern the character after Altherians or Kzetans.

"Half-Breeds"

Players wishing to run a character from a mixed background (Amonite-Hormunese, for example), may do so at the DMs discretion. In these cases, the PC should "favour" one or the other race, as far as bonuses to stats and skills.

Languages

All PCs speak "Lukarian," the Old World tongue.

Character Ethos

There are no alignments in OMERIAN TALES. As in real life, each character is represented by admirable character traits, called *Virtues*, and not so admirable character traits, called *Vices*. Before starting play, choose one virtue and one vice from the list below (feel free to supplement with your own, if these aren't enough).

VIRTUES:

Academic
Bold
Compassionate
Courageous
Daring
Determined
Fair
Faithful
Free-spirited
Generous
Gregarious
Honest
Industrious
Just
Kind
Thoughtful

VICES:

Addicted
Arrogant
Capricious
Cowardly
Cynical
Egoistic
Hidebound
Impulsive
Insensitive
Lazy
Manipulative
Petty
Power Hungry
Selfish
Stubborn
Vengeful

Acting according to Ethos

Characters acting in accordance with their Ethos, be it virtue or vice, can receive additional KAR awards. In simple terms, the DM uses the Ethos list to award players for good role-playing. The list of Virtues-Vices serves as a basic template to envision the overall character. If, in the DM's judgment, the character's actions during an adventure session "ring true" to the description, he may award a point of KAR. KAR awards for role-playing should not exceed more than 1 pt. every few sessions.

Using Magic

Magic is divided into disciplines: *Earth, Air, Fire, Water, Body* and *Mind*. Each of the disciplines has "Effects" the caster can create (for specifics, see

"OMERIAN TALES—CORE RULES"
(FOR D20 FANTASY)
BY CHARLES J. EICHMAN (AKA "HONESTIAGO")

"Magic Effects," below. General rules for magic use are as follows:

Casting spells:

- **Casting:** roll (d20+Caster Level+WIS) vs (Effect DC and modifiers). See "Magic Disciplines" to determine specific DC of effects. If the DC check is not made, the point of MANA is lost, and the spell fizzles.
- **Spell cost:** 1 MANA to activate the spell. And additional MANA used in casting adds +3 to the check. When a Character runs out of MANA, he cannot cast spells until he recovers ALL his MANA.
- **Using STA to overcome Mods:** Each spell has its own DC check and modifiers. A Mystic may spend STA to increase his chances of making the DC on a 1-STA for each +1 basis. If the check misses, the STA is lost (as well as the MANA, above). STA lost in this way can be regained with normal healing spells.
- **Using BP to overcome Mods:** A Character can spend BP's to increase his chances of making his spell DC. Each BP "burned" adds a +3 to the spell attempt. HOWEVER, the PC MUST make a WILL check as if receiving wounds, the same as a PC who sustains BP damage in combat. BP's lost in this way CANNOT be healed with magic, but must be regained thru normal rest.
- **"Specialist Mages:"** When a Mystic gains access to a new spell discipline through levelling, he may instead opt to forgo the new discipline and take a +1 modifier to any previously known disciplines (see *Levelling*, below). This represents the PCs increased focus on that specific area of magic.

Starting Wealth

Each PC starts with 100 gp. modified by the CHA stat, plus the PCs Class and Background:

Background modifier to wealth:

- Altherians, Lathlorians, Delrithians= +3d6x10 gp's
- Gamnans= +3d6x5 gp's
- Amonites, Izurians=no bonus
- Hormunese= -2d6x4 gp's
- Kzetans= roll d6; 1-2=treat as Altherian; 3-5=Treat as Izurian; 6=Treat as Hormunese

Levels in Omerian Tales

OMERIAN TALES is a gritty fantasy world a la *Middle Earth*. Advancement is slower, relative challenges are higher. Because of the decreased scale of advancement, characters start harder than usual (BP's and STA). Relatively speaking, by the time a PC reaches level 5, they should be considered full-fledged heroes by those around them. Level 10 heroes are legendary in the OT world.

Level Cap: All OMERIAN TALES characters are capped at level 10. Slow advancement, plus a level cap means that many of the higher level challenges will most certainly require additional help, items of

power, tomes of arcane lore, and so on. This is fitting when the PCs face earth-shaping challenges. Remember: Sargon wasn't brought down in direct combat. It was a couple of Halflings delivering an innocuous ring to a sea of lava. GMs should keep this in mind when designing stories.

Levelling

Characters level when the GM feels they should. Levelling should only occur when major story goals are met (i.e., "beating the big nasty," "saving the princess," foiling the pirates," "escaping the dreaded island," etc.)

Level Benefits

Characters in OMERIAN TALES gain different benefits at different levels. Some benefits are role specific:

Every Even level

- **STA gain:** Warriors=2d6+CON; All others= d6+CON
- **Skill Boost:** Specialists: 3 skill points; All Others: 2 skill points
- **Combat Bonus, Warrior:** +1 to Melee or Missile Attack, OR +1 to Defense.

Every Odd Level

- **MANA GAIN:** +2 MANA, New Spell Discipline (mystics only)
- **MAGIC SPECIALIZATION (Mystic Only):** Disregard new MANA and Discipline, above for a +1 to all checks involving currently known disciplines.
- **ABILITY BUMP:** +1 to any single ability (all)
- **KARMA GAIN:** +1 KARMA point (all)
- **Combat Bonus, Specialist:** +1 to Melee or Missile attack, OR +1 to Defense

"OMERIAN TALES—CORE RULES"
(FOR D20 FANTASY)
BY CHARLES J. EICHMAN (AKA "HONESTIAGO")

CREDITS

The World of Omeria would not exist without all the innumerable fantasy authors, game designers and general contributions of everyone who's kept the RPG hobby alive. As for this particular set of rules, identifying major contributions is a bit easier:

Neal Scott (Creation of Alkaghi League; contributions to Omerian Pantheon; securing of all the artwork you see here; multiple humorous discussion concerning Laxar the Priest of Semit).

Player contributors/testers: Rob Beals, Russel Boyd, Kathryn Eichman, Jason Frisbie, Eddie Garza, Brendan Grayson, Matt Harris, Matt Olejarczyk, Mack Morris, Stephen Puckett, Neal Scott, Erik Skiles, Scott Smith, William Reid, Mark Spigelmeyer, Arthur Tambur, Dwight Upton.

Art: Stephen Grant, Boris Radjuko, Jeff Carlisle, Katy Hargrove, Matteo Lolli

MAGIC DISCIPLINES and Effects

ELEMENTAL MAGIC: Has four disciplines – Earth, Air, Fire and Water. Each is a separate discipline.

Earth

- *Enchanted Rock* (DC 10+3 per stone+1/desired bonus): grant small stone or pebble a max +1/lvl to hit and damage; lasts until stone is used; max stones enchanted at any one time=5. All stones must be spent before enchanting new ones.
- *Mud Pits* (DC 10+2 per 5' radius+2/round duration): turn ground into cloying mud, cutting movement and initiative by half; normal resistance. Max Rounds=caster lvl.
- *Stoneskin* (DC10+1/ target +1/rnd duration+ 1/desired bonus, applied to all targets): +AC for each target for one round; maxplus=caster level; absorbs crits as normal armor.
- *Stoneshape* (DC20+1 per 10' square): Shape or move stone into desired forms; permanent, unless used to grapple (then dispels in one hour). Max area=Caster level x 20.
- *Trackless* (DC15+1 per additional target+1/ 5 minutes): Cover your tracks and the tracks of your friends while moving through environments where you can be tracked.

Air

- *Airburst* (DC10+1 per weapon+ 1 per round duration+1/desired bonus, applied to all targets): Cast on missile weapons; grants d6 damage, +1/lvl to hit and damage; max plus=caster level.
- *Flight* (DC20+1 per additional target; +3/10 minutes): Soar through the air like a bird.
- *Float* (DC15+1 per target +1/rnd): Become light as a feather, softening falls.
- *Lightning Strike* (DC15+1 per target+1 per d6 dmg [max#/d6's=caster lvl]): damage to selected targets; CON+Physical resist for half-damage (against caster DC).
- *Sonic Blast* (DC25+1 per 5' radius): Explosive burst temporarily stuns foes for 1 rnd/lvl of caster, plus does d6/lvl damage; Resistance check to avoid stunning, but still take damage.

Fire

- *Create Fire* (DC10+1/hour): create torchlike flame; OR: start a normal fire without flint and steel
- *Everburning Lamp* (DC 25): Create a torchlike effect on an object; duration: until dispelled.
- *Flamestrike* (DC10+1 per weapon+1 per round duration+1 per desired bonus, applied to target weapons [max level=caster]): Cast on melee weapons; adds d6 fire damage +1/lvl to successful strike. No save.
- *Fireball* (DC15+1 per 5' radius+1 per 50' range): Blast your enemies with searing flame, d6/caster lvl (REF resist for half damage); minimum range=30' (or subject to own fireball).
- *Firewall*: (DC15+1/rnd duration/+1 per 5' area, +1/d6 damage of flame [max lvl=caster]): Create a wall of flame that will sear anyone trying to pass through it; CON resist for half-damage.

Water

- *Purify Water* (DC10+1/gallon purified [max gallons=caster]): Purify 1 gallon of water per level; duration: permanent.
- *Fins* (DC15+2 per target+1 per minute): sprout fin-like appendages; +4 swimming
- *Healing Balm* (DC10+1 per target+1 per d6 healing effect, applies to all targets): use clean water to heal; max d6's=caster lvl.
- *Obscure* (DC15+1 per 5' radius+1/round duration): Create a hazy mist emanating from yourself; +4 subterfuge or -4 to opponent's perception, depending on situation.
- *Water Breath* (DC15+1 per target+1 per 10 minutes duration): breathe underwater as if breathing air; include all targets in single casting.

BODY MAGIC

- *Change Appearance* (DC20+1 modifier to detect/notice): single target; change a willing target's physical appearance; duration: 1 hour/lvl or dispelled.
- *Cure Wounds* (DC 10+1 per target+1/d6 healed, applies to all targets): heal wounds; max d6's=caster lvl.
- *Cure Condition* (DC 15+severity of condition): heals diseases, curses, and other adverse conditions.
- *Enhance Physical* (DC10+1 per target+1/round duration+1 per plus, applied to all targets): Enhance Physical skill ability to a max=caster level
- *Raise Dead* (DC30+1 per day dead): Raise someone from the dead (corpse must be intact).

MIND MAGIC

- *Detect Magic* (DC10+1 per 10' radius+1/rnd duration): Detect magic around or near you, Max rounds=Caster level.
- *Dispel Magic* (DC15+lvl of magic dispelled): dispel magical effects
- *Enhance Mind* (DC10+1/target+1/5 minute duration+1 per plus, applied to all targets): gain bonus to Perception or Communications; max plus=caster level; can be used to communicate in extraordinary ways, i.e., speak with dead, extra-planar, greater powers (GM determines additional difficulty).
- *Mental Bolt* (DC15+lvl of target+1/additional target difficulty to resist applied to all targets): d6 dmg +1/lvl mental damage; resist or be stunned for #/rnds=caster level.
- *Mind Control* (DC20+#/targets+targetlvl+1/rnd of control, per target): control a target's actions; normal resistance roll; Once controlled, resistance is enhanced depending on what you try to make the target do (actions detrimental to itself will increase the resistance).

<p>ARMOR:</p> <p>Light Padded +1 [10 gp] Leather +2 [20 gp] Shield +1 [5 gp]</p> <p>Medium Scale +3 [50 gp] Chain +4 [100 gp]</p> <p>Heavy Half-Plate +5 [250 gp] Full Plate +6 [500 gp]</p> <p>Subterfuge Penalty=Armor Protection</p>	<p>WEAPONS: *=must used two-handed</p> <p>Light Weapons=d6 Dagger Sling Staff*</p> <p>Medium Weapons=2d6 Sword Bow* Warhammer</p> <p>Heavy Weapons=3d6 Battleaxe* Greatsword* Blunderbuss***</p> <p>*Two-handed weapon **Composite versions do +1 damage ***RARE. Requires two rounds to load.</p>

"Omerian Tales: Lands and People of Omeria" ***(A d20/OT supplement)***

Welcome to Omeria

This is the first background supplement for *Omerian Tales*, a d20-Fantasy RPG set in the "New World." Settlers from Alkaghi, the "Old World," are forging new paths to fame and adventure every day. This supplement is intended mainly for GM use. A set of the d20/OT rules are required to play this game (though it can also be adapted to any d20 fantasy setting in a pinch).

Flavor of the New World: Humans are quickly making inroads in the vast, unexplored tracts of Omeria. This is primarily due to their skill in magic. To draw a real-world analogy, magic is to Omeria what gunpowder was to the actual new world. The

intelligent denizens of the New World tend to greet humans with a mixture of fear, awe, respect and contempt. Naturally, there are opposing forces at work among the Old World Folk. There are those who see Omeria and its people as one, and seek to live among them as harmoniously as possible. Then there are those who see a land ripe for exploit, dark forces long kept silent in the old world, seeking a place to make their melevolevt voices heard once again.

The Land

Upper Omeria – land of Relics: Settlers from Alkaghi have a well-established foothold in the new world in the form of Balderville, a bustling, megalopolis on the shores of Omeria. The vicinity beyond Balderville is still being explored, but already tales of ruined keeps, and vast underground labyrinths filled with amazing structures are flooding the area, attracting both the brave and the foolhardy to these shores. Upper Omeria is a land of verdant plains, old, deep forests, imposing mountains, and -- as if to balance out its wonder -- menacing threats tucked away in the dark parts of the world. Decades of seclusion have brought about the development of extremely large versions of mundane creatures, like spiders, rats, bats, and snakes (some of the latter so big, they are called "dragons"). Thankfully, there are more than enough adventurers willing to try their hand at charting this land of opportunity, thus taming the land and making safe for all.

Major geographical features:

The Iznawt Expedition: Most of what is presently known about Omeria comes from the reports of adventures. There was, however, a great expedition of several years led by a Kzetan named Nethis Iznawt. His map of the area, first sketched over a decade ago, forms the basis of what is known about Omeria, since amended by the *Learned Uncles* at UMMAC (see below).

"Omerian Tales: Lands and People of Omeria"

(A d20/OT supplement)

BALDERVILLE: Balderville is a thriving megalopolis built around the original New World Settlement of *Omerton*, which is now little more than a historical district and administrative center at the heart of the city. It is a collection of several smaller cites,

surrounded by thick walls, guarded by an imposing garrison. Just outside the eastern wall of the city is the huge trading port of *Cawton Estuary*, which runs far inland. Pretty much anything and everything can be found in Balderville, depending on where you go, and it is said one may

spend a lifetime exploring the city streets (not to mention, its vast underground). The city's power and position are further solidified by the presence of *The Red Temple*, a large garrison housing *The Fangs of Semit* (elite warriors and their associated priests) and *The University of Metaphysics and Magic* (UMMAC), where *Learned Uncles* study many great and powerful relics, and find new means of exploiting Alkaghi magic.

ELDER CITY: A tremendous edifice, rising 20 stories and covering several miles, the city glows with a faint blue tint that can be seen for miles at night. This blue barrier has thus far thwarted all attempts to enter this perfectly preserved remnant of the long-lost civilization scholars call *The Ancients*. No one really knows what lies within its haunting spires, though everyone wants to find out.

THE GROVENWOLD: A deep, tangly, but inviting forest that is largely unexplored, if only because the few who have entered do not wish to return.

Travellers speak of a pervasive feeling of being watched by unseen eyes. There are tales among the Inwahe of an elusive, powerful spirit that resides somewhere in the heart of the Wold. The Gnoll call it *Fer Mel I'Kamen*, or "The Spirit of the Green Mist."

CASTLE BLACKROCK: A remnant of the long-dead Baldren Empire, a rugged, human-like race that evidently ruled the realm sometime after the Ancients. The keep is well preserved, and sits atop an apparently endless labyrinth of caves and caverns, both natural and man-made (which adventurers call "Blackdeep"). The peaks of Blackrock are incongruously chilly, leading some to believe there is a curse laid upon it due to

some transgression by its citizens. Adventurers traveling to and from the ruins report many dangers, including a living city deep in the earth, populated with powerful warriors clad in glimmering metal. The description of these folk, echoed by reports from other locations, has led scholars to term these them using a name from mythology. They call these strong, wide, bearded, powerful, axe-wielding warriors "dwarves." To date, there have been many reports of "dwarves," none of them depicting the people as anything other than zealot xenophobes who destroy anything and anyone who enters their realm.

The Broken Lands: This flat, arid plain consists of huge fissures and canyons, some of which plunge deep into the earth. To date, no one has bothered to venture very far down, though there are several stories of a race of cliff-dwelling humanoids, blue-skinned, who traverse the canyon lands on great birds. Scholars have discounted most of these stories, though they yet to explain away the return of a gleaming sword of incredible sharpness, reportedly taken from one of these folk.

Craggiset: The land of the Grig Gnoll. Craggiset is full of precious metals and ore, which the Grig craft into strong weapons and armor. Thankfully, they are so

busy at war with each other that they have taken little notice of the Omerians. Expeditions to the Craggiset always return with tales of ruined structures and Baldren statues – not to mention markedly fewer members than when they started. Most believe it the trip to Craggiset, a harsh, unforgiving environment, isn't worth the effort. In the far south of Craggiset are twin cites of Talis and Talmued, well-preserved Baldren keeps that are, at present, completely overrun with Gnoll.

Coyne's Pass: An armed garrison that serves as a way station for those traveling down The Longway Run. There is a large, friendly tribe of Inwahe (the *Open Hand* tribe) who inhabit the hills just west of who seem to be on peaceful terms with the Grig in the mountains nearby (a clan known as *The Whiteskull*). Omerians use the Inwahe as an

"Omerian Tales: Lands and People of Omeria"

(A d20/OT supplement)

intermediary to placate the Grig. Coyne's Pass is a popular launching point for expeditions across the water into Bothan, as it allows a party to avoid The Plains of Elendi, where the warlike Puningi roam.

Bothan: More inviting than the Grovenwold, Bothan features numerous ancient structures and ruins in which adventurers can find relics to return to UMMAC for great reward. The relative frequency of these ruins suggest to scholars that this area was once home to a powerful kingdom, most likely Baldren. The dangers of the forest are typical: large versions of pests (spiders, wasps, rats and the like), plus the occasional monstrosity located in the interior, when adventurers find old caves and dungeons dating from long ago. There have been reports of a swift, elusive group of creatures, who inhabit the area where the forest is most dense (the southern edge of Bothan, near the foothills of Ironhold). No one has ever seen

these creatures. What is usually found are the corpses of adventurers hanging from the trees, their gear untouched,

their bodies pockmarked with holes that appear to have come from arrows.

Ebronder: This is a collection of Inwahe tribes who have come together mainly as a means of security against the Omerians. Though on good terms with the Humans, the Gnoll are ever vigilant of deceit, citing "other dealings with your kind," the likes of which they refuse to expound upon. Some believe this antipathy is a remnant of a long ago age, just after the Baldren period, but well before the present day.

Lawton's Bend: Little more than a turn in the river itself, this area is home to yet another large, ruined keep, as yet unnamed (most simply call it "The Keep at Lawton's Bend"). The keep itself is avoided, mainly because the first five expeditions who visited it all vanished without a trace. Some travellers have reported strange, winged creatures emerging from

the ruins on moon-filled nights, but no one has bothered to go find out what they could actually be (scholars assume some form of giant bat).

Ironhold: No one travels far into Ironhold, if they travel in at all. Though there is evidence to suggest abundant metals, gems and minerals, the entire mountain range emits a strange radiation that thwarts magic. The further one travels into Ironhold, the harder magic is to use. To make matters worse, there are suggestions of a massive dwarven population who inhabit not just the underground, but the surface areas, as well. Scholars have taken to calling these people *The Chaar*, based on the discovery and decipherment of runes located in the lower foothills (all examples of which appear to be warnings that one should not trespass on pain of death).

The Dreadmyre: A huge swamp, filled with precious stones and not a few Baldren ruins. There are also reports of a sunken, haunted Ancient city at the Myre's center. Unfortunately, this area is most definitely the home to the largest versions of Omerian snakes, or "Dragons," some of which appear to possess a rudimentary intelligence in the form of extreme cunning. Two expeditions have successfully returned from The Dreadmyre, one of which came back with a cut emerald the size of a human head. The other expedition brought back the skin of a snake, which was crafted into a suit of armor as light as leather, but hard as mail. The lure of obtaining additional skins has led many to take on the mire, but few to return, most empty-handed, with tales to freeze the bones.

The Hole: At the base of Winder's Peak (at the tallest mountain in Omeria) is a tremendous chasm, whose sheer walls plummet deep, deep into the earth. No one has ever bothered to see what lies beneath. Only a few have bothered to climb the mountain, whose tallest spires extend into the clouds.

The Towers/Evinsfayte: this is an almost completely unexplored mountain range. "The Great Pillar of Iznowt" is a tall, narrow, needle-like spire that thrusts straight up out

“Omerian Tales: Lands and People of Omeria” (A d20/OT supplement)

of the range. It is obviously named for Nethis Iznawt, who headed the first Omerian mapping expedition. The range of Evinsfayte is named for Iznawt's Altherian companion, Abelard Evins, who perished there from a fall.

Rabscuttle: A completely inhospitable place that is home to several warring Grig factions, among them: *The Bonebreakers*; *The Bloody Skull*; *The Eyebiter*, and *The Red Sun*. None of these tribes are friendly, though it was *Red Sun* guides who took Iznawt through the region when he mapped it.

The indigenous people

Upper Omeria is (was?) primarily populated by the Gnoll, a tribal race of dog-like humanoids. Though each tribe has its own identity, special customs and mores, all currently known species of Gnoll are classified into three camps:

The Inwahe: benevolent lodge-dwellers found primarily Ebronder, and in the forests on the outskirts of Balderville.

The Puningi: fierce horseman who roam the Plain of Elendi in search of great herds.

The Grig: “advanced,” metal-using, warlike tribes who rule the harsh lands of The Cragiset.

PCs can expect to meet with Inwahe fairly early in the campaign, as the Inwahe trade freely with the “Irdruzil,” or “the Strange Folk,” (or simply “Strangers”). Encounters with the Puningi should be avoided, as their reactions depend entirely on their mood at the moment. As already noted, very few adventurers have gone into the Cragiset and returned to tell of it. Though individual Grig tribes hate each other, they despise outsiders even more. Additional information on the Gnoll, plus the other unusual races of Omeria, is found, below.

New World Races

The new world is populated by the typical races found in most fantasy milieus. In *Omeria*, however, it is assumed that there has been very little contact between the people of the old world and the people of the new, as humans only recently settled the new world. For that reason, no encounter can be considered “standard.” Stance of neutrality, enmity and empathy are forged as the campaign progresses, and there is no way to know what reactions will occur until they are played out.

Racial archetypes: Some racial descriptions are broken down into “Archetypes” and “Ethnicities.” A racial archetype is a general description of the race overall. An ethnicity is a subset or variation of the archetype. Not all races have archetypes and sub-sets.

Omerian Player Characters: As the campaign develops, and players come into contact with more and more Omerian people, some players may want to play these new races. For that reason, information is available under each archetype or ethnicity.

DWARVES

(*Ethnicities: Hill, Mountain and Surface*)

Bonuses	+1 STR +1 BP, +2d6 STA
Negatives	-1 DEX, -1 CHA
Virtues	Determined
Vices	Zealous

Dwarves are short, stout creatures resembling small, stocky (often bearded) humans. They are typically strong and wide of shoulder, and short of leg. They are generally hardy fighters, and usually bitter realists. On the whole, most Dwarven cultures are introverted and somewhat xenophobic, their initial reactions typically range from neutral to openly hostile.

Dwarves are split into three related, but unique sub-species. These sub-species, while cultures unto themselves, nonetheless share many common traits and characteristics. There are two reasons for this. First, while it is uncommon for the different types of Dwarves to mix cultures or intermarry, it is not unheard of. All Dwarves tend to cling to and carry their cultural mores with them. More integral than intermarriage, however, is the generally agreed upon belief that all Dwarves sprang from the same stock and location, during which time they shared a common tongue and culture for hundreds of years. The reasons why the race inexplicably split off into their present three branches is a secret only the Dwarves know (and they ain't talkin').

All Dwarves are by reputation excellent craftsman, known for their expert building skills, fine jewelry and well-made armament. Their communities are found in three places, the surface (rare, but usually plains), the hills and the mountains. Being less than tolerant of other races (and sometimes not even very tolerant of each other) Dwarven communities (usually) trade freely amongst themselves. Where the different terrains merge (i.e., hills with mountains, plains with hills), you will often find the two types of Dwarves living relatively close by. On occasion, there will be isolated pockets of single Dwarven races (usually consisting of Mountain or Hill Dwarves). In these cases, the community

"Omerian Tales: Lands and People of Omeria"

(A d20/OT supplement)

consider themselves apart from even their Dwarven cousins. Such communities are invariably powerful and exert major influence on their habitats and neighboring kingdoms.

The prevalent Mountain Dwarf belief system revolves around the ability to "craft," be it in a skill like masonry, or a task such as war. Anyone who is excellent at his craft is seen as blessed by the gods. Their most revered god is, of course, Kranrik, "the great craftsman." Dwarven society is heavily patriarchal. Females are treated as property, for the most part, and almost all marriages are arranged (usually by cooperating clans as a means to maintain power and/or influence).

Dwarven names are usually descriptive, reflecting their backgrounds. Typical Dwarven last names include Steelhand, Ironhelm, and Goldhammer (these, of course, are translations from the Dwarven tongue). Dwarves live to be between 550-750 yrs. old.

Hill Dwarves: Hill Dwarves are seemingly a mixture of Mountain and Surface Dwarves, possessing a synthesis of traits that the others have individually. It is rumored among scholars, in fact, that the Hill Dwarfs most closely resemble the original Dwarven culture to which all Dwarves once belonged. Unlike their Mountain brethren, Hill Dwarves are comfortable living both above and below ground and their architecture and lifestyle reflect this. Some Hill Dwarf

communities build their abodes completely inside the earth, while others may build entirely outside, like humans. No matter how the community is built, it is always walled, heavily fortified, and trapped to the gills. Hill Dwarves are equally adept at farming as their surface brethren (see below) and as good as their mountain brothers at mining and stone cutting. If they were as aggressive as their mountain cousins, they might rule more and larger territories than they do.

While not as prejudiced and introverted as the Mountain Dwarves, Hill Dwarves are nonetheless a relatively closed society. They rarely interact with non-Dwarves unless it is to their benefit. When they do, they prefer that the Surface Dwarves act as a go between in their relations with others (non-dwarfs). They can be as quick to anger as their Mountain brothers and are fierce fighters when provoked. They are fiercely devoted to king, clan and family (usually in that order), and tend to treat their females as subservient beings. There is relatively little infighting and political posturing among Hill Dwarven populations, due to the fact that they see their leaders as part of an unbroken line descending directly from the gods.

Mountain Dwarves: The most fiercely introverted, mysterious and warlike of all the Dwarven "races" are the Mountain Dwarves. Mountain Dwarves live in seclusion, far away from almost all outside influences. They usually maintain somewhat cordial relations with other Dwarven enclaves (except with Surface Dwarves which they view with a certain degree of contempt). All other creatures are usually treated as hostile invaders. Typically, an initial encounter with a Mountain Dwarf will be, at best, tension-filled. To say they are distrustful of all other races is an understatement. No one knows the reason behind their warlike stance, but most assume it has its roots in simple arrogance. A select few sages point to some strange historical event that occurred many years ago, perhaps the same event that causes the legendary original clan to split into the present three races.

