Color Spray: A sheet of bright conflicting colors affecting 1-6 levels/hit dice of creatures (plus 1 level/hit dice for every 5 levels of the caster), rendering them unconscious (for 1

minute/caster level) through confusion. Targets selected randomly. No saving throw if fully affected. Creatures not fully affected get a save with +1 per level/die after the first not affected. Creatures over 6th level not affected. R: 240 feet.

Darkness: Magical darkness which even blocks infravision and darkvision within a circle with 30 ft. radius. R: 120 feet. D: 1 hour+10 min/caster level.

Detect Illusion: Detects any illusion for what it is. R: 60 feet. D: 30 minutes.

Detect Invisible: Detect invisible items and beings within 10 feet per caster level. D: 1 hour.

Gaze Reflection: A spell that simply acts as a perfect mirror, reflecting the gaze of a creature such as a Basilisk or Medusa as if a mirror was in front of their eyes. R: 80 ft. D: 10 minutes.

Hypnotism: Acts like a Charm person spell with a +2 chance of success, it is necessary for the subject to look the Illusionist in the eyes. R: 80 ft.

Light: Object lights circle with 30 ft. radius, not full daylight. R: 120 feet. D: 1 hour+10 min/caster level.

Mirror Image: Creates 1d6-1 exact images of the caster, all moving exactly like original. Attackers cannot tell images from original. Images hit disappear. R: around caster. D: 1 hour.

Phantasmal Forces: Vivid illusions of nearly anything the caster envisions, lasts as long as the caster concentrates. Damage caused is real if the target believes illusion. R: 240 feet.

Read Magic: Read scrolls, spellbooks, other magical writing. R: Caster Only. D: one reading (two scrolls or equivalent).

Ventriloquism: allows caster to "throw his voice" absolutely convincingly. R: 90 feet. D: 50 minutes.

Wall of Fog: Creates an opaque wall of rolling, boiling fog with no other effect than blocking vision. Wall lasts as long as caster concentrates on it. R: 160 feet.

2nd Level

Blindness: Causes the target to become blind (if save failed). R: 120 feet. D: until cancelled by caster or dispelled.

Blur: Caster's appearance is blurred, making -2 on being hit, and +2 on saves vs. magic. R: self. D: 10 times 1d4+4 minutes.

Deafness: Causes the target to become deaf (if save failed). R: 120 feet. D: until cancelled by caster or dispelled.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Dispel Illusion: Automatically dispels any illusion caused by a non-Illusionist. Versus those created by Illusionists, it functions like Dispel Magic. R: 120 feet.

Fog: A cloud of opaque fog that acts like a Cloudkill except that is has no effect but to obstruct vision. 30 feet in diameter, moves with wind or 6 feet per minute. D: 1 hour.

Hypnotic Pattern: A pattern that the Illusionist projects in front of him that will hold anyone looking at the pattern motionless. It can catch 4d6 1st level types, 3d6 2nd level types, 2d6 3rd or 4th level types, 1d6 5th or 6th level types. R: 120 feet. D: as long as caster concentrates plus 1d6+3 turns afterwards.

Improved Phantasmal Forces: As regular Phantasmal Forces but the caster can move while employing the spell and the illusion will last up to 30 minutes after the caster has stopped concentrating. R: 360 feet.

Invisibility: Subject is invisible until spell broken by caster, some outside force, or until subject attacks. R: 240 feet.

Magic Mouth: Mouth appears on target object and delivers up to 30 word message when conditions set by caster are met. R: touch. D: permanent until triggered or dispelled.

Misdirection: cause a detect spell (Detect Good, Evil, Magic, etc.) to malfunction. (Magic Attack vs. Spell's DC for success) R: 120 feet. D: instant but effects permanent.

Rope Trick: Caster tosses rope into the air. It hangs there. Caster and up three others can climb rope into a hidden pocket dimension at top. Rope can be pulled up or left out. R: rope toss. D: 60 minutes + 10 minutes/caster level.

3rd Level

Continual Darkness: Magical darkness which even blocks infravision and darkvision within a circle with 120 ft. radius until dispelled. R: 120 feet.

Continual Light: Object lights circle with 120 ft. radius until dispelled, full daylight. R: 120 feet.

Dispel Exhaustion: This spell temporarily gives its recipient the

illusion of being well rested and healthy, restoring the target to full hit points, but the target will be totally exhausted and unable to do anything for 8 hours when the spell expires. If the target has taken body damage, the target immediately suffers an additional 1d2 points of body damage. D: 4 hours

Fear: Causes creatures who fail their saving throw to flee fear. Affect 4d10 1st level types, 3d10 second level types, 2d10 3rd level types, 1d10 4th level types, 1d6 5th level types, 1d4 6th level types. R: 180 feet. D: 10 times 1d6+level minutes.

Hallucinatory Terrain: Makes one type of terrain appear like another type until dispelled or area entered by an opponent. R: 240 feet

Illusionary Script: Allows the caster to write in a script which can only be read by whom the caster sets it to be read by (like Magic Mouth), any others who attempt to read it must save vs. magic or be confused for 6d10 minutes. One spell is suitable for a full page per level of the caster of writing.

Invisibility 10' Range: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until one attacks.

Non-Detection: Prevents Detection spells from working against the target using it and acts like an Amulet vs. ESP and Crystal Balls. R: touch. D: 20 minutes/caster level.

Paralyzation: Paralyzes twice as many hit dice as the caster's level. R: 180 feet. D: until dispelled or caster removes it.

Phantasmal Killer: Creates an illusionary horrible beast formed from the target's own fears whose touch causes death. The beast is visible only to the target and is immune from all attacks and barriers as it exists only in the target's mind. Target must save vs. magic twice. If the target fails one save, he is unconscious for 1d6 hours. If both saves fail, the target is dead. Range: 60 feet.

Spectral Forces: As Improved Phantasmal Forces, but includes sound, smell and temperature illusions. Spectral Forces are not destroyed by touch and they last up to 50 minutes after the caster has stopped concentrating. R: 360 feet.

Suggestion: Caster makes 1-2 sentence hypnotic suggestion to target. If save failed, target will carry out suggestion for up to duration. Only 1% chance target will obey suggestion that obviously would result in target's death/extreme injury. R: 30 feet. D: 1 week.

4th Level

Arcane Magic: Learning this spell allows the Illusionist to learn and use all 1st level magic-user spells. He must seek these spells in the same manner as a magic-user. They are considered 4th level spells for casting cost purposes.

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Emotions: Projects a selected emotion. The emotions that can be projected are: Fear (as the spell), Battle Lust (makes men fight as Berserkers, can be countered by Fear; if Fear is thrown first, Battle Lust does not counter it), Deprivation (lowers morale by 75%), Bravado (give immunity from Fear, Bravado which can counter Deprivation), Hate (interpretation by the subject is variable, roll d20: 1-4: hate any enemy around; 5-8: hate each other; 9-14: hate both enemy/each other; 15-16: hate selves, 17-20: hate caster. A person under the influence of a hate will attack whoever the die roll indicates). R: 180 feet. D: concentration.

Improved Invisibility: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until 1d4+caster level minutes after the first attack is made by one under this spell.

Massmorph: Makes up to 100 humanoids appear to be trees until dispelled or negated by caster. Creatures may move and still appear to be trees. R: 240 feet.

Minor Creation: Allows the caster to create materials up to a hardness comparable to wood (much like a Djinn). The total amount of weight an illusionist may create in a day equals 5 pounds times the caster's level. R: touch. D: 4 + level days (longer for softer materials).

Shadow Magic: This spell allows the illusionist to cast semi-real offensive spells which mimic the following real offensive spells: Lightning Bolt/Fire Ball (1d6 damage per 4 caster levels) or Death Spell (Affects 1d8 creatures of 1 HD). R: as original spell D: instant but effects permanent.

Shadow Monsters: This spell allows the caster to conjure semi-

real monsters. Monsters summoned have 20% the number of HD of the original (Original HP X 0.2. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 9 [10], and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet: D: 1 minute/caster level.

5th Level

Advanced Arcane Magic: Learning this spell allows the illusionist to learn and use all 2nd level magic-user spells. He must seek these spells in the same manner as a magic-user. They are considered 5th level spells for casting cost purposes.

Chaos: This spell affects a 30 foot x 30 foot area. All those caught within the affected area will become confused until they leave the area. Fighters and Illusionists over the caster's level are not affected by this spell. R: 120 feet. D: concentration.

Create Spectre: This spell creates a spectre from a target deceased person. The spectre has Hit Dice equal to 1/2 the deceased character's level (rounded up). The deceased character must have been at least 2nd level in order to be raised as a spectre. The spectre is raised with both its mind and memory intact (and does not automatically become evil). The spectre retains its independence. The deceased must be raised within 24 + 6 times the caster's level turns from the target creature's death. R: 10 feet. D: Permanent.

Major Creation: Allows the caster to create materials up to a hardness comparable to iron (much like a Djinn). The total amount of weight an illusionist may create in a day equals 15 pounds times the caster's level. R: touch. D: 4 + level days (for wood hardness, longer for softer materials, shorter for harder materials).

Projected Image: Project an image of yourself that can sense and talk as if you were the image. Other spells cast come from image. R: 240 feet. D: 1 hour.

Shadow Magic II: This spell allows the illusionist to cast semi-real offensive spells which mimic the following real offensive spells: Lightning Bolt/Fire Ball (1d6 damage per 2 illusionist levels) or Death Spell (Affects 1d8 creatures of up to 2 HD).

Shadow Monsters II: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 40% the number of HD of the original (Original HP X 0.4. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 11, and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to 1.5 times the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute per level.

Summon Shadows: Similar to an Invisible Stalker spell, but summons Shadows instead. The number of Shadows summoned is equal to 1 + 1 per level over 5. D: until mission completed.

6th Level

Conjure Animals: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the caster. R: 30 feet. D: 100 minutes.

Mass Suggestion: Area version of the suggestion spell, affecting 1d8 creatures or 1 creature at -4 saving throw. The same suggestion must be made to all on whom it is cast. R: 30 feet. D: 1 week.

Permanent Illusion: As Spectral Forces, but lasts until dispelled. R: 360 feet. D: Until dispelled.

Programmed Illusion: As Spectral Forces, but illusion performs pre-set instructions without the caster's concentration. For example, a dragon flies to the camp, circles it for 30 minutes, roars every other pass, then flies off while the Illusionist escapes. R: 720 feet. D: 120 minutes.

Shadow Monsters III: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 20% the number of HD of the original (Original HP X 0.6. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 12, and do not possess any of the original monster's special abilities (unless the

victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to 2 times the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute per level

True Sight: Spell increases target's sight. A polymorphed creature or object will appear as it really is, superimposed with its present form. When looking at a person one may tell his class, level, and general intentions. One may also see invisible, displaced, ethereal and astral objects. R: touch. D: (level - 10) + 1d6 10 minute turns.

7th Level

Alter Reality: Works like the Magic-User spell Limited Wish, but the caster must first cast an illusion of what is being wished for, then cast the Alter Reality spell on the illusion to turn it into reality. R: variable. D: variable.

Astral Spell: The caster projects his astral form into other places; the astral form is invisible to all creatures but those also on the astral plane. If the caster's physical body is moved beyond the range of the spell from its original location while the astral form is away, the link is sundered and the caster's soul becomes lost in the beyond. The spell range has no other effect. The astral form is capable of casting spells, but there is a 5% chance per spell level that the spell will fail. Additionally, there is a 2% chance per spell level of the attempted spell that the astral spell itself will falter as a result of the spell casting, and the astral form will return to the physical body. When astral traveling above the ground, the astral form may travel as fast as 100 miles per hour per level above 18th. If the form is traveling underground, its top speed is 120 feet per 10-minute turn. With special study, this spell can also be used to travel to other planes.

Maze: This spell puts its victim in an extra-dimensional maze. After the determined time has elapsed the creature will reappear at the spot where it disappeared. Creatures with intelligence of 12 or better will require 1d4 10 minute turns to escape, those with intelligence under 6 will require from 1d4+8 10 minute turns to escape, others require 1d4+4 10 minute turns to escape. R: 60 feet.

Prismatic Spray: Creates a stream of rainbow colored energy, 90 feet long, 10 feet wide. Roll 1d8 for each being/object hit by it. On a roll of 1 to 7, the effects are as if the being/object passed through the corresponding layer in a prismatic wall. A roll of 8 means the being/object has been hit by two colors, roll again twice, ignoring 8s. R: 90 feet. D: instant but effects permanent.

Prismatic Wall: As the Magic-User spell Prismatic Sphere, but in the form of a wall. R: 60 feet. D: 1 hour.

Vision: If an Illusionist wishes guidance from those above, he formulates his question, then casts this spell. Random reaction dice are rolled, and +2 are added to the result. On a negative reaction, the Illusionist is quested to do some task; on a neutral reaction, the caster gets useful information, but not what he asked for; on a positive reaction, the caster's question is answered in great detail. R: caster. D: 1 question.

Divine (Cleric) Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Cure Light Wounds (Reversible): Cure 1d6+1 hit points of wounds. R: touch. D: instant but effects permanent.

Detect Evil (Reversible): Reveals evil thoughts/intent or evil items. R: 120 feet. D: 1 hour.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Light (Reversible): object lights circle with 20 ft. radius, full daylight. R: 60 feet. D: 2 hours.

Protection from Evil (Reversible): +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters. R: shell around caster. D: 2 hours.

Purify Food & Water (Reversible): Purifies food and water for up to 12 people. R: 10 feet. D: instant but effects permanent.

2nd Level

Bless: Allies gain +1 on attack rolls, saves against fear, and morale checks. Cannot be cast in combat. R: 10 feet. D: 1 hour.

Find Traps: Notice traps within 30 feet. R: caster. D: 20

minutes.

Hold Person: Paralyzes 1-4 targets. Cast at single target, save at -2 and double duration. R: 180 feet. D: 90 minutes.

*Silence, 15' Radius**: Magical silence for 15 feet around target, moving with target. No sound within area can be heard from outside it. R: 180 feet. D: 2 hours.

Snake Charm: 1d6 snakes/level charmed and will obey caster's commands. R: 60 feet. D: 20 minutes + 1d4 x 10 minutes.

Speak with Animals: Can understand and speak with animals. R: 30 feet. D: 1 hour.

3rd Level

Continual Light (Reversible): object lights circle with 120 ft. radius until dispelled, full daylight. R: 120 feet.

Cure Disease: Cures person of any diseases, including magical diseases. R: touch D: instant but effects permanent.

Locate Object: Senses direction toward an object (specific or type) D: level minutes. R: 90 feet.

Prayer: Gives saving throw penalty of 1 per ten levels of caster to enemies in 20x20 foot area. R: 30 feet. D: next melee round.

Remove Curse (Reversible): Frees subject from a single curse. R: 10 feet. D: instant but effects permanent.

Speak with Dead: Ask three questions of a corpse. Age of corpse affected: Cleric under level 8: 1d4 days, level 9-14: 1d4 months, level 15+: any age. R: 10 feet. D: 3 questions.

4th Level

Create Water: Creates water, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Cure Serious Wounds (Reversible): Cures 3d6+3 hit points of wounds. R: touch. D: instant but effects permanent.

Neutralize Poison: Immunizes subject against poison (10 minute duration) OR detoxifies venom in or on subject (instant but effects permanent). R: 10 feet.

Protection from Evil, 10' radius (Reversible): +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters to all within 10 foot circle around caster. R: caster. D: 2 hours.

Speak with Plants: Can understand and speak with plants. R: 30 feet. D: 1 hour.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 1 hour.

5th Level

Commune: Cleric's Deity truthfully answers three yes-or-no questions. R: caster. D: 10 minutes.

Create Food: Creates food, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Dispel Evil (Reversible): Works like Dispel Magic, but affects any evil sending or evil spell. R: 30 feet. D: instant but effects permanent.

Insect Plague: Insect swarms (20 x 20x 20 feet) attack creatures. Creatures under 2 HD flee in terror. Can only be cast outdoors. R: 480 feet. D: 1 day.

Quest: Force a creature to obey one long-term order. R: 30 feet. D: until order completed.

Raise Dead (Reversible): Restores life to subject who died as long as 4 days (plus 4 days per caster level over 8) ago. R: line of sight. D: instant but effects permanent.

6th Level

Animate Object: "Brings to life" inanimate objects such as statues, chairs, carpets, and tables. The objects follow the caster's commands, attacking his foes or performing other actions on his behalf. GM determines the combat attributes of the objects, such as armor class, speed, hit dice, and hit bonuses as needed as no the object animated. A stone statue would be considerably more sturdy and dangerous than wooden furniture, for example. R: 60 feet. D: 1 hour.

Blade Barrier: Creates a barrier of whirling blades up to 30 feet in diameter which do from 7d10 points of damage upon anyone or anything which attempts to pass through it. R: 60 feet. D: 120 minutes.

Conjure Animals: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the Cleric.

R: 30 feet. D: 100 minutes.

Find the Path: This spell shows the caster the fastest and safest way out of a trap maze, wilderness, underworld, etc. It will, for example, allow the caster to free himself from a Maze spell in a single turn after casting the spell. D: Indoors: 1 hour + 10 minutes/caster level; Outdoors: 1 day.

Speak with Monsters: Allows the target to speak with and understand any monster. R: 10 feet. D: 3d4 questions.

Word of Recall: The cleric teleports without error back to his previous prepared sanctuary. R: infinite. D: instant.

7th Level

Aerial Servant: Summons a servant from the elemental plane of air to fetch and return one thing (or creature) to the caster. Only a creature with a Strength of 18 can fight its way from the servant's grasp, and even then the chance is not likely to be greater than 50%. The servant can carry up to 500 pounds in weight. An aerial servant has the following attributes: HD 16, AC 3 [16], Atk Bonus +17, Atk 1 (4d4), Move 240 ft. If the servant is frustrated in its efforts to bring the desired object to the caster, it will become insane, returning and attacking him. D: until task completed or insanity.

Astral Spell: The caster projects his astral form into other places; the astral form is invisible to all creatures but those also on the astral plane. If the caster's physical body is moved beyond the range of the spell from its original location while the astral form is away, the link is sundered and the caster's soul becomes lost in the beyond. The spell range has no other effect. The astral form is capable of casting spells, but there is a 2% chance per spell level that the spell will fail. Additionally, there is a 1% chance per spell level of the attempted spell that the astral spell itself will falter as a result of the spell casting, and the astral form will return to the physical body. When astral traveling above the ground, the astral form may travel as fast as 100 miles per hour per level above 18th. If the form is traveling underground, its top speed is 120 feet per 10-minute turn. With special study, this spell can also be used to travel to other planes.

Control Weather: Caster can adjust weather. D: GM decision.

Earthquake: Causes a powerful earthquake in an area 60 feet x 60 feet plus an additional 10 feet (in both length and width) per three levels above 17th. The quake topples walls, causes rock-slides, and opens gaping fissures in the earth. Any creature caught in the quake has a 1 in 6 chance of falling into the depths of the earth and being killed. No effect beyond the spell's area of effect. R: GM discretion. D: instant but effects permanent.

Holy Word: Speaking of a holy word affects all those within the range as follows: creatures of less than 5 hit dice are slain, creatures of 5 to 8 hit dice are stunned for 2d10 turns, and creatures with 9-12 hit dice are deafened for 1d6 turns. Creatures with 13+ hit dice are unaffected. R: 40 feet.

Part Water: Creates a gap through water, to a depth of 20 feet lasting for 2 hours. At 18th and every level thereafter, the cleric adds 10 feet to the depth of water parted, and 1 additional hour to the spell's duration. R: 240 feet. D: see above.

Restoration (Reversible): Restores one level lost to an energy drain attack or restores one limb destroyed or maimed. The reverse drains one energy level. R: touch. D: instant but effects permanent.

Resurrection (Reversible): Restores life to subject who died as long as 4 days (plus 4 days per caster level over 8) ago. The subject is fully healed and restored with no side-effects, no rest required. The reverse causes death, no saving throw allowed. R: touch. D: instant but effects permanent.

Symbol: Creates a magical trap in the shape of a holy rune. The rune's magic is activated when any person or creature hostile to the caster reads it, or passes over, under, or past it. Various different runes are known, and others may be possible but none may cause permanent harm to the target.

Symbol of Discord: Causes all creatures in the hostile group to begin arguing, and possibly fighting amongst themselves with lethal intent.

Symbol of Fear: Casts a Fear spell.

Symbol of Sleep: Casts a Sleep spell affecting double the normal number of creatures and with double the normal duration.

Symbol of Stunning: 150 hit dice (HD) of creatures are

affected as by a Power Word, Stun.

Wind Walk: Allows the caster and one other person in contact with him become incorporeal and mist-like, able to travel through walls and other obstacles, traveling at 48 ft. per minute indoors (or in subterranean settings) and much faster outdoors. R: touch. D: 1 day or until dispelled.

Divine (Druid) Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Detect Snares/Pits: This spell allows the caster to discover snares, pits, and other outdoor traps. R: 10 feet/caster level. D: caster level + 1 hours.

Locate Animals: Senses direction toward an animal (specific or type) R: 60 +10/caster level feet. D: 1 minute/caster level.

Predict Weather: Forecast the weather in the caster's location with 95% accuracy. D: instant.

Purify Water: Purifies water for up to 12 people. R: 10 feet. D: instant but effects permanent.

2nd Level

Create Water: Creates water, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Cure Light Wounds: Cure 1d6+1 hit points of wounds. R: touch. D: instant but effects permanent.

Detect Poison: Detects whether a creature, object, or area (5 foot cube) has been poisoned or is poisonous. R: 30 feet. D: Instant.

Heat Metal: Spell makes 1 metal item (weighing up to 0.5 pounds per level of the caster) extremely warm. Creatures take damage if holding or wearing equipment that is targeted by this spell. Take 1d2 damage on the first round and 1d2+1 additional damage on the second round. 50% chance per round that a target object being held in the hand is dropped. R: 30 feet. D: 2 combat rounds.

Locate Plants: Senses direction toward a plant (specific or type) R: 60 +10/caster level feet. D: 1 minute/caster level.

Obscurement: A misty vapor arises near the druid. It is stationary once created. The vapor obscures all sight beyond 5 feet. The cloud covers 100 cubic feet per druid level. R: 20 feet. D: 10 minutes/caster level.

Produce Flame: Produces a small flame in the palm of Druid's hand which illuminates as a small lantern. The flame may be hurled and causes inflammables to combust. R: caster. D: 20 minutes/caster level.

Speak with Animals: Can understand and speak with animals. R: caster. D: 1 hour.

Warp Wood: Causes straight wooden shafts to bend. The spell effects an amount of wood equal to 1 spear shaft (or 6 arrows) per 2 druid levels. R: 30 feet. D: instant but effects permanent.

3rd Level

Call Lightning: Call down one lightning bolt (8d6 + level damage) per turn. The caster may target anyone within the spell's range. This spell is only usable outdoors within 360' of stormy weather. R: 360 ft. D: 1 turn/caster level.

Cure Disease: Cures person of any diseases, including magical diseases. R: touch D: instant but effects permanent.

Hold Animal: Paralyzes 1-4 animals. Cast at single target, save at -2 and double duration. R: 120 feet. D: 1 hour plus 10 minutes/caster level.

Neutralize Poison: Immunizes subject against poison (10 minute duration) OR detoxifies venom in or on subject (instant but effects permanent). R: touch.

Plant Growth: Plants in an area up to 30x30 yards become overgrown and nearly impassable. Lasts until dispelled or plants killed. R: 240 feet.

Protection/Fire: Cast upon a non-druid, this spell renders the target invulnerable to normal fire. Cast upon a druid, this spell also protects from magical fire, but such magical flames will immediately cancel the spell on the next turn. R: touch. D: 30 + 10/caster level minutes.

Pyrotechnics: Caster creates either fireworks or blinding smoke

from a normal fire. R: 240 feet. D: 1 hour.

Water Breathing: Subject can breathe water. R: 30 feet. D: 2 hours.

4th Level

Animal Summoning I: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the druid. R: 30 feet. D: 1 hour.

Control Temperature, 10'radius: Allows the druid to vary the temperature in a given area (10' radius) by +/- 50 degrees. Mistletoe is required to cast this spell. R: 60 feet. D: 30 + 10/caster level minutes.

Cure Serious Wounds: Cures 3d6+3 hit points of wounds. R: touch. D: instant but effects permanent.

Dispel Magic: Cancels magic effects and spells. (Magic Attack vs. Spell's DC for success) R: 120 feet. D: instant but effects permanent for spells or 10 minutes for items.

Hallucinatory Forest: This spell creates an illusionary forest covering an area of 30' x 30' per level. Creatures within this area will absolutely believe they are in a forest, acting and reacting appropriately to their surroundings. Other druids, magical woodland creatures, and treants are never fooled by this spell. R: 60 feet to forest edge. D: until dispelled.

Insect Plague: Insect swarms (20 x 20x 20 feet) attack creatures. Creatures under 2 HD flee in terror. Can only be cast outdoors. R: 480 feet. D: 1 day.

Plant Door: Allows the druid to pass through thick/dense vegetation. This 3' X 6' "door" is usable only by the caster, but another druid or a dryad may follow. This spell may also be used to pass through solid tree trunks. The druid may decide to stay within the trunk for up to the duration of the spell to hide from others. R: caster. D: 30 + 10/caster level minutes.

Produce Fire: Creates normal fire covering an area of 10' X 10'. This spell may be reversed to extinguish fires covering the same area. R: 30 feet. D: 10 minutes.

Protection from Lightning: This spell negates the effects of electrical attacks upon the target. The spell ceases after such an attack. R: touch D: 1 hour + 10/caster level minutes.

Speak with Plants: Can understand and speak with plants. R: 30 feet. D: 1 hour.

5th Level

Animal Growth: 1d6 normal animals grow to giant size. R: 120 feet. D: 2 hours.

Animal Summoning II: Conjures 2 large animal (elephant, hippo, rhino, etc.), 6 medium sized animals (lions, tigers, bears, etc.) or 12 small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the druid. R: 30 feet. D: 1 hour.

Anti-Plant Shell: Similar to the magic-user spell Anti-Magic Shell but instead of protecting from spells, it protects against attacks from plants and living vegetables. R: caster. D: 2 hours.

Commune with Nature: Same as the cleric spell Commune but must be performed outdoors and the answers received will only pertain to Nature. R: caster. D: 3 questions.

Control Winds: A druid may employ this spell to increase the force of, or calm, winds within 120' of the druid. The center-point of the spell's effect is the druid and follows the druid's movements. Such affected winds may influence flying creatures and sailing ships (forcing them out of the air or halting their maritime travel). A Control Winds spell cast upon an existing Control Winds spell will negate it. The spell's range is increased to 320 at 11th level, 400 at 12th level, and 480 at 12th druid level. R: 120 feet. D: 1 hour + 10/caster level minutes.

Hold Plant: Similar to the magic-user spell Hold Monster but affects living, magical or animated plants. This spell affects both treants and fungoid life forms. R: 30 feet + 10 feet/caster level. D: 1 hour + 10/caster level minutes.

Pass Plant: Allows the druid to enter one tree and emerge from another of the same species. The base distance travelled this way is 480 yards + modifier based on the tree type (Oak +120 yards. Ash, yew, linden, and elm -120 yards. Other deciduous trees -180 yards. Coniferous trees -240 yards). The tree's girth must be large enough to engulf the druid. Travel must be from one living tree to another. If no such tree exists within the range of the spell, then the spell fails and the druid re-emerges from

the starting tree. R: see above. D: 10 minutes.

Rock-Mud: Transforms rock to mud or vice-versa, up a 300x300 foot area. R: 120 feet. D: 3d6 days.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 1 hour.

Wall of Fire: Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through wall deals 2d6 damage +1/caster level. Wall lasts as long as caster concentrates on it. R: 60 feet.

6th Level

Animal Summoning III: Conjures 4 large animal (elephant, hippo, rhino, etc.), 12 medium sized animals (lions, tigers, bears, etc.) or 24 small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the druid. R: 30 feet. D: 60 minutes.

Anti-Animal Shell: Same as the Anti-Plant Shell spell, but focuses on natural or giant animals. While affected by this spell, those inside the shell are protected from all animal attacks (excluding fantastic or magical creatures), but are unable to attack, be it by normal or magical means. R: 20 foot hemisphere. D: 30 + 10/caster level minutes.

Conjure Fire Elemental: Similar to the magic-user's Conjure Elemental spell but is limited to summoning a 16 HD fire elemental. On a roll of 1-2 on d20 the caster may choose to summon 1d3 salamanders instead, and on a roll of 1 on d20, the druid may choose to summon a 20 HD fire elemental. The elemental will not turn upon the druid but will regard him as a friend of sorts. R: 30 feet. D: 1 hour.

Feeblemind: Subject's MIND drops to 1. R: 240 feet. D: until dispelled.

Finger of Death: Target must save or die. Will only work if druid's life in dire peril. R: 120 feet. D: instant but effects permanent.

Transport via Plant: Allows the druid to pass from one plant to any other plant of similar species anywhere, as long as the druid has seen the plant at one time. Should the emergence fail, the druid will instead emerge from another plant which may be miles away. A druid may choose to remain inside a plant instead of transporting from it, and may remain so for up to 24 hours. While within a plant in this manner, the druid is completely aware of his surroundings. D: instant or up to 24 hours.

Turn Wood: Creates a wall of force which moves away from the druid. Any wooden objects in the wall's path (weapon hafts, spear shafts, arrows, etc.) are pushed back, dragging back any creature holding such items. The length of the wall runs 60' to either side of the druid, and moves at a rate of 40' per turn. R: 20 x level feet. D: 10 + 10/caster level minutes.

7th Level

Animate Rock: Similar to a cleric's Animate Object spell, but only affects stone. Up to approximately 2 x level cubic feet of stone can be animated. The rock will move at 2-4" per turn, the faster speeds for rock-masses which are basically of an ambulatory shape such as statues. R: 60 feet. D: 1 hour.

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Conjure Earth Elemental: Similar to the magic-user's Conjure Elemental spell but is limited to summoning a 16 HD earth elemental. The elemental will not turn upon the druid but will regard him as a friend of sorts. R: 30 feet. D: 1 hour.

Control Weather: Caster can adjust weather. D: GM decision.

Creeping Doom: Summons a horde of 1D10 times 1000 small and deadly insects and arachnids. They appear within 1 to 3 minutes. They then move forward to attack whatever they are commanded to, provided it is within 60 feet at the time of the command. They will pursue until the prey is beyond a 240 feet range (or until it or they are otherwise destroyed). Can be used indoors or outdoors. R: 60 feet. D: see above.

Fire Storm: Creates a fire of intensity equal to a "wall of fire" in a large area. This magical conflagration lasts only 10 minutes, but all combustible material within the area affected will continue to burn thereafter. The spell can be reversed to extinguish normal fires in an area twice that of the maximum possible area of the druid's fire storm. There is a 5% chance per caster level of the reversed version extinguishing magical fires of up to the normal area. Area: 30 x 30 foot square area per caster level (must be contiguous). R: 60 feet.

Metal-Wood: Cast upon any metal (up to 5 pounds per level of

the caster) it will permanently change it into some type of wood (caster's choice). R: 60 feet. D: instant but effects permanent.

Reincarnate: Restores dead person to life in a random (usually animal or nature-oriented humanoid) form. R: touch. D: instant.

Monsters

AC=Armor; HD=Hit Dice; AT=Attacks; MR=Morale Rating;
S=Special Abilities

Undead Immunities=Immune to sleep, charm, fear, paralysis

ANT, GIANT: AC: 16 HD: 3d8 AT: bite +3 (1d6) MR: 12 S: acid (2d6).

ANHKHEG: AC: 16 HD: 5d8 AT: bite +5 (1d10) MR: 8 S: Squirt acid (3d6).

BADGER, GIANT: AC: 15 HD: 3d8 AT: 2 claws +3 (1d6), bite +3 (1d6) MR: 8

BANSHEE: AC: 20 HD: 7d8 AT: claw +7 (1d8) MR: 12 S: Magic or silver to hit; magic resistance 50%; shriek of death; Immune to enchantments.

BASILISK: AC: 15 HD: 6d8 AT: bite +6 (1d10) MR: 9 S: petrifies onlookers.

BAT, GREATER: AC: 12 HD: 4d8 AT: bite +4 (1d10) MR: 8 S: Human-sized.

BAT, MONSTER: AC: 13 HD: 8d8 AT: bite +8 (2d8), claws +8 (1d6) MR: 8 S: Twice the size of a human.

BEETLE, GIANT FIRE: AC: 15 HD: 1d8 AT: bite +1 (2d6) MR: 7 S: Light glands glow for 1d6 days after death.

BLACK PUDDING: AC: 13 HD: 10d8 AT: slam +10 (3d8) MR: 12 S: immune to everything but fire, divides when hit, corrodes metal.

BLINK DOG: AC: 15 HD: 4d8 AT: bite +6 (1d6) MR: 6 S: teleports, hate coeurls.

BOAR, WILD: AC: 12 HD: 3d8 AT: gore +3 (3d4) MR: 9 S: attacks for 2 rounds after death.

BRAIN EATER: AC: 14 HD: 8d8 AT: mouth tentacles +8 (1d6, special) or weapon +8 MR: 7 S: on hit by tentacles 1d4 turns later tentacles reach brain, killing victim; Psi Blast (8d6 cone of mental force, save to confused), 90% magic resistant.

BROWN HULK: AC: 17 HD: 8d8 AT: 2 claws (2d6) or bite +8 (2d4) MR: 9 S: burrows through rock, eyes cause confusion.

BUGBEAR: AC: 14 HD: 3d8 AT: bite +3 (2d4) or weapon +3 MR: 9 S: surprise foes on a 1-3.

CATOBLEPAS: AC: 12 HD: 6d8 AT: tail +6 (1d3 + stun) MR: 8 S: gaze (save vs. death).

CARCASS CREEPER: AC: 16 HD: 3d8 AT: 8 tentacles +3 (paralysis) MR: 8 S: walk on walls and ceilings.

CENTAUR: AC: 15 HD: 4d8 AT: 2 kick +4 (1d6) or weapon +4 MR: 8

CENTPEDE, GIANT: AC: 14 HD: 4d8 AT: bite +4 (1d6) MR: 7 S: poison (1d6 DEX).

CHIMERA: AC: 15 HD: 9d8 AT: 2 claws +9 (1d3), goat gore +9 (1d4), lion bite +9 (2d4), dragon bite +9 (3d4) MR: 9 S: breathes fire (3d6), flies.

COCKATRICE: AC: 13 HD: 5d8 AT: bite +5 (1d3) MR: 7 S: petrifying bite.

COEURL: AC: 15 HD: 6d8 AT: tentacles +6 (2d6) MR: 9 S: appear 3 feet from actual position (+2 to defense and saves), hate blink dogs.

DEMON, BAAL-ROG: AC: 17 HD: 9d8 AT: sword or flaming whip +9 (2d6) MR: 9 S: flies, flaming (3d8 damage to all in contact), darkness, 10 ft. r., 75% magic resistance, immune to non-magic weapons. Spell-like powers: cause fear, detect magic and invisible, read magic and languages, pyrotechnics, dispel magic, suggestion, telekinesis, symbols (fear, discord, sleep), gate demons 70%.

DEMON, LEMURE: AC: 17 HD: 3d8 AT: claws (1d6) MR: 7 S: regenerate 1 HP/minute.

DEMON, SUCCUBUS: AC: 10 HD: 6d8 AT: 2 claws (1d6) or kiss (drain 1 energy level) MR: 9 S: immune to non-magic weapons, 70% magic resistance, darkness 5 ft. r. Spell-like powers: Ethereal, charm person, ESP, clairaudience, suggestion, shape change (humanoid forms only), gate demons 40%.

DJINN: AC: 15 HD: 7d8 AT: fist or weapon +7 MR: 12 S: flies, whirlwind, creation of things, create illusions, invisibility,

immune to mundane weapons.

DOPPELGANGER: AC: 14 HD: 4d8 AT: claw +4 (1d12) MR: 8 S: imitate humanoids, immune to sleep and charm. +5 on magic saves.

DRAGON, BLACK: AC: 17 HD: 7d8 AT: 2 claws +7 (1d6), bite +7 (3d6) MR: 9 S: flies, breathes line of acid (7d8).

DRAGON, BLUE: AC: 17 HD: 9d8 AT: 2 claws +9 (1d6), bite +9 (3d8) MR: 9 S: flies, breathes line of lightning (9d8).

DRAGON, BRASS: AC: 17 HD: 7d8 AT: 2 claws +7 (1d6), bite +7 (4d4) MR: 9 S: flies, breathes cloud of sleep or fear gas.

DRAGON, BRONZE: AC: 17 HD: 9d8 AT: 2 claws +9 (1d6), bite +9 (3d8) MR: 9 S: flies, breathes lightning (9d8) or repulsion.

DRAGON, COPPER: AC: 17 HD: 8d8 AT: 2 claws +8 (1d6), bite +8 (5d4) MR: 9 S: flies, breathes acid cloud (8d8) or slow.

DRAGON, GREEN: AC: 17 HD: 8d8 AT: 2 claws +8 (1d6), bite +8 (2d10) MR: 9 S: flies, breathes cloud of chlorine gas (8d6).

DRAGON, GOLD: AC: 19 HD: 11d8 AT: 2 claws +11 (1d6), bite +11 (3d12) MR: 10 S: flies, breathes cloud of poisonous gas or cone of fire (11d8), uses magic as MU of level 1 to 8 (by age), assume human form.

DRAGON, RED: AC: 17 HD: 10d8 AT: 2 claws +10 (1d6), bite +10 (3d10) MR: 9 S: flies, breathes cone of fire (10d8), uses magic as MU of level 1 to 6 (by age -2).

DRAGON, SILVER: AC: 18 HD: 10d8 AT: 2 claws +10 (1d6), bite +10 (3d10) MR: 9 S: flies: breathes cloud of poisonous gas or cone of cold (10d8), uses magic as MU of level 1 to 8 (by age), assume human form.

DRAGON, WHITE: AC: 17 HD: 6d8 AT: 2 claws +6 (1d6), bite +6 (2d8) MR: 9 S: flies, breathes cone of cold (6d8).

DRAGON TURTLE: AC: 21 HD: 20d8 AT: 2 claws +15 (1d8), bite +15 (10d6) MR: 10 S: swims well, slow on land, breathes steam cloud (20d8) only when in water.

DRYAD: AC: 14 HD: 2d8 AT: weapon +2 MR: 6 S: charm.

DWARF: AC: 15 HD: 1d6+1 AT: warhammer +1 (1d8) MR: 10 S: standard dwarf abilities.

EFREET: AC: 16 HD: 10d8 AT: slam +10 (2d8) MR: 12 S: flies, wall of fire, creation of things, create illusions, invisibility, immune to mundane weapons.

ELEMENTAL, AIR: AC: 19 HD: 12d8 AT: slam +12 (2d8) MR: 10 S: whirlwind, extra damage against foes in the air.

ELEMENTAL, EARTH: AC: 19 HD: 12d8 AT: slam +12 (4d8) MR: 10 S: tear down stone, extra damage against foes standing on the ground (1d8).

ELEMENTAL, FIRE: AC: 19 HD: 12d8 AT: slam +12 (3d8) MR: 10 S: ignite materials.

ELEMENTAL, WATER: AC: 19 HD: 12d8 AT: slam +12 (3d10) MR: 10 S: overturn boats, extra damage against swimming foes (1d6).

ELEPHANT: AC: 14 HD: 9d8 AT: 2 Tusks +9 (2d4) or Trample +9 (4d8) MR: 8 S: can make charge attack

ELF: AC: 14 HD: 1d8 AT: sword or longbow (1d6) MR: 8 S: standard elf abilities.

EYE GLOBE: AC: 17 (Eye Stalks: 15) HD: Body 40 HP, Eye Stalk 10 HP each AT: 1d4 eyes MR: 8 S: floats about; large body eye generates anti-magic ray; 12 smaller eyes do: 1-charm person ray, 2-charm monster ray, 3-death ray, 4-2d6 damage ray, 5-sleep ray, 6-telekenesis ray, 7-slow ray, 8-fear ray, 9-stoning ray, 10-disintegration ray, 11-turn/control undead ray, 12-mind reading ray.

GARGOYLE: AC: 14 HD: 4d8 AT: 2 claws +4 (1d3) or bite +4 (1d6), horns +4 (1d4) MR: 11 S: fly.

GELATINOUS CUBE: AC: 11 HD: 4d8 AT: slam +4 (2d4) MR: 12 S: touch paralyzes, immune to lightning and cold, surprise foes on a 1-4.

GHAST: AC: 13 HD: 3d8 AT: 2 claws +2 (1d3) or bite +2 (1d4) MR: 9 S: undead immunities touch paralyzes, humans slain by ghouls rise again as ghouls in 24 hours. Regenerate 1 HP/minute until slain.

GHOUL: AC: 13 HD: 2d8 AT: 2 claws +2 (1d3) or bite +2 (1d4) MR: 9 S: undead immunities touch paralyzes, humans slain by ghouls rise again as ghouls in 24 hours.

GIANT, CLOUD: AC: 17 HD: 13d8 AT: weapon +13 (6d6) or hurl

rocks +13 (3d6) MR: 10 S: only surprised on a 1.

GIANT, FIRE: AC: 16 HD: 12d8 AT: weapon +12 (5d6) or hurl rocks +12 (3d6) MR: 9 S: immune to fire.

GIANT, FROST: AC: 15 HD: 11d8 AT: weapon +11 (4d6) or hurl rocks/ice +11 (3d6) MR: 9 S: immune to cold.

GIANT, HILL: AC: 15 HD: 8d8 AT: weapon +8 (2d6) or hurl rocks +8 (3d6) MR: 8

GIANT, STONE: AC: 20 HD: 9d8 AT: stone club +9 (3d6) or hurl rocks +9 (3d6) MR: 9

GIANT, STORM: AC: 18 HD: 16d8 AT: weapon +16 (8d6) or hurl rocks +16 (3d6) MR: 10 S: control weather.

GNOLL: AC: 14 HD: 2d8 AT: weapon +2 MR: 8

GNOME: AC: 14 HD: 1d8 AT: weapon +1 MR: 8

GOBLIN: AC: 12 HD: 1d6-1 AT: weapon +1 MR: 7 S: -1 to hit in sunlight.

GOLEM, FLESH: AC: 10 HD: 12d8 AT: 2 fists +12 (2d8) MR: 11 S: Healed by lightning, hit only by magic weapons, slowed by fire and cold, immune to most spells.

GOLEM, IRON: AC: 16 HD: 13d8 AT: fists or weapon +13 (4d10) MR: 11 S: Poison gas, immune to all weapons +2 or less, slowed by lightning, healed by fire, immune to most magic.

GOLEM, STONE: AC: 14 HD: 16d8 AT: fist +15 (4d8) MR: 11 S: Unaffected by +2 or lesser weapons, slowed by fire, healed/damages by rock to mud, immune to most magic.

GORGON: AC: 17 HD: 8d8 AT: gore +8 (2d6) MR: 8 S: breathes petrifying gas.

GREEN SLIME: AC: n/a HD: n/a AT: organics and metal turn to green slime if touched MR: n/a S: killed by cold or fire. Cure Disease stops transformation to green slime.

GREMLIN: AC: 12 HD: 1d8 AT: weapon +1 MR: 12 S: chaos aura causes physical actions with 10 feet to fail 50% of the time in a chaotic manner.

GREY OOZE: AC: 12 HD: 3d8 AT: strike +3 (1d6) MR: 12 S: acid. destroys armor in one round, deals automatic damage after the first hit, immune to blunt/crushing attacks, spells, fire and cold.

GRIFFON: AC: 16 HD: 7d8 AT: 2 claws +7 (1d4), bite +7 (2d8) MR: 8 S: flies.

HALFLING: AC: 12 HD: 1d6 AT: weapon+1 (1d6) MR: 8 S: nearly invisible in outdoor cover.

HARPY: AC: 12 HD: 3d8 AT: 2 talons +3 (1d4) or weapon +3 MR: 7 S: flies, siren-song (Charm person).

HELL HOUND: AC: 15 HD: 5d8 AT: bite +5 (1d6) MR: 9 S: breathe fire (10 HP damage)

HIPPOGRIFF: AC: 14 HD: 3d8 AT: 2 claws +3 (1d6), bite +3 (1d10) MR: 8 S: flies.

HOBGOBLIN: AC: 14 HD: 1d8+1 AT: weapon +1 MR: 8

HORSE, RIDING: AC: 12 HD: 2d8 AT: bite +2 or kick +2 (1d4) MR: 7

HORSE, WAR: AC: 12 HD: 3d8 AT: bite +3 (1d6) or kick +3 (2d6) MR: 9

HUMAN, BANDIT/SOLDIER: AC: 12 HD: 1d8 AT: weapon +1 MR: 8

HUMAN, BERSERKER: AC: 12 HD: 1d6+2 AT: weapon +1 MR: 12 S: Berserking (+2 to hit)

HUMAN, COMMON MAN: AC: 10 HD: 1d8-2 AT: weapon +0 MR: 6

HUMAN, SERGEANT-AT-ARMS: AC: 14 HD: 3d8 AT: weapon +3 MR: 8

HYDRA: AC: 14 HD: 5-12d6 AT: 5-12 bites +HD (1d6) MR: 11 S: 1 HD per head, 20% chance fire-breathing or regenerating.

INVISIBLE STALKER: AC: 16 HD: 8d8 AT: 1 bash +8 (4d4) MR: 12 S: flies, invisible.

KOBOLD: AC: 13 HD: 1d4 AT: weapon +0 (1d6) MR: 9

LEPRECHAUN: AC: 11 HD: 1d4 AT: theft, magic MR: 7 S:

invisible, polymorph non-living objects, illusions and ventriloquism at will; steal small valuable item (75% successful, 25% chance if dropping per turn chased), 80% magic resistant, never surprised.

LICH: AC: 20 HD: 12-18d6 AT: touch +HD (1d10) or weapon +HD MR: 10 S: undead immunities, touch causes paralysis (no save), cause fear in creatures under 4th level/HD, Magic-User or cleric level equals hit dice.

LIZARDMAN: AC: 14 HD: 2d8 AT: claws +2 (1d6) or weapon +2 MR: 11 S: breathe underwater.

LURKER RAY: AC: 13 HD: 10d8 AT: wing smother +10 (1d8) MR: 9 S: those hit take 1d8 damage/turn and smother in 1d6 turns.

LYCANTHROPE, WEREBEAR: AC: 17 HD: 7d8 AT: 2 claws +7 (2d4), bite +7 (1d8) MR: 10 S: lycanthropy, extra 2d6 damage if both claws hit.

LYCANTHROPE, WEREBOAR: AC: 15 HD: 4d8 AT: tusks +6 (2d6) MR: 9 S: lycanthropy, attack +6 instead of +4 because of rage.

LYCANTHROPE, WERERAT: AC: 13 HD: 3d8 AT: bite (1d4) or weapon +3 MR: 8 S: lycanthropy, surprise foes on a 1-4.

LYCANTHROPE, WERETIGER: AC: 16 HD: 5d8 AT: 2 claws +5 (1d6), bite +5 (2d6) S: lycanthropy, surprise foes on a 1-4.

LYCANTHROPE, WEREWOLF: AC: 14 HD: 4d8 AT: 2 claws +4 (1d4) bite +4 (2d4) MR: 8 S: lycanthropy.

MANTICORE: AC: 15 HD: 6d8 AT: claws +6 (1d4) or bite +6 (2d4) MR: 9 S: flies, six tail spikes +6 (1d6) per round, 24 spikes in total.

MEDUSA: AC: 14 HD: 6d8 AT: weapon +6 MR: 8 S: onlookers turn to stone, hair attacks at +3 (poison bite), averting eyes reduces to hit by 4 and grants +2 to medusa attacks.

MERMAN: AC: 13 HD: 1d8 AT: weapon +1 MR: 8 S: breathe water, swim.

MINOTAUR: AC: 13 HD: 6d8 AT: weapon +6 or bite +6 (1d6) or Head gore +6 (1d6) MR: 12 S: never lost in mazes.

MULE: AC: 12 HD: 2d8 AT: Kick +2 (1d4) MR: 8

MUMMY: AC: 16 HD: 6d8 AT: touch +6 (2d6) MR: 12 S: mummy rot curse if hit (no more healing), undead immunities, hit only by magic weapons (for half damage), spells, and fire.

NAGA, GUARDIAN: AC: 14 HD: 12d8 AT: bite +12 (1d4 + poison), spit +12 (30 range, poison), constrict +12 (1d8/rd until freed) MR: 9 S: spells as 6th level Cleric.

NAGA, SPIRIT: AC: 14 HD: 10d8 AT: bite +10 (1d4 + poison) MR: 8 S: spells as 6th level Cleric and 7th level Magic-User, gaze (permanent charm).

NAGA, WATER: AC: 14 HD: 8d8 AT: bite +10 (1d3 + poison) MR: 7 S: spells as 5th level Magic-User (no fire or lightning).

NIXIE: AC: 12 HD: 1d8 AT: weapon +1 (1d6) MR: 6 S: swims, charm.

OCHRE JELLY: AC: 11 HD: 6d8 AT: acid strike +6 (2d6) MR: 6 S: a hit destroys organic material, lightning divides jelly into three jellies, each doing +2 (1d6) damage.

OGRE: AC: 14 HD: 4d8 AT: weapon +4 (2d6) MR: 10

OGRE MAGE: AC: 15 HD: 5d8 AT: weapon +5 (2d6) MR: 9 S: flies, magic use (turn invisible, darkness 10' radius, sleep, charm person, cone of frost).

ORC: AC: 13 HD: 1d8 AT: weapon +1 MR: 8

OWLBEAR: AC: 14 HD: 5d8 AT: 2 claws or bite +5 (1d8) MR: 9 S: hug for additional 2d6 if both claws hit.

PEGASUS: AC: 13 HD: 4d8 AT: 2 hooves +4 (1d6) MR: 8 S: flies.

PHOENIX: AC: 17 HD: 9d8 AT: 2 claws +9 (1d6), bite +9 (2d6) MR: 10 S: +3 or better weapon to hit, immune to charm/hold/fire attacks, 3d6 fire damage to all within 10 feet.

PIXIE: AC: 12 HD: 1d8 AT: weapon +1 (1d4) MR: 7 S: flies, charm, naturally invisible.

PURPLE WORM: AC: 13 HD: 15d8 AT: bite +15 (2d8) or sting +15 (1d8) MR: 10 S: poison sting (1d6 STR), swallows whole on roll 4 higher than needed to hit, swallowed creatures take 1d6 automatic damage every round.

RAT, GIANT: AC: 12 HD: 1d8 AT: bite +1 (1d3) MR: 8 S: 1 in 20 chance of disease from bite.

RAT, MONSTROUS: AC: 13 HD: 3d8 AT: bite or claws +3 (1d6) MR: 7 S: 1 in 20 chance of disease from bite.

ROC: AC: 15 HD: 12d8 AT: 2 claws +12 (1d8) or bite +12 (2d10) MR: 9 S: flies

RAKSHASA: AC: 23 HD: 7d8 AT: claws, bite +7 (1d8) or weapon +7 MR: 8 S: spells as 1d3 level Magic-User and 1st level cleric, immune to non-magic weapons, below +3 weapons do 50% damage, blessed crossbow bolt kill instantly.

RUST MONSTER: AC: 17 HD: 5d8 AT: touch +5 (special) MR: 7 S: touch of (or touching) the rust monster causes metal items to turn to rust.

SALAMANDER: AC: 15 HD: 7d8 AT: bite +8 (1d6) or constrict +8 (1d8) S: heat does 1d8 to nearby creatures, immune to fire.

SCORPION, GIANT: AC: 17 HD: 4d8 AT: 2 claws +4 (1d10), sting +4 (1d4, poison) MR: 11 S: poison causes paralysis and loss of 1d4 hp per minute.

SCORPIONMAN: AC: 17 HD: 8d8 AT: weapon +8 (1d10), sting +4 (1d4, poison) MR: 9 S: poison causes paralysis and loss of 1d4 hp per minute.

SEA SERPENT: AC: 17 HD: 30d6 AT: bite +15 (4d6) MR: 9 S: swallows whole on roll 4 higher than needed to hit, swallowed creatures take 1d6 automatic damage every turn.

SHADOW: AC: 12 HD: 3d8 AT: touch +3 (1d4, special) MR: 12 S: drains 1 STR per hit, hit only by magical weapons, surprise foes on a 1-5, creatures reduced to 0 STR will rise 24 hours later as a shadow. Not undead.

SHARK: AC: 15 HD: 4d8 AT: bite +4 (2d6) MR: 7

SHARK, GIANT: AC: 16 HD: 10d8 AT: bite +10 (3d10) MR: 7

SHRIEKER: AC: 11 HD: 3d8 AT: none MR: 12 S: large toadstool, if disturbed (light 60 feet/movement 30 feet) emits loud shriek for 1d3 minutes which stuns small (tat-sized) creatures.

SKELETON: AC: 12 HD: 1d8 AT: weapon +1 MR: 12 S: undead immunities.

SLUG, GIANT: AC: 11 HD: 12d8 AT: bite +12 (2d6) MR: 10 S: spits acid (2d6).

SNAKE, CONSTRICTOR: AC: 14 HD: 2d6, AT: constriction (1d3) MR: 7 S: On successful attack, automatic 1d3 damage thereafter until dead.

SNAKE, GIANT CONSTRICTOR: AC: 14 HD: 6 AT: constriction +4 (1d6) M&: 7 S: On successful attack, automatic 1d6 damage thereafter until dead.

SNAKE, GIANT VIPER: AC: 14 HD: 4d8 AT: bite +4 (1d3 + poison) MR: 7 S: Poison bite does 2d4 hp per minute.

SNAKE, VIPER: AC: 14 HD: 1d8 AT: bite +1 (1hp + poison) MR: 7 S: Poison bite does 1d4 hp per minute.

SPECTRE: AC: 17 HD: 7d8 AT: touch +7 (1d6) MR: 11 S: undead immunities, drains 2 levels per hit, creatures reduced to 0 levels will rise 24 hours later as a spectre.

SPHINX: AC: 19 HD: 12d8 AT: 2 claws +12 (3d6), bite +12 (2d8) MR: 10 S: Males are level 12 magic-users. Females are level 12 clerics. Roar (2/day) save or flee in terror

SPIDER, GIANT: AC: 13 HD: 2d6+2 AT: bite +2 (1d6) MR: 8 S: bite causes paralysis via poison, surprise on 1-5.

SPRITE: AC: 14 HD: 1d4 AT: none MR: 7 S: can curse (effects funny rather than dangerous, wears off after 1d20 hours)

STIRGE: AC: 12 HD: 1d8 AT: sting +1 (1d4) MR: 9 S: attaches on a hit and will deal 1d4 automatically damage every round.

TREANT: AC: 17 HD: 10d8 AT: branches +10 (3d6) MR: 9 S: Control trees and can make them move and attack.

TICK, GIANT: AC: 15 HD: 3d8 AT: bite+3 (1d6) MR: 7 S: attaches on a hit and will deal 1d6 damage automatically every round.

TITAN: AC: 22 HD: 16d8 AT: weapon+15 (5d6) S: Spells.

TOAD, GIANT: AC: 12 HD: 2d8 AT: bite +2 (1d6) MR: 6 S: surprise foes on a 1-3, swallows small creatures whole on a natural 20, swallowed creatures take 1d6 automatic damage every round, long tongue pulls victims in to bite making bite attack like pole arms.

TROLL: AC 15 HD: 6d8 AT: 2 claws +6 (1d6), bite +6 (1d10) MR: 10 S: regenerate 3 hp per round (except acid or fire damage).

UNICORN: AC: 17 HD: 5d8 AT: 2 hoofs +5 (1d8) or horn +5 (1d8) MR: 7 S: double damage for charge, 25% magic resistance, teleport, horn can cure damage or disease.

VAMPIRE: AC: 17 HD: 9d8 AT: bite +9 (1d6) or weapon +9 MR: 11 S: undead immunities, hit only by magical weapons, regenerate 3 hp per round, drains 2 levels per hit, gaseous form at will, shape change into bat, charm gaze, avoids garlic and mirrors, summons bats or wolves, immobilized and apparently dead if a stake is driven through its heart, drowns under water

in one round, creatures reduced to 0 levels will rise 24 hours later as a vampire under the control of their creator.
 WAR DOG: AC: 12 HD: 2d8 AT: bite +2 (1d6) MR: 9
 WIGHT: AC: 14 HD: 3d8 AT: claw +3 (1d6) MR: 12 S: undead immunities, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise 24 hours later as a wight.
 WILL-O-THE-WISP: AC: 27 HD: 9d8 AT: shock +9 (1d6+4) MR: 10 S: flies.
 WOLF: AC: 12 HD: 2d8 AT: bite +2 (1d6) MR: 8

WORG: AC: 13 HD: 4d8 AT: bite +4 (2d6) MR: 8
 WRAITH: AC: 16 HD: 4d8 AT: touch +4 (1d6) MR: 11 S: undead immunities, only hit by magic or silver weapons, arrows do a max 1 HP damage, drains a level per hit, creatures reduced to 0 levels will rise 24 hours later as a wraith.
 WYVERN: AC: 16 HD: 8d8 AT: bite +8 (2d8) or sting +8 (1d6) MR: 9 S: poison sting (1d6 STR), flies.
 YELLOW MOLD: AC: n/a HD: n/a AT: 1d6 if touched MR: n/a S: if struck, 50% releases spore cloud (choke to dead in 6 rounds unless cure disease), destroyed by fire.
 ZOMBIE: AC: 11 HD: 2d8 AT: weapon +2 or claws +2 (1d8) MR: 12 S: undead immunities always lose initiative.

Microlite74 Treasure

Here is a list of sample treasure items appropriate to a Microlite74 campaign. Maps to possible hoards of such treasures are also a common treasure item. Of course, any magic item you like from the SRD can be used, but higher powered items may be too powerful for most Microlite74 games.

Money: 1 gold piece (gp) = 10 silver pieces (sp); 1 silver piece = 5 copper pieces (cp).

Gems: Most range in value from 10gp to 1000gp, with 50% of gems being worth about 100gp.

Magic Weapons: Most range from +1 to +3, some +1 weapons have a greater plus versus specific types of monsters. Magic Swords sometimes have a special spell-like power or two. A few swords are intelligent and have a number of spell-like powers (some even talk). A few weapons are cursed and reduce one's chance to hit.

Magic Armor: Most are plus +1, with a few +2 or +3. Magic shields exist with similar pluses.

Scrolls: Most hold one to six spells (all arcane or all divine). Some are protection against good/evil/one of the elements. A few place curses on the reader.

Potions: Common examples: Growth, Diminution, Giant Strength, Invisibility, Gas Form, Polymorph Drinker, Speed, Fly, Levitate, ESP, Healing, Clairvoyance, Clairaudience, Control (Animal, Demon, Dragon, Giant, Human, Plant, Undead, etc.), Invulnerability, Heroism, Resistance (Fire, Cold, Acid, etc.), Treasure Finding, Water Breathing, etc. Some potions are poison, cause disease, cause delusions, etc.

Rings: Common examples: Spell Storing, Spell Turning, X-Ray Vision, Telekinesis, Protection, Protection 5 foot radius, Invisibility, Control (Human, Mammal, Zombie, etc.), Resistance (Fire, Cold, Acid, etc.). Uncommon examples: Three Wishes, Regeneration, Djinn Summoning. Some rings are cursed with negative effects.

Wands and Staves: Common examples: Detection (Enemy, Metal, Secret Doors, Traps, Magic, etc.), Illusion, Fire Balls, Lightning Bolts, Cold, Polymorph, Healing, Commanding, Striking, etc. Uncommon examples might have several of the above powers. Wands operate as level 6 casters with 1d100 charges. Staves operate as level 8 casters with 1d200 charges.

Unusual Magic Items: Here are some ideas: Boots (Speed, Levitation, Travelling, Leaping, Elven), Cloak (Displacing, Elven, Flying, Protection), Crystal Ball, Flying Broom, Flying Carpet, Amulets (Protection, versus ESP, versus Charm, etc.), Helms (Read Magic, Read Languages, Telepathy, Teleportation, Good, Evil, etc.), Horn (Blasting, Summoning, etc.), Belts of Giant Strength, Efreet Bottle, Djinn Lamp, Mirror of Life Trapping, etc. Cursed items are possible as well.

Notes on "Old School" Play

While Microlite74 is designed using tried and true "D20" systems filtered through the Microlite20 rules, it is designed for a completely different style of play than many players who started to play in the last 20 years or so may be used to. This section will give a brief overview of "old school" play.

What is "Old School" Play?

There are two major styles of roleplaying games. The first (and older) style says "Here is the situation. Pretend you are there as your character, what do you want to do?" This style has been superseded over the years with a style that says "Here is the situation. Based on your character's stats, abilities, skills, etc. as listed on his character sheet and your knowledge of the many detailed rules of the game, what is the best way to use your character's skills and abilities and the rules to solve the situation?" Old school play strongly favors the first style and frowns on too much of the second.

Here are some major points where old school play is different:

Heroic, not Superheroic: Old school play, especially at low to mid levels, is about fairly normal people put in situations where they can be heroes, not about extraordinary people doing things that would make a four-color comic book superhero proud – and at first level yet. Just like in the real world, the more a character improves his abilities, the harder it is to improve them further, while new characters may advance rapidly, the higher their level the more effort and time (and XP) it takes to advance to the next level.

Achievement, not Advancement. Many modern games are often all about what special feats, extra classes and special game mechanics the players wish to obtain for their characters as they increase in level. In old school games, a character's abilities are generally predetermined by his character class, so old school games focus on the things that the characters wish to accomplish in the game world rather than on what game mechanics they want to acquire. Level advancement is often much slower than in modern fantasy RPGs which makes in campaign achievements even more important as a measure of character success.

No Skills: Unlike in most modern RPGs, there aren't any skills in Microlite74 -- not even the streamlined four skills of Microlite20. Players are intended to have their characters act like adventurers. So don't search your character sheet or the rules for the perfect solution in Microlite74. Instead, you just tell the GM what your character is trying to do. Note that you are assumed to be competent with all common activities associated with your class and background. If you need to keep a door open or shut, you might tell the GM your character is using a spike to keep the door open or closed. A ten foot pole is your friend for checking for traps. Searching a room means looking in and under objects, not rolling a skill check. While this may seem strange at first, you will quickly learn to appreciate the freedom it gives you. No longer are you limited to the skills and feats on your character sheet, you can try anything your character should be capable of trying. You might not succeed, but the rules generally will not stop you from trying.

Limited Magic Items: Modern fantasy RPGs often assume that magic items are easy to buy and/or to create. In most old school campaigns, magic items are relatively rare and hard to create. Only potions and scrolls are generally relatively easy to create or purchase. Other magic items are seldom found for sale (and are very high priced when they are found for sale) and are usually very expensive in money and time to try to create – often requiring rare ingredients that the characters must quest to find. Therefore characters are generally limited to the magic items they find in treasures or take from defeated enemies on adventures.

No Assumption of "Game Balance": Old style game sessions aren't about carefully balanced characters (who are all able to shine equally at all times) who only run into situations carefully designed by the GM to be beatable by the characters presently

in the party and to provide treasure that fits their current level. Instead, part of player skill is learning to evaluate situations so situations well over the party's current abilities or which will waste the party's resources for little gain can be avoided. Don't assume that you can beat every monster that you encounter, running away from monsters too tough to handle can mean the difference between character survival and character death. You can also get creative in how you defeat monsters. Perhaps those goblins you bypassed could be talked into (or tricked into) attacking that giant you know you can't beat, perhaps killing it for you or at least softening it up so your party has a chance of defeating it and living to tell the tale. Also remember that treasure can be turned into XP, even if you can't kill the monsters, perhaps you can still acquire some of their treasure. Part of the skill of playing "old school" style is coming up with creative solutions when a direct attack is likely to fail.

It's Not All About Combat: Many modern fantasy RPGs have made combat the star of the system, combats in these systems are time-consuming and very crunchy with rules for everything. Microlite20 avoids this by having a fast-playing abstract combat system. Microlite74 takes this one step further, combat isn't intended to be the main source of fun in the game. The game is as much about exploration and treasuring finding as it is about combat. Sure, you are going to have to fight things to explore and find treasure, but always remember that combat may not be the best or safest way to handle every situation. Think before you rush into combat. After all, it's not the only way to earn a good pile of experience – and monsters don't have to be killed to be defeated (and get XP for them).

Reality/Common Sense Trumps Rules: Old-school games use loose and simple rules that cover average cases and the GM and players are supposed to apply common sense and their knowledge of how reality works to cover the unusual and edge cases. "Reality/Common Sense" as interpreted by the GM always trumps the written rules if they conflict. For example, a character has a magic weapon and the rules for that weapon say it always causes its target to fall prone if hit. The character hits a gelatinous cube moving down the corridor toward them with the weapon. The rules say that the target should fall and be in a prone position. Reality, however, says otherwise. Gelatinous cubes don't have a top and bottom (so prone penalties make no sense) and a 10 foot cube can't fall when it is moving through a 10 foot corridor. In some modern games, the rules would be applied anyway and the cube would suffer the effects of falling prone no matter how little sense that makes. In an old school game, the GM ignores the rule because it makes no sense in the specific situation.

Forget "Rules Mastery": As some of the above differences have hinted, player skill in "old school" style games isn't about mastering the game rules so you can solve any problem by knowing the right combination of rules from 20 different rule books. Microlite20 is designed to be rules light and Microlite74 tries to stress this even more by encouraging GMs to make rulings on the spot taking into account specific circumstances instead of trying to hunt up special cases in the SRD or a stack of optional rule books. This is faster and helps players immerse themselves in their character and the game world instead of in rule books. GM rulings will be based on specific circumstances and common sense, not just on the written rules and prior rulings. Just because it requires a certain roll to jump one 10 foot pit does not mean all 10 foot wide pits will require the same roll. After all, all sorts of variables can affect the roll (terrain, weather, lighting, pressure to jump quickly, etc.). Players need to remember that these rules are merely a tool for the GM. They are just guidelines for the GM, not something written in stone that the GM must obey. If something herein does not work right in your campaign (or the GM just does not like a rule), the GM is well within his right to change it. Microlite74 is not a game for rules lawyers or for those who believe that the game designer always knows what is best.

No Script Immunity: In most old school games, player characters do not have any form of script immunity. Player characters can die, lose equipment, suffer strange magical effects and other often unpleasant consequences if they are not

careful or are just very unlucky. On the other hand, there are no rules limiting their success. If they take on an adult red dragon as first level characters and miraculously manage to win, there are no rules about level appropriate wealth or level appropriate magic items to interfere with their becoming rich and probably flush with magic items from the dragon's hoard.

Not Mentioned does not mean Prohibited: Many people seem to read RPG rules and come away with the idea that anything not specifically mentioned in the rules as allowed is prohibited. While this really doesn't make much sense given that no set of rules could ever cover everything that characters might attempt to do in an adventure, it seems to be a very common way to view RPG rules. In an old school game like Microlite74, this is specifically not true: the millions of possible activities not mentioned in the rules are not prohibited, they are up to the GM to allow or disallow based on his knowledge of how reality works and how his specific campaign world differs from reality. Unless the rules specifically prohibit some action, players should ask their GM instead of simply assuming it is prohibited because the rules do not mention it.

Styles of "Old School" Play

If you read some "old school" blogs, forums, and web sites, you might get the impression that there is only one "old school" style of play: a style with expendable player characters who spend all their time in dungeons designed in the style of the old "Tomb of Horrors" module where an adventuring party is only one slipup away from death. This style of play is often shown in early modules.

What most people forget is that these early modules were designed for tournament play where the party that lasted longest and made it deepest into the dungeon was the winner. While a few gaming groups did run their regular campaigns like this and enjoy it, most people did not enjoy such games and the GMs who ran them were often referred to as "Killer GMs" (who often found themselves without players). Instead most home campaigns were a mixture of the following four styles – some campaigns stressing one or two styles over the others.

Power-Gaming: Many players start out playing in this style. Most soon get bored with it and add more and more of other styles. A power-gaming campaign is all about character power. Characters are known by their class, level, special items, and amazing powers and deeds. ("I killed the Demon King with my 15th Level Fighter/Magic-User/Druid. It only took two hits from Thor's Hammer to knock him out. Then I cut off his head with my vorpal blade.") There is often a lot of player competition for the most powerful character in campaigns that stress power-gaming. A lot of people look down on this style, but it can be a lot of fun to play a pure power-game in a group of players who all like the style.

Wargaming: This is probably the style old school rules were originally written for. The wargaming style of play is a competition between the player group and the GM. The GM sets up tactical battles, puzzles, and the like and the players solve them for treasure and experience. Fudging die rolls and ignoring rules (either for or against the players) is frowned upon as it detracts from the challenge and fun of the adventure. Characters in pure wargaming campaigns often were expendable and had little personality or goals (beyond staying live and getting rich) as a character with such might be tempted to do things dysfunctional to survival. Published tournament dungeons like Tomb of Horrors could be considered examples of extreme forms of this style. Once the RPG hobby became known outside of the minis and board wargaming community, pure forms of the wargaming style quickly became uncommon.

Role-Playing: A pure role-playing campaign is almost the opposite of a pure wargaming campaign. Player skill, tactics, and rules aren't really important. What is important is the player's character and that character's life in the game. In a pure role-playing campaign, players create the personality of their characters in great detail and players generally have a large emotional investments made in them and do not consider their characters expendable. Players tend to have their characters act within their personalities and within the beliefs

they're supposed to hold – even when doing so is not the best thing to do at the time within the game. The object is to live your character's life in the campaign world. You "win" be having your character achieve his goals, goals which may or may not have anything to do with the game's goals of exploring and accumulating treasure and experience points. The modern computer game *The Sims* is an example of this style of play.

Story-Telling: While all campaigns tell a story after-the-fact (that is, you can tell a story based on the characters actions in the game), in a story-telling campaign, the GM has worked out a story in advance and the player characters are the protagonists. The campaign world usually has a detailed background and back story behind it. Knowing this background may be more important than knowing the rules. Some pure story telling campaigns are little more than single-line railroads where the characters play their almost pre-scripted parts in the story. In other cases, things are more free-form with story flow and events created by interactions between the GM's basic outline of story events and the actions of individual characters during the campaign. Some people consider the more pure forms of story-telling campaigns boring straight-jackets while others love the idea of being a major part of a real story.

These four major styles of play appeared early in the history of role-playing games. They were first mentioned in a general circulation publication in Glenn Blacow's article "Aspects of Adventure Gaming" in *Different Worlds* #10 (the October 1980 issue).

The important thing to take from this section isn't the four styles or their labels (as there are other systems for describing this with their own labels), but the idea that there were many different styles of "old school" play back in the "old school" days – not just the single style stressed in some "old school" blogs, forums, and web sites. Don't let those sites make you believe that you aren't playing old school right if your campaign isn't strongly in the wargaming camp. Most successful campaigns back in "old school" days were a mixture of all four major styles – and a heaping helping of minor styles.

Advice for the New Old School Game Master

If you are comfortable running a rules-light game like standard Microlite20, you'll probably have no trouble running Microlite74 as you have already learned to run a game without having hundreds of pages of rules detailing how to handle every situation that might possibly arise in the game. You've learned to just make a ruling that you think fits the situation and keep the game moving.

Running a Game Without Skills

The greatest change between Microlite20 and Microlite75 is the removal of all character skills. If you are used to just allowing players to just say "I'm searching the room. What do I find?" and make search skill roll or just say "I'll try to persuade the baron to loan us a catapult." and make a persuade skill roll, running without skill rolls is going to require as much change to your thinking as it will to your players' thinking.

First, you need to get your players to tell you what their characters are actually doing in the campaign world, instead of talking in terms of what skill they are using. Then you need to learn to listen to what they say and decide if there description of what they are doing a) would most likely solve the problem, b) wouldn't have a chance of solving the problem, c) might not immediately solve the problem but would provide more info that would help solve the problem, or d) would not definitely solve the problem but has a fair chance of doing so. Only d would require a die roll.

Let's take checking a chest for traps as an example. Get the players to describe in general terms how they are going to check the chest for traps. Note general terms are enough, the idea is to see what the characters are doing, not to require them to describe every single muscle and eye movement they make. Having to "click on one exact pixel on the screen" to succeed is boring and frustrating in a computer game, the verbal equivalent of it is even more frustrating in a tabletop game.

Don't fall into the trap of doing it as it turns players off fast.

Let's say a player says "I'll look the chest quickly over for obvious traps, paying special to the keyhole, clasp, and anything that looks out of the ordinary. I'm not touching it yet."

If the chest had a poison needle near the clasp or some holes for poison gas or needles to shoot out of, this should be enough for the character to notice it without a roll, even if he isn't a Rogue or the like. However, if the chest is set to explode (or shoot daggers out of the opening when opened, such a search is not going to discover the trap – again no matter what the character's class or background as such a trap isn't visible from the outside. If you are feeling generous, you might have a Rogue make roll and if she makes it tell her player that while she doesn't see a trap, something still doesn't seem right about the chest.

If the character had said he was then poking the chest with a pole instead of rushing to open it, he might hear something strange if the chest had the above-mentioned dagger trap. Of course, unless he is a Rogue or has some strange background, chances are he would not associate the noise with a trap, but rather just that there was something loose in the chest. Again, you might give a Rogue a roll, especially an experienced Rogue.

As this example shows, it really isn't hard – unless you choose to make it hard. It's just different. After a few sessions both you and your players will find that it really isn't as hard as it looks.

Some players, however, really want die rolls. Because of previous bad experiences with poor GMs, they just can't trust the GM enough to handle some decisions being made without die rolls. If your players are like this, you can use "skill" rolls as a safety net. The players will still have to describe what their character does to solve the problem just as above. Once the player describes what his character is doing, the GM calls for a class/background based "skill" roll as described in the skills section of these rules. The results are determined by your opinion as GM of the action described and the skill roll. There are basically two situations:

In the first case, you feel that the player has a good plan that should likely succeed. Therefore it will succeed regardless of the result of the roll, but how well it succeeds is determined by the skill roll. A failed skill roll is a minimal success; the character succeeds, but just barely. A successful skill roll means the character's plan succeeds without any major hitches.

In the second case, either the player obviously knows less than his character does about the situation or just comes up with a bad idea that you feel is unlikely to work. You let the skill roll decide the result. A failed roll means the plan fails, while a successful roll means the plan somehow worked after all, but probably not perfectly.

Players who refuse to even try to come up with some type of rational statement about what their character is actually doing but just want to let the skill roll decide automatically fail.

Guidelines Not Rules

Finally, remember that these rules are a tool for the GM. If something herein does not work right in your campaign, change it. The object is to have fun, not be a slave to rules or to players who think being a rules-lawyer is the way to get ahead. In many roleplaying games, the Rules As Written (RAW) are often considered sacrosanct or at least somehow better than those a GM can come up with himself. This is not true of Microlite74 so please change anything you do not like.

Old School Games and Retro-Clones

Microlite74 is designed to be an introduction to "old school" gaming for players more familiar with the 3.x version of the world's most popular fantasy roleplaying game. While I've tried to design Microlite74 for long running campaigns, if you find the "old school" style of play espoused by Microlite74 fun you may want to move to one of the original games or one of their retro-

clones.

What is a retro-clone? The OGL has allowed fans to recreate the rules of older, out of print editions of the world's most popular fantasy roleplaying game. These are usually called "retro-clones" because they are "clones" of the rules to older ("retro") editions of the world's most popular fantasy roleplaying game. Most retro-clones have free PDF versions and most have nicely bound printed copies available for a very reasonable price. Retro-clones allow play of an older, out-of-print game system without the trouble and expense of tracking down a copy of an out-of-print game. While no retro-clone is an exact copy of an earlier game, they generally are close to identical in play.

Oe and Retro-Clones

Oe: The Original Game

<http://www.retroroleplaying.com/book/original-dd>

The original Oe booklets and supplements can be found at auction on eBay or RPG Marketplace or at specialists like Noble Knight Games, but they are generally very expensive collectibles. Some excellent third party Oe adventures (and an excellent campaign setting) from the late 1970s are also available in PDF format. These adventures could easily be used with Microlite74 or a Oe retro-clone – and converted for use with any other early edition/retro-clone with only a little effort.

Original Edition Characters (for Labyrinth Lord)

<http://www.goblinoidgames.com/labyrinthlord.html>

Original Edition Characters is a supplement for *Labyrinth Lord* (see the B/X and Retro-clones section below). It modifies the *Labyrinth Lord* rules to emulate the Oe game.

Microlite74

<http://www.retroroleplaying.com/content/microlite74>

Microlite74 is a restatement of Oe using a very light version of the 3.x rules (*Microlite20*) as a base. You are holding the Standard Version in your hands. *Microlite74 Basic* covers the original Oe boxed set. *Microlite74 Standard* covers the original Oe boxed set and supplements. *Microlite74 Extended* adds a number of house rules and other material the author was using in the late 1970s to overs the original Oe boxed set and supplements. *Microlite74 Companion* volumes add optional rules, detailed spell, monster, and treasure information, and other material which can generally be used with any version of *Microlite74*.

Swords & Wizardry

<http://www.swordsandwizardry.com/>

Swords & Wizardry is an OGL retro-clone of the Oe version from the mid-1970s, the same edition *Microlite74* is loosely based on. *Sword & Wizardry* is handy for complex spell and monster descriptions for use with *Microlite74* as well as a great game itself. The spell lists and monsters can be used as drop in replacements for those listed in *Microlite74*. There are three versions of this game. One uses just the material from the three LBB and the other two also use selected material from the Oe supplements.

B/X and Retro-Clones

B/X: The Original Game

<http://www.retroroleplaying.com/book/classical-dd>

The original B/X boxed sets and the revised version of this edition, the five box BECMi edition, can be found at auction on eBay or RPG Marketplace or at specialists like Noble Knight Games, as can a very large number of excellent adventure and campaign modules. Many of these modules could be used with *Microlite74* or other B/X retro-clones with little modification -- and converted for use with any other early edition/retro-clone with only a little more effort.

Basic Fantasy Role-Playing Game

<http://www.basicfantasy.org/>

The *Basic Fantasy Role-Playing Game* is loosely based on the so-called B/X edition of the world's most popular fantasy roleplaying game from the early 1980s. There are a number of minor tweaks like ascending armor class and separation of races and classes.

Dark Dungeons

<http://darkdungeonsblog.wordpress.com/>

Dark Dungeons is based on the single volume RC version of the BECMi edition from the early 1990s. The rules are fairly close to the original but some changes have been made, especially where setting specific material is concerned.

Labyrinth Lord

<http://www.goblinoidgames.com/labyrinthlord.html>

Labyrinth Lord is more closely based on the so-called B/X edition of the world's most popular fantasy roleplaying game from the early 1980s. While some minor changes have been made for compliance with the OGL and copyright law, many people have a hard time finding any truly major differences between *Labyrinth Lord* and the original.

B/X Companion

<http://bxblackrazor.blogspot.com/2010/07/what-hell-is-bx-companion.html>

The *B/X Companion* is intended to be the mythical 3rd volume designed to complete the work begun with Tom Moldvay's *Basic Rules* and continued in the Dave Cook/Steve Marsh *Expert Rules*, both published in 1981. Both promised a "Companion" volume that would conclude the series. This is an attempt at producing the promised *B/X Companion*. (No free PDF version.)

Companion Expansion

<http://www.lulu.com/product/paperback/companion-expansion/6130494>

This is another attempt at producing the never published "third book" of the B/X version. "Presenting additional creatures and magical items for fantasy roleplaying games for basic- and expert-level players and gamemasters!"

1e and Retro-Clones

1e: The Original Game

<http://www.retroroleplaying.com/book/add-first-edition>

The original 1e rulebooks and adventures can be found at auction on eBay or RPG Marketplace or at specialists like Noble Knight Games – often at good prices if you do not need collectible condition. Also, some excellent third party 1e adventures are available in PDF format. 1e adventures and campaign settings could be converted for use with *Microlite74* or any other early edition/retro-clone without much work.

Advanced Edition Companion (for Labyrinth Lord)

<http://www.goblinoidgames.com/labyrinthlord.html>

The *Advanced Edition Companion* is a supplement for *Labyrinth Lord* (see the B/X and Retro-clones section above). It modifies the *Labyrinth Lord* rules to emulate the 1e game – or at least those parts of it that most players actually used.

OSRIC

<http://www.knights-n-knaves.com/osric/>

OSRIC (Old School Reference & Index Compilation) is an OGL version of the first "advanced" edition of the world's most popular fantasy roleplaying game from the late 1970s and early 1980s. The first edition of *OSRIC* was designed to be just something that would allow publishers to legally publish OGL materials compatible with 1e. This attitude is also responsible for the boring name. The second edition of *OSRIC* is much more complete and is written with both players and publishers in mind.

2e and Retro-Clones

2e: The Original Game

<http://www.retroroleplaying.com/book/add-2nd-edition>

The original 2e rulebooks and adventures can be found at auction on eBay or RPG Marketplace or at specialists like Noble Knight Games – often at very good prices if you do not need collectible condition. Also, some excellent third party 2e adventures are available in PDF format. 2e adventures and campaign settings could be converted for use with *Microlite74* or any other early edition/retro-clone without much work.

For Gold & Glory

http://feysquare.com/?page_id=3

For Glory & Glory is an attempt to create a close adaption of the

2e rules, or at least those in the three 2e core rulebooks.

Myth & Magic

http://www.newhavengames.com/?page_id=23

Myth & Magic is built from the core 2e rules. It retains the essence of classic fantasy role playing, while advancing the mechanics and providing more options, classes, spells, monsters, and more.

Other Fantasy Games

Adventurer Conqueror King System

<http://www.autarch.co/>

Adventurer Conqueror King takes the end game (ruling a domain) assuming in early editions of the world's most popular fantasy RPG and rebuilds the entire game around it, with special attention to a simple but functional economic system.

Adventures Dark and Deep

<http://www.adventuredarkanddeep.com/>

This game is not a retro-clone, strictly speaking. Instead, it is an attempt to create an alternate universe version of 2e. 2e as it might have been if it had been written by the author of 0e and 1e.

Age of Shadows

<http://old.enworld.org/CrookedStaffProductions/page24.html>

A free old-school fantasy RPG based on the Openquest (D100 system) rules.

Barbarians of Lemuria

<http://www.1km1kt.net/rpg/barbarians-of-lemuria>

Non-traditional but still old school rules for fantasy games set on the lost continent of Lemuria -- loosely based on Lin Carter's novels. This is link to the free version. There is also a Legendary Edition from Beyond Belief Games.

The Big Brown Book

http://feysquare.com/?page_id=84

The Big Brown Book takes the rules of 0e and gives them a new spin — What would the world's most popular fantasy role playing game look like had it continued its wargame roots?

Castles & Crusades

<http://www.trolllord.com/cnc/index.html>

Castles & Crusades is 1e reimaged using 3e rules. It's fairly compatible with adventures from all editions of the world's most popular fantasy RPG through 3.5.

Dangers and Dweomers

<http://artikid.altervista.org/?id=Games&detail=Dangers%20and%20dweomers>

Dangers and Dweomers is the designer's personal take on early editions: "As much as possible I streamlined the S&W system, filling what I found as gaps with material from the BFRPG and the SRD."

Dark Passages

<http://www3.telus.net/public/uncouths/Passages.pdf>

Dark Passages is a modernized and re-organized take on the 0e/1e era of rules.

Dragons at Dawn

<http://stores.lulu.com/boggswood>

This game is an attempt to recreate the rules of the original Blackmoor campaign from the early 1970s. "*Dragons at Dawn* is a retro tribute to the very first fantasy gaming system pioneered by Dave Arneson, the man who later went on to co-author the world's most popular roleplaying game. The result of years of careful historical research, *Dragons at Dawn* is entirely consistent with Arneson's original, largely forgotten methods of play developed roughly in the period 1970-1973." (No Free PDF version.)

Epées & Sorcellerie

<http://www.lulu.com/product/file-download/ep%C3%A9es-sorcellerie-%28english-translation%29/16178887>

Epées & Sorcellerie is a French RPG strongly inspired by 0e. An English translation is available.

Errant

<http://errantgame.blogspot.com/p/errant-rpg.html>

Errant RPG is a retro-clone that captures the basic play style of the classic game while introducing a variety of modern innovations to improve play.

Fire & Sword

<http://basicroleplaying.com/downloads.php?do=cat&id=12>

Fire & Sword was created by Raymond Turney, a co-creator of *RuneQuest*, and *Fire and Sword* is his evolution of the system. It thus has much in common with *BRP*, but contains many new interesting mechanisms.

Forward to Adventure!

<http://www.flyingmice.com/FTA.html>

This game is not a retro-clone, but a modern game that was designed with "old school" dungeon adventuring in mind. While not an "old school" game by any stretch of the imagination, it would be relatively easy to use FtA! to run a campaign in the old-school style. Unlike most modern RPG designs, there is little designed into FtA! that would interfere with this which makes it a system those who like the "old school" style of play but dislike the "old school" style of rules might wish to consider. (No free PDF version.)

Lamentations of the Flame Princess

<http://lotfp.blogspot.com/>

Lamentations of the Flame Princess is a 0e-like rules system with a stress on "weird fantasy." (Free PDF version of the "Grindhouse" rules available.)

Legends of the Ancient World

<http://www.darkcitygames.com/display.php?series=law>

Legends of the Ancient World is a rules-light clone of Megagaming's *The Fantasy Trip* -- complete in seven pages. The game is a free PDF, but the publisher sells solitaire adventures for it similar to the ones Megagaming produced for TFT.

Mazes & Minotaurs

<http://mazesandminotaurs.free.fr/>

Mazes & Minotaurs answers the question of what might 0e and 1e look like if their designers had been interested in classical Greek fantasy rather than medieval fantasy. There are two versions of the game available: Original and Revised.

Old School Hack

<http://www.oldschoolhack.net/>

Sort of the old Red Box version reimaged through a somewhat new school lens. It's not really an old school game but it not really not an old school game either.

Pars Fortuna

<http://matt-landofnod.blogspot.com/p/pars-fortuna.html>

What if you took the *Swords and Wizardry* rules and threw out all the standard races, classes, spells, monsters and magic items and replace them with ones generated randomly via sites like Chaotic Shiny, Seventh Sanctum or Abulafia? You get *Pars Fortuna*. (No free PDF version, although a free basic version is available.)

Siege Perilous

<http://oldguyrpg.blogspot.com/2009/09/siege-perilous-ultima-rpg-playtest.html>

Siege Perilous is a 0e variant designed to emulate the first three games of a very popular computer roleplaying game from the early 1980s.

Spellcraft & Swordplay

<http://stores.lulu.com/elflairgames>

Spellcraft & Swordplay is an OGL redesign of the 0e version from the mid-1970s. The designer decided to rewrite 0e based on the original combat system (from the miniatures rules 0e grew out of) instead of 0e's "alternative combat system." The alternative combat system quickly became the standard combat system of the world's most popular fantasy roleplaying game. This is sort of a retroclone from an alternate universe where the original combat system was the most-used. (No free PDF

version, although a free basic version PDF is available.)

Tombs & Terrors

<http://beyondbeliefgames.files.wordpress.com/2010/12/cq-tt1.pdf>

Tombs & Terrors is an unashamedly familiar role playing game of delving into subterranean crypts and looting the treasure -- compatible with sourcebooks and supplements that you already have.

ZeFRS

<http://www.midcoast.com/~ricekrwc/zeprs/>

David "Zeb" Cook's 1985 rules for the TSR Conan roleplaying game returns as a generic sword-and-sorcery RPG complete in one volume. Trample the jeweled kingdoms of your own world beneath your sandals!

Other Games

Mutant Future

<http://www.goblinoidgames.com/mutantfuture.html>

Mutant Future is a nuclear post-apocalyptic science fantasy game. It is created in the style of similar RPGs from the late 70s, but built around the core *Labyrinth Lord* rules so that these two games are fully compatible.

Stars Without Number

http://rpg.drivethrustuff.com/product_info.php?products_id=86467

Stars Without Number is a retro science fiction role playing game influenced by the Old School Renaissance and partially inspired by the great fantasy role-playing game editions written by Tom Moldvay and Frank Mentzer.

Weird West

http://rpg.drivethrustuff.com/product_info.php?products_id=91122&affiliate_id=163285

Weird West is a fast playing adventure roleplaying game with a very small set of rules for weird western worlds of cowboys, kung-fu, magic and otherworldly malevolence.

Adventures and Settings

There are a large number of adventures and campaign settings available for TSR editions of the world's most popular fantasy RPG. Playing copies of most of original adventures from TSR can be found on eBay for very low prices. TSR era adventures can be used with any pre-WOTC edition or retroclone with only very minor conversion.

There are also a large number of free and low cost adventures available in PDF format on the web. A good play to start looking for free adventures is on the Dragonsfoot forum web site (see the link under Old School Internet Resources below.

The best settings and adventures, however, are those you create yourself for your campaign. They don't need to be nearly as elaborate as those produced for use by others, let alone as fancy as those written for professional publication. Many 0e GM adventure location keys (including those of the game's original designers) were nothing but room/location numbers with something like "8 hobgoblins, leader has 20gp, trapdoor in floor hides skeleton with silver dagger (animates if dagger touched)" or "Small village, 27 families, 10 orc slaves, Headman: Mongar the Brown (Ftr 4th lvl, +1 sword) Mongar's wife, Rose is a 3rd lvl Cleric of Odin)." You can do that.

Microlite20 Notes

Microlite20 is a trimmed down sub-miniature version of the OGL 3.5 SRD. In its most basic form, Microlite20 has only two pages of rules but can be used with most fantasy OGL and d20 adventures and supplements with little or no conversion. Since M20 was published in 2006, many people who prefer rules-lite games have been using it for their d20 games and/or writing expansions, supplements and other material especially for M20. You can find out more about the original Microlite20 and find more variants like Microlite74 on the Microlite20 web site:

<http://microlite20.net/>

Retroroleplaying Web Site

The author of Microlite74 maintains a web site devoted to out of print and out of style tabletop roleplaying games. He is always willing to discuss and answer questions about Microlite74 in the Microlite74 board on the Retroroleplaying forum.

Web Site: <http://www.retroroleplaying.com/>

Forum: <http://www.retroroleplaying.com/forum/>

Blog: <http://blog.retroroleplaying.com/>

Old School Internet Resources

Old-School Blogs

There are a lot of old-school blogs. Even a selection of just the ones I currently read regularly would fill up a page or two and would likely be out of date quickly. Fortunately, there is a great place to find old school RPG blogs -- the RPG Blog Network, check the Legacy D&D category:

<http://www.rpgbloggers.com/>

Major Old-School Forums

Dragonsfoot

Very large forum discussing 1e and earlier, related games like retro-clones, Hackmaster, and Castles & Crusades. Many people who worked for TSR in the early days post here. Many free downloads including Footprints magazine and adventures.

<http://www.dragonsfoot.org/>

Knights & Knaves Alehouse

Discussions of 0e and 1e.

<http://knights-n-knaves.com/phpbb/>

Original D&D Discussion

Mainly discussions of 0e. Home of Fight On! Magazine.

<http://odd74.proboards76.com/>

The Piazza: Old D&D Campaign Worlds

Discussions of old published campaign worlds including many no longer officially supported.

<http://www.thepiazza.org.uk/bb/index.php>

Old School Product

A number of publishers are producing new material for old school games (using the OGL and retro-clones for compatibility). Many of these products are available through Lulu's Old School Renaissance group. Some downloadable products are free.

<http://stores.lulu.com/oldschoolren>

Microlite74 Trademark License

You may use the Microlite74 trademarks in your own OGL products without obtaining prior permission from the trademark owner in two cases:

- 1) Adventures, campaign settings, and other supplements either designed specifically for Microlite74 or that are written for another 0e, B/X (BECMI) or 1e rules set may be labeled "Suitable for use with Microlite74" (or suitable for use with specific versions: Basic, Standard, and/or Extended).
- 2) Microlite74 may be mentioned by name in documents (or sections of a larger product) written to provide information on converting adventures and other materials between one game system and another.

In no case may the Microlite74 trademarks be used in any manner than indicates a product is endorsed or otherwise approved by the author of Microlite74. The terms "Microlite74 Companion" and "Microlite74 Supplement" may not be used in the title of a product without permission in writing.

All others uses of the "Microlite74" trademarks in products requires permission in writing from the trademark owner. This permission will generally be given, so don't be afraid to ask.

This product is 100% Open Game Content except for Product Identity, as per the Open Game License above. Product Identity includes Microlite74, Microlite74 Basic, Microlite74 Standard, Microlite74 Extended, Microlite74 Companion, Microlite74 Supplement, and Randall S. Stukey and all pictures and illustrations.

Microlite74 Standard

Microlite74 games are trimmed-down miniature versions of the Primary Fantasy SRD rules designed to be quick and easy to play, especially when compared to modern incarnations of the game. The goal of *Microlite74* games is to recreate the style and feel of that very first ("0e") fantasy roleplaying game published back in 1974 without giving up all of the clearer mechanics of modern D20-based versions.

The *Microlite74 Standard* rules are based on three little booklets found in the boxed set of the 1974 original edition of the world's most popular tabletop fantasy roleplaying game plus rules from the four supplements and official material published in magazine articles. The rules are not intended to be a clone of the 0e rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules. *Microlite74 Standard* is a version of the third edition of the original *Microlite74* rules and includes material originally published in the *Microlite74* supplement *Wary's Grimoire*.

Other Versions include *Microlite74 Basic* and *Microlite74 Extended*. *Microlite74 Basic* rules are complete but basic: There are only three classes (Fighter, Magic-User, and Cleric). Spells are limited and levels top out at 12 to 14. *Microlite74 Extended* includes all the material in the standard version extended with a number of house rules the author used in his 0e campaigns starting in the late 1970s. *Microlite74 Companion* volumes add even more options to the game.

These rules assume that the GM understands the basic concepts of roleplaying games, but provides information for both the GM and the players on the various "old school" styles of play. *Microlite74* games can easily use adventures and material from early editions of the world's most popular tabletop fantasy roleplaying game or modern clones.

Microlite74

Extended Edition

Version 3.0 (Condensed Type Edition)

OGL20 Rules for Tabletop Fantasy Roleplaying Campaigns with Old School (0e) Flare

Microlite74 Extended

Version 3.0 (October 1, 2011)

Copyright © 2008, 2009, 2010, 2011 Randall S Stukey

Special Thanks to ADD Grogard, Lord Rocket, Kingstrum, Pete Ubu, and Zimzerveran
for proofreading. All art is in the public domain.

*Microlite74 is dedicated to the memory of those who gave us the first roleplaying games and
campaigns:*

Dave Arneson, E. Gary Gygax, David Hargrave, Bob Bledsaw

Microlite74 Extended, like its parent game, *Microlite20*, is a trimmed-down, sub-miniature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal of *Microlite74* games, however, is to recreate the style and feel of that very first ("0e") fantasy roleplaying game published back in 1974.

The *Microlite74 Extended* rules are based on three little booklets found in the boxed set of the 1974 0e edition, the four 0e supplements, material from the publisher's official magazine and third party products of the time and the author's house rules from the late 1970s. The rules are not intended to be a clone of the 0e rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules. *Microlite74 Extended* is based on the third edition of the original *Microlite74* rules and was originally called *Microlite75*.

These rules assume a basic familiarity with tabletop role-playing games in general and with the basic principles of "D20" based rules. If you are completely new to tabletop role-playing games, you will want to start by playing with someone who is familiar with how they work.

The Rules

Stats

There are 4 stats: Strength (STR), Dexterity (DEX), Mind (MIND), and Charisma (CHA).

Roll 3d6, total the 3 dice, and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/3, round toward zero.

Races

Humans get +1 to any 2 stats. Experience base modifier of +0. *Special Abilities*: none

Dwarves get +2 to STR. Experience base modifier of +5. *Special Abilities*: +4 to any save vs. a magical effect; note slanting passages, traps, shifting walls and new construction in underground settings (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of dwarves, gnomes, kobolds and goblins; can see in darkness half as well as in light.

Elves get +2 to MIND. Experience base modifier of +7. *Special Abilities*: Can use elf-made magic armor and magic weapons even as a magic-user/illusionist; +2 to hit and damage goblinoid monsters; note secret/hidden doors (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of elves, orcs, hobgoblins, and gnolls.

Gnomes get +1 to STR and DEX. Experience base modifier of +4. *Special Abilities*: +4 to any save vs. poison; note slanting passages, unsafe walls, ceilings, or floors in underground settings (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of dwarves, gnomes, kobolds and goblins; can see in darkness half as well as in light.

Half-Elves get +2 to CHA. Experience base modifier of +5. *Special Abilities*: Can use elf-made magic armor and magic weapons even as a magic-user/illusionist; note secret/hidden doors (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of elves, orcs, hobgoblins, and gnolls.

Half-Orcs get +2 to STR and DEX and get -2 to CHA. Experience base modifier of +4. *Special Abilities*: +1 to hit with light or medium weapons; thick hide gives +1 to armor; speak languages of orcs, goblins, hobgoblins, and gnolls.

Halflings get +2 to DEX. Experience base modifier of +3. *Special Abilities*: +4 to any save vs. a magical effect; +2 to hit

and damage with slings and light bows; can blend in background (d20 + DEX Bonus; DC 12 if outdoors, DC 16 if indoors – this is an extraordinary ability above and beyond simply hiding in available cover which anyone can try to do).

Classes

Classes are divided into three groups: Fighting Classes (those who have a lot of training in combat), Arcane Classes (those who focus most of their training in magic), and Specialist Classes (whose training is focused on things other than combat or magic). Characters normally begin at Level 1 (unless directed otherwise by the GM).

Standard Classes

The standard classes are Fighter, Ranger, Paladin, Magic-User, Illusionist, Cleric, Druid, and Thief. They are common to most campaigns and may be used unless your GM says otherwise.

Fighters (Fighting Class) can wear any kind of armor, can use any weapon and may use shields. *Physical Combat Bonus* is level/2, round up. *Magical Combat Bonus* is level/4, round up. Experience Base is 20. Class Saving Throw Bonus is +4. They add +2 to FORT saves. They add +1 to all attack and damage rolls. This increases by +1 at 4th level and every four levels thereafter. After a fighter kills an opponent in melee combat, he may immediately make another attack against any still-standing foe in range. The maximum number of attacks he can make in one round is equal to his level.

Rangers (Fighting Class) can wear light or medium armor, may use shields, and can use any weapon. *Physical Combat Bonus* is level/2, round up. *Magical Combat Bonus* is level/4, round up. Experience Base is 25. Class Saving Throw Bonus is +2. They add +1 to FORT and REF saves. They add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels thereafter. They are expert at wilderness tracking and survival and good at moving quietly and hiding in cover in the wilderness.

Paladins (Fighting Class) can wear any armor, may use shields, and can use any weapon. *Physical Combat Bonus* is level/2, round up. *Magical Combat Bonus* is level/4, round up. Experience Base is 25. Class Saving Throw Bonus is +3. They add +1 to FORT and PRE saves. They add +1 to all attack, damage and saving rolls. This increases by +1 at 5th level and every five levels thereafter. Paladins are immune to disease, detect evil within 60 feet by concentrating, and heal 1 BP per class level per day by laying on hands. Paladins must be true to the tenets of the religion or philosophy they follow to gain experience.

Magic-Users (Arcane Class) wear no armor and can only use daggers, slings or staves as weapons. *Physical Combat Bonus* is level/4, round up. *Magical Combat Bonus* is level/2, round up. Experience Base is 30. Class Saving Throw Bonus is +1. They add +2 to WIL saves. They cast arcane spells and have the Minor Magic and Arcane Blast special abilities.

Illusionists (Arcane Class) wear no armor and can only use daggers, slings or staves as weapons. *Physical Combat Bonus* is level/4, round up. *Magical Combat Bonus* is level/2, round up. Experience Base is 30. Class Saving Throw Bonus is +1. They add +1 to WIL and PRE saves. They cast illusionist spells and have the Minor Magic and Arcane Blast special abilities.

Clerics (Specialist Class) can wear light or medium armor and use shields, but cannot use edged weapons, bows, or crossbows. *Physical Combat Bonus* is level/3, round up. *Magical Combat Bonus* is level/2, round up. Experience Base is 20. Class Saving Throw Bonus is +2. They add +1 to FORT and WIL saves. They cast divine spells and have the Turn Undead and Smite special Abilities.

Druids (Specialist Class) can wear light or medium armor and use shields and can use any light weapon. *Physical Combat Bonus* is level/3, round up. *Magical Combat Bonus* is level/2, round up. Experience Base is 25. Class Saving Throw Bonus is +1. They add +1 to WIL and PRE saves. Druids can cast druid spells, have immunity to woodland fey, the ability to Pass

Without Trace at 3rd Level, and can shape shift to a small/medium animal up to 3 times per day at 7th Level. When shape shifting back to their original form, the Druid can heal 2 HP per level of damage. They are good at wilderness survival.

Thieves (Specialist Class) can wear light armor, use shields, and use any light or medium weapon. *Physical Combat Bonus* is level/3, round up. *Magical Combat Bonus* is level/3, round up. Experience Base is 20. Class Saving Throw Bonus is +3. They add +2 to REF saves. They have the Sneak Attack special ability which adds the Thief's class level to the damage of his first attack, if he successfully sneaks up on a foe. They can use a spell from an arcane scroll successfully on a roll of 1d20 + MIND bonus + Magical Combat Bonus versus a DC of 10 + (2 x spell level). Spell fades as if used on failure and backfires on a natural roll of the spell level or less. Thieves are experts at urban survival as well as picking pockets, hiding, sneaking, and other tasks associated with theft.

Optional Classes

The following classes are optional as they will not fit well in many campaigns. They may only be used in a campaign with GM approval.

Assassins (Specialist Class) can wear light armor, use shields, and use any light or medium weapon. *Physical Combat Bonus* is level/3, round up. *Magical Combat Bonus* is level/4, round up. Experience Base is 20. Class Saving Throw Bonus is +2. They add +1 to FORT and REF saves. Assassins are experts at disguise, hiding, sneaking, and spying. Assassins automatically hit (and add their class level to the damage of that hit) with their first attack when attacking from a prearranged (and unsuspected) ambush.

Barbarians (Fighting Class) can wear light or medium armor, may use shields, and can use any weapon. *Physical Combat Bonus* is level/2, rounded up. *Magical Combat Bonus* is level/4, rounded up. Experience Base is 30. Class Saving Throw Bonus is +3. They add +2 to FORT saves. They add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels thereafter. They are expert at wilderness survival and good at moving quietly and hiding in cover in the wilderness.

Barbarians may go into a berserker rage when in combat. During a berserker rage, they always attack the nearest foe (determine randomly if multiple foes in range). His ferocity doubles his fighter bonus to his attack roll and his damage. To break off combat (before all foes are dead) the berserker barbarian must make a WIL save (-2 for every opponent still standing). Each round the barbarian is berserker costs him 2 hp, subtracted immediately after the berserker rage ends.

Bards (Specialist Class) can wear light armor, use shields, and use any light or medium weapon. *Physical Combat Bonus* is level/3, rounded up. *Magical Combat Bonus* is level/2, rounded up. Experience Base is 25. Class Saving Throw Bonus is +1. They add +2 to PRE saves. A Bard's musical abilities allow him to play songs with the effect of Druid or Illusionist spells (starting at 6th level as if he were 5 levels lower in the chosen class), can counter sound-based effects within a 30 foot radius, and Charm Person or Remove Fear once per day (plus one additional time per day at 5th level and every five levels thereafter).

Monks (a Fighting Class also known as **Martial Artists**) cannot wear armor or use shields. While they can use light weapons, they are most effective with their bare hands and feet. *Physical Combat Bonus* is level/2, round up. *Magical Combat Bonus* is level/4, round up. Experience Base is 25. Class Saving Throw Bonus is +2. They add +2 to REF saves. They add +1 to all attack and damage rolls in unarmed combat. This increases by +1 at 4th level and every four levels thereafter. They cause 1d8 + STR bonus + class level/2 (round up) damage in unarmed combat. So long as they are able to move at all their armor class is 11 + class level/2 (round up) + one per point DEX is over 14. They are good at moving quietly and hiding in cover.

Mystics (Arcane Class) wear no armor and can only use

daggers, slings or staves as weapons. *Physical Combat Bonus* is level/4, round up. *Magical Combat Bonus* is level/2, round up. Experience Base is 30. Class Saving Throw Bonus is +1. They add +2 to PRE saves. They cast spells from any Microlite74 spell list as rituals and have the Minor Magic and Smite special abilities.

Sorcerers (Specialist Class) can wear light or medium armor, may use shields, and can use any light or medium weapons. *Physical Combat Bonus* is level/3, rounded up. *Magical Combat Bonus* is level/2, rounded up. Experience Base is 30. Class Saving Throw Bonus is +1. They add +1 to FORT and WIL saves. They can cast arcane spells as rituals and have the Minor Magic special ability.

Warlords (Fighting Class) can wear any kind of armor, can use all weapons and may use shields. *Physical Combat Bonus* is level/2, rounded up. *Magical Combat Bonus* is level/4, rounded up. Experience Base is 25. Class Saving Throw Bonus is +2. They add +1 to FORT and PRE saves. They add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels thereafter. When leading a group of hirelings under their command, the hirelings subtract the Warlord's fighter bonus in any morale checks and add one-half the Warlord's fighter bonus (round up) to their attack and damage rolls. Warlords are expert at riding and at small unit tactics.

Class Special Abilities

Some classes have special abilities which cannot easily be explained in a sentence. These named special abilities are described in this section.

Cleric Special Abilities: All Clerics have the following special abilities. The cleric must have a holy symbol of his religion in hand to use these abilities.

Turn Undead - Clerics can Turn Undead. Roll 1d20 + CHA Bonus + level versus a DC of 10 + twice the Hit Dice of the undead. One undead flees per point over the roll needed. Turning Undead costs HP equal to the number of hit dice possessed by the highest HD undead the cleric is attempting to turn.

Smite - A cleric may imbue his normal weapon with holy power allowing it to hit monsters that normally require silver or even magical weapons to hit. Spending 1 HP before making the attack roll will allow hitting monsters that require silver (or other special non-magical) weapons to hit. Spending 2 HP before making the attack roll will allow hitting monsters that require magical weapons to hit.

Magic-User Special Abilities: All Magic-Users and Illusionists have the following special abilities. All require the use of a special wand hand-made by the magic-user (see Implements in Magic rules section).

Arcane Blast - A Magic-User can shoot a dart of magic energy from the tip of their handmade wand once per round provided no other action is taken. They must roll to hit the target normally. Range: short 60; medium 120; long 180. Usable once per round if no other action taken and does 1d4 damage if it hits. No saving throw is allowed. Requires pointing a handmade wand at the target and costs 1 HP per use. The visible effects can be whatever the Magic-User desires; note that this does not affect damage, it only adds color to the ability.

Minor Magic - Magic-Users can cast minor "everyday/non-combat" magic at will. Basically, any everyday thing someone could do mundanely, a magic-user or illusionist can do with minor magic. Attempting something the GM considers abusive fails and causes the magic-users wand to explode (doing 1d6 backfire damage to the magic-user unless a WIL save is made). Usable once per round if no other action taken. Requires waving a handmade wand. Cost 1 HP per use.

Some examples: Light a candle or pipe with a flame from the wand tip. Dust things – at first level a minor magic spell might be needed for each shelf or piece of furniture, while at third level a single spell might dust a room and at sixth level the magic-user's the entire floor of a house or tower. Tie or untie a

knot. Float coins from the magic-users coin purse to a merchant's hand. Open a cabinet. Mix drinks. Dress/undress.

Background

Characters may select, with the approval of the GM, a one or two-word background that represents a broad base of skills and knowledge, e.g. Farmer, Merchant, Desert Nomad, Noble, Shaman, Templar, Thyatian Mercenary, Ritualist, etc. Backgrounds need not be related to the PCs class, e.g. a player who creates a deeply religious fighter skilled in the arts of vision interpretation, divination and oration might pick 'Prophet' as a background. Backgrounds may not duplicate a class.

The GM will consider the character's background just as he would the character's class when deciding if a character will succeed with an action. For example, a character with an "Engineer" background should have a much better chance of damming a creek or building a bridge over it than a character with a "Courtier" background.

Skills

There are no specific skills in Microlite75. Instead players are expected to think like adventurers, tell the GM what they are doing and the GM decides if it will succeed in the situation, taking into account the characters' classes and backgrounds. If the GM decides a random success chance is truly needed he may resolve the situation with a roll of his choice or he may call for one of the following rolls:

Primary Skill Roll: 1d20 + Stat Bonus + Class Level if the character is attempting something directly related to their class or background.

Secondary Skill Roll: 1d20 + Stat Bonus + (Class Level/2, round up) if the character is attempting something only loosely related to their class or background.

Minor Skill Roll: 1d20 + Stat Bonus + (Class Level/3, round down) if the character is attempting something not really related to their class or background.

When the GM calls for a skill roll, he will declare the type of skill roll, which stat the skill roll falls under, and any situational modifiers and the player will make a skill roll. (The GM should make the roll in secret if seeing the result would give the player more information than his character should have.)

Roll higher than the GM assigned Difficulty Class to succeed. Unless the GM rules otherwise, a natural roll of 20 always succeeds for a Primary Skill Roll. Suggested Difficulty Classes: Easy - 8, Normal - 12, Difficult - 16, Hard - 20, Very Hard - 24, Legendary - 28, Unbelievable - 32.

Certain classes (Thieves and Rangers, for example) have abilities that members of those classes are good at -- or even expert at. The GM must be sure to take such strong abilities into consideration when deciding success or failure of a related action.

Basic Adventuring Skills: Unless a player specifies otherwise about a character at character creation, all characters are assumed to have basic practical adventuring skills such as maintaining weapons and armor, riding a horse, setting up a camp, swimming, climbing, cooking, first aid, etc., and have a rough idea of the value of common coins, trade goods, gems, and jewels. Success should simply be assumed unless there are unusual conditions.

Languages: All character races speak common. Other intelligent beings speak their own languages (20% chance of also speaking common). Beings with a MIND over 10 may speak one additional language per point of MIND over 10 (these are in addition to any languages known by race).

Saving Throws

When subject to an unusual or magical attack, characters generally get a saving throw to avoid or reduce the effect. To make a saving throw, roll 1d20, add modifiers based on the type of saving throw (and any circumstantial modifiers set by the GM). A natural roll of 1 automatically fails. A natural roll of 20 automatically succeeds. Otherwise, the saving throw is

successful if the total of the roll and modifiers is 20 or greater. Standard Modifiers are the total character's Class Saving Throw Bonus, the character's Level/2 (round down), and a Stat/Class bonus based on the type of saving throw.

Types of Saving Throws: There are four types of saving rolls: Fortitude (FORT), Reflex (REF), Will (WIL), and Presence (PRE).

Fortitude: These saves measure ability to stand up to physical punishment or attacks against vitality and health. Add STR bonus to Fortitude saving throws. *Reflex:* These saves test ability to dodge area attacks. Add DEX bonus to Reflex saving throws. *Will:* These saves reflect resistance to mental influence and many magical effects. Add MIND bonus to Will saving throws. *Presence:* These saves reflect resistance to fear, awe, and some "social" effects. Add CHA bonus to Presence saving throws.

Alignment

Basic Alignment: There are three basic alignments: Light, Dark, and Neutral. Only intelligent beings have alignment and the vast majority of those tend to be neutral. Player Characters should select an alignment for their characters.

Light: Light aligned characters try to avoid unnecessary harm to others by their actions or inaction. They often put the good of society/everyone over the immediate good of themselves and their friends. They are usually willing to help others/society even if doing so is somewhat inconvenient. If given power over others, they tend to use it for the good of all.

Dark: Dark aligned characters only care about themselves and those who are currently useful to them. While they may not go out of their way to harm others, they do not care if others are harmed as long as they succeed at their personal goals. They are generally only willing to help others/society if they get something they want or need out of it. If given power over others they tend to abuse it and use it mainly to help themselves.

Neutral: Neutral characters tend to put themselves and their friends first, but will generally not allow others to come to unnecessary harm or inconvenience in order to succeed. They are willing to help others/society so long as doing so is not inconvenient. If given power over others, they tend to use it for good, but they and their friends come first.

Virtues and Vices (Optional): As in real life, each character has virtues (admirable character traits) and vices (not so admirable character traits). Players select six traits from the lists below before play starts. Neutral characters must select three from each list. Light aligned characters must select at least one (but no more than two) vices. Dark aligned characters must select at least one (but no more than two) virtues. Players can select virtues and vices not on the list with GM approval.

Virtues	Vices
Academic	Arrogant
Austere	Bigoted
Bold	Capricious
Cheerful	Cowardly
Compassionate	Egoistical
Courageous	Fearful
Daring	Hateful
Determined	Hidebound
Fair	Impulsive
Faithful	Insensitive
Friendly	Lazy
Generous	Manipulative
Gregarious	Miserly
Honest	Petty
Hopeful	Power Hungry
Industrious	Rude
Just	Self-Centered
Kind	Spendthrift
Patriotic	Stubborn
Thoughtful	Thoughtless
Thrifty	Vengeful

Magic

Magic-using characters can cast any spell from their respective spell list with a spell level equal or below 1/2 their class level, rounded up. A Magic-User or Illusionist starts with Read Magic and 1d2 additional first level spells in his spell book (which must be approved by the GM) and can add more spells by finding (or buying) them on scrolls or books and copying them into his spell book. A Magic-User or Illusionist can memorize up to Level + MIND bonus spells and these spells can be directly cast (others spells may be cast via a casting ritual). A Magic-User or Illusionist requires his spell book and 1 hour of time to change the spells he has memorized. Clerics and Druids do not need spell books and automatically have access to all divine spells of a level they can cast (use of certain spells may be forbidden by the cleric's deity, however).

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character.

Casting Cost: Direct casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast if the spell is cast with an implement and 1 + triple the level of the spell being cast if the spell is cast without an implement:

Spell Level	1	2	3	4	5	6	7	8	9
HP Cost with Implement	3	5	7	9	11	13	15	17	19
HP Cost without Implement	4	7	10	13	16	19	22	25	28

Although there are ways to reduce the cost of casting spells, the casting cost cannot be reduced below 2 Hit Points.

Spell Difficulty Class: For purposes of things like dispelling, the Difficulty Class (DC) for all spells is: 10 + Caster Level + Caster's MIND bonus

Signature Spells: Select one 'signature' spell per spell level from first upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use. For Magic-Users and Illusionists, signature spells are always in memory and do not count against the number of spells a caster can memorize.

Implement Use: Spells cast through an implement (a wand or staff for a Magic-User, Illusionist or other arcane caster, a holy symbol for a cleric, druid, or other divine caster) cost less to use. The implement must either be a magic item or be made by the caster (12 hours, wood, and carving tools needed). The implement must be undamaged and in the caster's hand at the time the spell is cast.

Combat Casting: In combat, if a character is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles. This costs the caster 1 HP per level of the spell he was attempting to cast and the caster loses his action for the round.

Ritual Magic: A Magic-User or Cleric can perform ritual magic to cast spells of any level (and other special rituals that might be found in old books or scrolls) provided the caster has a written copy of the spell or ritual, any needed materials (mainly required by special rituals), and the time and space needed to perform the ritual.

Ritual casting of a spell of a level the caster is able to cast normally takes 10 minutes and costs 1 HP per level of the spell being ritually cast. Ritual casting of a spell of a level the caster is not yet able to cast normally takes 10 minutes per level of the spell and costs twice as much in hit points as it would to cast directly. Ritual casting of a special ritual takes as long and costs as many HP as the ritual states (that is, the GM assigns these as needed when he creates the special ritual). Multiple Magic-Users and/or Clerics may participate in a casting a special ritual with the HP cost of casting divided among them.

Optional Sacrifices - One or more beings with human or better intelligence may be sacrificed during ritual magic. Each sacrifice

made adds 10 minutes to the ritual and provides 10 plus the being's level or hit dice in HP to power the ritual. This amount is tripled if the being is truly a willing sacrifice. Some special rituals may require the sacrifice of intelligent beings. The sacrifice of intelligent beings is normally against the law in civilized societies.

Hit Points and Healing

Hit Points (HP): Hit Points for Fighting Classes equal STR + 1d8 per Level. Hit Points for other classes equal STR + 1d6 per level. If Hit Points reach 0, the character is unconscious and begins to take severe physical injury. Further damage, including any remaining points of damage the attack that reduced hit points to zero, directly reduces Body Points. Hit Points represent stamina, luck, minor cuts and scrapes, etc. Optional: To avoid confusion, "Hit Points" may be renamed "Fatigue Points."

Body Points (BP): All characters have 20 Body Points. If Body Points reach 0, the character is dead. Each two points of body damage a character has suffered gives a -1 to all attack, success, saving, and similar rolls (also to strike speed). *Option:* Body Points for Fighting Classes equal 20 + (Level/2) (round down, maximum 30). Body Points for Arcane Classes equal 20 - (Level/2) (round up, minimum 10). This has fighting classes slowly becoming tougher while arcane classes lose physical conditioning as they become more magically powerful.

Recovering Hit Points: All characters recover all hit points after six hours of total rest. If a character has lost Body Points due to wounds, only 50% of total hit points lost are recovered per six hours of rest.

Healing Body Point Damage: Body points lost recover at a rate equal to the character's STR Bonus (minimum of 1 point regained) per full day of rest. If a character with up to 50% Body Point damage (up to 10 points of BP damage if base 20 BP is used) performs more than very light activity or careful travel during a day, he has a 50% chance of losing an additional body point. If a character with more 50% of Body Point damaged (11 or more points of BP damage if base 20 BP is used) does anything other than rest quietly in bed during a day, he has a 50% chance of losing an additional body point.

Bleeding (optional): A character who has been reduced to 0 hit points by weapon or other trauma-related damage will eventually bleed out and die if their wounds are not bound. A bleeding character must make a FORT Save every minute or suffer one body point of additional damage. Binding wounds takes 1 minute per point of body damage taken, but no further bleeding rolls are needed (including while the wounds are being bound). Any healing spell cast on a bleeding character will effectively stop the bleeding.

Healing Magic (Optional): Healing magic is not instantaneous, 1 body point will be cured per 10 minutes of rest after the spell is cast (up to the maximum the spell will cure), if the rest is interrupted any remaining points of healing are lost.

Second Wind (Optional): Once per day, characters may regain 20% of their total hit points (round up) by resting in a safe place for an hour while eating a meal. This amount is reduced by 2 hp per point of body damage (to a minimum of 0 hp recovered).

Monster Body Points (Optional): If the GM does not mind the added complexity, monsters may have Body Points as well. A monster's Body Points are equal to twice the number of hit dice the monster has. This option is not recommended.

Combat

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 a side is surprised and may not act at all in the first round. If attacking from an undetected ambush, the ambush victims are surprised on a roll of 1-4. A side cannot be surprised if it is aware of the other.

Combat Stance: Any character able to act may select a combat stance. Any character who has not announced their combat stance before initiative is rolled automatically selects "Standard." Combat Stances (and their effects) are *Full Defense*

(Attack: no attack possible; AC: +2 bonus, +4 bonus with shield, +6 bonus with large shield; Strike: -5), *Active Defense* (Attack: -2 penalty; AC: +1 bonus, +2 with shield; Strike: -2), *Standard* (Attack: Normal; AC: Normal; Strike: normal), *Active Attack* (Attack: +1 bonus; AC: -1 penalty; Strike: +1), and *Full Attack* (Attack: +2 bonus; AC: -2 penalty; Strike: +2). Spell casters casting a spell cannot select the Full Defense or Active Defense Stance. The Stance Strike modifier is optional.

Initiative: Roll 1d20 for initiative for each side. The side with the higher roll gets a +5 to strike speed for the round. Spell casters casting a spell must declare the spell being cast and its target before initiative is rolled.

Actions: Combat is very abstract. Each combat round lasts a minute and includes a lot of jockeying for position, feints, etc. The "hit roll" determines if any damaging blows were delivered during the round. Everyone can do one thing each round; move, attack, cast a spell, etc. The GM may choose to allow some combined actions, like a charge attack, to be one thing. A 5-foot step/shift, drawing a weapon, speaking or similar activities are "free" and do not count as an action.

Strike Speed: Characters and monsters act in order of their strike speed from high to low. Base Strike Speed is determined by their action type in the table below. Characters/Monster add +5 to the Base Strike Speed if their side has initiative. Fighting Classes add their Fighter attack bonus. Monsters add one-half their hit dice, rounded down if the GM classes them as fighters. (Ties in Strike Speed are resolved by Character Level/Monster Hit Dice, with the higher acting first.) The Strike modifier from a character's combat stance is added if the GM use this option.

SS	Weapon/Attack Action
1	Read Scroll
2	Cast Spell
3	Short Length Weapon
4	Medium Length Weapon
5	Long Weapon
6	Very Long Weapon
7	Pole Arms
8	Missile Fire/Arcane Blast
9	Breath Weapon
10	Glance

Attack Rolls: Add attack bonus to d20 roll. A natural roll equal to or less the target's Natural Defense (which is 1 unless otherwise stated in the monster description) always misses, otherwise if the result is higher than your opponent's Armor Class (AC), it's a hit.

Melee attack bonus = STR bonus + Physical Combat Bonus
 Missile attack bonus = DEX bonus + Physical Combat Bonus
 Magic attack bonus = MIND bonus + Magical Combat Bonus

Armor Class (AC) = 10 + DEX bonus + Armor bonus. Basic Armor Bonuses: Light Armor (e.g. leather) +2, Medium Armor (e.g. Chainmail) +4, Heavy Armor (e.g. Plate) +6; a shield adds +1; a large shield adds +2. *Option:* Armor bonus is as listed in parenthesis for the armor type on the equipment table.

A natural 20 that would otherwise hit is automatically a critical hit doing maximum damage and doing a number of body points damage equal to the number of damage dice rolled (normally 1). Most monsters do not have body points, so a critical hit will do maximum damage plus a normal damage roll to them and cause them to lose their next attack.

Fighting classes can use DEX bonus + Physical Combat Bonus as Melee attack bonus instead if wielding a light weapon. Fighting classes can wield 2 light weapons and attack with both in a round (making one attack roll at -2). Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

Range Penalties: If the target is relatively close, there is no penalty to hit for range. If it's mid-range for the weapon you're using, take a -2. If it's farther out than that, the GM will assign a -4 to -10 penalty to hit, depending on his judgment of how far

away the target is. *Optional:* If exact distances are known, penalty is -1 per range increment after the first as listed on the equipment table.

Minimum Strength (optional): Characters wielding weapons who lack the minimum strength needed for the weapon as listed on the equipment table are at -1 to hit for each point their STR is below the listed MinSTR.

Cover: Characters behind an object gain +2 to +10 to their AC against ranged attacks, depending on the extent of the cover (light cover = +2 to nearly complete = +10). In some situations, the GM may allow half this AC bonus to apply to saves.

Damage: Light weapons do 1d4 damage. Medium weapons do 1d6 damage. Heavy weapons do 1d8 damage. Add STR bonus and any class damage bonus to Melee damage (x2 for two-handed weapons). *Option:* Weapons do the damage listed for the specific weapon (in parenthesis) on the equipment table.

Shield Special: A character with a shield may choose to have it completely absorb all the damage from any attack (including a critical hit). A non-magical shield shatters when it does so. A magical shield permanently loses one point of its magical AC bonus when it does so, becoming a non-magical shield if its magical AC bonus is reduced to zero.

Special Combat Situations:

Opportunity Attacks: Anyone not surprised and with a ready weapon who is not already involved in a melee combat gets a free attack on opponents trying to move past them – this attack is in addition to their normal attack for the round. If the attack is successful, the opponents takes damage and can move no further that round.

Ranged Attack into Melee: Shooting or throwing into a crowded melee is not a good idea: there is a 50% chance you'll hit a friend instead of an opponent. Fighting classes may take -4 to hit to avoid hitting a friend.

Dodge: A character who is not making an Active or Full Attack may forgo his next attack at any time and dodge out of the way. Roll 1d20 + DEX bonus + Physical Combat Bonus (PCB). The total is the character's effective AC until his next attack. If it's lower than his real AC, well, the character zigged when he should've zagged. The GM may modify the roll by +2 or -2 (or more) to reflect the terrain and cover of the area.

Aid Another: A character who can make a melee attack on an opponent engaging an ally in melee combat can help that character attack or defend by distracting or interfering with an opponent. Make an attack roll against AC 10. If successful, the ally gains either a +2 (Fighter Bonus +1 for fighting classes) bonus on his next attack roll against that opponent or a +2 (Fighter Bonus +1 for fighting classes) bonus to AC against that opponent's next attack (aiding character's choice), as long as that attack comes before the beginning of the aiding character's next turn. Multiple characters can aid the same ally.

Grapple: A character can make a grapple attack on an adjacent target. A successful attack roll means they are then grappled with their target. When grappled, both the attacker and the defender's AC becomes 10 and neither can make move actions. When grappled, the defender can't make normal actions and must make opposed rolls (1d20 + PCB) against the attacker to attempt to break free. As long as the defender is grappled the attacker can make automatic unarmed attacks on the defender.

Knockout Blow: A character can attempt an armed melee attack against an adjacent creature to stun them. On a successful hit the target is stunned one minute for every point the attacker rolled higher than their defense. Rogues add their level in minutes to this time.

Combat Tricks/Stunts: Declare what the trick/stunt attack is going to do. It could be anything from knocking a weapon from your opponent's hand to blowing his hat off or extinguishing a

lantern. Other possibilities could be stapling the target to the wall through his clothing with a thrown weapon, tying him up with a bola, tripping him and so on.

The attack roll is made at -8 (-6 for fighting classes). If the roll is successful and the target is alive and aware of the attack, the target makes a defense roll (a normal attack roll) against a DC equal to the adjusted attack roll (with the to hit penalty). If the defense roll fails, the target suffers the exact effect described. If the defense roll succeeds, then the attack is treated as a normal attack against the target's AC (with the penalty), which may result in normal damage. *Option:* The defense roll is automatically failed if the target has a combat stance of Active Attack or Full Attack.

Against an inanimate object, if the attack roll (with the penalty) is successful, the stunt works. No defense roll is needed.

Morale: While a few monsters, such as mindless creatures, are fearless and will fight to the death, most monsters have a strong desire to survive and will not continue to fight when the battle is going against them. They will instead seek to retreat, to flee, or even to surrender. The GM decides when monsters abandon the battle and retreat, based on the situation and the monster's intelligence. Monsters are assigned a Morale Rating (from 2 to 12, with 2 being a complete coward and 12 being totally fearless) to help the GM make these decisions. If the GM wishes, he may simply roll 2d6 and have the monsters break off combat if the number rolled is greater than the monster's Morale Rating.

Energy Drain: Certain undead and demonic monsters can drain energy levels from characters. Each energy level drained reduces the character's level by one. The character may regain the level normally via experience. If the standard energy drain rule seems too harsh, try the following instead. Each energy level drained subtracts one from any roll to which the character would add his level (or his level/2). 1 point of energy drained is recovered every L days where L is equal to the hit dice of the monster that drained the energy level.

Group Initiative (Optional): Each side rolls a d20 (reroll ties). High roll wins initiative. Strike Speed rules are not used. The combat order changes to the following: 1) Side that lost initiative declares actions. 2) Side that won initiative declares actions. 3) Side that won initiative acts. 4) Side that lost initiative acts. 5) Any bookkeeping is done.

Hirelings

Players may find it useful to have their characters hire bearers to carry light sources into ruins and dungeons (and to carry treasure out) and men-at-arms to aid in combat. In some areas there may be a guild where such people may be found and hired, in other areas characters may have to advertise. Pay must be negotiated and what will be asked will depend on the situation the hirelings think they may get into and the reputation of the characters hiring them.

Bearers have 2 hit points and generally will only fight if cornered and there is no other choice – even then their effective level (used in attack rolls) is -2. They will carry light sources and baggage willingly so long as they are paid, fed, treated well, and not exposed to much mortal danger. Minimum pay: 1 SP/day.

Men-at-Arms will fight but consider being used as a bearer (except of treasure they get a share of) to be beneath them. Green Men-At-Arms have 4 hit points, an effective combat level (used in attack rolls) of 0 and can use whatever armor and weapons their employers provide. Minimum pay: 5 SP/day plus 1/20 of a share of any non-magical treasure found. Veteran Men-at-Arms have 7 hit points, an effective combat level (used in attack rolls) of 1 and can use whatever armor and weapons their employers provide. Minimum pay: 1 GP/day and 1/10 a share of any non-magical treasure found. Men-at-Arms will serve willingly as long as they are fed, paid, treated well, and not asked to take unusual risks that their employers are not taking with them.

Hiring Morale (Optional): Bearers have a base Morale Rating (MR) of 4. Green Men-At-Arms have a base MR of 7. Veteran

Men-At-Arms have a base MR of 9. Base MR is modified by how well the hirelings are treated: -4 for bad treatment, -2 for poor treatment, +1 for good treatment, and +2 for exceptional treatment; and by the CHA bonus of the person paying the hireling. A hireling's MR may also be used to determine how loyal the hireling is to the PCs in cases of attempted bribery and the like.

Monsters

See the Microlite74 Monster List or use the monster descriptions in any Oe game (substituting d8 for hit dice if needed). To create new monsters quickly: Pick a name, assign a level, hit dice = level, hit points = 1d8 per level, Save DC = 19 – level (minimum 3), all attack bonuses = level, damage = 1d8 for ordinary claws, bites, and weapons, 2d8 for large maws, giant clubs, 3d8 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases. Natural Defense is 1 for all but the most powerful or unusual creatures. Special attacks act like magic attacks against an appropriate defense. Intelligent monsters may have classes at the GM's option. If needed, assign stats to suit. Equip and add abilities as required.

Monster Reactions: Some monsters (like skeletons guarding a tomb) may always attack. In cases where the reaction of the monsters to the party is not obvious, the GM may opt to make a reaction roll for the monsters by rolling 2d6 and adding the CHA bonus (and any other appropriate modifiers) to the roll and consulting this table.

Adjusted Reaction Roll	Result
2 or less	Very Unfavorable
3-6	Unfavorable
7	Neutral/Uncertain
8-11	Favorable
12 or more	Very Favorable

Interpretation of the results is left to the GM, however, these general principles may prove helpful. Very Unfavorable means the monsters will most likely attack unless the odds are overwhelmingly against them. They will not help the characters. Unfavorable means the monsters are hostile and might attack unless they are given a good reason not to. They will not help the characters. Neutral means the monsters are unsure of the party. They are not likely to attack immediately, but are not friendly or helpful. Favorable means the monsters are willing to listen and are open to negotiation. They might be willing to be slightly helpful. Very Favorable means the monsters like the characters and are willing to be somewhat helpful and are open to working with the party to mutual advantage.

Mooks (optional): Sometimes a GM may want to use a large number of monsters but not want to carefully track each one. Mooks are "cannon fodder" monsters that have 1 hit point per hit die, never make a saving throw, and always run away or surrender if the battle is obviously going against them. Any hit from a Fighting Class character will likely kill a mook. Mooks cannot be told at a glance from non-mook monsters. Mooks make excellent minions for powerful leaders as they are very effective against normal people even if they cannot stand long against PCs and NPCs with class levels.

Other Hazards

Falling: 1d6 damage per 10', half damage on REF save. DC=depth fallen in feet

Spikes: add +1 point to falling damage per 10' fallen, max +10

Poison: FORT save to avoid or for half damage, depending on poison. Effect varies with poison type.

Extreme Heat & Cold: If not wearing suitable protection, FORT save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Starvation: Characters generally need 2 pounds of food per day. After 2 days without food, a character takes 1d6 damage per additional day without food and no longer heals.

Dehydration: Characters generally need 1 gallon of water per day. Each day after the first without water, a character loses 25% of his full HP and BP in damage (and no longer heals).

Level Advancement

Characters get Experience Points (XP) when their party defeats monsters. Experience Points (XP) = Hit Dice of defeated monsters. Add +1 for each doubling of the number of foes. e.g.: 1 kobold (a 1 hit die monster) = 1 XP. 2 kobolds = 2 XP. 4 kobolds = 3 XP, 8 kobolds = 4 XP etc. Add +1 or +2 XP (GM's discretion) if the foes have dangerous special abilities.

Characters also earn a GM-assigned amount of experience points for defeating traps, solving puzzles, excellent roleplaying, and the like. The GM should assign XP depending on the situation (usually from 1 to 5 XP). Characters can also lose up to 5 XP for generally ignoring their alignment or other very poor roleplaying.

Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, generic "training," etc.). A character earns 1 XP for each 100gp (round down) so spent.

Add up the Experience Points (XP) of every successful encounter you take part in plus any earned from GM specials and treasure spent. When the total is equal to your Experience Base x your next level, you've advanced to the next level. Reset the total XP to 0 after advancing.

Each level adds +1d6 (+1d8 for Fighting Classes) to Hit Points and the character's Physical and Magical Combat Bonuses are recalculated. (Note that the above are already included in the physical and magic attack and hit point formulas given in the rules.) Individual classes may also have abilities that change as a member of that class increases in level. When an arcane caster gains access to a new spell level he gets one spell of the new level added to his spell books. The player may select the spell subject to GM veto.

Example: Four newly minted first level adventurers have just completed a dungeon adventure. The human Fighter, Thief, and Cleric each have an experience base of 20 and each need 40 XP to reach second level. The Elf Magic User has an experience base of 37 and needs 74 XP to reach second level. Their expedition was extremely successful. They defeated 22 XP worth of monsters and earned 7 XP from traps and other GM specials for a total of 29 XP each. The party's cleric earned 4 XP for great roleplaying while risking her life to save the party from an angry spirit. The fighter, however, ignored his "Light" alignment and acted like a selfish thug and lost 5 XP for poor roleplaying. The party also found and recovered 2900gp in treasure from the dungeon. That's 725gp each. The cleric decides to donate the entire sum to her temple, and earn 7 more XP. This gives her 40 XP. She goes up to second level and her XP total is reset to 0. The Thief and the Magic-User have 29 XP each, while the Fighter has 24 XP.

Equipment

Suggested starting packs for new characters:

Pack A	Pack B	Pack C
backpack	backpack	backpack
bedroll	bedroll	bedroll
hooded lantern	10 torches	tent
10 oil flasks	10 oil flasks	10 torches
flint & steel	flint & steel	flint & steel
shovel	chalk	hammer
2 sets of caltrops	10 ft. pole	10 iron spikes
signal whistle	mirror	grappling hook
pen & paper	crowbar	50 ft. rope
water skin	water skin	water skin
iron rations for four days	iron rations for four days	iron rations for four days

Finally, add the following, based on your Class:

Fighting Classes: Vial of holy water, medium armor (AC +4), a one handed weapon + shield, or a two handed weapon, and 5 gold pieces

Monk: Vial of holy water, two light weapons and 10 gold pieces.

Arcane Classes: Spellbook with all spells known, a dagger, and 5 gold pieces

Cleric/Druid: Silver holy symbol, light armor (AC +2), a one handed weapon + shield, and 5 gold pieces

Thief: lock picking tools, light armor (AC +2), light weapon, and 5 gold pieces.

Players, with the permission of the GM, may elect to roll their starting wealth in gold pieces and buy equipment piece by piece from the equipment list later in the rules. If this is done, each character starts with 120 + (3d6 x 5) gold pieces. The GM is free to modify the equipment list to suit the starting location in his campaign.

Encumbrance (Optional): Characters can carry twelve (plus STR bonus) items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item.

Oe Conventions

Almost any material you come across for Oe or other early editions of the world's most popular roleplaying game can be used in Microlite75 with little modification. However, there are some descriptive conventions that Oe used that may need explanation.

Time Conventions: Oe talks about time in terms of rounds (combat rounds) and turns. A round was 1 minute and a turn was 10 minutes.

Movement/Distance Conventions: Oe gave distances in inches. When underground or in buildings or the like, one inch equaled 10 feet. When outdoors, however, one inch was 10 yards. Yes, this meant spell and weapon ranges were greater outdoors than indoors. Normal human movement (when carefully exploring) was 12" per move, with two moves per turn. Carrying too much weight cut this down to 9" or even 6". Running movement was double the above.

Descending Armor Class: Oe and other pre-SRD editions used a descending Armor Class system where an unarmored character was AC 9 (AC 10 in some editions) and better armor used lower numbers (e.g. AC 5 was Chain, AC 2 was plate). Magic armor could even have a negative armor class. Microlite74 uses the ascending Armor Class system used in the OGL SRD. If you have old adventures using the original descending AC system and wish to use them, it is easy to convert descending ACs to ascending ACs.

Unarmored AC is 9: If the adventure is for Oe (or other edition where the unarmored AC is 9), subtract the descending AC listed in the adventure from 19 to get the ascending AC used by Microlite74.

Unarmored AC is 10: If the adventure is for 1e or 2e (where the unarmored AC is 10), subtract the descending AC listed in the adventure from 20 to obtain the ascending AC used by Microlite74.

Dungeon Exploration Conventions

Light: Humans and many other races require a light source (or magical ability) to see in the dark. Torches, lanterns, etc. will produce limited areas of light (generally 20 feet of bright light and a further 10 feet of dim light), but they also make it easy for monsters to see the party coming, making surprise impossible. Torches can be blown out by strong gusts of wind (d6 roll: blown out on a 1 or 2). Most monsters living in a dungeon have infravision or some other means of seeing in the dark; however these methods do not work in the presence of a light source.

Seeing Monsters: Unless surprised, characters will see monsters when they are 2d4 x 10 feet apart. Surprise distance is 1d3 x 10 feet.

Wandering Monsters: The GM should roll 1d6 every 1d3 turns for wandering monsters (more often if the party is making a lot of noise or otherwise attracting attention). On a roll of 1, wandering monsters stumble across the party from a random direction and distance.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow their orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue if there is less than 120 feet between the two groups. Monsters will only pursue around a corner or through a door on roll of 1 or 2 on a d6 (1 if a secret door is used). Fire will deter many monsters. Food will distract many monsters: unintelligent monsters 90% of the time, semi-intelligent monsters 50% of the time, intelligent monsters 10% of the time. Treasure may also distract monsters: unintelligent monsters 10% of the time, semi-intelligent monsters 50% of the time, and intelligent monsters 90% of the time. All chances may be adjusted by the GM depending on circumstances.

Rest: One turn in six must be spent in rest or all characters suffer a -1 to all d20 rolls per rest missed. Time spent searching is not time spent resting.

Doors: Most dungeon doors must be forced open by strength; a character may make a FORT save to attempt to force a door open. Doors with locks must be picked or forced at a minus equal to the dungeon level. Most dungeon doors will automatically close unless held or spiked open (spikes slip 20% of the time). Dungeon doors usually open automatically for monsters unless held closed.

Characters may wish to listen at doors before opening them. Unless a character has special listening abilities, a roll of 1 on a d6 will allow the character to hear through the door – if there is anything to be heard.

Traps: A trap will usually spring on a d6 roll of 1 or 2 when a character passes over or by them or otherwise triggers them.

Secret Passages: Unless a character has racial abilities with secret passages, characters will detect secret doors/passages doors on a d20 + MIND bonus roll (normal DC 16). A 10 x 10

foot area may be searched in a turn by a single character.

Wilderness Exploration Conventions

Seeing Monsters: Unless surprised, characters will see monsters when they are 4d6 x 10 yards apart. Surprise distance is 1d3 x 10 yards.

Wandering Monsters: The GM should roll 1d6 every day of travel for wandering monsters. If the party is camping, an additional roll should be made at night. If a wandering monster is indicated (roll varies by terrain, see terrain table below), wandering monsters stumble across the party from a random direction and distance. At night, the GM should randomly determine which watch is on duty when the attack is made.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue so long as the party can be detected, there is a 50% chance monsters faster than the party will catch it (30% chance for monsters about as fast as the party) in each hex traveled through. Woods or swamp reduce the chance of being caught by 25%. Monsters will pursue into another hex on the map 50% of the time. The chase continues until combat occurs or the monsters break off. The party must rest for one-half day for each hex travelled during a pursuit. All chances may be adjusted by the GM depending on circumstances.

Becoming Lost: A group travelling off a well-marked trail or road without an accurate map or a knowledgeable guide may become lost. The chance of becoming lost is rolled on a d6 and depends on the type of terrain the party is in (see table below). If lost, the party actually moves in a random direction but believes they have moved in the direction intended.

Terrain Chart

Terrain Type	Chance Lost	Chance of Encounter
Plains	1	1
Woods	1-2	1-2
Forest	1-3	1-2
River	1	1-2
Swamp	1-3	1-3
Hills	1	1-2
Mountains	1-2	1-3
Desert	1-3	1-2

Donate to the RetroRoleplaying Cancer Fund and Get Some PDF Goodies

Many Microlite74 gamers know that Randall Stukey, the author of Microlite74 and other M20-based old school games is trying to raise funds to pay the bills from [his wife's oral cancer](#) treatments and that he worked on the original Microlite74 as way to cope during her recovery from 6 weeks of radiation treatment in 2008. Randall and Donna are some of the 40 to 50 million people in the US who do not have health insurance nor did they qualify for government aid as they live in Texas and have no children. Donna (successful so far) cancer treatments have cost over \$110,000. While some of this has been absorbed by hospital foundations and the like, they still owe a lot of it. You can donate to the RetroRoleplaying Cancer Fund (via PayPal) and help them pay their bills.

Can You Help Pay the Cancer Bills?

Everyone who donates any amount at all get a password giving them access to a number of special downloads. *Some* of the currently available downloads include:

- Pdf copies of the two issues of The Grimoire Randall published in the late 1970s (which Randall blogged about here: The Grimoire #1 (<http://blog.retroroleplaying.com/2009/05/grimoire-1-spring-1978-d-fanzine.html>) and The Grimoire #2 (<http://blog.retroroleplaying.com/2009/05/grimoire-2-summer-1979-d-fanzine.html>))
- Pdf copy of The Second Grimoire of Pharesm the Bright-Eyed, a set of house rules for a BECMI campaign Randall ran at a game shop in the mid-1980s.
- A copy of the Player's Introduction to the Fourth Campaign Arn (from about 1984)
- Microlite74 2.0 Special Edition -- a 60-page PDF designed to be printed in booklet format from Adobe Acrobat. Artwork is by Håkan Ackegård. This Special Edition incorporates the rules from the first supplement. The text has been reformatted into a single column in a large enough font to easily read.

To get access to these downloads and access to a private donor forum where you can get advance information on upcoming Microlite74 releases, help Randall pay the cancer bills by sending a donation in any amount -- small or large -- to the RetroRoleplaying Cancer Fund via Paypal at this link:

Support Microlite74: Please donate if you can!

Microlite74 Extended Spell Lists

Arcane (Magic-User) Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Alarm: Alarm sounds a mental or audible alarm (caster's choice) each time a creature enters the warded area (20 ft. radius) without speaking the password (set at casting). R: 60 feet. D: 2 hours/caster level.

Burning Hands: A fan of flame (3 ft. long in a 120-degree arc) shoots from caster's hands, doing 1 hp/caster level damage to all hit. R: 3 feet. D: instant but effects permanent.

Charm Person: Puts one living humanoid totally under your influence. R: 120 feet. D: until dispelled.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Erase: Erases normal or magical writing (save allowed) from an area about two pages wide. R: 30 feet. D: instant but effects permanent.

Feather Fall: Target creature or object falls slowly and takes no damage from landing. R: 60 feet. D: 1 minute/caster level.

Floating Disc: Creates 3-ft.-diameter horizontal disk that holds 100 lb./caster level. R: 10 feet. D: 1 hour/caster level.

Hold Portal: Holds door/gate shut. R: 10 feet. D: 2d6 x 10 minutes.

Identify: Determines one unknown property of a magic item, including how to activate that function, and how many charges are left. Caster is in trance for duration. R: touch. D: 1 hour.

Light: Object lights circle with 30 ft. radius, not full daylight. R: 120 feet. D: 1 hour+10 min/caster level.

Magic Missile: Creates magic arrow which hits its target for 1d6 damage. An additional 2 missiles are created every 5 levels (e.g. total 3 at level 5, total 5 at level 10). R: 150 feet. D: instant.

Message: Caster points to any creature in range and whisper a short message that creature (and only that creature) will hear. R: 60 feet + 10/caster level. D: 20 seconds.

Pep: One target per caster level instantly recovers 20% of their Hit Points. No effect on targets in combat or other heavy activity. Can only affect a specific target once per day. R: touch. D: instant but effects permanent.

Protection from Evil: +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters. R: shell around caster. D: 1 hour.

Read Languages: Read any written language. R: touch. D: 1 or 2 readings.

Read Magic: Read scrolls, spellbooks, other magical writing. R: caster only. D: one reading (two scrolls or equivalent).

Repair: Repairs a broken or torn small object. It does not restore magic. R: 30 feet. D: instant but effects permanent.

Shield: Improves caster's armor class to 17 versus missile attack and to 15 versus melee attacks. R: caster. D: 20 minutes.

Sleep: Puts 4d6 HD of beings into magical slumber. Creatures with more than 4 hit dice are not affected. Range: 240 feet. D: GM's discretion.

Unseen Servant: Invisible force that obeys caster and is able to perform simple tasks and exert up to 20 pounds of force. It cannot attack and is ineffective beyond 30 feet from caster. R: caster. D: 1 hour + 10 minutes/caster level.

Ventriloquism: allows caster to "throw his voice" absolutely convincingly. R: 60 feet. D: 20 minutes.

2nd Level

Continual Light: Object lights circle with 120 ft. radius until dispelled, not full daylight. R: 120 feet.

Darkness, 15' Radius*: Magical darkness which even blocks infravision and darkvision. R: 120 feet. D: 1 hour.

Detect Evil: Reveals evil thoughts/intent or evil items. R: 60 feet. D: 20 minutes.

Detect Invisible: Detect invisible items and beings within 10 feet per caster level. D: 1 hour.

ESP: Allows caster to read surface thoughts of target. R: 60 feet. D: 2 hours.

Fool's Gold: Makes up to 1 cubic foot of metal (about 2000 coins) look like gold. Save to detect fraud. R: touch. D: 1

hour/caster level.

Forget: 1d4 targets forget last level/2 (round up) minutes. R: 30 feet. D: instant but effects permanent.

Invisibility: Subject is invisible until spell broken by caster, some outside force, or until subject attacks. R: 240 feet.

Knock: Unlocks/unbars all locked or magically sealed doors or other door-like barriers. R: 60 feet. D: instant.

Levitate: Caster floats up and down as he desires. Speed: 6 feet/minute. R: 20 feet up/down per level. D: 10 minute/caster level.

Locate Object: Senses direction toward an object (specific or type) D: level minutes. R: 60 + 10/caster level feet.

Magic Mouth: Mouth appears on target object and delivers a message of up to 30 words when conditions set by caster are met. R: touch. D: permanent until triggered or dispelled.

Mirror Image: Creates 1d6-1 exact images of the caster, all moving exactly like original. Attackers cannot tell images from original. Images hit disappear. R: around caster. D: 1 hour.

Phantasmal Forces: Vivid illusions of nearly anything the caster envisions, lasts as long as the caster concentrates. Damage caused is real if target believes illusion. R: 240 feet.

Pyrotechnics: Caster creates either fireworks or blinding smoke from a normal fire. R: 240 feet. D: 1 hour.

Ray of Enfeeblement: Target loses 25% of strength (damage it inflicts also reduced 25%). R: 10 feet. D: 1 minute/caster level.

Shatter: Causes one normal item (up to 10 pounds/caster level) to shatter into pieces. R: 60 feet. D: instant but effects permanent.

Spider Climb: Allows non-thieves to climb as a thief of one-half caster's level. Adds caster's level to thieves for climbing checks. R: touch. D: 1 minute/caster level.

Sinking Cloud: Creatures within 20 foot cloud must save or be unable to act for 1d4+1 minutes. Unaffected must save every round they are within cloud. R: 60 feet. D: 1 minute/caster level.

Strength: Adds 1d6+1 to a single Fighter's Strength or 1d6-1 to a single Cleric's. Maximum Strength is 18. R: touch D: 8 hours.

Web: Sticky webs fill a 10x10x20 foot area. Burning through the webs takes 6+1d4 minutes. Large creatures push through in 14+1d6 minutes. Human-sized creatures take 20+3d6 minutes. R: 30 feet. D: 8 hours.

Wizard Lock: Locks door like Hold Portal. Permanent until dispelled. Knock opens without dispelling. Caster can pass through without lifting spell. R: 10 feet.

3rd Level

Clairaudience: Hear at a distance for 2 hours. R: 60 feet.

Clairvoyance: See at a distance for 2 hours. R: 60 feet.

Dispel Magic: Cancels magic effects and spells. (Magic Attack vs. Spell's DC for success) Duration: instant but effects permanent for spells or 10 minutes/caster level for items. Range: 120 feet.

Explosive Runes: Deals 1d6 + Level damage when read. D: until discharged. R: touch

Fire Ball: 1d6/caster level fire damage, 20 foot burst. R: 240 feet. D: instant.

Fly: Subject can fly at a speed of 120 feet per minute. R: Touch. D: 1d6 x 10 minutes plus 10 minutes/caster level. (GM rolls secretly.)

Haste Spell: Subjects (up to 24 beings in a 60 foot radius of target) double in speed, taking two actions at a time. (Counters Slow) R: 240 feet. D: 30 minutes.

Hold Person: Paralyzes 1-4 targets. Cast at single target, save at -2 and double duration. R: 120 feet. D: 1 hour plus 10 minutes/caster level.

Infravision: See in the dark. R: touch. D: 1 day. Sight Range: 30 + (1d3 x 10) feet.

Invisibility, 10' radius: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until one attacks.

Lightning Bolt: 1d6/caster level electrical damage. R: 240 feet, bolt is 10 feet wide, 60 feet long. D: instant.

Monster Summoning I: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell expires. Sample monsters (1d6) – 1: 1d6 giant rats, 2: 1d3 goblins, 3: 1d3 hobgoblins, 4: 1d6 kobolds, 5: 1d3 orcs, 6: 1d3 skeletons. D: 6 minutes.

Protection from Evil, 10' radius: +2 to AC and saves, counters mind control, hedge out elementals and enchanted monsters to

all within 10 foot circle around subject. D: 2 hours.

Protection from Normal Missiles: Non-magical thrown and missile weapons automatically miss. R: 30 feet. D: 2 hours.

Rope Trick: Caster tosses rope into the air. It hangs there.

Caster and up three others can climb rope into a hidden pocket dimension at top. Rope can be pulled up or left out. R: rope toss. D: 60 minutes + 10 minutes/caster level.

Slow Spell: Subjects (up to 24 beings in a 60 foot radius of target) slowed by 50%. (Counters Haste) R: 240 feet. D: 30 minutes.

Suggestion: Caster makes 1-2 sentence hypnotic suggestion to target. If the save is failed, target will carry out suggestion for up to duration. Only 1% chance target will obey suggestion that obviously would result in target's death/extreme injury. R: 30 feet. D: 1 week.

Tiny Hut: Creates 20 foot diameter opaque force sphere that protects up to 10 humanoid-sized creatures from the weather. R: 20 feet. D: 2 hours/caster level.

Tongues: Grants the target the ability to speak and understand the language of any intelligent creature. R: touch. D: 10 minutes/caster level.

Water Breathing: Subject can breathe water. R: 30 feet. D: 2 hours.

4th Level

Charm Monster: Makes one monster of 3+ hit dice (or 3d6 monsters of less than 3 hit dice) believe they are the caster's strong ally. Save again every level days or when asked to do something obviously against the being's interest. R: 60 feet.

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Dimension Door: Teleports subject a short distance (up to 360 feet). D: instant. R: 10 feet.

Fear: 240 ft. long cone of fear (120 ft. width at far end) extends from caster. Creatures within must save or flee in fear/horror for 1 hour. R: as above. D: 1 hour of fear.

Hallucinatory Terrain: Makes one type of terrain appear like another type until dispelled or area entered by an opponent. R: 240 feet.

Ice Storm: 30 foot cubic vortex of ice, snow, and hail appears doing 5d6 damage to all within. R: 120 feet. D: 1 minute.

Massmorph: Makes up to 100 humanoids appear to be trees until dispelled or negated by caster. Creatures may move and still appear to be trees. R: 240 feet.

Monster Summoning II: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell expires. Sample monsters (1d6) – 1: 1d2 hobgoblins, 2: 1d2 zombies, 3: 1d2 gnolls, 4: 1d2 bugbears, 5: 1d6 orcs, 6: 1d6 skeletons. D: 6 minutes.

Plant Growth: Plants in an area up to 30x30 yards become overgrown and nearly impassable. Lasts until dispelled or plants killed. R: 120 feet.

Polymorph Others: Change another into form of another being. The change is complete and includes gaining special abilities and mind of creature. R: 60 feet. D: until dispelled.

Polymorph Self: Change self to form of another being, does not get special powers but retains own intelligence. R: caster only. D: 1 hour + 1 hour/ caster level.

Remove Curse: Frees subject from a curse. R: touch. D: instant but effects permanent.

Telepathy: Caster can speak mind-to-mind with any intelligent being he is in eye contact with. R: 30 feet D: 10 minutes plus 1 minute/caster level.

Wall of Fire: Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through wall deals 2d6 damage + 1point/caster level. The wall lasts as long as caster concentrates on it. R: 60 feet.

Wall of Ice: Creates wall of ice with 15 hp + 1hp /caster level. Wall lasts as long as caster concentrates on it. R: 60 feet.

Wizard Eye: Allows sending an invisible eye up to 240 feet away which relays all it sees to the caster. Moves up to 12 feet each minute. D: 1 hour.

5th Level

Animal Growth: 1d6 normal animals grow to giant size. R: 120 feet. D: 2 hours.

Animate Dead: Create undead skeletons or zombies under control of caster from dead bodies, 1d6/caster level over 8th level. R: GM discretion. D: permanent.

Cloudkill: Creates a moving, poisonous cloud of vapor which is deadly to all creatures with less than five hit dice. 30 feet in diameter, moves with wind or 6 feet per minute. D: 1 hour.

Conjure Elemental: Conjures one 16 HD elemental who will serve the caster until dispelled/dismissed/caster no longer concentrates. Caster can only summon one of each type in a day. R: 240 feet.

Contact Higher Plane: Lets Caster ask yes/no question of other planar entity, 1 question/caster level. Chance of correct answer 5%/caster level, maximum 95%.

Feeblemind: Subject's MIND drops to 1. R: 240 feet. D: until dispelled.

Hold Monster: As Hold Person, but any creature. R: 120 feet. D: 1 hour plus 10 minutes/caster level.

Magic Jar: Moves caster's spirit/mind to a fixed object from which caster can try to possess others. Magic Attack vs. DC of (10 + MIND bonus + target level or hit dice). R: 30 feet. D: until dispelled, the target makes his save (a new saving throw is allowed every caster level days), or the caster ends spell.

Monster Summoning III: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell expires. Sample monsters (1d6) – 1: 1d4 bugbears, 2: 1d2 harpies, 3: 1d2 ochre jellies, 4: 1d2 wererats, 5: 1d2 wights, 6: 1d2 wild boars. D: 6 minutes.

Pass-Wall: Creates a human-sized passage up to 10 feet long through a wood or stone wall. R: 30 feet. D: 30 minutes.

Rock-Mud: Transforms rock to mud or vice-versa, up a 300x300 foot area. R: 120 feet. D: 3d6 days.

Telekinesis: Moves object by mental power. Up to 20 pounds/caster level. R: 120 feet. D: 1 hour.

Telepathic Link: Caster forms a telepathic contention with up to one other willing intelligent being/3 caster levels. Those so linked can communicate via mental speech regardless of distance (upon the same plane). Mental or Psionic attacks on one member of the link does not affect others. R: touch. D: 1 hour/caster level.

Teleport: Instantly transports subject up to 100 miles/caster level. Caster must know target location exactly.

Wall of Iron: Creates a wall of iron in any shape. 1000 square feet (3 inches thick). R: 60 feet. D: 2 hours.

Wall of Stone: Creates a wall of stone in any shape. 1000 square feet (2 inches thick). R: 60 feet. D: until destroyed or dispelled.

6th Level

Anti-Magic Shell: Shell surrounds caster blocking magic both ways. R: caster. D: 2 hours.

Control Weather: Caster can adjust weather. D: GM decision.

Death Spell: Kills 2D8 beings with less than 7 hit dice with a 60 foot radius. R: 240 feet. D: instant but effect permanent.

Disintegrate: Makes one creature or non-magical object vanish, turning it to fine dust. R: 60 feet. D: permanent.

Geas: Force a creature to obey one long-term order. R: 30 feet. D: until order completed.

Invisible Stalker: Summons an invisible stalker, an extra-dimensional monster, under the control of the Magic-User who may give it a single mission which it will carry out until it is finished.

Legend Lore: A complex process taking 1d100 days allows caster to gain knowledge of a legendary person, place, or thing. Information is accurate but may be in a cryptic form. R: caster.

Lower Water: Lowers bodies of water 50%. R: 240 feet. D: 10 turns.

Mind Meld: As for Telepathic Link, but members of the link always know the thoughts of the others in the link. Spells known by any link member may be used by any link member able to cast spells (using his own HP). Communication is at the speed of thought. R: touch. D: 1 hour/caster level.

Monster Summoning IV: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell expires. Sample monsters (1d6) – 1: 1 gargoyle, 2: 1 ogre, 3: 1 owlbear, 4: 1 shadow, 5: 1 werewolf, 6: 1 wraith. D: 6 minutes.

Move Earth: Move small hills, dig ditches and moats, other surface features, etc. Land moves at 6 feet per minute. R: 240 feet. D: permanent.

Part Water: Parts bodies of water up to 10 feet deep. R: 240 feet. D: 1 hour.

Projected Image: Project an image of yourself that can sense and talk as if you were the image. Other spells cast come from image. R: 240 feet. D: 1 hour.

Reincarnation: Restores dead person to life in a random (usually humanoid) form. R: touch. D: instant.

Repulsion: Any being trying to move toward spell target finds itself moving away instead. R: 120 feet. D: 1 hour.

Stone-Flesh: Turns subject into a stone statue (or vice versa). R: 120 feet. D: permanent.

7th Level

Cacodemon: Summons a demon or other fiend (such as a devil) from the lower planes of existence. The spell provides no protection against the summoned creature, so the magic user should use other spells or items of protection. As the summoned creature is not forced to aid or obey the caster, that is a matter of negotiations and threats between the caster and the fiend. This spell may only be cast as a ritual. R: 10 feet. D: variable.

Charm Plants: Charms the equivalent of: 1 large oak, 6 medium sized bushes, 12 small shrubs, or 24 little plants. These charmed plants will do anything the caster demands as long as it is within their ability to comply. R: 120 feet. D: until dispelled.

Delayed Blast Fireball: 1d6/caster level fire damage, 20 foot burst. The actual blast can be delayed for up to 10 minutes as set by the caster. R: 240 feet. D: instant.

Limited Wish: An extremely weak version of the "wish" spell. It is not even powerful enough to create or bring treasure to the caster, and under some circumstances only a part of the wish might actually be fulfilled. The spell does have the power to reach for a limited period of time into the past or future as well as the present. R: variable. D: variable.

Mass Invisibility: Up to 6 dragon-sized objects or 300 men and horses are invisible until spell broken by caster, some outside force, or until one attacks. R: 240 feet

Monster Summoning V: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell expires. Sample monsters (1d6) – 1: 1 Cockatrice, 2: 1 Manticore, 3: 1 Minotaur, 4: 1 Ogre Mage, 5: 1 Salamander, 6: 1 Troll. D: 6 minutes.

Phase Door: Creates an invisible door that can only be opened by the caster. Similar to a Passwall but invisible and only the caster can open the door. R: 10 feet. D: 7 uses

Power Word Stun: A single powerful word that stuns those hearing it for 2d6 10-minute turns if the creature has up to 35 hit points or for 1d6 10-minute turns if the creature has between 36 and 70 hit points. The word has no effect on creatures who are currently over 70 hit points. R: 120 feet.

Reverse Gravity: Within a 30 foot cube gravity reverses itself. Those within the area fall upwards with the force of a normal fall, and then fall again when the spell expires. R: 90 feet. D: 1 minute.

Simulacrum: Creates a duplicate of himself or some other person. The basic form is created from snow and ice, and must then be animated (Animate Dead will work). A Limited Wish (along with the actual simulacrum spell) is then used to imbue the animated form with intelligence and knowledge of the person being simulated. The simulacrum gains 1d4+2 times 10% of the simulated creature's knowledge and experience. The simulacrum follows its creator's orders. A simulacrum is not a perfect copy of the original. Side by side, the differences are obvious, and the simulacrum is detectable with a Detect Magic spell. If the original of the simulacrum dies, the simulacrum begins to gain the knowledge and experience of the dead individual at a rate of 1% per week (to a maximum of 90%).

8th Level

Clone: This spell allows a piece of flesh, taken from a living person, to grow into an exact duplicate of the person at the time the flesh was removed. If a clone is created while its parent-creature still lives, the clone will seek to kill its original. If it fails to achieve this goal, both the clone and the original will become insane. A full Wish will prevent this for 1 year.

Mass Charm: A Charm Person/Monster which affects up to 30 levels, i.e. 30 level 1 creatures, 15 level 2 creatures, 10 level 3 creatures, etc. in any combination. Saving throws are made -2. R: 120 feet. D: until dispelled.

Mind Blank: Makes the target immune to any form of detection by magic or psionics including ESP, Clairvoyance, Clairaudience,

Crystal Ball gazing or any other form of scrying), Wishing, Commune, Contact Higher Plane, etc. R: 10 feet. D: 1 day.
Mind Link: Similar to Mind Meld, but members of the link form a group mind sharing all thoughts, senses, knowledge and skills. Link members can freely use each other's HP, class abilities, senses, etc. (subject to common sense aka GM approval). Mental or psionic attacks targeting one member, target all. Likewise, the mental or psionic defenses of one member protect all. It is almost like one mind inhabiting several bodies. R: touch. D: 1 hour/caster level.

Monster Summoning VI: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell expires. Sample monsters (1d6) – 1: 1 Black Dragon, 2: 1 Chimera, 3: 1 Efreet, 4: 1 Flesh Golem, 5: 1 Frost Giant, 6: 1 Mummy. D: 6 minutes.

Permanency: This spell makes the effect of another spell permanent -- unless a Magic-user of twice the caster's level dispels it. No more than one permanency is ordinarily possible on any one object, and no more than two upon a creature. GM discretion required: many spells should not be subject to being made permanent. R: 10 feet.

Polymorph Object: Spell allows any object to be turned into another object, animal, vegetable, or mineral. The degree of change will affect the spell's duration. Animal-to-animal changes, vegetable-to-vegetable changes, and mineral-to-mineral changes are all likely to remain permanent until dispelled. Thus, turning a human into an orc, or turning a wall into a pile of sand, would both result in a permanent change. On the other hand, turning a shrub into a thinking human being would last only a small number of turns. R: 240 feet. D: GM decides.

Power Word Blind: A single powerful word that blinds those hearing it for 2d4 days if the creature has up to 40 hit points or for 1d4 days if the creature has between 41 and 80 hit points. The word has no effect on creatures who are currently over 80 hit points. R: 120 feet.

Symbol: Creates a magical trap in the shape of an arcane rune. The rune's magic is activated when any person or creature hostile to the caster reads it, or passes over, under, or past it. Various different runes are known, and others may be possible:

Symbol of Death: Deals 80 hit points of damage
 Symbol of Discord: Causes all creatures in the hostile group to begin arguing, and possibly fighting amongst themselves with lethal intent.

Symbol of Fear: Casts a Fear spell.

Symbol of Insanity: Up to 100 HD of creatures are driven insane by a curse.

Symbol of Sleep: Casts a Sleep spell affecting double the normal number of creatures and with double the normal duration.

Symbol of Stunning: 150 hit dice (HD) of creatures are affected as by a Power Word, Stun.

9th Level

Astral Spell: The caster projects his astral form into other places; the astral form is invisible to all creatures but those also on the astral plane. If the caster's physical body is moved beyond the range of the spell from its original location while the astral form is away, the link is sundered and the caster's soul becomes lost in the beyond. The spell range has no other effect. The astral form is capable of casting spells, but there is a 5% chance per spell level that the spell will fail. Additionally, there is a 2% chance per spell level of the attempted spell that the astral spell itself will falter as a result of the spell casting, and the astral form will return to the physical body. When astral traveling above the ground, the astral form may travel as fast as 100 miles per hour per level above 18th. If the form is traveling underground, its top speed is 120 feet/10-minute turn. With special study, this spell can also be used to travel to other planes.

Gate: Creates an opening to another plane of existence that can either be used to travel through or can be used to summon a specified, tremendously powerful being from the other plane, including gods and demi-gods. The caster must know the name of the creature he is attempting to summon, or the spell will fail. There is a 5% chance that the wrong being may be summoned, and (regardless whether the summoned being is the right one or not) there is a 5% chance that it will lack interest in the

situation and return through the gate. The summoned being is not necessarily friendly to the caster, and may be extremely annoyed. R: 20 feet. D: 10 minutes.

Maze: This spell puts its victim in an extra-dimensional maze. After the determined time has elapsed the creature will reappear at the spot where it disappeared. Creatures with Mind of 12 or better will require 1d4 10 minute turns to escape, those with Mind under 6 will require from 1d4+8 10 minute turns to escape, others require 1d4+4 10 minute turns to escape. R: 60 feet.

Meteor Swarm: Either a group of four Fire Balls each doing 6D10 points of damage or a group of eight Fire Balls of one-half normal diameter and 5d6 points damage may be thrown. They may be thrown in whatever pattern the caster desires. R: 240 feet.

Monster Summoning VII: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell expires. Sample monsters (1d6) – 1: 1 Hydra (9 heads), 2: 1 Iron Golem, 3: 1 Lich, 4: 1 Purple Worm, 5: 1 Red Dragon, 6: 1 Storm Giant. D: 6 minutes.

Power Word Kill: A single powerful word that kills those creatures hearing it. The word has no effect on creatures who are currently over 50 hit points. R: 120 feet.

Prismatic Sphere: A sphere of seven colors whirls about the caster with a radius of ten feet. The glowing colors form a layered spectrum; to destroy the sphere, each layer must be destroyed in turn from Red to Orange, to Yellow, to Blue, to Indigo, and then to the innermost Violet layer. Any creature of 7 or fewer hit dice that looks upon the sphere will be blinded for 1d6 turns. Anything attempting to cross into the sphere suffers the effects of each color that has not been negated.

Red: Causes 12 points of damage to the touch. Stops any magic arrows or missiles (including the spell Magic Missile). Negated by Ice Storm or other cold-based attack.

Orange: Causes 24 points of damage to the touch. Stops arrows and any other non-magical missile. Negated by Lightning Bolt or other electrical attack.

Yellow: Causes 48 points of damage to the touch. Blocks all breath weapons. Negated by Magic Missile spell or a magical arrow.

Green: Causes death (saving throw allowed) to the touch. Blocks any scrying and detection-type spells from seeing within. Negated by Passwall spell or other earth-moving magic.

Blue: Turns flesh to stone when touched (saving throw allowed). Blocks all divine (Clerical/Druid) magic from passing through. Negated by Disintegrate spell/effect.

Indigo: Causes death and destroys the soul utterly when touched (saving throw allowed). Negated by Dispel Magic.

Violet: Causes permanent insanity when touched. Blocks all arcane (Magic-user) spells. Negated by Continual Light.

R: caster D: 1 hour.

Shape Change: Change self into the form of another being. Change is complete and includes gaining special abilities of the creature, but the caster retains his own intelligence and ability to cast magic. The caster may change form at will while the spell lasts. R: caster. D: (1d6 + 10 + caster's level) 10 minute turns

Time Stop: This spell freezes time in a 30 feet cubic area surrounding the caster. The user may move freely, but any other creatures within the area, or which subsequently enter it, will be stopped in time with respect to the caster. D: 1d4+1 minutes (GM rolls)

Wish: This spell grants a wish of limited scope (although much more powerful than a Limited Wish). The Referee's discretion will rule what sort of wishes are within the spell's power. After casting a wish spell, the Magic-user is too mentally drained to cast spells for a period of 1d4 days.

Arcane (Illusionist) Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Change Self: Illusion makes the caster appear to be a different creature. The illusionary guise must share the same general size and shape as the illusionist. R: caster. D: 10 x (1d6 + 10 + level) minutes.

Color Spray: A sheet of bright conflicting colors affecting 1-6 levels/hit dice of creatures (plus 1 level/hit dice for every 5

levels of the caster), rendering them unconscious (for 1 minute/caster level) through confusion. Targets selected randomly. No saving throw if fully affected. Creatures not fully affected get a save with +1 per level/die after the first not affected. Creatures over 6th level not affected. R: 240 feet.

Darkness: Magical darkness which even blocks infravision and darkvision within a circle with 30 ft. radius. R: 120 feet. D: 1 hour+10 min/caster level.

Detect Illusion: Detects any illusion for what it is. R: 60 feet. D: 30 minutes.

Detect Invisible: Detect invisible items and beings within 10 feet per caster level. D: 1 hour.

Gaze Reflection: A spell that simply acts as a perfect mirror, reflecting the gaze of a creature such as a Basilisk or Medusa as if a mirror was in front of their eyes. R: 80 ft. D: 10 minutes.

Hypnotism: Acts like a Charm person spell with a +2 chance of success, it is necessary for the subject to look the Illusionist in the eyes. R: 80 ft.

Light: Object lights circle with 30 ft. radius, not full daylight. R: 120 feet. D: 1 hour+10 min/caster level.

Magic Aura: Alters item's aura so that it appears to detection magic as though it were non-magical or the subject of a spell you specify. Identify Spell will reveal the false aura. Limited effect on very powerful items. R: touch D: 1 day/caster level.

Mirror Image: Creates 1d6-1 exact images of the caster, all moving exactly like original. Attackers cannot tell images from original. Images hit disappear. R: around caster. D: 1 hour.

Phantasmal Forces: Vivid illusions of nearly anything the caster envisions, lasts as long as the caster concentrates. Damage caused is real if the target believes illusion. R: 240 feet.

Read Magic: Read scrolls, spellbooks, other magical writing. R: Caster Only. D: one reading (two scrolls or equivalent).

Ventriloquism: allows caster to "throw his voice" absolutely convincingly. R: 90 feet. D: 50 minutes.

Wall of Fog: Creates an opaque wall of rolling, boiling fog with no other effect than blocking vision. Wall lasts as long as caster concentrates on it. R: 160 feet.

2nd Level

Blindness: Causes the target to become blind (if save failed). R: 120 feet. D: until cancelled by caster or dispelled.

Blur: Caster's appearance is blurred, making -2 on being hit, and +2 on saves vs. magic. R: self. D: 10 times 1d4+4 minutes.

Deafness: Causes the target to become deaf (if save failed). R: 120 feet. D: until cancelled by caster or dispelled.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Dispel Illusion: Automatically dispels any illusion caused by a non-Illusionist. Versus those created by Illusionists, it functions like Dispel Magic. R: 120 feet.

Fog: A cloud of opaque fog that acts like a Cloudkill except that it has no effect but to obstruct vision. 30 feet in diameter, moves with wind or 6 feet per minute. D: 1 hour.

Hypnotic Pattern: A pattern that the Illusionist projects in front of him that will hold anyone looking at the pattern motionless. It can catch 4d6 1st level types, 3d6 2nd level types, 2d6 3rd or 4th level types, 1d6 5th or 6th level types. Range: 120 feet. D: as long as caster concentrates plus 1d6+3 turns afterwards.

Improved Phantasmal Forces: As regular Phantasmal Forces but the caster can move while employing the spell and the illusion will last up to 30 minutes after the caster has stopped concentrating. R: 360 feet.

Invisibility: Subject is invisible until spell broken by caster, some outside force, or until subject attacks. R: 240 feet.

Magic Mouth: Mouth appears on target object and delivers up to 30 word message when conditions set by caster are met. R: touch. D: permanent until triggered or dispelled.

Misdirection: cause a detect spell (Detect Good, Evil, Magic, etc.) to malfunction. (Magic Attack vs. Spell's DC for success) R: 120 feet. D: instant but effects permanent.

Phantom Trap: Makes a lock or other small mechanism seem to be trapped to anyone who can detect traps. R: touch: D: permanent.

Rope Trick: Caster tosses rope into the air. It hangs there. Caster and up three others can climb rope into a hidden pocket dimension at top. Rope can be pulled up or left out. R: rope toss. D: 60 minutes + 10 minutes/caster level.

3rd Level

Continual Darkness: Magical darkness which even blocks infravision and darkvision within a circle with 120 ft. radius until dispelled. R: 120 feet.

Continual Light: Object lights circle with 120 ft. radius until dispelled, full daylight. R: 120 feet.

Dispel Exhaustion: This spell temporarily gives its recipient the illusion of being well rested and healthy, restoring the target to full hit points, but the target will be totally exhausted and unable to do anything for 8 hours when the spell expires. If the target has taken body damage, the target immediately suffers an additional 1d2 points of body damage. D: 4 hours

Displacement: Target appears to be about 2 feet away from its true location. Attacks on target automatically miss 50% of the time and are at -2 to hit the rest of the time. R: touch. D: 1 minute/caster level.

Fear: Causes creatures who fail their saving throw to flee fear. Affect 4d10 1st level types, 3d10 second level types, 2d10 3rd level types, 1d10 4th level types, 1d6 5th level types, 1d4 6th level types. R: 180 feet. D: 10 times 1d6+level minutes.

Hallucinatory Terrain: Makes one type of terrain appear like another type until dispelled or area entered by an opponent. R: 240 feet

Illusionary Script: Allows the caster to write in a script which can only be read by whom the caster sets it to be read by (like Magic Mouth), any others who attempt to read it must save vs. magic or be confused for 6d10 minutes. One spell is suitable for a full page per level of the caster of writing.

Invisibility 10' Range: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until one attacks.

Non-Detection: Prevents Detection spells from working against the target using it and acts like an Amulet vs. ESP and Crystal Balls. R: touch. D: 20 minutes/caster level.

Paralyzation: Paralyzes twice as many hit dice as the caster's level. R: 180 feet. D: until dispelled or caster removes it.

Phantasmal Killer: Creates an illusionary horrible beast formed from the target's own fears whose touch causes death. The beast is visible only to the target and is immune from all attacks and barriers as it exists only in the target's mind. Target must save vs. magic twice. If the target fails one save, he is unconscious for 1d6 hours. If both saves fail, the target is dead. Range: 60 feet.

Spectral Forces: As Improved Phantasmal Forces, but includes sound, smell and temperature illusions. Spectral Forces are not destroyed by touch and they last up to 50 minutes after the caster has stopped concentrating. R: 360 feet.

Suggestion: Caster makes 1-2 sentence hypnotic suggestion to target. If save failed, target will carry out suggestion for up to duration. Only 1% chance target will obey suggestion that obviously would result in target's death/extreme injury. R: 30 feet. D: 1 week.