Since the Mountain Dwarves are so secluded from the rest of the world, they tend to be greedy when it comes to anything outside of the world they live in. Metals and stones are common to a Mountain Dwarf, but such things as paper or fine cloth are sought out and hoarded. It is this greed for the unusual, in fact, that accounts for the very few (often black market) trade routes that exist between Mountain Dwarves and non-dwarves. Such trade is often conducted through several layers of middlemen, and most often is instigated by rich and/or curious Dwarven nobles.

Mountain Dwarves exist in a clan-like culture whose politics exhibit their inherent violence and capriciousness. This makes the aforementioned trade

“Omerian Tales: Lands and People of Omeria” **(A d20/OT supplement)**

agreements spotty and, sometimes, very dangerous to maintain. Like Hill Dwarves, they believe their leaders are anointed by the gods. Unlike other Dwarven ethnicities, they are much quicker to reconcile the replacement of inept leaders through combat or assassination as “the will of the gods,” particularly if the leader has acted in a weak or dishonorable manner,

Physically, Mountain Dwarves’ homes are built inside massive tunnels (either natural or carved). They are exceptional miners, stone cutters and stonemasons, with expertise beyond all other Dwarves. While they live deep inside and beneath mountains, they will still often build great fortresses inside their underground kingdom. Like all other Dwarves, the Mountain clans are skilled in any other crafts they acquire.

Through means as yet unknown, Mountain dwarves have acquired a degree of magic resistance. Some sages speculate it has something to do with the very earth in which they have created their homes. The stone deep within the Omerian mountains is said to be a strange, dark substance that, according to rumor, exudes some sort of natural anti-magic radiation. In game terms, all mountain dwarves have a +4 resistance to any sort of magical effect, including beneficial ones, like healing spells. The Mountain Dwarf cannot turn this resistance on and off as he pleases. There are some rumors, however, of Mountain Dwarves losing their resistance as they travel further away from their homelands.

Needless to say, there are no Mountain Dwarf magicians, nor or there traditional priests. Mountain Dwarf priests tend to be either seers or war priests. The seers do not cast spells or scry like the typical member of their profession, but rather utilize rune stones, or sacred objects. They are said to be remarkably accurate in their predictions. Mountain Dwarf war priests are usually just extremely devoted or proficient warriors endowed with some unusual attribute or ability (like *Battlerager* or *Improved Critical*). There are some reports, however, of war priests who have the ability to create very limited spell-like effects on themselves and their immediate followers. Such reports are largely unsubstantiated.

Surface Dwarves: The most open and (relatively) friendly of the Dwarves, relatively speaking, are the Surface Dwarves. The surface dwellers are also the tallest but least physically powerful. Sometimes called “the sundered” or “the cursed” by their Hill and Mountain brethren, Surface Dwarves seem to have originated from the same stock as Hill Dwarves. Some scholars speculate that the Surface dwarves were part of a clan that was banned (for reasons unknown) from the old Dwarven society. They now serve as a link between the outside peoples and the more secluded worlds of their Dwarven brothers. In fact, it is the ability to comfortably live in both worlds

that allows the Surface Dwarves to thrive where their cousins seem to be dwindling.

Surface Dwarves have less of a problem conducting amicable relations with other races, and seem to be accepted (or at least tolerated) in the usually secluded homes of their relatives in the Hills and Mountains. Most surface clans themselves still live in mountainous regions, but on occasion, “wilders” or “rovers” (as they are called by the other Dwarves) can be found elsewhere. There are even some tribes, like the Malaryians of Bothan, who have adopted the wholly non-traditional role of fishermen (though they still tend to be poor swimmers).

Surface Dwarves are usually excellent farmers, creating croplands where most others would never dare try. Their hill farms are built on terraces, giving their communities a unique look to them. This terracing is useful in many ways. For starters it gives them the ground they need to raise crops. The second and much more subtle use of terracing is homeland defense. With each terraces higher and generally offset from those below, it offers strategic advantage for the sureshot Surface Slingers. Swarf clans that farm traditional flatlands tend to produce large amounts of crop in small spaces. This is because Dwarven crop specimens are unusually large. No one is sure how this effect is achieved. Rumor has it the Surface Dwarves import some sort of strange powder from their Hill and Mountain relatives which spurs this remarkable growth.

Surface Dwarves live in extended families as part of tribes of various sizes. While Surface Dwarf tribes are each unique in their temperament and structure, it is not unusual at all to find several tribes occupying the same territory and sharing it with a minimum of dispute. Unlike in the Hill and Mountain culture, Surface Dwarven females live in complete equanimity with their male counterparts.

ELVES

(Ethnicities: Wood, Steel)

Bonuses	+1 DEX
Negatives	-1 STR
Virtues	Free-Spirited
Vices	Fearful

Green (Wood) Elves: Green elves inhabit the deepest, darkest forests -- areas seldom frequented by other races. They are hardy fighters, physically the strongest of elves, but are somewhat barbarous in their ways. Green Elves are normally over 6' tall, but are usually rather thin. Their skin color ranges in pigmentation, but there is always a hint of green. Hair color is usually black, though occasional, unexplainable variations have occurred. Their eyes are always a shade of green or blue.

Wood Elves are inclined toward militancy, and

"Omerian Tales: Lands and People of Omeria"

(A d20/OT supplement)

most spend a good portion of their lives training in the use of weaponry. These 'barbarians' are extremely proficient in the use Bows and Daggers (Crit on a 19 or a 20 with these weapons). Note that most Wood Elves characters stone, wood, or bone versions of weapons, as metalworking is almost unheard of in Wood Elf society.

Green Elves live in tribes of various sizes, and almost every tribe has a dozen natural enemies (including other Elf tribes). When dealing with outsiders, they tend to "shoot first and ask question later" (though they will usually stalk potential enemies for some time before committing to action). This is not to say they are foolhardy. They will scout any threat as much as possible, using a "blending skill," which is basically a *Sneak* attack that allows them a +4 to their Subterfuge check in their natural

environment. This particularly deadly skill allows, a "blended" Green Elf to his blending and subterfuge

bonuses to any sneak attacks. This ability can only be used in the Wild Elf's natural terrain, however, the woods.

Green elves are very superstitious, and many will have obvious problems adapting to the outside world. Players playing Green Elves should be extremely detailed in their particular tribal norms, and must incorporate at least two strange habits into their character's daily routine. Green Elves tend to have certain strange phobias, which the player is encouraged to create and play.

Wood Elves live to be 120-150 years old, and always take names that reflect their life in the wilds. They wear clothing that blends with the wild, and always carry a hunting knife.

Blue (Steel) Elves: Blue elves inhabit remote areas, generally shunning the rest of society. They are stoic to a fault, but make strong allies. In appearance, they are tall and sinewy, which belies their great strength (for elves). Most are around or over 6' tall, and no fat steel elf has ever been seen. Their skin is a glistening, metallic blue. Their hair is always black, and their eyes are always some shade of blue.

The Blue Elves are excellent metal workers, and all are trained with the blade. In addition, Steel Elves are extremely adept at survival in their natural element (consider any Survival checks in natural terrain to be at DC 5).

Steel Elves wear as little, or as much clothing as they need. They are pragmatic creatures, with little use for ornamentation. Males and females alike always carry a sword of some type. Blue Elven names reflect their affinity for strong sturdy mountains and good, solid craft. Some humans have even gone so far to say that these names closely resemble those used by dwarves. There are legends of certain Blue Elf tribes living in huge dugouts in the walls of forbidding canyons. These Elves are said to ride great, fearsome birds.

GNOLL (*Ethnicities: Grig, Inwahe, Puningi, Maotauna*)

Bonuses	+2 STR +2 BP, +2d6 STA
Negatives	-2 CHA, -2 INT
Virtues	Industrious
Vices	Cowardly

Gnoll is the human term used to describe that vast collection of tribes inhabited by this dog-like race. The Gnoll are basically large humanoids with canine facial features. They are best described as tall (6' to 7') stocky beings with human bodies and dog heads.

All Gnoll come from primitive backgrounds, and are usually short-lived. Little is known about them outside of their society, and many other races

“Omerian Tales: Lands and People of Omeria” **(A d20/OT supplement)**

avoid them. They roam the land in tribal units, and no two tribes are the same. There are some basic similarities between tribal types, however, which allow major classification of the various enclaves. Besides their dog-like features, every Gnoll sub-race maintains the canine sense of smell. Their enhanced sense of smell grants makes them very difficult to surprise. Gnoll PCs are usually Archers, Fighters, Rangers, or Rogues.

Grig (greeg): The most common of the Gnoll, the Grig are typically barbaric. They have a “might makes right” mentality, with their size and strength more often than not placing them in “the right.” They are hardy warriors, rather large and muscular. Their appearance can be menacing. Their fur is usually dark, and their coat is invariably dirty. They take pains to keep their canines glistening and menacing, however, and love to create and wear “perfumes” that smell of blood or offal. They prefer ornamentation that makes them look as menacing as possible (spikes, sharp edges, fearsome iconography emblazoned on shields, etc.).

Grigs tend to form large tribes, and because other races tend to push them out, they usually inhabit desolate places. They are adept at making steel weapons, if given the proper materials, and can fashion armor, as well. Many tribes, in fact, prize armor and weaponry above all else, and form relatively huge empires, ruling vast tracts of mountainous or rough terrain. Characters stumbling on such territory will almost immediately notice the despoiling of arable land (if any is present), as well as many examples of fearsome heraldic symbols, such as impaled cadavers or elaborate stone and bone markers. Grig are acquisitive and fearsome, and usually not prudent about choosing enemies, so such territory is frequented only by fools. Grig still maintain the pack mentality of their ancient ancestors, with the strong dominating the weak, and little care given to those who can’t take care of themselves. They do not discriminate among male and female, each gender fully capable of exerting control (through various means) over their brethren.

Should a player run a Grig character, the bad reputation of the Grig as a whole will follow that individual character everywhere he goes. In game terms, all interactions with non-Grig, or non-party members suffer a -2. Checks concerning Elves, their natural enemies, are penalized at -4.

Inwahe (een-WAH-hee): The benevolent Inwahe take up residence in great wooden lodges next to fertile tracts of land, such as streambeds or forests. They are forest tenders and farmers, a far cry from their brothers, the many typical, warlike species of Gnoll. Inwahe are the smallest of the Gnoll, approximately the size of Elves, with whom they sometimes share territory. Inwahe, in fact, tend to

make treaties with all of their neighbors, often at the expense of land or respect. As a predominately non-violent race, they tend to collect as powerful an “entourage” as possible to protect themselves. All Inwahe are capable farmers, and many can craft hunting arrows as well, given the proper materials.

Inwahe hold reverence for all living things, especially animals, with whom they feel a kindred spirit. Each Inwahe accordingly possesses a spirit guide (or totem), which they can communicate with using various rituals. The most common form of ritual involves meditation, focused on the use of a small bag filled with special personal objects. The bag, called a Niktaki (neek-TAHK-ee), or Medicine Bag, is worn around the neck and removed only in rituals involving the totem. The preliminary “calling ritual,” or “Izh B’em’he (Eezh beh-MEH), is performed at the age of 10, and involves the actual summoning of the totem spirit. By this time, the child has collected a number of personal objects, which he removes from his pack and places on a small sheet of sacred material, usually leather or buckskin. The Inwahe then wills himself into a trance, during which time he sees his spirit guide in his mind. From that point on, the child will forever recognize his guide, and will be able to communicate with it on the spiritual level. Players running Inwahe characters should simulate the above ritual by rolling the guide’s attributes on the table below (roll twice, once for type of creature, once for ecological niche).

	TYPE (d20)	ECOLOGICAL NICHE
Mammal	1-11	Carnivore 1-6
Avian	12-14	Herbivore 7-12
Sea creature	15-16	Omnivore 13-18
Insect	17-18	Scavenger 19-20
Reptile	19-20	

The player should bear in mind that the totem should reflect the characters strengths and weaknesses. Thus, a physically weak character with a Carnivorous Mammal as a totem would not likely have a Wolf as a spirit guide. Players who despair of their initial rolls, or who cannot come up with an appropriate guide should be allowed one additional roll on the above tables. After the second roll, however, the character is stuck with what he gets (as is the nature of the ritual -- the animal chooses the Inwahe, NOT the other way around). If the player simply cannot accept the hand dealt by fate (i.e., the above die rolls), assume that the character simply has no spirit guide. Perhaps he has attempted the ritual several times, and a guide has not yet shown. This could be a great role-playing hook for the character, who may be roaming the lands, searching for his guide, or attempting to accomplish some great feat to enamor him in the eyes of the spirits.

Whatever the case, Inwahe characters with spirit guides have certain advantages. First off, they

“Omerian Tales: Lands and People of Omeria” **(A d20/OT supplement)**

may attempt *Communion* with the animal, which is quite similar to the above summoning ritual. In this case, however, the character merely clutches at the medicine bag, and attempts to contact the totem. If he is successful, the guide appears in a vision and imparts the requested knowledge to the character in symbolic, or cryptic form (it's up to the GM to decide how this is done). In game terms, Communion is accomplished by rolling WIS+Communication versus DC10. A successful roll indicates that the guide has appeared as above. Communion can only be attempted once per day, and takes no less than 10 minutes to accomplish. The character must have quiet and solitude to attempt the task.

A second advantage possessed by the character is *Manifestation*, which is the actual summoning of the guide in physical form. This is a more difficult feat to accomplish (DC20). If the character is successful, the guide appears within minutes, and remains to serve for a number of hours equal to the success ratio of the Check. Summoning can be attempted once per day.¹

The final ability granted through possession of a totem spirit is Transmutation, which allows the character to take on characteristics of his guide. Transmutation is difficult to achieve (DC20), and physically taxing on the character (cost=2d6 STA). If the character is successful, however, he immediately the abilities of his totem, in whatever combination he desires. A character with a shark for a guide, for example, might be able to swim underwater without need of air. He might, as well, develop a mouth full of razor-sharp teeth.

Transmutation may be attempted any number of times per day, provided the character has enough STA. There are risks, however. A character that attempts Transmutation and loses more STA than he presently has, will collapse into unconscious, and must make a WILL check at DC15 or permanently lose a BP. Further, a critical failure on the part of a character attempting Transmutation requires a STR+Physical DC20 check to resist the following effects (roll d6):

1-2: *Unconscious*: Character loses all STA, in coma for 3 days.

3-4: *Injured*: Character loses STA + 2 BPs (structural damage from aborted change)

5: *Cursed*: Spirit Guide deserts character for 2d6 days. All checks at -2 during this time.

6: *Death*: Character must make an additional roll check versus DC25 or die. If successful, character is reduced to 0 HP's, 1 BP, and bedridden for a month. Spirit Guide deserts character permanently, quest must be taken to acquire replacement. Character loses d4 KAR, permanently.

The fur of the Inwahe is varied. In all cases, however, coloration usually features a base brown shade of some type, ranging from a dull, dirty color to a gleaming metallic gold. Trace elements of white are sometimes found on the snout and jowl fur, and occasional patches of green might be seen. These green patches are highly prized by Inwahe, and represent blessings from the spirits. Characters have a 6 in 20 (30%) chance of possessing such a patch, and are granted a 2 additional KAR points if they have it.

Of all their species, only the Inwahe maintain regular trade with non-Gnoll races. In addition, they tend to settle closer to and get along better with other races. They tend to build simple wooden dwellings (“lodges”), to include the occasional walled enclosure (fort). Though they are not great warriors physically, they tend to be prudent and patient during conflict. They will create all sorts of barricades, maintain secret hideaways, and exercise hit-and-run tactics against their enemies. Unlike the Grig and Puningi, who seem to value individual strength and prowess above common sense, the Inwahe only care about winning the war. They are tenacious foes, and, if drawn into a conflict they cannot avoid, they will carry on harassing techniques indefinitely.²

Puningi (poo-NEEN-jie): In many ways, the Puningi are the most ferocious of Gnoll warriors, and are feared even by the steel-using Grig. They live in small, roving tribes that follow wild herd animals across the landscape, upon which they depend for sustenance. Some scholars believe that only their nomadic tribal lifestyle keeps the Puningi from dominating not only other Gnoll, but other lifeforms in their area.

The Puningi are exceptional horsemen and hunters. Some even call them the best mounted warriors in the world. Simply put, this incredible skill with horses equates a +5 bonus handling horses. In addition, a Puningi riding a horse he himself has broken and trained never has to make a Check to perform unusual or outstanding feats while on that horse. All Puningi warriors are also capable of the following racial Feats:

¹ Note that, if the guide has no way of logically reaching the character (for example, the character summons a wolf while he is out at sea, or a fish while he is in a dry cavern), the manifestation automatically fails. The GM should, in fact, inform players whether the manifestation is logistically possible before they make the attempt. It is assumed that the character will know the best conditions for manifestation.

² An apt template for this mindset and execution would be the Viet Cong during the Vietnam War.

"Omerian Tales: Lands and People of Omeria"

(A d20/OT supplement)

Mounted Bow shots: The Puningi can fire without penalty from odd angles while mounted, such as leaning to one side, or bracing himself with his legs and firing from under the horse's neck (thereby using the horse as partial cover [+2 AC]).

Leaping from horseback: Puningi can leap in attack from horseback to another target with no penalty, regardless of whether the other target is moving. The warrior must simply make a roll to hit, and gets an additional +2 if the target is dismounted. A successful attack requires the target to make a STR+Physical Check DC15 to remain upright. A Puningi who 'misses' his leap will land unharmed, provided he makes a successful DEX+Physical Check+riding bonus vs. DC20. An offshoot of this trait is the ability leap *on* to horseback with a successful check like the one above. The mount, if it has been trained by the Puningi, will automatically speed off in the desired direction.

Puningi coloration resembles German Shepherds (browns and blacks), and their countenance often reflects their demeanor. Though they roam after the herds, the location of the herds is seasonally static. That is, the herds have a tendency to wander the same lands during specific times of year. Puningi are quite possessive of their lands, and often attack trespassers first and ask questions later.

A feature of many of these lands are the Puningi graveyards, which feature tall platforms set high above the ground on stilt-like legs. The

deceased Puningi are placed on the platform with all their material possessions (which tend to be few, since the tribe roams). This always includes weaponry, and may include monetary possessions, if the tribe recognizes their worth (a few tribes maintain active trade with certain, trusted merchants). There is always a contingent of Puningi warriors serving as Di'ish b'te (deesh ba'TEH), or "guardians of the dead." The graveyards are usually situated on or near the tribal "wintering lands" (Gol Narshasak [GAWL narshaSACK]), where the Puningi settle during the cold months.

Puningi warriors go to great lengths to present a fearsome image, often painting their faces wildly, or wearing gruesome skull masks. Some tribes have unusual rituals revolving around combat, in which mind-altering herbs or plants are consumed before battles. Still others perform bizarre rituals on the bodies of their dead enemies, such as scalping them or removing the victim's heart and devouring it to capture the former foe's 'spirit.' A Puningi PC should have a number of these "strange habits" (suggest d6-1 habits).

Puningi tribes usually elect their leaders through rituals of strength or skill. These rituals may include direct (sometimes lethal) combat, a test of hunting skills, an endurance trial, a "vision quest," or any combination of the above. Tribal leaders are always male, and are revered and served until they die or abdicate (either of which can occur by challenge). Some tribes feature a council of elders

with a "chief" at its head, and still others create councils of functionaries (i.e., "war chief," "hunt leader," "home guard," etc.). Puningi are usually incredibly loyal to their rituals and their word, which sometimes leads them

into disadvantageous agreements with those who are not. They despise their Grig brothers, and tend to look down upon (and occasionally abuse) their Inwahe brothers.

Moatauna (MOW[as in HOW] -TAH-NAH):

The Maotana are a mystical, highly revered, and highly feared race amongst the Gnoll. They appear seemingly at random

“Omerian Tales: Lands and People of Omeria” **(A d20/OT supplement)**

among any of the aforementioned races (and their birth usually causes great consternation among the tribe). They are natural spellcasters, often serving as shaman (Druids) for their people, performing rituals involving all sort of strange ceremony. Indeed, they are often the only Gnolls able to wield magic, and are thus treasured, as well as feared.

Though treated as a race unto itself, a Maotana can be born into any race. Similar to the case of the Minotaur (below), the birth of one of these creatures is said to be a sign from the gods. How the sign is interpreted is up to the individual tribe. A Puningi tribe, for instance, might see the birth as a sign of great power bestowed upon their warriors, and might immediately launch a hunt, or raid their enemies. The Inwahe might see the birth as a sign of a bitter harvest, or perhaps the opposite – a bounty. Grig almost always take great pains to protect, and later serve, the spellcaster. On the whole, though, the tribal reaction often depends upon many strange, unpredictable factors.

Maotana do not resemble their parents in any way. Their features are sleek and black, and their heads resemble Doberman Pinschers. They invariably carry with them an air of mystery. Their movements are fluid and surreal, almost ghostly. Other Gnoll (even boisterous Grig) tend to give way when they approach. They are almost always stoic and reserved, and usually utterly humorless. Most Maotana might as well be outcasts among their own people, as fear inevitably causes them to be shunned or, at best, kept at arm's length. This occurs even when they are serving in important and benevolent roles, such as that of healer, or tribal shaman, their usual occupation for much of their adult life.

At some point in their lives – no one can explain why – some inborn instinct draws the Maotana away from his home and tribe. A strange migration takes place during the winter of one of the character's younger years, leading the magical being to an undetermined location. No one is sure where the shaman goes, but legends say that all Maotana find their way to one central tribe, to live among their own kind and indulge in their mystical arts. Some Gnoll tribes tell stories about a mythical tribe of Maotana, which is gathering strength to descend from the mountains and destroy the lands during the Glim'wo Knitokshoaw (GLEE-mao nee-TOK-show [as in cow]), or 'The Final Time,' when all things return to the earth. Again, no one, other than the Maotana themselves, know where or why they depart. Some eventually return from their sojourn. Others are never seen by their people again.

In game terms, Maotana are always spellcasters, usually Elementalists. They are naturally resistant to magic (+2 on all resistance rolls). They may occasionally combine a Warrior or Archer profile with their spellcasting profession (this is more common among those born to Puningi tribes). In

fact, Maotana character's are allowed to possess all granted abilities of their parent tribe (Puningi *Riding*, Inwahe *Spirit Guide*).

It should be quite obvious that the Maotana character is *rare* and specific to their racial group. Players should only be allowed to run one of these characters if the campaign is heavily centered on or connected with the Gnoll culture. It is almost unheard of for one of these strange creatures to associate with non-Gnoll.³

Haflings

Bonuses	+3 DEX
Negatives	-2 STR
Virtues	Determined
Vices	Fearful

These small folk are a mongrel race of human-kin, most often seen as slaves of the more powerful races of the realm (primarily Grig Gnolls and Dwarves). Once a thriving people found in idyllic forest glens and rolling grasslands, the Halfling now exist in small, isolated pockets, burying themselves from the sight and sound of all creatures. They are inherently distrustful of all non-halflings, and take elaborate pains to protect their lands, using all sorts

of clever tricks, traps and misdirection to thwart their enemies. When Halflings do engage in combat, their small size and great dexterity give them a +4 to AC versus creatures larger than themselves. All Halflings have the ability to *Sneak* attack like a Wood Elf. Unlike Elves, these abilities extend outside

their home terrain or domain.

In appearance, the “Little People” are a small folk, and in appearance seem to be a cross between humans and elves. Some Halflings feature the

³ Though not entirely improbable, given the right circumstances.

After all, no one knows where the Maotana “migrate” to during their strange sojourn. Encounters with non-Gnoll will probably take place during such travels. It is also possible that the character is sick of being treated as an outcast, and is simply searching for a place to fit in (either before or after the strange “migration” takes place).

"Omerian Tales: Lands and People of Omeria" (A d20/OT supplement)

traditional arched eyebrows of the elves, and a select few even have pointed ears. They tend to have bushy brown or red hair, and dark eyes. For reasons no one can explain, Halflings' names reflect a sensibility that is in direct opposition to their difficult place in the world (Examples: Handly Sunwarm, Glyssa Waterbright). Halflings have the same life expectancy as humans.

Humans

(see M20/OT Core Rules for PC creation)

Humans new to the realm, and fast gaining power. They run the gamut between good and evil, prosperity and poverty, and are found mainly in well-established settlements. At present, the number of those settlements is expanding (much to the consternation of the other races). As a general rule, humans get along very well with (or at least tolerate) other races. They are also an extremely versatile and

as devious as a Halfling, and as menacing as a Grig. Thanks in part to their unusual combination of unpredictability and resourcefulness, almost all non-human races consider them to be the most dangerous creatures in the world. They are admired, envied, pitied and feared. And, much to the chagrin of certain races, they are here to stay.

Humans range from 5' to 7' tall, with weight ranges from below 100 to approaching 400 lbs. Human names are as varied as snow, though many favor appellations or titles (like "Lord," or "the Cursed," etc.). Most humans live to be around 100 years old. As for Traits, any combination of positive or negative is possible, given the eclectic nature of Human society. Human PCs are hail from the Old World, Alkaghi. There are rumors of human settlements in the New World, but none have been substantiated.

KENKU

Bonuses +1 DEX, +1 WIS

Negatives -2 STR

Virtues Charismatic

Vices Capricious

These sinewy birdmen from the high mountains are travelers, traders, and merchants, fond of acquiring and dispersing fine gems and jewels. In appearance, they are bipedal, like humans, but their bodies are completely covered in feathers. The head resembles a bird of some type, usually a bird of prey. They have no wings, but instead have formed arms and hands, like their closely related humanoid brethren. However, their legs and feet closely resemble a bird's, so they are very careful to protect these fragile elements.

Kenku are natural craftsmen and experienced travelers. They hardly ever set down roots, preferring to roam the world in search of adventure and great riches. Accordingly, the two motivations are mutually exclusive, as riches tend to weigh the traveler down. That being the case, all Kenku prefer to convert their goods to something of a portable nature (i.e., gems, jewelry). They travel light, and dress comfortably. In addition, almost every Kenku will carry some sort of disguise with them on their sojourns, for traveling undetected through areas where they may not be welcome.

Kenku numbers are not numerous, and encounters with them are relatively rare. Most of these encounters take place in marketplaces, or perhaps place of business. As a result of their wanderings and their propensity to haggle, many reputation-destroying rumors are afloat that depict Kenku as con artists. The Kenku's ability to profit from their cleverness does little to refute these reports (though, in fairness to the Kenku, they are usually better business people than the established

adaptable people. They are also, as Dwarves put it, "dangerously fertile."

Humans tend toward organization and power, and can be as covetous as the greediest Mountain Dwarf. They can also be as enlightened as a Gold Elf,

“Omerian Tales: Lands and People of Omeria” **(A d20/OT supplement)**

merchants themselves). Kenku are excellent appraisers of material goods (+2 to all checks). Though they admire sweet music, they are incapable of playing most instruments (specifically, any wind instrument, or instruments where lips are required). Many, though not all, still retain the ability to sing like a bird.

Socially speaking, Kenku are solitary creatures. They tend to come together with their own kind for mating and business purposes only. Mated pairs (Kenku never marry) live together (i.e., “nest”) only as long as is necessary, which is long enough to create and care for their children.⁴ Kenku are extremely protective of their infants, and will do all they can to protect and provide for them. Growth is rapid, and once the child reaches the age of 3, however, they are considered fully grown, and the parents abandon them (or “kick them out of the nest”). There is usually little trace of parent-child bonding, and in truth, many Kenku seem to forget their parents within a few years after setting off on their own.