4th Level

Arcane Magic: Learning this spell allows the Illusionist to learn and use all 1st level magic-user spells. He must seek these spells in the same manner as a magic-user. They are considered 4th level spells for casting cost purposes.

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Emotions: Projects a selected emotion. The emotions that can be projected are: Fear (as the spell), Battle Lust (makes men fight as Berserkers, can be countered by Fear; if Fear is thrown first, Battle Lust does not counter it), Deprivation (lowers morale by 75%), Bravado (give immunity from Fear, Bravado which can counter Deprivation), Hate (interpretation by the subject is variable, roll d20: 1-4: hate any enemy around; 5-8: hate each other; 9-14: hate both enemy/each other; 15-16: hate selves, 17-20: hate caster. A person under the influence of a hate will attack whoever the die roll indicates). R: 180 feet. D: concentration.

Illusory Wall: Creates the illusion of a wall, floor, ceiling, or similar surface which appears real when viewed, but physical objects pass through without difficulty. Detection abilities that do not require sight work normally. Touch or a probing search reveals the true nature, but does not cause the illusion to disappear. R: 30 feet. D: permanent.

Improved Invisibility: Subject and those within 10 feet of him

are invisible until spell broken by caster, some outside force, or until 1d4+caster level minutes after the first attack is made by one under this spell.

Massmorph: Makes up to 100 humanoids appear to be trees until dispelled or negated by caster. Creatures may move and still appear to be trees. R: 240 feet.

Minor Creation: Allows the caster to create materials up to a hardness comparable to wood (much like a Djinn). The total amount of weight an illusionist may create in a day equals 5 pounds times the caster's level. R: touch. D: 4 + level days (longer for softer materials).

Rainbow Pattern: A pattern that the Illusionist projects in front of him that will hold anyone looking at the pattern motionless. It can catch 8d6 1st level types, 6d6 2nd level types, 4d6 3rd or 4th level types, 2d6 5th or 6th level types, or 1d6 7th or 8th level types. D: as long as caster concentrates plus 1d6+3 turns afterwards. Range: 120 feet.

Seeming: Like Change Self, except can change the appearance of other people as well. Affected creatures resume their normal appearances if slain. R: 30 feet. D: 10 x (1d6 + 10 + level) minutes.

Shadow Magic: This spell allows the illusionist to cast semi-real offensive spells which mimic the following real offensive spells: Lightning Bolt/Fire Ball (1d6 damage per 4 caster levels) or Death Spell (Affects 1d8 creatures of 1 HD). R: as original spell D: instant but effects permanent.

Shadow Monsters: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 20% the number of HD of the original (Original HP X 0.2. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 9 [10], and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute/caster level.

5th Level

Advanced Arcane Magic: Learning this spell allows the illusionist to learn and use all 2nd level magic-user spells. He must seek these spells in the same manner as a magic-user. They are considered 5th level spells for casting cost purposes.

Chaos: This spell affects a 30 foot x 30 foot area. All those caught within the affected area will become confused until they leave the area. Fighters and Illusionists over the caster's level are not affected by this spell. R: 120 feet. D: concentration.

Create Spectre: This spell creates a spectre from a target deceased person. The spectre has Hit Dice equal to 1/2 the deceased character's level (rounded up). The deceased character must have been at least 2nd level in order to be raised as a spectre. The spectre is raised with both its mind and memory intact (and does not automatically become evil). The spectre retains its independence. The deceased must be raised within 24 + 6 times the caster's level turns from the target creature's death. R: 10 feet. D: Permanent.

False Vision: Any divination/scrying magic used to view anything within the area of this spell instead receives a false image (as the Spectral Forces spell), as defined by you at the time of casting. While the spell lasts, you can concentrate to change the image as desired. R: 40 feet radius. D: 1 hour/caster level.

Major Creation: Allows the caster to create materials up to a hardness comparable to iron (much like a Djinn). The total amount of weight an illusionist may create in a day equals 15 pounds times the caster's level. R: touch. D: 4 + level days (for wood hardness, longer for softer materials, shorter for harder materials).

Mirage: As Hallucinatory Terrain, except that it enables the caster to make any area appear to be something other than it is. Unlike Hallucinatory Terrain, the spell can alter the appearance of structures (or add them where none are present). R: 240 feet. D: 1 hour/caster level.

Projected Image: Project an image of yourself that can sense and talk as if you were the image. Other spells cast come from image. R: 240 feet. D: 1 hour.

Shadow Magic II: This spell allows the illusionist to cast semi-real offensive spells which mimic the following real offensive spells: Lightning Bolt/Fire Ball (1d6 damage per 2 illusionist levels) or Death Spell (Affects 1d8 creatures of up to 2 HD).

Shadow Monsters II: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 40% the number of HD of the original (Original HP X 0.4. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 11, and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to 1.5 times the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute per level. *Summon Shadows:* Similar to an Invisible Stalker spell, but summons Shadows instead. The number of Shadows summoned is equal to 1 + 1 per level over 5. D: until mission completed.

6th Level

Conjure Animals: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the caster. R: 30 feet. D: 100 minutes.

Illusionary Double: Caster becomes invisible as Improved Invisibility (for one minute/caster level) and a Programmed Illusion of the caster unnoticeably takes his place. R: caster. D: 2 hours.

Mass Suggestion: Area version of the suggestion spell, affecting 1d8 creatures or 1 creature at -4 saving throw. The same suggestion must be made to all on whom it is cast. R: 30 feet. D: 1 week.

Permanent Illusion: As Spectral Forces, but lasts until dispelled. R: 360 feet. D: Until dispelled.

Programmed Illusion: As Spectral Forces, but illusion performs pre-set instructions without the caster's concentration. For example, a dragon flies to the camp, circles it for 30 minutes, roars every other pass, then flies off while the Illusionist escapes. R: 720 feet. D: 120 minutes.

Shadow Monsters III: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 20% the number of HD of the original (Original HP X 0.6. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 12, and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to 2 times the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute per level.

True Sight: Spell increases target's sight. A polymorphed creature or object will appear as it really is, superimposed with its present form. When looking at a person one may tell his alignment, class, level, and general intentions. One may also see invisible, displaced, ethereal and astral objects. R: touch. D: (level - 10) + 1d6 10 minute turns.

Veil: Like Change Self, except can change the appearance of other people as well and the new appearance can be anything. Affected creatures resume their normal appearances if slain. R: 30 feet. D: 10 x (1d6 + 10 + level) minutes.

7th Level

Alter Reality: Works like the Magic-User spell Limited Wish, but the caster must first cast an illusion of what is being wished for, then cast the Alter Reality spell on the illusion to turn it into reality. R: variable. D: variable.

Astral Spell: The caster projects his astral form into other places; the astral form is invisible to all creatures but those also on the astral plane. If the caster's physical body is moved beyond the range of the spell from its original location while the astral form is away, the link is sundered and the caster's soul becomes lost in the beyond. The spell range has no other effect. The astral form is capable of casting spells, but there is a 5% chance per spell level that the spell will fail. Additionally, there is a 2% chance per spell level of the attempted spell that the astral spell itself will falter as a result of the spell casting, and the astral form will return to the physical body. When astral traveling above the ground, the astral form may travel as fast as 100 miles per hour per level above 18th. If the form is traveling underground, its top speed is 120 feet per 10-minute turn. With special study, this spell can also be used to travel to other planes.

Maze: This spell puts its victim in an extra-dimensional maze.

After the determined time has elapsed the creature will reappear at the spot where it disappeared. Creatures with intelligence of 12 or better will require 1d4 10 minute turns to escape, those with intelligence under 6 will require from 1d4+8 10 minute turns to escape, others require 1d4+4 10 minute turns to escape. R: 60 feet.

Prismatic Spray: Creates a stream of rainbow colored energy, 90 feet long, 10 feet wide. Roll 1d8 for each being/object hit by it. On a roll of 1 to 7, the effects are as if the being/object passed through the corresponding layer in a prismatic wall. A roll of 8 means the being/object has been hit by two colors, roll again twice, ignoring 8s. R: 90 feet. D: instant but effects permanent.

Prismatic Wall: As the Magic-User spell Prismatic Sphere, but in the form of a wall. R: 60 feet. D: 1 hour.

Vision: If an Illusionist wishes guidance from those above, he formulates his question, then casts this spell. Random reaction dice are rolled, and +2 are added to the result. On a negative reaction, the Illusionist is questioned to do some task; on a neutral reaction, the caster gets useful information, but not what he asked for; on a positive reaction, the caster's question is answered in great detail. R: caster. D: 1 question.

Divine (Cleric) Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Bless Water (Reversible): Turns 1 flask (1 pint)/caster level of water into holy water. R: touch. D: instant but effects permanent.

Cure Light Wounds (Reversible): Cure 1d2+1 body points (1d6+1 hit points on beings without BP). R: touch. D: instant but effects permanent.

Detect Evil (Reversible): Reveals evil thoughts/intent or evil items. R: 120 feet. D: 1 hour.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Detect Poison: Detects whether a creature, object, or area (5 foot cube) has been poisoned or is poisonous. R: 30 feet. D: Instant.

Divine Guidance: +1 on one attack roll, saving throw, or skill check. Use of bonus must be announced before roll. R: touch. D: one minute/caster level.

Holy Weapon: Weapon gains +1 hit/damage bonus and is able to hit all creatures that can only be hit by magic weapons. R: touch. D: 1 minute/caster level.

Light (Reversible): object lights circle with 20 ft. radius, full daylight. R: 60 feet. D: 2 hours.

Protection from Evil (Reversible): +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters. R: shell around caster. D: 2 hours.

Purify Food & Water (Reversible): Purifies food and water for up to 12 people. R: 10 feet. D: instant but effects permanent.

Remove Fear: Cancels fear effects or gives +4 on saves against fear for one subject + one per four levels. R: 30 feet. D: 10 minutes.

2nd Level

Augury: Tells, for the immediate future, whether an action will be good or bad. R: caster. D: 1 minute trance.

Bless: Allies gain +1 on attack rolls, saves against fear, and morale checks. Cannot be cast during combat. R: 10 feet. D: 1 hour.

Delay Poison: Stops poison from harming subject for 1 hour/caster level. R: 30 feet.

Find Traps: Notice traps within 30 feet. R: caster. D: 20 minutes.

Gentle Repose: Preserve the remains of a dead creature. Days spent under this spell don't count against the time limit for spells like Raise Dead. Also works on severed body parts and the like. R: touch. D: 1 day/caster level.

Hold Person: Paralyzes 1-4 targets. Cast at single target, save at -2 and double duration. R: 180 feet. D: 90 minutes.

Silence, 15' Radius:* Magical silence for 15 feet around target, moving with target. No sound within area can be heard from outside it. R: 180 feet. D: 2 hours.

Snake Charm: 1d6 snakes/caster level charmed and will obey caster's commands. R: 60 feet. D: 20 + (1d4 x 10) minutes.

Speak with Animals: Can understand and speak with animals. R: 30 feet. D: 1 hour.

Undetectable Alignment: Conceals alignment of target from detection. R: 30 feet. D: 1 day.

3rd Level

Continual Light (Reversible): Object lights circle with 120 ft. radius until dispelled, full daylight. R: 120 feet.

Cure Blindness/Deafness (Reversible): Cures normal or magical blindness or deafness. R: touch. D: instant but effects permanent.

Cure Disease (Reversible): Cures person of any diseases, including magical diseases. R: touch. D: instant but effects permanent.

Helping Hand: Creates the ghostly image of a hand, which is sent to find a specific creature within 5 miles. Hand then leads the creature to you if the creature is willing to follow. Moves up to 240 feet per minute. R: 5 miles. D: 1 hour/caster level.

Locate Object: Senses direction toward an object (specific or type) R: 90 feet. D: level minutes.

Prayer: Gives saving throw penalty of 1 per ten caster levels to enemies in 20x20 foot area. R: 30 feet. D: next melee round.

Remove Curse (Reversible): Frees subject from a single curse. R: 10 feet. D: instant but effects permanent.

Speak with Dead: Ask three questions of a corpse. The age of corpse is determinative: Cleric under level 8: 1d4 days, level 9-14: 1d4 months, level 15+: any age. R: 10 feet. D: 10 minutes.

Water Walk: Targets (one creature/caster level) can walk on water or any liquid as if solid, hovering an inch above it. R: touch. D: 10 minutes/caster level.

4th Level

Create Water: Creates water, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Cure Serious Wounds (Reversible): Cures 3d2+3 body points (3d6+3 hit points on beings without BP). R: touch. D: instant but effects permanent.

Neutralize Poison: Immunizes subject against poison (10 minute duration) OR detoxifies venom in or on subject (instant but effects permanent). R: 10 feet.

Protection from Evil, 10' radius (Reversible): +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters to all within 10 foot circle around caster. R: caster. D: 2 hours.

Speak with Plants: Can understand and speak with plants. R: 30 feet. D: 1 hour.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 1 hour.

5th Level

Commune: Cleric's deity truthfully answers three yes-or-no questions. R: caster. D: 10 minutes.

Create Food: Creates food, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Dispel Evil (Reversible): Works like Dispel Magic, but affects any evil sending or evil spell. R: 30 feet. D: instant but effects permanent.

Insect Plague: Insect swarms (20 x 20x 20 feet) attack target creatures. Creatures under 2 HD flee in terror. This spell can only be cast outdoors. R: 480 feet. D: 1 day.

Quest: Force a creature to obey one long-term order. R: 30 feet. D: until order completed.

Raise Dead (Reversible): Restores life to subject who died as long as 4 days (plus 4 days per caster level over 8) ago. R: line of sight. D: instant but effects permanent.

6th Level

Animate Object: "Brings to life" inanimate objects such as statues, chairs, carpets, and tables. The objects follow the caster's commands, attacking his foes or performing other actions on his behalf. GM determines the combat attributes of the objects, such as armor class, speed, hit dice, and hit bonuses as needed as no the object animated. A stone statue would be considerably more sturdy and dangerous than wooden furniture, for example. R: 60 feet. D: 1 hour.

Blade Barrier: Creates a barrier of whirling blades up to 30 feet in diameter which do from 7d10 points of damage upon anyone

or anything which attempts to pass through it. R: 60 feet. D: 120 minutes.

Conjure Animals: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the Cleric. R: 30 feet. D: 100 minutes.

Find the Path: This spell shows the caster the fastest and safest way out of a trap maze, wilderness, underworld, etc. It will, for example, allow the caster to free himself from a Maze spell in a single turn after casting the spell. D: Indoors: 1 hour + 10 minutes/caster level; Outdoors: 1 day.

Speak with Monsters: Allows the target to speak with and understand any monster. R: 10 feet. D: 3d4 questions.

Word of Recall: The cleric teleports without error back to his previous prepared sanctuary. R: infinite. D: instant.

7th Level

Aerial Servant: Summons a servant from the elemental plane of air to fetch and return one thing (or creature) to the caster. Only a creature with a Strength of 18 can fight its way from the servant's grasp, and even then the chance is not likely to be greater than 50%. The servant can carry up to 500 pounds in weight. An aerial servant has the following attributes: HD 16, AC 3 [16], Atk Bonus +17, Atk 1 (4d4), Move 240 ft. If the servant is frustrated in its efforts to bring the desired object to the caster, it will become insane, returning and attacking him. D: until task completed or insanity.

Astral Spell: The caster projects his astral form into other places; the astral form is invisible to all creatures but those also on the astral plane. If the caster's physical body is moved beyond the range of the spell from its original location while the astral form is away, the link is sundered and the caster's soul becomes lost in the beyond. The spell range has no other effect. The astral form is capable of casting spells, but there is a 2% chance per spell level that the spell will fail. Additionally, there is a 1% chance per spell level of the attempted spell that the astral spell itself will falter as a result of the spell casting, and the astral form will return to the physical body. When astral traveling above the ground, the astral form may travel as fast as 100 miles per hour per level above 18th. If the form is traveling underground, its top speed is 120 feet per 10-minute turn. With special study, this spell can also be used to travel to other planes.

Control Weather: Caster can adjust weather. D: GM decision.

Earthquake: Causes a powerful earthquake in an area 60 feet x 60 feet plus an additional 10 feet (in both length and width) per three levels above 17th. The quake topples walls, causes rock-slides, and opens gaping fissures in the earth. Any creature caught in the quake has a 1 in 6 chance of falling into the depths of the earth and being killed. No effect beyond the spell's area of effect. R: GM discretion. D: instant but effects permanent.

Holy Word: Speaking of a holy word affects all those within the range as follows: creatures of less than 5 hit dice are slain, creatures of 5 to 8 hit dice are stunned for 2d10 turns, and creatures with 9-12 hit dice are deafened for 1d6 turns. Creatures with 13+ hit dice are unaffected. R: 40 feet.

Part Water: Creates a gap through water, to a depth of 20 feet lasting for 2 hours. At 18th and every level thereafter, the cleric adds 10 feet to the depth of water parted, and 1 additional hour to the spell's duration. R: 240 feet. D: see above.

Restoration (Reversible): Restores one level lost to an energy drain attack or restores one limb destroyed or maimed. The reverse drains one energy level. R: touch. D: instant but effects permanent.

Resurrection (Reversible): Restores life to subject who died as long as 4 days (plus 4 days per caster level over 8) ago. The subject is fully healed and restored with no side-effects, no rest required. The reverse causes death, no saving throw allowed. R: touch. D: instant but effects permanent.

Symbol: Creates a magical trap in the shape of a holy rune. The rune's magic is activated when any person or creature hostile to the caster reads it, or passes over, under, or past it. Various different runes are known, and others may be possible but none may cause permanent harm to the target.

Symbol of Discord: Causes all creatures in the hostile group to begin arguing, and possibly fighting amongst themselves with

lethal intent.

Symbol of Fear: Casts a Fear spell.

Symbol of Sleep: Casts a Sleep spell affecting double the normal number of creatures and with double the normal duration.

Symbol of Stunning: 150 hit dice (HD) of creatures are affected as by a Power Word, Stun.

Wind Walk: Allows the caster and one other person in contact with him become incorporeal and mist-like, able to travel through walls and other obstacles, traveling at 48 ft. per minute indoors (or in subterranean settings) and much faster outdoors. R: touch. D: 1 day or until dispelled.

Divine (Druid) Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Calm Animals: Soothes and quiets (2d4 + level) HD of normal animals, rendering them docile and harmless. R: 30 feet. D: 1 minute/caster level.

Charm Animal: Like charm person, except that it affects one normal animal. R: 60 feet. D: until dispelled.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Detect Snakes/Pits: This spell allows the caster to discover snares, pits, and other outdoor traps. R: 10 feet/caster level. D: caster level + 1 hours.

Endure Elements: Target (and equipment) can exist comfortably in hot or cold environments (between -50 and 140 degrees F). R: touch. D: 24 hours.

Faerie Fire: Lines the target in a luminescent glow. R: 60 feet. D: 1 hour.

Locate Animals: Senses direction toward an animal (specific or type) R: 60 +10/caster level feet. D: 1 minute/caster level.

Magic Fang: One natural weapon of target creature gets +1 on attack and damage rolls (and counts as a magic weapon). R: touch. D: 1 minute/caster level.

Predict Weather: Forecast the weather in the caster's location with 95% accuracy. D: instant.

Purify Water: Purifies water for up to 12 people. R: 10 feet. D: instant but effects permanent.

2nd Level

Animal Messenger: Compels a small animal to go to a spot you designate, carrying a scroll or other small item, and allow others to take that item. R: touch. D: 1 day/caster level.

Create Water: Creates water, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Cure Light Wounds: Cure 1d2+1 body points (1d6+1 hit points on beings without BP). R: touch. D: instant but effects permanent.

Detect Poison: Detects whether a creature, object, or area (5 foot cube) has been poisoned or is poisonous. R: 30 feet. D: Instant.

Heat Metal: Spell makes 1 metal item (weighing up to 0.5 pounds per level of the caster) extremely warm. Creatures take damage if holding or wearing equipment that is targeted by this spell. Take 1d2 damage on the first round and 1d2+1 additional damage on the second round. 50% chance per round that a target object being held in the hand is dropped. R: 30 feet. D: 2 combat rounds.

Locate Plants: Senses direction toward a plant (specific or type) R: 60 +10/caster level feet. D: 1 minute/caster level.

Obscurement: A misty vapor arises near the druid. It is stationary once created. The vapor obscures all sight beyond 5 feet. The cloud covers 100 cubic feet per druid level. R: 20 feet. D: 10 minutes/caster level.

Produce Flame: Produces a small flame in the palm of Druid's hand which illuminates as a small lantern. The flame may be hurled and causes inflammables to combust. R: caster. D: 20 minutes/caster level.

Speak with Animals: Can understand and speak with animals. R: caster. D: 1 hour.

Warp Wood: Causes straight wooden shafts to bend. The spell effects an amount of wood equal to 1 spear shaft (or 6 arrows) per 2 druid levels. R: 30 feet. D: instant but effects permanent.

Wood Shape: Forms one existing piece of wood into any shape that suits your purpose. While it is possible to make crude coffers, doors, and so forth, fine detail isn't possible. R: touch. D: instant but effects permanent.

3rd Level

Call Lightning: Call down one lightning bolt (8d6 + level damage) per turn. The caster may target anyone within the spell's range. This spell is only usable outdoors within 360' of stormy weather. R: 360 ft. D: 1 turn/caster level.

Cure Disease: Cures person of any diseases, including magical diseases. R: touch D: instant but effects permanent.

Dominate Animal: Enchant an animal and direct it with simple mental commands such as "Attack," "Run," and "Fetch." Suicidal or self-destructive commands (including an order to attack a creature considerably larger than the dominated animal) are simply ignored. R: 30 feet. D: 1 minute/caster level.

Hold Animal: Paralyzes 1-4 animals. Cast at single target, save at -2 and double duration. R: 120 feet. D: 1 hour plus 10 minutes/caster level.

Neutralize Poison: Immunizes subject against poison (10 minute duration) OR detoxifies venom in or on subject (instant but effects permanent). R: touch.

Plant Growth: Plants in an area up to 30x30 yards become overgrown and nearly impassable. Lasts until dispelled or plants killed. R: 240 feet.

Protection/Fire: Cast upon a non-druid, this spell renders the target invulnerable to normal fire. Cast upon a druid, this spell also protects from magical fire, but such magical flames will immediately cancel the spell on the next turn. R: touch. D: 30 + 10/caster level minutes.

Pyrotechnics: Caster creates either fireworks or blinding smoke from a normal fire. R: 240 feet. D: 1 hour.

Water Breathing: Subject can breathe water. R: 30 feet. D: 2 hours.

4th Level

Animal Summoning I: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the druid. R: 30 feet. D: 1 hour.

Control Temperature, 10' radius: Allows the druid to vary the temperature in a given area (10' radius) by +/- 50 degrees. Mistletoe is required to cast this spell. R: 60 feet. D: 30 + 10/caster level minutes.

Cure Serious Wounds: Cures 3d2+3 body points (3d6+3 hit points on beings without BP). R: touch. D: instant but effects permanent.

Dispel Magic: Cancels magic effects and spells. (Magic Attack vs. Spell's DC for success). R: 120 feet. D: instant but effects permanent for spells or 10 minutes for items.

Hallucinatory Forest: This spell creates an illusory forest covering an area of 30' x 30' per level. Creatures within this area will absolutely believe they are in a forest, acting and reacting appropriately to their surroundings. Other druids, magical woodland creatures, and treants are never fooled by this spell. R: 60 feet to forest edge. D: until dispelled.

Insect Plague: Insect swarms (20 x 20x 20 feet) attack creatures. Creatures under 2 HD flee in terror. Can only be cast outdoors. R: 480 feet. D: 1 day.

Plant Door: Allows the druid to pass through thick/dense vegetation. This 3' X 6' "door" is usable only by the caster, but another druid or a dryad may follow. This spell may also be used to pass through solid tree trunks. The druid may decide to stay within the trunk for up to the duration of the spell to hide from others. R: caster. D: 30 + 10/caster level minutes.

Produce Fire: Creates normal fire covering an area of 10' X 10'. This spell may be reversed to extinguish fires covering the same area. R: 30 feet. D: 10 minutes.

Protection from Lightning: This spell negates the effects of electrical attacks upon the target. The spell ceases after such an attack. R: touch D: 1 hour + 10/caster level minutes.

Speak with Plants: Can understand and speak with plants. R: 30 feet. D: 1 hour.

5th Level

Animal Growth: 1d6 normal animals grow to giant size. R: 120 feet. D: 2 hours.

Animal Summoning II: Conjures 2 large animal (elephant, hippo, rhino, etc.), 6 medium sized animals (lions, tigers, bears, etc.) or 12 small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the druid. R: 30 feet. D: 1 hour.

Anti-Plant Shell: Similar to the magic-user spell Anti-Magic Shell but instead of protecting from spells, it protects against attacks from plants and living vegetables. R: caster. D: 2 hours.

Charm Plants: Charms the equivalent of: 1 large oak, 6 medium sized bushes, 12 small shrubs, or 24 little plants. These charmed plants will do anything the caster demands as long as it is within their ability to comply. R: 120 feet. D: until dispelled.

Commune with Nature: Same as the cleric spell Commune but must be performed outdoors and the answers received will only pertain to Nature. R: caster. D: 3 questions.

Control Winds: A druid may employ this spell to increase the force of, or calm, winds within 120' of the druid. The center-point of the spell's effect is the druid and follows the druid's movements. Such affected winds may influence flying creatures and sailing ships (forcing them out of the air or halting their maritime travel). A Control Winds spell cast upon an existing Control Winds spell will negate it. The spell's range is increased to 320 at 11th level, 400 at 12th level, and 480 at 12th druid level. R: 120 feet. D: 1 hour + 10/caster level minutes.

Hold Plant: Similar to the magic-user spell Hold Monster but affects living, magical or animated plants. This spell affects both treants and fungoid life forms. R: 30 feet + 10 feet/caster level. D: 1 hour + 10/caster level minutes.

Pass Plant: Allows the druid to enter one tree and emerge from another of the same species. The base distance travelled this way is 480 yards + modifier based on the tree type (Oak +120 yards. Ash, yew, linden, and elm -120 yards. Other deciduous trees -180 yards. Coniferous trees -240 yards). The tree's girth must be large enough to engulf the druid. Travel must be from one living tree to another. If no such tree exists within the range of the spell, then the spell fails and the druid re-emerges from the starting tree. R: see above. D: 10 minutes.

Rock-Mud: Transforms rock to mud or vice-versa, up a 300x300 foot area. R: 120 feet. D: 3d6 days.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 1 hour.

Wall of Fire: Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through wall deals 2d6 damage +1/caster level. Wall lasts as long as caster concentrates on it. R: 60 feet.

6th Level

Animal Summoning III: Conjures 4 large animal (elephant, hippo, rhino, etc.), 12 medium sized animals (lions, tigers, bears, etc.) or 24 small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the druid. R: 30 feet. D: 60 minutes.

Anti-Animal Shell: Same as the Anti-Plant Shell spell, but focuses on natural or giant animals. While affected by this spell, those inside the shell are protected from all animal attacks (excluding fantastic or magical creatures), but are unable to attack, be it by normal or magical means. R: 20 foot hemisphere. D: 30 + 10/caster level minutes.

Conjure Fire Elemental: Similar to the magic-user's Conjure Elemental spell but is limited to summoning a 16 HD fire elemental. On a roll of 1-2 on d20 the caster may choose to summon 1d3 salamanders instead, and on a roll of 1 on d20, the druid may choose to summon a 20 HD fire elemental. The elemental will not turn upon the druid but will regard him as a friend of sorts. R: 30 feet. D: 1 hour.

Feeblemind: Subject's MIND drops to 1. R: 240 feet. D: until dispelled.

Finger of Death: Target must save or die. Will only work if druid's life in dire peril. R: 120 feet. D: instant but effects permanent.

Transport via Plant: Allows the druid to pass from one plant to any other plant of similar species anywhere, as long as the druid has seen the plant at one time. Should the emergence fail, the druid will instead emerge from another plant which may be miles away. A druid may choose to remain inside a plant instead of transporting from it, and may remain so for up to 24 hours.

While within a plant in this manner, the druid is completely aware of his surroundings. D: instant or up to 24 hours.

Turn Wood: Creates a wall of force which moves away from the druid. Any wooden objects in the wall's path (weapon hafts, spear shafts, arrows, etc.) are pushed back, dragging back any creature holding such items. The length of the wall runs 60' to either side of the druid, and moves at a rate of 40' per turn. R: 20 x level feet. D: 10 + 10/caster level minutes.

Weather Summoning: The druid may call for any weather desired, limited by the current season and climate. Extreme weather conditions may only be summoned by an 11th level druid. The altered weather is not under the control of the druid. It takes 3 + 5d4 - druid level 10 minute turns for the altered weather to arrive, but will be noticeable after 30 minutes. The duration of this spell varies according to the climactic changes brought about by the druid. A tornado may last a few turns, while torrential rains might last a few hours or day (GM's choice). R: 5 mile radius. D: variable.

7th Level

Animate Rock: Similar to a cleric's Animate Object spell, but only affects stone. Up to approximately 2 x level cubic feet of stone can be animated. The rock will move at 2-4" per turn, the faster speeds for rock-masses which are basically of an ambulatory shape such as statues. R: 60 feet. D: 1 hour.

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Conjure Earth Elemental: Similar to the magic-user's Conjure Elemental spell but is limited to summoning a 16 HD earth elemental. The elemental will not turn upon the druid but will regard him as a friend of sorts. R: 30 feet. D: 1 hour.

Control Weather: Caster can adjust weather. D: GM decision.

Creeping Doom: Summons a horde of 1D10 times 1000 small and deadly insects and arachnids. They appear within 1 to 3 minutes. They then move forward to attack whatever they are commanded to, provided it is within 60 feet at the time of the command. They will pursue until the prey is beyond a 240 feet range (or until it or they are otherwise destroyed). Can be used indoors or outdoors. R: 60 feet. D: see above.

Fire Storm: Creates a fire of intensity equal to a "wall of fire" in a large area. This magical conflagration lasts only 10 minutes, but all combustible material within the area affected will continue to burn thereafter. The spell can be reversed to extinguish normal fires in an area twice that of the maximum possible area of the druid's fire storm. There is a 5% chance per caster level of the reversed version extinguishing magical fires of up to the normal area. Area: 30 x 30 foot square area per caster level (must be contiguous). R: 60 feet.

Metal-Wood: Cast upon any metal (up to 5 pounds per level of the caster) it will permanently change it into some type of wood (caster's choice). R: 60 feet. D: instant but effects permanent.

Reincarnate: Restores dead person to life in a random (usually animal or nature-oriented humanoid) form. R: touch. D: instant.

+4 (1d4, poison) ST: 11 MR: 9 S: poison causes paralysis and loss of 1 BP per minute.

SEA SERPENT: AC: 17 HD: 30d6 AT: bite +15 (4d6) ST: 3 MR: 9 S: natural defense: 2, swallows whole on roll 4 higher than needed to hit, swallowed creatures take 1d6 automatic damage every turn.

SHADOW: AC: 12 HD: 3d8 AT: touch +3 (1d4, special) ST: 16 MR: 12 S: drains 1 STR per hit, hit only by magical weapons, surprise foes on a 1-5, creatures reduced to 0 STR will rise 24 hours later as a shadow. Not undead.

SHARK: AC: 15 HD: 4d8 AT: bite +4 (2d6) ST: 15 MR: 7

SHARK, GIANT: AC: 16 HD: 10d8 AT: bite +10 (3d10) ST: 19 MR: 7

SHRIEKER: AC: 11 HD: 3d8 AT: none ST: 16 MR: 12 S: large toadstool, if disturbed (light 60 feet/movement 30 feet) emits loud shriek for 1d3 minutes which stuns small (rat-sized) creatures.

SKELETON: AC: 12 HD: 1d8 AT: weapon +1 ST: 18 MR: 12 S: undead immunities.

SLUG, GIANT: AC: 11 HD: 12d8 AT: bite +12 (2d6) ST: 7 MR: 10 S: spits acid (2d6).

SNAKE, CONSTRICTOR: AC: 14 HD: 2d8, AT: constriction (1d3) ST: 17 MR: 7 S: On successful attack, automatic 1d3 damage thereafter until dead.

SNAKE, GIANT CONSTRICTOR: AC: 14 HD: 6d8 AT: constriction +4 (1d6) ST: 13 MR: 7 S: On successful attack, automatic 1d6 damage thereafter until dead.

SNAKE, GIANT VIPER: AC: 14 HD: 4d8 AT: bite +4 (1d3 + poison) ST: 15 MR: 7 S: Poison bite does 2 BP per minute.

SNAKE, VIPER: AC: 14 HD: 1d8 AT: bite +1 (1hp + poison) ST: 18 MR: 7 S: Poison bite does 1 BP per minute.

SPECTRE: AC: 17 HD: 7d8 AT: touch +7 (1d6) ST: 10 MR: 11 S: undead immunities, drains 2 levels per hit, creatures reduced to 0 levels will rise 24 hours later as a spectre.

SPHINX: AC: 19 HD: 12d8 AT: 2 claws +12 (3d6), bite +12 (2d8) ST: 7 MR: 10 S: Males are level 12 magic-users. Females are level 12 clerics. Roar (2/day) save or flee in terror

SPIDER, GIANT: AC: 13 HD: 2d8+2 AT: bite +2 (1d8) ST: 17 MR: 8 S: bite causes paralysis via poison, surprise on 1-5.

SPRITE: AC: 14 HD: 1d4 AT: none ST: 16 MR: 7 S: can curse (effects funny rather than dangerous, wears off after 1d20 hours)

STIRGE: AC: 12 HD: 1d8 AT: sting +1 (1d4) ST: 18 MR: 9 S: attaches on a hit and will deal 1d4 automatically damage every round.

TREANT: AC: 17 HD: 10d8 AT: branches +10 (3d6) ST: 9 MR: 9 S: Control trees and can make them move and attack.

TICK, GIANT: AC: 15 HD: 3d8 AT: bite+3 (1d6) ST: 16 MR: 7 S: attaches on a hit and will deal 1d6 damage automatically every round.

TITAN: AC: 22 HD: 16d8 AT: weapon+15 (5d6) ST: 3 MR: 11 S: natural defense: 3, Spells.

TOAD, GIANT: AC: 12 HD: 2d8 AT: bite +2 (1d6) ST: 19 MR: 6 S: surprise foes on a 1-3, swallows small creatures whole on a natural 20, swallowed creatures take 1d6 automatic damage every round, long tongue pulls victims in to bite making bite attack like pole arms.

TROLL: AC 15 HD: 6d8 AT: 2 claws +6 (1d6), bite +6 (1d10) ST: 11 MR: 10 S: regenerate 3 hp per round (except acid or fire damage).

UNICORN: AC: 17 HD: 5d8 AT: 2 hoofs +5 (1d8) or horn +5 (1d8) ST: 14 MR: 7 S: double damage for charge, 25% magic resistance, teleport, horn can cure damage or disease.

VAMPIRE: AC: 17 HD: 9d8 AT: bite +9 (1d6) or weapon +9 ST: 8 MR: 11 S: undead immunities, hit only by magical weapons, regenerate 3 hp per round, drains 2 levels per hit, gaseous form at will, shape change into bat, charm gaze, avoids garlic and mirrors, summons bats or wolves, immobilized and apparently dead if a stake is driven through its heart, drowns under water in one round, creatures reduced to 0 levels will rise 24 hours later as a vampire under the control of their creator.

WAR DOG: AC: 12 HD: 2d8 AT: bite +2 (1d6) ST: 17 MR: 9

WIGHT: AC: 14 HD: 3d8 AT: claw +3 (1d6) ST: 16 MR: 12 S:

undead immunities, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise 24 hours later as a wight.

WILL-O-THE-WISP: AC: 27 HD: 9d8 AT: shock +9 (1d6+4) ST: 10 MR: 10 S: flies.

WOLF: AC: 12 HD: 2d8 AT: bite +2 (1d6) ST: 17 MR: 8

WORG: AC: 13 HD: 4d8 AT: bite +4 (2d6) ST: 15 MR: 8

WRAITH: AC: 16 HD: 4d8 AT: touch +4 (1d6) ST: 13 MR: 11 S: undead immunities, only hit by magic or silver weapons, arrows do a max 1 HP damage, drains a level per hit, creatures reduced to 0 levels will rise 24 hours later as a wraith.

WYVERN: AC: 16 HD: 8d8 AT: bite +8 (2d8) or sting +8 (1d6) ST: 11 MR: 9 S: poison sting (1d6 STR), flies.

YELLOW MOLD: AC: n/a HD: n/a AT: 1d6 if touched ST: 18 MR: n/a S: if struck, 50% releases spore cloud (choke to dead in 6 rounds unless cure disease), destroyed by fire.

ZOMBIE: AC: 11 HD: 2d8 AT: weapon +2 or claws +2 (1d8) ST: 15 MR: 12 S: undead immunities always lose initiative.

Science Fantasy Machine Monsters:

ANDROID, LABORER: AC: 12 HD: 3d8 (28 hp); AT: weapon +3 ST: 16 MR: 7 S: bio-machine

ANDROID, LEADER: AC: 14 HD: 2d8; AT: 1 weapon +2 ST: 17 MR: 8 S: bio-machine

ANDROID, SOLDIER: AC: 18 HD: 4d8 AT: 2 weapon +4 ST: 15 MR: 11 S: bio-machine

BUILDERBOT: AC: 20 HD: 10d8 AT: laser drill +10 (4d6 ranged), saw arm +10 (3d6), 2 grabber arms +10 (2d6) ST: 9 MR: 11 S: thermal vision; giant construction robot

DOCBOT: AC: 12 HD: 2d8 AT: none ST: 17 MR: 11 S: regeneration ray heals 1d20 damage (+10 on humans); if malfunctioning can reverse polarity and fire a radiation ray that does 2d8 radiation damage

LAWBOT: AC: 18 HD: 6d8 AT: 2 stun pistols +6 (2d6, stun) or stun grenade launcher +6 (3d6, area stun) ST: 13 MR: 11 S: low light and thermal vision

SECURITYBOT: AC: 23 HD: 20d8 AT: 1 Fusion Launcher +15 (6d6, area) ST: 3 MR: 12 S: low light and thermal vision; 20 HP force field

SPIDERBOT: AC: 15 HD: 4d8 AT: 1 laser eye beam +4 (3d8 ranged) ST: 15 MR: 11 S: low light and thermal vision

UTILITYBOT: AC: 12 HD 2d8 AT: 2 mechanical claws +2 (2d6) ST: 17 MR: 11 S: thermal vision; general industrial robot

VENDORBOT: AC: 14 HD: 2d8 AT projectile merchandise +2 (2d4 ranged) ST: 17 MR: 9 S: proximity sensors

WARBOT: AC: 30 HD: 80d8 AT: 2 Rocket Launcher +15 (4d6 area), 2 Plasma Launcher +15 (5d6 area), Fusion Launcher +15 (6d6 area) ST: 3 MR: 12 S: low light and thermal vision; radar, sonar, 40 HP force field; flies, swims

Equipment

Many players prefer to select their equipment rather than use the standard quick packs. The GM may use these lists or GM created lists if the GM allows equipment selection.

Weapons	Range	MinSTR	Cost	Damage
Arrows (20)		--	1gp	—
Axe, throwing	10ft	--	8gp	M (1d6)

Warhorse, heavy	400 gp
Warhorse, light	150 gp
Warpony	100 gp
Saddle, Military	20 gp
Saddle, Pack	5 gp
Saddle, Riding	10 gp
Saddlebags	4 gp

Microlite74 Treasure

Here is a list of sample treasure items appropriate to a Microlite74 campaign. Maps to possible hoards of such treasures are also a common treasure item. Of course, any magic item you like from the SRD can be used, but higher powered items may be too powerful for most Microlite74 games.

Money: 1 gold piece (gp) = 10 silver pieces (sp); 1 silver piece = 5 copper pieces (cp).

Gems: Most range in value from 10gp to 1000gp, with 50% of gems being worth about 100gp.

Magic Weapons: Most range from +1 to +3; some +1 weapons have a greater plus versus specific types of monsters. Magic Swords sometimes have a special spell-like power or two. A few swords are intelligent and have a number of spell-like powers (some even talk). A few weapons are cursed and reduce one's chance to hit.

Magic Armor: Most are plus +1, with a few +2 or +3. Magic shields exist with similar pluses.

Scrolls: Most hold one to six spells (all arcane or all divine). Some are protection against good/evil/one of the elements. A few place curses on the reader.

Potions: Common examples: Growth, Diminution, Giant Strength, Invisibility, Gas Form, Polymorph Drinker, Speed, Fly, Levitate, ESP, Healing, Clairvoyance, Clairaudience, Control (Animal, Demon, Dragon, Giant, Human, Plant, Undead, etc.), Invulnerability, Heroism, Resistance (Fire, Cold, Acid, etc.), Treasure Finding, Water Breathing, etc. Some potions are poison, cause disease, cause delusions, etc.

Rings: Common examples: Spell Storing, Spell Turning, X-Ray Vision, Telekinesis, Protection, Protection 5 foot radius, Invisibility, Control (Human, Mammal, Zombie, etc.), Resistance (Fire, Cold, Acid, etc.). Uncommon examples: Three Wishes, Regeneration, Djinn Summoning. Some rings are cursed with negative effects.

Wands and Staves: Common examples: Detection (Enemy, Metal, Secret Doors, Traps, Magic, etc.), Illusion, Fire Balls, Lightning Bolts, Cold, Polymorph, Healing, Commanding, Striking, etc. Uncommon examples might have several of the

above powers. Wands operate as level 6 casters with 1d100 charges. Staves operate as level 8 casters with 1d200 charges.

Unusual Magic Items: Here are some ideas: Boots (Speed, Levitation, Travelling, Leaping, Elven), Cloak (Displacing, Elven, Flying, Protection), Crystal Ball, Flying Broom, Flying Carpet, Amulets (Protection, versus ESP, versus Charm, etc.), Helms (Read Magic, Read Languages, Telepathy, Teleportation, Good, Evil, etc.), Horn (Blasting, Summoning, etc.), Belts of Giant Strength, Efrete Bottle, Djinn Lamp, Mirror of Life Trapping, etc. Cursed items are possible as well.

Notes on "Old School" Play

While Microlite74 is designed using tried and true "D20" systems filtered through the Microlite20 rules, it is designed for a completely different style of play than many players who started to play in the last 20 years or so may be used to. This section will give a brief overview of "old school" play.

What is "Old School" Play?

There are two major styles of roleplaying games. The first (and older) style says "Here is the situation. Pretend you are there as your character, what do you want to do?" This style has been superseded over the years with a style that says "Here is the situation. Based on your character's stats, abilities, skills, etc. as listed on his character sheet and your knowledge of the many detailed rules of the game, what is the best way to use your character's skills and abilities and the rules to solve the situation?" Old school play strongly favors the first style and frowns on too much of the second.

Here are some major points where old school play is different:

Heroic, not Superheroic: Old school play, especially at low to mid levels, is about fairly normal people put in situations where they can be heroes, not about extraordinary people doing things that would make a four-color comic book superhero proud – and at first level yet. Just like in the real world, the more a character improves his abilities, the harder it is to improve them further, while new characters may advance rapidly, the higher their level the more effort and time (and XP) it takes to advance to the next level.

Achievement, not Advancement. Many modern games are often all about what special feats, extra classes and special game mechanics the players wish to obtain for their characters as they increase in level. In old school games, a character's abilities are generally predetermined by his character class, so old school games focus on the things that the characters wish to accomplish in the game world rather than on what game mechanics they want to acquire. Level advancement is often much slower than in modern fantasy RPGs which makes in campaign achievements even more important as a measure of character success.

No Skills: Unlike in most modern RPGs, there aren't any skills in Microlite74 -- not even the streamlined four skills of Microlite20. Players are intended to have their characters act like adventurers. So don't search your character sheet or the rules for the perfect solution in Microlite74. Instead, you just tell the GM what your character is trying to do. Note that you are assumed to be competent with all common activities associated with your class and background. If you need to keep a door open or shut, you might tell the GM your character is using a spike to keep the door open or closed. A ten foot pole is your friend for checking for traps. Searching a room means looking in and under objects, not rolling a skill check. While this may seem strange at first, you will quickly learn to appreciate the freedom it gives you. No longer are you limited to the skills and feats on your character sheet, you can try anything your character should be capable of trying. You might not succeed, but the rules generally will not stop you from trying.

Limited Magic Items: Modern fantasy RPGs often assume that magic items are easy to buy and/or to create. In most old school campaigns, magic items are relatively rare and hard to create. Only potions and scrolls are generally relatively easy to create or purchase. Other magic items are seldom found for sale

(and are very high priced when they are found for sale) and are usually very expensive in money and time to try to create – often requiring rare ingredients that the characters must quest to find. Therefore characters are generally limited to the magic items they find in treasures or take from defeated enemies on adventures.

No Assumption of “Game Balance”: Old style game sessions aren’t about carefully balanced characters (who are all able to shine equally at all times) who only run into situations carefully designed by the GM to be beatable by the characters presently in the party and to provide treasure that fits their current level. Instead, part of player skill is learning to evaluate situations so situations well over the party’s current abilities or which will waste the party’s resources for little gain can be avoided. Don’t assume that you can beat every monster that you encounter, running away from monsters too tough to handle can mean the difference between character survival and character death. You can also get creative in how you defeat monsters. Perhaps those goblins you bypassed could be talked into (or tricked into) attacking that giant you know you can’t beat, perhaps killing it for you or at least softening it up so your party has a chance of defeating it and living to tell the tale. Also remember that treasure can be turned into XP, even if you can’t kill the monsters, perhaps you can still acquire some of their treasure. Part of the skill of playing “old school” style is coming up with creative solutions when a direct attack is likely to fail.

It’s Not All About Combat: Many modern fantasy RPGs have made combat the star of the system, combats in these systems are time-consuming and very crunchy with rules for everything. Microlite20 avoids this by having a fast-playing abstract combat system. Microlite74 takes this one step further, combat isn’t intended to be the main source of fun in the game. The game is as much about exploration and treasuring finding as it is about combat. Sure, you are going to have to fight things to explore and find treasure, but always remember that combat may not be the best or safest way to handle every situation. Think before you rush into combat. After all, it’s not the only way to earn a good pile of experience – and monsters don’t have to be killed to be defeated (and get XP for them).

Reality/Common Sense Trumps Rules: Old-school games use loose and simple rules that cover average cases and the GM and players are supposed to apply common sense and their knowledge of how reality works to cover the unusual and edge cases. “Reality/Common Sense” as interpreted by the GM always trumps the written rules if they conflict. For example, a character has a magic weapon and the rules for that weapon say it always causes its target to fall prone if hit. The character hits a gelatinous cube moving down the corridor toward them with the weapon. The rules say that the target should fall and be in a prone position. Reality, however, says otherwise. Gelatinous cubes don’t have a top and bottom (so prone penalties make no sense) and a 10 foot cube can’t fall when it is moving through a 10 foot corridor. In some modern games, the rules would be applied anyway and the cube would suffer the effects of falling prone no matter how little sense that makes. In an old school game, the GM ignores the rule because it makes no sense in the specific situation.

Forget “Rules Mastery”: As some of the above differences have hinted, player skill in “old school” style games isn’t about mastering the game rules so you can solve any problem by knowing the right combination of rules from 20 different rule books. Microlite20 is designed to be rules light and Microlite74 tries to stress this even more by encouraging GMs to make rulings on the spot taking into account specific circumstances instead of trying to hunt up special cases in the SRD or a stack of optional rule books. This is faster and helps players immerse themselves in their character and the game world instead of in rule books. GM rulings will be based on specific circumstances and common sense, not just on the written rules and prior rulings. Just because it requires a certain roll to jump one 10 foot pit does not mean all 10 foot wide pits will require the same roll. After all, all sorts of variables can affect the roll (terrain, weather, lighting, pressure to jump quickly, etc.). Players need to remember that these rules are merely a tool for the GM. They

are just guidelines for the GM, not something written in stone that the GM must obey. If something herein does not work right in your campaign (or the GM just does not like a rule), the GM is well within his right to change it. Microlite74 is not a game for rules lawyers or for those who believe that the game designer always knows what is best.

No Script Immunity: In most old school games, player characters do not have any form of script immunity. Player characters can die, lose equipment, suffer strange magical effects and other often unpleasant consequences if they are not careful or are just very unlucky. On the other hand, there are no rules limiting their success. If they take on an adult red dragon as first level characters and miraculously manage to win, there are no rules about level appropriate wealth or level appropriate magic items to interfere with their becoming rich and probably flush with magic items from the dragon’s hoard.

Not Mentioned does not mean Prohibited: Many people seem to read RPG rules and come away with the idea that anything not specifically mentioned in the rules as allowed is prohibited. While this really doesn’t make much sense given that no set of rules could ever cover everything that characters might attempt to do in an adventure, it seems to be a very common way to view RPG rules. In an old school game like Microlite74, this is specifically not true: the millions of possible activities not mentioned in the rules are not prohibited, they are up to the GM to allow or disallow based on his knowledge of how reality works and how his specific campaign world differs from reality. Unless the rules specifically prohibit some action, players should ask their GM instead of simply assuming it is prohibited because the rules do not mention it.

Styles of “Old School” Play

If you read some “old school” blogs, forums, and web sites, you might get the impression that there is only one “old school” style of play: a style with expendable player characters who spend all their time in dungeons designed in the style of the old “Tomb of Horrors” module where an adventuring party is only one slipup away from death. This style of play is often shown in early modules.

What most people forget is that these early modules were designed for tournament play where the party that lasted longest and made it deepest into the dungeon was the winner. While a few gaming groups did run their regular campaigns like this and enjoy it, most people did not enjoy such games and the GMs who ran them were often referred to as “Killer GMs” (who often found themselves without players). Instead most home campaigns were a mixture of the following four styles – some campaigns stressing one or two styles over the others.

Power-Gaming: Many players start out playing in this style. Most soon get bored with it and add more and more of other styles. A power-gaming campaign is all about character power. Characters are known by their class, level, special items, and amazing powers and deeds. (“I killed the Demon King with my 15th Level Fighter/Magic-User/Druid. It only took two hits from Thor’s Hammer to knock him out. Then I cut off his head with my vorpal blade.”) There is often a lot of player competition for the most powerful character in campaigns that stress power-gaming. A lot of people look down on this style, but it can be a lot of fun to play a pure power-game in a group of players who all like the style.

Wargaming: This is probably the style old school rules were originally written for. The wargaming style of play is a competition between the player group and the GM. The GM sets up tactical battles, puzzles, and the like and the players solve them for treasure and experience. Fudging die rolls and ignoring rules (either for or against the players) is frowned upon as it detracts from the challenge and fun of the adventure.

Characters in pure wargaming campaigns often were expendable and had little personality or goals (beyond staying live and getting rich) as a character with such might be tempted to do things dysfunctional to survival. Published tournament dungeons like Tomb of Horrors could be considered examples of extreme forms of this style. Once the RPG hobby became known outside

of the minis and board wargaming community, pure forms of the wargaming style quickly became uncommon.

Role-Playing: A pure role-playing campaign is almost the opposite of a pure wargaming campaign. Player skill, tactics, and rules aren't really important. What is important is the player's character and that character's life in the game. In a pure role-playing campaign, players create the personality of their characters in great detail and players generally have a large emotional investments made in them and do not consider their characters expendable. Players tend to have their characters act within their personalities and within the beliefs they're supposed to hold – even when doing so is not the best thing to do at the time within the game. The object is to live your character's life in the campaign world. You "win" by having your character achieve his goals, goals which may or may not have anything to do with the game's goals of exploring and accumulating treasure and experience points. The modern computer game *The Sims* is an example of this style of play.

Story-Telling: While all campaigns tell a story after-the-fact (that is, you can tell a story based on the characters actions in the game), in a story-telling campaign, the GM has worked out a story in advance and the player characters are the protagonists. The campaign world usually has a detailed background and back story behind it. Knowing this background may be more important than knowing the rules. Some pure story telling campaigns are little more than single-line railroads where the characters play their almost pre-scripted parts in the story. In other cases, things are more free-form with story flow and events created by interactions between the GM's basic outline of story events and the actions of individual characters during the campaign. Some people consider the more pure forms of story-telling campaigns boring straight-jackets while others love the idea of being a major part of a real story.

These four major styles of play appeared early in the history of role-playing games. They were first mentioned in a general circulation publication in Glenn Blacow's article "Aspects of Adventure Gaming" in *Different Worlds* #10 (the October 1980 issue).

The important thing to take from this section isn't the four styles or their labels (as there are other systems for describing this with their own labels), but the idea that there were many different styles of "old school" play back in the "old school" days – not just the single style stressed in some "old school" blogs, forums, and web sites. Don't let those sites make you believe that you aren't playing old school right if your campaign isn't strongly in the wargaming camp. Most successful campaigns back in "old school" days were a mixture of all four major styles – and a heaping helping of minor styles.

Advice for the New Old School Game Master

If you are comfortable running a rules-light game like standard Microlite20, you'll probably have no trouble running Microlite74 as you have already learned to run a game without having hundreds of pages of rules detailing how to handle every situation that might possibly arise in the game. You've learned to just make a ruling that you think fits the situation and keep the game moving.

Running a Game Without Skills

The greatest change between Microlite20 and Microlite75 is the removal of all character skills. If you are used to just allowing players to just say "I'm searching the room. What do I find?" and make search skill roll or just say "I'll try to persuade the baron to loan us a catapult." and make a persuade skill roll, running without skill rolls is going to require as much change to your thinking as it will to your players' thinking.

First, you need to get your players to tell you what their characters are actually doing in the campaign world, instead of talking in terms of what skill they are using. Then you need to learn to listen to what they say and decide if there description of what they are doing a) would most likely solve the problem, b) wouldn't have a chance of solving the problem, c) might not immediately solve the problem but would provide more info that

would help solve the problem, or d) would not definitely solve the problem but has a fair chance of doing so. Only option d would require a die roll.

Let's take checking a chest for traps as an example. Get the players to describe in general terms how they are going to check the chest for traps. Note general terms are enough; the idea is to see what the characters are doing, not to require them to describe every single muscle and eye movement they make. Having to "click on one exact pixel on the screen" to succeed is boring and frustrating in a computer game, the verbal equivalent of it is even more frustrating in a tabletop game. Don't fall into the trap of doing it as it turns players off fast.

Let's say a player says "I'll look the chest quickly over for obvious traps, paying special to the keyhole, clasp, and anything that looks out of the ordinary. I'm not touching it yet."

If the chest had a poison needle near the clasp or some holes for poison gas or needles to shoot out of, this should be enough for the character to notice it without a roll, even if he isn't a Rogue or the like. However, if the chest is set to explode (or shoot daggers out of the opening when opened, such a search is not going to discover the trap – again no matter what the character's class or background as such a trap isn't visible from the outside. If you are feeling generous, you might have a Rogue make roll and if she makes it tell her player that while she doesn't see a trap, something still doesn't seem right about the chest.

If the character had said he was then poking the chest with a pole instead of rushing to open it, he might hear something strange if the chest had the above-mentioned dagger trap. Of course, unless he is a Rogue or has some strange background, chances are he would not associate the noise with a trap, but rather just that there was something loose in the chest. Again, you might give a Rogue a roll, especially an experienced Rogue.

As this example shows, it really isn't hard – unless you choose to make it hard. It's just different. After a few sessions both you and your players will find that it really isn't as hard as it looks.

Some players, however, really want die rolls. Because of previous bad experiences with poor GMs, they just can't trust the GM enough to handle some decisions being made without die rolls. If your players are like this, you can use "skill" rolls as a safety net. The players will still have to describe what their character does to solve the problem just as above. Once the player describes what his character is doing, the GM calls for a class/background based "skill" roll as described in the skills section of these rules. The results are determined by your opinion as GM of the action described and the skill roll. There are basically two situations:

In the first case, you feel that the player has a good plan that should likely succeed. Therefore it will succeed regardless of the result of the roll, but how well it succeeds is determined by the skill roll. A failed skill roll is a minimal success; the character succeeds, but just barely. A successful skill roll means the character's plan succeeds without any major hitches.

In the second case, either the player obviously knows less than his character does about the situation or just comes up with a bad idea that you feel is unlikely to work. You let the skill roll decide the result. A failed roll means the plan fails, while a successful roll means the plan somehow worked after all, but probably not perfectly.

Players who refuse to even try to come up with some type of rational statement about what their character is actually doing but just want to let the skill roll decide automatically fail.

Guidelines Not Rules

Finally, remember that these rules are a tool for the GM. If something herein does not work right in your campaign, change it. The object is to have fun, not be a slave to rules or to players who think being a rules-lawyer is the way to get ahead. In many

roleplaying games, the Rules As Written (RAW) are often considered sacrosanct or at least somehow better than those a GM can come up with himself. This is not true of Microlite74 so please change anything you do not like.

Old School Games and Retro-Clones

Microlite74 is designed to be an introduction to "old school" gaming for players more familiar with the 3.x version of the world's most popular fantasy roleplaying game. While I've tried to design Microlite74 for long running campaigns, if you find the "old school" style of play espoused by Microlite74 fun you may want to move to one of the original games or one of their retro-clones.

What is a retro-clone? The OGL has allowed fans to recreate the rules of older, out of print editions of the world's most popular fantasy roleplaying game. These are usually called "retro-clones" because they are "clones" of the rules to older ("retro") editions of the world's most popular fantasy roleplaying game. Most retro-clones have free PDF versions and most have nicely bound printed copies available for a very reasonable price. Retro-clones allow play of an older, out-of-print game system without the trouble and expense of tracking down a copy of an out-of-print game. While no retro-clone is an exact copy of an earlier game, they generally are close to identical in play.

Oe and Retro-Clones

Oe: The Original Game

<http://www.retroroleplaying.com/book/original-dd>

The original Oe booklets and supplements can be found at auction on eBay or RPG Marketplace or at specialists like Noble Knight Games, but they are generally very expensive collectibles. Some excellent third party Oe adventures (and an excellent campaign setting) from the late 1970s are also available in PDF format. These adventures could easily be used with Microlite74 or a Oe retro-clone – and converted for use with any other early edition/retro-clone with only a little effort.

Original Edition Characters (for Labyrinth Lord)

<http://www.goblinoidgames.com/labyrinthlord.html>

Original Edition Characters is a supplement for *Labyrinth Lord* (see the B/X and Retro-clones section below). It modifies the *Labyrinth Lord* rules to emulate the Oe game.

Microlite74

<http://www.retroroleplaying.com/content/microlite74>

Microlite74 is a restatement of Oe using a very light version of the 3.x rules (Microlite20) as a base. You are holding the Extended Version in your hands. *Microlite74 Basic* covers the original Oe boxed set. *Microlite74 Standard* covers the original Oe boxed set and supplements. *Microlite74 Extended* adds a number of house rules and other material the author was using in the late 1970s to overs the original Oe boxed set and supplements. *Microlite74 Companion* volumes add optional rules, detailed spell, monster, and treasure information, and other material which can generally be used with any version of Microlite74.

Swords & Wizardry

<http://www.swordsandwizardry.com/>

Swords & Wizardry is an OGL retro-clone of the Oe version from the mid-1970s, the same edition Microlite74 is loosely based on. *Sword & Wizardry* is handy for complex spell and monster descriptions for use with Microlite74 as well as a great game itself. The spell lists and monsters can be used as drop in replacements for those listed in Microlite74. There are three versions of this game. One uses just the material from the three LBB and the other two also use selected material from the Oe supplements.

B/X and Retro-Clones

B/X: The Original Game

<http://www.retroroleplaying.com/book/classical-dd>

The original B/X boxed sets and the revised version of this edition, the five box BECMi edition, can be found at auction on eBay or RPG Marketplace or at specialists like Noble Knight Games, as can a very large number of excellent adventure and campaign modules. Many of these modules could be used with

Microlite74 or other B/X retro-clones with little modification -- and converted for use with any other early edition/retro-clone with only a little more effort.

Basic Fantasy Role-Playing Game

<http://www.basicfantasy.org/>

The *Basic Fantasy Role-Playing Game* is loosely based on the so-called B/X edition of the world's most popular fantasy roleplaying game from the early 1980s. There are a number of minor tweaks like ascending armor class and separation of races and classes.

Dark Dungeons

<http://darkdungeonsblog.wordpress.com/>

Dark Dungeons is based on the single volume RC version of the BECMi edition from the early 1990s. The rules are fairly close to the original but some changes have been made, especially where setting specific material is concerned.

Labyrinth Lord

<http://www.goblinoidgames.com/labyrinthlord.html>

Labyrinth Lord is more closely based on the so-called B/X edition of the world's most popular fantasy roleplaying game from the early 1980s. While some minor changes have been made for compliance with the OGL and copyright law, many people have a hard time finding any truly major differences between *Labyrinth Lord* and the original.

B/X Companion

<http://bxbblackrazor.blogspot.com/2010/07/what-hell-is-bx-companion.html>

The *B/X Companion* is intended to be the mythical 3rd volume designed to complete the work begun with Tom Moldvay's Basic Rules and continued in the Dave Cook/Steve Marsh Expert Rules, both published in 1981. Both promised a "Companion" volume that would conclude the series. This is an attempt at producing the promised *B/X Companion*. (No free PDF version.)

Companion Expansion

<http://www.lulu.com/product/paperback/companion-expansion/6130494>

This is another attempt at producing the never published "third book" of the B/X version. "Presenting additional creatures and magical items for fantasy roleplaying games for basic- and expert-level players and gamemasters!"

1e and Retro-Clones

1e: The Original Game

<http://www.retroroleplaying.com/book/add-first-edition>

The original 1e rulebooks and adventures can be found at auction on eBay or RPG Marketplace or at specialists like Noble Knight Games – often at good prices if you do not need collectible condition. Also, some excellent third party 1e adventures are available in PDF format. 1e adventures and campaign settings could be converted for use with Microlite74 or any other early edition/retro-clone without much work.

Advanced Edition Companion (for Labyrinth Lord)

<http://www.goblinoidgames.com/labyrinthlord.html>

The *Advanced Edition Companion* is a supplement for *Labyrinth Lord* (see the B/X and Retro-clones section above). It modifies the *Labyrinth Lord* rules to emulate the 1e game – or at least those parts of it that most players actually used.

OSRIC

<http://www.knights-n-knaves.com/osric/>

OSRIC (Old School Reference & Index Compilation) is an OGL version of the first "advanced" edition of the world's most popular fantasy roleplaying game from the late 1970s and early 1980s. The first edition of *OSRIC* was designed to be just something that would allow publishers to legally publish OGL materials compatible with 1e. This attitude is also responsible for the boring name. The second edition of *OSRIC* is much more complete and is written with both players and publishers in mind.

2e and Retro-Clones

2e: The Original Game

<http://www.retroroleplaying.com/book/add-2nd-edition>

The original 2e rulebooks and adventures can be found at auction on eBay or RPG Marketplace or at specialists like Noble Knight Games – often at very good prices if you do not need collectible condition. Also, some excellent third party 2e adventures are available in PDF format. 2e adventures and campaign settings could be converted for use with Microlite74 or any other early edition/retro-clone without much work.

For Gold & Glory

http://feysquare.com/?page_id=3

For Glory & Glory is an attempt to create a close adaption of the 2e rules, or at least those in the three 2e core rulebooks.

Myth & Magic

http://www.newhavengames.com/?page_id=23

Myth & Magic is built from the core 2e rules. It retains the essence of classic fantasy role playing, while advancing the mechanics and providing more options, classes, spells, monsters, and more.

Other Fantasy Games

Adventurer Conqueror King System

<http://www.autarch.co/>

Adventurer Conqueror King takes the end game (ruling a domain) assuming in early editions of the world's most popular fantasy RPG and rebuilds the entire game around it, with special attention to a simple but functional economic system.

Adventures Dark and Deep

<http://www.adventuresdarkanddeep.com/>

This game is not a retro-clone, strictly speaking. Instead, it is an attempt to create an alternate universe version of 2e. 2e as it might have been if it had been written by the author of 0e and 1e.

Age of Shadows

<http://old.enworld.org/CrookedStaffProductions/page24.html>

A free old-school fantasy RPG based on the Openquest (D100 system) rules.

Barbarians of Lemuria

<http://www.1km1kt.net/rpg/barbarians-of-lemuria>

Non-traditional but still old school rules for fantasy games set on the lost continent of Lemuria -- loosely based on Lin Carter's novels. This is link to the free version. There is also a Legendary Edition from Beyond Belief Games.

The Big Brown Book

http://feysquare.com/?page_id=84

The Big Brown Book takes the rules of 0e and gives them a new spin — what would the world's most popular fantasy role playing game look like had it continued its wargame roots?

Castles & Crusades

<http://www.trolllord.com/cnc/index.html>

Castles & Crusades is 1e reimaged using 3e rules. It's fairly compatible with adventures from all editions of the world's most popular fantasy RPG through 3.5.

Dangers and Dweomers

<http://artikid.altervista.org/?id=Games&detail=Dangers%20and%20dweomers>

Dangers and Dweomers is the designer's personal take on early editions: "As much as possible I streamlined the S&W system, filling what I found as gaps with material from the BFRPG and the SRD."

Dark Passages

<http://www3.telus.net/public/uncouths/Passages.pdf>

Dark Passages is a modernized and re-organized take on the 0e/1e era of rules.

Dragons at Dawn

<http://stores.lulu.com/boggswood>

This game is an attempt to recreate the rules of the original Blackmoor campaign from the early 1970s. "Dragons at Dawn" is a retro tribute to the very first fantasy gaming system pioneered

by Dave Arneson, the man who later went on to co-author the world's most popular roleplaying game. The result of years of careful historical research, *Dragons at Dawn* is entirely consistent with Arneson's original, largely forgotten methods of play developed roughly in the period 1970-1973." (No Free PDF version.)

Epées & Sorcellerie

<http://www.lulu.com/product/file-download/ep%C3%A9es-sorcellerie-%28english-translation%29/16178887>

Epées & Sorcellerie is a French RPG strongly inspired by 0e. An English translation is available.

Errant

<http://errantgame.blogspot.com/p/errant-rpg.html>

Errant RPG is a retro-clone that captures the basic play style of the classic game while introducing a variety of modern innovations to improve play.

Fire & Sword

<http://basicroleplaying.com/downloads.php?do=cat&id=12>

Fire & Sword was created by Raymond Turney, a co-creator of *RuneQuest*, and *Fire and Sword* is his evolution of the system. It thus has much in common with *BRP*, but contains many new interesting mechanisms.

Forward to Adventure!

<http://www.flyingmice.com/FTA.html>

This game is not a retro-clone, but a modern game that was designed with "old school" dungeon adventuring in mind. While not an "old school" game by any stretch of the imagination, it would be relatively easy to use FtA! to run a campaign in the old-school style. Unlike most modern RPG designs, there is little designed into FtA! that would interfere with this which makes it a system those who like the "old school" style of play but dislike the "old school" style of rules might wish to consider. (No free PDF version.)

Lamentations of the Flame Princess

<http://lotfp.blogspot.com/>

Lamentations of the Flame Princess is a 0e-like rules system with a stress on "weird fantasy." (Free PDF version of the "Grindhouse" rules available.)

Legends of the Ancient World

<http://www.darkcitygames.com/display.php?series=law>

Legends of the Ancient World is a rules-light clone of Megagaming's *The Fantasy Trip* -- complete in seven pages. The game is a free PDF, but the publisher sells solitaire adventures for it similar to the ones Megagaming produced for TFT.

Mazes & Minotaurs

<http://mazesandminotaurs.free.fr/>

Mazes & Minotaurs answers the question of what might 0e and 1e look like if their designers had been interested in classical Greek fantasy rather than medieval fantasy. There are two versions of the game available: Original and Revised.

Old School Hack

<http://www.oldschoolhack.net/>

Sort of the old Red Box version reimaged through a somewhat new school lens. It's not really an old school game but it not really not an old school game either.

Pars Fortuna

<http://matt-landofnod.blogspot.com/p/pars-fortuna.html>

What if you took the *Swords and Wizardry* rules and threw out all the standard races, classes, spells, monsters and magic items and replace them with ones generated randomly via sites like Chaotic Shiny, Seventh Sanctum or Abulafia? You get *Pars Fortuna*. (No free PDF version, although a free basic version is available.)

Siege Perilous

<http://oldguyrpg.blogspot.com/2009/09/siege-perilous-ultima-rpg-playtest.html>

Siege Perilous is a 0e variant designed to emulate the first three games of a very popular computer roleplaying game from the

early 1980s.

Spellcraft & Swordplay

<http://stores.lulu.com/elflairgames>

Spellcraft & Swordplay is an OGL redesign of the 0e version from the mid-1970s. The designer decided to rewrite 0e based on the original combat system (from the miniatures rules 0e grew out of) instead of 0e's "alternative combat system." The alternative combat system quickly became the standard combat system of the world's most popular fantasy roleplaying game. This is sort of a retroclone from an alternate universe where the original combat system was the most-used. (No free PDF version, although a free basic version PDF is available.)

Tombs & Terrors

<http://beyondbeliefgames.files.wordpress.com/2010/12/cq-tt1.pdf>

Tombs & Terrors is an unashamedly familiar role playing game of delving into subterranean crypts and looting the treasure -- compatible with sourcebooks and supplements that you already have.

ZeFRS

<http://www.midcoast.com/~ricekrwc/zeprs/>

David "Zeb" Cook's 1985 rules for the TSR Conan roleplaying game returns as a generic sword-and-sorcery RPG complete in one volume. Trample the jeweled kingdoms of your own world beneath your sandals!

Other Games

Mutant Future

<http://www.goblinoidgames.com/mutantfuture.html>

Mutant Future is a nuclear post-apocalyptic science fantasy game. It is created in the style of similar RPGs from the late 70s, but built around the core *Labyrinth Lord* rules so that these two games are fully compatible.

Stars Without Number

http://rpg.drivethrustuff.com/product_info.php?products_id=86467

Stars Without Number is a retro science fiction role playing game influenced by the Old School Renaissance and partially inspired by the great fantasy role-playing game editions written by Tom Moldvay and Frank Mentzer.

Weird West

http://rpg.drivethrustuff.com/product_info.php?products_id=91122&affiliate_id=163285

Weird West is a fast playing adventure roleplaying game with a very small set of rules for weird western worlds of cowboys, kung-fu, magic and otherworldly malevolence.

Adventures and Settings

There are a large number of adventures and campaign settings available for TSR editions of the world's most popular fantasy RPG. Playing copies of most of original adventures from TSR can be found on eBay for very low prices. TSR era adventures can be used with any pre-WOTC edition or retroclone with only very minor conversion.

There are also a large number of free and low cost adventures available in PDF format on the web. A good place to start looking for free adventures is on the Dragonsfoot forum web site (see the link under Old School Internet Resources below).

The best settings and adventures, however, are those you create yourself for your campaign. They don't need to be nearly as fancy as those produced for use by others, let alone as fancy as those written for professional publication. Many 0e GM adventure location keys (including those of the game's original designers) were nothing but room/location numbers with something like "8 hobgoblins, leader has 20gp, trapdoor in floor hides skeleton with silver dagger (animates if dagger touched)" or "Small village, 27 families, 10 orc slaves, Headman: Mongar the Brown (Ftr 4th lvl, +1 sword) Mongar's wife, Rose is a 3rd lvl Cleric of Odin)." You can do that.

Microlite20 Notes

Microlite20 is a trimmed down sub-miniature version of the OGL 3.5 SRD. In its most basic form, Microlite20 has only two pages of rules but can be used with most fantasy OGL and d20 adventures and supplements with little or no conversion. Since M20 was published in 2006, many people who prefer rules-lite games have been using it for their d20 games and/or writing expansions, supplements and other material especially for M20. You can find out more about the original Microlite20 and find more variants like Microlite74 on the Microlite20 web site: <http://microlite20.net/>

Retroroleplaying Web Site

The author of Microlite74 maintains a web site devoted to out of print and out of style tabletop roleplaying games. He is always willing to discuss and answer questions about Microlite74 in the Microlite74 board on the Retroroleplaying forum.

Web Site: <http://www.retroroleplaying.com/>

Forum: <http://www.retroroleplaying.com/forum/>

Blog: <http://blog.retroroleplaying.com/>

Old School Internet Resources

Old-School Blogs

There are a lot of old-school blogs. Even a selection of just the ones I currently read regularly would fill up a page or two and would likely be out of date quickly. Fortunately, there is a great place to find old school RPG blogs -- the RPG Blog Network, check the Legacy D&D category: <http://www.rpgbloggers.com/>

Major Old-School Forums

Dragonsfoot

Very large forum discussing 1e and earlier, related games like retro-clones, Hackmaster, and Castles & Crusades. Many people who worked for TSR in the early days post here. Many free downloads including Footprints magazine and adventures. <http://www.dragonsfoot.org/>

Knights & Knaves Alehouse

Discussions of 0e and 1e.

<http://knights-n-knaves.com/phpbb/>

Original D&D Discussion

Mainly discussions of 0e. Home of Fight On! Magazine.

<http://odd74.proboards76.com/>

The Piazza: Old D&D Campaign Worlds

Discussions of old published campaign worlds including many no longer officially supported.

<http://www.thepiazza.org.uk/bb/index.php>

Old School Product

A number of publishers are producing new material for old school games (using the OGL and retro-clones for compatibility). Many of these products are available through Lulu's Old School Renaissance group. Some downloadable products are free. <http://stores.lulu.com/oldschoolren>

Special Thanks to Microlite75 Sponsors

Microlite74 Extended was originally published as *Microlite75*. The author would like to thank the following individuals and groups who sponsored the production of *Microlite75* by making donations to the RetroRoleplaying Cancer Fund to help pay the huge cancer bills treating my wife's Stage 3 Oral Cancer without insurance ran up.

Bronze Sponsors

Kristian Collins, Kevin Donovan, Robert Fisher, John Gaunt, Dennis Kadera, Michael McMenamin, Shane Morales, Ronald Pehr, The Reliquary, Martin Thomas, Richard Tongue

Silver Sponsors

Matthew Cooper, Marcelo Paschoalin, Scott Sandy

Gold Sponsors

Harry Duncan, www.miniaturewargaming.com

Platinum Sponsors

Sebastian Dietz, [North Texas RPG Con](#), Jim Madale

Diamond Sponsors

Catherine Belaire, Ben Sugermann

And additional sponsors who wish to remain anonymous

Microlite74 Trademark License

You may use the Microlite74 trademarks in your own OGL products without obtaining prior permission from the trademark owner in two cases:

- 1) Adventures, campaign settings, and other supplements either designed specifically for Microlite74 or that are written for another Oe, B/X (BECMI) or 1e rules set may be labeled "Suitable for use with Microlite74" (or suitable for use with specific versions: Basic, Standard, and/or Extended).
- 2) Microlite74 may be mentioned by name in documents (or sections of a larger product) written to provide information on converting adventures and other materials between one game system and another.

In no case may the Microlite74 trademarks be used in any manner than indicates a product is endorsed or otherwise approved by the author of Microlite74. The terms "Microlite74 Companion" and "Microlite74 Supplement" may not be used in the title of a product without permission in writing.

All other uses of the "Microlite74" trademarks in products requires permission in writing from the trademark owner. This permission will generally be given, so don't be afraid to ask.

Microlite74 Extended
Version 3.0 (October 1, 2011)

Copyright © 2008, 2010, 2011 Randall S. Stukey

Microlite74 is dedicated to the memory of those who gave us the first roleplaying games and campaigns:

This product is 100% Open Game Content except for Product Identity, as per the Open Game License above. Product Identity includes Microlite74, Microlite74 Basic, Microlite74 Standard, Microlite74 Extended, Microlite74 Companion, Microlite74 Supplement, and Randall S. Stukey and all pictures and illustrations.

Microlite74 Extended

Microlite74 games are trimmed-down miniature versions of the Primary Fantasy SRD rules designed to be quick and easy to play, especially when compared to modern incarnations of the game. The goal of *Microlite74* games is to recreate the style and feel of that very first ("0e") fantasy roleplaying game published back in 1974 without giving up all of the clearer mechanics of modern D20-based versions.

The *Microlite74 Extended* rules are based on the 1974 0e edition of the world's most popular fantasy roleplaying game with its supplements and material from 0e magazine articles, some 0e third party material, some of the house rules the author used in the 1970s, and selected ideas from other roleplaying games. These rules are not intended to be a clone of the 0e rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules.

This book contains the complete rules for *Microlite74 Extended*. This book includes:

- Simple Character Creation Rules: Roll 4 attributes and select a race, class, background, and alignment.
- Standard Classes: Fighter, Ranger, Paladin, Monk, Magic-User, Illusionist, Cleric, Druid, and Thief
- Simple and fast-playing combat system that tracks physical damage (aka body points) separately from luck/skill/fatigue (aka hit point) damage.
- Hit points recover with a night's rest. Spells cost hit points to cast. Actual wounds recover more slowly.
- Rules for hirelings, monster reactions (not every monster wants to fight), morale (not every monster fights to the death), and more.
- A complete list of spells and monsters.
- Compatible with most other 0e based games and adventures.

Other versions include *Microlite74 Basic* and *Microlite74 Standard*. *Microlite74 Basic* rules are complete but basic: There are only three classes (Fighter, Magic-User, and Cleric). Spells are limited and levels top out at 12 to 14. *Microlite74 Standard* includes many more classes and spells – all over those included in the original edition and its supplements. *Microlite74 Companion* volumes add even more options.

Microlite78

First Edition Lite

Version 1.0 Silver (Condensed Type Edition)

OGL20 Guidelines for Tabletop Fantasy Roleplaying Campaigns with Old School (1e) Flair

Special Thanks to Our Sponsors

The author would like to thank the following individuals who sponsored the production of *Microlite78* and *Microlite81* by making donations to the RetroRoleplaying Cancer Fund to help pay the huge cancer bills treating my wife's Stage 3 Oral Cancer without insurance ran up.

Bronze Donors: Kenneth Bailey, Rob Baseel, Isaac Boekelheide, Jason Decker, Pascal Furlan, Nathan Harwell, Sean McKeon, Sandra Misse, Alex Muscar, Thomas Simmons

Copper Donors: August Beirmont, Stacey Conover, Silas Crowe, Dennis Davis, Chris Harvey, Tom Hayes, Michael Julius, J.E. Leems, Tom Lewis, Juan Lopez, Marianne Marlow, Brian Marstella, Chad Nal, Joseph Nelson, Keith Nelson, Brennan O'Brien, Peter Reynolds, Bertel Robbins, Ed Roberts, Brett Slocum, Harold Smith, Scott Sutherland, George Taylor, Lisann Towwer, Don Turner, Harald Wagener

Silver Donors: Gabriel Barrenechea, Chris Brandon, Timothy Brannan, Alistair Caunt, Marion Hill, John Lockard, Oliver Korpilla, John Lee, Olivier Lefebvre, Allan MacKenzie, Jonathan Mayo, Lloyd Rasmussen, John Seabury

Gold Donors: Penelope Anders, Sebastian Dietz, Brian Isikoff, Helen Perez, Nelson Singer, Steven Wales

Electrum Donors: Robert Gibson, Ralph Williams

Platinum Donors: Bill Morrison

And thirty-five additional donors who wish to remain anonymous.

Microlite78 First Edition Lite

Version 1.0 Silver (March 10, 2015)

Copyright © 2015 Randall S Stukey

All art is in the public domain.

Microlite78, like its parent game, *Microlite20*, is a trimmed-down, sub-miniature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal of *Microlite78*, however, is to recreate the style and feel of that first edition advanced ("1e") fantasy roleplaying game published back in 1978.

The *Microlite78 First Edition Lite* rules are based on first three hardback rulebooks published for the 1978 first/advanced edition, , material from the publisher's official magazine and third party products of the time and the author's house rules from the late 1970s. The rules are not intended to be a clone of the 1e rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules. *Microlite78 First Edition Lite* is based on the third edition of the original *Microlite74 Extended* rules.

These rules assume a basic familiarity with tabletop role-playing games in general and with the basic principles of "D20" based rules. If you are completely new to tabletop role-playing games, you will want to start by playing with someone who is familiar with how they work.

Characters

Creating a character requires rolling Stats, selecting a Race, Class, Alignment, and Background. Certain classes may require addition selections (spells for spell casters), for example. Characters normally begin at Level 1 (unless directed otherwise by the GM).

Stats

There are 4 stats: Strength (STR), Dexterity (DEX), Mind (MIND), and Charisma (CHA).

Roll 4d6 and drop the lowest die. Total the remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/3, round toward zero.

Races

Humans get +1 to any 2 stats. Experience base modifier of +0. *Special Abilities*: none

Dwarves get +2 to STR. Experience base modifier of +250/+2500.

Special Abilities: +4 to any save vs. a magical effect; note slanting passages, traps, shifting walls and new construction in underground settings (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of dwarves, gnomes, kobolds and goblins; can see in darkness half as well as in light.

Elves get +2 to MIND. Experience base modifier of +400/+4000.

Special Abilities: Can use elf-made magic armor and magic weapons even as a magic-user/illusionist; +2 to hit and damage goblinoid monsters; note secret/hidden doors (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of elves, orcs, hobgoblins, and gnolls.

Gnomes get +1 to STR and DEX. Experience base modifier of +200/+2000.

Special Abilities: +4 to any save vs. poison; note slanting passages, unsafe walls, ceilings, or floors in underground settings (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of dwarves, gnomes, kobolds and goblins; can see in darkness half as well as in light.

Half-Elves get +2 to CHA. Experience base modifier of +250/+2500.

Special Abilities: Can use elf-made magic armor and magic weapons even as a magic-user/illusionist; note secret/hidden doors (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of elves, orcs, hobgoblins, and gnolls.

Half-Orcs get +2 to STR and DEX and get -2 to CHA.

Experience base modifier of +200/+2000.

Special Abilities: +1 to hit with light or medium weapons; thick hide gives +1 to armor; speak languages of orcs, goblins, hobgoblins, and gnolls.

Halfings get +2 to DEX. Experience base modifier of +150/+1500.

Special Abilities: +4 to any save vs. a magical effect; +2 to hit and damage with slings and light bows; can blend in background (d20 + DEX Bonus; DC 12 if outdoors, DC 16 if indoors – this is an extraordinary ability above and beyond simply hiding in available cover which anyone can try to do).

Classes

Basic Classes: The Fighter, Magic-User, Cleric and Thief classes are available to all characters (not otherwise limited by race) with no minimum stat or other qualifications.

Additional Classes: The Assassin, Druid, Illusionist, Paladin, and Ranger classes are less common classes and have special stat and other requirements that characters must meet before the class can be selected.

Abbreviations: PCB –Physical Combat Bonus; MCB – Magical Combat Bonus; FB – Fighter Bonus; Mem – Memory Slots; XP – Minimum Experience Points Required (to reach level); HP – Hit Points.

Fighters are soldiers, champions, and other warriors who are exclusively trained in the arts of combat and war. They are specialists in dealing damage with weapons and in the other arts of physical combat. They are trained to lead others in battle. Prime Requisite: STR. Special Requirements: none.

Weapons and Armor: Fighters may use any kind of armor or weapon and may use shields.

Battlefield Prowess: At 5th level, a fighter inspires those under his command. Any hirelings or mercenaries hired by the fighter have a +1 bonus to their morale when personally led by the fighter.

Stronghold: At level 9 a fighter may become a great leader of men, taking control of a parcel of land and a leadership rank in his society. A fighter will, assuming money is at hand, build a castle. He may ultimately control several villages and towns, but must be a good, strong leader and provide protection.

Experience Base: 2000/120000.

Fighter Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d10	+0/+0	+1	0	14	0
2	2d10	+0/+0	+1	0	13	2000
3	3d10	+1/+0	+1	0	12	4000
4	4d10	+2/+1	+2	0	11	8000
5	5d10	+3/+1	+2	0	10	16000
6	6d10	+4/+1	+2	0	9	32000
7	7d10	+5/+1	+3	0	8	65000
8	8d10	+5/+2	+3	0	7	130000
9	9d10	+6/+2	+3	0	7	250000
10	9d10+2	+7/+2	+4	0	6	370000
11	9d10+4	+7/+3	+4	0	6	490000
12	9d10+6	+8/+3	+4	0	5	610000
13	9d10+8	+8/+4	+5	0	5	730000
14	9d10+10	+8/+4	+5	0	4	850000
15	9d10+12	+9/+4	+5	0	4	970000
16	9d10+14	+9/+5	+6	0	3	1210000
17	9d10+16	+9/+5	+6	0	3	1330000
18	9d10+18	+10/+5	+6	0	2	1450000
19	9d10+20	+10/+5	+7	0	2	1570000
20	9d10+22	+10/+5	+7	0	2	1690000

Magic-Users (sometimes called wizards, sorcerers, or magicians) study arcane secrets and cast spells. While early in their career magic-users have only limited power, experienced magic-users are able to cast a great number of powerful spells. Prime Requisite: MIND. Special Requirements: none.

Weapons and Armor: Magic-Users wear no armor and can only use daggers, slings, or staves as weapons.

Class Abilities: Magic-Users can cast arcane (magic-user) spells.

Magical Research: At 5th level, a magic-user is able to research spells, scribe scrolls, and brew potions. When a magic-user reaches the 9th level, he is able to create magic items.

Stronghold: A magic-user may build a stronghold, often a great tower, when he reaches level 11. He will then attract magic-user apprentices (1d6), who will range from level 1-3.

Experience Base: 2500/150000.

Magic-User Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d4	+0/+0	+0	1	16	0
2	2d4	+0/+0	+0	2	15	2500
3	3d4	+0/+1	+0	3	14	5000
4	4d4	+1/+2	+0	4	13	10000
5	5d4	+1/+3	+0	5	11	20000
6	6d4	+1/+4	+0	6	10	40000
7	7d4	+1/+5	+0	7	9	80000
8	8d4	+2/+5	+0	8	8	120000
9	9d4	+2/+6	+0	9	8	270000
10	10d4	+2/+7	+0	10	8	420000
11	11d4	+3/+7	+0	12	7	570000
12	11d4+1	+3/+8	+0	14	7	720000
13	11d4+2	+4/+8	+0	17	7	870000
14	11d4+3	+4/+8	+0	20	6	1020000
15	11d4+4	+4/+9	+0	23	6	1170000
16	11d4+5	+5/+9	+0	26	6	1320000
17	11d4+6	+5/+9	+0	29	5	1470000
18	11d4+7	+5/+10	+0	32	5	1620000
19	11d4+8	+5/+10	+0	35	5	1770000
20	11d4+9	+5/+10	+0	38	5	1920000

Clerics have pledged their lives to serve a specific deity (or pantheon). While clerics are a form of priest, they seldom serve a priest at a temple; instead they are warrior-priests serving as an arm of their deity in the world. Prime Requisite: CHR. Requirements: none.

Weapons and Armor: Clerics can wear any type of armor and use shields. They can use any weapon except edged weapons.

Class Abilities: Clerics can cast divine magic.

Magical Research: At 5th level, a cleric is able to research divine spells and scribe divine scrolls. When a cleric reaches the 9th level, he is able to create magic items usable by clerics.

Turn Undead: A Cleric can Turn Undead with a successful Magic Attack. DC is 10 + twice the Hit Dice of the undead. One undead flees per point over the roll needed. This can be used (2 + Level + MIND bonus) times per day.

Stronghold: Once attaining 9th level, a cleric may establish or build a stronghold. So long as the cleric is currently in favor with his god, he may buy or build a keep at half the normal price due to divine intervention. Once a stronghold is established, the cleric's reputation will spread and he will attract 1st and 2nd level followers of the fighter class (numbering 5d6 x10). They are completely loyal (never checking morale). The GM chooses which proportions of followers are bowman, infantry, etc.

Experience Base: 1500/100000.

Cleric Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d8	+0/+0	+0	0	15	0
2	2d8	+0/+0	+0	1	14	1500

18	9d8+9	+6/+6	+0	24	4	1100000
19	9d8+10	+7/+7	+0	27	4	1200000
20	9d8+11	+7/+7	+0	30	4	1300000

Thieves are sneaks and trouble-shooters who specialize at infiltration and obtaining items from others through nefarious means. Prime Requisite: DEX. Special Requirements: Alignment cannot be Law.

Weapons and Armor: Thieves can wear light armor, use shields, and use any light or medium weapon.

Class Abilities: Thieves are specialists at urban survival as well as at picking pockets, hiding in cover, sneaking silently, opening locks, removing traps, climbing walls, and other tasks associated with theft. Thieves may also attempt to climb sheer surfaces and hide in shadows with a successful secondary skill roll. Thieves also have special training in listening at doors and detecting traps and secret/hidden doors, see the section on Adventuring for the details.

Backstab: If a thief successfully sneaks up on a foe, they can Backstab which adds +4 to the attack roll and does more damage if successful (Levels 1-4, x2 damage; Levels 5-8, x3 damage; Levels 9-12, x4 damage; Level 13+, x5 damage).

Read Languages: At 4th Level, a thief gains the ability to read languages (including ciphers, treasure maps, and dead languages, but not magical writings) on a roll of 1-4 on a d6. On failure, the thief cannot attempt to read that document again until he gains a new level.

Read Arcane Scrolls: At 10th level, a thief can read and cast magic from arcane scrolls on a roll of 3 or higher on a D20 with the spell level subtracted from the roll. Failure means the spell does not function as expected (with humorous or negative effects up to the GM).

Stronghold: When a thief attains level 9 he can establish a thief den, and 2d6 thief apprentices of 1st level will come to work with the character. These thieves will serve the character with some reliability; however, should any become arrested or killed the character will not be able to attract more followers of this type to replace them. A successful character might use these followers to start a Thieves' Guild.

Experience Base: 1250/100000.

Thief Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d6	+0/+0	+0	0	15	0

19	10d6+20	+6/+5	+0	0	3	1180000
20	10d6+22	+6/+5	+0	0	3	1280000

Sub-Classes

Assassins are trained to kill by ambush and treachery. Like fighters they are specialists in dealing damage with weapons but they are not trained in battlefield combat. Prime Requisite: DEX. Requirements: STR 12+, DEX 12+, MIND 12+

Weapons and Armor: Assassins may use any kind of armor or weapon but may not use shields. Wearing medium or heavy armor prevents the use of some special abilities.

Class Abilities: Assassins are specialists at disguise, hiding in cover and sneaking silently (and may also attempt to hide in shadows with a successful secondary skill roll), provided they are not wearing medium or heavy armor. Assassins also have the same special training in listening at doors and detecting traps and secret/hidden doors as thieves, see the section on Adventuring for the details.

Backstab: If an assassin successfully sneaks up on a foe, they can Backstab which adds +4 to the attack roll and does more damage if successful (Levels 1-4, x2 damage; Levels 5-8, x3 damage; Levels 9-12, x4 damage; Level 13+, x5 damage). An assassin wearing medium or heavy armor cannot backstab,

Assassination: Assassins may attempt to kill a target instantly. The assassin must attempt and succeed in a backstab and achieve surprise on his opponent. The base chance of success is 50% against a victim of equal level or monster HD to the assassin. This probability is raised or lowered by 5% for each level or HD the target is above or below the assassin. For example, if a 5th level assassin attempts to assassinate a 7th level character, the probability of success goes down to 40%. If

that same 5th level assassin attempts to assassinate a 3 HD monster, the probability goes up to 60%.

Stronghold: At level 9 an assassin may build a hideout and 2d6 assassin apprentices of 1st level will come to work with the character. These assassins will serve the character with some reliability; however, should any become arrested or killed the character will not be able to attract more followers of this type to replace them. A successful character might use these followers to start an Assassins Guild.

Experience Base: 1700/120000.

Assassin Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP

20	9d6+22	+6/+5	+3	0	5	1550000

Druids have pledged their lives to serve a Nature (and its deity the Earth Mother). Prime Requisite: CHR. Requirements: MIND 12+, CHA 15+.

Weapons and Armor: Druids can wear any type of armor made of natural, non-metal material. They can use wooden or leather shields. They can only use clubs, daggers, slings, sickles, and staves as weapons.

Class Abilities: Druids can cast divine (druid) magic. They save at +2 vs fire and lightning. They have a +1 chance of surprise in the wilderness. They gain +2 to all reaction rolls when encountering normal animals, and can take animals as henchmen. They are good at wilderness survival.

One with the Wilderness: At 3rd level, a druid can go to ground, disappearing into woods and underbrush with a proficiency throw of 3+ on 1d20. At 4th level, a druid may speak with animals at will and they acquire immunity to the powers of woodland fey.

Magical Research: At 5th level, a druid is able to research divine (druid) spells and create fetishes (one use items equivalent to divine scrolls). When a cleric reaches the 9th level, he is able to create magic items usable by druids.

Shapeshift: At 7th level, a druid may shape shift to a small/medium animal up to 3 times per day (once every eight hours). When shape shifting back to their original form, a Druid can heal 2 HP per level of damage.

Stronghold: Once attaining 9th level, a druid may establish a grove in a true wilderness area. Once a grove is established, all ordinary animals within 5 miles will become friendly and helpful to the druid. The druid will then attract 1d6 apprentices of 1st-3rd level plus 2d6 normal men and women seeking to become druids. Their wisdom scores will be above average, but many will become discouraged from the rigorous mental training and quit after 1d6 months, if failing a throw of 14+ modified by their Wisdom modifier. Those who succeed become 1st level druids. Each year the druid tends to the grove, he will attract an additional 1d6 normal men, until she has a maximum of 6 apprentices of any level, and 12 normal men, studying at any time.

Experience Base: 2000/120000.

Druid Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP

Illusionists are specialized mages whose spells usually deceive and manipulate the senses and the mind. Their more powerful spells use a combination of illusory components and proto-matter drawn from the plane of shadows. These potent spells produce pseudo- and quasi-real effects that may actually harm an opponent. Prime Requisite: MIND. Requirements: MIND 15+. Special: except where specified in this section, treat illusionists as magic-users.

Weapons and Armor: Illusionists wear no armor and can only use daggers, slings, or staves as weapons.

Class Abilities: Illusionists can cast illusion (arcane) spells and have the Arcane Blast, Arcane Dueling, and Minor Magic special abilities.

Magical Research: When an illusionist reaches 5th level, he is able to research spells, scribe magical scrolls, and brew potions. When an illusionist reaches 9th level, he is able to create more powerful magic items such as weapons, rings, and staves. At 11th level, an illusionist may learn and cast ritual illusion (arcane) spells of great power (7th level and higher), craft magical constructs, and create magical cross-breeds. If chaotic, at 11th level the illusionist may create necromantic servants and become undead.

Stronghold: An Illusionist may build a stronghold, often a great tower, when he reaches level 11. He will then attract illusionist apprentices (1d6), who will range from level 1-3.

Experience Base: 2500/150000.

Illusionist Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d4	+0/+0	+0	1	16	0
2	2d4	+0/+0	+0	2	15	2500

19	11d4+8	+5/+10	+0	35	5	1770000
20	11d4+9	+5/+10	+0	38	5	1920000

Paladins are champions of Law who crusade against those who seek to extinguish the light of civilization. Wherever the forces of Chaos marshal to threaten man, paladins can be found, battling back the darkness with courage and steel. Prime Requisite: CHA. Requirements: STR 12+, MIND 11+, CHA 17+, alignment must be Law.

Weapons and Armor: Paladins may any type of armor and may use shields. They may use all medium and heavy weapons.

Class Abilities: Aura of Protection (+1 to AC and saving throws against attacks made or created by those aligned with for created by Chaos); immune to disease (including magical diseases); Detect Evil (can detect evil or chaos, 60 foot range, requires 10 minutes prayer and concentration); Lay on Hands (may heal by touching target and praying for 5 minutes; may heal up to his level in Body Points per day total, may heal diseases (costs 2 BP of healing per disease, 3 BP of healing for magical diseases).

Holy Fervor: At 5th level, a paladin inspires those under his command. Any hirelings or mercenaries of the same religion as the paladin have a +1 bonus to their morale when personally led by the paladin.

Alignment: All paladins must be of Lawful alignment. A paladin who changes to Neutral or Chaotic alignment loses his class abilities and powers. If he later reverts to Lawful alignment and atones for any misdeeds (possibly through a quest spell) he can regain his lost class abilities and powers.

Stronghold: At level 9 a paladin may build a fortress in the borderlands or wilderness. 1d4+1 x 10 reliable mercenaries will apply for jobs and 1d6 low level paladins will apply for training. The fortress will attract settlers over time and they will look to the paladin for leadership.

Experience Base: 2000/120000.

Paladin Advancement Table

20	9d8+22	+9/+4	+5	0	3	1690000

Rangers are scouts and trackers, adept at both woodcraft and archery. Few adventuring parties would dare the wilderness without an experienced ranger to guide them. Prime Requisite: STR. Requirements: MIND 12+, CON 15+.

Weapons and Armor: Rangers may use light or medium armor and may use shields. They may use all missile and light weapons.

Class Abilities: +1 bonus to initiative and surprise rolls; can blend in background (d20 + DEX Bonus; DC 8 if outdoors/wilderness, DC 16 if indoors/urban -- this is an extraordinary ability above and beyond simply hiding in available cover which anyone can try to do); can move silently and tracklessly in the wilderness (d20 + DEX Bonus; DC ranges

from 8 to 20 depending on terrain); +1 to lost rolls if outdoors (applies to any party a ranger is guiding); +1 to Chance of Encounter rolls outdoors (+2 if alone); +2 to Fighter Bonus with missile weapons; tracking and trailing in the wilderness.

Wilderness Prowess: At 5th level, a ranger inspires those under his command. Any hirelings or mercenaries hired by the fighter have a +1 bonus to their morale when personally led by the ranger in the wilderness.

Stronghold: At level 9, a ranger may build a border fort in the borderlands or wilderness. 1d4+1 * 10 reliable mercenaries will apply for jobs and 1d3 low level rangers will apply for training. The fortress will attract settlers over time and they will look to the ranger for leadership.

Experience Base: 2000/120000.

20	9d8+22	+9/+4	+4	0	3	1690000

Other Character Information

The following other information is available:

Determining Hit Points: Each class has an HP column on their Class Advancement Table. XdY means roll X dice of type Y and add the character's Strength bonus to each die rolled. The minimum roll (after adding the Strength stat bonus) is 1. After level nine, a few hit points (1, 2, or v3 are added at each level. Strength stat bonuses are not added for levels greater than 9.

For example, a first level fighter has a Strength of 15 for a STR stat bonus of +1. At first level, the player rolls 1d8 and adds +1 to determine his maximum hit points. At second level, the player would roll another 1d8+1 and add the result to his first level hit point maximum to get the character's second level hit points.

Max at First Level (Optional): Instead of rolling a die for first level characters, assume the die roll was the highest possible roll for the type of die. *This option is strongly recommended.*

Reroll All Dice at Every Level (Optional): Instead of just rolling a single die at every level and adding the result to the character's previous hit points, reroll all the dice every time the character gains a new level, using the higher of the new roll or the previous hit point total +1.

Weapons and Armor Limitations: As noted, many classes are limited in what weapons and armor they can utilize. Regardless of such class limitations, characters of any class may purchase, carry, and use any weapons or armor desired. However, characters who equip themselves with weapons and armor unusable by their class will fight as 0th level characters while so equipped. They also will receive no bonus on their attack rolls or armor class from ability scores or equipment, may not use any of their class powers, and do not gain XP.

Determining Experience Points Required to Advance: The XP column of each class table lists the minimum XP a character needs to reach a given level in a class for standard characters. This table will need to be recalculated from the Experience Base numbers of the class if any optional rules that modify the experience base are used for a character.

Experience Base: Two numbers are listed for each class, for example, the Fighter's Experience Base is 2000/12000. The first number (2000 in the example) is the Low Level Base and the second number (12000 in the example) is the High Level Adder. Optional rules may have Experience Base modifiers. Again these are listed with two numbers (example: +100/+2500), if a character possesses the optional ability, the first number (+100 in the example) is added to the Low Level Base for the character's class and the second number is added to the High Level Adder for the character's class. If a Fighter had the one optional ability from this example, his final Experience Base would be: 2100/122500.

Calculating Experience Points per Level: To calculate a character's custom XP advancement schedule, start with the Low Level Base number from the character's final Experience Base (including his class base plus all modifiers from optional rules). That is the experience point total required to advance to 2nd level. The experience required to advance doubles each level thereafter until 8th level reached. Exception: Round the experience point requirement for 7th level to the nearest 5000.

After 8th level, the amount of experience points required to advance no longer doubles. Instead of doubling, it increases by a flat amount each level: the High Level Adder from the character's final Experience Base.

The standard XP advancement charts listed for each class were calculated by this method and should serve as examples of this calculation.

Class Special Abilities

Some classes have special abilities which cannot easily be explained in a sentence. These named special abilities are described in this section.

Fighting Classes Special Abilities: All Fighters, Paladins, and Rangers (referred to collectively as "fighters" in the special ability descriptions in this section) have the following special ability:

Cleave - After a Fighter kills an opponent, he may immediately make another attack against any still-standing foe within 5 feet. The maximum number of attacks he can make in one round is equal to his level.

Fighters may select one special ability from the following list at levels 3, 6, 9, 12, 15 and 18. Paladins and Rangers may select one special ability from the following list at levels 6, 12, and 18. Each special ability may only be selected once. Paladins may not select Berserker Rage.

Accuracy - A Fighter with this special ability rolls one die size larger for damage (1d6 instead of 1d4, 1d8 instead of 1d6, etc.) with thrown or missile weapons.

Berserker Rage - A Fighter with this special ability may go into a berserker rage when in combat. During a berserker rage, the Fighter always attacks the nearest foe (determine randomly if multiple foes in range). His ferocity adds his level to his attack roll and his damage. To break off combat (before all foes are dead) the berserk Fighter must make a MIND save versus a DC of 10 (plus 2 for every opponent still standing) in order to break off from fighting. Each round the Fighter is berserker costs him 2 hp, subtracted immediately after the berserker rage ends. A berserk Fighter cannot use any combat stunts nor the Find Weakness or Leadership special abilities.

Blind-fighting - A fighter with this ability may attack while blind or in conditions of total darkness with only a -2 penalty to hit.

Brutal Attack – A Fighter with this special ability rolls one die size larger for damage (1d6 instead of 1d4, 1d8 instead of 1d6, etc.) with melee weapons.

Danger Sense: A Fighter with this special ability has a sixth sense for danger and can never be surprised so long as he is conscious and aware.

Dodging - When not wearing armor (and conscious and able to move), a Fighter with this special ability may add his level (plus 1 for every point of dexterity above 15) to his AC.

Dragon Slayer - A fighter with this ability ignores the -1 penalty to saves against breath weapons and other blasts.

Find Weakness - When attacking an unaware opponent, a Fighter with this special ability may ignore any AC bonus the opponent has due to armor worn. He is hitting at his opponent's weak, exposed areas.

Goblin Slayer - A fighter with this ability treats his Fighter Bonus as one higher when fighting kobolds, goblins, orcs, gnolls, hobgoblins, bugbears, ogres, trolls, and giants. At the GM's option similar abilities might exist for fighting demihumans (humans, dwarves, elves, halflings, and gnomes) or other groups of monsters (such as dragons or the undead).

Grappling Expert - A fighter with this bonus retains their full AC while grappling.

Mounted Combat - The character receives a +1 bonus to attacks while mounted.

Leadership - When a Fighter with this special ability is leading a group of hirelings under their command, When leading a group of hirelings under their command, the hirelings subtract the Fighter's Fighter Bonus in any morale checks and add one-half the Fighter's Fighter Bonus (round up) to their attack and damage rolls.

One Shot – A Fighter with this special ability incapacitates opponents (knocks unconscious or otherwise out of combat) whose hit dice or level are less than or equal to the Fighter's level on a critical hit (in addition to the normal effects of a critical hit).

Sniper - A fighter with this ability ignores -2 of the penalty for using a ranged weapon at medium or long range.

Striker – A Fighter with this special ability makes a critical hit on a natural roll of 19 or 20.

Terrifying Style – A Fighter with this special ability has a terrifying combat style. Opposing side must check morale every time he makes a critical hit.

Toughness - A fighter with this ability has extra hit points equal to twice their Fighter Bonus

Unarmed Combat – A Fighter with this special ability does 1d6 damage with his bare hands (instead of the standard 1d2 bare handed damage).

Weapon Focus - A fighter with this ability adds +2 to their Fighter Bonus with one class of weapon: Swords and daggers; spears and pole arms (including the staff); flails, hammers, and maces; bows and crossbows; axes; or slings and thrown weapons

Illusionist/Magic-User Special Abilities: All class with the ability to learn and cast arcane spells have the following special abilities. All require the use of a special wand hand-made by the caster. Note that references to "magic-users" in this section actually refer to magic-users as well as illusionists.

Create Handmade Wand - A Magic-User knows how to create the handmade wand required for Magic-User special abilities. The wand must be made by the Magic-User using it to function.

Creating the wand requires a knife, a living tree to cut the wand from, and 12 minus the Magic-User's level hours (minimum of 1 hour) of uninterrupted time.

Arcane Blast – A magic-user can shoot a dart of magic energy from the tip of their handmade wand once per round provided no other action is taken. They must roll to hit the target normally. Range: short 60; medium 120; long 180. Usable once per round if no other action taken and does 1d4 damage if it hits. No saving throw is allowed. Requires pointing a handmade wand at the target and costs 1 HP per use. The visible effects can be whatever the Magic-User desires; note that this does not affect damage, it only adds color to the ability.

Arcane Dueling - By forgoing their action on their turn, a magic-user can engage another magic-user in an Arcane Duel.

On each of their turns, both combatants roll a d20 and add their Magic Attack bonus - whoever scores higher wins that round. Each round costs the combatants 1HP, and each round they succeed, they do damage equal to their Magic Attack bonus (minimum 1HP) to their opponent. A draw roll means both opponents take 2HP damage. An opponent can leave a duel at any time, but takes the opponent's Magic Bonus as damage (as though they had scored a successful hit).

Both players and GMs should make their descriptions vivid and entertaining - but appropriate to the level of the combatants. A 1st-level mage and a Kobold Shaman will be throwing sparks and stings at each other, while 10th-level mages will have battles that look more like Rush album covers.

Minor Magic - Magic-Users can cast minor "everyday/non-combat" magic at will. Basically, any everyday thing someone could do mundanely, a magic-user or illusionist can do with minor magic. Attempting something the GM considers abusive fails and causes the magic-users wand to explode (doing 1d6 backfire damage to the magic-user unless a WIL save is made). Usable once per round if no other action taken. Requires waving a handmade wand. Cost 1 HP per use.

Some examples: Light a candle or pipe with a flame from the wand tip. Dust things – at first level a minor magic spell might be needed for each shelf or piece of furniture, while at third level a single spell might dust a room and at sixth level the magic-user's the entire floor of a house or tower. Tie or untie a knot. Float coins from the magic-users coin purse to a merchant's hand. Open a cabinet. Mix drinks. Dress/undress.

Cleric Special Abilities: Clerical special abilities vary by the type of deity the character serves. The following are examples special abilities for common types of deities. If a campaign features other types of deities, The GM may need to create special abilities for these deities their specific campaign setting.

Priests of Storm/Thunder Gods: (Example deities: Thor or Zeus) Clerics of storm/thunder deities can use javelins. In place of the Turn Undead ability, clerics of storm have the ability to throw a bolt of lightning that can strike up to four creatures in a straight line from you within 30 feet, for 1d8 + level lightning damage. Use of this ability requires a ranged attack roll vs AC and costs 3 Hit Points

Priests of War Gods: (Example deities: Ares or Tyr) Clerics of war deities can wield non-magical swords. In place of the Turn Undead ability, clerics of war gods gain the Tactical Expertise ability:

Tactical Expertise – A cleric with this special ability gains a number of Tactics Points per day equal to his level plus one for every point of charisma above 13. These points are spent directly before the attack roll of anyone in the cleric's party, giving a +1 per point spent. Tactics Points can also be spent before any enemy's attack roll, giving a -1 per point spent.

Priests of Knowledge/Magic Gods: (Example deities: Hecate or Thoth) Clerics of Knowledge/Magic deities are somewhat less adept in combat than normal clerics, having only the same knowledge of weapons and armor as a magic-user. In place of the Turn Undead ability, clerics of knowledge/magic deities gain the Careful Study and a limited ability to use arcane magic: 1) the GM will add adding one spell suitable to the deity from the magic-user spell list that is not also on the cleric spell list for each spell level. 2) the cleric may attempt to cast an arcane spell from any scroll successfully on a roll of 1d20 + MIND bonus + Magical Combat Bonus versus a DC of 10 + (2 x spell level, rounded up). The spell fades from the scroll whether the attempt is a success or failure.

Careful Study: If the cleric is allowed to study a problem or physical obstacle for a full turn without interruption, she can add her MIND bonus to a skill check to overcome it-- even if she would add it already. If she is allowed the time and resources to research thoroughly, she can add an additional bonus to the check as long as she confronts the same problem or obstacle again within a number of days equal to her MIND score. If the cleric is allowed to study for a full turn she acquires a +1 bonus. She can improve this bonus to +2 with another two hours of study. Another three hours beyond that grants a +3 bonus, and so on (to a maximum of fourteen hours of study to attain a +5 bonus). By the same token, if a cleric is allowed to study an enemy's fighting style for three rounds without interruption, she gains her MIND bonus to the next attack she makes against it as long as she makes the attack within one turn.

Priests of Craftsman Gods: (Example deities: Hephaestus or many gods of the dwarves) are expert at any crafts (such as smithing or masonry or sculpture) that their god represents. Instead of the Turn Undead ability, you gain the ability to repair any broken small object and can detect and identify magic items (with a MIND check, DC 16 if you just examine the item, DC 12 if you have the opportunity to closely observe the other properties of the item or see it used). If the campaign is using Weird Science, you are probably well-enough trained with machinery that a device is only DC10 for you to figure out how to operate.

Repair: Repairs a broken or torn small object at a cost of 2 HP. It does not restore magic. The cleric must know what the item is to repair it.

Priests of Nature Gods (Example deities: Pan, Flora): The GM will add one spell of each level from the Druid Spell list (that is

not on the Cleric spell list) that is appropriate for the specific deity to list of spells available to the cleric. Note: Followers of deities considered "Earth Mothers" should be druids if the optional Druid class is used.

Priests of Trickster Gods (Example deities: Loki, Hermes, Coyote, or Anansi) can use daggers and are experts at riddles. In place of the Turn Undead ability, you add a number of illusionist spells equal to the higher of your MIND or CHA bonus (but always at least 1) to your own at each spell level. Priests of Trickster Gods, also have the Minor Divination ability (so they can learn secrets that will better enable them to prepare a clever prank or con).

Minor Divination - A cleric may spend 10 minutes in prayer asking his deity whether or not a specific action would have generally good or generally bad results *from the deity's point of view*. The cleric will have vague feeling of rightness or wrongness. A cleric may do this at most 1 per day (+1 additional time per day every 5 levels).

Priests of death gods (Example deities: Anubis, Hades) have learned to ceremonially use sickles, but usually only favor light armor at the most. The effectiveness of a successful Turn Undead is doubled.

Priests of Eldritch Horror Gods: (Example deities: Cthulhu, Nyarlathotep) Clerics are trained in daggers for the sake of sacrifice, and often do not wear armor. In place of the Turn Undead ability, they gain the Whispered Secret ability and the ability to use arcane magic scrolls as a thief.

Whispered Secret: Being inured to the horrible secrets of the universe, you can speak them in an attempt to drive enemies to madness. Roll 1d20 + CHA Bonus + level versus a DC of 10 + twice the Hit Dice of the creature you are addressing, who must be within about 5 feet to hear you clearly. If you succeed the target acts as if afflicted by a *Confusion* spell, or flees in terror, your choice. This costs HP equal to the HD of the being to whom you are speaking. Some creatures, such as Brain Eaters and Deep Scum, are perfectly aware of these things and are unaffected by this ability. If you like, you can instead shout your dark knowledge aloud, but to do so is to call down the wrath of all that is good and holy, for it costs HP damage equal to the collective HD of all who hear you and is indiscriminate in who it effects, save for creatures that would be immune or fellow priests of the elder ones.

Note: Clerics who lose the Turn Undead special ability may have a Turn Undead spell (Level 1) that functions like the ability if the GM considers it appropriate to the deity if undead are a major part of the campaign world.

Background

Characters may select, with the approval of the GM, a one or two-word background that represents a broad base of skills and knowledge, e.g. Farmer, Merchant, Desert Nomad, Noble, Shaman, Templar, Thyatian Mercenary, Ritualist, etc. Backgrounds need not be related to the PCs class, e.g. a player who creates a deeply religious fighter skilled in the arts of vision interpretation, divination and oration might pick 'Prophet' as a background. Backgrounds may not duplicate a class.

The GM will consider the character's background just as he would the character's class when deciding if a character will succeed with an action. For example, a character with an "Engineer" background should have a much better chance of damming a creek or building a bridge over it than a character with a "Courtier" background.

The word "word" should be taken loosely. For example, the name of a culture/location should be considered "one word" even if it is "Holy Panamon Imperium". "Blue Knight of the Holy Panamon Imperium" could count as "two words" if such clearly describes a single background in the campaign world.

Alignment

Basic Alignment: There are three basic alignments: Law, Chaos, and Neutral. Only intelligent beings have alignment and the vast majority of those tend to be neutral. Player Characters should select an alignment for their characters.

Law: Characters aligned with Law try to avoid unnecessary harm to others by their actions or inaction. They often put the good of society/everyone over the immediate good of themselves and their friends. They are usually willing to help others/society even if doing so is somewhat inconvenient. If given power over others, they tend to use it for the good of all.

Chaos: Characters aligned with Chaos only care about themselves and those who are currently useful to them. While they may not go out of their way to harm others, they do not care if others are harmed as long as they succeed at their personal goals. They are generally only willing to help others/society if they get something they want or need out of it. If given power over others they tend to abuse it and use it mainly to help themselves.

Neutral: Neutral characters tend to put themselves and their friends first, but will generally not allow others to come to unnecessary harm or inconvenience in order to succeed. They are willing to help others/society so long as doing so is not inconvenient. If given power over others, they tend to use it for good, but they and their friends come first.

Advanced Alignment: People familiar with 1e will notice that the basic alignment system does not account for "good" and "evil." This is because these concepts are left to interpretation. This is a philosophy more in line with classic pulp fantasy and science fiction. In this way of thinking, the "highest philosophy" is the conflict between law and chaos, with the balance of neutrality between. In this philosophical universe, concepts of good and evil are merely a means to attain the goals of any one of these greater spheres of thought. In this game, then, "evil" and "good" are much more situational than doctrines of behavior. Evil will often be associated with chaos, and good with law, but this need not always be the case. However for those who prefer the more complex alignment system of 1e, what follows is a presentation of alignments that incorporates good and evil. This system may optionally be used for PCs or NPCs, and may be assigned to monsters as the GM sees fit.

Lawful Good: A lawful good character opposes evil and believes in maintaining order. He keeps his word and acts against injustice. A lawful good character hates to see the guilty go unpunished. He believes the best way to maintain the greater good is through tradition, discipline, and order.

Neutral Good: A neutral good character opposes evil, but no particular importance is placed on law or chaos. He believes the greater good can be achieved at times through both means, and a balance of the two.

Chaotic Good: A chaotic good character acts as his conscience directs him with little regard for what others expect of him. He believes in goodness and right but has little use for laws and regulations. He follows his own moral compass, which, although good, may not agree with that of society.

Lawful Neutral: A lawful neutral character acts in accordance with law, tradition, or a personal code. Order and organization are paramount. Good and evil are to be maintained in balance to achieve order.

Neutral: A neutral character commits himself philosophically to neutrality. He sees good, evil, law, and chaos as extremes that must be maintained entirely in balance, as nature intends. In nature these forces may fluctuate, but a neutral character would oppose any artificial imbalance imposed by others.

Chaotic Neutral: A chaotic neutral character believes in randomness. Further, the best way to maintain disorder is to keep good and evil in balance. These characters are often unpredictable, but not cruel.

Lawful Evil: A lawful evil character cares about tradition, loyalty, and order but not about freedom, dignity, or life. He plays by the rules but without mercy or compassion. Domination is attained through strict adherence to discipline.

Neutral Evil: A neutral evil character is selfish and cares nothing for life or others. Evil for the sake of evil is the main tenet with these characters, and law or chaos are unimportant or only a means to an end.

Chaotic Evil: A chaotic evil character does whatever his greed, hatred, and lust for destruction drive him to do. He may be vicious, arbitrarily violent, and unpredictable. He may be simply out for whatever he can get, or he may be committed to the spread of evil and chaos.

Virtues and Vices (Optional): As in real life, each character has virtues (admirable character traits) and vices (not so admirable character traits). Players select six traits from the lists below before play starts. Neutral characters must select three from each list. Lawful characters must select at least one (but no more than two) vices. Chaotic characters must select at least one (but no more than two) virtues. Players can select virtues and vices not on the list with GM approval.

Virtues	Vices
Academic	Arrogant
Austere	Bigoted
Bold	Capricious
Cheerful	Cowardly
Compassionate	Egoistical
Courageous	Fearful
Daring	Hateful
Determined	Hidebound
Fair	Impulsive
Faithful	Insensitive
Friendly	Lazy
Generous	Manipulative
Gregarious	Miserly
Honest	Petty
Hopeful	Power Hungry
Industrious	Rude
Just	Self-Centered
Kind	Spendthrift
Patriotic	Stubborn
Thoughtful	Thoughtless
Thrifty	Vengeful

Character Tagline (Optional)

Each character should have one fairly unique feature in his personality or background that sets him or her apart from other characters and npcs in the campaign (and from other characters the player may play or have played in the campaign. This feature should not be something that would give a mechanical bonus in play, but something interesting and unique in the character's personality, background, or history. The GM should work with the player to ensure the character's tagline is appropriate to the campaign setting. A tagline can also be a "catch phrase" that sums up the character in some way.

Some examples of a simple character taglines from history and literature would be "never tells a lie" for George Washington, "the lionheart" for Richard I of England, "demands his martinis be shaken not stirred" for James Bond, "cultivates a grandfather image but quietly manipulates others to achieve the greater good" for Dumbledore, and "I didn't do it, nobody saw me, you can't prove anything" for Bart Simpson.

The Rules

Skills

There are no specific skills in Microlite78. Instead players are expected to think like adventurers, tell the GM what they are doing and the GM decides if it will succeed in the situation, taking into account the characters' classes and backgrounds. If the GM decides a random success chance is truly needed he may resolve the situation with a roll of his choice or he may call for one of the following rolls:

Primary Skill Roll: 1d20 + Stat Bonus + Class Level if the character is attempting something directly related to their class or background.

Secondary Skill Roll: 1d20 + Stat Bonus + (Class Level/2, round up) if the character is attempting something only loosely related to their class or background.

Minor Skill Roll: 1d20 + Stat Bonus + (Class Level/3, round down) if the character is attempting something not really related to their class or background.

When the GM calls for a skill roll, he will declare the type of skill roll, which stat the skill roll falls under, and any situational modifiers and the player will make a skill roll. (The GM should make the roll in secret if seeing the result would give the player more information than his character should have.)

Roll higher than the GM assigned Difficulty Class to succeed. Unless the GM rules otherwise, a natural roll of 20 always succeeds for a Primary Skill Roll. Suggested Difficulty Classes: Easy - 8, Normal - 12, Difficult - 16, Hard - 20, Very Hard - 24, Legendary - 28, Unbelievable - 32.

Certain classes (Thieves and Rangers, for example) have abilities that members of those classes are good at -- or even expert at. The GM must be sure to take such strong abilities into consideration when deciding success or failure of a related action.

Basic Adventuring Skills: Unless a player specifies otherwise about a character at character creation, all characters are assumed to have basic practical adventuring skills such as maintaining weapons and armor, riding a horse, setting up a camp, swimming, climbing, cooking, first aid, etc., and have a rough idea of the value of common coins, trade goods, gems, and jewels. Success should simply be assumed unless there are unusual conditions.

Languages: All character races speak common. Other intelligent beings speak their own languages (20% chance of also speaking common). Beings with a MIND over 10 may speak one additional language per point of MIND over 10 (these are in addition to any languages known by race).

Talents: At level 2 (and every 2 levels thereafter), characters may select one narrow area of skill where they are better than average: something they are "Good at." This talent should be either something directly related to their class or background -- or something they have spent game time and/or money learning. If the player wishes (and the GM approves), instead of selecting a new talent a talent the character is already "Good at" be improved to "Expert at" at a later even-numbered level and a talent the character is "Expert at" may be improved a final time to "Master at" at yet a later even-numbered level. The GM will consider the character's talents just as he would the character's class and background when deciding if a character will succeed with an action. . If you need to assign numerical benefits to talents for when a success roll is needed, +2 per level is a good place to start for most talents (i.e. Good at +2, Expert at +4, Master at: +6).

Saving Throws

When subject to an unusual or magical attack, characters generally get a saving throw to avoid or reduce the effect. To make a saving throw, roll 1d20, add modifiers based on the type of saving throw (and any circumstantial modifiers set by the GM). A natural roll of 1 automatically fails. A natural roll of 20 automatically succeeds. Otherwise, the saving throw is

successful if the total of the roll and modifiers is greater than the saving throw listed for the character's level. Unless noted otherwise, monsters save as a Fighter of a level equal to one-half their hit dice, rounded up.

Saving Throw Modifiers: What a character is saving against modifies the saving throw die roll. In cases where multiple types apply, use the first one listed below:

Breath Weapons: Breath Weapons and other blast-like effects give a -1 modifier to the saving throw.

Poison: Dwarves get a +3 bonus.

Death Magic: This includes negative energy attacks. Clerics get +3 due to their link with the higher and lower planes.

Rod, Staff, Wand: All magical effects created by a rod, staff, or wand give +1 bonus.

Spells: +2 bonus for Magic-Users.

Special Saving Throw Modifiers: Where applicable, these modifiers are applied in addition to those listed above:

Charm and Illusion Magic: Add MIND stat bonus.

All Magical Effects: Dwarves and Halflings receive a +4 bonus to all saving throws against a magical effect.

Magic

Magic-using characters can cast any spell from their respective spell list with a spell level equal or below 1/2 their class level, rounded up. A Magic-User or Illusionist starts with Read Magic and 1d2 additional first level spells in his spell book (which must be approved by the GM) and can add more spells by finding (or buying) them on scrolls or books and copying them into his spell book. A Magic-User or Illusionist can memorize up to Level + MIND bonus spells and these spells can be directly cast (others spells may be cast via a casting ritual). A Magic-User or Illusionist requires his spell book and 1 hour of time to change the spells he has memorized. Clerics and Druids do not need spell books and automatically have access to all divine spells of a level they can cast (use of certain spells may be forbidden by the cleric's deity, however).

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character.

Casting Cost: Direct casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast if the

spell is cast with an implement and 1 + triple the level of the spell being cast if the spell is cast without an implement:

Spell Level	1	2	3	4	5	6	7	8	9
HP Cost with Implement	3	5	7	9	11	13	15	17	19
HP Cost without Implement	4	7	10	13	16	19	22	25	28

Although there are ways to reduce the cost of casting spells, the casting cost cannot be reduced below 2 Hit Points.

Spell Difficulty Class: For purposes of things like dispelling, the Difficulty Class (DC) for all spells is: 10 + Caster Level + Caster's MIND bonus

Signature Spells: Select one 'signature' spell per spell level from first upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use. For Magic-Users and Illusionists, signature spells are always in memory and do not count against the number of spells a caster can memorize.

Implement Use: Spells cast through an implement (a wand or staff for a Magic-User or an Illusionist, a holy symbol for a Cleric or a Druid cost less to use. The implement must either be a magic item or be made by the caster (12 hours, wood, and carving tools needed). The implement must be undamaged and in the caster's hand at the time the spell is cast.

Combat Casting: In combat, if a character is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles. This costs the caster 1 HP per level of the spell he was attempting to cast and the caster loses his action for the round.

Ritual Magic: A Magic-User or Cleric can perform ritual magic to cast spells of any level (and other special rituals that might be found in old books or scrolls) provided the caster has a written copy of the spell or ritual, any needed materials (mainly required by special rituals), and the time and space needed to perform the ritual.

Ritual casting of a spell of a level the caster is able to cast normally takes 10 minutes and costs 1 HP per level of the spell being ritually cast. Ritual casting of a spell of a level the caster is not yet able to cast normally takes 10 minutes per level of the spell and costs twice as much in hit points as it would to cast directly. Ritual casting of a special ritual takes as long and costs as many HP as the ritual states (that is, the GM assigns these as needed when he creates the special ritual). Multiple Magic-Users and/or Clerics may participate in a casting a special ritual with the HP cost of casting divided among them.

Optional Sacrifices - One or more beings with human or better intelligence may be sacrificed during ritual magic. Each sacrifice made adds 10 minutes to the ritual and provides 10 plus the being's level or hit dice in HP to power the ritual. This amount is tripled if the being is truly a willing sacrifice. Some special rituals may require the sacrifice of intelligent beings. The sacrifice of intelligent beings is normally against the law in civilized societies.

Hit Points and Healing

Hit Points: Hit Points are an abstract measure of the amount of damage a character can suffer before falling unconscious and taking severe injuries. If Hit Points reach 0, the character is unconscious and begins to take severe physical injury. Further damage, including any remaining points of damage the attack that reduced hit points to zero, directly reduces Body Points. Hit Points represent stamina, luck, minor cuts and scrapes, etc. Optional: To avoid confusion, "Hit Points" may be renamed "Fatigue Points."

Body Points (BP): All characters have 20 Body Points. If Body Points reach 0, the character is dead. Each two points of body damage a character has suffered gives a -1 to all attack, success, saving, and similar rolls (also to strike speed). *Option:* Body Points for Fighters equal 20 + (Level/2) (round down,

maximum 30). Body Points for arcane spell casters (Magic-Users and Illusionists) equal 20 - (Level/2) (round up, minimum 10). This has fighters slowly becoming tougher while arcane classes lose physical conditioning as they become more magically powerful.

Recovering Hit Points: All characters recover all hit points after six hours of total rest. If a character has lost Body Points due to wounds, only 50% of total hit points lost are recovered per six hours of rest.

Healing Body Point Damage: Body points lost recover at a rate equal to the character's STR Bonus (minimum of 1 point regained) per full day of rest. If a character with up to 50% Body Point damage (up to 10 points of BP damage if base 20 BP is used) performs more than very light activity or careful travel during a day, he has a 50% chance of losing an additional body point. If a character with more 50% of Body Point damaged (11 or more points of BP damage if base 20 BP is used) does anything other than rest quietly in bed during a day, he has a 50% chance of losing an additional body point.

Bleeding (optional): A character who has been reduced to 0 hit points by weapon or other trauma-related damage will eventually bleed out and die if their wounds are not bound. A bleeding character must make a FORT Save every minute or suffer one body point of additional damage. Binding wounds takes 1 minute per point of body damage taken, but no further bleeding rolls are needed (including while the wounds are being bound). Any healing spell cast on a bleeding character will effectively stop the bleeding.

Healing Magic (Optional): Healing magic is not instantaneous, 1 body point will be cured per 10 minutes of rest after the spell is cast (up to the maximum the spell will cure), if the rest is interrupted any remaining points of healing are lost.

Second Wind (Optional): Once per day, characters may regain 20% of their total hit points (round up) by resting in a safe place for an hour while eating a meal. This amount is reduced by 2 hp per point of body damage (to a minimum of 0 hp recovered).

Monster Body Points (Optional): If the GM does not mind the added complexity, monsters may have Body Points as well. A monster's Body Points are equal to twice the number of hit dice the monster has. This option is not recommended.

Combat

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 a side is surprised and may not act at all in the first round. If attacking from an undetected ambush, the ambush victims are surprised on a roll of 1-4. A side cannot be surprised if it is aware of the other.

Combat Stance: Any character able to act may select a combat stance. Any character who has not announced their combat stance before initiative is rolled automatically selects "Standard." Combat Stances (and their effects) are *Full Defense* (Attack: no attack possible; AC: +2 bonus, +4 bonus with shield, +6 bonus with large shield; Strike: -5), *Active Defense* (Attack: -2 penalty; AC: +1 bonus, +2 with shield; Strike: -2), *Standard* (Attack: Normal; AC: Normal; Strike: normal), *Active Attack* (Attack: +1 bonus; AC: -1 penalty; Strike: +1), and *Full Attack* (Attack: +2 bonus; AC: -2 penalty; Strike: +2). Spell casters casting a spell cannot select the Full Defense or Active Defense Stance. The Stance Strike modifier is optional.

Initiative: Roll 1d20 for initiative for each side. The side with the higher roll gets a +5 to strike speed for the round. Spell casters casting a spell must declare the spell being cast and its target before initiative is rolled.

Actions: Combat is very abstract. Each combat round lasts a minute and includes a lot of jockeying for position, feints, etc. The "hit roll" determines if any damaging blows were delivered during the round. Everyone can do one thing each round; move, attack, cast a spell, etc. The GM may choose to allow some combined actions, like a charge attack, to be one thing. A 5-foot step/shift, drawing a weapon, speaking or similar activities are "free" and do not count as an action.

Strike Speed: Characters and monsters act in order of their strike speed from high to low. Base Strike Speed is determined by their action type in the table below. Characters/Monster add +5 to the Base Strike Speed if their side has initiative. Fighting Classes add their Fighter attack bonus. Monsters add one-half their hit dice, rounded down if the GM classes them as fighters. (Ties in Strike Speed are resolved by Character Level/Monster Hit Dice, with the higher acting first.) The Strike modifier from a character's combat stance is added if the GM use this option.

SS	Weapon/Attack Action
1	Read Scroll
2	Cast Spell
3	Short Length Weapon
4	Medium Length Weapon
5	Long Weapon
6	Very Long Weapon
7	Pole Arms
8	Missile Fire/Arcane Blast
9	Breath Weapon
10	Glance

Attack Rolls: Add attack bonus to d20 roll. A natural roll equal to or less the target's Natural Defense (which is 1 unless otherwise stated in the monster description) always misses, otherwise if the result is higher than your opponent's Armor Class (AC), it's a hit.

Melee attack bonus = STR bonus + Physical Combat Bonus
 Missile attack bonus = DEX bonus + Physical Combat Bonus
 Magic attack bonus = MIND bonus + Magical Combat Bonus

Armor Class (AC) = 10 + DEX bonus + Armor bonus. Basic Armor Bonuses: Light Armor (e.g. leather) +2, Medium Armor (e.g. Chainmail) +4, Heavy Armor (e.g. Plate) +6; a shield adds +1; a large shield adds +2. *Option:* Armor bonus is as listed in parenthesis for the armor type on the equipment table.

A natural 20 that would otherwise hit is automatically a critical hit doing maximum damage and doing a number of body points damage equal to the number of damage dice rolled (normally 1). Most monsters do not have body points, so a critical hit will do maximum damage plus a normal damage roll to them and

cause them to lose their next attack.

Fighters, Paladins, and Rangers can use DEX bonus + Physical Combat Bonus as Melee attack bonus instead if wielding a light weapon. Fighters can wield 2 light weapons and attack with both in a round (making one attack roll at -2).

Range Penalties: If the target is relatively close, there is no penalty to hit for range. If it's mid-range for the weapon you're using, take a -2. If it's farther out than that, the GM will assign a -4 to -10 penalty to hit, depending on his judgment of how far away the target is.

Cover: Characters behind an object gain +2 to +10 to their AC against ranged attacks, depending on the extent of the cover (light cover = +2 to nearly complete = +10). In some situations, the GM may allow half this AC bonus to apply to saves.

Damage: Light weapons do 1d4 damage. Medium weapons do 1d6 damage. Heavy weapons do 1d8 damage. Add STR bonus and any class damage bonus to Melee damage (x2 for two-handed weapons). *Option:* Weapons do the damage listed for the specific weapon (in parenthesis) on the equipment table.

Shield Special: A character with a shield may choose to have it completely absorb all the damage from any attack (including a critical hit). A non-magical shield shatters when it does so. A magical shield permanently loses one point of its magical AC bonus when it does so, becoming a non-magical shield if its magical AC bonus is reduced to zero.

Special Combat Situations:

Opportunity Attacks: Anyone not surprised and with a ready weapon who is not already involved in a melee combat gets a free attack on opponents trying to move past them – this attack is in addition to their normal attack for the round. If the attack is successful, the opponents takes damage and can move no further that round.

Ranged Attack into Melee: Shooting or throwing into a crowded melee is not a good idea: there is a 50% chance you'll hit a friend instead of an opponent. Fighting classes may take -4 to hit to avoid hitting a friend.

Dodge: A character who is not making an Active or Full Attack may forgo his next attack at any time and dodge out of the way. Roll 1d20 + DEX bonus + Physical Combat Bonus (PCB). The total is the character's effective AC until his next attack. If it's lower than his real AC, well, the character zigged when he should've zagged. The GM may modify the roll by +2 or -2 (or more) to reflect the terrain and cover of the area.

Aid Another: A character who can make a melee attack on an opponent engaging an ally in melee combat can help that character attack or defend by distracting or interfering with an opponent. Make an attack roll against AC 10. If successful, the ally gains either a +2 (Fighter Bonus +1 for fighting classes) bonus on his next attack roll against that opponent or a +2 (Fighter Bonus +1 for fighting classes) bonus to AC against that opponent's next attack (aiding character's choice), as long as that attack comes before the beginning of the aiding character's next turn. Multiple characters can aid the same ally.

Grapple: A character can make a grapple attack on an adjacent target. A successful attack roll means they are then grappled with their target. When grappled, both the attacker and the defender's AC becomes 10 and neither can make move actions. When grappled, the defender can't make normal actions and must make opposed rolls (1d20 + PCB) against the attacker to attempt to break free. As long as the defender is grappled the attacker can make automatic unarmed attacks on the defender.

Knockout Blow: A character can attempt an armed melee attack against an adjacent creature to stun them. On a successful hit the target is stunned one minute for every point the attacker rolled higher than their defense. Rogues add their level in minutes to this time.

Combat Tricks/Stunts: Declare what the trick/stunt attack is going to do. It could be anything from knocking a weapon from your opponent's hand to blowing his hat off or extinguishing a lantern. Other possibilities could be stapling the target to the wall through his clothing with a thrown weapon, tying him up with a bola, tripping him and so on.

The attack roll is made at -8 (-6 for fighting classes). If the roll is successful and the target is alive and aware of the attack, the target makes a defense roll (a normal attack roll) against a DC equal to the adjusted attack roll (with the to hit penalty). If the defense roll fails, the target suffers the exact effect described. If the defense roll succeeds, then the attack is treated as a normal attack against the target's AC (with the penalty), which may result in normal damage. *Option:* The defense roll is automatically failed if the target has a combat stance of Active Attack or Full Attack.

Against an inanimate object, if the attack roll (with the penalty) is successful, the stunt works. No defense roll is needed.

Morale: While a few monsters, such as mindless creatures, are fearless and will fight to the death, most monsters have a strong desire to survive and will not continue to fight when the battle is going against them. They will instead seek to retreat, to flee, or even to surrender. The GM decides when monsters abandon the battle and retreat, based on the situation and the monster's intelligence. Monsters are assigned a Morale Rating (from 2 to 12, with 2 being a complete coward and 12 being totally fearless) to help the GM make these decisions. If the GM wishes, he may simply roll 2d6 and have the monsters break off combat if the number rolled is greater than the monster's Morale Rating.

Energy Drain: Certain undead and demonic monsters can drain energy levels from characters. Each energy level drained reduces the character's level by one. The character may regain the level normally via experience. If the standard energy drain rule seems too harsh, try the following instead. Each energy level drained subtracts one from any roll to which the character would add his level (or his level/2). 1 point of energy drained is recovered every L days where L is equal to the hit dice of the monster that drained the energy level.

Simple Initiative (Optional): Each side rolls a d20 (reroll ties). High roll wins initiative. Strike Speed rules are not used. The combat order changes to the following: 1) Side that lost initiative declares actions. 2) Side that won initiative declares actions. 3) Side that won initiative acts. 4) Side that lost initiative acts. 5) Any bookkeeping is done.

Monsters

See the Microlite78 Monster List or use the monster descriptions in any 1e game. To create new monsters quickly: Pick a name, assign a level, hit dice = level, hit points = 1d8 per level, Save DC = 19 - level (minimum 3), all attack bonuses = level, damage = 1d8 for ordinary claws, bites, and weapons, 2d8 for large maws, giant clubs, 3d8 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases. Natural Defense is 1 for all but the most powerful or unusual creatures. Special attacks act like magic attacks against an appropriate defense. Intelligent monsters may have classes at the GM's option. If needed, assign stats to suit. Equip and add abilities as required.

Monster Reactions: Some monsters (like skeletons guarding a tomb) may always attack. In cases where the reaction of the monsters to the party is not obvious, the GM may opt to make a reaction roll for the monsters by rolling 2d6 and adding the CHA bonus (and any other appropriate modifiers) to the roll and consulting this table.

Adjusted Reaction Roll	Result
2 or less	Very Unfavorable
3-6	Unfavorable
7	Neutral/Uncertain
8-11	Favorable
12 or more	Very Favorable

Interpretation of the results is left to the GM, however, these general principles may prove helpful. Very Unfavorable means the monsters will most likely attack unless the odds are overwhelmingly against them. They will not help the characters. Unfavorable means the monsters are hostile and might attack unless they are given a good reason not to. They will not help the characters. Neutral means the monsters are unsure of the party. They are not likely to attack immediately, but are not friendly or helpful. Favorable means the monsters are willing to listen and are open to negotiation. They might be willing to be slightly helpful. Very Favorable means the monsters like the characters and are willing to be somewhat helpful and are open to working with the party to mutual advantage.

Mooks (optional): Sometimes a GM may want to use a large number of monsters but not want to carefully track each one. Mooks are "cannon fodder" monsters that have 1 hit point per hit die, never make a saving throw, and always run away or surrender if the battle is obviously going against them. Any hit from a Fighting Class character will likely kill a mook. Mooks cannot be told at a glance from non-mook monsters. Mooks make excellent minions for powerful leaders as they are very effective against normal people even if they cannot stand long against PCs and NPCs with class levels.

Experience Points and Level Advancement

Experience Points (XP): Characters get Experience Points (XP) through adventuring, defeating monsters, spending money from treasure, etc.

XP from Defeating Monsters: All monsters that are defeated (either outsmarted or killed), grant XP based on how powerful they are. All monsters begin with a base XP determined by hit dice (HD), and receive a bonus for each special ability they have (fire breath, spell-like abilities, etc.). Refer to the Monster Experience Points Table below.

Monster Experience Points Table

Monster HD	Base XP	Bonus XP/Ability
Less than 1	5	1
1	10	3
1+	15	6
2	20	9
2+	35	12
3	50	15
3+	65	35
4	80	55
4+	140	75
5	200	150
5+	260	200
6	320	250
6+	380	300
7	440	350
7+	500	400
8	560	500
8+	620	600
9-10+	1000	700
11-12+	1200	800
13-16+	1500	900
17-20+	2,250	1,000
21+*	3,000	2,000

*For monsters of HD 22 and higher, add a cumulative 250 XP for the Base and Bonus categories.

At the end of an adventure, the total XP earned from defeating monsters is divided by the number of characters in the party. Henchmen/Retainers count as 1/2 person and hirelings count as 1/10 person (round up for PCs, round down for others). Example: A party of 5 player characters, 2 retainers, and 10 men-at-arms and other hirelings earns 1200 XP from defeating monsters. Each PC earns 172 XP from defeating monsters, each retainer earns 85 XP, and each hireling earns 17 XP. (Note that XP for hirelings is earned but usually not actually tracked.)

XP from Treasure Spent: Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, generic "training," etc.). A character earns XP equal to the treasure so spent in gp divided by his current level. Note that XP from treasure is an abstract method of rewarding the various adventuring actions like finding traps that allow one to get treasure. Example: A 2nd level Fighter spending 1000gp on wine, women, and song earns 500 XP.

XP from Exploration: The GM may reward exploration with XP be designing special points on the map as worthy of XP for reaching them. The GM should generally not inform players in advance as to what, if any, special locations on the map are worth XP. Example: reaching the top of the tallest mountain on the map for the first time might be worth 150 or 200 XP for each character making it to the top or entering a well-hidden sub-level of a dungeon might be worth 50 XP.

XP from other Activities: The GM may award XP for excellent roleplaying, other important actions in the game (successfully completing a quest, for example), etc. In general, the total award from this category for any one session should not be more than 100 XP times the character's current level. No XP may be awarded in this category if the character refuses to even attempt to play his virtues and vices or other character

limitations.

Prime Requisite Effects (Optional): Each class has one stat listed as its Prime Requisite. If a character's highest stat is not the Prime Requisite for his class, the character suffers a 10% penalty to all XP earned.

Level Advancement: At the end of every adventure (or, at the GM's option, at the end of every session), total up the XP earned and added them to your character's total XP. If a character's XP total is higher than that the *Minimum Experience Points Required* for the next level on the character's class chart. The character goes up a level and gains all the benefits thereof (increased HP, PCB, MCB, improved Saving Throw, etc.). Note that a character may only go up one level per session. Any additional XP earned in that session that would put the character above 50% in his new level are lost.

Each level adds a die roll or a fixed amount after 9th level to Hit Points and the character's Physical Combat Bonus, Magical Combat Bonus, Fighter Bonus, etc. may change as indicated in the Advancement table for the character's class.

Spellcasters gain access to new spell levels at levels 3, 5, 7, 9, 11, 13, 15, and 17. When an arcane spellcaster gains access to a new spell level he gets one spell of the new level added to his spell books, selected randomly from a list created by the GM of spells of that level commonly available in the campaign setting.

Donate to the RetroRoleplaying Cancer Fund and Get Some PDF Goodies

Many Microlite74 gamers know that Randall Stukey, the author of Microlite74 and other M20-based old school games is trying to raise funds to pay the bills from [his wife's oral cancer](#) treatments and that he worked on the original Microlite74 as way to cope during her recovery from 6 weeks of radiation treatment in 2008. Randall and Donna are some of the 40 to 50 million people in the US who do not have health insurance nor did they qualify for government aid as they live in Texas and have no children. Donna (successful so far) cancer treatments have cost over \$110,000. While some of this has been absorbed by hospital foundations and the like, they still owe a lot of it. You can donate to the RetroRoleplaying Cancer Fund (via PayPal) and help them pay their bills.

Can You Help Pay the Cancer Bills?

Everyone who donates any amount at all get a password giving them access to a number of special downloads. *Some* of the currently available downloads include:

- Pdf copies of the two issues of The Grimoire Randall published in the late 1970s (which Randall blogged about here: The Grimoire #1 (<http://blog.retroroleplaying.com/2009/05/grimoire-1-spring-1978-d-fanzine.html>) and The Grimoire #2 (<http://blog.retroroleplaying.com/2009/05/grimoire-2-summer-1979-d-fanzine.html>)
- Pdf copy of The Second Grimoire of Pharesm the Bright-Eyed, a set of house rules for a BECM1 campaign Randall ran at a game shop in the mid-1980s.
- A copy of the Player's Introduction to the Fourth Campaign Arn (from about 1984)
- Microlite74 2.0 Special Edition -- a 60-page PDF designed to be printed in booklet format from Adobe Acrobat. Artwork is by Håkan Ackegård. This Special Edition incorporates the rules from the first supplement. The text has been reformatted into a single column in a large enough font to easily read.

To get access to these downloads and access to a private donor forum where you can get advance information on upcoming Microlite74 releases, help Randall pay the cancer bills by sending a donation in any amount -- small or large -- to the RetroRoleplaying Cancer Fund via Paypal at this link:

Adventuring

Almost any material you come across for 1e or other early editions of the world's most popular roleplaying game can be used in Microlite78 with little modification. However, there are some descriptive conventions that 1e used that may need explanation.

Time Conventions: 1E talks about time in terms of rounds (combat rounds) and turns. A round was 1 minute and a turn was 10 minutes, so there were 10 rounds in a turn.

Movement/Distance Conventions: 1E gave distances in inches. When underground or in buildings or the like, one inch equaled 10 feet. When outdoors, however, one inch was 10 yards. Yes, this meant spell and weapon ranges were greater outdoors than indoors. Normal human movement (when carefully exploring) was 12" per move, with two moves per turn. Carrying too much weight cut this down to 9" or even 6". Running movement was double the above.

Encumbrance: Characters can normally carry twelve (plus STR bonus) items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item. Oversized items (two-handed weapons, anything as tall as the character or that requires two hands to carry) count as two items. A character carrying 6 or fewer items is unencumbered. A character carrying 7-12 items is lightly encumbered. A character carrying 13-18 items is heavily encumbered. A character carrying more than 18 items is over-encumbered. If a more specific system is desired, the Weapons and Equipment section lists weights in stones. One "stone" is about 10 pounds and counts as 1 item. *Option:* Adjust number of items for each encumbrance class by the character's STR bonus.

Descending Armor Class: 1e and other pre-SRD editions used a descending Armor Class system where an unarmored character was AC 9 (AC 10 in some editions) and better armor used lower numbers (e.g. AC 5 was Chain, AC 2 was plate). Magic armor could even have a negative armor class. Microlite81 uses the ascending Armor Class system used in the OGL SRD. If you have old adventures using the original descending AC system and wish to use them, it is easy to convert descending ACs to ascending ACs.

Unarmored AC is 9: If the adventure is for B/X (or other edition where the unarmored AC is 9), subtract the descending AC listed in the adventure from 19 to get the ascending AC used by Microlite78.

Unarmored AC is 10: If the adventure is for 1e or 2e (where the unarmored AC is 10), subtract the descending AC listed in the adventure from 20 to obtain the ascending AC used by Microlite78.

Dungeon Exploration

Exploring dungeons is an iconic part of old school roleplaying games. The guidelines in this section will help the GM run adventures in dungeons, castles, caverns, and other "indoor" spaces.

Light: Humans and many other races require a light source (or magical ability) to see in the dark. Torches, lanterns, etc. will produce limited areas of light (generally 20 feet of bright light and a further 10 feet of dim light), but they also make it easy for monsters to see the party coming, making surprise impossible. Torches can be blown out by strong gusts of wind (d6 roll: blown out on a 1 or 2). Lanterns use flasks of oil as fuel, and a lantern can burn continuously on 1 flask of oil for 24 turns (4 hours). Torches burn continuously for 6 turns (1 hour) before burning out. Most monsters living in a dungeon have infravision or some other means of seeing in the dark; however these methods do not work in the presence of a light source.

Seeing Monsters: Unless surprised, characters will see monsters when they are 2d6 x 10 feet apart. Surprise distance

is 1d3 x 10 feet.

Wandering Monsters: The GM should roll 1d6 every 2 turns for wandering monsters (more often if the party is making a lot of noise or otherwise attracting attention). On a roll of 1, wandering monsters stumble across the party from a random direction and distance.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow their orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue if there is less than 120 feet between the two groups. Monsters will only pursue around a corner or through a door on roll of 1 or 2 on a d6 (1 if a secret door is used). Fire will deter many monsters. Food will distract many monsters: unintelligent monsters 90% of the time, semi-intelligent monsters 50% of the time, intelligent monsters 10% of the time. Treasure may also distract monsters: unintelligent monsters 10% of the time, semi-intelligent monsters 50% of the time, and intelligent monsters 90% of the time. All chances may be adjusted by the GM depending on circumstances. These same rules determine how monsters will pursue if the characters disengage and retreat (or rout) from a battle.

Rest: One turn in six must be sent in rest or all characters suffer a -1 to all d20 rolls and to damage rolls per rest missed. Time spent searching is not time spent resting.

Doors: Dungeons often have many doors, some secret and others obvious. Many are locked, and a thief will need to attempt to pick locks. However, characters can attempt to break a door down. In this case, the player rolls 1d6. A result of 2 or less means the door has been broken down. Strength adjustments apply, but no matter what the adjustment there must always be a chance of success or failure. Bonuses cannot take the success range above 5 or below 1 on 1d6.

Players will sometimes want their character to listen at a door to hear any noises beyond. Again, the GM rolls 1d6. A roll of 1 results in success, and a roll of 1 or 2 succeeds for demi-humans due to their keen hearing. A thief has specially trained for this task, and succeeds on a roll of 1-2 (Level 1-4), 1-3 (Level 5-8), 1-4 (Level 9-12), and 1-5 (Level 13+). This attempt may only be made one time at any door by a character. Note that some creatures, such as undead, do not make noise.

Traps and Trap Detection: A trap will usually spring on a d6 roll of 1 or 2 when a character passes over or by them or otherwise triggers them.

Characters of all classes can search for non-magical traps. All characters except dwarves and thieves can succeed in spotting a trap on a roll of 1 on 1d6. Dwarves succeed on a roll of 1 or 2 on 1d6. Thieves are specially trained for this task, and succeed on a roll of 1-2 (Level 1-4), 1-3 (Level 5-8), 1-4 (Level 9-12), and 1-5 (Level 13+). Players must declare that their characters are actively looking for traps, and they must be looking in the right place. This roll may only be made once in a particular location, and it takes 1 turn per effort made. Since the GM rolls the dice, the player never know if the roll failed or if there simply is no trap in the area searched.

Secret/Hidden Doors: Secret (and hidden) doors can only be spotted if characters are specifically looking for them. The GM rolls 1d6 when a player declares that his character is looking for secret doors. A result of 1 on 1d6 is a success, except that elves have better vision and succeed on a roll of 1 or 2 on 1d6. Thieves are specially trained for this task, and succeed on a roll of 1-2 (Level 1-6), 1-3 (Level 7-10), and 1-4 (Level 11+). A character can only attempt to look for secret doors once in any given area, and it takes 1 turn. A second attempt cannot be made in the same area. On a roll of 1 on 1d6 an Elf will notice a secret door even if he is not actively searching for secret doors. Since the GM rolls the dice, the player never know if the roll failed or if there simply is no door in the area searched.

Wilderness Exploration

Exploring the wilderness is an iconic part of old school roleplaying games. The guidelines in this section will help the GM run adventures in the great outdoors, whether exploring new lands or simply go from one place to another along well-travelled routes.

Time and Wilderness Movement: The wilderness is not cramped like in a dungeon, and characters can usually see further ahead and not be as wary of obstacles. For this reason, movement is measured in yards rather than feet in the wilderness.

A character that could move 120' per turn in a dungeon can move 120 yards (360') per turn in the wilderness. Further, characters can move, per day, their movement rate divided by 5 in miles per day. So a character that moves at 120 (feet or yards, depending on environment) can move 24 miles in the wilderness per day. It's likely that not all characters will have the same movement, so if they wish to stay together they must move as fast as the slowest character. Also note that the number of miles characters can move in 1 day presented here assumes a clear trail and easy travel. Other conditions will reduce the distance traveled in a day by fractions, as detailed below.

Terrain	Movement Modifier
Desert, hills, wooded areas	-1/3
Thick jungle, swamps, mountains	-1/2
Road travel, clear wide trails	+1/2

For example, if characters can travel 24 miles normally, but are following roads, they can travel 36 miles a day (24 + 12). If they are traveling through swampy land, they travel 12 miles (24 - 12) per day. Furthermore, certain kinds of terrain can slow travel at the GM's discretion, such as if the characters have to cross canyons, large rivers, or other formations. In addition to these conditions that can influence travel rates, characters

may engage in a forced march. A forced march is a day of hard, tiring travel, but increases travel speed by +1/2. However, the characters must rest for 24 hours after a forced march. Otherwise, during wilderness travel the characters have to rest one day per six days of travel. Weather can also affect travel rates or even prevent safe travel altogether.

Missile weapon and spell ranges are measured in yards in the wilderness also, but note that areas of effect remain the same for spells and other effects.

Unless there is an encounter, the GM will direct players through time in increments of days while traveling in the wilderness. When an encounter occurs, time is measured in rounds. Unlike in labyrinths, wilderness adventures do not often measure time in turns.

Seeing Monsters: Unless surprised, characters will see monsters when they are 4d6 x 10 yards apart. Surprise distance is 1d3 x 10 yards.

Wandering Monsters: The GM should roll 1d6 every day of travel for wandering monsters. If the party is camping, an additional roll should be made at night. If a wandering monster is indicated (roll varies by terrain, see terrain table below), wandering monsters stumble across the party from a random direction and distance. At night, the GM should randomly determine which watch is on duty when the attack is made.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue so long as the party can be detected, there is a 50% chance monsters faster than the party will catch it (30% chance for monsters about as fast as the party) in each hex traveled through. Woods or swamp reduce the chance of being caught by 25%. Monsters will pursue into another hex on the map 50% of the time. The chase continues until combat occurs or the monsters break off. The party must rest for one-half day for each hex travelled during a pursuit. All chances may be adjusted by the GM depending on circumstances. These same rules determine how monsters will pursue if the characters disengage and retreat (or rout) from a battle.

Becoming Lost: A group travelling off a well-marked trail or road without an accurate map or a knowledgeable guide may become lost. The chance of becoming lost is rolled on a d6 and depends on the type of terrain the party is in (see table below). If lost, the party actually moves in a random direction but believes they have moved in the direction intended.

Terrain Type	Chance Lost	Chance of Encounter
Plains	1	1
Woods	1-2	1-2
Forest	1-3	1-2
River	1	1-2
Swamp	1-3	1-3
Hills	1	1-2
Mountains	1-2	1-3
Desert	1-3	1-2

Strongholds: Characters may encounter a stronghold during their wilderness travels. If the GM decides the characters pass near a castle or other kind of stronghold, he can roll on the following table to randomly determine how any patrol that spots them might react. These rolls may be modified one way or another if the characters are acting suspicious, or if they are approaching peacefully and potentially with offerings.

Ruler	Reaction (1D6)				
Class	Level	Patrol Type	Ignore	Chase	Friendly
Cleric	6+1d8	Lt mounted, 2d6	1-2	3-4	5-6
Dwarf	8+1d4	Hvy infantry, 2d6	1-4	5	6
Elf	9 or 10	Lt mounted, 2d6	1-4	5	6

Fighter	8+1d6	Hvy mounted, 2d6	1-2	3-5	6
Halfling	6+1d2	Lt infantry, 2d6	1-3	3	4-6
MU	10+1d4	Hvy infantry, 2d6	1-4	5	6

Rations and Foraging: When adventuring in a dungeon, there may be very little available to eat. Characters must take rations with them to cover the extent of time they expect to be away from town. However, they may occasionally kill an edible monster.

When in the wilderness, characters can hunt or scavenge for food. Scavenging for food is an activity that can be accomplished without hindering travel by gathering fruit, nuts, or small animals. For each day of travel while scavenging, roll 1d6. A result of 1 indicates that sufficient food for 1d6 human sized beings has been acquired. Hunting follows the same roll, but succeeds on 1-2, and must be engaged as the sole activity for a day. No traveling is possible. In addition, there will be one Wandering Monster check, from the table appropriate for the terrain, while the group is hunting.

Characters that go without food and/or water will soon begin to suffer from the effects of starvation and/or dehydration:

Starvation: Characters generally need 2 pounds of food per day. After 2 days without food, a character takes 1d6 damage per additional day without food and no longer heals lost HP.

Dehydration: Characters generally need 1 gallon of water per day. Each day after the first without water, a character loses 25% of his full HP in damage (and can no longer heal).

Other Hazards

Falling: 1d6 damage per 10 feet fallen, save for half damage.

Spikes: add +1 point to falling damage per 10' fallen, max +10

Extreme Heat & Cold: If not wearing suitable protection, save once every 10 minutes (-1 per previous check), taking 1d6 damage on each failed save.

Creating a Stronghold

All of the Character classes have some ability, at some level, to establish a stronghold – or to take over a guild, in the case of Thieves. Strongholds are usually built by claiming an area of wilderness, clearing out the monsters that lair in the region, and then beginning construction of the new owner's fortified place of residence. The nature and type of stronghold will differ, of course, for the individual's choices will play an important role. For instance, it is traditional for you, the player, to create a map of your castle. In general, a strong leader who clears out an area with a radius of ten miles or so will end up in charge of between 2 and 8 (2d4) small settlements. The peasants in these hamlets, cots, and villages will be overjoyed to find themselves under the protection of a powerful and renowned protector – unless your Character is a tyrannical overlord in the service of Chaos. Each settlement holds roughly 1d4 x100 villagers, and the normal feudal tax is 10 gp per year per villager. Sometimes, of course, this is paid with chickens and oxen, and your stronghold might take on the appearance of a marketplace, around tax time – but a good reeve or bailiff can sort it all out quickly, without the Character's needing to get involved. Owning a stronghold allows a person to house and feed loyal retainers without paying for their room and board in local inns, or building campsites in the cold rain. It is a base of operations and a secure place to keep Treasure.

Building the actual castle, of course, is quite expensive. The owner will need to hire wagons for transporting materials, as well as masons and other experienced craftsmen from more civilized areas to raise the strong stone walls and towers of the fortress. While the construction costs could change drastically depending upon how far a freehold is from the rest of civilization and what materials are available in the area, the following sample costs will provide a baseline:

Stronghold Structure Costs

Barbican (gatehouse, 2 small towers, and a drawbridge)	38,000gp
Battlement (100' long, crenellated parapets)	500gp
Building, stone (20' high, 30' square, wood doors, floors, roof, stairs)*	3,000gp
Building, wood (20' high, 30' square, wood doors, floors, roof, stairs)*	1,500gp
Corridor, dungeon (10'x10'x10', hewn stone walls, flagstone floor)	500gp
Drawbridge, wood (10' x 20')	250gp
Gatehouse (20' high, 30' x 20', metal portcullis, wood doors, floors, stairs)	6,500gp
Keep, square (80' high, 60' square, wood doors, floors, stairs)*	75,000gp
Moat, unfilled (100' x 20' x 10' deep)*	400gp
Moat, filled (100' x 20' x 10' deep)*	800gp
Palisade, wood (10' high, 100' long, 1' thick)	125gp
Rampart, earthen (10' high, 100' long, 15' thick)	2,500gp
Tower, small round (30' high, 20' diameter, wood doors, floors, stairs)	15,000gp
Tower, medium round (40' high, 20' diameter, wood doors, floors, stairs)	22,500gp
Tower, large round (40' high, 30' diameter, wood doors, floors, roof, stairs)	30,000gp
Tower, huge round (60' high, 30' diameter, wood doors, floors, roof, stairs)	54,000gp
Wall, stone castle (20' high, 100' long, 10' thick)	5,000gp
Wall, stone castle (30' high, 100' long, 10' thick)	7,500gp
Wall, stone castle (40' high, 100' long, 10' thick)	12,500gp
Wall, stone castle (50' high, 100' long, 10' thick)	17,500gp
Wall, stone castle (60' high, 100' long, 10' thick)	22,500gp

*The dimensions of these constructions can be altered as long as the square footage remains the same.

In addition to the building costs, the character will need to hire at least one engineer (250gp/month) per 100,000gp cost of the stronghold. The time required to construct a stronghold depends entirely on its total price. For every 500gp it will take one day of game time. The construction time can be reduced by 25% by paying 50% additional construction costs, or reduced by 50% by paying 100% additional construction costs. The construction time cannot be reduced by more than 50%.

Magical Research

As described in their class descriptions, spell casters are able to research new spells and create magic items. These are expensive procedures which often do not succeed.

All magical research requires a magic research skill roll of some type to succeed. This throw is a Secondary MIND Skill Roll unless otherwise listed. An unmodified die roll of 1-3 is always a failure when conducting magical research, however. When a magic research throw fails, the time and money spent on the research is lost. In addition, any precious materials or special components (described below) are consumed.

Researching Spells

Researching Known Spells: A spellcaster of 5th level or higher may use spell research to gain access to spells on the standard Microlite81 spell list that he does not have access to from scrolls, spell books, or (if a divine spellcaster) his deity. Spell research costs 1,000gp, and takes two weeks of research, per level of the spell. Spell research requires a magic research throw versus a DC equal to 12 plus twice the level of the spell being researched. EXAMPLE: Riddle is an 11th level mage with a MIND of 15 researching a 4th level spell. It will take 8 weeks and cost 4,000gp, and require a Secondary MIND Skill Roll versus a DC of 20 to succeed.

Researching New Spells: A spellcaster may also use spell research to create a new spell not on the standard spell lists. The spellcaster must describe in detail the kind of spell he wants to create, and the effects it will have. The GM will then determine if the spell can be created, and if so what the spell level will be. The spellcaster must be capable of casting spells of the spell level the potential new spell will be; otherwise he must wait until he attains a high enough level to research and cast the spell. Spell research costs 1,000gp, and takes two weeks of research, per level of the spell. A magic research roll is required for success versus a DC equal to 12 plus three times the level of the spell being researched.

Identifying Magic Items: Spell research can also identify the properties of a magic item. It takes 1,000gp and two weeks of research to identify a magic item, and a magic research throw (A is required. The required DC is determined by how common the GM rules the magic item is: Common, DC 14; Uncommon, DC 17; Rare, DC 20; Very Rare, DC 24; Artifact/Unique, DC 30 (or higher).

A mage or other arcane caster can only research a spell if he can still learn spells of that level. A cleric or other divine caster can only research a spell with the permission of his deity (GM's discretion). The deity will usually remove a spell of the same level from the cleric's spell list in exchange for granting the new spell.

Libraries: To research a spell, a spellcaster must have access to a library. Wizard's guilds and major temples often will provide their mages and clerics access to such a library. If a spellcaster wishes to compile his own library, a minimum of 4,000gp must be invested to allow research on 1st level spells. For each subsequent spell level to be researched, another 2,000gp must be invested. Having an exceptionally large library aids research. For every 10,000gp of value above the minimum required for the spell, the spellcaster receives a +1 bonus on his magic research throw (up to a maximum +3 bonus).

Every time a wizard successfully researches a spell, 10% of the gold spent for that effect is added to his library value, reflecting the value of notes and annotations made during research. Authoritative tomes or rare books found as treasure might provide an additional bonus to research specific spells or types of spells.

Creating Magic Items

Starting at 5th level, spellcasters may begin to scribe scrolls and brew potions. At 9th level, they may begin to make other types of magic items, such as rods, rings, swords, and other items. An arcane spellcaster may never create magic items that are

exclusive to divine spellcasters. A divine spellcaster may make any item his class is eligible to use.

In order to create a magic item, the spellcaster must know the spell(s) that replicate the magic item's effect, or must find a sample or formula of the item. If a magic item's effect does not compare to any existing spell, the spellcaster must either research a new spell that will produce the desired effect, or he must find a sample or formula of the item.

Cost and Time: The base cost and time required to create a magic item is listed on the Magic Item Creation tables.

Magic Research Roll: Creating a magic item requires a magic research roll for success versus a DC equal to 12 plus three times the level of the spell needed to create the effect being enchanted. If multiple effects are being enchanted, each must be rolled separately. A +1 item bonus is considered a 1st level spell, a +2 item bonus is considered a single 3rd level spell, and a +3 item bonus is considered a single 6th level spell.

Formulas and Samples: A formula is a magical "recipe" for the creation of an item. A spellcaster automatically has a formula for any magic item he has previously created. Formulas may also be found as treasure. A sample is simply an existing magic item that is available to the spellcaster while he is working.

There are three advantages to having a formula or sample:

- 1) It enables the spellcaster to create a magic item without having to learn or invent the spells imbued in the item.
- 2) It reduces the cost and time to make the item by 50%.
- 3) The DC for the magic research roll is 12 plus two times the level of the spell needed to create the effect (instead of the standard plus three times the level of the spell needed to create the effect).

Precious Materials: Rare woods, noble metals, such as silver, gold, and platinum, and precious gems, such as rubies and diamonds, retain magic better than common woods, crude metals, or simple stone. Using precious materials can thus improve the chances of success of creating a magic item. For every 10,000gp of value in gems, jewelry, precious metals, and rare or elaborately carved woods added, the spellcaster receives a +1 bonus on his magic research throw. A character may not spend more on precious materials than the base cost of the item.

Special Components: Creating magic items requires special components for each spell effect in the item. Components are usually organs or blood from one or more monsters with a total XP value equal to the gp cost of the research. The cost of any special components is in addition to the base cost of the research. If a character does not have a formula when he begins creating the item, he will not learn the special components until the work is 50% complete. The GM will determine the specific components required for each item. Different formulas for the same item may require different components. For instance, one formula for a wand of fireball might require the fangs of 20 hellhounds, while another formula for a wand of fireball might require the ichor of four efreet.

Workshops: Just as a spellcaster needs a library to research spells, he needs a workshop in order to create magic items. Wizard's guilds and major temples often will provide their mages and clerics access to a workshop. If a spellcaster wishes to build his own workshop, a minimum of 4,000gp must be invested to allow creation of 1st level spell effects or item bonuses. For each subsequent spell level or bonus, another 2,000gp must be invested. Having an exceptionally valuable workshop aids item creation. For every 10,000gp of value above the minimum required for the spell, the spellcaster receives a +1 bonus on his magic research throw (up to a maximum +3 bonus).

Magic Item Creation: Base Cost

Item Type	Base Cost
One Use Effect	500gp x spell level
Charged Effect	500gp x spell level x charges*
Permanent Effect, Unlimited Use	500gp x spell level x 50
Permanent Effect, Use 1/turn	500gp x spell level x 33
Permanent Effect, Use 1/3 turns	500gp x spell level x 25
Permanent Effect, Use 1/hour	500gp x spell level x 16
Permanent Effect, Use 3/day	500gp x spell level x 12
Permanent Effect, Use 1/day	500gp x spell level x 10
Permanent Effect, Use 1/week	500gp x spell level x 6
Magical Weapon +1	5,000gp**
Incr bonus from +1 to +2	+10,000gp**
Incr bonus from +2 to +3	+20,000gp**
Magical Armor +1	5,000gp**
Incr bonus from +1 to +2	+10,000gp**
Incr bonus from +2 to +3	+20,000gp**

Magic Item Creation: Time Cost

Item Type	Time
One Use Effect	1 week x spell level
Charged Effect	2 days x spell level x charges
Permanent Effect, Unlimited Use	100 days x spell level
Permanent Effect, Use 1/turn	80 days x spell level
Permanent Effect, Use 1/3 turns	70 days x spell level
Permanent Effect, Use 1/hour	60 days x spell level
Permanent Effect, Use 3/day	50 days x spell level
Permanent Effect, Use 1/day	40 days x spell level
Permanent Effect, Use 1/wk	30 days x spell level
Magical Weapon +1	1 month x WBC / 10***
Incr bonus from +1 to +2	+1 month x WBC / 10***
Incr bonus from +2 to +3	+1 month x WBC / 10***
Magical Armor +1	1 month x Armor Class
Incr bonus from +1 to +2	+1 month
Incr bonus from +2 to +3	+1 month

* If a charged item has multiple spell effects powered by the same charges, use the base cost and time for the highest level spell effect, plus half the base cost and time for each other spell effect. The minimum time to create a charged item is never less than 1 week per spell level of the highest level effect.

** If the weapon or armor has a bonus that is restricted to a particular class or type of opponents, the extra bonus is half price. If the weapon or armor is enchanted with spell-like effects, the spell-like effects are enchanted separately using the cost and time for charged or permanent effects.

***"WBC" = Weapon Base Cost. Arrows, bolts, and sling stones are enchanted in bundles of 20 at a base cost of 10gp.

Weapons and Equipment

Money

Money takes the form of coins, with the gold piece being the standard unit. 1 platinum piece (pp) = 5 gold pieces; 1 gold piece (gp) = 10 silver pieces; 1 electrum piece (ep) = 5 silver pieces; 1 silver piece (sp) = 10 copper pieces (cp). Coins from different areas may look different and in some areas only coins from that area are acceptable, other coins will have to be exchanged for proper coins at a moneychanger who will take at least a 10% exchange fee.

To put the value of a gold piece into perspective, a single gold piece is enough for a peasant to subsist at a wretched quality of life for a month. Early in their career, adventurers will typically live on a few dozen gold pieces per month, enough to eat and sleep at an inn. A dragon's treasure hoard of 50,000gp might keep a village of peasants alive for decade, but merely cover a prince's monthly budget.

Equipment Packs

Suggested starting packs for new characters:

Pack A	Pack B	Pack C
normal clothing	normal clothing	normal clothing
backpack	backpack	backpack
bedroll	bedroll	bedroll
hooded lantern	10 torches	tent
10 oil flasks	10 oil flasks	10 torches
flint & steel	flint & steel	flint & steel
shovel	chalk	hammer
2 sets of caltrops	10 ft. pole	10 iron spikes
signal whistle	mirror	grappling hook
pen & paper	crowbar	50 ft. rope
water skin	water skin	water skin
iron rations for four days	iron rations for four days	iron rations for four days

Finally, add the following, based on your Class:

Cleric/Druid: Silver holy symbol, light armor (AC +2), a one handed weapon + shield, and 5 gold pieces

Monk: Vial of holy water, two light weapons and 10 gold pieces.

Fighter/Paladin/Ranger: Vial of holy water, medium armor (AC +4), a one handed weapon + shield, or a two handed weapon, and 5 gold pieces

Magic-User/Illusionist: Spell book with all spells known, a dagger, and 5 gold pieces

Thief: lock picking tools, light armor (AC +2), light weapon, and 5 gold pieces.

Standard Equipment List

Players, with the permission of the GM, may elect to roll their starting wealth in gold pieces and buy equipment piece by piece from the equipment list below. If this is done, each character starts with 120 + (3d6 x 5) gold pieces. The GM is free to modify the equipment list to suit the starting location in his campaign.

Armor	Cost	AC
Clothing Only	-	10
Hide and Fur Armor	10gp	11
Leather Armor	20gp	12
Ring Mail or Scale Armor	30gp	13
Chain Mail Armor	40gp	14
Banded Plate or Lamellar Armor	50gp	15

Inn (one person, one night, superb)	2gp
Hut (wattle)	25gp
Hut (wooden)	50gp
Townhouse (stone)	1,200gp

Equipment Descriptions

Arbalest: An arbalest is a heavy crossbow, pulled with the mechanical assistance of a rack and pinion or windlass. Historical examples include the late medieval arbalest and the Three Kingdoms era Chinese heavy crossbow.

Axe, Battle: This is a single- or double-bitted axe with a 24" to 48" haft, designed for battle and useable with one or two hands. Historical examples include the Scythian sagaris, Viking bearded and skeg axe, Celtic war axe, medieval battle axe, and Persian tabarzin.

Axe, Great: This is a double-bitted axe or long-shafted single-bitted axe, with a 48" or longer haft, requiring two-hands to use. Historical examples included the Greek double-bitted labrys, Viking long bearded axe, and the English longaxe. Great axes impose a -1 penalty on initiative rolls.

Axe, Hand: This is a single-bitted axe, with a 12" to 24" haft, balanced for throwing. Historical examples include the Frankish francisca, American tomahawk, and African mambele and kasuyu.

Backpack: A backpack has two straps and can be worn on the back, keeping the hands free. It holds up to 4 stone (40lb).

Ballista: A siege weapon, powered either by composite bow or torsion spring mechanisms, which hurls large bolts. Historical examples include the Greek oxybeles, Roman ballista, and medieval springald.

Barding: Barding is horse armor made from a variety of materials (see the descriptions of each type of Armor for details). Historical examples include Byzantine and Persian cataphract's barding and medieval destrier's barding.

Banded Plate Armor: Banded plate armor is made of overlapping horizontal strips of laminated metal sewn over leather. It is comparable in protection to lamellar armor, and superior to chain mail. Banded plate is commonly worn as a cuirass with shoulder protection, with reinforced leather protecting the arms and legs. The chief historical examples are Sumerian overlapping plate armor and Roman lorica segmenta.

Belladonna: Belladonna, also known as deadly nightshade, is a poisonous flower. A character who eats a sprig of belladonna within one hour of being infected with lycanthropy may make a saving throw versus Poison to shake off the affliction. If the character fails the saving throw, however, he dies from the poison after one turn. Even if the poison is then neutralized or the character is raised from the dead, he will still be afflicted with lycanthropy, and further doses of belladonna will be of no use.

Boat, River: This boat is 20' to 30' long, has a "beam" (width) of 10' to 15', and has a "draft," or surface depth, of between 2-3' when in the water. Riverboats are rowed, or poles are used to push it along. A river boat requires at least 1 rower as crew). The cost of the boat increases by 1,000gp if it has a roof. A riverboat can carry 400 stone (4,000lb) plus crew.

Boat, Sailing: This small boat has a single mast, with a length of 20' to 40', a beam of 10' to 15', and a draft of 2' to 3'. Sailing boats are primarily employed for fishing on lakes or coasts. A sailing boat requires at least 1 sailor as crew. A sailing boat can carry up to 600 stone (6,000lb) plus crew.

Bola: These are throwing weapons made of weights on the ends of interconnected cords, designed to capture animals by entangling their legs. A character can use a bola to make a knock down or wrestling maneuver with a thrown attack.

Boots: Low boots come to mid-calf. High boots come to the knee or thigh and are popular for riding.

Bow, Composite: A composite bow is a recurved bow made of laminated wood, horn, and sinew. Composite bows are time consuming and expensive to craft but offer a better combination of mobility and power than longbows or shortbows. Historical examples include the Scythian horn bow, Chinese laminated bamboo bow, Greek and Roman composite bow, Mongolian composite bow, and Japanese yumi.

Bow, Long: A long bow is made from a single piece of wood, as tall as the person who uses it. Equal in range and power to more expensive composite bows, longbows require substantial strength (STR 9 or more) and cannot be used by mounted troops. Historical examples include the ancient Indian longbow, the Nubian longbow, and the Welsh and English longbow.

Bow, Short: A short bow is made from a single piece of wood, usually around 4' tall. Shortbows lack the range and power of either longbows or composite bows, but are cheap and fast to make. Historical examples include the Neolithic short bow and Comanche self bow.

Candles: A candle dimly illuminates a 5' radius and burns for 1 hour. Wax candles burn cleanly, but tallow candles produce a foul smelling smoke. Adventurers carrying tallow candles will never surprise creatures with keen olfactory senses.

Canoe: A canoe consists of frame of light wood wrapped with bark, hides, canvas, or other waterproofed covering. Canoes are primarily used on rivers and in swamps. Canoes have a 15' length, 5' beam, ½' draft, and can carry up to 60 stone (600lb) (plus crew). They can be carried overland by two people, at a cost of 5 stone of encumbrance.

Cart, Small: A small cart is an open, two-wheeled vehicle meant for personal transport. It may be pulled by one or two mules. If the cart is pulled by only one mule, it can transport up to 40 stone at 60' per turn, or up to 60 stone at 30' per turn. If pulled by two mules, it can transport up to 80 stone at 60' per turn, or up to 120 stone at 30' per turn. Carts may only move through deserts, mountains, forests, or swamps if a road is available.

Cart, Large: A large cart is an open, two-wheeled vehicle meant for shipment. It may be pulled by one or two heavy horses. 2 mules or medium horses can be substituted for 1 heavy horse. If the cart is pulled by only one heavy horse, it can transport up to 80 stone at 60' per turn, or up to 120 stone at 30' per turn. If pulled by 2 heavy horses, it can transport up to 160 stone at 60' per turn, or up to 240 stone at 30' per turn. Carts may only move through deserts, mountains, forests, or swamps if a road is available.

Catapult: A catapult is a siege weapon powered by either torsion or fixed counter-weight mechanisms, which hurls rocks, burning pitch, or other projectiles. Light catapults inflict 3d6 damage in a 5' radius, while heavy catapults inflict 4d6 damage in a 10' radius. Historical examples include the Roman onager and medieval mangonel and couillard.

Chain Mail Armor: Chain mail is made of small metal rings linked together in a pattern to form a mesh. Chain mail is superior in protection to leather-based armors but inferior to metal scale or plate-reinforced armors. Chain mail is commonly worn as a shirt and coif, with lighter chain, ring mail, or hardened leather protecting the arms and legs. Historical examples include Viking byrnie, Norman mail, and Roman lorica hamata.

Cloak: A cloak is a cloth, fur, or leather garment of knee to ankle length, worn outdoors like an overcoat. Cloaks usually include a hood. Adventurers often favor military cloaks, generally worn pinned on one shoulder for ease of movement and access to a sword.

Club: A club is any simple bludgeon used to batter opponents.

Cottage: A cottage is a 20' high, 30' square wooden building with a thatched roof and earthen floor, suitable for a wealthy peasant family.

Crossbow: A crossbow is a bow mounted cross-wise on a stock with a trigger. It fires squat projectiles called bolts. Crossbows are light enough to pull by hand or with a quick drawing lever and are much easier to use than bows. Historical examples are the Greek gastraphetes, Roman arcuballista, Chinese handheld crossbow, and medieval crossbow and cavalry cranequin.

Crowbar: A crowbar is 2' - 3' long and made of solid iron. This object can be used for forcing doors and other objects open.

Dagger: A dagger has a small 6" - 12" blade, either single-edged for cutting, or doubled edged for stabbing. Daggers may be used in melee or for throwing. Historical examples include the Asian kris, medieval poniard, Japanese tanto, Scottish dirk, and Renaissance stiletto. Some daggers have blades coated with silver for use against enchanted creatures.

Dart: A dart is any small projectile designed to be thrown. Most darts are fletched wooden shafts, ranging in length from 6" to 2' long, but they may also be metal spikes or stars. Historical examples include the Roman plumbata, Macedonian kestros, and Japanese shuriken.

Dog: Hunting dogs are fast, lean hounds trained to track and bring down prey by working in packs. Most hunting dogs can scent prey, giving them the equivalent of Tracking proficiency. War dogs are heavy, fierce mastiffs trained to kill on command. While dangerous, they are capable of great loyalty to their masters when properly trained. See the Monsters section for game statistics.

Donkey: A donkey can carry its normal load of 8 stone and move 120' per turn. A donkey can carry its maximum load of 16 stone and move 60' per turn.

Flail: This is a bludgeoning weapon derived from the agricultural flail with a striking head connected to the haft by a flexible chain. Flails are useable with one or two hands. Historical examples include the medieval ball-and-chain, Japanese rentsuru and nunchaku, and Chinese meteor hammer.

Galley, Large: This is a large fully decked ship with a single mast, one large square sail, and multiple banks of oars. Large galleys are 120' to 150' length, 15' to 20' beam, and 3' draft, and can carry up to 4,000 stone (40,000lb) cargo in addition to its crew. A large galley is generally crewed by a captain, 50 marines, 20 sailors, and 180 rowers. Large galleys may be equipped with up to 2 light catapults, one at the bow and one at the stern, and a naval ram. Catapults must be bought separately, while a naval ram increase the cost of the ship by 1/3. A heavy catapult can substitute for 2 light catapults. A historical example is the Mediterranean trireme.

Galley, Small: The small galley is similar to the larger model, but smaller and lighter; length is 60' to 100', beam is 10' to 15', and draft is 2' to 3'. A small galley is generally crewed with a captain, 20 marines, 10 sailors, and 60 rowers. Besides the crew, the ship can carry 2,000 stone (20,000lb) cargo. Small galleys may be equipped with up to 2 light catapults, one at the bow and one at the stern, and a naval ram (increase cost by 1/3). A historical example is the Mediterranean bireme or penteconter.

Galley, War: War galleys are built to serve as the flagship of a fleet. These mighty ships have two masts, full decks, a length of 120' to 150', a beam 20' to 30', and draft of 4' to 6'. Their crew consists of a captain, 75 marines, 30 sailors, and 300 rowers. All war galleys come with a naval ram, a full deck over the rowers, and light wooden towers rising over the bow and stern. These platforms are 10' to 20' square, rising 15' to 20' above the deck. A war galley can be fitted with up to 3 light catapults, and can carry 6,000 stone (60,000lb) in addition to its crew. A heavy catapult can substitute for 2 light catapults. A historical example is the Mediterranean quinquereme.

Garlic: Garlic causes a vampire to cringe for 1d4 rounds if presented with confidence.

Grappling Hook: These large hooks are made of sturdy iron and can be used for anchoring a rope. The hook may be thrown or attached manually by a climber. A successful attack throw is required to throw a grappling hook onto a target.

Hammer (small): The small hammer can be used for construction or as a mallet with iron or wooden spikes. If used to fight, the small hammer deals 1d4 damage.

Hat: A hat is a cap, fez, turban, or other headgear for protecting the head from the elements.

Holy Symbol: A cleric is required to own a holy symbol. These symbols will be different for each religion, but they are often worn as a necklace. In the Auran Empire, the holy symbol of Ammonar is the winged sun.

Holy Water: Holy water is water that has been blessed by a cleric of 7th level or higher. It is used in some church rituals, and is a formidable weapon against the undead, inflicting 1d8 points of damage for 2 rounds. Holy water cannot retain its holy power if it is stored in any other container than the special vials it is placed in when blessed.

Horse, Heavy: A heavy horse can carry its normal load of 40 stone and move 120' per turn. A heavy horse can carry its maximum load of 80 stone and move 60' per turn. Heavy horses are normally trained for draft. Only a small percentage of the otherwise placid heavy horses can be trained for war. A historical example is the medieval destrier (warhorse).

Horse, Light: A light horse can carry its normal load of 20 stone and move at 240' per turn. A light horse can carry its maximum load of 40 stone and move at 120' per turn. Light horses are trained for riding or war. Historical examples include the medieval palfrey and jennet (riding horse), medieval rouncey (warhorse), and Mongolian and Turkoman horse.

Horse, Medium: A medium horse can carry its normal load of 30 stone and move at 180' per turn. A medium horse can carry its maximum load of 60 stone and move at up to 90' per turn. Medium horses are trained for draft, riding, or war. Historical examples include the medieval hackney (draft or riding horse), medieval courser (warhorse), and Sarmatian medium horse.

Hut: A hut is a 10' square building with an earthen floor and thatched roof. Serfs, unskilled laborers, and other working poor generally live in such homely dwellings.

Ink: This is a small pot of black ink. Ink can be purchased in other colors, but it costs twice as much.

Inn: An inn is an establishment that offers food, drink, lodging, and stabling. They are a common meeting place for adventurers. Slum inns are gambling dens, whorehouses, and flophouses, frequented by gamblers, harlots, and ruffians. Average inns include coaching inns, hostels, and traveler's lodges designed for travelers and traders. Superb inns are the preserve of wealthy merchants and nobles.

Iron Spikes: These sturdy pitons can be used to wedge doors open or spike them shut or to provide belaying points for ropes.

Javelin: Javelins are short spears, 3' to 6' long, designed for throwing. Historical examples include the Greek javelin, Roman pilum and verutum, early medieval angon, and Zulu assegai.

Lamellar Armor: Lamellar armor is made of small bronze, iron, or steel plates laced together in parallel rows with silk, leather thongs, or cotton. It is similar to scale armor, from which it evolved, and comparable in protection to banded armor. Lamellar is generally worn as a cuirass over light chain or leather, and sometimes sewn to the backing. Lamellar would also include leather lames worn over chain. Historical examples include Mongolian lamellar, medieval brigandine and splinted armor, Japanese o-yori armor, and Roman lorica squamata.

Lance: Lances are long spears, 12' to 16' in length, designed for mounted warriors. Despite their length, they are used one-handed. Historical examples include the Greek xyston, Persian and Byzantine kontos, and medieval lance. Lances do double damage when used to charge, but impose a -1 penalty on initiative rolls.

Lantern: Lanterns are used in dungeon adventures to provide light. They burn one oil flask for each four hours, or 24 turns, and have an effective light radius of 30'. Lanterns can be closed to hide the light or protect it from wind.

Leather Armor: Leather armor is made of hardened leather or laminated linen. Leather armor usually consists of spaulders (shoulder armor), cuirass, and tassets (flaps covering the groin and thighs). It is lighter but less protective than more reinforced leather armors such as ring mail. A historical example is Macedonian linothorax armor.

Lifeboat: Lifeboats typically have a 20' length, 4' to 5' beam, and 1' to 2' draft. They are equipped with rations to feed 10 human-sized beings for 1 week. The mast folds down for storage of the lifeboat on large ships' galleys, where there are typically 2 to 3 lifeboats. There are 1 or 2 lifeboats on small ships or galleys. Lifeboats weigh 50 stone (500lb) and will take up this much weight, each, on a vessel. The lifeboat itself is capable of holding a weight of 150 stone (1,500lb) in addition to crew.

Lock: This is a common iron lock with a key. More complex locks, made by highly skilled locksmiths, might be available (Judge's discretion); these impose penalties on a thief's proficiency throws to Open Locks.

Longship: The longship is a graceful, light ship with a single square-sailed mast, a 60' to 80' length, 10' to 15' beam, and 2' to 3' draft. Longships can operate equally well on oceans, coasts, or rivers, making them ideal raiding vessels. The standard crew is a captain and 75 sailors, of which 60 may row when the wind is low. Longship sailors are generally also marines (fighters). In addition to crew, longships are capable of holding a weight of 2,000 stone (20,000lb). A historical example is the Viking drakkar.

Mace: A mace is a bludgeoning weapon consisting of a 2' to 3' wood or metal shaft and a heavy stone or metal head, useable with one or two hands. Historical examples include the Egyptian bronze-headed mace, medieval flanged mace, Persian horseman's mace, Russian pernach, and Slavic bulawa.

Manacles: These are used to bind hands or feet. Characters bound with manacles can escape if they have the Contortionist proficiency (as described in Chapter 4), or by making a proficiency throw to Open Locks.

Morning Star: This is any type of large mace-like weapon with a spiked metal head. Historical examples include the medieval morning star, German chain-morning star, English holy water sprinkler, Flemish goedendag, and Japanese tetsubo. Any flails and maces too large to be used one-handed can also be treated as morning stars. Morning stars impose a -1 penalty on initiative rolls.

Mirror: A mirror can be used to check around corners and defend against monstrous gaze attacks. A character using a mirror to see his target suffers a -2 penalty to attack throws, and cannot use a shield, second weapon, or two-handed weapon.

Mule: A mule is the infertile offspring of a horse and a donkey. It can carry its normal load of 20 stone and move 120' per turn. A mule can carry its maximum load of 40 stone and move 60' per turn.

Net: This is a round, weighted cast net designed to entangle and entrap opponents. The chief historical example is the net of the Roman retiarius. A character using a net gets a +2 bonus on attack throws to wrestle opponents.

Oil: Common oil is burned in a lantern to give light. Common oil is usually olive oil, castor oil, or animal extract. Military oil is a weapon made of naphtha, and cannot be easily doused with water. Military oil may be thrown at monsters, dealing 1d8 points of damage for 2 rounds to the creature struck, or poured on the floor and ignited to delay pursuit.

Ox: An ox is a castrated bull, used for cart driving. An ox can carry its normal load of 45 stone and move 60' per turn. An ox can carry its maximum load of 90 stone and move 30' per turn.

Plate Armor: Plate armor is made from large metal plates worn over the chest and vital areas. Chain mail or other protective covering may cover exposed joints. Plate armor provides superior protection over banded plate and lamellar, having larger plates sewn onto a stronger backing. Historical examples include classical panoply (if worn with arm and leg armor), medieval plate and mail armor, Middle Eastern mirror armor, Eastern European plated mail, and Japanese tatami-do.

Pole, Wooden: This pole is a shaft of wood 10' long and 2" thick. Adventurers often carry 10' poles to prod and poke areas that might be trapped, test the strength of ledges or floors, or measure the depth of pools.

Pole Arm: Pole arms are two-handed slashing and piercing weapons with a metal head and a long wooden shaft. Pole arms range in length from 6' to 21'. Historical examples include the Thracian rhomphaia, Dacian falx, and Macedonian sarissa; the medieval bill, fauchard, glaive, guisarme, halberd, partisan, pike, ranseur, spetum, and voulge; the Chinese gun dao; and the Japanese bisento, nagamaki, and naginata. Pole arms can be used to attack from the second rank in melee, and inflict double damage when used in or against a charge, but impose a -1 penalty on initiative rolls.

Pouch/purse: These are 6" x 1' bags of cloth or leather that can contain half a stone (5lb). They can be carried on a shoulder strap or on a belt.

Raft: A raft is a floating platform usually used for river cargo. Professionally built rafts are called barges, and have raised edges to keep out water, small wooden huts for shelter, and steering oars. Barges can be 30' x 40' in size, and can carry 500 stone (5,000 lb) for each 10' square. Makeshift rafts are nothing more than crude platforms of up to 20' x 30'. Each 10' square section will only hold a weight of 250 stone (2,500lb). A makeshift raft can be built in 1 to 3 days for each 10x10 foot raft portion.

Rations, Iron: This food is dried and preserved to be carried on long voyages when securing other food may be uncertain. It will last two months in the wilderness and a week in the foul conditions of a dungeon. The cost for iron rations will vary

depending on quality. The cheapest iron rations consist of hard, dried salted biscuits. Better rations included salted or pickled meat and dried, pickled, or preserved fruit and vegetables.

Rations, Standard: This food is fresh but untreated. It will last for a week in the wilderness; it spoils overnight in dank dungeons. The cost for this food will vary depending on quality. The cheapest standard rations include fresh bread, cheese, and lard. Better standard rations will include bacon or other meat, eggs, beans, and fresh fruit and vegetables.

Ring Mail Armor: Ring mail armor is leather or padded armor that has a large number of small rings sewn directly over the foundation garment. Unlike chain mail, the rings are not physically interlocked with each other, so protection is inferior. Ring mail is closely related to scale armor, which sews leather or horn scales onto the foundation garment, and provides comparable protection. Historical examples include Frankish ring mail, Asian ring armor on leather, and Renaissance eyelet doublets.

Rope, 50': This strong rope, made of animal hair, hemp, or similar fibers, can bear 45 stone, the weight of approximately three human-sized beings.

Sack, Large: This is a 2' x 4' burlap, cloth, or leather bag that can contain 6 stone (60lb). It is normally carried over the shoulder and dropped when combat begins.

Sack, Small: This is a 1' x 2' burlap, cloth, or leather bag that can contain 2 stone (20lb). It is often tied to a belt or spearhead.

Saddle Bag: This is a long pocketed leather sack that can contain 3 stone (30lb).

Saddle & Tack: This includes a leather and wooden saddle with metal fastenings, a leather and metal bridle and bit, and stirrups. Draft saddle and tack is used to harness to a cart or wagon or carry saddle bags; it cannot be used for riding. Riding saddle and tack is designed for the rider's comfort. Military saddle and tack is designed for stability during combat. A character in combat without a military saddle must save v. Paralysis every time he is dealt damage or be knocked off the horse.

Sailing Ship, Large: This large, seaworthy ship has as many as 3 square-sailed masts, with a 100' to 150' length, 25' to 30' beam, and 10' to 12' draft. It has at least one full deck and the bow and stern are raised "castles" that give archers a superior field of fire. The crew for a large sailing ship is a captain and 20 sailors. It can carry 30,000 stone (300,000lb) of cargo in addition to crew. Up to 2 light catapults can be mounted on a large sailing ship. Historical examples include the Roman cladivata and the medieval round ship.

Sailing Ship, Small: This ship is much like the larger version, but has one mast, a 60' to 80' length, 20' to 30' beam, and 5' to 8' draft. Crew consists of a captain and 12 sailors. In addition to the crew, it can carry 10,000 stone (100,000lb) of cargo. Historical examples include the Roman corbita, the Viking knarr, and the medieval cog.

Sap: A sap consists of a heavyweight material wrapped inside a leather sack. Used as a weapon, it provides a +2 bonus to attack throws made to incapacitate.

Scale Armor: Scale armor consists of many small leather, cuir bouilli, or horn scales attached to a backing material of cloth or leather. Scale armor usually consists of a corselet or hauberk worn with leather or padded cloth. It is lighter than lamellar armor, which uses metal scales or lames over leather, and comparable to ring mail. Historical examples include Scythian scale armor, Egyptian scale armor, and early medieval scale armor.

Shield: A character with a shield equipped has his Armor Class increased by 1 point. A shield does not protect a character that is retreating or being attacked from behind, however.

Shoes: Simple leather shoes or sandals are suitable for walking long distances.

Sling: A sling is a projectile weapon, made of braided flax, hemp or wool cord, used to hurl small stones or lead bullets. Slings were used by all armies of the ancient world. Historical examples include the Hebrew shepherd's sling and Greek peltast's sling.

Spear: Wooden shafts, 6' to 8' in length, with metal heads designed for thrusting, spears are the main weapon of the common soldier. Spears can be used one- or two-handed. Historical examples include the Hoplite doru, the medieval winged spear, and the Japanese yari. Characters armed with spears can attack from the second rank in melee and inflict double damage when used in or against a charge.

Spell Book (Blank): A spell book has 100 pages of parchment, and each spell takes up one page per spell level (one page each for 1st level spells). These books can be used by an arcane spellcaster for recording spells.

Staff: A staff is a common weapon made from a stick of hardwood 4' to 6' long, and used two-handed. (A one-handed staff is a club.) Historical examples include the English quarterstaff, Japanese bo stick, and Chinese gun.

Stakes and Mallet: These 18" sharpened wood shafts are carried by adventures to destroy vampires.

Sword: The classic weapon of knights and kings, the sword includes straight and curved slashing and thrusting blades of 30" to 40" in length useable with one or two hands. Historical examples include the Roman spatha, Viking sword, medieval knightly sword and falchion, Japanese katana, and Chinese jian and dao.

Sword, Short: The short sword includes straight and curved slashing and thrusting blades, generally less than 30" in length, meant to be used with one hand. Historical examples include the Egyptian khopesh, Greek xiphos, Roman gladius, Japanese wakizashi, Arab scimitar, Persian shamshir, Turkish yatagan, and Indian talwar.

Sword, Two-Handed: The two-handed sword includes straight and curved slashing and thrusting blades, 40" or more in length, requiring two hands to use effectively. Historical examples include the medieval longsword, the Renaissance zweihänder, Scottish claymore, Japanese no-dachi, and Chinese zhanmadao. Two-handed swords impose a -1 penalty on initiative rolls.

Thieves' Tools: Thieves' tools include long metal picks and probes, fine wires, tiny saws, miniature hammers, and an assortment of skeleton keys. Thieves' tools are required to make proficiency throws to Open Locks and Find/Remove Traps.

Tinderbox: This is a tinderbox used to start fires. Lighting a torch with flint and steel takes a full round, and lighting any other fire with them takes at least that long.

Torch: Torches are 1' to 2' long pieces of wood tipped with pitch. A torch burns for six turns (1 hour), clearly illuminating a 30' radius. If a torch is used in combat, it deals 1d4 damage.

Townhouse: A townhouse is a 30' square two-story building with a wooden floor and stairs and thatched roof. Wealthy yeomen, master craftsmen, merchants, and other professionals might live in such a dwelling.

Troop Transport, Large: This is a large sailing ship reinforced for war and modified to carry additional troops. It can carry 50 marines in addition to its normal complement of 20 sailors.

Troop Transport, Small: This is a small sailing ship reinforced for war and modified to carry additional troops. It can carry 25 marines in addition to its normal complement of 12 sailors.

Wagon: This is a four-wheeled, open vehicle for transporting heavy loads. Generally, two or four heavy horses draw a wagon. Two mules or medium horses can be substituted for one heavy horse. If the wagon is pulled by two heavy horses, it can transport up to 160 stone at 60' per turn, or 320 stone at 30' per turn. If the wagon is pulled by four heavy horses, it can transport up to 320 stone at 60' per turn, or up to 640 stone at 30' per turn. A wagon can move at a similar speed and conditions as a cart.

Warhammer: A warhammer is a bludgeoning weapon with a 2' to 3' wooden or metal shaft and a broad metal head shaped like a hammer. It is designed for crushing armor, and useable with one or two hands. The chief historical example is the late medieval warhammer.

Waterskin/Wineskin: This container, made of hide or preserved animal bladder, will hold 2 pints (1 quart) of fluid.

Whip: This is a long, single-tailed whip of the sort used to herd cattle. Used as a weapon, it provides a +2 bonus to attack throws made to disarm or knock down opponents.

Wolfsbane: Wolfsbane (dried aconite flowers) may drive off werewolves and other lycanthropes if a character strikes the monster in hand-to-hand combat with the sprig. If the lycanthrope fails a saving throw versus Poison, it must flee as if turned.

Retainers

In addition to buying equipment, adventurers may also spend their money to hire various NPCs, known as retainers, to assist them. There are four types of hirelings. *Hirelings* are bearers and men-at-arms hired to accompany the adventurers on expeditions. *Henchmen* are NPC sidekicks, companions, and associates. *Henchmen* are typically very loyal and are willing to take reasonable risks; in particular, they are the only sort of hireling who will generally accompany an adventurer into a dungeon, lair, or ruin. *Mercenaries* are hired soldiers, and will guard, patrol, and otherwise serve in wilderness settings, but only as part of a larger force, not an adventuring group. *Specialists* are hired individuals who have a particular trade or who have special knowledge. These individuals are usually hired for a specific task.

Characters are limited to a finite number of retainers, which is indicated by the character's CHA score. Retainers are not mindless slaves, and although they will share the risks of the PCs, they will not act as battle fodder willingly. In fact, if abused in any way, retainers will typically warn others of this abuse and the PCs will soon find it difficult to hire other retainers.

Hirelings

Players may find it useful to have their characters hire bearers to carry light sources into ruins and dungeons (and to carry treasure out) and men-at-arms to aid in combat. In some areas there may be a guild where such people may be found and hired, in other areas characters may have to advertise. Pay must be negotiated and what will be asked will depend on the situation the hirelings think they may get into and the reputation of the characters hiring them.

Bearers have 2 hit points and generally will only fight if cornered and there is no other choice – even then their effective level (used in attack rolls) is -2. They will carry light sources and baggage willingly so long as they are paid, fed, treated well, and not exposed to much mortal danger. Minimum pay: 1 SP/day.

Men-at-Arms will fight but consider being used as a bearer (except of treasure they get a share of) to be beneath them. Green Men-At-Arms have 4 hit points, an effective combat level (used in attack rolls) of 0 and can use whatever armor and weapons their employers provide. Minimum pay: 5 SP/day plus 1/20 of a share of any non-magical treasure found. Veteran Men-at-Arms have 7 hit points, an effective combat level (used in attack rolls) of 1 and can use whatever armor and weapons their employers provide. Minimum pay: 1 GP/day and 1/10 a share of any non-magical treasure found. Men-at-Arms will serve willingly as long as they are fed, paid, treated well, and not asked to take unusual risks that their employers are not taking with them.

Hireling Morale (Optional): Bearers have a base Morale Rating (MR) of 4. Green Men-At-Arms have a base MR of 7. Veteran Men-At-Arms have a base MR of 9. Base MR is modified by how well the hirelings are treated: -4 for bad treatment, -2 for poor treatment, +1 for good treatment, and +2 for exceptional treatment; and by the CHA bonus of the person paying the hireling. A hirelings MR may also be used to determine how loyal the hireling is to the PCs in cases of attempted bribery and the like.

Henchmen

Henchmen are special hirelings who should be rolled up with ability scores, classes, hit points, and equipment, just like player characters. *Henchmen* are typically hired for a share of treasure (at least 15% of the employer's income) and a monthly fee for food, lodging and expenses. A henchmen's monthly fee is based on his level, as noted on the *Henchmen Monthly Fee table*, below.

Henchmen Monthly Fee

Class Level	Monthly Wage (gp)	Class Level	Monthly Wage (gp)
0	12	10	12,000
1	25	11	20,000
2	50	12	30,000
3	100	13	45,000
4	200	14	60,000
5	400	15	75,000
6	800	16	90,000
7	1,600	17	120,000
8	3,000	18	160,000
9	6,000	19	200,000

When they are hired, potential henchmen should be of lower level than their employer. A first level character can only hire normal men as henchmen; second level characters can only hire first level characters; and so on. There is no way for the henchmen to directly know the level of the PC employer, but if a henchman ever concludes he is more powerful than his employer, it is cause for an immediate Henchman Loyalty roll (see below). Note that henchmen of greater than 4th level are not generally for hire on the market, though they can sometimes be found on adventures.

Morale: All henchmen have a morale score, which is generally 0 plus the employer's Charisma bonus or penalty. This rating can be adjusted at the Judge's discretion. It can be increased if the PC has been particularly good to the henchman, or reduced if the PC has been cruel or contrary to his word.

Morale rolls are made each time the henchman suffers a calamity. A calamity includes suffering an energy drain, a curse, a magical disease, or being nearly killed (Judge's discretion). In addition, the Judge should make a morale roll for each henchman at the end of each adventure whenever the henchman has leveled up, to determine if the henchman strikes off on his own or remains with the adventurer. The Judge will roll 2d6 on the Henchman Loyalty table, adding the henchman's morale, to decide how the henchman responds to the recent events. The Judge may apply adjustments to this roll, probably no more than +/-2, if the henchman is particularly well or poorly paid.

Henchman Loyalty

Adjusted Die Roll	Result
2-	Hostility
3-5	Resignation
6-8	Grudging Loyalty
9-11	Loyalty
12+	Fanatic loyalty

Hostility means that the henchman will leave the service of the character, and will consider him a rival and enemy in the future. The henchman can never be attracted to the character's employ again.

Resignation means the henchman will leave the character's employment, but he bears no ill will to his former master, and could be recruited to work for the character again in the future.

Grudging Loyalty means the henchman is reluctant to continue in the character's service, but sees no better options. If the character does not make any improvements to the terms of service, the henchman's next loyalty roll will be at a -1 penalty.

Loyalty means that the NPC will continue in the character's service with enthusiasm.

Fanatic Loyalty means the henchman has become a dedicated and sworn servant of the character. All future morale rolls will be at +2.

A henchman's morale score is permanently decreased by 1 each time he suffers a calamity, and permanently increased by 1 each time he gains a level while in the adventurer's service.

A player character may hire at most 4 henchmen, adjusted by

the character's Charisma bonus or penalty. Any attempts to hire more than this number of henchmen will cause the character to lose one of his existing henchmen. Mercenaries and specialists do not count toward a character's maximum number of henchmen, since they do not require the same level of personal loyalty.

Experience: Henchmen gain experience when they participate in adventure; however, as they are under the command of a player character, only one-half of a share of XP is allocated to each henchman.

Mercenaries

Mercenaries are generally hired to garrison a stronghold or wage war in military campaigns. Mercenaries will not accompany their employers on highly dangerous adventures such as dungeon exploration unless they become henchmen. The GM should determine what constitutes a military campaign and what constitutes an adventurer depending on the overall circumstances. Mercenaries do not count toward a character's maximum number of retainers, since they are not the same kind of hired help.

Mercenary Troop Table

Mercenary Type	GP Wage per Month				
	Dwarf	Elf	Goblin	Human	Orc
Commoner	-	-	-	1	-
Light Infantry Gear: sword, shield, leather armor	-	5	1	3	2
Heavy Infantry Gear: sword, shield, chainmail armor	5	7	-	4	2
Crossbowman Gear: heavy crossbow, chainmail armor	7	-	-	5	3
Mounted Crossbowman Gear: crossbow	20	-	-	-	-
Bowman Gear: sword, short bow, leather armor	-	12	4	7	5
Mounted Bowman Gear: shortbow	-	35	-	15	-
Longbowman Gear: sword, longbow, chainmail armor	-	25	-	10	-
Light Mounted Gear: lance, leather armor	-	25	-	10	-
Medium Mounted Gear: lance, chainmail armor	-	-	-	15	-
Heavy Mounted Gear: lance, sword, plate armor	-	-	-	20	-
Wolf Mounted Gear: spear, leather armor	-	-	6	-	-

The Mercenary Troop Type table above list the typical wages of mercenary types based on type. The costs listed are the mercenaries' wages only. The cost of armorers to make and repair troop armor and weapons, stable hands to groom horses, caravans to provide supplies while in the field, and other miscellaneous expenses are not included. Mercenaries in garrison need only be paid their wages, but mercenaries on campaign will expect a share of military plunder in addition to wages.

Morale: Mercenaries have morale like henchmen, but mercenary morale is based on their training and equipment rather than the personal magnetism of their employers. Mercenaries may have additional bonuses or penalties to morale based on working conditions. If the mercenaries are being killed frequently or subjected to other abuses, morale will be low. If the mercenaries are enjoying riches and excitement, it might be

higher. All of these factors are considered by the Judge.

Mercenary Type	Base Morale
Commoner Militia	6
Barbarians or humanoids	7
Soldiers	8
Mounted Soldiers	9
Elite Soldiers	9
Fanatic or Devoted Soldiers	10

Specialists

Below are several possible specialists and typical monthly pay rates. This list is not exhaustive, and the GM may create more kinds of specialists as needed.

Alchemist (250gp/month): Alchemists are valuable specialists because they dedicate their expertise to creating potions and other concoctions. They may work as assistants to mages to help them create potions. They may also research new potions as if they were 5th level mages, but at twice the base time and cost. See the section on Magic Research.

Animal Trainer (25gp to 250gp/month): Characters wishing to ride hippogriffs or employ carnivorous apes as guards will need the assistance of an animal trainer. The lowest cost above is for a standard animal trainer, able to train one type of "normal" animal such as warhorses; those able to train more than one sort of animal, or to train monsters such as hippogriffs, are more expensive to hire. The Judge decides how long an animal must be trained, based on the nature of the training. It will take a minimum of 1 month to tame a wild animal. Likewise it takes a minimum of one month to teach an already tame animal one behavior. After the first month, an animal has become accustomed to a trainer and can be taught additional behaviors at half the time per behavior. If training is interrupted, all time already spent on that particular behavior is lost.

If an animal is being tamed and the time is interrupted, the animal will rebel and cannot ever be tamed. In some cases, animal training may take years, a fact that adventurers may find inconvenient as well as expensive. A single animal trainer can train and manage no more than 6 animals at a time. Once an animal is fully trained and put into service the animal trainer won't be needed to handle it any longer.

Armorer (75gp/month): Each month, an armorer can make 40gp worth of weapons, armor, or shields. In addition to being hired for producing weapons and armor, armorers must be hired at the frequency of 1 per 50 troops in order maintain fix armor and weapons. Armorers may be assisted by up to two journeymen (25gp/month) and four apprentices (5gp/month). An armorer with one journeyman and two apprentices produces 100gp per month and can maintain 125 troops; an armorer with two journeymen and four apprentices produces 160gp per month and can maintain 200 troops.

Engineer (250gp/month): Engineers plan and oversee large construction projects, such as building strongholds. The number of engineers required is based on the value of the project. A minimum of 1 engineer is needed, with an additional engineer per 100,000 gp value of the project. For example, if a project is 60,000gp it will require 1 engineer, and if it is 200,000gp it will require 2 engineers. Human engineers usually handle large aboveground structures, while dwarves are usually hired for underground construction.

Healer (healer 1gp/day/patient, physicker 2gp/day/patient, chirurgeon 4gp/day/patient): Healers are trained to treat wounds and diagnose illnesses. Being treated by a healer requires clean, sanitary conditions and bed rest. A patient under treatment of any healer regains an extra 1d3 body points per week. In addition, physickers can non-magically *neutralize poison*, *cure disease*, or *cure light wounds* with a D20 roll of 18+ once per day per patient. Highly skilled chirurgeons can non-magically *neutralize poison*, *cure disease*, or *cure serious wounds* with a D20 roll of 14+ once per day per patient. A normal healer can treat up to three patients per day, a physicker can treat up to four patients per day, and a chirurgeon can treat up to five

patients per day.

Mariner (rowers, 3gp/month; sailors 6gp/month; navigator 25gp/month; captain 100gp/month): Rowers are unskilled normal humans who man oars of vessels. Sailors are skilled normal humans who can handle a ship. The navigator understands how to read charts and navigate based on instruments and the position of the stars. He is required any time a ship will venture beyond sight of a coast. A captain is required for any large ship, is skilled like a sailor, and has more intimate knowledge of the particular coasts he frequents. In general, all such characters are normal men, and are not armored; they will usually be armed with clubs, daggers, or short swords.

Ruffian (carousers, 6gp/month; footpads, 25gp/month; spy 125gp/month; thug 25gp/month): Ruffians are specialists in petty crime. Carousers are 0th level brawlers and hoodlums that populate inns and taverns. Footpads are 1st level thieves. Spies are 4th level thieves. Thugs are 1st level assassins. Ruffians are hired on a monthly basis. They can be used as enforcers or muscle, or sent on various missions, such as assassinating, carousing, spying, stealing, or treasure-hunting. Ruffians hired for missions receive a success fee in addition to a monthly wage, and will expect their employer to bail them out of trouble should they be caught. Ruffians will not go on adventures unless recruited as henchmen, but may gain XP from missions. Ruffians who advance in level from successful missions will earn higher wages; use the Henchmen Monthly Fee table for high level ruffians. Ruffians may or may not be reliable, and could stab the hiring character in the back (maybe literally!).

Sage (500gp/month): Sages are rare; they usually specialize in a subject area, such as a sage specialist in dragons. Sages may be consulted for information. If the information is particularly difficult to obtain, it will cost the characters extra. Characters may have to pay the monthly rate in addition to any other supplies the sage needs to research their question. The Judge will decide these costs. Despite the special knowledge sages have, they are occasionally wrong when it comes to particularly obscure questions. The Judge will decide what questions are obscure and the probability of achieving a wrong answer. If the characters receive a wrong answer, they may not realize it!

Optional Rules

The following rules are optional. The GM decides if they will be used.

Minor Optional Rules

Encumbrance: Characters can normally carry twelve (plus STR bonus) items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item. Oversized items (two-handed weapons, anything as tall as the character or that requires two hands to carry) count as two items. A character carrying 6 or fewer items is unencumbered. A character carrying 7-12 items is lightly encumbered. A character carrying 13-18 items is heavily encumbered. A character carrying more than 18 items is over-encumbered. *Option:* Adjust number of items for each encumbrance class by the character's STR bonus.

Individual Initiative: Roll d20 + DEX bonus for initiative order each combat round. Use Hit Dice/2 instead of DEX for monsters. Characters and monsters act in Initiative order, from high to low. Spell casters casting a spell must declare the spell being cast and its target before initiative is rolled.

Energy Drain: If the standard energy drain rule seems too harsh, try the following instead. Each energy level drained subtracts one from any roll to which the character would add his level (or his level/2). 1 point of energy drained is recovered every L days where L is equal to the hit dice of the monster that drained the energy level.

Avoiding Save-or-"Die": There are a number of effects which cause the character to be taken out of play permanently or for a long period of time unless a saving throw is made (e.g. instant death, turn to stone, etc.). If this standard rule seems too harsh, try the following instead. If a character fails a save-or-"die" roll, the negative effect happens immediately but it can be reversed if the character receives 5 minutes of careful care in a non-combat environment starting within a number of minutes/melee rounds equal to the affected character's CON stat. The GM may rule that certain issues still require further treatment within 24 hours or the effect recurs (e.g. poison must still be neutralized) or may not be handled this way at all.

Traditional Experience for Treasure: Traditionally, experience points were only given for treasure found in 1e and were not given for treasure spent. To use this system, ignore the standard rules for experience from treasure found and experience for treasure spent and use the following rule instead.

At the end of an adventure, total the value of all non-magical treasure found during the adventure in gold pieces. Divide the result by the number of characters in the party to determine the number of XP each character receives from treasure. Henchmen/Retainers count as 1/2 person and hirelings count as 1/10 person (round up for PCs, round down for others).

Contest of Skills: A contest of skills is handled similar to combat, except the opponents aren't trying to kill one another; they are trying to defeat their opponent with their skills. Like in a combat, opponents in a contest of skills make an initiative roll for each round to determine who "attacks" first in the round. Instead of making a roll of attack bonus vs. Armor Class, each contestant makes the appropriate skill roll based on his class and background. If the attacker's result is equal or higher than the defender's result, he causes "skill damage" equal to 1d6 + stat bonus of the stat used by the skill. Skill Damage is removed from a set of Contest Points. At the beginning of the contest, each contestant's Contest Points which are set equal to the score of the stat used by the skill plus the character's level. When a character's Contest Points fall to 0 (zero) or less, the contest of skills is over, and the loser is defeated (knocked unconscious, humiliated, loses the bet, etc.). Contest Points cannot normally be increased during a Contest of Skills – unless someone successfully cheats.

Fire-And-Forget Magic

The first edition of the world's most popular fantasy roleplaying game used a much different system of magic from that of Microlite20-based games. This system had the magic-user or cleric select and prepare a set number of spells of certain levels in advance. Each prepared spell could only be cast once. This system can easily be substituted for the standard Microlite78 spell casting system using the following rules.

Both magic-users/illusionists and clerics/druids must select and prepare specific spells from their collections in advance. The number of spells of specific levels a character can prepare is limited by their class level (see below for details). Preparing spells takes one hour of uninterrupted time: magic-users must study their spell books while clerics must meditate and commune with their deity.

Casting a prepared spell does not cost any hit points, but once cast, a spell cast is no longer in memory and may not be cast again. Casters may prepare multiple copies of the same spell.

In combat, if a fire-and-forget caster is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles and the caster loses the spell from memory just as if he had cast it.

Number of Spells Prepared Per Day (Arcane Spell Casters):

Magic-User Level	1	2	3	4	5	6	7	8	9
1	1								
2	2								
3	2	1							
4	3	2							
5	4	2	1						
6	4	3	2						
7	4	3	2	1					
8	4	3	3	2					
9	4	4	3	2	1				
10	4	4	3	2	2				
11	4	4	4	3	3				
12	5	4	4	3	3	1			
13	5	5	4	3	3	2			
14	5	5	5	4	4	2	1		
15	5	5	5	4	4	3	2		
16	5	5	5	4	4	3	2	1	
17	5	5	5	5	5	4	3	2	1
18	5	5	5	5	5	4	3	2	1
19	5	5	5	5	5	5	4	3	2
20	5	5	5	5	5	5	4	3	2

Number of Spells Prepared Per Day (Divine Spell Casters):

Cleric Level	1	2	3	4	5	6	7
1	1						
2	2						
3	2	1					
4	3	2					
5	3	3	1				
6	3	3	2

20	9	9	9	8	7	5	2

Traditional Saving Throws

Some gamemasters and players prefer the traditional "five category" saving throw system used in early editions of the world's most popular fantasy roleplaying game. The following saving throw tables can be substituted for the standard Microlite81 saving throw system if the GM desires.

Cleric and Druid Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-4	16	11	14	12	15
5-8	14	9	12	10	12
9-12	12	7	10	8	9
13-16	8	3	8	4	6
17+	6	2	6	4	5

Fighter, Paladin, and Ranger Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
0 lvl Human	17	14	16	15	18
1-3	15	12	14	13	16
4-6	13	10	12	11	14
7-9	9	8	10	9	12
10-12	7	6	8	7	10
13-15	5	4	6	5	8
16-18	4	4	5	4	7
19+	4	3	4	3	6

Magic-User and Illusionist Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-5	16	13	13	13	14
6-10	14	11	11	11	12
11-15	12	9	9	9	8
16-18	8	7	6	5	6
19+	7	6	5	4	4

Thief and Assassin Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-4	16	14	13	15	14
5-8	14	12	11	13	12
9-12	12	10	9	11	10
13-16	10	8	7	9	8
17+	8	6	5	7	6

Item Saving Throws

When characters (and NPCs) die from a particularly damaging event, such as the fire breath of a dragon or a fire ball spell, some or all of their items may be destroyed. A GM using this optional rule may use either of the following methods to determine what items are destroyed:

Method 1: Whenever characters (and NPCs) die from a particularly damaging event, such as the fire breath of a dragon or the spell fire ball, all ordinary possessions on a character's body should be considered destroyed. Magical items may not be destroyed, and are allowed saving throws of the appropriate type for the attack based on the character's saving throw. Items that have bonuses will receive an equal bonus on the saving throw. For instance, a +1 dagger receives a bonus of +1 to the roll.

Method 2: Make a roll in the kind of situation mentioned above, as well as in situations when items are exposed to crushing damage (from falls), acid, or any other event that could feasibly destroy them. The GM will roll either 1d4 or 1d6, depending on the severity of the situation. Magic items have a chance of surviving based on their relative power. For instance, a +2 shield would survive on a roll of 1-2 on a d4 or d6. Items for which "pluses" do not apply can be assigned a number between 1 and 3. Scrolls and potions may survive on a roll of 1 on a d4 or d6, a staff or wand may survive on a roll of 1-2; any other items such as rings, rods, and other miscellaneous magical items are more durable and survive on a roll of 1-3. If an item which has "pluses" is damaged, it may not be destroyed outright, but may lose one "plus." Thus, a +2 shield becomes a +1 shield on a failed saving throw roll.

Modifiers: The GM should apply bonuses or penalties depending on the situation. If an attempt is made to intentionally damage an item, there may be a penalty of 2 to the roll. Bonuses may apply if an item is well protected. No penalty or bonus should be more than 2.

Psionics

Psionics are mental powers which aren't magic but sometimes duplicate magical abilities. If psionics are used in a campaign, any highly intelligent being has a slight chance of being psionic.

Creating Psionic Characters: Characters should check for psionic ability at character creation. Roll a d20 and add MIND bonus. On a roll of 21 or higher, the character may opt to have psionics abilities that will manifest as the character goes up levels. If the roll is successful and the player opts for the character to have psionics, roll 2d6. The result is the maximum number of psionic abilities the character will manifest. The character's Experience Base is immediately increased by +100/+2500 for each psionic ability the character may manifest.

Manifesting Psionic Abilities: At character creation and every time a psionic character goes up a level, the character rolls to see if a new psionic ability manifests. Roll 1d20 + MIND bonus against a DC of (21 - the maximum number of psionic abilities the character may manifest). On a successful roll, the character manifests a new psionic ability. Roll on the Psionic Ability Table below to determine the new ability. Reroll if the character already has the ability rolled.

Manifesting Psionic Attack and Defense Modes: Psionic characters manifest psionic attack and defense modes as they

gain psionic abilities. Specific modes manifest as the character manifests a specific number of abilities. See Psionic Combat below for more information.

Number of Psionic Abilities Manifested	Attack Mode Manifested	Defense Mode Manifested
1	Mind Thrust	Thought Shield
2		Mind Blank
3	Ego Whip	
4		Mental Barrier
5	Psionic Blast	
6		Intellect Fortress
7	Id Insinuation	
8		Tower of Iron Will
9	Psychic Crush	

Using Psionic Abilities: Using a psionic ability is an action. Successful use requires a 1d20 + MIND Bonus + Level/2 versus the DC given in the ability description. Certain abilities also cost HP (even if the attempt is unsuccessful). The power of many psionic abilities is determined by the Ability Level of the specific psionic ability. This is the number of levels the character has possessed the specific ability. Simply recording the character's level when he gets the ability will make calculating this easy.

Psionic Abilities: The following psionic abilities may manifest. Which abilities manifest should be determined randomly. The GM is free to create other abilities.

Roll	Psionic Ability	Roll	Psionic Ability
1	Animal Telepathy	13	Etherealness
2	Astral Projection	14	Healing Trance
3	Aura Alteration	15	Invisibility
4	Body Control	16	Levitation
5	Body Equilibrium	17	Mind over Body
6	Clairaudience	18	Precognition
7	Clairvoyance	19	Psychic Surgery
8	Dimension Door	20	Shape Alteration
9	Domination	21	Telekinesis
10	Empathic Projection	22	Telepathy
11	Empathy	23	Teleportation
12	ESP	24	Suspend Animation

Animal Telepathy: Character can establish 2-way mental communication with an animal. DC is 12. HP Cost is 1 HP per minute. Level of communication depends on the intelligence of the target. Does not require target to obey or be helpful.

Astral Projection: Character can enter a trance and project himself into the Astral Plane. This works like the Astral Spell except that speed of travel and other effects depend on Ability Level. DC is 15. HP Cost is 1 HP per 10 minutes.

Aura Alteration: Character can alter a target's aura to either to disguise the target's alignment and level, or to remove a compulsion or charm. Disguise has a DC of 15, costs 5 HP, lasts 10 minutes per Ability Level, can make the target appear as any desired alignment and can modify the character's apparent level by up to Ability Level levels. Removing a charm, compulsion, or curse costs 10 HP and grants the target another saving roll.

Body Control: Character can adjust his body to exist in unusual conditions (extreme temperatures, hostile/destructive elements like poison gas, water, acid, fire, lava, etc.). DC is 12 for unusual conditions like extreme temperatures, 15 for hostile environments like underwater or lack of good air. 18 for extreme conditions like acids, lava, etc. Costs 1 HP per 10 minutes. Maximum duration is Ability Level x 10 minutes. Reroll Ability check every hour.

Body Equilibrium: Character can adjust his body weight to correspond to the surface he is walking on so as not to sink into water, mud, quicksand, etc. DC is 12. Costs 1 HP per 10 minutes. Maximum duration is Ability Level x 10 minutes. Reroll Ability check every hour.

Clairaudience: Character can hear at a distance (30 feet +

Ability Level x 10). DC is 12 (plus +2 for each foot of material between psionic and target area). Costs 1 HP per minute.

Clairvoyance: Character can see at a distance (30 feet + Ability Level x 10). DC is 12 (plus +2 for each foot of material between psionic and target area). Costs 1 HP per minute.

Dimension Door: Character can teleport up to Ability Level x 20 feet. DC is 12 is target location visible, 15 otherwise. Costs 5 HP.

Domination: Character can force another to do their will. DC to establish is 15 + target's level/hit dice. DC to maintain for another round is 15 + target's level/hit dice. Costs the target's level/hit dice in HP per minute.

Empathic Projection: Character projects an emotional state upon targets. This works similar to the Suggestion spell but is limited to suggesting emotions. DC is 12 if touching a single target, 15 otherwise. Range: 30 feet + (Ability Level x 10). Can affect up to Ability Level targets. HP Cost is 3 per target.

Empathy: Character senses the emotions/emotional needs of the target(s). DC is 15. Cost: 1 HP per minute if a single target, 3 HP per minute otherwise. Range: 30 feet + (Ability Level x 10).

ESP: Character can read the surface thoughts of the target. DC is 10 + target's level/hit dice. Cost: 1 HP per minute if touching target, 3 HP per minute otherwise. Range: 30 feet + (Ability Level x 10). Searching for specific/deeper thoughts adds 5 to the DC (+10 if the target is specifically hiding them) and doubles the HP cost.

Etherealness: Character can alter his body vibrations to those of the Ethereal Plane, but is only able to carry Ability Level * Ability Level pounds of material with him. DC is 12 + 1 per 20 pounds of weight carried. HP Cost: 1 HP per 10 minutes.

Healing Trance: Character can go into a trance and heal Body Points quickly. A maximum of one BP per Ability Level can be healed. DC is 10 + number of BP to be healed. Trances lasts a number of hours equal to the BP to be healed, and 1 BP is healed per hour of trance. HP Cost: BP healed x 2.

Invisibility: Character can turn invisible by making those in range not notice the character. Character cannot attack and maintain invisibility. Range is Ability Level x 10 feet. DC is 12 (or 15 if the targets are highly alert).

Levitation: Character can float in the air. DC to float is 12 and it costs 1 HP per minute. Character can ascend or descend Ability Level feet per minute by making an ability check with a DC of 15. Character can move laterally Ability Level feet per minute by making an ability check with a DC of 18.

Mind over Body: Character can suppress bodily needs like food, water, and sleep for two days per Ability Level. Thereafter the character must spend an equal number of days resting before this ability can be used again. No ability check or HP cost.

Precognition: Character has a vague sense of the future. While using this power the character cannot be surprised and adds his Ability Level/2 (round up) to initiative, combat rolls, and any other d20 rolls where an ability to know what might happen in the near future would be helpful. DC is 15 and the roll must be made each minute the ability is used. HP cost is 5 HP per minute.

Psychic Surgery: Character and target go into a trance to heal target's Body Points quickly. Character must be touching target. A maximum of one BP per Ability Level can be healed. DC is 10 + number of BP to be healed. Trances last a number of hours equal to the BP to be healed and 1 BP is healed per hour of trance. HP Cost: BP healed x 2.

Shape Alteration: Character can modify his appearance similar to the Polymorph Self spell. DC is 12 to make minor changes to

appearance (remaining same species), 15 to make major changes (another species of similar size), and 18 to make more extreme changes. Cost is per hour and is based on type of change: 3 HP for minor changes, 8 HP for major changes, and 15 HP for extreme changes. Maximum duration is Ability Level hours.

Telekinesis: Character can move objects up to Ability Level x Ability Level pounds by mental power. DC is 12 (18 if precise control is needed). HP Cost is 3 HP per minute for slow movement, 8 per attack for combat speed movement.

Telepathy: Character can establish 2-way mental communication with an intelligent target. DC is 12 if target is willing, 18 otherwise. HP Cost is 1 HP per minute. 1 minute of telepathy allows an information exchange equal to 10 minutes of talking.

Teleportation: Character can teleport up to Ability Level * 100 miles. DC is 12 if the target location is intimately known to character, 18 if the target location is well known, and 24 if the target is only known from a clear description. HP Cost is 15.

Suspend Animation: Character can virtually stop all body functions for a predetermined amount of time. Maximum duration is Ability Level x Ability Level weeks. Character will not change during this time. A number of days equal to the number of weeks spend in suspended animation must pass before this ability can be used again. No ability check or HP cost.

Psionic Combat: Only psionic characters that have manifested a psionic attack ability can make a psionic attack. Psionic attacks are made at Strike Speed 10 (the same as Glance attacks). The Psionic Attack Roll is 1d20 + MIND bonus + number of psionic abilities manifested. The attack is successful if it is higher than the target's Psionic Armor Class (10 + MIND bonus + armor bonuses from a psionic defense mode).

Psionic attacks do psionic damage (see below for amounts). Tally psionic damage separately. If the total psionic damage ever becomes greater than the character's current hit points, the character falls into a coma and remains in a coma until he has more hit points than psionic damage points and makes a successful WIL save (may be attempted once per hour). With a night's sleep, psionic damage "heals" 1d6 + twice the number of psionic abilities manifested, if any.

Psionic Defense Modes: Defense modes increase the character's psionic armor class when in use. Only one mode can be in effect at one time. Thought Shield costs 0 HP to use and gives a +1 bonus to the character's psionic armor class. Mind Blank costs 0 HP to use and gives a +2 bonus to the character's psionic armor class. Mental Barrier costs 0 HP to use and gives a +4 bonus to the character's psionic armor class. Intellect Fortress costs 2 HP to use and gives a +4 bonus to the psionic armor class of the character and everyone within 10 feet. Tower of Iron Will costs 3 HP to use and gives a +6 bonus to the psionic armor class of the character and everyone within 3 feet.

Psionic Attack Modes: Mind Thrust costs 1 HP to use and does 1d8 points of psionic damage. Ego Whip costs 2 HP to use and does 2d6 points of psionic damage and the target must make a WIL save or be stunned for one minute. Psionic Blast costs 4 HP to use and attacks everyone in a conic area in front of the psionic doing 1d6 damage to everyone in the affected area, double damage to those in short range (10'), half damage at long range (30'). One attack roll is made and used against all possible targets. Id Insinuation costs 2 HP to use and does 3d6 psionic damage and the target must save vs. Fear or be affected as a fear spell for 1d6 rounds. Psychic Crush costs 5 HP to use and does 4d6 psionic damage and 2d6 physical (HP) damage.

Deities and Divine Intervention

Characters will find it helpful to follow one of the gods. Although Clerics, Druids, and Paladins have special access to the deities, other classes may receive advice and assistance at times as well. A character may select any deity (or pantheon in some campaigns) to follow from the campaign allowed by the GM.

Divine Intervention: Deities will occasionally assist their

followers when petitioned for aid. There is a chance of angering the deity and a strong possibility that the deity will not deign to take an interest in mortal affairs at that time. The petitioner may thus receive aid, suffer harm, or get no response at all. Petitioning for divine intervention more often than once a week results in automatic retribution.

Petitioning for divine intervention can be done at any time provided the character is capable of thought. A d100 roll on the appropriate table using the column for the characters level below will determine the result. Clerics, Druids, and Paladins add 5 to their level before consulting the chart.

Greater Deity	1-5	6-10	11-15	16-20	21+
Result					
Retribution	01-80	01-70	01-60	01-50	01-40
No Effect	81-95	71-90	61-85	51-80	41-70
Intervention	96-00	91-00	86-00	81-00	71-00

Major Deity	1-5	6-10	11-15	16-20	21+
Result					
Retribution	01-70	01-60	01-40	01-30	01-20
No Effect	81-90	61-80	41-70	31-60	21-50
Intervention	91-00	81-00	71-00	61-00	51-00

Minor Deity	1-5	6-10	11-15	16-20	21+
Result					
Retribution	01-60	01-40	01-30	01-20	01-15
No Effect	61-85	41-75	31-65	11-55	16-45
Intervention	86-00	76-00	66-00	56-00	46-00

Demi-God	1-5	6-10	11-15	16-20	21+
Result					
Retribution	01-50	01-30	01-20	01-10	01-05
No Effect	51-80	31-65	11-55	11-45	06-35
Intervention	81-00	66-00	56-00	46-00	36-00

Characters may make an offering to their deity before rolling for divine intervention. All offerings must be in the possession of the petitioner at the time of the request (deities do not accept IOUs). This table lists the die roll modifier for various types of offerings:

Offering	Die Roll Modifier
Treasure (1000gp)	+1
Each Potion	+2
Magic Weapon/Armor	+Bonus
Magic Scroll (per spell)	+2
Magic Ring, wand, or rod	+5
Magic Staff	+10
Miscellaneous Magic item	+10
Minor Artifact	+15
Minor Artifact	+25
Accept Minor Quest	+10
Accept Major Quest	+20
Intelligent Being Sacrificed	+Level or HD

Only evil deities accept the sacrifice of intelligent beings. A minor quest will take 4 to 8 months. A major quest will take 1 to 3 years. The quest will be imposed by the deity (and need not involve actual questing).

There is an additional modifier of -15 if the character does not regularly donate at least 10% of income to the deity's temple. Characters who ignore their deity except when in need of help suffer a die roll modifier of -10 to -30 as determined by the GM.

If the result is intervention, the deity will do the minimum needed to answer the request. For Demi-Gods, the maximum would be about the ability of a limited wish spell. For Minor Deities, the maximum would be about the power of a single wish spell. For Major Deities, the maximum would be about the about ability of several wish spells. There is no effective limit for what Greater Deities can do.

If the result is retribution, the petitioner takes his level in D6 of damage (plus Body Point damage equal to the character's level if Body Points are being used).

Conversion (Optional): Characters may not willingly change their allegiance to another deity/pantheon except at a full temple of the new deity and then only with a favorable reaction roll from the new deity's priests (large donations to the temple will give favorable modifications to the roll). Lay people accepted by a new god must spend 1d4 weeks (at their own expense) at the temple learning the basic rituals and dogma of their new faith before they can receive any benefits from that faith. Clerics and Druids must spend 1d6 months (plus their level in weeks) in such study before they can cast divine spells above 2nd level again. Druids can only convert to another nature deity.

Spell Level Availability (Optional): A character's deity may limit the level of Divine Spells the character may cast. If the character's deity is a Demi-God, the maximum level of Divine Spells the character has access to is 5th level. If the character's deity is a Minor Deity, the maximum level of Divine Spells the character has access to is 6th level. If the character's deity is a Major or Greater Deity, the maximum level of Divine Spells the character has access to is 7th level.

Special Spells by Deity (Optional): Deities may not offer all of the standard Divine Spells (Cleric) to their clerics. They may simply not provide some of the standard spells, substitute special spells for some of the standard spells, or even add additional spells to the standard spells.

Spell Descriptions

Spells are described here in alphabetical order, divided between cleric, druid, magic-user, and illusionist spells. These spells are listed by level in the next section.

Cleric Spells

Animal Growth

Level: 3

Duration: 12 turns

Range: 120'

One non-magical normal animal will be doubled in size when this spell is cast upon it. The animal can be a "giant" version of the animal, but intelligent animals are unaffected.

Animate Dead

Level: 3

Duration: Permanent

Range: 60'

This spell turns the bones or bodies of dead creatures into undead skeletons or zombies that follow the caster's spoken commands. The undead can follow the caster, or they can remain in an area and attack any creature (or just a specific kind of creature) entering the place. They remain animated until they are destroyed or until a *dispel magic* spell is cast upon them.

The caster may animate a number of hit die worth of zombies or skeletons equal to the caster's level. For example, a 7th level cleric can animate seven skeletons, but only three zombies. These creatures are unintelligent, and do not retain any abilities that they had in life. All skeletons have an AC of 7 and hit dice equal to the creature in life. Zombies have an AC of 8, and the number of hit dice of the living creature +1. It is important to note that if a character is animated in this fashion, he will not have hit dice related to his class level, but instead will have the standard skeleton or zombie hit dice. A lawful character that casts this spell may draw disfavor from his god.

Animate Objects

Level: 6

Duration: 1 round per level

Range: 30'

The caster imbues inanimate objects within 1 square foot per caster level with mobility and a semblance of life. Each such animated object then immediately attacks whomever or whatever the caster initially designates. An animated object can be of any non-magical material. This spell cannot animate objects carried or worn by a creature.

This spell requires considerable interpretation by the GM.

Animated objects can move in a manner logical to their shape, whether this is a slithering rope, a walking chair, a rolling vial, or a shuffling chest. Movement should range from 10' to a maximum of 120'. For example, a chair might move at the full possible movement, but something awkward and without legs, like a chest, might only move at 10'.

Objects attack using the same required attack value roll as the caster. Attack frequency and damage will depend on available weapons and the size of the animated object. The number of attacks should range from 1 per 5 rounds to 1 per 1 round, at the GM's discretion. Damage will be 1d6, unless variable weapon damage is used, in which case damage should range from 1d4 to 5d4 depending on the object type and size. Similarly, the GM will determine the object's hit points.

Astral Projection

Level: 7

Duration: See below

Range: Touch

By freeing his spirit from the physical body, this spell allows the caster to project an astral body onto another plane altogether.

The caster can bring the astral forms of five other willing creatures, provided all subjects are linked in a circle at the time of the casting. These fellow travelers are dependent upon the caster and must accompany him at all times. If something happens to the caster during the journey, his companions are stranded.

The caster projects his astral self onto the astral plane, leaving the physical body behind on the material plane in a state of suspended animation. The spell projects an astral copy of the caster, but only items that exist in the astral plane may be taken along. Since the astral plane touches upon other planes, the caster can travel astrally to any of these other planes. To enter one, the caster leaves the astral plane, forming a new physical body on the plane of existence entered.

While on the astral plane, the astral body is connected at all times to the physical body by a silvery cord. If the cord is broken, the caster is killed, astrally and physically. Luckily, very few things can destroy a silver cord. When a second body is formed on a different plane, the incorporeal silvery cord remains invisibly attached to the new body. If the second body or the astral form is slain, the cord simply returns to the body where it rests on the material plane, thereby reviving it from its state of suspended animation. Although astral projections are able to function on the astral plane, their actions affect only creatures existing on the astral plane; a physical body must be materialized on other planes.

The caster and companions may travel through the astral plane indefinitely. Their bodies simply wait behind in a state of suspended animation. The spell lasts until the caster desires it to end, or until it is terminated by some outside means.

Atonement

Level: 5
Duration: Permanent
Range: Touch

This spell removes the burden of unwilling evil acts or misdeeds from the subject. The creature seeking atonement must be truly repentant and desirous of setting right its misdeeds. *Atonement* may be cast to reverse magical alignment change. This ritual takes 1 turn to cast.

Augury

Level: 2
Duration: See below
Range: 0

An *augury* can tell the caster whether a particular action will bring good or bad results in the immediate future. The base chance for receiving a true reply is 70% + 1% per caster level; this roll is made secretly. The *augury* can see into the future only 3 turns, so anything that might happen after that does not affect the result. Thus, the result will not take into account the long-term consequences of a contemplated action.

Blade Barrier

Level: 6
Duration: 3 rounds per level
Range: 30'

An immobile, vertical curtain of whirling blades shaped of pure force springs into existence. Any creature passing through the wall takes 8d8 points of damage. The area of effect for this spell must be chosen when cast, and can range from 5 square feet to 20 square feet.

Bless (reversible)

Level: 2
Duration: 6 turns
Range: 60'

Bless fills the caster's allies with courage, but does not affect enemies within the affected area of 20' x 20'. Each ally gains a +1 morale bonus and +1 on attack and damage rolls. The reverse of this spell does not affect allies within the effect

area, and incurs penalties of -1 instead of bonuses to the rolls indicated above.

Command

Level: 1
Duration: 1 round
Range: 10'

When a cleric casts this spell, he may give the subject a *single word* command, which it obeys to the best of its ability. The single word must make sense as a single command, such as approach, drop, fall, flee, halt, surrender, sleep, etc. Although a target could be instructed to "die," this will only make the target take on a comatose state for a single round. Note that the caster must be able to speak the language of the target. Any intended target who has more than 5 HD or an INT of over 12 is entitled to a saving throw versus spells. This spell is ineffective against undead.

Commune

Level: 5
Duration: 3 turns
Range: 0

The caster calls upon divine powers in order to seek knowledge. This spell may only be cast one time per week, and the caster may ask three questions that can be answered by "yes" or "no". Divine powers do not look kindly upon those who call upon them for trivial matters, or who call upon them too often. The GM will make certain this spell is not abused. One time per year of game time, the caster may ask six questions instead of the normal three.

Conjure Animals

Level: 6
Duration: 2 rounds per level
Range: 30'

The caster can summon normal mammals to attack enemies designated by the caster. The number of animals that appear is directly related to the caster's level. The caster summons 1 hit die of animals per level of experience of the caster, and each +1 is calculated as 1/4 of a hit die. For example, a 9th level cleric can summon 9 hit dice of animals that could consist of nine 1 HD animals, or three 3 HD animals, or two 4+2 HD animals. Summoned animals will fight to the death or until the duration of the spell ends.

Continual Light (reversible)

Level: 3
Duration: See below
Range: 120'

When cast, this spell produces light as bright as sunlight in a 60' diameter, and any creatures that suffer penalties (not including damage) for being in sunlight are affected by this spell. This spell can be cast on objects, so that an object under this spell can be carried around. If the spell is cast on a creature, a saving throw is allowed. This spell can be cast on a creature's eyes, causing blindness. Unless dispelled, *continual light* is permanent.

Continual darkness (reverse of *continual light*) produces darkness in the same area and manner as continual light. It can be countered with *continual light* or *dispel magic*. Like *continual light*, this spell can be cast on a creature's eyes, producing blindness. Normal eyesight, including infravision, cannot penetrate this darkness, nor can lamps, torches, or the spell *light*.

Control Weather

Level: 7
Duration: 4d12 hours
Range: 0

The caster can change the weather in the local area. It takes 1 turn to cast the spell and an additional 1d4 turns for the effects to manifest. The caster calls forth weather appropriate to the climate and season of the area.

Season	Possible Weather
Spring	Tornado, thunderstorm, sleet storm, or hot weather
Summer	Torrential rain, heat wave, or hailstorm
Autumn	Hot or cold weather, fog, or sleet
Winter	Frigid cold, blizzard, or thaw
Late winter	Hurricane-force winds or early spring (coastal area)

The caster controls the general tendencies of the weather, such as the direction and intensity of the wind, but cannot control specific applications of the weather—where lightning strikes, for example, or the exact path of a tornado. Contradictory weather conditions are not possible simultaneously. *Control weather* can do away with atmospheric phenomena (naturally occurring or otherwise) as well as create them.

Create Water (reversible)

Level: 1
Duration: Permanent
Range: 10'

This spell generates wholesome, drinkable water, in a quantity of 4 gallons per level. Water can be created in an area as small as will actually contain the liquid, or in an area of a 3' cube. *Destroy water* is the reverse of this spell, and destroys a likewise amount of water. No steam, water droplets, or any other trace of destroyed water remains. This spell cannot create water within a creature.

Create Food and Water

Level: 4
Duration: Permanent
Range: 10'

The caster can create 1 cubic foot of water and/or nutritious food per level of experience. One cubic foot of food can feed three humans or similar sized creatures, or one larger animal such as a mule.

Cure Blindness (reversible)

Level: 3
Duration: Permanent
Range: Touch

The caster may touch a being and *cure blindness*. This blindness may be magical or physical. *Cause blindness* may be inflicted by touching a being; however, a saving throw versus spells is allowed to avoid the effect completely.

Cure Critical Wounds (reversible)

Level: 5
Duration: Permanent
Range: Touch

When this spell is cast, the cleric touches one character or creature (or himself) and heals it of 3d8+3 hit points or (if the HP/BP system is being used) 3d3+3 body points of damage (3d8+3 hit points of damage on beings without body points). This spell cannot grant more body or hit points than the being's normal maximum. *Cure critical wounds* also heals any conditions listed in *cure light wounds*.

Cause critical wounds (reverse of *cure critical wounds*) causes 3d8+3 hit points of damage to a being if the caster can touch the opponent.

Cure Disease (reversible)

Level: 3
Duration: Permanent
Range: 30'

This spell instantly kills green slime, and will instantly cure all diseases, including mummy rot and lycanthropy.

Cause disease (reverse of *cure disease*) inflicts a terrible withering disease on a victim, which will cause death in 2d12 days. A saving throw versus spells is allowed. This disease can be cured with the casting of *cure disease*. The victim of this disease cannot be cured of damage from other spells, and it takes twice the time for normal healing. This suffering further results in a penalty of -2 to hit rolls made by the victim.

Cure Light Wounds (reversible)

Level: 1
Duration: Permanent
Range: Touch

When this spell is cast, the cleric touches one character or creature (or himself) and heals it of 1d6+1 hit points or (if the HP/BP system is being used) 1d2+1 body points of damage (1d6+1 hit points of damage on beings without body points).

Alternatively, this spell also cures paralysis; it will not heal damage and paralysis in the same casting. This spell cannot grant more body or hit points than the being's normal maximum.

Cause light wounds (reverse of *cure light wounds*) causes 1d6+1 hit points of damage to a being if the caster can touch the opponent.

Cure Serious Wounds (reversible)

Level: 4
Duration: Permanent
Range: Touch

When this spell is cast, the cleric touches one character or creature (or himself) and heals it of 2d6+2 hit points or (if the HP/BP system is being used) 2d2+2 body points of damage (2d6+2 hit points of damage on beings without body points). This spell cannot grant more body or hit points than the being's normal maximum. *Cure serious wounds* also heals any conditions listed in *cure light wounds*.

Cause serious wounds (reverse of *cure serious wounds*) causes 2d6+2 hit points of damage to a being if the caster can touch the opponent.

Delay Poison

Level: 2
Duration: 1 turn per level
Range: Touch

The subject becomes temporarily immune to poison. Any poison in its system or any poison to which it is exposed during the spell's duration does not affect the subject until the spell's duration has expired. Unless cured, saving throws and damage as appropriate are rolled once the spell ends. *Delay poison* does not cure any damage that poison may have already done.

However, if the spell is cast on a subject who has recently died from poison, within 1 turn per caster level, life is restored until the spell duration ends. A revived character will have 1 hp for the duration of the spell, but if the spell ends prior to the poison being cured, the subject dies.

Detect Evil

Level: 1
Duration: 6 turns
Range: 120'

The caster can sense the presence of evil intentions, whether from a living being or an object enchanted for evil purposes. Objects or creatures within 120' with evil intent will magically glow. Note that the GM must decide what is "evil", and some things may be potentially harmful, like traps, but not "evil." This spell does not grant the ability to read minds, but only grants a general sense of evil intent.

Detect Lie (reversible)

Level: 4

Duration: 1 round per level

Range: 30'

The caster can use this spell on himself or another being, and will be able to know whether words heard are truth or lies. *Undetectable lie* (reverse of *detect lie*) can nullify the effect of detect lie, or can be used to tell lies in a convincing manner.

Detect Magic

Level: 1

Duration: 2 turns

Range: 60'

For the duration of this spell, the caster can see a magical glow on any enchanted object or creature within 60'. This includes objects that are permanently magical, such as weapons or other items, and objects or creatures that are currently under the influence of a spell or some other enchantment.

Dispel Evil

Level: 5

Duration: 1 turn

Range: 30'

When this spell is cast, the caster can take no other action but concentrate on the spell for the entire duration. All undead or other enchanted creatures that come within 30' of the caster must succeed in a saving throw versus spells or be destroyed. Any creature that succeeds this roll will instead flee. Instead of casting the spell in a 30' radius, the caster can direct the spell at one monster only, and that monster saves with a -2 penalty. In addition, *dispel evil* can be used to remove a cursed item from a being within the spell range.

Dispel Magic

Level: 3

Duration: Permanent

Range: 120'

When cast, spell effects within a 20' cube can be negated. All spells cast by any spell casting class are automatically negated if the caster is of an equal or lower level to the caster of *dispel magic*. For each level an opponent is above the caster, there is a cumulative 5% chance *dispel magic* does not function. For example, if a 7th level character attempts to dispel the effects of a spell cast by a 10th level character, there is a 15% chance dispel magic fails.

Divination

Level: 4

Duration: See below

Range: 0

Similar to *augury* but more powerful, a *divination* spell can provide the caster with useful information regarding an area, building, area of a dungeon, and other similar places. Information gained includes a general idea of how powerful the creatures are there, the general amount of treasure present, and what kind of resistance to attack is present and the nature of it, whether it is good, evil, chaotic, lawful, etc. The base chance for a correct *divination* is 60% + 1% per caster level. The referee should roll this secretly. If the dice roll fails, false information is delivered.

Earthquake

Level: 7

Duration: 1 round

Range: 120'

When *earthquake* is cast, an intense but highly localized tremor rips the ground, to a diameter of 5' per caster level. The shock collapses structures, opens cracks in the ground, and more. The effect lasts for 1 round, during which time creatures on the

ground cannot move, cast spells or attack. The earthquake affects all terrain, vegetation, structures, and creatures in the area. The specific effect of an *earthquake* spell depends on the nature of the terrain where it is cast.

Cave, Cavern, or Tunnel: The spell collapses the roof, dealing 7d6 points of damage to any creature caught under the cave-in. An *earthquake* cast on the roof of a very large cavern could also endanger those outside the actual area but below the falling debris.

Cliffs: *Earthquake* causes a cliff to crumble, creating a landslide that travels horizontally as far as it fell vertically. Any creature in the path takes 7d6 points of damage.

Open Ground: Fissures open in the earth, and 1d6 creatures on the ground fall into one and die.

Structure: Any structure standing on open ground takes 5d12 points of structural hit point damage, enough to collapse a typical wooden or masonry building, but not a structure built of stone or reinforced masonry. Any creature caught inside a collapsing structure takes 7d6 points of damage.

River, Lake, or Marsh: Fissures open underneath the water, draining away the water from that area and forming muddy ground. Soggy marsh or swampland becomes quicksand for the duration of the spell, sucking down structures. In addition, 1d6 creatures in the area will be sucked into the mud and killed.

Exorcise

Level: 4

Duration: Permanent

Range: 1'

The cleric may use this ritual to eliminate foreign influences from a being, whether those influences are from *magic jar*, *charm* spells, possession by other creatures, and similar magical and/or spell effects. The referee rolls d00, and this is the probability that a cleric is successful in the exorcism, *per turn* the exorcism is recited. This probability is lowered or raised by 1% for every level difference between the cleric and the possessing entity or level of the caster of the spell being opposed. For instance, if the odds are 50%, and the cleric is 5 levels higher than the opposed force, the odds are 55% per turn. If the opposed force were 5 levels higher, the cleric's odds would be 45% per turn.

Feign Death

Level: 3

Duration: 1 turn, +1 round per level

Range: Touch

With the exception of duration and that any HD creatures may be affected, this spell functions identically to the magic-user spell of the same name.

Find the Path (reversible)

Level: 6

Duration: 1 turn per level

Range: Touch

The recipient of this spell can find the shortest, most direct physical route to a specified destination, whether into or out of a locale. The locale can be outdoors, underground, or even inside a *maze* spell. *Find the path* works with respect to locations, not objects or creatures at a locale. The spell enables the subject to sense the correct direction that will eventually lead it to its destination, indicating, at appropriate times, the exact path to follow or physical actions to take. The spell ends when the destination is reached, or the duration expires, whichever comes first. *Find the path* can be used to remove the subject and its companions from the effect of a *maze* spell in a single round. *Lose the path* (reverse of *find the path*) renders a touched being completely incapable of finding its way.

Find Traps

Level: 2
Duration: 2 turns
Range: 30'

This spell is centered on the caster, and when a trapped object or area comes within range it glows with a blue magical light. Both magical and mechanical traps are detected. This spell grants no knowledge about the nature of the trap or how to deactivate it.

Flame Strike

Level: 5
Duration: Instantaneous
Range: 60'

A *flame strike* produces a vertical column of divine fire 30' high and 10' in diameter that roars downward on a target. The spell deals 6d8 hit points of damage. A successful saving throw versus spells reduces the damage to 3d8.

Gate

Level: 7
Duration: see below
Range: 30'

The spell functions exactly as the magic-user spell of the same name.

Glyph of Warding

Level: 3
Duration: See below
Range: Touch

This powerful inscription harms those who enter, pass, or open the warded area or object. A *glyph of warding* can guard a bridge or passage, ward a portal, trap a chest or box, and so on. The area of effect is up to 5' squared per caster level, and a maximum of 10' squared can be inscribed per round. Any creature entering or touching the warded area or opening the warded object without speaking a password (which is set when casting the spell) is subject to the magic it stores.

When casting the spell, the cleric weaves a tracery of faintly glowing lines around the warding sigil. A *glyph* can be placed to conform to any shape up to the limitations of the total square footage. When the spell is completed, the *glyph* and tracery become nearly invisible.

Depending on the version selected, a *glyph* either blasts the intruder or activates a spell.

Blast Glyph: A *blast glyph* deals 2 points of damage per caster level to the intruder. This damage is fire or electricity, caster's choice at the time of casting. Each creature affected can attempt a saving throw versus spell to take half damage.

Spell Glyph: The caster can store a harmful spell effect to be triggered. Effects may include blindness, paralyzation, and energy drain, or similar effects. The cleric must be of a high enough level to cast these spells. A saving throw versus spells is allowed to avoid the effects of this kind of *glyph*.

Heal (reversible)

Level: 6
Duration: Permanent
Range: Touch

Heal enables the caster to channel divine energy into a creature to wipe away injury and afflictions. It immediately ends any and all of the following adverse conditions affecting the target: blindness, disease, fatigue, *feeblemind*, and poison. It heals all but 1d4 hit points of damage, or if the HP/BP system is being used, all but 1d2-1 body points of damage (1d4 hit points of damage on beings without body points).

Harm (reverse of heal) takes away all but 1d4 hit points from the victim touched and inflicts the same disease as *cause*

disease.

Hold Person

Level: 2
Duration: 9 turns
Range: 180'

When this spell is cast, most humanoids become paralyzed and freeze in place. Undead and any monster of a greater size than an ogre are unaffected. They are aware and breathe normally but cannot take any actions, even speech. Subjects may attempt a saving throw versus spells. This spell can affect 1d4 beings, but if directed at a single monster or character, the saving throw is attempted with a -2 penalty.

Holy Chant

Level: 2
Duration: See below
Range: 0'

This spell is intoned continuously, bringing about supernatural intervention on behalf of the cleric and party members within a 30' radius. All attacks, damage, and saving throws are made with a +1 bonus. Likewise, all of the rolls attempted by enemies suffer a -1 penalty. This effect continues so long as the cleric does not move and focuses only on chanting. However, if he is successfully attacked and dealt damage, or otherwise physically distracted, the spell ends. The spell *silence* also negates the spell.

Holy Word (reversible)

Level: 7
Duration: See below
Range: 0

Upon speaking the *holy* or *unholy word*, any evil or good creature within a 60' area of the caster suffers the following ill effects.

HD	Effect
12+	Deafened 1d4 rounds, -2 to hit, Movement -25%,
8-11	Stunned 2d4 rounds, -4 to hit, Movement -50%
4-7	Paralyzed 1d4 turns
3 or fewer	Killed

Insect Plague

Level: 5
Duration: 1 day
Range: 480'

The caster summons a swarm of locusts in a 60' diameter. The swarm causes creatures occupying its area to flee if they are 2 HD or fewer. This spell does not function when cast underground. The caster can control the swarm to move 20' in a round. The caster must concentrate for the duration of the spell to maintain control over the swarm, and if the swarm leaves the range the caster loses control of them. The caster also loses control of them if he is successfully attacked.

Know Alignment

Level: 2
Duration: 1 round
Range: 10'

The caster of this spell will immediately know the alignment of a character or monster within range. In addition, magic items with an alignment or the nature of a holy (or unholy) place will be revealed.

Light (reversible)

Level: 1
Duration: 12 turns
Range: 120'

This spell causes an object to glow as bright as a torch, shedding bright light in a 15' radius. The effect is immobile, but

it can be cast on a movable object. This spell can be cast on a monster's or character's eyes if the target fails a saving throw versus spells. If the save fails, the target is blind for 12 turns. Light taken into an area of magical *darkness* (reverse of *light*) does not function, and vice versa. A *light* spell counters a *darkness* spell. *Darkness* can also be cast on a target's eyes, and a saving throw versus spells is allowed.

Locate Object

Level: 3
Duration: 6 turns
Range: 120'

The caster can sense the direction of a well-known or clearly visualized object. The caster can search for general items, in which case the nearest one of its kind is located. Attempting to find a certain item requires a specific and accurate mental image; if the image is not close enough to the actual object, the spell fails. Monsters or characters may not be located.

Lower Water

Level: 4
Duration: 1 turn per level
Range: 120'

The caster of this spell is able to lower water or any other fluid by a percentage of its volume at 5% per caster level and in an area of 1 square foot per caster level. For instance, a 10th level cleric could lower water by 50% in a 10' square area.

Neutralize Poison

Level: 4
Duration: Permanent
Range: Touch

The caster detoxifies any sort of venom or poison in the creature or object touched. A poisoned creature suffers no additional effects from the poison, and any temporary effects are ended, but the spell does not reverse instantaneous effects, such as hit point damage, or other effects that do not go away on their own. If a character dies of poison, *neutralize poison* will bring a character back to life if the spell is used no more than 10 rounds after death.

Part Water

Level: 6
Duration: 1 turn per level
Range: 20' per turn

For the duration of this spell, the caster creates a divide in a body of water. For each level of experience of the caster, he is able to create a divide in water that is 1' wide by 20' long and 3' deep. The caster can dismiss the spell at any time before the duration has expired.

Plane Shift

Level: 5
Duration: Permanent
Range: Touch

This spell allows the caster to move himself or some other creature to another plane of existence or alternate dimension. If several willing persons link hands in a circle, as many as eight can be affected by the *plane shift* at the same time. Note that *plane shift* transports creatures instantaneously and then ends. The creatures need to find other means if they are to travel back. An unwilling creature is entitled to a saving throw versus spells to negate the effects of this spell.

Prayer

Level: 3
Duration: 1 round per level
Range: 0

Prayer is a more advanced form of the spell *holy chant*. The function is identical, except that the area of effect is a 60' radius. In addition, it is unnecessary for the cleric to remain chanting. Once the spell is cast it lasts for its duration, while the

cleric may cast other spells, attack, or take other actions.

Protection from Evil

Level: 1
Duration: 12 turns
Range: Touch

This spell wards a creature from attacks by "evil" creatures. It creates a magical barrier around the subject that moves with the subject. The subject gains a bonus to AC of -1 and a +1 bonus on saving throws. Both these bonuses apply against attacks made or effects created by evil creatures.

In addition, this spell prevents bodily contact by summoned or created creatures. This causes the natural weapon attacks of such creatures to fail, and the creatures recoil if such attacks require touching the warded creature. However, these creatures can attempt missile attacks. The protection against contact by summoned creatures ends if the warded creature makes an attack against or tries to force the barrier against the blocked creature.

Protection from Evil 10' Radius

Level: 4
Duration: 12 turns
Range: Touch

This spell functions exactly like the spell *protection from evil*, except *protection from evil 10' radius* extends the protective barrier to a 10' radius around the caster or subject, allowing companions to stay close and gain the benefits of the spell.

Purify Food and Drink (reversible)

Level: 1
Duration: Permanent
Range: 10'

This spell makes spoiled, rotten, poisonous, or otherwise contaminated food and water pure and suitable for eating and drinking. Either 6 quarts of drink, one trail ration, or a quantity of unpreserved food for 12 human-sized beings can be affected by this spell. This spell does not prevent subsequent natural decay or spoilage. The opposite of this spell, *putrefy food and water*, spoils a like amount of food or drink.

Quest (reversible)

Level: 5
Duration: See below
Range: 30'

When this spell is cast on a character, a saving throw versus spells is allowed. Success indicates that the spell is not effective. If the save fails, the caster can compel the character to take on a quest. This quest can be dangerous, but the character cannot be instructed to purposefully harm himself. Should the affected character resist taking on the quest, he will be under the effect of a curse, the nature of which is decided by the GM. The only way to remove the curse is to undertake the quest, and when the quest is finished the spell terminates.

Alternatively, the reverse of this spell, *remove quest*, can be used to remove the curse and to dispel an active *quest* spell. Like *dispel magic*, the caster of *remove quest* will have a lower probability of successfully countering the spell if he is a lower level than the caster of the quest spell. The probability of spell failure is 5% per level the cleric is below the caster of *quest*.

Raise Dead (reversible)

Level: 5
Duration: Permanent
Range: 120'

This spell restores life to a deceased dwarf, elf, gnome, half-elf, half-orc, human, or halfling. The caster can raise a creature that has been dead for no longer than two days at 7th level, and four days are added per level above 7. For example, a 9th level cleric can bring a character back to life that has been dead for 10 days. However, the body of the person to be raised must be

fairly intact. For instance, if the head is missing the being cannot be raised. Coming back from the dead is an ordeal. The subject of the spell is brought back to life with 1 hit point, and for two weeks the character has 50% of movement and suffers from chronic weakness. Further, he may not engage in spell casting, combat, or any other strenuous activity. This period may not be shortened by any magical healing. If this spell is cast on an undead monster, it must save versus spells or die instantly.

Ray of death (reverse of *raise dead*) can be cast and directed at any character or monster. A ray of death shoots from the hand of the caster, and if the target fails a saving throw versus death he dies instantly. The casting of this spell is a chaotic act, and will be done by other alignments in rare situations.

Regenerate (reversible)

Level: 7
Duration: Permanent
Range: Touch

The subject's severed body appendages (fingers, toes, hands, feet, arms, legs, tails, or even heads of multiheaded creatures), broken bones, and ruined organs grow back. After the spell is cast, the physical regeneration is complete in 1 round if the severed parts are present and touching the creature. It takes 2d4 turns otherwise.

Necrosis (reverse of *regenerate*) will cause body parts to die, turn black, and shrivel to fall off. The body part becomes useless in 1 round, and falls off to become dust in 2d4 turns. The caster must successfully touch the opponent for the spell to work, and the GM will determine randomly which body part is affected.

Remove Curse (reversible)

Level: 3
Duration: Permanent
Range: Touch

Remove curse instantaneously removes one curse on a creature. *Remove curse* does not remove the curse from a cursed shield, weapon, or suit of armor, although the spell enables the creature afflicted with any such cursed item to remove and get rid of it. *Remove curse* counters and dispels *bestow curse*.

Bestow curse (reverse of *remove curse*) can bring about any number of unfortunate effects upon a being, determined by the caster and refereed by the GM. Some limits of effect must be enforced. Possibilities include no more than a -2 penalty to saving throws or -4 to hit. An ability might be reduced by 50%. These effects can have any number of creative symptoms. The victim can avoid being affected by *bestow curse* with a successful saving throw versus spells.

Remove Fear (reversible)

Level: 1
Duration: 2 turns
Range: Touch

This spells instills courage in the subject, and potentially removes the effect of magic-induced fear by allowing the target a saving throw versus spells to attempt to remove the effect. The subject receives a saving throw bonus of +1 per level of the caster. *Remove fear* counters and dispels *cause fear*. The subject must be touched for the spell to take effect.

Cause fear (reverse of *remove fear*) will cause a subject who is touched to run away, hysterical, at full running movement for a number of rounds equal to the caster's level.

Resist Cold

Level: 1
Duration: 6 turns
Range: 30'

While under the effects of this spell, a character or monster is unharmed by freezing (non-magical) cold, and grants a bonus of +2 to all saving throws versus cold-based magical or breath

attacks. In addition, 1 point of damage is subtracted from each die of damage dealt by a cold-based attack. Each die will inflict a minimum of 1 hp damage.

Resist Fire

Level: 2
Duration: 6 turns
Range: 30'

While under the effects of this spell, a character or monster is unharmed by intense (non-magical) heat, and he receives a bonus of +3 to all saving throws versus heat-based magical or breath attacks. In addition, 1 point of damage is subtracted from each die of damage dealt by a heat-based attack. Each die will inflict a minimum of 1 hp damage.

Restoration

Level: 7
Duration: Permanent
Range: Touch

This spell restores one experience level to a creature who has had a level drained. The drained level is restored only if the time since the creature lost the level is equal to or less than one day per caster level. A character that has a level restored by *restoration* has exactly the minimum number of experience points necessary to restore him or her to his or her previous level. This spell also negates the effects of the spell *feeblemind*. *Drain energy* (reverse of *restoration*) drains one level away from a target when touched.

Resurrection (reversible)

Level: 7
Duration: Permanent
Range: Touch

This spell functions like *raise dead*, except that upon completion of the spell, the creature is immediately restored to full hit points, vigor, and health, with no loss of prepared spells. The condition of the remains is not a factor. So long as some small portion of the creature's body still exists, it can be resurrected. The creature can have been dead no longer than 10 years per caster level.

Destruction (reverse of *resurrection*) causes the victim, when touched by the caster, to die immediately and fall to dust. When these spells are cast, the caster is weakened for 1 day per level of the character raised or destroyed, and must rest in bed. For this duration the caster cannot fight or cast spells.

Reveal Charm (reversible)

Level: 2
Duration: 1 turn
Range: 30'

By means of this spell, a cleric may examine one creature within range per round, to a maximum of 10 creatures, to determine if they are under the influence of a *charm* spell. The reverse, *obscure charm*, can protect one creature only from detection for 1 turn.

Sanctuary

Level: 1
Duration: 2 rounds, +1 round per level
Range: Touch

Any opponent attempting to strike or otherwise directly attack the warded creature must attempt a saving throw versus spells. If the save succeeds, the opponent can attack normally and is unaffected by that casting of the spell. If the save fails, the opponent will not attack the caster and will attack another creature instead. However, area effects may still affect the cleric. The cleric must not make offensive actions while this spell is in effect, but he may cast non-offensive spells to help companions.

Silence 15' Radius

Level: 2

Duration: 12 turns

Range: 180'

Upon the casting of this spell, complete silence prevails in a diameter of 30 feet. All sound is stopped and conversation is impossible. No noise whatsoever issues from the area, but noise originating from outside the silenced area can be heard by those within it. The spell can be cast on a point in space, but the effect is stationary unless cast on a mobile object. The spell can be centered on a creature, and the effect then radiates from the creature and moves as it moves. An unwilling creature can attempt a saving throw versus spells, and if successful the spell takes effect in a stationary location near the creature, but the creature may move out of the affected area.

Snake Charm

Level: 2

Duration: See below

Range: 60'

The caster is able to affect the behavior of snakes, making them indifferent to the caster and others. A cleric is able to affect snakes of a number of hit die equaling the caster's level. A 7th level cleric can affect 7 hit dice of snakes, which can equal seven 1 HD snakes, or two 3 HD snakes and one 1HD snake, or any other combination.

Hostile snakes are more difficult to charm, and if this spell is cast on snakes that are engaged in melee combat with the caster, the snakes will only be affected by the spell for 1d4+1 rounds. If the spell is cast on snakes that are not at the moment hostile, the spell will last 1d4+1 turns.

Speak with Animals

Level: 2

Duration: 6 turns

Range: 30'

The caster can comprehend and communicate with ordinary animals or giant versions of ordinary animals. The caster can ask questions of, and receive answers from, one particular kind of animal, although the spell doesn't make it any more friendly or cooperative than normal. The type of animal is decided when the spell is cast. If an animal is friendly toward the caster, it may do some favor or service.

Speak with Creatures

Level: 6

Duration: 6 turns

Range: 30'

This spell is a more powerful version of *Speak with Animals*, but allows the cleric to speak with any creature.

Speak with Dead

Level: 3

Duration: See below

Range: 1'

The caster grants the semblance of life and intellect to a corpse, allowing it to answer several questions put to it. The corpse may answer no matter what state of decay it is in. Regardless of the number of questions asked, the spell has a limited duration based on caster level. Unasked questions are wasted if the duration expires. The corpse's knowledge is limited to what the creature knew during life, including the languages it spoke (if any). The cleric may cast this spell on a corpse that has been dead for a period of time dependent on the caster's level. Refer to the table below.

Caster Level	Duration	Time Deceased	Questions
6 th or fewer	6 rounds	7 days	2
7 th to 8 th	18 rounds	7 weeks	3
9 th to 11 th	36 rounds	7 months	4
12 th to 14 th	1 turn	7 years	5
15 th to 18 th	2 turns	70 years	6
19 th to 20 th	3 turns	140 years	7
21 st +	6 turns	1,000 years+	8

Speak with Plants

Level: 4

Duration: 3 turns

Range: 60'

The caster can communicate with plants, including both normal plants and plant creatures. The caster is able to ask questions of and receive answers from plants, and can ask plants to move in such a way to clear a path that is impassable or covered in difficult growth. The spell does not make plant creatures any more friendly or cooperative than normal. If a plant creature is friendly toward the caster, it may do some favor or service.

Spiritual Weapon

Level: 2

Duration: 1 round per level

Range: 30'

A weapon made of pure force springs into existence and attacks opponents in range, dealing 1d6 damage per hit, with +1 to hit per three caster levels. However, the weapon is not considered "magical" for the purposes of dealing damage or striking foes that can only be hit by magical weapons. The weapon takes a shape favored by the caster's deity or a weapon with some spiritual significance or symbolism (a mace, hammer, etc.) It strikes at the opponent designated, with one attack per round the spell is in effect. It uses the caster's base attack value, just as any melee weapon wielded by the caster. The weapon manifests only as long as the caster concentrates, to the maximum duration allowed for the caster's level.

Sticks to Snakes

Level: 4

Duration: 6 turns

Range: 120'

The caster can transform 2d8 sticks into snakes, and there is a 50% probability that the snakes are poisonous. The caster may give the snakes orders. When killed or at the end of the spell's duration, snakes revert back into sticks. The monster statistics for these snakes are as follows: AL N, MV 90', AC 6, HD 1, #AT 1, DM 1d4, SV F1, ML 7.

Stone Tell

Level: 6

Duration: 1 turn

Range: Touch

The caster gains the ability to speak with stones, which can relate who or what has touched them as well as revealing what is covered or concealed behind or under them. The stones relate complete descriptions if asked. A stone's perspective, perception, and knowledge may prevent the stone from providing the details one is looking for. The caster can speak with natural or worked stone.

Striking

Level: 3

Duration: 1 turn

Range: 30'

The caster enchants a weapon to deal an extra 1d6 hit points of damage, and makes an otherwise non-magical weapon able to attack a monster normally only affected by weapons of a magical nature.

Summon Aerial Servant

Level: 6

Duration: 1 day per level

Range: 10'

The cleric combines this spell with *protection from evil* to summon forth an aerial servant. The creature can be asked to perform a service, or to retrieve an object or being, but the aerial servant cannot be directed specifically to engage in combat for the caster. Normally, if sent to retrieve an object, it can do so even if it is in the possession of another being if it scores a successful hit roll and the creature is unaware of the aerial servant's presence. The aerial servant is sent back to its home plane when the task is complete, it is dismissed by the caster, or the caster is killed.

Symbol

Level: 7

Duration: 1 turn per level

Range: Touch

This spell allows the caster to scribe a potent rune of power upon a surface or in the air. The *symbol* glows, lasting for 1 turn per caster level. There are three different *symbols* available to clerics, which are described below. The particular *symbol* desired must be chosen when the spell is cast. A character may receive a save versus spells to negate the effects of a *symbol*.

Symbol of Pain: Creatures suffer wracking pains that impose a –4 penalty on attack rolls, and a –2 penalty to DEX. These effects last for 2d10 turns.

Symbol of Persuasion: Creatures that see a *symbol of persuasion* become *charmed* by the caster and behave as if they are of the caster's alignment. This effect lasts 1d20 turns.

Symbol of Hopelessness: Creatures that see a *symbol of hopelessness* will surrender or give up any struggle for 3d4 turns.

Tongues (reversible)

Level: 4

Duration: 1 turn

Range: 0

This spell grants the caster the ability to speak and understand the language of any intelligent creature within a 60' diameter area, whether it is a racial or alignment tongue. The reverse, *garble*, makes all language incomprehensible within the affected area, or may be used to negate a tongues spell. No saving throw is permitted.

True Seeing

Level: 5

Duration: 1 round per level

Range: Touch

The caster confers on himself or a subject the ability to see all things as they actually are. The subject sees through normal and magical darkness, notices secret doors, sees invisible creatures or objects normally, sees through illusions, and sees the true form of polymorphed, changed, or transmuted things. Further, the subject can focus its vision to see into the ethereal plane (but not into extradimensional spaces).

False seeing, the opposite of *true seeing*, makes objects, characters, and monsters appear as their "opposite." The ugly appears beautiful, the valuable appears worthless, and so on.

Wind Walk

Level: 7

Duration: 6 turns per level

Range: Touch

The caster alters the substance of his body to a cloudlike vapor and moves through the air, possibly at great speed. The caster can take a few other creatures with him, 1 per 8 levels of experience, each of which acts independently. A *wind walker* can

fly at a speed of 60' per level, per turn, and up to 600' per turn. *Wind walkers* are not invisible but rather appear misty and translucent. If fully clothed in white, they are 80% likely to be mistaken for clouds, fog, vapors, or the like.

Word of Recall

Level: 6

Duration: Instantaneous

Range: 0

Word of recall teleports the caster instantly back to his sanctuary when the word is uttered. The caster must designate the sanctuary when preparing the spell, and it must be a very familiar place. Any distance may be traveled with no chance of error. In addition to himself, the caster can transport an additional 25 pounds per level of experience.

Druid Spells**Animal Companion**

Level: 1

Duration: Permanent

Range: 10'

A druid may use this spell to attract 2 HD of normal animals (and of ordinary animal intelligence) per caster level, and befriend them. The animals must have a neutral alignment. The druid may train these animals, so long as training takes place within 4 months of befriending them. A maximum of three specific behaviors may be trained, much like one might train a dog. It takes 1 week to train an animal to perform 1 behavior, but if the training is interrupted for more than 3 days it must be started all over. It takes 6 turns to cast this spell.

Animal Growth (reversible)

Level: 5

Duration: 2 rounds per level

Range: 80'

The caster may use this spell to double the size of up to 8 animals within a 20' x 20' area. This doubling effect applies to damage inflicted by the animals and applies to their HD numbers, which affects their attack values. The opposite, *reduce animal*, has exactly the opposite effect, reducing animals and their abilities by half.

Animate Mineral

Level: 7

Duration: 1 round per level

Range: 40'

This spell is effectively a more limited version of the cleric spell *animate objects*. The caster may animate 2' cubed of rock or some other mineral per level, but the object must not be part of a larger portion of mineral (not a piece of a stone wall, for instance). In all other ways this spell functions like *animate objects*.

Anti-Animal Shell

Level: 6

Duration: 1 turn per level

Range: 0

The spell *anti-animal shell* creates an invisible barrier that keeps all creatures within the shell protected, as if behind a wall, from attacks by ordinary creatures. Ordinary creatures include giant animals, ogres, orcs, but not any form of undead, demons, or most creatures from other planes of existence. The shell is centered on the caster and is 20' in diameter.

Anti-Plant Shell

Level: 5

Duration: 1 turn per level

Range: 0

The spell *anti-plant shell* creates an invisible barrier that keeps all creatures within the shell protected, as if behind a wall, from

attacks by plant creatures, animated plants, or missiles of plant material. The shell is centered on the caster and is 20' in diameter.

Barkskin

Level: 2

Duration: 4 rounds, +1 round per level

Range: Touch

Barkskin toughens a creature's skin; this spell may be used on the caster or another willing creature. The effect lowers the creature's existing armor class by 1, and provides a +1 to all saving throws except versus spells.

Call Lightning

Level: 3

Duration: 10 rounds per level

Range: 0

Immediately upon completion of the spell, and once per round thereafter, the caster may call down a vertical bolt of lightning that deals 2d8, +1d8 per level points of electricity damage. The caster must be outdoors and in a stormy area—a rain shower, clouds and wind, hot and cloudy conditions, or even a tornado. The bolt of lightning flashes down in a vertical stroke at whatever target point chosen within a 360' radius of the caster. Any creature within a 10' radius of the target area or in the path of the bolt is affected. A bolt of lightning may be called once every 10 rounds. This spell does not function underground, unless there is a clear straight vertical path outdoors. Victims may save versus spells for half of the *dice* damage.

Charm Person or Mammal

Level: 2

Duration: See below

Range: 80'

This spell functions in much the same manner as the magic-user spell *charm person*. Refer to that spell description for more details. However, in addition to humanoids, the druid spell may be used to charm mammals, including intelligent animals.

Commune with Nature

Level: 5

Duration: See below

Range: ½ mile radius per level

The caster becomes one with nature (in outdoor settings only), attaining knowledge of the surrounding territory. The caster may gain knowledge of a fact per caster level from among the following subjects: the ground or terrain, plants, minerals, bodies of water, people, general animal population, presence of woodland creatures, presence of powerful unnatural creatures, or even the general state of the natural setting. It takes 1 turn to cast this spell.

Confusion

Level: 7

Duration: 12 rounds

Range: 120'

This spell functions identically to the magic-user spell of the same name.

Conjure Earth Elemental (reversible)

Level: 7

Duration: 1 turn per level

Range: 40'

By means of this spell, the caster creates a portal to the plane of earth, and beckons forth a 16 HD earth elemental. It is of friendly disposition to the caster, and will perform tasks, including fight, for the caster for the duration of the spell. The reverse of this spell, *banish earth elemental*, or *dispel magic*, will send it back to the plane of earth.

Conjure Fire Elemental (reversible)

Level: 6

Duration: 1 turn per level

Range: 80'

By means of this spell, the caster creates a portal to the plane of fire, and beckons forth a creature native to that plane. Such a creature is of friendly disposition to the caster, and will perform tasks, including fight, for the caster for the duration of the spell. The reverse of this spell, *banish fire elemental*, or *dispel magic*, will send fire elementals back to the plane of fire, but only *banish fire elemental* can be used to send salamanders, efreeti, or other powerful creatures from the plane of fire back through the planes. When this spell is cast, consult the table below to determine which creature appears.

Roll d00	Creature Conjured
01-05	Efreeti
06-87	Fire Elemental (12 HD)
88-90	Fire Elemental (16 HD)
91-00	Flame Salamanders (1d4+1)

Control Weather

Level: 6

Duration: 4d12 hours

Range: 0

This spell functions identically to the cleric spell of the same name.

Control Weather (Greater)

Level: 7

Duration: 4d12 hours

Range: 0

This spell takes greater control of the weather than the cleric spell of the same name. It may change weather to be consistent with a prior or future adjacent season. For instance, if it is spring, winter or summer weather may be summoned. In all other respects this spell functions as *control weather*.

Control Winds

Level: 5

Duration: 10 rounds per level

Range: 0

This spell allows the caster to alter wind force within a 40' radius per caster level. The caster can make the wind increase or decrease its strength. The new strength persists until the spell ends or until the caster chooses to alter his handiwork. An "eye" of calm air that is 40' in diameter at the center of the area surrounds the caster. For every caster level, wind can increase or decrease speed by 3 miles per hour, in increments of 3 miles per hour per round. Wind speed reduces at the same rate when the spell ends or is dismissed by the caster.

- Strong winds (30+ mph) make sailing difficult, missile weapons difficult, and forces smaller airborne creatures out of the air.
- A severe wind (45+ mph) causes minor ship and building damage, and forces human-sized airborne creatures from the air.
- A windstorm (60+ mph) drives most flying creatures from the skies, uproots small trees, knocks down light wooden structures, tears off roofs, and endangers ships.
- Hurricane force winds (75+ mph) destroy wooden buildings, sometimes uproot even large trees, and cause most ships to sink.
- A tornado (175+ mph) destroys all unfortified buildings and often uproots large trees.

Note that in confined spaces, including underground, the spell will function. If the area is confined such that the radius of effect is less than 400', then there is no eye of calm winds and the caster will suffer from the winds just as any other creature in affected radius.

Create Water

Level: 2
Duration: Permanent
Range: 10'

This spell generates wholesome, drinkable water, just like clean rain water. Water can be created in an area as small as will actually contain the liquid, or up to 1' cubed per caster level. It takes 1 turn to cast this spell.

Creeping Doom

Level: 7
Duration: 4 rounds per level
Range: 0

When the caster utters the spell of *creeping doom*, a mass of centipedes, insects, and arachnids is called forth. The swarm occupies a volume of 20' square, and can be commanded to swarm any target within 80'. The swarm moves at 10' per round, and will consist of (1d6+4)x100 individual bugs, each of which deals 1 point of damage and then dies. If a swarm occupies the same area as a target, as many bugs attack as the creature has hit points. The remaining swarm may be commanded to attack a new target in range. If the swarm moves beyond 80' from the caster, 50 of their number wander away. An additional 50 wander away per 10', so that if they are 100' away, 150 have been lost.

Cure Critical Wounds (reversible)

Level: 6
Duration: Permanent
Range: Touch

This spell is identical to the cleric spell of the same name.

Cure Disease (reversible)

Level: 3
Duration: Permanent
Range: Touch

This spell functions in the same way as the cleric spell of the same name.

Cure Light Wounds (reversible)

Level: 1
Duration: Permanent
Range: Touch

This spell is identical to the cleric spell of the same name.

Cure Serious Wounds (reversible)

Level: 4
Duration: Permanent
Range: Touch

Cure serious wounds functions the same as the cleric spell of the same name.

Detect Magic

Level: 1
Duration: 2 turns
Range: 60'

This spell is identical to the cleric spell *detect magic*.

Detect Snares and Pits

Level: 1
Duration: 4 rounds per level
Range: 60'

In the wilderness, the druid can detect simple pits, deadfalls, and snares as well as mechanical traps. The spell does not detect complex traps, including trapdoor traps. In a dungeon or other below ground environment, the druid may only detect simple pits.

Dispel Magic

Level: 4
Duration: Permanent
Range: 120'

This spell functions the same as the cleric spell of the same name.

Divine Weather

Level: 1
Duration: 2 hours per level
Range: 0

A druid may use this spell to divine coming weather conditions within a 5 mile radius. The caster can predict the weather into the future by 2 hours per caster level. This spell only grants knowledge about general weather conditions (rain, snow, wind, temperature, etc.) but cannot detect specific future locations of lightning strikes, tornadoes, etc.

Entangle

Level: 1
Duration: 1 turn
Range: 80'

Grasses, weeds, bushes, and even trees wrap, twist, and entwine about creatures in a 40' diameter area or those that enter the designated area, holding them fast and causing them to become entangled. A creature may move half its normal movement if it succeeds in a saving throw versus spells.

Faerie Fire

Level: 1
Duration: 4 rounds per level
Range: 80'

A pale glow surrounds and outlines the subjects. Outlined subjects shed light that makes them visible in darkness at a distance of 80', or half this if the creatures are near a light source. The druid may affect creatures within a 40' radius, and may outline up to 12' per caster level. For instance, 2 human sized targets at first level, and 4 human sized targets at 2nd level, etc. The *faerie fire* can be blue, green, or violet, according to druid's choice at the time of casting. The *faerie fire* does not cause any harm to the objects or creatures thus outlined. However, their greater visibility grants attackers +2 to hit while the spell is in effect.

Feeblemind

Level: 6
Duration: Indefinite
Range: 240'

This spell is identical to the magic-user spell of the same name.

Feign Death

Level: 2
Duration: 4 rounds, +2 rounds per level
Range: Touch

With the exception of the duration, this spell functions identically to the magic-user spell of the same name.

Finger of Death

Level: 7
Duration: Permanent
Range: 60'

The caster may use this spell to slay any one living creature within range. The target is entitled to a saving throw versus death to survive the attack.

Find Plant

Level: 2
Duration: 1 turn per level
Range: 0

The caster of this spell is able to find a specific plant within a 10'

diameter circle per caster level (30' at level 3, etc.), centered on the caster. The caster may concentrate on a different plant type each round, and he may move around since the area of effect follows with him.

Fire Chariot

Level: 7

Duration: 5 turns, +1 turn per level

Range: 10'

By means of this spell, the caster creates a fire chariot pulled by two flaming specters of horses. The caster and up to 7 other human-sized creatures may ride on the chariot, but they must have been touching the caster when the spell was cast to be immune to the flames. The chariot is capable of ground movement [240' (80')] and can fly [480' (160')]. The flaming horses may only be damaged by water or magical weapons; they have AC 2 and 30 hp. Any creature that touches the chariot or horses suffers 1d6 hp fire damage.

Fire Seeds

Level: 6

Duration: See below

Range: 40'

The caster may turn acorns into explosive thrown weapons, or holly berries into bombs that can be detonated on command. It takes one round to enchant one seed, and each seed will retain its enchantment for 1 turn per caster level. The number of seeds that may be enchanted and their effects are determined by the type enchanted. Only one type may be enchanted per spell casting.

Acorn Grenades: As many as four acorns turn into hurled weapons that can be thrown up to 40'. An attack roll is required to strike the intended target. The acorns deal 2d8 points of fire damage. In addition, they ignite any combustible materials within 10'. A creature within this area that makes a successful saving throw versus spells takes only half damage; a creature struck directly is not allowed a saving throw.

Holly Berry Bombs: The caster can turn as many as eight holly berries into special bombs. The holly berries are usually placed by hand, since they are too light to make effective thrown weapons (they can be tossed only 5'). When the caster speaks a word of command within 40' of the berries, each berry instantly bursts into flames, causing 1d8 points of fire damage in a 5' radius burst and igniting any combustible materials within 5'. A creature in the area that makes a successful saving throw versus spells takes only half damage.

Fire Storm (reversible)

Level: 7

Duration: 1 round

Range: 160'

When a *fire storm* spell is cast, the whole area is shot through with sheets of roaring flame identical to a *wall of fire* in a 20' cube per level area (the area must be 10' high minimum, 20' high maximum). Any creature within the area or within 10' of it takes 2d8 points of fire damage plus a number equal to the caster's level. The reverse, extinguish storm, will extinguish normal fires covering double the normal area. It will extinguish magical fires in the normal area, but with a probability of 5% per caster level.

Fire Trap

Level: 2

Duration: See below

Range: Touch

The druid spell *fire trap* functions identically to the magic-user spell of the same name.

Flash Fire (reversible)

Level: 4

Duration: 1 round

Range: 40'

The caster causes a 10' square area within range to suddenly erupt in flames, potentially igniting flammable materials in addition to inflicting 1d4 hp damage to all creatures in the area. *Dampen fire*, the reverse of *flash fire*, may be used to snuff out any normal fires within the same area.

Hallucinatory Terrain, Druidic

Level: 4

Duration: Permanent

Range: 80'

This spell is very similar to the magic-user spell of the same name, but with some important differences. The caster makes some terrain look, sound, and smell like some other natural sort of terrain, but the entire terrain to be hidden must be encompassed by the range this spell may affect. The caster, all druids, and all sylvan creatures recognize the illusion for what it is. The caster may affect a 40' square area per level. The illusion is permanent, unless dispel magic is successfully cast on the enchanted area.

Heat Metal (reversible)

Level: 2

Duration: 7 rounds

Range: 40'

Heat metal makes metal extremely warm. A creature takes fire damage if its metal weapons, armor, or equipment is heated. On the first round of the spell, the metal becomes warm and uncomfortable to touch but deals no damage. The same effect also occurs on the last round of the spell's duration. During the second (and also the next-to-last) round, intense heat causes pain and damage. In the third, fourth, and fifth rounds, the metal is searing hot, causing more damage, as shown on the table below.

Round	Metal Temperature	Damage
1	Warm (Cool)	None
2	Hot (Cold)	1d4 (1d2) hp
3–5	Scorching (Freezing)	2d4 (1d4) hp
6	Hot (Cold)	1d4 (1d2) hp
7	Warm (Cool)	None

Note that when searing damage is delivered, additional effects occur depending on the body parts which are in contact with metal. A target may experience more than one of these effects if metal is contacting multiple body parts. Effects are as follows: extremities (hands, feet), unusable for 2d4 days; body (covered by metal armor), bedridden from extreme burns for 1d4 days; head (covered by a helmet), severely burned, victim is unconscious for 1d4 turns. If searing metal makes contact with flammable material (leather, cloth, etc.) it burns, dealing 2d4 damage the next round.

The reverse of *heat metal*, *chill metal*, has similar effects as noted in parenthesis in the table above. However, when freezing damage is dealt, small body parts like the ears, the nose, toes, fingers, etc. are completely frozen and must be amputated. At the referee's discretion, penalties to CHA may apply. Note that magical items or spells that provide protection from fire or cold, or exposure to magical or mundane heat or cold sources will all negate the appropriate spell effect. *Heat metal* negates *chill metal*, and vice versa.

Hold Animal

Level: 3

Duration: 2 rounds per level

Range: 80'

The caster of this spell can hold normal animals (including giant versions) for the spell duration, up to 400 lbs. of animals per caster level. If more than 4 creatures are affected, they may save versus spells as normal to avoid the effects of the spell. If creatures fewer than 4 are affected, each creature receives -1 per creature fewer. Thus, if only 1 is affected, it saves at -3, -2 for two creatures and -1 for 3 creatures. See also *hold person*.

Hold Vegetation and Fungus

Level: 4

Duration: 1 round per level

Range: 80'

This spell may be used to *hold* all forms of plant and fungus life, both intelligent and unintelligent. *Held* plant or fungus material is unmovable by magical animation or any other movement except by natural outside means, such as wind. Intelligent plants or fungus, or plant/fungus monsters are entitled to a saving throw versus spells to negate the effect. The caster may affect up to 70 square feet of plant-covered terrain, or up to 4 intelligent beings or non-intelligent but sentient and/or independently mobile beings. If creatures fewer than 4 are affected, each creature receives -1 to save versus spells per creature fewer. Thus, if only 1 is affected, it saves at -3, -2 for two creatures and -1 for 3 creatures.

Insect Plague

Level: 5

Duration: 1 day

Range: 480'

This spell is identical to the cleric spell of the same name.

Insect Swarm

Level: 3

Duration: 1 round per level

Range: 30'

As soon as this spell is cast, a swarm of biting, pinching, and stinging insects engulfs a victim. There is a 50% chance either way that the swarm is a mass of flying or crawling insects. They inflict 2 hp damage per round, and a victim may commit no other action than try to get rid of the insect swarm. The caster may direct the swarm to attack different opponents, but it takes one round for the insects to disengage one opponent and move to another. Flying insects move at 180' (60') and crawling insects move at 120' (40').

Invisibility, Animal

Level: 1

Duration: 1 turn, +1 round per level

Range: Touch

A druid may cast this spell on himself or another willing creature. The affected creature is completely invisible to ordinary (and giant) animals of normal animal intelligence.

Locate Creature

Level: 1

Duration: 1 round per level

Range: 0

By casting this spell, a druid may stand and detect whether a specific kind of animal is within range, and where in range it is located. The range is directly in front of the caster, in a 20' wide path that is 20' long per caster level. The caster may face in a different direction per round.

Neutralize Poison (reversible)

Level: 3

Duration: Permanent

Range: Touch

This spell functions identically to the cleric spell of the same name.

Obscuring Mist

Level: 2

Duration: 4 rounds per level

Range: 0

A misty vapor arises around the caster. It is stationary once created. The vapor obscures all sight, including infravision, beyond 2d4 feet for 4 rounds per caster level and covers 10' cubed per caster level. A strong wind disperses the fog, reducing its duration to 25% of normal.

Pass without Trace

Level: 1

Duration: 1 turn per level

Range: Touch

The caster or a subject can move through any type of terrain and leave neither footprints nor scent. Tracking the subjects is impossible; however, for 6d6 turns any area passed over will radiate faint magic.

Passplant

Level: 4

Duration: 5 turns

Range: Touch

The caster creates a passage through vegetation, whether natural or magical. The passage is 10' deep per caster level, 5' wide and 10' high. The caster may choose to hide within a tree, if it is large enough and falls in a direct path of the spell. When the spell ends the caster is simply expelled from the tree in a random direction. However, if the tree is killed (cut down) or otherwise destroyed while the caster is within, he dies.

Plant Growth

Level: 3

Duration: Permanent

Range: 160'

Plant growth causes normal vegetation (grasses, briars, bushes, creepers, thistles, trees, vines) within range and a 20' square area per level to become thick and overgrown. The plants entwine to form a thicket or jungle that creatures must hack or force a way through. Movement drops to 10', or 20' for large creatures. The area must have brush and trees in it for this spell to take effect. At the caster's option, the area can be any shape. This spell has no effect on plant creatures.

Produce Flame

Level: 2

Duration: 2 rounds per level

Range: 0

Flames as bright as a torch appear in the caster's open hand, for 2 rounds per caster level (unless dismissed early). The flames harm neither the caster nor his equipment; however, they will ignite other flammable materials. In addition to providing illumination, the flames can be hurled at enemies up to 40', bursting to catch fire to any burnable materials within a 2' radius of the impact point.

Protection from Fire

Level: 3

Duration: See below

Range: Touch

This spell may be used on the caster or another creature, with different effects in each case. When used on the caster, he is rendered completely immune to all damage from normal and magical fires, no matter their source, for an unlimited time or until an accumulation of 12 hp of damage per caster level is dealt. At that point the spell ends and immunity ends. If the spell is used on another creature, the duration is 1 turn per caster level, during which time the recipient benefits from immunity to all nonmagical fires and 50% immunity (half damage) from magical or other fires. In addition, the recipient may save versus fire-based attacks with a +4 bonus.

Protection from Electricity

Level: 4

Duration: See below

Range: Touch

This spell functions identically to *protection from fire*, but is effective against all electrical damage and attacks.

Purify Water (reversible)

Level: 1
Duration: Permanent
Range: 40'

The caster may use this spell to make poisoned or otherwise unsanitary or undrinkable water within a 10' square area pure and ready for drinking. The caster may convert a total of 1' cubed of water per level. *Spoil water*, the reverse of *purify water*, makes water undrinkable due to contamination. *Spoil water* may also be used to render holy or unholy water powerless.

Pyrotechnics

Level: 3
Duration: See below
Range: 160'

Pyrotechnics turns a fire into either a burst of blinding fireworks or a thick cloud of choking smoke, depending on the wishes of the caster.

Fireworks: The fireworks are a flashing, fiery, momentary burst of glowing, colored aerial lights. This effect causes creatures within 120' of the area of effect to become blinded. The size of the pyrotechnics is equal to 10x the size of the fire source. Creatures must have line of sight to the fire to be affected.

Smoke Cloud: A writhing stream of smoke billows out from the source, forming a choking cloud. The cloud obscures all vision of anything 20' or more distant and lasts for 1 round per caster level. The smoke fills a total area equal to 100x the size of the fire source.

Reincarnate

Level: 7
Duration: Permanent
Range: 0

This spell functions in an identical manner to the magic-user spell of the same name.

Repel Vermin

Level: 4
Duration: 1 turn per level
Range: 0

The caster of this spell is able to prevent all ordinary insects, rats, spiders, etc. from coming within a 10' radius. Giant vermin or vermin of 2 HD or more may enter the area if they succeed in a saving throw versus spells. However, entering the area causes 1d6 hp damage to them. This spell does not affect wererats or intelligent vermin-like creatures.

Repel Wood

Level: 6
Duration: 4 rounds per level
Range: 0

Waves of energy roll forth from the caster on a 120' wide path, 20' long per caster level, moving in the direction he faces. Once the spell is cast, the area of effect is stationary. It causes all wooden objects in the path of the spell to be pushed away to the limit of the range. Wooden objects larger than 30' in diameter that are fixed firmly are not affected, but loose objects are. Objects 30' in diameter or smaller that are fixed in place splinter and break, and the pieces move with the wave of energy. Objects affected by the spell are repelled at the rate of 40' per round.

Objects such as wooden shields, spears, wooden weapon shafts and hafts, and arrows and bolts are pushed back, dragging those carrying them along. If a spear is planted (set) to prevent this forced movement, it splinters. The waves of energy continue to sweep down the set path for the spell's duration. After being cast, the path is set, and the caster can then do other things or go elsewhere without affecting the spell's power.

Shillelagh

Level: 1
Duration: 1 round per level
Range: Touch

The caster's own nonmagical club or quarterstaff becomes a +1 weapon in regard to attack rolls. The weapon deals 2d4 damage. These effects only occur when the weapon is wielded by the caster.

Snare

Level: 3
Duration: See below
Range: Touch

This spell enables the caster to make a snare that functions as a magic trap. The snare can be made from any supple vine, a rope, or something similar. When *snare* is cast, the cordlike object blends with its surroundings (only 10% chance to detect by nonmagical means). One end of the snare is tied in a loop that contracts around one or more of the limbs of any creature stepping inside the circle.

If a strong and supple tree is nearby, the snare can be fastened to it. The spell causes the tree to bend and then straighten when the loop is triggered, dealing 1d6 points of damage to the creature trapped and lifting it off the ground by the trapped limb or limbs. If no such tree is available, the cordlike object tightens around the creature, dealing no damage but causing it to be entangled.

The snare is magical and will restrain a victim for 12 hours. To escape, a trapped creature must be as strong as a giant to break the bonds. The bonds lose their strength over time, so that after 4 hours STR 18 or ogre strength is needed, and after 8 hours STR 16 is needed.

Speak with Animals

Level: 1
Duration: 6 turns
Range: 60'

This spell functions in an identical way to the cleric spell *Speak with animals*.

Speak with Plants

Level: 4
Duration: 3 turns
Range: 80'

This spell functions identically to the cleric spell of the same name, but with a greater range.

Sticks to Snakes

Level: 5
Duration: 6 turns
Range: 120'

This spell functions identically to the cleric spell of the same name.

Stone Shape

Level: 3
Duration: Permanent
Range: Touch

This spell can form an existing piece of stone into any shape that suits the caster's purpose, to a total volume of 3' cubed, +1' cubed per level. While it's possible to make crude coffers, doors, and so forth with *stone shape*, fine detail isn't possible.

Stumble

Level: 2
Duration: 1 turn per level
Range: Touch

The caster of this spell may enchant a 10' length (or shorter) of organic material, such as a hemp rope, staff, stick, etc. When a

creature or creatures walk over the object, it very suddenly rises to trip them (even the caster is not immune!). If a victim fails a saving throw versus spells, he falls to the ground. Any creatures passing over the object and already aware of its magical behavior may save with a +4 bonus. There is only a 20% chance of detecting this trip trap by nonmagical methods. Creatures walking when tripped suffer no damage and may get up the next round. If running, a creature suffers 1d6 damage from the fall when on stone, rock, or similar unyielding surfaces and is stunned for 1d4+1 rounds. On softer surfaces such as earth, forest floor, etc. no damage is suffered and victims are stunned for only 1 round.

Summon Animal I

Level: 4
Duration: See below
Range: 40' per level

The caster of the spell summons 1d8 ordinary animals (including giant types) of up to 4 HD per animal, if they are within range of the spell. The referee will decide the chance of a particular animal type being available, and the caster may attempt up to three different animals before the spell is a failure. Summoned animals will serve the caster for a specific task, including fighting, aiding on a quest, or other goals that may be short term or relatively longer term. The caster may dismiss animals at any time.

Summon Animal II

Level: 5
Duration: See below
Range: 60' per level

This spell is a more powerful version of *summon animal I*. A total of 3d4 animals of up to 4 HD may be summoned, or 1d6 animals of up to 8 HD.

Summon Animal III

Level: 6
Duration: See below
Range: 80' per level

This spell is a more powerful version of *summon animal I*. A total of 4d4 animals of up to 4 HD may be summoned, or 2d4 animals of up to 8 HD, or 1d4 animals of up to 16 HD.

Summon Sylvan Beings

Level: 4
Duration: See below
Range: 120', +10' per level

The caster of this spell must be outdoors, and must both chant and make magical hand gestures. The casting ends when sylvan beings appear, or if 2 turns have passed with no results. The referee decides the probability of a particular type of woodland creature being available within range, based on the circumstances and terrain type. Refer to the table below for the type of creatures this spell may beckon forth, and how many of each will appear.

Creature	Number	Creature	Number
Centaur	1d4	Sprite	1d6
Dryad	1d4	Treant	1
Nixie	1d4	Unicorn	1
Pixie	1d8		

Creatures are allowed a saving throw versus spells, with a +4 bonus. When creatures arrive they receive an additional identical saving throw if any companion of the caster is chaotic. Summoned sylvan beings who fail their save are friendly to the caster, and will aid him in any way that is within their abilities. However, if they are asked to fight for the caster, the referee rolls on the monster reaction table, taking into account how the druid has treated the creature previously.

Temperature Control

Level: 4
Duration: 4 turns, +1 turn per level
Range: 0

By means of this spell, the caster can raise or lower the ambient temperature within a 20' diameter area around the caster. The amount of temperature change is 50 degrees (Fahrenheit), +10 degrees per caster level above 6th level. So, at 8th level the temperature may be changed by 70 degrees.

Transmute Metal to Wood

Level: 7
Duration: Permanent
Range: 80'

This spell enables the caster to change one metal object to wood. A magic object made of metal only has a 10% chance of being affected by this spell. The caster may transmute 8 lbs of metal into wood per level. Objects changed in this way are permanently altered such that *dispel magic* will not reverse the effects. However, a *wish* or *limited wish* can return an object to its original state.

Transmute Rock to Mud (reversible)

Level: 5
Duration: See below
Range: 160'

This spell turns natural, uncut or unworked rock of any sort into an equal volume of mud. The volume is up to 20' cubed per caster level. The depth of the mud created cannot exceed the width or breadth of the area chosen. A creature unable to *levitate*, *fly*, or otherwise free itself from the mud sinks and may drown if the depth is great enough. The mud remains until a successful *dispel magic* or *transmute mud to rock* spell (the reverse) restores its substance—but not necessarily its form. Evaporation turns the mud to normal dirt over a period of days. The exact time depends on exposure to the sun, wind, and normal drainage.

Transport via Plants

Level: 6
Duration: See below
Range: Touch

By means of this spell the caster may enter any large normal plant and pass any distance to a plant of the same kind in a single round, regardless of the distance separating the two. The entry plant must be alive. The destination plant need not be familiar to the caster, but it also must be alive. If the caster is uncertain of the location of a particular kind of destination plant, he need merely designate direction and distance and the *transport via plants* spell moves him as close as possible to the desired location. If a particular destination plant is desired but the plant is not living, the spell fails and the caster must leave the entry plant within 24 hours. There is a 5% chance that the spell goes awry, sending the caster to a similar plant 1d100 miles away in a random direction. Destruction of an occupied plant slays the caster (as with *passplant* and *treestride*).

Tree Stride

Level: 5
Duration: See below
Range: Touch

The caster gains the ability to enter trees and move from inside one tree to inside another tree. The trees entered must be of the same kind, must be living, and must have girth at least equal to the caster. By moving into an oak tree, for example, the caster may choose to move into the furthest oak tree to the east, wherever that may be in range. However, if the nearest oak in range is to the west, the caster emerges from that tree instead.

Type of Tree	Transport Range
Oak, ash, yew	600'
Elm, linden	420'
Other deciduous	300'
Other coniferous	240'
All other trees	180'

The caster can remain within a tree for 1 round per caster level, but is forced out when the spell ends. If the tree in which the caster is concealed is chopped down or burned, the caster is slain if he does not exit before the process is complete.

Tree Shape

Level: 3

Duration: 6 turns, +1 turn per level

Range: 0

By means of this spell, the caster is able to assume the form of a small living tree or shrub or a large dead tree trunk with a small number of limbs. The closest inspection cannot reveal that the tree in question is actually a magically concealed creature. To all normal tests the caster is, in fact, a tree or shrub. While in tree form, the caster can observe all that transpires around him just as if he were in his normal form. All clothing and gear carried or worn also changes. The caster may end the spell at any time, and may attack or undertake other normal actions the same round the spell is dismissed.

Wall of Fire

Level: 5

Duration: See below

Range: 60'

The function of this spell is identical to the magic-user spell of the same name.

Wall of Thorns

Level: 6

Duration: 1 turn per level

Range: 80'

A *wall of thorns* spell creates a barrier of very tough, pliable, tangled brush bearing needle-sharp thorns as long as a human's finger. Any creature forced into or attempting to move through a *wall of thorns* takes 8 damage +AC rating (0-9) per 10'. Any creature within the area of the spell when it is cast takes damage as if it had moved into the wall and is caught inside. The caster may create a 10' cubed area of wall per level. The wall must be 10' thick (or fills a smaller space completely), which allows it to be shaped as a number of 10x10x10 blocks. A *wall of thorns* can be breached by slow work with edged weapons at rate of 4 turns per 10'. Normal fire cannot harm the barrier, but magical fire burns away the wall in 2 turns.

Warp Wood

Level: 2

Duration: Permanent

Range: 10' per level

The caster causes wood to bend and warp, permanently destroying its straightness, form, and strength. A warped door springs open (or becomes stuck). A boat or ship springs a leak. Warped ranged weapons are useless. The caster may warp a volume of approximately 15 square *inches* per caster level. For example, at first level the caster could warp four arrows or a short wooden handle.

Water Breathing (reversible)

Level: 3

Duration: 1 day

Range: 30'

This spell is identical to the magic-user spell of the same name, except that the druid version is also reversible such that a water breathing creature may be made to breath air.

Illusionist Spells

Astral Projection

Level: 7

Duration: See below

Range: Touch

This spell functions identically to the cleric spell of the same name.

Auditory Illusion

Level: 1

Duration: 3 rounds per level

Range: 60', +10' per level

Except for the duration, this spell is identical to the magic-user spell of the same name.

Blindness

Level: 2

Duration: See below

Range: 30'

If the victim fails a saving throw versus spells, he is rendered permanently blind. The blindness is magical, not physical, so typical spells employed for the purpose of *curing blindness* are ineffective. The caster may remove the effect at any time, otherwise the spell *dispel magic* must be used.

Blur

Level: 2

Duration: 3 rounds, +1 round per level

Range: 0

The caster's outline appears blurred, shifting and wavering. The result of this distortion is that all opponents suffer -4 to hit the caster with melee and missile weapons the first round of an attack, and -2 on subsequent rounds. The caster also gains +1 to saving throws versus spell-like devices or spells that require a successful attack to take effect.

Color Spray

Level: 1

Duration: Instant

Range: 10' per level

A vivid cone of clashing colors springs forth from the caster's hand, causing 1d6 creatures to become stunned, perhaps also blinded, and possibly knocking them unconscious. The cone is 5' wide at the origin, 20' long, and 20' wide at its terminal end. A total creature HD equal to the caster's level may be affected. Each creature within the cone is affected according to its Hit Dice.

HD fewer or equal to the caster: The creature is unconscious for 2d4 rounds.

HD up to two greater than the caster's: The creature is blinded for 1d4 rounds.

HD 3 or greater than the caster's: The creature is stunned for 1 round.

Only beings of 6 HD or levels, or with more HD or levels than the caster, may save versus spell to avoid the spell's effects. Sightless creatures are not affected by *color spray*.

Confusion

Level: 4

Duration: 12 rounds

Range: 120'

This spell functions identically to the magic-user spell of the same name.

Confusion, Greater

Level: 5
Duration: 12 rounds
Range: 120'

This spell is a more powerful version of confusion. The function is identical, except every being in a 40' square area is affected. Illusionists can save versus spells to avoid the effects, as may fighters or subclasses of fighters except rangers and paladins. Non-magical, low intelligence creatures are entitled to a saving throw.

Conjure Animals

Level: 6
Duration: 2 rounds per level
Range: 30'

This spell functions identically to the cleric spell of the same name.

Continual Light (reversible)

Level: 3
Duration: See below
Range: 120'

This spell functions identically to the cleric spell of the same name.

Dancing Lights

Level: 1
Duration: 2 rounds per level
Range: 40', +10' per level

This spell functions identically to the magic-user spell of the same name.

Darkness Globe

Level: 1
Duration: 1 turn, +1 round per level
Range: 10' per level

This spell functions identically to the magic-user spell of the same name.

Deafness

Level: 2
Duration: See below
Range: 60'

If the victim fails a saving throw versus spells, he is rendered permanently deaf. The deafness is magical, not physical, so typical spells employed for the purpose of curing physical ailments are ineffective. The caster may remove the effect at any time, otherwise the spell *dispel magic* must be used.

Detect Illusion

Level: 1
Duration: 3 rounds, +2 round per level
Range: Touch

The caster places this enchantment on himself to grant sight that sees through illusion. Illusions can be seen in an area of 10' wide, 10' long per level. The caster may touch one other creature, granting it the ability to see through illusion as well, so long as the contact is maintained.

Detect Invisible

Level: 1
Duration: 5 rounds per level
Range: 10' per level

This spell functions identically to the magic-user spell of the same name.

Detect Magic

Level: 2
Duration: 2 turns
Range: 60'

This spell functions identically to the magic-user spell of the same name.

Dispel Phantasm

Level: 3
Duration: Permanent
Range: 10' per level

This spell may be used by an illusionist to dispel *phantasmal force*. Illusions created by others of the illusionist class are dispelled with the same probabilities as *dispel magic*; however, illusions created by other classes are dispelled automatically.

Doppelganger

Level: 1
Duration: 2d6 rounds, + 2 rounds per level
Range: 0

This spell creates a dweomer of illusion, altering the caster's appearance. The illusion must take the appearance of a humanoid, not taller or shorter than the caster by more than 1', but apparent weight and clothing or items may be altered in any way.

Fear

Level: 3
Duration: See below
Range: 0

This spell functions the same as the magic-user spell of the same name.

Fog Cloud

Level: 2
Duration: 4 rounds, +1 round per level
Range: 10'

A 40' high, 20' long x 20' high bank of fog billows forth at the caster's command. The cloud is identical in appearance to that produced by the magic-user spell *cloudkill*; however, its only effect is to obscure vision as a *wall of vapor*. The fog cloud travels away from the caster in a specified direction at a rate of 10' per round.

Hallucinatory Terrain

Level: 3
Duration: See below
Range: 240'

This spell functions identically to the magic-user spell of the same name.

Hypnotic Pattern

Level: 2
Duration: See below
Range: 0

A twisting pattern of subtle, shifting colors weaves through the air, fascinating creatures within its area of 30' square, centered on the caster. A total of 24 HD of creatures are affected, in any combination (twelve 2 HD creatures, four 5 HD and one 4 HD creature, etc.). Affected creatures become fascinated by the pattern of colors and remain motionless, dazed, for as many rounds as the caster concentrates on the spell and makes no other action.

Hypnotism

Level: 1
Duration: 1 round, +1 round per level
Range: 30'

The caster's gestures and droning incantation fascinate nearby creatures, causing 1d6 creatures in range to be mentally vulnerable to *suggestion*, exactly as the magic-user spell of that name. A successful saving throw versus spells may negate the effect.

Illusory Script

Level: 3
Duration: Permanent
Range: 20', +20' per level

The caster may write instructions or other information on parchment, paper, or any suitable writing material. The *illusory script* appears to be some form of foreign or magical writing. Only the person (or people) designated by the caster at the time of the casting are able to read the writing; it is unintelligible to any other being, although an illusionist recognizes it as *illusory script*. Any unauthorized creature attempting to read the script triggers a potent effect, and must save versus spells or suffer effects identical to the spell *confusion*. This effect lasts 3d6 turns.

Illusory Stamina

Level: 4
Duration: 3 turns per level
Range: Touch

When this spell is cast, up to 4 human-sized beings may be touched and made to feel as if they are healthier than they truly are. The net effect is that they seem to have been healed of 50% of any damage they have sustained below their maximum. In addition, for 1 round every 10 rounds affected beings may move as if under the effects of the spell *haste*. However, at the end of the spell's duration, affected beings lose all illusory hit points in addition to any new damage sustained. If this drops a being to below 0 hp, death occurs.

Implant Emotion

Level: 4
Duration: See below
Range: 10' per level

By means of this spell the caster can invoke a specific emotion in a subject unless he succeeds in a saving throw versus spells. The following emotions may be induced, with the following effects on the subject: *fear* as the spell, -2 to save; *rage*, +1 to hit, +3 to damage, +5 to hp, subject will fight to the death; *hate*, saving throws, to hit, damage, and morale +2; *despair*, as the symbol. Note that *implant emotion* may also be cast to negate the effects from a creature influenced by this spell.

Invisibility

Level: 2
Duration: See below
Range: Touch

This spell functions identically to the magic-user spell of the same name.

Invisibility 10' radius

Level: 3
Duration: See below
Range: 0

This spell functions identically to the magic-user spell of the same name.

Invisibility, Greater

Level: 3
Duration: 4 rounds, +1 round per level
Range: Touch

This spell is nearly identical to *invisibility*, except it is of limited duration and the creature touched is capable of attacking. When attacking, the invisibility may leave shimmering or other subtle indications of the creature's presence, allowing an opponent to attack with a -4 penalty.

Limited Wish

Level: 7
Duration: See below
Range: Unlimited

This spell functions identically to the magic-user spell of the same name.

Light (reversible)

Level: 1
Duration: See below
Range: 120'

This spell is in most respects identical to the 1st level cleric spell of the same name, except that the duration is a number of turns equal to the caster's level +6 turns.

Magic Mouth

Level: 2
Duration: See below
Range: See below

This spell functions identically to the magic-user spell of the same name.

Major Creation

Level: 5
Duration: 6 turns per level
Range: Touch

Major creation is much like *minor creation*; however, vegetable matter may be created with twice the duration.

Massmorph

Level: 4
Duration: See below
Range: 240'

This spell functions identically to the magic-user spell of the same name.

Maze

Level: 5
Duration: See below
Range: 5' per level

The function of this spell is identical to the magic-user spell of the same name.

Minor Creation

Level: 4
Duration: 6 turns per level
Range: Touch

The caster creates an object of nonliving vegetable matter (rope, cloth, wood, etc.). The volume of the item created cannot exceed 1' cube per caster level. A tiny piece of matter of the same sort of item the caster plans to create must be used when casting *minor creation*.

Mirror Image

Level: 2
Duration: 6 turns
Range: Self

This spell functions identically to the magic-user spell of the same name.

Misdirection

Level: 2
Duration: 1 round per level
Range: 30'

By means of this spell, the caster misdirects the information from divination spells such as *detect evil*, *detect magic*, *detect lie*, and the like. On casting the spell, an object or creature is chosen within range. For the duration, the opposite information or otherwise misleading or wrong information is conveyed when

a detection spell is applied. The caster of such a detection spell is allowed a saving throw to avoid the effect.

Nondetection

Level: 3
Duration: 1 turn per level
Range: 0

The caster and all within a 5' radius become impossible to detect by divination spells such as *clairaudience/clairvoyance*, *locate object*, and *detect* spells. *Nondetection* also prevents location by such magic items as *crystal balls*.

Paralyze

Level: 3
Duration: See below
Range: 10' per level

The caster may affect creatures up to twice his level of HD total, in a designated 20' x 20' area, making them feel as if they cannot move. All creatures that fail a saving throw versus spells are affected. The effect may be dismissed by the caster at any time, otherwise *dispel magic* or *dispel illusion* can negate the effect.

Phantasmal Door

Level: 5
Duration: 1 round per level
Range: 10'

The caster of this spell fabricates an illusory door. He may then appear to enter it, and pursuers are fooled into thinking this is the case. In reality, the caster becomes *invisible*, as the spell, and is standing next to the door. The invisibility only lasts for the duration of this spell. Any beings who pursue the caster through the phantom door believe themselves to enter a featureless 10' square room.

Phantasmal Force

Level: 1
Duration: See below
Range: 240'

The spell is identical to the magic-user spell of the same name.

Phantasmal Force, Greater

Level: 2
Duration: See below
Range: 240'

This spell is an improved version of the magic-user spell *phantasmal force*. The area of effect is a 40' cube, +10 square feet per level. In addition to a visual illusion, subtle auditory effects accompany the illusion so that a creature makes sound as it moves, or similar effects are heard. Coherent speech is not possible, but mumbling sounds may be heard. The caster can move at 50% his normal movement rate while concentrating on the spell, and the illusion does not disappear until 2 rounds after the caster stops concentrating on the illusion. Refer to *phantasmal force* for more details.

Phantasmal Killer

Level: 4
Duration: 1 round per level
Range: 5' per level

The caster creates a phantasmal image of the most fearsome creature imaginable to the subject simply by forming the fears of the subject's subconscious mind into something that its conscious mind can visualize: this most horrible beast. Only the spell's subject and the caster can see the phantasmal killer. If the phantasm successfully attacks the subject (as a 4 HD monster), the subject may try to disbelieve the illusion once by succeeding in an INT attribute check, or die from fear. If the subject of a *phantasmal killer* attack succeeds in disbelieving and is wearing a *helm of telepathy*, the beast can be turned upon the caster. The caster must then disbelieve it or become subject to its deadly fear attack.

Phantasmal Monsters

Level: 4
Duration: 1 round per level
Range: 30'

The caster may create phantasmal pseudo-real monsters in an area of 20'. The monster or monsters created cannot exceed the caster's level in HD. Monsters created in this fashion must all be the same type. They have 2 hp per the creature's normal HD. Victims are allowed an INT attribute check to realize the creatures are only partly real. The *phantasmal monsters* are able to attack and deal damage as per a normal creature of their type to any being that fails this check. If the check succeeds, the *phantasmal monsters* have an effective AC 10 and all damage is -80%, rounding up at .5.

Phantasmal Monsters, Greater

Level: 5
Duration: 1 round per level
Range: 30'

This spell is identical to *phantasmal monsters*, but the monsters created are stronger. These monsters have 3 hp per HD. Each creature has AC 8 and -60% to damage if the INT attribute check succeeds.

Phantasmal Monsters, Advanced

Level: 6
Duration: 1 round per level
Range: 30'

This spell is identical to *phantasmal monsters*, but the monsters created are stronger. These monsters have 4 hp per HD. Each creature has AC 6 and -40% to damage if the INT attribute check fails.

Prismatic Spray

Level: 7
Duration: Instant
Range: 0

This spell causes seven shimmering, intertwined, multicolored beams of light to spray from the caster's hand. The beams are intertwined in "fan" of light that is 70' long, 5' wide at the origin and 15' wide at the terminal end. Each beam has a different power. Creatures in the area of the spell with 8 HD or less are automatically blinded for 2d4 turns. Every creature in the area is randomly struck by one or more beams, which have additional effects that are identical to the same color of the globes produced by the magic-user spell *prismatic sphere*. See that spell description for these effects.

Roll d8	Color of Beam
1	Red
2	Orange
3	Yellow
4	Green
5	Blue
6	Indigo
7	Violet
8	Struck by two rays; roll twice more, ignoring any "8" results.

Prismatic Wall

Level: 7
Duration: 1 turn per level
Range: 10'

Prismatic wall creates a vertical, opaque wall—a shimmering, multicolored plane of light that protects the caster from all forms of attack. For all purposes this spell functions identically to the magic-user spell *prismatic sphere*, except a shimmering wall is produced rather than an opaque globe.

Project Image

Level: 5
Duration: 6 turns
Range: 240'

The function of this spell is identical to the magic-user spell of the same name.

Refraction

Level: 1
Duration: 1 round
Range: 0

By means of this spell the caster makes the space in front of him reflective, like a mirror. Any gaze attack directed at the caster does not affect him, but instead is turned back at the attacker.

Rope Trick

Level: 3
Duration: 2 turns per level
Range: Touch

This spell functions identically to the magic-user spell of the same name.

Shadow Evocation

Level: 5
Duration: See below
Range: 50', +10' per level

The caster taps energy from the plane of shadow to cast a quasi-real, illusory version of a magic-user spell. The possible spells include *fireball*, *lightning bolt*, *cone of cold*, and *magic missile*. These spells have normal effects unless an affected creature succeeds in an INT attribute check. Each disbelieving creature takes only one hp damage per caster level from the attack.

Shadow Evocation, Greater

Level: 6
Duration: See below
Range: 60', +10' per level

Greater shadow invocation is a more powerful version of *shadow invocation*, allowing the caster to tap the plane of shadow to cast *cloudkill*, a *wall of fire*, or a *wall of ice*. This spell is also capable of producing the spells allowed by *shadow evocation*; however, should a victim succeed in the INT attribute check, damage from spells is 2 hp per caster level, and the *wall of fire* and *wall of ice* may inflict 1d4 hp damage per level.

Spectral Force

Level: 3
Duration: See below
Range: 240'

This spell is identical to *greater phantasmal force*, except the illusion persists for 3 rounds after concentration ceases. In addition, a complete illusion is possible, including all senses.

Spectral Force, Permanent

Level: 6
Duration: See below
Range: 240'

This more powerful version of *spectral force* persists indefinitely when the caster ceases to concentrate on it.

Spectral Force, Programmed

Level: 6
Duration: See below
Range: 240'

This spell functions as a *spectral force*, except it is triggered when a set of circumstances specified by the caster occurs, and/or when a specific command is uttered. Once triggered, the

spectral force lasts for 1 round per caster level.

Suggestion

Level: 3
Duration: 6 turns, +6 turns per level
Range: 30'

This spell functions identically to the magic-user spell of the same name.

Suggestion, Mass

Level: 6
Duration: 6 turns, +6 turns per level
Range: 30'

This spell functions like *suggestion*, except that it can affect 1 creature per caster level within 30'. If used on only 1 being, that being must save versus spells with a -2 penalty. The caster may only issue one *mass suggestion*, he may not issue separate *suggestions* per affected creature.

Summon Shadow

Level: 5
Duration: 1 round, +1 round per level
Range: 10'

By means of this spell, the caster brings forth 1 shadow per 3 caster levels. These creatures serve the caster, and will fight to the death if ordered. They remain until killed or the spell duration ends.

True Seeing

Level: 6
Duration: 1 round per level
Range: Touch

This spell functions identically to the cleric spell of the same name.

Veil

Level: 6
Duration: 1 turn per level
Range: 10' per level

The caster instantly changes the appearance of a 20' square area, including creatures in it if desired. The illusion is maintained for the spell's duration. The caster can make the subjects appear to be anything desired. They look, feel, and smell just like the creatures the spell makes them resemble, or the area looks, feels and smells like a different area desired. Affected creatures resume their normal appearances if slain. This spell may also be used to mimic the effects of *hallucinatory terrain*, but the illusion does hold up even under physical inspection. The spell *true seeing* or similar magical effects will reveal the illusion for what it is.

Ventriloquism

Level: 2
Duration: 2 turns
Range: 60'

This spell functions identically to the magic-user spell of the same name.

Vision

Level: 7
Duration: See below
Range: 0

By means of this spell, the caster sacrifices an object of no less than 300 gp value in order to entice an answer to a question from a powerful entity. If the vision is imparted, the caster sees an illusory depiction as his answer, which can take a form that interacts with all senses. However, an answer is not guaranteed. Roll on the table below to determine the outcome.

Roll d20	Result
1-5	Success, the vision is accurate and detailed
6-11	Ambiguous, only partial information or periphery information is imparted
12-20	Failure, caster is affected by a <i>geas</i> to do the bidding of the power consulted

Wall of Vapor

Level: 1

Duration: 2d4 rounds, +1 round per level

Range: 30'

The caster of this spell creates an opaque, fog-like vapor in a 20' cube area per caster level. All beings caught within the vapor cannot see beyond 2'. Strong winds of natural or magical origin can dissipate the *wall of vapor* before its duration has expired.

Magic-User Spells**Allure**

Level: 1

Duration: 1 round per level

Range: Self

When this spell is cast, all intelligent creatures within a 20', +20' per level diameter must save versus spells or perceive the caster as if he has an additional 2d4 CHA. In addition, creatures that fail the saving throw feel good will, generosity and liking for the caster, and will help him within reason. Those who succeed in the saving throw perceive the caster as if he has 1d4 lower CHA, and automatically dislike and are annoyed by the caster.

Amnesia

Level: 2

Duration: Permanent

Range: 30'

This spell allows the caster to obliterate the memory of an opponent. The time span is equal to the previous 1 round, +1 round per 3 levels of the caster. This spell only affects memory, it does not alter any actual events that have taken place or nullify any other spell effects. The spell is capable of affecting up to 4 beings in range. Beings are allowed a saving throw versus spells, which is modified depending on how many creatures are targeted. No modifier is applied if 3 or 4 creatures are targeted, but if 2 are targeted the save is at -1, and -2 if only one being is targeted. If a victim realizes his memory has been altered, the spells *heal* or *restoration* can return the memory. Note that these spells must be specifically applied for the purpose.

Animal Growth (reversible)

Level: 5

Duration: 1 round per level

Range: 60'

Except for range and duration, this spell functions identically to the druid spell of the same name.

Animate Dead

Level: 5

Duration: Permanent

Range: 60'

This spell functions identically to the cleric spell of the same name.

Anti-Magic Shell

Level: 6

Duration: 12 Turns

Range: 0

An anti-magic barrier is created around the caster. No spells may pass through this barrier, whether from inside or outside. The caster therefore may not cast any spells other than those that affect him only. The caster may end this spell at any time before the maximum duration has expired.

Antipathy/Sympathy

Level: 8

Duration: 12 turns per level

Range: 30'

The caster causes an object or location to emanate magical vibrations that repel or attract either a specific kind of intelligent creature or creatures of a particular alignment, as defined by the caster. The kind of creature to be affected must be named specifically, or specific alignment to be repelled must be named.

Antipathy: Creatures of the designated kind or alignment feel an overpowering urge to leave the area or to avoid the affected item. A compulsion forces them to abandon the area or item, shunning it and never willingly returning to it while the spell is in effect. A creature that makes a successful saving throw can stay in the area or touch the item but feels extremely uncomfortable doing so. This distracting discomfort reduces the creature's DEX score by 1 point per round, to a maximum of 4 points.

Sympathy: Creatures of the specified kind or alignment feel elated and pleased to be in the area or desire to touch or to possess the object. The compulsion to stay in the area or touch the object is overpowering. If a saving throw is successful, the creature is released from the enchantment, but a subsequent save must be made 1d6 turns later. If this save fails, the affected creature attempts to return to the area or object.

Arcane Eye

Level: 4

Duration: 6 turns

Range: 240'

The caster creates an invisible magical sensor that sends visual information, and can see with 60' infravision. The *arcane eye* travels up to 120' each turn. The eye can travel in any direction as long as the spell lasts. Solid barriers block its passage, but it can pass through a hole or space as small as 1 inch in diameter.

Arcane Lock

Level: 2

Duration: Permanent

Range: 10'

An *arcane lock* spell cast upon a door, chest, or portal magically locks it in a similar manner to the spell *hold portal*. The caster can freely pass his own *arcane lock* without affecting it; otherwise, a door or object secured with this spell can be opened with a successful *dispel magic* or *knock* spell. *Dispel magic* removes the *arcane lock*, while *knock* merely allows passage. In addition, any spell caster who is at least 3 levels higher than the caster of the spell may pass through unimpeded.

Arcane Window

Level: 6

Duration: 1 round per level

Range: Touch

The caster of this spell is able to see through walls as if a 3' square window is present. For the duration of the spell, the caster may see through more than just one wall, but it takes one round to switch from one wall to another. The *arcane window*, according to the caster's preference, can be made visible to other creatures. However, if it is made visible to others it can only be applied to one wall. The window is always one way. The spell may be applied to 20' thick wood, 6' thick stone, or 4 inch thick metal. Platinum, gold, and lead block this spell.

Astral Projection

Level: 9

Duration: See below

Range: Touch

This spell is identical to the cleric spell of the same name.

Atmosphere Bubble

Level: 5

Duration: 1 turn per level

Range: 0

The caster of this spell creates a bubble of altered water in a body of water (or water-based medium). Within this bubble there is a breathable atmosphere. The bubble sinks in water; the center of the bubble is on the caster and moves with him. The area of effect is either a 20' radius globe, or a 40' radius hemisphere, caster's choice. Aquatic creatures cannot swim while in this bubble, as it is only slightly denser than air. Likewise, water breathing creatures cannot breathe within the area of affect. Intelligent aquatic creatures will not enter the area of effect by mistake.

Auditory Illusion

Level: 2

Duration: 2 rounds per level

Range: 60', +10' per level

The caster of this spell is able to create false sound. The sound may be centered anywhere within range, and within that range the sound can fluctuate and move, imitating approaching or receding footsteps, laughter, voices, and other possibilities. The sound produced is the approximate equivalent of noise produced by 4 human sized beings. The sound may increase by 4 for each level the caster is above the minimum required to cast this spell. Note that the sound does not have to be human-like, but could be animal or monster sounds. In these cases the referee will determine how much sound and how many individuals it might represent. For instance, the sounds of four humans might be approximately that of 6 or 8 children, or 2 ogres. Beings are allowed a saving throw versus spells to realize the effect is illusory, but only if they actively attempt to disbelieve.

Blink

Level: 3

Duration: 1 round per level

Range: Self

The caster of this spell is able to "blink" back and forth between the ethereal plane and the material plane, seeming to wink in and out of reality, only to reappear in another location. The caster reappears 2' from his original location, in a random direction relative to the direction he is facing. Roll 1d8: 1, forward; 2, forward right; 3, right; 4, backward right; 5, backward; 6, backward left; 7, left; 8, forward left.

If the indicated position is already occupied by solid matter, the caster is shifted in a random direction from that point, but only to a distance up to 10' (and not into the area originally occupied). If matter occupies all possible routes, the caster does not reappear and is trapped on the ethereal plane. If the spell caster achieves initiative in any given round that this spell is in effect, opponents are unable to successfully attack him, as he blinks away too quickly. However, any area effect attacks which occupy the same space the caster occupies at both locations in a round will affect the caster.

Beginning the second round *blink* is in effect, the caster may blink and attack with hand weapons the same round. Any other activities, including spell casting, missile attacks, use of magic items, etc. fail on a roll of 1-15 on 1d20 due to misuse, effects or weapons fired in the wrong direction, or other results determined by the referee.

Burning Hands

Level: 1

Duration: 1 round

Range: See below

This spell causes a 3' long cone of searing flame to shoot from the caster's fingertips. The cone shoots out in a 120 degree arc centered on the caster. Any creature in the area of the flames takes 1 point of fire damage per caster level (no saving throw). Flammable materials burn if the flames touch them.

Charm Monster

Level: 4

Duration: Special

Range: 120'

Charm monster is identical to the spell *charm person* (discussed below), except that *charm monster* is not limited to humanoids or creatures of ogre size or smaller. Only one monster is charmed if it is 4 HD or greater. A group of monsters which are 3 HD or fewer may be affected, with their number determined by rolling 3d6.

Charm Person

Level: 1

Duration: Special

Range: 120'

This spell makes a humanoid creature regard the caster as its trusted friend and ally (treat the target's attitude as friendly). Undead creatures are unaffected by this spell, as are humanoid monsters larger than ogres. The spell does not enable the caster to control the *charmed* person as if it was an automaton, but it perceives the caster's words and actions in the most favorable way. The subject can be given orders, but actions it wouldn't ordinarily do based on its nature or alignment may be abstained from. An affected creature never obeys suicidal or obviously harmful orders, but it might be convinced that something very dangerous is worth doing. Any act by the caster or his apparent allies that threatens the *charmed* person breaks the spell. The caster must speak the person's language to communicate commands, or else be good at pantomiming. Creatures will gain additional saving throws versus spell at time intervals based on intelligence scores. An INT score of 3-8 grants a new save once every month. An INT of 9-12 grants a new save each week, and 13-18 grants a new save once every day. Otherwise, *charm person* can be negated by the spell *dispel magic*.

Charm Plants

Level: 7

Duration: Permanent

Range: 30'

By casting this spell, a magic-user is capable of commanding plants in a 300' squared area. The plants may be directed to do anything within their ability, but intelligent plant life is allowed a saving throw versus spells at -4 to resist the enchantment. Once an area is enchanted in this way, the magic-user is able to command the plants within it indefinitely.

Clairaudience

Level: 3

Duration: 12 turns

Range: 60'

Clairaudience creates an invisible magical link between the caster and one creature within range. This link allows the caster to hear whatever the creature hears. The process of linking with one creature and perceiving the same sounds takes a minimum of 1 turn, such that the caster may choose a new creature once per turn. The magical link between caster and creature is obstructed by lead or rock of a thickness of 2' or greater.

Clairvoyance

Level: 3

Duration: 12 turns

Range: 60'

Clairvoyance creates an invisible magical link between the caster and one creature within range. This link allows the caster to see whatever the creature sees. The process of linking with one creature and observing with its eyes takes a minimum of 1 turn, such that the caster may choose a new creature once per turn. The magical link between caster and creature is obstructed by lead or rock of a thickness of 2' or greater.

Clenched Fist

Level: 8

Duration: 1 round per level

Range: 5' per level

This spell creates a large, ghostly and bodiless hand that can strike one opponent that the caster selects per round. The attacks always strike the opponent, and the severity of the blow is determined by rolling 1d20 and consulting the chart below. If a target becomes stunned, subtract 4 from die rolls on the table for attacks that occur when the target is stunned. This reflects the stunned target's inability to attempt to dodge the giant fist.

Roll 1d20	Damage
1 or below	4d6 + stun for 3 rounds
2-4	3d6 + stun for 1 round
5-8	2d6
9-20	1d6

An opponent can attack a clenched fist. It has an AC of 9 and hp equal to those of the caster.

Clone

Level: 8

Duration: Permanent

Range: Touch

This spell makes a duplicate of a creature. To create the duplicate, the caster must have a piece of flesh (not hair, nails, scales, or the like) taken from the original creature's living body. The piece of flesh need not be fresh, but it must be kept from rotting. Once the spell is cast, the duplicate must be grown in a laboratory for 2d4 months. Once the duplicate reaches maturity, if the original being is alive the two beings will share a psychic link for 1 week. During this time each will seek to destroy the other. If this proves to be impossible, there is a 95% probability that either the clone or the original will lose his sanity. If this occurs, 25% of the time it will be the original, otherwise it is the clone that becomes insane. There is a 5% probability that both beings lose their sanity. After 1 week if neither being destroys the other, the psychic link dissolves and there is no longer a compulsion to destroy each other. The spell duplicates only the original's body and mind, not its equipment.

Cloudkill

Level: 5

Duration: 6 turns

Range: 0

This spell generates a bank of yellowish green and poisonous fog in a diameter of 30'. The fog moves and grows away from the caster at 20 feet per round, rolling along the surface of the ground. For example, after two rounds the fog will be 40 feet long. Because the vapors are heavier than air, they sink to the lowest level of the land, even pouring down den or sinkhole openings. It cannot penetrate liquids, nor can it be cast underwater. These vapors kill any living creature with 4 or fewer HD who fails a saving throw versus poison. A new save must be made each round. Otherwise, they suffer 1 hp of damage per round while in the cloud. A living creature with 5 or more HD suffers 1 hp of damage per round while in the cloud. Holding one's breath doesn't help, but creatures immune to poison are unaffected by the spell.

Comprehend Languages (reversible)

Level: 1

Duration: Touch

Range: 5 rounds per level

The caster can understand the spoken words of creatures or read otherwise incomprehensible written messages. In either case, the creature or the writing must be touched. The ability to read does not necessarily impart insight into the material, merely its literal meaning. The spell enables the caster to understand or read an unknown language, not speak or write it. *Obscure languages*, the opposite of *comprehend languages*, dispels the effects of *comprehend languages*, or can be used to make spoken or written language incomprehensible.

Cone of Cold

Level: 5

Duration: Instantaneous

Range: 0

Cone of cold creates an area of extreme cold, originating at the caster's hand and extending outward in a cone 5' long per level. It drains heat, dealing 1d4 + 1 points of cold damage per caster level.

Confusion

Level: 4

Duration: 12 rounds

Range: 120'

This spell causes 3d6 targets to become *confused*, making them unable to independently determine what they will do.

Roll on the following table at the beginning of each subject's turn each round to see what the subject does in that round.

Roll 1d10	Behavior
1-4	Attack caster's group.
5-6	Do nothing but babble incoherently.
7-10	Attack creature's group.

A *confused* character that can't carry out the indicated action does nothing but babble incoherently.

Conjure Elemental

Level: 5

Duration: permanent

Range: 240'

With this spell, the caster may summon one elemental of a particular kind per day, to a maximum of four elementals per day (1 each of fire, water, earth or air). Only 1 elemental is summoned per casting of the spell. For the duration of the spell, the caster can move at ½ movement but may take no other actions, because the spell requires full concentration to command the elemental. The caster can give the elemental orders for the duration of the spell, and the caster can order the elemental to return to its home plane at any time. The elemental is forced to its home plane if a *dispel evil* or *dispel magic* spell is directed at it. If the caster loses concentration at any point during the duration of the spell, the elemental will turn to attack the caster, and the caster will be unable to order it back to its home plane.

Contact Other Plane

Level: 5

Duration: Special

Range: 0

The caster sends his mind to another plane of existence in order to receive advice and information from powers there. See the accompanying table for possible consequences and results of the attempt. The powers reply in a language the caster understands, but they resent such contact and give only brief answers to questions. All questions are answered with "yes," "no," "maybe," "never," "irrelevant," or some other one-word answer. The caster must concentrate on maintaining the spell in order to ask questions at the rate of one per round. A question is answered by the power during the same round. The caster may choose how many questions to ask. The number of questions asked reflects the level of power the contacted being has, and how far away it is. The greater the number of questions asked the further away the contacted place is and the more powerful the being is. First roll on the table below to see if the power knows the answer. Then roll to see if the power answers truthfully. There is a probability that the caster will go insane after casting the spell, and the probability is related to the number of questions asked.

Questions	Don't Know	True Answer	Insanity
3	75%	50%	5%
4	70%	55%	10%
5	65%	60%	15%
6	60%	65%	20%
7	50%	70%	25%
8	40%	75%	30%
9	30%	80%	35%
10	20%	85%	40%
11	10%	90%	45%
12	5%	95%	50%

Results of a Contact:

Don't Know: The entity may or may not know the answer, and may or may not tell the caster the truth of whether it knows or not.

True Answer: The caster gets a true, one-word answer.

Otherwise, the entity lies and the lie is undetectable.

Insanity: The chance that the caster goes insane at the effort of communication. A character that goes insane will remain that way for the same number of weeks as the total number of questions asked, and the player cannot play the character during this time. The base chance indicated on the table is reduced by 5% for every level the caster is above 11. For example, a 14th level caster receives –15% to the insanity roll.

Continual Light

Level: 2

Duration: Permanent

Range: 120'

This spell is similar to the 1st level cleric spell *light*. A 60' diameter sphere of light is brought into being, and is a permanent effect. This spell can be cast on objects so that the light is portable. This spell may be cast directly on a creature, but the creature receives a saving throw versus spells. If successfully cast on a creature's eyes, blindness results until the spell is negated with *dispel magic*.

Control Weather

Level: 6

Duration: See below

Range: 0

This spell differs from the cleric spell of the same name. The radius is limited to a localized 240 yards in an outdoor setting only. This spell has an indefinite duration so long as the caster maintains concentration. Possible weather and their effects are detailed below.

Weather	Effects
Calm	Dissipates foul weather
Hot	Will dry wet conditions, all movement divided by 2
Cold	Water and mud freezes, all movement divided by 2
Severe Winds	All movement divided by 2, no flying or missile weapon use possible. Sandy conditions will reduce visibility to 20'. Ship speed increased or decreased by a multiple of 2 depending on if sailing with or against the wind.
Tornado	The caster can direct the tornado, which moves at 120'. The tornado can be directed to attack, using the characteristics of an air elemental with 12 HD. Sea vessels have a 75% chance of suffering 8+1d4 structural hit points damage.
Foggy	Visibility drops to 20', and all movement is divided by 2.
Rainy	Missile attacks hit at –2. Mud forms in 3 turns, and movement divided by 2.
Snowy	Visibility drops to 20', and all movement is divided by 2

Crushing Hand

Level: 9

Duration: 1 round per level

Range: 5' per level

This spell creates a large, ghostly and bodiless hand that can grasp and squeeze one opponent that the caster selects per round. The attacks always strike the opponent, and the severity of the damage is determined by the duration of the squeezing. The target suffers 1d10 hit points of damage per round grasped, to a maximum of 4d10.

An opponent can attack a *crushing hand*. It has an AC of 9 and hp equal to those of the caster.

Dancing Lights

Level: 1

Duration: 2 rounds per level

Range: 40', +10' per level

The caster may create up to four lights that resemble either lanterns or torches (and cast that amount of light), or up to four glowing spheres of light (which look like will-o'-wisps), or one faintly glowing, vaguely humanoid shape. The *dancing lights* must stay within a 10' radius area in relation to each other but otherwise move as the caster desires (no concentration required): forward or back, up or down, straight or turning corners, or the like. The lights wink out if the distance between the caster and the light exceeds the spell's range, or the duration ends.

Darkness Globe

Level: 2

Duration: 1 turn, +1 round per level

Range: 10' per level

The caster creates a 15' radius ball of darkness, centered anywhere within range. This darkness is complete, and forms of normal vision which normally can see in darkness are useless, including infravision and ultraviolet vision. The spells *light* or *continual light* render the effects of *darkness globe* ineffective, such that the normal lighting conditions of the area are present.

Death Spell

Level: 6

Duration: 1 round

Range: 240'

This formidable spell kills creatures of 8 HD or fewer within a 60' cube. A total of 4d8 HD of creatures are killed, and a saving throw versus death is allowed. For example, if 20 HD is rolled and there are five 4 HD creatures in the area of effect, all may potentially die if they fail their saving throws. A successful save negates all effect.

Delayed Blast Fireball

Level: 7

Duration: See below

Range: 100', + 10' per level

In most respects, this spell is identical to *fireball*. However, damage receives a +1 bonus per damage die, and the caster may choose for the spell to "go off" from 1 to 5 rounds after the round the spell is cast.

Detect Evil

Level: 2

Duration: 2 turns

Range: 60'

With the exception of differences in duration and range, this spell is identical to the 1st level cleric spell of the same name.

Detect Invisible

Level: 2

Duration: 5 rounds per level

Range: 10' per level

The caster can see invisible, hidden, ethereal, or astral creatures

or items so long as they are directly in sight within a 10' wide range of vision.

Detect Magic

Level: 1
Duration: 2 turns
Range: 60'

All enchanted items, creatures, places, or other things within 60' of the caster will glow for the duration of the spell. The caster may move around to bring objects within the radius during the duration of the spell.

Dimension Door

Level: 4
Duration: 1 round
Range: 10'

The caster instantly transfers himself or another creature from its current location to any other known spot within 360'. The being always arrives at exactly the spot desired. An unknown or unseen place may be specified. For example, 100' south and 20' high, but if the destination is already occupied by a solid body, the spell fails.

Disintegrate

Level: 6
Duration: Permanent
Range: 60'

A thin, green ray springs from the caster's pointing finger. No attack to hit is necessary, but targets may save versus death to negate the effects of this spell. Any non-magical creature of any size struck by the ray is instantly disintegrated. When used against an object, the ray simply disintegrates as much as one 10' cube of nonliving matter. Thus, the spell disintegrates only part of any very large object or structure targeted. The ray affects even objects constructed entirely of force, such as *crushing hand*, but not magical effects such as an *anti-magic shell*.

Dispel Magic

Level: 3
Duration: permanent
Range: 120'

The caster can use *dispel magic* to end ongoing spells that have been cast on a creature or object within a 20' cube area by a spell caster of the same or lower level. If the level of the caster of the effect to be dispelled is higher than the caster of *dispel magic*, there is a cumulative 5% chance per level difference that the attempt to dispel will fail. *Note:* The effect of a spell with an instantaneous duration can't be dispelled, because the magical effect is already over before the *dispel magic* can take effect.

Distort Distance

Level: 5
Duration: 1 turn per level
Range: 10' per level

This spell is cast after an earth elemental has been summoned. The elemental will then obey, and spread itself over an area specified by the caster, up to 1,000 square feet per caster level. The area can be distorted to be twice long or equally short. Thus a 500' long x 200' wide cavern could be shrunk to 250' long x 100' wide, or expanded to 1000' long x 400' wide. Creatures traveling over such a distorted area do not realize it is distorted, and there is no way to detect any outside influence. The area will faintly radiate magic.

Duo-Dimension

Level: 7
Duration: 3 rounds, +1 per level
Range: 0

The spell caster causes one dimension of his being (depth) to exist in another plane, thus reducing the visible portion of

himself to the two-dimensional aspects of height and width. The caster can take all normal actions, but has the ability to appear invisible if standing such that only his side is presented to an observer. The caster may also slide sideways through small cracks or other tight spaces. *True seeing* does allow a viewer to see the caster. This two-dimensional existence also creates vulnerability. Any damage the caster sustains while under the effects of the spell is multiplied by three, but the character cannot be struck while standing sideways to an attacker. The caster can, however, be affected by area effect attacks, which are subject to the damage multiplier stated previously.

Dweomer of Rage

Level: 6
Duration: 1 round per level
Range: Self

This spell allows a magic-user to drink a *potion of heroism* or *superheroism*, and experience an amplified effect. The potion is quaffed and the spell cast. The caster becomes a wild, immensely powerful berserk fighter with +2 to damage and two attacks per round. The caster's current hp total is multiplied by two, and his AC is improved by 4. He attacks as a fighter of the same level as the caster. When the caster takes damage, it is subtracted from the addition hp, and if damage does not exceed that addition hp pool, when the spell duration ends the caster will experience no damage. However, for every hp damage beyond the extra hp pool, the caster suffers double damage from his normal hp total when the spell ends. Due to the blind blood rage induced by this spell, the caster has no choice but to continue fighting all enemies present until the spell ends.

Enchant Arms

Level: 4
Duration: 5 rounds per level
Range: Touch

This complicated spell takes 1 turn to cast. When finished, 2 smaller weapons (arrows, crossbow bolts, daggers, etc.) or one normal to larger sized weapon (any sword, a mace, etc.) is enchanted. Such weapons become temporarily magically honed, and are capable of affecting creatures that require +1 weapons to hit. Note that these weapons do not gain any bonuses to hit or damage. Missile weapons enchanted with this spell lose their enchantment when they hit a target. Melee weapons retain the enchantment until the duration ends.

Enlarge (reversible)

Level: 1
Duration: 1 turn per level
Range: 5' per level

This spell causes instant growth (and corresponding increase in weight) of a single object or creature that is in visible range. This increase changes a creature's size by 20% per caster level, and up to three times the original size of the creature. The effectiveness of this spell is half of this on non-living objects, with 10% per level, but a maximum of double the original size of the object. The caster can affect 10 cubic feet of living matter per level or 5 cubic feet per level of non-living matter. Magical item properties are not affected by this spell. For instance, a wand will have the same function even though it may be the size of a staff, and potion dosages are not increased, though they may take longer to drink. Objects do become stronger or heavier, so that a small rock gains the weight of an appropriately sized larger one, and a person enlarged will have a strength appropriate to his size (as an ogre, or any of the various giants, for example) with corresponding strength adjustments.

The reverse of *enlarge*, *reduce*, can *reduce* objects or creatures in size by the same proportions as *enlarge*. These spells cancel each other out. For either version of the spell a saving throw is allowed to negate the effect. This save may be forfeited if the recipient desires.

Erase

Level: 1
Duration: Permanent
Range: 30'

Erase removes writings of either magical or mundane nature from a scroll or from one or two pages of paper, parchment, or similar surfaces. The caster cannot remove *explosive runes* or a *glyph of warding*. The probability of success for magical writings is 50%, +2% for each level of the caster, or 50%, +4% per level of the caster for non-magical writings. A saving throw is allowed to negate these effects.

ESP

Level: 2
Duration: 12 turns
Range: 60'

The caster can choose a direction and focus his concentration for 1 turn. After this turn, he can perceive the thoughts of all creatures within 60'. The caster understands the meaning of all thoughts even if he does not share the creature's language. However, if multiple creatures are within the range of the spell, the caster must spend an additional turn to sort out one creature's thoughts, or else all thoughts mingle into a confusing jumble. The ability to hear thoughts is obstructed by lead or rock of a thickness of 2' or greater.

Explosive Runes

Level: 3
Duration: See below
Range: Touch

The caster traces mystic runes upon a book, map, scroll, or similar object bearing written information. The *runes* detonate when read, dealing 6d4+6 points of damage in a 10' radius. The reader suffers full damage, no save allowed. Anyone else in the area of effect takes the full damage unless a saving throw versus spells is made for half damage. The object on which the *runes* were written is obliterated, unless it is unaffected by fire. The caster and any other beings specifically instructed can read the protected writing without triggering the *runes*. Likewise, the caster can remove the *runes* whenever desired. Another creature can remove them with a successful *dispel magic* spell. A magic-user has a 5% chance per level of detecting the runes, and a thief has a flat 5% chance.

Extend Duration I

Level: 4
Duration: See below
Range: 0

This spell may be used to extend the duration of a spell the caster has already cast and is still in effect. Only spells of levels 1, 2, and 3 are extended in this way, and their duration is extended by 50%.

Extend Duration II

Level: 5
Duration: See below
Range: 0

Extend duration II is identical to *extend duration I*, except that the duration of spells from levels 1-4 may be extended by 50%.

Extend Duration III

Level: 6
Duration: See below
Range: 0

Extend duration III is identical to *extend duration I*, except that the duration of spells of levels 1-3 may be extended by 100%, and spells of levels 4 and 5 may be extended by 50%.

Faithful Hound

Level: 5
Duration: 2 rounds per level
Range: 10'

This spell conjures up a phantom watchdog. It guards the area where it was conjured. The hound immediately starts barking loudly if any creature approaches that is the size of a large rat or bigger. The hound sees invisible, ethereal and creatures that are out of phase or similar. If an intruder turns its back on the hound, the dog stops barking and delivers a vicious bite (as 10 HD creature, 3d6 points). The dog also may attack all creatures, even those that can only be hit with +3 weapons. Its bite is the equivalent of a magic weapon for the purpose of damage reduction. The hound cannot be attacked, but it can be dispelled. The caster must always remain within 30' of the guarded area, else the spell is broken.

False Gold

Level: 2
Duration: 6 turns per level
Range: 10'

The caster may transform copper or brass within 1 cubic foot per level into pure gold. This is the equivalent of 400 pounds per cubic foot, and the metal could be in the form of coins, art, etc. Beings that encounter false gold can check to see if the ruse is detected, by rolling 1d20 against INT. A penalty of +1 is added to the roll per level of the caster. So if a shopkeeper has an INT of 12 and the caster is 5th level, a roll of 7 or fewer is required to detect the false nature of the gold. Alternatively, if the gold makes contact with pure iron there is a 20% chance it reverts back to its true nature.

False Trap

Level: 2
Duration: 6 turns per level
Range: 10'

This clever enchantment may be used by the caster to permanently create the false perception that an item, such as a small box, lock, dagger, etc., is trapped. If the thief skill *detect traps* is employed on the item, there is an 80% chance, -4% per level of the observer, that a trap is perceived. If an attempt is made to remove the trap, there is a slim 20% chance, +4% per level of the observer, that the trap is perceived to be removed.

Fear

Level: 4
Duration: See below
Range: 0

An invisible cone (60' long, 5' wide origin, and 30' diameter at the terminal end) of terror causes each living creature in the area to become panicked and run away if they do not succeed in a saving throw versus spells. There is a 60% probability, -5% per victim's level, that the victim drops whatever he may be holding when he runs away. Victims flee as fast as their movement rates allow, for a number of rounds equal to the caster's level.

Feather Fall

Level: 1
Duration: 1 round per level
Range: 10' per level

The affected creatures or objects in range fall slowly. *Feather fall* instantly changes the rate at which the targets fall to that of a feather (about 10' per round), and the subjects take no damage upon landing while the spell is in effect. When the spell duration expires, a normal rate of falling is resumed. The spell affects one or more objects or creatures (including gear and carried objects up to each creature's maximum encumbrance). The maximum volume is 10 cubic feet, and 200 pounds +200 pounds per level may be affected, such that a 1st level magic-user can affect 400 pounds.

The spell can be cast with an instant utterance, quickly enough

to save the caster or another creature if he unexpectedly falls, but initiative, if appropriate, must be on the side of the caster. This spell has no special effect on ranged weapons unless they are falling quite a distance. The spell may be cast on falling items or creatures and missiles, but is ineffective against creatures firmly on the ground or flying. No saving throw is permitted.

Feeblemind

Level: 5
Duration: Indefinite
Range: 240'

If the target creature fails a saving throw versus spell with a -4 penalty, it becomes a mental invalid. The affected creature is unable to speak, cast spells, understand language, or communicate coherently. The subject remains in this state until a *dispel magic* spell is used to cancel the effect of the *feeblemind*.

Feign Death

Level: 3
Duration: 6 rounds, +1 round per level
Range: Touch

The caster of this spell causes a state of death-like paralytic arrest in himself or another willing creature. This physical state completely mimics death to any observer, even if the creature is physically examined. To affect another creature, physical contact must be made and the target must have equal or fewer levels or HD to the caster. No saving throw is permitted. Any being under the effect of this spell is conscious and can hear and smell, but cannot move and is completely numb. Thus, if the body is damaged or otherwise molested, there will be no discomfort to the spell recipient and no physical reaction. Damage inflicted to a creature in this state is reduced by 50%, and poison, paralysis, or energy drain attacks are ineffective. However, any poison that retains its effective duration after the spell ends will affect the creature once the spell ends or is negated. The caster may negate the spell before the duration ends, but 1 round must pass for the body to resume normal life functions.

Fire Ball

Level: 3
Duration: Instant
Range: 240'

A *fireball* spell is an explosion of flame that detonates with a low roar and deals 1d6 points of fire damage per caster level to every creature within a 20' radius. The caster points his finger and determines the range (distance and height) at which the *fireball* is to burst. A glowing, pea-sized bead streaks from the pointing digit and, unless it impacts upon a material body or solid barrier prior to attaining the prescribed range, blossoms into the *fireball* at that point. (An early impact results in an early detonation.)