The Kenku sense of detachment and wanderlust may have something to do with their short lifespans (Kenku only live to be 50 or so). Everything about them, in fact, seems to run in fast motion. Their speech patterns are fast and clipped, almost as if they must speak before they forget what they have to say. In addition, they have a high rate of metabolism, but are lucky enough to possess eclectic and tolerant palettes with which to satisfy their insatiable hunger. Kenku always seem to be pecking away at something. They can, in a pinch, almost eat any sort of grass, bark, or naturally occurring vegetation. They are especially fond of meat, mainly for its caloric content. They are not picky. They will even eat domestic and wild birds, since they do not consider them to be true relatives. They seem incapable of getting fat, and so are able to maintain and thrive on incredibly unhealthy diets of fatty foods. They *hate* being offered worms or birdseed, and consider such offerings to be the height of ignorance.

All Kenku are areligious, though they do pay obeisance to a neo-Goddess named Diksbkeu (DEEKs-ba-koo). Kenku legend holds that Diksbkeu was the mother of the first “evolved” birdman. That first egg holds great significance for the Kenku, and the more “devout” of their lot will sometimes carry a

miniature ivory replica as a sort of totem. Kenku “priests” are usually elementalists (Druids) dealing in the realms of earth and air (the domains of birds). Many Kenku are, in fact, outright thieves, are at least trained in some of the covert arts. Though there are exceptions, most Kenku are individualists who subscribe to the law only as long as it is convenient to them personally. No Kenku has webbed feet and, as a general rule, they hate the water.

Kenku travel through so many lands and encounter so many people that it is inevitable they will form many unusual liaisons. Players wishing to run a Kenku should be required to have a handful of Contacts, and possibly Enemies. The character might be a renegade, through some ‘misunderstanding,’ or perhaps they are treated as a hero in some quarters, due to some great deed they also inadvertently performed. The very fact that these creatures are well traveled should be an excellent hook for the player to create a very colorful character. Take advantage of it.

⁴ Like their less evolved ancestors, Kenku still lay eggs. However, the eggs stay inside the female body throughout most of the incubation period (usually three months). The resulting eggs are then kept in a hatchery, in which the heating fires are tended daily by both male and female. It takes another month or so for the eggs to finally hatch. Kenku females normally produce only one large egg per mating, though there are scattered reports of bird-like “clutches” of up to four eggs.

"OMERIAN TALES: THE ALKAGHI PANTHEON"
(A MICROLITE 20 RULES SUPPLEMENT AND FANTASY CAMPAIGN)

Campaign Background

Religion/Omerian Mythos

The Alkaghi are Pantheistic. Here are brief descriptions of the most common deities, as well as their most common aspects.

Raciatata (ROSH-ta)

(Healer, Goddess of the Winds, True-Seer)

Ractiatans (ROSH-tans) are by far the most prevalent and influential of priest orders. The goddess has an extensive following among the public, due to her wide and varied influence, and the generally honorable behavior of her priests. Most Ractiatans are Healers by trade, with Wind Priests and True-Seers making up about a fourth of the order's total number.

Healer Aspect (Healing, Protection; Knowledge):

In this outlook, Raciatata is looked upon as the benevolent mother, one that tends to wounds and brings forth the nurturing power of life. She is often depicted as wearing all white robes, with a hood pulled casually over her head. It is this aspect that is seen as the most benevolent. Followers of the Healer aspect wear all white robes and often embroider a dove somewhere prominent on their clothes.

Goddess of the Winds Aspect (Element, Wind; Protection; Knowledge): As the master of the winds Raciatata is looked upon as the harbinger of the seasons, letting man know when it is time to plant and when it is time to harvest. It is in this aspect that she is viewed to work closely with her mother Yulta and her brother Croatia. This is the most fickle of all her personas, and often times sailors will offer small sacrifices of burned herbs to ensure fair winds. Followers of the Wind aspect wear garments of all blue, usually light blue. And like the other priests they place a dove on their clothes for all to see.

True-Seer, Goddess of Truth Aspect (Knowledge; Order; Protection): This can be the most militant of all Raciatata's aspects. It is this aspect that works closely with Semit in dispensing justice. In this form she is seen as a much more stoic figure, accepting no excuses and permitting no falsehood. As the Goddess of Truth she is often seen in conflict with Gaskorathmichtx. Followers of the True-Seer, unlike the other orders, wear a white feather on their garments, symbolizing purity and truth. Their clothes are of mixed blue and white, and tend to feature clean, straight lines or strong, simple shapes.

Special Restrictions: One of the restrictions placed on this order is the self-imposed oath of truthfulness, which can be taken as the character's virtue, if the player is so inclined. If this oath is violated the priest loses all of his clerical abilities until he has atoned. Further, if the priest commits a crime, especially a moral crime all clerical abilities are lost forever. The character simply cannot atone.

Burial Rites: Followers of Raciatata are blessed and then cremated outdoors. The cremations are always done with fragrant spices or herbs as to please the winds.

Yulta (YULL-tah)

(Goddess of Nature and Renewal)

Yulta is seen as one of the more benevolent of the gods. She is probably the most active, except for Semit. She is viewed as a nurturing goddess, one that has helped man escape from the clutches of ignorance and despair. Because of this she has one of if not the largest followings among the human population. She is one of the few that has but one aspect. Yulta is often seen as the goddess of spring, summer and fall, all in one.

Goddess of Nature (Creation; Healing; Nature):

As the goddess of nature, the protector of man and the mother of the harvest, Yulta she is seen as a beautiful woman dressed in greens and browns in equal portions. She is the protector of all nature as well as its creator. She is pictured as a woman that carries a basket or a rake. Followers of this aspect dress in green garments with some brown elements and often sew a cloth leaf on their clothes. They are often seen planting flowers, shrubs and trees wherever they can. They protect nature from abusive treatment, not if it benefits humanity. Destruction simple for the sake of destruction often draws the wrath of these priests and of Yulta herself. They are "simple" people who try to live life in harmony with nature and they preach this harmony to others. Yultans often go out to help others however they can.

The "Brotherhood of the Oak" (Animals; Plants; Healing): There is a special sect of this aspect that is entirely composed of "Fighting Monks." This sect is known as "The Brotherhood of the Oak". This is a very small group and is under the direction of either special agents of Yulta or of Yulta herself. It is often this

"OMERIAN TALES: THE ALKAGHI PANTHEON"
(A MICROLITE 20 RULES SUPPLEMENT AND FANTASY CAMPAIGN)

aspect that is seen working with Semit in dispensing justice to those who would despoil or destroy nature. Brothers of the Oak undergo a great deal of martial training. They prefer wooden weapons, or their bare fists.

Burial Rites: Loyal followers are wrapped in a blanket and buried with wild herbs, flowers and small pine tree branches (unless a member of the Druidic order where they are buried with an oak branch).

Restrictions:

*Devote at least a month out of the year helping farmers.

*Must donate at least 25% of any treasure gained to the order (Oaks=75%)

*MUST MAINTAIN A PERMANENT RESIDENCE IN OR NEAR A WILDERNESS AREA.

Enx (ehnks)

(Keeper of the Lost Souls, God of Death, Lord of the Underworld, God of Winter, God of the Moon and the Night, Lord of Dreams)

Enx is a god of few words but powerful and far-reaching actions. He is the only god that has both a good and evil nature, thus setting his importance in the pantheon. In all his incarnations he is a soft-spoken, if not altogether silent god. His appearance tends to depend on the manner in which he is viewed. In all guides, he is not a very attractive God, though his visage may not be altogether unwelcoming.

God of Death Aspect (Death; Element, Earth): As the benevolent god of death, Enx is viewed as but a cycle of life, the caretaker of those whom have served their purpose on this earth. While his visage may be fearsome, a white skinned man wearing a jet-black cloak with red highlights, it is not meant to be evil. Enx judges those souls and sends them on their way to the higher or lower planes. In some cases, Enx will judge a mortal's deeds on the records of life to see if he is worth of traveling to Evermore (The home of all heroes) or if they have the distinction of inhabiting Toornak (The hall of villains). He will then judge if the person's soul is worthy to travel to Nirvana or down to Hades for eternity. This aspect views life as precious and wonderful and anyone that ends a person's life unjustly is viewed unfavorable by Enx. Followers of this aspect wear robes that range medium gray (initiates) to black with red trim (high priest). All priests wear something on their person or clothes displaying a white or silver circle with a black stone. This is the "Circle of life" and the stone represents both the start and ending of life's journey.

As the malevolent god of death, Enx is viewed as the final arbiter, the cutter of life's sacred strand, the scythe of life. While his visage is fearsome, a rotting corpse or a skeleton wearing a ragged, jet-black cloak with red highlights. In this aspect Enx is said to look with an uncaring eye upon all humanity, and with a callus and fickle temperament, cuts short the life of man. Even in this aspect, however, Enx must judge a mortal's deeds on the records of life to see if he is worthy to traveling to Evermore (the home of all heroes) or if they have the distinction of inhabiting Toornak (The hall of villains). If the person is

unworthy of those two places than they travel to the nether pits of Hades to slave for the great evil that is Trantrure. Followers of this aspect wear robes that are all black with red trim. All priests wear something on their person or clothes displaying a white or silver skull and sickle.

God of Winter (Element, Cold; Moon): As Yulta is seen as the goddess of spring, summer and fall, dark Enx is seen as the god that controls the world's dormant and bleak season, winter. This is the aspect that puts the world at rest, allowing it to sleep so that it may recover from the toils that man and beast has put it through. In this aspect he is seen as a white skinned man wearing white/light blue robes. This aspect has few followers. Followers of the aspect of winter wear all white robes with light blue trim and carry a symbol of an icicle. Usually these priests, when they are found at all, help man cope through the winter, searching for food and water. There are, naturally, a few sects that see winter as a punishment for the iniquities of the living, a transgression which they are altogether too willing to administer punishment.

God of the Moon and Night (Moon, Knowledge) : As the god of night, Enx is seen as the god that makes all man and beast rest. He is also seen as the god of sleep, rest and dreams. Enx is pictured as an elderly man wearing a black cloak with thousands of points of light and a halo around his head that is to symbolize the light of the full moon. Followers of this aspect work closely with Reyetta in pursuit of peace and rest for man. Unlike Reyetta's followers, they do not bicker and fight with Semit's priests, but try to work along side both sides. They realize that with rest and sleep can come reason and peace. This is still a very small sect and not often seen unless the city or town is quite large. The alter-world of sleep in rest is a neutral place all must enter. Thus, these priests tend to walk the line between the abstract concepts of "good" and "evil." They see only "troubled" or "tranquil" souls.

Burial Rites: None of the aspects of Enx have any particular burial rituals. Dead is dead. Any means will suffice.

Semit (SEM-it)

(Fiery One, God of War, Hammer of the Heavens, Slayer, The Justifier)

Semit is the most militant of all the Good pantheon of Gods. Most of his aspects are warlike in nature. In older days Semit was seen as the enforcer of the gods will or the "Iron fist of the gods". He was often called upon to punish insolence and evil. With all the troubles in the world recently Semit's base of followers have grown.

God of War Aspect (War, Strength): The most militant of his personas, Semit is seen as the ultimate warrior, a master of tactics, strategy, and combat skill. He is fearless and resolute. But unlike his twin brother Temis, he does not wage war simple for the sake of carnage and sport. This aspect only wages war so that peace may be restored. He impresses upon his followers that war is only an option should all other options be exhausted. Followers will always wear red, no matter what. The followers of war disdain armor in

"OMERIAN TALES: THE ALKAGHI PANTHEON"
(A MICROLITE 20 RULES SUPPLEMENT AND FANTASY CAMPAIGN)

combat, as Semit himself does. Lower order priests are allowed to wear medium armor, while the highest level priests might wear only a pair of leather pants (and some wear nothing at all). During combat, all priests of war will paint themselves red, so that the enemy will never know if they are wounded, and to prove their faith in their god. All higher-level followers will be seen with large two-handed weapons, usually a two-handed sword. All Semitians disdain shields and will never use them.

God of Justice Aspect (Order, Strength): As the enforcer of the god's laws, Semit is also seen as the god of laws and of order. He is tireless in rooting out evil and corruption. It is this aspect that works closely with Raciata in defeating evil and injustice. This aspect, like Raciata's True-Seer, is often in conflict with Gaskorathmichtx. Followers of the Justice aspect are not only warriors but also law enforcement officials, government personnel, and anyone who has been wronged. Priests of this order are often seen in many societies as the ultimate dispensers of justice, the executioners. This order wears all black with some traces of red. Like their war brethren they will not use shields and favor two-handed weapons in combat, primarily axes.

Burial Rites: Semitian priests and followers are wrapped in red or black cloaks and cremated with their most personal belongings, then the remains are buried.

Restrictions: Once the battle is enjoined, a Semitian can never engage in a full retreat. They CAN be convinced to "tactically withdraw," but will expect to launch a counterstrike at the first opportunity. Semitians who show cowardice in battle are rumored to be struck down dead by the God himself.

Mestamilsa (MEST-a-MILL-sah)

(Goddess of Pure Spirit, Thinker, Balancer, Goddess of Knowledge)

Mestamilsa is responsible for bringing the light of knowledge and wisdom to man. As a result, she is a popular god among man, but even that does not translate into a large religious following. She has suffered, much like her more passive brothers and sisters, with the troubles and strife in recent years. Her universal symbol is a torch, and four points of light radiating from the flame. Priests of this Goddess are called Mestans within and without the order.

Goddess of Knowledge Aspect (Intelligence, Knowledge, Wisdom): This is Mestamilsa's most common aspect. In this aspect. In iconography, she is seen as a woman in her mid to late thirties, and of modest appearance. She wears clothes in various shades of gray. In one hand is a book or scroll, and in the other she carries her torch of knowledge. Followers are all highly educated people (minimum INT=+2). They are often sought out for their knowledge in settling disputes, or sometimes just for tutoring. These followers will often set up schools so that ideas can be learned and expanded (costs vary from free to substantial). A city council will almost always have a Mestamilsan chair present. Priests of this aspect dress as their goddess does, in clothes of gray. Many of these priests run libraries and temples. In some cases a Mestan temple actually IS a library.

Goddess of Purity Aspect (Knowledge, Wisdom, Sun): In this form Mestamilsa is seen as the Goddess that taught the difference between good and evil, order and chaos, hope and despair. She teaches that evil only leads to needless death and that should that path be followed, everyone would wallow in the misery of ignorance and despair. This aspect works closely with Semit and Yulta in driving evil away and she is in direct conflict with the entire Evil Pantheon. Followers of this aspect wear all white, with touches of silver and gray. All preach the philosophy of truth, justice and the virtues of goodness. None of these followers will harbor nor abide evil in any form and they will seek to stamp it out by all acceptable and lawful means available to them.

Burial Rites : Followers are given a blessing, their foreheads are anointed in oil, wrapped in a white cloth and then cremated. The remains are given to either the family or the highest priest to dispose of as they see fit.

Foenseth (FO-wen-seth) aka "Reyetta" (ray-ET-tah)

(Water Bearer; Goddess of Rivers, Lakes and Oceans; The Virgin; Goddess of Beauty)

Foenseth (sometimes known as Reyetta) was the goddess that formed the world's streams, rivers, lakes and oceans with her tears and blood. Both of her aspects show her as an incredibly beautiful woman. It was this beauty that drove Trantrure mad with lust. He attempted to rape her, but she resisted and "killed" herself in order to prevent him from doing so. As a result, she formed all the water in the world with her tears, and in the same moment she rose again, whole,

"OMERIAN TALES: THE ALKAGHI PANTHEON"
(A MICROLITE 20 RULES SUPPLEMENT AND FANTASY CAMPAIGN)

to become the goddess of water and of alluring, eternal beauty. Trantrure, tried to rape her again, but was thwarted the second time by Semit who cast him from the heavens to dwell forever in the darkness of the netherworld.

Goddess of Water (Charisma; Element, Water; Healing): This aspect is responsible for the world's lifeblood, its waters. In it, the goddess fills the oceans and rivers with the essence of life and she gives water the power to make things grow again. It is this aspect that works hand in hand with Yulta in making the world bloom and prosper. Followers of this order wear robes of blue and often adorn their hair with blue beads. They all live near a source of water, be it a stream, the city fountain or the ocean. They all try to work closely with the Yultans and often mimic the Yultans' concepts of work, helping others and spreading goodness and temperance with nature. All followers will wear a symbol representing water.

Goddess of Beauty (Charisma; Element, Water; Love): In her other aspect, Foenseth is the personification of beauty. Every picture, statue or carving of her is different, but all depict a beautiful, virginal woman. Most of its followers are pacifists, first and foremost. They all take vows of poverty, refusing to live a pampered and lavish lifestyle. They all preach that beauty is more than a wondrous appearance, but that true beauty resides in the heart and that true goodness brings beauty no matter what a person looks like. This can at times put them in direct conflict with Semitians, who when "push comes to shove" will smite their enemies without a second thought. They carry or sew upon their clothes, an eyeless actor's mask, which symbolizes that beauty is often hidden beyond the range of normal sight.

Burial Rites: The body is washed and placed in a casket (or blanket if one is not available). Flowers and a small bottle of water are placed with the body and then the remains are buried.

Barkhat (BAR-hot)

(God of Crafts, God of Fire, The Forge-maker)

Massively muscled, Barkhat is the god that shapes the raw world into form. He taught both man and gods how to make things. His symbol is that of a single flame, gold and red, standing alone. He has few squabbles with the other gods save when they destroy his good works for no reason. The only god that he directly opposes is Murdt, whom he blocks in all his aspects. He is seen as an even-tempered middle aged man, often bald, but always with facial hair.

God of the Sun and Fire: As the god of the sun Barkhat is charged with regulating the length of day and the cycle of work in a person's life. In this aspect he is seen as the opposite of his "brother" Enx and the direct and mortal enemy of Murdt. As the god of the sun and fire, Barkhat appears as a fit and muscular man with a good tan and gold eyes. He wears few clothes, usually depicted as wearing only a light shirt and sorts or even nude.

God of Crafts and Strength: In this aspect Barkhat is an extremely muscular man with no hair on his head but almost always with some facial hair. He is seen as

wearing only wool pants and a leather workman's apron. This is the aspect that taught man and gods the benefits of tools and how to make things to better their lives. As the lord of the forge Barkhat can make or break any weapon, no matter where or what its origin may be. Some have even gone to say that he is the one that formed the world at Yulta's request, but this is disputed by many of his own followers.

Alasharta (Ah-lah-SCHAR-tah)

(Goddess of Music and Dance, Goddess of Language, Wind-Song)

Alasharta is the god that gave man the ability to communicate and to convey his feeling and emotions through movement and voice. Like many of the goddesses she is seen as a beautiful woman, but sometimes she is seen as a young girl. Her symbol is a harp or a flute, both silver. She is not fond of the evil gods and will not associate with them at all. She is fond of Semit and sings his praises, sometimes causing a bit of confusion among her followers and those of Semit whom don't know how to take the praise.

The Goddess of Music and Dance: The waif-like beauty of Alasharta with the sweet voice and perfection of motion is the personification of dance and song. She tells the stories of gods and men through motion and by song. She taught the first bards how to sing and the first lover's how to dance. This aspect has few followers save bards, minstrels and dancers and most of them only pay her homage in addition to serving other gods. Those whom she favors she gives the gift of dance or voice and any skill rolls they require will be granted anywhere from a +2 to a +4 bonus.

The Goddess of Language: She gave man voice and with it the ability to pass on knowledge and experience through language. She is often depicted working with Mestamilsa as a god of education and learning. Her priests automatically have the Positrait "Language Aptitude". Lower order priests can select two free language skills, mid order priests can have two additional skills while the higher order has two more plus the linguistics skill.

Gaskorathmichtx (gask-or-RAH-mi-tix)

("Gask;" Trickster, God of the Palmstone)

Gaskorathmichtx, or Gask as is he is known to his followers, is the god of thieves, and rogues. He is the god of trickery and jest and he is known for his symbol, "the Palmstone" As the lord of tricks, pranks and merriment, Gask is viewed as somewhat self serving and fun loving. In the lighter aspect, Gask has no love for the foulness of the evil gods, nor much for the stuffiness of the good gods. Instead Gask makes light and fun of all things. As such, Gask is a favorite diety to Bards, jesters, and people of similar persuasion. As the lord thieves, cutthroats and rogues, Gask is viewed as a dangerous, devious, vengeful man.

God of Trickery & Humor: In this aspect, Gask is seen as a thin person, be it male or female. Gask usually wears bright happy colors and is a very

"OMERIAN TALES: THE ALKAGHI PANTHEON"
(A MICROLITE 20 RULES SUPPLEMENT AND FANTASY CAMPAIGN)

extroverted person. He delights in making fun of the serious people and pokes fun at the establishment in general. Followers of this aspect gain one free skill having to do with music or entertainment.

God of Rogues Aspect: There are two sides to the rogue aspect. In the first, Gask is seen as a humble street urchin that steals from the rich to give to the poor. He doesn't steal out of malice or greed, but to spread the wealth to those that need it more. He is looked upon with an almost whimsical air about him. Temples dedicated to this aspect are hidden away, protected from the law enforcement elements of the local community. In the second, Gask is seen as a thug, a cutpurse or a common thief. He steals out of malice and greed, and is Trantrure's dark spy and principle assassin. Followers of this darker aspect have been known to place small palmstones in the mouths of their victims. There are rumors of particularly vehement followers of Gask the Rogue having notable abilities, such as the power to climb sheer walls, or to become invisible or inaudible at will.

God of Hate, Greed, and Jealousy: In this aspect, Gask is viewed as a thin, insatiably hateful and greedy man. He is never satisfied with what he has, always wanting more or better. He is the god that fosters hate among brothers and friends for material or philosophical reasons. He brings jealousy into the

hearts of lovers and greed into those that have and have not. It is not unusual for some people to pray to this aspect to cause injury, harm, or sorrow on others so that they might gain.

Croitia (kro-EE-sha)

(God of Storms, Finger of Fate, Fickle One)

Croitia is a god alone and unto himself. He is the brother of Foenseth, but he does not share her temperament. He lives in a cloud castle all to himself seeing only Yulta, Foenseth and Barkhat, the god of Craft. It is said that he has separated himself from the other gods because of what happened to his sister and that Trantrure was not given a more harsh punishment or slain by Semit outright. Because of this he has no love for the evil gods either and often wages his own silent war against them.

God of Storms: Croitia is a moody god, in this aspect given to fits of sullen silence to horrible rage. He has no followers, instead all people give offerings to him to appease his fickle temper and to placate his rage should it arise. There is no set sacrifice or offering, only what people see fit to give, and the hope that it will please him enough so that he won't destroy or damage anyone or anything.

God of Fate: As the god of fate, Croitia determines who has good fortune and who has bad fortune. It is this aspect that is neutral in his dealing with all men and gods. He has no followers and seldom if accepts offerings. He deals out fate to those that deserve it in his eyes.

Dorimor (DORE-i-more)

(God of Disease and Famine; Blighted One; Master of Rot; Pain Bringer)

Dorimor is the offspring of dark Enx and Witherithal, and as a result is the undisputed lord of plague, disease, and famine. Dorimor is most often depicted as a frail, diseased man wearing rotting clothes. He delights in bringing suffering and hardship on the followers of light and goodness. He often acts on his own, sometimes even thwarting the designs of his fellow evil gods.

God of Disease: Considered the "right-hand man" of Enx by his evil followers, Dorimor provides the lord of darkness with tortured souls. Dorimor is an asexual deity worshipped by many lesser species and tortured souls of the dark. A special sect of priests holds Dorimor as their high lord. Their temples are called "Pits" and the high priest is called a "Pit Master". It is rumored that one of the first abilities bestowed upon a Domorian is immunity to disease plus the ability to spread it. . . Some powerful followers can supposedly cause rot by a mere touch.

God of Pain: In this aspect he brings ultimate pain and suffering. It is said that he walks side by side with both Temis and Enx as they walk through the world of man. Sometimes he precedes their coming, sometimes he follows. There are few temples erected to this aspect, this does not have the following his other aspect possesses. But, some temples do exist. They try to work well with all the other dark gods, as

"OMERIAN TALES: THE ALKAGHI PANTHEON"
(A MICROLITE 20 RULES SUPPLEMENT AND FANTASY CAMPAIGN)

they believe there can not be true evil without pain. Followers of this aspect often receive the *Pain Resistance* Positrait at an early level. But this some have speculated that this might be due to the fact that the priests inflict self torture as a means of showing devotion to their god. In any event this aspect rewards his loyal followers with pain causing or preventing abilities as they gain in rank and status. There are several different symbols carried by the followers of this aspect, the most common being a jesters "crying mask" broken in half or a dagger with three jagged blades (this can also be used as a weapon, but it is extremely difficult to use to do is awkward design).

Trantrure (TRANT-rur)

(God of Evil; The Overlord of the Dark; The Dark Prince, Dark Lord, etc.)

Trantrure is evil in the truest sense of the word. An extremely intelligent and powerful deity, he is surprisingly free of the impatience which foils the plans of other evil schemers. He is content to slowly gather his forces and attack when the time is ripe. It is rumored that the Kingdom of Adlbore, located north of the Sea of Reeds is a monotheistic culture devoted to Trantrure. In conography, he is seen as a powerful figure, with black hair and eyes like glowing, red embers. Both of his aspects carry the same unholy symbol, a black fist.

The Overlord of Evil: Trantrure is the evil mastermind and the lord and ruler of the dark lords. His temples are ornate and rich. His priests are powerful and fearsome. As the lord of evil he preaches patience and power to his followers. High priests are rewarded for their careful plans and schemes that come to fruition. He rewards success and punishes failure. His priests are rewarded with a plethora of powers, far to numerable to mention here.

God of Lust and Power: In this aspect Trantrure is the god of rape, lust and the desire for power. He is a god who will take what he wants or needs because he has the power to do so. Those that lust for flesh, money or power pay homage to this god and offer his sacrifices at personal altars. Because of the personal nature of this aspect (and due to the individualistic nature) there are no temples erected and no priests ordained. There are reports of powerfil individual's touched by this aspect, wielding great abilities and influence.

Witherithal (WITH-er-i-THAL)

(Goddess of Decay and Entropy; The Dark Lady; Lady Trant; Destroyer)

Witherithal is the consort of Trantrure, and dreaded enemy of Yulta. She has a much smaller devotional base than either Trantrure or Enx, but she reputedly imbues her followers with the ability to use both preiely and wizardly power. Some priesthoods of her order find it difficult to recruit followers because she is such as shadowy and quite figure. She is hauntingly beautiful and has the ability to change he appearance from awe inspiring to horrific.

Goddess of Decay and Entropy: As the goddess of entropy Witherithal has power over the decay of all

material things. She is in direct conflict with Barkhat and Yulta in this regard. She seeks to destroy all that is made. She is patient and cunning, like her main consort Trantrure. Followers of her order develop all sorts of arcane powers. Some priests have been known to possess the ability to cause objects to crumble to dust and some have even whispered to have the power to cause death with a touch.

Goddess of Dark Knowledge: In this aspect The Dark Lady is seen as the master of the mystical arts and the teacher or arcane secrets. This aspect works hand in hand with many of the other god of evil as it benefits her and her followers to know and do. This aspect is called upon by other dark gods for divination and wisdom on how to defeat the gods of light. Followers of this aspect build temples with many hidden rooms and or underground catacombs that they use to hold dark rituals or store objects of power and wealth. Priests of this aspect, just like the priests of her other aspect, gain arcane powers as they increase in rank and status in her order. He symbol is a gold crescent moon on a black book.