The *fireball* sets fire to combustibles and damages objects in the area. It can melt metals with low melting points, such as lead, gold, copper, silver, and bronze. If the damage caused to an interposing barrier causes it to shatter or break apart, the *fireball* may continue beyond the barrier if the area permits; otherwise it stops at the barrier just as any other spell effect does. All beings caught within the explosion are allowed a saving throw versus spells. A successful save reduces damage by half.

Fire Shield

Level: 4
Duration: 2 rounds, +1 round per level
Range: 0

This spell wreathes the caster in flames. Any creature striking the caster with its body or a handheld weapon deals normal damage, but at the same time the attacker takes double that damage. When casting this spell, the caster appears to immolate himself, but the flames are thin and wispy, giving off light equal to only half the illumination of a normal torch (15'

radius). The special powers of each version are as follows, and must be chosen when the spell is cast:

Warm Shield: The flames are warm to the touch. The caster may make saving throws versus cold-based attacks with a +2 bonus, and if successful takes no damage from spells that allow a save for half damage, and he takes half damage from spells that do not normally allow a save. Should the caster fail a save versus a fire-based attack, damage is doubled.

Chill Shield: The flames are cool to the touch. The caster may make saving throws versus fire-based attacks with a +2 bonus, and if successful takes no damage from spells that allow a save for half damage, and he takes half damage from spells that do not normally allow a save. Should the caster fail a save versus a cold-based attack, damage is doubled.

Fire Trap

Level: 4
Duration: See below
Range: Touch

Fire trap creates a fiery explosion when an intruder opens the item that the trap protects. A *fire trap* can ward any object that can be opened and closed. When someone other than the caster opens the object, a fiery explosion fills the area within a 5' radius around the trapped area. The flames deal 1d4 points of fire damage +1 point per caster level. A saving throw versus spells is allowed for half damage. The item protected by the trap is not harmed by this explosion. A *fire trapped* item cannot have a second closure or warding spell placed on it. A *knock* spell does not bypass a *fire trap*. *Fire trap* is hard to detect and disable. All attempts to remove the trap are at half, and failure triggers the trap.

Flame Arrow

Level: 3
Duration: 1 round
Range: Touch

The caster touches and transforms arrows or crossbow bolts into fiery projectiles (1 per caster level). Each piece of ammunition deals +1 point of fire damage to any target it hits. A flaming projectile can easily ignite a flammable object or structure, but it won't ignite a creature it strikes. All missiles must be used by the end of the round after the spell is cast, for they have been consumed by flame after that point and are useless.

Flame Charm

Level: 4
Duration: 2 rounds per level
Range: 10'

The caster of *flame charm* may enchant a flame source to form a 10' radius circle of dancing, wavering magical flame that has the power to *charm*. All beings that see the flame must save versus spells or be mesmerized into a motionless daze. If the spell *suggestion* is cast on any being in this state, the save is with a -3 penalty. Should a mesmerized victim have his vision taken away from the flames, or vision is blocked, he shakes the influence of the spell. The flames are not illusion, and will inflict fire damage equal to that of the flame's source.

Floating Disc

Level: 1
Duration: 6 turns
Range: 6'

The caster creates a slightly concave, circular plane of force that follows him about and carries loads. The disk is 3 feet in diameter and 1 inch deep at its center. It can hold 500 pounds. If used to transport a liquid, its capacity is 2 gallons. The disk floats approximately 3 feet above the ground at all times and remains level. It floats along horizontally within spell range and will accompany the caster with an equal movement rate. If not otherwise directed, it maintains a constant interval of 6 feet between itself and the caster, and will follow the caster without prompting to maintain a minimum of 6' distance. When the disk

winks out at the end of the spell's duration, whatever it was supporting falls to the surface beneath it.

Fly

Level: 3

Duration: See below

Range: 0

For a number of turns equal to the caster's level + 1d6 turns, the caster can fly with a maximum movement of 120' each round. The caster can vary the speed as desired, and is capable of hovering.

Forceful Hand

Level: 6

Duration: 1 round per level

Range: 10' per level

This spell functions like *interposing hand*, except that the *forceful hand* pushes away an opponent. The force is capable of shoving away beings that weigh 500 pounds or fewer. Creatures heavier than this but weighing 2,000 pounds or fewer may only move 10' per round, and creatures heavier than this but not weighing more than 8,000 pounds move at half their normal rate per round. A forceful hand may be damaged (AC 9), and has the same hit points as the spell caster.

Freezing Sphere

Level: 6

Duration: See below

Range: See below

Freezing sphere creates one of three effects, as chosen by the caster when the spell is uttered. A frigid globe of cold energy may be formed from the caster's fingertips and thrown, where it explodes in a 10' radius burst, dealing 4d6 points of cold damage to each creature in the area. This globe of energy may also be gently formed and held or placed on the ground for a delayed effect. It will explode after 1 round per caster level, regardless of whether it has been deposited or whether it is still in the caster's hand. Creatures caught or struck by the sphere may save versus spells for half damage. The *freezing sphere* may be used to strike a body of water or a liquid that is principally water. It freezes the liquid to a depth of 6 inches over an area equal to 100 square feet per caster level. This ice lasts for 1 round per caster level. Finally, rather than a globe, the caster may spray a ray of freezing energy to a distance of 10' per level, dealing 4 hp damage per caster level. A successful saving throw versus spells avoids all damage from this effect.

Fumble

Level: 4

Duration: 1 round per level

Range: 10'

The victim of this spell becomes horribly clumsy if a saving throw versus spells fails. Items held fall to the ground; likewise, attempts to grab, catch, or otherwise manipulate other objects is doomed to bumbling ineptitude. Running victims fall down. It takes 1 round to pick an item back up or to get up from a fall, assuming the spell duration has ended. If the victim succeeds in his saving throw, he is able to concentrate on his magical clumsiness, but his actions may only be carried on as if under the effects of *slow* for the duration of the spell.

Gate

Level: 9

Duration: see below

Range: 30'

Casting a *gate* spell has two effects. First, it creates an interdimensional connection between the caster's plane of existence and a specified plane, allowing travel between those two planes in either direction. Second, the caster may then call a particular individual or kind of being through the *gate*. The caster must utter the name of the being, which can be any demonic or otherworldly being, or even a god, which he desires to come through the *gate*. Gods will most likely send

representatives rather than come through a *gate* personally. Some creature will always come through the planar portal, and will behave in a way that is completely dependent on the situation, including factors like the caster's alignment, the power level of any foes, and the nature of the being itself. The being will simply turn around and go back to its original plane 20% of the time if the reason for its summoning is trivial. It will leave 15% of the time if the reason is only slightly important. Otherwise there is up to a 50% chance the being may leave, with the lowest chance (01%) if the situation is not only important but one that the being can handle easily, and a higher chance if the situation is dangerous to the being or the being is angry at being summoned.

The GM must rule these situations carefully. Chaotic beings may betray the summoner if they can, or may have their own motives that will influence their actions. It must be emphasized that summoned beings are not mindlessly controlled by the summoner.

Geas (reversible)

Level: 6

Duration: See below

Range: 30'

This spell functions in an identical manner to the 5th level cleric spell *quest*.

Glass Like Steel

Level: 8

Duration: Permanent

Range: Touch

The caster may give glass the strength of steel in a quantity up to 10 pounds multiplied by caster level. The glass must consist of a finite object. For example, a complete window could be made to have the strength of steel, but not just part of a large window.

Globe of Invulnerability

Level: 6

Duration: 1 round per level

Range: 0

This spell is identical to *lesser globe of invulnerability*, except that it provides complete protection from 4th level spells and lower.

Globe of Invulnerability, Lesser

Level: 4

Duration: 1 round per level

Range: 0

An immobile, faintly shimmering magical 10' diameter sphere surrounds the caster and excludes all spell effects of 3rd level or lower. The area or effect of any such spells does not include the area of the *lesser globe of invulnerability*. Such spells fail to affect any target located within the globe. However, any type of spell can be cast through or out of the magical globe. Spells of 4th level and higher are not affected by the globe, nor are spells already in effect when the globe is cast. The globe can be brought down by a *dispel magic* spell.

Grasping Hand

Level: 7

Duration: 1 round per level

Range: 10' per level

This spell creates a ghostly and bodiless hand that can act as a barrier between the caster and another being, or can grasp the being to hold it in place. This hand can range in size from a normal-sized hand to a hand about 10' long, and can be used to hold a creature in place if it weighs 1000 pounds or fewer. The hand can also be used to push a being of 4,000 pounds or fewer so that its movement is reduced to 10' per round. Creatures of up to 16,000 pounds in weight can be pushed so that their movement rate is reduced by half.

An opponent can attack a *grasping hand*. It has an AC of 9 and hp equal to those of the caster.

Guards and Wards

Level: 6
Duration: 6 turns per level
Range: 0

This powerful spell is primarily used to defend a stronghold. The ward protects a 20' diameter sphere, and an additional 10' radius per caster level. The spell creates the following magical effects within the warded area.

Fog: Fog fills all corridors, obscuring all sight, including infravision, beyond 10'.

Arcane Locks: All doors in the warded area are *arcane locked*.
Webs: Webs fill all stairs from top to bottom. These strands are identical with those created by the *web* spell, except that they regrow in 10 minutes if they are burned or torn away while the *guards and wards* spell lasts.

Confusion: Where there are choices in direction—such as a corridor intersection or side passage—a minor *confusion*-type effect functions so as to make it 50% probable that intruders believe they are going in the opposite direction from the one they actually chose.

Lost Doors: One door per caster level is covered by an illusion to appear as if it were a plain wall.

In addition, the caster can place one of the following five magical effects.

1. *Dancing lights* in four corridors.
2. A *magic mouth* in two places.
3. A *stinking cloud* in two places. The vapors appear in the places designated; they return within 10 minutes if dispersed by wind while the *guards and wards* spell lasts.
4. A *gust of wind* in one corridor or room.
5. A *suggestion* in one place. The caster selects an area of up to 5' square, and any creature who enters or passes through the area receives the *suggestion* mentally.

The whole warded area radiates strong magic. *Dispel magic* cast on a specific effect, if successful, removes only that effect.

Gust of Wind

Level: 3
Duration: 1 round
Range: 0

This spell creates a severe blast of air that originates from the caster, affecting all creatures in a path 10' long and wide, +10' long per level. If flying, smaller creatures are blown back 1d6x10 feet. Human-sized creatures are unable to move forward against the force of the wind, and larger flying creatures have half movement. The force of the *gust* automatically extinguishes candles, torches, and similar unprotected flames. It causes protected flames, such as those of lanterns, to dance wildly and has a 5% chance per caster level to extinguish those lights.

Hallucinatory Terrain

Level: 4
Duration: See below
Range: 240'

The caster makes some terrain look, sound, and smell like some other sort of terrain, but the entire terrain to be hidden must be encompassed by the range this spell may affect. If the illusion comes into contact with an intelligent being, the spell is negated. Otherwise, *dispel magic* may be used to rid the area of the illusion. The caster may affect 1' square area per caster level.

Haste (reversible)

Level: 3
Duration: 3 turns
Range: 240'

This spell makes creatures move and act more quickly than normal. A maximum of 24 creatures within a diameter of 60' may be affected. A *hasted* creature may make double the normal number of attacks. However, a creature may not cast a second spell. All of the *hasted* creature's modes of movement (including land movement, burrow, climb, fly, and swim) double in speed. Multiple *haste* effects do not stack. *Haste* dispels and counters *slow* effects.

Slow, the reverse of *haste*, halves all attacks and movement, including spell casting such that only one spell may be cast every two rounds.

Hold Monster

Level: 5
Duration: See below
Range: 120'

The duration of this spell is a number of turns equal to the casters level +6 turns. In all other respects this spell is identical to the 2nd level cleric spell *hold person*, but can affect non-humanoid monsters and larger monsters.

Hold Person

Level: 3
Duration: 1 turn per level
Range: 120'

In all respects this spell is identical the cleric spell of the same name.

Hold Portal

Level: 1
Duration: 2d6 turns
Range: 10'

This spell magically holds shut a door, gate, window, or shutter of wood, metal, or stone. The magic affects the portal just as if it were securely closed and normally locked. A *knock* spell or a successful *dispel magic* spell can negate a *hold portal* spell.

Ice Storm

Level: 4
Duration: 1 round
Range: 10' per level

This spell causes great magical hailstones in a 40' diameter area to pound down for 1 full round, dealing 3d10 points damage to every creatures in the area. Alternatively, the caster can bring into being a sleet storm with a diameter of 80'. Movement within its area is at half speed, with a 50% chance of slipping and falling.

Identify

Level: 1
Duration: 1 round per level
Range: Touch

This spell may be used to determine the magical properties of a single magic item. However, the magic-user must be holding or wearing the item according to its function and the spell must be cast no later than 1 hour after it comes into the caster's possession. Weapons must be held, boots worn, etc. If such an item happens to be cursed or otherwise requires a saving throw, the spell caster receives all normal defenses.

For each round the spell is in effect, there is a probability of 15%, +5% for each caster level that one power of the item is discovered. If the item is powerless this information will be gained as well. However, when using this spell, the caster must succeed in a saving throw versus spells each round. Only if this succeeds is the information gained correct. If the save is failed by 5% (1 lower than the target number) the information gained

is false, to be determined by the referee. If the roll is failed by more than that, no information is gained. Note that while specific abilities or powers are revealed, the specific "+" of a weapon is not, only the fact that it is enchanted is revealed and a general sense of whether it is strong or weak. The specific number of charges, if relevant, contained in a magic item is not revealed. Knowledge of an approximation is granted, which will be in the form of a range above and below approximately 25% of the actual number.

This spell is very draining on the caster. The caster suffers temporary loss of 8 points to CON when the spell duration ends. If this should bring the magic-user to fewer than 3, he falls unconscious for 24 hours but awakens with full CON restored. Points of CON may only be restored at the rate of 1 per 6 turns of rest.

Imprisonment (reversible)

Level: 9

Duration: Permanent

Range: Touch

When the caster casts *imprisonment* and touches a creature, it is entombed in a state of suspended animation (see the *temporal stasis* spell) in a small sphere far beneath the surface of the earth. The subject remains there unless a *freedom* spell (reverse of imprisonment) is cast at the locale where the imprisonment took place. Magical search by a *crystal ball*, a *locate object* spell, or some other similar divination does not reveal the fact that a creature is imprisoned.

Incendiary Cloud

Level: 8

Duration: 4 rounds, +1d6 rounds

Range: 30'

An *incendiary cloud* spell creates a cloud of roiling smoke shot through with white-hot embers. The smoke obscures all sight, and is 20' x 20' x 10'. In addition, the white-hot embers within the cloud begin to deal damage after 3 rounds. Initially, damage is equal to half the spell caster's level. This heat reaches a peak on the 4th round, dealing damage equal to the caster's level. During the 5th round the cloud is in existence, the damage decreases to half that of the caster's level, and the cloud deals no more damage after the 5th round. All creatures caught within the cloud receive a saving throw versus spells on the third round of the cloud's existence. If successful, all damage inflicted by the cloud is reduced to half for the entire duration they are exposed to the cloud. Otherwise, a new saving throw is allowed on the 4th and 5th rounds to reduce damage.

Infravision

Level: 3

Duration: 1 day

Range: 0

The caster or another creature is able to see 60' in the dark with *infravision*.

Instant Summons

Level: 7

Duration: Instantaneous

Range: Infinite

The caster calls some nonliving item from virtually any location directly to his hand. First, the caster must place a magical mark on the item. The item must not be more than roughly 3' long nor weigh more than 8 pounds. Then the spell is cast, which magically and invisibly inscribes the name of the item on a gem worth at least 5,000 gp. Thereafter, the caster can summon the item by speaking a special word (set by the caster when the spell is cast) and crushing the gem. The item appears instantly in the caster's hand. Only the caster can use the gem in this way. If the item is in the possession of another creature, the spell does not work. The item can be summoned from another plane, but only if no other creature has claimed ownership of it.

Interposing Hand

Level: 5

Duration: 1 round per level

Range: 10' per level

Interposing hand creates a large magic hand that appears between the caster and one opponent. This floating, disembodied hand then moves to remain between the two, regardless of where the caster moves or how the opponent tries to get around it. The hand does not pursue an opponent, however. An *interposing hand* has as many hit points as the caster when undamaged. It has an AC of 9. Any creature weighing 2,000 pounds or less that tries to push past the hand is slowed to half its normal speed.

Invisibility

Level: 2

Duration: See below

Range: Touch

The creature or object touched becomes invisible, vanishing from sight, even from infravision. If the recipient is a creature carrying gear, gear vanishes too. If the spell is cast on someone else, neither the caster nor any allies can see the subject, unless they can normally see invisible things or other magic is employed to do so. Items dropped or put down by an invisible creature become visible; items picked up disappear if tucked into the clothing or pouches worn by the creature. Light, however, never becomes invisible, although a source of light can become so (thus, the effect is that of a light with no visible source). Any part of an item that the subject carries but that extends more than 10 feet from it becomes visible.

Of course, the subject is not magically *silenced*, and certain other conditions can render the recipient detectable (such as stepping in a puddle). The spell ends if the subject attacks any creature, but is otherwise of indefinite duration. For the purposes of this spell, an attack includes any spell targeting a foe or whose area of effect includes a foe. (Exactly who is a foe depends on the invisible character's perceptions.) Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If the subject attacks directly, however, it immediately becomes visible along with all its gear. Spells such as *bless* that specifically affect allies but not foes are not attacks for this purpose, even when they include foes in their area.

Invisibility 10' Radius

Level: 3

Duration: See below

Range: Touch

This spell has the same effects as *invisibility*, but it affects all creatures within 10' of the caster or subject and any creatures that move beyond the 10' radius of effect become visible again.

Invisible Stalker

Level: 6

Duration: See below

Range: 0

The caster uses this spell to summon an invisible stalker, which can be ordered to undergo a task or mission. The creature will attempt to accomplish the task until it is finished or until the invisible stalker is destroyed. The spell *dispel evil* will send an invisible stalker back to its home plane.

Irresistible Dance

Level: 8

Duration: 1d4+1 rounds

Range: Touch

The subject feels an undeniable urge to dance and begins doing so, complete with foot shuffling and tapping. The spell effect

makes it impossible for the subject to do anything other than caper and prance in place. The effect imposes a penalty of 4 to Armor Class and negates the ability of the creature to attempt saving throws. It also negates any AC bonus granted by a shield the target holds.

Jarring Hand

Level: 1
Duration: Instant
Range: 10' + 2 ½' per level

The caster of this spell causes an invisible hand to jar or push an object or creature. The weight that may be pushed is 1 pound to a distance of 1 foot, per level (1 foot pound pressure). In this way a 1 pound object may be pushed 1' away by a 1st level magic-user, in a perpendicular direction to the caster. The spell may also be used to distract or unbalance an opponent. If used in this way the opponent receives a saving throw versus spells to negate the effect, and if failed the opponent loses his attack that round. The creature cannot weigh more than the caster's level x50 lbs. The spell may also be directed at the opponent's weapon, in which case a failed save results in the opponent suffering an attack penalty of 1 per caster level, or an equal penalty to any saving throws being tried that round (not counting against this spell).

Jump

Level: 1
Duration: 1 turn
Range: Touch

By use of this spell, the caster may leap straight up 10', backwards 10', or forwards 30'. For every 10' forward that is sprung, the apex of the leap is 2'. When the spell is cast, the magic-user may leap 1 time at any point during the duration, and may leap an additional time per 3 levels of the caster (2 at level 4, 3 at level 7, 4 and level 10, etc.). Note that the duration of the spell is the same no matter how many leaps are possible.

Knock

Level: 2
Duration: 1 round
Range: 60'

The *knock* spell opens stuck, barred, locked, or *held* doors. It opens secret doors, as well as locked or trick-opening boxes or chests. Any secret doors must of course be discovered first. The door does not relock itself or become stuck again on its own. *Knock* does not raise barred gates or similar impediments (such as a portcullis), nor does it affect ropes, vines, and the like.

Legend Lore

Level: 6
Duration: See below
Range: 0

Legend lore brings to the caster's mind legends about an important person, place, or thing. If the person or thing is at hand, or if the caster is in the place in question, the casting time is 1d4x10 turns. If the caster has only detailed information on the person, place, or thing, the casting time is 1d10 days. If only rumors are known, the casting time is 2d6 weeks. During the casting, the magic-user cannot engage in other than routine activities: eating, sleeping, and so forth. When completed, the divination brings legends or information about the person, place, or things to mind, but always in the form of riddles, puzzles, symbols, or other obscure forms that must be reasoned or intuited to understand. If the person, place, or thing is not of legendary importance, no information is gained.

Levitate

Level: 2
Duration: See below
Range: 0

For a number of turns equal to the caster's level +6 turns, the caster can move up and down as he wishes. The caster mentally directs movement up or down as much as 20 feet each round.

The caster cannot move horizontally, but could clamber along the face of a cliff, for example, or push against a ceiling to move laterally (generally at half base land speed).

Light (reversible)

Level: 1
Duration: See below
Range: 120'

This spell is in most respects identical to the 1st level cleric spell of the same name, except that the duration is a number of turns equal to the caster's level +6 turns.

Lightning Bolt

Level: 3
Duration: Instantaneous
Range: 180'

The caster releases a powerful stroke of electrical energy that is 60' long and 5' wide. It deals 1d6 points of electricity damage per caster level to each creature within its area. The *lightning bolt* sets fire to combustibles and damages objects in its path. It can melt metals with a low melting point, such as lead, gold, copper, silver, or bronze. If the damage caused to an interposing barrier shatters or breaks through it, the bolt may continue beyond the barrier if the spell's range permits; otherwise, it stops at the barrier just as any other spell effect does. Any creature caught in the area of effect receives a saving throw versus spells. A successful save reduces damage by half.

Limited Wish

Level: 7
Duration: See below
Range: Unlimited

A *limited wish* allows the caster to create nearly any type of effect. For example, a *limited wish* can duplicate any spell of 7th level or lower, undo the harmful effects of many spells, such as *geas* or *quest*, and produce any other effect whose power level is in line with the above effects, such as a single creature automatically hitting on its next attack or taking a penalty on its next saving throw or attack roll. This spell may also grant special knowledge to the caster, or the answer to a riddle or question. Note that the desired effects do not have to exactly match any existing spell, but can be unique effects allowed at the GM's discretion.

Locate Object

Level: 2
Duration: 2 turns
Range: 60', +10' per level

The caster can sense the direction of a well-known or clearly visualized object. A search can be made for general items, in which case the nearest one of its kind if more than one is within range. Attempting to find a certain item requires a specific and accurate mental image; if the image is not close enough to the actual object, the spell fails. The caster cannot specify a unique item unless he has observed that particular item firsthand.

Lower Water

Level: 6
Duration: 10 turns
Range: 240'

This spell allows the caster to reduce the depth of 10,000 square feet of water by half for the duration of this spell.

Magic Aura

Level: 1
Duration: 1 day per level
Range: Touch

The caster may alter an item's aura so that it registers to *detect* spells (and spells with similar capabilities) as though it were magical. If the object bearing *magic aura* is physically examined (touched), the examiner recognizes that the aura is false if he succeeds in a saving throw versus spells. Otherwise, he believes

the aura and no amount of testing reveals what the true magic is.

Magic Jar

Level: 5

Duration: Special

Range: 30'

By casting *magic jar*, the caster places his soul in a gem or large crystal (known as the *magic jar*), leaving his body lifeless. An attempt can then be made to take control of a body within 120', forcing its soul into the *magic jar*. The caster may move back to the jar (thereby returning the trapped soul to its body) and attempt to possess another body. The spell ends when the caster sends his soul back to his own body, leaving the receptacle empty.

To cast the spell, the *magic jar* must be within spell range. While in the *magic jar*, the caster can sense and attack any life force. Attempting to possess a body is a full-round action. The caster possesses the body and forces the creature's soul into the *magic jar* unless the subject succeeds a saving throw versus spell. Failure to take over the host leaves the caster's life force in the *magic jar*, and the target automatically succeeds on further saving throws if the caster attempts to possess its body again.

If the caster is successful, his life force occupies the host body, and the host's life force is imprisoned in the *magic jar*. The caster keeps his own Intelligence, Wisdom, Charisma, level, class, and alignment. The body retains its Strength, Dexterity, Constitution, hit points, natural abilities, and automatic abilities. The creature's spells and spell-like abilities do not stay with the body. The caster can be forced out of a possessed body if a *dispel evil* spell is cast.

The spell ends when the caster shifts from the jar to his body. If the host body is slain, the caster returns to the *magic jar*, if within range, and the life force of the host departs (it is dead). If the host body is slain beyond the range of the spell, both the caster and the host die. If the caster's life force is within the *magic jar* and his own body is slain, the caster is trapped in the *magic jar* until a creature comes within range and can be possessed. If the caster's life force is in possession of a host and the *magic jar* is destroyed, the caster's life force is stranded in the host. Any life force with nowhere to go is treated as slain. Destroying the receptacle ends the spell and destroys any life force inside it.

Magic Missile

Level: 1

Duration: 1 turn

Range: 150'

A missile of magical energy darts forth from the caster's fingertip and strikes its target, dealing 1d6+1 points of damage. The missile strikes unerringly, even if the target is in melee combat or has less than total cover or total concealment. Specific parts of a creature can't be singled out. For every five caster levels, the caster gains two additional missiles—3 total at 5th level, five at 10th, seven at 15th, and so on. If the caster can shoot multiple missiles, they can be directed to strike a single creature or several creatures. A single missile can strike only one creature.

Magic Mouth

Level: 2

Duration: See below

Range: See below

This spell imbues the chosen object or creature with an enchanted mouth that suddenly appears and speaks its message the next time a specified event occurs. The message, which must be twenty-five or fewer words long, can be in any language known by the caster and can be delivered over a period of 1 turn. The mouth cannot utter spells or activate magical effects. It does, however, move according to the words articulated; if it were placed upon a statue, the mouth of the

statue would move and appear to speak. Of course, *magic mouth* can be placed upon a tree, rock, or any other object, but not intelligent creatures.

The spell functions when specific conditions are fulfilled according to a command as set in the spell. Commands can be as general or as detailed as desired, although only visual, audible, or tactile triggers can be used. Audible triggers can be keyed to general types of noises or to a specific noise or spoken word. Actions can serve as triggers if they are visible or audible. A *magic mouth* cannot distinguish alignment, level, HD, or class except by external garb.

The range limit of a trigger is 5' feet per caster level, so a 6th level caster can command a *magic mouth* to respond to triggers as far as 30' away. Regardless of range, the mouth can respond only to visible or audible triggers and actions in line of sight or within hearing distance. The duration of this enchantment is indefinite, as it is discharged only when the conditions are met.

Magic Sword

Level: 7

Duration: 1 round per level

Range: 30'

The caster brings into existence a glowing energy blade that is wielded like a sword. The wielder may attack as a fighter of half the caster's level. A hit roll of 19 or higher always strikes. The energy sword can strike any creature normally only damaged by magical weapons, as well as creatures that are either out of phase, or in the ethereal or astral planes. The sword deals 6d4 hit points of damage. The spell *dispel magic* can cause the *magic sword* to disappear.

Manipulate Fire

Level: 1

Duration: 1 round per level

Range: 5' per level

By use of this spell the caster can manipulate the size of a non-magical fire ranging in size from a small torch fire to a 3' diameter fire. The size of the fire may be altered only in terms of light output, to be made as small as the size of a candle or bright in a manner equivalent to the spell *light*. However, actual thermal energy is not diminished, so no matter how bright or dim a fire is made, it is as hot as its true size. Nonetheless, shrinking a fire cuts use of fuel by 50%, and making a fire brighter increases fuel use by 100%.

Mass Charm

Level: 8

Duration: Special

Range: 5' per level

This spell functions like *charm monster*. However, the total number of HD affected can be up to a number of HD equal to twice the caster's level. All creatures to be affected must be within a 30' square area. All affected creatures make their saving throw with a penalty of -2.

Mass Invisibility

Level: 7

Duration: Special

Range: 10' per caster level

This spell functions just like *invisibility*, but affects all creatures within a 30' square.

Massmorph

Level: 4

Duration: See below

Range: 240'

Within a diameter of 240', up to 100 human-sized or equivalent creatures are given the illusory appearance of a forest. Any creatures that enter such an enchanted area become part of the illusion. Likewise, any creatures that leave the affected area become visible for what they are. This spell can be dismissed by

the caster at any time, but unless dispelled by *dispel magic* the enchanted area is permanent.

Maze

Level: 8

Duration: special

Range: 5' per level

The caster banishes the subject into an extradimensional labyrinth of force planes. The number of turns or rounds the subject wanders is determined by his intelligence.

Intelligence	Wandering Time
2 or below	2d4 turns
3-5	1d4 turns
6-8	5d4 rounds
9-11	4d4 rounds
12-14	3d4 rounds
15-17	2d4 rounds
18 or higher	1d4 rounds

Minotaurs are not affected by this spell.

Mending

Level: 1

Duration: Permanent

Range: 30'

Mending repairs small breaks or tears in objects. It will weld broken metallic objects such as a ring, a chain link, a medallion, or a slender dagger, providing but one break exists. Ceramic or wooden objects with multiple breaks can be invisibly rejoined to be as strong as new. A hole in a leather sack or a wineskin is completely healed over by *mending*. The spell cannot repair magic items, including magic rods, staves, or wands, nor does it affect living (or undead) creatures.

Message

Level: 1

Duration: 1 round, +1 round per 2 levels

Range: 60', +10' per level

This spell grants the caster the ability to whisper messages and receive whispered replies. The caster points his finger at a creature he wants to receive the message. The target must be in direct line of sight, with no barrier. The whispered message is audible only to the target. The creature that receives the message can whisper a reply that the caster can hear if the spell duration has not expired. The spell transmits sound, not meaning. It doesn't transcend language barriers.

Meteor Swarm

Level: 9

Duration: Instantaneous

Range: 40', +10' per level

Meteor swarm is a very powerful and spectacular spell that is similar to *fireball* in many aspects. When the spell is cast, either four 2' diameter spheres or eight 1' diameter spheres spring from the caster's outstretched hand and streak in straight lines to the spots selected. The meteor spheres leave a fiery trail of sparks. Any creature struck directly by one of the larger spheres takes 1d4x10 points of damage and receives no saving throw. Otherwise, these larger spheres fly through the air 20' apart and impact the ground 20' apart, having an area of effect of 30' each. The blast areas overlap one another as four 30' overlapping fire blasts which do the damage indicated above in the radius. The smaller spheres inflict 5d4 points of damage and have a blast radius of 15'. They will also have overlapping blast radii, in the shape of an eight-sided star. A saving throw versus spells is permitted for the smaller spheres, and success reduces damage by half.

Mind Blank

Level: 8

Duration: 7 rounds, +1 per level

Range: 30'

The subject is protected from all devices and spells that detect,

influence, or read emotions or thoughts. This spell protects against all mind-affecting spells and effects as well as information gathering by divination spells or effects. *Mind blank* even foils *limited wish* and *wish* spells when they are used in such a way as to affect the subject's mind or to gain information about it. In the case of scrying that scans an area the creature is in, such as a *crystal ball*, the spell works but the creature simply isn't detected. Scrying attempts that are targeted specifically at the subject do not work at all.

Mirror Image

Level: 2

Duration: 6 turns

Range: 0

Several illusory duplicates of the caster pop into being, making it difficult for enemies to know which target to attack. The figments stay near the caster and disappear when struck. *Mirror image* creates 1d4 images. The figments mimic the caster's actions, pretending to cast spells, drink potions, and so on. Enemies attempting to attack the caster strike a figment. Any attack destroys an image even if no physical contact is made, until there are no images left.

Mnemonic Enhancer

Level: 4

Duration: 2 turns per level

Range: 0

This spell allows the caster to prepare additional spells or retain spells recently cast. Up to 3 levels of spells could be retained, or memorized above and beyond the number normally available for the caster's level. This can be in any combination of spell levels. For instance, one 3rd level spell or three 1st level spells. If spells are to be retained, then rather than memorize extra spells, mnemonic enhancer is cast first and then used to discharge the spells of the stated spell levels, while retaining them for one more casting.

Move Earth

Level: 6

Duration: 6 turns

Range: 240'

A total of 60 cubic feet of loose soil can be moved per turn within the range provided above. Neither solid stone nor large boulders may be moved. See *lesser move earth* for additional applications of this spell.

Move Earth, Lesser

Level: 4

Duration: 1 round per level

Range: 30'

This lesser form of *move earth* allows the caster to dig or excavate areas in 5' cube increments. The caster can move a volume of 5' cubed (125 cubic feet) of soil, mud, or sand. The dirt is only moved to just around the opening of the excavation. If desired, the caster can dig a trench, or dig straight down. If digging straight down, there is a cumulative probability the walls of the pit will collapse, depending on the following medium: soil, 15% per 5'; mud, 55%; sand, 35%. Any being that comes within 1' of the opening of a pit must make a DEX attribute check to avoid falling in. If a pit is excavated just in front of a fast moving being, it is entitled to a saving throw versus spells to avoid falling in. If a pit is excavated directly under a stationary creature, it will automatically fall in.

Part Water

Level: 6

Duration: 6 turns

Range: 120'

The caster creates a path 10' wide and a maximum of 120' long through water, such as a pond, lake, or other body. The caster can dismiss the spell effects before the duration ends, thus allowing water to crash upon unwanted pursuers.

Passwall

Level: 5
Duration: 3 turns
Range: 30'

The caster creates a passage through wooden, plaster, or stone walls, but not through metal or other harder materials. The passage is 10' deep with a 5' diameter.

Permanency

Level: 8
Duration: Permanent
Range: See below

This spell makes certain other spells permanent. The caster can make the following spells permanent in regard to himself: *comprehend languages*, *detect evil*, *detect invisibility*, *detect magic*, *infravision*, *protection from evil*, *protection from normal missiles*, *read magic*, *tongues*, and *unseen servant*.

The desired spell is cast and then followed with the *permanency* spell. These spells cannot be cast on other creatures. The magic-user loses 1 point of CON. This application of *permanency* can be dispelled only by a higher level magic-user. In addition to personal use, *permanency* can be used to make the following spells permanent on another creature, or an object (as appropriate): *enlarge*, *fear*, *gust of wind*, *invisibility*, *magic mouth*, *prismatic sphere*, *stinking cloud*, *wall of fire*, *wall of force*, and *web*. The latter application of this spell may be dispelled by *dispel magic* used normally.

Phantasmal Force

Level: 2
Duration: See below
Range: 240'

So long as the caster maintains concentration, he can create a persistent, active illusion within a 20' cube. A passive illusion will disappear if touched by a creature. However, an illusionary monster may be created to attack a foe. Observers are allowed a saving throw versus spells to see through any illusion produced with this spell. If the save fails, the illusion persists and any illusionary monster will seem to inflict harm when it attacks an opponent. Illusionary monsters have an effective AC of 9, and they vanish if a foe successfully strikes them. If a foe appears to lose all hit points, he falls unconscious rather than dying. Similarly, other special effects will not be real and no damage is ever real. Note that the caster is not allowed to take any action while concentrating on the spell.

Phase Door

Level: 7
Duration: 1 passage per 2 levels
Range: Touch

This spell creates an ethereal passage through wooden, plaster, or stone walls, but not other materials. This passage is 10' deep with a 5' diameter. The *phase door* is invisible and inaccessible to all creatures except the caster, and only the caster can use the passage. The caster disappears when entering the *phase door* and reappears when exiting. If the caster desires, he can take one other creature (human-sized or smaller) through the door. This counts as two uses of the door. The door does not allow light, sound, or spell effects through it, nor can it be seen through. A *phase door* is subject to *dispel magic*. If anyone is within the passage when it is dispelled, he is harmlessly ejected just as if he were inside a *passwall* effect.

Plant Growth

Level: 4
Duration: See below
Range: 120'

This spell causes normal vegetation (grasses, briars, bushes, creepers, thistles, trees, vines) within a maximum of 3000 square feet to become thick and overgrown. The plants entwine to form a thicket or jungle that creatures must hack or force a way through. The area must have brush and trees in it for this

spell to take effect, and the effects last until a *dispel magic* spell is cast. This spell has no effect on plant creatures.

Polymorph Any Object

Level: 8
Duration: Variable
Range: 5' per level

This spell functions like other *polymorph* spells, except that it changes one object or creature into another. A saving throw versus *polymorph* is permitted. The duration of the spell depends on how radical a change is made from the original state to its enchanted state. The duration is determined by using the following guidelines, but the GM will have to decide the specific duration of each use of this spell based on the circumstances.

Consider Changes in:

Kingdom (animal, vegetable, mineral)
Class (mammals, fungi, metals, etc.)
Size (similar size, or greater, smaller)
Related (twig is to tree, wolf fur is to wolf, etc.)
Overall shape (similar shapes, similar functions)
Same or lower Intelligence

Changes across kingdoms will at best last a few hours. Items that are related, such as a piece of wolf fur becoming a wolf, are permanent. Note that changes affecting several categories may result in a shorter duration. The spell *dispel magic* will reverse the effects of this spell. All objects or creatures affected by this spell will radiate magic should they come under scrutiny of spells or objects that detect enchanted materials.

This spell can also be used to duplicate the effects of *flesh to stone*, *stone to flesh*, and similar spells that alter matter. When this spell is used to create the effects of *flesh to stone*, the victim makes a saving throw with a penalty of -4.

Polymorph Others

Level: 4
Duration: See below
Range: 60'

By means of this spell, one living being may be transformed into another kind of being. The creature may make a saving throw versus *polymorph*, but if the creature is willing this roll can be forgone and the effects are automatic. If the new creature's HD total more than twice the HD of the original creature, the spell does not work. Although the final form will retain the same number of hit points as the original, all other abilities of the new form will be acquired, including intelligence level. The creature becomes the new creature in every way, including instincts, alignment, preferences, etc. This spell may not be used to reproduce the appearance of a specific identity.

Polymorph Self

Level: 4
Duration: See below
Range: 0

For a number of turns equal to the caster's level +6, the caster transforms himself into another being. A particular individual may not be mimicked with this spell, but only a typical individual of a creature type. The new body must be of a creature with a number of HD equal to the caster or fewer. The caster retains his intelligence, hit points, saving throws, and ability to attack, but does gain physical abilities of the new form, including strength or strength-based attack forms and damage. Magical abilities or other special abilities are not gained. For example, if the caster transforms into a mantichore, he will be able to fly. If the caster takes the form of a medusa, his gaze will not petrify. The caster is unable to cast spells when transformed. The spell *dispel magic* negates the effects of this spell, and if the caster dies while in a different form he will revert to his natural form in death.

Power Word Blind

Level: 8

Duration: See below

Range: 5' per level

The caster utters a single word of power that causes one or more creatures of his choice to become blinded, whether they can hear the word or not. A total of 100 hp of beings may be affected. The duration of the spell depends on the hit point total of creatures affected. Any creature that has more than 100 hit points is unaffected by *power word blind*.

Hit Points	Duration
50 or fewer	1d4+1 turns
51–100	1d4+1 rounds

Power Word Kill

Level: 9

Duration: Permanent

Range: 2.5' per level

The caster utters a single word of power that instantly kills one or more creatures within a diameter of 20', whether the creatures can hear the word or not. This spell will kill multiple creatures if they have under 11 hit points each, or the spell will kill a single creature that has 60 or fewer hit points. The caster must choose whether he is attempting to kill one creature or multiple creatures when he casts the spell. If multiple creatures are targeted, a maximum of 120 hit points total of creatures may be killed. Any creature that has 61 or more hit points is unaffected by *power word kill*. There is no saving throw against this spell.

Power Word Stun

Level: 7

Duration: See below

Range: 5' per level

The caster utters a single word of power that instantly causes one creature of his choice to become stunned for 2d4 rounds, whether the creature can hear the word or not. The duration of the spell depends on the target's current hit point total. Any creature that has 91 or more hit points is unaffected by *power word stun*. There is no saving throw against this spell.

Hit Points	Duration
30 or less	4d4 rounds
31–60	2d4 rounds
61–90	1d4 rounds

Prismatic Sphere

Level: 9

Duration: 1 turn per level

Range: 0

The caster conjures up an immobile, opaque globe of shimmering, multicolored light that surrounds him and offers protection from all forms of attack. The sphere flashes in all colors of the visible spectrum. The sphere has a *blindness* effect on creatures with less than 8 HD, which lasts 2d4 turns.

The caster can pass into and out of the *prismatic sphere* and remain near it without harm. However, when inside it, the sphere blocks any attempt to project something through the sphere (including spells). Other creatures that attempt to attack the caster or pass through suffer the effects of each color, one at a time. Typically, only the upper hemisphere of the globe will exist, since the caster is at the center of the sphere, so the lower half is usually excluded by the floor surface.

Color	Order	Effect of Color	Negated By
Red	1st	Stops non-magical ranged weapons. Deals 10 points of fire damage.	<i>Passwall</i>
Orange	2nd	Stops magical ranged weapons. Deals 20 points	<i>Fly</i>

damage.

Yellow	3rd	Stops poisons, gases, and petrification. Deals 40 points of damage.	<i>Disintegrate</i>
Green	4th	Stops breath weapons. Poison (Kills; saving throw versus poison).	<i>Passwall</i>
Blue	5th	Stops divination and mental attacks. Turned to stone (saving throw versus petrify negates).	<i>Magic missile</i>
Indigo	6th	Stops all spells. Save versus spell-like devices or become insane.	<i>Continual light</i>
Violet	7th	Energy field that sends creatures to another plane (saving throw versus spells negates).	<i>Dispel magic</i>

Project Image

Level: 6

Duration: 6 turns

Range: 240'

The caster creates a quasi-real, illusory version of himself. The projected image looks, sounds, and smells like the caster but is intangible. The projected image mimics the caster's actions (including speech) and any sound or spell effects will seem to come from the image. If the image is physically contacted by hand or with a weapon wielded by hand, it disappears. However, all missile weapons or spells will pass through the image or otherwise appear to do nothing to the caster.

Protection from Evil

Level: 1

Duration: 12 turns

Range: 0

This spell wards the caster from attacks by evilly intentioned creatures (and creatures not of the caster's alignment), from mental control, and from summoned creatures. It creates a magical barrier around the subject at a distance of 1 foot. The barrier moves with the subject and has two major effects. First, the subject gains a +1 bonus to AC and a +1 bonus on saving throws. Both these bonuses apply against attacks made or effects created by evil creatures. Second the spell prevents bodily contact by summoned creatures. This causes the natural weapon attacks of such creatures to fail and the creatures to recoil if such attacks require touching the warding creature. This does not prevent these creatures from attempting ranged attacks. The protection against contact by summoned creatures ends if the warding creature makes an attack against or tries to force the barrier against the blocked creature.

Protection from Evil 10' Radius

Level: 3

Duration: 12 turns

Range: 0

This spell is identical to *protection from evil*, except that the effective protection extends 10' around the caster, and protects companions within this area.

Protection from Normal Missiles

Level: 3

Duration: 12 turns

Range: Touch

While under the effects of this spell, the caster or subject is completely unharmed by small and non-magical missiles. Only the subject receives this protection, and it does not extend to large hurled boulders such as those that giants employ, or enchanted arrows.

Pyrotechnics

Level: 2

Duration: See spell description
Range: 120'

This spell is identical to the druid spell, with the noted difference to range.

Ray of Enfeeblement

Level: 2
Duration: 1 round per level
Range: 10', +5' per level

This spell effects a coruscating ray from the caster's hand. The opponent takes a penalty to STR equal to 25%, +2% per caster level beyond level 3. This penalty applies equally to melee and missile damage inflicted by an affected creature. A successful saving throw versus spells negates the effect.

Read Languages

Level: 1
Duration: 2 turns
Range: 0

For the duration of this spell, the caster may read any language, coded message, map, or other set of written instructions. This spell does not grant any ability to speak unknown languages.

Read Magic

Level: 1
Duration: 1 turn
Range: 0

By means of *read magic*, the caster can decipher magical inscriptions on objects—books, scrolls, weapons, and the like—that would otherwise be unintelligible. This does not normally invoke the magic contained in the writing, although it may do so in the case of a cursed scroll. Furthermore, once the spell is cast and the caster has read the magical inscription, he thereafter is able to read that particular writing without recourse to the use of *read magic*. All spell books are written such that only the elf or magic-user who owns the book can decipher it without the use of this spell.

Reincarnate

Level: 6
Duration: Permanent
Range: 0

With this spell, the caster returns life to a character by means of creating another body. Since the character is returning in a new body, all physical ills and afflictions are repaired. The condition of the remains is not a factor. So long as some small portion of the body still exists, it can be reincarnated. The magic of the spell creates an entirely new young adult body. If the result on the table below indicates reincarnation into a PC race, determine which class randomly and roll 1d6 to determine the character's level. The level may not exceed the original character's class level. If the result on the table below indicates that the reincarnated character returns as a creature, roll on the column matching the original character's alignment. Additional creatures may be used to extend the table, but no creature having more than 6 HD should be included, and each creature should be minimally semi-intelligent. A character brought back as a creature must either adventure as the creature or the player must retire the character. Monsters do not gain experience or advance in levels.

	New Form	Chaotic	Neutral	Lawful
1	Dwarf	Bugbear	Ape	Blink Dog
2	Elf	Gnoll	Baboon	Gnome
3	Gnome	Goblin	Centaur	Neanderthal
4	Halfling	Hobgoblin	Lizardfolk	Pegasus
5	Half-Elf	Kobold	Pixie	Roc (small)
6	Half-Orc	Minotaur	Werebear	Unicorn
7	Human	Ogre		
8	Creature	Orc		
9-10	Same race			

Remove Curse (reversible)

Level: 4
Duration: Permanent
Range: 0

In all respects this spell is identical to the 3rd level cleric spell *remove curse*.

Repulsion

Level: 6
Duration: 1 round per 2 levels
Range: 10' per level

An invisible, mobile field is brought into being for 10' in front of the caster and prevents creatures from approaching. Any creatures who come into contact with the field are repelled like similar poles of a magnet, with a minimum movement of 30' or the creature's current speed, whichever is greater. Note that when repelled, a creature must finish its full movement that round even though it is in an unintended direction.

Reverse Gravity

Level: 7
Duration: 1 round
Range: 5' per level

This spell reverses gravity in a 30' squared area, causing all unattached objects and creatures within that area to "fall" upward 20'. If some solid object (such as a ceiling) is encountered in this fall, falling objects and creatures strike it in the same manner as they would during a normal downward fall. If an object or creature reaches the maximum height without striking anything, it remains there, oscillating slightly, until the spell ends. At the end of the spell duration, affected objects and creatures fall downward.

Rope Trick

Level: 2
Duration: 2 turns per level
Range: Touch

When this spell is cast upon a piece of rope from 5' to 30' long, one end of the rope rises into the air until the whole rope hangs perpendicular to the ground, as if affixed at the upper end. The upper end is, in fact, fastened to an extradimensional space. Creatures in the extradimensional space are completely hidden. The space holds as many as five human-sized creatures. Creatures in the space can pull the rope up into the space, making the rope "disappear." Otherwise, the rope dangles in mid air unless it is removed.

Anything inside the extradimensional space drops out when the spell ends, from the appropriate height. The rope can be climbed by only one person at a time. The *rope trick* spell enables climbers to reach a normal place if they do not climb all the way to the extradimensional space.

Scare

Level: 2
Duration: 3d4 rounds
Range: 10'

Unless a successful saving throw versus spells is made, the target of this spell becomes a fearful wreck. Only opponents with fewer than 6 HD or levels are affected by this spell, and clerics, undead, and demonic/devilish creatures are immune. While under the effects of this spell, a creature will not initiate combat, but if attacked will reciprocate with a -1 attack roll penalty. Likewise, any saving throws are attempted with a -1 penalty.

Scribe

Level: 1
Duration: 1 hour per level
Range: 0

This spell allows a magic-user to copy a spell into his spell book,

even if it is of a level the caster cannot use, and even if the spell is unusable due to intelligence. The scribing takes 1 hour per spell level of the spell transferred. For the time the spell is written, the caster is in a deep state of concentration, and will always be *surprised*. The caster must succeed in a saving throw versus spells. A penalty of -1 is applied if the spell to be copied is 3 levels greater than the caster may use, and a bonus of +2 is granted if the spell is up to 1 level greater than the caster may use, or below. If this saving throw is unsuccessful, the magic-user suffers 1d4 damage per spell level of the spell to be scribed, and the strain forces the caster unconscious for an equal number of turns. The caster may only heal up to 4 hp per day of this damage.

Secret Chest

Level: 5

Duration: 60 days

Range: See below

By casting this spell, a magic-user can hide a chest on the ethereal plane for as long as sixty days and can retrieve it at will. The chest can contain up to 1 cubic foot of material per caster level (regardless of the chest's actual size, which is about 3 feet by 2 feet by 2 feet). If any living creatures are in the chest, there is a 75% chance that the spell simply fails. Once the chest is hidden, the caster can retrieve it by concentrating (a standard action), and it appears next to him.

The chest must be exceptionally well crafted and expensive. The cost of such a chest is never less than 5,000 gp. Once it is constructed, the caster must make a tiny replica (of the same materials and perfect in every detail), so that the miniature of the chest appears to be a perfect copy. The caster can have but one pair of these chests at any given time—even a *wish* spell does not allow more. The chests are nonmagical and can be fitted with locks, wards, and so on, just as any normal chest can be.

To hide the chest, the spell is cast while touching both the chest and the replica. The chest vanishes into the ethereal plane. The caster needs the replica to recall the chest. After sixty days, there is a cumulative chance of 5% per day that the chest is irretrievably lost. If the miniature of the chest is lost or destroyed, there is no way, not even with a *wish* spell, that the large chest can be summoned back. There is a slim chance (cumulative 1% per week) that a denizen or some other being on the ethereal plane will find the chest. If this happens, roll on the table below for the outcome.

Roll d20	Result
1-3	One item is added
4-9	One item is stolen
10-16	All new contents are present
17-20	The chest is emptied

Shape Change

Level: 9

Duration: 1 turn per level

Range: 0

This spell enables the caster to assume the form of any single non-unique creature (of any type) except for particularly powerful creatures like demons, devils, or demi-gods. The caster's hit points remain the same. The caster gains all extraordinary and supernatural abilities (both attacks and qualities) of the assumed form, except for any abilities relying on knowledge or intelligence of the monster, because the caster's mind remains his own. The caster can change form once each round for the duration of the spell.

Shatter

Level: 2

Duration: Permanent

Range: 60'

Shatter creates a loud, ringing noise that destroys nonmagical objects of crystal, glass, ceramic, or porcelain. All such objects within range are smashed into dozens of pieces by the spell.

Objects weighing more than 10 pounds per caster level are not affected, but all other objects of the appropriate composition are shattered. Items are entitled to a saving throw versus crushing damage.

Shield

Level: 1

Duration: 2 turns

Range: 0

Shield creates an invisible field of force that protects the caster. Against missile attacks, the spell grants the caster an AC of 2. The caster has an effective AC of 4 for all other attacks.

Shocking Grasp

Level: 1

Duration: Instant

Range: Touch

The caster must touch an opponent, which deals 1d8 points of electricity damage +1 per caster level. The spell only deals damage if the caster initiates the contact, not if the opponent does.

Simulacrum

Level: 7

Duration: Permanent

Range: Touch

Simulacrum creates a pseudo-duplicate of any creature. The spell is cast over a rough snow or ice form, and some piece of the creature to be duplicated (hair, nail, or the like) must be placed inside the snow or ice. The simulacrum appears to be the same as the original, but it has only one-half of the real creature's hit points. The duplicate has a faulty memory of the original's life, but will remember most details 30% of the time. At all times the simulacrum remains under the caster's absolute command. No special telepathic link exists, so command must be exercised in some other manner. A simulacrum has no ability to become more powerful. It cannot increase its level or abilities. However, if the spell reincarnation is cast on a simulacrum, it will gain 35% +3d10% of the original's memories and will have the class abilities of the original at 10% + (1d4 x 10%) of the level of the original. If reduced to 0 hit points or otherwise destroyed, a simulacrum reverts to snow and melts instantly into nothingness. A simulacrum will radiate magic with a *detect magic* spell, and *true seeing* will reveal a simulacrum's true nature.

Sleep

Level: 1

Duration: 4d4 turns

Range: 240'

A *sleep* spell causes a magical slumber to come upon creatures with 4+1 Hit Die or fewer. The caster may only affect 1 creature if it has 4+1 HD, but the spell will otherwise affect up to 2d8 HD of creatures. Calculate monsters with less than 1 HD as having 1 HD, and monsters with a bonus to HD as having the flat amount. For example, a 3+2 HD monster would be calculated as having 3 HD. Hit Die that are not sufficient to affect a creature are wasted. Creatures with the fewest HD are affected first. Sleeping creatures are helpless and can be killed instantly with a blade weapon. Slapping or wounding awakens an affected creature, but normal noise does not. *Sleep* does not affect undead creatures.

Spell Resistance

Level: 8

Duration: 1 turn per level

Range: Touch

The caster can use this spell to grant resistance to mind-affecting spells. Spells that *charm*, *command*, *cause fear*, and similar effects are granted a saving throw bonus of +8. Extremely powerful compulsive spells such as *geas* are granted a bonus to a saving throw of +5. The caster may affect 1 creature for 4 turns, per level, or multiple creatures with the

duration divided among them.

Spider Climb

Level: 1

Duration: 1 round, +1 per level

Range: Touch

The subject can climb and travel on vertical surfaces or even traverse ceilings as well as a spider does. The affected creature must have its hands and feet free and bare to climb in this manner. Any objects weighing fewer than 5 pounds cling to the spell recipient's hands. No spells may be cast when under the effect of this spell. This spell may be used on another being (touch required) with no saving throw.

Spiritwrath

Level: 6

Duration: See below

Range: 10', +1' per level

By using the blood of a demon or devil, depending on the intended victim, the magic-user constructs a powerful scroll used to torture an infernal being. This method may also be employed against the most powerful vampires or a lich. The being's name must be known. The magic-user must also buy valuable gems equal to 100 gp per 1 HD of the intended victim, and powder them as part of the process to fabricate the ink. When the caster reads the scroll, so long as the target is within range, it is affected if it fails a saving throw versus spells. It is held in place and can take no actions. The first turn of the recitation the being becomes increasingly uncomfortable. After 2 turns, the victim loses 1 hp per its HD number. After 3 turns, the victim is in absolute agony and loses half its HP, and is propelled back to its home plane (the plane of negative energy for undead) and is there imprisoned for 1 year per caster level. The victim is in constant tortured pain during its imprisonment. For obvious reasons, such a victim may seek the caster at a later date for retribution. However, this spell is often used to extort something from its victim, and may be stopped at any time short of imprisonment. Should a target succeed in its saving throw, it is still uncomfortable and the scroll protects the caster from attack much like a *scroll of warding*. There is a 95% chance the intended victim will flee.

Statue

Level: 7

Duration: 6 turns per level

Range: Touch

A *statue* spell turns the caster or a subject to solid stone, along with any garments and equipment worn or carried. The subject can see, hear, and smell normally, but it does not need to eat or breathe. Feeling is limited to those sensations that can affect the granite-hard substance of the individual's body. Chipping is equal to a mere scratch, but breaking off one of the statue's arms constitutes serious damage. The subject of a *statue* spell can return to its normal state, act, and then return instantly to the *statue* state if it so desires, as long as the spell duration is in effect.

Stinking Cloud

Level: 2

Duration: Permanent

Range: 30'

Stinking cloud creates a 20' cubed bank of fog centered anywhere within range, making living creatures within it helpless with nausea. This condition lasts as long as the creature is in the cloud and for 1d4+1 rounds after it leaves. Any creature that succeeds in a saving throw versus poison when leaving the fog is not affected for the additional rounds.

Stone Shape

Level: 5

Duration: Permanent

Range: Touch

This spell can form an existing piece of stone into any shape

that suits the caster's purpose, to a total volume of 1' cubed per level. While it's possible to make crude coffers, doors, and so forth with *stone shape*, fine detail isn't possible.

Stone to Flesh (reversible)

Level: 6

Duration: Permanent

Range: 120'

This spell restores a petrified creature to its normal state, restoring life and goods. Any petrified creature, regardless of size, can be restored. *Flesh to stone* (reverse of *stone to flesh*) turns one creature into a statue, including all gear and any items currently held. A saving throw versus petrify is permitted to resist the transformation.

Strength

Level: 2

Duration: 6 turns per level

Range: Touch

The caster of this enchantment may apply it to himself or another. It confers a temporary STR bonus, which varies depending on the recipient's class. Druids, clerics, thieves, and assassins receive +1d6; magic-users, illusionists, and monks receive +1d4; fighters, paladins, and rangers receive +1d8. A character's STR may not go above 18.

Suggestion

Level: 3

Duration: 6 turns, +6 turns per level

Range: 30'

The caster may influence the actions of the target creature by suggesting a course of activity (limited to a sentence or two). The *suggestion* must be worded in such a manner as to make the activity sound reasonable. Asking the creature to do some obviously harmful act automatically negates the effect of the spell. However, a victim may be led to believe that an action is not harmful. For instance, being told to drink something that is poisonous and that it is actually a hearty drink. The suggested course of activity can continue for the entire duration. If the suggested activity can be completed in a shorter time, the spell ends when the subject finishes what it was asked to do. A very reasonable *suggestion* causes the save to be made with a penalty (such as -1 or -2). A saving throw versus spells is allowed to negate the effects of this spell.

Summon Demon

Level: 7

Duration: See below

Range: 10'

This complicated spell is cast after a circle of protection for the caster, and a pentacle-bound 30' diameter area of imprisonment for a demon, is constructed with various magical markings and candles made from the fat of a humanoid. The caster may summon a demon of power up to a higher order demon, but for standard and higher order demons the demon's specific name must be known. The summoning takes 1 turn per HD of the demon. Demons are allowed a save versus spells to resist the summoning.

This spell may be used and combined with *spiritwrath* to coerce a demon into service. The *summon demon* spell creates a pact once the demon agrees, and it must perform the act desired by the caster. The service cannot take longer than 9 weeks. Alternatively, the caster can bribe the demon for this service via human sacrifice or a sacrifice of the demon's choosing. Finally, this spell may be combined with the spell *trap the soul*, which traps the demon in an object, and once released it must perform a service for the caster. After any service is performed, the demon is propelled back to its home plane. There is a base 5% chance that the bargaining is grossly mishandled, setting the demon loose to wreak vengeance on the caster. This chance is lowered by 1% per caster level above 15.

Summon Familiar

Level: 1

Duration: See below

Range: 10' per level

By casting this spell, the magic-user can obtain a familiar. The casting takes from 1-24 hours (referee's discretion) and uses up rare herbs and other materials that cost 100 gp. The materials are consumed during a ritual in which they are burned. The referee decides the probability that a creature will respond to the spell, and which type of creature is summoned within range. It is possible that no creature will respond. This spell may only be attempted one time per year. A familiar is able to grant the caster access to its own senses, and is able to communicate with the caster. In addition, a familiar is loyal, and will follow orders until its death. Familiars are more intelligent than ordinary animals; they have AC 7 and 2d4 hp. A familiar grants the caster additional hp equal to the familiar's maximum total, when the two are within 120' of one another. However, if a familiar is slain the magic-user must subtract the familiars maximum hp from his own maximum hp, permanently. A new familiar may not be summoned for one year. If a familiar is located, the referee may use the following as examples:

Familiar	Senses augmented
Bat	hearing
Cat	hearing and night vision
Hawk	much improved distance vision
Lizard	improved smell
Owl	hearing, night vision
Raven	improved vision
Toad	180 degree vision
Weasel	hearing, improved smell

Anytime a familiar is summoned there is a 5% chance it is a special familiar. The type is determined by the caster's alignment and good or evil leanings. Creatures are entitled to a saving throw versus spells, and if successful, the spell fails and the caster must wait 1 year before trying again. Where there is overlap in the chart below, determine the familiar randomly.

Alignment	Type
Lawful	Brownie or Psuedo-Dragon
Neutral	Pseudo-Dragon*, Imp*, or Quasit*
Chaotic	Imp or Quasit

*The familiar will try, over time, to sway the magic-user to chaos or law, as appropriate.

Refer to the monster listings for the powers granted by these creatures.

Summon Monster I

Level: 3

Duration: 2 rounds, +1 round per level

Range: 30'

This spell conjures 2d4 1st-level (1 HD) creatures that arrive in 1d4 rounds to an exact location within range which is specified by the caster. The monsters summoned are chosen by the referee. Summoned monsters may be commanded to fight nearby foes, and will do so until death or until the spell duration ends. Creatures may be commanded to perform other tasks, and will do so if it is within their abilities.

Summon Monster II

Level: 4

Duration: 3 rounds, +1 round per level

Range: 40'

With minor differences of range and duration, this spell functions much like *summon monster I*, but brings forth (1d6) 2 HD creatures.

Summon Monster III

Level: 5

Duration: 4 rounds, +1 round per level

Range: 50'

With minor differences of range and duration, this spell functions much like *summon monster I*, but brings forth (1d4) 3 HD creatures.

Summon Monster IV

Level: 6

Duration: 5 rounds, +1 round per level

Range: 60'

With minor differences of range and duration, this spell functions much like *summon monster I*, but brings forth (1d3) 4 HD creatures in 1d3 rounds.

Summon Monster V

Level: 7

Duration: 6 rounds, +1 round per level

Range: 70'

With minor differences of range and duration, this spell functions much like *summon monster I*, but brings forth (1d2) 5 HD creatures in 1d2 rounds.

Summon Monster VI

Level: 8

Duration: 7 rounds, +1 round per level

Range: 80'

With minor differences of range and duration, this spell functions much like *summon monster I*, but brings forth (1d2) 6 HD creatures in 1d3 rounds.

Summon Monster VII

Level: 9

Duration: 8 rounds, +1 round per level

Range: 90'

With minor differences of range and duration, this spell functions much like *summon monster I*, but brings forth (1d2) 7 HD creatures in 1 round, or (1) 8 HD creature in 2 rounds.

Symbol

Level: 8

Duration: See below

Range: Touch

This spell allows the caster to scribe a potent rune of power upon a surface. There are eight different kinds of symbol, each with a different effect. Symbols are triggered by being read, touched, or if a creature passes through a door with a symbol inscribed on it. The only way a symbol may be identified is by reading it, which automatically triggers the effects. The kinds of symbols the caster may inscribe are detailed below.

Symbol of Conflict

When triggered, all creatures in the area will argue for 5d4 rounds. Any beings of differing alignment may (50% chance) fight for 2d4 rounds.

Symbol of Death

When triggered, a *symbol of death* slays one or more creatures whose total hit points do not exceed 80.

Symbol of Despair

Any beings in the area must succeed in a saving throw versus spells, or leave the area in hopelessness. This feeling lasts for 3d4 turns, during which time affected creatures will cower, surrender, and otherwise lack enthusiasm. Only 75% of affected creatures will act in a given round, the remaining creatures will either leave the area or hang around doing nothing.

Symbol of Fear

All creatures must succeed in a saving throw versus spells with a penalty of -4 or suffer from the effects of a *fear* spell.

Symbol of Insanity

When triggered, a *symbol of insanity* causes all nearby creatures whose total hit points do not exceed 120 to become permanently insane (as the *confusion* spell). This effect can be

negated with the spells *heal* or *wish*.

Symbol of Pain

Each creature suffers wracking pains that impose a –4 penalty on attack rolls and –2 to DEX. These effects last for 2d10 turns.

Symbol of Sleep

All creatures of 8 HD or fewer fall into a catatonic slumber for 1d12+4 turns. Unlike with the *sleep* spell, sleeping creatures cannot be awakened by non-magical means before this time expires.

Symbol of Stunning

When triggered, a *symbol of stunning* causes all nearby creatures whose total hit points do not exceed 160 to become stunned and unable to act for 3d4 rounds. Any held items will be dropped.

Telekinesis

Level: 5

Duration: 6 rounds

Range: 120'

By concentrating on nothing else and taking no other actions, the caster can move objects or creatures by concentrating on them. A total of 20 pounds per caster level may be moved 20' per round. Living beings may also be moved, but they are allowed a saving throw versus spells.

Teleport

Level: 5

Duration: Instantaneous

Range: 10'

This spell instantly transports the caster or another being to a designated destination, which may be any distance. Interplanar travel is not possible. If transporting another being, it is entitled to resist with a saving throw versus spell. The caster must have some clear idea of the location and layout of the destination. The clearer the mental image, the more likely the teleportation works. To determine how well the teleportation works, roll d% and consult the table below. Refer to the following information for definitions of the terms on the table.

Familiarity: "Very familiar" is a place the caster has been very often. "Studied carefully" is a place known well, either because the caster can currently see it, he has been there often, or has used other means (such as *scrying*) to study the place for at least one hour. "Seen casually" is a place that the caster has seen more than once but with which he is not very familiar. "Viewed once" is a place that the caster has seen once, possibly using magic.

On Target: The caster or creature appears in the desired location

High: The caster or creature appears 1d10x10 feet above the destination. Should this location already be occupied by solid matter, the caster or creature is instantly killed.

Low: The caster or creature appears in the ground and is killed instantly

Familiarity	On Target	High	Low
Very familiar	01–95	96–99	00
Studied carefully	01–80	81–90	91–00
Seen casually	01–50	51–75	76–00
Viewed once	01–30	31–65	66–00

Note that the caster cannot intentionally teleport himself or another creature off target or into solid matter.

Temporal Stasis

Level: 9

Duration: Permanent

Range: 10'

The caster must succeed on an attack roll. The subject is placed into a state of suspended animation, and for the creature, time ceases to flow. The creature does not grow older, and its body functions virtually cease. This state persists until the magic is removed (such as by a successful *dispel magic* spell). No saving throw is permitted.

Time Stop

Level: 9

Duration: 2 rounds

Range: 0

This spell seems to make time cease to flow for everyone but the caster within a shimmering sphere of 30' diameter. The caster may act for 2 rounds within this area of effect, while all other creatures are frozen in time. If the caster leaves the sphere, the spell ends. If monsters enter the sphere from outside, they become frozen.

Tiny Hut

Level: 3

Duration: 6 turns per level

Range: 0

The caster creates an unmoving, opaque 10' diameter sphere of force. Half the sphere projects above the ground, and the lower hemisphere passes through the ground. As many as 6 other human-sized creatures can fit into the field with the caster; they can freely pass into and out of the hut without harming it. However, if the caster removes himself from the hut, the spell ends. The temperature inside the hut is 70F if the exterior temperature is between 0° and 100F. An exterior temperature below 0° or above 100° lowers or raises the interior temperature on a 1-degree-for-1 basis. The hut also provides protection against the elements, such as rain, dust, and sandstorms. The hut withstands any wind up to 50 mph, but greater force destroys it. The interior of the hut is a hemisphere. The caster can illuminate it dimly upon command or extinguish the light as desired. Although the force field is opaque from the outside, it is transparent from within. Missiles, weapons, and most spell effects can pass through the hut without affecting it, but the occupants cannot be seen from outside the hut.

Tongues (reversible)

Level: 3

Duration: 1 round per level

Range: 0

The function of this spell is identical to the cleric spell of the same name (4th level), except for the duration.

Transmute Rock to Mud (reversible)

Level: 5

Duration: 3d6 days

Range: 120'

This spell turns 3,000 square feet of rock 10' deep into mud for 3d6 days. Any beings passing through the mud have movement reduced by 90%. *Transmute mud to rock* (reverse of *transmute rock to mud*) changes an equal volume of mud described above into rock. This alteration is permanent.

Trap the Soul

Level: 8

Duration: Permanent

Range: 10'

Trap the soul forces a creature's life force (and its material body) into a gem. The gem holds the trapped entity indefinitely or until the gem is broken and the life force is released, which allows the material body to reform. Before the actual casting of *trap the soul*, the caster must procure a gem of at least 1,000 gp value for every Hit Die possessed by the creature to be

trapped. The spell can be triggered in one of two ways.
Spell Completion: First, the spell can be completed by speaking its final word as a standard action as if one were casting a regular spell at the subject. This allows the victim a saving throw versus spell to avoid the effect. If the save is successful, the gem shatters.

Trigger Object: The second method is far more insidious, for it tricks the subject into accepting a trigger object inscribed with the final spell word, automatically placing the creature's soul in the trap. To use this method, both the creature's name and the trigger word must be inscribed on the trigger object when the gem is enchanted. A *sympathy* spell can also be placed on the trigger object. As soon as the subject picks up or accepts the trigger object, its life force is automatically transferred to the gem without the benefit of a saving throw.

Unseen Servant

Level: 1
 Duration: 6 turns, +1 turn per level
 Range: 0

An *unseen servant* is an invisible, mindless, shapeless force that performs simple tasks at the caster's command. It can run and fetch things, open unstuck doors, and hold chairs, as well as clean and mend. It can open only normal doors, drawers, lids, and the like. It can lift 20 pounds or drag 40 pounds. The servant cannot attack in any way, and it cannot be killed because it is a magical force, not a living thing.

Vanish

Level: 7
 Duration: See below
 Range: Touch

By casting this spell, a magic-user may *teleport* an object as per the spell *teleport*, or may banish the object to the ethereal plane, in which case the object is replaced in the material plane with stone that matches the objects shape. A total of 50 pounds per level not to exceed a volume of 3' cubed per level may be caused to *vanish* in this manner. If the spell *dispel magic* is cast upon a stone item replaced by this spell, it may bring back the original item.

Ventriloquism

Level: 1
 Duration: 2 turns
 Range: 60'

For the duration of this spell the caster may make his voice appear to come from any location or source within the spell range.

Wall of Fire

Level: 4
 Duration: See below
 Range: 60'

An immobile, opaque, blazing curtain of shimmering violet fire springs into existence and persists so long as the caster takes no other action and focuses concentration on the spell. The wall can be as large as 1,200 square feet, and may be shaped in any manner and to any dimensions the caster desires, so that it can be a straight wall or curved into a protective circle. This wall of flames is impenetrable to monsters with fewer than 4 HD. Monsters with more than 4 HD suffer 1d6 hit points of damage when they pass through the wall. The wall deals double damage to undead creatures or creatures that use cold or are accustomed to cold. The wall may not be evoked so that it appears where objects are.

Wall of Force

Level: 5
 Duration: 1 turn, +1 round per level
 Range: 30'

A *wall of force* spell creates an invisible wall of force. The wall cannot move, it is immune to damage of all kinds, and it is

unaffected by most spells, including *dispel magic*. However, *disintegrate* immediately destroys it, as does a *rod of cancellation*. Breath weapons, spells, missile weapons, electrical attacks and thermal attacks cannot pass through the wall in either direction. The caster can form the wall into a sphere or hemisphere whose area is up to one 20' square per level.

Wall of Iron

Level: 5
 Duration: Permanent
 Range: 5' per level

With this spell the caster may cause a flat, vertical iron wall to spring into being. The wall inserts itself into any surrounding nonliving material if its area is sufficient to do so. The wall cannot be conjured so that it occupies the same space as a creature or another object. It must always be a flat plane. If not supported, the wall has a 50% chance of falling in either direction, smashing any creatures under it. A *wall of iron* is 1/4" thick per caster level. Total area can be 15' per caster level, and the area can be doubled if the thickness is halved. Like any iron wall, this wall is subject to rust, perforation, and other natural phenomena.

Wall of Ice

Level: 4
 Duration: 12 turns
 Range: 120'

An immobile, translucent, wall of ice springs into existence for the duration of the spell. The wall can be as large as 1,200 square feet, and may be shaped in any manner and to any dimensions the caster desires, so that it can be a straight wall or curved into a protective circle. This wall of ice is impenetrable to monsters with fewer than 4 HD. Monsters with more than 4 HD suffer 1d6 hit points of damage when they break through the wall. The wall deals double damage to creatures that use fire or are accustomed to hot conditions. The wall may not be evoked so that it appears where objects are, and it must rest on a solid surface.

Wall of Stone

Level: 5
 Duration: See below
 Range: 60'

The caster brings a stone wall into being that can be any form the caster desires, to a maximum of 1,000 cubic feet. This wall is permanent unless otherwise destroyed or a *dispel magic* spell is cast upon it. The wall may not be evoked so that it appears where objects are, and it must rest on a solid surface.

Water Breathing

Level: 3
 Duration: 1 day
 Range: 30'

The caster or another creature can breathe water freely by means of this spell. The spell does not make creatures unable to breathe air, and creatures under the influence of the spell are not granted any additional proficiency at swimming.

Web

Level: 2
 Duration: 48 turns
 Range: 10'

Web creates a many-layered mass of strong, sticky strands. Creatures caught within a *web* become entangled among the gluey fibers. Entangled creatures can't move, but can break loose depending on their strength. Any being with strength in a human range can break free of the webs in 2d4 turns. Creatures of higher strength or magically augmented strength above 18 can break free in 4 rounds. The strands of a *web* spell are flammable. All creatures within flaming webs take 1d6 points of fire damage from the flames for 2 rounds. After this time surviving creatures are free of the webs.

Wish

Level: 9

Duration: See below

Range: Unlimited

Wish is the mightiest spell that can be cast. By simply speaking aloud, the caster can alter reality. This spell can accomplish any effects described for limited wish, and may mimic other 9th level spells or create comparable effects. Ultimately, the GM will have to decide the limits of a wish spell. Events can be reversed; the dead can be brought back to life or an entire army might be healed of damage. An entire group could be teleported to any location with no chance of error. Powers or ability bonuses may be wished for at the GM's discretion, and these might be permanent or temporary. Wishes will be fulfilled according to the letter of the request, and the GM can exercise some regulation of wishes based on this strict enforcement. Although another character may be wished dead, such an act disrupts balance and the GM should think of a method to fulfill the wish but in a way that the character wished dead is unaffected. For instance, if a character is wished dead, the caster may be transported through time to a point where the victim has already died of natural causes, or the caster might be sent to an alternate dimension where the victim has died.

Spell Lists by Class and Level

Cleric Spell List

LEVEL 1

1. Command
2. Create Water (reversible)
3. Cure Light Wounds
4. Detect Evil
5. Detect Magic
6. Light
7. Protection from Evil
8. Purify Food and Drink
9. Remove Fear
10. Resist Cold
11. Sanctuary

LEVEL 2

1. Augury
2. Bless
3. Delay Poison
4. Find Traps
5. Know Alignment
6. Hold Person
7. Holy Chant
8. Resist Fire
9. Reveal Charm
10. Silence 15' Radius
11. Snake Charm
12. Speak with Animal
13. Spiritual Weapon

LEVEL 3

1. Animal Growth
2. Animate Dead
3. Continual Light
4. Cure Blindness
5. Cure Disease
6. Dispel Magic
7. Feign Death
8. Glyph of Warding
9. Locate Object
10. Prayer
11. Remove Curse (reversible)
12. Speak with Dead
13. Striking

LEVEL 4

1. Create Food and Water
2. Cure Serious Wounds
3. Detect Lie
4. Divination
5. Exorcise

6. Lower Water
7. Neutralize Poison
8. Protection from Evil 10' Radius
9. Speak with Plants
10. Sticks to Snakes
11. Tongues

LEVEL 5

1. Atonement
2. Commune
3. Cure Critical Wounds
4. Dispel Evil
5. Flame Strike
6. Insect Plague
7. Quest
8. Plane Shift
9. Raise Dead
10. True Seeing

LEVEL 6

1. Animate Objects
2. Blade barrier
3. Conjure Animals
4. Find the Path
5. Heal
6. Part Water
7. Speak with Creatures
8. Stone Tell
9. Summon Aerial Servant
10. Word of Recall

LEVEL 7

1. Astral Projection
2. Control Weather
3. Earthquake
4. Gate
5. Holy Word
6. Regenerate
7. Restoration
8. Resurrection
9. Symbol
10. Wind Walk

Druid Spell List

LEVEL 1

1. Animal Companion
2. Detect Magic
3. Detect Snares and Pits
4. Divine Weather
5. Entangle
6. Faerie Fire
7. Invisibility, Animal
8. Locate Creature
9. Pass without Trace
10. Purify Water
11. Shillelagh
12. Speak with Animals

LEVEL 2

1. Barkskin
2. Charm Person or Mammal
3. Create Water
4. Cure Light Wounds
5. Feign Death
6. Find Plant
7. Fire Trap
8. Heat Metal
9. Obscuring Mist
10. Produce Flame
11. Stumble
12. Warp Wood

LEVEL 3

1. Call Lightning
2. Cure Disease
3. Hold Animal
4. Insect Swarm
5. Neutralize Poison

6. Plant Growth
7. Protection from Fire
8. Pyrotechnics
9. Snare
10. Stone Shape
11. Tree Shape
12. Water Breathing

LEVEL 4

1. Cure Serious Wounds
2. Dispel Magic
3. Flash Fire
4. Hallucinatory Terrain
5. Hold Vegetation and Fungus
6. Passplant
7. Protection from Electricity
8. Repel Vermin
9. Speak with Plants
10. Summon Animal I
11. Summon Sylvan Beings
12. Temperature Control

LEVEL 5

1. Animal Growth
2. Anti-Plant Shell
3. Commune with Nature
4. Control Winds
5. Insect Plague
6. Sticks to Snakes
7. Summon Animal II
8. Transmute Rock to Mud (reversible)
9. Tree Stride
10. Wall of Fire

LEVEL 6

1. Anti-Animal Shell
2. Conjure Fire Elemental
3. Control Weather
4. Cure Critical Wounds
5. Feeblemind
6. Fire Seeds
7. Repel Wood
8. Summon Animal III
9. Transport via Plants
10. Wall of Thorns

LEVEL 7

1. Animate Mineral
2. Conjure Earth Elemental
3. Control Weather (Greater)
4. Confusion
5. Creeping Doom
6. Finger of Death
7. Fire Chariot
8. Fire Storm
9. Reincarnate
10. Transmute Metal to Wood

Illusionist Spell List**LEVEL 1**

1. Auditory Illusion
2. Color Spray
3. Dancing Lights
4. Darkness Globe
5. Detect Illusion
6. Detect Invisibility
7. Doppelganger
8. Hypnotism
9. Light
10. Phantasmal Force
11. Refraction
12. Wall of Vapor

LEVEL 2

1. Blindness
2. Blur
3. Deafness
4. Detect Magic

5. Fog Cloud
6. Hypnotic Pattern
7. Invisibility
8. Magic Mouth
9. Mirror Image
10. Misdirection
11. Phantasmal Force, Greater
12. Ventriloquism

LEVEL 3

1. Continual Light (reversible)
2. Dispel Phantasm
3. Fear
4. Hallucinatory Terrain
5. Illusionary Script
6. Invisibility 10' Radius
7. Nondetection
8. Paralyze
9. Rope Trick
10. Spectral Force
11. Suggestion

LEVEL 4

1. Confusion
2. Illusory Stamina
3. Implant Emotion
4. Invisibility, Greater
5. Massmorph
6. Minor Creation
7. Phantasmal Killer
8. Phantasmal Monsters

LEVEL 5

1. Confusion, Greater
2. Major Creation
3. Maze
4. Phantasmal Door
5. Phantasmal Monsters, Greater
6. Project Image
7. Shadow Evocation
8. Summon Shadow

LEVEL 6

1. Conjure Animals
2. Phantasmal Monsters, Advanced
3. Shadow Evocation, Greater
4. Spectral Force, Permanent
5. Spectral Force, Programmed
6. Suggestion, Mass
7. True Seeing
8. Veil

LEVEL 7

1. Astral Spell
2. Limited Wish
3. Prismatic Spray
4. Prismatic Wall
5. Vision

Magic-User Spell List**LEVEL 1**

1. Allure
2. Burning Hands
3. Charm Person
4. Comprehend Languages
5. Dancing Lights
6. Detect Magic
7. Enlarge
8. Erase
9. Feather Fall
10. Floating Disc
11. Hold Portal
12. Identify
13. Jarring Hand
14. Jump
15. Light
16. Magic Aura
17. Magic Missile

18. Manipulate Fire
19. Mending
20. Message
21. Protection from Evil
22. Read Languages
23. Read Magic
24. Scribe
25. Shield
26. Shocking Grasp
27. Sleep
28. Spider Climb
29. Summon Familiar
30. Unseen Servant
31. Ventriloquism

LEVEL 2

1. Amnesia
2. Arcane Lock
3. Auditory Illusion
4. Continual Light
5. Darkness Globe
6. Detect Evil
7. Detect Invisible
8. ESP
9. False Gold
10. False Trap
11. Invisibility
12. Knock
13. Levitate
14. Locate Object
15. Magic Mouth
16. Mirror Image
17. Phantasmal Force
18. Pyrotechnics
19. Ray of Enfeeblement
20. Rope Trick
21. Scare
22. Shatter
23. Stinking Cloud
24. Strength
25. Web

LEVEL 3

1. Blink
2. Clairaudience
3. Clairvoyance
4. Dispel Magic
5. Explosive Runes
6. Feign Death
7. Fire Ball
8. Flame Arrow
9. Fly
10. Gust of Wind
11. Haste (reversible)
12. Hold Person
13. Infravision
14. Invisibility 10' radius
15. Lightning Bolt
16. Protection from Evil 10' radius
17. Protection from Normal Missiles
18. Tiny Hut
19. Tongues
20. Suggestion
21. Summon Monster I
22. Water Breathing

LEVEL 4

1. Arcane Eye
2. Charm Monster
3. Confusion
4. Dimension Door
5. Enchant Arms
6. Extend Duration I
7. Fear
8. Fire Shield
9. Fire Trap
10. Flame Charm
11. Fumble

12. Globe of Invulnerability, Lesser
13. Hallucinatory Terrain
14. Ice Storm
15. Massmorph
16. Mnemonic Enhancer
17. Move Earth, lesser
18. Plant Growth
19. Polymorph Others
20. Polymorph Self
21. Remove Curse (reversible)
22. Summon Monster II
23. Wall of Fire
24. Wall of Ice

LEVEL 5

1. Animate Dead
2. Atmosphere Bubble
3. Cloudkill
4. Cone of Cold
5. Conjure Elemental
6. Contact Other Plane
7. Distort Distance
8. Extend Duration II
9. Faithful Hound
10. Feeblemind
11. Hold Monster
12. Interposing Hand
13. Magic Jar
14. Passwall
15. Secret Chest
16. Stone Shape
17. Telekinesis
18. Teleport
19. Transmute Rock to Mud
20. True Seeing
21. Wall of Force
22. Wall of Iron
23. Wall of Stone

LEVEL 6

1. Anti-Magic Shell
2. Arcane Window
3. Control Weather
4. Death Spell
5. Disintegrate
6. Dweomer of Rage
7. Extend Duration III
8. Forceful Hand
9. Freezing Sphere
10. Geas
11. Globe of Invulnerability
12. Guards and Wards
13. Invisible Stalker
14. Legend Lore
15. Lower Water
16. Monster Summoning IV
17. Move Earth
18. Part Water
19. Project Image
20. Reincarnate
21. Repulsion
22. Spiritwrath
23. Stone to Flesh

LEVEL 7

1. Charm Plants
2. Delayed Blast Fireball
3. Duo-Dimension
4. Grasping Hand
5. Instant Summons
6. Limited Wish
7. Mass Invisibility
8. Magic Sword
9. Phase Door
10. Power Word Stun
11. Reverse Gravity
12. Simulacrum
13. Statue

14. Summon Demon
15. Summon Monster V
16. Vanish

LEVEL 8

1. Antipathy/Sympathy
2. Clenched Fist
3. Clone
4. Glass Like Steel
5. Incendiary Cloud
6. Irresistible Dance
7. Mass Charm
8. Maze
9. Mind Blank
10. Permanency
11. Polymorph Any Object
12. Power Word Blind
13. Spell Resistance
14. Summon Monster VI
15. Symbol
16. Trap the Soul

LEVEL 9

1. Astral Projection
2. Crushing Hand
3. Gate
4. Imprisonment
5. Meteor Swarm
6. Power Word Kill
7. Prismatic Sphere
8. Shape Change
9. Summon Monster VII
10. Temporal Stasis
11. Time Stop
12. Wish

**Monsters: Introduction**

In *Microlite78*, the term "monster" can generally refer to any being other than the player characters. Monsters are listed in this section in an encyclopedic format. Each monster has certain characteristics, which are defined below. Though each monster listing can be considered to represent the "average" specimen of a particular creature, the GM can alter the abilities and power level of any creature to fit the situation. It is assumed that all monsters, except NPC humans, have infravision of 60'. The following terms are used to define the characteristics of monsters.

Number Encountered: This variable number represents the typical number of this type of monster that will appear together at one time if encountered on a dungeon level equal to the hit dice of the monster. For example, if a 4 HD creature has a Number Encountered listing of 1d8, then when this creature is encountered on the 4th level of a dungeon, 1d8 of the creatures will be encountered. The GM should alter the Number Encountered if the monster is encountered on a different labyrinth level. In general, the number should be reduced if the creature is encountered on a higher level, and increased if encountered on a lower level. These adjustments account for characters of higher level exploring deeper labyrinth levels, and lower level characters exploring higher (less depth) labyrinth levels.

A number range in parenthesis represents the number of monsters of a type that typically inhabits their "nest" or lair, or the number that will be encountered in a wilderness setting.

Alignment: All monsters will be lawful, neutral, or chaotic. Many monsters are either unintelligent or are simply unconcerned about law and chaos, and are considered neutral. Note that a monster must be intelligent to speak or understand its alignment language.

Movement: There are two listings under this category. The first represents a number in feet per turn that a creature may move. The second value provided in parentheses represents the monster's encounter movement, which are in feet per round. If two different rates are given, the additional movement will relate to movement of a different kind, which will be appropriate to the creature. A couple of possibilities include flying or swimming.

Armor Class: In game terms, the AC of a monster means the same thing as a character's AC. For monsters, this value reflects not only the creature's general agility but also its natural armor, from tough hide or a magical adjustment.

Hit Dice: This value is roughly equivalent to character level, but for monsters it always represents a number of hit points determined by this number of d8s. For example, a 2 HD monster will have 2d8 hit points. Sometimes a value is given as a "+" or "-", in which case this number is added or subtracted from the hit points rolled. A monster will have a minimum of 1 hp. Hit dice further reflect the attack ability of monsters. The hit dice number will be located on the Monster Attack table, and the number needed to hit different armor classes will be used for an encounter. Further, the number of hit dice a monster has is related to how many experience points the characters receive when the monster is killed. Refer to the Monster Experience Points table in Section 4.

Hit dice also are used to determine which labyrinth level the monster will be found on. A 2 HD monster will most typically be found on the second labyrinth level. As noted above, when monsters are found on a different labyrinth level their Number Encountered should be adjusted accordingly.

Attacks: This listing describes how many attacks are available to a monster, per round, and the nature of the attacks. These will be listed in the same order as the appropriate damage in the damage listing.

Damage: Damage is listed in the same order as attacks, and is represented by a number and kind of die that should be rolled,

just like weapon damage is rolled. Some monsters may in fact employ weapons. There are a number of special or unusual attacks that monsters can employ, and the effects of these are explained in greater detail below.

Acid: Some monsters employ acid. When acid successfully hits, it does damage because it has made contact with flesh. Once contact is made, acid does not need to make a new successful roll to hit in another round (unless otherwise noted). Most acid can be removed by rinsing it off with water or other non-flammable liquids (beer, wine). The acid breath attack employed by black dragons performs differently in that the acid does not remain active round to round, and damage is only suffered per attack. If armor is destroyed by acid, the character's AC should be adjusted to reflect having no armor.

Charge: In order to make a charge, a monster must have clear terrain and be able to run toward an opponent for 20 yards. The extra momentum of such an attack inflicts double the normal damage. Likewise, if a braced attack is prepared against a charging monster, such as a spear braced in the ground, a successful hit will deal double damage to a charging monster.

Charm: Some monsters are able to charm characters in a similar way as the spell *charm person*. The character receives a saving throw versus spells. However, when a monster charms a character, he is also confused and unable to use spells or magic items that require either commands or concentration. Like the effects of the spell, characters charmed by monsters will obey instructions so long as they are not directly harmful to the character. If the monster and charmed character cannot communicate due to a language barrier or some other situation, the charmed character will act in the interest of the monster, to protect it. Some charm effects have a duration, but if the monster is killed the effects will disappear.

Continuing Damage: Some monsters have attacks that, once successful, continue to deal damage on subsequent rounds without requiring further rolls to hit. Examples include the constrictive attack of a giant snake, or if a character is swallowed by a giant monster.

Dive: Some monsters capable of flight can attack by swooping in to do a dive attack. Opponents must be in open terrain for this attack to be effective. Like a charge, this attack deals double damage. If the roll to hit is 18 or greater and the flying monster is of sufficient size, it grasps on to the opponent and attempts to carry him away.

Energy Drain: Some monsters, especially undead, have an energy drain attack. No saving throw is permitted. This attack leaches experience levels from characters (or hit dice if used against other monsters). This effect can be reversed by the 7th level cleric spell *restoration*. Note that if a character is drained of a level, all abilities, including hit points, saving throws, etc., are affected as appropriate for the character of the new class level.

Paralysis: The paralysis attack of most monsters lasts 2d4 turns, and a saving throw versus paralysis is allowed. When a character is paralyzed, he collapses and is incapable of any movement whatsoever, including speaking or casting spells. Characters remain conscious and aware of their surroundings. The cleric spell *cure light wounds* can negate the paralysis, but no hit points are healed when the spell is used in this way. Paralyzed characters are very vulnerable to attack, and no roll to hit them is required.

Poison: One of the most dreaded attacks of some monsters is poison. A character exposed to the poison of a monster, unless otherwise noted, must succeed in a saving throw versus poison or be instantly killed. The 4th level cleric spell *neutralize poison* can be used to counter this effect.

Swallow Attack: Some monsters are capable of swallowing a character whole, and will ordinarily do so in an attack if a "20" is rolled to hit. Characters who are swallowed will suffer damage every round until they die, or until the monster is killed. If a character who has been swallowed has a sharp weapon, he may

attack the monster from inside its belly with a to hit penalty of -4. Should a swallowed character die and remain in a monster's belly for 6 turns, he has been irrecoverably digested.

Trample: When a monster tramples, it stomps or throws its weight against an opponent to deal damage due to its immense bulk. This attack adds +4 to hit if the opponent is human-sized or smaller. Any monster capable of this attack will do so 3/4 of the time (1-3 on a d4), and the remaining times will employ any other forms of attack available to it. Large numbers (20 or greater) of normal sized animals may also attempt a trample attack, such as a herd of cattle. These kinds of trample attacks deal 1d20 hit points of damage.

Save: Like characters, monsters have saving throws. Monsters have saving throws that are the equivalent of a particular class and class level. Usually, this is the Fighter class, but it can be any class. Monsters that are unintelligent often save as a Fighter of a level equal to one-half of the monster's hit dice number, rounded up. The following abbreviations are used in the monster listings, and are followed by a number indicating which level of the class a monster saves as: Cleric, C; Fighter, F; Magic-User, MU; Thief, T; Dwarf, D; Elf, E; Halfling, H.

Morale: This is the number that the GM refers to when testing for morale. The GM will roll 2d6 according to the Morale Check optional rule in Section 5. Any monster that fails this check will attempt to flee or surrender.

Hoard Type: This listing refers to the Treasure Hoard Type of the monster, and will consist of a roman numeral. This roman numeral is cross-referenced on the Treasure Hoard Type table to determine the treasure that is found in the lair of a monster. If the treasure quantity is fairly small, a monster may have this on its person, but usually treasure is kept in a secure location.

XP: This abbreviation stands for experience points. It is the precalculated total for the monster, taking into account its HD and any special abilities. Note that if a monster has variable HD, this total reflects a monster with the lowest HD possible, and XP will need to be recalculated for more powerful monsters.

Abbreviations

In written adventures, when monsters are indicated, their characteristics are typically abbreviated in the following order and format: AL, alignment; MV, Movement; AC, armor class; HD; hit dice; #AT, number of attacks; DG, damage; SV, save; MR, morale.

For example:

AL N, MV 90', AC 6, HD 1, #AT 1, DG 1d4, SV F1, MR 7
Alignment is abbreviated as follows: L, light; N, neutral; D, dark.

Habitat Density (Optional)

In any habitat appropriate to a creature, a **habitat density** rank can be used to give an indication of the relative commonality of that creature, in the context of all available creatures that might be encountered. This value is most relevant when designing random encounter tables, as the probability corresponding to the ranks is considered when designing which proportion of encounters will result in any given specific creature encounter. Habitat density rank is idiosyncratic to the campaign world and specific region; therefore, no standard habitat density ranks are assigned to monsters. This should be done by the referee.

Habitat Density Ranks		
Rank	Probability	d00
Profuse	65%	01-65
Common	20%	66-85
Sparse	10%	86-95
Rare	5%	96-00

The referee creates a list of creatures that can be encountered in an environment. He then assigns each creature a habitat density rank appropriate for the game world, campaign, and specific area. A habitat might be as broad as "forest" or as

specific as “forest within 5 miles of the castle,” depending on the scope and needs of the referee. The environment could be an entire dungeon level, or a portion of a dungeon level or sublevel. Refer to the *Microlite78 Plus* rules for examples of habitats and how to determine which HD of creatures are appropriate for a labyrinth level. On any given encounter table there will be a 65% chance of encountering *profuse* creatures. The chance of encountering any specific *profuse* creature is relative to how many *profuse* creatures are in that environment, and odds are divided evenly between them within that 65%.

There are various ways these encounter tables might be constructed. A more complicated method is to assign percentile points to each creature, accounting for the likelihood of encountering each creature within a habitat rank. For example, if there are 5 common creatures on a table, and since there is a 20% chance of encountering common creatures, each common creature would be assigned 4%. If there were 10 common creatures, they would each be assigned 2%.

Another method is to simply have a list of creatures for each environment divided into sections by density rank. Roll percentile dice on the habitat density ranks table when an encounter occurs. Then roll for a creature from your list, with an equal chance per creature.

Lair Encounter (Optional)

Since treasure hoards (except personal treasure Hoard Types I-IV) will only be present in a creature's lair, and since the number of creatures encountered sometimes varies depending on whether they are found in their lair, guidelines can be helpful for determining whether a creature in a random encounter is in its lair. The guidelines presented here are broad and meant to be used as an easy way of determining lair encounters. This system could be made more complicated, with additional factors, and this is left to the preference of the Labyrinth Lord. Note that in the monster listings the number provided for *No. Enc.* is the number found in a labyrinth. The number in parentheses is the number of creatures encountered when in the wilderness *or* in a lair. It is important to note that not all creatures actually have lairs. Some always wander. If a creature has 0 (2d4) listed under number encountered, for example, the creature is never found in a labyrinth and when encountered in the wilderness it may or may not lair.

It is important for the referee to distinguish between creatures that do and do not have lairs. This is determined solely by the judgment of the referee. If a creature has a Hoard Type, then unless there are special circumstances it almost certainly has a lair somewhere to store that treasure. Of course, if a creature has no treasure and the number encountered is the same whether found in a labyrinth or wilderness/lair, then whether they have a lair might be irrelevant.

As a general rule, creatures encountered in the wilderness will be found in their lair a base 50% of the time. Creatures encountered in a labyrinth that lair there will be encountered in their lair a base 30% of the time. Modifiers can be applied to this base depending on the nature of the creature, at the discretion of the referee. Modifiers need not always be applied. See the following table for suggested modifiers based on characteristics of the monsters. These modifiers should generally *not* be cumulative; the larger modifier should be used.

Monster Traits	Modifier
Solitary	+10 to 30%
Extraplanar	+20 to 40%
Winged, avian	-20%
Pack animal	-25%
War-like, humanoid bands	-25%
Secretive, hides lair	-30%

Monster Listings

A

Aerial Servant

No. Enc.: 1 (1)
 Alignment: Neutral
 Movement: 240' (80')
 Armor Class: 16
 Hit Dice: 16
 Attacks: 1
 Damage: 8d4
 Save: 8
 Morale: 10
 Hoard Type: None
 XP: 3,300

Aerial servants are semi-intelligent creatures from the elemental plane of air that often roam the astral and ethereal planes. On those planes they have a vaguely visible form, but when on the material plane they are invisible. They normally are only found on the material plane as a result of being summoned by a cleric and commanded to perform some task, often being required to use their immense strength to carry objects or aid the summoner. They may carry 1,000+ pounds, and have an immense strength which they can use to hold a human-sized or smaller target immobile. To break free, the victim must have a STR of 18, and even then there is only a 50% chance to break away. Victims with STR of 19 or higher may escape with no roll. Aerial servants have keen senses, and are only surprised on 1-4 on a d6. An aerial servant that fails or is thwarted in its mission becomes insane and immediately returns to the caster who summoned it and tries to kill him.

Ankheg

No. Enc.: 1d6 (1d6)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 16
 Hit Dice: 1d6+2
 Attacks: 1
 Damage: 3d6, +1d4
 Save: 14
 Morale: 9
 Hoard Type: XIX
 XP: 80-2,800

The ankheg is a burrowing monster with a taste for fresh meat. It has six legs, and some specimens are yellow rather than brown. It is about 10 feet long and weighs about 800 pounds, and has an insect-like exoskeleton. An ankheg burrows with legs and mandibles, and moves at half speed when it does so. It often digs a winding tunnel up to 40 feet below the surface in the rich soil of forests or farmlands. The tunnel is 5 feet tall and wide, and from 60 to 150 feet long. An ankheg usually lies 5 to 10 feet below the surface until its antennae detect the approach of prey. It then burrows up to attack. In addition to bite damage, the ankheg has acidic, digestive saliva that inflicts an additional 1-4 hp damage each round. If desperate, the creature can produce an acid spray once per day that inflicts 8d4 hp damage, but this uses up the acidic saliva for a 24 hour period.

Ant, Giant

No. Enc.: 2d4 (4d6)
 Alignment: Neutral
 Movement: 180' (60')
 Armor Class: 16
 Hit Dice: 4
 Attacks: 1
 Damage: 2d6
 Save: 16
 Morale: 7
 Hoard Type: VI
 XP: 80

Giant ants are hardy and adaptable. Workers are about 6' long, but the queen may be immense. Giant ants eat almost anything, since they are omnivores, and will never retreat if defending the nest. They will tend to only have a small amount of treasure around, from past opponents, but in some rare instances giant ants will inexplicably mine precious metals. This occurs in about 30% of nests, and there will be as much as 1d10x1000 gold pieces worth of raw gold nuggets.

Apes are distantly related to humans, and usually live in tropical wooded environments. They have different behaviors depending on the species, but deal powerful claw and bite attacks when threatened.

Chimpanzee: These apes are most closely related to humans, and are much more aggressive than gorillas. They may attack with very little provocation, and have a taste for meat.

Gorilla: Gorillas are larger than chimpanzees but less aggressive. They often fight only when threatened or to defend their territory. They are exclusively vegetarian.

Albino: Albino apes are adapted to living in a subterranean environment, only venturing to the surface to forage for food at night. As such, they have lost all pigment. Albino apes will vocalize and act aggressive if other creatures come near their lair, and may attack. In addition to two claw attacks, albino apes can throw rocks for 1d6 hit points of damage per round. Albino apes may occasionally be found as pets to Neanderthals or Morlocks.

Man-Eating: Man-eating apes are related to chimpanzees, but are much fiercer, larger than gorillas, and have an insatiable desire to consume humanoid flesh. They attack with powerful claws and a bite, and if both claws hit the same target in the same round, the victim suffers an extra 1d8 hp damage. Man-eating apes are more intelligent than other apes (average INT 8), and have sharp senses that allow them to be surprised only on 1 in 1d6.

Astral Raiders

No. Enc.:	1-8 (3d12 in Astral lair)
Alignment:	Chaotic
Movement:	90' (30')
Armor Class:	16
Hit Dice:	4
Attacks:	1
Damage:	1d6 or by weapon

Save:	14
Morale:	8
Hoard Type:	VII

From the depths of the Astral plane come the dreaded Astral Raiders, thin, emaciated beings that wield strange swords and even stranger powers. These sinister humanoids wear ornate and efficient armor and most will carry Crystal Swords (q.v.) with them. What they do on this plane is largely unknown and these creatures keep to themselves, although the Astral Raiders sometimes appear to be stranded or lost and will, at these times of apparent duress, work with wizards or others that might be able to get them back to the Astral Plane.

Astral Raiders have powers that can be considered spell-like abilities, although these powers seem to come from the mind alone. These powers are:

Astral Bolt: Twice per day an Astral Raider can project a mental blast at a target, if the victim of this power fails a save versus spells and spell like devices they suffer 1-6 hit points of damage. This power can be adjusted to 1d6 per level of the creature, assume a typically encountered Astral Raider is around the 4th level of experience.

Despair: Once per day an Astral Raider may attack by attempting to cause a sense of malaise or despair in any foe within 100 feet. Those who fail a save versus magic and magical devices are -1 to strike an Astral Raider.

Planar Travel: Two or more Astral Raiders can travel to another plane with concentration, yet four or more can do so with more precision. If a band of Astral Raiders is whittled down to a solitary creature, then the remaining individual is considered planebound and may not leave without the assistance of someone or something that can return him or her to the Astral plane.

Sustenance: If an Astral Raider concentrates for thirty minutes undisturbed he or she may somehow be able to function normally without food or drink for 1d6 days. This ability may only be used twice within a 30 day period of time.

Magic-User Astral Raiders are also sometimes encountered on the Prime Material plane and these are usually 4th-8th level in experience, with appropriate spells. The typical Astral Raiders will usually be the more martial type as described above.

Bands of Astral Raiders who routinely visit the Prime Material plane may have made pacts with different types of monsters (dragons, manticores, trolls, etc) and will often return to the lairs of these creatures as soon as they arrive for protection and information gathering purposes.

Axe Beak

No. Enc.:	1d6 (2d4)
Alignment:	Neutral
Movement:	180' (60')
Armor Class:	13
Hit Dice:	3
Attacks:	3 (2 claws, 1 bite)
Damage:	1d3/1d3/2d4

The axe beak is a prehistoric flightless, carnivorous bird that resembles a 7' tall ostrich. It is an aggressive hunter and has a strong, thick neck and a sharp beak.

B

Baboon

	<i>Normal</i>	<i>Higher</i>
No. Enc.:	2d4 (1d4x10)	2d6 (5d6)
Alignment:	Neutral	Neutral
Movement:	120' (40')	120' (40')
Armor Class:	12	13
Hit Dice:	1+1	2
Attacks:	1 (bite)	2 (bite, club)
Damage:	1d4	1d3/1d6
Save:	18	16
Morale:	7	8
Hoard Type:	None	VI
XP:	15	20

Baboons are powerful and aggressive primates adapted to life on the ground. They prefer open spaces but climb trees to find safe places to rest overnight. A typical baboon is the size of a big dog. Males can be 2 to 4 feet long and weigh as much as 90 pounds. When encountered as a large group, there will be 2d4 males that have +1 to damage. In these large groups, 50% of their total number are young that do not engage in combat.

Higher Baboon: Higher baboons are larger, more intelligent omnivores that have a higher tendency to hunt for meat. They bite, but also may use sticks as clubs. The higher baboon lives in packs like its smaller, less intelligent cousin, and are led by the biggest, strongest male. Higher baboons are aggressive, and are easily stimulated to fight.

Badger

	<i>Normal</i>	<i>Giant</i>
No. Enc.:	1d2 (1d4+1)	1d2 (1d4+1)
Alignment:	Neutral	Neutral
Movement:	60' (20')	60' (20')
Armor Class:	15	15
Hit Dice:	1+2	3
Attacks:	3 (2 claws, bite)	3 (2 claws, bite)
Damage:	1d2/1d2/1d3	1d3/1d3/1d6
Save:	18	16
Morale:	8	8
Hoard Type:	None	None
XP:	15	50

The badger is a furry animal with a squat, powerful body. Its strong forelimbs are armed with long claws for digging. They move at half their normal movement when burrowing. An adult badger is 2 to 3 feet long and weighs 25 to 35 pounds. Badgers attack with their sharp claws and teeth. If found in a group, it will consist of a mated pair and offspring.

Giant Badger: Giant badgers have the same habits as their smaller cousins, but are double their size.

Basilisk

No. Enc.:	1d6 (1d6)
Alignment:	Neutral
Movement:	60' (20')
Armor Class:	15
Hit Dice:	6 + 1
Attacks:	2 (bite, gaze)
Damage:	1d10/petrify
Save:	13
Morale:	9
Hoard Type:	XVII
XP:	570

A basilisk is a reptilian monster that petrifies living creatures with a mere gaze. A basilisk usually has a dull brown body with a yellowish underbelly. Some specimens sport a short, curved horn atop the nose. An adult basilisk's body grows to about 10 feet long. Basilisks often live in dense woods or labyrinths. Any victim that either gazes directly at the basilisk or touches the

basilisk is required to make a saving throw versus petrify or he turns to stone. The only way a character may avoid meeting the basilisk's gaze when in combat is to look away or view the creature through a mirror. Looking away reduces attack rolls by -4, and attacking while viewing through a mirror has a penalty of -1. A basilisk is not immune to its own gaze, and if it sees itself in a mirror (roll 35% or less on d00) it must succeed in a saving throw versus petrify or it turns itself to stone.

Bat

	<i>Normal</i>	<i>Giant</i>
No. Enc.:	1d00 (1d00)	1d10 (1d10)
Alignment:	Neutral	Neutral
Movement:	9' (3')	30' (10')
Fly:	120' (40')	180' (60')
Armor Class:	13	13
Hit Dice:	1 hp	2
Attacks:	confuse	1 (bite)
Damage:	None	1d4
Save:	18	15
Morale:	6	8
Hoard Type:	None	None
XP:	6	20

Bats live in sheltered caverns or abandoned buildings, and are nocturnal mammals with leathery wings. Their nocturnal lifestyle has made typical eyesight useless to them, but they are able to navigate with a refined use of sound, or echo location. For this reason, no spells or other influence that would normally blind an opponent will affect bats, but the spell silence 15' radius negates their ability to echolocate.

Bats, Normal: These bats are small and do not attack for significant damage. However, when in a group of 10 or more they are able to confuse by swarming around an opponent. When confused by a swarm of bats, an opponent makes all rolls to hit and all saving throws with a penalty of -2. No spell casting is possible. Normal bats are not particularly prone to fight, and as such they are susceptible to a morale check once each round. This does not apply to bats that are under another's control.

Bats, Giant: These bats are larger than normal bats and are fierce carnivores. About 95% of giant bats are of this normal variety, but the remaining portion are also vampiric and have a paralyzing bite that will cause paralysis if a saving throw versus paralyze is not rolled successfully. This paralysis lasts for 1d10 rounds. Unless otherwise distracted, a giant vampiric bat will feed on a paralyzed victim, dealing 1d4 hit points of damage per round. If the opponent is killed by this attack, he must succeed in a saving throw versus spells or he will rise again as a vampire one day after his death.

Bears can live in many different climates, and are dangerous predators. They attack with both claws and a bite, and if both claws successfully strike in one round, the bear also squeezes the character in a powerful hug that does an additional 2d8 hit points of damage. All bears are omnivorous, but some kinds of bears prefer flesh more than other kinds.

Black Bear: A black bear averages 6' tall, has black fur, and eats a variety of fruits and other foliage more frequently than meat. Though they will give their lives in defense of their cubs, black bears do not usually engage in combat unless they are forced to.

Cave Bear: These immense prehistoric bears are 15' tall and are vicious hunters. They live in caves and caverns, and particularly savor humanoid flesh. They are able to follow wounded creatures by the smell of their blood.

Grizzly Bear: A grizzly bear may have red or brown fur, and in older individuals it may be silver-tipped. These large bears average 9' tall, and are more aggressive and interested in meat than black bears.

Polar Bear: These bears live in very cold climates, usually by the sea. They average about 11' tall and almost exclusively eat meat. They are adept at swimming and moving on ice and snow.

Bee, Giant Killer

No. Enc.:	1d6 (5d6)
Alignment:	Neutral
Movement:	150' (50')
Armor Class:	12
Hit Dice:	1d4 hit points
Attacks:	1 (sting)
Damage:	1d3, see below
Save:	19
Morale:	9
Hoard Type:	None
XP:	7

Although many times larger, growing to a length of about 1', giant killer bees behave generally the same as their smaller aggressive cousins. Generally, the giant killer bees will attack any creature they encounter, especially if it is near their hive, which is an underground labyrinth of tunnels. They attack with a poisonous sting that requires a successful saving throw versus poison. Failure indicates death. A stinger always breaks off inside the victim, and if the victim survives the poison he suffers an additional 1 hp of damage per round until the stinger is removed. A bee that successfully strikes dies the following round

from the trauma of losing its stinger. A character must spend 1 round to remove a stinger. A queen is guarded by 10 giant killer bees. Some of this number (3 + 1d6) will be larger than other giant killer bees, with 1 HD apiece. A queen is a much larger killer bee, with 2 HD. She may sting multiple times, because her stinger does not break off with a successful attack.

Fire Beetle: These subterranean, nocturnal beetles are about 2 ½' long. The fire beetle is so named for the light-producing organs it exhibits on its head and abdomen. They produce light within a 10' radius. Two of these organs are on the head, and one is on the abdomen. If removed from the corpse of the beetle they will continue to illuminate an area for 1d6 days.

Spitting Beetle: These 3' long beetles have immense horn-like jaws that inflict damage, in addition to a toxic spray that can squirt an opponent within 5' of the beetle. When the toxic fluid successfully strikes an opponent, it is extremely painful and causes chemical burns and blisters. This effect makes the opponent suffer a -2 penalty to hit rolls for 1 day, or until the spell cure light wounds is used. These beetles can be found above and below ground.

Carnivorous Beetle: These fierce carnivorous beetles have a carapace with markings resembling the hide of a tiger. Though they often hunt giant insects, they also attack and eat large mammals, including humanoids.

Boring Beetle: These 9' long beetles live beneath the earth, where they cultivate and harvest various molds and fungi on rotting wood or vegetable matter they hoard underground. They have social behavior not unlike ants, where each beetle seems to intuitively understand its job.

Rhinoceros Beetle: These 12' long beetles have a 6' long horn, which they use as an effective weapon. Rhinoceros beetles feed primarily on leaves, plants, fruits, and other vegetation, but are territorial and will attack creatures when threatened.

Stag Beetle: These creatures are serious pests that greedily devour cultivated crops. A single beetle can strip an entire farm in short order. An adult giant stag beetle is about 10' long, with 8' long horns.

Black Pudding

No. Enc.: 1 (0)
 Alignment: Neutral
 Movement: 60' (20')
 Armor Class: 13
 Hit Dice: 10
 Attacks: 1
 Damage: 3d8
 Save: 9
 Morale: 12
 Hoard Type: None
 XP: 3,100

This black gooeey mass slithers about in labyrinth corridors, eating anything in its path. It is typically 10' to 30' in diameter. It is capable of moving not just on the floor, but also on the wall and ceiling, and may compress itself through small fissures and under the cracks of doors. It digests through even metal and wood. A black pudding is only damaged by fire, but does take full damage from a flame tongue sword. If a black pudding is attacked with other weapons, it splits into more individuals of reduced mass. Every successful attack creates a smaller pudding that has 2 HD and deals 1d8 hit points of damage to opponents.

Blink Dog

No. Enc.: 1d6 (1d6)
 Alignment: Lawful
 Movement: 120' (40')
 Armor Class: 14
 Hit Dice: 4
 Attacks: 1 (bite)
 Damage: 1d6
 Save: 15
 Morale: 6
 Hoard Type: XX
 XP: 135

The blink dog is an intelligent canine that has a limited teleportation ability. Blink dogs have their own language, a mixture of barks, yaps, whines, and growls that can transmit complex information. Blink dogs hunt in packs, teleporting, or "blinking" out of one location and "blinking" in close to prey for their attack. They blink again immediately after their attack, and will appear 1d4x10 feet from the opponent. In this way, should a blink dog win initiative it will not be possible for an opponent to attack the blink dog with a hand weapon before it blinks away. Blink dogs never blink into the same space occupied by another object. When blink dogs flee, they simply blink away and fail to appear again.

Damage:	2d4/2d4	2d6, weapon
Save:	15	9
Morale:	9	10
Hoard Type:	None	XX
XP:	65	3,800

Ordinary: These cantankerous omnivores are generally encountered in wooded locations, but exist in many different geographic locations and climates. They do not generally initiate combat, but may do so to defend young, or if threatened.

Giant: These 30' long giant cousins to ordinary boars are much more aggressive. They attack with little to no provocation, and crave the meat of humanoids. They are sometimes found with demon boars. There are rumors of a shaggy giant boar that is native to cold climates.

Warthog: These territorial, tropical relatives of boars are just as vicious and attack with two tusks. Males and females fight as equals, and when more than two are found the remainder are 1 or 2 HD young that deal 1d3 or 1d4+1 damage, respectively.

Demon: The demon boar is a more powerful and much more malicious variation of the wereboar. The demon boar delights in the taste of human meat, and will take residence and hunt near areas occupied by humans. In human form they are fat and grotesque; while in boar form they are immense. Like other lycanthropes, they can pass on their form of lycanthropy (refer to the lycanthrope monster listing), and are only damaged by magical or silver weapons. Demon boars have the innate ability to charm person in a manner similar to the spell, 3 times per day. Victims are allowed a saving throw versus spells with a -2 penalty. Demon boars have a 75% probability of having 1d3 charmed human thralls, who are unable to cast spells or use spell-like devices, due to being under mental domination. Demon boars, though powerful, will usually attempt to catch opponents by surprise.

Brain Eater

No. Enc.: 1 (1d3)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 14
 Hit Dice: 9
 Attacks: 1
 Damage: mouth tentacles (special), or weapon, or Psi Blast (special)
 Save: 11
 Morale: 9
 Hoard Type: III, IV, IX, XXI

The brain eater is a sinister, much feared denizen of the underworld. Its head resembles an octopus, with a round mouth lined with four large suckered tentacles, and four small, slime dripping tentacles. Its body is humanoid, but it has four fingers on each hand, all of the same approximate size with no distinguishable thumb. The tips of its fingers have retractable, hollow claw-like talons. It wears clothing, but its visible hide reveals metallic green and copper colored, swirling patterned slimy skin.

The brain eater is very intelligent. It will often attack by stealth rather than full out assault. Brain eaters may attack with their mental mutations, or may engage in close combat. In close combat, a brain eater will attempt to grasp an opponent's head. Once grasped, the hollow claws will puncture the skull in 1d4 rounds and instantly suction the victim's brain into accessory stomachs within the brain eater's forearms. Each round the talons burrow, the victim suffers 1d6 damage. Once the slimy probes reach the brain, the victim is instantly killed. Brain eaters have psionic abilities, among them the feared Psi Blast which does 8d6 damage (also causes confusion for 1d4 rounds) to all targets within a 30 foot cone. Save for half damage and no confusion.

Brain eaters live deep in the depths of the earth, often occupying dangerous underground ruins or deep, expansive

caves. They will usually have 3d20 Neanderthal slaves, which they breed as slaves for excavating their dwellings and using for other unspeakable tastes.

It is rumored that brain eaters come from some other, distant world, which may not be impossible due to their ability to *plane shift*. Others have said that brain lashers have control of alien technologies, which they wield to further their goals of domination, power, and enslavement.

Brownie

No. Enc.: 4d4 (4d4)
 Alignment: Lawful
 Movement: 120' (40')
 Armor Class: 16
 Hit Dice: 1d4 hp
 Attacks: 1 (weapon)
 Damage: 1d3
 Save: 17
 Morale: 7
 Hoard Type: X, XI, XIII
 XP: 12

A brownie is a timid, quiet fey creature that prefers to live only among its own kind. Most brownies dwell in pastoral areas untouched by civilization, such as deep forests and wild lands far from other creatures. Brownies are rarely over 18 inches tall. Their hair is always some earth tone such as brown, gray, or tawny. Though timid, brownies are generally friendly and are handy at fixing objects, repairing or mending clothing, and other such tasks. They may decide to help (50%) Lawful characters if approached gently. Most brownies prefer green or otherwise brightly colored clothing. Brownies are magically inclined beings, and can cast the following spells one time per day: confusion, continual light, dancing lights, dimension door, mirror image, protection from evil, and ventriloquism. Brownies speak common, elven, pixie, halfling, and sprite. Brownies may be distant relatives of pixies and halflings, but this has never been proven.

Brownies as familiars: The magic-user is granted an effective DEX of 18. In addition, the magic-user receives +2 to all saving throws, and is never surprised.

Bugbear

No. Enc.: 2d4 (5d4)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 14
 Hit Dice: 3 + 1
 Attacks: 1 (weapon)
 Damage: 2d4 or weapon + 1
 Save: 16
 Morale: 9
 Hoard Type: XXI
 XP: 100

These large, hairy cousins of goblins are quite strong, and receive a +1 to damage when they employ weapons. Despite their bulk, they are deceptively stealthy, and will surprise opponents 50% of the time.

Bulette

No. Enc.: 1d2 (1d2)
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 21 (13)
 Hit Dice: 9
 Attacks: 3 (2 claws, bite) or 4 (4 claws)
 Damage: 4d12/2d6/3d6 or 3d6/3d6/3d6/3d6
 Save: 12
 Morale: 9
 Hoard Type: None
 XP: 1,000

Also known as the landshark, the bulette is a terrifying predator that lives only to eat. It is a 10' tall and 12' long monstrosity. A bulette attacks anything it regards as edible, choosing the

easiest or closest prey first. The only creatures it refuses to eat are elves (and it dislikes the taste of dwarves). When burrowing underground, a landshark can detect prey from vibrations and moves at 30' (10'). When it senses something edible (that is, senses movement), it breaks to the surface, crest first, and begins its attack with 2 claws and a bite. If particularly threatened, it can leap out of the earth and additionally attack with its hind limbs, for 3d6 hp damage each. In this manner they will attack with all four limbs at once. This creature has a vulnerable under side (AC 13) which is exposed if the bulette comes to the surface to attack with all limbs.

C

Camel

No. Enc.: 0 (2d4)
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 12
 Hit Dice: 2
 Attacks: 2 (bite, hoof)
 Damage: 1/1d4
 Save: 18
 Morale: 7
 Hoard Type: None
 XP: 20

Camels are known for their ability to travel long distances without food or water, and they may travel for a period of 2 weeks without water if they are well hydrated to begin with. They are efficient at traveling in the desert, and will not suffer movement penalties in this terrain. Camels are temperamental, and are known to often kick or bite those who handle them. Camels can carry 300 lbs and move at their regular movement rate, and can carry up to 600 lbs. A mounted camel rider may not use a lance for a charge attack.

Carcass Scavenger

No. Enc.: 1d3 (1d3)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 12
 Hit Dice: 3 + 1
 Attacks: 8 (stingers)
 Damage: Paralysis
 Save: 16
 Morale: 9
 Hoard Type: XXI
 XP: 135

The dreaded carcass scavenger is 4' tall and 9' long, and resembles a giant fat grub with multifaceted eyes, small legs, and with a head bearing 2' long insect-like feelers tipped with a poisonous stinger. It is also known as a Carcass Creeper. This creature is rumored to be a magical abomination created from a giant maggot. When the stingers strike an opponent, he must succeed in a saving throw versus paralysis or become paralyzed for 2d4 turns. If not faced with more opponents, the carcass scavenger will swallow the paralyzed character on the subsequent round. Paralysis may be cured with cure light wounds, but when used in this way it does not heal damage.

Large cats are some of the most efficient hunters. They kill only for food or in defense, and generally remain above ground in wilderness settings. Sometimes a large cat will taste the blood of humans and become a man-killer, preferring to hunt humans over any other prey. Large cats will always give chase if an opponent runs away.

Mountain Lion: These large cats are light brown and blend in well in their preferred habitat, which includes mountains and high grassy meadows. However, they may be found in nearly any habitat. These cats will occasionally be found in labyrinths.

Panther: These fast-running predators are at home in grassy plains and wooded areas.

Tiger: These large hunters are extremely stealthy, and in a wooded environment surprise opponents with a roll result of 1-4 on 1d6. These cats typically live in subtropical or cooler environments. Their striped hides provide cover when hunting prey.

Sabre-tooth Tiger: These prehistoric hunters are fearsome and immense. They have extremely large canine teeth, which make them particularly dangerous killers.

Lion: Lions are very social cats, and live in groups. They prefer hot climates, typically living on savannah.

Centaur

No. Enc.:	0 (2d10)
Alignment:	Neutral
Movement:	180' (60')
Armor Class:	14
Hit Dice:	4
Attacks:	3 (2 hooves, weapon)
Damage:	1d6/1d6, weapon
Save:	15
Morale:	8
Hoard Type:	XXII
XP:	80

Centaur's have the body and legs of horses, but the upper body of humans. They are reclusive beings, and live far from other humanoids in densely wooded sylvan settings. They are able to attack by kicking with two legs at a time, as well as attacking with a weapon. Centaurs avoid conflict, and males guard their communities. Usually, females and young do not fight, and will seek escape if combat occurs. Young are considered to be monsters of 2 HD for combat purposes, and they inflict 1d2/1d2, or weapon damage. If forced into combat, centaurs are unlikely

to surrender.

Centipede, Giant

No. Enc.:	2d4 (1d8)
Alignment:	Neutral
Movement:	60' (20')
Armor Class:	10
Hit Dice:	1d4 hp
Attacks:	1 (bite)
Damage:	Poison
Save:	15
Morale:	7
Hoard Type:	None
XP:	6

These 1' long centipedes prefer dark, wet locations. Giant centipedes attack with a poisonous bite. No damage is inflicted by the bite, but anyone bitten is entitled to a saving throw versus poison. Failure indicates that the victim is horribly sick for a period of 10 days, and can only move at 50% of normal movement. No other physical activity is possible.

Chimera

No. Enc.:	1d2 (1d4)
Alignment:	Chaotic
Movement:	120' (40')
Fly:	180' (60')
Armor Class:	15
Hit Dice:	9
Attacks:	5 (2 claws, 3 heads, see below)
Damage:	1d3/1d3/2d4/2d4/3d4, see below
Save:	10
Morale:	9
Hoard Type:	XVII
XP:	1,700

The chimera is a magical hybrid of lion, goat, and red dragon. It has a head of each of these creature types, including the wings of a dragon, the front portion of the body from a lion, and the rear portion from a goat. The lion head may attack with a bite, the goat head may gore with horns, and the dragon head can both bite and emit a fire breath attack that is a cone 50' long and 10' wide at its terminal end. This fire breath attack deals 3d6 hit points of damage, and a saving throw is allowed to reduce damage by half. Like ordinary dragons, the red dragon head can only use the breath attack 3 times per day, and it will use either a bite or the breath attack 50% of the time, until the breath attack runs out and it may only bite. The chimera may live in the wilderness, particularly hilly terrain, but also takes up residence in labyrinths.

Cockatrice

No. Enc.:	1d4 (1d8)
Alignment:	Neutral
Movement:	90' (30')
Fly:	180' (60')
Armor Class:	13
Hit Dice:	5
Attacks:	2 (beak, petrify)
Damage:	1d6, petrify
Save:	14
Morale:	7
Hoard Type:	XIX
XP:	350

The cockatrice is a magical creature that has the body of a rooster, but the tail of a reptile. It is a small creature, about the size of a natural rooster, but has a powerful beak that inflicts 1d6 hit points of damage. If an opponent touches a cockatrice, or if the cockatrice successfully attacks/touches an opponent, the opponent must succeed in a saving throw versus petrify or turn to stone. Cockatrices are ill-tempered creatures, and though they primarily eat small insects or rodents, they will engage larger animals, and characters, in combat with little provocation. They live in any climate, including labyrinths.

Couatl

No. Enc.: 1d4 (1d4)
 Alignment: Lawful
 Movement: 60' (20')
 Fly: 180' (60')
 Armor Class: 14
 Hit Dice: 9
 Attacks: 2 (bite, constrict)
 Damage: 1d3/2d4
 Save: 7
 Morale: 8
 Hoard Type: XXI
 XP: 3,100

A couatl is about 12 feet long, with a wingspan of about 15 feet. It resembles a giant feathered snake and weighs about 1,800 pounds. They are extremely intelligent, magical creatures. They attack with a poisonous bite (save versus poison or die), and constrict for 2d4 hp damage each round until either the couatl or victim is dead. Couatls may polymorph themselves at will. They have either the abilities of a 7th level cleric (40%), or a 5th level magic-user (40%), or both (20%). Couatls speak common, and with reptiles and avians.

Crab, Giant

No. Enc.: 1d2 (1d6)
 Alignment: Neutral
 Movement: 60' (20')
 Armor Class: 17
 Hit Dice: 3
 Attacks: 2 (pinchers)
 Damage: 2d6/2d6
 Save: 17
 Morale: 7
 Hoard Type: None
 XP: 50

These giant cousins to ordinary crabs are unintelligent, and merely exist to eat. They are found in any watery environment, and do not have to remain fully submerged. They can be found prowling along fresh or saltwater shores, marshes, and watery subterranean caves.

Crayfish, Giant

No. Enc.: 1d4 (1d4)
 Alignment: Neutral
 Movement: 60' (20')
 Swim: 120' (40')
 Armor Class: 15
 Hit Dice: 4 + 4
 Attacks: 2 (claws)
 Damage: 2d6/2d6
 Save: 15
 Morale: 9
 Hoard Type: None
 XP: 140

Giant crayfish are 8' long, but otherwise look and behave much like their smaller relatives. They are laborious walkers but swim very fast. They may dart out at prey, surprising an opponent on 1-3 on 1d6. They attack with their immense pinchers.

Crocodile

	<i>Ordinary Crocodile</i>	<i>Large Crocodile</i>	<i>Giant Crocodile</i>
No. Enc.:	0 (1d8)	0 (1d4)	0 (1d3)
Alignment:	Neutral	Neutral	Neutral
Movement:	90' (30')	90' (30')	90' (30')
Swim:	90' (30')	90' (30')	90' (30')
Armor Class:	14	16	18
Hit Dice:	2	6	15
Attacks:	1	1	1
Damage:	1d8	2d8	3d8
Save:	16	14	12
Morale:	7	7	9
Hoard Type:	None	None	None
XP:	20	320	1,500

Crocodiles are aggressive reptiles, with fearsome bites. They breathe air, but are aquatic and usually remain submerged or within shallow water. They primarily hunt in water, and are attracted by movement or blood. Large crocodiles, on average, grow to a length of 20'. Giant crocodiles are big, prehistoric beasts that can reach a length of 50'.

Cyclops

No. Enc.: 1 (1d4)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 14
 Hit Dice: 13
 Attacks: 1
 Damage: 3d10
 Save: 10
 Morale: 9
 Hoard Type: XVIII + 5,000 gp
 XP: 2,400

Cyclops average 20' tall, and are related to giants. They have one large eye centered on their face. They have reduced depth perception and suffer a -2 penalty to attack rolls. They employ large clubs as weapons, but also throw rocks up to 200' for 3d6 hit points of damage. A few cyclops have the ability to issue a curse one time per week (reverse of remove curse). Cyclops are loners, and generally live together in small numbers only on occasion. They typically keep flocks of sheep, and often cultivate grapes. They live in caves.

D

Demons

Demons are evil creatures of chaos. They are diverse in form and abilities, and although the ones presented here are mainly demon races, many unique demons exist as well. Demon lords are always unique. Demons primarily dwell in demon worlds within the planes of chaos, where wars frequently rage between demon lords or dark gods, with lower demons often used as fodder. Demons may also travel to the astral plane, the ethereal plane, and the plane of shadow. They are generally barred from entering the material plane unless summoned via a gate. All demons may only be destroyed permanently when on the planes of chaos; otherwise when their material form is destroyed their essence returns to chaos where it takes 100 years to form a new body, unless aided by a demon lord or summoned via a gate. The exception is lower order demons, which are permanently destroyed when killed on any plane.

Demons are true to their dark natures and do not respect or adhere to a formal chain of authority. As a consequence, the rule of demon worlds is by fear and violence, and is always in flux, with constant back stabbing and intrigue amongst the demon lords and higher servants.

However, despite the lack of a formal demon hierarchy, it is useful to divide them by general power level into lower order (1-4 HD), standard order (5-8 HD), higher order (9+ HD), and demon lord (21+ HD) ranks. Demon lords have the innate ability to "promote" demons of lower orders to higher orders, which generally means an increase in HD and other innate abilities. Through these means the less powerful demons serve their betters in hopes of becoming powerful in time.

Demons vary in their abilities and weakness, but have some abilities or immunities in common. All demons have the following common abilities:

Infravision (90')
 Half damage from cold-based attacks
 Half damage from electrical-based attacks
 Half damage from fire-based attacks (all)
 Half damage from gas-type attacks
 Gate (varies in expression, not available to lower order demons)

Telepathy (allows all languages to be understood)
Teleport without error (not available to lower order demons)

Note that all demon spell-like abilities (unless otherwise noted) function at the minimum class level required to use the similar spell, or as the demon's HD in levels, whichever is higher. They are usable once each round.

Astarot (Demon Lord)

No. Enc.: Unique
Alignment: Chaotic
Movement: 150' (50')
Armor Class: 26
Hit Dice: 184 hp (23 HD)
Attacks: 3 (2 tentacles, tail)
Damage: 1d6/1d6/2d6
Save: 3
Morale: 12
Hoard Type: VIII, IX, XXII
XP: 17,000

Astarot is the demon prince of reptiles and ophidians; he is 20' tall and covered in dark green scales and a 20' long whip-like tail. He has the legs of a lizard, two tentacles for arms, and three heads. His first central head is that of a snake, his right head a lizard, and the left head a baboon. Astarot may only be harmed by weapons of +2 or better. The snake head has a charm gaze (as charm person and charm monster, no saving throw) that affects creatures within 300'. The number of creatures affected is determined by their HD as follows: 3 HD or fewer, 1d10x10; 4-6 HD, 5d8; 7-9 HD, 3d8; 10-12 HD, 2d6; and 13+ HD, 1d4. Creatures with 15+ HD are entitled to a saving throw versus spells. The lizard head has a breath attack usable at will identical to the cone of cold from a wand of ice. The baboon has a fear gaze as the spell. Astarot's tail may lash out to attack for 2d6 hp damage. In addition, victims must save versus spell-like devices or have a body part wither as the staff of withering. Astarot's tentacles strike for 1d6 hp damage each. Each successful strike drains 1 level from the victim.

Astarot has the following spell-like abilities at will: clairvoyance, clairaudience, continual darkness, fear, detect invisible, detect magic, dispel magic, ESP, greater phantasmal force, levitate, polymorph self, read languages, read magic, suggestion, telekinesis (500 lbs. per head), wall of ice, and water breathing.

The following abilities are usable once per day: feeblemind, power word stun, project image, sticks to snakes, symbol, and gate (85% probability of success). One of the following demons will appear: vroock, hezrou, glabrezu, nalfeshnee, marilith, or balor.

Babau (Standard Order Demon)

No. Enc.: 1d3 (1d6)
Alignment: Chaotic
Movement: 150' (50')
Armor Class: 22
Hit Dice: 7 + 10
Attacks: 3 (2 claws, horn) or 1 (weapon)
Damage: 1d4+1/1d4+1/2d4 or As weapon +4
Save: 11
Morale: 10
Hoard Type: XXI
XP: 1,700

These 7' tall demons have ebony flesh that clings closely to their skeleton, appearing almost like a leathery corpse. They have a single curving horn that emerges from the back of their heads. Babau demons prefer to attack with weapons from a distance when possible, and have STR 19 which grants bonuses to attacks and damage with some weapons. A slimy red jelly coats the babau's skin when in combat, reducing damage by 50% from cutting and stabbing weapons. Babau suffer damage from ordinary weapons, and +2 damage from weapons of iron. These demons have the abilities of a thief of 9th level. Additionally, any creature within 20' that looks into a babau's glowing red eyes must succeed in a saving throw versus spells or be affected

as if from a ray of enfeeblement. They have the following spell-like abilities, usable at will: darkness 10' radius, dispel magic, fear (as the wand of fear, by touch), fly, levitate, polymorph self, and heat metal. In addition, a babau may gate (25% probability of success) another babau demon.

Balor (Standard Order Demon)

No. Enc.: 1d3 (1d6)
Alignment: Chaotic
Movement: 60' (20')
Fly: 150' (50')
Armor Class: 21
Hit Dice: 8 + 7
Attacks: 1 (sword or whip)
Damage: 1d8+1 or 1d6 and 3d6 fire damage
Save: 8
Morale: 10
Hoard Type: XXII
XP: 1,820

A balor stands about 12' tall. It has bat-like wings, horns, and its skin is usually dark red. Balors love to join battle armed with their +1 swords and whips. A balor's whip is a long, flexible weapon with many tails tipped with hooks, spikes, and balls. Victims are sometimes dragged toward the demon's body using the whip, to expose them to the flames emanating from a balor's hide. This deals an additional 3d6 hp damage. Balors are only affected by +1 weapons or better. They have the following spell-like abilities usable at will: detect invisibility, detect magic, dispel magic, fear (as the wand), pyrotechnics, read languages, read magic, suggestion, telekinesis (600 lbs.), and symbol (despair, fear, sleep, and stunning). In addition, a balor may gate (70% probability of success) a glabrezu (75%) or nalfeshnee demon (25%).

Glabrezu (Higher Order Demon)

No. Enc.: 1d3 (1d6)
Alignment: Chaotic
Movement: 90' (30')
Armor Class: 23
Hit Dice: 10
Attacks: 5 (2 pinchers, 2 claws, bite)
Damage: 2d6/2d6/1d3/1d3/1d4+1
Save: 10
Morale: 9
Hoard Type: XXII
XP: 3,100

Glabrezu have penetrating violet eyes, and their skin color ranges from deep russet to pitch black. They have four arms. Their two primary arms have crab-like pinchers instead of hands, and they have two smaller human-like arms on their chests; the hands have wicked claws. Glabrezu have wolf-like heads with two goat-like horns. A glabrezu stands about 10' tall. They are susceptible to attacks from ordinary weapons. Glabrezu have the following spell-like abilities usable at will: darkness 10' radius, fear (as wand of fear), levitate, polymorph self, pyrotechnics, and telekinesis (400 lbs.). In addition, a glabrezu may gate (35% probability of success) a vroock, hezrou, or another glabrezu (determine randomly).

Hezrou (Higher Order Demon)

No. Enc.: 1d3 (1d6)
Alignment: Chaotic
Movement: 120' (40')
Armor Class: 21
Hit Dice: 9
Attacks: 3 (2 claws, bite)
Damage: 1d3/1d3/4d4
Save: 10
Morale: 10
Hoard Type: XIV
XP: 3,100

A hezrou can walk both upright and on all fours, but it always fights standing up. It resembles an 8' tall toad, but for its human-like arms and large teeth. They covet human flesh. Hezrou are susceptible to ordinary weapons. Hezrou have the

following spell-like abilities, usable at will: darkness 10' radius, detect invisibility, fear (as wand of fear), levitate, and telekinesis (300 lbs.). In addition, a hezrou may gate (25% probability of success) another hezrou.

Juiblex (Demon Lord)

No. Enc.: 1 (Unique)
 Alignment: Chaotic
 Movement: 30' (10')
 Armor Class: 26
 Hit Dice: 100 hp (21 HD)
 Attacks: 1
 Damage: 4d10
 Save: 4
 Morale: 10
 Hoard Type: X x 2, XII x 2
 XP: 7,000

Juiblex is the ruler over all slimes, oozes, jellies, and other disgusting and foul ooze-like creatures. Known by some as the Faceless Lord, his home is a demon world in the planes of chaos. It is a steaming, bubbling lair of putrid ooze and slime pits that are constantly shifting and changing at his whim. Even the other demonic rulers loathe to journey here. He is constantly attended by and surrounded with all sorts of slimes and oozes (1d4 of at least 4 types). When confronted, he usually takes the form of a 10' tall column of bubbling and squirting ooze. This being resembles a red-eyed large bubbling mass of greenish black and foul-smelling liquid. Ooze, slime, and pus constantly squirt and seep from its form. In combat he lashes out with a slimy pseudopod, dealing 4d10 acid damage. Once per 10 rounds he may employ a slime spittle up to 150' away with a 30' diameter area of effect that has both the effects of contact with green slime and ochre jelly. Juiblex regenerates 2 hp each round. He may only be affected by +2 weapons or better. Juiblex has the following spell-like abilities, usable at will: cause disease, charm monster, circle of cold (10' radius, 5d6 cold damage), darkness 15' radius, detect invisibility, dispel magic, ESP, fear (as the wand of fear), fly, hold monster, invisibility 10' radius, locate object, phase door, project image, putrefy food and water, and telekinesis (1,500 lbs.). He may gate (75% probability of success) 1d4 hezrou demons. In addition, Juiblex can utter unholy word one time per day.

Marilith (Standard Order Demon)

No. Enc.: 1d3 (1d6)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 25
 Hit Dice: 7 + 6
 Attacks: 7 (6 weapon, constrict)
 Damage: As weapon/2d4
 Save: 11
 Morale: 9
 Hoard Type: XVII
 XP: 1,700

These female demons have a six-armed human-like body and the lower body of a snake. They stand 7' tall and measure 20' from head to tip of tail. A marilith usually holds a longsword in each of its six hands and wears many bangles and jewels. They may attack with their six arms and with their tails to constrict all in the same round. Mariliths are only affected by +1 weapons or better. They have the following spell-like abilities, usable at will: charm person, darkness 10' radius, detect invisibility, levitate, polymorph self, project image, pyrotechnics, and read languages. In addition, a marilith may gate (75% probability of success) a vroock, hezrou, glabrezu, nalfeshnee or balor demon (determine randomly).

Nalfeshnee (Higher Order Demon)

No. Enc.: 1d3 (1d6)
 Alignment: Chaotic
 Movement: 90' (30')
 Fly: 120' (40')
 Armor Class: 20
 Hit Dice: 11
 Attacks: 3 (2 claws, bite)
 Damage: 1d4/1d4/2d4
 Save: 8
 Morale: 10
 Hoard Type: XVIII
 XP: 4,400

These 10' tall demons have the torso and arms of an ape, with the head and legs of a boar. They have small but functional feathered wings. Nalfeshnee are unaffected by ordinary weapons. In combat, they attack with their claws and bite, or employ one of the following spell-like abilities at will: darkness 10' radius, detect magic, dispel magic, fear (as wand of fear), illusion (as the wand of illusion), levitate, polymorph self, project image, read languages, symbol (despair and fear), and telekinesis (500 lbs.). In addition, a nalfeshnee may gate (65% probability of success) a vroock, hezrou, glabrezu, or nalfeshnee demon (determine randomly).

Orcus (Demon Lord)

No. Enc.: 1 (Unique)
 Alignment: Chaotic
 Movement: 90' (30')
 Fly: 180' (60')
 Armor Class: 25
 Hit Dice: 125 hp (22 HD)
 Attacks: 2 (fists and tail)
 Damage: 2d6+1/2d4 + poison
 Save: 5
 Morale: 10
 Hoard Type: VIII, IX, XII
 XP: 13,000

Orcus is the Prince of the Undead, and it is said that he alone created the first undead that walked the worlds. This demonic humanoid is squat, bloated, and stands 15' tall. His goat-like head sports large, spiraling ram-like horns. His legs are covered in thick brown fur and end in hooves. Large powerful arms wield a wicked skull-tipped wand. Two large, black, bat-like wings protrude from his back and a long, snake-like tail, tipped with a sharpened barb, trails behind it. Orcus is one of the most powerful of all demon lords. From his great bone palace he fights a never-ending war against rival demon lords that spans several smoldering and stinking demon worlds.

In combat Orcus may deal powerful blows with his fists that deal 2d6+1 hp damage per hit. He may use a poisonous tail attack that deals 2d4 hp damage and victims must save versus poison or die. If Orcus uses a weapon, his immense strength grants him +4 to hit and +5 to damage. Orcus is affected only by +3 weapons or better. He has the following spell-like abilities, usable at will: animate dead, charm person, clairsentience, clairvoyance, continual darkness, detect invisibility, detect magic, dispel magic, ESP, illusion (as the wand of illusion), lightning bolt (12d6 damage), polymorph any object, polymorph self, project image, pyrotechnics, read languages, read magic, shape change, speak with dead, suggestion, telekinesis (1,200 lbs.), and wall of fire. Once per day Orcus may use the following spell-like abilities: feeblemind, symbol (any), and time stop. In addition, Orcus may gate (85% probability of success) a marilith, glabrezu, vroock, hezrou, or nalfeshnee demon. As the Demon Lord of Undead, Orcus may summon undead as a monster summoning spell. He may bring forth either 4d12 skeletons, 4d8 zombies, 5d6 ghouls, or 2d4 vampires. Wand of Orcus: This powerful, wicked device instantly kills all mortals dealt a blow. It has many other powers or spell-like abilities, to be determined by the GM.

Quasit (Lower Order Demon)

No. Enc.: 1 (0)
 Alignment: Chaotic
 Movement: 150' (50')
 Armor Class: 17
 Hit Dice: 3
 Attacks: 3 (2 claws, bite)
 Damage: 1d2/1d2/1d4
 Save: 16
 Morale: 10
 Hoard Type: XI x 2
 XP: 95

In its natural form, a quasit is a small demonic creature that stands about 1 ½' tall. They often serve more powerful demons, but are most commonly encountered as familiars to dark magic-users. Quasits take no damage from non-magical weapons, except those of iron. In addition, they do not suffer damage from fire, cold, or electrical-based attacks. They regenerate 1 hp per round. Quasits save versus magical effects as a F7. They attack with claws and a bite. Victims of the claw attacks must save versus poison or lose 1 point of DEX for 2d6 rounds, for each successful attack. Quasits have the following spell-like abilities: detect good, detect magic, invisibility, and polymorph self (limited to the form of a bat, giant centipede, toad, or wolf). In addition, 1 time per day a quasit may induce fear (as the spell, except that its area is a 30' radius).

Quasits as familiars: When a quasit familiar is within 10' of its master, the magic-user functions as if 1 level higher and regenerates 1 hp per round. Conversely, if the quasit is more than a mile away from the magic-user, the master functions as if 1 level lower than normal. However, if not more than one mile apart, a quasit is able to communicate via telepathy with the magic-user, and he may perceive the surroundings of the quasit through all of its senses, including 60' infravision. A quasit may commune for its master 1 time per week, and is allowed 1d4+2 questions. If a quasit familiar is killed, the master loses 4 levels permanently.

Succubus/Incubus (Standard Order Demon)

No. Enc.: 1 (1)
 Alignment: Chaotic
 Movement: 120' (40')
 Fly: 180' (60')
 Armor Class: 19
 Hit Dice: 6
 Attacks: 2 (claws)
 Damage: 1d3/1d3
 Save: 11
 Morale: 7
 Hoard Type: XI, XIV, XV
 XP: 1,320

Succubae and incubi resemble very attractive human women and men, respectively, save for their bat-like wings. They avoid each other and do not normally lair with others of their kind. Rather, when not in the realms of chaos they haunt the material plane in search of humans to tempt. They are able to drain a mortal of a level if lured into some act of passion, or by simply planting a kiss on the victim. Otherwise, succubae and incubi may attack with deceptively formidable claws. They are not susceptible to damage by ordinary weapons. Succubae and incubi have the following spell-like abilities usable at will: charm person, clairaudience, ESP, ethereal form (as the oil of etherealness), shape change, and suggestion. In addition, a succubus or incubus may gate (65% probability of success) a balor demon or attempt to gate (5% probability of success) a demon lord.

Vrock (Standard Order Demon)

No. Enc.: 1d3 (1d6)
 Alignment: Chaotic
 Movement: 120' (40')
 Fly: 180' (60')
 Armor Class: 19
 Hit Dice: 8
 Attacks: 5 (2 claws, 2 rear claws, beak)
 Damage: 1d4/1d4/1d8/1d8/1d6
 Save: 12
 Morale: 11
 Hoard Type: XXI
 XP: 2,060

These demons resemble 8' tall humanoid vultures. They are susceptible to damage from ordinary weapons. In combat they may attack with all five attacks if airborne, or 2 claws and a bite if on the ground. Vrocks have the following spell-like abilities usable at will: darkness 10' radius, detect invisibility, and telekinesis (200lbs.). In addition, a vrock may gate (10% probability of success) a vrock demon.

**Devils**

Devils are evil creatures from the plane of order. Though they are light, they support the ideals of law through domination and foul acts. They respect lightness, but a twisted form that is heavily infused with treachery and deceit. They adhere to an order of command with arch-devils at the top of the hierarchy. Particularly powerful arch-devils rule their own domain on the plane of order (a kind of demi-plane), and sometimes encroach upon the plane of balance. Devils are divided into three main types, lesser, greater, and arch-devils. Arch-devils, like demon lords, are unique beings. The lesser and greater devils belong to devilish races, and arch-devils may promote individuals that transform into a new race until they work their way toward becoming an arch-devil (a rare event). There is overlap in the power of lesser and greater devils, with some of the most powerful lesser devils being more powerful than the less powerful of the greater devils. However, this is the price of promotion and ambition in the devil hierarchy, and some lesser devils choose to remain of lower rank to bask in this power. There are many more arch-devils and devilish races than are detailed here, and the GM should create new beings as the need arises.

Devils may travel through the plane of order freely. They may also venture to the astral plane, the plane of balance, and the plane of beasts. They may not enter other planes unless summoned via a gate or some similar means. If arch-devils or higher devils are killed on another plane, their essence is transported to the plane of order where it reforms in 20 years. Lesser devils killed on any plane are destroyed forever, and

arch-devils and greater devils killed on the plane of order are permanently destroyed.

Different arch-devils or devil races have varying powers. All lesser devils are susceptible to damage from ordinary weapons. Greater devils and arch-devils may only be harmed by magical weapons or weapons made of silver. All devils have the following abilities, spell-like abilities, or damage resistance in common. Note that spell-like abilities, unless otherwise noted, are usable at the rate of one ability per round:

Charm person
Half damage from cold-based attacks
Half damage from gas-based effects
Immunity to fire-based attacks (both magical and non-magical)
Infravision (90')
Know alignment
Phantasmal force
Suggestion
Teleport without error
Gate (varies in expression)
Telepathy (allows all languages to be understood)

Amon (Arch-devil)

No. Enc.: 1 (Unique)
Alignment: Chaotic
Movement: 180' (60')
Armor Class: 21
Hit Dice: 132 hp (22 HD)
Attacks: 1 (weapon or bite)
Damage: As weapon +4 or 3d4
Save: 3
Morale: 10
Hoard Type: XII, XVI
XP: 13,000

This wolf-headed humanoid stands 9' tall. His fur is brownish-black and his eyes and teeth are yellow. His great clawed hands are brownish in color and covered in shaggy fur. Amon is a vassal in service to Geryon, commanding no less than 3 legions of bone devils. Amon wields a +4 mace. He can also bite in the same round for 3d4 hp damage. Amon is only harmed by +3 or better weapons. Amon is very strong (STR 19), receiving +3 to hit and +4 to damage in melee combat. He regenerates 1 hp per round. Amon has the following spell-like abilities, usable at will: animate dead, charm monster, detect invisibility, detect magic, dispel magic, fear (as the spell), fly, geas, know alignment, polymorph self, produce flame, read languages, read magic, suggestion, teleportation, wall of ice, and limited wish (for another being only). In addition, one time per day he may employ symbol of hopelessness and gate (60% probability of success) 1d4 bone devils. He is able to summon all wolves in a 1 mile radius, and control them to do his will.

Bael (Arch-devil)

No. Enc.: 1 (Unique)
Alignment: Chaotic
Movement: 120' (40')
Armor Class: 22
Hit Dice: 110 hp (21 HD)
Attacks: 2
Damage: As weapon + 6
Save: 4
Morale: 10
Hoard Type: XII, XVI
XP: 11,000

Bael is an 8' tall diabolical-looking golden-skinned humanoid with bovine head features, large round eyes of black, a large nose, wolf-like upright ears, and a large mouth lined with razor-sharp teeth. Tiny forward-curving horns protrude from his forehead. He wears bronze chainmail and wields a +2 morningstar, which telescopes up to 8' long. He regenerates at the rate of 1 hp per round. Bael has the following spell-like abilities, usable at will: alter self, animate dead, cause serious wounds, detect invisibility, detect magic, dispel magic, fear aura 20' radius (as the spell), invisibility, know alignment, pyrotechnics, produce fire, read languages, suggestion,

teleportation, wind walk, and limited wish (other being only). Bael may use symbol of stunning one time per day, and shape change two times per day. He may also gate (65% probability of success) 1d4 barbed devils.

Barbed (Lesser devil)

No. Enc.: 1d2 (3d4)
Alignment: Chaotic
Movement: 120' (40')
Armor Class: 19
Hit Dice: 8
Attacks: 3 (2 claws, tail)
Damage: 2d4/2d4/3d4
Save: 12
Morale: 10
Hoard Type: None
XP: 2,560

Barbed devils are 7' tall humanoids, and are covered in spikes and horns. These creatures are often employed by arch-devils as guards and soldiers. They make particularly good sentries, and they have keen senses and cannot be surprised. They can attack each round with their clawed and barbed hands, or their spiked tail. A victim of any of these attacks must save versus spells or be affected by fear (as the wand of fear). In addition, barbed devils have the following spell-like abilities, usable at will: hold person, produce flame, pyrotechnics, and gate (35% probability of success) a barbed devil.

Bone (Lesser devil)

No. Enc.: 1d2 (2d4)
Alignment: Chaotic
Movement: 150' (50')
Armor Class: 20
Hit Dice: 9
Attacks: 1 (hook or tail)
Damage: 3d4 or 2d4 + STR drain
Save: 11
Morale: 10
Hoard Type: None
XP: 3,100

These 9' tall devils have tight-clinging skin, giving them a skeletal appearance, and they have a scorpion-like tail. Bone devils hate all other creatures and attack ruthlessly. They are able to see with ultraviolet vision. They strike with a special curved, barbed spear for 3d4 hp damage. On a successful attack there is a 50% probability the victim is caught in the hooked weapon. A bone devil attacks caught victims with its scorpion-like tail for 2d4 hp damage, and victims must save versus poison or lose 1d4 STR for 2d6 rounds. In addition, bone devils have the following spell-like abilities, usable at will: detect invisibility, fear aura 5' radius (as the fear spell), fly, invisibility, phantasmal force, and gate (40% probability of success) a bone devil. In addition, bone devils may create a wall of ice once per day.

Erinyes (Lesser devil)

No. Enc.: 1d3 (4d4)
Alignment: Chaotic
Movement: 60' (20')
Fly: 210' (70')
Armor Class: 17
Hit Dice: 6 + 5
Attacks: 1
Damage: 2d4
Save: 13
Morale: 10
Hoard Type: X
XP: 1,280

Unlike most other devils, erinyes appear attractive to humans, resembling very comely women or men, but they have large black feathered wings. They are a very common form of devil, and are often used as scouts within the plane of order and in other planes. Erinyes are also tasked with capturing evil people

from the material plane, to take them back to the plane of order to be transformed into lemures. They attack with a dagger that deals 2d4 damage, and victims must save versus poison or be paralyzed for 1d6 rounds. In addition, erinyes have a rope of entanglement. Erinyes have the following spell-like abilities, usable at will: detect invisibility, fear (was the wand of fear), invisibility, know alignment, locate object, polymorph self, produce flame, and gate (30% probability of success) an erinyes.

Geryon (Arch-devil)

No. Enc.: 1 (Unique)
 Alignment: Chaotic
 Movement: 60' (20')
 Fly: 180' (60')
 Armor Class: 22
 Hit Dice: 135 hp (23 HD)
 Attacks: 3 (2 claws, sting)
 Damage: 3d6/3d6/2d4
 Save: 3
 Morale: 10
 Hoard Type: X, XV
 XP: 13,000

Geryon is a towering 10' tall and 30' long arch-devil. He has the upper torso of a humanoid with paw-like hands, blue-furred arms, dark hair, piercing black eyes, and the lower torso of a massive black and gold banded snake. Geryon, the Great Serpent, rules a large demi-plane on the plane of order. His fortress, a large iron citadel located in the heart of a great city, is situated at the center of his domain. Geryon attacks with massive, powerful claws and his poisonous sting. Victims of the sting must save versus poison with a -4 penalty or die. Geryon is only affected by +2 or better weapons. He has the following spell-like abilities, usable at will: charm person, detect invisibility, dispel magic, geas, fear (as the spell), ice storm, invisibility, light, locate object, raise dead, read languages, read magic, shape change, wall of ice, and wish (for another being). One time per day he may utter an unholy word and employ a symbol of pain. Geryon may also gate an ice devil (45% probability of success) or (60% probability of success) 1d2 bone devils. Finally, Geryon has a bull's horn that is usable one time per week. It summons 5d4 minotaurs that will do his bidding unto death.

Horned (Greater devil)

No. Enc.: 1d2 (1d4+1)
 Alignment: Chaotic
 Movement: 90' (30')
 Fly: 180' (60')
 Armor Class: 24
 Hit Dice: 5 + 5
 Attacks: 4 (2 claws, bite, tail) or 1 (weapon)
 Damage: 1d4/1d4/1d4+1/1d3 or 2d6
 Save: 10
 Morale: 9
 Hoard Type: XIV
 XP: 1,260

Horned devils are 9' tall, scaly, and have reptilian wings. If unarmed they attack using their claws, bite, and tail all in the same round. Horned devils are only affected by +1 or better weapons. Their tail inflicts 1d3 hp damage, but it causes an infernal wound that must be bound or it continues to openly bleed, dealing an extra 1 hp of damage each turn and can only be healed by magical means. They may also wield a large spiked chain that deals 2d6 hp damage. Victims must save versus spells or be stunned for a number of rounds equal to the damage dealt. Horned devils have the following spell-like abilities, usable at will: detect magic, ESP, fear aura 5' radius (as the fear spell), phantasmal force, produce flame, pyrotechnics, and gate (55% probability of success) a horned devil. In addition, horned devils may create a wall of fire once per day. This effect deals three times the normal damage.

Imp (Lesser Devil)

No. Enc.: 1 (1)
 Alignment: Chaotic
 Movement: 60' (20')
 Fly: 180' (60')
 Armor Class: 17
 Hit Dice: 2 + 2
 Attacks: 1 (tail)
 Damage: 1d4
 Save: 15
 Morale: 8
 Hoard Type: XIII
 XP: 83

These 2' tall devils are blue-skinned and have bat-like wings, small horns, and a barbed tail. These creatures are created from lemures. They attack with a poisonous tail that deals 1d4 hp damage and victims must save versus poison or die. Imps may polymorph self into any of the following forms: large spider, raven, giant rat, and boar. Only magical weapons, or weapons made of silver, harm imp. Imps regenerate 1 hp per round. Imps save against all magical effects as if they have 7 HD. Imps have the following spell-like powers, usable at will: detect good, detect magic, and invisibility. One time per day they may make a suggestion.

Imps as familiars: So long as the imp and the magic-user are within 1 mile, the magic-user may access all of the imp's senses, including 90' infravision, and operates as if 1 level higher. If they are further than 1 mile apart, the magic-user operates as if 1 level lower. When they are within 10' if one another the magic-user receives +2 to save against all magical effects. In addition, he regenerates 1 hp per round. If an imp familiar dies, the magic-user loses 4 levels. Imps may use commune once per week, allowing 6 questions.

Ice (Greater devil)

No. Enc.: 1 (1d4)
 Alignment: Chaotic
 Movement: 60' (20')
 Armor Class: 23
 Hit Dice: 11
 Attacks: 4 (2 claws, mandibles, tail) or 1 (weapon)
 Damage: 1d4/1d4/1d4/3d4 or 2d6 + paralyzation
 Save: 9
 Morale: 11
 Hoard Type: X, XI
 XP: 4,800

These 12' tall devils have a humanoid/insectoid body with multifaceted eyes and powerful mandibles on a mantis-like head. They live in an icy demi-plane within the plane of order. Ice devils have ultraviolet vision, and regenerate 1 hp per round, and are only affected by +2 or better weapons. They attack with their claws, mandibles, and a barbed tail. They also have spears that inflict 2d6 hp damage and victims must save versus paralyzation or be afflicted with such numbing cold they are slowed for 3d6 rounds. Ice devils have the following spell-like abilities, usable at will: detect invisibility, detect magic, fear aura 10' radius (as the fear spell), fly, polymorph self, wall of ice, and gate (60% probability of success) an ice devil.

Lemure

No. Enc.: 0 (5d6)
 Alignment: Chaotic
 Movement: 30' (10')
 Armor Class: 12
 Hit Dice: 3
 Attacks: 1 (claws)
 Damage: 1d4
 Save: 16
 Morale: 6
 Hoard Type: None
 XP: 95

These sagging, 5' tall humanoid creatures are pathetic slaves of the devilish hordes. They were evil humans, but have been transformed into the lowest of the devils. Lemures are mindless

and cannot communicate, but they are sensitive to telepathic messages from other devils, typically obeying a devil's mental commands. They are often used as fodder in battles, and as slaves for labor. They regenerate 1 hp per round. They have the same immunities as undead, and cannot be permanently killed except by holy materials such as holy water. Certain rare lemures develop a sinister intellect, and these beings may be promoted to higher devilish ranks.

Pit Fiend (Greater devil)

No. Enc.: 1 (1d3)
 Alignment: Chaotic
 Movement: 60' (20')
 Fly: 150' (50')
 Armor Class: 22
 Hit Dice: 13
 Attacks: 2 (weapons) or 1 (tail)
 Damage: 1d6+6/1d6+6 or 2d4
 Save: 7
 Morale: 10
 Hoard Type: II, X
 XP: 5,100

Pit fiends are 12' tall, bat-winged and red-skinned devils. They are very high ranked in devilish society, and particularly cunning pit fiends have been known to ascend to arch-devil status. They wield two swords with scythe-like tips that deal 1d6+6 hp damage each. They may also attack with their constricting tail that deals 2d4 hp damage each round. Pit fiends regenerate 2 hp per round, and are only affected by +2 or better weapons. They have the following spell-like abilities, usable at will: detect invisibility, detect magic, hold person, polymorph self, produce flame, pyrotechnics, and wall of fire. Once per day pit fiends can either gate another pit fiend (65% probability of success) or 1d3 barbed devils (70% probability of success). Also, once per day pit fiends may use symbol of pain.

Djinni

No. Enc.: 1 (1)
 Alignment: Neutral
 Movement: 90' (30')
 Fly: 240' (80')
 Armor Class: 14
 Hit Dice: 7 + 1
 Attacks: 1 (fist), see below
 Damage: 2d8/2d6
 Save: 12
 Morale: 12
 Hoard Type: None
 XP: 1,700

Although they look like taller, majestic humans, djinn are actually an intelligent kind of air elemental. Djinn may only be affected by magic and magical weapons. Djinn have several spell-like abilities, and they can use each of them 3 times a day. They have four creation abilities, including create food and water (cast as a cleric of 7th level), create temporary objects of metal (the softer the metal the longer it lasts, gold lasts 24 hours while iron lasts 1 round, and 100 lbs maximum), create permanent goods (items made of wood, rope, and other kinds of softer goods of 100 lbs maximum), and create illusion (as phantasmal force, but the effect is permanent until touched or dispelled). Djinn can also take on a gaseous form or make themselves invisible.

Finally, djinn can assume the form of a whirlwind after 5 rounds of preparation. It has a 10' diameter at its base, is 70' high, and is 20' in diameter at its top end. When in whirlwind form, the djinn may move 120' (40'). The whirlwind deals 2d6 hit points of damage to all beings that it contacts. Beings with 2 or fewer HD must make a saving throw versus death or are thrown 10' away.

A djinn may also attack with powerful punches that inflict 2d8 hit points of damage. Djinn are very strong, and are able to transport 600 lbs easily. They may transport a maximum of 1,200 lbs for a period of 3 turns. However, after this period a djinni will have to spend 1 full turn resting.

Dog

	<i>War</i>	<i>Wild</i>
No. Enc.:	0 (0)	4d4 (4d4)
Alignment:	Neutral	Neutral
Movement:	120' (40')	150' (50')
Armor Class:	13	12
Hit Dice:	2 + 2	1 + 1
Attacks:	1	1
Damage:	2d4	1d4
Save:	17	18
Morale:	11	7
Hoard Type:	None	None
XP:	35	15

War: These dogs are bred and trained for combat. They will follow the commands of their owner, and likely will fight to the death. War dogs are sometimes equipped with leather armor.

Wild: Wild dogs are feral dogs that have taken up a pack lifestyle and tend to live on the outskirts of human society, either in the country or in the slums of towns.

Doppelganger

No. Enc.: 1d6 (1d6)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 14
 Hit Dice: 4
 Attacks: 1
 Damage: 1d12
 Save: 15
 Morale: 10
 Hoard Type: XVIII
 XP: 190

Doppelgangers are strange beings that are able to take on the shapes of those they encounter. They can imitate the shape of a humanoid up to 7' tall. In its natural form, the creature is 5 ½' tall and looks more or less humanoid, but slender and frail, with gangly limbs and half-formed features. The flesh is pale and hairless. Its large, bulging eyes are yellow with slitted pupils. A doppelganger's appearance is deceiving even when it's in its true form. A doppelganger is hardy, with a natural agility not in keeping with its frail appearance. Doppelgangers make excellent use of their natural mimicry to stage ambushes, bait traps, and infiltrate humanoid society. They will often try to kill the person they imitate, so to then attack a group by surprise. Doppelgangers revert to their natural forms when slain. They are immune to the effects of charm and sleep spells.

Dragon

Ancient, highly intelligent, treasure loving, and dangerous are all characteristics of dragons. They are a very old race of intelligent reptiles, which reproduce by laying eggs. They are completely carnivorous, and each race of dragon employs a particular kind of breath weapon attack. The races of dragons are identified by their predominant hide color, preferred climate, and alignment. Dragons are a long-lived race, and individuals can live for over a hundred thousand years.

Because of their long history, dragons seldom take notice of the lesser insignificant intelligent races, and view them as primitive upstarts. Nonetheless, dragons are extremely intelligent and value their own lives. To this end, dragons will bargain and even surrender to characters to save their lives or otherwise richly benefit. Dragons have immense egos, and even the most evil dragon may stop to listen to the pleas or praise of a soon to be lunch. Dragons of differing alignment will interact with other intelligent creatures in different ways. Neutral dragons may or may not converse with characters, depending on the circumstances. Lawful dragons are more likely to aid a good party or a party on a noble mission. Chaotic dragons will likely attempt to destroy a party on sight, unless there is something to be gained by exercising restraint.

Dragon Breath Weapons: Dragons are able to produce a powerful attack with a breath weapon. Dragons' breath attacks deal a number of hp damage equal to their total number of hp

when the attack occurs (not necessarily their maximum hp). The classic breath attack is the fire from a "fire-breathing dragon," but different dragons breathe different kinds of effects. All breath weapons are usable 3 times per day. Unless the situation prevents it, dragons will tend to use their breath weapon as their initial attack when confronted with combat. Dragons will use their breath weapons about 50% of the time on all subsequent rounds of combat, and if the breath weapon is not employed they will attack with two claws and a bite attack.

A dragon's breath attack can have one of three potential shapes, cloud shaped, cone shaped, and linear. All cloud-shaped breath effects occupy an area that is 20' high, 50' long, and 40' wide. Cone-shaped effects begin with a width of 2', and spread out in a cone shape to a variable maximum length, but the terminal end of a cone is always 30' wide. Linear breath attacks have the same 5' width for their entire lengths (100'). All creatures that find themselves the victims of a breath attack may attempt a saving throw versus breath attack. Success indicates that only half of the normal hit point damage is done. Dragons are immune to the effects of their own breath attack, as well as the same kind of breath attack from other dragons. They are further immune to ordinary instances of a similar nature to their attack. For instance, a gold dragon is immune to all ordinary fire and the fire breath of all other dragons. However, dragons will sustain half damage from magical based attacks that are similar to the nature of their breath attacks. A blue dragon, for instance, will not suffer damage from a natural lightning strike, but will suffer half damage from spell lightning bolt.

Let Sleeping Dragons Lie: When a dragon is encountered in its lair, or otherwise in a location on the ground, there is a chance that the dragon will be asleep when stumbled across. Dragons are an ancient, long-lived race, and as such they operate on a different schedule than humanoids. Dragons may sleep in a safe location for days and weeks if left undisturbed. The percentage chance that a dragon will be asleep when found is provided on the Additional Dragon Information table. For one round, opponents may attack a sleeping dragon and receive a bonus of +2 to all attack rolls. The dragon will be roused this round regardless of whether attacks actually make contact, and combat will progress on the second round as normal. Or, more accurately, with the dragon's full fury.

Dragon Speech Capability: The more powerful the dragon type, the greater probability that any given member of that type has the capability to speak. All dragons that can speak know common, dragon, and their alignment language. They may also cast magic-user/elf spells. Refer to the Addition Dragon Information table for the probability of speech and the spells available to dragons.

Dragon Surrender: Sometimes opponents seek to subdue dragons, so that they may be enslaved or bargained with. Any characters that wish to subdue a dragon must announce that they are attacking without intent to kill. All hand weapons with a blade may be employed to deal blunt blows with the flat of the blade. Combat and damage are calculated normally, noting how much damage is "subdue" damage. When a dragon reaches "0" hit points due to subdue damage, it is knocked unconscious and will surrender to the characters for the time being. Note that a dragon will always wish for its freedom, and unless restrained or otherwise under dire threat a dragon will make every effort to escape when the chance presents itself. Characters must choose to attempt to gain a service from a dragon, or sell it to a buyer if one can be found. As a general rule, a dragon may be sold, at most, for a number of gold pieces equal to 1,000 x the dragon's maximum hit points.

Dragon Age, Hit Dice, and Treasure: The qualities presented for dragons assume that the dragon is a mature adult. However, the hit dice should be adjusted + or - 3 hit dice if the dragon is old or young, respectively. Older dragons are not only more powerful, but since they are older they have likely accumulated a larger treasure hoard. Old dragons may have up to twice the amount of listed treasure, while young dragons may only have about half of the listed treasure.

	50' wide, 40' long, cloud, <i>paralyze</i>				
White	80' long, 30' wide, cone, cold	4	-	-	-
Sea	20' diameter gob, poison spittle	4	3	-	-

Metallic Dragons: Many metallic dragons have two breathe weapons. For example, a gold dragon is able to breathe chlorine gas as a green dragon and fire as a red dragon, but nonetheless can utilize a breath attack only 3 times per day. In addition, all gold and silver dragons are able to polymorph themselves into any animal or humanoid form at will.

Sea Dragons: The breath attack of a sea dragon is a giant 20' diameter gob of poisonous spittle. A victim struck must save versus breath attack or die. Note that this poison is no longer potent 1 round after the breath attack is made. These dragons stay almost exclusively in the water, but may glide over the surface of water for a duration of 6 rounds. These dragons live in underwater caverns, where they hoard treasure from sunken vessels. They will never be found asleep above water.

Dragon, Chromatic

No. Enc.:	1 (1)
Alignment:	Chaotic
Movement:	60' (20')
Fly:	180' (60')
Armor Class:	19
Hit Dice:	16 hp per head, 8 HD for the body (18 HD)
Attacks:	6 (5 bites, tail)
Damage:	As head/1d6+poison
Save:	3
Morale:	10
Hoard Type:	XV x4
XP:	5,250

Rumors abound of a type of a powerful all-female race of dark (and possibly demonic) dragons that spawn all other dragons of chaos or evil bent. A chromatic dragon is 60' long and has one head type of each of the following dragons: black, blue, green, red, and white. Each head may bite in a round, dealing damage equivalent to that dragon's bite damage. In addition, each head may deliver the appropriate breath weapon type, one per round, once per day. Each head may cast 2 spells a day of the spell level indicated below:

Head Type	Spell Level
Black	1st level
Blue	2nd level
Green	3rd level
Red	4th level spells
White	5th level spells

These creatures also attack with a stinger-tipped tail for 1d6 damage. Victims must additionally save versus poison or die. Each of the chromatic dragon's heads can suffer 16 hp damage before becoming lifeless, but they regenerate in 24 hours. If all heads are destroyed or the body is injured to 0 hp the dragon dies. Chromatic dragons are 90% likely per head color to have

one adult dragon of that type present as a companion. Only three known chromatic dragons are thought to be still living, Lahamu, Kishar, and Damgul.

Dragon Turtle

No. Enc.: 0 (1)
 Alignment: Chaotic
 Movement: 30' (10')
 Swim: 90' (30')
 Armor Class: 21
 Hit Dice: 30
 Attacks: 3 (2 claws, bite)
 Damage: 1d8/1d8/1d6x10
 Save: 3
 Morale: 10
 Hoard Type: XV
 XP: 9,500

This fearsome, massive beast is a magical hybrid of dragon and giant turtle. It has the large shell of a turtle, but the arms, legs, head, and tail of a dragon. Its rough, deep green shell is much the same color as the deep water the monster favors, and the silver highlights that line the shell resemble light dancing on open water. The turtle's legs, tail, and head are a lighter green, flecked with golden highlights. The lair of these creatures will always be below water in submerged caverns. They hoard wealth from ships that have sunk to the bottom of the sea. Dragon turtles have powerful claw and bite attacks, but also have a breath weapon that is usable 3 times per day. The breath weapon is a hot blistering steam cloud that is 90' long and 30' wide. Hit points of damage inflicted is equal to the dragon turtle's current hit points, and a victim may save versus breath attack for half damage.

Dragonne

No. Enc.: 1 (1)
 Alignment: Neutral
 Movement: 150' (50')
 Fly: 90' (30')
 Armor Class: 17
 Hit Dice: 9
 Attacks: 3 or 1 (2 claws, bite or roar)
 Damage: 1d8/1d8/3d6
 Save: 12
 Morale: 9
 Hoard Type: IX, XX, VIII
 XP: 2,800

A dragonne has the head of a lion and the body of a brass dragon. It possesses huge claws and fangs, and large eyes, usually the color of its brass scales. A dragonne is about 12' long and weighs about 700 pounds. A dragonne's wings are useful only for short flights, carrying the creature for 1 to 3 turns at a time. Nevertheless, it uses its wings effectively in battle. If opponents attempt to charge or encircle it, the dragonne simply takes to the air and finds a more defensible position. A dragonne can loose a devastating roar. All creatures except dragonnes within 120' must succeed in a save versus paralyze or suffer weakness. Those within 30' are deafened. These effects last 2d6 rounds.

Dryad

No. Enc.: 0 (1d6)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 14
 Hit Dice: 2
 Attacks: Charm
 Damage: 0
 Save: 17
 Morale: 6
 Hoard Type: XIX
 XP: 29

Shy, intelligent, and resolute, dryads are as elusive as they are alluring. A dryad's delicate features are much like a female elf's, though her flesh is the color of bark, and her hair is the color of a canopy of leaves that changes color with the seasons.

Although they are generally solitary, up to six dryads have been encountered in one place on rare occasions. A dryad is united by spirit to a particular tree, and if this tree is ever killed the dryad will be killed as well. Dryads may physically join with their trees, effectively disappearing. A dryad may not venture more than 240' from her tree, or she will die after 1 turn. Dryads have the innate ability to charm person. They will sometimes use this ability if threatened, or if they take a particular liking to an individual. A victim must succeed in a saving throw versus spells, or he goes to the dryad's tree and disappears within it. Any individual who does this is lost forever. Dryads acquire treasure from past victims or infatuations, and store it at the base of their trees, underground below the roots.

Dwarf

No. Enc.: 1d6 (5d8)
 Alignment: Lawful, Neutral
 Movement: 60' (20')
 Armor Class: 15
 Hit Dice: 1
 Attacks: 1 (weapon)
 Damage: 1d8 or weapon
 Save: 16
 Morale: 8
 Hoard Type: XVI
 XP: 10

This monster listing is for the typical NPC dwarf. Dwarves favor earth tones in their clothing and prefer simple and functional garb. Their skin can be very dark, but it is always some shade of tan or brown. Hair color can be black, gray, or brown. Dwarves average 4 feet tall and weigh as much as adult humans. When encountered in a group of 20 or more, one leader will be present, whose level will be determined by rolling 1d6+2. This leader may possess items of magic, with a probability equal to 5% per level of the leader per type of magic item, except for rods, wands, and staves, or scrolls. In the presence of a leader, dwarves have morale of 10 rather than 8. Goblins are the most reviled creatures to dwarves; dwarves will attack goblins first and ask questions later.

Dwarf, Duergar

No. Enc.: 2d4 (1d00+100)
 Alignment: Chaotic
 Movement: 60' (20')
 Armor Class: 15
 Hit Dice: 1 + 2
 Attacks: 1 (weapon)
 Damage: As weapon
 Save: 16
 Morale: 8
 Hoard Type: VI, XX
 XP: 21

Sometimes called gray dwarves, these evil beings dwell in the underworld. Most duergar are bald (even the females), and they dress in drab clothing that is designed to blend into stone. Duergar have 120' infravision, and suffer a -2 penalty to hit in bright light or sunlight. They war with other dwarves, even allying with other underworld creatures from time to time. In a group of duergar, 25% of their number will be 2nd level fighters. In a group of 10 or more, there will be a 4th or 5th level fighter. Duergars are most usually armed with crossbows, short swords, and/or light picks. There is a 25% chance each will be wearing plate armor. Duergar are very silent, and surprise opponents on 1-3 on 1d6. They have the same saving throw bonuses as other dwarves, but are completely immune to poison and paralysis. In their lair, there will be an additional number of young equal to 10% of the adults. In addition, there is a 75% chance the lair will have 1d4x100 slaves, consisting of morlocks, dwarves, deep elves, orcs, goblins, kobolds, or sometimes other humanoids. Duergar speak their own language, dwarven, and the gesture language of drow.

E

Eagle, Giant

No. Enc.: 1d6 (1d20)
 Alignment: Neutral
 Movement: 30' (10')
 Fly: 480' (120')
 Armor Class: 12
 Hit Dice: 4
 Attacks: 3 (2 claws, bite)
 Damage: 1d6/1d6/2d6
 Save: 16
 Morale: 8
 Hoard Type: XI, XXII (no coins)
 XP: 80

The grand, giant eagles have a 20' wingspan. They nest on large cliffs or other out of the way rocky areas. Their eyesight is so finely honed that during the day they are impossible to surprise. In addition to their normal claw and beak attacks, giant eagles may use a dive attack that deals 2d6 damage per claw, with no beak attack possible. They may instead opt to carry away prey, and can carry up to 200 lbs. at half their normal movement. When a nest is encountered there is a 60% chance that there are 1d4 young, otherwise there are a like number of eggs. Giant eagles are intelligent, and have a kind fondness for elves and dwarves.