Temis (TEH-mis)

(God of Strife; The All-Killer; The Iron Hand)

Temis is the twin brother of Semit, representing the evil side of the same ethos. Temis is war for war's sake only. There is no inherent nobility in Temis-sponsored struggles--only carnage, the rise to power and control over others. Temis' followers are usually warlike peoples, including such heinous groups as the

"OMERIAN TALES: THE ALKAGHI PANTHEON"
(A MICROLITE 20 RULES SUPPLEMENT AND FANTASY CAMPAIGN)

Silent Rippers and Spectral Hand. The nation of Malforia, far to the east, holds Temis as their chief god, replacing even Trantrure as the head of the dark ones. He openly wars against his twin brother Semit. His symbol, carried loyally by all his followers, is a red eye over a black sword (tip pointing upward).

God of War, Battle and Struggle: War, the struggle for total control over a peoples through the use of force and power, that is what Temis represents. He is the ultimate warrior, big, fast, strong, tough and fearsome. He wages war so that he may cull away the weak and the old. He wars solely for control and power. War is a contest and he and his followers don't like to lose. There are almost as many temples erected to Temis as there are erected to Trantrure. His loyal subjects receive some gifts, all in the realm that make them better warriors.

Murdt (MURT)

(God of Monsters, God of Terror, The Fearful one)

Murdt is the warped and twisted offspring of Trantrure and Witherithal. He is formless, a black inky cloud of evil. His followers include both human and non-human beings. His symbol is a black flag or cloth with two red eyes at the center. There are no known temples erected to this god but he does have followers among many evil or avaracious creatures.

God of Monsters: Murdt was believed to have "birthed" the first monster after a fierce battle with his principle opponent, Barkhat. His blood is said to have mingled with the earth and formed the first of the dark creatures to roam the world. Murdt is said to create and experiment with new creatures to torment and plague the inhabitants of the world. This aspect has no temples, or priests, but there are some that gain wisdom and guidance through him on how to construct new terrors.

God of Terror: In this aspect he is seen as all that is wrathful, hated, feared and loathed. It (since no one knows if it even has a gender) can assume any form and bring paralyzing fear to whatever sees it. He wages a private war with Barkhat to destroy hope and creativity, while Barkhat opposes him in his every move. Followers of this aspect can gain the ability to cause fear or to become immune to fear. The more powerful the followers, the more powers they possess and the greater the power becomes.

"OMERIAN TALES: THE ALKAGHI PANTHEON"
(A MICROLITE 20 RULES SUPPLEMENT AND FANTASY CAMPAIGN)

Ancient Languages

Here are ancient languages the characters might encounter in their travels:

Rahndoon: A language is found almost exclusively on scrolls and carvings dating back to antiquity. It is ascribed to a group of people called "The Lomarii," about which little is currently known.

Varda: An ancient tongue, dating back to what is now known as the Baldren Empire. Settlers report that some of the indigenous tribes of the New World speak a variant of this tongue.

Introduction

Welcome to the Beacon fantasy role-playing system.

Beacon started out with my desire to build a fast and fun fantasy RPG that I could play with my kids *and* my friends. In the past I played my share of RPGs and had made my share of house rules, however on returning to the hobby I wanted to simplify things. Keep the game fast and fun like it was in the olden times. I latched onto Microlite d20 for its clean and simple rules, but also for its basic compatibility with the large amount of material published for d20 systems such as 3rd edition Dungeons and Dragons. Microlite was great... but I wanted a little more under the hood.

Why call it Beacon? Well, I knew that another "Swine-men & Scimitars" wasn't going to cut it. I considered a d20 system style name or adding an M20 to something; say "Micro Pillager" or "Caverns M20", but I didn't want it to appear to be a programming language. I also wanted to invoke the feel of something 'lite', but not *micro*-lite.

Lite... Light. Hmmm, maybe "Light Quest" or "Light Spell". Maybe "Torch Bearer" (yuck). Maybe Beacon? Yea... Beacon. A shining light in the dark. A warning of trouble. I liked that a lot.

As a bonus, when I looked up Beacon, seeking existing references, there was an awesome black and white illustration called *Vardetenning* by Karl Dahl which depicted northern style warriors lighting up a beacon, *AND* the image was in the public domain! Wow. That name and that image seemed to really sum up what I thought the feel of this system should be. I think was a sign that the RPG gods were smiling on me.

What's different?

Beacon has its origins in Microlite d20 and shares some features of that system, namely;

- Magic based on a hit point based system.
- Simple and fast combat system.
- Streamlined stats and character classes.

- A simple but effective skill system that allows the players and GM to base results on how a task is described.

In addition Beacon has its own spin on things such as:

- Simple but robust class advancement;
- Spells modified for point based casting;
- A simple phased combat system;
- A critical hit/fumble mechanic for magic and combat;
- Streamlined monster statistics.
- A silver based money standard; and
- Druids are magic users and not clerics!

About D20

Beacon is a D20 based system and that means it is based on a common dice mechanism for action resolution. In short when an action requires an outcome, the player or GM will roll a 20 sided die and compare that number against a Difficulty Class number or **DC**. If the roll is equal to or higher than the **DC** value then the action succeeds – otherwise it fails. It's customary for a natural 1 (5%) to always fail and a natural 20 (5%) to always succeed. There are a lot of rules and situations that will modify the **DC** higher or lower or add modifiers to change the Player's roll, but the basic principle is always Dice Roll \geq **DC** for a success.

DC TABLE

Task is:	DC Target
A simple/easy action	DC 5
Normal difficulty	DC 10
Difficult	DC 15
Hard	DC 20
Very hard	DC 25
Fantastic or Heroic	DC 30+
Modifiers	
A favorable condition	-2
An unfavorable condition	+2

Thus climbing 5' up a rope would be **DC 5**, while climbing 20' would be **DC 10** and in a wind storm would be **DC 12**, and if the rope was coated in grease would be **DC 20**...

Characters

To make a new character roll Stats, select a Race and a Class and assign your starting skills.

Stats

There are 4 statistics, or *stats*, that describe a character's inherent traits and which do not change except through exceptional means (e.g. magic):

Strength, (STR): a character's ability to lift heavy objects, to endure pain, and to resist fatigue or disease.

Dexterity, (DEX): representing quickness of action, precision, fine motor skills, and/or surefootedness.

Mind, (MIND): the mental acuity of a character and their natural ability withstand confusion and to learn or reason.

Charisma, (CHA): a measure of personality, drive, animal magnetism, social ability and/or leadership.

To determine each character stat, roll three six sided dice (3d6) and total the result. Then apply any racial bonuses. This is old-school.

If players wish to create more "heroic" characters, have them roll 4d6, drop the lowest dice and total the remainder for each stat. If players desire to obtain a specific class of character, have them instead roll 3d6 as normal to generate their stats and then swap one of the stat numbers with another to obtain more optimal results for that class. Let them know this is not old-school but it's still O.K.

Each character stat provides a bonus which is used in conjunction with a *Skill* or other action modifiers to determine character performance.

Stat bonus = (STAT-10)/2, round down.

Skills

Skills represent a character's interests, abilities and effort in six distinct spheres. Unlike stats, skills are not rolled but start at 0 unless otherwise stated, however they can be improved with experience.

Physical skill represents a character's trained stamina, practiced body skills such as acrobatics and other maneuvers, or a tolerance for poisons and pain.

Subterfuge represents the ability to deceive or perform sneaky tasks. It is called on to test when a character wishes to hide or move without being noticed or open locks without a key. It also stands in when performing or understanding scams and swindles.

Knowledge represents study and memory. It can represent knowledge of facts but also mental training and concentration techniques.

Communication represents the ability to understand meaning, body language, and empathy. It also represents a knack for noticing details.

Survival represents the ability to interact with the natural world as well as the self, utilizing intuition or instinct, it can also represent that elusive spark of life.

Fabrication represents the ability to create, to make items or convincing stories. It also represents mechanical aptitude for building things or disabling traps.

When characters perform actions in game where there is a reasonable chance of failure, those actions are described by the player and the GM will determine which combination of skill and stat bonuses should be added to a d20 roll to determine if the action succeeds. This is called a Skill check

Skill check = d20 + skill + stat bonus + any situation modifiers >= DC

For example, forcing a door might use *Physical* + **STR** bonus, but crossing a narrow log bridge

might be *Physical* + **DEX** bonus. Finding a trap through informed searching might utilize *Subterfuge* + **MIND** bonus but disabling it's mechanism with small delicate tools might require *Fabrication* + **DEX** bonus. Tracking prey could be *Survival* + **MIND** bonus, while convincing a wood sprite to assist the party might call for *Survival* + **CHA** bonus.

Note that there are no "saving throws" in Beacon, when a reactive 'save' needs to be done just use an appropriate skill check such as *physical* + **STR** for fortitude or *physical* + **DEX** bonus for reflex type saves. Other reactive skill checks might include resisting magic (*Knowledge* + **MIND** bonus) or illusions (*Subterfuge* + **MIND** bonus) or even fear (*Survival* + **CHA**) or surprise (*Communication* + **MIND** bonus).

Characters can also work together to make a skill check if the situation makes sense. An assisting character can add either their skill *or* their stat bonus to the roll as determined by the situation. For each character assisting subtract one point for inefficiency. As always GM discretion is advised.

Races

The races that you use should be designed to fit the setting and story you wish to tell. Remember not to make one race too wonderful or to marginalize a race unless it fits with the story or theme you want. Here are outlines for some common fantasy races:

Dwarves

Shorter and stouter than humans, dwarves have a high muscle density and thus cannot swim or float. They may have improved dark sight or direction finding. Dwarves use d8 for Hit Dice and start with 8 **HP** and get +2 **STR** and 1 point in *Fabrication* which represents their skill as craftsmen.

Elves

Usually uncommon, elves are long lived and often nocturnal. Elves have excellent night vision and are immune to charm or sleep effects. Elves use **d6** for Hit Dice and start with 6 **HP**, +1 **MIND**, +1

CHA, 1 point in *Survival* and 1 point in *Knowledge*.

Halflings

The little people in your campaign, be they hobbits, gnomes or even goblins. This race is small, nimble and quick and receives a natural +1 to their armour class (AC). They use a **d6** for Hit dice and get 6 **HP** to start as well as +2 **DEX** and 1 point in *Subterfuge* and 1 point in any other chosen skill.

Humans

Generally the most common race, humans come in many cultural and physical variations. They use **d8** for Hit Dice and start with 8 **HP**. Humans are very adaptable and so choose four skills in which they can start off with 1 point to represent this

Something else?

If your campaign world needs some other race then go for it. Assign the race a Hit Die (see examples listed in the monster section) and start them out with max **HP** based on that. Then give them the appropriate skills and/or stat adjustments and any special abilities. Be very careful not to make these characters too powerful or too weak unless you have a plan to deal with it.

Classes

In addition to a race, players must choose a class for their character. The class determines how characters will progress in Skill development as they gain levels and any special abilities they receive such a special attack or the types of spells they can use. Class should not affect how a character acts or chooses to use their skills – both a fighter and a rogue may try to pick a lock or open a door; their success will be determined by how they describe the attempt and resolved using their skills and stats.

The Cleric

Clerics are characters able to sense and channel the spiritual powers of higher beings. They cast *Divine* spells and start with 3 points in the *Communication skill*. They get +1 to *Communication* every 4 levels (4, 8, 12). Their **Attack Bonus** increases by +1 every second level.

The Druid

Druids are mages who specialize in the study of the forces of the natural world. They cast Druid spells (*Arcane*) and start with 1 point in *Knowledge* and 2 in the *Survival* skill. They get +1 to either *Knowledge* or *Survival* every 4 levels (4, 8, 12). They gain +1 to their **Attack Bonus** every third level.

The Enchanter

Enchanters are mages who specialize in mental disruption and trickery. They can cast Enchanter (*Arcane*) spells and start with 1 point in *Communication* and 2 points in *Subterfuge*. They get +1 to either *Communication* or *Subterfuge* every 4 levels (4, 8, 12). They gain +1 to their **Attack Bonus** every third level.

The Fighter

Fighters are characters who specialize in combat and physical prowess. They start with 3 points in the *Physical* skill and add +1 to all attack and damage rolls. Their **Attack Bonus** increases by +1 every level and they also get +1 on their **HP** roll when they gain a level. Fighters gain +1 to their *Physical* skill and a +1 damage bonus every three levels (so at 3, 6, 9, 12).

The Mage

Mages study magical forces and are specialists in research and history. They can cast *Arcane* spells, and start with 3 points in the *Knowledge* skill. They get +1 to *Knowledge* every 4 levels (4, 8, 12). Their **Attack Bonus** increases by +1 every third level.

The Rogue

Rogues specialize in stealth and cunning. They start with 3 points to allocate between the *Subterfuge* and *Survival* skills. They may allocate an additional point to one of these skills every 3 levels (3, 6, 9, 12). Their **Attack Bonus** increases by +1 every second level. Rogues can choose to use **DEX** instead of **STR** as the bonus attribute when using *light weapons* in melee combat.

In combat a Rogue may attempt to perform a 'surprise attack' by rolling two d20 for their initial attack. If one die roll is successful then they succeed in their attack as normal, but if the second

is also successful, they may either add their *Subterfuge* skill to the damage of their melee attack or perform an additional strike with a ranged weapon (provided they have an additional one available).

The Savant

Savants are characters who have chosen to pursue skills rather than magic or combat. They start with 4 points to allocate to *at least two* skills as they desire. They also allocate an additional skill point to a chosen skill every second level (2, 4, 6, 8...). Their **Attack Bonus** increases by +1 every second level. Because of this, a Savant can play many different adventuring roles such as professional scholars, expert trackers, travelling acrobats and/or scheming merchants.

Character Levels & XP

Starting out

Characters just starting out begin at Level 1 with 0 experience (**XP**) and 2d6 x 10 silver pennies. This is farmhand or apprentice level play. If you wish to have characters start out a little more robust you can start them out at level 3 (veterans) or higher (heroes) by giving them the level advancements below and add 1d6 gold for each level (they drank the rest or gave it to their mom).

Level Advancements

In addition to their special class advancements, each level a character gains adds:

- Roll an additional Hit Die and add to Hit Points;
- +1 to any chosen skill.

Gaining Levels

Add up the **XP** of every encounter you take part in. When a characters total **XP** = 1000 times your current level, you've advanced to the next level. Reset the total to 0 after advancing (yes, yes, if it's not exact carry over the remaining **XP**) so you are always counting up to the next level.

The amount of **XP** given for combat in a scenario should be roughly (10 x **HD** Type) x **HD** level of defeated monsters or 100 x the encounter level (**EL**) of traps or situations. **XP** should also be

granted for any role playing or character advancement at the discretion of the DM.

Example:

Two 1st level adventurers have just completed a dungeon adventure, and defeated 12 goblins (1 **d6** or 60xp ea.), 6 hobgoblins (2 **d6** or 120xp ea.), two **EL2** traps (200xp ea.) and a bugbear (3 **d8** or 240xp). That's a total of 2080xp or 1040xp each, so they will advance to level 2. They'll each need another 1960xp to reach Level 3.

The way you hand out **XP** will likely impact the way your game evolves. Focus on combat and the players will learn to seek it out. Hand out generous **XP** rewards for completing quests and personal goals and they will start seeking those. Some good ideas are to give **XP** points for players choosing actions that are detrimental but appropriate for their character, or having players tell stories about their character's past. Reward the kind of play you want to see.

However, try not to be arbitrary in rewarding **XP** as this may seem to the players that they are pawns in some twisted game. In order to avoid this realization, announce the sort of **XP** rewards you will give for these types of quests or character development moments early on, and stick to these numbers.

Treasure & XP

An additional method of gaining **XP** is giving **XP** for treasure spent. Consider allowing players to gain **XP** at a rate of 1sp for 1 **XP**. This rewards more approaches to acquiring treasure in novel ways than just combat and is a good way to remove excess wealth from the game. This money should be considered life experience or 'training costs' and an associated period of time in a town 'to train and do research'* is implied when it is spent. Tying this spending to a time period also avoids abusive situations such as characters leveling up in a dungeon treasure room or having a rogue breaking into a bank, handing the cash over to a hobo and walking out of town a level higher. The money must also be expended or properly tithed specifically for the purposes of **XP**; characters cannot simply buy items or throw the money into a ditch or set up an **XP** Ponzi scheme. Remember to have this money cause in game repercussions like local inflation, crime and political attention. The GM might also decide to place limits on the amount of **XP** rewarded this way. Gaining multiple levels at once should not be allowed. Naturally, the sp:xp ratio should be adjusted in a campaign depending on the setting and availability of treasure.

**or draw up a carousing table.*

SKILL PROGRESSION BY CLASS

Class - Skill	Starts with	+1 at Level
Cleric - Communication	3 Communication	4/8/12
Druid - Knowledge or Survival	1 Knowledge, 2 Survival	4/8/12
Enchanter - Knowledge or Subterfuge	1 Knowledge, 2 Subterfuge	4/8/12
Fighter - Physical	3 Physical	3/6/9/12
Mage - Knowledge	3 Knowledge	4/8/12
Rogue - Subterfuge or Survival	3 between Subterfuge and Survival	3/6/9/12
Savant - Any Skill	4 in any two skills	2/4/6/8/10/12

ATTACK BONUS PROGRESSION BY CLASS

	L1	L2	L3	L4	L5	L6	L7	L8	L9	L10	L11	L12

Savant	0	+1	+1	+2	+2	+3	+3	+4	+4	+5*	+5	+6

*Indicates an additional attack gained

Combat

Hit Points

Hit Points (**HP**) are a measure of the character's life force, luck, energy and/or fatigue, and are used by players to avoid having their characters take actual damage. When a character is in a situation where they are going to take damage (from a weapon hit or any other non-specific damage) they can choose to instead spend **HP** to avoid taking some or all of that damage. **HP** can reduce the damage taken on a point for point basis. Some damage cannot be avoided this way - for example poisons or spells and effects that target specific stats directly cannot be soaked with **HP**. As **HP** are recovered much faster than damage, using **HP** to avoid damage is usually a good idea. However there are some considerations that might cause a player to not want to spend **HP**.

- Players with less **HP** than their current level are fatigued and have -1 to all reaction rolls and can only move half their normal speed.
- If a character's **HP** reaches 0, they are unconscious and unable to stay awake if roused.

Hit Points are restored fully after a solid rest, usually 6-8 hours of uninterrupted sleep and meditation in comfortable surroundings. **HP** recovery in other conditions should be determined by the circumstances. For example, a character trying to rest in a cold dank cave or while hiding in a forest with no shelter may gain back only half their expended **HP** while a character lodging in an expensive inn with a soft bed, a hot meal and a bath, would only require 5 hours rest for full recovery. If the GM desires, partial recovery for shorter 'rests' can be allowed, but should not exceed 2-3 **HP** per hour.

Damage

Damage is applied against a character's stat values, usually **STR** (which represents physical damage).

Characters with any stat that has fallen to 0 are in an unresponsive coma and if a character's **STR** reaches 0, they are dead.

Stat damage can be recovered at the rate of 1 per day per point below the character's natural score (unmodified by magic). A player recovering 1 **STR** point in damage could recover it in one day, while a player recovering 3 **STR** below their natural total would take 3+2+1 or 6 days to recover their full **STR** back. This rate can be sped or hindered by the quality of rest and care (say, if they were to be under care of a healing order or in a hospital healing could be twice as fast or more) at the GM's discretion.

Stat damage can be recovered in parallel; characters can regain points in **STR**, **DEX**, **MIND** and **CHA** at appropriate rates concurrently during the same convalescence period.

Also note that even after it has been fully recovered significant amounts of damage should leave the character with some scars, be they physical or mental.

The Combat Turn

Turns

A *turn* is the amount of time it takes for the players and their opponents to complete a basic round of actions in a tense or combat situation. This time is somewhere around 1 minute, however may be much quicker or a little longer depending on the situation.

Surprise

If a group is surprised they will not get to act during the first turn of combat, but their opponents will. Surprise can be determined by rolling 1 or 2 on a d6. That roll can be modified or even dispensed with outright if it makes sense in the situation. A party arguing with each other in a dark passage or one that forgets to post a night watch is a prime candidate to be surprised. Conversely, a careful and watchful group might only be surprised on a 1, or not at all.

Initiative

Initiative is a determination of who acts when in a combat situation. The GM decides how many distinct groups, or sides, are participating in the combat and then determines their initiative order at the start of each turn of combat. Initiative is rolled on a d6, and the order is highest to lowest.

Combat Phases

A combat turn is made up of two combat phases, *ranged phase* and *melee phase*. Each actor on each side can do *one of the following in each phase* in their initiative order:

Missile Phase:

- Declare preparing to cast a spell
- Missile attack(s)
- Move
- Ready a heavy weapon
- Reload, change out or recover a weapon
- Other action, e.g. grab item, close door, etc...

Melee Phase:

- Cast or Counter a spell
- Melee attacks(s)
- Move
- Ready a heavy weapon
- Reload, change out or recover a weapon
- Other action, e.g. grab item, close door, etc...

Example:

Two groups meet, each consisting of a mage, a rogue and a fighter. The GM determines there is no surprise and we will assume they had their weapons all out and were ready for combat.

Round 1: Group A wins initiative.

Ranged Phase:

1. Rogue A fires two arrows at Fighter B (misses, hits);
2. Mage A declares she's casting a spell;
3. Fighter A closes with Rogue B;
4. Mage B declares he's casting a spell;
5. Rogue B throws 2 daggers at Mage A (miss, miss); and
6. Fighter B closes with Fighter A.

Melee phase:

1. Fighter A attacks Rogue B (hit);
2. Mage A does counter spell but fails;
3. Fighter B attacks Fighter A (hit);
4. Mage B's declares he's casting Web and succeeds, tangling up Fighter A.
5. Rogue B switches to short sword.

And so on.

Movement

Humanoid creatures generally move at a rate up to 60 ft. per move action, or 120' per turn if taking two moves. Non-humanoid creatures adjust as required. When unencumbered and solely running, most creatures can move at triple this rate, or 60/120 *yards* per turn. Unencumbered, in this case, meaning no weighty armour (**minSTR** > 10) or heavy pack and dropping any large held items.

If using miniatures a good combat scale is 1" = 5 ft.

Attacking

To hit, add the character's attack bonus and the appropriate stat bonus to a d20 roll. If the result is higher than your opponent's Armour Class (AC) then it's a hit.

Melee attack = STR (or DEX bonus) + attack bonus >= Target AC

Missile attack = DEX bonus + attack bonus >= Target AC

The Attack Bonus & Additional Attacks

The Attack bonus is the number that represents a character's class based attacking skill and any intrinsic weapon or magical modifiers. If the characters total attack bonus is +5 or more a second attack can be made with a -5 penalty. If the total bonus is +10 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2. Stat bonuses and any situational or environmental bonuses to an attack are not considered part of the attack bonus.

Critical Hits

A natural 20 automatically hits, a natural 1 is automatically a fumble. Check the appropriate Critical hit/Fumble tables to resolve effects (or make up something appropriate).

Unarmed Combat

Punching/hitting is a Melee attack where the damage is 1 + **STR** bonus. Using hand weights such as a piece of iron or brass knuckles would do 2 + **STR** bonus as would most improvised weapons like chairs or branches. The **STR** bonus would not apply to improvised thrown items (things like torches or rocks).

Grappling/holding/throwing is a Melee attack where the **DC** is equal to either 10 or defender's **HP** – (attacker's **STR** + physical skill), whichever is greater. If the attacker is successful the defender is either held or thrown and damage is 1 + **STR** bonus. The same rules apply to break a hold on the defender's turn with the roles reversed. A held opponent that is still struggling is -6 **AC** if attacked.

Engagement

Once engaged, leaving combat or attempting to attack a different opponent without also attacking the current one will grant that opponent a free attack. A fleeing opponent is considered to be surprised (-2 **AC**) if attacked.

Defense

Attack rolls are rolled against a special form of **DC** called the target's Armour Class which is an abstraction of how hard it is to get past the target's defenses.

AC = 10 + DEX bonus + armour bonus.

If a character/creature is targeted by multiple assailants in one round, their **AC** is -1/attack for each assailant beyond the 1st.

Armour

Armour also has a Minimum Strength (**minSTR**) requirement representing how bulky and heavy it is to wear. The **minSTR** value for armor can affect the character's effective **DEX**, depending

on their strength. The formula is: **DEX** = (**STR** - **minSTR**) or **DEX**, whichever is lower.

Example: A character has **STR** of 12, and is using full plate which has a **minSTR** requirement of 15; their **DEX** is reduced by 3. That means they may be easier to hit than they should be for that armour type since their **DEX** bonus may go down and they may also have a harder time shooting a bow, jumping a stream or climbing walls. Fortunately however, they now receive an **AC** bonus of +8 against all physical attacks.

Armour also makes arcane casters incur additional fatigue when casting spells. Wearing armour will add the armour **AC** bonus to the **HP** cost per spell. For example a mage wearing leather armour (+2 **AC**) every spell they cast would cost 2 additional **HP**. Ouch.

Shields

Shields grant an **AC** bonus based on their size. Because shields constrain an arm, it is impossible to cast arcane spells with a shield equipped. Another important aspect of shields is that they can be splintered or sundered. A character may choose to take the damage of an attack on the shield and have the shield destroyed instead of taking the damage themselves.

Blocking

Instead of attacking in a turn, a character may try to block an attack. When blocking, apply a character's **STR** bonus + Shield bonus to their **AC**. A *block* can only happen if you have a shield or a suitable melee weapon equipped (primary or an offhand weapon) and you are actively blocking.

Weapons

Damage

All *Light Weapons* do base 1d6 damage and all *Heavy Weapons* do base 1d8 damage. Two handed melee weapons do an additional +1 damage when used with both hands. Strength also figures heavily on melee weapon damage. Add half **STR** bonus (round down) to melee damage and full **STR** bonus for 2 handed weapons wielded with 2 hands.

Minimum Strength

Light Weapons have a minimum strength (**minSTR**) requirement of 6 and *Heavy Weapons* have one of 12.

For each point of **STR** below the weapon's minimum strength requirement there is a -1 penalty for attacks made with it.

Wielding a 2 handed weapon with one hand adds +3 to its **minSTR** requirement and you only receive half the **STR** damage bonus since you are not using two hands. When wielding two weapons the character must average together the strength requirement of *both* weapons and add 6 (**minSTR**+**minSTR**/2)+6 to calculate a melee penalty.

For example Gummer the dwarf has a **STR** of 16 and wants to duel wield a battle ax and a heavy pick. The **minSTR** for these two weapons is (24/2)+6, or 18 so Gummer would have a -2 penalty. However if he wanted to dual wield two dwarven axes (with a +3 requirement for one handed use) the formula would be ((15+15)/2)+6 or **minSTR** 21 and he would have a melee penalty of -5 (and he'd lose half the **STR** based damage bonus).

Pole arms

Pole arm weapons allow attacks on non-adjacent targets (5 - 10 feet away). However, with the exception of the short spear, pole arm weapons suffer a -4 penalty when used at point blank range. All pole arm type weapons (glaive-gisarme, halberd, lance, spear and pike) get a free attack in any phase when readied against an onrushing attacker.

Readying Weapons

Light weapons do not need time to be prepared or made ready before use. Heavy weapons do need to be readied and this takes one combat phase.

Dual Weapons

Characters can simultaneously wield two one-handed weapons and gain an additional attack in a round *if they take a -2 penalty on all attack rolls that round*. The offhand weapon can also be used for blocking and defending, giving +1 AC bonus. Characters can decide *each round* if they will defend or attack with the offhand weapon,

however using an offhand weapon to defend will still incur the -2 penalty to hit with the main weapon. If the character has additional attacks beyond this initial extra attack, they can choose which weapon to deploy for each additional attack.