Ear Seeker

No. Enc.: 1d4 (1d4)
 Alignment: Neutral
 Movement: 10' (3')
 Armor Class: 10
 Hit Dice: 1 hp
 Attacks: See below
 Damage: See below
 Save: 18
 Morale: N/A
 Hoard Type: None
 XP: 5

These small insect-like creatures spend most of their lives eating decaying wood and living in the bark of fallen trees or similar environments. However, at the end of their lives they seek a warm-blooded host to lay eggs. They will try to crawl into an orifice or cavity, such as the opening to the ears, where they deposit 1d8+8 eggs. The parent exits the body and dies. Meanwhile the eggs hatch in 4d6 hours and proceed to consume flesh. There is only a 10% chance of the host's survival. The spell cure disease may be used to rid a host of the parasites.

**Eel**

	<i>Electric</i>	<i>Giant</i>
No. Enc.:	1d3 (1d3)	1d4 (1d4)

Sea

No. Enc.: 1d6x10
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 11
 Hit Dice: 1 – 1
 Attacks: 1 (bite)
 Damage: 1
 Save: 18
 Morale: 7
 Hoard Type: X, XII, XIII
 XP: 6

Eels are aquatic creatures that usually only attack when provoked.

Electric: Once per turn an electric eel may emit an electrical discharge in a 15' radius. The attack deals 3d8 damage to all beings within 5', and 2d8 to those between 5' and 10', and 1d8 beyond that to the maximum range. These eels are 9' long.

Giant: This giant 20' long cousin to normal eels lack an electrical attack.

Sea: These 6' long eels have bodies shaped like sea weed. They live in large colonies, inhabiting small networks of tunnels (6" or 8" in diameter) with open access to water. They have larger chambers deeper in rock, which they decorate with shiny riches. These eels attack with a poisonous bite that deals only 1 hp damage, but victims must save versus poison or die.

Efreeti

No. Enc.: 1 (1)
 Alignment: Chaotic
 Movement: 90' (30')
 Fly: 240' (80')
 Armor Class: 16
 Hit Dice: 10
 Attacks: 1
 Damage: 2d8
 Save: 9
 Morale: 12
 Hoard Type: None
 XP: 4,500

Although they look like giant, demonic beings, efreet are actually an intelligent kind of fire elemental. They may only be affected by magic and magical weapons. Efreet have several spell-like abilities, and they can use each of them 3 times a day. They have four creation abilities, including create food and water (cast as a cleric of 7th level), create temporary objects of metal (the softer the metal the longer it lasts, gold lasts 24 hours while iron lasts 1 round, and 100 lbs maximum), create permanent goods (items made of wood, rope, and other kinds of softer goods of 100 lbs maximum), and create illusion (as phantasmal force, but the effect is permanent until touched or dispelled). Efreet can also make themselves invisible and make a wall of fire. They can become a flame pillar that inflicts 1d8 hit points of damage, and ignites combustible materials that are within 5'. This form may only be maintained by an efreeti for 3 rounds.

Efreet resent being summoned, and though they must serve for 101 days when properly compelled, they will attempt to twist the meaning of their orders and obey them to the letter. Efreet are enemies of Djinn, and will try to destroy them when encountered.

Elementals are living beings made up of one of the four primary elements. They may be summoned in three different ways, and any time an elemental is summoned the summoner must spend complete concentration directing the elemental. Elementals will leave when dispelled, destroyed, or ordered to by the summoner. If the summoner stops concentrating or loses concentration due to being struck or taking other actions, the elemental will attack him and anyone in-between it and the summoner. Only magic and magical weapons can harm elementals.

There are three different power levels of elementals, and the type present will be determined by the means used to summon them. Any elemental summoned with a staff is the weakest of the three, having AC 2, HD 8, and DG 1d8. Any elemental summoned with other miscellaneous magic items has AC 0, HD 12, and DG 2d8. Elementals summoned with a spell have AC -2, HD 16, and DG 3d8.

Air Elementals: For every hit die possessed by an air elemental, it will have a diameter of ½' and be 2' high. For instance, an air elemental summoned by a spell would be 32' high and have a diameter of 8'. Their appearance is that of a twirling air mass. If a being of fewer than 2 HD is caught in the twirling mass, it is carried away, barring a successful saving throw versus death. Any aerial victim will suffer an extra 1d8 hit points of damage from an air elemental.

Earth Elementals: For every hit die possessed by an earth elemental, it will be 1' high. For instance, an earth elemental summoned by a spell would be 16' high. Their appearance is that of a giant humanoid made of earth. Any victim standing on the ground will suffer an extra 1d8 hit points of damage from earth elementals. Earth elementals are unable to move through water that has a width greater than an elemental's height.

Fire Elementals: For every hit die possessed by a fire elemental, it will have a diameter of 1' and be 1' high. For instance, a fire elemental summoned by a spell would be 16' high and have a 16' diameter. Their appearance is that of a giant pillar of flame. Any victim that uses cold-based attacks will suffer an extra 1d8 hit points of damage from fire elementals. Fire elementals are unable to move through water that has a width greater than an elemental's diameter.

Water Elementals: For every hit die possessed by a water elemental, it will have a diameter of 2' and be ½' high. For instance, a water elemental summoned by a spell would be 8' high and have a 32' diameter. Their appearance is that of a

large mass of watery waves. Any victim that is standing in, or submerged in, water suffers an extra 1d8 hit points of damage from water elementals. Water elementals may not be further than 60' from a source of water.

Elephant

No. Enc.:	0 (1d20)
Alignment:	Neutral
Movement:	120' (40')
Armor Class:	14
Hit Dice:	9
Attacks:	2 or 1 (2 tusks or trample)
Damage:	2d4/2d4 or 4d8
Save:	10
Morale:	8
Hoard Type:	None
XP:	2,400

Massive herbivores of tropical lands, elephants are unpredictable creatures, but nevertheless are sometimes used as mounts or beasts of burden. If elephants have enough distance between them and a foe, they will commit to a charge to score double damage with their tusks. When in close combat, they may attempt to attack with tusks or attempt to trample, preferring to trample with a roll of 1-3 on 1d4. Elephants have a +4 to their attack roll when attempting to trample an opponent that is smaller or approximately equal to the size of a human. Although elephants do not keep treasure, the ivory from tusks is valuable and each tusk is worth 1d6x100 gp.

Elf

No. Enc.:	1d4 (2d12)
Alignment:	Neutral
Movement:	120' (40')
Armor Class:	15
Hit Dice:	1 + 1
Attacks:	1 (weapon)
Damage:	1d8 or weapon
Save:	17
Morale:	8
Hoard Type:	XVIII
XP:	15

This monster listing is for the typical NPC elf. Elves average 5 feet tall and are slight of build. They prefer colorful clothes, usually with a green-and-gray cloak that blends well with the colors of the forest. When encountered in a group of 20 or more, one leader will be present, whose level will be determined by rolling 1d6+1. This leader may possess items of magic, with a probability equal to 5% per level of the leader per type of magic item. In the presence of a leader, elves have morale of 10 rather than 8.

Elf, Deep

No. Enc.:	1d10 (4d12)
Alignment:	Neutral (evil)
Movement:	120' (40')
Armor Class:	14
Hit Dice:	1
Attacks:	1 (weapon)
Damage:	As weapon
Save:	17
Morale:	7
Hoard Type:	XX
XP:	10

Deep elves are a degenerate race of subterranean elves, and are all albinos. It is said they followed an evolutionary path of savagery, as opposed to drow which retained sophisticated culture. They have 90' infravision, and suffer -2 to hit when in sunlight or other bright light. In a village there will be a leader that is a 3rd level fighter with 12 hp. In addition, there will be a 1st level magic-user. Deep elves are hated enemies of morlocks, and constantly war with them for territory. Deep elves are sometimes enslaved by drow, and horribly abused by them because they are viewed as weak and inferior.

Elf, Drow

No. Enc.: 2d4 (5d10)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 15
 Hit Dice: 2
 Attacks: 1 or 2 (weapon)
 Damage: As weapon
 Save: 16
 Morale: 10
 Hoard Type: V x 5, XI x 2
 XP: 38

Also known as dark elves, drow are a depraved and evil demon-worshipping subterranean offshoot. White is the most common hair color among drow, with ebony skin and eyes a vivid red.

Like other elves, they tend to be 5' tall and slight of build. They have 120' infravision, and if abruptly exposed to light are blinded for 1 round. In addition, when in bright light including sunlight they suffer -2 to hit and -2 to DEX. Drow have keen hearing and are surprised only on 1 on 1d8; they always move silently with 90% efficiency. Drow typically attack with short swords or afar with darts which are coated with poison. Victims must save versus poison at -4 or fall unconscious for 1d4 turns. Drow can use the following spell-like abilities once per day: dancing lights, darkness, and faerie fire. All drow save versus magical effects with a +2. In addition, drow of 4th level or higher have the following spell-like abilities once per day: detect magic, know alignment, and levitate. Finally, female drow are more powerful than males, and once per day have the abilities of clairvoyance, detect lie, dispel magic, and suggestion. In a group of 10 or more, a male 3rd level fighter will be present.

In a group of 20 or more, a female cleric/fighter of 6th level will be present. If more than 30 are encountered, a female cleric/fighter of 7th or 8th level will be present, and a male fighter/magic-user of 4th or 5th level will be present. There is a 5% chance per level that a drow has a magic item.

Ettin

No. Enc.: 1d2 (1d4)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 16
 Hit Dice: 10
 Attacks: 2 (club, club)
 Damage: 2d8/3d6
 Save: 12
 Morale: 9
 Hoard Type: XIX
 XP: 1,700

Ettins are dirty creatures that wear tattered skins and often use wicked weapons, such as barbed clubs. They share some affinity to orcs, witnessed in their pig-like faces. Ettins are large, nocturnal creatures that live below ground. They have two heads, each of which controls one arm. The right side is slightly dominant, and can cause 3d6 damage whereas the left can inflict 2d8. Ettins are seldom surprised (1 on 1d6) because one head or the other is usually keeping watch.

Eye, Floating

No. Enc.: 1d12 (1d12)
 Alignment: Neutral
 Movement: 300' (100')
 Armor Class: 10
 Hit Dice: 1d4 hp
 Attacks: 0
 Damage: 0
 Save: 18
 Morale: 6
 Hoard Type: None
 XP: 6

These bizarre fish are 1' long and transparent except for their single large eye. Creatures looking at the eye must succeed in a saving throw versus paralyzation or be hypnotized (stunned) and unable to move. There are always large aquatic predators

near floating eyes, ready to attack the prey. The floating eyes then feed on fallen morsels.

Eye of the Deep

No. Enc.: 1 (1)
 Alignment: Chaotic
 Movement: 60' (20')
 Armor Class: 14
 Hit Dice: 10-12
 Attacks: 3 (2 claws, bite)
 Damage: 2d4/2d4/1d6
 Save: 10
 Morale: 8
 Hoard Type: X
 XP: 3,800

These aggressive, evil intentioned creatures have the bodies of 5' wide orbs dominated by a central eye and large serrated mouth. The eye of the deep is thought to be a distant relative of the eye of terror, for its appearance is that of said creature. Hundreds of small seaweed-like bristles hang from the bottom of its body. Two large crab-like pincers protrude from its body, and two long, thin eyestalks sprout from the top of its orb. Eyes of the deep are typically found only in the deepest parts of the ocean, where they float slowly, searching for prey. They attack using eye rays, and then they grasp an opponent with pincer-like claws and subject victims to a bite attack. Each of the creature's eye stalks can produce a magical ray once per round. The creature can aim both of its eye rays in any direction. The eyes have the following powers:

Hold Person: Left eye—the target must succeed on a saving throw versus spells or be affected as though by the spell. An eye of the deep will use this ray early in a fight so as to disable its opponents.

Hold Monster: Right eye—the target must succeed on saving throw versus spells or be affected. This is used in the same manner as the hold person ray.

Phantasmal Force: By combining the rays of both eyes, the eye of the deep can replicate the spell phantasmal force.

Stun: An eye of the deep's central eye can, once per round, produce a cone of stunning energy extending straight ahead from its front to a range of 30', with a 20' diameter at the terminal end. Creatures in the area must succeed on a saving throw roll versus paralyze or be stunned for 2d4 rounds.

Eye, Tentacled

No. Enc.: 1 (1)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 15 (tentacles 14)
 Hit Dice: 14-16
 Attacks: 8 or 1 (tentacles or bite)
 Damage: 1d8 per tentacle or 2d6
 Save: 10
 Morale: 10
 Hoard Type: VII, IX, XIV
 XP: 4,200

Sages believe the tentacled eye is a very distant relative of the horrible eye of terror. These creatures have 15' wide orb-like bodies, a large tooth-filled mouth, and three elephantine legs. Their bodies are covered with eyes, and they may not be surprised. They have a disturbingly incongruent canine-like nose, and eight octopus-like tentacles. Tentacled eyes may attack any single opponent with 4 tentacles at a time, and may divide attacks so that they can attack up to 8 opponents, one for each tentacle, each round. Each tentacle is massive and deals 1d8 crushing damage. A successful hit means the victim is entangled and will suffer an additional 1d8 damage per round until either the tentacle is severed or the creature is killed.

Tentacles may be attacked individually, and have an AC of 5 and 2d6+4 hp. A tentacle regenerates in 2d4 days. Creatures being constricted attack with a -2 penalty to hit. The tentacled eye may also pull constricted creatures toward its mouth, where it

bites for 2d6 hp damage. Victims must succeed in a saving throw versus poison or become living husks with dead brains, waiting to be completely devoured. Curative spells cannot cure this condition, but if a victim is fully dead a raise dead or resurrection spell will revive him normally.

Eye of Terror

No. Enc.: 1 (1)
 Alignment: Chaotic
 Movement: 60' (20')
 Armor Class: 19 (body), 17 (central eye), 16 (eye stalks)
 Hit Dice: 10-12
 Attacks: 3 (2 tentacles, bite)
 Damage: 1d6/1d6/2d4
 Save: 8
 Morale: 9
 Hoard Type: VII, IX, XIV
 XP: 7,300

These highly intelligent cave or labyrinth dwelling evil cousins to eyes of the deep likewise have the bodies of 5' wide orbs dominated by a central eye and large serrated mouth. However, rather than bristles, hundreds of small tentacles hang from the bottom of its body. Instead of pinchers, eyes of terror have two 3' long tentacles ending in a spiked squid-like sucker appendage that can grasp like a hand. These appendages can slap opponents for 1d6 hp damage, and victims must save versus poison or die. The eye of terror moves around with a permanently active form of levitation. The central eye possesses 30% of the creature's total hp and has an independent AC of 2. Each eyestalk has AC 3 and 1d6+8 hp. Destroyed eyestalks regenerate in seven days. In addition to the central eye, each of the eye of terror's eight eyestalks have a special power. Note that these creatures may use four eyestalks and the central eye at the same time against opponents directly in front of the eye of terror. If there are additional attackers from other directions, other eyes may be employed against them as well. The eyes have the following powers:

Central Eye: Flesh to stone cone ray, 30' long and 20' diameter at the terminal end.
 Eye 1: Slow as the spell
 Eye 2: Polymorph other as the spell
 Eye 3: Hold monster as the spell
 Eye 4: Sleep as the spell
 Eye 5: Hold person as the spell
 Eye 6: Stun ray, 40' long, as the power word, stun spell
 Eye 7: Telekinesis as the spell
 Eye 8: Feeblemind as the spell

F

Ferret, Giant

No. Enc.: 1d8 (1d12)
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 14
 Hit Dice: 1 + 1
 Attacks: 1 (bite)
 Damage: 1d8
 Save: 18
 Morale: 8
 Hoard Type: None
 XP: 15

Giant ferrets are much like their smaller kin, but average 3' long. They are often trained to hunt giant vermin, but their temperamental personalities make them dangerous, as they occasionally turn on their masters.

Fish, Giant

	Catfish	Piranha
No. Enc.:	0 (1d2)	0 (2d4)
Alignment:	Neutral	Neutral
Movement:	-	-

Giant Catfish: These scaleless, ash-colored fish are both predators and scavengers. They can attack with their whisker-like feelers and a bite. The giant catfish reaches a length of about 15'.

Giant Piranha: These giant fish live in warm, moving water, and can reach a length of 5'. They will attack nearly anything that moves, and if blood is scented they will feed at a feverish pace, never having to check for morale. Note that as many as 8 giant piranhas may attack a single victim at a time.

Giant Rockfish: These giant fish are passive but deadly. They closely resemble the rocky sea surface that they call home, and blend in well since there is only a 30% chance that an observer will recognize the fish is present. The giant rockfish will attack if threatened, and its deadly spines are also poisonous, requiring a saving throw versus poison, or the victim dies. Should a being touch a rockfish due to mistaking it for its surroundings, it is struck by all four spines with no attack roll required.

Giant Sturgeon: These immense gray scaly fish can reach a length of 30'. If their attack roll is equal to or greater than 18, a victim is swallowed. A being that is swallowed takes 2d6 hit points of damage per round inside the giant sturgeon's belly. In addition, if a victim does not succeed in a saving throw versus paralyze, he is paralyzed. Otherwise, he may attack the sturgeon from the inside with a -4 to the attack roll versus an effective AC 7.

Flightless Bird

No. Enc.: 2d10 (2d10)
 Alignment: Neutral
 Movement: 180' (60')
 Armor Class: 12
 Hit Dice: 1-3
 Attacks: 1 (bite or claws)
 Damage: 1d4 or 2d4
 Save: 17
 Morale: 8
 Hoard Type: None
 XP: 10, 20, 50

This category of animal includes large flightless birds ranging in size from the smallest, the rhea, to the emu, and to the largest, the ostrich (with correspondingly higher HD).

Fly, Giant Carnivorous

No. Enc.: 1d6 (2d6)
 Alignment: Neutral
 Movement: 90' (30')
 Fly: 180' (60')
 Armor Class: 13
 Hit Dice: 2
 Attacks: 1 (bite)
 Damage: 1d8
 Save: 18
 Morale: 8
 Hoard Type: VI
 XP: 29

The dreaded giant carnivorous fly is 3' long. They have markings that make them appear similar to giant killer bees. The giant carnivorous fly preys upon these bees, and is immune to their poisonous sting. However, they also prey upon animals and humanoids. These giant flies skulk in shadows, waiting for victims, and surprise on 1-4 on 1d6. These carnivorous flies sometimes jump to a distance of 30' to attack. They attack by biting victims with their formidable mandibles.

Frog, Giant

	<i>Giant</i>	<i>Killer</i>
No. Enc.:	5d8 (5d8)	3d6

 Armor Class: 11
 Hit Dice: 1
 Attacks: 1
 Damage: 1
 Save: 18
 Morale: 7
 Hoard Type: None
 XP: 13

Giant: Giant frogs inhabit swamps, rivers, lakes, ponds or other bodies of water. Three different sizes are categorized here, 2' long and 50 lbs. (1 HD), 4' long and 150 lbs (2 HD), and 6' long and 250 lbs (3 HD). Much like their giant toad cousins, giant frogs blend into their environment, surprising opponents on 1-4 on 1d6. Giant frogs can leap 180' (60') and attack the same round. They often attack by extending their immensely long tongues that are three times as long as their bodies, to strike with +4 on the attack roll. If the victim fails to attack the tongue before the next round, he is drawn to the mouth of the frog and bitten for an amount of damage dependent on the frog's size. If the victim weighs more than the frog but not twice as much, he may attack the tongue an additional time before being dragged. Victims weighing more than twice the weight of the frog are not dragged. In addition to these attacks, giant frogs have a swallow attack, and are able to swallow human-sized opponents or smaller. Swallowed creatures suffer 1d6 damage from digestion per round.

Killer: Killer frogs are 2' long and attack with vicious claws and a bite. They crave human flesh, and attack with no provocation.

Poisonous: These 1' long frogs are not aggressive, but attack if provoked. Its bite is poisonous, as is its skin from merely a touch. Victims exposed to the poison must save versus poison with a +4 bonus or die.

Fungi, Violet

No. Enc.: 1d4 (1d4)
 Alignment: Neutral
 Movement: 10' (3')
 Armor Class: 12
 Hit Dice: 3
 Attacks: 1-4
 Damage: See below
 Save: 15
 Morale: 8
 Hoard Type: None
 XP: 80

Violet fungi are 4' to 7' tall, resemble shriekers, and are often found growing among them. A violet fungi's coloration ranges from purple overall to dull gray or violet covered with purple spots. A violet fungus flails about with its 1d4 tentacles at living creatures that come within its reach of 1' to 4' per tentacle. The tentacles ooze a rot-inducing slime, causing a victim to save versus poison or after one round rot into a corpse. If the spell cure disease is cast on the round immediately after the attack, the effect is avoided.

G

Gargoyle

No. Enc.: 1d6 (2d4)
 Alignment: Chaotic
 Movement: 90' (30')
 Fly: 150' (50')
 Armor Class: 14
 Hit Dice: 4
 Attacks: 4 (2 claws, bite, horn)
 Damage: 1d3/1d3/1d6/1d4
 Save: 15
 Morale: 11
 Hoard Type: XX
 XP: 500

Gargoyles are demonic-appearing beasts that are magical in nature, and may only be harmed by enchanted weapons or magic. They have large bat-like wings, horns, fangs, fearsome claws, and skin the color of gray stone. Although they are not greatly intelligent, they make up for this with the sly nature of efficient predators.

Gas Spore

No. Enc.: 1d3 (1d3)
 Alignment: Neutral
 Movement: 30' (10')
 Armor Class: 10
 Hit Dice: 1 hp
 Attacks: 1
 Damage: See below
 Save: 19
 Morale: 12
 Hoard Type: None
 XP: 6

From a distance greater than 10', the gas spore is 90% likely to be mistaken for an eye of terror. There is a 30% chance of mistaking the spore for an eye of terror even when up close. The gas spore is actually a fungus, and is not related to the eye of terror, but it resembles one most uncannily. When a gas spore contacts a living creature, it injects poisonous rhizomes into the foe and the gas spore drops dead. After just one round, the rhizomes grow in the whole victim's body. An infected creature dies in 24 hours and 2d4 gas spores emerge from its body. A cure disease spell cast on an affected creature before it dies destroys the rhizomes. If a gas spore is struck for a single point of damage, it explodes in a violent blast of gas that deals 6d6 points of damage to all creatures within a 30' radius. A successful save versus wands reduces the damage by half.

Gelatinous Cube

No. Enc.: 1 (0)
 Alignment: Neutral
 Movement: 60' (20')
 Armor Class: 11
 Hit Dice: 4
 Attacks: 1
 Damage: 2d4 + see below
 Save: 15
 Morale: 12
 Hoard Type: VII
 XP: 245

The nearly transparent gelatinous cube travels slowly along labyrinth corridors and cave floors, absorbing carrion, creatures, and trash. Inorganic material remains trapped and visible inside the cube's body. A typical gelatinous cube is 10 feet on a side, though much larger specimens are not unknown. The translucent appearance of the gelatinous cube makes characters surprised on a surprise check roll of 1-4 on 1d6. A gelatinous cube attacks by slamming its body into its prey to engulf foes. This attack deals 2d4 hit points of damage, and an opponent must succeed in a saving throw versus paralyze or become paralyzed for 2d4 turns. The spell cure light wounds causes a character to regain movement, but this use does not heal hit points with the same casting. Subsequent attacks against a paralyzed foe always hit. Gelatinous cubes are immune to the effects of lightning and cold-based attacks. They take normal damage from weapons and fire-based attacks.

Ghast

No. Enc.: 1d6 (1d6)
 Alignment: Chaotic
 Movement: 150' (50')
 Armor Class: 15
 Hit Dice: 4
 Attacks: 3 (2 claws, bite)
 Damage: 1d4/1d4/1d8
 Save: 16
 Morale: 9
 Hoard Type: VIII, IX, XI, XXI
 XP: 190

These despicable undead creatures resemble ghouls, and are often found with them. However, ghouls are much more powerful. Their bite induces paralysis for 2d4 turns unless a successful saving throw versus paralyze is made; this paralysis is potent even to elves. In addition, ghouls have a horrible rotting stench, and any beings within 10' must save versus poison or become horribly sick and vomiting, suffering -2 to hit in combat. Ghouls represent such a powerful evil that protection from evil is ineffective against them unless combined with powdered iron. Cold iron weapons deal twice normal damage against ghouls.

Ghoul

No. Enc.: 1d6 (2d8)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 13
 Hit Dice: 2 (turn as 3 HD)
 Attacks: 3 (2 claws, bite)
 Damage: 1d3/1d3/1d3 + see below
 Save: 17
 Morale: 9
 Hoard Type: XXI
 XP: 47

Formerly human, but now flesh-eating undead mockeries of their former existence, ghouls are fearsome enemies of all things living. Ghouls attack with claws and a vile bite. Any successful attack requires the opponent to attempt a saving throw versus paralyze, or become paralyzed for 2d4 turns. This paralysis may be cured with cure light wounds. Elves are immune to the paralysis of ghouls, and the paralysis cannot take effect on humanoids larger than ogres. Ghouls will attempt to paralyze all members of a group, so that they can feast on their

helpless bodies at leisure. All humans slain by ghouls rise again in 24 hours as ghouls, unless the spell bless is cast upon their bodies. Ghouls are turned on the Turning Undead Table as undead of 3 HD, but the amount turned is calculated normally for 2 HD undead.

Ghost

No. Enc.: 1 (1)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 19 (11)
 Hit Dice: 10
 Attacks: 1
 Damage: See below
 Save: 11
 Morale: 10
 Hoard Type: IX, XIX
 XP: 3,100

These incorporeal, ethereal beings are the animated spirits of horribly evil humans. In life their evil was so great as to attract otherworldly attention, and the powers preserved their being as ghosts after death. Ghosts are so terrifying that any being seeing one ages 10 years and flees as with a fear spell for 2d6 turns. A save versus spells negates the effect. The divine confidence belonging to clerics of 6th level or higher makes them immune. Beings of 8 HD or levels receive a +2 bonus to save. Ghosts usually attack via magic jar within a range of 60'. Ghosts may be attacked directly, whether physically or by spell, only by beings that are also ethereal or on the ethereal plane. If attacked on the ethereal plane ghosts have an AC of 8. A ghost may also partially materialize and attack a victim physically. A successful attack ages a victim by 1d4x10 years. Beings killed in this manner may not be reincarnated, raised or resurrected.

Hill Giant: In many ways hill giants resemble larger ogres, including having eyes rimmed with red and often wielding some bludgeoning weapon or a spear. They have skin of rust brown or tan, with similarly colored rust or black hair. They dress in animal skins and are 12' tall. Hill giants enjoy pillaging human villages.

Stone Giant: Stone giants are partially named for their stone-like complexions and iron colored eyes. Their hair is also dark-stone colored, sometimes with hints of blue. They are 14' tall. Whereas hill giants often use wooden clubs, stone giants prefer stone clubs and wear skins the color of stone. Stone giants can throw rocks to inflict 3d6 damage to a range of 300'. They keep guards (50% chance), which are typically bears (1d4 in number).

Frost Giant: Frost giants have the overall appearance of giant, 18' tall muscled barbarians. They have pale yellow or blue eyes, with white hair that can likewise be tinged with yellow or blue. Frost giants get their name for their love of the cold. They often live within frosty caverns, but have the propensity to take up residence in castles, as do some of their other giant kin. This love of the cold is reflected in the fact that frost giants are completely immune to ill effects from cold, including the bone-chilling breath of white dragons! Frost giants can throw rocks to inflict 3d6 damage to a range of 200'. They keep guards, which are usually (1-8 on 1d10) 6d6 wolves, or sometimes (9-10 on 1d10) 3d6 polar bears.

Fire Giant: Fire giants' hair is the red and orange color of flames, and their skin is soot black. Their teeth are flame orange, and their eyes red. They are 16' tall. They commonly wear armor on their broad shoulders. This armor is usually brass, bronze, copper, or sometimes made from the skin of red dragons. Fire giants live in castles or large structures made of stone or dense fire-hardened earth. Like most giants, fire giants delight in throwing rocks at enemies. They can hit a target from a distance of 200' to inflict 3d6 hit points of damage. When not throwing rocks, fire giants wield large swords. Fire giants are immune to fire-based attacks, including the fire breath of a red dragon. They keep guards, which are usually (1-8 on 1d10) 3d6 hellhounds, or sometimes (9-10 on 1d10) 1d3 hydras.

Cloud Giant: Cloud giants often dress in flowing clothing and fancy jewelry. They have bronze to white hair, with skin in tones of blue ranging from nearly white to cold, light blue. They are 20' tall. Cloud giants usually live in giant castles at high elevations. When not high up in the mountains, their castles exist on clouds given substance by magic. Their strong olfactory sense and sharp eyesight make them surprised on a roll of 1 on 1d6. Cloud giants keep various guards, and if the giants are living on clouds the guards will be giant hawks (3d6 in number). If living in castles on mountains, the guards will be dire wolves (6d6 in number). Although they often wield clubs, all cloud giants can throw rocks to inflict 3d6 damage to a range of 200'.

Storm Giant: There are two typical appearances of storm giants, which are related to their preference for environment. Those who choose to live under water are often of green hair, eyes and skin, while those above water have purple skin, eyes either purple or cloud gray, and blue-tinted black hair. Both kinds are 22' tall. Storm giants are the most formidable of all giants. They live in remote locations; about 60% of the time they live on clouds like their cloud giant cousins, and 30% of the time in the mountains like their stone giant relatives. Somewhat more rarely, 10% of the time storm giants choose to live underwater. In all cases, they live in immense, luxurious castles. Like most other giants, storm giants keep guards, and if living above water will have 2d4 griffons. However, storm giants who have their castle abodes under water will instead have giant crabs (3d6 in number). Storm giants have the ability to summon thunderstorms that will arrive after 1 turn. In the presence of a thunderstorm, a storm giant is able to cast a lightning bolt 1 time per 5 rounds. The hit point damage inflicted is equal to the storm giant's current hit point total, and a saving throw versus spells can reduce this damage by 50%. Storm giants are immune to all forms of lightning, even the lightning breath attack of blue dragons.

Gnoll

No. Enc.: 1d6 (3d6)
Alignment: Chaotic
Movement: 90' (30')
Armor Class: 14
Hit Dice: 2
Attacks: 1 (weapon)
Damage: 2d4 or weapon +1
Save: 17
Morale: 8
Hoard Type: XIX
XP: 47

Gnolls are hyena-headed, dark humanoids that wander in loose tribes. Most gnolls have dirty yellow or reddish-brown fur. A

gnoll is a nocturnal carnivore, preferring intelligent creatures for food because they scream more, though gnolls themselves are not particularly intelligent. Gnolls use a variety of weapons, and receive a +1 to damage due to their high strength. In any group of 20 gnolls, there is a leader who has 16 hit points and is considered to have 3 HD for attack purposes.

Gnome

No. Enc.: 1d8 (5d8)
Alignment: Lawful, Neutral
Movement: 60' (20')
Armor Class: 14
Hit Dice: 1
Attacks: 1 (weapon)
Damage: 1d6 or weapon
Save: 17
Morale: 8
Hoard Type: XX
XP: 10

Gnomes stand 3' to 3 ½' tall and are slighter of build than dwarves. Their skin color ranges from dark tan to woody brown, their hair is fair, noses large, and their eyes can be any shade of blue. Gnome males prefer long beards. Gnomes generally wear leather or earth tones, though they decorate their clothes with intricate stitching or fine jewelry. These cousins to dwarves share many of their likes, and often live in vast mines looking for precious metals and gems. Their tendency to underground life has granted them extended infravision to 90'. They have a fondness for contraptions, and often employ crossbows and fight hand-to-hand with war hammers. Gnomes have a particular hatred for kobolds, but are none too fond of goblins. Dwarves, however, are treated as welcome relatives.

In any group of 20 gnomes there is a leader who has 11 hit points. This leader attacks with an attack value of a monster with 2 HD. Gnomes are ruled by a grand chief, who is considered as a monster of 4 HD, and has 18 hit points. A grand chief is a particularly strong gnome, and receives a +1 bonus to all damage dealt. These chiefs have a small contingent of 1d6 bodyguards, who are considered to attack as monsters of 3 HD and each has 1d4 +9 hit points. When in the presence of the grand chief, all gnomes have an effective morale of 10.

Goblin

No. Enc.: 2d4 (6d10)
Alignment: Chaotic
Movement: 60' (20')
Armor Class: 13
Hit Dice: 1 - 1
Attacks: 1 (weapon)
Damage: 1d6 or weapon
Save: 18
Morale: 7
Hoard Type: III (XX)
XP: 5

A goblin stands 3' to 3 ½' tall. Its eyes are usually dull and glazed, varying in color from red to yellow. Their eyes sometimes flicker red in the dark. A goblin's skin color ranges from yellow through any shade of orange to a deep red; usually all members of a single tribe are about the same color. Goblins wear clothing of dark leather, tending toward drab, soiled-looking colors. They spend most of their days underground, and as such suffer a -1 penalty to all attack rolls when in full sunlight. They have a longer range of infravision, to 90'. Goblins are archenemies of dwarves, who they hate above all other humanoids, followed closely by their distaste for gnomes.

Goblins often use dire wolves as mounts, and 25% of their number will be mounted 20% of the time. A goblin king is an exceptional goblin, who attacks like a monster of 3 HD, and all damage dealt receives a bonus of +1. A goblin king is always accompanied by a loyal bodyguard, totaling 2d6 individuals. The bodyguards each have 2d6 hit points, and attack as monsters with 2 HD. All goblins in the presence of the goblin king have a

morale score of 9. The goblin lair always has more treasure (Hoard Type XX), and there is equally more treasure when encountering goblins in the wilderness.

Golems are magically created automatons of great power. Constructing one involves the employment of mighty magic. As such, they are created by exceptionally powerful clerics and magic-users. The examples provided here are just a few of the possible kinds. The GM may design new forms using the examples as guidelines. All golems are unaffected by ordinary weapons. In addition, golems have no true intelligence, and are thus unaffected by hold, charm, or sleep spells. Since they are not truly alive, they are unaffected by poison or gases.

Amber Golem: These golems are made of petrified tree sap, and this golden stone is commonly formed into the shape of dire wolves or large cats. They have the ability to detect invisibility to a range of 60', and are able to track any being.

Bone Golem: Though they may be mistaken for undead, these human-sized constructs of bones are animated golems. These golems are usually given four arms, and each may wield a weapon to attack every round. They may direct attacks at up to two opponents each round. In addition to ordinary immunities enjoyed by golems, bone golems are unaffected by electrical,

fire, or cold-based attacks.

Bronze Golem: These giant humanoids are made of bronze, and have molten metal inside them. Powerful fists deal 3d10 hp damage. The touch of a bronze golem inflicts 1d10 hp damage, from intense heat. When a bladed weapon strikes this golem, the attacker suffers 2d6 hp of damage as some of the molten metal inside it gushes forth. A saving throw versus death can be made to avoid this damage entirely.

Wood Golem: Wood golems are about the size of halflings, and are shaped from wood. They are clumsy and suffer -1 to initiative. These golems are particularly susceptible to fire-based attacks, and make saving throws with a penalty of -2. In addition, for fire-based attacks they take 1 more point of damage per damage die rolled.

Clay Golem: These golems are constructed from clay, and are usually humanoids approximately 8' tall. Their powerful fists deal 3d10 damage, which can only be magically healed by a cleric of at least 17th level. Sharp weapons are ineffective against clay golems. Only blunt magical weapons cause damage. Further, only the following spells affect clay golems: disintegrate acts as a slow spell, and deals only 1d12 hp damage; earthquake cast on the golem halts it in its tracks for one turn and deals 5d10 hp damage; move earth pushes a clay golem backwards by 120' and deals 3d12 hp damage.

Flesh Golem: A flesh golem is not an undead creature, though it is sometimes mistaken for one since it is typically cobbled together from various deceased humanoid body parts. Flesh golems are immensely powerful, and can automatically break down most doors. They are able to deal 1 shp of damage to a reinforced door or structure for every 3 rounds of attacking it. Ordinary weapons of any kind are ineffective against flesh golems. Likewise, all spells are ineffective except heat and cold-based spells, which act to slow flesh golems for 2d6 rounds. However, all electrical-based attacks actually repair damage to flesh golems at a rate of 1 hp per 1 HD of damage that would otherwise have been afflicted.

Iron Golem: These 12' tall iron beings are immensely powerful, and can deal 1 shp of damage per round. In addition to smashing with powerful fists, these golems have a poisonous gas breathe attack that affects a 10' cubed area in front of the golem. Creatures within the area must save versus poison or die. Only weapons at least +3 or better can damage iron golems. Spells are ineffective, except for lightning bolt, which acts to slow the golem for 3 rounds. Fire-based magical attacks actually repair damage to an iron golem at the rate of 1 hp per 1 hp damage that would otherwise have been inflicted.

Stone Golem: Stone golems have powerful fists that can deal 1 shp every other round. In addition, stone golems can cast slow at an opponent within 10' every other round. Only weapons at least +2 or better can damage stone golems. Spells are ineffective, except for rock to mud, which acts to slow the golem for 2d6 rounds. Mud to rock repairs all damage a stone golem has suffered. If stone to flesh is cast on the golem, it becomes susceptible to all normal attacks for 1 full round.

Gorgon

No. Enc.:	1d2 (1d4)
Alignment:	Chaotic
Movement:	120' (40')
Armor Class:	17
Hit Dice:	8
Attacks:	1 (gore or breath)
Damage:	2d6 or petrify
Save:	11
Morale:	8
Hoard Type:	XVIII
XP:	1,060

The gorgon resembles a large bull with red scales. A typical gorgon stands over 6 feet tall at the shoulder and measures 8 feet from snout to tail. It weighs about 4,000 pounds. Gorgons are nothing if not aggressive. They attack opponents on sight, attempting to gore or petrify them. If a gorgon gets a running

start to charge it may gore with its horns for double damage. Gorgons have a breath attack that is a gas cloud 10' wide and 60' long. Any creature caught in this cloud must succeed in a saving throw versus petrify or turn to stone. A gorgon is unaffected by its own breath attack. Gorgons live on hills and prairies.

Morale: 12
Hoard Type: None
XP: 80

Gray ooze can grow to a diameter of up to 10 feet, and a thickness of about 6 inches. It resembles damp stone so closely that it can be mistaken for that easily. A gray ooze strikes like a snake, slamming opponents with its body. A successful strike to an unarmored being deals 2d8 hit points of damage from the acidic slime that covers it. If an opponent is armored, whether the armor is magical or non-magical, it is destroyed 1 turn after a successful hit from the ooze, as the acid eats through it viciously. In either case, the ooze clings to an opponent and once armor is no longer a barrier the resilient acid continues to deal 2d8 hit points of damage every round until it can be neutralized. Gray ooze is immune to the effects of fire-based and cold-based attacks. They take normal damage from lightning and weapons.

Gray Worm

No. Enc.: 1d3 (1d3)
Alignment: Neutral
Movement: 60' (20')
Armor Class: 13
Hit Dice: 6
Attacks: 1 (bite)
Damage: 1d8
Save: 14
Morale: 9
Hoard Type: XXI
XP: 570

These large, 30' long gray worms attack with wide tooth-rimmed mouths. Gray worms are able to swallow prey whole (swallow attack) on an attack roll of 19 or 20. Any opponent who is swallowed whole suffers 1d8 hit points of damage every round, and this continues until either the gray worm is killed or until the opponent dies. The cramped quarters inside the belly of the worm prevent attack from the inside by any weapon except a dagger. Attacking a gray worm from inside its belly is difficult, and the attacker suffers a -4 penalty.

Green Slime

No. Enc.: 1 (0)
Alignment: Neutral
Movement: 3' (1')
Armor Class: NA, no roll needed
Hit Dice: 2
Attacks: 1
Damage: See below
Save: 18
Morale: 12
Hoard Type: None
XP: 38

This animate, viscous green slime feeds on plants, animals, and metals, including weapons and armor, but does not digest stone. Green slime senses movements through subtle vibrations, and will drop from high places onto victims to feed, or will cling to an opponent who steps on it. Once covering a victim, green slime will digest all clothing and armor in 6 rounds. The slime feeds so quickly that after this period, in only 1d4

rounds after contacting an animal's (or character's!) bare skin, the slime will completely digest it, creating more slime in its place. No magical revival is possible for a victim as nothing material of the victim remains. Green slime is impervious to most attacks, but is susceptible to fire. The slime clings in such a way to make scraping it off ineffective. Note that if green slime is burned while it is on a character, the damage from the fire is divided evenly between the slime and the character. Green slime is killed instantly by a cure disease spell.

Griffon

No. Enc.: 0 (2d8)
Alignment: Neutral
Movement: 120' (40')
Fly: 360' (120')
Armor Class: 14
Hit Dice: 7
Attacks: 3 (2 claws, bite)
Damage: 1d4/1d4/2d8
Save: 12
Morale: 8
Hoard Type: XVIII
XP: 440

Griffons are powerful, majestic creatures with the characteristics of both lions and eagles. From nose to tail, an adult griffon can measure as much as 8 feet. Neither males nor females are endowed with a mane. While their rear body is that of a lion, their front legs, head, and wings are from a giant eagle. The broad, golden wings emerge from the creature's back and span 25' or more. A griffon weighs about 500 pounds. Griffons are fierce hunters with a taste for horse flesh. If a horse is within 120' of a griffon, the griffon will automatically attack if it fails a morale check. Griffons are intensely protective of their young, and will attack any being that comes near. Griffon eggs or young may be captured to be raised and trained as mounts.

Groaning Spirit (Banshee)

No. Enc.: 1 (1)
Alignment: Chaotic
Movement: 150' (50')
Armor Class: 19
Hit Dice: 7
Attacks: 1
Damage: 1d8
Save: 12
Morale: 10
Hoard Type: XXII
XP: 1,490

This translucent figure resembles a beautiful elven female with delicate features. The groaning spirit is the malevolent spirit of a female elf that is found haunting swamps, fens, moors, and other desolate places. Groaning spirits hate the living and seek to destroy whomever they meet. A groaning spirit appears as a translucent image of her former self. A groaning spirit's primary attack is her keening, which may be employed 1 time per 24 hours, but only at night. Any being within 30' when the spirit keens must save versus spells or die. If a creature survives the keening attack, the groaning spirit attacks with her incorporeal chill touch. The chill touch deals 1d8 cold damage. Further, just the sight of a groaning spirit requires a successful save versus spells or the observer is affected with fear. Since these creatures are undead, they are immune to sleep and charm related magic. Groaning spirits are susceptible to exorcism, which destroys them.

H

Halfling

No. Enc.: 3d6 (5d8)
 Alignment: Lawful
 Movement: 90' (30')
 Armor Class: 12
 Hit Dice: 1 - 1
 Attacks: 1 (weapon)
 Damage: 1d6 or weapon
 Save: 16
 Morale: 7
 Hoard Type: VII (XXI)
 XP: 5

This monster listing is for the typical NPC halfling. Halflings stand about 3 feet tall. They have brown or black eyes. Halfling men often have long sideburns, but beards are rare among them and mustaches almost unseen. Halflings prefer simple, comfortable, and practical clothes. Unlike members of most races, they prefer actual comfort to shows of wealth. Typical halfling villages may have a population as small as 30 and up to 300 (3 x 1d10 x 10).

Every village has one leader, whose level will be determined by rolling 1d6+1. A village will also have a militia consisting of 5d4 individuals of 2 HD each. The Hoard Type XXI represents the amount of treasure present if encountering halflings in the wilderness.

Harpy

No. Enc.: 1d6 (2d4)
 Alignment: Chaotic
 Movement: 60' (20')
 Fly: 150' (50')
 Armor Class: 12
 Hit Dice: 3
 Attacks: 3 (2 claws, weapon, see below)
 Damage: 1d4/1d4/1d6, see below
 Save: 16
 Morale: 7
 Hoard Type: XX
 XP: 80

From the waist up these monsters resemble unsightly women, and they have the legs and wings of giant eagles. Harpies like to entrance hapless travelers with their magical songs and lead them to unspeakable torments. If a character hears this magical song, a saving throw versus spells may be attempted, and failure indicates the victim has been charmed. A successful saving throw grants the character immunity to the effects of the song for the rest of the encounter. Any being under the charm of a harpy will attempt to move close to them, and will not make any attacks. Only when a harpy has finished playing with its new "toys" will it release them from suffering by killing and consuming them. Harpies have an innate magic resistance, and a +2 saving throw bonus on all save rolls.

Hawk

	<i>Ordinary</i>	<i>Giant</i>
No. Enc.:	0 (1d6)	0 (1d3)
Alignment:	Neutral	Neutral
Movement:		
Fly:	480' (160')	450' (150')
Armor Class:	11	13
Hit Dice:	1d4 hit points	3 + 3
Attacks:	1	1
Damage:	1d2	1d6
Save:	18	16
Morale:	7	8
Hoard Type:	None	None
XP:	5	65

These predatory birds often glide through the air watching for prey on the ground. They attack, initially, with a swoop that

inflicts double damage if the opponent is surprised.

Ordinary Hawks: These creatures are similar to eagles but slightly smaller: 1 to 2 feet long, with wingspans of 6 feet or less.

Giant Hawks: Giant hawks may be 3 to 5 feet long, and are capable of attacking larger prey of roughly human-sized or smaller. Any being as small as a halfling may be grabbed and taken away.

Hell Hound

No. Enc.: 2d4 (2d4)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 15
 Hit Dice: 3 to 7
 Attacks: 1 (bite or breath)
 Damage: 1d6 or see below
 Save: 16 to 12
 Morale: 9
 Hoard Type: XX
 XP: 80/190/500/820/1,140

Hell hounds are sly and intelligent. They are roughly the size of dire wolves, with red to red-brown fur. They are immune to the effects of all non-magical fire. These demonic hounds favor hot environments, and may be found around volcanic activity, or with other creatures that prefer hot environments. They commonly take up residence in labyrinths. Hellhounds will bite 70% of the time for 1d6 hit points damage, or breath fire 30% of the time. The fire breath attack deals 1d6 hit points of damage per hit die the attacking hell hound possesses. A successful saving throw versus breath attack reduces the damage by half. Hell hounds will save as Fighters equal in level to their hit die. They have an imperfect ability to detect invisibility to a range of 60', with a 75% probability of detection.

Herd Animals

No. Enc.: 0 (3d10)
 Alignment: Neutral
 Movement: 240' (80')
 Armor Class: 12
 Hit Dice: 1 to 4
 Attacks: 1 (butt)
 Damage: 1d4, 1d6, or 1d8
 Save: 18 to 17
 Morale: 5
 Hoard Type: None
 XP: 10/20/50/80

Herd animals may be any of several kinds of animals that live in herds and are primarily grazing animals. Region and climate will determine which specific kind of grazing herd animal is encountered. The following are some typical kinds and their relative toughness: antelope, deer, and goats (1 or 2 HD, 1d4 butt); caribou, cattle, and oxen (3 HD, 1d6 butt); buffalo, elk and moose (4 HD, 1d8 butt). Usually only the males have horns or antlers, and may attack by butting an opponent. In any large group of herd animals there are 4 females or young for every 1 male. Note that adult males typically have 1d4 hit points more than the normal amount, and all young have half the standard adult hit points. In most cases herd animals will flee from predators. Males will occasionally fight to protect the females and young.

Hippocampus

No. Enc.: 2d4 (2d4)
 Alignment: Lawful
 Movement: 240' (80')
 Armor Class: 14
 Hit Dice: 4
 Attacks: 1
 Damage: 1d4
 Save: 16
 Morale: 8
 Hoard Type: None
 XP: 200

This strange creature appears to be half horse and half fish. The front half resembles a sleek stallion with a flowing mane and long, sleek legs ending in wide fins rather than hooves. The hindquarters are that of a great fish. Its body is covered in fine scales in the fore parts and large scales elsewhere. Hippocampi scales vary in color from ivory to deep green, with shades of blue and silver. Aquatic races often tame these animals, and they make fine steeds, for they are strong, swift, and very intelligent. A hippocampus is about 8 feet long and weighs about 600 pounds. Hippocampi speak their own language.

Hippogriff

No. Enc.: 0 (2d8)
 Alignment: Neutral
 Movement: 180' (60')
 Fly: 360' (120')
 Armor Class: 14
 Hit Dice: 3 + 1
 Attacks: 3 (2 claws, bite)
 Damage: 1d6/1d6/1d10
 Save: 16
 Morale: 8
 Hoard Type: None
 XP: 65

Hippogriffs are aggressive flying creatures that combine features of horses and giant eagles. They have the fore body and heads of giant eagles and the hindquarters of horses. Voracious omnivores, hippogriffs will hunt humanoids as readily as any other meal. They have a particular taste for pegasi meat. A typical hippogriff is 9 feet long, has a wingspan of 20 feet, and weighs 1,000 pounds. Hippogriffs typically nest high in the mountains. If captured when young, they can be trained as mounts.

Hobgoblin

No. Enc.: 1d6 (4d6)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 13
 Hit Dice: 1 + 1
 Attacks: 1 (weapon)
 Damage: 1d8 or weapon
 Save: 18
 Morale: 8
 Hoard Type: XIX
 XP: 15

Hobgoblins are larger cousins of goblins. Hobgoblins' hair color ranges from dark reddish-brown to dark gray. They have dark orange or red-orange skin. Hobgoblins' eyes are yellowish or dark brown, while their teeth are yellow. Their garments tend to be brightly colored, often blood red with black-dyed leather. Their weaponry is kept polished and in good repair. Hobgoblins tend to reside below ground, but often live or venture to the surface, and suffer no penalties to daylight like their smaller cousins. A hobgoblin king is an exceptional hobgoblin, with 22 hp and he attacks like a monster of 5 HD. All damage dealt receives a bonus of +2. A hobgoblin king is always accompanied by a loyal bodyguard, totaling 1d4 individuals. The bodyguards each have 3d6 hit points, and attack as monsters with 4 HD. All hobgoblins in the presence of the hobgoblin king have a morale score of 10.

Homunculus

No. Enc.: 1 (0)
 Alignment: See below
 Movement: 60' (20')
 Fly: 180' (60')
 Armor Class: 13
 Hit Dice: 2
 Attacks: 1 (bite)
 Damage: 1d3
 Save: As creator
 Morale: 11
 Hoard Type: None
 XP: 38

A homunculus is a miniature 1 ½' tall servant created by a magic-user. These creatures are weak combatants but make effective spies, messengers, and scouts. A homunculus's creator determines its precise features, but they are always humanoid and have bat-like wings. Homunculi are little more than tools designed to carry out assigned tasks. They are extensions of their creators, sharing the same alignment and basic nature. A homunculus cannot speak, but the process of creating one links it telepathically with its creator. A homunculus may attack by bite, and a victim must save versus spells or sleep for 5d6 turns. It knows what its master knows and can convey to him or her everything it sees and hears, out to a distance of 500'. A homunculus never travels beyond this range willingly, though it can be removed forcibly. If this occurs, the creature does everything in its power to regain contact with its master. An attack that destroys a homunculus deals 2d10 points of damage to its master. If the creature's master is slain, the homunculus also dies, and its body swiftly melts away into a pool of ichor. A homunculus is shaped from a mixture of clay, minerals, magical herbs, and one pint of the creator's own blood. The materials cost 2d4x100 gp. After the body is sculpted, it is animated through an extended magical ritual that requires a specially prepared laboratory or workshop, similar to an alchemist's laboratory and costing 500 gp to establish. The following spells must be cast on the body during the ritual: arcane eye, ESP, and mending.

Horse

	<i>Riding</i>	<i>War</i>	<i>Draft</i>
No. Enc.:	0 (1d10x10)	0	0
Alignment:	Neutral	Neutral	Neutral
Movement:	240' (80')	120' (40')	90' (30')
Armor Class:	12	12	12
Hit Dice:	2	3	3
Attacks:	2 (2 hooves)	2 (2 hooves)	None
Damage:	1d4/1d4	1d6/1d6	None
Save:	17	16	16
Morale:	7	9	6
Hoard Type:	None	None	None
XP:	20	50	50

Riding Horse: Riding horses are smaller than other horses, and built for speed and long-distance travel. Wild horses are the equivalent of riding horses. Horses can carry up to 300 lbs and move at full movement, and they can carry a maximum of 600 lbs and have movement halved.

War Horse: These horses have been bred to be strong and sturdy in combat, and will not bolt from fright as easily. These horses are meant for shorter distance travel. The rider of a war horse may attack with a charge, getting double damage with a lance. A war horse can only run in this kind of attack, but in subsequent close attacks the horse and rider may attack simultaneously. War horses can carry up to 400 lbs and move at full movement, and they can carry a maximum of 800 lbs and have movement halved.

Draft Horse: This horse breed is the largest of all, and is bred to be a big, strong laborer. Draft horses can carry up to 450 lbs and move at full movement, and they can carry a maximum of 900 lbs and have movement halved. They do not engage in combat, but run away if attacked or threatened.

Hydra

No. Enc.: 1 (1)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 14
 Hit Dice: 5 to 12
 Attacks: As head number
 Damage: 1d10 per head
 Save: 15 to 11
 Morale: 9
 Hoard Type: XXI
 XP: As HD

Hydras are reptile-like monsters with 1d8+4 heads. A hydra is gray-brown to dark brown, with a light yellow or tan underbelly. The eyes are amber and the teeth are yellow-white. It is about 20 feet long and weighs about 4,000 pounds. Hydras have a number of hit die equal to their number of heads. They have maximum hit points for their hit die. Each head attempts to bite an opponent in a round, so the number of attacks a hydra has each round is equal to the number of heads it has. When a hydra has suffered 8 hit points of damage, 1 head becomes useless. For each additional 8 hp damage, another head becomes useless, until all heads have been destroyed and the hydra dies. Hydras save as a Fighter equal in level to the hydra's HD number.

Aquatic Hydra: The aquatic hydra is a variation of the standard hydra. It has all of the same characteristics and abilities, but has fins rather than legs and lives under water.

The GM may create other variations of hydra. Some possibilities include hydra that can breathe fire for 8 hit points of damage per head, or bites that have poisonous venom.

Hyena

	<i>Normal</i>	<i>Giant</i>
No. Enc.:	2d6 (2d6)	2d4 (2d4)
Alignment:	Neutral	Neutral
Movement:	120' (40')	120' (40')
Armor Class:	12	12
Hit Dice:	3	5
Attacks:	1 (bite)	1 (bite)
Damage:	2d4	3d4
Save:	17	15
Morale:	9	9
Hoard Type:	None	None
XP:	50	200

Hyenas are very aggressive pack animals that do not give up on hunting prey easily. They have fierce bites, and devour almost all of a carcass since they are capable of digesting most bone.

I

Insect Swarm

No. Enc.:	1 swarm (3 swarms)
Alignment:	Neutral
Movement:	30' (10')
Fly:	60' (20')
Armor Class:	12
Hit Dice:	2 to 4
Attacks:	1
Damage:	2 hit points
Save:	18
Morale:	11
Hoard Type:	None
XP:	29/65/135

An insect swarm is a large swarm of small insects, such as bees, ants, wasps, spiders, and other small biting and stinging bugs that may crawl or fly. A swarm may attack to protect a nest, or because they are stimulated by a smell, a light, or some other thing. Characters may become engulfed in an insect swarm; a swarm is generally treated as a 10'x30' cloud of insects. A swarm does not need to roll to hit, and inflicts 2 hp of damage to any character engulfed. Double damage is dealt to characters wearing no armor. Although swarms do not sustain damage from weapons, a character may wave a weapon around to encourage the swarm to back off. If a character removes himself from a swarm, insects will be clinging to him and deal damage for 3 rounds. A character may flee into a body of water, in which case any clinging insects will die after inflicting damage one round. Any swarm that has been aggravated by suffering damage will chase a fleeing character. If a character flees from a swarm and is able to leave its line of sight, the swarm will not be able to pursue.

Fire, such as that from a torch, does 1d4 hit points damage to an insect swarm. Other fire-based and cold-based attacks will also damage a swarm, and a sleep spell will cause the entire swarm to go dormant. Smoke may be used to ward off a swarm.

Invisible Stalker

No. Enc.:	1 (1)
Alignment:	Neutral
Movement:	120' (40')
Armor Class:	16
Hit Dice:	8
Attacks:	1
Damage:	4d4
Save:	8
Morale:	12
Hoard Type:	None
XP:	215

Invisible stalkers are creatures of magic from another plane of existence. They sometimes serve magic-users, who summon them with the spell invisible stalker to perform specific tasks. A summoned invisible stalker undertakes whatever task the summoner commands, even if the task sends it hundreds or thousands of miles away. The creature follows a command until the task is completed and obeys only the summoner. However, it resents protracted missions or complex tasks and seeks to pervert its instructions accordingly. Invisible stalkers may be dispelled, and return to their home plane. Creatures that cannot detect invisible are surprised by an invisible stalker on a surprise check result of 1-5 on 1d6.

J

Jackal

No. Enc.:	1d6 (2d4)
Alignment:	Neutral
Movement:	150' (50')
Armor Class:	12
Hit Dice:	1d4 hp
Attacks:	1 (bite)
Damage:	1d2
Save:	18
Morale:	7
Hoard Type:	None
XP:	5

These canines are small, cowardly scavengers. They avoid direct conflict, and are fast runners.

Jackalwere

No. Enc.:	1d4 (1d4)
Alignment:	Chaotic
Movement:	120' (40')
Armor Class:	15
Hit Dice:	4
Attacks:	1 (bite or weapon)
Damage:	2d4 or weapon
Save:	15
Morale:	9
Hoard Type:	XXII
XP:	190

These creatures are jackals that may take the form of a human and an intermediate, jackal-man form which they often use for combat. They have a powerful bite that inflicts 2d4 hp damage, and a gaze attack that requires a save versus spells or the victim is affected by sleep. Jackalweres are only harmed by weapons of +1 or better, and iron.

K

Kobold

No. Enc.: 4d4 (6d10)
 Alignment: Chaotic
 Movement: 60' (20')
 Armor Class: 12
 Hit Dice: 1d4 hit points
 Attacks: 1 (weapon)
 Damage: 1d4 or weapon -1
 Save: 18
 Morale: 6
 Hoard Type: I (XIII)
 XP: 5

Kobolds are short, dog-like humanoids with cowardly and sadistic tendencies. A kobold's scaly skin ranges from dark rusty brown to a rusty black color. It has glowing red eyes. Kobolds wear ragged clothing, favoring red and orange. A kobold is 2 to 2 ½' tall. Kobolds live exclusively underground, and have an extended infravision to 90'. A kobold chief is an exceptional kobold, who attacks like a monster of 2 HD with 9 hit points. A kobold chief is always accompanied by a loyal bodyguard, totaling 1d6 individuals. Each bodyguard has 6 hit points, and attack as monsters with 1 + 1 HD. All kobolds in the presence of the kobold chief have a morale score of 8. The kobold lair always has more treasure (Hoard Type XIII), and there is equally more treasure when encountering kobolds in the wilderness.

L

Lamia

No. Enc.: 1 (1)
 Alignment: Chaotic
 Movement: 240' (80')
 Armor Class: 16
 Hit Dice: 9
 Attacks: 1 (weapon)
 Damage: 1d6
 Save: 11
 Morale: 9
 Hoard Type: XXII
 XP: 4,500

These highly dangerous creatures resemble women from the torso up, but have a centaur-like lower body that may resemble any beast or even a combination of beasts. They are often found in ruins and labyrinths, waiting for unsuspecting adventurers. Though a lamia is powerful and dangerous in close combat, it has no stomach for a fair fight. It uses its illusion ability (as the wand once per day) to lure adventurers into perilous situations. In addition, lamias have the following spell-like abilities usable once per day: charm person, mirror image, and suggestion. Finally, lamias may drain 1 point of WIS merely by touching an opponent, and when a victim reaches WIS 3 he becomes completely obedient to the lamia. Lamias feast on the blood and flesh of humanoids. They speak common and their alignment tongue.

Lammasu

No. Enc.: 2d4 (2d4)
 Alignment: Lawful
 Movement: 120' (40')
 Fly: 240' (80')
 Armor Class: 13
 Hit Dice: 7 + 7
 Attacks: 2 (2 claws)
 Damage: 1d6/1d6
 Save: 11
 Morale: 9
 Hoard Type: VIII, IX, X,
 XP: 1,300

These good, benevolent creatures have the bodies of lions, large feathered wings, and human-like faces. A typical lammasu is about 8' long. They are not by nature aggressive or violent, and may aid good beings in times of need. If forced to attack, a lammasu attacks with spells or its razor-sharp claws. It almost always enters combat if it observes a good creature being threatened by evil. A lammasu casts cleric spells, and can choose spells from the cleric spell list as follows: 1st level, 4; 2nd level, 3; 3rd level, 2; 4th level, 1. When casting any cure spell, lammasu may heal twice the normal amount. Further, 1 out of 10 of these creatures may use holy word. Finally, all lammasu constantly radiate protection from evil 10' radius, which is twice as effective as the normal spell.

Leech, Giant

No. Enc.: 0 (1d4)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 12
 Hit Dice: 6
 Attacks: 1 (drain blood)
 Damage: 1d6
 Save: 17
 Morale: 10
 Hoard Type: None
 XP: 570

Giant leeches are 4' long, brown, and slimy. They live in marshy terrain and other bodies of stagnant water. When a giant leech hits in combat, it latches on to a victim with its round barbed mouth, and drinks 1d6 hit points of blood from the victim each round. Once attached, a giant leech will only release a victim if the victim dies or the leech itself is killed.

Leprechaun

No. Enc.: 1 (1d20)
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 11
 Hit Dice: 1d4+1 hp
 Attacks: 0
 Damage: None
 Save: 16
 Morale: 6
 Hoard Type: XVII
 XP: 7

These small, 2' tall sylvan beings are as mischievous as they are elusive, and have a strong taste for wine. It is rumored that leprechauns are descended from halflings and pixies. They tend to live in vibrant, lush woods or other out of the way beautiful settings. They have such developed hearing that they are never surprised. Leprechauns do not physically attack, but have the following spell-like abilities usable at will: invisibility, phantasmal force, polymorph any object (non-living), and ventriloquism. These creatures delight in stealing valuable objects, and can do so with 75% proficiency. They are 25% likely to discard stolen items per turn if chased.

Should a leprechaun be captured, he will use his powers of illusion and polymorphing, and any other means at his disposal, to trick a captor so as not to give away treasure.

Lich

No. Enc.: 1 (1)
 Alignment: Neutral (evil)
 Movement: 60' (20')
 Armor Class: 19
 Hit Dice: 12+
 Attacks: 1 (cold touch)
 Damage: 1d10 cold damage
 Save: 7-
 Morale: 9
 Hoard Type: XXII
 XP: 4,400

A lich is an undead magic-user of at least 18th level (and possibly multiclassed) who has used its magical powers and a phylactery to unnaturally extend its life. It is a gaunt and skeletal humanoid with withered flesh stretched tight across horribly visible bones. Its eyes have long ago been lost to decay, but bright pinpoints of crimson light burn on in the empty sockets. A lich usually lives in a secluded keep or deep in a labyrinth, where it conducts magical research. Its powerful undead nature grants it a better natural AC and HD than a typical magic-user. Liches are only vulnerable to attack by creatures of 6 HD or more (or creatures of a magical nature), magical attack forms, and they are unaffected by non-magical weapons. In addition to having undead immunity to charm and sleep, liches are immune to the following spells or forms of damage: cold-based and electrical-based attacks, death spells, enfeeblement, polymorph, and any effects that cause insanity. A lich may attack by spell, or with a cold touch attack that deals 1d10 hp damage. Victims must also save versus paralyze or become paralyzed permanently, unless magically cured. Finally, all beings with 4 or fewer HD that see a lich will be affected with fear, and no saving throw is permitted.

**Lizard, Giant**

	Draco	Gecko

Giant Draco Lizard: The giant draco has a length of 6', and is capable of gliding in the air due to large skin flaps below its limbs. Although they live primarily above ground, they do occasionally venture underground to seek shelter or look for a meal.

Giant Gecko: The nocturnal giant gecko has a length of 5'. Giant geckos, like their smaller cousins, are adept at walking sheer cliffs, and even upside down. This ability allows them to spring upon unwary prey from above.

Giant Horned Chameleon: The immense 7' giant horned chameleon can surprise its prey, despite its bulk, due to its uncanny ability to take on the color, appearance, and texture of its local surroundings. A victim will be surprised on a surprise check roll of 1-5 on 1d6. The giant horned chameleon has three special attacks. The first is its sticky tongue, which can lash out to a distance of 5'. If this attack succeeds, the victim is immediately yanked back to the chameleon's mouth and bitten without the need for another attack roll, for 2d4 hit points of damage. The second special attack available to the chameleon is its large horns, which inflict 1d6 hit points of damage. Lastly, the chameleon may, on a successful attack, knock down an opponent by lashing out with its tail. The opponent may not attack the same round this occurs.

Giant Tuatara Lizard: This giant leathery skinned 8' carnivorous lizard has formidable spikes that run the length of its dorsal side. The iguana-like giant tuatara has infravision to 90' when it lowers a special membrane-like eyelid over each of its eyes.

Lizardfolk

No. Enc.: 2d4 (6d6)
 Alignment: Neutral
 Movement: 60' (20')
 Swim: 120' (40')
 Armor Class: 14
 Hit Dice: 2 + 1
 Attacks: 1 (weapon)
 Damage: 1d6 + 1 or weapon + 1
 Save: 17
 Morale: 12
 Hoard Type: XIX
 XP: 47

These scaly humanoids resemble humans but have the heads and tails of lizards. They delight in feasting upon the flesh of other humanoids. They employ any kind of weapon, but prefer spears, tridents, and clubs. Their immense strength grants them a +1 bonus to damage. They often venture into labyrinths, especially if there is an aquatic entrance. They are also found to dwell in marshes and along the banks of bodies of water.

Locathah

No. Enc.: 3d4 (2d10x10)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 13
 Hit Dice: 2
 Attacks: 1 (weapon)
 Damage: As weapon
 Save: 16
 Morale: 9
 Hoard Type: XXII
 XP: 20

Although humanoid in shape, locathahs are clearly more fish than human. They live in large complexes carved from undersea cliffs. The average locathah stands 5 feet tall. Females and males look very much alike, although the former can be recognized by the two ochre stripes marking their egg sacs. If 30 or more are encountered, one will be a 4 HD leader accompanied by 1d4 3 HD captains. In a group of over 100, the chief (5 HD) will be present along with 4d4 guards of 3 HD. Locathahs use giant eels as mounts, and will always be mounted when encountered. In any group, 20% of locathahs have lances, and the remaining fish-men are armed with tridents and crossbows, or nets and short swords.

Locust, Subterranean

No. Enc.: 2d10 (1d10)
 Alignment: Neutral
 Movement: 60' (20')
 Fly: 180' (60')
 Armor Class: 15
 Hit Dice: 2
 Attacks: 1 (bite, slam, spit)
 Damage: 1d2/1d4/see below
 Save: 16
 Morale: 5
 Hoard Type: None
 XP: 38

Subterranean locusts resemble giant 2' or 3' long grasshoppers, and are the color of stone. They primarily eat plants and all kinds of fungus that grows underground, and are immune to the effects of yellow mold and other poisons. Subterranean locusts are prone to panic, and will typically jump up to 60' away if they sense a disturbance. This haphazard sudden flight, however, can be in any direction. They will accidentally flee in the direction of the group half the time, and on a successful attack roll inflict 1d4 hit points of damage by slamming into a creature. A locust does not stay to fight, but flees in such an instance.

Sometimes, if the locust is attacked, it will create a high-pitched whine that can gain the attention of other monsters in a labyrinth (20%). If forced into combat, the locusts may produce a brown, sticky spit that they propel to 10' away. This attack must succeed against an AC of 9, because its effects take place even if the spittle does not bypass armor. If struck, the opponent must succeed in a saving throw versus poison, or becomes incapacitated due to the horrible smell of the spittle. This lasts for 1 turn, before the opponent becomes immune to the odor. The spittle must be rinsed off or any creature that comes to within 5' of a spit-soaked creature is subject to a saving throw versus poison, and failure indicates the creature is wracked with vomiting.

Lurker Above

No. Enc.: 1 (1d4)
 Alignment: Neutral
 Movement: 10' (3')
 Fly: 90' (30')
 Armor Class: 13
 Hit Dice: 10
 Attacks: 1
 Damage: 1d6
 Save: 9
 Morale: 12
 Hoard Type: XXI
 XP: 1,700

This black manta ray-like creature has a 20' wingspan. Its body is black, with gray on its underbelly. The lurker above is a subterranean carnivore that preys on any living creatures that enter its territory. It is able to hover or fly due to its light body, which is filled with many cavities of a buoyant gas. Lurkers surprise on 1-4 on 1d6. They descend from a ceiling and inflict 1d6 hp crushing damage. In 1d4+1 rounds, any being under the lurker dies of suffocation. Creatures in this predicament may attack the lurker from beneath, but only using short swords or daggers, and then only if they were wielded when the creature became enveloped.

Hoard Type:	XX	XX
XP:	650	190

All lycanthropes are humans cursed with the disease lycanthropy. They are able to take the form of one kind of animal, and are able to summon the aid of 1 to 2 of this same kind of animal, which will appear in 1d4 rounds. Lycanthropes never wear armor, since this would hinder the shape-changing process. Wolfsbane is an effective ward against all lycanthropes, and if one is touched with it (whether thrown at it or otherwise hit with it) the lycanthrope must succeed in a saving throw versus poison or flee out of fear. When killed, a lycanthrope takes his human form. Horses and sometimes other animals can sense lycanthropes when they are near, and will act restless or bolt.

Lycanthrope Forms

When a lycanthrope is in the human form, it may have subtle secondary characteristics in common with the animal type it is capable of transforming into. Examples could include extra body hair, striped "birth marks" on weretigers, or larger ears on a Wererat. When a lycanthrope is in its animal form, it may only communicate with other animals of its type, but may not speak any humanoid language. In addition, when in the animal form lycanthropes are immune to all attacks from normal weapons, but are harmed by spells, silver, and enchanted weapons.

The Disease

The horrid disease of lycanthropy is transmitted when the victim of a lycanthrope suffers a loss of hit points equal to or more than 50% of his maximum number. The victim will become a lycanthrope of the type that wounded him in 2d6 days, but several days before the disease has fully taken hold the victim will show signs and begin to take on some of the secondary characteristics mentioned above. Only humans may become a lycanthrope. Demi-humans and other non-humans do contract the disease, but they die after 2d6 days rather than become a lycanthrope. Lycanthropy may also be inherited. If one parent is a lycanthrope, there is a 50% chance that the child will become a lycanthrope at puberty. If both parents are lycanthropes, the child has a 100% chance of becoming a lycanthrope (in the rare event that the parents are not the same kind of lycanthrope, the type is determined randomly between the parental types). Contracted lycanthropy may be cured with the cleric spell cure disease, but the cleric must be of 11th level or greater.

Werebear: Highly intelligent and thoughtful lycanthropes, werebears are not inherently evil and may be friendly if approached carefully. They tend to be quite solitary, though they occasionally live with normal bears. As other bears, if a Werebear achieves a successful attack with both claws in the same round, it may grab its opponent in a crushing hug for 2d8

hit points of damage.

Wereboar: These aggressive, dim-witted, lycanthropes are easily enraged. If enraged, they will fight with a bonus of +2 to attack rolls, and continue fighting until there are no more enemies or until they are killed.

Wererat: These highly intelligent, sly lycanthropes are capable of humanoid speech when in animal form. They are very stealthy, and will surprise opponents on a surprise check roll of 1-4 on 1d6. Wererats often use weapons, even in animal form, and any damage from a weapon must be noted and not considered when estimating damage that may cause lycanthropy.

Weretiger: Weretigers have the natural cat-like grace of the animals they may transform into. They have great curiosity and are not particularly malicious. Their stealth allows them to surprise opponents on a surprise check roll of 1-4 on 1d6.

Werewolf: Werewolves are not extremely intelligent in animal form, but they make up for this in cunning. They roam in packs, and a pack consisting of at least 5 individuals will have a pack leader that fights as a monster of 5 HD and has 30 hit points. This individual is of greater strength, and receives a damage roll bonus of +2.

M

Manticore

No. Enc.: 1d2 (1d4)
Alignment: Chaotic
Movement: 120' (40')
Fly: 180' (60')
Armor Class: 15
Hit Dice: 6 + 1
Attacks: 3 (2 claws, bite) or 1 (spikes)
Damage: 1d4/1d4/2d4 or see below
Save: 13
Morale: 9
Hoard Type: XIX
XP: 980

This foul monster delights in feasting on human flesh. It has the face of a human, but there the similarities end. The manticore has giant bat wings, a lion's body, and a long reptilian tail that has 24 barbed spikes growing from its end. The manticore can throw 6 spikes per round, and can do so when airborne. They can hit a target up to 180' away and deal damage of 1d6 hit points. The spikes grow back at a rate of 2 every day. These creatures usually live in the mountains, and have been known to venture into labyrinths.

Mastodon

No. Enc.: 0 (2d8)
Alignment: Neutral
Movement: 120' (40')
Armor Class: 16
Hit Dice: 15
Attacks: 2 (tusks) or 1 (trample)
Damage: 2d6/2d6/ or 4d8
Save: 14
Morale: 8
Hoard Type: None
XP: 3,300

Mastodons are prehistoric cousins to elephants, but are adapted to colder climates and have a thick coat of shaggy hair. If mastodons have enough distance between them and a foe, they will commit to a charge to score double damage with their tusks. When in close combat, they may attempt to attack with tusks or attempt to trample, preferring to trample with a roll of 1-3 on 1d4. Mastodons have a +4 to their attack roll when attempting to trample an opponent that is smaller or approximately equal in

the size of a human. Although mastodons do not keep treasure, the ivory from their tusks is valuable and each tusk is worth 2d4x100 gp.

Medusa

No. Enc.: 1d3 (1d4)
Alignment: Chaotic
Movement: 90' (30')
Armor Class: 11
Hit Dice: 4
Attacks: 1 (snakebite or special)
Damage: 1d6, poison
Save: 13
Morale: 8
Hoard Type: XVII
XP: 245

Medusa are indistinguishable from human women, except that they have vicious snakes on their heads rather than hair. They may attempt to disguise themselves with a hooded robe, only to suddenly reveal their true nature. Any character that looks at a medusa must succeed in a saving throw versus petrify, or he turns to stone. A character may gaze at a medusa through a mirror to avoid this effect. However, a medusa that sees her own reflection will need to succeed in a saving throw versus petrify or become stone herself. Medusa may also attack with their snake hair, which inflicts 1d6 hit points of damage on a successful attack roll. In addition, a victim must succeed in a saving throw versus poison or die after 1 turn. Any character that engages in combat with a medusa while shielding his eyes attacks with a penalty of -4, and the medusa receives a bonus of +2 to hit. All medusa have a bonus of +2 to saving throws versus spells.

Hit Dice:	1
Attacks:	1
Damage:	1d6 or weapon type
Save:	17
Morale:	6
Hoard Type:	XXII

The men here are all considered 1st level fighters. Individuals of greater level will typically lead them. The Hoard Types provided indicate treasure found in camps or lairs, except for the case of merchants.

Berserker: These fighters are engulfed in a battle rage whenever they fight any humanoid. This determination gives them a +2 to their attack value, and they will battle until killed, without a morale check.

Brigand: These men are criminals who have banded together under the shared interest of stealing and pillaging. Half of all brigands encountered are armed with a short sword and short bow, and wear leather armor and a shield. The other half is better equipped with long swords, chain mail, a shield, and will have riding horses.

There is one fighter of 2nd level per 20 brigands. There is one fighter of 4th level per 40 brigands. These leaders are equipped with long swords, lances, plate armor, and mounted on war horses equipped with barding.

Bandit camps will have 5d6x10 inhabitants. They will have a fighter of 9th level as a leader, and there will be a fighter of 5th level per 50 men. An 8th level cleric may be present in a camp (1-3 on 1d10). There is also a probability that a magic-user of 8+1d2 level will be present (roll 1-5 on 1d10).

Merchant: These men trade goods, sometimes over great distances. They will all be mounted and will have additional pack animals (1d12). Animal types will be appropriate to the terrain. Every merchant caravan has a fighter of 5th level as a guard. For every five merchants encountered, the following additional guards will be present: fighters, 1st level (20); fighters, 2nd or 3rd level (2). All guards are armed with various swords, crossbows, daggers, and wear chain mail armor.

Nomad: Nomads are tribal people that live off the land and by animal husbandry. They follow game and seasonal foods by living in temporary camps of tents or simple structures. Per 25 nomads, a fighter of 2nd level will be present as a leader. Per 40 nomads, a fighter of 4th level will be present as a leader. Nomads can have any kind of armor or hand weapon. All are mounted, and half of their number will have bows, while the other half have lances.

The typical tribal camp will have 5d6x10 inhabitants. They will have a fighter of 8th level as a leader, and there will be a fighter of 5th level per 100 men. A 9th level cleric may be present in a camp (1-5 on 1d10). There is also a probability that a magic-user of 8th level will be present (roll 1 on 1d4). Nomads often trade with people they encounter. Their lifestyle brings them into contact and clashes with other humanoids.

Pirate: A pirate fleet may be found on any body of water, whether lake, sea, or river. The fleet size depends on the water vessel. Riverboat fleets number 1d8 ships, longship fleets number 1d4 ships, fleets of small galleys number 1d4, and any fleet of galleys larger than "small" size, and any fleet of sailing ships, number 1d3. The crew number is determined by the ship crew requirements described in Section 5.

There is one fighter of 4th level per 30 pirates, and one fighter of 5th level per 50 pirates. Per 300 pirates, one fighter of 8th level will be present. Any horde of 300 or greater is led by a Pirate King (fighter of 11th level). In a group this large the Pirate King may employ a magic-user of 8+1d2 level (roll 1-15 on 1d20).

Pirates are armed with any sword and leather armor. Some (40%) are also armed with crossbows.

Pirates raid ships and coastal towns. They may dock in lawless cities that trade with pirates. Pirates often hide their treasure in remote locations, and a leader may have a map to such a location. Any group of pirates may have 1d4 hostages who they have ransomed.

Merfolk

No. Enc.: 0 (1d20)
Alignment: Neutral
Movement: Swim: 120' (40')
Armor Class: 13
Hit Dice: 1 to 4
Attacks: 1
Damage: 1d6 or weapon type
Save: 16
Morale: 8
Hoard Type: XXII
XP: 20

These legendary beings have fish-like bodies from the waist down, and have human torsos, arms, and heads. They use weapons that are convenient in water, including daggers, spears, and tridents. These creatures live exclusively in large bodies of water. They may occasionally trade fish and other sea bounty to human villages, but generally they keep to themselves. Merfolk villages generally have a population of 1d3x100 individuals. A leader will be present in any group of 10 merfolk, and the leader has 2 HD. An exceptional leader will be present in any group of 50 merfolk, and the exceptional leader has 4 HD. These leaders save as a fighter level equal to their HD number. The GM may choose some sea creatures that act as guards for merfolk communities.

Mimic

No. Enc.: 1 (1)
Alignment: Neutral
Movement: 30' (10')
Armor Class: 12
Hit Dice: 7-10
Attacks: 1
Damage: 3d4
Save: 12
Morale: 8
Hoard Type: None
XP: 790

A mimic can have almost any dimensions, but usually is not more than 10' long. These creatures are able to take the form of inanimate objects made of wood and/or stone, such as doors, statues, etc. Younger mimics (7-8 HD) are more intelligent, can speak, and may negotiate with adventurers if it is made worthwhile. Older mimics (9-10 HD) have grown ancient and senile, attacking with only the interest of consuming flesh. Mimics attack when a being touches them. The being is held attached to the mimic with a glue-like substance, and the mimic bludgeons with an emergent pseudopod for 3d4 hp damage. The more intelligent mimics speak their own language, common, and their alignment tongue.

Minotaur

No. Enc.: 1d6 (1d8)
Alignment: Chaotic
Movement: 120' (40')
Armor Class: 13
Hit Dice: 6
Attacks: 2 or 1 (gore, bite, or weapon)
Damage: 1d6/1d6 or weapon
Save: 13
Morale: 12
Hoard Type: XX
XP: 820

These large, somewhat dimwitted, humanoids have the bodies of male humans but the heads of a horned bull. They usually live in labyrinths, where they prey upon anyone who ventures. They delight in the taste of human flesh. In combat, minotaurs may use any weapon, and due to their great strength receive a +2 bonus to weapon damage rolls. In a round, minotaurs will either attack with a weapon or attack with a bite and gore with their horns. Minotaurs are relentless, and will attempt to chase fleeing prey.

Morlock

No. Enc.: 1d12 (5d10)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 11
 Hit Dice: 1
 Attacks: 1 (weapon)
 Damage: As weapon
 Save: 17
 Morale: 9
 Hoard Type: XX
 XP: 5

Morlocks are a degenerate race of subterranean humans. They are all albinos, and have developed a carnivorous diet that favors the meat of other humanoids. They only venture to the surface at night, and if caught in the daylight they suffer an attack penalty of -2. Their subterranean existence has given them 90' infravision. These foul degenerate people wield any sort of weapon, but favor spears and swords. Morlocks lair deep within caverns or labyrinths, where a typical "village" will have a population of 5d10 individuals. In this community, there is usually a stronger individual in charge, who is treated as a 3 HD monster, saves as a fighter of 3rd level, and has 12 hit points. Morlocks are enemies of Neanderthals, dwarves, and gnomes, but they sometimes join groups of orcs and goblins. Like Neanderthals, morlocks sometimes tame albino apes.

Mule

No. Enc.: 1d8 (2d6)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 12
 Hit Dice: 2
 Attacks: 1 (kick or bite)
 Damage: 1d4 or 1d3
 Save: 17
 Morale: 8
 Hoard Type: None
 XP: 20

Mules are a hybrid of a donkey and a horse. Mules are notoriously ornery, and may attack if particularly provoked. They can carry 200 lbs comfortably, and may carry a maximum of 400 lbs. In the latter case, movement rate is reduced to 60' per turn. At the GM's discretion, a mule may be taken into the depths of a labyrinth to aid in transporting equipment or treasure, so long as conditions allow.

Mummy

No. Enc.: 1d4 (1d12)
 Alignment: Chaotic
 Movement: 60' (20')
 Armor Class: 16
 Hit Dice: 5 + 1
 Attacks: 1
 Damage: 1d12, disease
 Save: 13
 Morale: 12
 Hoard Type: XIX
 XP: 860

Mummies are preserved undead corpses animated through the auspices of dark desert gods best forgotten. They haunt old tombs and lost ruins. These undead are so fearsome that any being seeing one must succeed in a saving throw versus paralyze or become paralyzed with dread. This affect passes if the mummy leaves the victims range of vision, or if the mummy engages in combat. When a mummy successfully strikes a victim, the victim suffers 1d12 hit points of damage and contracts mummy rot. Mummy rot is a powerful curse, not a natural disease. When under the effects of the curse, characters are unable to receive the benefits of any form of magical healing. Characters heal naturally at 1/10th the normal rate. This magical disease may be removed with the spell remove curse. Like other undead, mummies are unaffected by charm, sleep, or hold spells. Further, mummies may only be harmed by magical weapons, spells, and fire-based attacks.

N**Naga**

Hit Dice:	7 or 8
Attacks:	1 (bite)
Damage:	1d4
Save:	11
Morale:	8
Hoard Type:	XIX
XP:	1,140

These creatures have large snake bodies, with human heads. They vary in temperament by type, but all are highly intelligent and magical.

Guardian: These 20' long creatures are honorable, brass scaled, and are often charged with the task of guarding a location to protect a treasure or to make sure an evil remains locked away. They may bite and constrict a victim in the same round. They also have poisonous spittle with a 30' range, and struck victims must save versus poison or die. Guardian nagas may cast spells as a 6th level cleric.

Spirit: Spirit nagas are 15' long, black scaled, and unredeemable in their refined evil. They lurk in labyrinths and ruins, awaiting adventurers to make prey. They attack with a poisonous bite that deals 1d3 hp damage, and victims must save versus poison or die. In addition, these creatures have a charm gaze, and victims must save versus paralyze or be indefinitely under the effect of the charm. These creatures have the spell-casting abilities of a 3rd level magic-user and a 2nd level cleric.

Water: Water nagas have blue-green scales, and live in lakes, ponds, or even deep pools above or below ground. They are generally solitary and unconcerned with the affairs of others. Like other nagas, their bite is poisonous and victims must save versus poison or die. Water nagas have the spell-casting ability of 5th level magic-users.

Neanderthal

No. Enc.: 1d10 (4d10)
 Alignment: Lawful
 Movement: 120' (40')
 Armor Class: 11
 Hit Dice: 2
 Attacks: 1 (weapon)
 Damage: 2d4 or weapon
 Save: 17
 Morale: 7
 Hoard Type: XX
 XP: 20

These demi-humans are cousins to humans. They often are assumed to be brutish, due to their large brow ridges, receding chins, and slightly shorter, denser bodies. However, though they

live a primitive lifestyle, they are as intelligent as humans. Neanderthals typically attack with spears and weapons with stone blades. A Neanderthal band usually consists of 1d4x10 individuals. Neanderthals are led by only the strongest of their kind, and the typical leader has 6 HD. The lair will often have albino apes as trained pets and guardians. Neanderthals revere cave bears, and will hunt them for rites of passage and religious purposes. They despise kobolds, goblins, and morlocks, but enjoy the company of gnomes and dwarves.

Night Hag

No. Enc.: 1 (1)
 Alignment: Neutral (evil)
 Movement: 90' (30')
 Armor Class: 10
 Hit Dice: 8
 Attacks: 1
 Damage: 2d6
 Save: 11
 Morale: 8
 Hoard Type: None
 XP: 1,560

Night hags come from other dark planes of existence, and are viewed by some to be demons. They appear to be human females, but have long talons that deal 2d6 hp damage and have hideously ugly faces. They attack light creatures on sight if the odds of success seem favorable. A night hag has the following spell-like abilities usable at will: detect good, know alignment, polymorph self, sleep (affects up to 12th level beings). They may use the following spell-like abilities 3 times per day: magic missile (2d8 hp damage) and ray of enfeeblement. A night hag can become ethereal at will.

Night hags may visit the dreams of individuals by using a special periapt known as a heartstone. The hag takes ethereal form and hovers over the victim. Once a hag invades the victim's dreams, it rides on the victim's back until dawn. The sleeper suffers from tormenting dreams and permanently loses 1 point of CON upon awakening. This process may be repeated nightly until a victim reaches 0 CON and dies. If this happens, the hag returns to her home plane with the victim's soul, and the victim may not be raised, resurrected, or reincarnated.

Nightmare

No. Enc.: 1 (0)
 Alignment: Chaotic
 Movement: 150' (50')
 Fly: 360' (120')
 Armor Class: 23
 Hit Dice: 6 + 6
 Attacks: 3 (bite, 2 hooves)
 Damage: 2d4/1d6+4/1d6+4
 Save: 13
 Morale: 10
 Hoard Type: None
 XP: 980

These infernal horses are used as mounts by demons and night hags, or by intelligent and powerful undead. They have jet black hide and glowing hooves. These creatures can fly at will, and assume ethereal form whenever they choose, and often travel the astral plane. In addition to a powerful bite and flaming hooves, nightmares may attack by breathing a cloud of hot, smoky gas at an opponent. The victim must save versus breath attacks or become choked and blinded by the vapor, suffering a -2 penalty to attack and damage rolls for 1d4+2 rounds.

Nixie

No. Enc.: 0 (2d20)
 Alignment: Neutral
 Movement: 120' (40')
 Swim:
 Armor Class: 12
 Hit Dice: 1
 Attacks: 1
 Damage: 1d4
 Save: 16
 Morale: 6
 Hoard Type: XXI
 XP: 16

Nixies are related to dryads, but are water beings that are 3' tall and appear as beautiful elf-like women with greenish, bluish, or green-gray skin color. They typically live in any permanent body of water, such as a lake, large pond, or river. When 10 nixies are together in one place, they may pool their magical energy to cast a charm spell on a character. The victim is allowed a saving throw versus spells, and if this is failed the character is taken into the watery domain of the nixies where he will serve them for 12 months. Nixies are able to cast water breathing on a character, and the effects last for 24 hours per casting. Nixies attack with very small weapons. Nixies have the ability to summon a giant fish (bass) for protection. The giant bass has the following characteristics: AL N, MV 120' (40'), AC 7, HD 2, #AT 1, DG 1d6, SV F1, ML 8.

Nymph

No. Enc.: 0 (1d4)
 Alignment: Neutral (good)
 Movement: 120' (40')
 Armor Class: 10
 Hit Dice: 3
 Attacks: 0
 Damage: None
 Save: 15
 Morale: 6
 Hoard Type: IX, XI x 10
 XP: 80

Nymphs are stunningly beautiful female fey creatures that closely resemble elven women. They live in a variety of temperate sylvan settings, far from civilization. They have the ability to dimension door 1 time per day. Their appearance is so striking that anyone who lays eyes on a nymph must save versus spells or become permanently blind. If the nymph is nude, a failed save means death. Nymphs have the spell-casting abilities of a 7th level druid. They have their own language and speak common.

O

Ochre Jelly

No. Enc.: 1 (0)
 Alignment: Neutral
 Movement: 30' (10')
 Armor Class: 11
 Hit Dice: 14
 Attacks: 1
 Damage: 2d6
 Save: 13
 Morale: 12
 Hoard Type: None
 XP: 500

The ochre jelly is named for its color and the fact that it is a slimy, giant amoeba. The acidic slime that oozes from the ochre jelly can eat through cloth, wood, and leather after 1 round, but cannot affect stone or metal. It inflicts 2d6 hit points of damage to bare flesh, and is able to squeeze under doors and into other small spaces. When attacked with lightning or weapons, an

ochre jelly will divide into 1d4+1 littler amoebas with 2 HD each. These smaller jellies deal 1d6 hit points of damage.

Octopus, Giant

No. Enc.: 0 (1d2)
 Alignment: Neutral
 Movement: -
 Swim: 90' (30')
 Armor Class: 12
 Hit Dice: 8
 Attacks: 8 (tentacles) or 1 (bite)
 Damage: 1d3 (per tentacle)/1d6
 Save: 11
 Morale: 7
 Hoard Type: None
 XP: 2,060

These creatures are aggressive and territorial hunters, with arms reaching 10 feet or more in length. Their tentacles are studded with barbs and sharp-edged suckers. They live in temperate or tropical ocean waters. Tentacles constrict victims when they successfully attack, and deal 1d3 hit points of damage each per successive rounds. For each tentacle that is constricting a victim, the victim suffers a cumulative attack penalty of -1. For instance, if four tentacles are constricting a character, he suffers -4 to hit. A tentacle can be cut off if a total of 6 hit points or more of damage is dealt with one blow. A giant octopus may swim away if it is losing an encounter, and it will spray a 40' radius cloud of black ink to obscure its escape. The giant octopus is able to move at its normal movement x3 when fleeing.

Ogre

No. Enc.: 1d6 (2d6)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 14
 Hit Dice: 4 + 1
 Attacks: 1 (club)
 Damage: 1d10
 Save: 15
 Morale: 10
 Hoard Type: XX + 1,000 gp
 XP: 215

Adult ogres stand 9 to 10 feet tall, and resemble big brutish humans. Their skin color ranges from dull yellow to dull brown. Their clothing consists of poorly cured furs and hides, which add to their naturally repellent odor. Ogres despise Neanderthals and will attempt to destroy them when encountered. Ogres usually live under rock shelters, or in caves, and will venture into labyrinths. When ogres are found away from their lair they will have sacks containing 1d6x100 gp.

Ogre Mage

No. Enc.: 1d6 (1d6)
 Alignment: Chaotic
 Movement: 90' (30')
 Fly: 150' (50')
 Armor Class: 15
 Hit Dice: 5 + 2
 Attacks: 1
 Damage: 1d12
 Save: 13
 Morale: 9
 Hoard Type: IX, XVII
 XP: 660

The ogre mage is a more intelligent and dangerous variety of its mundane cousin. An ogre mage stands about 10' tall. Its skin varies in color from light green to light blue, and its hair is black or very dark brown. Ogre mages favor loose, comfortable clothing and lightweight armor. Ogre mages rely on their spell-like abilities, resorting to physical combat only when necessary. They can fly for 12 turns, and have the following spell-like abilities at will: darkness 10' radius, invisibility, and polymorph self (from 4' to 12' tall). Once per day ogre magi may use the following abilities: charm person, gaseous form, sleep, and a

cone of cold (as the wand of ice for 8d6 damage). An ogre mage regenerates 1 hp per round. When found in their lair, there is a 60% chance that 2d6 slaves are present. Ogre mages speak their own language, ogre, troll, common and their alignment tongue.

Orc

No. Enc.: 2d4 (1d6x10)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 13
 Hit Dice: 1
 Attacks: 1 (weapon)
 Damage: 1d6 or weapon
 Save: 16
 Morale: 8
 Hoard Type: XIX
 XP: 10

Orcs' hair is usually black. They have pig-like faces and reddish eyes. Orcs prefer wearing vivid colors that many humans would consider unpleasant, such as blood red, mustard yellow, yellow-green, and deep purple. Their equipment is dirty and unkempt. An adult male orc is a little over 6 feet tall and females are slightly smaller. Orcs are primarily subterranean, but they are also nocturnal and may be found on the surface at night. They suffer a penalty of -1 to hit rolls when in sunlight. Orcs are exceedingly cruel and delight in the torment of others.

A party of orcs will have a leader who has 8 hit points, and is exceptionally strong. He receives a +1 bonus to weapon damage rolls. Should the leader of a party of orcs be slain, the remaining orcs have a morale of 6. Orcs are exceptionally greedy and love to kill, which makes them particularly attractive to dark rulers who hire orcs as mercenary soldiers. Orcs will employ any kind of hand or missile weapon.

Orcs are socially organized around warring tribes, which have repulsive names like the "Vile Eye" tribe or the "Bloody Skull" tribe. Tribes seldom work together unless united under strong (and fear inducing) leadership. Any tribe has a roughly equal number of males and females, with as many children as there are adults. The orc tribal chief fights as a monster with 4 HD and has 15 hit points. He will be very strong, having a weapon damage roll bonus of +2. There is a 60% chance that any tribe consisting of 20 or more orcs will have an ogre present. There is a 10% chance that a tribe of 20 or more orcs has a troll present.

Otyugh

	<i>Standard</i>	<i>Advanced</i>
No. Enc.:	1 (2)	1 (1)
Alignment:	Neutral	Neutral
Movement:	60' (20')	60' (20')
Armor Class:	16	19
Hit Dice:	6-8	9-12
Attacks:	3 (2 tentacles, bite)	3 (2 tentacles, bite)
Damage:	1d8/1d8/1d4+1	2d6/2d6/2d4
Save:	15	12
Morale:	10	9
Hoard Type:	See below	See below
XP:	820; 1,140; 1,560	2,400; 2,800

A typical standard or advanced otyugh has a body 8' in diameter. Both kinds have a short pseudopod extending from their thick hides, which is covered in eyes. This prevents them from being surprised.

Standard: An otyugh attacks living creatures if it feels threatened or if it is hungry; otherwise it is content to remain hidden, eating carrion or left over kills from predators. Otyughs slash opponents with their barbed tentacles for 1d8 hp damage each, and their mouths deal a hideous bite from which the victim must save versus poison or contract a rotting disease that inflicts 1d3 hp damage per day. These creatures have a low intelligence, but have a unique language and can communicate telepathically. They keep no treasure of their own, but may partner with other monsters and help guard treasure in exchange for leftovers.

Advanced: Advanced otyughs are more aggressive, more powerful relatives of standard otyughs. They are much more intelligent.

Owl, Giant

No. Enc.: 1d4+1 (1d4+1)
 Alignment: Neutral
 Movement: 30' (10')
 Fly: 180' (60')
 Armor Class: 13
 Hit Dice: 4
 Attacks: 3 (2 talons, beak)
 Damage: 2d4/2d4/1d4+1
 Save: 15
 Morale: 8
 Hoard Type: XI x 5, XXII (magic only)
 XP: 80

Giant owls are nocturnal birds of prey, feared for their ability to hunt and attack in near silence. They are intelligent, and though naturally suspicious, sometimes associate with good creatures. A typical giant owl stands about 9' tall, has a wingspan of up to 20', and resembles its smaller cousins in nearly every way except size. Giant owls have a language of their own, and often speak common. In a lair there is a 25% chance of finding 1d4 eggs, and a 25% chance of finding 1d4 chicks. Eggs and young are very valuable, as they can be raised and trained as companions.

Owl Bear

No. Enc.: 1d4 (1d4)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 14
 Hit Dice: 5
 Attacks: 3 (2claws, bite)
 Damage: 1d8/1d8/1d8
 Save: 14
 Morale: 9
 Hoard Type: XX
 XP: 350

Having the head of a giant owl and the body of a bear, owl bears are rumored to be a magical hybrid created for an unfathomably dark purpose. Their coats range in color from brown-black to yellowish brown; their beaks are a dull ivory color. A full-grown male can stand as tall as 8 feet and weigh up to 1,500 pounds. Adventurers who have survived encounters with the creature often speak of the bestial madness they glimpsed in its red-rimmed eyes. They are mean spirited carnivores. Just like bears, an owl bear may hug an opponent for 2d8 hit points of damage if it successfully hits with both paws in the same round. Owl bears are known to live in wooded areas, and are equally likely to take residence in caves or labyrinths.

P

Pegasus

No. Enc.: 0 (1d12)
 Alignment: Lawful
 Movement: 240' (80')
 Fly: 480' (160')
 Armor Class: 13
 Hit Dice: 2 + 2
 Attacks: 2 (hooves)
 Damage: 1d6/1d6
 Save: 16
 Morale: 8
 Hoard Type: None
 XP: 47

The pegasus is a magnificent winged horse that sometimes serves the cause of good. Though highly prized as aerial steeds, pegasi are wild and shy creatures not easily tamed. If young pegasi are tamed they can be used as mounts, but pegasi will only cooperate with light characters. Pegasi avoid hippogriffs, which are their predators.

Phase Tiger

No. Enc.: 1d4 (1d4)
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 15
 Hit Dice: 6
 Attacks: 2 (tentacles)
 Damage: 2d4/2d4
 Save: 14
 Morale: 8
 Hoard Type: XIX
 XP: 570

The phase tiger is not truly a cat, but is fairly intelligent and resembles a six-legged tiger with a long, scaly reptilian spiked whip on each shoulder. The whips have sharp barbs, which inflict 2d4 hit points of damage each. All opponents of a phase tiger receive a penalty of -2 to hit, due to the magical ability of the phase tiger to seem to be in a position that is 3' from where it actually stands. In addition, phase tigers have a saving throw bonus of +2 (all saving throws). Blink dogs are hated enemies of phase tigers, and a phase tiger will seek to kill any blink dogs encountered.

Piercer

No. Enc.: 3d6 (3d6)
 Alignment: Neutral
 Movement: 10' (3')
 Armor Class: 16
 Hit Dice: 1-4
 Attacks: 1
 Damage: 1d6 per HD
 Save: 16
 Morale: 10
 Hoard Type: None
 XP: 10, 20, 50, 80

These creatures are specially adapted to cavernous environments, as they perfectly resemble stalactites. When they sense body heat or movement, they drop from a cavern ceiling to impale and eat a victim. The largest ones are 6' long, and the smallest are 1' long.

Pixie

No. Enc.: 2d4 (1d4x10)
 Alignment: Neutral
 Movement: 90' (30')
 Fly: 180' (60')
 Armor Class: 16
 Hit Dice: 1
 Attacks: 1 (dagger)
 Damage: 1d4
 Save: 14
 Morale: 7
 Hoard Type: III + IV
 XP: 16

These 1' or 2' tall cousins to elves have wings like an insect's. These wings are relatively weak, and a pixie must spend 1 turn on its feet for each 3 turns spent flying. Pixies are naturally invisible, but may choose to become visible at will. The spell detect invisibility will reveal their presence. Pixie invisibility is unlike the spell of the same name in that a pixie may act freely, including attacking, without becoming visible. Because of this advantage, a pixie will have surprise on its opponent. An opponent cannot attack a pixie during the first round they are engaged in combat, but in the second round an opponent may strike due to hearing the pixie and otherwise having some idea where it might be as it moves. Attacks made against an invisible pixie are rolled with a penalty of -2.

Pseudo-dragon

No. Enc.: 1 (1)
 Alignment: Neutral (good)
 Movement: 60' (20')
 Fly: 240' (80')
 Armor Class: 17
 Hit Dice: 2
 Attacks: 1 (bite or tail)
 Damage: 1d3 or poison
 Save: 15
 Morale: 7
 Hoard Type: XI x 10
 XP: 38

These intelligent dragon-like creatures are at most 2' long, and live in temperate climates. They frequently take residence in labyrinths, or in secluded wilderness locales. Although by nature they are rust brown in color, they have the ability to blend into their surroundings, rendering them undetectable 80% of the time. They may attack with a bite, but prefer to use their whip-like tails that attack with +4 to hit. Victims take no damage, but must save versus poison or fall into a state like feign death for 1d6 days. However, unlike the spell, victims are unaware of their surroundings. There is a 25% chance that when the duration is up the victim dies. Pseudo-dragons are able to see invisible creatures or objects. They receive +4 to all saving throws versus magic, and can confer this bonus to another creature if they are touching. Pseudo-dragons are telepathic, and are able to grant clairaudience and clairvoyance centered on themselves, to another being within 240'.

Pterodactyl

	<i>Pterodactyl</i>	<i>Pteranodon</i>
No. Enc.:	0 (2d4)	0 (1d4)
Alignment:	Neutral	Neutral
Movement:	-	-
Fly:	180' (60')	240' (120')
Armor Class:	12	13
Hit Dice:	1	5
Attacks:	1 (bite)	1 (bite)
Damage:	1d3	1d12
Save:	18	15
Morale:	7	8
Hoard Type:	None	VII
XP:	13	350

These prehistoric winged reptiles are usually found in warm or tropical environments.

Pterodactyl: These large winged reptiles have wings that span 7 to 10 feet. They glide through the air, watching for prey on the ground. They typically attack small animals, or beings up to the size of a halfling. They have been known to attack larger beings if they are particularly famished.

Pteranodon: This winged reptile is a giant version of the pterodactyl, and has wings that can span up to 50'. They attack larger animals, including human-sized individuals.

Purple Worm

No. Enc.: 1d2 (1d4)
 Alignment: Neutral
 Movement: 60' (20')
 Armor Class: 13
 Hit Dice: 15
 Attacks: 2 (bite, sting)
 Damage: 2d8/1d8, poison
 Save: 4
 Morale: 10
 Hoard Type: XIX
 XP: 3,300

The body of a mature purple worm is 10' in diameter and 100' long or more. The creature has a poisonous stinger in its tail. These dreaded purple monstrosities burrow underground, only surfacing to consume unsuspecting prey. They may attack with both a bite and their stinging tail in 1 round. Anyone stung by the tail must also succeed in a saving throw versus poison or die. If a purple worm's bite attack roll is at least 4 higher than

the roll needed to hit (or a 20 is rolled), a victim is swallowed. A being that is swallowed takes 3d6 hit points of damage per round inside the purple worm's belly. The damage stops when either the character dies or the worm is killed. When a purple worm is found below the earth, it is usually from inside one of its tunnels. In this case the tunnel may only be as wide as the worm, preventing it from attacking with both attacks in the same round.

R**Rakshasa**

No. Enc.: 1d4 (1d4)
 Alignment: Chaotic
 Movement: 150' (50')
 Armor Class: 23
 Hit Dice: 7
 Attacks: 3 (2 claws, bite)
 Damage: 1d3/1d3/1d4+1
 Save: 12
 Morale: 9
 Hoard Type: XVIII
 XP: 1,840

These creatures are said to be a kind of demon. They have bodies resembling humans, but for their deadly claws and the head of a large cat, either a tiger, lion, or panther. Rakshasas are man-eaters, preferring the flesh of humans and dwarves. They have the spell-like abilities ESP and change self, which they often use in combination to assume an agreeable form to a potential victim. These creatures have the spell casting abilities of 1st level clerics and 3rd level magic-users. Rakshasas are unaffected by normal weapons, and suffer 50% damage from weapons that are +1, +2, or +3. In addition, they are immune to the effects of all spells save those of 9th level. When multiple Rakshasas are encountered there is 1 male with up to 3 females.

Rat

	<i>Ordinary</i>	<i>Giant</i>
No. Enc.:	5d10 (2d10)	3d6 (3d10)
Alignment:	Neutral	Neutral
Movement:	60' (20')	120' (40')
Swim:	30' (10')	60' (20')
Armor Class:	10	12
Hit Dice:	1 hit point	1d4 hit points
Attacks:	1 (bite, per group)	1 (bite)
Damage:	1d6, disease	1d3, disease
Save:	18	16
Morale:	5	8
Hoard Type:	XI	XX
XP:	6	6

Rats are omnivorous rodents that thrive in human trash on the fringes of dwellings. They are disease carriers, and any time a character is bitten by a rat of any variety there is a 5% chance the character contracts a disease. A saving throw versus poison is permitted, and should it fail the character dies of the disease 1d6 days later. A successful saving throw indicates that the character gets ill and is bedridden for 30 days, at the end of which there is a 25% chance the disease proves fatal. The spell cure disease will cure this infection. Rats may be warded away with fire. They are adept swimmers, who are at home in sewers, water-filled caverns, and marshes.

Ordinary Rats: Ordinary rats range in size from 6" long to 2' long. They can be black, brown, or gray in color. They live in packs that can consist of great numbers. Rat packs get 1 attack per 10 individuals, inflicting 1d6 hit points of damage per hit. If a character is swarmed by a whole pack, he must succeed in a saving throw versus death or fall to the ground under the writhing rodent horde. He may stand up the following round, but makes a new saving throw if still under the swarm. The opponent can make no attacks until he gets back on his feet.

Giant Rats: These rats are minimally 3' long, but may be larger. They attack individually. Giant rats live in refuse like their smaller cousins, and can be found in the litter that often accumulates in a labyrinth.

Remorhaz

No. Enc.: 1 (1)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 19, belly 16, head 17
 Hit Dice: 7-14
 Attacks: 1 (bite)
 Damage: 6d6
 Save: 14 - 10
 Morale: 10
 Hoard Type: XVIII
 XP: 1,140

A remorhaz is a whitish-blue in color multilegged lizard-like creature that pulses with a reddish glow from the heat its body produces. The creature is 20' long with 7 HD, 24' long with 8 HD, 28' long with 9 HD, and so on. Remorhazes hide under snow and ice until they hear movement above them, then attack from below and surprise prey. Once at the surface, they rear to attack, exposing their more vulnerable bellies. When these creatures are 8 HD or more, they are large enough to have a swallow attack in addition to their normally powerful bites. Swallowed victims are killed immediately because of the extreme heat within these creatures' innards. When in combat, the remorhaz's backside heats to an infernally hot temperature. Any non-magical weapons touching their bodies melt immediately, and magical items must make saving throws. If a being touches the hot hide it suffers 1d10x100 hp damage.

Rhagodessa, Giant

No. Enc.: 1d4 (1d6)
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 14
 Hit Dice: 4 + 2
 Attacks: 1 (leg or bite)
 Damage: 0 or 2d8
 Save: 16
 Morale: 9
 Hoard Type: VI
 XP: 215

The giant rhagodessa is a nocturnal carnivorous arachnid that closely resembles a spider, but has immense crushing mandibles. They have a chestnut colored thorax and are tan or mustard colored on their remaining bodies. These 6' long monsters have shorter legs than spiders, but are able to climb walls. The rhagodessa's front legs have suction pits that do not deal damage, but on a successful hit they can pull an opponent to the mandibles that deal 2d8 hit points of damage on the second round, with no extra attack roll needed.

Rhinoceros

	Ordinary	Woolly
No. Enc.:	0 (1d12)	0 (1d8)
Alignment:	Neutral	Neutral
Movement:	120' (40')	120' (40')
Armor Class:	14	15
Hit Dice:	6	8
Attacks:	1 (butt or trample)	1 (butt or trample)
Damage:	2d4 or 2d8	2d6 or 2d12
Save:	17	15
Morale:	6	6
Hoard Type:	None	None
XP:	570	1,060

The rhinoceros is infamous for its bad temper and willingness to charge intruders. They deal double damage after charging. A herd of these beasts will stampede if threatened, in any direction to be determined randomly.

Woolly Rhinoceros: The woolly rhino is a prehistoric rhino that is larger and covered in a dense, coarse hair.

Roc

	Small	Large	Giant
No. Enc.:	0 (1d12)	0 (1d8)	0 (1)
Alignment:	Lawful	Lawful	Lawful
Movement:	60' (20')	60' (20')	60' (20')
Fly:	480' (160')	480' (160')	480' (160')
Armor Class:	15	17	19
Hit Dice:	6	12	36
Attacks:	----- 3 (2 claws, bite) -----		
Damage:	1d4+1/1d4+1 2d6	1d8/1d8/ 2d10	3d6/3d6/ 8d6
Save:	15	11	7
Morale:	8	9	10
Hoard Type:	XIV	XIV	XIV
XP:	320	1,200	6,750

Rocs are powerful creatures living in high elevations and warm environments. They look somewhat like huge eagles. Their immense appetites accompany the great size of rocs, as rocs will frequently consume large mammals including horses and cattle. Rocs hunt much like eagles, swooping down on their meal and striking it with immense claws. When a roc nest is encountered, there is a 50% probability that 1d6 eggs or 1d4 young are present. Rocs fight to the death to defend their young. If eggs or chicks are captured, they can be trained as mounts. If a dark being encounters a roc, the roc will have a penalty of -2 to reaction checks, and a neutral being imposes a -1 penalty. This is due to the light nature of rocs, and their preference for dealing with other light creatures.

Roper

No. Enc.: 1d3 (1d3)
 Alignment: Chaotic
 Movement: 30' (10')
 Armor Class: 19
 Hit Dice: 10-12
 Attacks: 1
 Damage: 5d4
 Save: 11
 Morale: 8
 Hoard Type: V x 2
 XP: 2,400

A roper stands some 9' tall and tapers from 3 or 4 feet in diameter at the base to 1 foot across at the top. A roper's coloration and temperature change to match the features of the surrounding cave. A roper hunts by standing very still and imitating a stalagmite. This tactic often allows it to attack with surprise. When prey comes within reach, it lashes out with one of its six rope-like strands to a distance of up to 50'. If a roper hits with a strand attack, the strand latches onto the opponent's body. This deals no damage but drags the opponent to the roper's immense mouth, in 10' increments per round. In addition, the victim suffers from weakness for 1d4 rounds. A character must succeed in a force doors check in order to break away from a roper's strand. Ropers suffer only 50% damage from cold-based attacks, and are immune to electrical-based attacks. However, fire is disagreeable to them and they suffer -4 to save versus fire-based attacks.

Rot Grub

No. Enc.: 0 (5d4)
 Alignment: Neutral
 Movement: 10' (2')
 Armor Class: 10
 Hit Dice: 1 hit point
 Attacks: See below
 Damage: See below
 Save: 19
 Morale: Not applicable
 Hoard Type: None
 XP: 5

Although rot grubs can be found in animal waste and other foul refuse, they prefer to consume tissue that is still alive. Upon contact with a living being, rot grubs will begin to vigorously burrow deep into the body. Fire must be applied to the site of contact at once in order to prevent the rot grubs from burrowing further. This application of flame inflicts 1d6 hit points of damage per instance. If not stopped immediately, within 1d3x10 minutes the rot grubs will find the heart and kill their victim. The spell cure disease will destroy the rot grubs in a victim's body.

Rust Monster

No. Enc.: 1d4 (1d4)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 17
 Hit Dice: 5
 Attacks: 1
 Damage: See below
 Save: 14
 Morale: 7
 Hoard Type: None
 XP: 500

The body of this monster resembles a giant armadillo, and it has a long scaly tail. The hide of these creatures varies in color from a yellowish tan underside to a rust-red upper back. A rust monster's prehensile antennae can rust metals on contact, as can their hide when struck with metal weapons. All ordinary metal armor and weapons either struck by antennae or contacting a rust monster's hide (when it is attacked with a sword, for instance) instantly becomes utterly and permanently useless from severe rusting. Due to this effect, ordinary metal weapons do not harm rust monsters. Magic items will first lose their magical bonuses, 1 at a time, until they are ordinary items of their type. Any subsequent contact will then rust the item. Each "plus" grants the item a 10% probability of surviving contact unscathed. For instance, if a character strikes a rust monster with a dagger +2, it has an 80% chance of becoming a dagger +1. If it does, any subsequent hit has a 90% chance of making the dagger an ordinary dagger. If it becomes an ordinary dagger, a hit after that renders the dagger useless. A rust monster feeds upon the rust it creates in this manner.

S

Sahuagin

No. Enc.: 4d4 (3d4x10)
 Alignment: Chaotic
 Movement: 120' (40')
 Swim: 240' (80')
 Armor Class: 14
 Hit Dice: 2 + 2
 Attacks: 3, 5 (2 or for claws, bite) or 1 (by weapon)
 Damage: 1d2/1d2/1d2/1d4 or As weapon
 Save: 16
 Morale: 8
 Hoard Type: V, XI + XV
 XP: 47

Sahuagin are irredeemably evil fish-like humanoids that worship infernal forces. Most feature green coloration, darker along the back and lighter on the belly. Many have dark stripes, bands, or spots, but these tend to fade with age. An adult male sahuagin stands roughly 6' tall. They only live in saltwater, and may dwell in shallow waters near shore or in very deep locations far at sea. They have kingdoms under the waves that ape human societal structures. Sahuagin typically fight with tridents and nets (50%) or daggers, spears, and crossbows (25%). If unarmed, they attack with 2 claws and a bite when on shore, or 2 claws, 2 foot rakes, and a bite when under water. These creatures travel in bands led by a 4 HD chief. When 10 or more are encountered, there will be a 3 HD guard per 10 sahuagin in the group. When found in their lair, half of the sahuagin will be 2 HD females, and 25% are 1 HD hatchlings. There will be 2d4x10 eggs. In their

lair there will be a 9 HD baron. There is a 10% per 10 sahuagin encountered that there is a 5th to 8th level cleric and 1d4 4th level cleric assistants. In addition, in the lair there is a 5% chance a prince will be present, along with 2d4 chieftains of 3 HD and 3d10 2 HD concubines. When a prince is present there will always be clerics present as mentioned above. Lairs are typically guarded by 2d4 sharks, or 4d4 if a prince is present. Sahuagin often take human prisoners under the sea, where they are subject to unspeakable tortures.

Salamander

	<i>Flame</i>	<i>Frost</i>
No. Enc.:	1d4+1 (2d4)	1d3 (1d3)
Alignment:	Neutral	Chaotic
Movement:	120' (40')	120' (40')
Armor Class:	17	16
Hit Dice:	8	12
Attacks:	3 (2 claws, bite)	5 (4 claws, bite)
Damage:	1d4/1d4/1d8	1d6 (each claw)/2d6
Save:	12	9
Morale:	8	9
Hoard Type:	XVII	XVIII
XP:	2,060	3,600

Flame Salamander: The flame salamander is a kind of intelligent fire elemental. It has a lizard-like appearance, with red scales and four limbs. It reaches a length of 12' to 16'. Scorching heat emanates from the flame salamander, and all creatures within 20' who are susceptible to fire damage receive 1d8 hit points of damage per round. Flame salamanders are unharmed by all fire-based damage and non-magical weapons. They are unaffected by sleep or charm spells. These creatures often live in the molten lava of volcanoes, or otherwise in very hot and arid regions.

Frost Salamander: The frost salamander resembles a flame salamander, except that it has six limbs and is white or bluish white. It attacks with its front four claws and a bite. Bone-chilling cold emanates from the frost salamander, and all creatures within 20' that are susceptible to cold damage receive 1d8 hit points of damage per round. Frost salamanders are unharmed by all cold-based damage and non-magical weapons. They are unaffected by sleep or charm spells. These creatures prefer to live in icy and cold regions.

These two forms of salamander are natural enemies. They despise one another and will always fight if in the same vicinity.

Satyr

No. Enc.: 2d4 (2d4)
 Alignment: Neutral
 Movement: 180' (60')
 Armor Class: 14
 Hit Dice: 5
 Attacks: 1 (horns)
 Damage: 2d4
 Save: 14
 Morale: 7
 Hoard Type: IX, XVIII
 XP: 350

A satyr's hair is red or chestnut brown, while its hooves and horns are jet black. They live carefree lifestyles in isolated sylvan settings, where they enjoy good wine and seducing dryads, nymphs, and elven women. Satyrs avoid combat, but when forced they attack with their horns. There is a 25% chance that a satyr has a magical weapon. In any group of satyrs, one member has a set of magical pipes only usable by their kind. It has the effects of charm, sleep, and fear for beings within 60' who fail a save versus spells. If the save succeeds, that being cannot be affected by the same pipes again. Satyrs can be 90% invisible in wilderness settings, and their keen senses make them surprised only on a 1 on 1d6. Satyrs speak their own language, elven, and common.

Scorpion, Giant

No. Enc.: 1d6 (1d6)
 Alignment: Chaotic
 Movement: 150' (50')
 Armor Class: 17
 Hit Dice: 4
 Attacks: 3 (2 claws, sting)
 Damage: 1d10/1d10/1d4, poison
 Save: 15
 Morale: 11
 Hoard Type: VII
 XP: 190

These aggressive giant cousins to scorpions are about 6' long. Any time that a claw successfully strikes, the sting attack receives a bonus of +2 to hit. If stung, a victim needs to succeed at a saving throw versus poison or die. Giant scorpions can be found in labyrinths, rock shelters, ruins, and hot environments.

Sea Hag

No. Enc.: 1d4 (1d4)
 Alignment: Chaotic
 Movement: 150' (50')
 Armor Class: 12
 Hit Dice: 3
 Attacks: 1 (weapon)
 Damage: 1d4 (dagger)
 Save: 14
 Morale: 7
 Hoard Type: XIV
 XP: 95

This race of vile females lives in shallow fresh or saltwater areas. They consume humanoid flesh, and to that end they have a gaze that will instantly kill a victim within 30' that fails a save versus poison (usable 3 times per day).

These creatures are so hideous that any being looking at one must save versus magic or lose 50% of his STR for 1d6 turns.

Sea Serpent

	Normal	Giant
No. Enc.:	0 (2d6)	1 (1)
Alignment:	Neutral	Neutral
Movement:		
Swim:	150' (50')	250' (100')
Armor Class:	14	17
Hit Dice:	6	30
Attacks:	1 (bite or constrict)	1 (bite or constrict)
Damage:	2d6 or see below	4d6 or see below
Save:	14	3
Morale:	8	7
Hoard Type:	None	None
XP:	570	

Sailors dread sea serpents. Small serpents are immense, 30' long snake-like sea beasts that will attack ships that are 30' long or smaller. It wraps its serpentine body around ships to constrict for 1d10 structural hit points of damage each round. When attacking creatures or characters it attacks with a bite that deals 2d6 hit points of damage. Giant serpents are also known as Sea

Terrors and gigantic, 120' long snake-like sea beasts that will attack ships that are 100' long or smaller. It wraps its serpentine body around ships to constrict for 4d6 structural hit points of damage each round. When attacking creatures or characters it attacks with a bite that deals 4d6 hit points of damage and can swallow up to human-sized creatures whole.

Shadow

No. Enc.: 1d8 (1d12)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 12
 Hit Dice: 2 + 2
 Attacks: 1
 Damage: 1d4, special
 Save: 16
 Morale: 12
 Hoard Type: XVII
 XP: 83

Although shadows seem to resemble ghosts, since they have no corporeal body and resemble shadows, but they are not truly undead creatures. As a consequence, shadows are not susceptible to the cleric ability to turn undead. Shadows may only be struck with magical weapons. However, like undead, shadows are unaffected by charm or sleep spells. Shadows are very silent and difficult to observe. They will surprise on a surprise check roll of 1-5 on 1d6. When a shadow successfully attacks an opponent, the victim suffers 1d4 hit points of damage, and 1 point of STR is drained for 8 turns. Should a being be drained to STR 0, it permanently transforms into a shadow.

Shambling Mound

No. Enc.: 1d3 (1d3)
 Alignment: Neutral
 Movement: 60' (20')
 Armor Class: 19
 Hit Dice: 8-11
 Attacks: 2
 Damage: 2d8/2d8
 Save: 12
 Morale: 12
 Hoard Type: VIII, IX, XIV
 XP: 1,820

Shambling mounds, also called shamblers, appear to be heaps of rotting vegetation. They are actually intelligent, carnivorous plants. A shambler's brain and sensory organs are located in its upper body, buried deep within its slimy dense trunk. A shambler's body has an 8' girth and is about 6' tall when the creature stands erect. These creatures batter opponents with two huge, arm-like appendages. If both hit in the same round, a victim has been grabbed and it will be smothered to death by the shambler's abundant mucus in 2d4 rounds. The victim can only get free if the shambler is killed. Shamblers take no damage from electricity. Instead, any electricity attack used against a shambler grants it 1 HD (the creature actually grows). In addition, fire-based attacks do not harm it. Cold-based attacks do half damage, or no damage if the shambler succeeds in a saving throw. Weapons deal half damage. However, since shamblers are intelligent plant creatures they are susceptible to spells that affect plants.

Save:	16	12
Morale:	7	10
Hoard Type:	None	None
XP:	1,060	1,070

Sharks are some of the most efficient hunters of the sea. Although they are not very intelligent, they are cunning. As soon as sharks sense blood in the water (to a range of 300') they become furious feeders and will fight to the death with no check for morale.

Bull Shark: Bull sharks are brown and reach a length of 8'.

Mako Shark: These giant 15' sharks will attack large prey. They are tan or gray.

Great White Shark: This immense shark can reach lengths exceeding 30'. They are silvery-gray with white bellies. These sharks are vicious, and may attack boats that are half their length.

Giant Shark: These giant sharks are 25' to 50' long, but are otherwise much like their smaller cousins. Giant sharks have a swallow attack. A swallowed victim will die in 6 rounds unless the shark is killed before that time.

Shrew, Giant

No. Enc.:	1d4 (1d8)
Alignment:	Neutral
Movement:	180' (60')
Armor Class:	15
Hit Dice:	1
Attacks:	2 (bite)
Damage:	1d6/1d6
Save:	18
Morale:	10
Hoard Type:	None
XP:	19

Giant shrews are rodents, and in some ways resemble giant rats. However, shrews have slightly longer snouts and are burrowing animals with reduced eyesight. They can jump up to 5'. Giant shrews are able to echolocate in a fashion not unlike bats, by emitting small squeaks. With this kind of "vision" they are able to see 60', and this may be blocked with the spell silence 15' radius. A deafened (and thus blinded) giant shrew has an effective AC of 8 and suffers a -4 penalty to attack rolls. Giant shrews are insectivores, and are highly territorial. They will attack trespassers, and are extremely fast. They automatically have initiative on the first round of combat, and have a bonus of +1 on the second round. Giant shrews are fearsome, vicious fighters and they are extremely intimidating. Any opponent with 3 HD or fewer must succeed in a saving throw versus death or flee.

Shrieker

No. Enc.:	1d8 (0)
Alignment:	Neutral
Movement:	9' (3')
Armor Class:	12
Hit Dice:	3
Attacks:	See below
Damage:	See below
Save:	16
Morale:	12
Hoard Type:	None
XP:	65

A shrieker is a stationary fungus, resembling a large mushroom, that emits a loud noise to attract prey or when disturbed. Shriekers live in dark, subterranean places, and come in of shades of purple. The shrieker will emit its scream if it senses movement within 30', or light comes within 60'. The scream persists for 1d3 rounds. For every round a shrieker is screaming, there is a 50% probability that it has caught the attention of a wandering monster. Wandering monsters will arrive on the scene within 2d6 rounds.

Skeleton

No. Enc.:	3d4 (3d10)
Alignment:	Chaotic
Movement:	60' (20')
Armor Class:	12
Hit Dice:	1
Attacks:	1
Damage:	1d6 or weapon
Save:	18
Morale:	12
Hoard Type:	None
XP:	13

Skeletons are the animated bones of the dead, mindless automatons that obey the orders of their evil masters. A skeleton is seldom garbed in anything more than the rotting remnants of any clothing or armor it was wearing when slain. A skeleton does only what it is ordered to do. It can draw no conclusions of its own and takes no initiative. Because of this limitation, its instructions must always be simple. A skeleton attacks until destroyed. Skeletons are undead, and a cleric may turn them. Like other undead, skeletons are unaffected by charm or sleep spells.

Slithering Tracker

No. Enc.:	1 (1)
Alignment:	Neutral
Movement:	120' (40')
Armor Class:	14
Hit Dice:	5
Attacks:	0
Damage:	None
Save:	13
Morale:	10
Hoard Type:	XX
XP:	500

This creature looks like a long, thin transparent protoplasm, almost snake-like in form. It is an amorphous and transparent creature that inhabits dark underground areas of the world. It blends so well with the environment that it can only be seen 5% of the time. Unlike other oozes, the slithering tracker does not feed on organic matter. It survives by devouring living creatures. A typical slithering tracker is 3' long. It generally does not attack victims immediately, but instead follows them until they go to sleep. Then it contacts a victim's skin, and if the victim fails a save versus paralyze then the creatures poisonous slime paralyzes the victim permanently. The slithering tracker then engulfs the victim and digests it in 6 turns.

Slug, Giant

No. Enc.:	1 (1)
Alignment:	Neutral
Movement:	60' (20')
Armor Class:	11
Hit Dice:	12
Attacks:	1 (bite)
Damage:	1d12
Save:	11
Morale:	10
Hoard Type:	None
XP:	2,000

Giant slugs are larger, much stronger versions of normal slugs. They are pale gray in color with a dull white underbelly. They have a single pair of long, thin tentacles or antennae. The giant slug uses them to sense brightness, heat, and to smell. A typical giant slug is 20' long but can grow to twice that length. Its

squishy flexible body allows it to squeeze into relatively narrow corridors, though it may be in such a way as to prevent turning. A large slime trail marks the ground as it moves. Giant slugs are found in moist or wet environments such as swamps, marshes, rain forests, and dungeons. They are both scavengers and predators feeding on both plants and animals. Giant slugs are nocturnal creatures and spend the daylight hours away from the heat of the sun. Giant slugs may attack with a bite, but they often employ their highly dangerous acid spittle to a range of 60'. If struck, a victim suffers 5d8 hp acid damage. Giant slugs are only harmed by sharp weapons or magical blunt weapons (magical value deals damage only).

Snake

	<i>Spitting Cobra</i>	<i>Pit Viper</i>	<i>Sea Snake</i>

Save:	15	16
Morale:	8	8
Hoard Type:	VI	VI
XP:	350	135

Snakes are legless reptiles, and often have venomous bites. Snakes usually are not aggressive and flee when confronted. They live in many different climates, but especially avoid severely cold environments.

Spitting Cobra: Like most snakes, the 3' long spitting cobra avoids conflict. However, if it is threatened it will rear up and emit poisonous spittle. A victim is entitled to a saving throw versus poison, and failure indicates the opponent is blinded. The spell cure blindness will reverse the effects. The bite of the cobra deals 1d3 hit points of damage, and is venomous. A victim must succeed in a saving throw versus poison or be killed after 1d10 turns.

Pit Viper: This gray-green snake is 5' long, and the pits on its head are able to sense heat to a distance of 60'. Pit vipers are extremely fast, and will automatically have initiative every round. They have a venomous bite that requires a successful saving throw versus poison, or the victim dies.

Sea Snake: These 6' long aquatic snakes are extremely poisonous and aggressive. Their bites do very little damage, but like other venomous snakes, a victim must succeed in a saving throw versus poison or die after 1d4 + 2 turns. There is a 50% probability that a victim, if unaware of the snake's presence, will not realize he has been bitten. The poison from a sea snake is particularly potent, and the spell neutralize poison is ineffective 25% of the time.

Giant Python: The giant python is 20' long. It attacks first with a bite, and on a successful hit it is also able to constrict a victim for an additional 2d4 hit points of damage. The constriction continues on subsequent rounds.

Giant Rattlesnake: These snakes are extremely quick, and bite twice per round. One bite occurs at the beginning of the round, and another at the end of the round. The bite is venomous, and

a victim must succeed in a saving throw versus poison, or die 1d6 turns later. The giant rattlesnake is 10' long, carnivorous, and will hunt large mammals.

Spectre

No. Enc.:	1d4 (1d8)
Alignment:	Chaotic
Movement:	150' (50')
Fly:	300' (100')
Armor Class:	17
Hit Dice:	6
Attacks:	1 (touch)
Damage:	1d8, drain level
Save:	10
Morale:	11
Hoard Type:	XVIII
XP:	1,070

A spectre is an undead creature that looks much as it did in life and can be easily recognized by those who knew the individual or have seen the individual's face in a painting or a drawing. In many cases, the evidence of a violent death is visible on its body. A spectre is roughly human-sized and is weightless. These powerful undead are unharmed by ordinary weapons, including weapons made of silver. Being similar to all undead, they share an immunity to charm, hold, and sleep spells. The most dreaded attack of the spectre is its life draining ability. When a victim is struck, it suffers 1d8 hit points of damage and loses 2 experience levels or 2 HD. Note that characters drained of levels must also reduce other characteristics associated with their class and level. After being drained of levels, a character will have the minimum number of experience points for the level he is reduced to. Should a character reach level 0, he dies and will become a spectre in 24 hours. The new spectre is under the command of the spectre that killed him.

Sphinx

Sphinxes are enigmatic creatures with great, feathery wings and leonine bodies. All sphinxes are territorial, but the more intelligent ones can differentiate between deliberate intrusion and temporary or inadvertent trespass.

Androsphinx: These male sphinxes are 8' tall and have heads that combine the characteristics of a human and a lion. They generally attack with their large claws, but also have the spell casting ability of a 6th level cleric. Three times per day an androsphinx can let loose a mighty roar that can be heard for miles. It will usually only emit these roars if it becomes exceedingly angry. The effects of each roar are different. For the 1st roar, creatures within 360' must save versus spells or be affected as a wand of fear for 3 turns. For the second roar, all creatures smaller than ogres within 30' are rendered deaf for 2d6 rounds. Within 20' creatures must save versus petrification or be paralyzed for 1d4 rounds. If it roars a third time, all those within 240' must succeed in a save versus spells or reduce 2d4 points of STR for 2d4 rounds. In addition, any creature smaller than an ogre within 30' will be thrown to the ground. If thrown to the ground, a creature must save versus breath attacks or be stunned for 2d6 rounds. If the creature is not knocked down it suffers 2d8 hp damage instead. The force of this roar is so great that it breaks any stone or crystalline object within 30'. Androsphinxes despise gynosphinxes, and only deal with them for the purposes of reproduction.

Criosphinx: These crafty creatures have the head of a ram, and covet wealth. They are always male, and average 7' tall. They often attempt to trick wealth from other creatures. They attack with two claws and a head butt.

Gynosphinx: These sphinxes are the female counterparts of androsphinxes, and are 7' tall. They value wealth, and have been known to aid adventurers for a price. They have the following spell-like abilities usable 1 time per day: clairaudience, clairvoyance, detect invisibility, detect magic, dispel magic, read languages, read magic, remove curse, legend lore, and locate object. Every week they may use all forms of symbol once each. In addition to taking payment from adventurers in the form of treasure, they value knowledge, literature, and above all knowledge of the whereabouts of an androsphinx.

Hieracosphinx: These evil sphinxes have the head of an eagle, and attack with claws and a beak each round. They are 7' tall. Much like other sphinxes, hieracosphinxes covet treasure. They sometimes enter the service of powerful and evil creatures, often as steeds or guards.

Spider, Giant

	<i>Black Widow</i>	<i>Crab Spider</i>	<i>Tarantula</i>
No. Enc.:	1d3 (1d3)	1d4 (1d4)	1d3 (1d3)
Alignment:	Neutral	Neutral	Neutral
Movement:	60' (20')	120' (40')	120' (40')
Web:	120' (40')	None	None
Armor Class:	13	12	14
Hit Dice:	3	2	4
Attacks:	1 (bite)	1 (bite)	1 (bite)
Damage:	2d6, poison	1d8, poison	1d8, poison
Save:	17	18	17
Morale:	8	7	8
Hoard Type:	VI	VI	VI
XP:	80	38	135

Giant Black Widow: The giant black widow is a shiny black color, and has a red design resembling an hourglass on its ventral abdomen. This spider is 6' long. These spiders are very aggressive, and prefer to trap prey in their sticky web. The web has the same properties as that of the web produced by the spell of the same name. Any opponent bitten by the giant black widow is entitled to a saving throw versus poison, and failure indicates death after 1 turn.

Giant Crab Spider: These 5' long carnivorous spiders do not weave webs, but crawl upon vertical surfaces and ceilings to pounce upon prey. They are able to surprise opponents on a surprise check roll of 1-4 on 1d6, due to their ability to change colors to match the environment. The bite of the giant crab spider is venomous, and a victim will die in 1d4 turns unless a saving throw versus poison is made. A bonus of +2 is given on this roll, due to the less potent nature of the venom.

Giant Tarantula: This giant spider is highly magical, and is not truly a tarantula despite its appearance. Its painful bite has a magical poison. Any victim must succeed in a saving throw versus poison or begin to spasm horribly, while standing, in what appears to be some macabre dance. This excruciating dance imparts a penalty of -4 to hit if the victim engages in combat, and others receive a bonus of +4 to hit such a "dancer." The effects have a duration of 2d6 turns. However, victims of the dance become paralyzed in 5 turns, fall to the ground, and are completely helpless. The effects of the dance are magically infectious, such that any creatures witnessing the dance must also save versus poison or begin to dance themselves for the same duration as the first dancer. These effects can be countered with the spell dispel magic.

Spider, Phase

No. Enc.:	1d4 (1d4)
Alignment:	Neutral
Movement:	60' (20')
On web:	150' (50')
Armor Class:	12
Hit Dice:	5 + 5
Attacks:	1 (bite)
Damage:	1d6
Save:	14
Morale:	8
Hoard Type:	XVIII
XP:	660

These 8' long giant spiders attack with a poisonous bite. Victims must succeed in a saving throw versus poison or die. Phase spiders are difficult opponents, since they spend most of the time out of phase, and invulnerable to attack except by creatures capable of affecting beings on the ethereal plane. If the spell phase door is cast on a phase spider it cannot phase out again for 7 rounds. The webs of this spider are very sticky, and it takes a creature with 18 STR or higher 1 round to break out. If STR is 17, it takes 2 rounds. The webs burn easily, as with a web spell.

Sprite

No. Enc.: 3d6
 Alignment: Neutral
 Movement: 60' (20')
 Fly: 180' (60')
 Armor Class: 14
 Hit Dice: 1d4 hit points
 Attacks: 1 (spell)
 Damage: See below
 Save: 16
 Morale: 7
 Hoard Type: IV
 XP: 6

Sprites are reclusive fey creatures that are cousins to elves and pixies. They are 1' tall, and have wings. Sprites are not malicious, but are mischievous, and enjoy playing tricks on other creatures. When five sprites pool their energies, they may inflict a curse upon a target. A curse will not be directed to cause physical harm or illness, but will instead be embarrassing or of some other "humorous" nature. Examples might include making a character's skin change to be dotted or striped, or some other effect left to the GM's discretion. The spell remove curse can counter this effect.

 Hoard Type: VII
 XP: 1,070

These voracious free-swimming mollusks are fairly aggressive creatures, and can have bodies more than 20 feet long. They attack almost anything they meet. They have 2 large tentacles and 8 small tentacles. The larger ones are used to wrap around entire ships, dealing 1d10 structural hit points of constriction damage. When constricting a ship the squid will also attack with its great beak for an extra 2 points of structural hit point damage for each round. Smaller tentacles are used to grasp smaller creatures on ships or near water. These tentacles constrict victims when they successfully attack, and deal 1d4 hit points of damage each per successive rounds. They also may attack with their beak for 1d10 points of damage. A smaller tentacle can be cut off if a total of 6 hit points or more of damage is dealt with one blow, while a larger one requires a minimum of 10 hp damage. A giant squid may swim away if it is losing an encounter, and it will spray a 30' radius cloud of black ink to obscure its escape.

Statue, Animated

	<i>Crystal</i>	<i>Stone</i>	<i>Iron</i>
No. Enc.:	1d6 (1d6)	1d3 (1d3)	1d4 (1d4)
Alignment:	Lawful	Chaotic	Neutral
Movement:	90' (30')	60' (20')	30' (10')
Armor Class:	15	15	15
Hit Dice:	3	5	4
Attacks:	2 (fists)	2 (fists)	2 (fists)
Damage:	1d6/1d6	2d6/2d6	1d8/1d8
Save:	14	12	13
Morale:	11	11	11
Hoard Type:	None	None	None
XP:	65	500	190

Animated statues are statues of ordinarily inorganic, inanimate material given life by powerful magic-users. These statues may be used to guard locations, and unless they engage in some form of movement they will appear to be normal statues. The GM may create animate statues composed of additional materials, using the above three examples as guidelines. These statues often appear humanoid, but may be statues of any type

and size. Animate statues are immune to the effects of sleep spells.

Crystal: These animate statues are composed of crystals, often quartz.

Stone: These statues appear to be made simply of some kind of stone, but inside the statue there is a large pocket of molten lava. This statue does not usually attack with fists, but projects lava through the tips of its fingers to inflict 2d6 hit points of burning damage.

Iron: When ordinary, metal, non-magical weapons strike an animate iron statue the attacker must succeed in a saving throw versus spells. Otherwise, the weapon becomes lodged in the statue, and can only be retrieved by killing the statue.

Stegosaurus

No. Enc.: 0 (1d4)
 Alignment: Neutral
 Movement: 60' (20')
 Armor Class: 16
 Hit Dice: 11
 Attacks: 1 (tail or trample)
 Damage: 2d8 or 2d6
 Save: 15
 Morale: 7
 Hoard Type: None
 XP: 1,200

These prehistoric herbivore reptiles are very large, and have a strip of hard plates that runs along their spine. Their tails are powerful weapons, which have four large spikes on their ends. This creature will most often be encountered in warm, tropical or sub-tropical environments.

Stirge

No. Enc.: 1d10 (3d12)
 Alignment: Neutral
 Movement: 30' (10')
 Fly: 180' (60')
 Armor Class: 12
 Hit Dice: 1
 Attacks: 1
 Damage: 1d3
 Save: 18
 Morale: 9
 Hoard Type: XI
 XP: 16

This monster looks something like an anteater with feathers. A stirge's coloration ranges from rust-red to reddish-brown, with a dirty yellow underside. The long proboscis is pink at the tip, fading to gray at its base. A stirge's body is about 1 foot long, with a wingspan of about 2 feet. It weighs about 1 pound. A stirge uses its long proboscis to penetrate a victim, latch on, and drain its blood. When a stirge attacks an opponent for the first time, its quick speed grants it a bonus of +2 to hit. A successful attack deals 1d3 points of damage from blood sucking, and thereafter each round the stirge has latched to an opponent and

sucks 1d3 hit points of damage worth of blood every round. A stirge will remain attached to a victim until the victim dies, or until the stirge is killed.

Strangle Weed

No. Enc.: 3d4 (3d4)
 Alignment: Neutral
 Movement: None
 Armor Class: 13
 Hit Dice: 2-4
 Attacks: 1
 Damage: See below
 Save: 15
 Morale: NA
 Hoard Type: I, II, III, IV, V, XI, XIV
 XP: 29

This mass of writhing vines and leaves looks like a large patch of seaweed. Several long fronds protrude from the center of it, and it is 12' wide. It attacks by grappling its foe and then squeezing it. Slain creatures are digested by the strangle weed. The strangle weed is dark green and slightly slimy, with 3d4 fronds, each about 10' long, protruding from its main body. Strangle weed lies still until prey comes near. It then lashes out with its fronds, attempting to grapple its foes. Grappled foes are squeezed until they die. Each frond has an effective STR of 4d4. A victim has a 10% chance of breaking free for each point of STR he has above that of the frond's STR. More than one frond may entangle a victim, 1 frond per round with a successful attack. Multiple fronds combine STR. If the fronds have more STR than the victim, the victim suffers 1 hp crushing damage per point of STR the fronds have above the victim's. Creatures caught in the fronds may attack with -2 to hit. A subterranean version of the strangle weed is believed to exist, though encounters with it are very rare. It is whitish-green and is found in underground pools, stagnant water, and the like.

T

Throghrin

No. Enc.: 1d6 (1d10)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 13
 Hit Dice: 3
 Attacks: 2 or 1 (2 claws or weapon)
 Damage: 1d3/1d3 or weapon
 Save: 14
 Morale: 10
 Hoard Type: XX
 XP: 80

A throghrin may appear to be a hobgoblin at first glance, but these monsters are a wicked, unholy magical hybrid of troll, hobgoblin, and ghoul. They have an affinity for the company of hobgoblins, and are occasionally employed as bodyguards to a hobgoblin king. Throghrin have the same paralyzing touch as a ghoul, and can regenerate as a troll 1 hp per round. Hit points are gained at the start of each combat round.

Tick, Giant

No. Enc.: 3d4 (3d4)
 Alignment: Neutral
 Movement: 30' (10')
 Armor Class: 16
 Hit Dice: 2-4
 Attacks: 1
 Damage: 1d4
 Save: 16
 Morale: 8
 Hoard Type: None
 XP: 29

These creatures are 1' to 3' long, and attack with a bite. If

successful, they have attached themselves and drain 1d6 hp damage worth of blood each round thereafter, until they have drained an equivalent of blood equal to their maximum hp total. Giant ticks do not let go of a victim unless burned, killed, or suffocated by submersion in water. In addition, all victims have a 50% probability of contracting a wasting disease that kills the victim in 2d4 days. The spell cure disease is effective in eliminating this illness.

Titan

No. Enc.: 1d2 (1d2)
 Alignment: Lawful
 Movement: 210' (70') or 150' (50')
 Armor Class: 17 to 22
 Hit Dice: 17-22
 Attacks: 1 (fist)
 Damage: 7d6 or 8d6
 Save: 3
 Morale: 10
 Hoard Type: X, XI x 8, XVIII
 XP: 4,250; 7,000

A titan resembles an 18' to 23' tall very attractive human. They are disposed toward good but are nonetheless creatures of chaos. Titans vary in strength, with the most powerful ones being larger. Roll to determine the power level of a titan when it is encountered:

Roll d6	AC	HD	Damage	Movement	Height
1	17	17	7d6	210' (70')	18'
2	18	18	7d6	210' (70')	19'
3	19	19	7d6	210' (70')	20'
4	20	20	7d6	210' (70')	21'
5	21	21	8d6	150' (50')	22'
6	22	22	8d6	150' (50')	23'

Titans attack with their powerful fists. In addition, they have the following spell-like abilities: invisibility, levitate (twice per day), and they can become ethereal (twice per day). Further, titans may use cleric and magic-user spells. Their highest spell level ability for each class is determined by rolling 1d4+3, and titans have access to 2 spells per spell level. Titans speak all giant languages, titan, common, and their alignment tongue.

Titanotheres

No. Enc.: 0 (1d6)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 14
 Hit Dice: 12
 Attacks: 1 (butt or trample)
 Damage: 2d6 or 2d8
 Save: 15
 Morale: 7
 Hoard Type: None
 XP: 2,000

These creatures are prehistoric relatives of the rhinoceros. They have large, blunt-tipped horns rather than the sharp horns of rhinos, and can reach a height of 10' to 12'. Few creatures threaten these large beasts, and they are relatively peaceful herbivores. When they do attack, they are capable of a charge for double damage, and they may trample.

Toad, Giant

No. Enc.: 1d4 (1d4)
 Alignment: Neutral
 Movement: 90' (30')
 Armor Class: 12
 Hit Dice: 2 + 2
 Attacks: 1 (bite)
 Damage: 1d4 + 1
 Save: 18
 Morale: 6
 Hoard Type: None

	<i>Ice</i>	<i>Poisonous</i>
No. Enc.:	1d4 (1d4)	1d4 (1d4)
Alignment:	Neutral	Neutral
Movement:	90' (30')	90' (30')
Armor Class:	15	12
Hit Dice:	5	2 + 2
Attacks:	1 (bite)	1 (bite)
Damage:	3d4	1d4 + 1
Save:	15	18
Morale:	7	6
Hoard Type:	XIV	None
XP:	500	59

These immense toads can grow to be as large as a wolf and weigh up to 250 lbs. They have the ability to alter the color of their warty hides to match that of the dim labyrinth corridors or dark forests they frequent. For this reason they will surprise a victim on a surprise check roll of 1-3 on 1d6. Giant toads have 15' long tongues, and on a successful hit they are able to yank any being the size of a dwarf or smaller toward their mouths for a bite attack. Victims no larger than a halfling may be swallowed on an attack roll of 20. Any creature swallowed will suffer 1d6 hit points of damage per round as the toad digests it.

Ice: These giant toads are 8' long and live in cold regions or deep within labyrinths. Giant ice toads have a swallow attack, and are capable of swallowing human sized opponents. They lash out with 20' long tongues, and on a successful attack may yank a victim to its mouth for a bite attack. Swallowed opponents suffer 1d6 hp damage per round they are in the toad's stomach, unless it is killed. In addition, once every 2 rounds a giant ice toad may emit an icy blast at all creatures within a 10' radius. All creatures susceptible to cold-based attacks suffer 3d6 hp damage.

Poisonous: Giant poisonous toads are in all ways identical to "ordinary" giant toads. They are the size of a wolf and can blend into their environments, surprising opponents on a 1-3 on 1d6. They have a 15' long tongue they attack with to yank opponents to their gaping mouths. A successful bite attack deals 1d4+1 hp damage and victims must save versus poison or die. Giant poisonous toads have a swallow attack that is effective against opponents the size of a dwarf or smaller. Swallowed opponents suffer 1d6 hp damage per round they are in the toad's stomach, unless it is killed.

Trapper

No. Enc.:	1 (1)
Alignment:	Neutral
Movement:	30' (10')
Armor Class:	16
Hit Dice:	12
Attacks:	4+
Damage:	See below
Save:	13
Morale:	10
Hoard Type:	XVII
XP:	2,000

Trappers are thought to be distant relatives of the lurker above (see that entry). Unlike their relatives, however, trappers mimic the floor of a building, dungeon, or other structure and are 95% undetectable by visual inspection. By manipulating their body structure while covering the floor, trappers can form a box that resembles a small trunk or chest. This is usually enough to lure would-be-adventurers to their doom. A trapper waits until its prey is almost centered on its body near the "trunk" or "chest" before it strikes. It then quickly folds and wraps its body around its unsuspecting prey attempting to smother and squeeze it until it is dead. This deals 1d6 hp of crushing damage each round, and after the 6th round the prey is automatically smothered to death. Victims are incapable of attacking. Trappers suffer only half damage from cold or fire-based attacks, and no damage on a successful saving throw. They keep their treasure underneath them.

Treant

No. Enc.:	0 (1d8)
Alignment:	Lawful
Movement:	60' (20')
Armor Class:	17
Hit Dice:	8
Attacks:	2
Damage:	2d6/2d6
Save:	9
Morale:	6
Hoard Type:	XX
XP:	1,560

A treant is a mobile, intelligent tree-like creature. A treant is about 18' tall. Its leaves are deep green in the spring and summer. In the fall and winter the leaves change to yellow, orange, or red, but they rarely fall out. A treant's legs fit together when closed to look like the trunk of a tree, and a motionless treant is nearly indistinguishable from a tree. For this reason, at a distance of more than 30 yards, a motionless treant cannot be distinguished from a normal tree. Because of their inconspicuous nature, beings are surprised on a surprise check roll of 1-3 on 1d6. Treants are very long lived, and as such they take few actions, including speaking, with any haste. They fear fire, and will be cautious if it is nearby. Treants have the ability to control 2 normal trees with a range of 60'. These animated trees will engage in combat with the same characteristics of a treant, and have movement of 30' (5'). Treants may stop or start animating new trees on any given round.

Triceratops

No. Enc.:	0 (1d4)
Alignment:	Neutral
Movement:	90' (30')
Armor Class:	17
Hit Dice:	11
Attacks:	1 (gore or trample)
Damage:	3d6
Save:	14
Morale:	8
Hoard Type:	None
XP:	1,200

These large, 12' high and 40' long prehistoric dinosaurs are herbivores, but very aggressive to those who come near. They live in grassy environments in sub-tropical and temperate regions. These creatures have three very large horns and a big bony plate on their skulls. Like other large animals, a triceratops may charge during the first round of combat to inflict double damage.

Triton

No. Enc.:	3d4 (2d6x10)
Alignment:	Neutral (good)
Movement:	150' (50') swim
Armor Class:	14
Hit Dice:	3
Attacks:	1 (weapon)
Damage:	As weapon
Save:	15
Morale:	7
Hoard Type:	VIII, IX, X, XIX
XP:	50

A triton has silvery skin that fades into silver-blue scales on the lower half of its body. It has two scaled "legs" ending in fins. Tritons' hair is deep blue or blue-green and they are about the same size and weight as a human. The reclusive tritons prefer to avoid combat, but they fiercely defend their homes. They attack with either melee or ranged weapons as the circumstances warrant. When encountered outside their lair, they are 90% likely to be mounted on friendly sea creatures such as hippocampi. In a group of 10 or more there will be a 5 HD leader, and in a group of 20 or more there will be an additional 7 HD leader. If more than 60 are encountered, a 9 HD chieftain will be present. In addition, for every 10 tritons encountered there is a 10% chance that 1d4x10% of their number are magic-users of a level determined for each one by rolling 1d6.

Troglodyte

No. Enc.: 1d8 (5d8)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 14
 Hit Dice: 2
 Attacks: 3 (2 claws, bite)
 Damage: 1d4/1d4/1d4
 Save: 17
 Morale: 9
 Hoard Type: XXII
 XP: 38

These humanoid reptiles are green, scaly, and have a bony spine along the center of the top of their heads, backs, and backs of their arms. Troglodytes are malicious and warlike, and will attempt to slay any creatures that cross their paths. They have the ability to blend into their environment like a chameleon, and will surprise with a surprise check roll of 1-4 on 1d6. Their bodies are covered in small glands that produce a stinky, slimy coating on their scaly hide. All demi-humans and humans that come near a troglodyte are required to make a saving throw versus poison, or suffer -2 to attack rolls due to the disgusting, horrid stench.

Troll

No. Enc.: 1d8 (1d8)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 15
 Hit Dice: 6 + 3
 Attacks: 3 (2 claws, bite)
 Damage: 1d6/1d6/1d10
 Save: 11
 Morale: 10
 Hoard Type: XIX
 XP: 600

A troll's rubbery hide is moss green, mottled green and gray, or putrid gray. The hair is usually greenish black or iron gray. A typical adult troll stands 8' tall. These monsters enjoy eating other intelligent humanoids. Trolls tend to lurk in labyrinths, caverns, ruins, and swamps. They are very wiry and lanky, but excessively strong and have menacing, dirty claws and sharp teeth. Trolls have the ability to regenerate damage they receive. After 3 rounds have passed since they received damage, they will regenerate 3 hit points each round. Fire and acid damage cannot be regenerated by a troll. If a troll loses a limb or body part, these parts will attempt to crawl or squirm back toward the main portion of the body to reattach. A troll can reattach a severed member instantly by holding it to the stump. Due to this powerful ability to regenerate, trolls cannot be permanently destroyed except by fire or acid. If a troll is damaged enough to be killed (reaches 0 hit points) the troll will continue to regenerate and stand again to fight after 2d6 rounds.

Turtle, Giant

	Sea	Snapping
No. Enc.:	1d3 (1d3)	1d4 (1d4)
Alignment:	Neutral	Neutral
Movement:	10' (3')	30' (10')
Swim:	150' (50')	120' (40')

----	(head, flippers 14) ----	
Hit Dice:	15	10
Attacks:	1 (bite)	1 (bite)
Damage:	4d4	6d4
Save:	8	13
Morale:	6	9
Hoard Type:	None	None
XP:	1,500	1,700

Giant turtles are 40' in diameter. Their temperaments vary depending on type.

Sea: Giant sea turtles only fight if directly threatened or very hungry. They may capsize smaller vessels 90% of the time or larger vessels 10% of the time if they come to the surface directly under them.

Snapping: These giant turtles are extremely temperamental and aggressive. They live in bodies of fresh water or large rivers. They lie in wait for prey, extending their 10' long necks very suddenly to surprise on 1-4 on 1d6, and then snap at prey for 6d4 hp damage.

Tyrannosaurus Rex

No. Enc.: 0 (1)
 Alignment: Neutral
 Movement: 120' (40')
 Armor Class: 16
 Hit Dice: 20
 Attacks: 1 (bite)
 Damage: 6d6
 Save: 11
 Morale: 11
 Hoard Type: VII x3
 XP: 2,250

This large prehistoric carnivorous dinosaur is a fearsome predator. It is bipedal and can reach heights of 20'. It will hunt any creature that moves, but generally does not bother with prey smaller than a halfling.

U**Undead**

The undead are a class of monsters that include spectres, zombies, skeletons, wights, wraiths, vampires, and others. These beings were alive at one time, but through foul magic or by dying at the hands of another undead type, these beings rise again as undead horrors. Most undead do not make a sound when moving. All such creatures are immune to the effects of poison. Further, they are unaffected by the spells charm person, sleep, or hold person.

**Unicorn**

No. Enc.: 1d6 (1d8)
 Alignment: Lawful
 Movement: 240' (80')
 Armor Class: 17
 Hit Dice: 4
 Attacks: 3 (2 hooves, horn)
 Damage: 1d8/1d8/1d8
 Save: 14
 Morale: 7
 Hoard Type: None
 XP: 135

A unicorn has deep sea-blue, violet, brown, or fiery gold eyes. All unicorns have a long, straight horn growing from the center of their foreheads. Males sport a white beard, and all unicorns'

coats are snow white. A typical adult unicorn is the size of a wild horse. These majestic creatures have the ability to teleport 1 time per day, along with a rider, up to 360'. A light, virtuous maiden may only approach these shy creatures.

V

Vampire

No. Enc.: 1d4 (1d6)
 Alignment: Chaotic
 Movement: 120' (40')
 Fly: 180' (60')
 Armor Class: 17
 Hit Dice: 7 to 9
 Attacks: 1 (touch, see below)
 Damage: 1d10, drain life energy
 Save: 12 to 8
 Morale: 11
 Hoard Type: XVII
 XP: 3,150/5,060/7,300

The vampire is one of the most dreaded undead monsters. Being similar to other undead, they are immune to charm, hold, and sleep spells. Electricity and cold does only half damage, they are unaffected by normal weapons, and they regenerate 3 hit points per round. Vampires must take refuge in a coffin or other hide-away during the daylight hours, and must slumber on soil from their own grave once in a while to maintain their powers' vitality.

Vampires are immensely strong, and deal great blows that inflict 1d10 hit points of damage. These blows (or any other touch) further reduce the victim's life energy by two levels, which consequently reduces all other traits linked to a loss in levels (attack ability, hit dice, etc.).

Vampires have the innate ability to take gaseous form at will, but will be forced into this form if their hit points reach zero. They then attempt to reach their coffin to reform their bodies. If they do not reach the coffin within 2 turns and rest for 8 hours, they are unable to reform.

Further, vampires have the innate ability to shape change into a large bat at will, which grants them flying movement. They can summon 1d10x10 bats or rats when underground. They can summon 3d6 wolves or 2d4 dire wolves when above. These creatures will arrive in 2d6 rounds. In addition, a vampire has a charm gaze (as the charm person spell) that takes effect if a victim peers into a vampire's eyes. The victim may attempt a saving throw versus spells with a penalty of -2.

Although these items do not actually cause harm or completely repel these creatures, vampires will draw back from a light holy symbol, a mirror, or garlic if they are presented with confidence. Garlic causes a vampire to cringe for 1d4 rounds, and a holy symbol or mirror will cause a vampire to take a position in which the item does not impede his or her progress or attack. A light holy symbol will affect a vampire no matter what its ethos was in life. Once a person becomes a vampire, he or she is a dark undead creature, and holy water will inflict 1d6+1 hit points of damage.

There are a few means by which a vampire may be destroyed. They take great damage from immersion in running water, and will be killed in 1 turn. In addition, if caught in sunlight a vampire must succeed in a saving throw versus death for each round exposed, or it will be completely turned to dust. Finally, a stake through the heart, coupled with decapitation, will destroy a vampire. Holy sacraments (such as wafers) must be placed in the mouth. Note that if a vampire is staked he or she will appear to die, but unless also decapitated the vampire will revive when the stake is removed.

Vampires create others of their kind by draining humans or

other humanoids of all life energy (they reach 0 level). The victim must be buried, and after 1 day he will arise as a vampire. The victim will retain abilities, including class abilities, which he had in life but will become a dark undead being. He will be a slave to the vampire that created him, but becomes free willed if the master is killed.

W

Wasp, Giant

No. Enc.: 1d20 (1d20+20)
 Alignment: Neutral
 Movement: 60' (20')
 Fly: 210' (70')
 Armor Class: 15
 Hit Dice: 4
 Attacks: 2 (bite, sting)
 Damage: 2d4/1d4
 Save: 19
 Morale: 10
 Hoard Type: XI x 15
 XP: 135

These 3' long giant insects are incredibly aggressive and carnivorous. They create nests underground, usually in caverns or dug into the earth. Their nests are constructed of mud or paper. Giant wasps attack with a bite and a poisonous sting. Victims of the sting must succeed in a saving throw versus poison or be permanently paralyzed. Paralyzed victims are taken back to the nest where they are deposited to be devoured by hatching larvae. Victims are killed in this manner in 1d4+1 days. The spell neutralize poison can remove the paralysis.

Weasel, Giant

No. Enc.: 1d4 (1d6)
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 12
 Hit Dice: 4 + 4
 Attacks: 1 (bite)
 Damage: 2d4
 Save: 15
 Morale: 8
 Hoard Type: VII
 XP: 290

These 9' long creatures are brown, tan, or white. They are fierce hunters, and when they successfully attack with their bite they cling to the victim, sucking blood for 2d4 hit points of damage each round. They cannot be removed, and will cling until either the victim has died or the weasel has been killed. These creatures can see in the dark with a limited 30' infravision, and have a very keen sense of smell that they use to track prey. These burrowing creatures live in the tunnels they create in the earth, and will sometimes venture or burrow into labyrinths.

Whale

	<i>Killer</i>	<i>Narwhal</i>
No. Enc.:	0 (1d6)	0 (1d4)

Sperm

No. Enc.: 0 (1d3)
 Alignment: Neutral
 Movement: 180' (60')
 Armor Class: 13
 Hit Dice: 36
 Attacks: 1 (bite)
 Damage: 3d20
 Save: 4
 Morale: 7
 Hoard Type: VII
 XP: 12,500

Killer Whale: These immense whales typically reach a length of 25'. They prefer colder waters of the north or extreme south. They prey on many different animals of the sea. They will swallow any creature of a size equal to or less than a halfling if their attack roll result is a 20. A creature that is swallowed suffers 1d6 hit points of damage each round, and drowns after 10 rounds.

Narwhal: These large whales typically reach a length of 15'. They prefer colder waters of the north or extreme south. They are highly intelligent and have a magic horn on their heads that resembles the horn of a unicorn. Some say that this horn, even when severed, will vibrate in the vicinity of dark or evilly intentioned creatures. Even if this rumor is false, the horns are valuable for their ivory, fetching 1d6x1,000 gp.

Sperm Whale: These gigantic whales typically reach a length of 60'. They will swallow any creature of a size equal to or less than a human if their attack roll result is at least 4 higher than the attack roll required to strike. A creature that is swallowed suffers 3d6 hit points of damage each round. When a sperm whale encounters a sea vessel, it usually (90%) leaves it undisturbed, but may decide to attack. A sperm whale can slam into a ship with its immense head, dealing 6d6 structural hit points of damage.

Wight

No. Enc.: 1d6 (1d8)
 Alignment: Chaotic
 Movement: 90' (30')
 Armor Class: 14
 Hit Dice: 3
 Attacks: 1
 Damage: Drain life energy
 Save: 16
 Morale: 12
 Hoard Type: XXI
 XP: 110

Wights are undead creatures who were formerly humans or demi-humans in life. A wight's appearance is a weird and twisted reflection of the form it had in life. Wights attack by touching a victim and draining 1 level, or hit die, from a victim. For example, if a 3 HD monster is attacked and struck, it becomes a 2 HD monster. Likewise, if a 4th level character is struck, he becomes 3rd level. Any human or demi-human reduced to 0 level dies, and becomes a wight in 1d4 days. Wights may only be harmed by magical weapons, spells, and weapons made of silver. Like other undead, they are immune to the effects of sleep and charm spells.

Will-O-Wisp

No. Enc.: 1 (1d3)
 Alignment: Chaotic
 Movement: 180' (60')
 Armor Class: 27
 Hit Dice: 9
 Attacks: 1
 Damage: 2d8
 Save: 10
 Morale: 7
 Hoard Type: XVIII
 XP: 3,100

Will-o'-wisps can be yellow, white, green, or blue. They are easily mistaken for lanterns, especially in the foggy marshes and swamps where they reside. A will-o'-wisp's body is a globe of spongy material about 1' across, and its glowing body sheds a variable amount of light in order to confuse victims. They may become invisible for 2d4 round intervals. Will-o'-wisps usually avoid combat. They prefer to confuse and bewilder adventurers, luring them into morasses or other hazardous places where they feed on life energy as a victim dies in a trap or other hazard. When they are forced to fight, they let loose small electrical shocks that deal 2d8 hp damage. A will-o'-wisp is immune to most spells except magic missile, maze and protection from evil. However, these creatures are vulnerable to normal attacks. They are highly intelligent, and if reduced to only a few hit points they may negotiate with opponents for survival.

Wind Walker

No. Enc.: 1d3 (1d3)
 Alignment: Neutral
 Movement: 150' (50')
 Fly: 300' (100')
 Armor Class: 12
 Hit Dice: 6 + 3
 Attacks: 1
 Damage: 3d6
 Save: 14
 Morale: 9
 Hoard Type: XXII
 XP: 680

Wind walkers are creatures from the elemental plane of air. When found on the material plane they live on high mountain peaks or deep within labyrinths. On occasion, a wind walker is encountered in the service of a cloud giant, storm giant, efreet, djinn, or other such creature. A wind walker's natural form is that of a roaring and whistling column of wind about 12' tall. No discernable features can be seen in the wind walker. A wind walker attacks by using the surrounding air to pummel its foes for 3d6 hp damage each round. Wind walkers can only be attacked by ethereal creatures or creatures capable of affecting the ethereal plane. A control weather spell instantly slays a wind walker if it fails a saving throw versus spells. A haste spell deals 1d6 points of damage per two caster levels (maximum 5d6) to a wind walker. In addition, a haste spell doubles the damage the wind walker deals with its wind blast attack. An ice storm spell deals no damage to a wind walker, but affects it as if by a fear spell for 1d4 rounds. A wind walker is affected normally by magical barriers.

Wolf

	Ordinary Wolf	Dire Wolf
No. Enc.:	2d6 (3d6)	1d4 (2d4)
Alignment:	Neutral	Neutral
Movement:	180' (60')	150' (50')
Armor Class:	12	13
Hit Dice:	2 + 2	4 + 1
Attacks:	1 (bite)	1 (bite)
Damage:	1d6	2d4
Save:	18	15
Morale:	8	8
Hoard Type:	None	None

Winter

No. Enc.: 2d4 (2d4)
 Alignment: Neutral (evil)
 Movement: 180' (60')
 Armor Class: 5
 Hit Dice: 6
 Attacks: 1 (bite)
 Damage: 2d4
 Save: 13
 Morale: 10
 Hoard Type: XIV
 XP: 820

Ordinary Wolves: Wolves are carnivorous pack hunters known for their persistence and cunning. Wolves primarily hunt and live in wilderness settings, but occasionally venture into caverns and labyrinths. Wolves are social, and when their numbers are greater they are more confident. In a group of 3 or fewer, or if 50% of their number has been lost, their moral drops to 6. Wolf cubs may be kept and trained in the same manner as dogs.

Dire Wolves: These larger cousins of ordinary wolves are much more vicious, and are more intelligent. They more commonly live in wooded and mountainous areas, and are even more likely than ordinary wolves to venture into caverns or labyrinths in search of prey. Dire wolf cubs may be kept and trained in the same manner as dogs, but are more difficult to control. Goblins capture cubs to train them as mounts.

Winter Wolves: These intelligent and terrible 6' long wolves live in cold environments. In addition to a bite attack, winter wolves have a frosty breath weapon that inflicts 6d4 hp damage to victims within 10'. A successful save versus breath attacks reduces damage by 50%. They suffer an extra +1 point of damage per die of fire damage, but they are immune to all cold-based attacks.

Wolverine

	<i>Ordinary</i>	<i>Giant</i>
No. Enc.:	1 (1d3)	1 (1d3)
Alignment:	Neutral	Neutral
Movement:	120' (40')	150' (50')
Armor Class:	14	15
Hit Dice:	3	4 + 4
Attacks:	3 (2 claws, bite)	3 (2 claws, bite)
Damage:	1d4/1d4/1d4+1	1d4+1/1d4+1/2d4
Save:	17	15
Morale:	10	11
Hoard Type:	None	None
XP:	80	290

These creatures are efficient and vicious hunters. They attack with +4 to hit. In addition to their claws and bite, wolverines may attack with a musk spray that affects victims within a 60' long by 20' wide area (half this area for ordinary wolverines). Victims must save versus poison or be blinded for 1d8 hours.

Wraith

No. Enc.:	1d4 (1d6)
Alignment:	Chaotic
Movement:	120' (40')
Fly:	240' (80')
Armor Class:	16
Hit Dice:	4
Attacks:	1 (touch)
Damage:	1d6, drain life energy
Save:	13
Morale:	12
Hoard Type:	XVIII
XP:	300

Wraiths are incorporeal undead creatures born of evil and darkness. In some cases, the grim silhouette of a wraith might appear armored or outfitted with weapons. This appearance does not affect the creature's AC or combat abilities, but only reflects the shape it had in life. Like other undead, wraiths are unaffected by sleep, hold, or charm spells. They are unharmed by non-magical weapons. Although silver weapons do damage to them, these only deal half damage. When a wraith touches a victim it inflicts 1d6 hit points of damage and drains one level or hit die. Note that characters drained of levels must also reduce other characteristics associated with their class and level. After being drained of levels, a character will have the minimum number of experience points for the level he is reduced to. Should a character reach level 0, he dies and will become a wraith in 24 hours. The new wraith is under the command of the wraith that killed him.

Wyvern

No. Enc.:	1d2 (1d6)
Alignment:	Chaotic
Movement:	90' (30')
Fly:	240' (80')
Armor Class:	16
Hit Dice:	7
Attacks:	2 (bite, sting)
Damage:	2d8/2d8, poison
Save:	11
Morale:	9
Hoard Type:	XVIII
XP:	1,140

A distant cousin to the dragons, the wyvern is a huge flying lizard with a poisonous stinger in its tail. A wyvern's body is 15 feet long, and its scaly body is dark brown to gray. A wyvern attacks with a bite, and it is able to sting with its flexible, long tail at the same time. Any creature struck with the stinger will instantly die unless a successful saving throw versus poison is made.

Xorn

No. Enc.:	1d4 (1d4)
Alignment:	Neutral
Movement:	90' (30')
Armor Class:	21
Hit Dice :	7 + 7
Attacks:	4 (3 claws, bite)
Damage:	1d3/1d3/1d3/6d4
Save:	12
Morale:	10
Hoard Type:	XI x 3, XII, XIII, XXI
XP:	1,700

Xorns are about 5' tall and are native to the elemental plane of earth. When on the material plane they live deep within labyrinths, where they feed on minerals. Xorns are able to blend in their environment, and can surprise opponents on 1-3 on 1d6. Xorns do not attack fleshly beings except to defend themselves or their property, since they cannot digest meat. Xorns are indifferent to creatures of the material plane—with the sole exception of anyone carrying a significant amount of precious metals or minerals, which xorns eat. They can smell food up to 20' away, and may ask adventurers to give them their precious metals. If refused, they will almost always (90%) attack to take it forcefully. Xorns are completely immune to fire or cold-based attacks. They suffer only half damage from electrical-based attacks, or no damage with a successful saving throw. The spells rock to mud and stone to flesh reduce a xorn to AC 8 for 1 round, and the xorn cannot attack as it transforms back to its original form. The spell move earth pushes a xorn backwards 30' and stuns it for 1 round. A xorn can glide through stone, dirt, or almost any other sort of earth except metal after 1 round of preparation. A phase door spell cast on an area containing a burrowing xorn kills it instantly.

Y

Yellow Mold

No. Enc.: 1d4 (1d8)
 Alignment: Neutral
 Movement: 0
 Armor Class: Always hit
 Hit Dice: 2
 Attacks: Spores
 Damage: 1d6, special
 Save: 16
 Morale: Not applicable
 Hoard Type: None
 XP: 38

Yellow mold typically covers an area of 10 square feet. It does not move or attack, but if it is touched it is acidic and destroys leather and wood; it deals 1d6 points of damage to bare flesh. There is a 50% probability that any time yellow mold is contacted, it ejects spores into a 10' cube area. Any creature inside the area is required to roll a saving throw versus poison, and failure indicates suffocation and death in 6 rounds. Yellow mold is impervious to all attacks except from fire, and a torch can burn mold for 1d4 hit points of damage per strike.

Yeti

No. Enc.: 1d6 (2d4)
 Alignment: Neutral
 Movement: 150' (50')
 Armor Class: 13
 Hit Dice: 4 + 4
 Attacks: 2 (claws)
 Damage: 1d6/1d6
 Save: 14
 Morale: 8
 Hoard Type: XX
 XP: 38

These large, 9' tall hulking humanoids are covered in white, shaggy fur. Their hands end in filthy, razor-sharp claws. These

creatures' heads are large and sport a wide round mouth filled with fangs. Yetis make their lairs in remote mountains and hills. They are fierce predators with ravenous appetites, dining on mountain goats, sheep, polar bears, and humanoids. They are particularly fond of human and elf flesh. A yeti attacks with its claws, and grabs an opponent to squeeze it against its frigid body with an attack roll of 20. This deals an extra 2d8 hp damage. Creatures within 30' that meet the eyes of a yeti must succeed on a saving throw versus paralyzation or stand paralyzed in fear for 3 rounds. Yeti are 30% invisible in a snowy environment if more than 30' away. Yetis suffer 50% extra damage from heat-based attacks. When found in their lair 50% of their number are females, with a 20% chance of 1d4+1 young.

Z

Zombie

No. Enc.: 2d4 (4d6)
 Alignment: Chaotic
 Movement: 120' (40')
 Armor Class: 11
 Hit Dice: 2
 Attacks: 1 (weapon)
 Damage: 1d8 or weapon
 Save: 15
 Morale: 12
 Hoard Type: None
 XP: 29

Zombies are undead corpses reanimated through dark and sinister magic. Because of their utter lack of intelligence, the instructions given to a zombie by its creator must be very simple. The dark magic-users and clerics that create zombies use them to guard locations or valuable treasure. Zombies are susceptible to ordinary weapons, but like other undead they are immune to charm and sleep spells. Zombies' somewhat clumsy, decomposing limbs force them to attack last each round.

Treasure will be found in monster lairs that exist in underground locations or in the wilderness. Sometimes treasure will be found unguarded, in which case it may be hidden in a secret location. Each monster has a listed Hoard Type, which indicates what kinds and quantities of treasure a monster might have. These values should be considered guidelines. Although monsters will tend to have a Horde Class that corresponds to their general strength, the GM should use discretion in distributing wealth and magic. If a result on the Horde Class Treasure Tables seems over powered, reduce the amount of treasure rolled. On any of these tables the GM may decide to choose specific quantities of treasure or specific magic items, depending on the situation. Not all treasure must be coins, gems, jewelry, or magic. A creative way to disperse treasure is to place valuable art, tapestries, sculptures, and the like that have a treasure value but must be appraised and sold to cash them in, or can be kept as decorations in the strongholds of the adventurers.

How to Roll for Treasure

The GM chooses the appropriate row in the Hoard Type Treasure Table, and for each column rolls the appropriate dice to determine whether certain treasure occurs, and if so in what quantity. When magic items are indicated, the GM can either choose appropriate items or roll on the Specific Items tables in the "Random Determination of Treasure" section of *Microlite74 Companion II: Treasure*.

Microlite78 Treasure

Here is a list of sample treasure items appropriate to a *Microlite78* campaign. Maps to possible hoards of such treasures are also a common treasure item. Of course, any magic item you like from the SRD can be used, but higher powered items may be too powerful for most *Microlite78* games. This list is for GMs who want to select treasure themselves or generate their own lists of random treasure. See the *Microlite78* Random Treasure section at the end of this Companion volume for a sample random system of treasure generation using the magic treasures listed in this section.

Money: 1 gold piece (gp) = 10 silver pieces (sp); 1 silver piece = 5 copper pieces (cp).

Gems: Most range in value from 10gp to 1000gp, with 50% of gems being worth about 100gp.

Magic Items: Most magic items in a swords & sorcery setting will be potions and scrolls. Spell Wands and magic weapons and armor will also be somewhat common. The other items in the lists below will normally be very rare: perhaps even created by ancient or lost civilizations whose method of creation has been lost.

Magic Item Descriptions:

Potions:

There is a 70% chance that a potion bottle holds 1 dose, otherwise 1d6 doses. A quick taste of a potion can be used to identify it without consuming a dose. There is a 5% that a potion has decayed with age and has become a potion of delusion (60% chance) or poison (40% chance). Unless otherwise noted, the effects of a dose will last 1d6+6 10 minute turns.

Most potions on the list below can be made by any arcane spellcaster who has the recipe for the potion and the materials

and time, see the Potion Recipe scroll for more information. In addition to the potions listed here, those with the potion brewing talent can brew a large number of everyday potions (e.g. cures for specific diseases, antidotes for a specific natural poison, household cleaning potions, etc.). The brewer will know the specific formula for a specific everyday potion on a MIND-based skill roll. If he has the needed materials and brewing equipment, he may brew the everyday potion (succeeding on a MIND-based skill roll). The GM will set the time (generally ranging from a few hours to a week) and materials costs for everyday potions. Many everyday potions can be purchased at an apothecary.

Animal Control: The drinker may control one or more animals with a total hit dice of 3d6 or less. When the effect of the potion wears off, the animals will flee.

Antidote: The drinker becomes immune to all poisons of up to a specific strength for the duration of the potion. Poison from non-creature sources (e.g. a Potion of Poison) should be considered to be as if from a 7HD creature. The strength of the potion should be determined by rolling 1d10: 1-4 = Poison from 3HD creatures, 5-7 = Poison from 7HD creatures, 8-9 = Poison from 15HD creatures, 10 = All poison.

Blending: The drinker may change color to blend in with their surroundings. When hiding, the drinker will have a 90% chance to go unnoticed unless the viewer can see invisible creatures.

Bug Repellent: Any normal or giant bug (an insect, spider, scorpion, centipede, or other arthropod) will completely ignore the drinker unless magically controlled. If the bugs are magically controlled to attack the drinker, the drinker gets a +4 bonus to any saving throws against the controlling effect that allow the damage done by the insects to be reduced.