Arcane magic users who duel wield cannot cast arcane spells without at least one hand free.

Range & Terrain

Range and terrain both have an effect on combat. Weapons that do combat at range come in two types, projectiles and projectile throwers. Projectiles are things like daggers, rocks and throwing hammers. Projectile throwers are things that use other things as a projectile like bows, and slings. The weapon stats will include a range increment and for each range increment there is a -2 penalty on the attack roll. Projectiles can be used at up to five range increments distance while projectile throwers can be used on targets up to ten range increments away. For example a dagger, with range of 10 ft. can be thrown at a target 30 feet away with a -4 penalty.

COMBAT MODIFIERS

Situation	Modifier
Attack Modifiers (to hit)	
Blinded	-6
High Ground	+1
Fatigued, dazzled, distracted	-1
Encumbered, poor footing	-1
Mounted (melee)*	-1
Mounted (ranged)	-2
Ranged attack	-2/increment
Defense Modifiers (AC)	
Held (struggling)	-6
Full Cover	+4
Partial Cover	+2
Fatigued, dazzled, distracted	-1
Poor footing, encumbered	-1
Surprised	-2
# of attackers > 1	-x
Blocking	+STR bonus

*High ground may apply against non-mounted targets

Magic

There are two types of Magic available for spell casting; Arcane magic and Divine magic.

Arcane magic comes from using natural forces and deep study and requires the use of gestures and incantations. Arcane magic must be learned on a per spell basis and can be made into scrolls readable by its practitioners. To learn new spells the caster must write the spell into their “spell book”, aka their collection of spells so they can refresh their knowledge of it – they must frequently study their spell books in order to reacquire the spells in them. A caster can only cast spells he has studied in the last few weeks so the loss of spell books is a large concern.

Arcane magic requires the caster be audible and mobile, and have at least one arm free for gesturing, and so is greatly affected by the use of armour and shields.

Divine magic is based on channeling the power of spirits and gods through concentration and rituals. All the spells available to casters of divine magic are known to the caster and divine spells cannot be written to scrolls. Divine magic requires concentration but no physical or audible requirements unless specifically stated, so divine casters can usually cast spells even while bound or silenced. Divine magic is not affected by the casters use of armour and shields.

Both types of magic require the expenditure of physical energy and this energy cannot be replenished through normal healing. Spells, items and potions which replenish hit points generally *do not* replenish hit points used by spell casting unless it's specifically stated that they do.

Spell listings for the Beacon style of play are provided at the end of this document and are listed by type and level. Naturally GMs have the option of using any spell lists they like, the standard Microlite d20 lists or any D20 spells from supplements or the SRD should also work well.

Casting

Spell casters can cast any spell with a spell level to equal or below $\frac{1}{2}$ their class level, rounded up.

Arcane casters at level 1 start out knowing 5 0-level spells and 3 1st level spells. More spells can be gleaned from scrolls, spell books or teachers.

Spell Level	HP Cost	Cast at level
0	1	-
1	3	1
2	5	3
3	7	5
4	9	7
5	11	9
6	13	11

Casting spells costs energy in the form of Hit Points. The cost is 1 + double the level of the spell being cast. This loss cannot be healed normally but is recovered fully after 8 hours of comfortable rest. See rules for regaining **HP**.

There is no need to memorize spells in advance; casters can cast any spell that they have learned and have enough **HP** to cast.

Casting a spell is not an automatic success; spell casting requires a roll against a Difficulty Class (**DC**) of $10 + 1 \text{ per spell level}$. In addition spells can use the rules for critical hits.

Magic Attack = MIND bonus + caster level >= DC + spell level

For spells that require a physical hit on an opponent, roll instead the Magic attack bonus vs. the targets **AC** (shields may or may not apply).

For spells that allow a save the target must match the Difficulty Class (**DC**) of $15 + \text{Caster Level}$.

Disrupting spells

Interference

Spells take time to prepare and cast, and a lot can happen in that time. If a caster has prepared a spell, but is distracted or attacked before they get a chance to cast it the **DC** is increased for the casting roll. Being distracted sets base to difficult

(**DC** 15) while being attacked would set it to hard (**DC** 20) or possibly even higher if for example, a caster was knocked down some stairs or tossed out a window.

Counter Spell

Arcane spell casters have the ability to disrupt other arcane casters by attempting to counter their spells. Arcane casters can attempt to counter any type of arcane spell, however get a -1 penalty when countering spells from other schools. For resource purposes, Counter Spell is considered a cantrip or level 0 spell.

In order to succeed, the countering caster must roll a magic attack at a **DC** 20 + (the initial caster's level). Before rolling they may choose to use their magical energy (in the form of **HP**) to improve their chances of success: for each **HP** invested by doing so, this save roll gains +1 bonus. This loss of **HP** is only healed by resting, as per normal magic rules.

Example: a 3rd level mage and a 1st level mage face each other on a magic duel. The 3rd level mage casts a Magic Missile. The 1st level mage needs a **DC** 23 to counter it. Before the roll, the target decides to invest 3 **HP**, receiving a +3 bonus on his roll. If he's successful, the magic is countered and fizzles.

Potions

Divine Magic spells can be made into potions. The potion must be of a spell known to the caster and it must be created in a well stocked alchemist laboratory. It takes a day per spell level to prepare the ingredients. Once the potion is finished it requires an **HP** expenditure of 5x the spell cost to infuse the potion with the magic. Potions are applied topically or ingested as appropriate. Suggested ingredients for potions are rare and expensive monster parts, precious stones or herbs. Costs should average 100gp/spell level.

Spell books & Scrolls

Arcane magic, being the magic of symbols, can be transcribed into spell books or made into scrolls.

Scrolls can be cast through use of a Read Magic spell. Scrolls disintegrate once they are cast, but can be transcribed without activating their spell. Generally the type of spell (and other errata) is indicated on the scroll allowing it to be determined prior to casting- but this does not always have to be the case. Arcane casters can only create scrolls of known spells from their own school of magic, but they can with difficulty activate scrolls for spells they do not know or even from other magic schools. Casting an unknown spell or spell of a higher level than the caster is familiar with will add +1/level to cast, and to properly cast a scroll from a different school of magic adds a base **DC** modifier of +5.

Costs and time for transcribing spells AND for writing scrolls should be comparable with the costs of potions (100gp/day and 1day per spell level). The transcriber must have a high enough level to cast the spell in order to create a scroll or copy it to their spell book. In addition to the writing requirements, to make a scroll capable of being cast as a magic spell (as opposed to being written into a spell book) requires the caster to invest magical energy into it at a cost of 5x the **HP** of the original spell.

Magic items

Permanent magical items in Beacon should be fairly rare or unusual objects and not the sort of thing found for sale in 'magic shops' or by NPCs except for very rare cases (or by accident!). If you are running adventures written for other systems you may find you need to drastically reduce the amount or the power of magic items described in the adventure to fit with the balance of Beacon.

Examples of magic items might be:

- An iron tipped spear that always points to the nearest elf when spun in a circle
- A black tallow candle that makes the holder invisible as long as it is lit.
- A hand axe that returns to the owners hand when thrown, but will always miss when used as a melee weapon.

Other Hazards

Falling Damage

A falling character takes 1d6 damage per 10 feet fallen. If the character makes a successful *phys*+**DEX** roll, he takes only half damage. The **DC** for the *phys*+**DEX** roll is equal to the depth fallen in feet.

In the event that the fall ends in an area laden with spikes or jagged rocks, add +1 damage to falling damage per 10' fallen (with a maximum of +10).

Extreme Heat & Cold

If not wearing suitable protection, *Phys*+**STR** save once every 10 turns (**DC** 15, +1 per previous check), taking 1d6 damage on each failed save.

Disease

Diseases have various symptoms and are spread through a number of ways. Several typical diseases are summarized in the Diseases Table.

The entries for diseases include the following information: Name, Type, **DC**, incubation, damage. Type lists the disease's method of delivery (contact, inhaled, or injury). **DC** lists the *phys*+**STR** check **DC** needed to prevent infection. Two successful **DC** checks in a row will indicate the disease has been cured and stat damage will heal normally (see rules for HP recovery) unless otherwise indicated. Incubation lists the time before damage begins. Damage lists the ability damage the character takes after incubation and each day afterward. Diseases that prevent or hinder rest will impact normal full **HP** recovery through rest and in extreme cases prevent all **HP** recovery.

Poison

Characters can possibly take damage from a weapon that has been poisoned (injury), be attacked by a creature whose natural attacks feature poison (injury/contact), consume poison hidden in food or drink (ingested), or be poisoned in some other way (inhale).

The **DC** of a poison attack equals 10 + the HD level of the monster unless otherwise indicated.

The save roll to avoid the effects of poison is *phys*+**STR** with success seeing the poison having no effect on the character.

A roll of a natural 1 on the initial save **DOUBLES** the effects of the poison.

The exact effect of failure depends on **HOW MUCH** the save roll is failed by. This figure determines:

- How much general damage is taken in addition to the listed *specific effect* the poison inflicts each round. An additional save is allowed per round to avoid this.
- How many rounds the poison will be in effect for.

EXAMPLE - Jones is a 2nd level **FIGHTER** (+4 *physical*) with **STR** 16 (+3). A level 5 monster bites him and injects poison (**DC** 15). He rolls a 3 on his save for a total of 10. This is 5 short of what is required so Jones takes 5 points of damage straight away and if he fails a save roll at the start of each of the next 4 rounds, will take 5 points of damage each time. The specific effect is the initial effect or damage, taken immediately upon failing the *phys*+**STR** check against the poison. Damage targeting stats specifically cannot be absorbed by **HP**.

Price lists will have the *estimated* cost for one dose of the poison. It can usually only be obtained through less-than-reputable sources, as the possession of poisons are commonly illegal or at least a cause of great concern to the local population.

Travel

While not exactly a hazard in itself, going from point A to point B can be dangerous. Travel can be narrated, or it can be played out for random encounters. The further from civilization, the more rowdy and weird the encounters should get.

A handy travel table is included below for timekeeping some common travel situations. Characters with the Survival skill or active imaginations may find ways to adjust these numbers.

POISONS TABLE

Name	DC	Specific Effect	Est. Cost
Arsenic: Ingested	13	-1 STR/MIND/DEX	~12 gp
Blue Whinnis: Injury	14	-1 STR/sleep	~12 gp
Burnt Othur Fumes: Inhaled	18	-1 STR†	~210 gp
Deathblade: Injury	20	-1d6 STR†	~180 gp
Dataura: Ingested	13	-1 MIND	~5 gp
Insanity Mist: Inhaled	15	-1d4 MIND	-
Lethe vapours: Inhaled	15	sleep	~75 sp
Malys Root Paste: Contact	16	-1 DEX	~50 gp
Monstrous Scorpion Venom(tiny): Injury	12	-1 STR	~5 gp
Monst. Scorpion Venom(small): Injury	12	-1d2 STR	~10 gp
Monst. Scorpion Venom (large): Injury	14	-1d4 STR	~20 gp
Monst. Scorpion Venom (huge): Injury	18	-1d6 STR	~40 gp
Monst. Spider Venom (tiny): Injury	10	-1d2 STR	~8-9 gp
Monst. Spider Venom (small): Injury	10	-1d3 STR	~12 gp
Monst. Spider Venom (large): Injury	13	-1d6 STR	~25 gp
Monst. Spider Venom (huge): Injury	16	-1d8 STR	~50 gp
Pixie tears: Ingested	15	-1d2 MIND	-
Pog water: Contact	13	-1d4 CHA	~65 gp
Sassone Leaf Residue: Contact	16	-2d12 damage	~30 gp
Sleep Poison: Injury	13	sleep	~25 sp
Snake Venom (viper): Injury	11	-1d6 damage	~12 gp
Snake Venom (large viper): Injury	11	-1d6 damage	~12 gp
Snake Venom (huge viper): Injury	14	-1d6 damage	~25 gp
Wyvern Venom: Injury	17	-2d6 STR/DEX	~300 gp

Ability damage can be recovered over time unless marked with a dagger (†), in which case the loss is permanent.

Sleep effects lasts 1d3 hours.

DISEASE TABLE

Name	Type	DC	Incubation	Damage	Vector
Blinding Sickness	Contact	16	1d3 days	1d4 STR + save vs. blind.	Tainted water
Cackle Fever	Inhaled	16	1 day	1d6 MIND	Unknown
Cold	Contact	10	1-2 days	1 DEX	NPCs
Filth Fever	Injury	12	1d3 days	1d3 DEX and 1d3 STR	Vermin
Flu	Contact	10	1d3 days	1 STR and 1 MIND	NPCs
Flux	Ingested	12	1 day	Cannot recover HP	Tainted water
Mindfire	Inhaled	12	1 day	1d4 MIND	Unknown
Mummy Rot	Contact	20	1 day	1d6 STR *	Mummies
Plague	Contact	12**	1-3 days	1 STR and 1 CHA	NPCs
Red Ache	Injury	15	1d3 days	1d6 STR	Unknown
Shakes	Contact	13	1 day	1d8 DEX	Unknown
Slimy Doom	Contact	14	1 day	1d4 STR *	Slimy Doom

*can only be healed by magic

Add **DC 1 each day

CRITICAL HIT TABLE

Roll 2d10	Combat Critical*	Magic Critical	Combat Fumble	Magic Fumble
2-3	Heroic strike! Triple max weapon damage. Target AC -3	Astounding! Triple spell effect, target is -5 on save	Shatter! Attacker's weapon breaks	Explosion! Spell does max damage/effect to 10ft radius/level
4-5	Skillful blow! Double max weapon damage. Target AC -2	Amazing! Double spell effect, target is -3 on save	Attacker's weapon damaged, now does half damage	Mana Burn! Caster drops to 1 hp
6-7	Nimble attack! Attacker gets +1 attack bonus 1d6 rounds.	Harmful! Max spell effect and Target loses 1 CHA	Pulled a muscle! Attacker is -2 AC and to hit for rest of fight	Psychic Burn! Caster loses 1 CHA
8-9	Powerful hit! Max weapon damage. Target AC -1	Effective! Max spell effect, target is -2 on save.	Clumsy! Attacker drops weapon	Backfire! Caster stunned 1d4 turns
10-13	Target Stunned 1 turn		Attacker stunned 1 turn.	Caster stunned 1 turn
14-15	Disarm! Opponent loses weapon or similar effect.	Caster gets +1 magic rolls and saves for d6 rounds.	Attacker takes half the damage.	Silenced! Caster is mute for 1d4 rounds
16-17	Scarred! Target disarmed and -1 CHA.	Easy! Spell uses half HP.	Attacker takes the full damage.	Miscast! Cannot cast this spell for d4 hours
18-19	Blow to the head! Target stunned and -1 MIND.	Effortless! Spell uses no HP.	Wipeout! Attacker falls and drops to 0hp - unconscious	Backfire! Spell targets the wrong thing, GM choice.
20	Mighty blow! Disable opponent's limb. -1d4 DEX.	Sublime! Caster can cast spell as +1 Level (permanent).	Disabled! Arm or Hand. -1d6 DEX.	Brain Burn! Caster loses 1d6 MIND.

Critical Hits always do the maximum damage for the weapon type used in addition to other effects unless otherwise stated. Treat all stat loss as you would STR damage (see section on HP) for purposes of recovery.

For critical hits that do AC damage treat this as permanent damage to the targets armour or some temporary incapacitation to the target if they have no armour. Armour damaged this way can be repaired by the appropriate tradesmen for fractional value of the original cost – generally 10-20% per point of AC.

OVERLAND TRAVEL TABLE

Base daily travel speed:		20 miles	
Terrain Type or Activity	Modifier	Terrain Type or Activity	Modifier
Bad weather (storms)	-10	Mounted	+10
Dark	-15	Off-road dense forest	-10
Encumbered	-5	Off-road rough (hills/desert/scrub)	-5
Foraging/Hunting	-10	Off-road light forest	-5
Fresh mounts*	+5	Off-road swamp	-15
Good road (hard surface, smooth)	+5	Poor weather (rain/wind/snow)	-5
Hiding/sneaking	-10	Trained/Organized	+5
Hurrying/forced travel	+5	Very encumbered	-10
Mountains	-10	Wagon**	-5

*adds +5 each time fresh mounts are used, up to 3 times per day – think pony express

**a wagon moves slow but will reduce encumbrance. Not suitable for hiding or travelling off -road.

Equipment

Weapons

Here is the format for weapon entries (given as column headings on the table below).

Cost: This value is the price for purchasing the weapon. The cost includes miscellaneous gear that goes with the weapon.

Range (Increments): Any attack at less than this distance is not penalized for range. However, each full range increment imposes a cumulative -2 penalty on the attack roll. A thrown weapon has a maximum range of 5 range increments. A projectile weapon can shoot out to 10 range increments.

MinSTR: Light Weapons have **MinSTR** of 6 while, Heavy Weapons have a **MinSTR** of 12 to use the weapon *without penalty* (see Combat).

Armour & Shields

Here is the format for armour entries (given as column headings on the table below).

Cost: This value is the price for purchasing the armour.

AC: The column gives the Armour Class bonus provided by the armour.

DEX Mod: The amount that the shield modifies your **DEX** stat (and associated bonus).

MinSTR: The minimum **STR** required to use the armour *without penalty* (see Combat).

Coinage

Since economics is very integral to the campaign setting, coinage and item prices can vary widely between different locations and any prices listed should be flexible based on circumstances and supply. The exchange rates* for the most common coins is as follows:

- 10 copper pieces (cp) = 1 silver piece (sp)
- 10 silver pieces = 1 gold piece (gp)
- 10 gold pieces = 1 platinum piece (pp)

The standard weight of a coin is 1/3 of an ounce so 50 coins will weigh 1 pound.

*Remember money exchange is a service and not a right; be sure to have merchants charge a small percentage when players convert coins in bulk.

LIGHT WEAPONS

Weapon (1d6 dam)	Cost	Range
Cestus	25 sp	
Chain	3 sp	10 ft.

Mage Spells

Mages specialize in spells that draw upon the raw magics of the universe. Aside from a few initial spells they must seek out new magic spells and copy them into their spell books.

Mage Cantrips:

Alarm:

Range: Touch.

Duration: 2 hours /level.

Description: Alert caster of intrusion (10ft area/level) or of an item such as a door or chest.

Arcane Mark:

Range: Touch.

Duration: Permanent.

Description: Inscribes a personal rune (visible or hidden).

Create Fire:

Range: 1 ft.

Duration: Instant.

Description: Ignite flammable object.

Detect Magic:

Range: 60 ft.

Duration: Concentration, up to 1 turn /level.

Description: Detect spells and magic items along line of sight.

Ghost Sounds:

Range: 30 ft.

Duration: 1 turn /level or concentration.

Description: Project minor or distracting sounds.

Light:

Range: Touch.

Duration: 10 min. /level.

Description: Object shines like a torch.

Mage Hand:

Range: 10 ft.

Duration: Concentration.

Description: Slow telekinesis up to 5-pounds.

Prestidigitation:

Range: 10 ft.

Duration: Concentration.

Description: Performs minor magical tricks with smoke and fog. Caster can make shapes suggest themselves, change the colour or direction of smoke and fogs.

Read Magic:

Range: Personal.

Duration: 10 min. /level.

Description: Read magic writing, scrolls and spell books.

1st Level Mage Spells:

Feather Fall:

Range: 25 ft. + 5 ft. /level.

Duration: 1 turn/level

Description: Objects or creatures fall slowly for 1 turn /level.

Floating Disk:

Range: 25 ft. + 5 ft. /level.

Duration: 1 hour/level.

Description: Creates 3-ft.-diameter horizontal disk that holds 100 lb. /level.

Grease:

Range: 25 ft. + 5 ft. /level.

Duration: 1 turn / level.

Description: Makes 10ft area or item slippery. Creatures in area make DEX check -5 to remain standing.

Hold Portal:

Range: 10 ft. /level.

Duration: Concentration.

Description: Holds door shut as if locked. Adds **DC** +1/caster level to all attempts to force open.

Identify:

Range: Touch.

Duration: Instant.

Description: Determines properties of magic items. **DC** = 11+ (target item level - caster level).

Mage Armor:

Range: Touch.

Duration: 10 min. /level.

Description: Gives subject +4 **AC** bonus.

Magic Missile:

Range: Sight.

Duration: Instant.

Description: Caster launches missile that follows target and does 4+1d4 damage.

Ray of Frost:

Range: 25 ft. + 5 ft. /level.

Duration: Instant.

Description: Cold radiates from casters hand which can freeze small objects such as a bucket of water or small puddles. Ray deals 1d6 cold damage to living creatures.

Shocking Grasp:

Range: Touch.

Duration: Instant.

Description: Touch delivers 2d6 electricity damage.

2nd Level Mage Spells:

Arcane Lock:

Range: Touch.

Duration: Permanent.

Description: Magically locks door or chest to any but caster.

Chill Wind:

Range: 10 ft. /level

Duration: 1 turn /level.

Description: Icy wind emanates from caster and knocks down smaller creatures and/or disrupts light missiles, does 1d6 cold damage per turn.

Decipher:

Range: Sight.

Duration: 10 min. /level.

Description: You can understand any natural (non-magical, un-encoded) written language. Coded messages *might* be understood with a DC added to the casting roll.

Knock:

Range: Sight.

Duration: Instant.

Description: Opens locked or magically sealed chests or doors.

Levitate:

Range: Touch.

Duration: 1 turn /level.

Description: Subject moves up and down at your direction.

Mage Sight:

Range: Personal.

Duration: 10 min. /level.

Description: Caster is able to see in the dark for up to 60'. Can also see invisible or ethereal objects. Does not enable caster to see through illusions or see normally hidden objects.

Protection from Missiles:

Range: Personal.

Duration: 10 min. /level or until all damage is absorbed.

Description: Creates an invisible shield which has damage resistance of 10 +1 point / caster level against ranged weapons.

Spider Climb:

Range: Touch.

Duration: 10 min. /level.

Description: Grants ability to walk on walls and ceilings.

Web:

Range: 5 ft. /level.

Duration: 1 turn /level.

Description: Creates sticky net 20ft sq. to entangle creatures.

3rd Level Mage Spells:

Arcane Sight:

Range: Sight.

Duration: 1 turn /level.

Description: Magical auras and effects become visible to caster.

Dispel Magic:

Range: 100 ft. + 10 ft. / level.

Duration: Instant or 10 min / level.

Description: Cancels magical spells and effects. Works against non permanent spells **DC** = 11+ (target spell - caster level). **DC** + 2 when used against spells from different magic schools. Can also be used to suppress the effects of permanent magic spells for the duration of the spell.

Fireball:

Range: Up to 300 ft. +20 ft. /level.

Duration: Instant.

Description: Ball of fire materializes at desired range and deals 3d6 +1/level damage to everything in a 20-ft. radius. Will ignite flammable items.

Fly:

Range: Touch.

Duration: 1 turn /level.

Description: Subject can fly up to 60 ft/turn

Gaseous Form:

Range: Touch.

Duration: 1 turn /level.

Description: Subject becomes insubstantial and can float slowly.

Haste:

Range: 10 ft. /level.

Duration: 1 turn /level.

Description: Target moves faster (2 action turns every turn).

Lightning Bolt:

Range: 150 ft.

Duration: N/A.

Description: Electricity arcs from caster and deals 3d6 +1/level damage to target.

Slow:

Range: 10 ft. /level.

Duration: 1 turn /level.

Description: Target moves slower (1 action turns per 2 turns).

Vampiric Touch:

Range: Touch.

Duration: Instant.

Description: Touch deals 1d8 +1/level damage; caster can use this damage to restore their physical **HP** but not magic fatigue.**4th Level Mage Spells:****Animate Dead:**

Range: Touch.

Duration: Permanent.

Description: Creates 2 **HD**/ level of undead skeletons or zombies. Can control up to 4 **HD** of undead created per level.**Arcane Eye:**

Range: N/A.

Duration: 1 turn /level.

Description: Small floating eye moves 30 ft. /turn
Can be used to cast spells.**Black Tentacles:**

Range: 60 ft. +10 ft. /level.

Duration: 1 turn /level.

Description: 10 ft. long rubbery tentacles grapple all within 20 ft. **DC** 8 + caster level to escape/avoid being held. While held, creatures take 1d6+4 points damage.**Dimension Door:**

Range: 400 ft. + 50 ft. /level.

Duration: 1 turn /level.

Description: Opens a magic portal which teleports users a short distance visualized or in a chosen direction. If there is no open space in the target location then the portal targets a nearby location. If there are no nearby locations (e.g. inside a rock) then the spell fails and caster takes 1d6 damage.

Geas, Lesser:

Range: Sight and hearing.

Duration: 1 day/level or until task completed.

Description: Places a magical command on target subject of 7 **HD** or less. Geas cannot be used to command creatures to kill themselves or place themselves in known peril of death.**Polymorph, lesser:**

Range: Touch.

Duration: 1 turn /level.

Description: Gives one willing subject a new form, subject gains all non-spell like abilities of form (e.g. flying, water breathing). Damage taken in the new form reverts to a proportional damage when target resumes its original form.

Shout:

Range: 30 ft cone.

Duration: Instant.

Description: Deafens all within cone for 2d6 turns and deals 5d6 sonic damage. Crystalline/glass items in range take 1d6 points of damage per caster level.

Wall of Fire:

Range: 100 ft. +10 ft. /level.

Duration: Concentration +1 turn /level.

Description: Opaque curtain of fire length and height of 20ft. per level. Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through the wall deals 2d6 damage +1/level.

Wall of Ice:

Range: 100 ft. +10 ft. /level.

Duration: Until it melts.

Description: Creates ice wall or hemisphere up to 10 x 10 ft. per caster level and 1 inch per level thick. Wall takes 15 +1 **HP**/level, creatures trapped inside take 1d6 cold damage.**5th Level Mage Spells:****Cloudkill:**

Range: 100 ft. +10 ft. /level.

Duration: 1 turn /level.

Description: Kills creatures of 3 **HD** or less; creatures of 4-6 **HD** must save vs. **STR** or die, creatures with 6+ **HD** take 1d4 **STR** damage.**Cone of Cold:**

Range: 60 ft. cone.

Duration: Instant.

Description: Ice blast does 1d6/level cold damage (max 15d6).

Grow/Shrink Creature:

Range: 30 ft. + 5 ft. /level.

Duration: 1 turn /level.

Description: Target creature doubles or halves in size. Targets doubled in size have double **STR** and half **DEX** and take half damage from attacks; creatures half sized have double **DEX** and half **STR** and take double damage from attacks.

Hold:

Range: 100 ft. +10 ft. /level.

Duration: 1 turn / level.

Description: Immobilizes creatures equal to 1 **HD**/level while concentrating. Creatures get a chance to break the hold. **DC** 10+ caster's level each round.

Missile Shield:

Range: Dome 5 ft. + 5ft. / level.

Duration: 10 min. /level.

Description: A clear dome that deflects non-magical missiles and minor falling objects (e.g. rocks, branches, arrows and other items smaller than 2ft across).

Magic Resistance, lesser:

Range: Touch.

Duration: 10 min. /level.

Description: Confers +5 spell resistances (damage and saves) to target.

Telekinesis:

Range: 400 ft. + 40 ft. /level.

Duration: 1 turn /level with concentration.

Description: Caster can move objects with their mind up to 25 pounds /level up to 20 ft. /turn.

Teleport:

Range: 100 miles / level.

Duration: Instant.

Description: Instantly transports you as far as 100 miles/level.

Wall of Stone:

Range: 100 ft. + 10 ft. /level

Duration: Permanent.