Clairaudience: While concentrating, the drinker may listen as if at any point within 60' of their current location.

Clairvoyance: While concentrating, the drinker may see as if at any point within 60' of their current location.

Climbing: The drinker may walk on walls and ceilings as if a spider.

Defense: This potion only lasts 10 minutes. The drinker gets a bonus to their armor class based on the power of the potion. To determine the power of the potion, roll 1d10: 1-3 = +1, 4-5 = +2, 6-7 = +3, 8-9 = +4, 10 = +5.

Delusion: This potion will have no effect when drunk. However, if tasted, it will falsely give the taster the impression that it is another type of potion from this list. Multiple tasters will all get the same impression. A magical analysis of some type (spell or alchemical operation) will correctly identify this potion as one of Delusion rather than as the type it tastes like.

Diminution: The drinker shrinks down to 6" in height. While in this state they cannot hurt creatures larger than 1' tall with physical attacks, and have a 90% chance of being able to hide. If this potion is drunk while a Potion of Growth is in effect, they will simply cancel each other rather than making the drinker sick.

Dragon Control: The drinker of this potion can control up to three dragons of sub-adult or younger. The dragons do not get saving throws, but older dragons are not affected. Each potion of dragon control will only control one type of dragon. The controlled dragons will do anything that is commanded (other than suicidal commands) although they are not capable of casting spells. When the control ends, the dragons will become hostile to the drinker and will either flee or attack depending on their impression of the drinker's power. Roll 1d10 to see which type of dragon is affected: 1-2 = Black, 3-4 = Blue, 5-6 = Green, 7-8 = Red, 9-10 = White.

Dreamspeech: This potion only lasts for 10 minutes. The drinker can speak to one paralyzed, petrified or sleeping creature within 30' (only one creature can be spoken with per potion) and can hear the responses of the creature via ESP. The drinker will automatically understand the language of the target, but the target is under no compulsion to speak the truth (or even respond at all) if they do not wish to.

Elasticity: This potion only lasts for 10 minutes. The drinker may stretch and deform themselves and their equipment to fit through gaps as small as 1" and reach as far as 30'. The drinker cannot cast spells or attack while stretched, and items carried cannot be used or dropped unless they are in normal form. However, while stretched the drinker only takes half damage from blunt and bashing attacks.

ESP: This potion has the same effect as the spell of the same name.

Ethereality: This potion gives the drinker the ability to shift from the Prime Plane to the Ethereal Plane. The drinker may shift at any time before the potion's duration runs out, and may then spend up to 24 hours on the ethereal plane before shifting back. Once the drinker has shifted to the ethereal plane and back, the potion's duration immediately expires.

Fire Resistance: The drinker becomes immune to normal fire, gains a +2 bonus on all saving throws against fire or heat based attacks, and takes -1 point of damage per die (to a minimum of 1 point per die) from magical fire attacks.

Flying: This potion has the same effect as the Fly spell.

Freedom: The drinker is immune to paralysis and to all forms of Hold spell or effect.

Gaseous Form: The drinker's body transforms to a cloud of gas for up to 1 hour, causing all their equipment and carried items to fall to the floor. The drinker keeps control of their body, and can move through any non-airtight barrier. While in gaseous

form, the drinker cannot attack, but has an armor class of -2 and can only be hit by magical weapons.

Giant Control: The user may control up to four giants of a certain type, but each one gets a saving throw. The giants will normally be hostile once control ends. To determine the type of giant affected, roll 1d6: 1 = Cloud, 2 = Fire, 3 = Frost, 4 = Hill, 5 = Stone, 6 = Storm.

Giant Strength: The drinker gains the strength of a giant, and can do double damage with melee weapons or throw large rocks (range: 60/130/200) for 3d6 damage. This potion does not stack with other strength enhancing items such as Gauntlets of Ogre Power.

Growth: The drinker grows to twice normal size, and be able to do double damage with melee attacks. If this potion is drunk while a Potion of Diminution is in effect, they will simply cancel each other rather than making the drinker sick.

Healing: This potion will either cure 1d3+1 body points of damage to the drinker or cure their paralysis. This potion has an instant effect, rather than a duration.

Heroism: The drinker will temporarily gain one or more levels as follows (roll 1d20):

Common Man (no class): +3 Fighter levels.

Fighting Classes: 1-8: +1 level, 9-14: +2 levels, 15-19: +3 levels, 20: +4 levels

Specialist Classes: 1-12: +1 level, 13-19: +2 levels, 20: +3 levels

Arcane Classes: 1-19: +1 level, 20: +2 levels

All damage (including energy drains) is taken from the extra levels and hit points first. Spellcasters do not gain additional spellcasting ability.

Human Control: The drinker may control up to 6 levels of humans, similar to a Charm Person spell. The targets can only be controlled while within 60' of the drinker, and the effect lasts only for the duration of the potion.

Invisibility: This potion has the same effect as the spell of the same name.

Invulnerability: The drinker gains a +2 bonus to armor class and all saving throws for the duration of the potion. If a second Potion of Invulnerability is drunk within a week, the only effect is sickness.

Levitation: This potion has the same effect as the spell of the same name.

Longevity: The drinker immediately becomes 10 years younger. The effect is an instant one rather than an ongoing one, and therefore cannot be dispelled. This potion will not reduce the age of the drinker below 15 years old.

Luck: This potion lasts only for 1 hour. The potion makes the drinker extremely lucky. The player of the drinking character may choose any one roll that they make on behalf of the drinking character within the duration and simply place the dice on the result of their choice rather than having to actually roll them.

Merging: This potion allows the drinker to merge other creatures into their own body. The drinker can merge up to seven other creatures, and both the drinker and the other creatures must be willing. Creatures simply step "into" the drinker and disappear along with their items and equipment. While merged with the drinker, the creatures do not take damage if the drinker is hit, and they cannot take any actions other than speaking. The merged creatures can step "out of" the drinker at any time.

Plant Control: The drinker may control all mundane plants and all plantlike creatures in a 30'x30' area up to 60' away. Mundane plants may entangle creatures in their area, but cannot otherwise attack.

Poison: This potion looks like any other, but it is poisonous. Anyone taking even a taste of the potion must save vs STR or die within 1d6 minutes. (Option: save vs Str or in a coma until poison is neutralized, lose 1d2 BP per day per day of coma.)

Polymorph Self: This potion has the same effect as the spell of the same name.

Sight: This potion lasts for 10 minutes. While this potion is in effect, the drinker can temporarily see despite any blindness conditions. Additionally, the drinker may see invisible things.

Speech: The drinker can understand all languages that they hear, and can respond in those same languages. This potion does not give the drinker the power to speak a language unless they first hear it spoken.

Speed: The drinker may move at double normal speed and attack twice per round.

Super Healing: This potion will either cure 2d3+3 body points of damage to the drinker. This potion has an instant effect, rather than a duration.

Treasure Finding: When the drinker concentrates, they can detect the distance and direction to the largest amount of treasure within 360'. The drinker gains no insight about the nature of the treasure or how to get to it.

Undead Control: The drinker can control up to 18HD in total of undead creatures of 9HD or less. The undead will be hostile when the duration ends.

Water Breathing: This potion lasts for four hours, and has the same effect as the spell of the same name.

Scrolls

Most scrolls contain spells and can only be used by arcane or divine casters although a few spell scrolls can be used by any intelligent being. Special scrolls (protection, etc.) can generally be used by anyone able to read them. Roll 1d20 to determine the type of scroll:

1-12: Spell Scroll (50% for Arcane Casters/50% chance for Divine casters); 13-15: Spell Scroll (Anyone); 16-20: Special.

Spell Scroll (Arcane Casters): These scrolls can only be used by arcane spellcasters. They contain 1d6 spells. Roll 1d20 to determine the level of each spell: 1-5: level 1; 6-10: level 2; 11-13: level 3; 14-16: level 4; 17-18: level 5; 19: level 6; 20: level 7 or higher. Each spell may be cast once (or copied into a spellcaster's spell book) then it fades from the scroll.

Spell Scroll (Divine Casters): These scrolls can only be used by divine casters. They contain 1d6 spells. Roll 1d20 to determine the level of each spell: 1-5: level 1; 6-9: level 2; 10-12: level 3; 13-15: level 4; 16-17: level 5; 18-19: level 6; 20: level 7 or higher. Each spell may be cast once (or copied into a spellcaster's spell book) then it fades from the scroll.

Protection from Demons: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Demons cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 20 minutes, or until someone inside the zone attacks a demon in hand-to-hand combat.

Protection from Drowning: All within a 10 foot radius of the reader gain the ability to breathe underwater (or similar non-harmful liquid) for 1 full day.

Protection from Elementals: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Elementals cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 30 minutes, or until someone inside the zone attacks an elemental in hand-to-hand combat.

Protection from Lycanthropes: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Lycanthropes cannot enter the zone, but can use missile and spell attacks against those inside the zone. The zone lasts for 60 minutes, or until someone inside the zone attacks a lycanthrope in hand-to-hand combat.

Protection from Magic: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Mortal level magic (whether from spells or items) cannot enter or leave the zone. The zone lasts for 60 minutes, and can only be broken extremely powerful magic, like a wish.

Protection from Metal: Metal weapons or other items cannot harm or damage the reader for a period of 60 minutes.

Protection from Poison: Poison cannot harm the reader for a period of 6 hours, and any poison in already in his system is completely removed.

Protection from Undead: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Undead cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 60 minutes, or until someone inside the zone attacks an undead in hand-to-hand combat.

Curse: Anyone who reads this scroll and who fails a save is cursed (GM's choice of effects) until a Remove Curse is successfully cast.

Special Ritual: This scroll contains a special ritual (see Ritual Magic) of the GM's design. The more powerful the ritual the more expensive and complex the ritual should be. Many such rituals should be black magic and require especially gruesome sacrifices.

Potion Recipe: This scroll contains a recipe for one of the potions listed in the above list specifying the materials and brewing procedure/time. Any spellcaster (or any non-caster with the Alchemy advantage) can follow the directions and brew the potion with a successful INT roll.

Wands and Staves

Most wands and all staves are magical devices that contain spell-like enchantments.

Wands are normally thin sticks around 18" long. They can only be used by spellcasters (normally only arcane casters, but there are exceptions). A wand will hold 5d10 charges, and each time it is used one charge will be used up. Once all the charges are used up, a wand is simply a non-magical stick. Treat the effects produced a wand as if created by a 4th level caster.

Staves are the bigger cousins of wands. They are normally 5'-6' long, and made of wood. They can only be used by spellcasters (normally only arcane casters, but there are exceptions). Staves tend to be more versatile and powerful than wands, although they still use charges. A staff will have 10d10 charges when found, and each use of the staff may use one of more of these charges. Once all the charges are used up, a staff is simply a non-magical stick, even powers that do not use a charge fail. Treat the effects produced a staff as if created by a 5th level caster. A staff can be used in melee as if a quarterstaff.

Some wands, called spell wands, simply have a spell impressed on them. A spell caster able to cast the type of spell (arcane or divine) contained in the wand can use the wand to directly cast the spell it is impressed with regardless of the spell's level for the normal cost in HP

Most wands and staves can only be made if instructions for the specific special ritual needed are discovered. The more powerful the wand or staff the more costly in time and material the ritual. Certain wands and staves may only be available as relics of ancient or lost civilizations (GM option) as the method of creating them has been lost.

Spell Wand: A spell wand contains one spell that a spell caster using the wand can directly cast for the normal HP cost (and corruption point cost if the spell is black magic). Determine the level of spell and the spell impressed in the wand randomly. Spell level: 1-6: level 1, 7-12: level 2, 13-17: level 3, 16-17: level 4, 18: level 5, 19: level 6, 20: higher level (GM choice).

Wand of Cold: Each time a charge is expended, this wand creates a cone of cold, 60' long and 30' wide at the end. All creatures within the cone must take 6d6 damage.

Wand of Enemy Detection: This wand is usable by any spellcaster. Each time a charge is expended, all creatures with hostile intent towards the user within 60' will glow as if on fire. This includes Invisible or hidden enemies; in which case the glow may give away their positions. The glow lasts for 10 minutes before fading.

Wand of Fear: Each time a charge is expended, this wand creates a cone of fear, 60' long and 30' wide at the end. All creatures within the cone must make a saving throw vs MIND or flee in terror for 5 minutes.

Wand of Fireballs: Each time a charge is expended, this wand creates a Fireball up to 240' away. Anyone in the area of effect takes 6d6 damage. Save for half damage.

Wand of Illusion: Each time a charge is expended, this wand creates a Phantasmal Force as the spell of the same name. The caster must concentrate to maintain the illusion.

Wand of Lightning Bolts: Each time a charge is expended, this wand creates a Lightning Bolt up to 240' away and then extending 60' from that point. Anyone in the path of the lightning takes 6d6 damage. Save for half damage.

Wand of Magic Detection: This wand is usable by any spellcaster. Each time a charge is expended, all magical items and active spells within a 20' radius will glow for 6 rounds (1 minute).

Wand of Metal Detection: Each time a charge is expended, the wand will point towards a type of metal named by the user if there is at least 1,000cn of it within 20'.

Wand of Negation: Each time a charge is expended, this wand will cancel the effects of another wand or staff. If the effect that is being negated is an effect with a duration, it will be negated for a single round.

Wand of Paralyzation: Each time a charge is expended, this wand creates a cone 60' long and 30' wide at the end. All creatures within the cone must make a saving throw or be paralyzed for 1 hour.

Wand of Polymorphing: Each time a charge is expended, this wand produces the effect of either a Polymorph Self on the user of the wand or a Polymorph Other on a target that the wand is pointed at. Unwilling targets may make a saving throw to avoid the effect.

Wand of Secret Door Detection: When this wand is activated, it will point the user towards all secret doors within 20'. This expends one charge per secret door revealed.

Wand of Wizardry: This wand holds a reservoir of hit points which the wielder can use to cast spells instead of (or in addition to) his own. This reservoir will hold 10d4 hit points. When the reservoir drops below 50% capacity, the wand will automatically use a charge and refill the next day (at dawn).

Wand of Trap Detection: When this wand is activated, it will point the user towards all traps within 20'. This expends one charge per trap revealed.

Staff of Cancellation: This staff may be used by any character, but may only be used once. When activated, it will

permanently drain any magical item (except an artifact) that is touched by it of all power. The GM may require an attack roll to touch a magic item carried or worn by another creature, normally against armor class 10.

Staff of Dispelling: This staff is usable by any spellcaster. When the staff is used and a charge is expended, it will cast Dispel Magic as if by a 5th level caster, except with a range of only touch. The staff can be used to dispel magic items. When it is used against an item and a charge is expended it will automatically destroy any potion or scroll; and will cause any other magic item to temporarily cease working for 1d4 rounds. Note that magic weapons and armor still work as mundane weapons and armor even when their magical properties are temporarily suppressed.

Staff of Harming: This staff is usable by divine casters only. Whenever a creature is struck by the staff, the wielder may expend one charge to inflict an additional 1d6+1 damage to the creature in addition to the normal damage that the staff does. The wielder of the staff can also activate it as normal to use any of the following effects as if casting the reverse of the curing spells (using up a variable number of charges):
2 charges = Cause Blindness
2 charges = Cause Disease
3 charges = Cause Serious Wounds
4 charges = Create Poison

Staff of Healing: This staff is usable by divine casters only. The wielder may activate the staff to cure 1d2 body damage to a target. This does not use a charge, but each target can only be cured once per day by the staff. The staff can also be activated to cure other things, although this uses charges as follows:
1 charge = Cure Blindness
1 charge = Cure Disease
2 charges = Neutralize Poison
3 charges = Restoration

Staff of Power: This staff holds a reservoir of hit points which the wielder can use to cast spells instead of (or in addition to) his own. This reservoir will hold 10d10 hit points. When the reservoir drops below 50% capacity, the staff will automatically use a charge and refill the next day (at dawn).

Staff of Striking: Whenever a creature is struck by the staff, the wielder may expend one charge to inflict an additional 2d6 damage to the creature in addition to the normal damage that the staff does.

Staff of Withering: The wielder of the staff may activate the staff and expend a charge to touch a target and cause the target to make a saving throw or age 10 years. This staff does not work on undead.

Rings

Magical rings like those listed below are generally beyond the ability of current civilizations to create. They are the creations of ancient and/or lost civilizations.

A magical ring must be worn on a finger or thumb to operate, and a character can only wear one magical ring per hand. If a second ring is put on the same hand as an existing ring, neither ring will function (with the exception of a Ring of Weakness). Rings are usually either constant in effect or are activated by a "use item" action.

Animal Control: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Animal Control with the exception that the wearer only gets a single attempt to control creatures per use.

Delusion: This ring will appear to function as a different type of ring if an Analyze spell is used on it. Once the ring is worn, it will be completely nonfunctional, but cannot be removed without a Remove Curse being cast on it.

Djinn Summoning: Once per week, the wearer of this ring can summon a djinn, who will serve them for a day. If the djinn is

killed, the ring loses its magical power.

Ear: Three times per day this ring can be removed from its wearer's finger and placed against any surface. Until the wearer recovers the ring, they will be able to hear everything that happens around the ring as if their ear were in the ring's location.

Elemental Adaption: To determine the exact type of ring found, roll 1d100: 01-21 = Air, 22-42 = Earth, 43-63 = Fire, 64-84 = Water, 85-91 = Air and Water, 92-98 = Earth and Fire, 99-00 = All Elements.

The wearer of the ring is protected from environmental hazards in the elemental plane that matches the elemental alignment of the ring, and is able to breathe in those planes despite lack of air.

Fire Resistance: This ring makes its wearer immune to natural fire, gives a +2 bonus to all saving throws against magical fire, and reduces all magical fire damage done to the wearer by one point per die (to a minimum of one point per die).

Human Control: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Human Control with the exception that the wearer only gets a single attempt to control people per use.

Invisibility: This ring may only be used once per turn. When activated it affects the wearer as if they had cast an Invisibility spell on themselves.

Life Protection: This ring will protect its wielder from 1d6 levels worth of energy drain. If overloaded (for example if it has only a single level of protection left and the wearer is drained two levels) then it will successfully protect the caster and then turn to dust. If it is exactly used up without being overloaded, it will become a Ring of Protection +1 once its levels of protection have been used up.

Memory: This ring can only be used by a spell caster. Once per day, the caster may activate it to recover one spell that they have cast within the previous ten minutes. That spell will be available for casting again as if freshly prepared.

Plant Control: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Plant Control with the exception that the wearer only gets a single attempt to control creatures per use.

Protection: This ring gives a bonus to its wearer's armor class and to all saving throws equal to its magical bonus. If a character wears a Ring of Protection on both hands, only the larger of the two bonuses applies.

Quickness: Once per day, the wearer of this ring can move at double speed and take two actions per combat round for ten minutes.

Regeneration: The wearer of this ring will recover 1 hit point per ten minutes, and can slowly re-grow lost body parts. A limb will re-grow over the course of a week, whereas a finger or ear would re-grow over the course of a single day. This ring will not stop working when the wearer is on 0 hit points, and will not prevent the wearer from dying. It will also not heal damage from fire or acid (although will re-grow limbs lost to fire or acid).

Remedies: Once per day, this ring will duplicate the effect of a Cure Blindness, Cure Disease, Remove Curse or Neutralize Poison spell as if cast by a 6th level divine caster. The spell can be cast on the wearer or on a target that the wearer touches.

Safety: This ring acts like a Potion of Luck except that it has 1d4 charges and uses up a charge each time a die is placed instead of rolled. Once all the charges have been used up, this ring becomes non-magical.

Seeing: Once per day this ring enhances the character's sight for 30 minutes: a polymorphed creature or object will appear as it really is, superimposed with its present form. When looking at a person one may tell his alignment, class, level, and general intentions. One may also see invisible, displaced, ethereal and astral objects. Blindness is temporally "cured" when this ring is active.

Ring of Shooting Stars: Once per day, this ring can unleash 1d6 meteors that behave as the *Lightning Bolt* spell, but do 3d6 damage.

Spell Eating: This ring appears to Analyze spells to be a Ring of Spell Turning and operates as one. However, if the wearer of the ring casts a spell themselves, the ring immediately "eats" all the remaining prepared spells that the caster has. The ring can then no longer be removed except by the use of a Remove Curse cast by a 25th level caster. Once the curse has been activated, the wearer can prepare new spells as normal, but will lose them again when they next cast one.

Spell Storing: This ring will contain 1d6 different spells (determined randomly as if spells on a Spell Scroll) when found. The wearer of the ring can cast these spells once each, even if not a spell caster. The spells will always be cast as if by a caster of the minimum level needed to cast them, even if the wearer of the ring is a caster of higher level. Each spell can be recharged by having a spell caster cast it directly into the ring. The ring cannot "catch" spells generally cast at the wearer; the spells must be cast directly at the ring with the purpose of recharging it.

Spell Turning: Each day, this ring will reflect the first 2d6 spells (roll each day) cast at the wearer back at their casters. This only effects actual spells, not the spell-like powers of monsters or magic items. Once it has absorbed as many spells as it can, the ring has no other powers until the following day.

Survival: This ring will contain 1d100+100 charges when found. Each charge spent will allow the wearer to go for 24 hours without food and drink or for 1 hour without breathing. When the ring is down to its last five charges, it will turn black; and when it runs out of charges it will crumble to dust.

Telekinesis: This ring can be activated to produce an effect identical to the Telekinesis spell, capable of moving objects weighing up to 2,000cn.

Truth: Three times per day, this ring can be activated to telepathically warn its wearer whether a spoken statement that they have just heard is true in the opinion of the speaker. Note that there is a difference between the speaker being untruthful and the speaker merely being honestly wrong about something.

Truthfulness: This ring appears to be a Ring of Truth when examined with an Analyze spell, and will work as a Ring of Truth. However, once worn it cannot be removed except by a Remove Curse spell cast by a 26th level caster, and it compels its wearer to always speak the truth. The wearer may not knowingly lie while wearing the ring (but the ring doesn't prevent them from accidentally being wrong).

Truthlessness: This ring appears to be a Ring of Truth when examined with an Analyze spell, and will work as a Ring of Truth. However, once worn it cannot be removed except by a Remove Curse spell cast by a spellcaster of at least 12th level, and it compels its wearer to always speak lies. The wearer may not knowingly make any true statement while wearing the ring (but the ring does not prevent them from making a statement that is accidentally true if they genuinely don't know that it is).

Water Walking: This ring allows its wearer to walk on the surface of any liquid without sinking.

Weakness: 1d6 rounds after this ring is worn, it will immediately lower its wearer's strength score to 3. The ring cannot be

removed until it has had a Remove Curse spell cast on it.

Wishes: This ring will grant from one to four wishes (as the Wish spell) before crumbling into dust. To determine the number of wishes contained in the ring, roll 1d10: 1-4 = 1, 5-7 = 2, 8-9 = 3, 10 = 4.

X-Ray Vision: The wearer of this ring can see up to 30' through stone or up to 60' through wood. It cannot be used to see through metal. To use the ring, the wearer must stand still and concentrate and can view a 10'x10' area per use. It takes 10 minutes to scan such an area, and the ring can only be used once per hour.

Ancient and Wondrous Items

Rings of power were not the only magic items produced in ancient times by civilizations all-but-forgotten today. Many wonderful magic items existed then. Most of these items are very rare today even if they were fairly common ages ago. Some of these items may be one of a kind or have never existed outside of legends. Like magic rings, the methods used to create these items are generally lost to the mists of time.

Amulet of Scrying Protection: This item protects its wearer from being scried on via a Crystal Ball, and makes them immune to all types of ESP.

Bag of Devouring: This bag looks like a normal sack, but any non-living item placed entirely within it disappears from view and weighs nothing while in the bag. It will hold items up to 10,000cn in weight, providing the items fit wholly within it (i.e. they are 5'x1'x1' or smaller). Items placed within the bag can be found by touch by anyone reaching into the bag and can be withdrawn. However, any item left in the bag for more than two hours will vanish completely. This will not affect living creatures that are stuffed into the bag.

Bag of Holding: This bag looks like a normal sack, but any non-living item placed entirely within it disappears from view and weighs nothing while in the bag. It will hold items up to 10,000cn in weight, providing the items fit wholly within it (i.e. they are 5'x1'x1' or smaller). Items placed within the bag can be found by touch by anyone reaching into the bag and can be withdrawn. **Boat, Undersea:** This boat can be operated as a fully functional skiff. However, when a command word is given, it will dive under the water while simultaneously radiating a Water Breathing effect that protects all passengers who are touching the boat. The pilot of the boat can control its movement underwater as if on the surface.

Boat, Folding: This is an ordinary wooden rowboat or sailboat, but when it is not immersed in water, it can be collapsed into a 6-inch cube with a button on one side. If the button is pressed, the boat opens up instantly.

Boots of Dancing: These boots function as Boots of Speed until such time as the wearer is in combat or attempting to flee from same. At that point the wearer will be unable to do anything but dance, effectively reducing her speed by half.

Boots of Leaping: The wearer of these boots can make leaps of up to 10' vertically and up to 30' horizontally.

Boots of Levitation: The wearer of these boots may Levitate as per the spell of the same name. There is no limit to the duration of the levitation. **Boots of Speed:** When travelling overland, the wearer of these boots travels at the speed of a riding horse. However, the wearer can only move at this speed for a single day and then must rest for a day.

Boots of Speed: By speaking the command word, these boots double the wearer's speed, but they require the wearer to rest for twice as long as they were used.

Bowl of Water Elementals: Once per day, this bowl can be filled with water and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice water elemental. Conjuring the elemental takes 10 minutes.

Bracers of Armor: These leather bracers can be worn by anyone, regardless of their training in armor. While worn, they confer a bonus to AC. Roll 1d6 when found: 1-3: +1 AC, 4-5: +2 AC, 6: +3 AC.

Brazier of Fire Elementals: Once per day, this brazier can be lit and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice fire elemental. Conjuring the elemental takes 10 minutes.

Broom of Flying: This broom will carry its owner through the air at a speed of 80' per round. The owner of the broom must concentrate to move, and the broom will hover if the owner stops concentrating. The broom can also carry a passenger, but in this case its speed is reduced to 60' per round.

Cape of Escape: Three times per day, the wearer of this cape can, with a flourish, teleport up to 60 feet, leaving behind a bank of smoke in his wake similar to the *Obscurement* spell.

Censer of Air Elementals: Once per day, this censer can be filled with incense and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice air elemental. Conjuring the elemental takes 10 minutes.

Chime of Time: This simple metal chime can be commanded to keep track of time. It will sound every hour until commanded to stop, and can be clearly heard within a 60' radius. If the chime is in a Silence 15' Radius spell when it is time to chime, it will automatically dispel the spell as it chimes. The chime can also be used like a hourglass. If commanded, it will slowly change color from one end to the other taking exactly one hour to do so.

Crystal Ball: A crystal ball is a scrying device that can only be used by a spellcaster. The crystal ball can be used three times per day to see any place or object that they desire; and a current image of that place or object will appear and last for 10 minutes. The clarity of the image will be based on the familiarity that the user has with the object or area.

Crystal Ball of Suggestion: This Crystal Ball is being watched by a malevolent intelligence, which will show the user what it wants her to see rather than what she wants to see. It will finish by casting *Suggestion* on the user.

Crystal Ball with Clairaudience: This works just as a normal Crystal Ball, except that by concentrating the user can hear what is going on at the far end as if through the ears of any living creature shown in the ball. Only a spellcaster can use this item.

Crystal Ball with ESP: This works just as a normal Crystal Ball, except that by concentrating the user can read the thoughts of the main subject of the vision if it is a living creature. Only a spellcaster can use this item.

Decanter of Endless Water: On command, this glass bottle pours out one gallon of clean water, either fresh or salty according to the user's wishes. A rare few have a second function, producing a gushing torrent of water on command.

Deck of Illusions: When thrown down, this deck of cards creates illusions equal to the *Phantasmal Forces* spell. The face cards (Jack, Queen, King, and Ace) instead produce *Spectral Forces*. Each card only functions once, becoming a normal (if finely made) playing card forever after.

Deck of Many Things: This special deck of cards has only 20 cards, but each has an amazing power. The owner and anyone else present may draw as many times as they wants, but the deck shuffles after every draw. When all the cards have been drawn or everyone has agreed to stop drawing, they reassemble and vanish, leaving only the sound of mischievous laughter. Sample effects: Placed under a geas, granted one wish, instantly killed, gain one level instantly, add one point to a single stat.

Displacer Cloak: This item makes the wearer appear to be 5' from their actual position. This makes all attacks against the wearer take a -2 penalty to their to-hit rolls, and gives the wearer a +2 bonus to all saving throws.

Drums of Panic: These are a pair of large kettle drums. When played, they have no effect on creatures within 10' of them, but creatures from 10' to 240' from them must make a saving throw vs MIND or flee in terror for 30 minutes.

Dust of Disappearance: When this dust is sprinkled over a creature or object, it becomes invisible as if under the spell *Invisibility* for 1 turn.

Dust of Appearance, when sprinkled, reveals any invisible creature or object within 5 feet of where it settles.

Efreeti Bottle: This 3' tall heavy jug contains an efreeti. The stopper may be opened once per day, and the efreeti will come forth and serve the opener. If the efreeti is slain, the bottle becomes non-magical. The efreeti is reluctant to serve, and will do its best to use loopholes in the commands that it is given in order to cause harm to the owner of the bottle.

Egg of Wonder: This is a painted hollow eggshell. When dropped or thrown (up to 60') it will break and an animal will emerge and grow to full size. For the next hour, the animal will obey the user of the egg then it will disappear. To determine the type of animal summoned, roll 1d12: 1 = Ape (Rock Baboon), 2 = Bat (Giant), 3 = Bear (Black), 4 = Bear (Grizzly), 5 = Boar, 6 = Cat (Mountain Lion), 7 = Cat (Panther), 8 = Ferret (Giant), 9 = Lizard (Giant Gecko), 10 = Lizard (Giant Draco), 11 = Snake (Racer), 12 = Wolf.

Elven Boots: These boots give their wearer a Move Silently ability of 75%, like a thief.

Elven Cloak: This cloak is just like a Ring of Invisibility except that its invisibility is not perfect. When the wearer is in the presence of creatures that might notice them, their faint outline will be seen if a 1 is rolled on 1d6.

Figurine of Wonder: This is a small carved statuette of an animal. It works like an *Egg of Wonder*, but when time runs out (or if it dies), rather than disappearing it turns back into a figurine. It always produces the same kind of animal, and it can be used once per week.

Flask of the Alchemist: This flask can be filled with one pint of any ordinary liquid. Additionally, it can be used to produce a single dose of 1d4+1 randomly-selected potions. This latter ability only works as many times per week as the number of different potions it can make.

Flask of Curses: When the wax seal on this bottle is broken, the one who broke it will be affected by a random curse.

Flying Carpet: This carpet will carry one passenger at a speed of 100' per round, two at a speed of 80' per round, three at a speed of 60' per round, four at a speed of 40' per round, or five at a speed of 20' per round. The owner of the carpet must concentrate to make it move, and the carpet will hover in place if the owner stops concentrating.

Gauntlets of Ogre Power: The owner of these gauntlets has a strength of 18 while wearing the gauntlets, but taking them off returns the owner's strength back to its normal value.

Girdle of Giant Strength: Anyone who wears this girdle does double damage with whatever melee attacks they make.

Goggles of Infravision: While wearing these lenses, you can see in the dark as well as you can in light.

Hat of Disguise: Three times per day, the wearer of this hat can alter their appearance as *Change Self*, including their clothes.

Helm of Blindness: Anyone wearing this helmet is immediately made blind. The blindness cannot be cured until the helmet has been removed, and the helmet cannot be removed without a Remove Curse spell being cast on it.

Helm of Brilliance: At will, the wearer of this helm can cast *Light*. Three times per day, the wearer can cast *Wall of Fire*. Also, the wearer gains a +10 bonus to any saves against fire.

Helm of Reading: This helmet allows the wearer to read any language or cipher, and allows them to identify magical scrolls. However, it does not allow the wearer to use Spell Scrolls if they are not normally able to do so. This helmet is rather delicate, and has a 10% chance of being broken each time its wearer is struck in combat.

Helm of Telepathy: The wearer of this helmet can transmit their thoughts to any creature within 60'. The target creature will understand the thoughts of the wearer despite language differences. The wearer may also use the ESP spell to read the thoughts of others.

Helm of the Sea: While worn, this helmet allows the wearer to breathe and fight normally with any weapon she can use underwater, and grants her buoyancy enough to swim even if heavily armored.

Helm of Teleportation: This helm is only usable by arcane casters. The wearer of the helm may use the Teleport spell as often as they like to teleport themselves, with the normal chances of failure. The wearer may also use the helm to Teleport another creature (again, as if casting the spell). However, doing this discharges the helmet and it can no longer be used for any teleporting until it is recharged by having a Teleport spell cast into it.

Horn of Blasting: This horn can be blown once per ten minutes. When it is blown, it creates a cone of sound 100' long and 20' wide at the end. Everyone in the area must take 2d6 damage and make a saving throw vs STR or be deafened for ten minutes. Buildings and ships in the area of effect take 1d8 damage.

Horn of Valhalla: Once per day, this horn may be blown to summon the souls of 2d4 brave warriors, who fight alongside the one who blew it as Berserkers for one hour. Their weapons count as magical.

Horseshoes of Swiftmess: Function as *Boots of Speed*, but can be attached to the feet of any horse, pony, donkey, or mule (including magical horse-like creatures such as pegasi). All four must be worn for it to work, but the horse will never throw a shoe while they are attached.

Hurricane Lamp: When this lamp is opened for the first time in a day, a hurricane of wind and rain emerge. Everyone within 30' of the lamp is knocked to the floor for three rounds, and must make a saving throw vs. DEX to avoid having all loose items or items held or carried by them (including weapons, but not including clothing) is scattered throughout the area. Once the hurricane has ended, the lamp may be used as a Lamp of Long Burning, although the hurricane will reset each day and must be triggered again before the lamp can be used.

Incense of Miracles: This incense can burn for up to four hours. A cleric or druid who prepares spells while the incense is lit does so as if she were two levels higher, up to and including having the next level of spells.

Ioun Stone: Mined from the core of a dead star, there are eight kinds of ioun stone, each with different effects. When activated, they can slowly orbit around their owner's body if she so desires. Roll 1d8 to determine type: 1-Red (+1 to STR) 2-Orange (Reduce all damage by 1) 3-Yellow (+1 to DEX) 4-Green (User does not need to eat, drink, sleep, or breathe unless they want to) 5-Blue (+1 to MIND) 6-Purple (+1 to CHA) 7-White (Regenerate 1 BP/turn) 8-Prismatic (+1 to all d20 rolls)

Item of Delusion: Roll randomly on the table again. Although this is in all other respects a perfectly normal example of a similar item, whoever touches it is cursed to believe it is the indicated item despite all logical evidence to the contrary. (For instance an ordinary broomstick might be mistaken for a *Broom of Flying*).

Lamp of Long Burning: This lamp must be filled with oil and lit like any other lantern, but it will burn forever without using any of the oil that it contains. The lamp can be put out and re-lit repeatedly like any other lamp. If the lamp is ever completely submerged in water while lit, it will immediately stop working and lose its magical properties.

Loadstone of Weight: Whoever touches this heavy rock is unable to discard it until the curse is removed. 20% of these loadstones are also *items of delusion* that lead the bearer to believe that it is actually an enormous and valuable gemstone.

Medallion of ESP: This medallion allows the wearer to use the ESP spell at will, with a range as given in the item listing (either 30' or 90'). However, each time it is used, there is a 1 in 6 chance that instead of letting its wearer read minds, it will broadcast its all of its wearer's thoughts out loud for the next ten minutes.

Mirror of Life Trapping: If the owner of this mirror presents it to a creature of human size or smaller and activates it, the creature must make a saving throw vs. MIND or be sucked into the mirror, complete with everything they are wearing and carrying. The mirror can hold up to 20 creatures, who exist in a state of suspended animation while in the mirror, not needing food, drink or air and completely unable to take any actions.

Anyone looking into the mirror can see the reflections of the faces of all those trapped inside, and can wake any of them up temporarily to talk with them. No special communication powers are granted, so the viewer and victim need to share a common language to talk in. If the mirror is broken, all the creatures inside are instantly freed. However, the only way to free a single creature without breaking the mirror is to is a Wish spell.

Muzzle of Training: This muzzle will automatically reshape and resize itself to fit any creature with a mouth. When put on a creature and locked with a command word, the creature is magically prevented from biting, talking and casting spells; but it can still eat, drink and breathe normally. The owner of the muzzle can unlock it with a second command word, but otherwise it is locked with the equivalent of a Wizard Lock cast by a 6th level caster.

Nail, Finger: This appears to be a Nail of Pointing if checked with an Analyze spell. However, when someone tries to use it as such it will disappear. The next time that person tries to be unnoticed (by disguise, Invisibility or hiding), an illusion of a large glowing hand will appear above their head pointing them out. After that first instance, there is a 25% chance each time the person tries to go un-noticed that the hand will re-appear. This will continue to happen until the victim has a Remove Curse spell cast on them.

Nail of Pointing: This appears to be a simple 6" iron nail. Once per day, it can be commanded to point to a mundane (not magical or living) object, and for the next ten minutes the nail will point at the closest instance of that type of object (distance is irrelevant).

Ointment: This creamy white salve is normally found in small jars. To use the ointment, the whole jar must be applied to someone's skin. When the ointment is applied in this manner, it will have a random effect, rolled on 1d6: 1 = The user gets a +2 bonus to armor class and saving throws for the next ten minutes, 2 = The user is healed 2d6+2 points of damage, 3 = The user must make a saving throw vs. STR or die, 4 = The user takes 2d6 points of acid damage, 5 = The user is cured of all burn damage, whether magical or normal, 6 = The user's

skin turns bright orange for the next 1d4 months.

Pouch of Security: If this large sack is stolen, it will shout "Help! I am being stolen!" in common repeatedly for the next hour. The sack's owner can command it to be quiet before the end of the duration.

Quill of Copying: When supplied with 1,000gp worth of rare inks, any spell user can command this quill to copy a Spell Scroll containing one or more spells of a type that they can cast onto a blank parchment. There is a 75% chance that the spells will be copied correctly, creating two identical Spell Scrolls, and a 25% chance that the quill will burst, becoming useless and depositing its ink over both parchments (both ruining the original and failing to make a copy).

Ring Gates: Anything that passes through one of these two silver hoops (assuming it can fit) comes out of the other gate, preserving its momentum as it does so. One gate is set with a sapphire, the other is set with a carnelian.

Rope of Climbing: On command, this 50' rope will wriggle along the ground like a snake, and even up walls and on ceilings. It can fasten itself onto any solid protrusion on a surface that it is climbing up, and will support up to 10,000cn of weight. A second command will cause the rope to loosen itself and recoil.

Scarab of Protection: This charm has 2d6 charges. Each time a curse is placed on the wearer, it will immediately target the wearer with a Remove Curse as if by a 36th level caster. Each Remove Curse uses up one charge. Additionally, it will block any Finger of Death or Obliterate spell (the reverse of the Raise Dead and Raise Dead Fully spells) cast at the wearer; and this also uses up one charge. When the scarab has run out of charges, it crumbles to dust.

Ship, Flying: Anyone with skill at sailing can pilot this ship, which in the absence of wind (or when sailing into the wind) can magically prepare itself at around 15 miles per hour. Most flying ships are at Small Ships or Large Ships, but a few Galleys and Longships are known to exist.

Slate of Identification: This 3' square framed sheet of slate is used to identify magic items. The slate has ten charges per day, and is used by placing it on a horizontal surface and then placing a magic item on it. When activated, the slate will identify the magic item (if it has enough charges left to do so) and chalk writing will appear on the slate indicating type of magic item and what command words it has (if any). If asked to identify an artifact, the slate will shatter.

The slate is incapable of identifying cursed items, even those that fail to fool an Analyze spell (such as a Potion of Poison). If it is asked to identify a cursed item, the slate will identify it as being a random type of similar but useful item.

The number of charges needed to identify different types of item are: Potion = 2 charges, Scroll = 3 charges, Ammunition = 3 charges, Wand = 4 charges, Staff = 5 charges, Weapon = 6 charges, Armor or shield = 7 charges, Ring = 8 charges, Wondrous item = 9 charges.

Spoon of Sustenance: This wooden spoon, when placed in a bowl or pot and stirred three times, fills the container with bland-tasting but highly nutritious gruel, which can be flavored with magic.

Stone of Earth Elementals: Once per day, this stone can be buried in the earth and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice earth elemental. Conjuring the elemental takes 10 minutes.

Talisman of Travel: This talisman allows the wearer to cast either a Conjure Elemental or Summon Elemental spell in reverse. Instead of the spell summoning an elemental to the caster, the reversed spell will transport the caster to the elemental plane of their choice. While the caster continues to

wear the talisman, they are protected from environmental damage on the elemental plane, such as choking or burning, and can breathe normally.

Tome of the Archwizard: 75% of Tomes of the Archwizard contain every Magic-User spell ever invented. The rest contain every Illusionist Spell ever invented. Additionally, the book seems to have infinite pages for note-taking. Unlike other spellbooks, whoever possesses it is capable of reading the spells within (whether or not she can cast them) after one week of study.

Tome of Training: By spending one day studying the insights recorded in this book, a member of the indicated class instantly gains one level. Each Tome of Training only works once per reader.

Wheel of Floating: When put on a cart or wagon, this wheel will allow the cart to be pulled on the surface of water rather than sinking. A single Wheel of Floating will hold up a vehicle of up to 10,000cn in weight, with every additional Wheel of Floating adding 5,000cn to that weight. Although these wheels will keep the vehicle above water, they do not effect whatever animal or animals are pulling the vehicle.

Wheel, Square: This wheel is the size of a wagon or cart wheel, but is square rather than round. It cannot be used on normal terrain, but when fitted to a wagon or cart it will allow the cart to travel over desert or mountain as if being pulled along a road.

Magic Weapons and Armor

Basic magic weapons and armor can be made by any master weapon smith or master armorer, provided he or she has enough meteoric iron and time. A +1 item will take a full year to create. A +2 item will take 4 more years (total of 5 years). A +3 item is a lifework, requiring first creating a +2 item and doing 20 years additional work on it -- for a total of 25 years. +4 and +5 items are possible in theory but would be the work of generations of craftsmen as a +4 item would require 125 years to create and a +5 item 600 years to create, with the original/current craftsman's specially trained apprentice taking over the task -- if the chain of master training replacement gets broken, the item can no longer be successfully improved. Weapons can have a damage bonus as well. It takes 50% of the time listed above to enchant a magic weapon damage bonus. If a weapon is to have both a damage and a hit bonus, the damage bonus must be added first then the hit bonus -- but the entire procedure must be one continuous enchantment operation.

Some magic weapons and armor have special powers such as the ability to shed light, better attack or damage certain types of creatures, magic effects similar to spells, etc. Learning to enchant such weapons takes years or research (or finding someone else's research notes and figuring them out). The exact powers that can be enchanted in this manner are up to the GM, but some of these rare abilities are listed below.

Wheel, Square: This wheel is the size of a wagon or cart wheel, but is square rather than round. It cannot be used on normal terrain, but when fitted to a wagon or cart it will allow the cart to travel over desert or mountain as if being pulled along a road.

Cursed Weapons: Until the curse is broken by a *Remove Curse* spell, the wielder of a cursed weapon cannot discard the weapon and cannot draw any other weapon unless they are already holding the cursed one.

Dancing Weapon/Shield: Weapon fights on its own within 30 feet of owner, as a +1 weapon during first round of combat, a +2 weapon during second round of combat, and a +3 weapon during third round of combat. Afterwards, its owner must direct it to sheathe itself or attack a new opponent or else it acts as an otherwise ordinary (i.e. non-dancing) +1 weapon for 24 hours. Dancing shields work similarly, but defend instead of attack.

Ethereal Armor: Wearer is able to become incorporeal and can only be hit by other incorporeal creatures such as wraiths. This ability functions 50 times.

Fire Brand: Weapon is covered in licking flames, dealing 1d6 extra fire damage on a hit. The flames shed light in a 30' radius.

Fiery Armor: Any creature that makes a melee attack against the wearer takes 1d3 fire damage if they hit.

Frost Brand: Weapon is always as cold as ice, dealing 1d6 extra cold damage on a hit. Also keeps rations fresh for longer due to refrigeration.

Intelligent weapon: 10% chance of being able to cast a random spell of level 1d3 1/day. Can communicate with owner, 1 in 4 chance of being able to talk. Some are petulant and act as a cursed weapon unless they get their way.

Armor of Invulnerability: The character is immune to critical hits (except by Vorpal weapons) and only hit by magic weapons.

Possessed Armor: Contains the ghost of a previous wearer, who may or may not be able to take the armor for a joyride when it's not being worn and may or may not be willing to cooperate with the new owner.

Vorpal Weapon: Only weapons with some sort of bladed edge can be Vorpal. On a critical hit, a vorpal weapon slices off the head of its target, so long as it has a head. Unless the target has another head or is something that doesn't rely on its head to survive, it dies instantly.

Random Determination of Treasure

This is a simple system for generating random treasure. This is only a sample. GMs should feel free to tweak this system for their needs or even replace it with a system of their own designed for their specific campaign.

Rolling randomly for treasure after the PCs have defeated monsters can produce a strange effect: magic items that the monsters could have used in the battle and logically should have used as the result of the battle would have been different. The best way to handle this is to roll treasure for planned encounters when you create the encounter. Of course, this is often not possible for unplanned encounters (wandering monsters, etc.). In such cases, there are a number of ways to handle it.

- 1) Ignore the problem and put the item rolled in the treasure. While easy, this is unrealistic.
- 2) Simply eliminate the item and do not roll another. Assume the monsters had one less item.
- 3) Reroll until you get an item that would not have been obviously useful in the encounter. This can take a lot of time if you keep rolling items that could have been used in the encounter.
- 4) Replace the item with a "treasure map" of some type leading to the item.
- 5) Allow the item, but in such a way that the monsters could not have used it in the encounter. Perhaps the item is well hidden in the encounter area and the monsters never found it (but the PCs might if they search for it). Perhaps the item needs to be activated with a command word the monsters did not know (and the PCs would have to discover somehow) or only activates for its bearer after some specific "ritual" has been performed (such as a magic weapon that appears completely normal until used to kill a specific type of monster).

Always remember that any system of random treasure determination, including this one, is meant to be the GM's servant, not the GM's master. The GM is never required to place treasure he does not want in the campaign or that would not realistically fit the situation/environment just because the treasure was rolled on the charts. In such cases, feel free to roll again.

Part 1: The Basic Formula

An individual monster has a base amount of treasure in its lair proportionate to its XP value, according to the following table.

Monster XP value Base hoard size

1	15
2	25
3	40
4	65
5	100
6	165
7	270
8	430
9	700
10	1130
11	1830
12	2960
13	4790
14	7750

Each additional XP 150% the previous value

For the actual value of the hoard, multiply the base value by 1d4. For particularly ancient or wealthy monsters such as dragons, you might add 1 to the d4 roll, or even roll 1d6 instead. Monsters of animal intelligence that do not value treasure, or intelligent ones that have fallen on difficult times, might instead divide the hoard size by a similar amount, or even be treated as a much lower-level creature, if indeed they have any treasure at all. Random, unguarded treasure in a dungeon should generally correspond to the level of dungeon it is found on.

If you want the numbers to be a little more random, you can roll a d6 and a d10 for any number of digits, but not the highest place, adding the amount on the d10 if the d6 is odd and subtracting it if it is even.

Part 2: Specific Items

Now a monster *could* have all their treasure in just plain gold pieces, but where's the fun in that? No, they should have a variety of coins, valuables, and magical treasure. Use the following guidelines to spice up your treasure.

- d% of the treasure is gold. d% of the remainder is silver. Whatever is left is copper.
- If a treasure is worth less than 1000 GP, then for every 100 GP (rounded down), there is a 10% chance to substitute a roll on the Minor Treasures table for 100 GP of the money. If there is less than 100 GP, then there is a 1% chance for every 10 GP.
- If a treasure is worth less than 5000 GP, for each 1000 GP (rounded down), there is a 10% chance to substitute a roll on the Medium Treasures table for 1000 GP of the money and a 10% chance of 1d4 rolls on the Lesser Treasures table in addition to the money.
- For each 5000 GP (rounded down), there is a 10% chance to substitute a roll on the Major Treasures table for 5000 GP of the money, a 10% chance of 1d4 rolls on the Medium Treasures table in addition to the money, and a 40% chance of 2d6 rolls on the Minor Treasures table in addition to the money.

1d20 Minor Treasures	Medium Treasures	Major Treasures
1-12 Minor Gem or Jewel	Medium Gem or Jewel	Major Gem or Jewel
13-19 Minor Object of Art	Medium Object of Art	Major Object of Art
20 Minor Magic Item	Medium Magic Item	Major Magic Item

Gems and Jewelry Table

1d8 Minor Gems	Medium Gems	Major Gems
1 Polished stone or glass worth 1d6 GP	Tiny precious stone worth 1d100 GP	Tooth-sized precious stone worth 1d100x10 GP
2 Cheap jewelry worth 1d6 GP	Jewelry worth 1d100 GP	Princely jewelry worth 1d100x10
3 Tiny precious stone worth 1d100+25GP	Tooth-sized precious stone worth 1d6x200 GP	Eye-sized gem or jewelry worth 1d100x80 GP
4 Jewelry worth 1d100+25GP	Fine jewelry worth 1d6x200 GP	Royal jewelry worth 1d100x80 GP
5 Tooth-sized precious stone worth 1d100+75GP	Tooth-sized precious stone worth 1d6x300 GP	Fist-sized gem worth 1d100x120 GP
6 Jewelry worth 1d100+75GP	Fine jewelry worth 1d6x300 GP	Royal jewelry worth 1d100x120 GP
7 Tooth-sized precious stone worth 1d100x10GP	Eye-sized precious stone worth 1d100x100 GP	Head-sized precious stone worth 1d100x200 GP
8 Fine jewelry worth 1d100x10GP	Princely jewelry worth 1d100x100 GP	Unique jewelry worth 1d100x200 GP

Objects of Art Tables

1d4 Minor Art	Medium Art	Major Art
1 1d6 GP	1d100 GP	1d100x10 GP
2 1d100+25GP	1d6x200 GP	1d100x80 GP
3 1d100+75GP	1d6x300 GP	1d100x120 GP
4 1d100x10GP	1d100x100 GP	1d100x200 GP

If you want to describe a specific piece of jewelry or art, you can use the following tables:

Art Object Details

1d12 Kind of Art	Kind of Jewelry	Jewelry material
1 Carving/Sculpture/Idol/Holy symbol	Ring	Carved wood
2 Tapestry	Earrings	Carved bone/ivory
3 Book/scroll/poem	Bracelet	Clay
4 Furniture	Anklet	Copper
5 Urn/pottery	Necklace/chain	Brass/Tin
6 Painting/drawing	Pendant	Iron
7 Container (sarcophagus/box/thea)	Body piercing	Bronze
8 Fine vestments/hat/other article of clothing	Comb/hairpin	Silver
9 Fine musical instrument	Spectacles/monocle/magnifying glass	Electrum
10 Ceremonial weapon or armor	Belt/waist chain	Gold
11 Unusually fine normal item (pipe, lantern, cup, hourglass, mirror, etc)	Brooch/pin/cufflinks/cameo	Carved entirely from a big quartz/semiprecious stone
12 Musical score/libretto	Crown/Tiara/Circlet	Platinum/Mithril (Reroll if Minor Jewelry)

Magic Items Table

1d4 Minor Magic Item	Medium Magic Item	Major Magic Item
1 One random potion	3 random potions	6 random potions
2 Roll once on the Minor Scroll table	Roll once on the Medium Scroll table	Roll once on the Major Scroll table
3 Roll once on the Minor Arms and Armor table	Roll once on the Medium Arms and Armor table	Roll once on the Major Arms and Armor table
4 Roll once on the Minor Enchanted Items table	Roll once on the Medium Enchanted Items table	Roll once on the Major Enchanted Items table

Potions Table

Roll a d6. If it's odds, roll on potion table 1. If it's even roll on potion table 2

1d20 Potions 1	1d20 Potions 1 (cont.)	1d20 Potions 2	1d20 Potions 2 (cont.)
1 Animal Control	11 Dreamspeech	1 Growth	11 Plant Control
2 Antidote	12 Elasticity	2 Healing	12 Poison
3 Blending	13 ESP	3 Heroism	13 Polymorph Self
4 Bug-repellent	14 Ethereality	4 Human Control	14 Sight
5 Clairaudience OR Clairvoyance	15 Fire resistance	5 Invisibility	15 Speech
6 Climbing	16 Flying	6 Invulnerability	16 Speed
7 Defense	17 Freedom	7 Levitation	17 Super Healing
8 Delusion	18 Gaseous Form	8 Longevity	18 Treasure Finding
9 Diminution	19 Giant Control	9 Luck	19 Undead Control
10 Dragon Control	20 Giant Strength	10 Merging	20 Water Breathing

Scrolls Table

For scrolls, randomly determine the list the spells are selected from. Scrolls seldom have more than one kind of spell written on them.

1d10 Minor Scrolls	Medium Scrolls	Major Scrolls
1 1 spell, 1st level	1 spell, 1d6 level	5 spells, 1d6 level
2 1 spell, 1d3 level	2 spells, 1d4 level	6 spells, 1d6 level
3 2 spells, 1d2 level	2 spells, 1d6+1 level	7 spells, 1d6 level
4 3 spells, 1st level	5 spells, 1d3 level	8 spells, 1d6 level
5 Cursed scroll	Cursed Scroll	Cursed Scroll
6 Protection scroll (random)	Protection Scroll (random)	Protection Scroll (random)
7 Special Ritual	Special Ritual	Special Ritual
8 Potion Recipe	Potion Recipe	Potion Recipe
9 Spell scroll, anyone can use (reroll 1d4)	Spell scroll, anyone can use (reroll 1d4)	Spell scroll, anyone can use (reroll 1d4)
10 Treasure Map	Treasure Map	Treasure Map

Arms and Armor Table

1d8 Minor Arms	Medium Arms (1d6)	Major Arms
1 Ordinary weapon with special ability	+1 weapon with special ability	+2 weapon with special ability
2 +1 ranged weapon	+2 ranged weapon	+3 ranged weapon
3 +1 melee weapon	+2 melee weapon	+3 melee weapon
4 +1 shield	+2 shield	+3 shield
5 +1 armor	+2 armor	+3 armor
6 Cursed weapon	+2 melee weapon	Unusual Weapon
7 Cursed armor or shield		Unusual armor or shield
8 Mithril armor		Mithril armor, +1

Weapon, shield, and armor properties

1d8 Cursed	Special abilities	Unusual Weapons	Unusual Weapons 2	Unusual Armor
1 -1	+1 to damage	+1 weapon that destroys undead on a hit (4+ HD undead get a save)	+1d4-1 (minimum 0) Flame Brand (see note)	+4 Armor
2 "	"	+1 weapon returns if thrown	+1d4-1 (minimum 0) Frost Brand (see note)	+4 Shield
3 -2	"	+1 weapon, extra attack 1/round	+1d4-1 (minimum 0) dancing weapon (see note)	+5 Armor
4 "	"	+1 weapon, +2 vs. particular type of enemy	+1d3 intelligent weapon (see note)	+5 Shield
5 -3	"	+1 weapon, +4 vs. particular type of enemy	+1d3 Vorpal weapon	Armor of Arrow Deflection (+2 AC against missile weapons)
6 -1 to AC against ranged attacks	Sheds light, 15' radius	+2 weapon, +3 vs. particular type of enemy	+2 weapon, +5 in the hands of randomly-selected class	Dancing Shield
7 Wearer must make WILL save to avoid (odds) fleeing at the start of combat (evens) charging recklessly at enemies	Sheds light, 30' radius	+4 weapon	+1d3 Lifedrinker (Drains 1 level from opponent on hit)	+1d4-1 (minimum 0) Ethereal Armor (See note)
8 Drains 1 level from wielder	+4 damage against a particular kind of foe (dragons, giants, orcs, etc)	+5 weapon	+1d3, grants 1 wish	+1d4-1 (minimum 0) Firey Armor (See note)
9 Backbiter (deals half damage to wielder)	Heals wielder for 1d6 HP or 1d2 BP 1/day			+1d4-1 (minimum 0) Possessed Armor (See note)
10 1 in 4 chance of breaking when used	Charm Person 1/day			+1d4-1 (minimum 0) Invulnerability (See note)

Enchanted Objects Table

1d20 Minor Enchanted Objects	1d20 Medium Enchanted Objects	1d20 Major Enchanted Objects
1 Minor Wand	1-2 Minor Wand	1-2 Major Wand
2 Minor Ring	3 Major Wand	3-4 Major Ring
3-20 Minor Wondrous Item	4-5 Minor Ring	5 Staff
	6 Major Ring	6-20 Major Wondrous Item
	7-20 Medium Wondrous Item	

Wands and Staves Table

1d6 Minor Wands	1d8 Major Wands 1	1d8 Major Wands 2	1d8 Staves
1-2 Level 1 spell	1 Level 3 spell	1 Wand of Magic Detection	1 Staff of Cancellation
3-4 Level 2 spell	2 Level 4 Spell	2 Wand of Metal Detection	2 Staff of Dispelling
5-6 Level 3 spell	3 Wand of Cold	3 Wand of Negation	3 Staff of Dispelling
	4 Wand of Enemy Detection	4 Wand of Paralyzation	4 Staff of Harming
	5 Wand of Fear	5 Wand of Polymorphing	5 Staff of Healing
	6 Wand of Fireballs	6 Wand of Secret Door Detection	6 Staff of Power
	7 Wand of Illusion	7 Wand of Trap Detection	7 Staff of Striking
	8 Wand of Lightning Bolts	8 Wand of Wizardry	8 Staff of Withering

Rings Table

1d10 Minor Rings	Major Rings 1	Major Rings 2	Cursed
1 Animal Control	Djinn Summoning	Shooting Stars	Delusion
2 Cursed	Elemental Adaptation	Spell Storing	Spell Eating
3 Ear	Human Control	Spell Turning	Truthfulness
4 Fire Resistance	Life Protection	Survival	Truthlessness
5 Poison Resistance	Memory	Telekinesis	
6 Plant Control	Protection +3	Truth	
7 Protection +1	Quickness	Water Walking	
8 Protection +2	Regeneration	Weakness	
9	Remedies	Wishes	
10	Safety	X-Ray Vision	

Wondrous Items Table

1d20 Minor Wondrous Items	Medium Wondrous Items	Major Wondrous Items	Cursed
1 Bag of Holding	Amulet of Scrying Protection	1d4: 1-Bowl of Water Elementals, 2-Brazier of Fire Elementals 3-Censer of Air Elementals 4-Stone of Earth Elementals	Bag of Devouring
2 Boat, Folding	Boat, Underwater	Crystal ball (1d4: 1-2-Normal, 3-Clairaudience 4-ESP)	Boots of Dancing
3 Boots of (odds) Leaping/(evens) Speed*	Broom of Flying	Deck of Many Things	Crystal Ball of Suggestion
4 Boots of Levitation	Cape of Escape	Efreeti Bottle	Flask of Curses
5 Bracers of Armor	Deck of Illusions	Flask of the Alchemist	Helm of Blindness
6 Chime of Time	Displacer Cloak	Girdle of Giant Strength	Loadstone of Weight
7 Cursed Item	Drums of Panic	Helm of Brilliance	Nail, Finger
8 Decanter of Endless Waters	Figurine of Wonder	Helm of Teleportation	Item of Delusion
9 Dust of (odds) Appearance/(evens) Disappearance	Flying Carpet	Horn of Blasting	
10 Egg of Wonder	Gauntlets of Ogre Power	Hurricane Lamp	
11 Elven Boots	Goggles of Infravision	Incense of Miracles	
12 Elven Cloak	Hat of Disguise	Ioun Stone	
13 Horseshoes of Swiftess	Helm of Reading	Mirror of Life-Trapping	
14 Lamp of Long Burning	Helm of the Sea	Ring Gates	
15 Nail of Pointing	Horn of Valhalla	Ship, Flying	
16 Ointment	Medallion of ESP	Slate of Identification	
17 Pouch of Security	Muzzle of Training	Stone of True Seeing	
18 Rope of Climbing	Quill of Copying	Talisman of Travel	
19 Spoon of Sustenance	Scarab of Protection	Tome of the Archwizard	
20 Wheel, Square	Wheel, Floating	Tome of Training (1d4 1-Arcane classes 2-Fighting classes 3-Specialist classes that cast spells 4-Specialist classes without spells)	

A Personal Note on Microlite78

Microlite78 was created at the request of a RetroRoleplaying Cancer Fund donor who asked me if I could piece together parts of *Microlite74* to produce a complete single volume *Microlite78: First Edition Lite* and add a "few things" to make it more like the 1978 "First Edition" of the world's most popular fantasy roleplaying game. It would have been simple to toss the rules from *Microlite74 Extended* with the descriptions from *Companion II (Treasure)*, *Companion IV (Bestiary of Monsters)* and *Companion V (First Edition Spells)* together in one volume. However, the request is for a bit more: classes written up in more detail (as in *Microlite81*, including the more normal XP treatment) and some of the system altered a bit to make it more like 1e.

I agreed to do this on April 5, 2014. Unfortunately, five days later my wife's mother passed away and we spent the next ten months dealing with the funeral, moving into her house which my wife inherited, selling our Waco house, and remodeling the new house to deal with my wife's disabilities. This turned what should have been a one or two month *Microlite78* project into a project that will have taken about a year to complete. My apologies to everyone who has been waiting and waiting for *Microlite78: First Edition Lite* for far longer than they (or I) expected.

Notes on "Old School" Play

While *Microlite78* is designed using tried and true "D20" systems filtered through the *Microlite20* rules, it is designed for a completely different style of play than many players who started to play in the last 20 years or so may be used to. This section will give a brief overview of "old school" play.

What is "Old School" Play?

There are two major styles of roleplaying games. The first (and older) style says "Here is the situation. Pretend you are there as your character, what do you want to do?" This style has been superseded over the years with a style that says "Here is the situation. Based on your character's stats, abilities, skills, etc. as listed on his character sheet and your knowledge of the many detailed rules of the game, what is the best way to use your character's skills and abilities and the rules to solve the situation?" Old school play strongly favors the first style and frowns on too much of the second.

Here are some major points where old school play is different:

Heroic, not Superheroic: Old school play, especially at low to mid levels, is about fairly normal people put in situations where they can be heroes, not about extraordinary people doing things that would make a four-color comic book superhero proud – and at first level yet. Just like in the real world, the more a character improves his abilities, the harder it is to improve them further, while new characters may advance rapidly, the higher their level the more effort and time (and XP) it takes to advance to the next level.

Achievement, not Advancement. Many modern games are often all about what special feats, extra classes and special game mechanics the players wish to obtain for their characters as they increase in level. In old school games, a character's abilities are generally predetermined by his character class, so old school games focus on the things that the characters wish to accomplish in the game world rather than on what game mechanics they want to acquire. Level advancement is often much slower than in modern fantasy RPGs which makes in campaign achievements even more important as a measure of character success.

No Skills: Unlike in most modern RPGs, there aren't any skills in *Microlite78* -- not even the streamlined four skills of *Microlite20*. Players are intended to have their characters act like adventurers. So don't search your character sheet or the

rules for the perfect solution in *Microlite78*. Instead, you just tell the GM what your character is trying to do. Note that you are assumed to be competent with all common activities associated with your class and background. If you need to keep a door open or shut, you might tell the GM your character is using a spike to keep the door open or closed. A ten foot pole is your friend for checking for traps. Searching a room means looking in and under objects, not rolling a skill check. While this may seem strange at first, you will quickly learn to appreciate the freedom it gives you. No longer are you limited to the skills and feats on your character sheet, you can try anything your character should be capable of trying. You might not succeed, but the rules generally will not stop you from trying.

Limited Magic Items: Modern fantasy RPGs often assume that magic items are easy to buy and/or to create. In most old school campaigns, magic items are relatively rare and hard to create. Only potions and scrolls are generally relatively easy to create or purchase. Other magic items are seldom found for sale (and are very high priced when they are found for sale) and are usually very expensive in money and time to try to create – often requiring rare ingredients that the characters must quest to find. Therefore characters are usually limited to the magic items they find in treasures or take from defeated enemies on adventures.

No Assumption of "Game Balance": Old style game sessions aren't about carefully balanced characters (who are all able to shine equally at all times) who only run into situations carefully designed by the GM to be beatable by the characters presently in the party and to provide treasure that fits their current level. Instead, part of player skill is learning to evaluate situations so situations well over the party's current abilities or which will waste the party's resources for little gain can be avoided. Don't assume that you can beat every monster that you encounter, running away from monsters too tough to handle can mean the difference between character survival and character death. You can also get creative in how you defeat monsters. Perhaps those goblins you bypassed could be talked into (or tricked into) attacking that giant you know you can't beat, perhaps killing it for you or at least softening it up so your party has a chance of defeating it and living to tell the tale. Also remember that treasure can be turned into XP, even if you can't kill the monsters, perhaps you can still acquire some of their treasure. Part of the skill of playing "old school" style is coming up with creative solutions when a direct attack is likely to fail.

It's Not All About Combat: Many modern fantasy RPGs have made combat the star of the system, combats in these systems are time-consuming and very crunchy with rules for everything. *Microlite20* avoids this by having a fast-playing abstract combat system. *Microlite78* takes this one step further, combat isn't intended to be the main source of fun in the game. The game is as much about exploration and treasuring finding as it is about combat. Sure, you are going to have to fight things to explore and find treasure, but always remember that combat may not be the best or safest way to handle every situation. Think before you rush into combat. After all, it's not the only way to earn a good pile of experience – and monsters don't have to be killed to be defeated (and get XP for them).

Reality/Common Sense Trumps Rules: Old-school games use loose and simple rules that cover average cases and the GM and players are supposed to apply common sense and their knowledge of how reality works to cover the unusual and edge cases. "Reality/Common Sense" as interpreted by the GM always trumps the written rules if they conflict. For example, a character has a magic weapon and the rules for that weapon say it always causes its target to fall prone if hit. The character hits a gelatinous cube moving down the corridor toward them with the weapon. The rules say that the target should fall and be in a prone position. Reality, however, says otherwise. Gelatinous cubes don't have a top and bottom (so prone penalties make no sense) and a 10 foot cube can't fall when it is moving through a 10 foot corridor. In some modern games, the rules would be applied anyway and the cube would suffer the effects of falling prone no matter how little sense that makes. In an old school

game, the GM ignores the rule because it makes no sense in the specific situation.

Forget “Rules Mastery”: As some of the above differences have hinted, player skill in “old school” style games isn’t about mastering the game rules so you can solve any problem by knowing the right combination of rules from 20 different rule books. Microlite20 is designed to be rules light and Microlite78 tries to stress this even more by encouraging GMs to make rulings on the spot taking into account specific circumstances instead of trying to hunt up special cases in the SRD or a stack of optional rule books. This is faster and helps players immerse themselves in their character and the game world instead of in rule books. GM rulings will be based on specific circumstances and common sense, not just on the written rules and prior rulings. Just because it requires a certain roll to jump one 10 foot pit does not mean all 10 foot wide pits will require the same roll. After all, all sorts of variables can affect the roll (terrain, weather, lighting, pressure to jump quickly, etc.). Players need to remember that these rules are merely a tool for the GM. They are just guidelines for the GM, not something written in stone that the GM must obey. If something herein does not work right in your campaign (or the GM just does not like a rule), the GM is well within his right to change it. Microlite78 is not a game for rules lawyers or for those who believe that the game designer always knows what is best.

No Script Immunity: In most old school games, player characters do not have any form of script immunity. Player characters can die, lose equipment, suffer strange magical effects and other often unpleasant consequences if they are not careful or are just very unlucky. On the other hand, there are no rules limiting their success. If they take on an adult red dragon as first level characters and miraculously manage to win, there are no rules about level appropriate wealth or level appropriate magic items to interfere with their becoming rich and probably flush with magic items from the dragon’s hoard.

Not Mentioned does not mean Prohibited: Many people seem to read RPG rules and come away with the idea that anything not specifically mentioned in the rules as allowed is prohibited. While this really doesn’t make much sense given that no set of rules could ever cover everything that characters might attempt to do in an adventure, it seems to be a very common way to view RPG rules. In an old school game like Microlite78, this is specifically not true: the millions of possible activities not mentioned in the rules are not prohibited, they are up to the GM to allow or disallow based on his knowledge of how reality works and how his specific campaign world differs from reality. Unless the rules specifically prohibit some action, players should ask their GM instead of simply assuming it is prohibited because the rules do not mention it.

Styles of “Old School” Play

If you read some “old school” blogs, forums, and web sites, you might get the impression that there is only one “old school” style of play: a style with expendable player characters who spend all their time in dungeons designed in the style of the old “Tomb of Horrors” module where an adventuring party is only one slipup away from death. This style of play is often shown in early modules.

What most people forget is that these early modules were designed for tournament play where the party that lasted longest and made it deepest into the dungeon was the winner. While a few gaming groups did run their regular campaigns like this and enjoy it, most people did not enjoy such games and the GMs who ran them were often referred to as “Killer GMs” (who often found themselves without players). Instead most home campaigns were a mixture of the following four styles – some campaigns stressing one or two styles over the others.

Power-Gaming: Many players start out playing in this style. Most soon get bored with it and add more and more of other styles. A power-gaming campaign is all about character power. Characters are known by their class, level, special items, and amazing powers and deeds. (“I killed the Demon King with my 15th Level Fighter/Magic-User/Druid. It only took two hits from Thor’s Hammer to knock him out. Then I cut off his head with

my vorpal blade.”) There is often a lot of player competition for the most powerful character in campaigns that stress power-gaming. A lot of people look down on this style, but it can be a lot of fun to play a pure power-game in a group of players who all like the style.

Wargaming: This is probably the style old school rules were originally written for. The wargaming style of play is a competition between the player group and the GM. The GM sets up tactical battles, puzzles, and the like and the players solve them for treasure and experience. Fudging die rolls and ignoring rules (either for or against the players) is frowned upon as it detracts from the challenge and fun of the adventure. Characters in pure wargaming campaigns often were considered expendable and had little personality or goals (beyond staying live and getting rich) as a character with such might be tempted to do things counterproductive to survival. Published tournament dungeons like Tomb of Horrors could be considered examples of extreme forms of this style. Once the RPG hobby became known outside of the minis and board wargaming community, pure forms of the wargaming style quickly became uncommon.

Role-Playing: A pure role-playing campaign is almost the opposite of a pure wargaming campaign. Player skill, tactics, and rules aren’t really important. What is important is the player’s character and that character’s life in the game. In a pure role-playing campaign, players create the personality of their characters in great detail and players generally have a large emotional investments made in them and do not consider their characters expendable. Players tend to have their characters act within their personalities and within the beliefs they’re supposed to hold – even when doing so is not the best thing to do at the time within the game. The object is to live your character’s life in the campaign world. You “win” by having your character achieve his goals, goals which may or may not have anything to do with the game’s goals of exploring and accumulating treasure and experience points. The modern computer game *The Sims* is an example of this style of play.

Story-Telling: While all campaigns tell a story after-the-fact (that is, you can tell a story based on the characters actions in the game), in a story-telling campaign, the GM has worked out a story in advance and the player characters are the protagonists. The campaign world usually has a detailed background and back story behind it. Knowing this background may be more important than knowing the rules. Some pure story telling campaigns are little more than single-line railroads where the characters play their almost pre-scripted parts in the story. In other cases, things are more free-form with story flow and events created by interactions between the GM’s basic outline of story events and the actions of individual characters during the campaign. Some people consider the more pure forms of story-telling campaigns boring straight-jackets while others love the idea of being a major part of a real story.

These four major styles of play appeared early in the history of role-playing games. They were first mentioned in a general circulation publication in Glenn Blacow’s article “Aspects of Adventure Gaming” in *Different Worlds* #10 (the October 1980 issue).

The important thing to take from this section isn’t the four styles or their labels (as there are other systems for describing this with their own labels), but the idea that there were many different styles of “old school” play back in the “old school” days – not just the single style stressed in some “old school” blogs, forums, and web sites. Don’t let those sites make you believe that you aren’t playing old school right if your campaign isn’t strongly in the wargaming camp. Most successful campaigns back in “old school” days were a mixture of all four major styles – and a heaping helping of minor styles.

Advice for the New Old School Game Master

If you are comfortable running a rules-light game like standard Microlite20, you’ll probably have no trouble running Microlite78 as you have already learned to run a game without having hundreds of pages of rules detailing how to handle every situation that might possibly arise in the game. You’ve learned

to just make a ruling that you think fits the situation and keep the game moving.

Running a Game Without Skills

The greatest change between Microlite20 and Microlite78 is the removal of all character skills. If you are used to just allowing players to just say "I'm searching the room. What do I find?" and make search skill roll or just say "I'll try to persuade the baron to loan us a catapult." and make a persuade skill roll, running without skill rolls is going to require as much change to your thinking as it will to your players' thinking.

First, you need to get your players to tell you what their characters are actually doing in the campaign world, instead of talking in terms of what skill they are using. Then you need to learn to listen to what they say and decide if their description of what they are doing a) would most likely solve the problem, b) wouldn't have a chance of solving the problem, c) might not immediately solve the problem but would provide more info that would help solve the problem, or d) would not definitely solve the problem but has a fair chance of doing so. Only option d would require a die roll.

Let's take checking a chest for traps as an example. Get the players to describe in general terms how they are going to check the chest for traps. Note general terms are enough; the idea is to see what the characters are doing, not to require them to describe every single muscle and eye movement they make. Having to "click on one exact pixel on the screen" to succeed is boring and frustrating in a computer game, the verbal equivalent of it is even more frustrating in a tabletop game. Don't fall into the trap of doing it as it turns players off fast.

Let's say a player says "I'll look the chest quickly over for obvious traps, paying special to the keyhole, clasp, and anything that looks out of the ordinary. I'm not touching it yet."

If the chest had a poison needle near the clasp or some holes for poison gas or needles to shoot out of, this should be enough for the character to notice it without a roll, even if he isn't a Rogue or the like. However, if the chest is set to explode (or shoot daggers out of the opening when opened, such a search is not going to discover the trap – again no matter what the character's class or background as such a trap isn't visible from the outside. If you are feeling generous, you might have a Rogue make roll and if she makes it tell her player that while she doesn't see a trap, something still doesn't seem right about the chest.

If the character had said he was then poking the chest with a pole instead of rushing to open it, he might hear something strange if the chest had the above-mentioned dagger trap. Of course, unless he is a Rogue or has some strange background, chances are he would not associate the noise with a trap, but rather just that there was something loose in the chest. Again, you might give a Rogue a roll, especially an experienced Rogue.

As this example shows, it really isn't hard – unless you choose to make it hard. It's just different. After a few sessions both you and your players will find that it really isn't as hard as it looks.

Some players, however, really want die rolls. Because of previous bad experiences with poor GMs, they just can't trust the GM enough to handle some decisions being made without die rolls. If your players are like this, you can use "skill" rolls as a safety net. The players will still have to describe what their character does to solve the problem just as above. Once the player describes what his character is doing, the GM calls for a class/background based "skill" roll as described in the skills section of these rules. The results are determined by your opinion as GM of the action described and the skill roll. There are basically two situations:

In the first case, you feel that the player has a good plan that should likely succeed. Therefore it will succeed regardless of the result of the roll, but how well it succeeds is determined by the skill roll. A failed skill roll is a minimal success; the character

succeeds, but just barely. A successful skill roll means the character's plan succeeds without any major hitches.

In the second case, either the player obviously knows less than his character does about the situation or just comes up with a bad idea that you feel is unlikely to work. You let the skill roll decide the result. A failed roll means the plan fails, while a successful roll means the plan somehow worked after all, but probably not perfectly.

Players who refuse to even try to come up with some type of rational statement about what their character is actually doing but just want to let the skill roll decide automatically fail.

Guidelines Not Rules

Finally, remember that these rules are a tool for the GM. If something herein does not work right in your campaign, change it. The object is to have fun, not be a slave to rules or to players who think being a rules-lawyer is the way to get ahead. In many roleplaying games, the Rules As Written (RAW) are often considered sacrosanct or at least somehow better than those a GM can come up with himself. This is not true of Microlite78 so please change anything you do not like.

Adventures and Settings

There are a large number of adventures and campaign settings available for TSR editions of the world's most popular fantasy RPG. Playing copies of most of original adventures from TSR can be found on eBay for very low prices. TSR era adventures can be used with any pre-WOTC edition or retroclone with only very minor conversion.

There are also a large number of free and low cost adventures available in PDF format on the web. A good place to start looking for free adventures is on the Dragonsfoot forum web site (see the link under Old School Internet Resources below).

The best settings and adventures, however, are those you create yourself for your campaign. They don't need to be nearly as elaborate as those produced for use by others, let alone as fancy as those written for professional publication. Many 1e GM adventure location keys (including those of the game's original designers) were nothing but room/location numbers with something like "8 hobgoblins, leader has 20gp, trapdoor in floor hides skeleton with silver dagger (animates if dagger touched)" or "Small village, 27 families, 10 orc slaves, Headman: Mongar the Brown (Ftr 4th lvl, +1 sword) Mongar's wife, Rose is a 3rd lvl Cleric of Odin)." You can do that.

Microlite20 Notes

Microlite20 is a trimmed down sub-miniature version of the OGL 3.5 SRD. In its most basic form, Microlite20 has only two pages of rules but can be used with most fantasy OGL and d20 adventures and supplements with little or no conversion. Since M20 was published in 2006, many people who prefer rules-lite games have been using it for their d20 games and/or writing expansions, supplements and other material especially for M20. You can find out more about the original Microlite20 and find more variants like Microlite78 on the Microlite20 web site: <http://microlite20.net/>

Retroroleplaying Web Site

The author of Microlite78 maintains a web site devoted to out of print and out of style tabletop roleplaying games. He is always willing to discuss and answer questions about Microlite78 in the Microlite78 board on the RetroRoleplaying forum.

Web Site: <http://www.retroroleplaying.com/>
 Forum: <http://www.retroroleplaying.com/forum/>
 Blog: <http://blog.retroroleplaying.com/>

Old School Internet Resources

Old-School Blogs

There are a lot of old-school blogs. Even a selection of just the ones I currently read regularly would fill up a page or two and would likely be out of date quickly. Fortunately, there is a great place to find old school RPG blogs -- the RPG Blog Network, check the Legacy D&D category:
<http://www.rpgbloggers.com/>

Major Old-School Forums

Dragonsfoot

Very large forum discussing 1e and earlier, related games like retro-clones, Hackmaster, and Castles & Crusades. Many people who worked for TSR in the early days post here. Many free downloads including Footprints magazine and adventures.
<http://www.dragonsfoot.org/>

Knights & Knaves Alehouse

Discussions of 0e and 1e.
<http://knights-n-knives.com/phpbb/>

Original D&D Discussion

Mainly discussions of 0e. Home of Fight On! Magazine.
<http://odd74.proboards76.com/>

The Piazza: Old D&D Campaign Worlds

Discussions of old published campaign worlds including many no longer officially supported.
<http://www.thepiazza.org.uk/bb/index.php>

Old School Product

A number of publishers are producing new material for old school games (using the OGL and retro-clones for compatibility). Many of these products are available through Lulu's Old School Renaissance group. Some downloadable products are free.

Microlite78: First Edition Lite
Copyright © 2015 Randall Stukey
Version 1.0 Silver (March 10, 2014)

Microlite78 Trademark License

You may use the Microlite78 trademarks in your own OGL products without obtaining prior permission from the trademark owner in two cases:

- 1) Adventures, campaign settings, and other supplements either designed specifically for Microlite78 or that are written for another Oe, B/X (BECMI) or 1e rules set may be labelled "Suitable for use with Microlite78" (or suitable for use with "Microlite78: First Edition Lite").
- 2) Microlite78 may be mentioned by name in documents (or sections of a larger product) written to provide information on converting adventures and other materials between one game system and another.

In no case may the Microlite78 trademarks be used in any manner than indicates a product is endorsed or otherwise approved by the author of Microlite78. The terms "Microlite78 Companion" and "Microlite78 Supplement" may not be used in the title of a product without permission in writing.

All other uses of the "Microlite78" trademarks in products requires permission in writing from the trademark owner. This permission will generally be given (provided your product isn't in very poor taste and your use of the trademark isn't going to mislead people), so don't be afraid to ask.

Notes

Notes

Microlite78

First Edition Lite

Microlite78 is a trimmed-down miniature version of the Primary Fantasy SRD rules designed to be quick and easy to play, especially when compared to modern incarnations of the game. The goal of *Microlite78* is do for First Edition (1e) what *Microlite74* did for the Original Edition (0e) to recreate the style and feel of the First Edition of the world's most popular fantasy roleplaying game published back in 1978 without giving up all of the clearer mechanics of modern D20-based versions.

The *Microlite78* rules are based on the 1978 1e edition of the world's most popular fantasy roleplaying game with, some of the house rules the author used in the 1970s, and selected ideas from other roleplaying games. These rules are not intended to be a clone of the 1e rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules.

Special Thanks to the Sunday Game Crew for Playtesting

All art is in the public domain.

Microlite81, like its parent game, *Microlite20*, is a trimmed-down, sub-miniature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal of *Microlite81* games, however, is to recreate the style and feel of those two boxed sets ("B/X") published back in 1981.

The *Microlite81* rules are based on the two boxed sets (Basic and Expert) published in 1981, often referred to as B/X. The rules are not intended to be a clone of the B/X rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules. *Microlite81* is based on the third edition of the original *Microlite74* rules.

These rules assume a basic familiarity with tabletop role-playing games in general and with the basic principles of "D20" based rules. If you are completely new to tabletop role-playing games, you will want to start by playing with someone who is familiar with how they work. These rules also assume that your Game Master (GM) is familiar with creating dungeons, wilderness areas, and running campaigns.

Characters

Stats

There are 4 stats: Strength (STR), Dexterity (DEX), Mind (MIND), and Charisma (CHA).

Roll 3d6, Total the 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/3, round toward zero.

Classes

The Fighter, Magic-User, Cleric and Thief classes are available to humans. Non-humans (elves, dwarves, and halflings) each have their own class. Characters normally begin at Level 1 (unless directed otherwise by the GM). Humans may reach a maximum level of 14, Dwarves may reach a maximum of level 12, Elves a maximum of level 10, and Halflings a maximum of level 8. Abbreviations: PCB –Physical Combat Bonus; MCB – Magical Combat Bonus; FB – Fighter Bonus; Mem – Memory Slots; XP – Minimum Experience Points Required (to reach level).

Dwarves are fierce warriors. Prime Requisite: STR. Requirements: none.

Weapons and Armor: Dwarves may use any kind of armor or weapon and may use shields. Due to their height, they cannot wield large weapons over 4 feet in length (except axes and hammers), specifically two-handed swords, pole arms, and longbows.

Class Abilities: +4 to magic saves; note slanting passages, traps, shifting/false walls and new/hidden construction in underground settings (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of dwarves, gnomes, kobolds and goblins; can see in darkness half as well as in light.

Battlefield Prowess: At 5th level, a dwarf inspires other dwarves under his command. Any dwarf hirelings or mercenaries hired by the dwarf have a +1 bonus to their morale when personally led by the dwarf.

Stronghold: When a dwarf reaches level 9, he has the option of creating an underground stronghold that will attract dwarves from far and wide. Dwarves usually live in clans, so dwarves of the character's clan will be attracted to live under his roof, but dwarves from other clans will also come and live nearby to be ruled by the character. A dwarf ruler is able to hire dwarven soldiers or mercenaries, but may only hire members of other races

for other tasks, such as human alchemists or elves for spell casting.

Dwarf Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d8	+0/+0	+1	0	14	0
2	2d8	+0/+0	+1	0	13	2200
3	3d8	+1/+0	+1	0	12	4400
4	4d8	+2/+1	+1	0	11	8800
5	5d8	+3/+1	+2	0	10	17600
6	6d8	+4/+1	+2	0	9	35200
7	7d8	+5/+1	+2	0	8	70000
8	8d8	+5/+2	+2	0	7	140000
9	9d8	+6/+2	+3	0	7	260000
10	9d8+3	+7/+2	+3	0	6	380000
11	9d8+6	+7/+3	+3	0	6	500000
12	9d8+9	+8/+3	+3	0	5	620000

Elves are warrior mages. Prime Requisite: MIND. Requirements: none.

Weapons and Armor: Elves may wear any kind of armor or weapon and may use shields.

Class Abilities: +2 to hit and damage goblinoid monsters; speak languages of elves, orcs, hobgoblins, and gnolls. Elves can cast arcane spells.

Battlefield Prowess: At 5th level, an elf inspires those under his command. Any elf hirelings or mercenaries hired by the elf have a +1 bonus to their morale when personally led by the elf.

Magical Research: At 5th level, an elf is able to research spells, scribe scrolls, and brew potions. When an elf reaches the 9th level, he is able to create spells and magic items.

Stronghold: Elves can establish a stronghold in a natural setting, such as a forest or glen, when they reach the 9th level. Rather than impose upon nature, this keep must blend seamlessly with it. Because of the elven connection to nature, within 5 miles of the stronghold all ordinary animals will be kind and helpful to elves. This helpfulness includes the ability to warn of dangers and pass information, or even messages to others nearby. However, in exchange, an elven ruler must always defend the animals within this territory. Elven rulers can hire members of other races in the capacity of retainers or specialists, but only soldiers of elven stock may be hired.

Elf Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d6	+0/+0	+1	1	17	0
2	2d6	+0/+0	+1	2	16	4000
3	3d6	+1/+1	+1	3	15	8000
4	4d6	+2/+2	+1	4	14	16000
5	5d6	+3/+3	+2	5	13	32000
6	6d6	+4/+4	+2	6	12	64000
7	7d6	+5/+5	+2	7	10	130000
8	8d6	+5/+5	+2	8	9	280000
9	9d6	+6/+6	+2	9	8	480000
10	9d6+2	+7/+7	+3	10	7	680000

Fighters are soldiers, champions, and other warriors who are exclusively trained in the arts of combat and war. They are specialists in dealing damage with weapons and in the other arts of physical combat. They are trained to lead others in battle. Prime Requisite: STR. Requirements: none.

Weapons and Armor: Fighters may use any kind of armor or weapon and may use shields.

Battlefield Prowess: At 5th level, a fighter inspires those under his command. Any hirelings or mercenaries hired by the fighter have a +1 bonus to their morale when personally led by the fighter.

Stronghold: At level 9 a fighter may become a great leader of men, taking control of a parcel of land and a leadership rank in his society. A fighter will, assuming money is at hand, build a castle. He may ultimately control several villages and towns, but must be a good, strong leader and provide protection.

Fighter Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d8	+0/+0	+1	0	14	0
2	2d8	+0/+0	+1	0	13	2000
3	3d8	+1/+0	+1	0	12	4000
4	4d8	+2/+1	+2	0	11	8000
5	5d8	+3/+1	+2	0	10	16000
6	6d8	+4/+1	+2	0	9	32000
7	7d8	+5/+1	+3	0	8	65000
8	8d8	+5/+2	+3	0	7	130000
9	9d8	+6/+2	+3	0	7	250000
10	9d8+2	+7/+2	+4	0	6	370000
11	9d8+4	+7/+3	+4	0	6	490000
12	9d8+6	+8/+3	+4	0	5	610000
13	9d8+8	+8/+4	+5	0	5	730000
14	9d8+10	+8/+5	+5	0	4	850000

Halflings are a humanoid race about half the height of a human. They make excellent warrior-scouts. Prime Requisite: DEX. Requirements: none.

Weapons and Armor: Halflings who can wear light or medium armor, use shields, and use any light or medium weapon. Due to their stature, they must wield medium weapons with two hands and they cannot use a long bow.

Class Abilities: +4 to magic saves; +2 to hit and damage with slings and light bows; can blend in background (d20 + DEX Bonus; DC 12 if outdoors, DC 16 if indoors – this is an extraordinary ability above and beyond simply hiding in available cover which anyone can try to do). They can move silently outdoors.

Battlefield Prowess: At 5th level, a halfling inspires other halflings under his command. Any halfling hirelings or mercenaries hired by the halfling have a +1 bonus to their morale when personally led by the halfling.

Stronghold: When a halfling reaches level 8, he can build a stronghold. These strongholds will be in serene, beautiful valleys and halflings will come from great distances to settle there. The character becomes the sheriff of the people (their leader) and must rule them wisely and well.

Halfling Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d6	+0/+0	+1	0	15	0
2	2d6	+0/+0	+1	0	14	1800
3	3d6	+1/+0	+1	0	13	3600
4	4d6	+2/+1	+2	0	12	7200
5	5d6	+3/+1	+2	0	11	14400
6	6d6	+4/+1	+2	0	10	28800
7	7d6	+5/+1	+3	0	8	60000
8	8d6	+5/+2	+3	0	6	120000

Magic-Users (sometimes called wizards, sorcerers, or magicians) study arcane secrets and cast spells. While early in their career magic-users have only limited power, experienced magic-users are able to cast a great number of powerful spells. Prime Requisite: MIND. Requirements: none.

Weapons and Armor: Magic-Users wear no armor and can only use daggers, slings, or staves as weapons.

Class Abilities: Magic-Users can cast arcane spells.

Magical Research: At 5th level, a magic-user is able to research spells, scribe scrolls, and brew potions. When a magic-user reaches the 9th level, he is able to create magic items.

Stronghold: A magic-user may build a stronghold, often a great tower, when he reaches level 11. He will then attract magic-user apprentices (1d6), who will range from level 1-3.

Magic-User Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d4	+0/+0	+0	1	16	0
2	2d4	+0/+0	+0	2	15	2500
3	3d4	+0/+1	+0	3	14	5000
4	4d4	+1/+2	+0	4	13	10000
5	5d4	+1/+3	+0	5	11	20000
6	6d4	+1/+4	+0	6	10	40000
7	7d4	+1/+5	+0	7	9	80000
8	8d4	+2/+5	+0	8	8	160000
9	9d4	+2/+6	+0	9	7	310000
10	9d4+1	+2/+7	+0	10	6	460000
11	9d4+2	+3/+7	+0	12	6	610000
12	9d4+3	+3/+8	+0	14	5	760000
13	9d4+4	+4/+8	+0	17	5	910000
14	9d4+5	+5/+8	+0	20	5	1060000

Clerics have pledged their lives to serve a specific deity (or pantheon). While clerics are a form of priest, they seldom serve a priest at a temple; instead they are warrior-priests serving as an arm of their deity in the world. Prime Requisite: CHR. Requirements: none.

Weapons and Armor: Clerics can wear any type of armor and use shields. They can use any weapon except edged weapons.

Class Abilities: Clerics can cast divine magic.

Magical Research: At 5th level, a cleric is able to research divine spells and scribe divine scrolls. When a cleric reaches the 9th level, he is able to create magic items usable by clerics.

Turn Undead: A Cleric can Turn Undead with a successful Magic Attack. DC is 10 + twice the Hit Dice of the undead. One undead flees per point over the roll needed. This can be used (2 + Level + MIND bonus) times per day.

Stronghold: Once attaining 9th level, a cleric may establish or build a stronghold. So long as the cleric is currently in favor with his god, he may buy or build a keep at half the normal price due to divine intervention. Once a stronghold is established, the cleric's reputation will spread and he will attract 1st and 2nd level followers of the fighter class (numbering 5d6 x10). They are completely loyal (never checking morale). The GM chooses which proportions of followers are bowman, infantry, etc.

Cleric Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d6	+0/+0	+0	0	15	0
2	2d6	+0/+0	+0	1	14	1500
3	3d6	+0/+0	+0	2	13	3000
4	4d6	+1/+1	+0	3	12	6000
5	5d6	+1/+1	+0	4	11	12000
6	6d6	+2/+2	+0	5	10	24000
7	7d6	+2/+2	+0	6	9	50000
8	8d6	+2/+2	+0	7	8	100000
9	9d6	+3/+3	+0	8	7	200000
10	9d6+1	+3/+3	+0	9	7	300000
11	9d6+2	+4/+4	+0	10	6	400000
12	9d6+3	+5/+5	+0	12	6	500000
13	9d6+4	+6/+6	+0	14	5	600000
14	9d6+5	+6/+6	+0	16	5	700000

Thieves are sneaks and trouble-shooters who specialize at infiltration and obtaining items from others through nefarious means. Prime Requisite: DEX. Requirements: Alignment cannot be Law.

Weapons and Armor: Thieves can wear light armor, use shields, and use any light or medium weapon.

Class Abilities: Thieves are specialists at urban survival as well as at picking pockets, hiding in cover, sneaking silently, opening locks, removing traps, climbing walls, and other tasks associated with theft. Thieves may also attempt to climb sheer surfaces and hide in shadows with a successful secondary skill roll. Thieves also have special training in listening at doors and detecting traps and secret/hidden doors, see the section on Adventuring for the details.

Backstab: If a thief successfully sneaks up on a foe, they can Backstab which adds +4 to the attack roll and does more damage if successful (Levels 1-4, x2 damage; Levels 5-8, x3 damage; Levels 9-12, x4 damage; Level 13+, x5 damage).

Read Languages: At 4th Level, a thief gains the ability to read languages (including ciphers, treasure maps, and dead languages, but not magical writings) on a roll of 1-4 on a d6. On failure, the thief cannot attempt to read that document again until he gains a new level.

Read Arcane Scrolls: At 10th level, a thief can read and cast magic from arcane scrolls on a roll of 3 or higher on a D20 with the spell level subtracted from the roll. Failure means the spell does not function as expected (with humorous or negative effects up to the GM).

Stronghold: When a thief attains level 9 he can establish a thief den, and 2d6 thief apprentices of 1st level will come to work with the character. These thieves will serve the character with some reliability; however, should any become arrested or killed the character will not be able to attract more followers of this type to replace them. A successful character might use these followers to start a Thieves' Guild.

Thief Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d4	+0/+0	+0	0	15	0
2	2d4	+0/+0	+0	0	14	1250
3	3d4	+0/+0	+0	0	13	2500
4	4d4	+1/+1	+0	0	12	5000
5	5d4	+1/+1	+0	0	11	10000
6	6d4	+2/+2	+0	0	10	20000
7	7d4	+2/+2	+0	0	9	40000
8	8d4	+2/+2	+0	0	8	80000
9	9d4	+3/+3	+0	0	8	180000
10	9d4+1	+3/+3	+0	0	7	280000
11	9d4+2	+4/+4	+0	0	7	380000
12	9d4+3	+5/+5	+0	0	6	480000
13	9d4+4	+6/+6	+0	0	6	580000
14	9d4+5	+6/+6	+0	0	5	680000

Determining Hit Points: Each class has a HP column on their Class Advancement Table. XdY means roll X dice of type Y and add the character's Strength bonus to each die rolled. The minimum roll (after adding the Strength stat bonus) is 1. After level nine, a few hit points (1, 2, or v3 are added at each level. Strength stat bonuses are not added for levels greater than 9.

For example, a first level fighter has a Strength of 15 for a STR stat bonus of +1. At first level, the player rolls 1d8 and adds +1 to determine his maximum hit points. At second level, the player would roll another 1d8+1 and add the result to his first level hit point maximum to get the character's second level hit points.

Max at First Level (Optional): Instead of rolling a die for first level characters, assume the die roll was the highest possible roll for the type of die. *This option is strongly recommended.*

Reroll All Dice at Every Level (Optional): Instead of just rolling a single die at every level and adding the result to the character's previous hit points, reroll all the dice every time the character gains a new level, using the higher of the new roll or the previous hit point total +1.

Weapons and Armor Limitations: As noted, many classes are limited in what weapons and armor they can utilize. Regardless of such class limitations, characters of any class may purchase, carry, and use any weapons or armor desired. However, characters who equip themselves with weapons and armor unusable by their class will fight as 0th level characters while so equipped. They also will receive no bonus on their attack rolls or armor class from ability scores or equipment, may not use any of their class powers, and do not gain XP.

Alignment

Basic Alignment: There are three basic alignments: Law, Chaos, and Neutral. Only intelligent beings have alignment and the vast majority of those tend to be neutral. Player Characters should select an alignment for their characters.

Law: Characters aligned with Law try to avoid unnecessary harm to others by their actions or inaction. They often put the good of society/everyone over the immediate good of themselves and their friends. They are usually willing to help others/society even if doing so is somewhat inconvenient. If given power over others, they tend to use it for the good of all.

Chaos: Characters aligned with Chaos only care about themselves and those who are currently useful to them. While they may not go out of their way to harm others, they do not care if others are harmed as long as they succeed at their personal goals. They are generally only willing to help others/society if they get something they want or need out of it. If given power over others they tend to abuse it and use it mainly to help themselves.

Neutral: Neutral characters tend to put themselves and their friends first, but will generally not allow others to come to unnecessary harm or inconvenience in order to succeed. They are willing to help others/society so long as doing so is not inconvenient. If given power over others, they tend to use it for good, but they and their friends come first.

Virtues and Vices (Optional): As in real life, each character has virtues (admirable character traits) and vices (not so admirable character traits). Players select six traits from the lists below before play starts. Neutral characters must select three from each list. Lawful characters must select at least one (but no more than two) vices. Chaotic characters must select at least one (but no more than two) virtues. Players can select virtues and vices not on the list with GM approval.

Virtues	Vices
Academic	Arrogant
Austere	Bigoted
Bold	Capricious
Cheerful	Cowardly
Compassionate	Egoistical
Courageous	Fearful
Daring	Hateful
Determined	Hidebound
Fair	Impulsive
Faithful	Insensitive
Friendly	Lazy
Generous	Manipulative
Gregarious	Miserly
Honest	Petty
Hopeful	Power Hungry
Industrious	Rude
Just	Self-Centered
Kind	Spendthrift
Patriotic	Stubborn
Thoughtful	Thoughtless
Thrifty	Vengeful

Character Tagline (Optional)

Each character should have one fairly unique feature in his personality or background that sets him or her apart from other characters and npcs in the campaign (and from other characters the player may play or have played in the campaign. This feature should not be something that would give a mechanical bonus in play, but something interesting and unique in the character's personality, background, or history. The GM should work with the player to ensure the character's tagline is appropriate to the campaign setting. A tagline can also be a "catch phrase" that sums up the character in some way.

Some examples of a simple character taglines from history and literature would be "never tells a lie" for George Washington, "the lionheart" for Richard I of England, "demands his martinis be shaken not stirred" for James Bond, "cultivates a grandfather image but quietly manipulates others to achieve the greater good" for Dumbledore, and "I didn't do it, nobody saw me, you can't prove anything" for Bart Simpson.

Standard Rules

Skills

There are no skills in Microlite81. Instead players are expected to think like adventurers, tell the GM what they are doing and the GM decides if it will succeed in the situation, taking into account the characters' classes. If the GM decides a random success chance is truly needed he may resolve the situation with a roll of his choice (such as a attribute roll or a saving throw) or he may call for one of the following rolls:

Primary Skill Roll: 1d20 + Stat Bonus + Class Level if the character is attempting something directly related to their class, such as using class abilities.

Secondary Skill Roll: 1d20 + Stat Bonus + (Class Level/2, round up) if the character is attempting something only loosely related to their class.

Minor Skill Roll: 1d20 + Stat Bonus + (Class Level/3, round down) if the character is attempting something not really related to their class.

When the GM calls for a skill roll, he will declare the type of skill roll, which stat the skill roll falls under, and any situational modifiers and the player will make a skill roll. (The GM should make the roll in secret if seeing the result would give the player more information than his character should have.)

Roll higher than the GM assigned Difficulty Class to succeed. Unless the GM rules otherwise, a natural roll of 20 always succeeds for a Primary Skill Roll with a Difficulty Class below Legendary. Suggested Difficulty Classes: Easy - 8, Normal - 12, Hard - 16, Difficult - 20, Very Difficult - 24, Legendary - 28, Unbelievable - 32, Nearly Impossible - 36.

Basic Adventuring Skills: Unless a player specifies otherwise about a character at character creation, all characters are assumed to have basic practical adventuring skills such as maintaining weapons and armor, riding a horse, setting up a camp, swimming, climbing, cooking, first aid, etc., and have a rough idea of the value of common coins, trade goods, gems, and jewels. Success should simply be assumed unless there are unusual conditions.

Languages: All character races speak common. Other intelligent beings speak their own languages (20% chance of also speaking common). Beings with a MIND over 10 may speak one additional language per point of MIND over 10 (these are in addition to any languages known by race).

Saving Throws

When subject to an unusual or magical attack, characters generally get a saving throw to avoid or reduce the effect. To make a saving throw, roll 1d20, add modifiers based on the type of saving throw (and any circumstantial modifiers set by the GM). A natural roll of 1 automatically fails. A natural roll of 20 automatically succeeds. Otherwise, the saving throw is successful if the total of the roll and modifiers is greater than the saving throw listed for the character's level. Unless noted otherwise, monsters save as a Fighter of a level equal to one-half their hit dice, rounded up.

Saving Throw Modifiers: What a character is saving against modifies the saving throw die roll. In cases where multiple types apply, use the first one listed below:

Breath Weapons: Breath Weapons and other blast-like effects give a -1 modifier to the saving throw.

Poison: Dwarves get a +3 bonus.

Death Magic: This includes negative energy attacks. Clerics get +3 due to their link with the higher and lower planes.

Rod, Staff, Wand: All magical effects created by a rod, staff, or wand give +1 bonus.

Spells: +2 bonus for Magic-Users.

Special Saving Throw Modifiers: Where applicable, these modifiers are applied in addition to those listed above:

Charm and Illusion Magic: Add MIND stat bonus.

All Magical Effects: Dwarves and Halflings receive a +4 bonus to all saving throws against a magical effect.

Magic

Magic-using characters can cast any spell from their respective spell list with a spell level equal or below 1/2 their class level, rounded up. A Magic-User or Elf starts with Read Magic and 1d2 additional first levels spells in his spell book (which must be approved by the GM) and can add more spells by finding (or buying) them on scrolls or books and copying them into his spell book. Clerics do not need spell books and automatically have access to all divine spells of a level they can cast (use of certain spells may be forbidden by the cleric's deity, however).

A Magic-User, Elf, or Cleric can memorize up to his memory limit ("Mem" on the appropriate Level Advancement Table) in spells at one time. A Magic-User or Elf requires his spell book and one hour of time to change the spells he has memorized. Clerics simply need one hour of quiet meditation to change their spell selection.

Casting Cost: Direct casting a spell of any kind costs Hit Points as shown on the following table:

Spell Level	1	2	3	4	5	6
HP Cost	2	3	5	7	8	10

This loss *cannot* be healed magically but is recovered after 8 hours rest.

Spell Difficulty Class: For purposes of things like dispelling, the Difficulty Class (DC) for all spells is: 10 + Caster Level + Caster's MIND bonus

Signature Spells: Select one 'signature' spell per spell level from first upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

Combat Casting: In combat, if a character is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles. This costs the caster 1 HP per level of the spell he was attempting to cast and the caster loses his action for the round. Characters casting spells in combat must remain stationary.

Hit Points and Healing

Hit Points: Hit Points are an abstract measure of the amount of damage a character can suffer before falling unconscious and taking severe injuries. If HP reach 0, the character is unconscious and near death. Further damage directly reduces STR. If STR reaches 0, the character is dead. Hit points should be thought of as a combination fatigue from dodging and parrying to reduce the actual effect of hits and taking minor damage from hits.

Healing: All characters recover hit points lost due to wounds and damage at a rate equal to one-half their level (round up) in hit points per night of rest. (In addition, Magic-Users and Clerics recover all hit points lost due to spell casting with a night's rest.) If a character has lost strength due to wounds, no hit points are recovered, but the character regains lost strength at the rate equal to their STR Bonus (minimum of 1 point regained) per full day of rest.

Combat

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 a side is surprised and may not act at all in the first round. If attacking from an undetected ambush, the ambush victims are surprised on a roll of 1-4. A side cannot be surprised if it is aware of the other.

Initiative: Each side rolls a d6 (reroll ties). High roll wins initiative. The combat order is: 1) Side that lost initiative declares actions. 2) Side that won initiative declares actions. 3) Side that won initiative acts. 4) Side that lost initiative acts. 5) Any bookkeeping is done. This ends a combat round. If the combat continues, roll initiative again and repeat.

Actions: Combat is very abstract. Each combat round lasts 10 seconds and includes a lot of jockeying for position, feints, etc. The "hit roll" determines if any damaging blows were delivered during the round. Everyone can do one thing each round; move, attack, cast a spell, etc. The GM may choose to allow some combined actions, like a charge attack, to be one thing (especially for characters with a non-zero Fighter Bonus). Drawing a weapon, speaking or similar activities are "free" and do not count as an action.

Opportunity Attacks: Anyone not surprised and with a ready weapon who is not already involved in a melee combat gets a free attack on opponents trying to move past them – this attack is in addition to their normal attack for the round. If the attack is successful, the opponents takes damage and can move no further that round.

Attack Rolls: Add attack bonus to d20 roll. A natural roll of 1 always misses, otherwise if the result is higher than your opponent's Armor Class (AC), it's a hit. A natural 20 that would otherwise hit is automatically a critical hit doing maximum damage.

Melee attack bonus = STR bonus + Physical Combat Bonus
Missile attack bonus = DEX bonus + Physical Combat Bonus
Magic attack bonus = MIND bonus + Magical Combat Bonus

Armor Class (AC) = 10 + DEX bonus + Armor bonus. Basic Armor Bonuses: Light Armor (e.g. leather) +2, Medium Armor (e.g. Chainmail) +4, Heavy Armor (e.g. Plate) +6; a shield adds +1; a large shield adds +2.

Fighting classes can use DEX bonus + Physical Combat Bonus as Melee attack bonus instead if wielding a light weapon. Fighting classes can wield 2 light weapons and attack with both in a round (making one attack roll at -2). Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

Range Penalties: If the target is relatively close, there is no penalty to hit for range. If it's mid-range for the weapon you're using, take a -2. If it's farther out than that, the GM will assign a -4 to -10 penalty to hit, depending on his judgment of how far away the target is.

Helpless Targets: Regardless of attack throw and AC, all attacks on sleeping, paralyzed, or otherwise helpless targets automatically hit. If the attacker is not engaged by any other opponents, the helpless target can be automatically slain (if desired). Otherwise, a standard damage roll is made.

Combat Maneuvers: Attacker may describe a special effect he wishes to impose on a target before rolling to hit. Unless the GM rules the maneuver impossible, a critical hit means the special effect happens instead of damage characters with a non-zero Fighter Bonus may do normal damage as well on a critical). A normal hit means the target may decide (before damage is rolled) to either accept the special effect or to take the damage from the attack. If the attacker has a non-zero Fighter Bonus and is a higher level than the target, the target must make a successful saving throw to reject the special effect. Possible maneuvers include: disarm, knock down, push back (up to STR feet), switch positions, slip past, steal an obvious and accessible item from the target, etc. GM Notes: Non-intelligent and low intelligence monsters will normally accept the maneuver rather than damage. Average intelligence and better monsters may choose damage over the maneuver effects if accepted the effects will obviously kill or incapacitate them or if they make a morale check.

Fighter Bonus: Dwarves, elves, fighters, and halflings have a non-zero Fighter Bonus. They may add their Fighter Bonus to their attack and damage rolls (both melee and missile).

Cleaving (optional): If a character with a non-zero Fighter Bonus (or a monster) kills or incapacitates an opponent with a melee or missile attack, the character may immediately make another attack (with the same weapon) against another opponent within 5 feet of the target he has just dropped. The maximum number of melee attacks the character can make in one round is equal to his level (hit dice for monsters). If using a missile weapons, a character is limited to a maximum of 2 additional cleave with arbalest or crossbow, 3 with longbow, and 4 with composite bow, shortbow, sling, or thrown darts, daggers, or javelins.

Damage: Light weapons do 1d4 damage. Medium weapons do 1d6 damage. Heavy weapons do 1d8 damage. Add STR bonus and any class damage bonus to Melee damage (x2 for two-handed weapons). **Option:** Weapons do the damage listed for the specific weapon on the equipment table.

Shield Special: A character with a shield may choose to have it completely absorb all the damage from any attack (including a critical hit). A non-magical shield shatters when it does so. A magical shield permanently loses one point of its magical AC bonus when it does so, becoming a non-magical shield if its magical AC bonus is reduced to zero. **Option:** Non-magical wooden shields made from a particular expensive wood (e.g. Rowan wood) can be used up in this manner for a successful save versus any spell. Such shields are only available one-third of the time and cost 10 times as much as a regular wooden shield.

Morale: While a few monsters, such as mindless creatures, are fearless and will fight to the death, most monsters have a strong desire to survive and will not continue to fight when the battle is going against them. They will instead seek to retreat, to flee, or even to surrender. The GM decides when monsters abandon the battle and retreat, based on the situation and the monster's intelligence. Monsters are assigned a Morale Rating (from 2 to 12, with 2 being a complete coward and 12 being totally fearless) to help the GM make these decisions. If the GM wishes, he may simply roll 2d6 and have the monsters break off combat if the number rolled is greater than the monster's Morale Rating.

Energy Drain: Certain undead and demonic monsters can drain energy levels from characters. Each energy level drained reduces the character's level by one, the character may regain the level normally via experience.

Hirelings

Players may find it useful to have their characters hire bearers to carry light sources into ruins and dungeons (and to carry treasure out) and men-at-arms to aid in combat. In some areas there may be a guild where such people may be found and hired, in other areas characters may have to advertise. Pay must be negotiated and what will be asked will depend on the situation the hirelings think they may get into and the reputation of the characters hiring them.

Bearers have 2 hit points and generally will only fight if cornered and there is no other choice – even then their effective level (used in attack rolls) is -2. They will carry light sources and baggage willingly so long as they are paid, fed, treated well, and not exposed to much mortal danger. Minimum pay: 1 SP/day.

Men-at-Arms will fight but consider being used as a bearer (except of treasure they get a share of) to be beneath them. Green Men-at-Arms have 4 hit points, an effective combat level (used in attack rolls) of 0 and can use whatever armor and weapons their employers provide. Minimum pay: 5 SP/day plus 1/20 of a share of any non-magical treasure found. Veteran Men-at-Arms have 7 hit points, an effective combat level (used in attack rolls) of 1 and can use whatever armor and weapons their employers provide. Minimum pay: 1 GP/day and 1/10 a share of any non-magical treasure found. Men-at-Arms will serve willingly as long as they are fed, paid, treated well, and not asked to take unusual risks that their employers are not taking with them.

Monsters

See the Microlite81 Monster List or use the monster descriptions in any B/X game. To create new monsters quickly: Pick a name, assign a level, hit dice = level, hit points = 1d8 per level, magic save = as fighter of level HD/2, all attack bonuses = level (maximum +15), damage = 1d6 for ordinary claws, bites, and weapons, 2d6 for large maws, giant clubs, 3d6 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases. Special attacks act like magic attacks against an appropriate defense. Intelligent monsters may have classes at the GM's option. If needed, assign stats to suit. Equip and add abilities as required.

Monster Reactions: Some monsters (like skeletons guarding a tomb) may always attack. In cases where the reaction of the monsters to the party is not obvious, the GM may opt to make a reaction roll for the monsters by rolling 2d6 and adding the CHA bonus (and any other appropriate modifiers) to the roll and consulting this table.

Adjusted Reaction Roll	Result
2 or less	Very Unfavorable
3-6	Unfavorable
7	Neutral/Uncertain
8-11	Favorable
12 or more	Very Favorable

Interpretation of the results is left to the GM, however, these general principles may prove helpful. Very Unfavorable means the monsters will most likely attack unless the odds are overwhelmingly against them. They will not help the characters. Unfavorable means the monsters are hostile and might attack unless they are given a good reason not to. They will not help the characters. Neutral means the monsters are unsure of the party. They are not likely to attack immediately, but are not friendly or helpful. Favorable means the monsters are willing to listen and are open to negotiation. They might be willing to be slightly helpful. Very Favorable means the monsters like the characters and are willing to be somewhat helpful and are open to working with the party to mutual advantage.

Mooks (optional): Sometimes a GM may want to use a large number of monsters but not want to carefully track each one. Mooks are "cannon fodder" monsters that have 1 hit point per hit die, never make a saving throw, and always run away or surrender if the battle is obviously going against them. Any hit from a Fighting Class character will likely kill a mook. Mooks cannot be told at a glance from non-mook monsters. Mooks make excellent minions for powerful leaders as they are very effective against normal people even if they cannot stand long against PCs and NPCs with class levels.

Experience Points and Level Advancement

Experience Points (XP): Characters get Experience Points (XP) through adventuring, defeating monsters, spending money from treasure, etc.

XP from Defeating Monsters: Each monster defeated is worth a base XP equal to the monster's hit dice squared multiplied by 5. If a monster has both hit dice and a character level the higher is used as "hit dice" in this formula. Many monsters have special abilities which make them more dangerous than their hit dice indicate. For each such special ability, add 50% (round down) of the monster's base XP. Example: A party defeats 3 Hippogriffs. Hippogriff has 3 hit dice and one special ability (flight), so each hippogriff is worth 67 XP for a total of 201 XP.

At the end of an adventure, the total XP earned from defeating monsters is divided by the number of characters in the party. Henchmen/Retainers count as 1/2 person and hirelings count as 1/10 person (round up for PCs, round down for others). Example: A party of 5 player characters, 2 retainers, and 10 men-at-arms and other hirelings earns 1200 XP from defeating monsters. Each

PC earns 172 XP from defeating monsters, each retainer earns 85 XP, and each hireling earns 17 XP. (Note that XP for hirelings is earned but usually not actually tracked.)

XP from Treasure Found: At the end of an adventure, total the value of all non-magical treasure found during the adventure in gold pieces and divide it by two. Divide the result by the number of characters in the party to determine the number of XP each character receives from treasure. Henchmen/Retainers count as 1/2 person and hirelings count as 1/10 person (round up for PCs, round down for others). Example: A party of 5 player characters, 2 retainers, and 10 men-at-arms and other hirelings recovers 2400gp worth of treasure on their latest trip through the dungeon. 2400 divided by 2 gives 1200 XP from treasure. Each PC earns 172 XP from treasure founds, each retainer earns 85 XP, and each hireling earns 17 XP. (Note that XP for hirelings is earned but usually not actually tracked.)

XP from Treasure Spent: Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, generic "training," etc.). A character earns XP equal to the treasure so spent in gp divided by his current level. Note that XP from treasure is an abstract method of rewarding the various adventuring actions like finding traps that allow one to get treasure. Example: A 2nd level Fighter spending 1000gp on wine, women, and song earns 500 XP.

XP from Exploration: The GM may reward exploration with XP by designing special points on the map as worthy of XP for reaching them. The GM should generally not inform players in advance as to what, if any, special locations on the map are worth XP. Example: reaching the top of the tallest mountain on the map for the first time might be worth 150 or 200 XP for each character making it to the top or entering a well-hidden sub-level of a dungeon might be worth 50 XP.

XP from other Activities: The GM may award XP for excellent roleplaying, other important actions in the game (successfully completing a quest, for example), etc. In general, the total award from this category for any one session should not be more than 100 XP times the character's current level. No XP may be awarded in this category if the character refuses to even attempt to play his virtues and vices or other character limitations.

Level Advancement: At the end of every adventure (or, at the GM's option, at the end of every session), total up the XP earned and added them to your character's total XP. If a character's XP total is higher than that the *Minimum Experience Points Required* for the next level on the character's class chart. The character goes up a level and gains all the benefits thereof (increased HP, PCB, MCB, improved Saving Throw, etc.). Note that a character may only go up one level per session. Any additional XP earned in that session that would put the character above 50% in his new level are lost.

Each level adds a die roll or a fixed amount after 9th level to Hit Points and the character's Physical Combat Bonus, Magical Combat Bonus, Fighter Bonus, etc. may change as indicated in the Advancement table for the character's class.

Clerics and Magic-Users gain access to new spell levels at levels 3, 5, 7, 9, and (Magic-User only) 11. When a Magic-User gains access to a new spell level he gets one spell of the new level added to his spell books. The player may select the spell subject to GM veto.

Weapons and Equipment

Money

Money takes the form of coins, with the gold piece being the standard unit. 1 platinum piece (pp) = 5 gold pieces; 1 gold piece (gp) = 10 silver pieces; 1 electrum piece (ep) = 5 silver pieces; 1 silver piece (sp) = 10 copper pieces (cp). Coins form different areas may look different and in some areas only coins from that area are acceptable, other coins will have to be exchanged for proper coins at a moneychanger who will take at least a 10% exchange fee.

To put the value of a gold piece into perspective, a single gold piece is enough for a peasant to subsist at a wretched quality of life for a month. Early in their career, adventurers will typically live on a few dozen gold pieces per month, enough to eat and sleep at an inn. A dragon's treasure hoard of 50,000gp might keep a village of peasants alive for decade, but merely cover a prince's monthly budget.

Equipment Packs

Suggested starting packs for new characters:

Pack A	Pack B	Pack C
normal clothing	normal clothing	normal clothing
backpack	backpack	backpack
bedroll	bedroll	bedroll
hooded lantern	10 torches	tent
10 oil flasks	10 oil flasks	10 torches
flint & steel	flint & steel	flint & steel
shovel	chalk	hammer
2 sets of caltrops	10 ft. pole	10 iron spikes
signal whistle	mirror	grappling hook
pen & paper	crowbar	50 ft. rope
water skin	water skin	water skin
iron rations for four days	iron rations for four days	iron rations for four days

Finally, add the following, based on your Class:

Cleric: Silver holy symbol, light armor (AC +2), a one handed weapon + shield, and 5 gold pieces

Dwarf, Fighter, Halfling: Vial of holy water, medium armor (AC +4), a one handed weapon + shield, or a two handed weapon, and 5 gold pieces

Elf: light armor (AC +2), one-handed weapon, spellbook with all spells known, and 5 gold pieces

Magic-User: Spellbook with all spells known, a dagger, and 5 gold pieces

Thief: lock picking tools, light armor (AC +2), light weapon, and 5 gold pieces.

Standard Equipment List

Players, with the permission of the GM, may elect to roll their starting wealth in gold pieces and buy equipment piece by piece from the equipment list below. If this is done, each character starts with 120 + (3d6 x 5) gold pieces. The GM is free to modify the equipment list to suit the starting location in his campaign.

Armor	Cost	AC
Clothing Only	-	10
Hide and Fur Armor	10gp	11
Leather Armor	20gp	12
Ring Mail or Scale Armor	30gp	13
Chain Mail Armor	40gp	14
Banded Plate or Lamellar Armor	50gp	15
Plate Armor	60gp	16

Galley (war)	60,000gp
Longship	15,000gp
Sailing Ship (large)	20,000gp
Sailing Ship (small)	5,000gp
Troop Transport (large)	40,000gp
Troop Transport (small)	10,000gp

Lodging

Cottage (wood)	300gp
Inn (one person, one night, slum)	1sp
Inn, one person, one night, average)	5sp
Inn (one person, one night, superb)	2gp
Hut (wattle)	25gp
Hut (wooden)	50gp
Townhouse (stone)	1,200gp

Cost

numbers (e.g. AC 5 was Chain, AC 2 was plate). Magic armor could even have a negative armor class. Microlite81 uses the ascending Armor Class system used in the OGL SRD. If you have old adventures using the original descending AC system and wish to use them, it is easy to convert descending ACs to ascending ACs.

Unarmored AC is 9: If the adventure is for B/X (or other edition where the unarmored AC is 9), subtract the descending AC listed in the adventure from 19 to get the ascending AC used by Microlite81.

Unarmored AC is 10: If the adventure is for 1e or 2e (where the unarmored AC is 10), subtract the descending AC listed in the adventure from 20 to obtain the ascending AC used by Microlite81.

Dungeon Exploration

Exploring dungeons is an iconic part of old school roleplaying games. The guidelines in this section will help the GM run adventures in dungeons, castles, caverns, and other "indoor" spaces.

Light: Humans and many other races require a light source (or magical ability) to see in the dark. Torches, lanterns, etc. will produce limited areas of light (generally 20 feet of bright light and a further 10 feet of dim light), but they also make it easy for monsters to see the party coming, making surprise impossible. Torches can be blown out by strong gusts of wind (d6 roll: blown out on a 1 or 2). Lanterns use flasks of oil as fuel, and a lantern can burn continuously on 1 flask of oil for 24 turns (4 hours). Torches burn continuously for 6 turns (1 hour) before burning out. Most monsters living in a dungeon have infravision or some other means of seeing in the dark; however these methods do not work in the presence of a light source.

Seeing Monsters: Unless surprised, characters will see monsters when they are 2d6 x 10 feet apart. Surprise distance is 1d3 x 10 feet.

Wandering Monsters: The GM should roll 1d6 every 2 turns for wandering monsters (more often if the party is making a lot of noise or otherwise attracting attention). On a roll of 1, wandering monsters stumble across the party from a random direction and distance.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow their orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue if there is less than 120 feet between the two groups. Monsters will only pursue around a corner or through a door on roll of 1 or 2 on a d6 (1 if a secret door is used). Fire will deter many monsters. Food will distract many monsters: unintelligent monsters 90% of the time, semi-intelligent monsters 50% of the time, intelligent monsters 10% of the time. Treasure may also distract monsters: unintelligent monsters 10% of the time, semi-intelligent monsters 50% of the time, and intelligent monsters 90% of the time. All chances may be adjusted by the GM depending on circumstances. These same rules determine how monsters will pursue if the characters disengage and retreat (or rout) from a battle.

Rest: One turn in six must be spent in rest or all characters suffer a -1 to all d20 rolls and to damage rolls per rest missed. Time spent searching is not time spent resting.

Doors: Dungeons often have many doors, some secret and others obvious. Many are locked, and a thief will need to attempt to pick locks. However, characters can attempt to break a door down. In this case, the player rolls 1d6. A result of 2 or less means the door has been broken down. Strength adjustments apply, but no matter what the adjustment there must always be a chance of

Adventuring

B/X Conventions

Almost any material you come across for B/X or other early editions of the world's most popular roleplaying game can be used in Microlite81 with little modification. However, there are some descriptive conventions that B/X used that may need explanation.

Time Conventions: B/X talks about time in terms of rounds (combat rounds) and turns. A round was 10 seconds and a turn was 10 minutes, so there were 60 rounds in a turn.

Movement/Distance Conventions: B/X gave distances in inches. When underground or in buildings or the like, one inch equaled 10 feet. When outdoors, however, one inch was 10 yards. Yes, this meant spell and weapon ranges were greater outdoors than indoors. Normal human movement (when carefully exploring) was 12" per move, with two moves per turn. Carrying too much weight cut this down to 9" or even 6". Running movement was double the above.

Descending Armor Class: B/X and other pre-SRD editions used a descending Armor Class system where an unarmored character was AC 9 (AC 10 in some editions) and better armor used lower

success or failure. Bonuses cannot take the success range above 5 or below 1 on 1d6.

Players will sometimes want their character to listen at a door to hear any noises beyond. Again, the GM rolls 1d6. A roll of 1 results in success, and a roll of 1 or 2 succeeds for demi-humans due to their keen hearing. A thief has specially trained for this task, and succeeds on a roll of 1-2 (Level 1-4), 1-3 (Level 5-8), 1-4 (Level 9-12), and 1-5 (Level 13+). This attempt may only be made one time at any door by a character. Note that some creatures, such as undead, do not make noise.

Traps and Trap Detection: A trap will usually spring on a d6 roll of 1 or 2 when a character passes over or by them or otherwise triggers them.

Characters of all classes can search for non-magical traps. All characters except dwarves and thieves can succeed in spotting a trap on a roll of 1 on 1d6. Dwarves succeed on a roll of 1 or 2 on 1d6. Thieves are specially trained for this task, and succeed on a roll of 1-2 (Level 1-4), 1-3 (Level 5-8), 1-4 (Level 9-12), and 1-5 (Level 13+). Players must declare that their characters are actively looking for traps, and they must be looking in the right place. This roll may only be made once in a particular location, and it takes 1 turn per effort made. Since the GM rolls the dice, the player never know if the roll failed or if there simply is no trap in the area searched.

Secret/Hidden Doors: Secret (and hidden) doors can only be spotted if characters are specifically looking for them. The GM rolls 1d6 when a player declares that his character is looking for secret doors. A result of 1 on 1d6 is a success, except that elves have better vision and succeed on a roll of 1 or 2 on 1d6. Thieves are specially trained for this task, and succeed on a roll of 1-2 (Level 1-6), 1-3 (Level 7-10), and 1-4 (Level 11+). A character can only attempt to look for secret doors once in any given area, and it takes 1 turn. A second attempt cannot be made in the same area. On a roll of 1 on 1d6 an Elf will notice a secret door even if he is not actively searching for secret doors. Since the GM rolls the dice, the player never know if the roll failed or if there simply is no door in the area searched.

Wilderness Exploration

Exploring the wilderness is an iconic part of old school roleplaying games. The guidelines in this section will help the GM run adventures in the great outdoors, whether exploring new lands or simply go from one place to another along well-travelled routes.

Time and Wilderness Movement: The wilderness is not cramped like in a dungeon, and characters can usually see further ahead and not be as wary of obstacles. For this reason, movement is measured in yards rather than feet in the wilderness.

A character that could move 120' per turn in a dungeon can move 120 yards (360') per turn in the wilderness. Further, characters can move, per day, their movement rate divided by 5 in miles per day. So a character that moves at 120 (feet or yards, depending on environment) can move 24 miles in the wilderness per day. It's likely that not all characters will have the same movement, so if they wish to stay together they must move as fast as the slowest character. Also note that the number of miles characters can move in 1 day presented here assumes a clear trail and easy travel. Other conditions will reduce the distance traveled in a day by fractions, as detailed below.

Terrain	Movement Modifier
Desert, hills, wooded areas	-1/3
Thick jungle, swamps, mountains	-1/2
Road travel, clear wide trails	+1/2

For example, if characters can travel 24 miles normally, but are following roads, they can travel 36 miles a day (24 + 12). If they are traveling through swampy land, they travel 12 miles (24 - 12) per day. Furthermore, certain kinds of terrain can slow travel at the GM's discretion, such as if the characters have to cross canyons, large rivers, or other formations. In addition to these conditions that can influence travel rates, characters may engage in a forced march. A forced march is a day of hard, tiring travel, but increases travel speed by +1/2. However, the characters must rest for 24 hours after a forced march. Otherwise, during wilderness travel the characters have to rest one day per six days of travel. Weather can also affect travel rates or even prevent safe travel altogether.

Missile weapon and spell ranges are measured in yards in the wilderness also, but note that areas of effect remain the same for spells and other effects.

Unless there is an encounter, the GM will direct players through time in increments of days while traveling in the wilderness. When an encounter occurs, time is measured in rounds. Unlike in labyrinths, wilderness adventures do not often measure time in turns.

Seeing Monsters: Unless surprised, characters will see monsters when they are 4d6 x 10 yards apart. Surprise distance is 1d3 x 10 yards.

Wandering Monsters: The GM should roll 1d6 every day of travel for wandering monsters. If the party is camping, an additional roll should be made at night. If a wandering monster is indicated (roll varies by terrain, see terrain table below), wandering monsters stumble across the party from a random direction and distance. At night, the GM should randomly determine which watch is on duty when the attack is made.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue so long as the party can be detected, there is a 50% chance monsters faster than the party will catch it (30% chance for monsters about as fast as the party) in each hex traveled through. Woods or swamp reduce the chance of being caught by 25%. Monsters will pursue into another hex on the map 50% of the time. The chase continues until combat occurs or the monsters break off. The party must rest for one-half day for each hex travelled during a pursuit. All chances may be adjusted by the GM depending on circumstances. These same rules determine how monsters will pursue if the characters disengage and retreat (or rout) from a battle.

Becoming Lost: A group travelling off a well-marked trail or road without an accurate map or a knowledgeable guide may become lost. The chance of becoming lost is rolled on a d6 and depends on the type of terrain the party is in (see table below). If lost, the party actually moves in a random direction but believes they have moved in the direction intended.

Terrain Type	Chance Lost	Chance of Encounter
Plains	1	1
Woods	1-2	1-2
Forest	1-3	1-2
River	1	1-2
Swamp	1-3	1-3
Hills	1	1-2
Mountains	1-2	1-3
Desert	1-3	1-2

Strongholds: Characters may encounter a stronghold during their wilderness travels. If the GM decides the characters pass near a castle or other kind of stronghold, he can roll on the following

table to randomly determine how any patrol that spots them might react. These rolls may be modified one way or another if the characters are acting suspicious, or if they are approaching peacefully and potentially with offerings.

Ruler			Reaction (1D6)		
Class	Level	Patrol Type	Ignore Chase Friendly		
Cleric	6+1d8	Lt mounted, 2d6	1-2	3-4	5-6
Dwarf	8+1d4	Hvy infantry, 2d6	1-4	5	6
Elf	9 or 10	Lt mounted, 2d6	1-4	5	6
Fighter	8+1d6	Hvy mounted, 2d6	1-2	3-5	6
Halfling	6+1d2	Lt infantry, 2d6	1-3	3	4-6
MU	10+1d4	Hvy infantry, 2d6	1-4	5	6

Rations and Foraging: When adventuring in a dungeon, there may be very little available to eat. Characters must take rations with them to cover the extent of time they expect to be away from town. However, they may occasionally kill an edible monster.

When in the wilderness, characters can hunt or scavenge for food. Scavenging for food is an activity that can be accomplished without hindering travel by gathering fruit, nuts, or small animals. For each day of travel while scavenging, roll 1d6. A result of 1 indicates that sufficient food for 1d6 human sized beings has been acquired. Hunting follows the same roll, but succeeds on 1-2, and must be engaged as the sole activity for a day. No traveling is possible. In addition, there will be one Wandering Monster check, from the table appropriate for the terrain, while the group is hunting.

Characters that go without food and/or water will soon begin to suffer from the effects of starvation and/or dehydration:

Starvation: Characters generally need 2 pounds of food per day. After 2 days without food, a character takes 1d6 damage per additional day without food and no longer heals lost HP.

Dehydration: Characters generally need 1 gallon of water per day. Each day after the first without water, a character loses 25% of his full HP in damage (and can no longer heal).

Other Hazards

Falling: 1d6 damage per 10 feet fallen, save for half damage.

Spikes: add +1 point to falling damage per 10' fallen, max +10

Extreme Heat & Cold: If not wearing suitable protection, save once every 10 minutes (-1 per previous check), taking 1d6 damage on each failed save.

Creating A Stronghold

All of the Character classes have some ability, at some level, to establish a stronghold – or to take over a guild, in the case of Thieves. Strongholds are usually built by claiming an area of wilderness, clearing out the monsters that lair in the region, and then beginning construction of the new owner's fortified place of residence. The nature and type of stronghold will differ, of course, for the individual's choices will play an important role. For instance, it is traditional for you, the player, to create a map of your castle. In general, a strong leader who clears out an area with a radius of ten miles or so will end up in charge of between 2 and 8 (2d4) small settlements. The peasants in these hamlets, cots, and vils will be overjoyed to find themselves under the protection of a powerful and renowned protector – unless your Character is a tyrannical overlord in the service of Chaos. Each settlement holds roughly 1d4 x100 villagers, and the normal feudal tax is 10 gp per year per villager. Sometimes, of course, this is paid with chickens and oxen, and your stronghold might take on the appearance of a marketplace, around tax time – but a good reeve or bailiff can sort it all out quickly, without the Character's needing to get involved.

Owning a stronghold allows a person to house and feed loyal retainers without paying for their room and board in local inns, or building campsites in the cold rain. It is a base of operations and a secure place to keep Treasure.

Building the actual castle, of course, is quite expensive. The owner will need to hire wagons for transporting materials, as well as masons and other experienced craftsmen from more civilized areas to raise the strong stone walls and towers of the fortress. While the construction costs could change drastically depending upon how far a freehold is from the rest of civilization and what materials are available in the area, the following sample costs will provide a baseline:

Stronghold Structure Costs

Barbican (gatehouse, 2 small towers, and a drawbridge)	38,000gp
Battlement (100' long, crenellated parapets)	500gp
Building, stone (20' high, 30' square, wood doors, floors, roof, stairs)*	3,000gp
Building, wood (20' high, 30' square, wood doors, floors, roof, stairs)*	1,500gp
Corridor, dungeon (10'x10'x10', hewn stone walls, flagstone floor)	500gp
Drawbridge, wood (10' x 20')	250gp
Gatehouse (20' high, 30' x 20', metal portcullis, wood doors, floors, stairs)	6,500gp
Keep, square (80' high, 60' square, wood doors, floors, stairs)*	75,000gp
Moat, unfilled (100' x 20' x 10' deep)*	400gp
Moat, filled (100' x 20' x 10' deep)*	800gp
Palisade, wood (10' high, 100' long, 1' thick)	125gp
Rampart, earthen (10' high, 100' long, 15' thick)	2,500gp
Tower, small round (30' high, 20' diameter, wood doors, floors, stairs)	15,000gp
Tower, medium round (40' high, 20' diameter, wood doors, floors, stairs)	22,500gp
Tower, large round (40' high, 30' diameter, wood doors, floors, roof, stairs)	30,000gp
Tower, huge round (60' high, 30' diameter, wood doors, floors, roof, stairs)	54,000gp
Wall, stone castle (20' high, 100' long, 10' thick)	5,000gp
Wall, stone castle (30' high, 100' long, 10' thick)	7,500gp
Wall, stone castle (40' high, 100' long, 10' thick)	12,500gp
Wall, stone castle (50' high, 100' long, 10' thick)	17,500gp
Wall, stone castle (60' high, 100' long, 10' thick)	22,500gp

*The dimensions of these constructions can be altered as long as the square footage remains the same.

In addition to the building costs, the character will need to hire at least one engineer (250gp/month) per 100,000gp cost of the stronghold. The time required to construct a stronghold depends entirely on its total price. For every 500gp it will take one day of game time. The construction time can be reduced by 25% by paying 50% additional construction costs, or reduced by 50% by paying 100% additional construction costs. The construction time cannot be reduced by more than 50%.

Magical Research

As described in their class descriptions, spell casters are able to research new spells and create magic items. These are expensive procedures which often do not succeed.

All magical research requires a magic research skill roll of some type to succeed. This throw is a Secondary MIND Skill Roll unless otherwise listed. An unmodified die roll of 1-3 is always a failure when conducting magical research, however. When a magic research throw fails, the time and money spent on the research is lost. In addition, any precious materials or special components (described below) are consumed.

Researching Spells

Researching Known Spells: A spellcaster of 5th level or higher may use spell research to gain access to spells on the standard Microlite81 spell list that he does not have access to from scrolls, spell books, or (if a divine spellcaster) his deity. Spell research costs 1,000gp, and takes two weeks of research, per level of the spell. Spell research requires a magic research throw versus a DC equal to 12 plus twice the level of the spell being researched. EXAMPLE: Riddle is an 11th level mage with a MIND of 15 researching a 4th level spell. It will take 8 weeks and cost 4,000gp, and require a Secondary MIND Skill Roll versus a DC of 20 to succeed.

Researching New Spells: A spellcaster may also use spell research to create a new spell not on the standard spell lists. The spellcaster must describe in detail the kind of spell he wants to create, and the effects it will have. The GM will then determine if the spell can be created, and if so what the spell level will be. The spellcaster must be capable of casting spells of the spell level the potential new spell will be; otherwise he must wait until he attains a high enough level to research and cast the spell. Spell research costs 1,000gp, and takes two weeks of research, per level of the spell. A magic research roll is required for success versus a DC equal to 12 plus three times the level of the spell being researched.

Identifying Magic Items: Spell research can also identify the properties of a magic item. It takes 1,000gp and two weeks of research to identify a magic item, and a magic research throw (A is required). The required DC is determined by how common the GM rules the magic item is: Common, DC 14, Uncommon, DC 17; Rare, DC 20; Very Rare, DC 24; Artifact/Unique, DC 30 (or higher).

A mage or other arcane caster can only research a spell if he can still learn spells of that level. A cleric or other divine caster can only research a spell with the permission of his deity (GM's discretion). The deity will usually remove a spell of the same level from the cleric's spell list in exchange for granting the new spell.

Libraries : To research a spell, a spellcaster must have access to a library. Wizard's guilds and major temples often will provide their mages and clerics access to such a library. If a spellcaster wishes to compile his own library, a minimum of 4,000gp must be invested to allow research on 1st level spells. For each subsequent spell level to be researched, another 2,000gp must be invested. Having an exceptionally large library aids research. For every 10,000gp of value above the minimum required for the spell, the spellcaster receives a +1 bonus on his magic research throw (up to a maximum +3 bonus).

Every time a wizard successfully researches a spell, 10% of the gold spent for that effect is added to his library value, reflecting the value of notes and annotations made during research. Authoritative tomes or rare books found as treasure might provide an additional bonus to research specific spells or types of spells.

Creating Magic Items

Starting at 5th level, spellcasters may begin to scribe scrolls and brew potions. At 9th level, they may begin to make other types of magic items, such as rods, rings, swords, and other items. An arcane spellcaster may never create magic items that are exclusive to divine spellcasters. A divine spellcaster may make any item his class is eligible to use.

In order to create a magic item, the spellcaster must know the spell(s) that replicate the magic item's effect, or must find a sample or formula of the item. If a magic item's effect does not compare to any existing spell, the spellcaster must either research a new spell that will produce the desired effect, or he must find a sample or formula of the item.

Cost and Time: The base cost and time required to create a magic item is listed on the Magic Item Creation tables.

Magic Research Roll: Creating a magic item requires a magic research roll for success versus a DC equal to 12 plus three times the level of the spell needed to create the effect being enchanted. If multiple effects are being enchanted, each must be rolled separately. A +1 item bonus is considered a 1st level spell, a +2 item bonus is considered a single 3rd level spell, and a +3 item bonus is considered a single 6th level spell.

Formulas and Samples: A formula is a magical "recipe" for the creation of an item. A spellcaster automatically has a formula for any magic item he has previously created. Formulas may also be found as treasure. A sample is simply an existing magic item that is available to the spellcaster while he is working.

There are three advantages to having a formula or sample:

- 1) It enables the spellcaster to create a magic item without having to learn or invent the spells imbued in the item.
- 2) It reduces the cost and time to make the item by 50%.
- 3) The DC for the magic research roll is 12 plus two times the level of the spell needed to create the effect (instead of the standard plus three times the level of the spell needed to create the effect).

Precious Materials: Rare woods, noble metals, such as silver, gold, and platinum, and precious gems, such as rubies and diamonds, retain magic better than common woods, crude metals, or simple stone. Using precious materials can thus improve the chances of success of creating a magic item. For every 10,000gp of value in gems, jewelry, precious metals, and rare or elaborately carved woods added, the spellcaster receives a +1 bonus on his magic research throw. A character may not spend more on precious materials than the base cost of the item.

Special Components: Creating magic items requires special components for each spell effect in the item. Components are usually organs or blood from one or more monsters with a total XP value equal to the gp cost of the research. The cost of any special components is in addition to the base cost of the research. If a character does not have a formula when he begins creating the item, he will not learn the special components until the work is 50% complete. The GM will determine the specific components required for each item. Different formulas for the same item may require different components. For instance, one formula for a wand of fireball might require the fangs of 20 hellhounds, while another formula for a wand of fireball might require the ichor of four efreet.

Workshops: Just as a spellcaster needs a library to research spells, he needs a workshop in order to create magic items. Wizard's guilds and major temples often will provide their mages and clerics access to a workshop. If a spellcaster wishes to build his own workshop, a minimum of 4,000gp must be invested to allow creation of 1st level spell effects or item bonuses. For each subsequent spell level or bonus, another 2,000gp must be invested. Having an exceptionally valuable workshop aids item creation. For every 10,000gp of value above the minimum required for the spell, the spellcaster receives a +1 bonus on his magic research throw (up to a maximum +3 bonus).

Magic Item Creation: Base Cost

Item Type	Base Cost
One Use Effect	500gp x spell level
Charged Effect	500gp x spell level x charges*
Permanent Effect, Unlimited Use	500gp x spell level x 50
Permanent Effect, Use 1/turn	500gp x spell level x 33
Permanent Effect, Use 1/3 turns	500gp x spell level x 25
Permanent Effect, Use 1/hour	500gp x spell level x 16
Permanent Effect, Use 3/day	500gp x spell level x 12
Permanent Effect, Use 1/day	500gp x spell level x 10
Permanent Effect, Use 1/week	500gp x spell level x 6
Magical Weapon +1	5,000gp**
Increase bonus from +1 to +2	+10,000gp**
Increase bonus from +2 to +3	+20,000gp**
Magical Armor +1	5,000gp**
Increase bonus from +1 to +2	+10,000gp**
Increase bonus from +2 to +3	+20,000gp**

Magic Item Creation: Time Cost

Item Type	Time
One Use Effect	1 week x spell level
Charged Effect	2 days x spell level x charges
Permanent Effect, Unlimited Use	100 days x spell level
Permanent Effect, Use 1/turn	80 days x spell level
Permanent Effect, Use 1/3 turns	70 days x spell level
Permanent Effect, Use 1/hour	60 days x spell level
Permanent Effect, Use 3/day	50 days x spell level
Permanent Effect, Use 1/day	40 days x spell level
Permanent Effect, Use 1/week	30 days x spell level
Magical Weapon +1	1 month x weapon base cost / 10***
Increase bonus from +1 to +2	+1 month x weapon base cost / 10***
Increase bonus from +2 to +3	+1 month x weapon base cost / 10***
Magical Armor +1	1 month x Armor Class
Increase bonus from +1 to +2	+1 month
Increase bonus from +2 to +3	+1 month

* If a charged item has multiple spell effects powered by the same charges, use the base cost and time for the highest level spell effect, plus half the base cost and time for each other spell effect. The minimum time to create a charged item is never less than 1 week per spell level of the highest level effect.

** If the weapon or armor has a bonus that is restricted to a particular class or type of opponents, the extra bonus is half price. If the weapon or armor is enchanted with spell-like effects, the spell-like effects are enchanted separately using the cost and time for charged or permanent effects.

***Arrows, bolts, and sling stones are enchanted in bundles of 20 at a base cost of 10gp.

Optional Rules

The following rules are optional. The GM decides if they will be used.

Background: Characters may select, with the approval of the GM, a one or two-word background that represents a broad base of skills and knowledge, e.g. Farmer, Merchant, Desert Nomad, Noble, Shaman, Templar, Thyatian Mercenary, Ritualist, etc. Backgrounds need not be related to the PCs class, e.g. a player who creates a deeply religious fighter skilled in the arts of vision interpretation, divination and oration might pick 'Prophet' as a background. Backgrounds may not duplicate a class.

The GM will consider the character's background just as he would the character's class when deciding if a character will succeed with an action. For example, a character with an "Engineer" background should have a much better chance of damming a creek or building a bridge over it than a character with a "Courtier" background.

Encumbrance: Characters can normally carry twelve (plus STR bonus) items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item. Oversized items (two-handed weapons, anything as tall as the character or that requires two hands to carry) count as two items. A character carrying 6 or fewer items is unencumbered. A character carrying 7-12 items is lightly encumbered. A character carrying 13-18 items is heavily encumbered. A character more than 18 items is over-encumbered. *Option:* Adjust number of items for each encumbrance class by the character's STR bonus.

Individual Initiative: Roll d20 + DEX bonus for initiative order each combat round. Use Hit Dice/2 instead of DEX for monsters. Characters and monsters act in Initiative order, from high to low. Spell casters casting a spell must declare the spell being cast and its target before initiative is rolled.

Simple Combat Maneuvers: If the standard combat maneuvers rules seems too complex, substitute the following instead. Attacker may describe a special effect he wishes to impose on a target before rolling to hit. Unless the GM rules the maneuver impossible, the character rolls to hit normally. If successful, no damage is done, but the target suffers the special effect unless the target makes a saving throw. On a critical hit, the target does not get a saving throw. Possible maneuvers include: disarm, knock down, push back (up to STR feet), switch positions, slip past, steal an obvious and accessible item from the target, etc.

Energy Drain: If the standard energy drain rule seems too harsh, try the following instead. Each energy level drained subtracts one from any roll to which the character would add his level (or his level/2). 1 point of energy drained is recovered every L days where L is equal to the hit dice of the monster that drained the energy level.

Healing: In the original B/X, characters healed 1d3 hit points per full day of complete rest, no healing otherwise. If play closer to the original is desired, this rule may be used in place of the standard Microlite81 healing rules. Hit points used to cast spells should still recover with a night's rest, however.

Raise Dead Spell Expansion: As B/X does not have clerical spells higher than 5th level, the B/X cleric lacks a way to restore lost limbs or restore levels lost. If the GM wishes high level Microlite81 clerics to have these abilities, the simplest way to add them is to extend the clerical "Raise Dead" spell so it does one of four things when cast (caster's choice): 1) The standard raise dead function as described in the spell description. 2) Regrow one lost limb (or partially lost limb) to a single living target; the limb

takes 1 day to regrow. 3) Restore one energy level lost within the last (level of caster) days to a single living target. 4) Completely heal a single living target of all damage (both hit point and STR damage).

The name of the spell could be changed to "Restore Life" if this optional rule is used.

Avoiding Save-or-"Die": There are a number of effects which cause the character to be taken out of play permanently or for a long period of time unless a saving throw is made (e.g. instant death, turn to stone, etc.). If this standard rule seems too harsh, try the following instead. If a character fails a save-or-"die" roll, the negative effect happens immediately but it can be reversed if the character receives 5 minutes of careful care in a non-combat environment starting within a number of minutes/melee rounds equal to the affected character's CON stat. The GM may rule that certain issues still require further treatment within 24 hours or the effect recurs (e.g. poison must still be neutralized) or may not be handled this way at all.

Traditional Experience for Treasure: Traditionally, experience points were only given for treasure found in B/X and were not given for treasure spent. To use this system, ignore the standard rules for experience from treasure found and experience for treasure spend and use the following rule instead.

At the end of an adventure, total the value of all non-magical treasure found during the adventure in gold pieces. Divide the result by the number of characters in the party to determine the number of XP each character receives from treasure. Henchmen/Retainers count as 1/2 person and hirelings count as 1/10 person (round up for PCs, round down for others).

Traditional Saving Throws: Some gamemasters and players prefer the traditional "five category" saving throw system used in early editions of the world's most popular fantasy roleplaying game. The following saving throw tables can be substituted for the standard Microlite81 saving throw system if the GM desires.

Cleric Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-4	16	11	14	12	15
5-8	14	9	12	10	12
9-12	12	7	10	8	9
13+	8	3	8	4	6

Dwarf and Halfling Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-3	13	8	10	9	12
4-6	10	6	8	7	10
7-9*	7	4	6	5	8
10+	4	2	4	3	6

* Maximum for halflings

Elf Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-3	15	12	13	13	15
4-6	13	10	11	11	13
7-9	9	8	9	9	11
10	7	6	7	7	9

Fighter Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
0 lvl Human	17	14	16	15	18
1-3	15	12	14	13	16
4-6	13	10	12	11	14
7-9	9	8	10	9	12
10-12	7	6	8	7	10
13+	5	4	6	5	8

Magic-User Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-5	16	13	13	13	14
6-10	14	11	11	11	12
11+	12	9	9	9	8

Thief Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-4	16	14	13	15	14
5-8	14	12	11	13	12
9-12	12	10	9	11	10
13+	10	8	7	9	8

Item Saving Throws: When characters (and NPCs) die from a particularly damaging event, such as the fire breath of a dragon or a fire ball spell, some or all of their items may be destroyed. A GM using this optional rule may use either of the following methods to determine what items are destroyed:

Method 1: Whenever characters (and NPCs) die from a particularly damaging event, such as the fire breath of a dragon or the spell fire ball, all ordinary possessions on a character's body should be considered destroyed. Magical items may not be destroyed, and are allowed saving throws of the appropriate type for the attack based on the character's saving throw. Items that have bonuses will receive an equal bonus on the saving throw. For instance, a +1 dagger receives a bonus of +1 to the roll.

Method 2: Make a roll in the kind of situation mentioned above, as well as in situations when items are exposed to crushing damage (from falls), acid, or any other event that could feasibly destroy them. The GM will roll either 1d4 or 1d6, depending on the severity of the situation. Magic items have a chance of surviving based on their relative power. For instance, a +2 shield would survive on a roll of 1-2 on a d4 or d6. Items for which "pluses" do not apply can be assigned a number between 1 and 3. Scrolls and potions may survive on a roll of 1 on a d4 or d6, a staff or wand may survive on a roll of 1-2; any other items such as rings, rods, and other miscellaneous magical items are more durable and survive on a roll of 1-3. If an item which has "pluses" is damaged, it may not be destroyed outright, but may lose one "plus." Thus, a +2 shield becomes a +1 shield on a failed saving throw roll.

Modifiers: The GM should apply bonuses or penalties depending on the situation. If an attempt is made to intentionally damage an item, there may be a penalty of 2 to the roll. Bonuses may apply if an item is well protected. No penalty or bonus should be more than 2.

Fire-And-Forget Magic: The B/X version of the world's most popular fantasy roleplaying game used a much different system of

magic from that of Microlite20-based games. This system had the magic-user or cleric select and prepare a set number of spells of certain levels in advance. Each prepared spell could only be cast once. This system can easily be substituted for the standard Microlite81 spell casting system using the following rules.

Both magic-users and clerics must select and prepare specific spells from their collections in advance. The number of spells of specific levels a character can prepare is limited by their class level (see below for details). Preparing spells takes one hour of uninterrupted time: magic-users must study their spell books while clerics must meditate and commune with their deity.

Casting a prepared spell does not cost any hit points, but once cast, a spell cast is no longer in memory and may not be cast again. Casters may prepare multiple copies of the same spell.

In combat, if a fire-and-forget caster is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles and the caster loses the spell from memory just as if he had cast it.

No Clerical Spell at First Level (Optional): To be true to the original B/X source material, first level clerics should not have any spells. To duplicate this, change the number of first level spells available to first level clerics to zero and the number available to second level clerics to one on the Cleric table below.

Number of Spells Prepared Per Day (Magic-Users/Elves):

Magic-User/ Elf Level	Spell Level					
	1	2	3	4	5	6
1	1					
2	2					
3	2	1				
4	2	2				
5	2	2	1			
6	2	2	2			
7	3	2	2	1		
8	3	3	2	2		
9	3	3	3	2	1	
10	3	3	3	3	2	
11	4	3	3	3	2	1
12	4	4	3	3	3	2
13	4	4	4	3	3	3
14	4	4	4	4	3	3

Number of Spells Prepared Per Day (Clerics):

Cleric Level	Spell Level				
	1	2	3	4	5
1	1				
2	2				
3	2	1			
4	3	2			
5	3	2	1		
6	3	3	2		
7	4	3	2	1	
8	4	3	3	2	
9	4	4	3	2	1
10	5	4	3	3	2
11	5	4	4	3	2
12	5	5	4	3	3
13	6	5	4	4	3
14	6	5	5	4	3

Donate to the RetroRoleplaying Cancer Fund and Get Some PDF Goodies

Many Microlite81 gamers know that Randall Stukey, the author of Microlite81 and other M20-based old school games is trying to raise funds to pay the bills from [his wife's oral cancer](#) treatments and that he worked on the original Microlite81 as way to cope during her recovery from 6 weeks of radiation treatment in 2008. Randall and Donna are some of the 40 to 50 million people in the US who do not have health insurance nor did they qualify for government aid as they live in Texas and have no children. Donna's cancer treatments have cost over \$110,000. While some of this has been absorbed by hospital foundations and the like, they still owe a lot of it. You can donate to the RetroRoleplaying Cancer Fund (via PayPal) and help them pay their bills.

Can You Help Pay the Cancer Bills?

Everyone who donates any amount at all get a password giving them access to a number of special downloads. *Some* of the currently available downloads include:

- Pdf copies of the two issues of The Grimoire Randall published in the late 1970s (which Randall blogged about here: The Grimoire #1 (<http://blog.retroroleplaying.com/2009/05/grimoire-1-spring-1978-d-fanzine.html>) and The Grimoire #2 (<http://blog.retroroleplaying.com/2009/05/grimoire-2-summer-1979-d-fanzine.html>))
- Pdf copy of The Second Grimoire of Pharesm the Bright-Eyed, a set of house rules for a BECMI campaign Randall ran at a game shop in the mid-1980s.
- A copy of the Player's Introduction to the Fourth Campaign Arn (from about 1984)
- Microlite81 2.0 Special Edition -- a 60-page PDF designed to be printed in booklet format from Adobe Acrobat. Artwork is by Håkan Ackegård. This Special Edition incorporates the rules from the first supplement. The text has been reformatted into a single column in a large enough font to easily read.

To get access to these downloads and access to a private donor forum where you can get advance information on upcoming Microlite81 releases, help Randall pay the cancer bills by sending a donation in any amount -- small or large -- to the RetroRoleplaying Cancer Fund via Paypal at this link:

Microlite81 Spell Lists

Arcane (Magic-User/Elf) Spells

For expanded spell descriptions see B/X or a B/X retro-clone. R: is range. D: is duration.

1st Level

Charm Person: Makes a humanoid creature regard the caster as its trusted friend and ally (treat the target's attitude as friendly).

Undead creatures are not affected by this spell, nor are humanoid monsters larger than ogres. R: 120 feet. D: until dispelled or saved against.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Floating Disk: Creates a small shield sized floating energy disc that follows the caster. Holds up to 500 lbs. R: 5 feet D: 60 minutes.

Hold Portal: Holds door/gate shut. R: 10 feet. D: 2d6 x 10 minutes.

Light: object lights circle with 30 ft. radius, not full daylight. R: 120 feet. D: 1 hour+10 min/level.

Magic Missile: Creates magic arrow which hits its target for 1d6 damage. An additional 2 missiles are created every 5 levels (e.g. total 3 at level 5, total 5 at level 10). R: 150 feet. D: 10 minutes.

Protection from Evil: +1 to AC and saves, counter mind control, hedge out summoned and enchanted monsters. Attacking a creature negates protection against that creature. Moves with caster. R: shell around caster. D: 1 hour.

Read Languages: Read any written language. D: 1 or 2 readings.

Read Magic: Read scrolls, spellbooks, other magical writing. R: caster only. D: one reading (two scrolls or equivalent).

Shield: Improves caster's armor class to 17 versus missile attack and to 15 versus melee attacks. R: caster. D: 20 minutes.

Sleep: Puts 4d6 HD of beings into magical slumber. Undead and creatures with more than 4 hit dice are not affected. Range: 240 feet. D: GM's 4d4 x 10 minutes.

Ventriloquism: allows caster to "throw his voice" absolutely convincingly. R: 60 feet. D: 20 minutes.

2nd Level

Continual Light: object lights circle with 120 ft. radius until dispelled, not full daylight. R: 120 feet.

Detect Evil: Reveals evil thoughts/intent or evil items. R: 60 feet. D: 20 minutes.

Detect Invisible: Detect invisible items and beings within 10 feet per caster level. D: 1 hour.

ESP: Allows Caster to read surface thoughts of target. Undead are immune. R: 60 feet. D: 2 hours.

Invisibility: Target is invisible until spell broken by caster, some outside force, or until it attacks. R: 240 feet.

Knock: Unlocks/unbars all locked or magically sealed doors or other door-like barriers. R: 60 feet. D: instant.

Levitate: Caster floats up and down as he desires. Speed: 20 feet up/down per minute. D: 60 minutes + 10 minutes/level.

Locate Object: Senses direction toward an object (specific or type) D: 20 minutes. R: 60 + 10/level feet.

Mirror Image: Creates 1d6-1 exact images of the caster, all moving exactly like original. Attackers cannot tell images from original. Images hit disappear. R: around caster. D: 1 hour.

Phantasmal Forces: Vivid illusions of nearly anything the caster envisions, lasts as long as the caster concentrates. Damage caused is real if target believes illusion. R: 240 feet.

Web: Sticky webs fill a 10x10x10 foot area. Burning through the webs takes 6+1d4 minutes. Large creatures push through in 14+1d6 minutes. Human-sized creatures take 20+3d6 minutes. R: 10 feet. D: 8 hours.

Wizard Lock: Locks door like Hold Portal. Permanent until dispelled. Knock opens without dispelling. Caster can pass through without lifting spell. R: 10 feet. D: instant.

3rd Level

Clairvoyance: See through eyes of one creature. Caster can change creatures once every 10 minutes. R: 60 feet. D: 120 minutes.

Dispel Magic: Cancels magic effects and spells in a 20x20 foot area. (If cast by higher level caster, Magic Attack vs. Spell's DC for success) Range: 120 feet. Duration: instant but effects permanent.

Fire Ball: Missile of fire that bursts when hits target for 1d6/level fire damage, 20 foot burst radius. R: 240 feet. D: instant.

Fly: Target can fly at a speed of 120 feet per minute. R: Touch. D: 1d6 x 10 minutes plus 10 minutes/level. (GM rolls secretly.)

Haste Spell: Subjects (up to 24 beings in a 60 foot radius of target) double in speed, taking two actions at a time. (Counters Slow) R: 240 feet. D: 30 minutes.

Hold Person: Paralyzes 1-4 targets. Cast at single target, save at -2 and double duration. R: 120 feet. D: 10 minutes/level.

Infravision: See in the dark. R: touch. D: 1 day. Sight Range: 30 + (1d3 x 10) feet.

Invisibility, 10' radius: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until one attacks.

Lightning Bolt: 1d6/level electrical damage. Bolt bounces off walls, etc. R: 240 feet, bolt is 5 feet wide, 60 feet long. D: instant.

Protection from Evil, 10' radius: +1 to AC and saves, counter mind control, hedge out elementals and enchanted monsters to caster and all allies within 10 foot circle around caster. D: 120 minutes.

Protection from Normal Missiles: Non-magical thrown and missile weapons automatically miss. R: 30 feet. D: 120 minutes.

Water Breathing: Subject can breathe water. R: 30 feet. D: 1 day.

4th Level

Charm Monster: Makes one monster of 3+ hit dice (or 3d6 monsters of less than 3 hit dice) believe they are the caster's strong ally. Save again every level days or when asked to do something obviously against the being's interest. R: 120 feet.

Confusion: Subjects (up to 3d6 hit dice in a 60 foot circle, only 2+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Dimension Door: Teleports subject a short distance (up to 360 feet) from current location. Fails if destination not open air. R: 10 feet. D: instant.

Hallucinatory Terrain: Makes one type of terrain appear like another type until dispelled or area entered by an opponent. R: 240 feet.

Massmorph: Makes up to 100 humanoids in a 240 foot diameter circle appear to be trees until dispelled or negated by caster. Creatures may move and still appear to be trees. R: 240 feet.

Plant Growth: Plants in an area up to 3000 square feet (entire area must be within range) become overgrown and nearly impassable. Lasts until dispelled or plants killed. R: 120 feet.

Polymorph Others: Change one creature (but not self) into the form of another being. Change is complete and includes gaining special abilities and mind of creature. New form cannot have more than 2x the hit dice of original. R: 60 feet. D: until dispelled.

Polymorph Self: Change self to form of another being, does not get special powers but retains own intelligence. R: caster only. D: 60 + 10/level minutes.

Remove Curse: Frees subject from a single curse. Does not remove curse from object, but frees user to get rid of the cursed object. R: 10 feet. D: instant but effects permanent.

Wall of Fire: Creates thin wall of fire up to 1200 square feet. Blocks sight and creatures under 4 hit dice cannot pass. Passing through wall deals 1d6 damage (2d6 for undead or cold-using creatures). Wall lasts as long as caster concentrates on it. R: 60 feet.

Wall of Ice: Creates translucent wall of ice 20 feet tall and 60 feet long (or equivalent). Creatures under 4 hit dice cannot pass. Passing through wall deals 1d6 damage (2d6 for undead or fire-using creatures). Wall lasts as long as caster concentrates on it. R: 60 feet.

Wizard Eye: Allows sending an invisible eye that can see in the

dark up to 240 feet away which relays all it sees to the caster. Moves up to 12 feet each minute. D: 60 minutes.

5th Level

Animate Dead: Create undead skeletons or zombies under control of caster from dead bodies, up to 1 hit die of undead per caster level. R: 60 feet. D: permanent.

Cloudkill: creates a moving, opaque, poisonous cloud of vapor which is deadly to all creatures with less than five hit dice. 30 feet in diameter, moves with wind or 6 feet per minute. Effects (suffered each minute within cloud): if under 5HD, save vs poison or die, suffer 1 hp damage if save made. 5HD or more, suffer 1 hp damage. D: 60 minutes.

Conjure Elemental: Conjures one 16 HD elemental who will serve the caster until dispelled/dissipated/caster no longer concentrates. Caster can only summon one of each type in a day. R: 240 feet.

Contact Higher Plane: Lets Caster ask yes/no question of other planar entity, There are 10 levels (from 3-12) of higher planes. Caster chooses which level to contact. 1 question per level. Chance of correct answer 45 + 5% per level, maximum 95%. Chance of going insane from the contact is 5% per level, maximum 50%. Range: caster. Duration: 1 minute per question.

Feeblemind: Subject's MIND drops to 1. Save at -4. R: 240 feet. D: until dispelled.

Hold Monster: As Hold Person, but any creature. R: 120 feet. D: 1 hour plus 10 minutes/level.

Magic Jar: Moves caster's spirit/mind to a fixed object from which caster can try to possess others. Magic Attack vs. DC of (10 + MIND bonus + target level or hit dice). New save every level days. Range: 30 feet. Duration: until dispelled or caster ends spell.

Pass-Wall: Creates a 5 foot wide passage up to 10 feet long through a wood or stone wall. R: 30 feet. D: 30 minutes.

Rock-Mud: Transforms rock to mud or vice-versa, up to 3000 square foot area 10 feet deep. R: 120 feet. D: 3d6 days.

Telekinesis: Moves object by mental power. Up to 20 pounds per level. Object moves 20 feet per minute. Living creatures get a saving throw if they do not wish to be moved. R: 120 feet. D: 1 hour.

Teleport: Instantly transports subject up to 100 miles/level. Caster must know target location exactly. The less exactly one knows the target, the greater the chance of appearing too high or too low. Too low is usually fatal as creature and ground do not mix.

Wall of Stone: Creates a wall of stone in any shape up to 1000 cubic feet. R: 60 feet. D: until destroyed or dispelled.

6th Level

Anti-Magic Shell: Shell surrounds caster blocking magic both ways. R: caster. D: 2 hours.

Control Weather: Caster can adjust weather in a 240 yard radius. D: concentration.

Death Spell: Kills 4d8 hit dice of creatures with less than 8 hit dice with a 60 foot cube. R: 240 feet. D: instant but effect permanent.

Disintegrate: Makes one creature or non-magical object (or part of a large object, up to a 10 foot cube) vanish, turning it to fine dust. R: 60 feet. D: instant but effects permanent.

Geas: Force a creature to obey one long-term order, similar to the clerical Quest spell. R: 30 feet. D: until order completed.

Invisible Stalker: Summons an invisible stalker, an extra-dimensional monster, under the control of the Magic-User who may give it a single mission which it will carry out until it is finished.

Lower Water: Lowers the depth of 10,000 square feet of water by 50%. R: 240 feet. D: 10 turns.

Move Earth: Move 60 cubic feet of loose soil per turn within the range of the spell. Neither solid stone nor large boulders may be moved. R: 240 feet. D: permanent.

Part Water: Creates a dry path 10' wide and a maximum of 120' long through water, such as a pond, lake, or other body. Caster can terminate spell early. R: 240 feet. D: 1 hour.

Projected Image: Project an image of yourself that can sense and

talk as if you were the image. Other spells cast come from image. R: 240 feet. D: 60 minutes.

Reincarnation: Restores dead person to life in a random (usually humanoid) form. R: touch. D: instant.

Stone-Flesh: Turns subject into a stone statue (or vice versa). R: 120 feet. D: permanent.

Divine (Cleric) Spells

For expanded spell descriptions see B/X or a B/X retro-clone. R: is range. D: is duration.

1st Level

Cure Light Wounds (Reversible): Cure 1d6+1 hit points of wounds or cures paralysis. R: touch. D: instant but effects permanent.

Detect Evil: Reveals evil thoughts/intent or evil items. R: 120 feet. D: 1 hour.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Light (Reversible): object lights circle with 30 ft. radius, not full daylight. R: 60 feet. D: 2 hours.

Protection from Evil (Reversible): +1 to AC and saves, counter mind control, hedge out summoned and enchanted monsters. Attacking a creature negates protection against that creature. Moves with caster. R: shell around caster. D: 2 hours.

Purify Food & Water (Reversible): Purifies food and water for up to 12 people. R: 10 feet. D: instant but effects permanent.

Remove Fear (Reversible): Calms one creature, removing all normal fear. If magical fear, grants immediate save with a bonus equal to caster's level. R: touch D: 20 minutes.

Resist Cold: Targets immune to effects or normal cold, have a +2 to save vs. cold, and have damage from magical cold reduced by 1 point per damage die (minimum damage: 1 point per die). R: 30 feet. D: 60 minutes.

2nd Level

Bless (Reversible): Allies gain +1 on attack rolls, saves against fear, and morale checks. Cannot be cast in combat. R: 10 feet. D: 1 hour.

Find Traps: Notice traps within 30 feet. R: caster. D: 20 minutes.

Know Alignment: Caster knows alignment of a character or monster within range (if target saves, no effect). Alignment of magic items or the nature of a holy (or unholy) place will be revealed.

Hold Person: Paralyzes 1-4 targets. Cast at single target, save at -2 and double duration. R: 180 feet. D: 90 minutes.

Resist Fire: Targets immune to effects of normal fire/intense heat, have a +2 to save vs. fire/heat, and have damage from magical fire/heat reduced by 1 point per damage die (minimum damage: 1 point per die). R: 30 feet. D: 60 minutes.

Silence, 15' Radius: Magical silence for 15 feet around target, moving with target. No sound within area can be heard from outside it. R: 180 feet. D: 2 hours.

Snake Charm: 1d6 snakes/level charmed and will obey caster's commands. R: 60 feet. D: 20 minutes + 1d4 x 10 minutes.

Speak with Animals: Can understand and speak with animals. R: 30 feet. D: 1 hour.

3rd Level

Animal Growth: One non-magical normal or giant animal will be doubled in size. R: 120 feet. D: 120 minutes.

Continual Light (Reversible): object lights circle with 120 ft. radius until dispelled, full daylight. R: 120 feet.

Cure Disease (Reversible): Cures person of any diseases, including magical diseases. Kills Green Slime. R: 30 feet. D: instant but effects permanent.

Locate Object: Senses direction toward an object (specific object or object type) D: 60 minutes. R: 90 feet.

Remove Curse (Reversible): Frees subject from a single curse. Does not remove curse from object, but frees user to get rid of the cursed object. R: 10 feet. D: instant but effects permanent.

Striking: Enchants weapon to do extra 1d6 damage and be able

to hit creatures only affected by magic weapons. R: 30 feet. D: 10 minutes.

4th Level

Create Water: Creates water, enough for up to 12 people and their horses for one day. For each level the caster has above 8, water for 12 more people and horses is produced. R: 10 feet. D: instant but effects permanent.

Cure Serious Wounds (Reversible): Cures 2d6+2 hit points from wounds and cures paralysis. R: touch. D: instant but effects permanent.

Neutralize Poison: Cancels all effects of poison (including death if cast within 10 minutes of poison death). R: touch. D: instant but effects permanent.

Protection from Evil, 10' radius (Reversible): +1 to AC and saves, counter mind control, hedge out elementals and enchanted monsters to caster and all allies within 10 foot circle around caster. R: caster. Moves with caster. R: shell around caster. D: 2 hours.

Speak with Plants: Can understand and speak with plants. Plants will perform simple tasks like allow passage if asked. R: 30 feet. D: 30 minutes.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 60 minutes.

5th Level

Commune: Cleric's Deity truthfully answers three yes-or-no questions. Only once per week. Double questions once per year. R: caster. D: 10 minutes.

Create Food: Creates food, enough for up to 12 people and their horses for one day. For each level the caster has above 8, food for 12 more people and horses is produced. R: 10 feet. D: instant but effects permanent.

Dispel Evil (Reversible): Dispel any enchanted, summoned, or undead creature in range that fails save. If save made, creatures must flee for duration so long as caster concentrates. If used against one creature, save at -2. R: 30 feet. D: instant (flee effects up to 10 minutes).

Insect Plague: Insect swarms (60 feet in diameter) obscure vision and attack creatures. Creatures under 3 HD flee in terror. Can only be cast outdoors. R: 480 feet. D: 1 day.

Quest (Reversible): Force a creature to obey one long-term order or suffer curse that can only be removed by completing quest or by the reverse of this spell. R: 30 feet. D: until order completed.

Raise Dead (Reversible): Restores life to subject who died as long as 4 days (plus 4 days per caster level over 8) ago. R: line of sight. D: instant but effects permanent.

Monsters

OWL BEAR: AC: 14 HD: 5d8 AT: 2 claws+5 (1d8), bite+5 (1d8) MR: 9 ST: F3 TC: 20 S: hug for additional 2d6 if both claws hit.

PEGASUS: AC: 13 HD: 2d8+2 AT: 2 hooves +2 (1d6) MR: 8 ST: F2 TC: 0 S: flies.

PHASE TIGER: AC: 15 HD: 6d8 AT: 2 tentacles+6 (2d4) MR: 8 ST: F6 TC: 19 S: attackers at -2 as it phases in and out.

PIXIE: AC: 16 HD: 1d8 AT: weapon +1 (1d4) MR: 7 ST: E1 TC: 3 +4 S: flies, charm, naturally invisible, always surprises.

PTERODACTYL: AC: 12 HD: 1d8 AT: bite+1 (1d3) MR: 7 ST: F1 TC: 0

PTERANODON: AC: 13 HD 5d8 AT: bite+5 (1d12) MR: 8 ST: F3 TC: 0

PURPLE WORM: AC: 13 HD: 15d8 AT: bite+15 (2d8) or sting+15 (1d8) MR: 10 ST: F8 TC: 19 S: poison sting, swallows whole on roll 4 higher than needed to hit, swallowed creatures take 3d6 automatic damage every round.

RAT, ORDINARY: AC: 10 HD: 1 hp AT: bite+0 (1d6, 5% disease) MR: 5 ST: human TC: 11 S: fear fire, 1 attack per 10 rats, if

diseased: save vs poison or fall ill after 1d6 days, bedridden 30 days, 25% chance fatal

RAT, GIANT: AC: 12 HD: 1d4 AT: bite +1 (1d3, 5% chance disease) MR: 8 ST: F1 TC: 20 S: : fear fire, if diseased: save vs poison or fall ill after 1d6 days, bedridden 30 days, 25% chance fatal

RHAGODESSA, GIANT: AC: 14 HD: 4d8+2 AT: leg+4 (special) or bite+4 (2d8) MR: 9 ST: F2 TC: 6 S: leg hit pulls target to mandibles for auto hit by bite next round

RHINOCEROS, ORDINARY: AC: 14 HD: 6d8 AT: butt+6 (2d4) or trample+6 (2d8) MR: 6 ST: F3 TC: 0 S: can charge for 2x damage, herd stampedes if random direction if threatened

RHINOCEROS, WOOLY: AC: 15 HD: 8d8 AT: butt+8 (2d6) or trample+8 (2d12) MR: 6 ST: F4 TC: 0 S: can charge for 2x damage, herd stampedes if random direction if threatened

ROC, SMALL: AC: 15 HD: 6d8 AT: 2 claws+6 (1d4+1), bite+6 (2d6) MR: 8 ST: F3 TC: 14 S: flies, -2 reaction to chaos, -1 reaction to neutral.

ROC, LARGE: AC: 17 HD: 12d8 AT: 2 claws+12 (1d8), bite+12 (2d10) MR: 9 ST: F6 TC: 14 S: flies, -2 reaction to chaos, -1 reaction to neutral.

ROC, GIANT: AC: 19 HD: 36d8 AT: 2 claws+15 (3d6), bite+15 (8d6) MR: 10 ST: F9 TC: 14 S: flies, -2 reaction to chaos, -1 reaction to neutral.

ROT GRUB: AC: 10 HD: 1 hp AT: special MR: 12 S: human TC: 0 S: Upon contact rot grubs burrow into the body. Fire applied to contact location at once kills them (but does 1d6 fire damage) the rot grubs from burrowing further. Otherwise rot grubs reaches heart in 1d3 x 10 minutes causes death. Cure Disease destroys all rot grubs in body.

RUST MONSTER: AC: 17 HD: 5d8 AT: touch +5 (special) MR: 7 ST: F3 TC: 0 S: touch of (or touching) the rust monster causes metal items to turn to rust. Magic items first lose bonuses (+1 per touch, each =1 gives a 10% chance of ignoring touch)

SALAMANDER, FLAME: AC: 17 HD: 8d8 AT: 2 claws+8 (1d4), bite +8 (1d8) MR: 8 ST: F8 TC: 17 S: heat does 1d8 to creatures within 20 feet, immune to sleep, charm, fire and non-magical weapons.

SALAMANDER, FROST: : AC: 16 HD: 2d8 AT: 4 claws+12 (1d6), bite +12 (2d6) MR: 9 ST: F12 TC: 18 S: cold does 1d8 to creatures within 20 feet, immune to sleep, charm, cold and non-magical weapons.

SCORPION, GIANT: AC: 17 HD: 4d8 AT: 2 claws+4 (1d10), sting +4 (1d4, poison) MR: 11 ST: F2 TC: 8 S: poison causes paralysis and loss of 1d4 hp per minute.

SEA SERPENT: AC: 14 HD: 6d6 AT: bite+6 (2d6) or constrict+6 (special) MR: 8 ST: F3 TC: 0 S: wraps around ships for 1d10 constriction damage to ship structure.

SHADOW: AC: 12 HD: 2d8+2 AT: touch+2 (1d4, special) MR: 12 ST: F2 TC: 17 S: drains 1 STR per hit (regained after 80-minutes), hit only by magical weapons, surprise on a 1-5, creatures reduced to 0 STR will rise 24 hours later as a shadow. Not undead but immune to charm and sleep.

SHARK, BULL: AC: 15 HD: 2d8 AT: bite+2 (2d4) MR: 7 ST: F1 TC: 0

SHARK, MAKO: : AC: 15 HD: 4d8 AT: bite+4 (2d6) MR: 7 ST: F2 TC: 0

SHARK, GREAT WHITE: AC: 15 HD: 8d8 AT: bite+8 (2d10) MR: 7 ST: F4 TC: 0

SHREW, GIANT: AC: 15 HD: 1d8 AT: 2 bite+1 (1d6) MR: 10 ST: F1 TC: 0 S: Win initiative on first round, fear: 3 HD or less must save or flee.

SHRIEKER: AC: 12 HD: 3d8 AT: none MR: 12 ST: F1 TC: 0 S: large toadstool, if disturbed (light 60 feet/movement 30 feet) emits loud shriek for 1d3 minutes.

SKELETON: AC: 12 HD: 1d8 AT: weapon +1 MR: 12 ST: F1 TC: 0 S: undead immunities.

SNAKE, SPITTING COBRA: AC: 12 HD: 1d8 AT: bite+1 (1d3, poison) or spit+1 (blinded) MR: 7 ST: F1 TC: 0 S: spit causes blindness (save vs. poison); bite: save vs. poison or die in 1d10 * 10 minutes.

SNAKE, PIT VIPER: AC: 13 HD: 2d8 AT: bite+2 (1d4, poison) MR: 7 ST: F1 TC: 0 S: always win initiative, bite: save vs. poison or die.

SNAKE, SEA: AC: 13 HD: 2d8 AT: bite+2 (1d4, poison) MR: 7 ST: F1 TC: 0 S: bite: save vs. poison or die in 1d4 x 10 + 20 minutes (neutralize poison only 75% successful). If unaware of snake, 50% chance does not notice bite.

SNAKE, GIANT PYTHON: AC: 13 HD: 5d8 AT: bite+5 (1d4), constrict+5 (2d4) MR: 8 ST: F3 TC: 0 S: successful bite allows constrict attack, once successful, constriction damage suffered every round.

SNAKE, GIANT RATTLESNAKE: AC: 14 HD: 4d8 AT: 2 bite+4 (1d4, poison) MR: 8 ST: F2 TC: 0 S: bite: save vs. poison or die in 1d6 x 10 minutes; bites twice per round, second at end of round.

SPECTRE: AC: 17 HD: 6d8 AT: touch+6 (1d6) MR: 11 ST: F6 TC: 18 S: undead immunities, immune to non-magic weapons, drains 2 levels per hit, creatures reduced to 0 levels will rise 24 hours later as a spectre.

SPIDER, GIANT BLACK WIDOW: AC: 13 HD: 3d8 AT: bite+3 (2d6, poison) MR: 8 ST: F2 TC: 6 S: web, bite: save vs. poison or die in 10 minutes.

SPIDER, GIANT CRAB: AC: 12 HD: 2d8 AT: bite+2 (1d8, poison) MR: 7 ST: F1 TC: 6 S: surprise on 1d4, bite: save vs. poison at +2 or die in 1d4 x 10 minutes.

SPIDER, GIANT TARANTULA: AC: 14 HD: 4d8 AT: bite+4 (1d8, poison) MR: 8 ST: F2 TC: 6 S: bite: save vs. poison or spasm dance for 2d6 x 10 minutes (-4 to all actions. Others hit at +4), after 50 minutes paralyzed. Any seeing dance must save vs poison or suffer same effect. Effects counter by dispel magic.

SPRITE: AC: 14 HD: 1d4 AT: none MR: 7 ST: E1 TC: 4 S: 5 sprites can curse (effects funny rather than dangerous)

SQUID, GIANT: AC: 12 HD: 6d8 AT: 8 small tentacles+6 (1d4), bite+6 (1d10), 2 large tentacles+6 (special) MR: 7 ST: F3 TC: 7 S: large tentacles constrict ships of 1d10 structural damage (beak can do 2 structural); small tentacles constrict victims (damage taken each round). Small tentacles take 6 hp (large 10 hp) to chop off. Can shoot cloud of black ink to cover escape.

STEGOSAURUS: AC: 16 HD: 11d8 AT: tail+11 (2d8) or trample+11 (2d6) MR: 7 ST: F6 TC: 0

STATUE, ANIMATED CRYSTAL: AC: 15 HD: 3d8 AT: 2 fists+3 (1d6) MR: 11 ST: F3 TC: 0

STATUE, ANIMATED STONE: AC: 15 HD: 5d8 AT: 2 fists+5 (2d6) MR: 11 ST: F5 TC: 0 S: fists do lava damage

STATUE, ANIMATED IRON: AC: 15 HD: 4d8 AT: 2 fists+4 (1d8) MR: 11 ST: F4 TC: 0 S: when hit by non-magical metal weapon, attacker must save vs. spells or weapon lodged in statue, statue must be killed to retrieve.

STIRGE: AC: 12 HD: 1d8 AT: bite+1 (1d3) ST: 18 MR: 9 ST: F2 TC: 11 S: first attack at +2, attaches on a hit and will deal 1d3 automatically damage every round.

THROGHRIN: AC: 13 HD: 3d8 AT: 2 claws+3 (1d3) or weapon+3 MR: 10 ST: F3 TC: 20 S: troll/hobgoblin/ghoul hybrid, touch paralyses as ghoul, regenerate 1 hp each round as troll.

TITANOTHERE: AC: 14 HD: 12d8 AT: butt+12 (2d6) or trample+12 (2d8) MR: 7 ST: F6 TC: 0 S: charge for double butt damage.

TOAD, GIANT: AC: 12 HD: 2d8+2 AT: bite+2 (1d4+1) MR: 6 ST: F1 TC: 0 S: surprise foes on a 1-3, swallows small creatures whole on a natural 20, swallowed creatures take 1d6 automatic damage every round, long tongue pulls victims in to bite.

TREANT: AC: 17 HD: 8d8 AT: 2 branches+8 (2d6) MR: 6 ST: F8 TC: 20 S: Surprise on 1-3; Control 2 trees and can make them move and attack as a treant.

TRICERATOPS: AC: 17 HD: 11d8 AT: gore+11 (3d6) or trample+11 (3d6) MR: 8 ST: F6 TC: 0

TROGLODYTE: AC: 14 HD: 2d8 AT: 2 claws+2 (1d4), bite+2 (1d4) MR: 9 ST: F2 TC: 22 S: surprise on 1-4; horrid stench: save vs. poison or suffer -2 to attack rolls

TROLL: AC: 15 HD: 6d8+3 AT: 2 claws+6 (1d6), bite+6 (1d10) MR: 10 ST: F6 TC: 19 S: regenerate 3 hp per round (except acid or fire damage).

TYRANNOSAURUS REX: AC: 16 HD: 20d8 AT: bite+15 (6d6) MR:

11 ST: F10 TC: 8 (x3) S: generally ignores creatures smaller than halfling.

UNICORN: AC: 17 HD: 4d8 AT: 2 hoofs+4 (1d8) or horn+4 (1d8) MR: 7 ST: F8 TC: 0 S: double horn damage for charge, 25% magic resistance, teleport once per day, horn can cure damage or disease.

VAMPIRE: AC: 17 HD: 7 to 9 d8 AT: touch+HD (1d10, special) or weapon+HD. MR: 11 ST: F7 to F9 TC: 17 S: undead immunities, hit only by magical weapons, electricity and cold do half damage, regenerate 3 hp per round, drains 2 levels per hit, immense strength, gaseous form at will, shape change into bat, charm gaze, avoids garlic and mirrors, summons bats or wolves, immobilized and apparently dead if a stake is driven through its heart (must then have head cut off to die), drowns under water in one round, creatures reduced to 0 levels will rise 24 hours later as a vampire under the control of their creator.

WEASEL, GIANT: AC: 12 HD: 4d8+4 AT: bite+4 (2d4) MR: 8 ST: F3 TC: 7 S: successful bite allows damage to continue each round.

WAR DOG: AC: 12 HD: 2d8 AT: bite+2 (1d6) MR: 9 ST: F2 TC: 0

WHALE, KILLER: AC: 13 HD: 6d8 AT: bite+6 (1d20) MR: 10 ST: F3 TC: 7 S: on attack roll of 20: swallow target (up to halfling size), swallowed creature suffers 1d6/minute, drowns after 10 minutes.

WHALE, NARWHAL: AC: 12 HD: 12d8 AT: bite+12 (2d6) or horn+12 (1d8) MR: 8 ST: F12 TC: 0 S: highly intelligent, ivory horn worth 1d6 x 1000gp.

WHALE, SPERM: AC: 13 HD: 36d8 AT: bite+15 (3d20) MR: 7 ST: F14 TC: 8 S: : on attack roll 4 higher than needed: swallow target (up to human size), swallowed creature suffers 3d6/minute, can slam into ships for 6d6 structural damage.

WIGHT: AC: 14 HD: 3d8 AT: touch+3 (special) MR: 12 ST: F3 TC: 21 S: undead immunities, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise 1d4 days later as a wight.

WOLF, ORDINARY: AC: 12 HD: 2d8+2 AT: bite+2 (1d6) MR: 8 ST: F1 TC: 0 S: when 50% of pack lost, MR drops to 6.

WOLF, DIRE: AC: 13 HD: 4d8+1 AT: bite+4 (2d4) MR: 8 ST: F2 TC: 0 S: used by goblins as mounts.

WRAITH: AC: 16 HD: 4d8 AT: touch+4 (1d6, special) MR: 12 ST: F4 TC: 18 S: undead immunities, only hit by magic or silver weapons, silver does half damage, drains a level per hit, creatures reduced to 0 levels will rise 24 hours later as a wraith.

WYVERN: AC: 16 HD: 8d8 AT: bite +8 (2d8) or sting +8 (1d6) MR: 9 S: poison sting (1d6 STR), flies.

YELLOW MOLD: AC: n/a HD: 2d8 AT: 1d6 if touched MR: n/a ST: F2 TC: 0 S: if struck, 50% releases spore cloud (choke to dead in 6 rounds unless cure disease), immune to all attacks except fire (a torch does 1d4 damage).

ZOMBIE: AC: 11 HD: 2d8 AT: weapon+2 or claws+2 (1d8) MR: 12 ST: F1 TC: 0 S: undead immunities; always attack last.

Microlite81 Treasure

Here is a list of sample treasure items appropriate to a Microlite81 campaign. Maps to possible hoards of such treasures are also a common treasure item. Of course, any magic item you like from the SRD can be used, but higher powered items may be too powerful for most Microlite81 games.

Money: 1 platinum piece (pp) = 5 gold pieces; 1 gold piece (gp) = 10 silver pieces; 1 electrum piece (ep) = 5 silver pieces; 1 silver piece (sp) = 10 copper pieces (cp).

Gems: Most range in value from 10gp to 1000gp, with 50% of gems being worth about 100gp. 1% are worth 1d20 times as much. 0.1% are worth 5d20 times as much.

Jewelry: Most pieces of jewelry are worth 3d6 x 100gp. 1% are worth 1d20 times as much. 0.1% are worth 5d20 times as much.

Artwork (statues, tapestries, paintings, drawings, etc.): Most art items are worth 10d10 x 10gp. 1% are worth 1d20 times as much. 0.1% are worth 5d20 times as much.

Magic Item Descriptions:

Potions:

There is a 70% chance that a potion bottle holds 1 dose, otherwise 1d6 doses. A quick taste of a potion can be used to identify it without consuming a dose. There is a 5% that a potion has decayed with age and has become a potion of delusion (60% chance) or poison (40% chance). Useless otherwise noted, the effects of a dose will last 1d6+6 10 minute turns.

Animal Control: The drinker may control one or more animals with a total hit dice of 3d6 or less. When the effect of the potion wears off, the animals will flee.

Antidote: The drinker becomes immune to all poisons of up to a specific strength for the duration of the potion. Poison from non-creature sources (e.g. a Potion of Poison) should be considered to be as if from a 7HD creature. The strength of the potion should be determined by rolling 1d10: 1-4 = Poison from 3HD creatures, 5-7 = Poison from 7HD creatures, 8-9 = Poison from 15HD creatures, 10 = All poison.

Clairaudience: While concentrating, the drinker may listen as if at any point within 60' of their current location.

Clairvoyance: While concentrating, the drinker may see as if at any point within 60' of their current location.

Climbing: The drinker may walk on walls and ceilings as if a spider.

Delusion: This potion will have no effect when drunk. However, if tasted, it will falsely give the taster the impression that it is another type of potion from this list. Multiple tasters will all get the same impression. An Analyze spell will correctly identify this potion as one of Delusion rather than as the type it tastes like.

Diminution: The drinker shrinks down to 6" in height. While in this state they cannot hurt creatures larger than 1' tall with physical attacks, and have a 90% chance of being able to hide. If this potion is drunk while a Potion of Growth is in effect, they will simply cancel each other rather than making the drinker sick.

Dragon Control: The drinker of this potion can control up to three dragons of sub-adult or younger. The dragons do not get saving throws, but older dragons are not affected. Each potion of dragon control will only control one type of dragon. The controlled dragons will do anything that is commanded (other than suicidal commands) although they are not capable of casting spells. When the control ends, the dragons will become hostile to the drinker and will either flee or attack depending on their impression of the drinker's power. Roll 1d10 to see which type of dragon is affected: 1-2 = Black, 3-4 = Blue, 5-6 = Green, 7-8 = Red, 9-10 = White.

ESP: This potion has the same effect as the spell of the same name.

Extra-Healing: This potion will either cure 3d6+3 hit points of damage to the drinker (or cure their paralysis). Can be used as 3 doses of Healing potion. This potion has an instant effect, rather than a duration.

Fire Resistance: The drinker becomes immune to normal fire, gains a +2 bonus on all saving throws against fire or heat based attacks, and takes -1 point of damage per die (to a minimum of 1 point per die) from magical fire attacks.

Flying: This potion has the same effect as the Fly spell.

Gaseous Form: The drinker's body transforms to a cloud of gas for up to 1 hour, causing all their equipment and carried items to fall to the floor. The drinker keeps control of their body, and can move through any non-airtight barrier. While in gaseous form, the drinker cannot attack, but has an armor class of -2 and can only be hit by magical weapons.

Giant Control: The user may control up to four giants of a certain type, but each one gets a saving throw. The giants will normally be hostile once control ends. To determine the type of giant affected, roll 1d6: 1 = Cloud, 2 = Fire, 3 = Frost, 4 = Hill, 5 = Stone, 6 = Storm.

Giant Strength: The drinker gains the strength of a giant, and can do double damage with melee weapons or throw large rocks (range: 60/130/200) for 3d6 damage. This potion does not stack with other strength enhancing items such as Gauntlets of Ogre Power.

Growth: The drinker grows to twice normal size, and be able to do double damage with melee attacks. If this potion is drunk while a Potion of Diminution is in effect, they will simply cancel each other rather than making the drinker sick.

Healing: This potion will either cure 1d6+1 hit points of damage to the drinker or cure their paralysis. This potion has an instant effect, rather than a duration.

Heroism: Dwarves, Halflings, and Fighters who drink this potion will temporarily gain one or more levels as follows:

Common Man (no class): +4 Fighter levels.

Dwarves, Halflings, and Fighters: Level 1-3: +3 levels; Level 4-7: +2 levels; Level 8-10: +1 level; Level 11+: no effect

All damage (including energy drains) is taken from the extra levels and hit points first.

Human Control: The drinker may control up to 6 levels of humans, similar to a Charm Person spell. The targets can only be controlled while within 60' of the drinker, and the effect lasts only for the duration of the potion.

Invisibility: This potion has the same effect as the spell of the same name.

Invulnerability: The drinker gains a +2 bonus to armor class and all saving throws for the duration of the potion. If a second Potion of Invulnerability is drunk within a week, the only effect is sickness.

Levitation: This potion has the same effect as the spell of the same name.

Longevity: The drinker immediately becomes 10 years younger. The effect is an instant one rather than an ongoing one, and therefore cannot be dispelled. This potion will not reduce the age of the drinker below 15 years old.

Mana: This potion gives the drinker temporary hit points that can only be used to cast spells. These temporary hit points disappear in 10+1d10 minutes if not used. The strength of this potion is determined by rolling 1d6: 1-3: adds 1d6 temporary hit points, 4-5: adds 2d6 temporary hit points, 6: adds 3d6 temporary hit points.

Oil of Etherealness: This thin oil is applied to the character and all of his belongings in order to achieve an ethereal state for 4+1d4 x 10 minutes. It takes 3 minutes for the potion to produce effect, and can be negated earlier than the duration by applying a mildly acidic liquid. When ethereal, a character is invisible and can pass through any objects that are not also ethereal.

Oil of Slipperiness: Any creature coated in this thin oil cannot be restrained or grabbed, and neither wrapped in the grip of constrictor snakes or any other grasping attacks, including binding ropes, chains, or cuffs, magical or otherwise. Simply put, nothing can get a grip on a character coated in this oil. Objects can be coated with the oil, and if a floor is coated any individual even standing on the floor will have a 95% probability each round of falling, due to slipping. The effects of the oil last 8 hours, but the oil can be cleaned off early with liquid containing alcohol.

Philter of Love: Drinker becomes charmed by the next person or creature he or she lays eyes upon. However, the drinker will actually become charmed and besotted by the person or creature if it is of the preferred sex and of similar racial stock. The charm aspect of this potion lasts for 4+1d4 x 10 minutes, but only dispel magic will make the drinker cease to be enthralled by a member of a preferred sex.

Plant Control: The drinker may control all mundane plants and all plantlike creatures in a 30'x30' area up to 60' away. Mundane plants may entangle creatures in their area, but cannot otherwise attack.

Poison: This potion looks like any other, but it is poisonous. Anyone taking even a taste of the potion must save vs STR or die. Philter of Love:

Polymorph: This potion has the same effect as the polymorph self spell.

Speed: The drinker may move at double normal speed and attack twice per round.

Super-Heroism: Dwarves, Halflings, and Fighters who drink this potion will temporarily gain one or more levels for 5d6 minutes as follows:

Common Man (no class): +6 Fighter levels.
Dwarves, Halflings, and Fighters: Level 1-3: +5 levels; Level 4-7: +4 levels; Level 8-10: +3 level; Level 11+: +2 levels

All damage (including energy drains) is taken from the extra levels and hit points first.

Sweet Water: Used to cleanse water (including turning saltwater into fresh water) or otherwise transform poisons, acid, etc. into drinkable liquid. Sweet water will destroy other potions. For most liquids, this potion will affect up to 100,000 cubic feet. However, only 1,000 cubic feet of acid can be neutralized. The effects of sweet water are permanent, and once treated, liquid will resist spoilage or contamination for 5d4 rounds.

Treasure Finding: When the drinker concentrates, they can detect the distance and direction to the largest amount of treasure within 360'. The drinker gains no insight about the nature of the treasure or how to get to it.

Undead Control: The drinker can control up to 3d6 HD in total of undead creatures as the charm person spell. Effects last 5d4

minutes and intelligent undead will be hostile when the duration ends.

Water Breathing: This potion lasts for 1 hour plus 1d10 minutes, and has the same effect as the spell of the same name.

Scrolls

Most scrolls contain spells and can only be used by spell casters although a few spell scrolls can be used by any intelligent being. Special scrolls (warding, curse, etc.) can generally be used by anyone able to read them.

Spell Scroll (Clerical): These scrolls can be read by anyone but only used by clerics. They contain 1d3 spells. Roll 1d20 to determine the level of each spell: 1-8: level 1; 9-14: level 2; 15-17: level 3; 18-19: level 4; 20: level 5 (or GM choice). Each spell may be cast once then it fades from the scroll.

Spell Scroll (Magic-User/Elf): These scrolls can only be read with the read magic spell and can only be cast by magic-users or elves. They contain 1d3 spells. Roll 1d20 to determine the level of each spell: 1-6: level 1; 7-11: level 2; 12-14: level 3; 15-17: level 4; 18-19: level 5; 20: level 6 (or GM choice). Each spell may be cast once then it fades from the scroll.

Ward against Elementals: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Elementals cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 30 minutes, or until someone inside the zone attacks an elemental in hand-to-hand combat.

Ward against Lycanthropes: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Lycanthropes cannot enter the zone, but can use missile and spell attacks against those inside the zone. The zone lasts for 60 minutes, or until someone inside the zone attacks a lycanthrope in hand-to-hand combat.

Ward Against Magic: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Mortal level magic (whether from spells or items) cannot enter or leave the zone. The zone lasts for 60 minutes, and can only be broken extremely powerful magic, like a wish.

Ward Against Undead: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Undead cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 60 minutes, or until someone inside the zone attacks an undead in hand-to-hand combat.

Treasure Map: GM will construct the map and the treasure it leads to. The map is likely to lead to a treasure within the dungeon/area the characters find the map, or the map may lead to another, sometimes remote, location. Difficulty in attaining the treasure should reflect its value. There may be traps, riddles, or other challenges. The map itself may be enchanted so that it requires read magic to decipher or may be written in a different (or even dead) language.

Curse: Anyone who reads this scroll and who fails a save is cursed (GM's choice of effects or use table below) until a Remove Curse is successfully cast.

d6 Roll Effect of Curse

- | | |
|---|---|
| 1 | Victim loses random magic item. |
| 2 | Random Stat suffers a -4 penalty. |
| 3 | Victim does not gain experience. |
| 4 | Victim's level reduced by 1. |
| 5 | Victim turns in a small animal (as Polymorph Other) |
| 6 | Victim is rendered blind. |

Wands and Staves

Most wands and all staves are magical devices that contain spell-like enchantments.

Wands are normally thin sticks around 18 inches long. They can only be used by magic-users and elves. A wand will hold 2d10 charges, and each time it is used one charge will be used up. Once all the charges are used up, a wand is simply a non-magical stick. Treat the effects produced a wand as if created by a 4th level caster.

Staves are the bigger cousins of wands. They are normally 5-6 feet long, and made of wood. Staves may be used by either magic-users/elves or clerics. A staff will have 3 d10 charges when found, and each use of the staff may use one of more of these charges. Once all the charges are used up, a staff is simply a non-magical stick, even powers that do not use a charge fail. Treat the effects produced a staff as if created by a 5th level caster. A staff can be used in melee as if a quarterstaff. When a staff is described, the name of the item will be followed by either "C" if it is usable by a cleric, or "MU/E" if it is usable by elves and magic-users.

Rods are as thick as staff but only about 3 feet long. A rod will have 2d6 charges when found. Rods can be used by any class, unless otherwise noted.

Wand of Cold: Each time a charge is expended, this wand creates a cone of cold, 60 feet long and 30 feet wide at the end. All creatures within the cone must take 3d6 damage.

Wand of Detecting Enemies: Each time a charge is expended, all creatures with hostile intent towards the user within 60' will glow as if on fire. This includes Invisible or hidden enemies. The glow lasts for 10 minutes before fading.

Wand of Detecting Magic : Each time a charge is expended, all magical items and active spells within a 20 foot radius will glow blue for 6 rounds (1 minute).

Wand of Detecting Metals: Each time a charge is expended, the wand will point in the direction of any concentration of metal that weighs 100 pounds or more if it is within 20 feet. The wielder is aware of the kind of metal detected.

Wand of Detecting Secret Doors: When this wand is activated, it will point the user towards all secret doors within 20 feet. This expends one charge per use.

Wand of Detecting Traps: When this wand is activated, it will point the user towards all traps within 20 feet. This expends one charge per use.

Wand of Device Negation: Each time a charge is expended, this wand will cancel the effects of another wand or staff. If the effect that is being negated is an effect with a duration, it will be negated for a single round.

Wand of Fear: Each time a charge is expended, this wand creates a cone of fear, 60' long and 30' wide at the end. All creatures within the cone must make a saving throw or flee in terror for 5 minutes.

Wand of Fireballs: Each time a charge is expended, this wand creates a Fireball up to 240' away. Anyone in the area of effect takes 6d6 damage. Save for half damage.

Wand of Illusion: Each time a charge is expended, this wand creates a Phantasmal Force as the spell of the same name. The caster must concentrate to maintain the illusion.

Wand of Lightning Bolts: Each time a charge is expended, this wand creates a Lightning Bolt up to 240' away and then extending

60' from that point. Anyone in the path of the lightning takes 6d6 damage. Save for half damage.

Wand of Magic Missiles: This wand fires one or two magic missiles (user's choice) per round as the magic-user/elf spell of the same name. The missiles inflict 1d6+1 hit points of damage each, and always strike. Each individual missile fired expends one charge.

Wand of Paralyzation: Each time a charge is expended, this wand creates a cone 60' long and 30' wide at the end. All creatures within the cone must make a saving throw or be paralyzed for 1 hour.

Wand of Polymorphing: Each time a charge is expended, this wand produces the effect of either a Polymorph Self on the user of the wand or a Polymorph Other on a target that the wand is pointed at. Unwilling targets may make a saving throw to avoid the effect.

Rod of Cancellation: This rod may be used by any character, but may only be used once. When activated, it will permanently drain any magical item (except an artifact) that is touched by it of all power. The GM may require an attack roll to touch a magic item carried or worn by another creature, normally against armor class 10.

Rod of Energy: This rod may be used by any spell-caster. It holds a reservoir of hit points which the wielder can use to cast spells instead of (or in addition to) his own. This reservoir will hold 10d10 hit points. When the reservoir drops below 50% capacity, the rod will automatically use a charge and refill the next day (at dawn).

Rod of Resurrection: A cleric of any level may use this rod one time per day to raise beings from the dead as the resurrection spell. A cleric using this rod does not need to rest after expending charges from the rod. Different kinds of characters may be resurrected, and each type requires a different number of charges (Cleric, 2 charges; Dwarf, 4 charges; Elf, 7 charges; Halfling, 3 charges; 0-level Human 1 charge; Magic-User, 4 charges; Thief, 4 charges). When all charges from the rod are used, it crumbles into dust.

Staff of Commanding [C]: This staff may be used by a cleric to command plants, animals, and humans in the same manner as the rings command human, animal command, and command plant. Each use requires one charge.

Staff of Healing [C]: A cleric may activate the staff to cure 1d6+1 hit points of damage to a target, but it can only be used one time per creature per day. This staff may heal an unlimited number of creatures in a day.

Staff of Power [MU/E]: This powerful staff has several abilities. First, it can be used to cast the spells cone of cold, lightning bolt, and fireball (each dealing 8d6 hp of damage). In addition, the staff may be used to cast continual light and telekinesis (with a weight limit of 250 pounds). Finally, this staff can also be used with the same effect as a staff of striking.

Staff of Striking [C]: Whenever a creature is struck by the staff, the wielder may expend one charge to inflict an additional 2d6 damage to the creature in addition to the normal damage that the staff does.

Staff of Withering [C]: This staff functions as a +1 staff that deals 2d4+1 hit points of damage when a charge is used. By using 2 charges and successfully striking an opponent, the staff ages a victim by 10 years. If three charges are spent in this attack, one of the victim's limbs will shrivel into a mummified, useless member (saving throw versus spell-like devices is allowed). The aging effect will automatically kill most creatures that have a short lifespan. Also note that effects of spent charges are cumulative,

such that if 3 charges are used, the victim will not only receive damage, but he will be aged and have a withered limb.

Staff of Wizardry [MU/E]: This staff functions as a +1 staff. In addition, the staff may be used to cast the spells conjure elementals, invisibility, passwall, and web. The staff has the similar spell-like effect of a djinni to create a whirlwind and can be used as a wand of paralyzation. Each of these abilities requires one charge. The staff may be broken for a final blow. The results of a final blow depend on the number of charges in the staff. For each charge, 8 hit points of damage are dealt in a grand fireball to all monsters and characters (even the owner of the staff) within 30'. The staff is then broken and useless.

Staff of the Serpent [C]: This staff does not employ charges. It strikes as a +1 staff. The user can command the staff to grow to become a giant constrictor snake and constrict around a victim. The command for the staff to become a snake is uttered as it strikes a victim. The victim must succeed in a saving throw versus spell-like devices or be held immobile by the constricting snake for 1d4 turns, or until the owner commands the snake to release him. The serpent returns to the owner and returns to staff form after it has constricted around an opponent. If the snake form is slain, it will not return to staff form and the staff is destroyed. When the snake returns to staff form, all damage it has sustained in combat is automatically healed.

Rings

Magical rings like those listed below are generally beyond the ability of current civilizations to create. They are the creations of ancient and/or lost civilizations.

A magical ring must be worn on a finger or thumb to operate, and a character can only wear one magical ring per hand. If a second ring is put on the same hand as an existing ring, neither ring will function (with the exception of a Ring of Weakness). Rings are usually either constant in effect or are activated by twisting the ring.

Animal Command: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Animal Control with the exception that the wearer only gets a single attempt to control creatures per use.

Command Human: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Human Control with the exception that the wearer only gets a single attempt to control people per use.

Command Plant: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Plant Control with the exception that the wearer only gets a single attempt to control creatures per use.

Delusion: This ring will appear to function as a different type of ring if an Analyze spell is used on it. Once the ring is worn, it will be completely nonfunctional, but cannot be removed without a Remove Curse being cast on it.

Djinn Summoning: Once per day, the wearer of this ring can summon a djinn, who will serve them for 24 hours. If the djinn is killed, the ring loses its magical power.

Fire Resistance: This ring makes its wearer immune to natural fire, gives a +2 bonus to all saving throws against magical fire, and reduces all magical fire damage done to the wearer by one point per die (to a minimum of one point per die).

Invisibility: This ring may only be used once per turn. When activated it affects the wearer as if they had cast an Invisibility spell on themselves.

Protection: This ring gives a bonus to its wearer's armor class and to all saving throws equal to its magical bonus. If a character wears a Ring of Protection on both hands, only the larger of the two bonuses applies. Roll a d100 to determine the ring's protection bonus: 01-80: +1; 81-91: +2 92: +2, 5 foot radius; 93-99: +3; 00: +3, 5 foot radius.

If a radius is given, the power of the ring, as it applies to saving throws only, extends to all creatures within the radius.

Regeneration: The wearer of this ring will recover 1 hit point per minute, and can slowly re-grow lost body parts. A limb will re-grow over the course of a week, whereas a finger or ear would re-grow over the course of a single day. This ring will not stop working when the wearer is on 0 hit points, but not prevent the wearer from dying. It will also not heal damage from fire or acid (although will re-grow limbs lost to fire or acid).

Spell Storing: This ring will contain 1d6 different spells (determined randomly as if spells on a Spell Scroll) when found. The wearer of the ring can cast these spells once each, even if not a spell caster. The spells will always be cast as if by a caster of the minimum level needed to cast them, even if the wearer of the ring is a caster of higher level. Each spell slot can be recharged by having a spell caster cast a spell directly into the ring. The ring cannot "catch" spells generally cast at the wearer; the spells must be cast directly at the ring with the purpose of charging it.

Spell Turning: Each day, this ring will reflect the first 2d6 spells (roll each day) cast at the wearer back at their caster. This only effects actual spells, not the spell-like powers of monsters or magic items. Once it has absorbed as many spells as it can, the ring has no other powers until the following day.

Telekinesis: This ring can be activated to produce an effect identical to the Telekinesis spell but with no duration limit.

Water Walking: This ring allows its wearer to walk on the surface of any liquid without sinking.

Weakness: 1d6 rounds after this ring is worn, it will immediately lower its wearer's strength score to 3. The ring can not be removed until it has had a Remove Curse spell cast on it.

Wishes: This ring will grant from one to four wishes (as the Wish spell) before crumbling into dust. To determine the number of wishes contained in the ring, roll 1d10: 1-4 = 1, 5-7 = 2, 8-9 = 3, 10 = 4.

X-Ray Vision: The wearer of this ring can see up to 30' through stone or up to 60' through wood. It cannot be used to see through metal. To use the ring, the wearer must stand still and concentrate and can view a 10'x10' area per use. It takes 10 minutes to scan such an area, and the ring can only be used once per hour.

Ancient and Wondrous Items

Rings of power were not the only magic items produced in ancient times by civilizations all-but-forgotten today. Many wonderful magic items existed then. Most of these items are very rare today even if they were fairly common ages ago. Some of these items may be one of a kind or have never existed outside of legends. Like magic rings, the methods used to create these items are generally lost to the mists of time.

Amulet of Scrying Protection: This item protects its wearer from being scried on via a Crystal Ball, and makes them immune to all types of ESP.

Bag of Devouring: This bag looks like a normal sack, but any non-living item placed entirely within it disappears from view and weighs nothing while in the bag. It will hold items up to 10,000cn in weight, providing the items fit wholly within it (i.e. they are

5'x1'x1' or smaller). Items placed within the bag can be found by touch by anyone reaching into the bag and can be withdrawn. However, any item left in the bag for more than two hours will vanish completely. This will not affect living creatures that are stuffed into the bag.

Bag of Holding: This bag looks like a normal sack, but any non-living item placed entirely within it disappears from view and weighs nothing while in the bag. It will hold items up to 10,000cn in weight, providing the items fit wholly within it (i.e. they are 5'x1'x1' or smaller). Items placed within the bag can be found by touch by anyone reaching into the bag and can be withdrawn.

Boat, Undersea: This boat can be operated as a fully functional skiff. However, when a command word is given, it will dive under the water while simultaneously radiating a Water Breathing effect that protects all passengers who are touching the boat. The pilot of the boat can control its movement underwater as if on the surface.

Boat, Folding: A folding boat looks like a small wooden box—about 12 inches long, 6 inches wide, and 6 inches deep. It can be used to store items like any other box. If a command word is given, however, the box unfolds itself to form a boat 10 feet long, 4 feet wide, and 2 feet in depth. A second command word causes it to unfold to a ship 24 feet long, 8 feet wide, and 6 feet deep. Any objects formerly stored in the box now rest inside the boat or ship. In its smaller form, the boat has one pair of oars, an anchor, a mast, and a lateen sail. In its larger form, the boat has a deck, single rowing seats, five sets of oars, a steering oar, an anchor, a deck cabin, and a mast with a square sail. The boat can hold four people comfortably, while the ship carries fifteen with ease. A third word of command causes the boat or ship to fold itself into a box once again. The necessary command words may be present, either visible or invisible, etched into the box. Alternatively, the command words may need to be sought through an NPC or a small quest.

Boots of Levitation: The wearer of these boots may Levitate as per the spell of the same name. There is no limit to the duration of the levitation.

Boots of Speed: When travelling overland, the wearer of these boots travels at the speed of a riding horse. However, the wearer can only move at this speed for a single day and then must rest for a day.

Boots of Speed: These boots allow the wearer to move 240' per turn for up to 12 hours. The wearer is exhausted after this activity, and is required to rest for 24 hours.

Boots of Travelling and Springing: While these boots are worn, the wearer need not rest if engaged in ordinary movement. Further, he may spring up to 10 feet high, and to a distance of 30 feet.

Bowl of Water Elementals: Once per day, this bowl can be filled with water and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice water elemental. Conjuring the elemental takes 10 minutes.

Bracers of Armor: Wrist or arm guards that grant the wearer an AC as though he were wearing armor. Both bracers must be worn for the magic to be effective, and no other armor may be worn with the bracers (magical or non-magical). Dexterity modifiers do apply. The protection offered by the bracers can be combined with other magical effects that alter AC, such as a ring of protection or cloak of protection. Roll d100 to determine the which kind of bracers are found: 01-06: AC 11; 07-16: AC 12; 17-36: AC 13; 37-51: AC 14; 52-71: AC 15; 72-86: AC 16; 87-00: AC 17.

Brazier of Commanding Fire Elementals: Once per day, this brazier can be lit and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice fire elemental. Conjuring the elemental takes 1 minute.

Brooch of Shielding: A piece of silver or gold jewelry used to fasten a cloak or cape. In addition to this mundane task, it can absorb magic missiles of the sort generated by spell, device, or spell-like ability. A brooch can absorb up to 101 hit points of damage from magic missiles before it melts and becomes useless.

Broom of Flying: This broom will carry its owner through the air at a speed of 80' per round. The owner of the broom must concentrate to move, and the broom will hover if the owner stops concentrating. The broom can also carry a passenger, but in this case its speed is reduced to 60' per round.

Censer of Controlling Air Elementals: Once per day, this censer can be filled with incense and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice air elemental. Conjuring the elemental takes 1 minutes.

Chime of Opening: A chime of opening is a hollow mithral tube about 1 foot long. When struck, it sends forth magical vibrations that cause locks, lids, doors, valves, and portals to open. The device functions against normal bars, shackles, chains, bolts, and so on. A chime of opening also automatically dispels a hold portal spell or even an arcane lock cast by a wizard of lower than 15th level. The chime must be pointed at the item or gate to be loosed or opened (which must be visible and known to the user). The chime is then struck, a clear tone rings forth, and in 1 round the target lock is unlocked, the shackle is loosed, the secret door is opened, or the lid of the chest is lifted. Each sounding only opens one form of locking, so if a chest is chained, padlocked, locked, and arcane locked, it takes four uses of a chime of opening to get it open. A silence spell negates the power of the device. Each use requires a charge, and a chime contains 2d4x10 charges before it cracks and becomes useless.

Cloak of Protection: This magical cloak appears to be an ordinary brown cloth or leather cloak. The cloak functions much like a ring of protection, offering a bonus to the wearer's AC and all saving throws. These bonuses are cumulative if the cloak is worn with a ring of protection. Roll 1d100 to determine AC bonus: 01-80: +1; 81-91: +2; 92-100: +3.

Crystal Ball: A crystal ball is a scrying device that can only be used by a Sorcerer. The crystal ball can be used three times per day to see any place or object that they desire; and a current image of that place or object will appear and last for 10 minutes. The clarity of the image will be based on the familiarity that the user has with the object or area.

Crystal Ball with Clairaudience: This works just as a normal Crystal Ball, except that by concentrating the user can hear what is going on at the far end as if through the ears of any living creature shown in the ball. Only a Sorcerer can use this item.

Crystal Ball with ESP: This works just as a normal Crystal Ball, except that by concentrating the user can read the thoughts of the main subject of the vision if it is a living creature. Only a Sorcerer can use this item.

Cube of Frost Resistance: This cube is activated or deactivated by pressing one side. When activated, it creates a cube-shaped area 10 feet on a side centered on the possessor (or on the cube itself, if the item is later placed on a surface). The temperature within this area is always at least 65°F. The field absorbs all cold-based attacks. However, if the field is subjected to more than 50 points of cold damage in 1 turn (from one or multiple attacks), it collapses into its portable form and cannot be reactivated for 1 hour. If the field absorbs more than 100 points of cold damage in a turn, the cube is destroyed.

Decanter of Endless Water: If the stopper is removed from this ordinary-looking flask and a command word spoken, an amount of fresh or salt water pours out. Separate command words determine the type, as well as the volume and velocity. "Stream" pours out 1

gallon per round. "Fountain" produces a 5' long stream at 5 gallons per round. "Geyser" produces a 20' long, 1' wide stream at 30 gallons per round.

The geyser effect causes considerable backpressure, requiring the holder to be on stable ground and braced to avoid being knocked down. The force of the geyser kills small creatures. The command word must be spoken to stop it.

Displacer Cloak: This item makes the wearer appear to be 5' from their actual position. This makes all attacks against the wearer take a -2 penalty to their to hit rolls, and gives the wearer a +2 bonus to all saving throws.

Drums of Panic: These are a pair of large kettle drums. When played, they have no effect on creatures within 10' of them, but creatures from 10' to 240' from them must make a saving throw vs MIND or flee in terror for 30 minutes.

Dust of Appearance: This fine powder appears to be a very fine, very light metallic dust. A single handful of this substance flung into the air coats all objects within a 10' radius, making them visible even if they are invisible. If the dust is blown through a tube it covers an area in the shape of a cone 20' long and 15' wide at its terminal end. The dust likewise negates the effects of mirror image, cloak of displacement, and elven cloaks. The dust's effect lasts for 2d10 turns. Dust of appearance is typically stored in small silk packets or hollow bone tubes, and 5d10 of these tubes or packets will be found at a time.

Dust of Disappearance: This dust looks just like dust of appearance and is typically stored in the same manner. A creature or object touched by it becomes invisible. Normal vision can't see dusted creatures or objects, nor can they be detected by magical means, including detect invisible. Dust of appearance, however, does reveal people and objects made invisible by dust of disappearance. The invisibility bestowed by the dust lasts for 2d10 turns, and the invisibility is not dispelled if the enchanted character makes attacks

Efrete Bottle: This 3' tall heavy jug contains an efreet. The stopper may be opened once per day, and the efreet will come forth and serve the opener. If the efreet is slain, the bottle becomes non-magical. The efreet is reluctant to serve, and will do its best to use loopholes in the commands that it is given in order to cause harm to the owner of the bottle.

Elven Boots: These boots give their wearer a Move Silently ability of 75%, like a thief.

Elven Cloak: This cloak is just like a Ring of Invisibility except that its invisibility is not perfect. When the wearer is in the presence of creatures that might notice them, their faint outline will be seen if a 1 is rolled on 1d6.

Eyes of Charming: These two crystal lenses fit over the user's eyes. The wearer is able to use charm person (one target per round) merely by meeting a target's gaze. Those failing a saving throw versus spells are charmed as per the spell. If the wearer has both lenses, there is a penalty of -2 to the saving throw. If the wearer has only one lens, the saving throw is made with a bonus of +2.

Eyes of the Eagle: These items are made of special crystal and fit over the eyes of the wearer. These lenses allow the wearer to see 100 times further than normal. Wearing only one of the pair causes a character to become dizzy and, in effect, stunned for 1 round. Thereafter, the wearer can use the single lens without being stunned so long as he covers his other eye.

Eyes of Petrification: These items are made of special crystal and fit over the eyes of the wearer. When a being places the eyes on, he instantly turns to stone as the spell, with no saving throw.

About 1/4 (01-25 on d00) of these eyes allow the wearer to use a petrification gaze attack. Both lenses must be worn for the magic to be effective, and the victim is allowed a saving throw versus petrify.

Flying Carpet: This carpet will carry one passenger at a speed of 100' per round, two at a speed of 80' per round, three at a speed of 60' per round, four at a speed of 40' per round, or five at a speed of 20' per round. The owner of the carpet must concentrate to make it move, and the carpet will hover in place if the owner stops concentrating.

Gauntlets of Ogre Power: The owner of these gauntlets has a strength of 18 while wearing the gauntlets, but taking them off return's the owner's strength back to its normal value.

Girdle of Giant Strength: Anyone who wears this girdle does double damage with whatever melee attacks they make.

Helm of Alignment Changing: This ornate helmet instantly changes the alignment of the being that places it on. The change is random. The helmet cannot be removed except by the spell remove curse. The wearer will not desire for the helmet to be removed, but once it has been taken off he reverts back to his original alignment.

Helm of Blindness: Anyone wearing this helmet is immediately made blind. The blindness cannot be cured until the helmet has been removed, and the helmet cannot be removed without a Remove Curse spell being cast on it.

Helm of Comprehend Languages and Read Magic: Appearing as a normal helmet, a helm of comprehend languages and read magic grants its wearer the ability to understand the spoken words of any creature, and to read text in any language or any magical writing. Note that understanding a magical text does not necessarily imply spell use unless the magic is usable by the character's class and level.

Helm of Reading: This helmet allows the wearer to read any language or cipher, and allows them to identify magical scrolls. However, it does not allow the wearer to use Spell Scrolls if they are not normally able to do so. This helmet is rather delicate, and has a 10% chance of being broken each time its wearer is struck in combat.

Helm of Telepathy: The wearer of this helmet can transmit their thoughts to any creature within 60'. The target creature will understand the thoughts of the wearer despite language differences. The wearer may also use the ESP spell to read the thoughts of others.

Helm of Teleportation: This helm is only usable by Sorcerers. The wearer of the helm may use the Teleport spell as often as they like to teleport themselves, with the normal chances of failure. The wearer may also use the helm to Teleport another creature (again, as if casting the spell). However, doing this discharges the helmet and it can no longer be used for any teleporting until it is recharged by having a Teleport spell cast into it.

Horn of Blasting: This horn can be blown once per ten minutes. When it is blown, it creates a cone of sound 100' long and 20' wide at the end. Everyone in the area must take 2d6 damage and make a saving throw vs STR or be deafened for ten minutes. Buildings and ships in the area of effect take 1d8 damage.

Medallion of ESP: This medallion allows the wearer to use the ESP spell at will, with a range as given in the item listing (either 30' or 90'). However, each time it is used, there is a 1 in 6 chance that instead of letting its wearer read minds, it will broadcast its all of its wearer's thoughts out loud for the next ten minutes.

Mirror of Life Trapping: If the owner of this mirror presents it to a creature of human size or smaller and activates it, the creature must make a saving throw vs MIND or be sucked into the mirror, complete with everything they are wearing and carrying. The mirror can hold up to 20 creatures, who exist in a state of suspended animation while in the mirror, not needing food, drink or air and completely unable to take any actions.

Anyone looking into the mirror can see the reflections of the faces of all those trapped inside, and can wake any of them up temporarily to talk with them. No special communication powers are granted, so the viewer and victim need to share a common language to talk in. If the mirror is broken, all the creatures inside are instantly freed. However, the only way to free a single creature without breaking the mirror is to use a Wish spell.

Mirror of Opposition: This item resembles a normal mirror about 4 feet long and 3 feet wide. If a creature is reflected in the mirror's surface, an exact duplicate of that creature comes into being. This opposite immediately attacks the original. The duplicate has all the possessions and powers of its original (including magic). Upon the defeat or destruction of either the duplicate or the original, the duplicate and its items disappear completely.

Necklace of Adaptation: This necklace is a heavy chain with a platinum medallion. The magic of the necklace wraps the wearer in a shell of fresh air, making him immune to all harmful vapors and gases. The bubble can enable the wearer to survive in an environment without air for 1 week.

Rope of Climbing: On command, this 50' rope will wriggle along the ground like a snake, and even up walls and on ceilings. It can fasten itself onto any solid protrusion on a surface that it is climbing up, and will support up to 10,000 lb of weight. A second command will cause the rope to loosen itself and re-coil.

Scarab of Protection: This charm has 2d6 charges. Each time a curse is placed on the wearer, it will immediately target the wearer with a Remove Curse as if by a 36th level caster. Each Remove Curse uses up one charge. Additionally, it will block any Finger of Death or Obliterate spell (the reverse of the Raise Dead and Raise Dead Fully spells) cast at the wearer; and this also uses up one charge. When the scarab has run out of charges, it crumbles to dust.

Stone of Controlling Earth Elementals: Once per day, this stone can be buried in the earth and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice earth elemental. Conjuring the elemental takes 10 minutes.

Magic Weapons and Armor

Magical weapons and armor follow the same class restrictions as all normal weapons and armor. Magic items will have a "+" value, or if cursed they will have a "-" negative value. When an item has a plus, such as a dagger +1, this means that rolls to hit and damage rolls receive a +1 bonus. Armor with a plus will reduce the AC by the amount specified. For example, leather armor +1 would reduce AC to 6 rather than 7. Cursed items have the opposite effect, incurring penalties based on the negative value provided. Cursed items, once possessed by a character, can only be disposed of with a dispel evil or remove curse spell. The owner of a cursed item will not believe the item is cursed, and will resist efforts to get rid of the item until one of these spells is cast. Furthermore, the possessor of a cursed weapon will prefer to use this weapon in combat above any other weapon.

Magical armor of the non-cursed variety is lighter and less cumbersome than other armor. Refer to the table below for magical armor weights and for rolling up the kind of armor found by a party.

d100	Roll	Armor Type	Unmodified AC	Magic Weight (lbs)
01-10		Banded mail	15	15
11-30		Chain mail	14	20
31-60		Leather	12	10
61-67		Padded	11	5
68-85		Plate mail	16	25
86-90		Scale mail	13	15
91-95		Splint mail	15	20
96-00		Studded leather	13	15

Magic Swords

Other powers beyond having a "+" to their attacks and damage sometimes apply to swords and other weapons. They also may have more than one bonus listed, where the first bonus applies to all attacks and damage, and the second applies only to an exclusive group of creatures. Some of these are detailed below, and others listed in the treasure tables are self-explanatory. Other weapons have powers that the wielder is able to command. These weapons are detailed below.

Sword +1, Flame Tongue: This sword is +2 against monsters that regenerate, +3 against avian monsters or monsters that have a cold-based attack, or are immune to fire, and this sword is +4 against all undead. When the wielder utters a command, the sword becomes engulfed in flame. The flames provide the same amount of light as a torch, and can be used to ignite anything flammable.

Sword +1, Life Drinker: This sword drains a hit die or a life level from any target struck if the wielder utters a command. This sword has 1d4+4 charges, and each use of this ability drains one charge. Once the charges have been used, the sword performs as a normal sword +1.

Sword +1, Locate Objects: The wielder may locate objects as the magic-user/elf spell one time each day, to a range of 120'.

Sword +1, Luck Blade: This sword grants its possessor a +1 bonus on all saving throws. In addition, a luck blade will contain 1d4+1 wishes. When the last wish is used, the sword remains a sword +1 and still grants the +1 saving throw bonus.

Sword +1, Wish Blade: In addition to functioning as a sword +1, this sword contains 1d4 wishes. Refer to the magic-user spell wish for guidelines on granting wishes. Once the wishes have been used, the sword performs as a normal sword +1.

Sword +2, Charm Person: In addition to functioning as a sword +1, this sword grants the wielder the ability to charm person, as the magic-user/elf spell, 3 times in a week.

Sword +3, Frost Brand: This sword is a +6 sword against monsters that live in a hot environment or use a fire-based attack. The sword sheds light as a torch when the temperature drops below 0°F. At such times it cannot be concealed when drawn, nor can its light be shut off. Its wielder is protected from fire in the same manner as wearing a ring of fire resistance. A frost brand extinguishes all non-magical fires in a 10' area when touched to a flame.

Other Magic Weapons

War Hammer +2, Dwarfven Thrower: In the hands of a dwarf, the war hammer gains an additional +1 bonus (for a total bonus of +3) and gains the returning special ability. It can be hurled with a 60' range. When hurled, it deals triple damage against giants, ettins, ogres, and trolls. It does double damage when thrown against any other target.

Arrow +3, Slaying Arrow: This arrow +3 is keyed to a particular type of creature. If it strikes such a creature, the target instantly

dies, with no saving throw. Against any other target the arrow functions as an arrow +3. These arrows are often adorned with decorations that imply the creature they can slay. To determine the type of creature the arrow is keyed to, roll on the table below. The GM may add to this list, or choose an appropriate creature type for the situation.

d20 Roll Type	d20 Roll Type
1 Avians	11 Giant animals
2 Chimera	12 Golems
3 Clerics	13 Halflings
4 Dragons	14 Magic-users
5 Dwarves	15 Mammals
6 Efreeti	16 Reptiles
7 Elementals	17 Sea creatures
8 Elves	18 Spiders
9 Fighters	19 Thieves
10 Giants	20 Undead

Sentient Swords

Particularly powerful magical swords are sometimes sentient, or thinking and intelligent entities. These weapons have motivations of their own, and may or may not be hostile to their wielder. The GM plays the personalities of these items in the same manner as an NPC. To create a sentient sword, refer to the categories below, which include Mental Character and Alignment, and Powers.

Intelligence: The first step to creating a sentient sword is to roll for its intelligence. The intelligence ability score will determine how many additional powers the sword possesses. Consult the table below.

d6 Roll	INT	Detection Powers	Spell-Like Powers	Communication
1	7	1	0	Empathy
2	8	2	0	Empathy
3	9	3	0	Empathy
4	10	3	0	Verbal
5	11	3	0	Verbal, Read Magic
6	12	3	1	Verbal, read Magic

When a sword communicates through empathy, no actual words are exchanged between it and its wielder, but the wielder becomes intuitively aware of the powers the sword possesses and how these can be employed. A sword capable of verbal communication actually produces an audible voice and speaks to those around it. Sentient swords capable of read magic do so as the magic-user/elf spell, but the ability is always active. Further, swords with the ability to read magic may also read the ordinary written language of any languages known.

Alignment: Every sentient sword will have an alignment. This alignment is undetectable until the sword is touched. A character may only wield a sword that shares the same alignment, and if he attempts to handle a sword of a different alignment he will suffer damage each round. The severity of the damage is related to the degree of difference of alignment. For each degree of difference, the character will suffer 1d6 hit points of damage. For example, a chaotic sword will inflict 1d6 hp damage to a neutral character; it will inflict 2d6 hp damage to a lawful character. For this reason, a neutral sword will only ever inflict 1d6 hp of damage. Roll 1d10 to determine the sentient sword's alignment: 1-4: Chaotic; 5-6: Neutral; 7-10: Lawful.

Psyche and Willpower: Sentient swords have a psyche rating from 1-12 (roll 1d12). This rating represents the overall strength of character that the sword has. In addition, sentient swords have

a base willpower rating equal to the sum of its INT and psyche. A bonus of +1 is added to this rating for each spell-like power the sword possesses. Spell-like powers are discussed below.

A sentient sword may mentally wrestle for dominance with its wielder, depending on the sword's personality and desires. Under certain situations, the GM will need to make an influence check. This may be made in the following situations:

1. The wielder first touches the sword
2. The sword's motivation comes into play
3. A character of a differing alignment touches the sword
4. Another magical sword is found
5. A character has lost 50% of his hp

When an influence check is called for, the willpower of the sword and the willpower of the character are compared, and the highest score wins the test. A character's willpower is determined by summing his WIS and STR. The character subtracts 1d4 from this total if he is wounded but has more than or equal to 50% of his hp. If he has less than 50% of his hp, 2d4 is subtracted from willpower. The sword receives a bonus of 1d10 to its willpower if its alignment is not the same as the character's.

If the character loses, then he loses control of his actions for an amount of time determined by the LL. The sword will force the character to perform a task, such as disposing of or ignoring magic items if a second magical sword is found. Other actions include compelling the wielder into combat or surrender with a nearby foe, or making the character perform another action that serves the desires and goals of the sword. Usually, the duration of control will only be for several rounds until the task is completed.

Sentient Sword Motivations: Sentient swords have a 5% probability of having a particular motivation (roll 01-05 on d00). These motivations involve the destruction of particular creatures, classes, or alignments. If a sword has a motivation, raise its INT and psyche each to 12. When a sentient sword is used to attack a being that fits its motivation, a special power is used against the opponent. These powers are determined by the alignment of the sword. A chaotic sword will turn an opponent to stone if the opponent is lawful. Likewise, a lawful sword will paralyze an opponent of chaotic alignment. Saving throws versus spells are allowed for each of these effects. A neutral sword grants the sword wielder a bonus of +1 to all saving throws when combating a creature of the motivational type (regardless of its alignment).

Roll 1d6 to determine a sentient sword's motivation, or the GM may choose an opponent type based on differing characteristics (all reptiles, beings of a certain religion, etc.): 1 – Clerics; 2 – Dwarves, fighters, and halflings; 3 – Elves and magic-users; 4 – Chaotic beings (if sword lawful); 5 – Lawful beings (if sword chaotic); 6 – Monster type (determine randomly).

Powers: Sentient swords can have two kinds of additional powers. These include detection powers and spell-like powers. Detection powers allow the sword to detect any of a number of possible items or inclinations. Spell-like powers often mimic spell effects. To use any of the powers detailed below, the sword wielder is required to be holding the sword and concentrating on the effect. All of the detection powers may only be used once in a round, and all spell-like powers may only be used 3 times total in one day. Roll on the detection powers table and ignore identical results, if required to roll more than once. The same holds true if required to roll on the spell-like powers table.

Detection Powers Table

Roll d00	Detect	Additional Details
01-05	Evil	20' range
06-10	Good	20' range
11-15	Gems and Jewelry	60' range
16-25	Invisible or hidden	20' range
26-35	Secret doors	10' range, 3 usages per day
36-45	Metals (any specified)	60', lead blocks this ability
46-60	Moving walls and rooms	10' range
61-80	Sloping passages	10' range
81-96	Traps	10' range, 3 usages per day
97	Roll two times	
98-00	Spell-like Power (1)	

Spell-Like Powers Table

Roll d00	Power	Additional Details
01-10	Clairaudience	As clairvoyance below, but audible instead of visual
11-20	Clairvoyance	As the magic-user spell
21-25	Double damage	See below*
26-35	ESP	As the magic-user spell
36-40	Fly	As the magic-user spell, for 3 turns
41-45	Regenerate	See below**
46-50	Levitate	As the magic-user spell, for 3 turns
51-57	Phantasmal Force	As the magic-user spell
58-67	Telekinesis	As the magic-user spell, up to 200 pounds
68-77	Telepathy	As a <i>helm of telepathy</i>
78-86	Teleportation	As the magic-user spell
87-96	X-Ray Vision	As a <i>ring of x-ray vision</i>
97-99	Roll twice	
00	Roll three times	

* Damage is doubled for 1d10 rounds. This table result can be combined if rolled more than once. If rolled twice, damage is x4, if rolled three times, damage is x6. This effect does not influence the roll to hit.

** The sword can regenerate hit points with a rate of 1 hp per round, to a maximum of 6 hp per day. This table result can be combined if rolled more than once. If rolled twice, up to 12 hp may be healed, if rolled three times, up to 18 hp may be healed. Note that the rate of healing does not change.

Treasure Class Table

Small Treasure Hoards (Individuals)

Treasure Class	CP	SP	EP	GP	PP	Gems	Jewelry	Magic

The GM chooses the appropriate row in the Treasure Class table, and for each column rolls the appropriate dice to determine whether certain treasure occurs, and if so in what quantity. When magic items are indicated, the GM either selects appropriate items or rolls randomly to determine items. To determine a random type of magic item roll 1d100: 01-20: Potions; 21-25: Rings; 26-56: Scrolls; 57-61: Rods, Staves, and Wands; 62-66: Ancient and Wondrous Items; 67-87: Swords; 88-92: Miscellaneous Weapons, 93-00: Armor.

Swords

Roll d00	Item
01-39	Sword +1
40-44	Sword +1, +2 versus lycanthropes
45-49	Sword +1, +2 versus spell casters
50-53	Sword +1, +3 versus undead
54-57	Sword +1, +3 versus dragons
58-62	Sword +1, +3 versus regenerating monsters
63-67	Sword +1, +3 versus magical monsters
68-75	Sword +1, <i>light</i> 30' radius
76-80	Sword +1, Flame Tongue
81	Sword +1, Life Drinker
82-84	Sword +1, <i>locate objects</i>
85-86	Sword +1, Luck Blade
87	Sword +1, Wish Blade
88-90	Sword +2,
91-92	Sword +2, <i>charm person</i>

93-94	Sword +3
95	Sword +3, Frost Brand
96-97	Sword -1 (cursed)
98-99	Sword -2 (cursed)
00	Sapient Sword*

*These swords should be very rare, and used with discretion.

Miscellaneous Weapons

Roll d00	Weapon
01-10	Arrows +1 (quantity 2d6)
11-12	Arrows +1 (quantity 3d10)
13-18	Arrows +2 (quantity 1d6)
19-21	Arrows +3 (quantity 1d4)
22	Arrow +3, Slaying Arrow
23-31	Axe +1
32-34	Axe +2
35-41	Bow +1
42-51	Crossbow Bolts +1 (quantity 2d6)
52-53	Crossbow Bolts +1 (quantity 3d10)
54-60	Crossbow Bolts +2 (quantity 1d6)
61-63	Crossbow Bolts +3 (quantity 1d4)
64-68	Dagger +1
69	Dagger +2, +3 versus goblins, kobolds and orcs
70-75	Sling +1
76-82	Spear +1
83-86	Spear +2
87	Spear +3
88-94	War Hammer +1
95-99	War Hammer +2
00	War Hammer +2, Dwarven Thrower

Armor

Roll d00	Armor Type
01-15	Armor +1
16-25	Armor +1 and Shield +1
26-27	Armor +1 and Shield +2
28	Armor +1 and Shield +3
29-32	Armor +2
33-35	Armor +2 and Shield +1
36-38	Armor +2 and Shield +2
39	Armor +2 and Shield +3
40	Armor +3
41	Armor +3 and Shield +1
42	Armor +3 and Shield +2
43	Armor +3 and Shield +3
44-63	Shield +1
64-73	Shield +2
74-79	Shield +3
80-82	Armor -1 (cursed)
83-85	Armor -2 (cursed)
86	Armor -1 (cursed) and Shield +1
87	Armor -2 (cursed) and Shield +1
88-90	Armor AC 9 (cursed)
91-94	Shield -1 (cursed)
95-97	Shield -2 (cursed)
98-00	Shield AC 9 (cursed)

Notes on “Old School” Play

While Microlite81 is designed using tried and true “D20” systems filtered through the Microlite20 rules, it is designed for a completely different style of play than many players who started to play in the last 20 years or so may be used to. This section will give a brief overview of “old school” play.

What is “Old School” Play?

There are two major styles of roleplaying games. The first (and older) style says “Here is the situation. Pretend you are there as your character, what do you want to do?” This style has been superseded over the years with a style that says “Here is the situation. Based on your character’s stats, abilities, skills, etc. as listed on his character sheet and your knowledge of the many detailed rules of the game, what is the best way to use your character’s skills and abilities and the rules to solve the situation?” Old school play strongly favors the first style and frowns on too much of the second.

Here are some major points where old school play is different:

Heroic, not Superheroic: Old school play, especially at low to mid levels, is about fairly normal people put in situations where they can be heroes, not about extraordinary people doing things that would make a four-color comic book superhero proud – and at first level yet. Just like in the real world, the more a character improves his abilities, the harder it is to improve them further, while new characters may advance rapidly, the higher their level the more effort and time (and XP) it takes to advance to the next level.

Achievement, not Advancement. Many modern games are often all about what special feats, extra classes and special game mechanics the players wish to obtain for their characters as they increase in level. In old school games, a character’s abilities are generally predetermined by his character class, so old school games focus on the things that the characters wish to accomplish in the game world rather than on what game mechanics they want to acquire. Level advancement is often much slower than in modern fantasy RPGs which makes in campaign achievements even more important as a measure of character success.

No Skills: Unlike in most modern RPGs, there aren’t any skills in Microlite81 -- not even the streamlined four skills of Microlite20. Players are intended to have their characters act like adventurers. So don’t search your character sheet or the rules for the perfect solution in Microlite81. Instead, you just tell the GM what your character is trying to do. Note that you are assumed to be competent with all common activities associated with your class and background. If you need to keep a door open or shut, you might tell the GM your character is using a spike to keep the door open or closed. A ten foot pole is your friend for checking for traps. Searching a room means looking in and under objects, not rolling a skill check. While this may seem strange at first, you will quickly learn to appreciate the freedom it gives you. No longer are you limited to the skills and feats on your character sheet, you can try anything your character should be capable of trying. You might not succeed, but the rules generally will not stop you from trying.

Limited Magic Items: Modern fantasy RPGs often assume that magic items are easy to buy and/or to create. In most old school campaigns, magic items are relatively rare and hard to create. Only potions and scrolls are generally relatively easy to create or purchase. Other magic items are seldom found for sale (and are very high priced when they are found for sale) and are usually very expensive in money and time to try to create – often requiring rare ingredients that the characters must quest to find. Therefore characters are usually limited to the magic items they find in treasures or take from defeated enemies on adventures.

No Assumption of “Game Balance”: Old style game sessions aren’t about carefully balanced characters (who are all able to

shine equally at all times) who only run into situations carefully designed by the GM to be beatable by the characters presently in the party and to provide treasure that fits their current level. Instead, part of player skill is learning to evaluate situations so situations well over the party’s current abilities or which will waste the party’s resources for little gain can be avoided. Don’t assume that you can beat every monster that you encounter, running away from monsters too tough to handle can mean the difference between character survival and character death. You can also get creative in how you defeat monsters. Perhaps those goblins you bypassed could be talked into (or tricked into) attacking that giant you know you can’t beat, perhaps killing it for you or at least softening it up so your party has a chance of defeating it and living to tell the tale. Also remember that treasure can be turned into XP, even if you can’t kill the monsters, perhaps you can still acquire some of their treasure. Part of the skill of playing “old school” style is coming up with creative solutions when a direct attack is likely to fail.

It’s Not All About Combat: Many modern fantasy RPGs have made combat the star of the system, combats in these systems are time-consuming and very crunchy with rules for everything. Microlite20 avoids this by having a fast-playing abstract combat system. Microlite81 takes this one step further, combat isn’t intended to be the main source of fun in the game. The game is as much about exploration and treasuring finding as it is about combat. Sure, you are going to have to fight things to explore and find treasure, but always remember that combat may not be the best or safest way to handle every situation. Think before you rush into combat. After all, it’s not the only way to earn a good pile of experience – and monsters don’t have to be killed to be defeated (and get XP for them).

Reality/Common Sense Trumps Rules: Old-school games use loose and simple rules that cover average cases and the GM and players are supposed to apply common sense and their knowledge of how reality works to cover the unusual and edge cases. “Reality/Common Sense” as interpreted by the GM always trumps the written rules if they conflict. For example, a character has a magic weapon and the rules for that weapon say it always causes its target to fall prone if hit. The character hits a gelatinous cube moving down the corridor toward them with the weapon. The rules say that the target should fall and be in a prone position. Reality, however, says otherwise. Gelatinous cubes don’t have a top and bottom (so prone penalties make no sense) and a 10 foot cube can’t fall when it is moving through a 10 foot corridor. In some modern games, the rules would be applied anyway and the cube would suffer the effects of falling prone no matter how little sense that makes. In an old school game, the GM ignores the rule because it makes no sense in the specific situation.

Forget “Rules Mastery”: As some of the above differences have hinted, player skill in “old school” style games isn’t about mastering the game rules so you can solve any problem by knowing the right combination of rules from 20 different rule books. Microlite20 is designed to be rules light and Microlite81 tries to stress this even more by encouraging GMs to make rulings on the spot taking into account specific circumstances instead of trying to hunt up special cases in the SRD or a stack of optional rule books. This is faster and helps players immerse themselves in their character and the game world instead of in rule books. GM rulings will be based on specific circumstances and common sense, not just on the written rules and prior rulings. Just because it requires a certain roll to jump one 10 foot pit does not mean all 10 foot wide pits will require the same roll. After all, all sorts of variables can affect the roll (terrain, weather, lighting, pressure to jump quickly, etc.). Players need to remember that these rules are merely a tool for the GM. They are just guidelines for the GM, not something written in stone that the GM must obey. If something herein does not work right in your campaign (or the GM just does not like a rule), the GM is well within his right to change it. Microlite81 is not a game for rules lawyers or for those who believe that the game designer always knows what is best.

No Script Immunity: In most old school games, player characters do not have any form of script immunity. Player characters can die, lose equipment, suffer strange magical effects and other often unpleasant consequences if they are not careful or are just very unlucky. On the other hand, there are no rules limiting their success. If they take on an adult red dragon as first level characters and miraculously manage to win, there are no rules about level appropriate wealth or level appropriate magic items to interfere with their becoming rich and probably flush with magic items from the dragon's hoard.

Not Mentioned does not mean Prohibited: Many people seem to read RPG rules and come away with the idea that anything not specifically mentioned in the rules as allowed is prohibited. While this really doesn't make much sense given that no set of rules could ever cover everything that characters might attempt to do in an adventure, it seems to be a very common way to view RPG rules. In an old school game like Microlite81, this is specifically not true: the millions of possible activities not mentioned in the rules are not prohibited, they are up to the GM to allow or disallow based on his knowledge of how reality works and how his specific campaign world differs from reality. Unless the rules specifically prohibit some action, players should ask their GM instead of simply assuming it is prohibited because the rules do not mention it.

Styles of "Old School" Play

If you read some "old school" blogs, forums, and web sites, you might get the impression that there is only one "old school" style of play: a style with expendable player characters who spend all their time in dungeons designed in the style of the old "Tomb of Horrors" module where an adventuring party is only one slipup away from death. This style of play is often shown in early modules.

What most people forget is that these early modules were designed for tournament play where the party that lasted longest and made it deepest into the dungeon was the winner. While a few gaming groups did run their regular campaigns like this and enjoy it, most people did not enjoy such games and the GMs who ran them were often referred to as "Killer GMs" (who often found themselves without players). Instead most home campaigns were a mixture of the following four styles – some campaigns stressing one or two styles over the others.

Power-Gaming: Many players start out playing in this style. Most soon get bored with it and add more and more of other styles. A power-gaming campaign is all about character power. Characters are known by their class, level, special items, and amazing powers and deeds. ("I killed the Demon King with my 15th Level Fighter/Magic-User/Druid. It only took two hits from Thor's Hammer to knock him out. Then I cut off his head with my vorpal blade.") There is often a lot of player competition for the most powerful character in campaigns that stress power-gaming. A lot of people look down on this style, but it can be a lot of fun to play a pure power-game in a group of players who all like the style.

Wargaming: This is probably the style old school rules were originally written for. The wargaming style of play is a competition between the player group and the GM. The GM sets up tactical battles, puzzles, and the like and the players solve them for treasure and experience. Fudging die rolls and ignoring rules (either for or against the players) is frowned upon as it detracts from the challenge and fun of the adventure. Characters in pure wargaming campaigns often were expendable and had little personality or goals (beyond staying live and getting rich) as a character with such might be tempted to do things dysfunctional to survival. Published tournament dungeons like Tomb of Horrors could be considered examples of extreme forms of this style. Once the RPG hobby became known outside of the minis and board wargaming community, pure forms of the wargaming style quickly became uncommon.

Role-Playing: A pure role-playing campaign is almost the opposite of a pure wargaming campaign. Player skill, tactics, and rules aren't really important. What is important is the player's character and that character's life in the game. In a pure role-playing campaign, players create the personality of their characters in great detail and players generally have a large emotional investments made in them and do not consider their characters expendable. Players tend to have their characters act within their personalities and within the beliefs they're supposed to hold – even when doing so is not the best thing to do at the time within the game. The object is to live your character's life in the campaign world. You "win" by having your character achieve his goals, goals which may or may not have anything to do with the game's goals of exploring and accumulating treasure and experience points. The modern computer game *The Sims* is an example of this style of play.

Story-Telling: While all campaigns tell a story after-the-fact (that is, you can tell a story based on the characters actions in the game), in a story-telling campaign, the GM has worked out a story in advance and the player characters are the protagonists. The campaign world usually has a detailed background and back story behind it. Knowing this background may be more important than knowing the rules. Some pure story telling campaigns are little more than single-line railroads where the characters play their almost pre-scripted parts in the story. In other cases, things are more free-form with story flow and events created by interactions between the GM's basic outline of story events and the actions of individual characters during the campaign. Some people consider the more pure forms of story-telling campaigns boring straight-jackets while others love the idea of being a major part of a real story.

These four major styles of play appeared early in the history of role-playing games. They were first mentioned in a general circulation publication in Glenn Blacow's article "Aspects of Adventure Gaming" in *Different Worlds* #10 (the October 1980 issue).

The important thing to take from this section isn't the four styles or their labels (as there are other systems for describing this with their own labels), but the idea that there were many different styles of "old school" play back in the "old school" days – not just the single style stressed in some "old school" blogs, forums, and web sites. Don't let those sites make you believe that you aren't playing old school right if your campaign isn't strongly in the wargaming camp. Most successful campaigns back in "old school" days were a mixture of all four major styles – and a heaping helping of minor styles.

Advice for the New Old School Game Master

If you are comfortable running a rules-light game like standard Microlite20, you'll probably have no trouble running Microlite81 as you have already learned to run a game without having hundreds of pages of rules detailing how to handle every situation that might possibly arise in the game. You've learned to just make a ruling that you think fits the situation and keep the game moving.

Running a Game Without Skills

The greatest change between Microlite20 and Microlite81 is the removal of all character skills. If you are used to just allowing players to just say "I'm searching the room. What do I find?" and make search skill roll or just say "I'll try to persuade the baron to loan us a catapult." and make a persuade skill roll, running without skill rolls is going to require as much change to your thinking as it will to your players' thinking.

First, you need to get your players to tell you what their characters are actually doing in the campaign world, instead of talking in terms of what skill they are using. Then you need to learn to listen to what they say and decide if there description of

what they are doing a) would most likely solve the problem, b) wouldn't have a chance of solving the problem, c) might not immediately solve the problem but would provide more info that would help solve the problem, or d) would not definitely solve the problem but has a fair chance of doing so. Only option d would require a die roll.

Let's take checking a chest for traps as an example. Get the players to describe in general terms how they are going to check the chest for traps. Note general terms are enough, the idea is to see what the characters are doing, not to require them to describe every single muscle and eye movement they make. Having to "click on one exact pixel on the screen" to succeed is boring and frustrating in a computer game, the verbal equivalent of it is even more frustrating in a tabletop game. Don't fall into the trap of doing it as it turns players off fast.

Let's say a player says "I'll look the chest quickly over for obvious traps, paying special to the keyhole, clasp, and anything that looks out of the ordinary. I'm not touching it yet."

If the chest had a poison needle near the clasp or some holes for poison gas or needles to shoot out of, this should be enough for the character to notice it without a roll, even if he isn't a Rogue or the like. However, if the chest if set to explode (or shoot daggers out of the opening when opened, such a search is not going to discover the trap – again no matter what the character's class or background as such a trap isn't visible from the outside. If you are feeling generous, you might have a Rogue make roll and if she makes it tell her player that while she doesn't see a trap, something still doesn't seem right about the chest.

If the character had said he was then poking the chest with a pole instead of rushing to open it, he might hear something strange if the chest had the above-mentioned dagger trap. Of course, unless he is a Rogue or has some strange background, chances are he would not associate the noise with a trap, but rather just that there was something loose in the chest. Again, you might give a Rogue a roll, especially an experienced Rogue.

As this example shows, it really isn't hard – unless you choose to make it hard. It's just different. After a few sessions both you and your players will find that it really isn't as hard as it looks.

Some players, however, really want die rolls. Because of previous bad experiences with poor GMs, they just can't trust the GM enough to handle some decisions being made without die rolls. If your players are like this, you can use "skill" rolls as a safety net. The players will still have to describe what their character does to solve the problem just as above. Once the player describes what his character is doing, the GM calls for a class/background based "skill" roll as described in the skills section of these rules. The results are determined by your opinion as GM of the action described and the skill roll. There are basically two situations:

In the first case, you feel that the player has a good plan that should likely succeed. Therefore it will succeed regardless of the result of the roll, but how well it succeeds is determined by the skill roll. A failed skill roll is a minimal success; the character succeeds, but just barely. A successful skill roll means the character's plan succeeds without any major hitches.

In the second case, either the player obviously knows less than his character does about the situation or just comes up with a bad idea that you feel is unlikely to work. You let the skill roll decide the result. A failed roll means the plan fails, while a successful roll means the plan somehow worked after all, but probably not perfectly.

Players who refuse to even try to come up with some type of rational statement about what their character is actually doing but just want to let the skill roll decide automatically fail.

On Failure

If a character attempts to do something, failure should normally mean no more than that: the character failed to do what he was trying to do. Failure should not normally mean that some worst case disaster has occurred. For example, if a character fails his climb roll while attempting to climb a cliff, this should normally simply mean that the character did not make it to the top for some GM described reason and had to return to the ground, not that the character fell to the ground. If failure (even with a natural roll of 1) is going to lead to "disaster" instead of some type of simple failure, the GM should clearly indicate this before the character rolls (especially for a primary or secondary skill roll).

Guidelines Not Rules

Finally, remember that these rules are a tool for the GM. If something herein does not work right in your campaign, change it. The object is to have fun, not be a slave to rules or to players who think being a rules-lawyer is the way to get ahead. In many roleplaying games, the Rules As Written (RAW) are often considered sacrosanct or at least somehow better than those a GM can come up with himself. This is not true of Microlite81 so please change anything you do not like.

Adventures and Settings

There are a large number of adventures and campaign settings available for TSR editions of the world's most popular fantasy RPG. Playing copies of most of original adventures from TSR can be found on eBay for very low prices. TSR era adventures can be used with any pre-WOTC edition or retroclone with only very minor conversion.

There are also a large number of free and low cost adventures available in PDF format on the web. A good place to start looking for free adventures is on the Dragonsfoot forum web site (see the link under Old School Internet Resources below).

The best settings and adventures, however, are those you create yourself for your campaign. They don't need to be nearly as elaborate as those produced for use by others, let alone as fancy as those written for professional publication. Many B/X GM adventure location keys (including those of the game's original designers) were nothing but room/location numbers with something like "8 hobgoblins, leader has 20gp, trapdoor in floor hides skeleton with silver dagger (animates if dagger touched)" or "Small village, 27 families, 10 orc slaves, Headman: Mongar the Brown (Ftr 4th lvl, +1 sword) Mongar's wife, Rose is a 3rd lvl Cleric of Odin)." You can do that.

Versions of Microlite81

Several versions of Microlite81 are planned.

Microlite81: This is the version you currently hold in your hands. It is intended to be fairly standard B/X converted to a Microlite20-based system. This version is the "standard" version of *Microlite81*.

Microlite81 Complete: This version is intended to be standard *Microlite81* with more complete descriptions of spells, monsters, and magic items and a few extras like an example of play which will hopefully make the game more friendly to players with less experience with old school gaming.

Microlite81 Expanded: This version will be Microlite81 with the author's house rules from the 1977-1983 era. Most of the house rules used in *Microlite74 Expanded* will also be used in *Microlite81 Expanded*. They will be modified as needed to work with a system based on B/X instead of one based on Oe. A number of optional rules may also be included.

Microlite81 Advanced: This is a version of Microlite81 using the spell lists, monsters, and treasures from the 1e (Advanced) version of the world's most popular fantasy RPG combined with

author's house rules from the 1977-1983 era. There will be a large number of optional rules: psionics, mutations, etc. Microlite81 Advanced will essentially be a Microlite20 version of my planned *Lords & Wizards* game, the actual *Lords & Wizards* will then be based on this *Microlite81* version.

Microlite20 Notes

Microlite20 is a trimmed down sub-miniature version of the OGL 3.5 SRD. In its most basic form, Microlite20 has only two pages of rules but can be used with most fantasy OGL and d20 adventures and supplements with little or no conversion. Since M20 was published in 2006, many people who prefer rules-lite games have been using it for their d20 games and/or writing expansions, supplements and other material especially for M20. You can find out more about the original Microlite20 and find more variants like Microlite81 on the Microlite20 web site: <http://microlite20.net/>

RetroRoleplaying Web Site

The author of Microlite81 maintains a web site devoted to out of print and out of style tabletop roleplaying games. He is always willing to discuss and answer questions about Microlite81 in the Microlite81 board on the RetroRoleplaying forum.

Web Site: <http://www.retroroleplaying.com/>

Forum: <http://www.retroroleplaying.com/forum/>

Blog: <http://blog.retroroleplaying.com/>

Old School Internet Resources

Old-School Blogs

There are a lot of old-school blogs. Even a selection of just the ones I currently read regularly would fill up a page or two and would likely be out of date quickly. Fortunately, there is a great place to find old school RPG blogs -- the RPG Blog Network, check the Legacy D&D category:

<http://www.rpgbloggers.com/>

Major Old-School Forums

Dragonsfoot

Very large forum discussing 1e and earlier, related games like retro-clones, Hackmaster, and Castles & Crusades. Many people who worked for TSR in the early days post here. Many free downloads including Footprints magazine and adventures.

<http://www.dragonsfoot.org/>

Knights & Knaves Alehouse

Discussions of B/X and 1e.

<http://knights-n-knaves.com/phpbb/>

Original D&D Discussion

Mainly discussions of B/X. Home of Fight On! Magazine.

<http://odd74.proboards76.com/>

The Piazza: Old D&D Campaign Worlds

Discussions of old published campaign worlds including many no longer officially supported.

<http://www.thepiazza.org.uk/bb/index.php>

Old School Product

A number of publishers are producing new material for old school games (using the OGL and retro-clones for compatibility). Many of these products are available through Lulu's Old School Renaissance group. Some downloadable products are free.

<http://stores.lulu.com/oldschoolren>

Microlite81 Trademark License

Note that this license only takes effect once the Final Version of Microlite81 is released. It is therefore NOT in effect now.

You may use the Microlite81 trademarks in your own OGL products without obtaining prior permission from the trademark owner in two cases:

- 1) Adventures, campaign settings, and other supplements either designed specifically for Microlite81 or that are written for another Oe, B/X, BECM1 or 1e rule set may be labeled "Suitable for use with Microlite81".
- 2) Microlite81 may be mentioned by name in documents (or sections of a larger product) written to provide information on converting adventures and other materials between one game system and another.

In no case may the Microlite81 trademarks be used in any manner than indicates a product is endorsed or otherwise approved by the author of Microlite81. The terms "Microlite81 Companion" and "Microlite81 Supplement" may not be used in the title of a product without permission in writing.

All others uses of the "Microlite81" trademarks in products requires permission in writing from the trademark owner. This permission will generally be given, so don't be afraid to ask.

Microlite81

Microlite81

Microlite81 games are trimmed-down miniature versions of the Primary Fantasy SRD rules designed to be quick and easy to play, especially when compared to modern incarnations of the game. The goal of *Microlite81* games is to recreate the style and feel of the "B/X" edition of the world's first fantasy roleplaying game published back in 1981 without giving up all of the clearer mechanics of modern D20-based versions.

The *Microlite81* rules are based on the Basic and Expert boxed sets published in 1981, often referred to as B/X. The rules are not intended to be a clone of the B/X rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules. These rules assume that the GM understands the basic concepts of roleplaying games, but provides information for both the GM and the players on the various "old school" styles of play. *Microlite81* games can easily use adventures and material from early editions of the world's most popular tabletop fantasy roleplaying game or modern clones.

Microlite81 Extended

**OGL20 Rules for Tabletop Fantasy Roleplaying Campaigns
with Old School (B/X) Flair**

Version 1.0

Special Thanks to Our Sponsors

The author would like to thank the following individuals who sponsored the production of *Microlite81* by making donations to the RetroRoleplaying Cancer Fund to help pay the huge cancer bills treating my wife's Stage 3 Oral Cancer without insurance ran up.

Copper Donors: August Beirmont, Alistair Caunt, Stacey Conover, Silas Crowe, Dennis Davis, Chris Harvey, Tom Hayes, Michael Julius, Oliver Korpilla, J.E. Leems, Tom Lewis, John Lockard, Juan Lopez, Chad Nal, Joseph Nelson, Brennan O'Brien, Bertel Robbins, Ed Roberts, Brett Slocum, Harold Smith, Scott Sutherland, George Taylor, Lisann Towwer, Don Turner, Harald Wagener, Steven Wales

Silver Donors: Chris Brandon, Timothy Brannan, Marion Hill, Oliver Korpilla, John Lee, Olivier Lefebvre, Allan MacKenzie, Lloyd Rasmussen, John Seabury

Gold Donors: Penelope Anders, Brian Isikoff, Helen Perez, Nelson Singer

Electrum Donors: Robert Gibson, Ralph Williams

Platinum Donors: Bill Morrison

And twenty-eight additional donors who wish to remain anonymous.

You can still add your name to the list of Microlite81 Sponsors: You can add your name to this list in the upcoming *Microlite81 Complete* and *Microlite81 Advanced* (and in the Gold Editions of *Microlite81* and *Microlite81 Expanded*) with a donation of \$25 or more to the [RetroRoleplaying Cancer Fund](http://www.retroroleplaying.com/node/153) via this Paypal link:

<http://www.retroroleplaying.com/node/153>

Special Thanks to Rachel GhouI

for permission to adapt her B/X Dragonborn, Tiefling, and Warforged classes to Microlite81.

Microlite81 Extended

Version 1.0 Silver (March 23, 2014)

Copyright © 2014 Randall S Stukey

Special Thanks to the Sunday Game Crew for Playtesting
and to RetroRoleplaying blog readers and Google+ members for Proofreading.
All art is in the public domain.

Microlite81 Extended, like its parent game, *Microlite20*, is a trimmed-down, sub-miniature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal of *Microlite81* games, however, is to recreate the style and feel of those two boxed sets ("B/X") published back in 1981.

The *Microlite81 Extended* rules are based on the two boxed sets (Basic and Expert) published in 1981, often referred to as B/X plus some of the author's house rules from the era. The rules are not intended to be a clone of the B/X rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules. *Microlite81* is based on the third edition of the original *Microlite74* rules.

These rules assume a basic familiarity with tabletop role-playing games in general and with the basic principles of "D20" based rules. If you are completely new to tabletop role-playing games, you will want to start by playing with someone who is familiar with how they work.

Characters

Stats

There are 4 stats: Strength (STR), Dexterity (DEX), Mind (MIND), and Charisma (CHA).

Roll 3d6, Total the 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/3, round toward zero.

Standard Classes

The Fighter, Magic-User, Cleric and Thief classes are available to humans. Non-humans (elves, dwarves, and halflings) each have their own class. Characters normally begin at Level 1 (unless directed otherwise by the GM). Humans may reach a maximum level of 14, Dwarves may reach a maximum of level 12, Elves a maximum of level 10, and Halflings a maximum of level 8. Abbreviations: PCB – Physical Combat Bonus; MCB – Magical Combat Bonus; FB – Fighter Bonus; Mem – Memory Slots; XP – Minimum Experience Points Required (to reach level).

Dwarves are fierce warriors. Prime Requisite: STR. Requirements: none.

Weapons and Armor: Dwarves may use any kind of armor or weapon and may use shields. Due to their height, they cannot wield large weapons over 4 feet in length (except axes and hammers), specifically two-handed swords, pole arms, and longbows.

Class Abilities: +4 to magic saves; note slanting passages, traps, shifting/false walls and new/hidden construction in underground settings (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of dwarves, gnomes, kobolds and goblins; can see in darkness half as well as in light.

Battlefield Prowess: At 5th level, a dwarf inspires other dwarves under his command. Any dwarf hirelings or mercenaries hired by the dwarf have a +1 bonus to their morale when personally led by the dwarf.

Stronghold: When a dwarf reaches level 9, he has the option of creating an underground stronghold that will attract dwarves from far and wide. Dwarves usually live in clans, so dwarves of the character's clan will be attracted to live under his roof, but dwarves from other clans will also come and live nearby to be ruled by the character. A dwarf ruler is able to hire dwarven soldiers or mercenaries, but may only hire members of other races for other tasks, such as human alchemists or elves for spell casting.

Experience Base: 2200/120000.

Dwarf Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d8	+0/+0	+1	0	14	0
2	2d8	+0/+0	+1	0	13	2200
3	3d8	+1/+0	+1	0	12	4400
4	4d8	+2/+1	+1	0	11	8800
5	5d8	+3/+1	+2	0	10	17600
6	6d8	+4/+1	+2	0	9	35200
7	7d8	+5/+1	+2	0	8	70000
8	8d8	+5/+2	+2	0	7	140000
9	9d8	+6/+2	+3	0	7	260000
10	9d8+3	+7/+2	+3	0	6	380000
11	9d8+6	+7/+3	+3	0	6	500000
12	9d8+9	+8/+3	+3	0	5	620000

Elves are warrior mages. Prime Requisite: MIND. Requirements: none.

Weapons and Armor: Elves may wear any kind of armor or weapon and may use shields.

Class Abilities: +2 to hit and damage goblinoid monsters; speak languages of elves, orcs, hobgoblins, and gnolls. Elves can cast arcane spells – either magic-user or illusionist spells as selected when the character is created.

Battlefield Prowess: At 5th level, an elf inspires those under his command. Any elf hirelings or mercenaries hired by the elf have a +1 bonus to their morale when personally led by the elf.

Magical Research: At 5th level, an elf is able to research spells, scribe scrolls, and brew potions. When an elf reaches the 9th level, he is able to create spells and magic items.

Stronghold: Elves can establish a stronghold in a natural setting, such as a forest or glen, when they reach the 9th level. Rather than impose upon nature, this keep must blend seamlessly with it. Because of the elven connection to nature, within 5 miles of the stronghold all ordinary animals will be kind and helpful to elves. This helpfulness includes the ability to warn of dangers and pass information, or even messages to others nearby. However, in exchange, an elven ruler must always defend the animals within this territory. Elven rulers can hire members of other races in the capacity of retainers or specialists, but only soldiers of elven stock may be hired.

Experience Base: 4000/200000.

Elf Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d6	+0/+0	+1	1	17	0
2	2d6	+0/+0	+1	2	16	4000
3	3d6	+1/+1	+1	3	15	8000
4	4d6	+2/+2	+1	4	14	16000
5	5d6	+3/+3	+2	5	13	32000
6	6d6	+4/+4	+2	6	12	64000
7	7d6	+5/+5	+2	7	10	130000
8	8d6	+5/+5	+2	8	9	280000
9	9d6	+6/+6	+2	9	8	480000
10	9d6+2	+7/+7	+3	10	7	680000

Fighters are soldiers, champions, and other warriors who are exclusively trained in the arts of combat and war. They are specialists in dealing damage with weapons and in the other arts of physical combat. They are trained to lead others in battle. Prime Requisite: STR. Requirements: none.

Weapons and Armor: Fighters may use any kind of armor or weapon and may use shields.

Battlefield Prowess: At 5th level, a fighter inspires those under his command. Any hirelings or mercenaries hired by the fighter have a +1 bonus to their morale when personally led by the fighter.

Stronghold: At level 9 a fighter may become a great leader of men, taking control of a parcel of land and a leadership rank in his society. A fighter will, assuming money is at hand, build a castle. He may ultimately control several villages and towns, but must be a good, strong leader and provide protection.

Experience Base: 2000/120000.

Fighter Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d8	+0/+0	+1	0	14	0
2	2d8	+0/+0	+1	0	13	2000

8	8d8	+5/+2	+3	0	7	130000
9	9d8	+6/+2	+3	0	7	250000
10	9d8+2	+7/+2	+4	0	6	370000
11	9d8+4	+7/+3	+4	0	6	490000
12	9d8+6	+8/+3	+4	0	5	610000
13	9d8+8	+8/+4	+5	0	5	730000
14	9d8+10	+8/+5	+5	0	4	850000

Halflings are a humanoid race about half the height of a human. They make excellent warrior-scouts. Prime Requisite: DEX. Requirements: none.

Weapons and Armor: Halflings who can wear light or medium armor, use shields, and use any light or medium weapon. Due to their stature, they must wield medium weapons with two hands and they cannot use a long bow.

Class Abilities: +4 to magic saves; +2 to hit and damage with slings and light bows; can blend in background (d20 + DEX Bonus; DC 12 if outdoors, DC 16 if indoors – this is an extraordinary ability above and beyond simply hiding in available cover which anyone can try to do). They can move silently outdoors.

Battlefield Prowess: At 5th level, a halfling inspires other halflings under his command. Any halfling hirelings or mercenaries hired by the halfling have a +1 bonus to their morale when personally led by the halfling.

Stronghold: When a halfling reaches level 8, he can build a stronghold. These strongholds will be in serene, beautiful valleys and halflings will come from great distances to settle there. The character becomes the sheriff of the people (their leader) and must rule them wisely and well.

Experience Base: 1800/-.

Halfling Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d6	+0/+0	+1	0	15	0
2	2d6	+0/+0	+1	0	14	1800
3	3d6	+1/+0	+1	0	13	3600
4	4d6	+2/+1	+2	0	12	7200
5	5d6	+3/+1	+2	0	11	14400
6	6d6	+4/+1	+2	0	10	28800
7	7d6	+5/+1	+3	0	8	60000
8	8d6	+5/+2	+3	0	6	120000

Magic-Users (sometimes called wizards, sorcerers, or magicians) study arcane secrets and cast spells. While early in their career magic-users have only limited power, experienced magic-users are

able to cast a great number of powerful spells. Prime Requisite: MIND. Requirements: none.

Weapons and Armor: Magic-Users wear no armor and can only use daggers, slings, or staves as weapons.

Class Abilities: Magic-Users can cast arcane (magic-user) spells.

Magical Research: At 5th level, a magic-user is able to research spells, scribe scrolls, and brew potions. When a magic-user reaches the 9th level, he is able to create magic items.

Stronghold: A magic-user may build a stronghold, often a great tower, when he reaches level 11. He will then attract magic-user apprentices (1d6), who will range from level 1-3.

Experience Base: 2500/150000.

Magic-User Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d4	+0/+0	+0	1	16	0
2	2d4	+0/+0	+0	2	15	2500

13	9d4+4	+4/+8	+0	17	5	910000
14	9d4+5	+5/+8	+0	20	5	1060000

Clerics have pledged their lives to serve a specific deity (or pantheon). While clerics are a form of priest, they seldom serve a priest at a temple; instead they are warrior-priests serving as an arm of their deity in the world. Prime Requisite: CHR. Requirements: none.

Weapons and Armor: Clerics can wear any type of armor and use shields. They can use any weapon except edged weapons.

Class Abilities: Clerics can cast divine magic.

Magical Research: At 5th level, a cleric is able to research divine spells and scribe divine scrolls. When a cleric reaches the 9th level, he is able to create magic items usable by clerics.

Turn Undead: A Cleric can Turn Undead with a successful Magic Attack. DC is 10 + twice the Hit Dice of the undead. One undead flees per point over the roll needed. This can be used (2 + Level + MIND bonus) times per day.

Stronghold: Once attaining 9th level, a cleric may establish or build a stronghold. So long as the cleric is currently in favor with his god, he may buy or build a keep at half the normal price due to divine intervention. Once a stronghold is established, the cleric's reputation will spread and he will attract 1st and 2nd level followers of the fighter class (numbering 5d6 x10). They are completely loyal (never checking morale). The GM chooses which proportions of followers are bowman, infantry, etc.

Experience Base: 1500/100000.

Cleric Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d6	+0/+0	+0	0	15	0
2	2d6	+0/+0	+0	1	14	1500
3	3d6	+0/+0	+0	2	13	3000
4	4d6	+1/+1	+0	3	12	6000
5	5d6	+1/+1	+0	4	11	12000
6	6d6	+2/+2	+0	5	10	24000
7	7d6	+2/+2	+0	6	9	50000
8	8d6	+2/+2	+0	7	8	100000
9	9d6	+3/+3	+0	8	7	200000
10	9d6+1	+3/+3	+0	9	7	300000
11	9d6+2	+4/+4	+0	10	6	400000
12	9d6+3	+5/+5	+0	12	6	500000
13	9d6+4	+6/+6	+0	14	5	600000
14	9d6+5	+6/+6	+0	16	5	700000

Thieves are sneaks and trouble-shooters who specialize at infiltration and obtaining items from others through nefarious means. Prime Requisite: DEX. Requirements: Alignment cannot be Law.

Weapons and Armor: Thieves can wear light armor, use shields, and use any light or medium weapon.

Class Abilities: Thieves are specialists at urban survival as well as at picking pockets, hiding in cover, sneaking silently, opening locks, removing traps, climbing walls, and other tasks associated with theft. Thieves may also attempt to climb sheer surfaces and hide in shadows with a successful secondary skill roll. Thieves also have special training in listening at doors and detecting traps and secret/hidden doors, see the section on Adventuring for the details.

Backstab: If a thief successfully sneaks up on a foe, they can Backstab which adds +4 to the attack roll and does more damage if successful (Levels 1-4, x2 damage; Levels 5-8, x3 damage; Levels 9-12, x4 damage; Level 13+, x5 damage).

Read Languages: At 4th Level, a thief gains the ability to read languages (including ciphers, treasure maps, and dead languages, but not magical writings) on a roll of 1-4 on a d6. On failure, the thief cannot attempt to read that document again until he gains a new level.

Read Arcane Scrolls: At 10th level, a thief can read and cast magic from arcane scrolls on a roll of 3 or higher on a D20 with the spell level subtracted from the roll. Failure means the spell does not function as expected (with humorous or negative effects up to the GM).

Stronghold: When a thief attains level 9 he can establish a thief den, and 2d6 thief apprentices of 1st level will come to work with the character. These thieves will serve the character with some reliability; however, should any become arrested or killed the character will not be able to attract more followers of this type to replace them. A successful character might use these followers to start a Thieves' Guild.

Experience Base: 1250/100000.

Thief Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d4	+0/+0	+0	0	15	0
2	2d4	+0/+0	+0	0	14	1250
3	3d4	+0/+0	+0	0	13	2500
4	4d4	+1/+1	+0	0	12	5000
5	5d4	+1/+1	+0	0	11	10000
6	6d4	+2/+2	+0	0	10	20000
7	7d4	+2/+2	+0	0	9	40000

10	9d4+1	+3/+3	+0	0	7	280000
11	9d4+2	+4/+4	+0	0	7	380000
12	9d4+3	+5/+5	+0	0	6	480000
13	9d4+4	+6/+6	+0	0	6	580000
14	9d4+5	+6/+6	+0	0	5	680000

Optional Human Classes

The following classes are not suitable for all campaigns but may be used if the GM allows. Unless otherwise noted, these classes are only available to humans.

Assassins are trained to kill by ambush and treachery. Like fighters they are specialists in dealing damage with weapons but they are not trained in battlefield combat. Prime Requisite: DEX. Requirements: none.

Weapons and Armor: Assassins may use any kind of armor or weapon but may not use shields. Wearing medium or heavy armor prevents the use of some special abilities.

Class Abilities: Assassins are specialists at disguise, hiding in cover and sneaking silently (and may also attempt to hide in shadows with a successful secondary skill roll), provided they are not wearing medium or heavy armor. Assassins also have the same special training in listening at doors and detecting traps and secret/hidden doors as thieves, see the section on Adventuring for the details.

Backstab: If an assassin successfully sneaks up on a foe, they can Backstab which adds +4 to the attack roll and does more damage if successful (Levels 1-4, x2 damage; Levels 5-8, x3 damage; Levels 9-12, x4 damage; Level 13+, x5 damage). An assassin wearing medium or heavy armor cannot backstab,

Stronghold: At level 9 an assassin may build a hideout and 2d6 assassin apprentices of 1st level will come to work with the character. These assassins will serve the character with some reliability; however, should any become arrested or killed the character will not be able to attract more followers of this type to replace them. A successful character might use these followers to start an Assassins Guild.

Experience Base: 1700/120000.

Assassin Advancement Table

Barbarians are tough, hardy warriors from cultures outside of the civilized world. Some barbarians live on the edge of true savagery, while others hail from rich cultures with epic poetry and weapons of steel, but all share an outlander's mix of contempt and awe for the grand tapestry of civilization. There are three types of barbarians: northern, plains, and jungle. Prime Requisite: STR. Requirements: none.

Weapons and Armor: Barbarians may use light or medium armor and may use shields. They have a limited selection of weapons depending on their regional origin (northern, plains, jungle). Northern barbarians: battle axe, club, dagger, great axe, hand axe, short bow, spear, sword, two-handed sword, war hammer. Plains barbarians: composite bow, dagger, hand axe, javelin, lance, net, sling, short sword (scimitar), spear, whip. Jungle barbarians: bola, club, dart, dagger, hand axe, javelin, net, short bow, short sword, spear.

Class Abilities: Barbarians have a +1 bonus to initiative and surprise rolls. Barbarians can deal massive damage either via melee or missile weapons as selected when the character is generated, adding double their Fighter Bonus (instead of just their Fighter Bonus) to all damage done with the selected type of weapon. Barbarians have a savage resilience that allows them to withstand body point damage and still function normally: they only suffer the -1 to all attack, success, saving, and similar rolls (also to strike speed) for every three points of body damage suffered (instead of every two points). Northern barbarians are experts at climbing. Plains barbarians are experts at riding. Jungle barbarians are experts in survival.

Battlefield Prowess: At 5th level, a barbarian inspires those under his command. Any hirelings or mercenaries hired by the fighter have a +1 bonus to their morale when personally led by the barbarian.

Stronghold: At level 9 a barbarian can build or claim a chieftain's hall and seek to rule on the strength of his axe. When the barbarian establishes his hall, 1d4+1x10 mercenaries and 1d6 barbarians of 1st-3rd level seeking plunder and rapine will join his service. If hired, they must be paid standard rates for mercenaries. Barbarians' halls are otherwise identical to fighters' castles.

Experience Base: 2600/120000.

Bards remember and recite the sagas and songs of history, mythology, and successful adventurers. Most bards are content to recite the deeds of others, but some bold few participate in the dangers themselves and become inspiring heroes in their own right. Prime Requisite: CHR. Requirements: none.

Weapons and Armor: Bards may use light armor and light weapons but may not use shields.

Class Abilities: Bards can sing, recite poetry, or play a group of instruments in a skilled manner. The bard chooses the type of performance that his character knows. Instrument groups include stringed instruments, percussion instruments, brass instruments, and woodwind instruments. Their study of ancient annals and legends, allows bards to decipher occult runes, remember ancient history, identify historic artifacts, and similar tasks.

Inspire Courage: By reciting heroic lays and epic poems, bards can inspire courage. This requires a minute or two of oration before a battle, and grants the bard's allies within a 50' radius a +1 bonus to attack throws, damage rolls, morale rolls (for monsters or NPCs allied with the caster), and saving throws against magical fear. The bonus lasts for 10 minutes. A bard can inspire courage in any given character once per day per class level.

Dabble in the Arcane: Their study of ancient annals and legends allows bards to attempt to use wands, staves, and other magic items only useable by mages. At 1st level, the bard must make a roll of 18+ on 1d20 or the attempt backfires in some negative manner (GM's discretion). The roll required reduces by 2 per level, to a minimum of 3+.

Read Languages: At 4th Level, a bard gains the ability to read languages (including ciphers, treasure maps, and dead languages, but not magical writings) on a roll of 1-4 on a d6. On failure, the bard cannot attempt to read that document again until he gains a new level.

Stronghold: At level 9 a bard may build a hall and 2d6 assassin apprentices of 1st level will come to work with the character.

Experience Base: 1400/120000.

14	9d4+10	+6/+6	+0	0	5	900000

Druids have pledged their lives to serve a Nature (and its deity the Earth Mother). Prime Requisite: CHR. Requirements: none.

Weapons and Armor: Druids can wear any type of armor made of natural, non-metal material. They can use wooden or leather shields. They can only use clubs, daggers, slings, sickles, and staves as weapons.

Class Abilities: Druids can cast divine (druid) magic. They save at +2 vs fire and lightning. They have a +1 chance of surprise in the wilderness. They gain +2 to all reaction rolls when encountering normal animals, and can take animals as henchmen. They are good at wilderness survival.

One with the Wilderness: At 3rd level, a druid can go to ground, disappearing into woods and underbrush with a proficiency throw of 3+ on 1d20. At 4th level, a druid may speak with animals at will and they acquire immunity to the powers of woodland fey.

Magical Research: At 5th level, a druid is able to research divine (druid) spells and create fetishes (one use items equivalent to

divine scrolls). When a cleric reaches the 9th level, he is able to create magic items usable by druids.

Shapeshift: At 7th level, a druid may shape shift to a small/medium animal up to 3 times per day (once every eight hours). When shape shifting back to their original form, a Druid can heal 2 HP per level of damage.

Stronghold: Once attaining 9th level, a druid may establish a grove in a true wilderness area. Once a grove is established, all ordinary animals within 5 miles will become friendly and helpful to the druid. The druid will then attract 1d6 apprentices of 1st-3rd level plus 2d6 normal men and women seeking to become druids. Their wisdom scores will be above average, but many will become discouraged from the rigorous mental training and quit after 1d6 months, if failing a throw of 14+ modified by their Wisdom modifier. Those who succeed become 1st level druids. Each year the druid tends to the grove, he will attract an additional 1d6 normal men, until she has a maximum of 6 apprentices of any level, and 12 normal men, studying at any time.

Experience Base: 2000/120000.

Illusionists are specialized mages whose spells usually deceive and manipulate the senses and the mind. Their more powerful spells use a combination of illusory components and proto-matter drawn from the plane of shadows. These potent spells produce pseudo- and quasi-real effects that may actually harm an opponent. Prime Requisite: MIND. Requirements: none. Special: except where specified in this section, treat illusionists as magic-users.

Weapons and Armor: Illusionists wear no armor and can only use daggers, slings, or staves as weapons.

Class Abilities: Illusionists can cast illusion (arcane) spells and have the Arcane Blast, Arcane Dueling, and Minor Magic special abilities.

Magical Research: When an illusionist reaches 5th level, he is able to research spells, scribe magical scrolls, and brew potions. When an illusionist reaches 9th level, he is able to create more powerful magic items such as weapons, rings, and staves. At 11th level, an illusionist may learn and cast ritual illusion (arcane) spells of great power (7th level and higher), craft magical constructs, and create magical cross-breeds. If chaotic, at 11th level the illusionist may create necromantic servants and become undead.

Stronghold: An Illusionist may build a stronghold, often a great tower, when he reaches level 11. He will then attract illusionist apprentices (1d6), who will range from level 1-3.

Experience Base: 2500/150000.

Paladins are champions of Law who crusade against those who seek to extinguish the light of civilization. Wherever the forces of Chaos marshal to threaten man, paladins can be found, battling back the darkness with courage and steel. Prime Requisite: CHA. Requirements: alignment must be Law.

Weapons and Armor: Paladins may any type of armor and may use shields. They may use all medium and heavy weapons.

Class Abilities: Aura of Protection (+1 to AC and saving throws against attacks made or created by those aligned with for created by Chaos); immune to disease (including magical diseases); Detect Evil (can detect evil or chaos, 60 foot range, requires 10 minutes prayer and concentration); Lay on Hands (may heal by touching target and praying for 5 minutes; may heal up to his level in Body Points per day total, may heal diseases (costs 2 BP of healing per disease, 3 BP of healing for magical diseases).

Holy Fervor: At 5th level, a paladin inspires those under his command. Any hirelings or mercenaries of the same religion as the paladin have a +1 bonus to their morale when personally led by the paladin.

Alignment: All paladins must be of Lawful alignment. A paladin who changes to Neutral or Chaotic alignment loses his class abilities and powers. If he later reverts to Lawful alignment and atones for any misdeeds (possibly through a quest spell) he can regain his lost class abilities and powers.

Stronghold: At level 9 a paladin may build a fortress in the borderlands or wilderness. 1d4+1 x 10 reliable mercenaries will apply for jobs and 1d6 low level paladins will apply for training. The fortress will attract settlers over time and they will look to the paladin for leadership.

Experience Base: 1850/120000.

Rangers are scouts and trackers, adept at both woodcraft and archery. Few adventuring parties would dare the wilderness without an experienced ranger to guide them. Prime Requisite: STR. Requirements: none.

Weapons and Armor: Rangers may use light or medium armor and may use shields. They may use all missile and light weapons.

Class Abilities: +1 bonus to initiative and surprise rolls; can blend in background (d20 + DEX Bonus; DC 8 if outdoors/wilderness, DC 16 if indoors/urban -- this is an extraordinary ability above and beyond simply hiding in available cover which anyone can try to do); can move silently and tracklessly in the wilderness (d20 + DEX Bonus; DC ranges from 8 to 20 depending on terrain); +1 to lost rolls if outdoors (applies to any party a ranger is guiding); +1 to Chance of Encounter rolls outdoors (+2 if alone); +2 to Fighter Bonus with missile weapons; tracking and trailing in the wilderness.

Wilderness Prowess: At 5th level, a ranger inspires those under his command. Any hirelings or mercenaries hired by the fighter have a +1 bonus to their morale when personally led by the ranger in the wilderness.

Stronghold: At level 9, a ranger may build a border fort in the borderlands or wilderness. 1d4+1 * 10 reliable mercenaries will apply for jobs and 1d3 low level rangers will apply for training. The fortress will attract settlers over time and they will look to the ranger for leadership.

Experience Base: 2000/120000.

Ranger Advancement Table

Warlords are warriors trained to lead in combat. Any fighter is able to lead others in battle but warlords specialize in battle leadership. Prime Requisite: STR. Requirements: CHR 9+.

Weapons and Armor: Warlords may use light or medium armor and may use shields. They may use any weapon.

Class Abilities: When leading a group of hirelings under their command, the hirelings subtract the warlord's fighter bonus in any morale checks and add one-half the warlord's fighter bonus (round up) to their attack and damage rolls. Warlords are expert at riding and at small unit tactics.

Battlefield Prowess: At 5th level, a warlord inspires those organized units (mercenary companies, etc.) under his direct command. Any organized military units under the command of the warlord have a +1 bonus to their morale. At 10th level, this bonus becomes +2.

Inspiration: Warlords are able to inspire allies during combat by battle cries and shouting encouragement. Only allies who can clearly hear the warlord are affected by these abilities. Each of these abilities may only be used once per combat (and cannot be used again until the warlord has rested for at least one turn (10

minutes). The effects of these abilities do not stack under any circumstances.

- **Inspire Courage:** Warlords can use their action to grant all allies who can hear them +2 bonus to saves against charm and fear effects and a +2 bonus on attack and weapon damage rolls for a number of rounds equal to twice his Fighter Bonus. Using this ability costs the Warlord 3 hit points.
- **Inspire Greatness:** Warlords of at least 5th level can use their action to inspire greatness in a single willing ally who can hear them. The ally gains 12 (plus twice the target's Constitution modifier) temporary hit points, a +2 bonus on attack rolls, and a +2 bonus to saves against charm and fear effects for a number of rounds equal to twice the Warlord's Fighter Bonus. Using this ability costs the Warlord 5 hit points.
- **Inspire Derring-Do:** Warlords of at least 9th level can use their action to inspire daring-do in a single willing ally who can hear them. The ally gains a +4 bonus to their AC and all saving throws for a number of rounds equal to twice the Warlord's Fighter Bonus. Using this ability costs the Warlord 7 hit points.
- **Inspire Heroism:** Warlords of at least 11th level can use their action to inspire heroism in a single willing ally who can hear them. The ally gains the effects of a Heroism potion for a number of rounds equal to the Warlord's Fighter Bonus. Using this ability costs the Warlord 10 hit points.

Mercenary Unit: At level 9 a warlord can raise a mercenary unit from a friendly populated area. The Warrior must spend 2d4 days doing nothing but spreading the word in the local region and rallying interest. On the morning following his efforts, the Warrior will have gathered together a fighting force of (his level + CHA bonus) x 10 men-at-arms. The GM may increase or decrease this number by up to 50% to reflect the population of the area. The warlord is responsible for food and supplies for these men, and they will follow him so long as they are treated well. A warlord may only have one such mercenary unit at a time.

Stronghold: At level 12 a warlord may build a fortress in the borderlands or wilderness. The fortress will also attract settlers over time and they will look to the warlord for leadership.

Experience Base: 2200/120000.

Optional Non-Human Classes

The following classes are not suitable for all campaigns but may be used if the GM allows. These classes represent non-human races.

Dragonborn are scaly, quasi-reptilian humanoids that claim descent from dragons-- a claim corroborated by the fact that they are found in the same colors (though usually more muted, earthy shades) as the various known species of dragon, and by the fact that many of them share a breath weapon with the dragons they closely resemble. Dragonborn tend to be about six feet tall and weigh over 200 lbs. Dragonborn are often very proud, serious and humorless, but exude a predatory confidence. Prime Requisite: STR. Requirements: none.

Weapons and Armor: Dragonborn may use any kind of armor or weapon and may use shields.

Class Abilities: Dragonborn are covered in thick but flexible scales that give them a -2(+2) bonus to their AC. Dragonborn speak the languages of dragons, kobolds, orcs, and goblins.

Breath Weapon: All dragonborn have a breath weapon similar to that of a dragon which deals 1d6 points of damage per point of Fighter Bonus, to a maximum of 4d6 damage, along either a cone 40 feet long and 20 feet wide at its far end (if fire or cold), a 20-foot diameter cloud (if toxic gas), or a 60-foot line (if lightning or acid). A successful saving throw against Dragon Breath reduces the damage by half. The type of is determined by the dragonborn's color (just as for dragons). A dragonborn's color can be determined randomly by the GM or selected by the player (subject to GM approval). Using his breath weapon costs a dragonborn 5 HP for the first use in an hour, additional uses within an hour cost 10 HP each. A dragonborn may use his breath weapon a maximum number of times a day equal to his Fighter Bonus. A dragonborn gains a +2 bonus to any saving throws against damage of the same type as their breath weapon.

Battlefield Prowess: At 5th level, a dragonborn inspires other dragonborn under his command. Any dragonborn hirelings or mercenaries hired by the elf have a +1 bonus to their morale when personally led by the dragonborn.

Stronghold: Dragonborn can establish a stronghold in a natural setting, suitable to a dragon of their color, when they reach the 9th level. Dragonborn rulers can hire members of other races in the capacity of retainers or specialists, but only soldiers of dragonborn stock may be hired.

Experience Base: 2500/150000.

Dragonborn Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d8	+0/+0	+1	0	14	0
2	2d8	+0/+0	+1	0	13	2500

10	9d8+2	+7/+2	+4	0	6	460000
11	9d8+4	+7/+3	+4	0	6	610000

Tieflings are the descendants of nobles of a decadent human empire that entered into a series of alliances (both military and marital) with the forces of Chaos. They resemble devilish humanoids with an aristocratic bearing, and often have reddish, grey, or stark white skin, horns, and tails. Some have cloven hooves for feet. Tieflings tend to be about the same height (not counting their horns) and weight as humans. Prime Requisite: STR and MIND. Requirements: MIND must be 9 or higher.

Weapons and Armor: Tieflings may wear any kind of armor or weapon and may use shields.

Class Abilities: Tieflings can see 60 feet in the dark and are immune to the effects of fear. Tieflings can cast arcane (magic user) spells as a magic-user, but cannot learn spells higher than 4th level. Tieflings may hide in shadows, move silently, and backstab as a thief of the same level provided they are not wearing medium or heavy armor. Inherently Chaotic monsters remember the old pacts made between them and the first tieflings and so apply a +2 bonus to their reaction rolls and a -2 penalty to saving throws against any *Charm* spells the tiefling uses against them.

Magical Research: At 7th level, a tiefling is able to research spells, scribe scrolls, and brew potions. When a tiefling reaches the 10th level, he is able to create spells and magic items.

Stronghold: When a tiefling reaches level 9, he can build a stronghold. These strongholds will be in remote areas and tieflings will come from great distances to settle there. These settlers will look to the character as their leader.

Experience Base: 4000/200000.

Warforged are artificially-constructed beings made of a wooden, leather, and metal frame covered in armor-like steel plates, brought to life by means of magical and alchemical processes. They were created for a war that has since been consigned to history, and in the intervening years the secret of their creation has been lost. Despite their artificial appearances, warforged are self-aware and are often surprisingly "human" in their outlook. With the war they were built to fight gone, many turn to adventuring in hopes of finding a new purpose in life.

Apart from the color of their eyes and a serial rune on the crown of their heads, all warforged look essentially alike to human eyes, though some paint identifying markings upon themselves. A warforged stands six feet tall and weighs 275 pounds. Although their bulky, somewhat angular appearance suggests masculinity to human eyes, most warforged are not strongly concerned with gender (though they have no problem going along with whatever gender others are comfortable assigning them). Prime Requisite: STR. Requirements: none.

Weapons and Armor: Warforged may use any kind of armor or weapon and may use shields. As they are already covered in armor-like plates of metal, any armor they wear must be specially-fitted and costs twice as much.

Class Abilities: Warforged are covered in sturdy metal plating that grants them a -2(+2) bonus to their armor class. Although they have souls and are alive, warforged are immune to the effects of disease and poison, and have no need to eat, drink, sleep, or breathe (however poison gas such as the breath weapons of green dragons is still dangerous to them because it is corrosive to their organic components). Warforged have minds and souls and can therefore be *charmed*, *held*, or raised from the dead. While

warforged do not need to sleep, they must mediate to recover hit points.

Restrictions: Due of their wooden-and-metal construction, magical effects involving metal or wood affect them. For example, a rust monster may use their feelers to consume a warforged's plating and other metal components, dealing 2d6 damage per round and negating their armor bonus. Warforged always count as holding a metal object for purposes of *Heat Metal spells*, *Turn Wood* repels them on a failed save, and *Metal to Wood* reduces their AC bonus by 1.

Healing: Warforged do not heal body points on their own and receive only half the normal effect of healing magic, but they can be repaired by any skilled armorer with access to a forge with one hour of work per point of damage suffered.

Stronghold: When a warforged reaches level 9, he has the option of creating a stronghold that will attract warforged from far and wide. Warforged rulers can hire members of other races in the capacity of retainers or specialists, but only warforged soldiers may be hired.

Experience Base: 2200/120000.

Warforged Advancement Table

Level	HP	PCB/MCB	FB	Mem	Save	XP
1	1d8	+0/+0	+1	0	14	0
2	2d8	+0/+0	+1	0	13	2200
3	3d8	+1/+0	+1	0	12	4400
4	4d8	+2/+1	+1	0	11	8800
5	5d8	+3/+1	+2	0	10	17600
6	6d8	+4/+1	+2	0	9	35200
7	7d8	+5/+1	+2	0	8	70000
8	8d8	+5/+2	+2	0	7	140000
9	9d8	+6/+2	+3	0	7	260000
10	9d8+3	+7/+2	+3	0	6	380000

Other Character Information

The following other information is available:

Determining Hit Points: Each class has an HP column on their Class Advancement Table. XdY means roll X dice of type Y and add the character's Strength bonus to each die rolled. The minimum roll (after adding the Strength stat bonus) is 1. After level nine, a few hit points (1, 2, or v3 are added at each level. Strength stat bonuses are not added for levels greater than 9.

For example, a first level fighter has a Strength of 15 for a STR stat bonus of +1. At first level, the player rolls 1d8 and adds +1 to determine his maximum hit points. At second level, the player would roll another 1d8+1 and add the result to his first level hit point maximum to get the character's second level hit points.

Max at First Level (Optional): Instead of rolling a die for first level characters, assume the die roll was the highest possible roll for the type of die. *This option is strongly recommended.*

Reroll All Dice at Every Level (Optional): Instead of just rolling a single die at every level and adding the result to the character's previous hit points, reroll all the dice every time the character gains a new level, using the higher of the new roll or the previous hit point total +1.

Weapons and Armor Limitations: As noted, many classes are limited in what weapons and armor they can utilize. Regardless of such class limitations, characters of any class may purchase, carry, and use any weapons or armor desired. However, characters who equip themselves with weapons and armor unusable by their class will fight as 0th level characters while so equipped. They also will receive no bonus on their attack rolls or armor class from ability scores or equipment, may not use any of their class powers, and do not gain XP.

Determining Experience Points Required to Advance: The XP column of each class table lists the minimum XP a character needs to reach a given level in a class for standard characters. This table will need to be recalculated from the Experience Base numbers of the class if any optional rules that modify the experience base are used for a character.

Experience Base: Two numbers are listed for each class, for example, the Fighter's Experience Base is 2000/12000. The first number (2000 in the example) is the Low Level Base and the second number (120000 in the example) is the High Level Adder. Optional rules may have Experience Base modifiers. Again these are listed with two numbers (example: +100/+2500), if a character possesses the optional ability, the first number (+100 in the example) is added to the Low Level Base for the character's class and the second number is added to the High Level Adder for the character's class. If a Fighter had the one optional ability from this example, his final Experience Base would be: 2100/122500.

Calculating Experience Points per Level: To calculate a character's custom XP advancement schedule, start with the Low Level Base number from the character's final Experience Base (including his class base plus all modifiers from optional rules). That is the experience point total required to advance to 2nd level. The experience required to advance doubles each level thereafter until 8th level reached. Exception: Round the experience point requirement for 7th level to the nearest 5000.

After 8th level, the amount of experience points required to advance no longer doubles. Instead of doubling, it increases by a flat amount each level: the High Level Adder from the character's final Experience Base.

The standard XP advancement charts listed for each class were calculated by this method and should serve as examples of this calculation.

Class Special Abilities

Some classes have special abilities which cannot easily be explained in a sentence. These named special abilities are described in this section.

Fighting Classes Special Abilities: All Fighters, Dwarves, Elves, Halflings, and Warforged (referred to collectively as "fighters" in the special ability descriptions in this section) have the following special ability:

Cleave - After a Fighter kills an opponent, he may immediately make another attack against any still-standing foe within 5 feet. The maximum number of attacks he can make in one round is equal to his level.

Fighters, Dwarves, Elves, Halflings, and Warforged may select one special ability from the following list at levels 3, 6, 9, 12, and 14. Each special ability may only be selected once.

Accuracy - A Fighter with this special ability rolls one die size larger for damage (1d6 instead of 1d4, 1d8 instead of 1d6, etc.) with thrown or missile weapons.

Berserker Rage - A Fighter with this special ability may go into a berserker rage when in combat. During a berserker rage, the Fighter always attacks the nearest foe (determine randomly if multiple foes in range). His ferocity adds his level to his attack roll and his damage. To break off combat (before all foes are dead) the berserk Fighter must make a MIND save versus a DC of 10 (plus 2 for every opponent still standing) in order to break off from fighting. Each round the Fighter is berserker costs him 2 hp, subtracted immediately after the berserker rage ends. A berserk Fighter cannot use any combat stunts nor the Find Weakness or Leadership special abilities.

Blind-fighting - A fighter with this ability may attack while blind or in conditions of total darkness with only a -2 penalty to hit.

Brutal Attack – A Fighter with this special ability rolls one die size larger for damage (1d6 instead of 1d4, 1d8 instead of 1d6, etc.) with melee weapons.

Danger Sense: A Fighter with this special ability has a sixth sense for danger and can never be surprised so long as he is conscious and aware.

Dodging - When not wearing armor (and conscious and able to move), a Fighter with this special ability may add his level (plus 1 for every point of dexterity above 15) to his AC.

Dragon Slayer - A fighter with this ability ignores the -1 penalty to saves against breath weapons and other blasts.

Find Weakness - When attacking an unaware opponent, a Fighter with this special ability may ignore any AC bonus the opponent has due to armor worn. He is hitting at his opponent's weak, exposed areas.

Goblin Slayer - A fighter with this ability treats his Fighter Bonus as one higher when fighting kobolds, goblins, orcs, gnolls, hobgoblins, bugbears, ogres, trolls, and giants. At the GM's option similar abilities might exist for fighting demihumans (humans, dwarves, elves, halflings, and gnomes) or other groups of monsters (such as dragons or the undead).

Grappling Expert - A fighter with this bonus retains their full AC while grappling.

Mounted Combat - The character receives a +1 bonus to attacks while mounted.

Leadership - When a Fighter with this special ability is leading a group of hirelings under their command, When leading a group of hirelings under their command, the hirelings subtract the Fighter's Fighter Bonus in any morale checks and add one-half the Fighter's Fighter Bonus (round up) to their attack and damage rolls.

One Shot – A Fighter with this special ability incapacitates opponents (knocks unconscious or otherwise out of combat) whose hit dice or level are less than or equal to the Fighter's level on a critical hit (in addition to the normal effects of a critical hit).

Sniper - A fighter with this ability ignores -2 of the penalty for using a ranged weapon at medium or long range.

Striker – A Fighter with this special ability makes a critical hit on a natural roll of 19 or 20.

Terrifying Style – A Fighter with this special ability has a terrifying combat style. Opposing side must check morale every time he makes a critical hit.

Toughness - A fighter with this ability has extra hit points equal to twice their Fighter Bonus

Unarmed Combat – A Fighter with this special ability does 1d6 damage with his bare hands (instead of the standard 1d2 bare handed damage).

Weapon Focus - A fighter with this ability adds +2 to their Fighter Bonus with one class of weapon: Swords and daggers; spears and pole arms (including the staff); flails, hammers, and maces; bows and crossbows; axes; or slings and thrown weapons

Elf/Illusionist/Magic-User/Tiefling Special Abilities: All class with the ability to learn and cast arcane spells have the following special abilities. All require the use of a special wand hand-made by the caster. Note that references to "magic-users" in this section

actually refer to magic-users as well as illusionists, elves, and tieflings.

Create Handmade Wand - A Magic-User knows how to create the handmade wand required for Magic-User special abilities. The wand must be made by the Magic-User using it to function. Creating the wand requires a knife, a living tree to cut the wand from, and 12 minus the Magic-User's level hours (minimum of 1 hour) of uninterrupted time.

Arcane Blast – A magic-user can shoot a dart of magic energy from the tip of their handmade wand once per round provided no other action is taken. They must roll to hit the target normally. Range: short 60; medium 120; long 180. Usable once per round if no other action taken and does 1d4 damage if it hits. No saving throw is allowed. Requires pointing a handmade wand at the target and costs 1 HP per use. The visible effects can be whatever the Magic-User desires; note that this does not affect damage, it only adds color to the ability.

Arcane Dueling - By forgoing their action on their turn, a magic-user can engage another magic-user in an Arcane Duel.

On each of their turns, both combatants roll a d20 and add their Magic Attack bonus - whoever scores higher wins that round. Each round costs the combatants 1HP, and each round they succeed, the do damage equal to their Magic Attack bonus (minimum 1HP) to their opponent. A draw roll means both opponents take 2HP damage. An opponent can leave a duel at any time, but takes the opponent's Magic Bonus as damage (as though they had scored a successful hit).

Both players and GMs should make their descriptions vivid and entertaining - but appropriate to the level of the combatants. A 1st-level mage and a Kobold Shaman will be throwing sparks and stings at each other, while 10th-level mages will have battles that look more like Rush album covers.

Minor Magic - Magic-Users can cast minor "everyday/non-combat" magic at will. Basically, any everyday thing someone could do mundanely, a magic-user or illusionist can do with minor magic. Attempting something the GM considers abusive fails and causes the magic-users wand to explode (doing 1d6 backfire damage to the magic-user unless a WIL save is made). Usable once per round if no other action taken. Requires waving a handmade wand. Cost 1 HP per use.

Some examples: Light a candle or pipe with a flame from the wand tip. Dust things – at first level a minor magic spell might be needed for each shelf or piece of furniture, while at third level a single spell might dust a room and at sixth level the magic-user's the entire floor of a house or tower. Tie or untie a knot. Float coins from the magic-users coin purse to a merchant's hand. Open a cabinet. Mix drinks. Dress/undress.

Cleric Special Abilities: Clerical special abilities vary by the type of deity the character serves. The following are examples special abilities for common types of deities. If a campaign features other types of deities, The GM may need to create special abilities for these deities their specific campaign setting.

Priests of Storm/Thunder Gods: (Example deities: Thor or Zeus) Clerics of storm/thunder deities can use javelins. In place of the Turn Undead ability, clerics of storm have the ability to throw a bolt of lightning that can strike up to four creatures in a straight line from you within 30 feet, for 1d8 + level lightning damage. Use of this ability requires a ranged attack roll vs AC and costs 3 Hit Points

Priests of War Gods: (Example deities: Ares or Tyr) Clerics of war deities can wield non-magical swords. In place of the Turn Undead ability, clerics of war gods gain the Tactical Expertise ability:

Tactical Expertise – A cleric with this special ability gains a number of Tactics Points per day equal to his level plus one for every point of charisma above 13. These points are spent directly before the attack roll of anyone in the cleric's party, giving a +1 per point spent. Tactics Points can also be spent before any enemy's attack roll, giving a -1 per point spent.

Priests of Knowledge/Magic Gods: (Example deities: Hecate or Thoth) Clerics of Knowledge/Magic deities are somewhat less adept in combat than normal clerics, having only the same knowledge of weapons and armor as a magic-user. In place of the Turn Undead ability, clerics of knowledge/magic deities gain the Careful Study and a limited ability to use arcane magic: 1) the GM will add adding one spell suitable to the deity from the magic-user spell list that is not also on the cleric spell list for each spell level. 2) the cleric may attempt to cast an arcane spell from any scroll successfully on a roll of 1d20 + MIND bonus + Magical Combat Bonus versus a DC of 10 + (2 x spell level, rounded up). The spell fades from the scroll whether the attempt is a success or failure.

Careful Study: If the cleric is allowed to study a problem or physical obstacle for a full turn without interruption, she can add her MIND bonus to a skill check to overcome it-- even if she would add it already. If she is allowed the time and resources to research thoroughly, she can add an additional bonus to the check as long as she confronts the same problem or obstacle again within a number of days equal to her MIND score. If the cleric is allowed to study for a full turn she acquires a +1 bonus. She can improve this bonus to +2 with another two hours of study. Another three hours beyond that grants a +3 bonus, and so on (to a maximum of fourteen hours of study to attain a +5 bonus). By the same token, if a cleric is allowed to study an enemy's fighting style for three rounds without interruption, she gains her MIND bonus to the next attack she makes against it as long as she makes the attack within one turn.

Priests of Craftsman Gods: (Example deities: Hephaestus or many gods of the dwarves) are expert at any crafts (such as smithing or masonry or sculpture) that their god represents. Instead of the Turn Undead ability, you gain the ability to repair any broken small object and can detect and identify magic items (with a MIND check, DC 16 if you just examine the item, DC 12 if you have the opportunity to closely observe the other properties of the item or see it used). If the campaign is using Weird Science, you are probably well-enough trained with machinery that a device is only DC10 for you to figure out how to operate.

Repair: Repairs a broken or torn small object at a cost of 2 HP. It does not restore magic. The cleric must know what the item is to repair it.

Priests of Nature Gods (Example deities: Pan, Flora): The GM will add one spell of each level from the Druid Spell list (that is not on the Cleric spell list) that is appropriate for the specific deity to list of spells available to the cleric. Note: Followers of deities considered "Earth Mothers" should be druids if the optional Druid class is used.

Priests of Trickster Gods (Example deities: Loki, Hermes, Coyote, or Anansi) can use daggers and are experts at riddles. In place of the Turn Undead ability, you add a number of illusionist spells equal to the higher of your MIND or CHA bonus (but always at least 1) to your own at each spell level. Priests of Trickster Gods, also have the Minor Divination ability (so they can learn secrets that will better enable them to prepare a clever prank or con).

Minor Divination - A cleric may spend 10 minutes in prayer asking his deity whether or not a specific action would have generally good or generally bad results *from the deity's point of view*. The cleric will have vague

feeling of rightness or wrongness. A cleric may do this at most 1 per day (+1 additional time per day every 5 levels).

Priests of death gods (Example deities: Anubis, Hades) have learned to ceremonially use sickles, but usually only favor light armor at the most. The effectiveness of a successful Turn Undead is doubled.

Priests of Eldritch Horror Gods: (Example deities: Cthulhu, Nyarlathotep) Clerics are trained in daggers for the sake of sacrifice, and often do not wear armor. In place of the Turn Undead ability, they gain the Whispered Secret ability and the ability to use arcane magic scrolls as a thief.

Whispered Secret: Being inured to the horrible secrets of the universe, you can speak them in an attempt to drive enemies to madness. Roll 1d20 + CHA Bonus + level versus a DC of 10 + twice the Hit Dice of the creature you are addressing, who must be within about 5 feet to hear you clearly. If you succeed the target acts as if afflicted by a *Confusion* spell, or flees in terror, your choice. This costs HP equal to the HD of the being to whom you are speaking. Some creatures, such as Brain Eaters and Deep Scum, are perfectly aware of these things and are unaffected by this ability. If you like, you can instead shout your dark knowledge aloud, but to do so is to call down the wrath of all that is good and holy, for it costs HP damage equal to the collective HD of all who hear you and is indiscriminate in who it effects, save for creatures that would be immune or fellow priests of the elder ones.

Note: Clerics who lose the Turn Undead special ability may have a Turn Undead spell (Level 1) that functions like the ability if the GM considers it appropriate to the deity if undead are a major part of the campaign world.

Background

Characters may select, with the approval of the GM, a one or two-word background that represents a broad base of skills and knowledge, e.g. Farmer, Merchant, Desert Nomad, Noble, Shaman, Templar, Thyatian Mercenary, Ritualist, etc. Backgrounds need not be related to the PCs class, e.g. a player who creates a deeply religious fighter skilled in the arts of vision interpretation, divination and oration might pick 'Prophet' as a background. Backgrounds may not duplicate a class.

The GM will consider the character's background just as he would the character's class when deciding if a character will succeed with an action. For example, a character with an "Engineer" background should have a much better chance of damming a creek or building a bridge over it than a character with a "Courtier" background.

The word "word" should be taken loosely. For example, the name of a culture/location should be considered "one word" even if it is "Holy Panamon Imperium". "Blue Knight of the Holy Panamon Imperium" could count as "two words" if such clearly describes a single background in the campaign world.

Alignment

Basic Alignment: There are three basic alignments: Law, Chaos, and Neutral. Only intelligent beings have alignment and the vast majority of those tend to be neutral. Player Characters should select an alignment for their characters.

Law: Characters aligned with Law try to avoid unnecessary harm to others by their actions or inaction. They often put the good of society/everyone over the immediate good of themselves and their friends. They are usually willing to help others/society even if doing so is somewhat inconvenient. If given power over others, they tend to use it for the good of all.

Chaos: Characters aligned with Chaos only care about themselves and those who are currently useful to them. While they may not go out of their way to harm others, they do not care if others are harmed as long as they succeed at their personal goals. They are generally only willing to help others/society if they get something they want or need out of it. If given power over others they tend to abuse it and use it mainly to help themselves.

Neutral: Neutral characters tend to put themselves and their friends first, but will generally not allow others to come to unnecessary harm or inconvenience in order to succeed. They are willing to help others/society so long as doing so is not inconvenient. If given power over others, they tend to use it for good, but they and their friends come first.

Virtues and Vices (Optional): As in real life, each character has virtues (admirable character traits) and vices (not so admirable character traits). Players select six traits from the lists below before play starts. Neutral characters must select three from each list. Lawful characters must select at least one (but no more than two) vices. Chaotic characters must select at least one (but no more than two) virtues. Players can select virtues and vices not on the list with GM approval.

Virtues	Vices
Academic	Arrogant
Austere	Bigoted
Bold	Capricious
Cheerful	Cowardly
Compassionate	Egoistical
Courageous	Fearful
Daring	Hateful
Determined	Hidebound
Fair	Impulsive
Faithful	Insensitive
Friendly	Lazy
Generous	Manipulative
Gregarious	Miserly
Honest	Petty
Hopeful	Power Hungry
Industrious	Rude
Just	Self-Centered
Kind	Spendthrift
Patriotic	Stubborn
Thoughtful	Thoughtless
Thrifty	Vengeful

Character Tagline (Optional)

Each character should have one fairly unique feature in his personality or background that sets him or her apart from other characters and npcs in the campaign (and from other characters the player may play or have played in the campaign. This feature should not be something that would give a mechanical bonus in play, but something interesting and unique in the character's personality, background, or history. The GM should work with the player to ensure the character's tagline is appropriate to the campaign setting. A tagline can also be a "catch phrase" that sums up the character in some way.

Some examples of a simple character taglines from history and literature would be "never tells a lie" for George Washington, "the lionheart" for Richard I of England, "demands his martinis be shaken not stirred" for James Bond, "cultivates a grandfather image but quietly manipulates others to achieve the greater good" for Dumbledore, and "I didn't do it, nobody saw me, you can't prove anything" for Bart Simpson.

Standard Rules

Skills

There are no skills in Microlite81. Instead players are expected to think like adventurers, tell the GM what they are doing and the GM decides if it will succeed in the situation, taking into account the characters' classes and backgrounds. If the GM decides a random success chance is truly needed he may resolve the situation with a roll of his choice or he may call for one of the following rolls:

Primary Skill Roll: 1d20 + Stat Bonus + Class Level if the character is attempting something directly related to their class or background.

Secondary Skill Roll: 1d20 + Stat Bonus + (Class Level/2, round up) if the character is attempting something only loosely related to their class or background.

Minor Skill Roll: 1d20 + Stat Bonus + (Class Level/3, round down) if the character is attempting something not really related to their class or background.

When the GM calls for a skill roll, he will declare the type of skill roll, which stat the skill roll falls under, and any situational modifiers and the player will make a skill roll. (The GM should make the roll in secret if seeing the result would give the player more information than his character should have.)

Roll higher than the GM assigned Difficulty Class to succeed. Unless the GM rules otherwise, a natural roll of 20 always succeeds for a Primary Skill Roll. Suggested Difficulty Classes: Easy - 8, Normal - 12, Difficult - 16, Hard - 20, Very Hard - 24, Legendary - 28, Unbelievable - 32.

Basic Adventuring Skills: Unless a player specifies otherwise about a character at character creation, all characters are assumed to have basic practical adventuring skills such as maintaining weapons and armor, riding a horse, setting up a camp, swimming, climbing, cooking, first aid, etc., and have a rough idea of the value of common coins, trade goods, gems, and jewels. Success should simply be assumed unless there are unusual conditions.

Languages: All character races speak common. Other intelligent beings speak their own languages (20% chance of also speaking common). Beings with a MIND over 10 may speak one additional language per point of MIND over 10 (these are in addition to any languages known by race).

Talents: At level 2 (and every 2 levels thereafter), characters may select one narrow area of skill where they are better than average: something they are "Good at." This talent should be either something directly related to their class or background -- or something they have spent game time and/or money learning. If the player wishes (and the GM approves), instead of selecting a new talent a talent the character is already "Good at" be improved to "Expert at" at a later even-numbered level and a talent the character is "Expert at" may be improved a final time to "Master at" at yet a later even-numbered level. The GM will consider the character's talents just as he would the character's class and background when deciding if a character will succeed with an action.

Weapon Mastery

There are three levels of Weapon Mastery: Good at (a specific weapon), Expert at (a specific weapon) and Master at (a specific weapon). Naturally you have to already be "good at" a specific weapon before you can become "expert at" that specific weapon and you have to be "expert at" a specific weapon before you can become "master at" that specific weapon.

Classes with a non-zero Fighter Bonus select a Weapon Mastery at 1st level and all odd-numbered levels. Classes with a zero Fighter Bonus can only gain a level of Weapon Mastery by selecting it in place of a regular talent at even-numbered levels.

Only classes with a non-zero Fighter Bonus can reach the "Master at" level. Arcane casters (except Elves) can only reach the "Good at" level. No character can take a level of Weapon Mastery in a weapon he is unable to use because of class restrictions.

The effects of each level of Weapon Mastery are as follows:

Good at [Specific Weapon]: +2 to hit when wielding this specific weapon. Roll damage as 1d2+2 (for 1d4), 1d3+3 (for 1d6), 1d4+4 (for 1d8), etc. (Arcane Casters are only +1 to hit.)

Expert at [Specific Weapon]: +2 to hit when wielding this specific weapon. Roll damage as 1d2+2 (for 1d4), 1d3+3 (for 1d6), 1d4+4 (for 1d8), etc. Add +1 to damage for every two points you beat the number you need to hit on your attack roll. Critical Hit on a natural 19 or 20. Can hit beings that require a silver weapon to hit with a normal weapon.

Master at [Specific Weapon]: +3 to hit when wielding this specific weapon. Roll damage as 1d2+2 (for 1d4), 1d3+3 (for 1d6), 1d4+4 (for 1d8), etc. Add +1 to damage for every point you beat the number you need to hit on your attack roll. Critical Hit on a natural 18, 19, or 20. Critical hit does double normal body damage (or adds an extra die of damage on targets without body points). Can hit beings that require a silver or a magical weapon to hit with a normal weapon.

Specific Weapon means just at one specific type of weapon: a dagger, a short sword, a longbow, a sling, etc.

Fighters may instead elect to take Weapon Mastery in an entire class of weapons (one-handed swords, bows, thrown weapons, pole arms, etc.). The effects of Weapon Mastery for an entire class of weapons are less than for a specific weapon as shown below:

Good at [Weapon Class]: +1 to hit when wielding weapons of this general type.

Expert at [Weapon Class]: +1 to hit when wielding weapons of this general type. Roll damage as 1d2+2 (for 1d4), 1d3+3 (for 1d6), 1d4+4 (for 1d8), etc.

Master at [Weapon Class]: +1 to hit when wielding weapons of this general type. Roll damage as 1d2+2 (for 1d4), 1d3+3 (for 1d6), 1d4+4 (for 1d8), etc. Add +1 to damage for every two points you beat the number you need to hit on your attack roll. Critical Hit on a natural 19 or 20.

Saving Throws

When subject to an unusual or magical attack, characters generally get a saving throw to avoid or reduce the effect. To make a saving throw, roll 1d20, add modifiers based on the type of saving throw (and any circumstantial modifiers set by the GM). A natural roll of 1 automatically fails. A natural roll of 20 automatically succeeds. Otherwise, the saving throw is successful if the total of the roll and modifiers is greater than the saving throw listed for the character's level. Unless noted otherwise, monsters save as a Fighter of a level equal to one-half their hit dice, rounded up.

Saving Throw Modifiers: What a character is saving against modifies the saving throw die roll. In cases where multiple types apply, use the first one listed below:

Breath Weapons: Breath Weapons and other blast-like effects give a -1 modifier to the saving throw.

Poison: Dwarves get a +3 bonus.

Death Magic: This includes negative energy attacks. Clerics get +3 due to their link with the higher and lower planes.

MICROLITE81 EXTENDED (VERSION 1.0 SILVER)

Rod, Staff, Wand: All magical effects created by a rod, staff, or wand give +1 bonus.

Spells: +2 bonus for Magic-Users.

Special Saving Throw Modifiers: Where applicable, these modifiers are applied in addition to those listed above:

Charm and Illusion Magic: Add MIND stat bonus.

All Magical Effects: Dwarves and Halflings receive a +4 bonus to all saving throws against a magical effect.

Magic

Magic-using characters can cast any spell from their respective spell list with a spell level equal or below 1/2 their class level, rounded up. A Magic-User (including Elves, Illusionists, and Tiedlings) starts with Read Magic and 1d2 additional first levels spells in his spell book (which must be approved by the GM) and can add more spells by finding (or buying) them on scrolls or books and copying them into his spell book. Clerics and Druids do not need spell books and automatically have access to all divine spells of a level they can cast (use of certain spells may be forbidden by the cleric's deity, however).

A magic-using character can memorize up to his memory limit ("Mem" on the appropriate Level Advancement Table) in spells at one time. A Magic-User (including Elves, Illusionists, and Tiedlings) requires his spell book and one hour of time to change the spells he has memorized. Clerics and druids simply need one hour of quiet meditation to change their spell selection.

Casting Cost: Direct casting a spell of any kind costs Hit Points as shown on the following table:

Spell Level	1	2	3	4	5	6
HP Cost	2	3	5	7	8	10

Although there are ways to reduce the cost of casting spells, the casting cost cannot be reduced below 1 Hit Point.

Spell Difficulty Class: For purposes of things like dispelling, the Difficulty Class (DC) for all spells is: 10 + Caster Level + Caster's MIND bonus

Signature Spells: Select one 'signature' spell per spell level from first upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

Combat Casting: In combat, if a character is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles. This costs the caster 1 HP per level of the spell he was attempting to cast and the caster loses his action for the round. Characters casting spells in combat must remain stationary.

Ritual Magic: A spell-caster can perform ritual magic to cast spells of any level available to his class (and other special rituals that might be found in old books or scrolls) provided the caster has a written copy of the spell or ritual, any needed materials (mainly required by special rituals), and the time and space needed to perform the ritual.

Ritual casting of a spell of a level the caster is able to cast normally takes 10 minutes and costs 1 HP per level of the spell being ritually cast. Ritual casting of a spell of a level the caster is not yet able to cast normally takes 10 minutes per level of the spell and costs twice as much in hit points as it would to cast directly. Ritual casting of a special ritual takes as long and costs as many HP as the ritual states (that is, the GM assigns these as needed when he creates the special ritual). Multiple Magic-Users and/or Clerics may participate in a casting a special ritual with the HP cost of casting divided among them.

Optional Sacrifices: One or more beings with human or better intelligence may be sacrificed during ritual magic. Each sacrifice made adds 10 minutes to the ritual and provides 10 plus the being's level or hit dice in HP to power the ritual. This amount is tripled if the being is truly a willing sacrifice. Some special rituals may require the sacrifice of intelligent beings. The sacrifice of intelligent beings is normally against the law in civilized societies.

Hit Points and Healing

Hit Points: Hit Points are an abstract measure of the amount of damage a character can suffer before falling unconscious and taking severe injuries. If Hit Points reach 0, the character is unconscious and begins to take severe physical injury. Further damage, including any remaining points of damage the attack that reduced hit points to zero, directly reduces Body Points. Hit Points represent stamina, luck, minor cuts and scrapes, etc. Optional: To avoid confusion, "Hit Points" may be renamed "Fatigue Points."

Body Points (BP): All characters have 20 Body Points. If Body Points reach 0, the character is dead. Each two points of body damage an Adventurer has suffered gives a -1 to all attack, success, saving, and similar rolls (also to strike speed).

Recovering Hit Points: All characters recover all hit points after six hours of total rest. If a character has lost Body Points due to wounds, only 50% of total hit points lost are recovered per six hours of rest.

Healing Body Point Damage: Body points lost recover at a rate equal to the character's STR Bonus (minimum of 1 point regained) per full day of rest. If a character with up to 50% Body Point damage (up to 10 points of BP damage if the standard 20 BP is used) performs more than very light activity or careful travel during a day, he has a 50% chance of losing an additional body point. If a character with more 50% of Body Point damaged (11 or more points of BP damage if the standard 20 BP is used) does anything other than rest quietly in bed during a day, he has a 50% chance of losing an additional body point.

Bleeding (optional): A character who has been reduced to 0 hit points by weapon or other trauma-related damage will eventually bleed out and die if their wounds are not bound. A bleeding character must make a STR Save every minute or suffer one body point of additional damage. Binding wounds takes 1 minute per point of body damage taken, but no further bleeding rolls are needed (including while the wounds are being bound). Any healing spell cast on a bleeding character will effectively stop the bleeding.

Healing Magic (Optional): Healing magic is not instantaneous, 1 body point will be cured per 10 minutes of rest after the spell is cast (up to the maximum the spell will cure), if the rest is interrupted any remaining points of healing are lost.

Second Wind (Optional): Once per day, characters may regain 20% of their total hit points (round up) by resting in a safe place for an hour while eating a meal. This amount is reduced by 2 hp per point of body damage (to a minimum of 0 hp recovered).

Monster Body Points (Optional): If the GM does not mind the added complexity, monsters may have Body Points as well. A monster's Body Points are equal to twice the number of hit dice the monster has. This option is not recommended.

Combat

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 a side is surprised and may not act at all in the first round. If attacking from an undetected ambush, the ambush victims are surprised on a roll of 1-4. A side cannot be surprised if it is aware of the other.

Initiative: Each side rolls a d6 (reroll ties). High roll wins initiative. The combat order is: 1) Side that lost initiative declares actions. 2) Side that won initiative declares actions. 3) Side that

won initiative acts. 4) Side that lost initiative acts. 5) Any bookkeeping is done. This ends a combat round. If the combat continues, roll initiative again and repeat.

Fighting Classes: A Fighting Class is a character class with a positive, non-zero Fighter Bonus. Examples: Dwarf, Elf, Fighter, Halfling. These classes may add their Fighter Bonus to their attack and damage rolls (both melee and missile).

Combat Stance: Any character able to act may select a combat stance. Any character who does not announce their combat stance when declaring their actions for the round is assumed to select the "Standard" Combat Stance. Combat Stances (and their effects) are *Full Defense* (Attack: no attack possible; AC: +2 bonus, +4 bonus with shield, +6 bonus with large shield), *Active Defense* (Attack: -2 penalty; AC: +1 bonus, +2 with shield), *Standard* (Attack: Normal; AC: Normal), *Active Attack* (Attack: +1 bonus; AC: -1 penalty), and *Full Attack* (Attack: +2 bonus; AC: -2 penalty). Spell casters casting a spell cannot select the Full Defense or Active Defense Stance.

Actions: Combat is very abstract. Each combat round lasts 10 seconds and includes a lot of jockeying for position, feints, etc. The "hit roll" determines if any damaging blows were delivered during the round. Everyone can do one thing each round; move, attack, cast a spell, etc. The GM may choose to allow some combined actions, like a charge attack, to be one thing. Drawing a weapon, speaking or similar activities are "free" and do not count as an action.

Attack Rolls: Add attack bonus to d20 roll. A natural roll of 1 always misses, otherwise if the result is higher than your opponent's Armor Class (AC), it's a hit. A natural 20 that would otherwise hit is automatically a critical hit doing maximum damage.

Melee attack bonus = STR bonus + Physical Combat Bonus
Missile attack bonus = DEX bonus + Physical Combat Bonus
Magic attack bonus = MIND bonus + Magical Combat Bonus

Armor Class (AC) = 10 + DEX bonus + Armor bonus. Basic Armor Bonuses: Light Armor (e.g. leather) +2, Medium Armor (e.g. Chainmail) +4, Heavy Armor (e.g. Plate) +6; a shield adds +1; a large shield adds +2.

Critical Hits: A natural 20 that would otherwise hit is automatically a critical hit doing maximum damage and doing a number of body points damage equal to the number of damage dice rolled (normally 1). Most monsters do not have body points, so a critical hit will do maximum damage plus a normal damage roll to them and cause them to lose their next attack.

Critical Hit Special Effects (optional): When a Fighting Class character (or a monster, at the GM's option) has selected the Active Attack or Full Attack combat stance for a round and scores a critical hit in melee combat during that round, one of the following special effects may be imposed at the attacker's option:

- *Trip:* Target is knocked prone.
- *Disarm:* Target's weapon or shield is knocked away in a random direction a number of feet equal to half the damage you dealt.
- *Reposition:* Force your target to move to a new location of your choice, up to a number of feet equal to half the damage you dealt (plus attacker's STR bonus). Attacker may move with target if attacker desires.
- *Shield Slam:* If wielding a shield, bludgeon your target with it, dealing damage as a shield bash. Target is then forced back from you a number of feet equal to half the damage dealt by the original attack (plus the attacker's STR bonus).
- *Disorient:* Blow leaves your opponent off-guard. Until the end of his next turn, target is confused.

- **Hinder:** Target is briefly slowed, reducing his speed to five feet until the end of his next turn.

If the movement effect of Reposition or Shield Slam would force the target over a cliff, into a pool of dangerous liquid, or the like, the target gets a DEX save to stop safely at the edge.

Critical Miss Special Effects (optional): When a Fighter Class character (or a monster, at the GM's option) has selected the Active Defense or Full Defense combat stance for a round and an enemy attacking him during that round rolls a natural 1 on their attack roll, one of the following special effects may be imposed at the defender's option:

- **Counterattack:** You make a melee attack against your attacker. This is in addition to any other attacks you might make during the round.
- **Disengage:** You dart away from your attacker, moving up to your movement, but you cannot engage another by doing so.
- **Blind:** You spit, throw sand, or otherwise attack your enemy's eyes. Until the end of the next round, he is blinded.
- **Redirect Attack:** Your opponent's attack automatically strikes another creature of your choice within reach of your enemy's weapon.
- **Feint:** You quickly feign an attack against your foe. Until the end of his next turn, your enemy is has a negative modifier equal to your level to all actions.
- **Steal:** You pluck a small unprotected item--usually no more cumbersome than a weighty coin purse--from your foe.

Light Weapons: Fighting classes can use DEX bonus + Physical Combat Bonus as Melee attack bonus instead of wielding a light weapon. Fighting classes can wield 2 light weapons and attack with both in a round (making one attack roll at -2). Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

Range Penalties: If the target is relatively close, there is no penalty to hit for range. If it's mid-range for the weapon you're using, take a -2. If it's farther out than that, the GM will assign a -4 to -10 penalty to hit, depending on his judgment of how far away the target is.

Cover: Characters behind an object gain +2 to +10 to their AC against ranged attacks, depending on the extent of the cover (light cover = +2 to nearly complete = +10). In some situations, the GM may allow half this AC bonus to apply to saves.

Damage: Light weapons do 1d4 damage. Medium weapons do 1d6 damage. Heavy weapons do 1d8 damage. Add STR bonus and any class damage bonus to Melee damage (x2 for two-handed weapons). **Option:** Weapons do the damage listed for the specific weapon on the equipment table.

Shield Special: A character with a shield may choose to have it completely absorb all the damage from any attack (including a critical hit). A non-magical shield shatters when it does so. A magical shield permanently loses one point of its magical AC bonus when it does so, becoming a non-magical shield if its magical AC bonus is reduced to zero.

Special Combat Situations:

Opportunity Attacks: Anyone not surprised and with a ready weapon who is not already involved in a melee combat gets a free attack on opponents trying to move past them – this attack is in addition to their normal attack for the round. If the attack is successful, the opponents takes damage and can move no further that round.

Ranged Attack into Melee: Shooting or throwing into a crowded

melee is not a good idea: there is a 50% chance you'll hit a friend instead of an opponent. Fighting classes may take -4 to hit to avoid hitting a friend.

Dodge: A character who is not making an Active or Full Attack may forgo his next attack at any time and dodge out of the way. Roll 1d20 + DEX bonus + Physical Combat Bonus (PCB). The total is the character's effective AC until his next attack. If it's lower than his real AC, well, the character zipped when he should've zagged. The GM may modify the roll by +2 or -2 (or more) to reflect the terrain and cover of the area.

Aid Another: A character who can make a melee attack on an opponent engaging an ally in melee combat can help that character attack or defend by distracting or interfering with an opponent. Make an attack roll against AC 10. If successful, the ally gains either a +2 (Fighter Bonus +1 for fighting classes) bonus on his next attack roll against that opponent or a +2 (Fighter Bonus +1 for fighting classes) bonus to AC against that opponent's next attack (aiding character's choice), as long as that attack comes before the beginning of the aiding character's next turn. Multiple characters can aid the same ally.

Grapple: A character can make a grapple attack on an adjacent target. A successful attack roll means they are then grappled with their target. When grappled, both the attacker and the defender's AC becomes 10 and neither can make move actions. When grappled, the defender can't make normal actions and must make opposed rolls (1d20 + PCB) against the attacker to attempt to break free. As long as the defender is grappled the attacker can make automatic unarmed attacks on the defender.

Knockout Blow: A character can attempt an armed melee attack against an adjacent creature to stun them. On a successful hit the target is stunned one minute for every point the attacker rolled higher than their defense. Rogues add their level in minutes to this time.

Combat Tricks/Stunts: Declare what the trick/stunt attack is going to do. It could be anything from knocking a weapon from your opponent's hand to blowing his hat off or extinguishing a lantern. Other possibilities could be stapling the target to the wall through his clothing with a thrown weapon, tying him up with a bola, tripping him and so on.

The attack roll is made as normal, if the attack roll is a hit, the player rolls 1d6. If he rolls his Fighter Bonus or less on the D6, the combat trick works. If the combat trick roll fails, the character still hits for normal damage.

Characters with a Fighter Bonus of zero, however, will only succeed with a combat trick if they roll at least a 20 on their attack roll (and the roll would hit the target). If they fail to at least roll a 20 and hit the target, both the combat trick and the attack fail.

Morale: While a few monsters, such as mindless creatures, are fearless and will fight to the death, most monsters have a strong desire to survive and will not continue to fight when the battle is going against them. They will instead seek to retreat, to flee, or even to surrender. The GM decides when monsters abandon the battle and retreat, based on the situation and the monster's intelligence. Monsters are assigned a Morale Rating (from 2 to 12, with 2 being a complete coward and 12 being totally fearless) to help the GM make these decisions. If the GM wishes, he may simply roll 2d6 and have the monsters break off combat if the number rolled is greater than the monster's Morale Rating.

Energy Drain: Certain undead and demonic monsters can drain energy levels from characters. Each energy level drained reduces the character's level by one, the character may regain the level normally via experience.

Hirelings

Players may find it useful to have their characters hire bearers to carry light sources into ruins and dungeons (and to carry treasure out) and men-at-arms to aid in combat. In some areas there may be a guild where such people may be found and hired, in other areas characters may have to advertise. Pay must be negotiated and what will be asked will depend on the situation the hirelings think they may get into and the reputation of the characters hiring them.

Bearers have 2 hit points and generally will only fight if cornered and there is no other choice – even then their effective level (used in attack rolls) is -2. They will carry light sources and baggage willingly so long as they are paid, fed, treated well, and not exposed to much mortal danger. Minimum pay: 1 SP/day.

Men-at-Arms will fight but consider being used as a bearer (except of treasure they get a share of) to be beneath them. Green Men-At-Arms have 4 hit points, an effective combat level (used in attack rolls) of 0 and can use whatever armor and weapons their employers provide. Minimum pay: 5 SP/day plus 1/20 of a share of any non-magical treasure found. Veteran Men-at-Arms have 7 hit points, an effective combat level (used in attack rolls) of 1 and can use whatever armor and weapons their employers provide. Minimum pay: 1 GP/day and 1/10 a share of any non-magical treasure found. Men-at-Arms will serve willingly as long as they are fed, paid, treated well, and not asked to take unusual risks that their employers are not taking with them.

Monsters

See the Microlite81 Monster List or use the monster descriptions in any B/X game. To create new monsters quickly: Pick a name, assign a level, hit dice = level, hit points = 1d8 per level, magic save = as fighter of level HD/2, all attack bonuses = level (maximum +15), damage = 1d6 for ordinary claws, bites, and weapons, 2d6 for large maws, giant clubs, 3d6 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases. Special attacks act like magic attacks against an appropriate defense. Intelligent monsters may have classes at the GM's option. If needed, assign stats to suit. Equip and add abilities as required.

Monster Reactions: Some monsters (like skeletons guarding a tomb) may always attack. In cases where the reaction of the monsters to the party is not obvious, the GM may opt to make a reaction roll for the monsters by rolling 2d6 and adding the CHA bonus (and any other appropriate modifiers) to the roll and consulting this table.

Adjusted Reaction Roll	Result
2 or less	Very Unfavorable
3-6	Unfavorable
7	Neutral/Uncertain
8-11	Favorable
12 or more	Very Favorable

Interpretation of the results is left to the GM, however, these general principles may prove helpful. Very Unfavorable means the monsters will most likely attack unless the odds are overwhelmingly against them. They will not help the characters. Unfavorable means the monsters are hostile and might attack unless they are given a good reason not to. They will not help the characters. Neutral means the monsters are unsure of the party. They are not likely to attack immediately, but are not friendly or helpful. Favorable means the monsters are willing to listen and are open to negotiation. They might be willing to be slightly helpful. Very Favorable means the monsters like the characters and are willing to be somewhat helpful and are open to working with the party to mutual advantage.

Mooks (optional): Sometimes a GM may want to use a large number of monsters but not want to carefully track each one. Mooks are "cannon fodder" monsters that have 1 hit point per hit

die, never successfully make a saving throw, and always run away or surrender if the battle is obviously going against them. Any hit from a Fighting Class character will likely kill a mook. Mooks cannot be told at a glance from non-mook monsters. Mooks make excellent minions for powerful leaders as they are very effective against normal people even if they cannot stand long against PCs and NPCs with class levels.

Experience Points and Level Advancement

Experience Points (XP): Characters get Experience Points (XP) through adventuring, defeating monsters, spending money from treasure, etc.

XP from Defeating Monsters: Each monster defeated is worth a base XP equal to the monster's hit dice squared multiplied by 5. If a monster has both hit dice and a character level the higher is used as "hit dice" in this formula. Many monsters have special abilities which make them more dangerous than their hit dice indicate. For each such special ability, add 50% (round down) of the monster's base XP. Example: A party defeats 3 Hippogriffs. Hippogriff has 3 hit dice and one special ability (flight), so each hippogriff is worth 67 XP for a total of 201 XP.

At the end of an adventure, the total XP earned from defeating monsters is divided by the number of characters in the party. Henchmen/Retainers count as 1/2 person and hirelings count as 1/10 person (round up for PCs, round down for others). Example: A party of 5 player characters, 2 retainers, and 10 men-at-arms and other hirelings earns 1200 XP from defeating monsters. Each PC earns 172 XP from defeating monsters, each retainer earns 85 XP, and each hireling earns 17 XP. (Note that XP for hirelings is earned but usually not actually tracked.)

XP from Treasure Spent: Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, generic "training," etc.). A character earns XP equal to the treasure so spent in gp divided by his current level. Note that XP from treasure is an abstract method of rewarding the various adventuring actions like finding traps that allow one to get treasure. Example: A 2nd level Fighter spending 1000gp on wine, women, and song earns 500 XP.

XP from Exploration: The GM may reward exploration with XP be designing special points on the map as worthy of XP for reaching them. The GM should generally not inform players in advance as to what, if any, special locations on the map are worth XP. Example: reaching the top of the tallest mountain on the map for the first time might be worth 150 or 200 XP for each character making it to the top or entering a well-hidden sub-level of a dungeon might be worth 50 XP.

XP from other Activities: The GM may award XP for excellent roleplaying, other important actions in the game (successfully completing a quest, for example), etc. In general, the total award from this category for any one session should not be more than 100 XP times the character's current level. No XP may be awarded in this category if the character refuses to even attempt to play his virtues and vices or other character limitations.

Prime Requisite Effects (Optional): Each class has one stat listed as its Prime Requisite. If a character's highest stat is not the Prime Requisite for his class, the character suffers a 10% penalty to all XP earned.

Level Advancement: At the end of every adventure (or, at the GM's option, at the end of every session), total up the XP earned and added them to your character's total XP. If a character's XP total is higher than that the *Minimum Experience Points Required* for the next level on the character's class chart. The character goes up a level and gains all the benefits thereof (increased HP, PCB, MCB, improved Saving Throw, etc.). Note that a character

may only go up one level per session. Any additional XP earned in that session that would put the character above 50% in his new level are lost.

Each level adds a die roll or a fixed amount after 9th level to Hit Points and the character's Physical Combat Bonus, Magical Combat Bonus, Fighter Bonus, etc. may change as indicated in the Advancement table for the character's class.

Spellcasters gain access to new spell levels at levels 3, 5, 7, 9, and (Magic-User only) 11. When an arcane spellcaster gains access to a new spell level he gets one spell of the new level added to his spell books. The player may select the spell subject to GM veto.

Weapons and Equipment

Money

Money takes the form of coins, with the gold piece being the standard unit. 1 platinum piece (pp) = 5 gold pieces; 1 gold piece (gp) = 10 silver pieces; 1 electrum piece (ep) = 5 silver pieces; 1 silver piece (sp) = 10 copper pieces (cp). Coins from different areas may look different and in some areas only coins from that area are acceptable, other coins will have to be exchanged for proper coins at a moneychanger who will take at least a 10% exchange fee.

To put the value of a gold piece into perspective, a single gold piece is enough for a peasant to subsist at a wretched quality of life for a month. Early in their career, adventurers will typically live on a few dozen gold pieces per month, enough to eat and sleep at an inn. A dragon's treasure hoard of 50,000gp might keep a village of peasants alive for decade, but merely cover a prince's monthly budget.

Equipment Packs

Suggested starting packs for new characters:

Pack A	Pack B	Pack C
normal clothing	normal clothing	normal clothing
backpack	backpack	backpack
bedroll	bedroll	bedroll
hooded lantern	10 torches	tent
10 oil flasks	10 oil flasks	10 torches
flint & steel	flint & steel	flint & steel
shovel	chalk	hammer
2 sets of caltrops	10 ft. pole	10 iron spikes
signal whistle	mirror	grappling hook
pen & paper	crowbar	50 ft. rope
water skin	water skin	water skin
iron rations for four days	iron rations for four days	iron rations for four days

Finally, add the following, based on your Class:

Cleric: Silver holy symbol, light armor (AC +2), a one handed weapon + shield, and 5 gold pieces

Dwarf, Fighter, Halfling: Vial of holy water, medium armor (AC +4), a one handed weapon + shield, or a two handed weapon, and 5 gold pieces

Elf: light armor (AC +2), one-handed weapon, spell book with all spells known, and 5 gold pieces

Magic-User: Spell book with all spells known, a dagger, and 5 gold pieces

Thief: lock picking tools, light armor (AC +2), light weapon, and 5 gold pieces.

Standard Equipment List

Players, with the permission of the GM, may elect to roll their starting wealth in gold pieces and buy equipment piece by piece from the equipment list below. If this is done, each character starts with 120 + (3d6 x 5) gold pieces. The GM is free to modify the equipment list to suit the starting location in his campaign.

Armor	Cost	AC
Clothing Only	-	10
Hide and Fur Armor	10gp	11
Leather Armor	20gp	12
Ring Mail or Scale Armor	30gp	13
Chain Mail Armor	40gp	14
Banded Plate or Lamellar Armor	50gp	15
Plate Armor	60gp	16
Shield	10gp	+1

Inn (one person, one night, superb)	2gp
Hut (wattle)	25gp
Hut (wooden)	50gp
Townhouse (stone)	1,200gp

Adventuring

B/X Conventions

Almost any material you come across for B/X or other early editions of the world's most popular roleplaying game can be used in Microlite81 with little modification. However, there are some descriptive conventions that B/X used that may need explanation.

Time Conventions: B/X talks about time in terms of rounds (combat rounds) and turns. A round was 10 seconds and a turn was 10 minutes, so there were 60 rounds in a turn.

Movement/Distance Conventions: B/X gave distances in inches. When underground or in buildings or the like, one inch equaled 10 feet. When outdoors, however, one inch was 10 yards. Yes, this meant spell and weapon ranges were greater outdoors than indoors. Normal human movement (when carefully exploring) was 12" per move, with two moves per turn. Carrying too much weight cut this down to 9" or even 6". Running movement was double the above.

Descending Armor Class: B/X and other pre-SRD editions used a descending Armor Class system where an unarmored character was AC 9 (AC 10 in some editions) and better armor used lower numbers (e.g. AC 5 was Chain, AC 2 was plate). Magic armor could even have a negative armor class. Microlite81 uses the ascending Armor Class system used in the OGL SRD. If you have old adventures using the original descending AC system and wish to use them, it is easy to convert descending ACs to ascending ACs.

Unarmored AC is 9: If the adventure is for B/X (or other edition where the unarmored AC is 9), subtract the descending AC listed in the adventure from 19 to get the ascending AC used by Microlite81.

Unarmored AC is 10: If the adventure is for 1e or 2e (where the unarmored AC is 10), subtract the descending AC listed in the adventure from 20 to obtain the ascending AC used by Microlite81.

Dungeon Exploration

Exploring dungeons is an iconic part of old school roleplaying games. The guidelines in this section will help the GM run adventures in dungeons, castles, caverns, and other "indoor" spaces.

Light: Humans and many other races require a light source (or magical ability) to see in the dark. Torches, lanterns, etc. will produce limited areas of light (generally 20 feet of bright light and a further 10 feet of dim light), but they also make it easy for monsters to see the party coming, making surprise impossible. Torches can be blown out by strong gusts of wind (d6 roll: blown out on a 1 or 2). Lanterns use flasks of oil as fuel, and a lantern can burn continuously on 1 flask of oil for 24 turns (4 hours). Torches burn continuously for 6 turns (1 hour) before burning out. Most monsters living in a dungeon have infravision or some other means of seeing in the dark; however these methods do not work in the presence of a light source.

Seeing Monsters: Unless surprised, characters will see monsters when they are 2d6 x 10 feet apart. Surprise distance is 1d3 x 10 feet.

Wandering Monsters: The GM should roll 1d6 every 2 turns for wandering monsters (more often if the party is making a lot of noise or otherwise attracting attention). On a roll of 1, wandering monsters stumble across the party from a random direction and distance.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow their orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a

battle. Monsters will generally pursue if there is less than 120 feet between the two groups. Monsters will only pursue around a corner or through a door on roll of 1 or 2 on a d6 (1 if a secret door is used). Fire will deter many monsters. Food will distract many monsters: unintelligent monsters 90% of the time, semi-intelligent monsters 50% of the time, intelligent monsters 10% of the time. Treasure may also distract monsters: unintelligent monsters 10% of the time, semi-intelligent monsters 50% of the time, and intelligent monsters 90% of the time. All chances may be adjusted by the GM depending on circumstances. These same rules determine how monsters will pursue if the characters disengage and retreat (or rout) from a battle.

Rest: One turn in six must be sent in rest or all characters suffer a -1 to all d20 rolls and to damage rolls per rest missed. Time spent searching is not time spent resting.

Doors: Dungeons often have many doors, some secret and others obvious. Many are locked, and a thief will need to attempt to pick locks. However, characters can attempt to break a door down. In this case, the player rolls 1d6. A result of 2 or less means the door has been broken down. Strength adjustments apply, but no matter what the adjustment there must always be a chance of success or failure. Bonuses cannot take the success range above 5 or below 1 on 1d6.

Players will sometimes want their character to listen at a door to hear any noises beyond. Again, the GM rolls 1d6. A roll of 1 results in success, and a roll of 1 or 2 succeeds for demi-humans due to their keen hearing. A thief has specially trained for this task, and succeeds on a roll of 1-2 (Level 1-4), 1-3 (Level 5-8), 1-4 (Level 9-12), and 1-5 (Level 13+). This attempt may only be made one time at any door by a character. Note that some creatures, such as undead, do not make noise.

Traps and Trap Detection: A trap will usually spring on a d6 roll of 1 or 2 when a character passes over or by them or otherwise triggers them.

Characters of all classes can search for non-magical traps. All characters except dwarves and thieves can succeed in spotting a trap on a roll of 1 on 1d6. Dwarves succeed on a roll of 1 or 2 on 1d6. Thieves are specially trained for this task, and succeed on a roll of 1-2 (Level 1-4), 1-3 (Level 5-8), 1-4 (Level 9-12), and 1-5 (Level 13+). Players must declare that their characters are actively looking for traps, and they must be looking in the right place. This roll may only be made once in a particular location, and it takes 1 turn per effort made. Since the GM rolls the dice, the player never know if the roll failed or if there simply is no trap in the area searched.

Secret/Hidden Doors: Secret (and hidden) doors can only be spotted if characters are specifically looking for them. The GM rolls 1d6 when a player declares that his character is looking for secret doors. A result of 1 on 1d6 is a success, except that elves have better vision and succeed on a roll of 1 or 2 on 1d6. Thieves are specially trained for this task, and succeed on a roll of 1-2 (Level 1-6), 1-3 (Level 7-10), and 1-4 (Level 11+). A character can only attempt to look for secret doors once in any given area, and it takes 1 turn. A second attempt cannot be made in the same area. On a roll of 1 on 1d6 an Elf will notice a secret door even if he is not actively searching for secret doors. Since the GM rolls the dice, the player never know if the roll failed or if there simply is no door in the area searched.

Wilderness Exploration

Exploring the wilderness is an iconic part of old school roleplaying games. The guidelines in this section will help the GM run adventures in the great outdoors, whether exploring new lands or simply go from one place to another along well-travelled routes.

Time and Wilderness Movement: The wilderness is not cramped like in a dungeon, and characters can usually see further

ahead and not be as wary of obstacles. For this reason, movement is measured in yards rather than feet in the wilderness.

A character that could move 120' per turn in a dungeon can move 120 yards (360') per turn in the wilderness. Further, characters can move, per day, their movement rate divided by 5 in miles per day. So a character that moves at 120 (feet or yards, depending on environment) can move 24 miles in the wilderness per day. It's likely that not all characters will have the same movement, so if they wish to stay together they must move as fast as the slowest character. Also note that the number of miles characters can move in 1 day presented here assumes a clear trail and easy travel. Other conditions will reduce the distance traveled in a day by fractions, as detailed below.

Terrain	Movement Modifier
Desert, hills, wooded areas	-1/3
Thick jungle, swamps, mountains	-1/2
Road travel, clear wide trails	+1/2

For example, if characters can travel 24 miles normally, but are following roads, they can travel 36 miles a day (24 + 12). If they are traveling through swampy land, they travel 12 miles (24 - 12) per day. Furthermore, certain kinds of terrain can slow travel at the GM's discretion, such as if the characters have to cross canyons, large rivers, or other formations. In addition to these conditions that can influence travel rates, characters may engage in a forced march. A forced march is a day of hard, tiring travel, but increases travel speed by +1/2. However, the characters must rest for 24 hours after a forced march. Otherwise, during wilderness travel the characters have to rest one day per six days of travel. Weather can also affect travel rates or even prevent safe travel altogether.

Missile weapon and spell ranges are measured in yards in the wilderness also, but note that areas of effect remain the same for spells and other effects.

Unless there is an encounter, the GM will direct players through time in increments of days while traveling in the wilderness. When an encounter occurs, time is measured in rounds. Unlike in labyrinths, wilderness adventures do not often measure time in turns.

Seeing Monsters: Unless surprised, characters will see monsters when they are 4d6 x 10 yards apart. Surprise distance is 1d3 x 10 yards.

Wandering Monsters: The GM should roll 1d6 every day of travel for wandering monsters. If the party is camping, an additional roll should be made at night. If a wandering monster is indicated (roll varies by terrain, see terrain table below), wandering monsters stumble across the party from a random direction and distance. At night, the GM should randomly determine which watch is on duty when the attack is made.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue so long as the party can be detected, there is a 50% chance monsters faster than the party will catch it (30% chance for monsters about as fast as the party) in each hex traveled through. Woods or swamp reduce the chance of being caught by 25%. Monsters will pursue into another hex on the map 50% of the time. The chase continues until combat occurs or the monsters break off. The party must rest for one-half day for each hex travelled during a pursuit. All chances may be adjusted by the GM depending on circumstances. These same rules determine how monsters will pursue if the characters disengage and retreat (or rout) from a battle.

Becoming Lost: A group travelling off a well-marked trail or road without an accurate map or a knowledgeable guide may become lost. The chance of becoming lost is rolled on a d6 and depends on the type of terrain the party is in (see table below). If lost, the party actually moves in a random direction but believes they have moved in the direction intended.

Terrain Type	Chance Lost	Chance of Encounter
Plains	1	1
Woods	1-2	1-2
Forest	1-3	1-2
River	1	1-2
Swamp	1-3	1-3
Hills	1	1-2
Mountains	1-2	1-3
Desert	1-3	1-2

Strongholds: Characters may encounter a stronghold during their wilderness travels. If the GM decides the characters pass near a castle or other kind of stronghold, he can roll on the following table to randomly determine how any patrol that spots them might react. These rolls may be modified one way or another if the characters are acting suspicious, or if they are approaching peacefully and potentially with offerings.

Ruler			Reaction (1D6)		
Class	Level	Patrol Type	Ignore	Chase	Friendly
Cleric	6+1d8	Lt mounted, 2d6	1-2	3-4	5-6
Dwarf	8+1d4	Hvy infantry, 2d6	1-4	5	6
Elf	9 or 10	Lt mounted, 2d6	1-4	5	6
Fighter	8+1d6	Hvy mounted, 2d6	1-2	3-5	6
Halfling	6+1d2	Lt infantry, 2d6	1-3	3	4-6
MU	10+1d4	Hvy infantry, 2d6	1-4	5	6

Rations and Foraging: When adventuring in a dungeon, there may be very little available to eat. Characters must take rations with them to cover the extent of time they expect to be away from town. However, they may occasionally kill an edible monster.

When in the wilderness, characters can hunt or scavenge for food. Scavenging for food is an activity that can be accomplished without hindering travel by gathering fruit, nuts, or small animals. For each day of travel while scavenging, roll 1d6. A result of 1 indicates that sufficient food for 1d6 human sized beings has been acquired. Hunting follows the same roll, but succeeds on 1-2, and must be engaged as the sole activity for a day. No traveling is possible. In addition, there will be one Wandering Monster check, from the table appropriate for the terrain, while the group is hunting.

Characters that go without food and/or water will soon begin to suffer from the effects of starvation and/or dehydration:

Starvation: Characters generally need 2 pounds of food per day. After 2 days without food, a character takes 1d6 damage per additional day without food and no longer heals lost HP.

Dehydration: Characters generally need 1 gallon of water per day. Each day after the first without water, a character loses 25% of his full HP in damage (and can no longer heal).

Other Hazards

Falling: 1d6 damage per 10 feet fallen, save for half damage.

Spikes: add +1 point to falling damage per 10' fallen, max +10

Extreme Heat & Cold: If not wearing suitable protection, save once every 10 minutes (-1 per previous check), taking 1d6 damage on each failed save.

Creating a Stronghold

All of the Character classes have some ability, at some level, to establish a stronghold – or to take over a guild, in the case of Thieves. Strongholds are usually built by claiming an area of wilderness, clearing out the monsters that lair in the region, and then beginning construction of the new owner's fortified place of residence. The nature and type of stronghold will differ, of course, for the individual's choices will play an important role. For instance, it is traditional for you, the player, to create a map of your castle. In general, a strong leader who clears out an area with a radius of ten miles or so will end up in charge of between 2 and 8 (2d4) small settlements. The peasants in these hamlets, cots, and villages will be overjoyed to find themselves under the protection of a powerful and renowned protector – unless your Character is a tyrannical overlord in the service of Chaos. Each settlement holds roughly 1d4 x100 villagers, and the normal feudal tax is 10 gp per year per villager. Sometimes, of course, this is paid with chickens and oxen, and your stronghold might take on the appearance of a marketplace, around tax time – but a good reeve or bailiff can sort it all out quickly, without the Character's needing to get involved.