Description: Creates a stone wall of desired shape and with a volume of 5ft sq/ level.

Antimagic Field:

Range: 10ft radius.

Duration: 10 min. /level.

Description: Suppresses the effects of magic brought into or cast in the field. Spell effects may resume when field is dispelled.

Chain Lightning:

Range: 400 ft. + 40 ft. /level.

Duration: Instant.

Description: 1d6/level damage; 1 secondary bolt/level each deals half damage.

Contingency:

Range: N/A

Duration: 1day / level or discharged.

Description: Sets trigger condition for another spell.

Destroy Undead:

Range: A radius of 5 ft. /level.

Duration: Instant.

Description: The spell destroys 1d4 HD per caster level worth of undead creatures in area (maximum 20d4).

Disintegrate:

Range: 100 ft. + 10 ft. /level

Duration: Instant.

Description: Destroys one creature or object.

Flight:

Range: Personal.

Duration: 1 hour /level

Description: Fly up to 704 ft per turn or 8 mph.

Geas:

Range: Sight and hearing.

Duration: Until discharged or removed.

Description: Commands any creature, binding it to a specific task. Subject takes 3d6 points of damage each day it does not attempt to follow the geas. A geas cannot be used to command creatures to kill themselves or place themselves in known peril of death.

Protection Sphere:

Range: 10ft radius.

Duration: 10 min. /level.

Description: Confers a 20 +1/level resistance to any physical, mental or magical damage. The damage is absorbed by the sphere or negated. Only one sphere per caster can be in effect on a target at any time.

6th Level Mage Spells:

Analyze Dweomer:

Range: Sight.

Duration: Concentration.

Description: Reveals magical aspects of subject.

Enchanter Spells

Enchanters specialize in spells that misdirect or confuse the mind.

Enchanter Cantrips:

Arcane Mark:

Range: Touch.

Duration: Permanent.

Description: Inscribes a personal rune (visible or hidden).

Confusion:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn.

Description: In their next combat action, target has +5% chance of a critical fumble per every 2 caster levels, up to a maximum of 50%.

Dancing Lights:

Range: 100 ft. + 10 ft. /level

Duration: 1 turn.

Description: Creates floating lights (up to one per level) which may resemble torches or coloured lights.

Daze:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn.

Description: Clouds mind of the target. Intelligent creature (4 **HD** or less) loses next action if not resisted.

Decorate:

Range: 10 ft.

Duration: 1 hour

Description: Performs minor visual tricks such as colour changes to smoke, clothing, eyes and hair, sparkling effects or other very minor illusions.

Detect Magic:

Range: 60 ft.

Duration: Concentration, up to 1 min. /level.

Description: Detect magical auras from spells and magic items.

Ghost Sound:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn /level.

Description: Create fragments of sounds such as indistinct talking, squeaks or creaking.

Message:

Range: 100 ft. + 10 ft. /level

Duration: 1 turn /level.

Description: Whisper to a target at a distance.

Read Magic:

Range: Personal.

Duration: 10 min. /level.

Description: Read magic writing, scrolls and spell books.

1st Level Enchanter Spells:

Charm Person:

Range: 25 ft. + 5 ft. /2 levels

Duration: 1 hour/level

Description: Makes one humanoid your friend. Hostile targets receive +5 to resist.

Color Spray:

Range: 15 ft.

Duration: Instant.

Description: Vivid burst of colored light as a 15' cone. Sighted creatures who fail to resist are blinded and stunned for 2d4 minutes.

Detect Illusion:

Range: 60 ft.

Duration: Concentration, up to 1 turn /level.

Description: Caster can detect visual illusions along line of sight or discern audible illusions.

Disguise Self:

Range: Personal.

Duration: 10 min. /level.

Description: Changes your appearance within limits of basic body type. Can appear to be shorter, taller, stouter or otherwise clothed or armoured. Caster can assume the appearance of a person of the same race if familiar. Does not change mannerisms or voice.

Fright:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1d4 turns.

Description: One creature (5 **HD** or less) flees in terror.

Mesmerize:

Range: 25 ft. + 5 ft. /2 levels + Sight and hearing.

Duration: 2d4 turns.

Description: Fascinates 2d4 **HD** of creatures causing them to stop and stare. Hostile targets gain +2 resist.

Silent Image:

Range: 400ft. + 40ft. /level.

Duration: Concentration.

Description: Creates a visual only illusion of your design up to 5 cubic feet/level in size.

Sleep:

Range: 50 ft. + 10 ft. /level.

Duration: 1 turn /level.

Description: Puts 4 **HD** of creatures into magical slumber. Creatures can be woken with difficulty.

Ventriloquism:

Range: 25 ft. + 5 ft. /2 levels

Duration: 1 turn /level.

Description: Throws voice for 1 turn per level.

2nd Level Enchanter Spells:**Blindness/Deafness:**

Range: 100 ft. + 10 ft. /level.

Duration: Permanent.

Description: Makes subject blinded or deafened **DC** 8+ caster level to save.

Blur:

Range: Touch.

Duration: 1 turn /level.

Description: Target appears to shift and blur and gains +4 to **AC**, cannot be Sneak Attacked.

Darkness:

Range: Touch.

Duration: 10 min. /level.

Description: Touched object radiates 20-ft. sphere of supernatural shadow.

Hideous Laughter:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn /level.

Description: Subject undergoes fits of laughter, loses actions.

Hypnotic Pattern:

Range: 100 ft. + 10 ft. /level.

Duration: Concentration + 2 turns.

Description: Fascinates up to 2d4+level **HD** of creatures.

Invisibility:

Range: Touch.

Duration: 1 turn /level.

Description: Subject is invisible for until it attacks. Does not mask sounds or scent.

Magic Mouth:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Permanent until discharged.

Description: Magical image of mouth speaks short phrase once when triggered.

Minor Image:

Range: 400ft. + 40ft. /level.

Duration: Concentration +2 turns.

Description: Creates a visual and audible illusion of your design up to 5 cubic feet/level in size.

Mirror Image:

Range: Personal.

Duration: 1 turn /level.

Description: Creates 1d4+1 decoys all within 5 feet of each other which shift around. Chance that attacker hits image is determined by random roll (except for area effects).

3rd Level Enchanter Spells:**Clairaudience/Clairvoyance:**

Range: 400 ft. + 40 ft. /level.

Duration: 1 turn /level

Description: Hear or see at a distance (cannot use for ranged casting.)

Daylight:

Range: Touch

Duration: 10 min. /level.

Description: Target emits 60' radius sphere of light as strong as full daylight.

Lesser Seeming:

Range: Touch.

Duration: 1 hour.

Description: Visual and audible illusion changes appearance of 1 creature to another creature of at least 50% similar size and shape. Does not provide any tactile, mobile or ability effects to recipient.

Illusory Script:

Range: Touch (writing).

Duration: One day/level.

Description: Embed hidden message in writing or write a secret message. Only the intended reader can decipher.

Invisibility Sphere:

Range: Touch.

Duration: 1 turn /level.

Description: Makes everyone within 10' of object invisible.

Major Image:

Range: 400ft. + 40ft. /level.

Duration: Concentration +2 turns.

Description: As *minor image*, creates an illusion of your design up to 5 cubic feet/level in size plus sound, smell, and thermal effects.

Nondetection:

Range: Touch

Duration: 1 hour/level.

Description: Hides subject from magical detection devices or spells such as divination or scrying.

Stinking Cloud:

Range: 100 ft. + 10 ft. /level.

Duration: 1 turn /level.

Description: Creates a cloud of nauseating vapors.

Nauseated creatures must save (**DC** 10 + caster level) or take no actions except movement.

Nausea lasts 1d4+1 turns after cloud dissipates.

Suggestion:

Range: 25 ft. + 5 ft. /2 levels (requires hearing).

Duration: 1 hour/level or until completed.

Description: Compels subject to follow stated course of action. Suggestion can also be triggered by an event. Suggestion is broken if it involves obvious harm to subject.

4th Level Enchanter Spells:

Animate Shadow:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Concentration + 1 turn /level.

Description: Turns *an existing shadow* of any type into a shadow of a creature or creatures with total HD equal to the casters level. Shadow creatures are mostly insubstantial and do 1d6 damage and have an AC of 15.

Charm Monster:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 day/level.

Description: Make one living creature believe it is your ally.

Crushing Despair:

Range: 30 ft cone.

Duration: 1 turn /level.

Description: Subjects in area take -2 on attack rolls, damage rolls, saves, and checks.

Fear:

Range: 30 ft cone.

Duration: 1 turn /level.

Description: Subjects within cone save or flee in terror.

Hallucinatory Terrain:

Range: 30ft. /level.

Duration: 2 hours /level.

Description: Makes one type of terrain appear like another (field into forest, or the like).

Illusory Wall:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Permanent.

Description: Permanent wall, floor, or ceiling looks real, but anything can pass through.

Invisibility, Greater:

Range: Touch.

Duration: 1 turn /level.

Description: As invisibility, but subject can attack and stay invisible. Cannot be detected by mage sight.

Phantasmal:

Range: 100 ft. + 10 ft. /level.

Duration: Instant.

Description: Fearsome illusion deals 1d6 damage/level + insanity check **DC** 5.

Rainbow Pattern:

Range: 100 ft. + 10 ft. /level

Duration: Concentration + 1 turn /level.

Description: 20 ft. sphere of rainbow lights fascinate up to 24 **HD** of (sighted) creatures within it.

5th Level Enchanter Spells:

Break Enchantment:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Instant.

Description: Frees subjects (Up to one creature per level, all within 30 ft. of each other) from enchantments, alterations, curses, and petrification.

Dream/Nightmare:

Range: Unlimited.

Duration: N/A.

Description: Sends a dream message to anyone sleeping or a nightmare that ends with dealing 1d10 **HP** and preventing their rest. Must be able to see the target or have an item of theirs.

Dominate Person:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 day/level.

Description: Subject will follow orders of the caster and can be directly controlled telepathically. Caster will be generally aware of the subjects actions even when they are not nearby and can concentrate fully to access the subjects sensory input. Any commands given that are contrary to the subject's nature or interests allow them to make a save with +2 bonus.

Feebleminded:

Range: Sight

Duration: Permanent.

Description: Subject's **MIND** score drops to 1.

Persistent Image:

Range: 400ft. + 40ft. /level.

Duration: 1 turn /level.

Description: As *major image*, creates an illusion up to 5 cubic feet/level in size plus sound, smell, and thermal effects. Image can follow a script so no concentration is required to maintain it.

Seeming:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 12 hours.

Description: As Lesser Seeming but changes the appearance of up to 1 creature per 2 levels of caster.

Symbol of Pain:

Range: Touch.

Duration: Until triggered.

Description: Glowing rune wracks creatures with pain (triggered by proximity or sight). -4 to actions for 10 min/casters level.

Symbol of Sleep:

Range: Touch.

Duration: Until triggered.

Description: Glowing rune causes creatures to fall into a catatonic sleep (triggered by proximity or sight). Cannot be woken for 10 min/casters level.

Visions of Insanity:

Range: Sight.

Duration: 1day/level.

Description: Caster creates images in the target's mind that are so horrible that they become insane. Save is **DC** 5+ 1/caster level.

6th Level Enchanter Spells:**Mislead:**

Range: 25 ft. + 5 ft. /2 levels

Duration: 1 turn/level and concentration + 3 turns

Description: Turns you invisible (as Greater invisibility) for the specified time and creates an illusory double which can be controlled by concentration and which will last 3 turns afterwards.

Phantasmal Killer:

Range: 100 ft. + 10 ft. /level.

Duration: Instant.

Description: Fearsome illusion deals 2d6 damage/level + insanity check **DC** 10.

Permanent Image:

Range: 400ft. + 40ft. /level.

Duration: Permanent.

Description: Caster creates a permanent illusion with sight, sound, and smell.

Programmed Image:

Range: 400ft. + 40ft. /level.

Duration: Permanent until triggered, then 1 turn/level

Description: As persistent image but triggered by specific event.

Shadow Walk:

Range: Touch.

Duration: 1 hour /level.

Description: Step into a shadow and travel rapidly; 50mph for duration. Caster can take creatures along as long as all remain touching. Creatures who wander off or lose touch while journeying have a 50% chance of becoming lost in the shadow realm, otherwise will appear somewhere in the world emerging from a shadow.

Suggestion, Mass:

Range: 100 ft. + 10 ft. /level.

Duration: 1 hour/level or until completed

Description: As *suggestion*, plus one subject per level.

Symbol of Fear:

Range: Sight.

Duration: 10 turns /level once triggered.

Description: Triggered rune panics (drop items and flee) nearby creatures for 1 turn per level.

Symbol of Persuasion:

Range: Sight.

Duration: 10 turns /level once triggered.

Description: Triggered rune charms nearby creatures for 1 hour/level.

True Seeing:

Range: Sight.

Duration: 1 turn /level.

Description: Lets you see through all darkness, enchantments and illusions (including shape-changed or ethereal objects) and all things as they really are.

Druid Spells

Druids specialize in the study of spells that influence the natural world and it's creatures.

Druid Cantrips:

Calm Animals:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn /level.

Description: Soothes and quiets up to 2d4 + caster level HD of ordinary animals. Intelligent or magical creatures are not affected (and may even become more hostile if they suspect they are being manipulated).

Clean Water:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Instant.

Description: Makes up to 2 gallons/level of water drinkable and parasite free.

Detect Magic:

Range: 60 ft.

Duration: 1 turn /level or concentration.

Description: Detect spells and magic items.

Detect Poison:

Range: 25 ft. + 5 ft. /2 levels

Duration: Instant.

Description: Detects poison in one creature or object. Can determine the Poison type with KNOW check at DC 20.

Know Direction:

Range: Personal.

Duration: Instant.

Description: Discern the compass directions.

Mending:

Range: Touch.

Duration: Instant.

Description: Repairs small breaks, cracks or tears in objects.

Pass without Trace:

Range: Touch.

Duration: 1 hour/level.

Description: One subject leaves no tracks or scent as they travel.

Read Magic:

Range: Personal.

Duration: 10 min. /level.

Description: Read magic writing, scrolls and spell books.

Resist Glamour:

Range: Touch.

Duration: 1 hour/level.

Description: +1/level to resist charm and sleep effects of woodland creatures.

1st Level Druid Spells:

Entangle:

Range: 400 ft. + 40 ft. /level

Duration: 1 turn/level.

Description: Plants in area entangle everyone in a 40' radius.

Faerie Fire:

Range: 400 ft. + 40 ft. /level

Duration: 1 turn /level.

Description: Outlines all subjects within a 5 ft. radius of target in a light equal to a candle, cancels *blur*, *invisibility*, etc.

Goodberry:

Range: Touch.

Duration: 1 day.

Description: When cast on a handful of berries they become wholesome and, if immediately eaten can restore up to 2d4 **HP** (max 8 **HP** per person in a 24 hour period). Eating additional berries, or berries which are stored provide sustenance but no healing. Any original effects of the berries are replaced (e.g. poison, intoxication).

Hide from Animals:

Range: Touch.

Duration: 10 min. /level

Description: Animals cannot see, hear, or smell the target. If a subject touches or attacks an animal the spell ends.

Obscuring Mist:

Range: Personal.

Duration: 1 turn /level.

Description: Fog surrounds you in a 5 ft radius, providing concealment and obscuring all vision beyond 5 ft. Can be dissipated by strong winds.

Produce Flame:

Range: Touch.

Duration: 1 turn /level.

Description: Torch-like flames appear from casters hand. Can be used to light objects, burn opponents or can be thrown. Fire does 1d6 damage +1/level to others.

Restful Glade:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 8 hours.

Description: Enchants an area, providing a comfortable rest in the wilderness (see **HP** recovery).

Speak with Animals:

Range: Personal.

Duration: 1 turn /level.

Description: You can communicate with animals.

Watcher:

Range: Touch.

Duration: 1 day/level.

Description: Plant can be spelled to raise alarm to the caster if (simple) trigger condition is observed.

2nd Level Druid Spells:

Barkskin:

Range: Touch.

Duration: 10 min. /level.

Description: Target's skin becomes tough like bark but remains flexible. Grants a +2 **AC** bonus.

This bonus does not stack with other natural armour bonuses that affect skin or hides.

Bull's Strength:

Range: Touch.

Duration: 1 turn /level.

Description: Subject gains +4 to **STR**.

Cat's Grace:

Range: Touch.

Duration: 1 turn /level.

Description: Subject gains +4 to **DEX**.

Fog Cloud:

Range: 100 ft. + 10 ft. level

Duration: 10 min/level.

Description: Fog billows out from target in a 20 ft. radius and spreading 1 ft per turn in all directions and obscuring vision beyond 5ft. Fog dissipates in sunlight after an hour. A moderate wind will disperse it in 4 turns, a strong wind in 1 turn.

Gust of Wind:

Range: 60 ft one direction.

Duration: 1 turn.

Description: Strong wind rushes out from caster, blows out torches, knocks down missiles or smaller objects and creatures.

Heat/Chill Metal:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn /level.

Description: Makes metal so hot or cold that it damages those who touch it for 1d4 **HP** /turn.

Summon Swarm:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Concentration + 2 turns.

Description: Summons swarm of bats, rats, spiders (or other small creatures) which will attack all creatures in an area or defend an area for the length of the spell. The caster has no control over the swarm once summoned.

Tree Shape:

Range: Personal.

Duration: 1 hour/level.

Description: You can assume the form of a tree or shrub.

Wood Shape:

Range: Touch.

Duration: Instant.

Description: Bends and rearranges wood (10 cu. ft. + 1ft. / level) into any shape. Fine detail is not possible.

3rd Level Druid Spells:

Call Lightning:

Range: 100 ft. + 10 ft. /level.

Duration: 1 turn /level

Description: Calls down a 3d6-damage lightning bolt from the sky once per turn.

Dominate Animal:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 10 min/level.

Description: Non-intelligent/non magical animal will follow simple orders of the caster and can be directly controlled telepathically. Caster will be generally aware of the subjects actions even when they are not nearby and can concentrate fully to access the subjects sensory input. Any commands given that are contrary to the subject's nature or safety allow them to make a save with +2 bonus.

Influence Plant Growth:

Range: Up to 400 feet + 40 feet per level.

Duration: 1 turn

Description: Causes all plants within the area of effect to increase in size (and yield if applicable) or to be stunted as desired. The effect on terrain is to slow travel by half or clear an overgrown area to allow normal travel. The effect on yields is to double or half the normal yield. When cast on a single plant can cause it to increase or decrease up to 4 times its original size.

Poison/Neutralize Poison:

Range: Touch.

Duration: Instant.

Description: Touch deals damage equal to a poison of **DC** 8+caster's level (caster's choice) or neutralizes an existing poison. It does not reverse damage effects of poisons already incurred.

Protection from Energy:

Range: Touch.

Duration: 10 min/level or exhausted.

Description: Target can resist 5 points/level of damage from specified kind of energy (cold, fire, electricity...).

Speak with Plants:

Range: Personal.

Duration: 1 turn /level.

Description: You can talk to normal plants and plant creatures.

Spike Growth:

Range: 100 ft. + 10 ft. /level.

Duration: 1 hour/level.

Description: Causes all ground cover and vegetation in an area up to 20 ft. /level to become thorny and sharp. Creatures in the area take d4 damage per 5' movement, and may be slowed.

Stone Shape:

Range: Touch.

Duration: Instant.

Description: Sculpts stone (10 cu. ft. + 1ft. / level) into any shape. Fine detail is not possible.

Water Breathing:

Range: Touch.

Duration: 10 min. /level.

Description: Subject can breathe water for 10 min. /level.

4th Level Druid Spells:

Animal Form:

Range: Personal.

Duration: 1 hour /level.

Description: Caster is able to assume any natural animal form. They assume the statistics of the form and can use any natural abilities of the animal (e.g. dig, fly, smell) however they retain their original **HP** and the ability to speak and cast spells.

Dispel Magic:

Range: 100 ft. + 10 ft. /level.

Duration: Instant or 10 min. /level.

Description: Cancels magical spells and effects.

Works against non permanent spells **DC** = 11+ (target spell - caster level). **DC** + 2 when used against spells from different magic schools. Can also be used to suppress the effects of permanent magic spells for the duration of the spell.

Hidden Glade:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 2 hours /level.

Description: Creates a hidden (**DC** 15 +caster level to detect) and restful area out of any natural space providing minimal cover. No activity (sound, smells smoke... in the area will be detectable from the outside).

Ice Storm:

Range: 400 ft. + 40 ft. /level.

Duration: 5 turns.

Description: Summons up strong roaring winds and hail which does 1d6 damage per turn to all creatures in its path (a cylinder 20 ft. radius and 40 ft. high). In the storms area of effect concentration requires a **MIND** check each round and all movement is at half speed.

Locate Creature:

Range: N/a.

Duration: 10 min. /level.

Description: Locate a specific creature known to the caster or the closest type of a creature. The spell will indicate the direction, the targets rough distance, speed and direction of travel.

Rusting Grasp:

Range: Touch.

Duration: Instant.

Description: Your touch corrodes iron and alloys, causes wood and paper to burst into flame or water to evaporate. Rusting can effect up to a 3 ft. x 3 ft. area.

Static Charge:

Range: Touch.

Duration: Instant.

Description: Adds 4d6 +1 /level of lightning damage to an object which is discharged when next touched.

Stone Skin:

Range: Touch.

Duration: 10 min. /level.

Description: Target's skin becomes tough like bark but remains flexible. It is also resistant to normal scratches and abrasion or minor damage up to 1hp. Grants a +4 AC bonus. This bonus does not stack with other natural armour bonuses that affect skin or hides.

Summon Nature's Ally:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn /level.

Description: Summons non-intelligent, non-magical animal(s) totaling 6 HD who fight or otherwise act on behalf of the caster for example a 6 HD lion, or three 2 HD wolves or a dozen rats or ravens with ½ HD each. The creatures immediately vanish when killed or when the spell ends.

5th Level Druid Spells:

Animal Growth:

Range: 100 ft. + 10 ft. /level.

Duration: 1 turn /level.

Description: Non-intelligent and non magical animals are made to grow to twice their normal size. Targets doubled in size have double STR and half DEX and take half damage from attacks.

Animal Shrink:

Range: 100 ft. + 10 ft. /level.

Duration: 1 turn /level.

Description: Non-intelligent and non magical animals are made to shrink to half size. Animals half sized have double DEX and half STR and take double damage from attacks.

Animate Plants:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn /level.

Description: 1 large plant for every 3 caster levels becomes animate and fights for the caster.

Call Lightning Storm:

Range: 400 ft. + 40 ft. /level

Duration: 1 turn /level.

Description: Summons up strong roaring winds and caster can call down one bolt of lightning per round which does 5d6 damage (a cylinder 20 ft. radius and 40 ft. high). In the storms area of effect concentration requires a MIND check each round and all movement is at half speed.

Summon Elemental:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 10 min. /level.

Description: Summons a large elemental which will obey the caster. The appropriate element must be present e.g. a fire is burning in range to summon a fire elemental.

Move Earth:

Range: 400 ft. + 40 ft. /level.

Duration: 1 turn.

Description: Digs trenches and builds hills, in an area up to 750' square and 10' deep.

Transmute Rock to Mud/Mud to Rock:

Range: 100 ft. + 10 ft. /level.

Duration: Permanent.

Description: Transforms up to 2 10 ft. cubes per level from rock to mud or mud to rock.

Tree Stride:

Range: Personal.

Duration: 1 hour/level or until expended.

Description: The caster can walk through trees, stepping from one tree to another up to 1000 ft. away.

Wall of Thorns:

Range: 100 ft. + 10 ft. /level.

Duration: 10 min. /level.

Description: 10 cu. ft. /level of thorns damage (25 - AC) anyone who tries to pass.

6th Level Druid Spells:

Baleful Polymorph:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Permanent.

Description: Transforms subject into harmless animal of no more than 1HD.

Bull's Strength, Mass:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn / level

Description: As bull's strength, targets gain +4 to STR, Affects one subject/level.

Cat's Grace, Mass:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn /level.

Description: As cat's grace, Targets gain +4 to DEX. Affects one subject/level.

Circle of Life/Unlife:

Range: 10ft. +1 ft. /level radius from caster.

Duration: 10 min. /level.

Description: Kills 1d4 /level **HD** of either living *or* undead creatures within area of effect. The type of effect is determined when the spell is cast and cannot change.

Find the Path:

Range: Touch.

Duration: 10 min. /level.

Description: Recipient of the spell can sense the shortest and best path to a specified destination.

Obstacles and traps are avoided or made known.

Fire Seeds:

Range: Touch.

Duration: 10 min. /level or until used.

Description: Creates Acorn Grenades (1d6 fire damage/level divided among up to 4 seeds) that explode in a 10' radius and ignite combustibles.

Ironwood:

Range: Touch.

Duration: 1 day /level.

Description: Converts up to 5lb/level of wood to magic wood that is strong as steel.

Transport via Plants:

Range: Touch.

Duration: 10 turns.

Description: Move instantly from one plant to another of its type anywhere up to 100 miles/level.

Wall of Stone:

Range: 100 ft. + 10 ft. /level.

Duration: Instant.

Description: Creates a shaped wall of stone up to 5 ft. /level area.

Cleric Spells

Clerics automatically know spells appropriate to their level; they gain them through spiritual growth and guidance – not through research. In addition to spells, each divine spell level also has a ritual which generally takes longer to cast or requires special preparation than a spell. Feel free to create new spells and/or rituals for clerics of specific faiths.

Some divine spell effects, those marked with an asterisk (*), are either positive or negative based on caster's religious orientation; they generally cannot choose to use either effect but must use the effect most aligned with their beliefs. Clerics must be very careful not to misuse such spells or face repercussions from both gods and their fellow believers.

Cleric Orisons:

***Ease/Turmoil:**

Range: Touch.

Duration: 1 turn /level.

Description: Laying hands to remove/cause pain and anxiety.

Endure Elements:

Range: N/A.

Duration: 24 hours.

Description: Exist comfortably in inhospitable environments (hot/cold/damp/dry climates).

Favor:

Range: Personal.

Duration: 1 turn.

Description: You gain +1 on attack and damage rolls for 1 turn.

Guidance:

Range: Touch.

Duration: 1 turn or until discharged.

Description: Target gets +1 on one attack roll, saving throw, or skill check.

***Purify/putrefy Food and Drink:**

Range: Touch.

Duration: Instant.

Description: Purifies or spoils 1 cu. ft. /level of food or water.

Detect Poison:

Range: 25 ft. + 5 ft. /2 levels

Duration: Instant.

Description: Detects poison in one creature or object.

Detect Undead:

Range: 60 ft.

Duration: Concentration, up to 1 turn / level.

Description: Reveals the presence of undead to the caster and their approximate strength.

1st Level Cleric Spells:

***Bless/Bane:**

Range: 50 ft. radius.

Duration: 1 turn /level.

Description: Bless causes allies in range to gain +1 on attack rolls and checks against fear. Bane causes all enemies within range to be -1 on attack and fear rolls.

***Bless/Curse Water or oil:**

Range: Touch.

Duration: Instant.

Description: Makes holy or unholy waters and oils which are used in religious rituals. Holy waters and oils can cause damage (generally 1d6) to creatures of opposing natures or faiths.

Comprehend Languages:

Range: Personal.

Duration: 10 min. /level.

Description: You understand all spoken and written languages.

***Cure/Cause Light Wounds:**

Range: Touch.

Duration: Instant.

Description: Cures/causes 4+1d4 damage.

***Turn Undead/Cause Fear:**

Range: 25 ft. + 5 ft. /level.

Duration: 1 turn /level.

Description: For the spell duration, 2 **HD** of undead per caster level are sent fleeing (or are subdued and cannot approach the caster if unable to flee). Cause Fear acts in a similar manner against the living.

Shield of Faith:

Range: Touch.

Duration: 1 turn /level.

Description: Shimmering aura grants +2 **AC** bonus to target. This bonus does not stack.

***Light/Dark:**

Range: Touch.

Duration: 10 min. /level.

Description: Object touched shines like a torch or absorbs all light for in a 20ft radius.

Ritual - Liturgy:

Range: Sight and hearing.

Duration: 1 day.

Description: The Liturgy is a religious service performed by an initiated cleric in which blessing and instructions are conferred upon the faithful. For every 30 minutes spent preaching (max 3 hours) people present at a liturgy will respond favorably to the caster as if he had +1 charisma. It may also confer the effects of a Bless spell for its duration and an equal length of time afterwards.

2nd Level Cleric Spells:

Bless/Curse Weapon:

Range: Touch.

Duration: 10 min/level.

Description: Caster gives weapon an enhancement bonus of +1 to hit and damage. The obverse of the spell will curse a weapon with -1 to hit and damage. In either case, the weapon is considered magical.

Delay Poison:

Range: Touch.

Duration: 1 hour/level.

Description: Stops poison from harming subject but does not cure the poison or damage already incurred.

Detect Spirits:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Concentration.

Description: Reveals to the caster the presence of unseen spirits or ghosts and an impression of their nature/intent. This spell can be used to determine if a creature or object is possessed. It cannot be used to detect the presence of normal creatures that are hidden or invisible.

***Gentle/Hideous Repose:**

Range: Touch.

Duration: 1 day / level (or instant).

Description: Preserves one corpse (fouls one corpse preventing resurrection).

Hold Person:

Range: 100 ft. + 10 ft. /level

Duration: 1 turn /level.

Description: Sentient target creature of **HD** up to caster level is immobilized, unable to move or act. Target may attempt to resist each round it is held.

Paralyzing Touch/Remove Paralysis:

Range: Touch.

Duration: 1d6+2 min. (or instant).

Description: Causes creature touched to be paralyzed or frees one or more creatures from paralysis or slow effects.

Zone of Truth:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 turn /level.

Description: Subjects in 20 ft. radius cannot lie.

Ritual – Anoint:

Range: Touch.

Duration: Permanent.

Description: Anoint is a 30 minute ritual that allows a divine caster to mark a person as a follower of the faith. This ritual is used to invest new clerics to the religion as well as protect (or maybe harvest) the souls of the dying. Anointing will grant an additional save at +2 against the death effects caused by certain undead or the effects of lycanthropy (or an additional chance for the subject to be effected). Anointing requires a suitable substance such as holy/unholy water or oil to perform.

3rd Level Cleric Spells:

Create Food and Water:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 8 hours.

Description: Feeds three humans (or one horse)/ 3 levels. The food and water if not consumed vanishes within 8 hours.

***Cure/Cause Blindness/Deafness:**

Range: Touch.

Duration: Permanent.

Description: Cures or causes blindness or deafness.

***Cure/Cause Serious Wounds:**

Range: Touch.

Duration: Instant.

Description: Cures/causes 8+2d8 damage.

***Remove/Cause Disease:**

Range: Touch.

Duration: Instant.

Description: Cures all diseases affecting subject (or inflicts a disease **DC** 8 + level severity).

***Restoration/Drain, Lesser:**

Range: Touch.

Duration: Instant.

Description: Dispels magical penalties to abilities or cures (causes) 1d4 ability damage.

***Searing Light/Freezing Dark:**

Range: 100 ft. + 10 ft. /level.

Duration: Instant.

Description: Ray of light (or dark) deals 1d8 damage for every 2 levels (up to 5d8). Searing Light does double damage against the undead.

Speak with Dead:

Range: 10 ft.

Duration: 1 turn /level.

Description: Corpse answers one question per two levels of caster. Does not work on undead.

Ritual - Consecration:

Range: Touch and/or area 100 ft. + 10 ft. /level.

Duration: Permanent.

Description: The Consecration ritual allows a caster to dedicate a building or altar fit to be used in rituals of the faith. Consecrated areas act as Cause Fear to beings of opposing faiths and also make it difficult (**DC** +5) for them to cast spells, or resist spells of the consecrated faith. Consecrated areas are also immune to some arcane effects such as scrying and area effect spells such as Restful Glade or Hallucinatory Terrain. A consecration ceremony takes at least a full week of uninterrupted prayer and fasting. An area already consecrated by a rival faith must first be cleansed both physically (by removing offending materials) and spiritually before it can be consecrated in the casters faith - a process that can be time consuming and expensive.

4th Level Cleric Spells:

Circle of Protection:

Range: Up to 20ft. radius.

Duration: 1 turn /level.

Description: Caster draws a circle and proclaims a type of energy (heat, cold, electricity, sound...)

and those within the circle are protected against 3d6 +2/level damage from that type of energy.

Control Vermin:

Range: 400 ft. + 40 ft./level.

Duration: 1 turn / level.

Description: Caster can summon and direct the emotions or reactions of swarms of small creatures such as ants, locusts, rats, spiders, etc. These creatures can be made to attack a target, occupy an area or flee in terror, but cannot be made to perform complex actions such as opening doors or fetching unseen items.

Ethereal Ward:

Range: Radius 25 ft. + 5 ft. /2 levels.

Duration: 10 min/level.

Description: Area is impassable to ethereal creatures and effects (including spells such as invisibility and Mage Sight, but not greater invisibility). When the spell is cast, ethereal creatures already in the area are ejected and Ethereal based spells stop working.

Hold Creatures:

Range: 100 ft. + 10 ft. /level

Duration: 10 min/level.

Description: Works as Hold Person but longer and on multiple subjects within a 30ft area (total combined targets **HD** up to 2x caster level) immobilized.

Manifest:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Concentration + 1 round.

Description: Causes spirits, or other incorporeal beings of **HD** lower than the casters level to be made corporeal. Entities possessing objects or creatures will be forced out of them and stunned for 1 round.

***Neutralize Poison/Poison:**

Range: Touch.

Duration: Instant.

Description: Immunizes subject against poison for 10 min. /level, detoxifies venom in or on subject.

***Restoration/Drain:**

Range: Touch

Duration: Instant.

Description: Restores level and ability score drains (or drains 1 level and 1d4 ability from target touched).

Ritual – Remove Curse:

Range: Touch

Duration: Special.

Description: The remove curse ritual takes one hour. This ritual will remove or block the effects of curses (and blessings or other like enchantments) on the subject. It will allow minor cursed objects to be cleansed or destroyed and major cursed objects to be safely removed or interred. Materials required for this spell should be in the 500-1000 sp. range. Exceptional enchanted items may require additional materials or conditions to be met (or repeated castings of the ritual).

5th Level Cleric Spells:

***Cure/Cause Light Wounds, Mass:**

Range: 25 ft. + 5 ft. /2 levels.

Duration: Instant.

Description: Cures/causes 4 +1d4 damage for one creature/ level.

Divine Strike:

Range: 100 ft. + 10 ft. /level.

Duration: Instant.

Description: Smite foes with divine energy 10-ft. radius, 40 ft. high for 5d6 +1/level damage).

Plane Shift:

Range: Touch.

Duration: Instant.

Description: Caster and up to 8 other creatures and their worn equipment are projected to another plane of existence. Their material bodies will remain in a suspended state until their souls can (return or are destroyed).

***Raise Dead/Create Undead:**

Range: Touch.

Duration: Instant.

Description: Brings creature back from the dead. Creature cannot have been dead for longer than 1 day /level and the body must have been preserved from rot or spoilage. The raised creature has HP equal to their level or **HD**. All their stats are at half value. This can also be used to create undead such as zombies, mummies, ghouls or wights of a total HD equal to the casters level divided among the number spoiled bodies or where the soul(s) have been destroyed.

Righteous Might:

Range: Personal.

Duration: 1 turn /level.

Description: Causes caster and equipment to grow up to double in size, double in STR, and take half damage from attacks while enlarged. Unlike a growth spell, the casters DEX and AC remains the same.

Spell Resistance:

Range: Touch.

Duration: 1 turn /level.

Description: Subject gains +10 to resist spell effects and/or damage resistance of 10 + level to spell effects.

True Seeing:

Range: Touch.

Duration: 1 turn /level.

Description: Lets you see all things as they really are for up to 120 feet. Subject can see invisible objects, discern illusions, even the true form of altered objects - but not hidden or concealed creatures or objects.

Ritual - Communion:

Range: Personal.

Duration: N/A.

Description: When attempting the Commune ritual, the caster enters a trance like dream state for a number of hours and consults with their deity or agents of their deity on a question or state of affairs they wish guidance on, the greater the question, the greater the length of the meditation. The more powerful the caster the more clear and informative the consultation will be, although the communion will never be direct, but symbolic in nature. At lower levels the communion will give general impressions and feelings about the issues in question, but at higher levels the caster will have receive more definite images and impressions or even verbal answers and prophecy.

6th Level Cleric Spells:

Animate Objects:

Range: 100 ft. + 10 ft. /level.

Duration: 1 turn /level.

Description: Any non-living non-magical object becomes animated and can be set to attack or interact as caster designates.

Banishment:

Range: 25 ft. + 5 ft. /2 levels.

Duration: Instant.

Description: Banishes 2 **HD**/level of extra-planar creatures from casters Plane.

***Heal/Harm:**

Range: Touch.

Duration: Instant.

Description: Cures/causes 10 points/level of damage, Can also restore or cause stat loss at 1 point/level or cure/cause diseases and mental conditions.

Minor Summoning:

Range: 25 ft. + 5 ft. /2 levels

Duration: 10 min. /level or until task is completed.

Description: Summons extra-planar creature of up to 6 **HD** to assist in one task.

Quest:

Range: 25 ft. + 5 ft. /2 levels.

Duration: 1 day /level or discharged.

Description: Commands any creature, binding it to a specific task as spoken by the caster. Target cannot be forced to harm self.

Voice of God:

Range: Hearing.

Duration: Instant.

Description: The caster speaks the true language of their god(s) which causes all who hear it to take 2d6 damage and be deaf for 2d6 rounds. In addition, creatures and entities opposed to the casters religion (e.g. undead, spirits, minor devils, lawful clerics...) suffer the effects of Turn Undead/Cause Fear. Opposed creatures of less than 2 **HD** must make a save or be destroyed and opposed creatures of higher **HD** but still less than the caster's level must save or take 4d6 +1/ caster's level damage.

Word of Recall:

Range: Unlimited.

Duration: Instant.

Description: Upon speaking this word, the caster + 25lb/level of weight are returned to a location previously prepared.

***Ritual - Resurrection:**

Range: Touch.

Duration: Permanent.

Description: This ritual requires at least 3 clerics of the same faith to perform and takes one day

to perform for every 10 years since the subject's death. The subject returns to life fully restored and with full stats and HP, which are supplied from among the casters. Some piece of the body must be used to restore it and the target creature must have a soul that is not trapped or otherwise destroyed (or may have a soul provided for them...). The material cost of this ceremony is very great (> 100,000 sp.) and usually not payable in cash due to the toll it takes on the casters - only the most worthy (or heinous) applicants would be considered.

Monsters

Monsters are out there; ready to provide challenges, loot and death for unwary adventurers. As a game master, it is your duty to make these creatures interesting and memorable opponents. Monsters should be dangerous and not simply a source of experience and loot – the adventure will be more satisfying if it is hard won.

It is also probably best to have your monsters behave appropriate to their nature and not burst into coins and XP on their demise. A scheming vampire may not only be carrying a valuable magic item, it will use it in battle. A dumb beast is not likely to drop gold and treasures when killed, but their body may be valuable in it itself. Orcs do not generally roam around with pockets full of coins, however their leader may be carrying their loot, or know where it is hidden.

It is also important to maintain a tone of fear and wonder of dealing with monsters, and a good way to do this is by keeping them unknown and the situations unpredictable. Try not to name the monsters when describing them to your players, instead let the players determine what foes they face based on your descriptions. Have them track the beasts or nervously hear the sounds of their passage rather than calmly remarking “you see three orcs standing under the tree.” Even a lowly hobgoblin can be mysterious if it is presented as the snapping of a branch or the soft footfall around the corner.

As Beacon is mostly compatible with other d20 games you should be able to use monsters from them with little adjustment. However a bestiary of creatures is here provided using the following conventions to simplify monster statistics:

Monster stat blocks

Hit Dice: The prime attribute of monsters is their Hit Dice (**HD**), this is important to note for both the die type and number of dice.

HP/damage: The Hit Dice (**HD**) type determines dice to use to determine the number of **HP** a creature has and the damage a creature will do when it hits (**HD** type + number). For example

creature with **HD 2 d6** will have between 2-12 hp and roll 1d6+2 damage. Rule of thumb for HD type is **d1–d4** for small creatures, **d6** for small humanoids and medium sized animals, **d8** for large humanoids, **d10–d12** for huge creatures or undead, and **d20** for gigantic creatures like Dragons. **HP** values are given here for median and maximum based on the number of HD and the type. For quick encounters use the median and roll and additional couple **HD** to generate hp.

Attacks and special abilities: Since monster damage is determined by HD, most attacks are flavour, e.g. slam, bite, pointy stick. Multiple attacks or optional attacks will be noted. Special attacks like poison or stat drains will have a **DC** listed to resist them if applicable. Non attack special abilities like flying or invisibility are listed at the end of the block.

Skills: All creatures have a bonus to all skills (*Phys, Subt, Know, Comm, Survival, Fab*) equal to their number of **HD**. If the creature is intelligent, add +3 to one or more skills. Add stat bonuses to suit and as logic dictates. This is intentionally kept vague – if you need a sneaky bugbear, assign the +3 bonus to *Subterfuge*; if a warrior, give +3 to *Physical*.

Monster Advancement: To make a more dangerous monster, add more Hit Dice; each additional **HD** adds one to their skill and combat bonuses. If a creature is simply larger or tougher than normal increase the **HD** type. Alternatively, add class levels to intelligent monsters. Start with the base Hit Dice and add levels of Fighter, Rogue, Mage or Cleric as required.

Armour Class: For creatures who commonly use armour, **AC** is based on the *usual* armour type they would be wearing – adjust to suit. **AC** indicated with an * means that the creature resists *all damage* except for special cases e.g. silver, magic, angel feathers or fire.

Create your own: Assign **HD** type based desired on size/toughness and damage. Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter add +3 bonus to one skill. Add stat bonuses, armour or special effects to suit.

Animals

Ape: HD 4 d10 (22-40 hp), AC 14, slam + bite

Bat, Dire: HD 4 d6 (14-24 hp), AC 20, bite; blind sight.

Bear:

Black: HD 3 d10 (17-30 hp), AC 13, claw + bite.

Brown/Polar: HD 6 d12 (39-72 hp), AC 15, claw or grapple + bite.

Dire: HD 12 d12 (78-144 hp), AC 17, claw (x2) or grapple + bite.

Beetle, Giant: HD 1 d6 (4-6 hp), AC 16, bite.

Boar: HD 3 d6 (11-18 hp), AC 16, gore + kick

Cat: HD 1 d1 (1 hp), AC 14, claw + bite.

Centipede: HD 1 d1 (1 hp), AC 14, bite; poison (DC 11, 1 DEX)

Centipede, giant: HD 3 d4 (8-12 hp), AC 14, bite; poison (DC 16, 1d4 DEX).

Crocodile: HD 3 d10 (17-30 hp), AC 16, bite or tail slap.

Crocodile, giant: HD 6 d12 (39-72 hp), AC 16, bite or tail slap.

Dog: HD 2 d4 (5-8 hp), AC 15, bite.

Eagle: HD 1 d4 (3-4 hp), AC 14, claw + bite; flying.

Horse (light): HD 2 d10 (11-20 hp), AC 13, kick or bite.

Horse (heavy): HD 2 d12 (13-24 hp), AC 12, kick or bite.

Lion: HD 6 d12 (39-72 hp), AC 15, claw (x2) + bite.

Mule or Pony: HD 2 d8 (9-16 hp), AC 13, kick or bite.

Rat: HD 1 (1 hp), AC 14, bite.

Rat, Dire: HD 1 d8 (5-8 hp), AC 15, bite; disease.

Scorpion:

Tiny: HD 1 (1 hp), AC 14, sting; poison (DC 12, 1 STR).

Small: HD 1 d4 (3-4 hp), AC 14, claw + sting; poison (DC 12, 1 STR).

Large: HD 5 d8 (23-40 hp), AC 17, claw + sting; poison (DC 13, 1d6 STR).

Huge: HD 7 d12 (45-84 hp), AC 20, claw + sting; poison (DC 16, 1d8 STR).

Snake

Constrictor: HD 3 d8 (14-24 hp), AC 15, bite, constrict.

Giant constrictor: HD 8 d12 (52-96 hp), AC 15, bite, constrict.

Small viper: HD 2 d1 (2 hp), AC 17, bite; poison (DC 11, 1 STR).

Large viper: HD 3 d4 (8-12 hp), AC 15, bite; poison (DC 11, 1d6 STR)

Huge viper: HD 6 d8 (27-48 HP), AC 15, bite; poison (DC 14, 1d6 STR)

Spider:

Tiny: HD 1 d1 (1 hp), AC 14, bite; poison (DC 10, 1d2 STR).

Small: HD 1 d4 (3-4 hp), AC 14, bite; poison (DC 10, 1d3 STR).

Large: HD 4 d6 (14-24 hp), AC 14, bite; poison (DC 13, 1d6 STR).

Huge: HD 8 d8 (36-64 hp), AC 16, bite; poison (DC 16, 1d8 STR).

Wolf: HD 2 d6 (7-12 hp), AC 14, claw + bite

Wolf, Dire: HD 6 d8 (27-48 hp), AC 14, claw + bite

Creatures

Animated Object (sword, hat-rack, etc):

Small: HD 2 d4 (5-8 hp), AC 14, slam.

Medium: HD 3 d6 (11-18 hp), AC 14, slam.

Large: HD 4 d8 (18-32 hp), AC 14, slam.

Assassin Vine: HD 4 d8 (18-32 hp), AC 15, slam or constrict.

Behemoth: HD 7 d12 (46-84 hp), AC 20, tusks + slam; poison (DC 14, 1d6 STR).

Bugbear: HD 3 d8 (14-24 hp), AC 17 (chain), mace, club or javelin.

Carrion Crawler: HD 3 d8 (14-24 hp), AC 17, tentacles (x8), bite; paralysis (DC13); scent

Choker: HD 4 d6 (14-24 hp), AC 17, tentacle choke, or slam (x2); climbing.

Cockatrice: HD 6 d6 (21-36 hp), AC 14, bite + stare; petrification (DC 12); flying

Dryad: HD 2 d6 (7-12 hp), AC 12; spells as 5th level Enchanter

Elemental (large)

Air: HD 8 d8 (36-64 hp), AC 20, whirlwind (x2); flying.

Earth: HD 8 d12 (52-96 hp), AC 18, Slam (x2).

Fire: HD 8 d8 (36-64 hp), AC 18, Burn (x2).

Water: HD 8 d8 (36-64 hp), AC 20, Slam (x2).

Elemental (small)

Air: HD 4 d6 (14-24 hp), AC 17, whirlwind; flying.

Earth: HD 4 d8 (18-32 hp), AC 17, slam.

Fire: HD 4 d6 (14-24 hp), AC 15, burn.

Water: HD 4 d6 (14-24 hp), AC 17, slam.

Ettin: HD 7 d10 (39-70 hp) AC 18, great clubs (x2).

Gargoyle: HD 4 d10 (22-40 hp), AC 16, Claw (x2); flying.

Gelatinous Cube: HD 5 d10 (23-50 hp), AC 4, slam, engulf; paralysis (DC 20); acid.

Grey Ooze: HD 3 d10 (17-30 hp), AC 5, slam, constrict; acid.

Giant

Hill: HD 12 d12 (78-144 hp), AC 20, great-club or rock.

Stone: HD 8 d20 (84-160 hp), AC 25, tree or boulder.

Storm: HD 12 d20 (126-240 hp), AC 27, huge swords and bows; spells control weather, call lightning.

Golem:

Flesh: HD 7 d10 (37-70 hp), AC 18, slam.

Iron: HD 12 d12 (78-144 hp), AC 30, slam.

Stick: HD 4 d6 (14-24 hp), AC 14, slam.

Stone: HD 14 d12 (46-84 hp), AC 26, slam.

Great Worm: HD 16 d20 (168-320 HP) AC 19, slam, bite; (poison DC 24), digest.

Griffon: HD 7 d12 (46-84 hp), AC 17, bite, claw (x2); flying.

Hellhound: HD 4 d8 (18-32 hp), AC 16, bite + burning touch.

Hydra: HD 3 d10 +1 d10/head (17-30+x hp), AC 15, 1 bite/head or spit acid.

Magma Man: HD 4 d10 (22-40 hp), AC 14, slam, burn.

Manticore: HD 6 d10 (33-60), AC 17, bite, claw (x2), shooting spines (x6); flying.

Mud Man: HD 3 d10 (17-30 hp), AC 14, slam, suffocate.

Shadow: HD 5 d6 (18-30 hp), AC 13* (silver or magic), incorporeal touch.

Shambling Mound: HD 8 d8 (36-64 hp), AC 20, slam (x2), constrict.

Stirge: HD 1 d4 (3-4 hp), AC 16, bite (attach DC 15 to remove); flying.

Treant: HD 7 d12 (46-84 hp), AC 20, slam (x2).

Werewolf: HD 4 d8 (18-32 hp), AC 17* (silver, wolfsbane); wolf control; Human form: long sword or dagger; wolf form: claw + bite; Hybrid form: claw (x2) + bite; (lycanthropy DC 15).

Wyvern: HD 7 d12 (45-84 hp), AC 18, sting or talons and bite; sting poison (DC 17 1d6 STR); flying.

Demons & Devils

Demon:

Least: HD 2 d8 (9-16 hp) AC 15, claws (x2); darkness, curse, cause light wounds as 4th level cleric.

Minor: HD 4 d8 (18-32 hp) AC 19, claws (x2); darkness, curse, cause light/moderate wounds, paralysis as 8th level cleric.

Demon: HD 7 d8 (32-56 hp) AC 22* (magic/blessed), claws (x2) + tail; darkness, curse wounds, paralysis ...etc as 12th level cleric.

Greater: HD 12 d8 (54-96 hp) AC 26* (magic/blessed), claws (x4) + tail; darkness, curse, cause wounds, paralysis ...etc as 16th level cleric.

Lord: HD 20 d8 (90-160 hp) AC 35* (magic/blessed), claws (x6) +tail; darkness, curse, cause wounds, paralysis ...etc as 24th level cleric.

Devil:

Imp: HD 3 d8 (13-24 hp), AC 18, claw +tail sting; poison (DC 13 1d4/2d4 DEX)

Minor Devil: HD 6 d8 (27-48 hp), AC 20, claw (x2) + tail sting; poison (DC 14 1d4/1d4 STR), spell effects as 6th level mage.

Barbed: HD 13 d12 (84-156 HP), AC 30, claws (x2) + tail sting; poison (DC 21 1d4/2d4 STR + disease), spell effects as 13th level mage.

Pit Fiend: HD 20 d12 (130-240 hp), AC 30, claws (x2), tail sting; poison (DC 27 1d4/2d4 STR + disease), spell effects as 20th level mage.

Dragons

Young: HD 10 d20 (105-200 hp), AC 20, bite + claw + tail + breath (DC 15 to dodge for half); flying; arcane spells

Young Adult: HD 15 d20 (157-300 hp), AC 25, bite + claw + tail + breath (DC 20 to dodge for half); flying; arcane spells

Adult: HD 20 d20 (210-400 hp), AC 30, bite + claw + tail + breath (DC 25 to dodge for half); flying; arcane spells

Very Old: HD 30 d20 (315-600 hp), AC 35, bite + claw + tail + breath (DC 35 to dodge for half); flying; arcane spells

Humanoids

Dwarf: HD 2 d8 (9-16 hp), AC 16 (chain), war axe or light crossbow.

Elf common: HD 1 d6 (4-6 hp), AC 12 (leather), short sword or longbow.

Elf wild: HD 3 d6 (11-18 hp), AC 15 (scale), long sword or longbow.

Gnoll: HD 2 d8 (9-16 hp), AC 15 (chain), battle-axe or longbow and bite.

Goblin: HD 1 d6 (4-6 hp), AC 14 (leather), club or pointed stick.

Goblin chief: HD 3 d6 (11-18 hp), AC 14 (Leather), mace, sword or short spear.

Halfling: HD 1 d6 (4-6 hp), AC 16 (leather), short sword or short bow.

Hobgoblin: HD 2 d6 (7-12 hp), AC 15 (chain), sword, axe or javelin.

Hobgoblin, shaman: HD 3 d6 (11-18 hp), AC 12 (rags), staff; spells as 2nd level cleric.

Human, commoner: HD 1 d8 (5-8 hp), AC 10, Dagger or sling.

Human, ruffian: HD 2 d8 (9-16 hp), AC 12 (leather), Dagger, short sword or sling.

Kobold: HD 1 d4 (3-4 hp), AC 15 (padded), javelin or bite or sling.

Kobold skirmisher: HD 2 d4 (5-8 hp), AC 15 (leather), axe, short spear, sling or bite.

Lizard folk: HD 2 d8 (9-16 hp), AC 15, claw, club or trident.

Minotaur: HD 6 d8 (27-48 hp), AC 14 (leather), great axe (x2), or gore.

Ogre: HD 4 d10 (22-40 hp), AC 16 (splint), great club or spear.

Ogre Mage: HD 6 d10 (33-60 hp), AC 18 (Splint), great club (x2); spells as level 3 mage.

Orc: HD 2 d8 (9-16 hp), AC 13 (chain), falchion or spear.

Orc captain: HD 3 d8 (14-24 hp), AC 13 (chain), falchion or spear.

Ratling: HD 1 d4 (3-4 hp), AC 17, pointy stick, knife or bite.

Troll, rock: HD 8 d12 (39-72 hp), AC 21, branch, rock, claw (x2).

Troll, swamp: HD 6 d10 (33-60 hp), AC 18, claw (x2); regenerate 2 per turn.

The Undead

Banshee: HD 7 d12 (46-84 HP), AC 19, claws (x2), scream (DC 15 vs. *phys*+CHA or fear for 1d6+4 turns)

Ghoul: HD 2 d12 (13-24 HP), AC 14, bite or claws; paralysis (DC 15).

Mummy: HD 5 d12 (33-60 hp), AC 17, fists; rot (DC 20 *Phys*+STR, 1d4 STR/day); Cause fear as 5th level cleric.

Skeleton:

medium: HD 1 d12 (7-12 hp), AC 13, Scimitar or claw(s).

large: HD 2 d12 (13-24 hp), AC 13, club or claw(s).

Skeleton Mage: HD 6 d8 (27-48 hp), AC 14, fireball, lightning bolt, web as level 5 mage.

Vampire:

Young: HD 4 d12 (26-48 hp), AC 15* (silver, magic, light), Slam; plus energy drain -1 level, (DC 14 *survival*+CHA to negate) or bite; blood drain (-1d4 STR); regenerate 2 per turn; speed; level 1 Enchanter spells

Elder: HD 8 d12 (52-96 hp), AC 25* (silver, magic, light), Slam; energy drain -1 level, (DC 24 *survival*+CHA) or bite; blood drain (-1d4 STR), regenerate 4 per turn; speed; level 5 Enchanter spells.

Wight: HD 4 d12 (26-48 hp), AC 15, slam; energy drain (-1 level DC 14 *survival*+CHA).

Wraith: HD 5 d12 (33-60 hp), AC 15* (silver, magic, light), slam; incorporeal touch (-1d6 CHA, DC 14 *phys*+CHA to negate).

Wraith, dread: HD 16 d12 (104-192 hp), AC 25* (silver, magic, light), slam; incorporeal touch (-1d6 CHA&STR, DC 25 *phys*+CHA to negate).

Zombie,

medium: HD 2 d12 (13-24 hp), AC 11, slam, bite.

large: HD 4 d12 (26-48 hp), AC 11, slam, bite.

WarEngine RPG-SRDish

The Dice Mechanic only d6s are needed- the notation xky(+z) refers the number of dice rolled & the number of dice kept, e.g.: 5k4, roll 5d6 keep the highest 4. If a (+z) is shown then add the "z" amount to the kept die total. **Maximum kept dice are 5.**

There are 3 Attributes These also function as raw Df in various situations as mentioned below.

Fortitude= FRT Strength, Health, Stamina, etc.
- FRT is also basic Physical damage resistance.
When defending vs. a physical attack FRT is your Df.
- FRT kept die= Physical Soak & can be enhanced.
- Fort kept die also stacks with CC Av

Reflex= REF Reaction speed, Agility, etc.
- If you do not attack you may add REF to FRT Df.
- The kept die of this rating stacks with R Av.
- Movement in inches is equal the combined rating of Reflex, e.g.: 2k2= 4" of movement.
- REF may be used as Df vs. AET attacks. Success reduces the damage by 1/2.

Will= WIL Mental discipline, Awareness, etc.
- WIL is also basic Mental resistance. When defending against Mental attacks WIL is your Df.
- WIL kept die= Mental Soak & can be enhanced.
- WIL kept die stacks with Av for Mental attacks.

***Soak=** This is a static amount that buffers damage to your character. After Df is rolled Soak is subtracted before applying the result to the Wound Track. Note there is Physical and Mental Soak values, both of which can be enhanced through Tweaks.

There are 3 Aptitudes

Physical(PHY), Knowledge(KNW), Subterfuge(SUB)
These are applied as a fixed stacking bonus to an Attribute roll for appropriate tasks. Example, reading an ancient tome would be WIL + KNW. Scaling a wall would be REF + PHY. Picking a lock would be REF + SUB. See the Tweak Skill Focus for additional options.

The Game Turn

- 1.) **Initiative:** Reflex test, winner goes first
- 2.) **Attack/Move/Charge:** Attack, Move or Charge
- 3.) **Reserve Attacks:** an unused attack may be reserved – this attack can react to Aerial Moves, etc.
- 4.) **Follow-up:** ongoing effects continue

CHARACTER BUILDER Determine Attributes, Aptitudes & Tweaks. Point costs marked with an (*) may be purchased multiple times and the benefits stack.

ATTRIBUTES(Att)

~FRT, REF, WIL

Personal Tweaks - Overview

Personal Flaws

Coup Counter (-4pts) after CC victory may not move or attack until after the next Follow Up.

Glory Hound (-2pts) must attack target with best Df

Hard Luck (-8pts) Once per game, must re-roll at the request of opponent

Limited Maneuverability (-4pts) can only make 45 degree turns

Obvious (-6pts) Lt Cover = no bonus & Hvy Cover only = +1k1 Df

Ponderous (-12pts) only be activates every other turn

Rage (-5pts) must charge. *may not take R weapons*

Small (-8pts) Df 6s = 5

Stupid (-2pts) must pass a WIL test or lose actions

Summoned (-10pts) brought into play by Summoning

Combat Terminology & Clarifications

Move only whole moves, i.e.: move 5 1/4" = 6"

Aerial Moves (Discussed later in Powers)

Charging +1/2 Mv if charging into CC, Av is +1k1.

Line of Sight(LOS) ability to see a target

Base to Base contact(B2B) characters are in CC **Cover**

Light= bushes, trees, fences & so on, or heavy cover that obscures less than 1/2 a fig **Df+1k1**

Heavy= solid objects, stone wall, rubble, etc **Df+2k2**

Entrenching= heavy cover that is a prepared defensive position, like a trench **Df+2k2**

****Prone**= Going prone you present a smaller target, stacks with Entrenching Cover **Df+1k1**

*****Cover bonuses may violate the xk5 rule!**

Combat Process

Attack Value(Av) vs. relevant Defense Value(Df). After applying Soak record overflow on the Wound Track. Remember that Soak can be modified by Tweaks, Cover, etc. Note the penalties for the various wound states. These are subtracted from the kept die total.

WOUND TRACK:

1-5	FW: no effect				
6-15	LW: -1				
16-20	MW: -2				
21-25	CW: -4				
26+	INC				

Healing

Natural- Erase all FW boxes after an encounter.

Recover FRT kept die in LW boxes per day of rest.

Magical- The Healer must roll better than the minimum number in the range to heal the wound, i.e.: a 26 or better to heal INC, a 21 to heal a CW, etc. Overflow on a Healing test heals additional boxes.

Area Effect Weapons(AE)

Attackers select targets according to AE (2x, 3x, or 4x) & the AE Type (CC, EX, BU or LI). Attacker rolls Av & each defender rolls Df vs. the single Av roll.

Close Combat Area Effect(CC) target(s) in B2B contact (i.e. a 3x Attack can attack 3 times in B2B).
Explosive Area Effect(Ex) Ex AE have a 3" radius. Both CC & R weapons can take the Ex AE. For CC, the effect is centered on the attacker. Ex AE may not affect less than the maximum number of targets. .
Burst Fire Area Effect You must declare wide or narrow when purchasing this AE. **Wide Burst(Bu-W)** is only available to R weapons & affects a 3" radius. Bu-W AE may not affect less than the maximum number of targets, so friendlies will be affected too. All targets must be in LOS. **Narrow Burst(Bu-N)** Bu-N affects single targets. The target must roll Df vs. all attacks in the burst.

Linear Area Effect(Li) Li Attacks fire in a straight line, destroying all targets in the way until depleting their energy in multiple targets or reaching the limits of their R. Intervening terrain that would normally block LOS to additional targets halts the shot.

Suppression Effect Ex & Bu AEs cause suppression. Those in a suppressed area must perform a WIL test vs. the amount of damage. Those failing the WIL test must subtract the difference from all task attempts their next turn while in the area of the Suppression Effect. **Bonuses for Hard Armour, Toughness, etc. will stack with this WIL test.**

Aiming Attacks You may give up all actions to aim gaining a +1k1Av vs. your target next turn

Leaving Close Combat when you leave CC enemies in B2B gain an extra attack on you

Reserve Attack You may reserve any unused weapon. To use a reserved attack, you interrupt your enemy & attack. If your opponent is attacking you, your attacks are simultaneous

Advancement

Total the characters Build Total and multiply it by 10. When the character has defeated/overcome challenges equal to that amount it gains 6k5 additional Build Points. These points may be spent to enhance/advance the character's profile. They may also be used to permanently acquire found gear.

Iron Will (+4pts*) +1 to WIL Soak

Jump (+2pts) can jump across the battlefield - ignores Cover while jumping that would not provide cover from a raised position (such as low walls) note: only reserve attacks may target flyers/jumpers

Large (+8pts) FRT Df 1s = 2s

Lightning Reflexes (+6pts*) +2 REF Df & Initiative

Flight (+4pts) can fly - ignores cover that would not protect from a raised position (such as low walls) - max height is 18" - R is measured by height off the gaming surface & distance to target. note: only reserve attacks may target flyers/jumpers

Lucky (+14pts) may reroll once per turn

Lurker (+8pts) +1k1 Df in cover

Protective Field (+3pts) +3 Df kept total

Pulsating Force Shield (+6pts) -1 from every die of enemy attack.

Reflective Armor (+3pts*) +1k0 vs. Energy

Regeneration (+12pts) + FRT kept die in LW per turn

Sharpshooter (+4pts*) +1k0 Av R

Skill Focus (+2pts*) for each 2 build points invested you gain an additional +1 to a particular Aptitude-based task, e.g.: Lock Picking, Carousing, etc.

Slippery (+1pt) exit CC without being attacked

Stealthy (+8pts) WIL test to detect Stealthy figs in MV radius. If the stealthy character did not move or is in Hvy or Entrenching Cover, the test is -1k1. WIL tests must be made for every attack, even if the Stealthy character was previously detected.

Toughness (+4pts*) +1 to FRT

Weapon Master (+4pts*) +1k1 with any CC weapon

ATTACK BUILDER Both Powers & Attacks use these options. Defense vs. Powers uses WIL unless the target is willing. Use your imagination when designing Attacks. They may be described simply as in “**Sword**” or “**Arcane Blast**”. But, descriptive and colorful names such as “**Pugilistic Onslaught**” or “**Infernal Vortex**” would be more appropriate at higher levels of power. The system is abstract, so for purposes of RPGing, creative “fluff” is very useful. Assume durations when necessary equal the kept die of the Attack/Power in turns.

The first step in building an Attack/Power is to determine its range, then Attack Value and finally, Area Effect (if any).

RANGE (R)		ATTACK VALUE (Av)		AREA EFFECT (AET)	
R	Pts	AV	Pts	AE	Pts
6"	6	1k1	4	2x	1.5
12"	10	2k1	6	3x	2
18"	14	3k2	10	4x	3
24"	18	3k3	12		
30"	22	4k3	14		
36"	26	4k4	16		
42"	30	5k4	18		
48"	34	5k5	20		
Los	42	6k5	22		

AE is calculated differently than other characteristics since it is a multiplier. Select the number of targets the attack may affect. An AE of 2x means two figures, etc. Multiply the total spent on R & Av by the amount shown. The result is the new total cost for the attack, except for tweaks you may add later. Notice that the Area Effect multiplier is applied before you add tweaks.

AREA EFFECT TYPES (AET)

AET	Name	Notes
CC	Close Combat	CC only, allows the fig to attack multiple targets in CC with a single blow
Ex	Explosive	Any weapon, explodes on the target affecting additional targets closest to the primary target
Bu	Burst Fire	R only, sprays a large number of projectiles, potentially hitting a cluster of targets
Li	Linear	R only, hits a series of targets in a line from the shooter regardless of distance between them

Attack Tweaks - Overview

Attack Flaws

Heavy Recoil (-1pt) When fired, move the figure firing it 1" away from target – does not count for purposes of the Move or Fire flaw.

Move or Fire (-6pts) attack is unwieldy - may not be fired if you moved on the previous turn

One Shot (-12pts) may only be used once per game

Slow Attack (-2pts) may never be placed on reserve

Slow Reload (-6pts) may only fire every other turn

Time Delay (-2pts) attack resolved during Follow Up

Under Powered Weapon (-2pts) all 6s = 5

Attack Edges

Accurate Attack (+2pts) +1k0 Av

Anti-Air (+5pts) R attack aerial targets without reserve, +1k1 Av vs. flying or jumping

Armor-Piercing (+12pts) R +1k 1+4 kept total Av vs. targets with a Df Armor Bonus only - allows violation of the xk5 dice rule.

Ballistic Attack (+0pts) Attack is a Ballistic Projectile

Charging Weapon (+6pts) CC if charging 1s & 2s= 3

Defense Only (+2pts) CC this trait forces an attack to be used only for defense - bonus stacks with Df Max Stats 2k2 (e.g.: a Shield)

Energy Attack (+0pts) Attack is a burst of Energy

Entangling (+4pts) CC Entangles the target, preventing it from escaping and hampering its movements. The target may not leave CC, even if it has Slippery. It also rolls Df against further CC at -1k1. These effects last until the target is destroyed, the user makes another attack with the Entangling weapon, the user is no longer in CC with the target, or the user chooses to let the target go.

Entangling Ranged (+5pts) R Entangles the target, preventing it from acting on its turn and hampering its movements. It also rolls Df against further CC with a -1k1 penalty. These effects last until the end of the targets next action.

Extra Bite (+2pts) Av 1s become 2s

Expanded Area (Ex) (+4pts) 5" Ex AET

Highly Accurate (+4pts) +2k0 Av

Ignores Basic Cover (+8pts) ignores Lt Cover - targets may take the prone bonus

Ignores Advanced Cover (+12pts) ignores Lt & Heavy Cover - targets may go Prone - Entrenching Cover provides a +1k1

Immolation (+12pts) some other persistent damaging noxious effect like acid, toxic gas, disease, or the like eats away at the target. During the Follow Up step, any target attacked must defend again. The Av used is the weapon's basic Av -1k1. The Df used is the target's basic Df with no adjustments.

Indirect Attack (+4pts) R Attacks with this weapon are created by firing in an indirect manner. It may fire over interceding terrain removing the cover bonus of a viewed target. (Such as behind a stone wall) This weapon may fire at unseen targets by targeting an area on the board (Example a hut with possible figures hiding inside). Weapons of this type may not make a direct fire attack. When making an indirect fire attack the figure needs to roll a WIL-2 check for the accuracy of the shot. (A static roll of 10) If passed the shot is on target, if failed the shot must roll for deviation. The weapon using this trait must have area-effect. Deviation is achieved by rolling d6, each face representing 60 degrees.

Long (+6pts) CC may CC within 2"

Mental Attack (+12pts) must defend with WIL

Missile Weapon (+0pts) R Attack is a missile

Multi-profile (+5pts) The attack has more than one profile - in a particular turn, the attack may only use one of the profiles. The weapon's cost is that of the highest profile plus the points for Multi-profile. Each profile may include weapon tweaks. This tweak can be used to represent a weapon that has different kinds of attacks available, like a huge club, which can either sweep attack several enemies or smash a single one with a more powerful blow. Alternatively, it can represent two or more weapons that are exclusive of one another in a particular turn.

Overpowered Weapon (+4pts) a superior design - all 1s = 3s for Av. Cannot be combined with Extra Bite.

Parry Weapon (+2pts) CC +1k0 FRT Df

Piercing Attack (+6pts) +4 Av

Pulse Attack (+12pts) R re-roll a 2nd attack, +1k1+2

Superior Parry Weapon (+4pts) CC +2k0 FRT Df

Very Long (+9pts) CC may CC within 3"

Vs. Weapon (+2pts) +1k1 vs. a particular type of opponent, such as Undead, Dwarves, Ethereal, etc.

List of Powers

Animate Dead (+10pts) Animate AE dead figures - undead must remain in range of the animator or control will be lost and the dead figure will attack nearest figure. Undead use basic 2k1 for all stats.

Astral Projection (+5pts) sends forth a shadowy remotely controlled other self - Powers may come from the user or the projection - it is destroyed by WIL attack vs. user - also removed if outside of R - Powers or non-mental weapons do not effect it - may only have one projection active at a time.

Banish Spirit (+18pts) forces the spirit of the target (animate or otherwise) to exit its physical form - if successful the target is destroyed

Battering Waves (+8pts) a crushing wave of force smashes a 6"x2" area - reduces cover value 1 step

Bless Weapon (+5pts) CC weapon = Charging Weapon Edge

PsyShriek (+10pts) a mental shriek stabs the target's brain - loses next activation & any reserve

Control Figure (+15 pts) controls the target

Drain Power (+10pts) target loses a Power/Edge of user's choice

Earth Sense (+8pts) negates Stealthy bonus

Guide Attack (+10pts) next attack is +1k1 Av & R +12". (this power violates the #k5 die rule.)

Illuminate Enemy (+8pts) target is outlined by a glow - attacks vs. = +1k0 Av

Illusinary Swarm (+8pts) target believes it is being attacked by hordes of vermin - next activation, it must attack the closest figure (friendly or otherwise)

Invigorate (+10pts) + 1K0 REF, FRT or WIL temporary buff

Invisibility (+15pts) may not be targeted without Eagle Eye or equivalent

Wrack Construct (+8pts) Constructs lose all reserve & may not activate for the turn

Healer (+8pts) can only be done if injured is in B2B – (see Wound Track on opposite)

Null Field (+5pts) immune to Powers

Pounding Rage (+5pts) +1k0 in CC

Protection (+8pts) immune to Powers /+1k0 Df

Psychic Shield (+10pts) +4 WIL Df

Remove Earthen Barrier (+10pts) terrain or cover no greater than 6"x2" is destroyed

Restore (+14pts) stops any continuous effect - also functions as Healer (may be R)

See the Future (+12pts) glimpse the stream of possible futures (wins the next Initiative)

Shield of God (+5pts) protected by a blinding dazzle of light (Lt Cover)

Shove (+10pts) targets within 3" are flung R - taking a 2k2 hit - if they hit another target both take 2k2

Skulk in Shadows (+5pts) gains Stealthy Edge

Static Charge (+10pts) auto 2k2Av CC electrical zap when in B2B

Stone Skin (+5pts) +1k1 Df

Summoning (+10pts) able to Summon figures

Telepathy (+8pts) probe minds= +1k0 all actions

Teleport (+15pts) target is instantly transported to any location in R, may not be used to insta-kill

Terror (+5pts) -2k0 Av

Wall of Force (+8pts) a wall of force 12" long & 1" deep, deflects Attacks and Mv but not Powers

Wall of Fire (+8pts) a wall of flame 12" long & 1" deep, any moving through it take an Av 5k4 hit - blocks LOS

Wall of Spewing Filth (+10pts) a 6"x2" wall of filth, any moving through it must spend the next turn cleaning their eyes, nostrils & weapons - blocks LOS

War Chant (+5pts) 1s = 2s until the end of the turn

Wave (+5pts) a wave of force, any hit by the wave are moved 3"

Wrath (+15pts) enemies are knocked prone

YAMATO M20

Introduction

Yamato m20 is a Role-Playing Game set in legendary Japan where players take the roles of samurai, ninja, monks and mystics. Heroic conflict and political intrigue await the characters who must depend on their weapons, their honor and their connection with the spiritual world to defeat their adversaries.

Yamato m20 uses the Microlite20 (m20) system. M20 is a rules-lite version of the 3.x Fantasy System Reference Document (SRD). Game Masters (GM) and players can use SRD and SRD-compatible resources with minimal or no conversion. The SRD and a copy of Oriental Adventures or Rokugan Campaign Setting are recommended.

Stats

Each character has 3 stats: Strength (STR), Dexterity (DEX) and Mind (MIND). To generate stats for a character, roll 4d6 and drop lowest die. Total the remaining 3 dice and allocate the result to one of the stats. Repeat for remaining stats.

Each stat has a corresponding stat bonus:

Stat bonus = (STAT-10)/2, rounded down

Races

All player characters are human and get +1 to all skill rolls.

Skills

Each character has 4 skills: Physical (PHYS), Subterfuge (SUB), Knowledge (KNOW) and Communication (COMM). Roll

higher than the GM-determined Difficulty Class (DC) to succeed at a skill roll.

Skill rank = any bonus due to your class, race or clan/caste.

Skill roll = d20 + skill rank + class level + appropriate stat bonus is most applicable to the use + situation modifiers.

For example, Climbing would use PHYS + STR bonus.

Dodging a falling rock is PHYS + DEX bonus. Finding a trap is SUB + MIND bonus. Disabling a trap is SUB + DEX bonus.

Note that there are no "saving throws" in this game. Use PHYS + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your class level.

Contest of Skills: Some situations call for a resolution other than rolling against a DC. When two opponents vying directly

against each other (arm-wrestling, grabbing a sacred idol, playing Go), have them each do a skill roll. Many contests of skills will be PHYS+DEX, but a game of Go would be KNOW+MIND. The highest skill roll wins.

Aspects and Unmei Points

Aspects are a collection of traits that help describe the character's background, motivation or appearance. An epithet, quote, relationship, possession, or anything else can be an Aspect. Characters start with seven Aspects at 1st Level and can gain more with Level advancement. For each Aspect, a player gets an Unmei Point (perhaps measured with a poker chip or other counter) at the beginning of each session. At the beginning of each session, or if enough in-game time has passed determined by the GM, a player's Unmei Points are reset.

The best aspects are the ones that can both help and hinder a character. Interesting aspects provide the most opportunity for a player to use and gain Unmei Points. The GM should grant more leeway for aspects that make the gaming session more interesting and enjoyable.

Invoking an Aspect

At any time during the session, the player may invoke an Aspect after any die roll by describing how it comes into play and spending an Unmei Point. If the Unmei point is used for something simple (the PC needs just one more flask of oil) and has the aspect "Gear: Encumbered because I travel with everything", the GM simply declares that the PC succeeds. If the Unmei point is used for something requiring a roll, the PC will get a re-roll. The PC can take the highest roll. If the rolls were equal, then the PC gets the result of the roll +1.

The GM may also invoke that character's Aspect(s). Non-player characters, monsters and Kami (spirits) may invoke appropriate aspects. If the player refuses, then she must spend an Unmei Point; if she accepts the consequences, then she gains an Unmei Point. This provides dramatic interest in the PC's flaws and well as allows the players to gain more Unmei points during play.

Tagging an Aspect

Players can spend an Unmei point to invoke an aspect, which is not on their own character sheet, if they know what the aspect is. This is referred to as tagging an aspect. Situations, other characters, locations, and other things of dramatic importance can have aspects. Sometimes they're obvious, and sometimes they're less so. Kami are a great way to use tagged aspects since they inhabit every part of nature (a river, a mountain, animals).

As a rule of thumb, tagging someone or something else's aspects requires a little more justification than invoking one of your own aspects. It should be some way to really bring in the visual or theme that the aspect suggests. For aspects on opponents, the player needs to know about the aspect in the first place, and then play to it.

Starting Aspects

All characters start with Aspects for Gear, Wealth, Religion and Clan/Caste. Many will have Honor/Bushido or Taint (corrupted by evil Kami). A character will have seven aspects at 1st level.

Clans and Castes

Clans and Castes are Aspects that also give a bonus to one skill. The default time period for Yamato m20 is the Heian Period (8th to 12th Century AD). The clan and caste names can be changed to fit other periods of Japanese history. If a character changes his or her clan or caste, the skill bonus will not change.

Yamato Clans and Castes

Fujiwara Clan (+1 KNOW, Keepers of the culture and power of the Empire)

Taira Clan (+1 PHYS, Clan of warriors)

Minamoto Clan (+1 COMM, Diplomats between clans)

Tachibana Clan (+1 SUB, influence in regions outside the Imperial Court)

Ronin (+1 SUB, Bad Reputation, Masterless)

Buraku (+2 SUB, Very Bad Reputation, "Untouchable").

Buraku will also have the Aspect: Wealth – Poor.

Commoner (+1 to skill of their choice). Commoners will also have the Aspect: Wealth – Poor

Religious Order (+1 to skill of their choice).

Classes

There are seven classes. Players choose a class for their character. Characters begin at Class Level 1.

Bushi

Bushi (warrior) can wear armor of any kind. They have a +3 bonus to PHYS and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on. It is a crime to wear Samurai armor (see Armor section).

Nusutto

Nusutto (rogue) can wear light armor. They have a +3 bonus to Subterfuge. If they successfully Sneak (usually SUB+DEX, but depends on situation) up on a foe they can add their SUB skill rank to the damage of their first attack.

Common Aspects: Bad Reputation, Taint.

Ninja

Ninja wear no armor. They have a +3 bonus to Subterfuge and can fight unarmed (kicks, punches, etc) doing d4 damage (STR bonus to damage still applies). Their unarmed damage increases every four levels starting at the fourth level as shown in the following table:

Level	1	4	8	12	16	20
Damage	1d4	1d6	1d8	1d10	2d6	2d8

Their attacks count as magical after 5th level.

They gain an AC bonus equal to their level divided by 3 (rounded down) provided they are wearing no more than loose fitting clothes.

If they successfully Sneak (usually sub+DEX, but depends on situation) up on a foe they can add their Subterfuge skill rank to the damage of their first attack. This increases by +1 at 5th level and every five levels on.

Required Aspects: Gear: travels light, loyalty to my master

Common Aspects: Bad Reputation, Taint.

Samurai

Samurai can wear armor of any kind. They have a +3 bonus to PHYS and add +1 to all attack and damage rolls. This increases by +1 at 4th level and every four levels on. Samurai add +1 to attack and +2 to damage rolls when using a katana. Samurai add +1 to attack and +1 to damage rolls when using a bow.

Required Aspects: Bushido (Honor, Loyalty, Frugality, Honesty)

Common Aspects: Gear - Travels Heavy, Religion - Buddhist.

Shugenja

Shugenja (priest) wear no armor. They cast Shugenja spells and gain +3 bonus to Communication. They can cast any Shugenja spell with a spell level equal or below ½ their class level, rounded up. A Shugenja must pick one favored element. He or she must then also choose a prohibited element. Spells from this element are easier to cast, costing 1 less HP to use. A Shugenja cannot cast spells from the prohibited element.

A Shugenja can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Aspects: Travel light. Religion – Shugendo. Often has Honor. Evil Shugenja will have Taint. Clan – Religious Order.

Sohei

Sohei (warrior-priest) can wear armor of any kind including Samurai armor. They have a +3 bonus to PHYS and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on. Sohei add +1 to attack and +2 to damage rolls when using a naginata Beginning at 4th level. Sohei can cast any Shugenja spell with a spell level equal or below ¼ their class level, rounded down. They cannot cast spells of 5th level and higher. They can cast spells only from the Water element.

A Sohei can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead + 2. If the DC is

exceeded by 10 it is destroyed. This can be used (Level) times per day.

Required Aspects: Bushido (Honor, Loyalty, Frugality, Honesty), Religion – Buddhist (zealot). Clan – Religious Order

Yamabushi

Yamabushi (monk) wear no armor. They have a +3 bonus to PHYS and can fight unarmed (kicks, punches, etc) doing d6 damage (STR bonus to damage still applies). Their unarmed damage increases every four levels starting at the fourth level as shown in the following table:

Level	1	4	8	12	16	20
Damage	1d6	1d8	1d10	2d6	2d8	2d10

Their attacks count as magical after 3rd level.

They gain an AC bonus equal to half their level (rounded up) provided they are wearing no more than loose fitting clothes.

Yamabushi can use DEX bonus + level instead of STR bonus + level as melee attack bonus if unarmed.

Yamabushi make multiple attacks per round by taking -2 on the first attack, -4 on the second attack, and so on, as long as their melee attack bonus is positive.

A Yamabushi can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level) times per day.

Required Aspects: Honor, Gear - Travels light, Wealth: Relies on the help of others, Religion – Shugendo, Clan – Religious Order

Religion

All characters must choose a religion as an Aspect. The religious choices are Buddhist, Shinto or Shugenja. Most characters typically will practice elements from both Buddhism and Shinto. The Shugenja religion takes elements from both Buddhism and Shinto and is typically practiced only by Shugenja and Yamabushi. Fervor in one's chosen religion can vary widely.

Look in the References section for resources describing these religions.

Kami

Kami are Shinto spirits that reside in everything, particularly in nature. Natural phenomena (thunder, wind), natural objects (mountains, trees, the sun, animals), spirits of one's ancestors are all kami. Some kami are deities or represent human qualities such as wisdom, fertility and war. Most kami are not corporeal and remain unseen. However, some kami may decide to take a physical form, often in the form of an animal, to communicate directly to the characters. In game terms Kami provide many opportunities for characters to use their Unmei points. Using one's knowledge of the surroundings and situation, a character may be able to use Unmei points to invoke a kami who is willing to help. Also, a GM may use evil or mischievous kami to hinder the characters. While Kami are a central part of the Shinto religion, characters of other religions can still Invoke a Kami since most characters will be familiar with this element of Shinto.

Level Advancement

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 akki = EL1. 2 akkis = EL2. 4 akkis = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds:

+1d6 to Hit Points

+1 to all attack rolls

+1 to all skill rolls