Owning a stronghold allows a person to house and feed loyal retainers without paying for their room and board in local inns, or building campsites in the cold rain. It is a base of operations and a secure place to keep Treasure.

Building the actual castle, of course, is quite expensive. The owner will need to hire wagons for transporting materials, as well as masons and other experienced craftsmen from more civilized areas to raise the strong stone walls and towers of the fortress. While the construction costs could change drastically depending upon how far a freehold is from the rest of civilization and what materials are available in the area, the following sample costs will provide a baseline:

Stronghold Structure Costs

Barbican (gatehouse, 2 small towers, and a drawbridge)	38,000gp
Battlement (100' long, crenellated parapets)	500gp
Building, stone (20' high, 30' square, wood doors, floors, roof, stairs)*	3,000gp
Building, wood (20' high, 30' square, wood doors, floors, roof, stairs)*	1,500gp
Corridor, dungeon (10'x10'x10', hewn stone walls, flagstone floor)	500gp
Drawbridge, wood (10' x 20')	250gp
Gatehouse (20' high, 30' x 20', metal portcullis, wood doors, floors, stairs)	6,500gp
Keep, square (80' high, 60' square, wood doors, floors, stairs)*	75,000gp
Moat, unfilled (100' x 20' x 10' deep)*	400gp
Moat, filled (100' x 20' x 10' deep)*	800gp

Palisade, wood (10' high, 100' long, 1' thick)	125gp
Rampart, earthen (10' high, 100' long, 15' thick)	2,500gp
Tower, small round (30' high, 20' diameter, wood doors, floors, stairs)	15,000gp
Tower, medium round (40' high, 20' diameter, wood doors, floors, stairs)	22,500gp
Tower, large round (40' high, 30' diameter, wood doors, floors, roof, stairs)	30,000gp
Tower, huge round (60' high, 30' diameter, wood doors, floors, roof, stairs)	54,000gp
Wall, stone castle (20' high, 100' long, 10' thick)	5,000gp
Wall, stone castle (30' high, 100' long, 10' thick)	7,500gp
Wall, stone castle (40' high, 100' long, 10' thick)	12,500gp
Wall, stone castle (50' high, 100' long, 10' thick)	17,500gp
Wall, stone castle (60' high, 100' long, 10' thick)	22,500gp

**The dimensions of these constructions can be altered as long as the square footage remains the same.*

In addition to the building costs, the character will need to hire at least one engineer (250gp/month) per 100,000gp cost of the stronghold. The time required to construct a stronghold depends entirely on its total price. For every 500gp it will take one day of game time. The construction time can be reduced by 25% by paying 50% additional construction costs, or reduced by 50% by paying 100% additional construction costs. The construction time cannot be reduced by more than 50%.

Magical Research

As described in their class descriptions, spell casters are able to research new spells and create magic items. These are expensive procedures which often do not succeed.

All magical research requires a magic research skill roll of some type to succeed. This throw is a Secondary MIND Skill Roll unless otherwise listed. An unmodified die roll of 1-3 is always a failure when conducting magical research, however. When a magic research throw fails, the time and money spent on the research is lost. In addition, any precious materials or special components (described below) are consumed.

Researching Spells

Researching Known Spells: A spellcaster of 5th level or higher may use spell research to gain access to spells on the standard Microlite81 spell list that he does not have access to from scrolls, spell books, or (if a divine spellcaster) his deity. Spell research costs 1,000gp, and takes two weeks of research, per level of the spell. Spell research requires a magic research throw versus a DC equal to 12 plus twice the level of the spell being researched. EXAMPLE: Riddle is an 11th level mage with a MIND of 15 researching a 4th level spell. It will take 8 weeks and cost 4,000gp, and require a Secondary MIND Skill Roll versus a DC of 20 to succeed.

Researching New Spells: A spellcaster may also use spell research to create a new spell not on the standard spell lists. The spellcaster must describe in detail the kind of spell he wants to create, and the effects it will have. The GM will then determine if the spell can be created, and if so what the spell level will be. The spellcaster must be capable of casting spells of the spell level the potential new spell will be; otherwise he must wait until he attains a high enough level to research and cast the spell. Spell research costs 1,000gp, and takes two weeks of research, per level of the spell. A magic research roll is required for success versus a DC equal to 12 plus three times the level of the spell being researched.

Identifying Magic Items: Spell research can also identify the properties of a magic item. It takes 1,000gp and two weeks of research to identify a magic item, and a magic research throw (A is required). The required DC is determined by how common the GM rules the magic item is: Common, DC 14; Uncommon, DC 17; Rare, DC 20; Very Rare, DC 24; Artifact/Unique, DC 30 (or higher).

A mage or other arcane caster can only research a spell if he can still learn spells of that level. A cleric or other divine caster can only research a spell with the permission of his deity (GM's discretion). The deity will usually remove a spell of the same level from the cleric's spell list in exchange for granting the new spell.

Libraries: To research a spell, a spellcaster must have access to a library. Wizard's guilds and major temples often will provide their mages and clerics access to such a library. If a spellcaster wishes to compile his own library, a minimum of 4,000gp must be invested to allow research on 1st level spells. For each subsequent spell level to be researched, another 2,000gp must be invested. Having an exceptionally large library aids research. For every 10,000gp of value above the minimum required for the spell, the spellcaster receives a +1 bonus on his magic research throw (up to a maximum +3 bonus).

Every time a wizard successfully researches a spell, 10% of the gold spent for that effect is added to his library value, reflecting the value of notes and annotations made during research. Authoritative tomes or rare books found as treasure might provide an additional bonus to research specific spells or types of spells.

Creating Magic Items

Starting at 5th level, spellcasters may begin to scribe scrolls and brew potions. At 9th level, they may begin to make other types of magic items, such as rods, rings, swords, and other items. An arcane spellcaster may never create magic items that are exclusive to divine spellcasters. A divine spellcaster may make any item his class is eligible to use.

In order to create a magic item, the spellcaster must know the spell(s) that replicate the magic item's effect, or must find a sample or formula of the item. If a magic item's effect does not compare to any existing spell, the spellcaster must either research a new spell that will produce the desired effect, or he must find a sample or formula of the item.

Cost and Time: The base cost and time required to create a magic item is listed on the Magic Item Creation tables.

Magic Research Roll: Creating a magic item requires a magic research roll for success versus a DC equal to 12 plus three times the level of the spell needed to create the effect being enchanted. If multiple effects are being enchanted, each must be rolled separately. A +1 item bonus is considered a 1st level spell, a +2 item bonus is considered a single 3rd level spell, and a +3 item bonus is considered a single 6th level spell.

Formulas and Samples: A formula is a magical "recipe" for the creation of an item. A spellcaster automatically has a formula for any magic item he has previously created. Formulas may also be found as treasure. A sample is simply an existing magic item that is available to the spellcaster while he is working.

There are three advantages to having a formula or sample:

- 1) It enables the spellcaster to create a magic item without having to learn or invent the spells imbued in the item.
- 2) It reduces the cost and time to make the item by 50%.
- 3) The DC for the magic research roll is 12 plus two times the level of the spell needed to create the effect (instead of the standard plus three times the level of the spell needed to create the effect).

Precious Materials: Rare woods, noble metals, such as silver, gold, and platinum, and precious gems, such as rubies and diamonds, retain magic better than common woods, crude metals, or simple stone. Using precious materials can thus improve the chances of success of creating a magic item. For every 10,000gp

of value in gems, jewelry, precious metals, and rare or elaborately carved woods added, the spellcaster receives a +1 bonus on his magic research throw. A character may not spend more on precious materials than the base cost of the item.

Special Components: Creating magic items requires special components for each spell effect in the item. Components are usually organs or blood from one or more monsters with a total XP value equal to the gp cost of the research. The cost of any special components is in addition to the base cost of the research. If a character does not have a formula when he begins creating the item, he will not learn the special components until the work is 50% complete. The GM will determine the specific components required for each item. Different formulas for the same item may require different components. For instance, one formula for a wand of fireball might require the fangs of 20 hellhounds, while another formula for a wand of fireball might require the ichor of four efreet.

Workshops: Just as a spellcaster needs a library to research spells, he needs a workshop in order to create magic items. Wizard's guilds and major temples often will provide their mages and clerics access to a workshop. If a spellcaster wishes to build his own workshop, a minimum of 4,000gp must be invested to allow creation of 1st level spell effects or item bonuses. For each subsequent spell level or bonus, another 2,000gp must be invested. Having an exceptionally valuable workshop aids item creation. For every 10,000gp of value above the minimum required for the spell, the spellcaster receives a +1 bonus on his magic research throw (up to a maximum +3 bonus).

Magic Item Creation: Base Cost

Item Type	Base Cost
One Use Effect	500gp x spell level
Charged Effect	500gp x spell level x charges*
Permanent Effect, Unlimited Use	500gp x spell level x 50
Permanent Effect, Use 1/turn	500gp x spell level x 33
Permanent Effect, Use 1/3 turns	500gp x spell level x 25
Permanent Effect, Use 1/hour	500gp x spell level x 16
Permanent Effect, Use 3/day	500gp x spell level x 12
Permanent Effect, Use 1/day	500gp x spell level x 10
Permanent Effect, Use 1/week	500gp x spell level x 6
Magical Weapon +1	5,000gp**
Incr bonus from +1 to +2	+10,000gp**
Incr bonus from +2 to +3	+20,000gp**
Magical Armor +1	5,000gp**
Incr bonus from +1 to +2	+10,000gp**
Incr bonus from +2 to +3	+20,000gp**

Magic Item Creation: Time Cost

Item Type	Time
One Use Effect	1 week x spell level
Charged Effect	2 days x spell level x charges
Permanent Effect, Unlimited Use	100 days x spell level
Permanent Effect, Use 1/turn	80 days x spell level
Permanent Effect, Use 1/3 turns	70 days x spell level
Permanent Effect, Use 1/hour	60 days x spell level
Permanent Effect, Use 3/day	50 days x spell level
Permanent Effect, Use 1/day	40 days x spell level
Permanent Effect, Use 1/wk	30 days x spell level
Magical Weapon +1	1 month x WBC / 10***
Incr bonus from +1 to +2	+1 month x WBC / 10***
Incr bonus from +2 to +3	+1 month x WBC / 10***
Magical Armor +1	1 month x Armor Class
Incr bonus from +1 to +2	+1 month
Incr bonus from +2 to +3	+1 month

* If a charged item has multiple spell effects powered by the same charges, use the base cost and time for the highest level spell effect, plus half the base cost and time for each other spell effect. The minimum time to create a charged item is never less than 1 week per spell level of the highest level effect.

** If the weapon or armor has a bonus that is restricted to a particular class or type of opponents, the extra bonus is half price. If the weapon or armor is enchanted with spell-like effects, the spell-like effects are enchanted separately using the cost and time for charged or permanent effects.

***"WBC" = Weapon Base Cost. Arrows, bolts, and sling stones are enchanted in bundles of 20 at a base cost of 10gp.

Optional Rules

The following rules are optional. The GM decides if they will be used.

Minor Optional Rules

Encumbrance: Characters can normally carry twelve (plus STR bonus) items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item. Oversized items (two-handed weapons, anything as tall as the character or that requires two hands to carry) count as two items. A character carrying 6 or fewer items is unencumbered. A character carrying 7-12 items is lightly encumbered. A character carrying 13-18 items is heavily encumbered. A character carrying more than 18 items is over-encumbered. *Option:* Adjust number of items for each encumbrance class by the character's STR bonus.

Individual Initiative: Roll d20 + DEX bonus for initiative order each combat round. Use Hit Dice/2 instead of DEX for monsters. Characters and monsters act in Initiative order, from high to low. Spell casters casting a spell must declare the spell being cast and its target before initiative is rolled.

Energy Drain: If the standard energy drain rule seems too harsh, try the following instead. Each energy level drained subtracts one from any roll to which the character would add his level (or his level/2). 1 point of energy drained is recovered every L days where L is equal to the hit dice of the monster that drained the energy level.

Raise Dead Spell Expansion: As B/X does not have clerical spells higher than 5th level, the B/X cleric lacks a way to restore lost limbs or restore levels lost. If the GM wishes high level Microlite81 clerics to have these abilities, the simplest way to add them is to extend the clerical "Raise Dead" spell so it does one of four things when cast (caster's choice): 1) The standard raise dead function as described in the spell description. 2) Regrow one lost limb (or partially lost limb) to a single living target; the limb takes 1 day to regrow. 3) Restore one energy level lost within the last (level of caster) days to a single living target. 4) Completely heal a single living target of all damage (both hit point and STR damage). The name of the spell could be changed to "Restore Life" if this optional rule is used.

Avoiding Save-or-"Die": There are a number of effects which cause the character to be taken out of play permanently or for a long period of time unless a saving throw is made (e.g. instant death, turn to stone, etc.). If this standard rule seems too harsh, try the following instead. If a character fails a save-or-"die" roll, the negative effect happens immediately but it can be reversed if the character receives 5 minutes of careful care in a non-combat environment starting within a number of minutes/melee rounds equal to the affected character's CON stat. The GM may rule that certain issues still require further treatment within 24 hours or the effect recurs (e.g. poison must still be neutralized) or may not be handled this way at all.

Traditional Experience for Treasure: Traditionally, experience points were only given for treasure found in B/X and were not given for treasure spent. To use this system, ignore the standard rules for experience from treasure found and experience for treasure spent and use the following rule instead.

At the end of an adventure, total the value of all non-magical treasure found during the adventure in gold pieces. Divide the result by the number of characters in the party to determine the number of XP each character receives from treasure. Henchmen/Retainers count as 1/2 person and hirelings count as 1/10 person (round up for PCs, round down for others).

Character Goals and Personality Traits

The alignment system is a simple way to handle character "personalities" at a very simple level. While alignment is suitable for many types of campaigns, a more flexible system is needed for others. If this system is used, the GM will "enforce" it with Experience Point bonuses for using the character's goals and traits in play.

Character Goals: In order to individual characters, each player must select four goals from the list below and arrange them in order of importance to the character from first to fourth. Goals not on the list may be selected with prior GM approval. The GM may award bonus XP for goal achievements during a session. Characters can also earn points by helping their friends (fellow PCS and associated NPC) achieve their goals, so long as their friends goals do not clash with their own goals. Players may change a goal or change the order of their goals during a campaign with GM approval.

Suggested Goals: (The player must select a particular aspect to stress for those marked with an asterisk)

Furtherance of Scholarly Studies*	History, linguistics, literature, etc.
Furtherance of Art*	Music, architecture, crafts, etc.
Furtherance of Science*	Astrology, engineering, etc.
Wealth	Accumulation of treasure or other wealth
Earthly Pleasures	Wine, women/men, drugs, etc.
Romance	True love
Power over Others	Political, religious, in criminal underworld, etc.
Fame	Personal renown far and wide
Rank*	On social scale or in institution like religion or military
Preservation of the Status Quo	Prevention of change (in government, religion, social system, etc.)
Preservation of Nature	
Preservation of Order	Prevention of breakdown of law and order
Comradeship	Establishment and maintenance of friendships
Risk Tasking	Taking physical, financial, or spiritual risks
Commercial Business	Setting up and running profitable businesses
Collecting*	Jewelry, antiques, weapons. Etc. (for pleasure of ownership, not for actual use)
Religious Service	Serving religions and Gods
Battle Glory	Winning renown in battle
Image Cultivation	Adopting a distinctive appearance and style to impress others
Freedom	Preservation of individual freedoms
Chivalry	Mercy, fairness, compassion
Honor	Duty to liege, family, friends, or own dignity
Mystic Power	Finding spells, magic items, etc. for own use
Patriotism	Acting in country's best interest
Discovery	Bringing new knowledge to own civilization
Experience Wonders	Travelling through strange lands, other planes, etc.
Intrigue	Political/Social secret scheming and plotting
Materialism	Spending money on displays of wealth: manors, castles, useless expensive items, etc.
Welfare of Others	
Responsibility	Desire to carry out duties, take care of charges, etc.
Expansion of Civilization	Into new lands, etc.

Wanton Destruction

Cruelty
Persecution of Evil

Competition

Personal Feats
Creation*
Self-Discipline

Trickery*

Desire to destroy things for the pleasure of destroying
Desire to cause pain in others
"Evil" as defined by your culture or religion
Desire to compete for competition's sake
The "do it because it's there" spirit
Make magic items, works of art, etc.
Controlling one's behavior and emotions
Thwarting authority, playing practical jokes, etc.

Character Personality Traits:

In order to further individualize characters, players must select three of the following Personality Traits for their character. Personality Traits other than those listed may be used with prior GM approval. Players should be careful not to select traits that they are not interested in playing or that strongly conflict

with their goals or religion (unless that is what the player wants). Players should also try to avoid selecting conflicting Personal Traits for their characters. If such traits are selected (for example, the first two on the list below), the negative trait (passion for drink, in this case) is applied to the character while the positive trait is directed toward the behavior of others – which tends to make the character a hypocrite.

Suggested Personality Traits:

True passion for alcoholic beverages
Disapproves of drunken ways
True passion for gambling
Disapproves of gambling
Enjoy a good public brawl and will start one given a good reason
Disapproves of public brawling
True passion for members of the opposite sex
Disapproves of lewd and/or flirtatious behavior
Braggart who exaggerates his/her deeds
Modest about own deeds and disapproves of bragging
Gourmet who will not tolerate poor cuisine
Glutton who will eat just about anything and think it great
Rather crude and rough manners
Excellent manners, cannot tolerate bad manners
Will lie when it suits his/her needs
Truthful character who does not tolerate falsehood
Grasping and greedy
Miserly and begrudges spending money
Spendthrift whose money never lasts long
Tends to forgive (or forget) personal insults and injuries
Tends not to forgive or forget personal insults and injuries, and always tries to get even – sometime
Social snob who demands due respect from his/her social inferiors
Social egalitarian that places little worth in social class differences when a person has shown his/her worth
Character will not kill except in self-defense (and only after all else has been tried and has failed)
Sexist who belittles the abilities of the opposite sex.
Mild prejudice against a specific race or class (belittles their abilities)
Overconfident of own abilities
Little confidence in own abilities
Mild phobia
Always optimistic
Always pessimistic

Advantages and Disadvantages

Many players like to have characters that are mechanically different from other characters of their class. Backgrounds help provide this, but some campaigns may need more. Characters in such campaigns may be created with advantages and disadvantages that adjust the character's Experience Base. All advantages and disadvantages selected for a specific character must be approved by the GM as suitable the campaign, the style of play, and the specific character. Things that any characters should be able to try to do should never be allowed as advantages. The following are example advantages and disadvantages that may be used. These are only examples, you may wish to remove some of the ones listed that do not fit your campaign or style of play and/or add new ones tailored to your campaign.

Advantages: The following special abilities increase a character's abilities and powers at the cost of increasing the number of experience points a character needs to advance.

Alchemy: Alchemists can create potions with the effect of Arcane Spells. With access to water, ingredients (5 gp per use per Spell Level), and a successful roll of 1d20 + Magic Attack Bonus vs. a DC of 10 + (3 x Spell Level), an Alchemist can create potions for spells of a Spell Level up to 1/2 the Alchemist's Level (round up). Potions take 30 minutes per spell level to brew. These potions can be used up to 24 hours after their creation; creating a potion with no expiration adds (2 x Spell Level) to the DC. Each potion after the first created in a day adds +2 to the DC. Experience base modifier of +500/12500.

Ambidextrous: Characters are normally considered to be right or left-handed. Ambidextrous characters can use both hands equally well, even at the same time. Experience base modifier of +100/2500.

Danger Sense: The character has a sixth sense for danger. For an Experience Base modifier of +200/5000, he can never be surprised.

Direction Sense: For an Experience Base modifier of +100/2500, a character always knows which direction is which (e.g. which way is north). For an Experience Base modifier of +300/7500, a character not only always knows which direction is which but can always retrace his path (e.g. return the way he came in in a maze).

Former Magic-User Apprentice: The character began training as a Magic-User or Illusionist but did not complete it. The character has the Magic-User special abilities (Arcane Blast and Minor Magic) but at a cost of 3 HP per use. He can create the needed wand, but doing so takes a full week instead of a few hours. If the ritual rules are used, the character can cast first and second level spells as rituals provided he has a readable written copy of the spell ritual. Experience Base modifier of +500/12500.

Herbalism: Herbalists are familiar with the magical methods of selecting and preparing herbal elixirs, poultices, etc. with the effects of divine healing spells (effect level is listed in parenthesis): Cure Light Wounds (1), Gentle Repose (2), Cure Blindness (3), Cure Deafness (3), Cure Disease (3), Cure Serious Wounds (4), Neutralize Poison (5), Restoration (7). Successful creation requires access to water, ingredients (5 gp per use per effect level), and a successful roll of 1d20 + Magic Attack Bonus vs. a DC of 10 + (3 x Spell Level). Effects equal to 1/2 the herbalist's level (round up) can be created. Herbal creations may be used up to 24 hours after creation. Herbal creations affecting disease or poison must be created for a specific disease or poison. Experience base modifier of +500/12500.

Photographic Memory: For an Experience Base modifier of +100/2500, a character may remember details most would forget on a successful WIL save. For an Experience Base modifier of

+300/7500, a character can remember everything with true photographic detail on a successful MIND save.

Disadvantages: The following major hindrances to a character decrease the number of experience points a character needs to advance. However, the character's Experience Base can never go below 50% of his Experience Base without any disadvantages.

Frail: Character is unhealthy and weak of frame, subtracting 1 from the number of hit points gained at each level (minimum 0). Experience Base modifier of -100/2500.

Hunted by Enemies: The character is hunted by some powerful person or group who want to do them ill. The Experience Base modifier is the total of the modifier for the hunter's power and how often the enemy has a hand in the character's adventures. Power: slightly more powerful than character -0/0; much more powerful -200/5000; extremely powerful -400/10000. Frequency: 20% of game sessions -100/2500; 40% of game sessions -200/5000; 60% of game sessions -300/7500.

Low Self-Esteem: Character has little self-confidence or self-worth, taking a -3 penalty on Presence saves. Experience Base modifier of -100/2500.

Meager Fortitude: Character is sickly and weak of stomach, taking a -3 penalty on Fortitude saves. Experience Base modifier of -100/2500.

Noncombatant: Character is relatively inept at melee combat; take a -2 penalty on all melee attack rolls. Experience Base modifier of -100/2500.

Phobia: The character has a fear so strong it can overwhelm him. Mild phobias can be temporarily overcome with a MIND save. Severe phobias cannot be overcome. The Experience Base modifier is determined by how common the object of the fear is and the severity. Type of fear: Rare object/situation: -100/2500; Uncommon object/situation: -200/5000; Common object/situation: -300/7500. Severity of Fear: Mild Fear: 1x; Severe fear: 2x.

Poor Reflexes: Character zigs when he should zag, taking a -3 penalty on Reflex saves. Experience Base modifier of -100/2500.

Shaky: Character is relatively poor at ranged combat, taking a -2 penalty on all ranged attack rolls. Experience Base modifier of -100/2500.

Unlucky: Your character just has bad luck, usually at the worst possible time. The GM will arbitrarily make something go wrong for the character each game session. This bad luck cannot kill the character outright, but just about anything else goes. Experience Base modifier of -300/7500.

Unreactive: Character is slow to react to danger, taking a -4 penalty on initiative checks. Experience Base modifier of -100/2500.

Vow: Your character has sworn an oath to do or not do something. The number of points it is worth is based on the amount of inconvenience the GM thinks it will cause the character during an average game session. Characters who break their vow during a session receive no XP for the session. Minor inconvenience: -100/2500; Major inconvenience: -200/5000; Great inconvenience: -300/7500.

Vulnerable: Character is not good at defending himself, taking a -1 penalty to Armor Class. Experience Base modifier of -100/2500.

Weak Will: Character is highly suggestible and easily duped; taking a -3 penalty on Will saves. Experience Base modifier of -100/2500.

Fire-And-Forget Magic

The B/X version of the world's most popular fantasy roleplaying game used a much different system of magic from that of Microlite20-based games. This system had the magic-user or cleric select and prepare a set number of spells of certain levels in advance. Each prepared spell could only be cast once. This system can easily be substituted for the standard Microlite81 spell casting system using the following rules.

Both magic-users and clerics must select and prepare specific spells from their collections in advance. The number of spells of specific levels a character can prepare is limited by their class level (see below for details). Preparing spells takes one hour of uninterrupted time: magic-users must study their spell books while clerics must meditate and commune with their deity.

Casting a prepared spell does not cost any hit points, but once cast, a spell cast is no longer in memory and may not be cast again. Casters may prepare multiple copies of the same spell.

In combat, if a fire-and-forget caster is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles and the caster loses the spell from memory just as if he had cast it.

No Clerical Spell at First Level (Optional): To be true to the original B/X source material, first level clerics should not have any spells. To duplicate this, change the number of first level spells available to first level clerics to zero and the number available to second level clerics to one on the Cleric table below.

Number of Spells Prepared Per Day (Magic-Users/Elves):

Magic-User/ Elf Level	Spell Level					
	1	2	3	4	5	6
1	1					
2	2					
3	2	1				
4	2	2				
5	2	2	1			
6	2	2	2			
7	3	2	2	1		
8	3	3	2	2		
9	3	3	3	2	1	
10	3	3	3	3	2	
11	4	3	3	3	2	1
12	4	4	3	3	3	2
13	4	4	4	3	3	3
14	4	4	4	4	3	3

Number of Spells Prepared Per Day (Clerics):

Cleric Level	Spell Level				
	1	2	3	4	5
1	1				
2	2				
3	2	1			
4	3	2			
5	3	2	1		
6	3	3	2		
7	4	3	2	1	
8	4	3	3	2	
9	4	4	3	2	1
10	5	4	3	3	2
11	5	4	4	3	2
12	5	5	4	3	3
13	6	5	4	4	3
14	6	5	5	4	3

Traditional Saving Throws

Some gamemasters and players prefer the traditional "five category" saving throw system used in early editions of the world's most popular fantasy roleplaying game. The following saving throw tables can be substituted for the standard Microlite81 saving throw system if the GM desires.

Cleric Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-4	16	11	14	12	15
5-8	14	9	12	10	12
9-12	12	7	10	8	9
13+	8	3	8	4	6

Dwarf and Halfling Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-3	13	8	10	9	12
4-6	10	6	8	7	10
7-9*	7	4	6	5	8
10+	4	2	4	3	6

* Maximum for halflings

Elf Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-3	15	12	13	13	15
4-6	13	10	11	11	13
7-9	9	8	9	9	11
10	7	6	7	7	9

Fighter Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
0 lvl Human	17	14	16	15	18
1-3	15	12	14	13	16
4-6	13	10	12	11	14
7-9	9	8	10	9	12
10-12	7	6	8	7	10
13+	5	4	6	5	8

Magic-User Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-5	16	13	13	13	14
6-10	14	11	11	11	12
11+	12	9	9	9	8

Thief Saving Throws

Level	Breath Attacks	Poison or Death	Petrify or Paralyze	Wands	Spells or Spell-like Devices
1-4	16	14	13	15	14
5-8	14	12	11	13	12
9-12	12	10	9	11	10
13+	10	8	7	9	8

Item Saving Throws

When characters (and NPCs) die from a particularly damaging event, such as the fire breath of a dragon or a fire ball spell, some or all of their items may be destroyed. A GM using this optional rule may use either of the following methods to determine what items are destroyed:

Method 1: Whenever characters (and NPCs) die from a particularly damaging event, such as the fire breath of a dragon or the spell fire ball, all ordinary possessions on a character's body should be considered destroyed. Magical items may not be destroyed, and are allowed saving throws of the appropriate type for the attack based on the character's saving throw. Items that have bonuses will receive an equal bonus on the saving throw. For instance, a +1 dagger receives a bonus of +1 to the roll.

Method 2: Make a roll in the kind of situation mentioned above, as well as in situations when items are exposed to crushing damage (from falls), acid, or any other event that could feasibly destroy them. The GM will roll either 1d4 or 1d6, depending on the severity of the situation. Magic items have a chance of surviving based on their relative power. For instance, a +2 shield would survive on a roll of 1-2 on a d4 or d6. Items for which "pluses" do not apply can be assigned a number between 1 and 3. Scrolls and potions may survive on a roll of 1 on a d4 or d6, a staff or wand may survive on a roll of 1-2; any other items such as rings, rods, and other miscellaneous magical items are more durable and survive on a roll of 1-3. If an item which has "pluses" is damaged, it may not be destroyed outright, but may lose one "plus." Thus, a +2 shield becomes a +1 shield on a failed saving throw roll.

Modifiers: The GM should apply bonuses or penalties depending on the situation. If an attempt is made to intentionally damage an item, there may be a penalty of 2 to the roll. Bonuses may apply if an item is well protected. No penalty or bonus should be more than 2.

Psionics

Psionics are mental powers which aren't magic but sometimes duplicate magical abilities. If psionics are used in a campaign, any highly intelligent being has a slight change of being psionic.

Creating Psionic Characters: Characters should check for psionic ability at character creation. Roll a d20 and add MIND bonus. On a roll of 21 or higher, the character may opt to have psionics abilities that will manifest as the character goes up levels. If the roll is successful and the player opts for the character for the character to have psionics, roll 2d6. The result is the maximum number of psionic abilities the character will manifest. The character's Experience Base is immediately increased by +100/+2500 for each psionic ability the character may manifest.

Manifesting Psionic Abilities: At character creation and every time a psionic character goes up a level, the character rolls to see if a new psionic ability manifests. Roll 1d20 + MIND bonus against a DC of (21 – the maximum number of psionic abilities the character may manifest). On a successful roll, the character

manifests a new psionic ability. Roll on the Psionic Ability Table below to determine the new ability. Reroll if the character already has the ability rolled.

Manifesting Psionic Attack and Defense Modes: Psionic characters manifest psionic attack and defense modes as they gain psionic abilities. Specific modes manifest as the character manifests a specific number of abilities. See Psionic Combat below for more information.

Number of Psionic Abilities Manifested	Attack Mode Manifested	Defense Mode Manifested
1	Mind Thrust	Thought Shield
2		Mind Blank
3	Ego Whip	
4		Mental Barrier
5	Psionic Blast	
6		Intellect Fortress
7	Id Insinuation	
8		Tower of Iron Will
9	Psychic Crush	

Using Psionic Abilities: Using a psionic ability is an action. Successful use requires a 1d20 + MIND Bonus + Level/2 versus the DC given in the ability description. Certain abilities also cost HP (even if the attempt is unsuccessful). The power of many psionic abilities is determined by the Ability Level of the specific psionic ability. This is the number of levels the character has possessed the specific ability. Simply recording the character's level when he gets the ability will make calculating this easy.

Psionic Abilities: The following psionic abilities may manifest. Which abilities manifest should be determined randomly. The GM is free to create other abilities.

Roll	Psionic Ability	Roll	Psionic Ability
1	Animal Telepathy	13	Etherealness
2	Astral Projection	14	Healing Trance
3	Aura Alteration	15	Invisibility
4	Body Control	16	Levitation
5	Body Equilibrium	17	Mind over Body
6	Clairaudience	18	Precognition
7	Clairvoyance	19	Psychic Surgery
8	Dimension Door	20	Shape Alteration
9	Domination	21	Telekinesis
10	Empathic Projection	22	Telepathy
11	Empathy	23	Teleportation
12	ESP	24	Suspend Animation

Animal Telepathy: Character can establish 2-way mental communication with an animal. DC is 12. HP Cost is 1 HP per minute. Level of communication depends on the intelligence of the target. Does not require target to obey or be helpful.

Astral Projection: Character can enter a trance and project himself into the Astral Plane. This works like the Astral Spell except that speed of travel and other effects depend on Ability Level. DC is 15. HP Cost is 1 HP per 10 minutes.

Aura Alteration: Character can alter a target's aura to either to disguise the target's alignment and level, or to remove a compulsion or charm. Disguise has a DC of 15, costs 5 HP, lasts 10 minutes per Ability Level, can make the target appear as any desired alignment and can modify the character's apparent level by up to Ability Level levels. Removing a charm, compulsion, or curse costs 10 HP and grants the target another saving roll.

Body Control: Character can adjust his body to exist in unusual conditions (extreme temperatures, hostile/destructive elements like poison gas, water, acid, fire, lava, etc.). DC is 12 for unusual conditions like extreme temperatures, 15 for hostile environments like underwater or lack of good air. 18 for extreme conditions like

acids, lava, etc. Costs 1 HP per 10 minutes. Maximum duration is Ability Level x 10 minutes. Reroll Ability check every hour.

Body Equilibrium: Character can adjust his body weight to correspond to the surface he is walking on so as not to sink into water, mud, quicksand, etc. DC is 12. Costs 1 HP per 10 minutes. Maximum duration is Ability Level x 10 minutes. Reroll Ability check every hour.

Clairaudience: Character can hear at a distance (30 feet + Ability Level x 10). DC is 12 (plus +2 for each foot of material between psionic and target area). Costs 1 HP per minute.

Clairvoyance: Character can see at a distance (30 feet + Ability Level x 10). DC is 12 (plus +2 for each foot of material between psionic and target area). Costs 1 HP per minute.

Dimension Door: Character can teleport up to Ability Level x 20 feet. DC is 12 if target location visible, 15 otherwise. Costs 5 HP.

Domination: Character can force another to do their will. DC to establish is 15 + target's level/hit dice. DC to maintain for another round is 15 + target's level/hit dice. Costs the target's level/hit dice in HP per minute.

Empathic Projection: Character projects an emotional state upon targets. This works similar to the Suggestion spell but is limited to suggesting emotions. DC is 12 if touching a single target, 15 otherwise. Range: 30 feet + (Ability Level x 10). Can affect up to Ability Level targets. HP Cost is 3 per target.

Empathy: Character senses the emotions/emotional needs of the target(s). DC is 15. Cost: 1 HP per minute if a single target, 3 HP per minute otherwise. Range: 30 feet + (Ability Level x 10).

ESP: Character can read the surface thoughts of the target. DC is 10 + target's level/hit dice. Cost: 1 HP per minute if touching target, 3 HP per minute otherwise. Range: 30 feet + (Ability Level x 10). Searching for specific/deeper thoughts adds 5 to the DC (+10 if the target is specifically hiding them) and doubles the HP cost.

Etherealness: Character can alter his body vibrations to those of the Ethereal Plane, but is only able to carry Ability Level * Ability Level pounds of material with him. DC is 12 + 1 per 20 pounds of weight carried. HP Cost: 1 HP per 10 minutes.

Healing Trance: Character can go into a trance and heal Body Points quickly. A maximum of one BP per Ability Level can be healed. DC is 10 + number of BP to be healed. Trances lasts a number of hours equal to the BP to be healed, and 1 BP is healed per hour of trance. HP Cost: BP healed x 2.

Invisibility: Character can turn invisible by making those in range not notice the character. Character cannot attack and maintain invisibility. Range is Ability Level x 10 feet. DC is 12 (or 15 if the targets are highly alert).

Levitation: Character can float in the air. DC to float is 12 and it costs 1 HP per minute. Character can ascend or descend Ability Level feet per minute by making an ability check with a DC of 15. Character can move laterally Ability Level feet per minute by making an ability check with a DC of 18.

Mind over Body: Character can suppress bodily needs like food, water, and sleep for two days per Ability Level. Thereafter the character must spend an equal number of days resting before this ability can be used again. No ability check or HP cost.

Precognition: Character has a vague sense of the future. While using this power the character cannot be surprised and adds his Ability Level/2 (round up) to initiative, combat rolls, and any other d20 rolls where an ability to know what might happen in the near

future would be helpful. DC is 15 and the roll must be made each minute the ability is used. HP cost is 5 HP per minute.

Psychic Surgery: Character and target go into a trance to heal target's Body Points quickly. Character must be touching target. A maximum of one BP per Ability Level can be healed. DC is 10 + number of BP to be healed. Trances last a number of hours equal to the BP to be healed and 1 BP is healed per hour of trance. HP Cost: BP healed x 2.

Shape Alteration: Character can modify his appearance similar to the Polymorph Self spell. DC is 12 to make minor changes to appearance (remaining same species), 15 to make major changes (another species of similar size), and 18 to make more extreme changes. Cost is per hour and is based on type of change: 3 HP for minor changes, 8 HP for major changes, and 15 HP for extreme changes. Maximum duration is Ability Level hours.

Telekinesis: Character can move objects up to Ability Level x Ability Level pounds by mental power. DC is 12 (18 if precise control is needed). HP Cost is 3 HP per minute for slow movement, 8 per attack for combat speed movement.

Telepathy: Character can establish 2-way mental communication with an intelligent target. DC is 12 if target is willing, 18 otherwise. HP Cost is 1 HP per minute. 1 minute of telepathy allows an information exchange equal to 10 minutes of talking.

Teleportation: Character can teleport up to Ability Level * 100 miles. DC is 12 if the target location is intimately known to character, 18 if the target location is well known, and 24 if the target is only known from a clear description. HP Cost is 15.

Suspend Animation: Character can virtually stop all body functions for a predetermined amount of time. Maximum duration is Ability Level x Ability Level weeks. Character will not change during this time. A number of days equal to the number of weeks spend in suspended animation must pass before this ability can be used again. No ability check or HP cost.

Psionic Combat: Only psionic characters that have manifested a psionic attack ability can make a psionic attack. Psionic attacks are made at Strike Speed 10 (the same as Glance attacks). The Psionic Attack Roll is 1d20 + MIND bonus + number of psionic abilities manifested. The attack is successful if it is higher than the target's Psionic Armor Class (10 + MIND bonus + armor bonuses from a psionic defense mode).

Psionic attacks do psionic damage (see below for amounts). Tally psionic damage separately. If the total psionic damage ever becomes greater than the character's current hit points, the character falls into a coma and remains in a coma until he has more hit points than psionic damage points and makes a successful WIL save (may be attempted once per hour). With a night's sleep, psionic damage "heals" 1d6 + twice the number of psionic abilities manifested, if any.

Psionic Defense Modes: Defense modes increase the character's psionic armor class when in use. Only one mode can be in effect at one time. Thought Shield costs 0 HP to use and gives a +1 bonus to the character's psionic armor class. Mind Blank costs 0 HP to use and gives a +2 bonus to the character's psionic armor class. Mental Barrier costs 0 HP to use and gives a +4 bonus to the character's psionic armor class. Intellect Fortress costs 2 HP to use and gives a +4 bonus to the psionic armor class of the character and everyone within 10 feet. Tower of Iron Will costs 3 HP to use and gives a +6 bonus to the psionic armor class of the character and everyone within 3 feet.

Psionic Attack Modes: Mind Thrust costs 1 HP to use and does 1d8 points of psionic damage. Ego Whip costs 2 HP to use and does 2d6 points of psionic damage and the target must make a WIL save or be stunned for one minute. Psionic Blast costs 4 HP to use

and attacks everyone in a conic area in front of the psionic doing 1d6 damage to everyone in the affected area, double damage to those in short range (10'), half damage at long range (30'). One attack roll is made and used against all possible targets. Id Insinuation costs 2 HP to use and does 3d6 psionic damage and the target must save vs. Fear or be affected as a fear spell for 1d6 rounds. Psychic Crush costs 5 HP to use and does 4d6 psionic damage and 2d6 physical (HP) damage.

Deities and Divine Intervention

Characters will find it helpful to follow one of the gods. Although Clerics, Druids, and Paladins have special access to the deities, other classes may receive advice and assistance at times as well. A character may select any deity (or pantheon in some campaigns) to follow from the campaign allowed by the GM.

Divine Intervention: Deities will occasionally assist their followers when petitioned for aid. There is a chance of angering the deity and a strong possibility that the deity will not deign to take an interest in mortal affairs at that time. The petitioner may thus receive aid, suffer harm, or get no response at all. Petitioning for divine intervention more often than once a week results in automatic retribution.

Petitioning for divine intervention can be done at any time provided the character is capable of thought. A d100 roll on the appropriate table using the column for the characters level below will determine the result. Clerics, Druids, and Paladins add 5 to their level before consulting the chart.

Greater Deity					
Result	1-5	6-10	11-15	16-20	21+
Retribution	01-80	01-70	01-60	01-50	01-40
No Effect	81-95	71-90	61-85	51-80	41-70
Intervention	96-00	91-00	86-00	81-00	71-00

Major Deity					
Result	1-5	6-10	11-15	16-20	21+
Retribution	01-70	01-60	01-40	01-30	01-20
No Effect	81-90	61-80	41-70	31-60	21-50
Intervention	91-00	81-00	71-00	61-00	51-00

Minor Deity					
Result	1-5	6-10	11-15	16-20	21+
Retribution	01-60	01-40	01-30	01-20	01-15
No Effect	61-85	41-75	31-65	11-55	16-45
Intervention	86-00	76-00	66-00	56-00	46-00

Demi-God					
Result	1-5	6-10	11-15	16-20	21+
Retribution	01-50	01-30	01-20	01-10	01-05
No Effect	51-80	31-65	11-55	11-45	06-35
Intervention	81-00	66-00	56-00	46-00	36-00

Characters may make an offering to their deity before rolling for divine intervention. All offerings must be in the possession of the petitioner at the time of the request (deities do not accept IOUs). This table lists the die roll modifier for various types of offerings:

Offering	Die Roll Modifier
Treasure (1000gp)	+1
Each Potion	+2
Magic Weapon/Armor	+Bonus
Magic Scroll (per spell)	+2
Magic Ring, wand, or rod	+5
Magic Staff	+10
Miscellaneous Magic item	+10
Minor Artifact	+15
Minor Artifact	+25
Accept Minor Quest	+10
Accept Major Quest	+20
Intelligent Being Sacrificed	+Level or HD

Only evil deities accept the sacrifice of intelligent beings. A minor quest will take 4 to 8 months. A major quest will take 1 to 3 years. The quest will be imposed by the deity (and need not involve actual questing).

There is an additional modifier of -15 if the character does not regularly donate at least 10% of income to the deity's temple. Characters who ignore their deity except when in need of help suffer a die roll modifier of -10 to -30 as determined by the GM.

If the result is intervention, the deity will do the minimum needed to answer the request. For Demi-Gods, the maximum would be about the ability of a limited wish spell. For Minor Deities, the maximum would be about the power of a single wish spell. For Major Deities, the maximum would be about the about ability of several wish spells. There is no effective limit for what Greater Deities can do.

If the result is retribution, the petitioner takes his level in D6 of damage (plus Body Point damage equal to the character's level if Body Points are being used).

Conversion (Optional): Characters may not willingly change their allegiance to another deity/pantheon except at a full temple of the new deity and then only with a favorable reaction roll from the new deity's priests (large donations to the temple will give favorable modifications to the roll). Lay people accepted by a new god must spend 1d4 weeks (at their own expense) at the temple learning the basic rituals and dogma of their new faith before they can receive any benefits from that faith. Clerics and Druids must spend 1d6 months (plus their level in weeks) in such study before they can cast divine spells above 2nd level again. Druids can only convert to another nature deity.

Spell Level Availability (Optional): A character's deity may limit the level of Divine Spells the character may cast. If the character's deity is a Demi-God, the maximum level of Divine Spells the character has access to is 5th level. If the character's deity is a Minor Deity, the maximum level of Divine Spells the character has access to is 6th level. If the character's deity is a Major or Greater Deity, the maximum level of Divine Spells the character has access to is 7th level.

Special Spells by Deity (Optional): Deities may not offer all of the standard Divine Spells (Cleric) to their clerics. They may simply not provide some of the standard spells, substitute special spells for some of the standard spells, or even add additional spells to the standard spells.

Microlite81 Spell Lists

Arcane (Magic-User/Elf) Spells

For expanded spell descriptions see B/X or a B/X retro-clone. R: is range. D: is duration.

1st Level

Charm Person: Makes a humanoid creature regard the caster as its trusted friend and ally (treat the target's attitude as friendly). Undead creatures are not affected by this spell, nor are humanoid monsters larger than ogres. R: 120 feet. D: until dispelled or saved against.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Floating Disk: Creates a small shield sized floating energy disc that follows the caster. Holds up to 500 lbs. R: 5 feet D: 60 minutes.

Hold Portal: Holds door/gate shut. R: 10 feet. D: 2d6 x 10 minutes.

Light: object lights circle with 30 ft. radius, not full daylight. R: 120 feet. D: 1 hour+10 min/level.

Magic Missile: Creates magic arrow which hits its target for 1d6 damage. An additional 2 missiles are created every 5 levels (e.g. total 3 at level 5, total 5 at level 10). R: 150 feet. D: 10 minutes.

Protection from Evil: +1 to AC and saves, counter mind control, hedge out summoned and enchanted monsters. Attacking a creature negates protection against that creature. Moves with caster. R: shell around caster. D: 1 hour.

Read Languages: Read any written language. D: 1 or 2 readings.

Read Magic: Read scrolls, spell books, other magical writing. R: caster only. D: one reading (two scrolls or equivalent).

Shield: Improves caster's armor class to 17 versus missile attack and to 15 versus melee attacks. R: caster. D: 20 minutes.

Sleep: Puts 4d6 HD of beings into magical slumber. Undead and creatures with more than 4 hit dice are not affected. Range: 240 feet. D: GM's 4d4 x 10 minutes.

Ventriloquism: allows caster to "throw his voice" absolutely convincingly. R: 60 feet. D: 20 minutes.

2nd Level

Continual Light: object lights circle with 120 ft. radius until dispelled, not full daylight. R: 120 feet.

Detect Evil: Reveals evil thoughts/intent or evil items. R: 60 feet. D: 20 minutes.

Detect Invisible: Detect invisible items and beings within 10 feet per caster level. D: 1 hour.

ESP: Allows Caster to read surface thoughts of target. Undead are immune. R: 60 feet. D: 2 hours.

Invisibility: Target is invisible until spell broken by caster, some outside force, or until it attacks. R: 240 feet.

Knock: Unlocks/unbars all locked or magically sealed doors or other door-like barriers. R: 60 feet. D: instant.

Levitate: Caster floats up and down as he desires. Speed: 20 feet up/down per minute. D: 60 minutes + 10 minutes/level.

Locate Object: Senses direction toward an object (specific or type) D: 20 minutes. R: 60 + 10/level feet.

Mirror Image: Creates 1d6-1 exact images of the caster, all moving exactly like original. Attackers cannot tell images from original. Images hit disappear. R: around caster. D: 1 hour.

Phantasmal Forces: Vivid illusions of nearly anything the caster envisions, lasts as long as the caster concentrates. Damage caused is real if target believes illusion. R: 240 feet.

Web: Sticky webs fill a 10x10x10 foot area. Burning through the webs takes 6+1d4 minutes. Large creatures push through in 14+1d6 minutes. Human-sized creatures take 20+3d6 minutes. R: 10 feet. D: 8 hours.

Wizard Lock: Locks door like Hold Portal. Permanent until dispelled. Knock opens without dispelling. Caster can pass through without lifting spell. R: 10 feet. D: instant.

3rd Level

Clairvoyance: See through eyes of one creature. Caster can change creatures once every 10 minutes. R: 60 feet. D: 120 minutes.

Dispel Magic: Cancels magic effects and spells in a 20x20 foot area. (If cast by higher level caster, Magic Attack vs. Spell's DC for success) Range: 120 feet. Duration: instant but effects permanent.

Fire Ball: Missile of fire that bursts when hits target for 1d6/level fire damage, 20 foot burst radius. R: 240 feet. D: instant.

Fly: Target can fly at a speed of 120 feet per minute. R: Touch. D: 1d6 x 10 minutes plus 10 minutes/level. (GM rolls secretly.)

Haste Spell: Subjects (up 24 beings in a 60 foot radius of target) double in speed, taking two actions at a time. (Counters Slow) R: 240 feet. D: 30 minutes.

Hold Person: Paralyzes 1-4 targets. Cast at single target, save at -2 and double duration. R: 120 feet. D: 10 minutes/level.

Infravision: See in the dark. R: touch. D: 1 day. Sight Range: 30 + (1d3 x 10) feet.

Invisibility, 10' radius: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until one attacks.

Lightning Bolt: 1d6/level electrical damage. Bolt bounces off walls, etc. R: 240 feet, bolt is 5 feet wide, 60 feet long. D: instant.

Protection from Evil, 10' radius: +1 to AC and saves, counter mind control, hedge out elementals and enchanted monsters to caster and all allies within 10 foot circle around caster. D: 120 minutes.

Protection from Normal Missiles: Non-magical thrown and missile weapons automatically miss. R: 30 feet. D: 120 minutes.

Water Breathing: Subject can breathe water. R: 30 feet. D: 1 day.

4th Level

Charm Monster: Makes one monster of 3+ hit dice (or 3d6 monsters of less than 3 hit dice) believe they are the caster's strong ally. Save again every level days or when asked to do something obviously against the being's interest. R: 120 feet.

Confusion: Subjects (up to 3d6 hit dice in a 60 foot circle, only 2+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Dimension Door: Teleports subject a short distance (up to 360 feet) from current location. Fails if destination not open air. R: 10 feet. D: instant.

Hallucinatory Terrain: Makes one type of terrain appear like another type until dispelled or area entered by an opponent. R: 240 feet.

Massmorph: Makes up to 100 humanoids in a 240 foot diameter circle appear to be trees until dispelled or negated by caster. Creatures may move and still appear to be trees. R: 240 feet.

Plant Growth: Plants in an area up to 3000 square feet (entire area must be within range) become overgrown and nearly impassable. Lasts until dispelled or plants killed. R: 120 feet.

Polymorph Others: Change one creature (but not self) into the form of another being. Change is complete and includes gaining special abilities and mind of creature. New form cannot have more than 2x the hit dice of original. R: 60 feet. D: until dispelled.

Polymorph Self: Change self to form of another being, does not get special powers but retains own intelligence. R: caster only. D: 60 + 10/level minutes.

Remove Curse: Frees subject from a single curse. Does not remove curse from object, but frees user to get rid of the cursed object. R: 10 feet. D: instant but effects permanent.

Wall of Fire: Creates thin wall of fire up to 1200 square feet. Blocks sight and creatures under 4 hit dice cannot pass. Passing through wall deals 1d6 damage (2d6 for undead or cold-using creatures). Wall lasts as long as caster concentrates on it. R: 60 feet.

Wall of Ice: Creates translucent wall of ice 20 feet tall and 60 feet long (or equivalent). Creatures under 4 hit dice cannot pass. Passing through wall deals 1d6 damage (2d6 for undead or fire-using creatures). Wall lasts as long as caster concentrates on it. R: 60 feet.

Wizard Eye: Allows sending an invisible eye that can see in the dark up to 240 feet away which relays all it sees to the caster. Moves up to 12 feet each minute. D: 60 minutes.

5th Level

Animate Dead: Create undead skeletons or zombies under control of caster from dead bodies, up to 1 hit die of undead per caster level. R: 60 feet. D: permanent.

Cloudkill: creates a moving, opaque, poisonous cloud of vapor which is deadly to all creatures with less than five hit dice. 30 feet in diameter, moves with wind or 6 feet per minute. Effects (suffered each minute within cloud): if under 5HD, save vs poison or die, suffer 1 hp damage if save made. 5HD or more, suffer 1 hp damage. D: 60 minutes.

Conjure Elemental: Conjures one 16 HD elemental who will serve the caster until dispelled/dismissed/caster no longer concentrates. Caster can only summon one of each type in a day. R: 240 feet.

Contact Higher Plane: Lets Caster ask yes/no question of other planar entity. There are 10 levels (from 3-12) of higher planes. Caster chooses which level to contact. 1 question per level. Chance of correct answer 45 + 5% per level, maximum 95%. Chance of going insane from the contact is 5% per level, maximum 50%. Range: caster. Duration: 1 minute per question.

Feeblemind: Subject's MIND drops to 1. Save at -4. R: 240 feet. D: until dispelled.

Hold Monster: As Hold Person, but any creature. R: 120 feet. D: 1 hour plus 10 minutes/level.

Magic Jar: Moves caster's spirit/mind to a fixed object from which caster can try to possess others. Magic Attack vs. DC of (10 + MIND bonus + target level or hit dice). New save every level days. Range: 30 feet. Duration: until dispelled or caster ends spell.

Pass-Wall: Creates a 5 foot wide passage up to 10 feet long through a wood or stone wall. R: 30 feet. D: 30 minutes.

Rock-Mud: Transforms rock to mud or vice-versa, up to 3000 square foot area 10 feet deep. R: 120 feet. D: 3d6 days.

Telekinesis: Moves object by mental power. Up to 20 pounds per level. Object moves 20 feet per minute. Living creatures get a saving throw if they do not wish to be moved. R: 120 feet. D: 1 hour.

Teleport: Instantly transports subject up to 100 miles/level. Caster must know target location exactly. The less exactly one knows the target, the greater the chance of appearing too high or too low. Too low is usually fatal as creature and ground do not mix.

Wall of Stone: Creates a wall of stone in any shape up to 1000 cubic feet. R: 60 feet. D: until destroyed or dispelled.

6th Level

Anti-Magic Shell: Shell surrounds caster blocking magic both ways. R: caster. D: 2 hours.

Control Weather: Caster can adjust weather in a 240 yard radius. D: concentration.

Death Spell: Kills 4d8 hit dice of creatures with less than 8 hit dice with a 60 foot cube. R: 240 feet. D: instant but effect permanent.

Disintegrate: Makes one creature or non-magical object (or part of a large object, up to a 10 foot cube) vanish, turning it to fine dust. R: 60 feet. D: instant but effects permanent.

Geas: Force a creature to obey one long-term order, similar to the clerical Quest spell. R: 30 feet. D: until order completed.

Invisible Stalker: Summons an invisible stalker, an extra-dimensional monster, under the control of the Magic-User who may give it a single mission which it will carry out until it is finished.

Lower Water: Lowers the depth of 10,000 square feet of water by 50%. R: 240 feet. D: 10 turns.

Move Earth: Move 60 cubic feet of loose soil per turn within the range of the spell. Neither solid stone nor large boulders may be moved. R: 240 feet. D: permanent.

Part Water: Creates a dry path 10' wide and a maximum of 120' long through water, such as a pond, lake, or other body. Caster can terminate spell early. R: 240 feet. D: 1 hour.

MICROLITE81 EXTENDED (VERSION 1.0 SILVER)

Projected Image: Project an image of yourself that can sense and talk as if you were the image. Other spells cast come from image. R: 240 feet. D: 60 minutes.

Reincarnation: Restores dead person to life in a random (usually humanoid) form. R: touch. D: instant.

Stone-Flesh: Turns subject into a stone statue (or vice versa). R: 120 feet. D: permanent.

Arcane (Illusionist) Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Change Self: Illusion makes the caster appear to be a different creature. The illusionary guise must share the same general size and shape as the illusionist. R: caster. D: 10 x (1d6 + 10 + level) minutes.

Color Spray: A sheet of bright conflicting colors affecting 1-6 levels/hit dice of creatures (plus 1 level/hit dice for every 5 levels of the caster), rendering them unconscious (for 1 minute/caster level) through confusion. Targets selected randomly. No saving throw if fully affected. Creatures not fully affected get a save with +1 per level/die after the first not affected. Creatures over 6th level not affected. R: 240 feet.

Darkness: Magical darkness which even blocks infravision and darkvision within a circle with 30 ft. radius. R: 120 feet. D: 1 hour+10 min/caster level.

Detect Illusion: Detects any illusion for what it is. R: 60 feet. D: 30 minutes.

Detect Invisible: Detect invisible items and beings within 10 feet per caster level. D: 1 hour.

Hypnotism: Acts like a Charm person spell with a +2 chance of success, it is necessary for the subject to look the Illusionist in the eyes. R: 80 ft.

Light: Object lights circle with 30 ft. radius, not full daylight. R: 120 feet. D: 1 hour+10 min/caster level.

Magic Aura: Alters item's aura so that it appears to detection magic as though it were non-magical or the subject of a spell you specify. Identify Spell will reveal the false aura. Limited effect on very powerful items. R: touch D: 1 day/caster level.

Phantasmal Forces: Vivid illusions of nearly anything the caster envisions, lasts as long as the caster concentrates. Damage caused is real if the target believes illusion. R: 240 feet.

Read Magic: Read scrolls, spell books, other magical writing. R: Caster Only. D: one reading (two scrolls or equivalent).

Ventriloquism: allows caster to "throw his voice" absolutely convincingly. R: 90 feet. D: 50 minutes.

Wall of Fog: Creates an opaque wall of rolling, boiling fog with no other effect than blocking vision. Wall lasts as long as caster concentrates on it. R: 160 feet.

2nd Level

Blindness: Causes the target to become blind (if save failed). R: 120 feet. D: until cancelled by caster or dispelled.

Blur: Caster's appearance is blurred, making -2 on being hit, and +2 on saves vs. magic. R: self. D: 10 times 1d4+4 minutes.

Deafness: Causes the target to become deaf (if save failed). R: 120 feet. D: until cancelled by caster or dispelled.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Fog: A cloud of opaque fog that acts like a Cloudkill except that it has no effect but to obstruct vision. 30 feet in diameter, moves with wind or 6 feet per minute. D: 1 hour.

Hypnotic Pattern: A pattern that the Illusionist projects in front of him that will hold anyone looking at the pattern motionless. It can catch 4d6 1st level types, 3d6 2nd level types, 2d6 3rd or 4th level types, 1d6 5th or 6th level types. Range: 120 feet. D: as long as caster concentrates plus 1d6+3 turns afterwards.

Improved Phantasmal Forces: As regular Phantasmal Forces but the caster can move while employing the spell and the illusion will last up to 30 minutes after the caster has stopped concentrating. R: 360 feet.

Invisibility: Subject is invisible until spell broken by caster, some outside force, or until subject attacks. R: 240 feet.

Magic Mouth: Mouth appears on target object and delivers up to 30 word message when conditions set by caster are met. R: touch. D: permanent until triggered or dispelled.

Mirror Image: Creates 1d6-1 exact images of the caster, all moving exactly like original. Attackers cannot tell images from original. Images hit disappear. R: around caster. D: 1 hour.

Misdetection: cause a detect spell (Detect Good, Evil, Magic, etc.) to malfunction. (Magic Attack vs. Spell's DC for success) R: 120 feet. D: instant but effects permanent.

Phantom Trap: Makes a lock or other small mechanism seem to be trapped to anyone who can detect traps. R: touch. D: permanent.

3rd Level

Continual Darkness: Magical darkness which even blocks infravision and darkvision within a circle with 120 ft. radius until dispelled. R: 120 feet.

Continual Light: Object lights circle with 120 ft. radius until dispelled, full daylight. R: 120 feet.

Dispel Illusion: Automatically dispels any illusion caused by a non-Illusionist. Versus those created by Illusionists, it functions like Dispel Magic. R: 120 feet.

Displacement: Target appears to be about 2 feet away from its true location. Attacks on target automatically miss 50% of the time and are at -2 to hit the rest of the time. R: touch. D: 1 minute/caster level.

Fear: Causes creatures who fail their saving throw to flee fear. Affect 4d10 1st level types, 3d10 second level types, 2d10 3rd level types, 1d10 4th level types, 1d6 5th level types, 1d4 6th level types. R: 180 feet. D: 10 times 1d6+level minutes.

Hallucinatory Terrain: Makes one type of terrain appear like another type until dispelled or area entered by an opponent. R: 240 feet

Illusionary Script: Allows the caster to write in a script which can only be read by whom the caster sets it to be read by (like Magic Mouth), any others who attempt to read it must save vs. magic or be confused for 6d10 minutes. One spell is suitable for a full page per level of the caster of writing.

Invisibility 10' Range: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until one attacks.

Non-Detection: Prevents Detection spells from working against the target using it and acts like an Amulet vs. ESP and Crystal Balls. R: touch. D: 20 minutes/caster level.

Paralyzation: Paralyzes twice as many hit dice as the caster's level. R: 180 feet. D: until dispelled or caster removes it.

Rope Trick: Caster tosses rope into the air. It hangs there. Caster and up three others can climb rope into a hidden pocket dimension at top. Rope can be pulled up or left out. R: rope toss. D: 60 minutes + 10 minutes/caster level.

Spectral Forces: As Improved Phantasmal Forces, but includes sound, smell and temperature illusions. Spectral Forces are not destroyed by touch and they last up to 50 minutes after the caster has stopped concentrating. R: 360 feet.

Suggestion: Caster makes 1-2 sentence hypnotic suggestion to target. If save failed, target will carry out suggestion for up to duration. Only 1% chance target will obey suggestion that obviously would result in target's death/extreme injury. R: 30 feet. D: 1 week.

4th Level

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Dispel Magic: Cancels magic effects and spells in a 20x20 foot area. (If cast by higher level caster, Magic Attack vs. Spell's DC for success) Range: 120 feet. Duration: instant but effects permanent.

Emotions: Projects a selected emotion. The emotions that can be projected are: Fear (as the spell), Battle Lust (makes men fight as Berserkers, can be countered by Fear; if Fear is thrown first, Battle Lust does not counter it), Deprivation (lowers morale by

75%), Bravado (give immunity from Fear, Bravado which can counter Deprivation), Hate (interpretation by the subject is variable, roll d20: 1-4: hate any enemy around; 5-8: hate each other; 9-14: hate both enemy/each other; 15-16: hate selves, 17-20: hate caster. A person under the influence of a hate will attack whoever the die roll indicates). R: 180 feet. D: concentration.

Illusory Wall: Creates the illusion of a wall, floor, ceiling, or similar surface which appears real when viewed, but physical objects pass through without difficulty. Detection abilities that do not require sight work normally. Touch or a probing search reveals the true nature, but does not cause the illusion to disappear. R: 30 feet. D: permanent.

Improved Invisibility: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until 1d4+caster level minutes after the first attack is made by one under this spell.

Massmorph: Makes up to 100 humanoids appear to be trees until dispelled or negated by caster. Creatures may move and still appear to be trees. R: 240 feet.

Minor Creation: Allows the caster to create materials up to a hardness comparable to wood (much like a Djinn). The total amount of weight an illusionist may create in a day equals 5 pounds times the caster's level. R: touch. D: 4 + level days (longer for softer materials).

Rainbow Pattern: A pattern that the Illusionist projects in front of him that will hold anyone looking at the pattern motionless. It can catch 8d6 1st level types, 6d6 2nd level types, 4d6 3rd or 4th level types, 2d6 5th or 6th level types, or 1d6 7th or 8th level types. D: as long as caster concentrates plus 1d6+3 turns afterwards. Range: 120 feet.

Seeming: Like Change Self, except can change the appearance of other people as well. Affected creatures resume their normal appearances if slain. R: 30 feet. D: 10 x (1d6 + 10 + level) minutes.

Shadow Magic: This spell allows the illusionist to cast semi-real offensive spells which mimic the following real offensive spells: Lightning Bolt/Fire Ball (1d6 damage per 4 caster levels) or Death Spell (Affects 1d8 creatures of 1 HD). R: as original spell D: instant but effects permanent.

Shadow Monsters: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 20% the number of HD of the original (Original HP X 0.2. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 9 [10], and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute/caster level.

5th Level

Chaos: This spell affects a 30 foot x 30 foot area. All those caught within the affected area will become confused until they leave the area. Fighters and Illusionists over the caster's level are not affected by this spell. R: 120 feet. D: concentration.

False Vision: Any divination/scrying magic used to view anything within the area of this spell instead receives a false image (as the Spectral Forces spell), as defined by you at the time of casting. While the spell lasts, you can concentrate to change the image as desired. R: 40 feet radius. D: 1 hour/caster level.

Major Creation: Allows the caster to create materials up to a hardness comparable to iron (much like a Djinn). The total amount of weight an illusionist may create in a day equals 15 pounds times the caster's level. R: touch. D: 4 + level days (for wood hardness, longer for softer materials, shorter for harder materials).

Mirage: As Hallucinatory Terrain, except that it enables the caster to make any area appear to be something other than it is. Unlike Hallucinatory Terrain, the spell can alter the appearance of structures (or add them where none are present). R: 240 feet. D: 1 hour/caster level.

Phantasmal Killer: Creates an illusionary horrible beast formed from the target's own fears whose touch causes death. The beast is visible only to the target and is immune from all attacks and barriers as it exists only in the target's mind. Target must save vs. magic twice. If the target fails one save, he is unconscious for 1d6 hours. If both saves fail, the target is dead. Range: 60 feet.

Projected Image: Project an image of yourself that can sense and talk as if you were the image. Other spells cast come from image. R: 240 feet. D: 1 hour.

Shadow Magic II: This spell allows the illusionist to cast semi-real offensive spells which mimic the following real offensive spells: Lightning Bolt/Fire Ball (1d6 damage per 2 illusionist levels) or Death Spell (Affects 1d8 creatures of up to 2 HD).

Shadow Monsters II: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 40% the number of HD of the original (Original HP X 0.4. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 11, and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to 1.5 times the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute per level.

Summon Shadows: Similar to an Invisible Stalker spell, but summons Shadows instead. The number of Shadows summoned is equal to 1 + 1 per level over 5. D: until mission completed.

6th Level

Conjure Animals: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the caster. R: 30 feet. D: 100 minutes.

Illusionary Double: Caster becomes invisible as Improved Invisibility (for one minute/caster level) and a Programmed Illusion of the caster unnoticeably takes his place. R: caster. D: 2 hours.

Mass Suggestion: Area version of the suggestion spell, affecting 1d8 creatures or 1 creature at -4 saving throw. The same suggestion must be made to all on whom it is cast. R: 30 feet. D: 1 week.

Permanent Illusion: As Spectral Forces, but lasts until dispelled. R: 360 feet. D: Until dispelled.

Programmed Illusion: As Spectral Forces, but illusion performs pre-set instructions without the caster's concentration. For example, a dragon flies to the camp, circles it for 30 minutes, roars every other pass, then flies off while the Illusionist escapes. R: 720 feet. D: 120 minutes.

Shadow Monsters III: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 20% the number of HD of the original (Original HP X 0.6. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 12, and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to 2 times the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute per level.

True Sight: Spell increases target's sight. A polymorphed creature or object will appear as it really is, superimposed with its present form. When looking at a person one may tell his alignment, class, level, and general intentions. One may also see invisible, displaced, ethereal and astral objects. R: touch. D: (level - 10) + 1d6 10 minute turns.

Veil: Like Change Self, except can change the appearance of other people as well and the new appearance can be anything. Affected creatures resume their normal appearances if slain. R: 30 feet. D: 10 x (1d6 + 10 + level) minutes.

Divine (Cleric) Spells

For expanded spell descriptions see B/X or a B/X retro-clone. R: is range. D: is duration.

1st Level

Cure Light Wounds (Reversible): Cure 1d2+1 body points (1d6+1 hit points on beings without BP) or cures paralysis. R: touch. D: instant but effects permanent.

Detect Evil: Reveals evil thoughts/intent or evil items. R: 120 feet. D: 1 hour.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Light (Reversible): object lights circle with 30 ft. radius, not full daylight. R: 60 feet. D: 2 hours.

Protection from Evil (Reversible): +1 to AC and saves, counter mind control, hedge out summoned and enchanted monsters. Attacking a creature negates protection against that creature. Moves with caster. R: shell around caster. D: 2 hours.

Purify Food & Water (Reversible): Purifies food and water for up to 12 people. R: 10 feet. D: instant but effects permanent.

Remove Fear (Reversible): Calms one creature, removing all normal fear. If magical fear, grants immediate save with a bonus equal to caster's level. R: touch D: 20 minutes.

Resist Cold: Targets immune to effects or normal cold, have a +2 to save vs. cold, and have damage from magical cold reduced by 1 point per damage die (minimum damage: 1 point per die). R: 30 feet. D: 60 minutes.

2nd Level

Bless (Reversible): Allies gain +1 on attack rolls, saves against fear, and morale checks. Cannot be cast in combat. R: 10 feet. D: 1 hour.

Find Traps: Notice traps within 30 feet. R: caster. D: 20 minutes.

Know Alignment: Caster knows alignment of a character or monster within range (if target saves, no effect). Alignment of magic items or the nature of a holy (or unholy) place will be revealed.

Hold Person: Paralyzes 1-4 targets. Cast at single target, save at -2 and double duration. R: 180 feet. D: 90 minutes.

Resist Fire: Targets immune to effects of normal fire/intense heat, have a +2 to save vs. fire/heat, and have damage from magical fire/heat reduced by 1 point per damage die (minimum damage: 1 point per die). R: 30 feet. D: 60 minutes.

Silence, 15' Radius: Magical silence for 15 feet around target, moving with target. No sound within area can be heard from outside it. R: 180 feet. D: 2 hours.

Snake Charm: 1d6 snakes/level charmed and will obey caster's commands. R: 60 feet. D: 20 minutes + 1d4 x 10 minutes.

Speak with Animals: Can understand and speak with animals. R: 30 feet. D: 1 hour.

3rd Level

Animal Growth: One non-magical normal or giant animal will be doubled in size. R: 120 feet. D: 120 minutes.

Continual Light (Reversible): object lights circle with 120 ft. radius until dispelled, full daylight. R: 120 feet.

Cure Disease (Reversible): Cures person of any diseases, including magical diseases. Kills Green Slime. R: 30 feet. D: instant but effects permanent.

Locate Object: Senses direction toward an object (specific object or object type) D: 60 minutes. R: 90 feet.

Remove Curse (Reversible): Frees subject from a single curse. Does not remove curse from object, but frees user to get rid of the cursed object. R: 10 feet. D: instant but effects permanent.

Striking: Enchants weapon to do extra 1d6 damage and be able to hit creatures only affected by magic weapons. R: 30 feet: D: 10 minutes.

4th Level

Create Water: Creates water, enough for up to 12 people and their horses for one day. For each level the caster has above 8, water for 12 more people and horses is produced. R: 10 feet. D: instant but effects permanent.

Cure Serious Wounds (Reversible): Cures 3d2+3 body points (3d6+3 hit points on beings without BP) and cures paralysis. R: touch. D: instant but effects permanent.

Neutralize Poison: Cancels all effects of poison (including death if cast within 10 minutes of poison death). R: touch. D: instant but effects permanent.

Protection from Evil, 10' radius (Reversible): +1 to AC and saves, counter mind control, hedge out elementals and enchanted monsters to caster and all allies within 10 foot circle around caster. R: caster. Moves with caster. R: shell around caster. D: 2 hours.

Speak with Plants: Can understand and speak with plants. Plants will perform simple tasks like allow passage if asked. R: 30 feet. D: 30 minutes.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 60 minutes.

5th Level

Commune: Cleric's Deity truthfully answers three yes-or-no questions. Only once per week. Double questions once per year. R: caster. D: 10 minutes.

Create Food: Creates food, enough for up to 12 people and their horses for one day. For each level the caster has above 8, food for 12 more people and horses is produced. R: 10 feet. D: instant but effects permanent.

Dispel Evil (Reversible): Dispel any enchanted, summoned, or undead creature in range that fails save. If save made, creatures must flee for duration so long as caster concentrates. If used against one creature, save at -2. R: 30 feet. D: instant (flee effects up to 10 minutes).

Insect Plague: Insect swarms (60 feet in diameter) obscure vision and attack creatures. Creatures under 3 HD flee in terror. Can only be cast outdoors. R: 480 feet. D: 1 day.

Quest (Reversible): Force a creature to obey one long-term order or suffer curse that can only be removed by completing quest or by the reverse of this spell. R: 30 feet. D: until order completed.

Raise Dead (Reversible): Restores life to subject who died as long as 4 days (plus 4 days per caster level over 8) ago. R: line of sight. D: instant but effects permanent.

Divine (Druid) Spells

For expanded spell descriptions see B/X or a B/X retro-clone. R: is range. D: is duration.

1st Level

Calm Animals: Soothes and quiets (2d4 + level) HD of normal animals, rendering them docile and harmless. R: 30 feet. D: 1 minute/caster level.

Charm Animal: Like charm person, except that it affects one normal animal. R: 60 feet. D: until dispelled.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Detect Snares/Pits: This spell allows the caster to discover snares, pits, and other outdoor traps. R: 10 feet/caster level. D: caster level + 1 hours.

Endure Elements: Target (and equipment) can exist comfortably in hot or cold environments (between -50 and 140 degrees F). R: touch. D: 24 hours.

Faerie Fire: Lines the target in a luminescent glow. R: 60 feet. D: 1 hour.

Locate Animals: Senses direction toward an animal (specific or type) R: 60 +10/caster level feet. D: 1 minute/caster level.

Predict Weather: Forecast the weather in the caster's location with 95% accuracy. D: instant.

Purify Water: Purifies water for up to 12 people. R: 10 feet. D: instant but effects permanent.

2nd Level

Animal Messenger: Compels a small animal to go to a spot you designate, carrying a scroll or other small item, and allow others to take that item. R: touch. D: 1 day/caster level.

Create Water: Creates water, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Cure Light Wounds: Cure 1d2+1 body points (1d6+1 hit points on beings without BP). R: touch. D: instant but effects permanent.

Detect Poison: Detects whether a creature, object, or area (5 foot cube) has been poisoned or is poisonous. R: 30 feet. D: Instant.

Heat Metal: Spell makes 1 metal item (weighing up to 0.5 pounds per level of the caster) extremely warm. Creatures take damage if holding or wearing equipment that is targeted by this spell. Take 1d2 damage on the first round and 1d2+1 additional damage on the second round. 50% chance per round that a target object being held in the hand is dropped. R: 30 feet. D: 2 combat rounds.

Locate Plants: Senses direction toward a plant (specific or type) R: 60 +10/caster level feet. D: 1 minute/caster level.

Obscurement: A misty vapor arises near the druid. It is stationary once created. The vapor obscures all sight beyond 5 feet. The cloud covers 100 cubic feet per druid level. R: 20 feet. D: 10 minutes/caster level.

Produce Flame: Produces a small flame in the palm of Druid's hand which illuminates as a small lantern. The flame may be hurled and causes inflammables to combust. R: caster. D: 20 minutes/caster level.

Speak with Animals: Can understand and speak with animals. R: caster. D: 1 hour.

Warp Wood: Causes straight wooden shafts to bend. The spell effects an amount of wood equal to 1 spear shaft (or 6 arrows) per 2 druid levels. R: 30 feet. D: instant but effects permanent.

Wood Shape: Forms one existing piece of wood into any shape that suits your purpose. While it is possible to make crude coffers, doors, and so forth, fine detail isn't possible. R: touch. D: instant but effects permanent.

3rd Level

Call Lightning: Call down one lightning bolt (8d6 + level damage) per turn. The caster may target anyone within the spell's range. This spell is only usable outdoors within 360' of stormy weather. R: 360 ft. D: 1 turn/caster level.

Cure Disease: Cures person of any diseases, including magical diseases. R: touch D: instant but effects permanent.

Dominate Animal: Enchant an animal and direct it with simple mental commands such as "Attack," "Run," and "Fetch." Suicidal or self-destructive commands (including an order to attack a creature considerably larger than the dominated animal) are simply ignored. R: 30 feet. D: 1 minute/caster level.

Hold Animal: Paralyzes 1-4 animals. Cast at single target, save at -2 and double duration. R: 120 feet. D: 1 hour plus 10 minutes/caster level.

Neutralize Poison: Immunizes subject against poison (10 minute duration) OR detoxifies venom in or on subject (instant but effects permanent). R: touch.

Plant Growth: Plants in an area up to 30x30 yards become overgrown and nearly impassable. Lasts until dispelled or plants killed. R: 240 feet.

Protection/Fire: Cast upon a non-druid, this spell renders the target invulnerable to normal fire. Cast upon a druid, this spell also protects from magical fire, but such magical flames will immediately cancel the spell on the next turn. R: touch. D: 30 + 10/caster level minutes.

Pyrotechnics: Caster creates either fireworks or blinding smoke from a normal fire. R: 240 feet. D: 1 hour.

Water Breathing: Subject can breathe water. R: 30 feet. D: 2 hours.

4th Level

Control Temperature, 10' radius: Allows the druid to vary the temperature in a given area (10' radius) by +/- 50 degrees. Mistletoe is required to cast this spell. R: 60 feet. D: 30 + 10/caster level minutes.

Cure Serious Wounds: Cures 3d2+3 body points (3d6+3 hit points on beings without BP). R: touch. D: instant but effects permanent.

Dispel Magic: Cancels magic effects and spells. (Magic Attack vs. Spell's DC for success). R: 120 feet. D: instant but effects permanent for spells or 10 minutes for items.

Hallucinatory Forest: This spell creates an illusionary forest covering an area of 30' x 30' per level. Creatures within this area will absolutely believe they are in a forest, acting and reacting appropriately to their surroundings. Other druids, magical woodland creatures, and treants are never fooled by this spell. R: 60 feet to forest edge. D: until dispelled.

Insect Plague: Insect swarms (20 x 20x 20 feet) attack creatures. Creatures under 2 HD flee in terror. Can only be cast outdoors. R: 480 feet. D: 1 day.

Plant Door: Allows the druid to pass through thick/dense vegetation. This 3' X 6' "door" is usable only by the caster, but another druid or a dryad may follow. This spell may also be used to pass through solid tree trunks. The druid may decide to stay within the truck for up to the duration of the spell to hide from others. R: caster. D: 30 + 10/caster level minutes.

Produce Fire: Creates normal fire covering an area of 10' X 10'. This spell may be reversed to extinguish fires covering the same area. R: 30 feet. D: 10 minutes.

Protection from Lightning: This spell negates the effects of electrical attacks upon the target. The spell ceases after such an attack. R: touch D: 1 hour + 10/caster level minutes.

Speak with Plants: Can understand and speak with plants. R: 30 feet. D: 1 hour.

5th Level

Animal Growth: 1d6 normal animals grow to giant size. R: 120 feet. D: 2 hours.

Anti-Plant Shell: Similar to the magic-user spell Anti-Magic Shell but instead of protecting from spells, it protects against attacks from plants and living vegetables. R: caster. D: 2 hours.

Charm Plants: Charms the equivalent of: 1 large oak, 6 medium sized bushes, 12 small shrubs, or 24 little plants. These charmed plants will do anything the caster demands as long as it is within their ability to comply. R: 120 feet. D: until dispelled.

Commune with Nature: Same as the cleric spell Commune but must be performed outdoors and the answers received will only pertain to Nature. R: caster. D: 3 questions.

Control Winds: A druid may employ this spell to increase the force of, or calm, winds within 120' of the druid. The center-point of the spell's effect is the druid and follows the druid's movements. Such affected winds may influence flying creatures and sailing ships (forcing them out of the air or halting their maritime travel). A Control Winds spell cast upon an existing Control Winds spell will negate it. The spell's range is increased to 320 at 11th level, 400 at 12th level, and 480 at 12th druid level. R: 120 feet. D: 1 hour + 10/caster level minutes.

Hold Plant: Similar to the magic-user spell Hold Monster but affects living, magical or animated plants. This spell affects both treants and fungoid life forms. R: 30 feet + 10 feet/caster level. D: 1 hour + 10/caster level minutes.

Pass Plant: Allows the druid to enter one tree and emerge from another of the same species. The base distance travelled this way is 480 yards + modifier based on the tree type (Oak +120 yards. Ash, yew, linden, and elm -120 yards. Other deciduous trees -180 yards. Coniferous trees -240 yards). The tree's girth must be large enough to engulf the druid. Travel must be from one living tree to another. If no such tree exists within the range of the spell, then the spell fails and the druid re-emerges from the starting tree. R: see above. D: 10 minutes.

Rock-Mud: Transforms rock to mud or vice-versa, up a 300x300 foot area. R: 120 feet. D: 3d6 days.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 1 hour.

Wall of Fire: Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through wall deals 2d6 damage +1/caster level. Wall lasts as long as caster concentrates on it. R: 60 feet.

Monsters

AC=Armor; HD=Hit Dice; AT=Attacks; MR=Morale Rating; ST=Saving Throw; TC=Treasure Class; S=Special Abilities

ROC, SMALL: AC: 15 HD: 6d8 AT: 2 claws+6 (1d4+1), bite+6 (2d6) MR: 8 ST: F3 TC: 14 S: flies, -2 reaction to chaos, -1 reaction to neutral.

ROC, LARGE: AC: 17 HD: 12d8 AT: 2 claws+12 (1d8), bite+12 (2d10) MR: 9 ST: F6 TC: 14 S: flies, -2 reaction to chaos, -1 reaction to neutral.

ROC, GIANT: AC: 19 HD: 36d8 AT: 2 claws+15 (3d6), bite+15 (8d6) MR: 10 ST: F9 TC: 14 S: flies, -2 reaction to chaos, -1 reaction to neutral.

ROT GRUB: AC: 10 HD: 1 hp AT: special MR: 12 S: human TC: 0 S: Upon contact rot grubs burrow into the body. Fire applied to contact location at once kills them (but does 1d6 fire damage) the rot grubs from burrowing further. Otherwise rot grubs reaches heart in 1d3 x 10 minutes causes death. Cure Disease destroys all rot grubs in body.

RUST MONSTER: AC: 17 HD: 5d8 AT: touch +5 (special) MR: 7 ST: F3 TC: 0 S: touch of (or touching) the rust monster causes metal items to turn to rust. Magic items first lose bonuses (+1 per touch, each =1 gives a 10% chance of ignoring touch)

SALAMANDER, FLAME: AC: 17 HD: 8d8 AT: 2 claws+8 (1d4), bite +8 (1d8) MR: 8 ST: F8 TC: 17 S: heat does 1d8 to creatures within 20 feet, immune to sleep, charm, fire and non-magical weapons.

SALAMANDER, FROST: : AC: 16 HD: 2d8 AT: 4 claws+12 (1d6), bite +12 (2d6) MR: 9 ST: F12 TC: 18 S: cold does 1d8 to creatures within 20 feet, immune to sleep, charm, cold and non-magical weapons.

SCORPION, GIANT: AC: 17 HD: 4d8 AT: 2 claws+4 (1d10), sting +4 (1d4, poison) MR: 11 ST: F2 TC: 8 S: poison causes paralysis and loss of 1d4 hp per minute.

SEA SERPENT: AC: 14 HD: 6d6 AT: bite+6 (2d6) or constrict+6 (special) MR: 8 ST: F3 TC: 0 S: wraps around ships for 1d10 constriction damage to ship structure.

SHADOW: AC: 12 HD: 2d8+2 AT: touch+2 (1d4, special) MR: 12 ST: F2 TC: 17 S: drains 1 STR per hit (regained after 80-minutes), hit only by magical weapons, surprise on a 1-5, creatures reduced to 0 STR will rise 24 hours later as a shadow. Not undead but immune to charm and sleep.

SHARK, BULL: AC: 15 HD: 2d8 AT: bite+2 (2d4) MR: 7 ST: F1 TC: 0

SHARK, MAKO: AC: 15 HD: 4d8 AT: bite+4 (2d6) MR: 7 ST: F2 TC: 0

SHARK, GREAT WHITE: AC: 15 HD: 8d8 AT: bite+8 (2d10) MR: 7 ST: F4 TC: 0

SHREW, GIANT: AC: 15 HD: 1d8 AT: 2 bite+1 (1d6) MR: 10 ST: F1 TC: 0 S: Win initiative on first round, fear: 3 HD or less must save or flee.

SHRIEKER: AC: 12 HD: 3d8 AT: none MR: 12 ST: F1 TC: 0 S: large toadstool, if disturbed (light 60 feet/movement 30 feet) emits loud shriek for 1d3 minutes.

SKELETON: AC: 12 HD: 1d8 AT: weapon +1 MR: 12 ST: F1 TC: 0 S: undead immunities.

SNAKE, SPITTING COBRA: AC: 12 HD: 1d8 AT: bite+1 (1d3, poison) or spit+1 (blinded) MR: 7 ST: F1 TC: 0 S: spit causes blindness (save vs. poison); bite: save vs. poison or die in 1d10 x 10 minutes.

SNAKE, PIT VIPER: AC: 13 HD: 2d8 AT: bite+2 (1d4, poison) MR: 7 ST: F1 TC: 0 S: always win initiative, bite: save vs. poison or die.

SNAKE, SEA: AC: 13 HD: 2d8 AT: bite+2 (1d4, poison) MR: 7 ST: F1 TC: 0 S: bite: save vs. poison or die in 1d4 x 10 + 20 minutes (neutralize poison only 75% successful). If unaware of snake, 50% chance does not notice bite.

SNAKE, GIANT PYTHON: AC: 13 HD: 5d8 AT: bite+5 (1d4), constrict+5 (2d4) MR: 8 ST: F3 TC: 0 S: successful bite allows constrict attack, once successful, constriction damage suffered every round.

SNAKE, GIANT RATTLESNAKE: AC: 14 HD: 4d8 AT: 2 bite+4 (1d4, poison) MR: 8 ST: F2 TC: 0 S: bite: save vs. poison or die in 1d6 x 10 minutes; bites twice per round, second at end of round.

SPECTRE: AC: 17 HD: 6d8 AT: touch+6 (1d6) MR: 11 ST: F6 TC: 18 S: undead immunities, immune to non-magic weapons, drains 2 levels per hit, creatures reduced to 0 levels will rise 24 hours later as a spectre.

SPIDER, GIANT BLACK WIDOW: AC: 13 HD: 3d8 AT: bite+3 (2d6, poison) MR: 8 ST: F2 TC: 6 S: web, bite: save vs. poison or die in 10 minutes.

SPIDER, GIANT CRAB: AC: 12 HD: 2d8 AT: bite+2 (1d8, poison) MR: 7 ST: F1 TC: 6 S: surprise on 1d4, bite: save vs. poison at +2 or die in 1d4 x 10 minutes.

SPIDER, GIANT TARANTULA: AC: 14 HD: 4d8 AT: bite+4 (1d8, poison) MR: 8 ST: F2 TC: 6 S: bite: save vs. poison or spasm dance for 2d6 x 10 minutes (-4 to all actions. Others hit at +4), after 50 minutes paralyzed. Any seeing dance must save vs poison or suffer same effect. Effects counter by dispel magic.

SPRITE: AC: 14 HD: 1d4 AT: none MR: 7 ST: E1 TC: 4 S: 5 sprites can curse (effects funny rather than dangerous)

SQUID, GIANT: AC: 12 HD: 6d8 AT: 8 small tentacles+6 (1d4), bite+6 (1d10), 2 large tentacles+6 (special) MR: 7 ST: F3 TC: 7 S: large tentacles constrict ships of 1d10 structural damage (beak can do 2 structural); small tentacles constrict victims (damage taken each round). Small tentacles take 6 hp (large 10 hp) to chop off. Can shoot cloud of black ink to cover escape.

STEGOSAURUS: AC: 16 HD: 11d8 AT: tail+11 (2d8) or trample+11 (2d6) MR: 7 ST: F6 TC: 0

STATUE, ANIMATED CRYSTAL: AC: 15 HD: 3d8 AT: 2 fists+3 (1d6) MR: 11 ST: F3 TC: 0

STATUE, ANIMATED STONE: AC: 15 HD: 5d8 AT: 2 fists+5 (2d6) MR: 11 ST: F5 TC: 0 S: fists do lava damage

STATUE, ANIMATED IRON: AC: 15 HD: 4d8 AT: 2 fists+4 (1d8) MR: 11 ST: F4 TC: 0 S: when hit by non-magical metal weapon, attacker must save vs. spells or weapon lodged in statue, statue must be killed to retrieve.

STIRGE: AC: 12 HD: 1d8 AT: bite+1 (1d3) ST: 18 MR: 9 ST: F2 TC: 11 S: first attack at +2, attaches on a hit and will deal 1d3 automatically damage every round.

THROGHHRIN: AC: 13 HD: 3d8 AT: 2 claws+3 (1d3) or weapon+3 MR: 10 ST: F3 TC: 20 S: troll/hobgoblin/ghoul hybrid, touch paralyzes as ghoul, regenerate 1 hp each round as troll.

TITANOTHERE: AC: 14 HD: 12d8 AT: butt+12 (2d6) or trample+12 (2d8) MR: 7 ST: F6 TC: 0 S: charge for double butt damage.

TOAD, GIANT: AC: 12 HD: 2d8+2 AT: bite+2 (1d4+1) MR: 6 ST: F1 TC: 0 S: surprise foes on a 1-3, swallows small creatures whole on a natural 20, swallowed creatures take 1d6 automatic damage every round, long tongue pulls victims in to bite.

TREANT: AC: 17 HD: 8d8 AT: 2 branches+8 (2d6) MR: 6 ST: F8 TC: 20 S: Surprise on 1-3; Control 2 trees and can make them move and attack as a treant.

TRICERATOPS: AC: 17 HD: 11d8 AT: gore+11 (3d6) or trample+11 (3d6) MR: 8 ST: F6 TC: 0

TROGLODYTE: AC: 14 HD: 2d8 AT: 2 claws+2 (1d4), bite+2 (1d4) MR: 9 ST: F2 TC: 22 S: surprise on 1-4; horrid stench: save vs. poison or suffer -2 to attack rolls

TROLL: AC 15 HD: 6d8+3 AT: 2 claws+6 (1d6), bite+6 (1d10) MR: 10 ST: F6 TC: 19 S: regenerate 3 hp per round (except acid or fire damage).

TYRANNOSAURUS REX: AC: 16 HD: 20d8 AT: bite+15 (6d6) MR: 11 ST: F10 TC: 8 (x3) S: generally ignores creatures smaller than halfling.

UNICORN: AC: 17 HD: 4d8 AT: 2 hoofs+4 (1d8) or horn+4 (1d8) MR: 7 ST: F8 TC: 0 S: double horn damage for charge, 25% magic resistance, teleport once per day, horn can cure damage or disease.

VAMPIRE: AC: 17 HD: 7 to 9 d8 AT: touch+HD (1d10, special) or weapon+HD. MR: 11 ST: F7 to F9 TC: 17 S: undead immunities, hit only by magical weapons, electricity and cold do half damage, regenerate 3 hp per round, drains 2 levels per hit, immense strength, gaseous form at will, shape change into bat, charm gaze, avoids garlic and mirrors, summons bats or wolves, immobilized and apparently dead if a stake is driven through its heart (must then have head cut off to die), drowns under water in one round, creatures reduced to 0 levels will rise 24 hours later as a vampire under the control of their creator.

WEASEL, GIANT: AC: 12 HD: 4d8+4 AT: bite+4 (2d4) MR: 8 ST: F3 TC: 7 S: successful bite allows damage to continue each round.

WAR DOG: AC: 12 HD: 2d8 AT: bite+2 (1d6) MR: 9 ST: F2 TC: 0

WHALE, KILLER: AC: 13 HD: 6d8 AT: bite+6 (1d20) MR: 10 ST: F3 TC: 7 S: on attack roll of 20: swallow target (up to halfling size), swallowed creature suffers 1d6/minute, drowns after 10 minutes.

WHALE, NARWHAL: AC: 12 HD: 12d8 AT: bite+12 (2d6) or horn+12 (1d8) MR: 8 ST: F12 TC: 0 S: highly intelligent, ivory horn worth 1d6 x 1000gp.

WHALE, SPERM: AC: 13 HD: 36d8 AT: bite+15 (3d20) MR: 7 ST: F14 TC: 8 S: : on attack roll 4 higher than needed: swallow target (up to human size), swallowed creature suffers 3d6/minute, can slam into ships for 6d6 structural damage.

WIGHT: AC: 14 HD: 3d8 AT: touch+3 (special) MR: 12 ST: F3 TC: 21 S: undead immunities, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise 1d4 days later as a wight.

WOLF, ORDINARY: AC: 12 HD: 2d8+2 AT: bite+2 (1d6) MR: 8 ST: F1 TC: 0 S: when 50% of pack lost, MR drops to 6.

WOLF, DIRE: AC: 13 HD: 4d8+1 AT: bite+4 (2d4) MR: 8 ST: F2 TC: 0 S: used by goblins as mounts.

WRAITH: AC: 16 HD: 4d8 AT: touch+4 (1d6, special) MR: 12 ST: F4 TC: 18 S: undead immunities, only hit by magic or silver weapons, silver does half damage, drains a level per hit, creatures reduced to 0 levels will rise 24 hours later as a wraith.

WYVERN: AC: 16 HD: 8d8 AT: bite +8 (2d8) or sting +8 (1d6) MR: 9 S: poison sting (1d6 STR), flies.

YELLOW MOLD: AC: n/a HD: 2d8 AT: 1d6 if touched MR: n/a ST: F2 TC: 0 S: if struck, 50% releases spore cloud (choke to dead in 6 rounds unless cure disease), immune to all attacks except fire (a torch does 1d4 damage).

ZOMBIE: AC: 11 HD: 2d8 AT: weapon+2 or claws+2 (1d8) MR: 12 ST: F1 TC: 0 S: undead immunities; always attack last.

Microlite81 Treasure

Here is a list of sample treasure items appropriate to a Microlite81 campaign. Maps to possible hoards of such treasures are also a common treasure item. Of course, any magic item you like from the SRD can be used, but higher powered items may be too powerful for most Microlite81 games.

Money: 1 platinum piece (pp) = 5 gold pieces; 1 gold piece (gp) = 10 silver pieces; 1 electrum piece (ep) = 5 silver pieces; 1 silver piece (sp) = 10 copper pieces (cp).

Gems: Most range in value from 10gp to 1000gp, with 50% of gems being worth about 100gp. 1% are worth 1d20 times as much. 0.1% are worth 5d20 times as much.

Jewelry: Most pieces of jewelry are worth 3d6 x 100gp. 1% are worth 1d20 times as much. 0.1% are worth 5d20 times as much.

Artwork (statues, tapestries, paintings, drawings, etc.): Most art items are worth 10d10 x 10gp. 1% are worth 1d20 times as much. 0.1% are worth 5d20 times as much.

Magic Item Descriptions:

Potions:

There is a 70% chance that a potion bottle holds 1 dose, otherwise 1d6 doses. A quick taste of a potion can be used to identify it without consuming a dose. There is a 5% that a potion has decayed with age and has become a potion of delusion (60% chance) or poison (40% chance). Useless otherwise noted, the effects of a dose will last 1d6+6 10 minute turns.

Animal Control: The drinker may control one or more animals with a total hit dice of 3d6 or less. When the effect of the potion wears off, the animals will flee.

Antidote: The drinker becomes immune to all poisons of up to a specific strength for the duration of the potion. Poison from non-creature sources (e.g. a Potion of Poison) should be considered to be as if from a 7HD creature. The strength of the potion should be determined by rolling 1d10: 1-4 = Poison from 3HD creatures, 5-7 = Poison from 7HD creatures, 8-9 = Poison from 15HD creatures, 10 = All poison.

Clairaudience: While concentrating, the drinker may listen as if at any point within 60' of their current location.

Clairvoyance: While concentrating, the drinker may see as if at any point within 60' of their current location.

Climbing: The drinker may walk on walls and ceilings as if a spider.

Delusion: This potion will have no effect when drunk. However, if tasted, it will falsely give the taster the impression that it is another type of potion from this list. Multiple tasters will all get the same impression. An Analyze spell will correctly identify this potion as one of Delusion rather than as the type it tastes like.

Diminution: The drinker shrinks down to 6" in height. While in this state they cannot hurt creatures larger than 1' tall with physical attacks, and have a 90% chance of being able to hide. If this potion is drunk while a Potion of Growth is in effect, they will simply cancel each other rather than making the drinker sick.

Dragon Control: The drinker of this potion can control up to three dragons of sub-adult or younger. The dragons do not get saving throws, but older dragons are not affected. Each potion of dragon control will only control one type of dragon. The controlled dragons will do anything that is commanded (other than suicidal commands) although they are not capable of casting spells. When the control ends, the dragons will become hostile to the drinker and will either flee or attack depending on their impression of the drinker's power. Roll 1d10 to see which type of dragon is affected: 1-2 = Black, 3-4 = Blue, 5-6 = Green, 7-8 = Red, 9-10 = White.

ESP: This potion has the same effect as the spell of the same name.

Extra-Healing: This potion will cure 3d2+3 body points (3d6+3 hit points on beings without BP) of damage to the drinker and cure their paralysis. Can be used as 3 doses of Healing potion. This potion has an instant effect, rather than a duration.

Fire Resistance: The drinker becomes immune to normal fire, gains a +2 bonus on all saving throws against fire or heat based attacks, and takes -1 point of damage per die (to a minimum of 1 point per die) from magical fire attacks.

Flying: This potion has the same effect as the Fly spell.

Gaseous Form: The drinker's body transforms to a cloud of gas for up to 1 hour, causing all their equipment and carried items to fall to the floor. The drinker keeps control of their body, and can move through any non-airtight barrier. While in gaseous form, the drinker cannot attack, but has an armor class of -2 and can only be hit by magical weapons.

Giant Control: The user may control up to four giants of a certain type, but each one gets a saving throw. The giants will normally be hostile once control ends. To determine the type of giant affected, roll 1d6: 1 = Cloud, 2 = Fire, 3 = Frost, 4 = Hill, 5 = Stone, 6 = Storm.

Giant Strength: The drinker gains the strength of a giant, and can do double damage with melee weapons or throw large rocks (range: 60/130/200) for 3d6 damage. This potion does not stack with other strength enhancing items such as Gauntlets of Ogre Power.

Growth: The drinker grows to twice normal size, and be able to do double damage with melee attacks. If this potion is drunk while a Potion of Diminution is in effect, they will simply cancel each other rather than making the drinker sick.

Healing: This potion will either cure 1d2+1 body points (1d6+1 hit points on beings without BP) of damage to the drinker or cure their paralysis. This potion has an instant effect, rather than a duration.

Heroism: Dwarves, Halflings, and Fighters who drink this potion will temporarily gain one or more levels as follows:

Common Man (no class): +4 Fighter levels.
Dwarves, Halflings, and Fighters: Level 1-3: +3 levels; Level 4-7: +2 levels; Level 8-10: +1 level; Level 11+: no effect

All damage (including energy drains) is taken from the extra levels and hit points first.

Human Control: The drinker may control up to 6 levels of humans, similar to a Charm Person spell. The targets can only be controlled while within 60' of the drinker, and the effect lasts only for the duration of the potion.

Invisibility: This potion has the same effect as the spell of the same name.

Invulnerability: The drinker gains a +2 bonus to armor class and all saving throws for the duration of the potion. If a second Potion of Invulnerability is drunk within a week, the only effect is sickness.

Levitation: This potion has the same effect as the spell of the same name.

Longevity: The drinker immediately becomes 10 years younger. The effect is an instant one rather than an ongoing one, and

therefore cannot be dispelled. This potion will not reduce the age of the drinker below 15 years old.

Mana: This potion gives the drinker temporary hit points that can only be used to cast spells. These temporary hit points disappear in 10+1d10 minutes if not used. The strength of this potion is determined by rolling 1d6: 1-3: adds 1d6 temporary hit points, 4-5: adds 2d6 temporary hit points, 6: adds 3d6 temporary hit points.

Oil of Etherealness: This thin oil is applied to the character and all of his belongings in order to achieve an ethereal state for 4+1d4 x 10 minutes. It takes 3 minutes for the potion to produce effect, and can be negated earlier than the duration by applying a mildly acidic liquid. When ethereal, a character is invisible and can pass through any objects that are not also ethereal.

Oil of Slipperiness: Any creature coated in this thin oil cannot be restrained or grabbed, and neither wrapped in the grip of constrictor snakes or any other grasping attacks, including binding ropes, chains, or cuffs, magical or otherwise. Simply put, nothing can get a grip on a character coated in this oil. Objects can be coated with the oil, and if a floor is coated any individual even standing on the floor will have a 95% probability each round of falling, due to slipping. The effects of the oil last 8 hours, but the oil can be cleaned off early with liquid containing alcohol.

Philter of Love: Drinker becomes charmed by the next person or creature he or she lays eyes upon. However, the drinker will actually become charmed and besotted by the person or creature if it is of the preferred sex and of similar racial stock. The charm aspect of this potion lasts for 4+1d4 x 10 minutes, but only dispel magic will make the drinker cease to be enthralled by a member of a preferred sex.

Plant Control: The drinker may control all mundane plants and all plantlike creatures in a 30'x30' area up to 60' away. Mundane plants may entangle creatures in their area, but cannot otherwise attack.

Poison: This potion looks like any other, but it is poisonous. Anyone taking even a taste of the potion must save vs STR or die. Philter of Love:

Polymorph: This potion has the same effect as the polymorph self spell.

Speed: The drinker may move at double normal speed and attack twice per round.

Super-Heroism: Dwarves, Halflings, and Fighters who drink this potion will temporarily gain one or more levels for 5d6 minutes as follows:

Common Man (no class): +6 Fighter levels.
Dwarves, Halflings, and Fighters: Level 1-3: +5 levels; Level 4-7: + 4 levels; Level 8-10: +3 level; Level 11+: + 2 levels

All damage (including energy drains) is taken from the extra levels and hit points first.

Sweet Water: Used to cleanse water (including turning saltwater into fresh water) or otherwise transform poisons, acid, etc. into drinkable liquid. Sweet water will destroy other potions. For most liquids, this potion will affect up to 100,000 cubic feet. However, only 1,000 cubic feet of acid can be neutralized. The effects of sweet water are permanent, and once treated, liquid will resist spoilage or contamination for 5d4 rounds.

Treasure Finding: When the drinker concentrates, they can detect the distance and direction to the largest amount of treasure within 360'. The drinker gains no insight about the nature of the treasure or how to get to it.

MICROLITE81 EXTENDED (VERSION 1.0 SILVER)

Undead Control: The drinker can control up to 3d6 HD in total of undead creatures as the charm person spell. Effects last 5d4 minutes and intelligent undead will be hostile when the duration ends.

Water Breathing: This potion lasts for 1 hour plus 1d10 minutes, and has the same effect as the spell of the same name.

Scrolls

Most scrolls contain spells and can only be used by spell casters although a few spell scrolls can be used by any intelligent being. Special scrolls (warding, curse, etc.) can generally be used by anyone able to read them.

Spell Scroll (Clerical): These scrolls can be read by anyone but only used by clerics. They contain 1d3 spells. Roll 1d20 to determine the level of each spell: 1-8: level 1; 9-14: level 2; 15-17: level 3; 18-19: level 4; 20: level 5 (or GM choice). Each spell may be cast once then it fades from the scroll.

Spell Scroll (Magic-User/Elf): These scrolls can only be read with the read magic spell and can only be cast by magic-users or elves. They contain 1d3 spells. Roll 1d20 to determine the level of each spell: 1-6: level 1; 7-11: level 2; 12-14: level 3; 15-17: level 4; 18-19: level 5; 20: level 6 (or GM choice). Each spell may be cast once then it fades from the scroll.

Ward against Elementals: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Elementals cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 30 minutes, or until someone inside the zone attacks an elemental in hand-to-hand combat.

Ward against Lycanthropes: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Lycanthropes cannot enter the zone, but can use missile and spell attacks against those inside the zone. The zone lasts for 60 minutes, or until someone inside the zone attacks a lycanthrope in hand-to-hand combat.

Ward Against Magic: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Mortal level magic (whether from spells or items) cannot enter or leave the zone. The zone lasts for 60 minutes, and can only be broken extremely powerful magic, like a wish.

Ward Against Undead: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Undead cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 60 minutes, or until someone inside the zone attacks an undead in hand-to-hand combat.

Treasure Map: GM will construct the map and the treasure it leads to. The map is likely to lead to a treasure within the dungeon/area the characters find the map, or the map may lead to another, sometimes remote, location. Difficulty in attaining the treasure should reflect its value. There may be traps, riddles, or other challenges. The map itself may be enchanted so that it requires read magic to decipher or may be written in a different (or even dead) language.

Curse: Anyone who reads this scroll and who fails a save is cursed (GM's choice of effects or use table below) until a Remove Curse is successfully cast.

d6 Roll Effect of Curse

1	Victim loses random magic item.
2	Random Stat suffers a -4 penalty.
3	Victim does not gain experience.
4	Victim's level reduced by 1.
5	Victim turns in a small animal (as Polymorph Other)
6	Victim is rendered blind.

Wands and Staves

Most wands and all staves are magical devices that contain spell-like enchantments.

Wands are normally thin sticks around 18 inches long. They can only be used by magic-users and elves. A wand will hold 2d10 charges, and each time it is used one charge will be used up. Once all the charges are used up, a wand is simply a non-magical stick. Treat the effects produced a wand as if created by a 4th level caster.

Staves are the bigger cousins of wands. They are normally 5-6 feet long, and made of wood. Staves may be used by either magic-users/elves or clerics. A staff will have 3 d10 charges when found, and each use of the staff may use one of more of these charges. Once all the charges are used up, a staff is simply a non-magical stick, even powers that do not use a charge fail. Treat the effects produced a staff as if created by a 5th level caster. A staff can be used in melee as if a quarterstaff. When a staff is described, the name of the item will be followed by either "C" if it is usable by a cleric, or "MU/E" if it is usable by elves and magic-users.

Rods are as thick as as staff but only about 3 feet long. A rod will have 2d6 charges when found. Rods can be used by any class, unless otherwise noted.

Wand of Cold: Each time a charge is expended, this wand creates a cone of cold, 60 feet long and 30 feet wide at the end. All creatures within the cone must take 3d6 damage.

Wand of Detecting Enemies: Each time a charge is expended, all creatures with hostile intent towards the user within 60' will glow as if on fire. This includes Invisible or hidden enemies. The glow lasts for 10 minutes before fading.

Wand of Detecting Magic : Each time a charge is expended, all magical items and active spells within a 20 foot radius will glow blue for 6 rounds (1 minute).

Wand of Detecting Metals: Each time a charge is expended, the wand will point in the direction of any concentration of metal that weighs 100 pounds or more if it is within 20 feet. The wielder is aware of the kind of metal detected.

Wand of Detecting Secret Doors: When this wand is activated, it will point the user towards all secret doors within 20 feet. This expends one charge per use.

Wand of Detecting Traps: When this wand is activated, it will point the user towards all traps within 20 feet. This expends one charge per use.

Wand of Device Negation: Each time a charge is expended, this wand will cancel the effects of another wand or staff. If the effect that is being negated is an effect with a duration, it will be negated for a single round.

Wand of Fear: Each time a charge is expended, this wand creates a cone of fear, 60' long and 30' wide at the end. All creatures

within the cone must make a saving throw or flee in terror for 5 minutes.

Wand of Fireballs: Each time a charge is expended, this wand creates a Fireball up to 240' away. Anyone in the area of effect takes 6d6 damage. Save for half damage.

Wand of Illusion: Each time a charge is expended, this wand creates a Phantasmal Force as the spell of the same name. The caster must concentrate to maintain the illusion.

Wand of Lightning Bolts: Each time a charge is expended, this wand creates a Lightning Bolt up to 240' away and then extending 60' from that point. Anyone in the path of the lightning takes 6d6 damage. Save for half damage.

Wand of Magic Missiles: This wand fires one or two magic missiles (user's choice) per round as the magic-user/elf spell of the same name. The missiles inflict 1d6+1 hit points of damage each, and always strike. Each individual missile fired expends one charge.

Wand of Paralyzation: Each time a charge is expended, this wand creates a cone 60' long and 30' wide at the end. All creatures within the cone must make a saving throw or be paralyzed for 1 hour.

Wand of Polymorphing: Each time a charge is expended, this wand produces the effect of either a Polymorph Self on the user of the wand or a Polymorph Other on a target that the wand is pointed at. Unwilling targets may make a saving throw to avoid the effect.

Rod of Cancellation: This rod may be used by any character, but may only be used once. When activated, it will permanently drain any magical item (except an artifact) that is touched by it of all power. The GM may require an attack roll to touch a magic item carried or worn by another creature, normally against armor class 10.

Rod of Energy: This rod may be used by any spell-caster. It holds a reservoir of hit points which the wielder can use to cast spells instead of (or in addition to) his own. This reservoir will hold 10d10 hit points. When the reservoir drops below 50% capacity, the rod will automatically use a charge and refill the next day (at dawn).

Rod of Resurrection: A cleric of any level may use this rod one time per day to raise beings from the dead as the resurrection spell. A cleric using this rod does not need to rest after expending charges from the rod. Different kinds of characters may be resurrected, and each type requires a different number of charges (Cleric, 2 charges; Dwarf, 4 charges; Elf, 7 charges; Halfling, 3 charges; 0-level Human 1 charge; Magic-User, 4 charges; Thief, 4 charges). When all charges from the rod are used, it crumbles into dust.

Staff of Commanding [C]: This staff may be used by a cleric to command plants, animals, and humans in the same manner as the rings command human, animal command, and command plant. Each use requires one charge.

Staff of Healing [C]: A cleric may activate the staff to cure 1d2+1 body points (1d6+1 hit points on beings without BP) of damage to a target, but it can only be used one time per creature per day. This staff may heal an unlimited number of creatures in a day. The staff may also be used to cure paralysis on an unlimited number of creatures an unlimited number of times per day.

Staff of Power [MU/E]: This powerful staff has several abilities. First, it can be used to cast the spells cone of cold, lightning bolt, and fireball (each dealing 8d6 hp of damage). In addition, the staff may be used to cast continual light and telekinesis (with a weight limit of 250 pounds). Finally, this staff can also be used with the same effect as a staff of striking.

Staff of Striking [C]: Whenever a creature is struck by the staff, the wielder may expend one charge to inflict an additional 2d6 damage to the creature in addition to the normal damage that the staff does.

Staff of Withering [C]: This staff functions as a +1 staff that deals 2d4+1 hit points of damage when a charge is used. By using 2 charges and successfully striking an opponent, the staff ages a victim by 10 years. If three charges are spent in this attack, one of the victim's limbs will shrivel into a mummified, useless member (saving throw versus spell-like devices is allowed). The aging effect will automatically kill most creatures that have a short lifespan. Also note that effects of spent charges are cumulative, such that if 3 charges are used, the victim will not only receive damage, but he will be aged and have a withered limb.

Staff of Wizardry [MU/E]: This staff functions as a +1 staff. In addition, the staff may be used to cast the spells conjure elementals, invisibility, passwall, and web. The staff has the similar spell-like effect of a djinni to create a whirlwind and can be used as a wand of paralyzation. Each of these abilities requires one charge. The staff may be broken for a final blow. The results of a final blow depend on the number of charges in the staff. For each charge, 8 hit points of damage are dealt in a grand fireball to all monsters and characters (even the owner of the staff) within 30'. The staff is then broken and useless.

Staff of the Serpent [C]: This staff does not employ charges. It strikes as a +1 staff. The user can command the staff to grow to become a giant constrictor snake and constrict around a victim. The command for the staff to become a snake is uttered as it strikes a victim. The victim must succeed in a saving throw versus spell-like devices or be held immobile by the constricting snake for 1d4 turns, or until the owner commands the snake to release him. The serpent returns to the owner and returns to staff form after it has constricted around an opponent. If the snake form is slain, it will not return to staff form and the staff is destroyed. When the snake returns to staff form, all damage it has sustained in combat is automatically healed.

Rings

Magical rings like those listed below are generally beyond the ability of current civilizations to create. They are the creations of ancient and/or lost civilizations.

A magical ring must be worn on a finger or thumb to operate, and a character can only wear one magical ring per hand. If a second ring is put on the same hand as an existing ring, neither ring will function (with the exception of a Ring of Weakness). Rings are usually either constant in effect or are activated by twisting the ring..

Animal Command: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Animal Control with the exception that the wearer only gets a single attempt to control creatures per use.

Command Human: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Human Control with the exception that the wearer only gets a single attempt to control people per use.

Command Plant: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Plant Control with the exception that the wearer only gets a single attempt to control creatures per use.

Delusion: This ring will appear to function as a different type of ring if an Analyze spell is used on it. Once the ring is worn, it will be completely nonfunctional, but cannot be removed without a Remove Curse being cast on it.

Djinn Summoning: Once per day, the wearer of this ring can summon a djinn, who will serve them for 24 hours. If the djinn is killed, the ring loses its magical power.

Fire Resistance: This ring makes its wearer immune to natural fire, gives a +2 bonus to all saving throws against magical fire, and reduces all magical fire damage done to the wearer by one point per die (to a minimum of one point per die).

Invisibility: This ring may only be used once per turn. When activated it affects the wearer as if they had cast an Invisibility spell on themselves.

Protection: This ring gives a bonus to its wearer's armor class and to all saving throws equal to its magical bonus. If a character wears a Ring of Protection on both hands, only the larger of the two bonuses applies. Roll a d100 to determine the ring's protection bonus: 01-80: +1; 81-91: +2 92: +2, 5 foot radius; 93-99: +3; 00: +3, 5 foot radius.

If a radius is given, the power of the ring, as it applies to saving throws only, extends to all creatures within the radius.

Regeneration: The wearer of this ring will recover 1 body point per 10 minute turn (or 1 hit point per minute for beings without body points), and can slowly re-grow lost body parts. A limb will re-grow over the course of a week, whereas a finger or ear would re-grow over the course of a single day. This ring will not stop working when the wearer is at 0 body points (or 0 hit points), but not prevent the wearer from dying. It will also not heal damage from fire or acid (although will re-grow limbs lost to fire or acid).

Spell Storing: This ring will contain 1d6 different spells (determined randomly as if spells on a Spell Scroll) when found. The wearer of the ring can cast these spells once each, even if not a spell caster. The spells will always be cast as if by a caster of the minimum level needed to cast them, even if the wearer of the ring is a caster of higher level. Each spell slot can be recharged by having a spell caster cast a spell directly into the ring. The ring cannot "catch" spells generally cast at the wearer; the spells must be cast directly at the ring with the purpose of charging it.

Spell Turning: Each day, this ring will reflect the first 2d6 spells (roll each day) cast at the wearer back at their caster. This only affects actual spells, not the spell-like powers of monsters or magic items. Once it has absorbed as many spells as it can, the ring has no other powers until the following day.

Telekinesis: This ring can be activated to produce an effect identical to the Telekinesis spell but with no duration limit.

Water Walking: This ring allows its wearer to walk on the surface of any liquid without sinking.

Weakness: 1d6 rounds after this ring is worn, it will immediately lower its wearer's strength score to 3. The ring cannot be removed until it has had a Remove Curse spell cast on it.

Wishes: This ring will grant from one to four wishes (as the Wish spell) before crumbling into dust. To determine the number of wishes contained in the ring, roll 1d10: 1-4 = 1, 5-7 = 2, 8-9 = 3, 10 = 4.

X-Ray Vision: The wearer of this ring can see up to 30' through stone or up to 60' through wood. It cannot be used to see through metal. To use the ring, the wearer must stand still and concentrate and can view a 10'x10' area per use. It takes 10 minutes to scan such an area, and the ring can only be used once per hour.

Ancient and Wondrous Items

Rings of power were not the only magic items produced in ancient times by civilizations all-but-forgotten today. Many wonderful magic items existed then. Most of these items are very rare today even if they were fairly common ages ago. Some of these items may be one of a kind or have never existed outside of legends. Like magic rings, the methods used to create these items are generally lost to the mists of time.

Amulet of Scrying Protection: This item protects its wearer from being scried on via a Crystal Ball, and makes them immune to all types of ESP.

Bag of Devouring: This bag looks like a normal sack, but any non-living item placed entirely within it disappears from view and weighs nothing while in the bag. It will hold items up to 10,000cn in weight, providing the items fit wholly within it (i.e. they are 5'x1'x1' or smaller). Items placed within the bag can be found by touch by anyone reaching into the bag and can be withdrawn. However, any item left in the bag for more than two hours will vanish completely. This will not affect living creatures that are stuffed into the bag.

Bag of Holding: This bag looks like a normal sack, but any non-living item placed entirely within it disappears from view and weighs nothing while in the bag. It will hold items up to 10,000cn in weight, providing the items fit wholly within it (i.e. they are 5'x1'x1' or smaller). Items placed within the bag can be found by touch by anyone reaching into the bag and can be withdrawn.

Boat, Undersea: This boat can be operated as a fully functional skiff. However, when a command word is given, it will dive under the water while simultaneously radiating a Water Breathing effect that protects all passengers who are touching the boat. The pilot of the boat can control its movement underwater as if on the surface.

Boat, Folding: A folding boat looks like a small wooden box—about 12 inches long, 6 inches wide, and 6 inches deep. It can be used to store items like any other box. If a command word is given, however, the box unfolds itself to form a boat 10 feet long, 4 feet wide, and 2 feet in depth. A second command word causes it to unfold to a ship 24 feet long, 8 feet wide, and 6 feet deep. Any objects formerly stored in the box now rest inside the boat or ship. In its smaller form, the boat has one pair of oars, an anchor, a mast, and a lateen sail. In its larger form, the boat has a deck, single rowing seats, five sets of oars, a steering oar, an anchor, a deck cabin, and a mast with a square sail. The boat can hold four people comfortably, while the ship carries fifteen with ease. A third word of command causes the boat or ship to fold itself into a box once again. The necessary command words may be present, either visible or invisible, etched into the box. Alternatively, the command words may need to be sought through an NPC or a small quest.

Boots of Levitation: The wearer of these boots may Levitate as per the spell of the same name. There is no limit to the duration of the levitation.

Boots of Speed: When travelling overland, the wearer of these boots travels at the speed of a riding horse. However, the wearer can only move at this speed for a single day and then must rest for a day.

Boots of Speed: These boots allow the wearer to move 240' per turn for up to 12 hours. The wearer is exhausted after this activity, and is required to rest for 24 hours.

Boots of Travelling and Springing: While these boots are worn, the wearer need not rest if engaged in ordinary movement. Further, he may spring up to 10 feet high, and to a distance of 30 feet.

Bowl of Water Elementals: Once per day, this bowl can be filled with water and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice water elemental. Conjuring the elemental takes 10 minutes.

Bracers of Armor: Wrist or arm guards that grant the wearer an AC as though he were wearing armor. Both bracers must be worn for the magic to be effective, and no other armor may be worn with the bracers (magical or non-magical). Dexterity modifiers do apply. The protection offered by the bracers can be combined with other magical effects that alter AC, such as a ring of protection or cloak of protection. Roll d100 to determine the which kind of bracers are found: 01-06: AC 11; 07-16: AC 12; 17-36: AC 13; 37-51: AC 14; 52-71: AC 15; 72-86: AC 16; 87-00: AC 17.

Brazier of Commanding Fire Elementals: Once per day, this brazier can be lit and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice fire elemental. Conjuring the elemental takes 1 minute.

Brooch of Shielding: A piece of silver or gold jewelry used to fasten a cloak or cape. In addition to this mundane task, it can absorb magic missiles of the sort generated by spell, device, or spell-like ability. A brooch can absorb up to 101 hit points of damage from magic missiles before it melts and becomes useless.

Broom of Flying: This broom will carry its owner through the air at a speed of 80' per round. The owner of the broom must concentrate to move, and the broom will hover if the owner stops concentrating. The broom can also carry a passenger, but in this case its speed is reduced to 60' per round.

Censer of Controlling Air Elementals: Once per day, this censer can be filled with incense and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice air elemental. Conjuring the elemental takes 1 minutes.

Chime of Opening: A chime of opening is a hollow mithral tube about 1 foot long. When struck, it sends forth magical vibrations that cause locks, lids, doors, valves, and portals to open. The device functions against normal bars, shackles, chains, bolts, and so on. A chime of opening also automatically dispels a hold portal spell or even an arcane lock cast by a wizard of lower than 15th level. The chime must be pointed at the item or gate to be loosed or opened (which must be visible and known to the user). The chime is then struck, a clear tone rings forth, and in 1 round the target lock is unlocked, the shackle is loosed, the secret door is opened, or the lid of the chest is lifted. Each sounding only opens one form of locking, so if a chest is chained, padlocked, locked, and arcane locked, it takes four uses of a chime of opening to get it open. A silence spell negates the power of the device. Each use requires a charge, and a chime contains 2d4x10 charges before it cracks and becomes useless.

Cloak of Protection: This magical cloak appears to be an ordinary brown cloth or leather cloak. The cloak functions much like a ring of protection, offering a bonus to the wearer's AC and all saving throws. These bonuses are cumulative if the cloak is worn with a ring of protection. Roll 1d100 to determine AC bonus: 01-80: +1; 81-91: +2; 92-100: +3.

Crystal Ball: A crystal ball is a scrying device that can only be used by an arcane spellcaster. The crystal ball can be used three times per day to see any place or object that they desire; and a current image of that place or object will appear and last for 10 minutes. The clarity of the image will be based on the familiarity that the user has with the object or area.

Crystal Ball with Clairaudience: This works just as a normal Crystal Ball, except that by concentrating the user can hear what is going on at the far end as if through the ears of any living creature shown in the ball. Only an arcane spellcaster can use this item.

Crystal Ball with ESP: This works just as a normal Crystal Ball, except that by concentrating the user can read the thoughts of the main subject of the vision if it is a living creature. Only an arcane spellcaster can use this item.

Cube of Frost Resistance: This cube is activated or deactivated by pressing one side. When activated, it creates a cube-shaped area 10 feet on a side centered on the possessor (or on the cube itself, if the item is later placed on a surface). The temperature within this area is always at least 65°F. The field absorbs all cold-based attacks. However, if the field is subjected to more than 50 points of cold damage in 1 turn (from one or multiple attacks), it collapses into its portable form and cannot be reactivated for 1 hour. If the field absorbs more than 100 points of cold damage in a turn, the cube is destroyed.

Decanter of Endless Water: If the stopper is removed from this ordinary-looking flask and a command word spoken, an amount of fresh or salt water pours out. Separate command words determine the type, as well as the volume and velocity. "Stream" pours out 1 gallon per round. "Fountain" produces a 5' long stream at 5 gallons per round. "Geyser" produces a 20' long, 1' wide stream at 30 gallons per round.

The geyser effect causes considerable backpressure, requiring the holder to be on stable ground and braced to avoid being knocked down. The force of the geyser kills small creatures. The command word must be spoken to stop it.

Displacer Cloak: This item makes the wearer appear to be 5' from their actual position. This makes all attacks against the wearer take a -2 penalty to their to hit rolls, and gives the wearer a +2 bonus to all saving throws.

Drums of Panic: These are a pair of large kettle drums. When played, they have no effect on creatures within 10' of them, but creatures from 10' to 240' from them must make a saving throw vs MIND or flee in terror for 30 minutes.

Dust of Appearance: This fine powder appears to be a very fine, very light metallic dust. A single handful of this substance flung into the air coats all objects within a 10' radius, making them visible even if they are invisible. If the dust is blown through a tube it covers an area in the shape of a cone 20' long and 15' wide at its terminal end. The dust likewise negates the effects of mirror image, cloak of displacement, and elven cloaks. The dust's effect lasts for 2d10 turns. Dust of appearance is typically stored in small silk packets or hollow bone tubes, and 5d10 of these tubes or packets will be found at a time.

Dust of Disappearance: This dust looks just like dust of appearance and is typically stored in the same manner. A creature or object touched by it becomes invisible. Normal vision can't see dusted creatures or objects, nor can they be detected by magical means, including detect invisible. Dust of appearance, however, does reveal people and objects made invisible by dust of disappearance. The invisibility bestowed by the dust lasts for 2d10 turns, and the invisibility is not dispelled if the enchanted character makes attacks

Efrete Bottle: This 3' tall heavy jug contains an efreet. The stopper may be opened once per day, and the efreet will come forth and serve the opener. If the efreet is slain, the bottle becomes non-magical. The efreet is reluctant to serve, and will do its best to use loopholes in the commands that it is given in order to cause harm to the owner of the bottle.

Elven Boots: These boots give their wearer a Move Silently ability of 75%, like a thief.

Elven Cloak: This cloak is just like a Ring of Invisibility except that its invisibility is not perfect. When the wearer is in the presence of creatures that might notice them, their faint outline will be seen if a 1 is rolled on 1d6.

Eyes of Charming: These two crystal lenses fit over the user's eyes. The wearer is able to use charm person (one target per round) merely by meeting a target's gaze. Those failing a saving

throw versus spells are charmed as per the spell. If the wearer has both lenses, there is a penalty of -2 to the saving throw. If the wearer has only one lens, the saving throw is made with a bonus of +2.

Eyes of the Eagle: These items are made of special crystal and fit over the eyes of the wearer. These lenses allow the wearer to see 100 times further than normal. Wearing only one of the pair causes a character to become dizzy and, in effect, stunned for 1 round. Thereafter, the wearer can use the single lens without being stunned so long as he covers his other eye.

Eyes of Petrification: These items are made of special crystal and fit over the eyes of the wearer. When a being places the eyes on, he instantly turns to stone as the spell, with no saving throw. About 1/4 (01-25 on d00) of these eyes allow the wearer to use a petrification gaze attack. Both lenses must be worn for the magic to be effective, and the victim is allowed a saving throw versus petrify.

Flying Carpet: This carpet will carry one passenger at a speed of 100' per round, two at a speed of 80' per round, three at a speed of 60' per round, four at a speed of 40' per round, or five at a speed of 20' per round. The owner of the carpet must concentrate to make it move, and the carpet will hover in place if the owner stops concentrating.

Gauntlets of Ogre Power: The owner of these gauntlets has a strength of 18 while wearing the gauntlets, but taking them off return's the owner's strength back to its normal value.

Girdle of Giant Strength: Anyone who wears this girdle does double damage with whatever melee attacks they make.

Helm of Alignment Changing: This ornate helmet instantly changes the alignment of the being that places it on. The change is random. The helmet cannot be removed except by the spell remove curse. The wearer will not desire for the helmet to be removed, but once it has been taken off he reverts back to his original alignment.

Helm of Blindness: Anyone wearing this helmet is immediately made blind. The blindness cannot be cured until the helmet has been removed, and the helmet cannot be removed without a Remove Curse spell being cast on it.

Helm of Comprehend Languages and Read Magic: Appearing as a normal helmet, a helm of comprehend languages and read magic grants its wearer the ability to understand the spoken words of any creature, and to read text in any language or any magical writing. Note that understanding a magical text does not necessarily imply spell use unless the magic is usable by the character's class and level.

Helm of Reading: This helmet allows the wearer to read any language or cipher, and allows them to identify magical scrolls. However, it does not allow the wearer to use Spell Scrolls if they are not normally able to do so. This helmet is rather delicate, and has a 10% chance of being broken each time its wearer is struck in combat.

Helm of Telepathy: The wearer of this helmet can transmit their thoughts to any creature within 60'. The target creature will understand the thoughts of the wearer despite language differences. The wearer may also use the ESP spell to read the thoughts of others.

Helm of Teleportation: This helm is only usable by arcane spellcasters. The wearer of the helm may use the Teleport spell as often as they like to teleport themselves, with the normal chances of failure. The wearer may also use the helm to Teleport another creature (again, as if casting the spell). However, doing this discharges the helmet and it can no longer be used for any

teleporting until it is recharged by having a Teleport spell cast into it.

Horn of Blasting: This horn can be blown once per ten minutes. When it is blown, it creates a cone of sound 100' long and 20' wide at the end. Everyone in the area must take 2d6 damage and make a saving throw vs STR or be deafened for ten minutes. Buildings and ships in the area of effect take 1d8 damage.

Medallion of ESP: This medallion allows the wearer to use the ESP spell at will, with a range as given in the item listing (either 30' or 90'). However, each time it is used, there is a 1 in 6 chance that instead of letting its wearer read minds, it will broadcast its all of its wearer's thoughts out loud for the next ten minutes.

Mirror of Life Trapping: If the owner of this mirror presents it to a creature of human size or smaller and activates it, the creature must make a saving throw vs MIND or be sucked into the mirror, complete with everything they are wearing and carrying. The mirror can hold up to 20 creatures, who exist in a state of suspended animation while in the mirror, not needing food, drink or air and completely unable to take any actions.

Anyone looking into the mirror can see the reflections of the faces of all those trapped inside, and can wake any of them up temporarily to talk with them. No special communication powers are granted, so the viewer and victim need to share a common language to talk in. If the mirror is broken, all the creatures inside are instantly freed. However, the only way to free a single creature without breaking the mirror is to is a Wish spell.

Mirror of Opposition: This item resembles a normal mirror about 4 feet long and 3 feet wide. If a creature is reflected in the mirror's surface, an exact duplicate of that creature comes into being. This opposite immediately attacks the original. The duplicate has all the possessions and powers of its original (including magic). Upon the defeat or destruction of either the duplicate or the original, the duplicate and its items disappear completely.

Necklace of Adaptation: This necklace is a heavy chain with a platinum medallion. The magic of the necklace wraps the wearer in a shell of fresh air, making him immune to all harmful vapors and gases. The bubble can enable the wearer to survive in an environment without air for 1 week.

Rope of Climbing: On command, this 50' rope will wriggle along the ground like a snake, and even up walls and on ceilings. It can fasten itself onto any solid protrusion on a surface that it is climbing up, and will support up to 10,000cn of weight. A second command will cause the rope to loosen itself and re-coil.

Scarab of Protection: This charm has 2d6 charges. Each time a curse is placed on the wearer, it will immediately target the wearer with a Remove Curse as if by a 36th level caster. Each Remove Curse uses up one charge. Additionally, it will block any Finger of Death or Obliterate spell (the reverse of the Raise Dead and Raise Dead Fully spells) cast at the wearer; and this also uses up one charge. When the scarab has run out of charges, it crumbles to dust.

Stone of Controlling Earth Elementals: Once per day, this stone can be buried in the earth and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice earth elemental. Conjuring the elemental takes 10 minutes.

Magic Weapons and Armor

Magical weapons and armor follow the same class restrictions as all normal weapons and armor. Magic items will have a "+" value, or if cursed they will have a "-" negative value. When an item has a plus, such as a dagger +1, this means that rolls to hit and damage rolls receive a +1 bonus. Armor with a plus will reduce the AC by the amount specified. For example, leather armor +1 would reduce AC to 6 rather than 7.

Cursed items have the opposite effect, incurring penalties based on the negative value provided. Cursed items, once possessed by a character, can only be disposed of with a dispel evil or remove curse spell. The owner of a cursed item will not believe the item is cursed, and will resist efforts to get rid of the item until one of these spells is cast. Furthermore, the possessor of a cursed weapon will prefer to use this weapon in combat above any other weapon.

Magical armor of the non-cursed variety is lighter and less cumbersome than other armor. Refer to the table below for magical armor weights and for rolling up the kind of armor found by a party.

d100 Roll	Armor Type	Unmodified AC	Magic Weight (lbs)
01-10	Banded mail	15	15
11-30	Chain mail	14	20
31-60	Leather	12	10
61-67	Padded	11	5
68-85	Plate mail	16	25
86-90	Scale mail	13	15
91-95	Splint mail	15	20
96-00	Studded leather	13	15

Magic Swords

Other powers beyond having a "+" to their attacks and damage sometimes apply to swords and other weapons. They also may have more than one bonus listed, where the first bonus applies to all attacks and damage, and the second applies only to an exclusive group of creatures. Some of these are detailed below, and others listed in the treasure tables are self-explanatory. Other weapons have powers that the wielder is able to command. These weapons are detailed below.

Sword +1, Flame Tongue: This sword is +2 against monsters that regenerate, +3 against avian monsters or monsters that have a cold-based attack, or are immune to fire, and this sword is +4 against all undead. When the wielder utters a command, the sword becomes engulfed in flame. The flames provide the same amount of light as a torch, and can be used to ignite anything flammable.

Sword +1, Life Drinker: This sword drains a hit die or a life level from any target struck if the wielder utters a command. This sword has 1d4+4 charges, and each use of this ability drains one charge. Once the charges have been used, the sword performs as a normal sword +1.

Sword +1, Locate Objects: The wielder may locate objects as the magic-user/elf spell one time each day, to a range of 120'.

Sword +1, Luck Blade: This sword grants its possessor a +1 bonus on all saving throws. In addition, a luck blade will contain 1d4+1 wishes. When the last wish is used, the sword remains a sword +1 and still grants the +1 saving throw bonus.

Sword +1, Wish Blade: In addition to functioning as a sword +1, this sword contains 1d4 wishes. Refer to the magic-user spell wish for guidelines on granting wishes. Once the wishes have been used, the sword performs as a normal sword +1.

Sword +2, Charm Person: In addition to functioning as a sword +1, this sword grants the wielder the ability to charm person, as the magic-user/elf spell, 3 times in a week.

Sword +3, Frost Brand: This sword is a +6 sword against monsters that live in a hot environment or use a fire-based attack. The sword sheds light as a torch when the temperature drops below 0°F. At such times it cannot be concealed when drawn, nor can its light be shut off. Its wielder is protected from fire in the same manner as wearing a ring of fire resistance. A frost brand extinguishes all non-magical fires in a 10' area when touched to a flame.

Other Magic Weapons

War Hammer +2, Dwarven Thrower: In the hands of a dwarf, the war hammer gains an additional +1 bonus (for a total bonus of +3) and gains the returning special ability. It can be hurled with a 60' range. When hurled, it deals triple damage against giants, ettins, ogres, and trolls. It does double damage when thrown against any other target.

Arrow +3, Slaying Arrow: This arrow +3 is keyed to a particular type of creature. If it strikes such a creature, the target instantly dies, with no saving throw. Against any other target the arrow functions as an arrow +3. These arrows are often adorned with decorations that imply the creature they can slay. To determine the type of creature the arrow is keyed to, roll on the table below. The GM may add to this list, or choose an appropriate creature type for the situation.

d20 Roll	Type	d20 Roll	Type
1	Avians	11	Giant animals
2	Chimera	12	Golems
3	Clerics	13	Halflings
4	Dragons	14	Magic-users
5	Dwarves	15	Mammals
6	Efreeti	16	Reptiles
7	Elementals	17	Sea creatures
8	Elves	18	Spiders
9	Fighters	19	Thieves
10	Giants	20	Undead

Sentient Swords

Particularly powerful magical swords are sometimes sentient, or thinking and intelligent entities. These weapons have motivations of their own, and may or may not be hostile to their wielder. The GM plays the personalities of these items in the same manner as an NPC. To create a sentient sword, refer to the categories below, which include Mental Character and Alignment, and Powers.

Intelligence: The first step to creating a sentient sword is to roll for its intelligence. The intelligence ability score will determine how many additional powers the sword possesses. Consult the table below.

d6 Roll	INT	Detection Powers	Spell-Like Powers	Communication
1	7	1	0	Empathy
2	8	2	0	Empathy
3	9	3	0	Empathy
4	10	3	0	Verbal
5	11	3	0	Verbal, Read Magic
6	12	3	1	Verbal, read Magic

When a sword communicates through empathy, no actual words are exchanged between it and its wielder, but the wielder becomes intuitively aware of the powers the sword possesses and how

these can be employed. A sword capable of verbal communication actually produces an audible voice and speaks to those around it. Sentient swords capable of read magic do so as the magic-user/elf spell, but the ability is always active. Further, swords with the ability to read magic may also read the ordinary written language of any languages known.

Alignment: Every sentient sword will have an alignment. This alignment is undetectable until the sword is touched. A character may only wield a sword that shares the same alignment, and if he attempts to handle a sword of a different alignment he will suffer damage each round. The severity of the damage is related to the degree of difference of alignment. For each degree of difference, the character will suffer 1d6 hit points of damage. For example, a chaotic sword will inflict 1d6 hp damage to a neutral character; it will inflict 2d6 hp damage to a lawful character. For this reason, a neutral sword will only ever inflict 1d6 hp of damage. Roll 1d10 to determine the sentient sword's alignment: 1-4: Chaotic; 5-6: Neutral; 7-10: Lawful.

Psyche and Willpower: Sentient swords have a psyche rating from 1-12 (roll 1d12). This rating represents the overall strength of character that the sword has. In addition, sentient swords have a base willpower rating equal to the sum of its INT and psyche. A bonus of +1 is added to this rating for each spell-like power the sword possesses. Spell-like powers are discussed below.

A sentient sword may mentally wrestle for dominance with its wielder, depending on the sword's personality and desires. Under certain situations, the GM will need to make an influence check. This may be made in the following situations:

1. The wielder first touches the sword
2. The sword's motivation comes into play
3. A character of a differing alignment touches the sword
4. Another magical sword is found
5. A character has lost 50% of his hp

When an influence check is called for, the willpower of the sword and the willpower of the character are compared, and the highest score wins the test. A character's willpower is determined by summing his WIS and STR. The character subtracts 1d4 from this total if he is wounded but has more than or equal to 50% of his hp. If he has less than 50% of his hp, 2d4 is subtracted from willpower. The sword receives a bonus of 1d10 to its willpower if its alignment is not the same as the character's.

If the character loses, then he loses control of his actions for an amount of time determined by the LL. The sword will force the character to perform a task, such as disposing of or ignoring magic items if a second magical sword is found. Other actions include compelling the wielder into combat or surrender with a nearby foe, or making the character perform another action that serves the desires and goals of the sword. Usually, the duration of control will only be for several rounds until the task is completed.

Sentient Sword Motivations: Sentient swords have a 5% probability of having a particular motivation (roll 01-05 on d00). These motivations involve the destruction of particular creatures, classes, or alignments. If a sword has a motivation, raise its INT and psyche each to 12. When a sentient sword is used to attack a being that fits its motivation, a special power is used against the opponent. These powers are determined by the alignment of the sword. A chaotic sword will turn an opponent to stone if the opponent is lawful. Likewise, a lawful sword will paralyze an opponent of chaotic alignment. Saving throws versus spells are allowed for each of these effects. A neutral sword grants the sword wielder a bonus of +1 to all saving throws when combating a creature of the motivational type (regardless of its alignment).

Roll 1d6 to determine a sentient sword's motivation, or the GM may choose an opponent type based on differing characteristics (all reptiles, beings of a certain religion, etc.): 1 – Clerics; 2 – Dwarves, fighters, and halflings; 3 – Elves and magic-users; 4 – Chaotic beings (if sword lawful); 5 – Lawful beings (if sword chaotic); 6 – Monster type (determine randomly).

Powers: Sentient swords can have two kinds of additional powers. These include detection powers and spell-like powers. Detection powers allow the sword to detect any of a number of possible items or inclinations. Spell-like powers often mimic spell effects. To use any of the powers detailed below, the sword wielder is required to be holding the sword and concentrating on the effect. All of the detection powers may only be used once in a round, and all spell-like powers may only be used 3 times total in one day. Roll on the detection powers table and ignore identical results, if required to roll more than once. The same holds true if required to roll on the spell-like powers table.

Detection Powers Table

Roll d00	Detect	Additional Details
01-05	Evil	20' range
06-10	Good	20' range
11-15	Gems and Jewelry	60' range
16-25	Invisible or hidden	20' range
26-35	Secret doors	10' range, 3 usages per day
36-45	Metals (any specified)	60', lead blocks this ability
46-60	Moving walls and rooms	10' range
61-80	Sloping passages	10' range
81-96	Traps	10' range, 3 usages per day
97	Roll two times	
98-00	Spell-like Power (1)	

Spell-Like Powers Table

Roll d00	Power	Additional Details
01-10	Clairaudience	As clairvoyance below, but audible instead of visual
11-20	Clairvoyance	As the magic-user spell
21-25	Double damage	See below*
26-35	ESP	As the magic-user spell
36-40	Fly	As the magic-user spell, for 3 turns
41-45	Regenerate	See below**
46-50	Levitate	As the magic-user spell, for 3 turns
51-57	Phantasmal Force	As the magic-user spell
58-67	Telekinesis	As the magic-user spell, up to 200 pounds
68-77	Telepathy	As a <i>helm of telepathy</i>
78-86	Teleportation	As the magic-user spell
87-96	X-Ray Vision	As a <i>ring of x-ray vision</i>
97-99	Roll twice	
00	Roll three times	

* Damage is doubled for 1d10 rounds. This table result can be combined if rolled more than once. If rolled twice, damage is x4, if rolled three times, damage is x6. This effect does not influence the roll to hit.

** The sword can regenerate hit points with a rate of 1 hp per round, to a maximum of 6 hp per day. This table result can be combined if rolled more than once. If rolled twice, up to 12 hp may be healed, if rolled three times, up to 18 hp may be healed. Note that the rate of healing does not change.

Treasure Class Table

Small Treasure Hoards (Individuals)

Treasure Class	CP	SP	EP	GP	PP	Gems	Jewelry	Magic
0	-	-	-	-	-	-	-	-
1	4d6	-	-	-	-	-	-	-

5	-	-	-	-	1d6	-	-	-
6	1d00 (70%)	1d00 (5%)	-	1d00 (5%)	-	1d6 (7%)	1d4 (3%)	1 (3%) any
7	-	1d00 (15%)	1d00 (7%)	1d00 (8%)	1d00 (5%)	1d6 (15%)	1d4 (5%)	1 (7%) any

Large Treasure Hoards (Lairs)

Treasure Class	CP x1000	SP x1000	EP x1000	GP x1000	PP x100	Gems	Jewelry	Magic
8	-	-	-	-	-	-	-	1d4 scrolls (45%)
9	-	-	-	-	-	-	-	2d4 potions (45%)
10	-	-	-	1d8 (50%)	3d12 (40%)	2d8+4 (60%)	1d12 (40%)	-
11	-	-	-	-	-	1d6 (40%)	-	-
12	-	1d8 (25%)	1d4 (20%)	-	-	-	-	-
13	1d6 (25%)	1d4 (15%)	-	-	-	-	-	-
14	-	-	-	-	2d4 (30%)	1d12 (55%)	1d12 (45%)	1 (20%) any
15	2d12 (25%)	1d00 (60%)	1d8x10 (40%)	1d4x10 (60%)	4d6 (30%)	1d8x10 (55%)	1d8x10 (45%)	6 (18%) any 4, 1 potion, 1 scroll
16	-	-	-	1d6x10 (55%)	1d4 (45%)	2d8 (30%)	1d10 (20%)	6 (30%) any 5, 1 scroll
17	-	3d6 (15%)	1d6 (25%)	2d6 (45%)	1d4 (25%)	4d6 (25%)	1d8 (10%)	5 (30%) any 3 (no weapons), 1 potions, 1 scroll
18	2d6 (7%)	1d10 (35%)	1d6 (20%)	1d6 (30%)	-	1d8 (15%)	1d8 (10%)	4 (30%) any 3, 1 scroll
19	1d10 (10%)	1d10 (15%)	-	1d8 (55%)	-	1d6 (40%)	1d6 (40%)	4 (15%) any 2, 2 potions
20	1d12 25%	1d6 (30%)	1d6 (15%)	-	-	1d6 (20%)	1d6 (20%)	2 (12%) any
21	1d10 (45%)	1d4 (25%)	1d4 (30%)	1d4 (20%)	-	1d8 (30%)	1d4 (20%)	1 (12%) armor, sword, or miscellaneous weapon
22	1d8 (30%)	1d4 (20%)	1d6 (25%)	1d12 (40%)	1d4 (20%)	5d8 (55%)	5d8 (45%)	3 (25%) any

The GM chooses the appropriate row in the Treasure Class table, and for each column rolls the appropriate dice to determine whether certain treasure occurs, and if so in what quantity. When magic items are indicated, the GM either selects appropriate items or rolls randomly to determine items. To determine a random type of magic item roll 1d100: 01-20: Potions; 21-25: Rings; 26-56: Scrolls; 57-61: Rods, Staves, and Wands; 62-66: Ancient and Wondrous Items; 67-87: Swords; 88-92: Miscellaneous Weapons, 93-00: Armor.

Donate to the RetroRoleplaying Cancer Fund and Get Some PDF Goodies

Many Microlite81 gamers know that Randall Stukey, the author of Microlite81 and other M20-based old school games is trying to raise funds to pay the bills from [his wife's oral cancer](#) treatments and that he worked on the original Microlite81 as way to cope during her recovery from 6 weeks of radiation treatment in 2008. Randall and Donna are some of the 40 to 50 million people in the US who do not have health insurance nor did they qualify for government aid as they live in Texas and have no children. Donna's cancer treatments have cost over \$110,000. While some of this has been absorbed by hospital foundations and the like, they still owe a lot of it. You can donate to the RetroRoleplaying Cancer Fund (via PayPal) and help them pay their bills.

Can You Help Pay the Cancer Bills?

Everyone who donates any amount at all get a password giving them access to a number of special downloads. *Some* of the currently available downloads include:

- Pdf copies of the two issues of The Grimoire Randall published in the late 1970s (which Randall blogged about here: The Grimoire #1 (<http://blog.retroroleplaying.com/2009/05/grimoire-1-spring-1978-d-fanzine.html>) and The Grimoire #2 (<http://blog.retroroleplaying.com/2009/05/grimoire-2-summer-1979-d-fanzine.html>)
- Pdf copy of The Second Grimoire of Pharesm the Bright-Eyed, a set of house rules for a BECM1 campaign Randall ran at a game shop in the mid-1980s.
- A copy of the Player's Introduction to the Fourth Campaign Arn (from about 1984)
- Microlite81 2.0 Special Edition -- a 60-page PDF designed to be printed in booklet format from Adobe Acrobat. Artwork is by Håkan Ackegård. This Special Edition incorporates the rules from the first supplement. The text has been reformatted into a single column in a large enough font to easily read.

To get access to these downloads and access to a private donor forum where you can get advance information on upcoming Microlite81 releases, help Randall pay the cancer bills by sending a donation in any amount -- small or large -- to the RetroRoleplaying Cancer Fund via Paypal at this link:

Notes on "Old School" Play

While Microlite81 is designed using tried and true "D20" systems filtered through the Microlite20 rules, it is designed for a completely different style of play than many players who started to play in the last 20 years or so may be used to. This section will give a brief overview of "old school" play.

What is "Old School" Play?

There are two major styles of roleplaying games. The first (and older) style says "Here is the situation. Pretend you are there as your character, what do you want to do?" This style has been superseded over the years with a style that says "Here is the situation. Based on your character's stats, abilities, skills, etc. as listed on his character sheet and your knowledge of the many detailed rules of the game, what is the best way to use your character's skills and abilities and the rules to solve the situation?" Old school play strongly favors the first style and frowns on too much of the second.

Here are some major points where old school play is different:

Heroic, not Superheroic: Old school play, especially at low to mid levels, is about fairly normal people put in situations where they can be heroes, not about extraordinary people doing things that would make a four-color comic book superhero proud -- and at first level yet. Just like in the real world, the more a character improves his abilities, the harder it is to improve them further, while new characters may advance rapidly, the higher their level the more effort and time (and XP) it takes to advance to the next level.

Achievement, not Advancement. Many modern games are often all about what special feats, extra classes and special game mechanics the players wish to obtain for their characters as they increase in level. In old school games, a character's abilities are generally predetermined by his character class, so old school games focus on the things that the characters wish to accomplish in the game world rather than on what game mechanics they want to acquire. Level advancement is often much slower than in modern fantasy RPGs which makes in campaign achievements even more important as a measure of character success.

No Skills: Unlike in most modern RPGs, there aren't any skills in Microlite81 -- not even the streamlined four skills of Microlite20. Players are intended to have their characters act like adventurers. So don't search your character sheet or the rules for the perfect solution in Microlite81. Instead, you just tell the GM what your character is trying to do. Note that you are assumed to be competent with all common activities associated with your class and background. If you need to keep a door open or shut, you might tell the GM your character is using a spike to keep the door open or closed. A ten foot pole is your friend for checking for traps. Searching a room means looking in and under objects, not rolling a skill check. While this may seem strange at first, you will quickly learn to appreciate the freedom it gives you. No longer are you limited to the skills and feats on your character sheet, you can try anything your character should be capable of trying. You might not succeed, but the rules generally will not stop you from trying.

Limited Magic Items: Modern fantasy RPGs often assume that magic items are easy to buy and/or to create. In most old school campaigns, magic items are relatively rare and hard to create. Only potions and scrolls are generally relatively easy to create or purchase. Other magic items are seldom found for sale (and are very high priced when they are found for sale) and are usually very expensive in money and time to try to create -- often requiring rare ingredients that the characters must quest to find. Therefore characters are usually limited to the magic items they find in treasures or take from defeated enemies on adventures.

No Assumption of "Game Balance": Old style game sessions aren't about carefully balanced characters (who are all able to

shine equally at all times) who only run into situations carefully designed by the GM to be beatable by the characters presently in the party and to provide treasure that fits their current level. Instead, part of player skill is learning to evaluate situations so situations well over the party's current abilities or which will waste the party's resources for little gain can be avoided. Don't assume that you can beat every monster that you encounter, running away from monsters too tough to handle can mean the difference between character survival and character death. You can also get creative in how you defeat monsters. Perhaps those goblins you bypassed could be talked into (or tricked into) attacking that giant you know you can't beat, perhaps killing it for you or at least softening it up so your party has a chance of defeating it and living to tell the tale. Also remember that treasure can be turned into XP, even if you can't kill the monsters, perhaps you can still acquire some of their treasure. Part of the skill of playing "old school" style is coming up with creative solutions when a direct attack is likely to fail.

It's Not All About Combat: Many modern fantasy RPGs have made combat the star of the system, combats in these systems are time-consuming and very crunchy with rules for everything. Microlite20 avoids this by having a fast-playing abstract combat system. Microlite81 takes this one step further, combat isn't intended to be the main source of fun in the game. The game is as much about exploration and treasuring finding as it is about combat. Sure, you are going to have to fight things to explore and find treasure, but always remember that combat may not be the best or safest way to handle every situation. Think before you rush into combat. After all, it's not the only way to earn a good pile of experience – and monsters don't have to be killed to be defeated (and get XP for them).

Reality/Common Sense Trumps Rules: Old-school games use loose and simple rules that cover average cases and the GM and players are supposed to apply common sense and their knowledge of how reality works to cover the unusual and edge cases. "Reality/Common Sense" as interpreted by the GM always trumps the written rules if they conflict. For example, a character has a magic weapon and the rules for that weapon say it always causes its target to fall prone if hit. The character hits a gelatinous cube moving down the corridor toward them with the weapon. The rules say that the target should fall and be in a prone position. Reality, however, says otherwise. Gelatinous cubes don't have a top and bottom (so prone penalties make no sense) and a 10 foot cube can't fall when it is moving through a 10 foot corridor. In some modern games, the rules would be applied anyway and the cube would suffer the effects of falling prone no matter how little sense that makes. In an old school game, the GM ignores the rule because it makes no sense in the specific situation.

Forget "Rules Mastery": As some of the above differences have hinted, player skill in "old school" style games isn't about mastering the game rules so you can solve any problem by knowing the right combination of rules from 20 different rule books. Microlite20 is designed to be rules light and Microlite81 tries to stress this even more by encouraging GMs to make rulings on the spot taking into account specific circumstances instead of trying to hunt up special cases in the SRD or a stack of optional rule books. This is faster and helps players immerse themselves in their character and the game world instead of in rule books. GM rulings will be based on specific circumstances and common sense, not just on the written rules and prior rulings. Just because it requires a certain roll to jump one 10 foot pit does not mean all 10 foot wide pits will require the same roll. After all, all sorts of variables can affect the roll (terrain, weather, lighting, pressure to jump quickly, etc.). Players need to remember that these rules are merely a tool for the GM. They are just guidelines for the GM, not something written in stone that the GM must obey. If something herein does not work right in your campaign (or the GM just does not like a rule), the GM is well within his right to change it. Microlite81 is not a game for rules lawyers or for those who believe that the game designer always knows what is best.

No Script Immunity: In most old school games, player characters do not have any form of script immunity. Player characters can die, lose equipment, suffer strange magical effects and other often unpleasant consequences if they are not careful or are just very unlucky. On the other hand, there are no rules limiting their success. If they take on an adult red dragon as first level characters and miraculously manage to win, there are no rules about level appropriate wealth or level appropriate magic items to interfere with their becoming rich and probably flush with magic items from the dragon's hoard.

Not Mentioned does not mean Prohibited: Many people seem to read RPG rules and come away with the idea that anything not specifically mentioned in the rules as allowed is prohibited. While this really doesn't make much sense given that no set of rules could ever cover everything that characters might attempt to do in an adventure, it seems to be a very common way to view RPG rules. In an old school game like Microlite81, this is specifically not true: the millions of possible activities not mentioned in the rules are not prohibited, they are up to the GM to allow or disallow based on his knowledge of how reality works and how his specific campaign world differs from reality. Unless the rules specifically prohibit some action, players should ask their GM instead of simply assuming it is prohibited because the rules do not mention it.

Styles of "Old School" Play

If you read some "old school" blogs, forums, and web sites, you might get the impression that there is only one "old school" style of play: a style with expendable player characters who spend all their time in dungeons designed in the style of the old "Tomb of Horrors" module where an adventuring party is only one slipup away from death. This style of play is often shown in early modules.

What most people forget is that these early modules were designed for tournament play where the party that lasted longest and made it deepest into the dungeon was the winner. While a few gaming groups did run their regular campaigns like this and enjoy it, most people did not enjoy such games and the GMs who ran them were often referred to as "Killer GMs" (who often found themselves without players). Instead most home campaigns were a mixture of the following four styles – some campaigns stressing one or two styles over the others.

Power-Gaming: Many players start out playing in this style. Most soon get bored with it and add more and more of other styles. A power-gaming campaign is all about character power. Characters are known by their class, level, special items, and amazing powers and deeds. ("I killed the Demon King with my 15th Level Fighter/Magic-User/Druid. It only took two hits from Thor's Hammer to knock him out. Then I cut off his head with my vorpal blade.") There is often a lot of player competition for the most powerful character in campaigns that stress power-gaming. A lot of people look down on this style, but it can be a lot of fun to play a pure power-game in a group of players who all like the style.

Wargaming: This is probably the style old school rules were originally written for. The wargaming style of play is a competition between the player group and the GM. The GM sets up tactical battles, puzzles, and the like and the players solve them for treasure and experience. Fudging die rolls and ignoring rules (either for or against the players) is frowned upon as it detracts from the challenge and fun of the adventure. Characters in pure wargaming campaigns often were considered expendable and had little personality or goals (beyond staying live and getting rich) as a character with such might be tempted to do things counterproductive to survival. Published tournament dungeons like Tomb of Horrors could be considered examples of extreme forms of this style. Once the RPG hobby became known outside of the minis and board wargaming community, pure forms of the wargaming style quickly became uncommon.

Role-Playing: A pure role-playing campaign is almost the opposite of a pure wargaming campaign. Player skill, tactics, and rules aren't really important. What is important is the player's character and that character's life in the game. In a pure role-playing campaign, players create the personality of their characters in great detail and players generally have a large emotional investments made in them and do not consider their characters expendable. Players tend to have their characters act within their personalities and within the beliefs they're supposed to hold – even when doing so is not the best thing to do at the time within the game. The object is to live your character's life in the campaign world. You "win" by having your character achieve his goals, goals which may or may not have anything to do with the game's goals of exploring and accumulating treasure and experience points. The modern computer game *The Sims* is an example of this style of play.

Story-Telling: While all campaigns tell a story after-the-fact (that is, you can tell a story based on the characters actions in the game), in a story-telling campaign, the GM has worked out a story in advance and the player characters are the protagonists. The campaign world usually has a detailed background and back story behind it. Knowing this background may be more important than knowing the rules. Some pure story telling campaigns are little more than single-line railroads where the characters play their almost pre-scripted parts in the story. In other cases, things are more free-form with story flow and events created by interactions between the GM's basic outline of story events and the actions of individual characters during the campaign. Some people consider the more pure forms of story-telling campaigns boring straight-jackets while others love the idea of being a major part of a real story.

These four major styles of play appeared early in the history of role-playing games. They were first mentioned in a general circulation publication in Glenn Blacow's article "Aspects of Adventure Gaming" in *Different Worlds* #10 (the October 1980 issue).

The important thing to take from this section isn't the four styles or their labels (as there are other systems for describing this with their own labels), but the idea that there were many different styles of "old school" play back in the "old school" days – not just the single style stressed in some "old school" blogs, forums, and web sites. Don't let those sites make you believe that you aren't playing old school right if your campaign isn't strongly in the wargaming camp. Most successful campaigns back in "old school" days were a mixture of all four major styles – and a heaping helping of minor styles.

Advice for the New Old School Game Master

If you are comfortable running a rules-light game like standard Microlite20, you'll probably have no trouble running Microlite81 as you have already learned to run a game without having hundreds of pages of rules detailing how to handle every situation that might possibly arise in the game. You've learned to just make a ruling that you think fits the situation and keep the game moving.

Running a Game Without Skills

The greatest change between Microlite20 and Microlite81 is the removal of all character skills. If you are used to just allowing players to just say "I'm searching the room. What do I find?" and make search skill roll or just say "I'll try to persuade the baron to loan us a catapult." and make a persuade skill roll, running without skill rolls is going to require as much change to your thinking as it will to your players' thinking.

First, you need to get your players to tell you what their characters are actually doing in the campaign world, instead of talking in terms of what skill they are using. Then you need to learn to listen to what they say and decide if their description of

what they are doing a) would most likely solve the problem, b) wouldn't have a chance of solving the problem, c) might not immediately solve the problem but would provide more info that would help solve the problem, or d) would not definitely solve the problem but has a fair chance of doing so. Only option d would require a die roll.

Let's take checking a chest for traps as an example. Get the players to describe in general terms how they are going to check the chest for traps. Note general terms are enough; the idea is to see what the characters are doing, not to require them to describe every single muscle and eye movement they make. Having to "click on one exact pixel on the screen" to succeed is boring and frustrating in a computer game, the verbal equivalent of it is even more frustrating in a tabletop game. Don't fall into the trap of doing it as it turns players off fast.

Let's say a player says "I'll look the chest quickly over for obvious traps, paying special to the keyhole, clasp, and anything that looks out of the ordinary. I'm not touching it yet."

If the chest had a poison needle near the clasp or some holes for poison gas or needles to shoot out of, this should be enough for the character to notice it without a roll, even if he isn't a Rogue or the like. However, if the chest is set to explode (or shoot daggers out of the opening when opened, such a search is not going to discover the trap – again no matter what the character's class or background as such a trap isn't visible from the outside. If you are feeling generous, you might have a Rogue make roll and if she makes it tell her player that while she doesn't see a trap, something still doesn't seem right about the chest.

If the character had said he was then poking the chest with a pole instead of rushing to open it, he might hear something strange if the chest had the above-mentioned dagger trap. Of course, unless he is a Rogue or has some strange background, chances are he would not associate the noise with a trap, but rather just that there was something loose in the chest. Again, you might give a Rogue a roll, especially an experienced Rogue.

As this example shows, it really isn't hard – unless you choose to make it hard. It's just different. After a few sessions both you and your players will find that it really isn't as hard as it looks.

Some players, however, really want die rolls. Because of previous bad experiences with poor GMs, they just can't trust the GM enough to handle some decisions being made without die rolls. If your players are like this, you can use "skill" rolls as a safety net. The players will still have to describe what their character does to solve the problem just as above. Once the player describes what his character is doing, the GM calls for a class/background based "skill" roll as described in the skills section of these rules. The results are determined by your opinion as GM of the action described and the skill roll. There are basically two situations:

In the first case, you feel that the player has a good plan that should likely succeed. Therefore it will succeed regardless of the result of the roll, but how well it succeeds is determined by the skill roll. A failed skill roll is a minimal success; the character succeeds, but just barely. A successful skill roll means the character's plan succeeds without any major hitches.

In the second case, either the player obviously knows less than his character does about the situation or just comes up with a bad idea that you feel is unlikely to work. You let the skill roll decide the result. A failed roll means the plan fails, while a successful roll means the plan somehow worked after all, but probably not perfectly.

Players who refuse to even try to come up with some type of rational statement about what their character is actually doing but just want to let the skill roll decide automatically fail.

Guidelines Not Rules

Finally, remember that these rules are a tool for the GM. If something herein does not work right in your campaign, change it. The object is to have fun, not be a slave to rules or to players who think being a rules-lawyer is the way to get ahead. In many roleplaying games, the Rules As Written (RAW) are often considered sacrosanct or at least somehow better than those a GM can come up with himself. This is not true of Microlite81 so please change anything you do not like.

Adventures and Settings

There are a large number of adventures and campaign settings available for TSR editions of the world's most popular fantasy RPG. Playing copies of most of original adventures from TSR can be found on eBay for very low prices. TSR era adventures can be used with any pre-WOTC edition or retroclone with only very minor conversion.

There are also a large number of free and low cost adventures available in PDF format on the web. A good place to start looking for free adventures is on the Dragonsfoot forum web site (see the link under Old School Internet Resources below).

The best settings and adventures, however, are those you create yourself for your campaign. They don't need to be nearly as elaborate as those produced for use by others, let alone as fancy as those written for professional publication. Many B/X GM adventure location keys (including those of the game's original designers) were nothing but room/location numbers with something like "8 hobgoblins, leader has 20gp, trapdoor in floor hides skeleton with silver dagger (animates if dagger touched)" or "Small village, 27 families, 10 orc slaves, Headman: Mongar the Brown (Ftr 4th lvl, +1 sword) Mongar's wife, Rose is a 3rd lvl Cleric of Odin)." You can do that.

Microlite20 Notes

Microlite20 is a trimmed down sub-miniature version of the OGL 3.5 SRD. In its most basic form, Microlite20 has only two pages of rules but can be used with most fantasy OGL and d20 adventures and supplements with little or no conversion. Since M20 was published in 2006, many people who prefer rules-lite games have been using it for their d20 games and/or writing expansions, supplements and other material especially for M20. You can find out more about the original Microlite20 and find more variants like Microlite81 on the Microlite20 web site: <http://microlite20.net/>

Retroroleplaying Web Site

The author of Microlite81 maintains a web site devoted to out of print and out of style tabletop roleplaying games. He is always willing to discuss and answer questions about Microlite81 in the Microlite81 board on the RetroRoleplaying forum.

Web Site: <http://www.retroroleplaying.com/>
Forum: <http://www.retroroleplaying.com/forum/>
Blog: <http://blog.retroroleplaying.com/>

Old School Internet Resources

Old-School Blogs

There are a lot of old-school blogs. Even a selection of just the ones I currently read regularly would fill up a page or two and would likely be out of date quickly. Fortunately, there is a great place to find old school RPG blogs -- the RPG Blog Network, check the Legacy D&D category:
<http://www.rpgbloggers.com/>

Major Old-School Forums

Dragonsfoot

Very large forum discussing 1e and earlier, related games like retro-clones, Hackmaster, and Castles & Crusades. Many people who worked for TSR in the early days post here. Many free downloads including Footprints magazine and adventures.

<http://www.dragonsfoot.org/>

Knights & Knaves Alehouse

Discussions of B/X and 1e.
<http://knights-n-knaves.com/phpbb/>

Original D&D Discussion

Mainly discussions of B/X. Home of Fight On! Magazine.
<http://odd74.proboards76.com/>

The Piazza: Old D&D Campaign Worlds

Discussions of old published campaign worlds including many no longer officially supported.
<http://www.thepiazza.org.uk/bb/index.php>

Old School Product

A number of publishers are producing new material for old school games (using the OGL and retro-clones for compatibility). Many of these products are available through Lulu's Old School Renaissance group. Some downloadable products are free.
<http://stores.lulu.com/oldschoolren>

Microlite81 Trademark License

Note that this license only takes effect once the Final Version of Microlite81 is released. It is therefore NOT in effect now.
You may use the Microlite81 trademarks in your own OGL products without obtaining prior permission from the trademark owner in two cases:

- 1) Adventures, campaign settings, and other supplements either designed specifically for Microlite81 or that are written for another Oe, B/X, BECMI or 1e rule set may be labeled "Suitable for use with Microlite81".
- 2) Microlite81 may be mentioned by name in documents (or sections of a larger product) written to provide information on converting adventures and other materials between one game system and another.

In no case may the Microlite81 trademarks be used in any manner than indicates a product is endorsed or otherwise approved by the author of Microlite81. The terms "Microlite81 Companion" and "Microlite81 Supplement" may not be used in the title of a product without permission in writing.

All other uses of the "Microlite81" trademarks in products requires permission in writing from the trademark owner. This permission will generally be given, so don't be afraid to ask.

Microlite81 Extended

Microlite81 games are trimmed-down miniature versions of the Primary Fantasy SRD rules designed to be quick and easy to play, especially when compared to modern incarnations of the game. The goal of *Microlite81* games is to recreate the style and feel of the "B/X" edition of the world's first fantasy roleplaying game published back in 1981 without giving up all of the clearer mechanics of modern D20-based versions.

The *Microlite81 Extended* rules are based on the Basic and Expert boxed sets published in 1981, often referred to as B/X. The rules are not intended to be a clone of the B/X rules, but rather a conversion of them (plus the designer's house rules from the late 1970s and some optional modern additions like Dragonborn and Tieflings) to a rules-lite D20-based system that encourages old-school play without strictly old-school rules. These rules assume that the GM understands the basic concepts of roleplaying games, but provides information for both the GM and the players on the various "old school" styles of play. *Microlite81* games can easily use adventures and material from early editions of the world's most popular tabletop fantasy roleplaying game or modern clones.

Gryphons & Gramarye

Basic Edition

Public Playtest 1.0

Guidelines for Tabletop Fantasy Roleplaying Campaigns in the Old School Style

Gryphons & Gramarye – Basic Edition

Public Playtest 1.0 (September 15, 2015)

Copyright © 2015 Randall S Stukeley

All art is in the public domain.

What is Gryphons & Gramarye Basic?

You are holding in your hands (or more likely, reading on your screen) an early public playtest version of a new OSR game-style (based on my *Microlite74* and *Microlite81* games) I'm developing for my home campaign. While this is very early in the development and playtest cycle, *Gryphons & Gramarye Basic* is playable in its current form – thanks to starting the system as a variant of *Microlite74*.

The most noticeable changes so far are the classes:

- **Fighter:** a warrior powerful who is more likely to hit and deal damage (a great deal of damage, especially at higher levels) than any other class in the game, and easily powerful than the standard Oe fighting-man.
- **Scout:** In combat, about the equal of the standard Oe fighter, but with outdoorsman and thieving abilities.
- **Paladin:** Like the scout, this class is the equal of the standard Oe fighter, but has the ability to call on the divine through prayers, turns undead, and is better able to fight chaos. Can heal through prayer.
- **Magician:** Limited to light armor and weapons, the magician isn't a powerful warrior, but he is a master of illusion and nature-based magic.
- **Wizard:** Very similar to the standard Oe magic-user: horrible in physical combat but wields powerful magic.

There may be more or different classes in the final version of *Gryphons & Gramarye*. That's what playtesting is all about, after all. The final game will be complete with full descriptions of spells, monsters, treasures and many things not included in this early *Microlite74*-based draft.

Comments on this game are welcome. Future public playtest versions of this game will come out at irregular intervals – depending on what gets done and when I have time to release a coherent public playtest version. You can get all the playtest versions (along with playtest versions of other projects I work on) by making a donation to the RetroRoleplaying Cancer Fund. See the sidebar explaining the RetroRoleplaying Cancer Fund just before the spell lists in this pdf file or visit its home page at <http://www.retroroleplaying.com/content/retroroleplaying-cancer-fund-special-downloads>

Note that you will be given the option to remain anonymous. About 50% of donors wanted to remain anonymous when I was developing *Microlite78* and *Microlite81*.

Whether you wish to donate or not, I hope you like this free early playtest of *Gryphons & Gramarye*. You can also download free copies of my other games (including the various versions of *Microlite74*, *Microlite78*, and *Microlite81*) at <http://www.retroroleplaying.com/> or in the download section of the <http://microlite20.org/> web site.

INTRODUCTION

Gryphons & Gramarye, like its parent game, *Microlite20*, is a trimmed-down, sub-miniature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal of *Microlite74* games, however, is to recreate the style and feel of that very first ("0e") fantasy roleplaying game published back in 1974.

The *Gryphons & Gramarye* rules are based on three little booklets found in the boxed set of the 1974 0e edition. The rules are not intended to be a clone of the 0e rules, but rather a conversion of them to a rules-lite D20-based system that encourages old-school play without strictly old-school rules. *Gryphons & Gramarye* is loosely based on the third edition of the original *Microlite74* rules.

These rules assume a basic familiarity with tabletop role-playing games in general and with the basic principles of "D20" based rules. If you are completely new to tabletop role-playing games, you will want to start by playing with someone who is familiar with how they work.

CHARACTER CREATION

Stats

There are 6 stats: Strength (STR), Dexterity (DEX) and INT (INT), Wisdom (WIS), Constitution (CON) and Charisma (CHR).

Roll 3d6, Total the 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/4, round toward zero.

Strength measures your character's muscle and physical power.

Dexterity measures hand-eye coordination, agility, reflexes, and balance.

Constitution represents your character's health and stamina.

Intelligence is a measure of a PC's formal education and knowledge and not a measure of how smart the character is – as a PC's wit and cleverness are that of the player. For NPCs and monsters, however, this stat is also a measure of raw intelligence.

Wisdom describes a character's willpower, common sense, perception, and intuition. This stat represents being in tune with and aware of one's surroundings.

Charisma measures a character's force of personality, persuasiveness, personal magnetism, ability to lead, and physical attractiveness. This stat represents actual strength of personality, not merely how one is perceived by others in a social setting.

Races

Humans can be any class (suggested maximum level 14).

Dwarves can be Fighters or Hunters, max level 12.

Special Abilities: +4 to magic saves; note slanting passages, traps, shifting walls and new construction in underground settings (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of dwarves, gnomes, kobolds and goblins; can see in darkness half as well as in light.

Elves can be Fighters, Scouts, or Magicians, max level 10.

Special Abilities: Can switch between a single selected warrior class (fighter or scout) and Magician between adventures and can use any magic armor and any magic weapon when acting as a Magician (however, their max level is reduced to 8 if they multiclass like this); +2 to hit and damage goblinoid monsters; note secret/hidden doors (d20 + MIND bonus; DC 12 if carefully checking, DC 16 if just passing through area); speak languages of elves, orcs, hobgoblins, and gnolls.

Halflings can be Fighters (max level 8) or Scouts (max level 12).

Special Abilities: +4 to magic saves; +2 to hit and damage with slings and light bows; can blend in background (d20 + DEX Bonus; DC 12 if outdoors, DC 16 if indoors – this is an extraordinary ability above and beyond simply hiding in available cover which anyone can try to do).

Classes

The classes are Fighter, Scout, Magician, and Wizard. Characters normally begin at Level 1 (unless directed otherwise by the GM).

Fighters are soldiers, champions, and other warriors who are exclusively trained in the arts of combat and war. They are specialists in dealing damage with weapons and in the other arts of physical combat. They are trained to lead others in battle. Prime Requisite: STR. Requirements: none.

Weapons and Armor: Fighters may use any kind of armor or weapon and may use shields.

Combat Machine: Against foes of one hit dice (HD) or fewer, Fighters get one attack per level each combat round. At 6th level, this applies to foes of two hit dice or less. At 12th level, this applies to foes of three hit dice or less.

Cleave: After a fighter kills an opponent in melee combat, he may immediately make another attack against any still-standing foe in range. The maximum number of attacks he can make in one round is equal to his level. Cleave only applies to foes too powerful for the Combat Machine effect.

Weapon Mastery: At first level a fighter selects one specific type of weapon (daggers, short swords, maces, spears, etc.) that he has mastered and selects another every odd level (level 3, 5, 7, etc.). When using a mastered weapon, the fighter adds his Combat Bonus to weapon damage, may hit monsters requiring silver weapons with a normal weapon, and scores a critical hit on a natural roll of 19 or 20 (which would otherwise hit). A fighter may select a specific weapon twice. When using a twice mastered weapon, the fighter adds his Combat Bonus to weapon damage, may hit monsters that require a silver weapon or a +1 magic weapon with a normal weapon, and scores a critical hit on a natural roll of 18, 19, or 20 (which would otherwise hit).

Saving Throw: Fighters receive a +2 bonus on saving throws vs. death and poison (unless the alternative "Saving Throw Matrix" is used).

Magic Use: Fighters may attempt to cast spells from scrolls. To successfully cast a spell from a scroll the fighter must be able to read the language the scroll is written in and roll against his Use Magic score on a D20, adjusting the roll by both his INT bonus and the level of the spell being attempted (- spell level). If successful, the spell functions normally and fades from the scroll. If unsuccessful, the spell fades from the scroll and the fighter loses 1d6+2 hit points.

Recruiting: When rolling for reactions from perspective henchmen or hirelings, the fighter has a +1 bonus to the roll.

Battlefield Prowess: At 4th level, a fighter inspires those under his command. Any hirelings or mercenaries hired by the fighter have a +1 bonus to their morale when personally led by the fighter. At 8th level, any hirelings or mercenaries hired by the fighter never need to check morale when personally led by the fighter and foes must make a morale check to attack the fighter.

Stronghold: At level 9 a fighter may become a great leader of men, taking control of a parcel of land and a leadership rank in his society. A fighter will, assuming money is at hand, build a castle. He may ultimately control several villages and towns, but must be a good, strong leader and provide protection.

Experience Base: 2000

Fighter Advancement Table

Level	Hit Points	Combat Bonus	Magic Use	Melee	Saves	XP
1	2d8	+3	18+	0	13	0
2	3d8	+4	18+	0	12	2000
3	4d8	+5	17+	0	11	4000
4	5d8	+6	17+	0	10	8000
5	6d8	+7	16+	0	9	16000
6	7d8	+8	16+	0	8	32000
7	8d8	+9	15+	0	8	64000
8	9d8	+10	15+	0	7	128000
9	9d8+3	+11	14+	0	7	256000
10	9d8+6	+12	14+	0	6	512000
11	9d8+9	+13	13+	0	6	768000
12	9d8+12	+14	13+	0	5	1024000
13	9d8+15	+15	12+	0	5	1280000
14	9d8+18	+15	12+	0	4	1536000

Scouts are warriors who are at home in the wilderness and are trained to be sent out ahead of a main force so as to gather information about the enemy's position, strength, or movements. While they are capable in combat their forte is stealthy actions and special operations. In addition to their military use, they make excellent guides, spies, and even thieves. Prime Requisite: DEX. Requirements: none.

Weapon and Armor Restrictions: Scouts are trained in warfare and, as such, have no restrictions on the kind of weapons or armor they can use. However, if they are wear metal armor their chance of success with stealth activities is at -4.

Cleave: After a scout kills an opponent in melee combat, he may immediately make another attack against any still-standing foe in range. The maximum number of attacks he can make in one round is equal to his level.

Back Stab: Any time a Scout attacks an opponent who is unaware of their presence, the Scout receives a +2 "to hit" bonus. If the attack is successful, the Scout may roll his weapon damage twice to calculate damage.

Stealth Abilities: Scouts possess a number of very specific abilities to assist them in their scouting duties. These abilities include proficiency at opening locks and disarming traps, moving without a sound, and using shadows to conceal themselves. They also possess a greater facility for detecting sounds and noises from beyond closed doors. To successfully use these abilities the player must roll 1d20 + any Dexterity ability modifiers and achieve a result greater than or equal to the target number on the Scout Abilities table.

Wilderness Survival (WS): Scouts are most at home in the wilderness, among the flora and fauna of the world. A scout's Wilderness roll may be used to track both humanoids and animals in natural environments. When in these natural environments, wilderness survival may also be used to remain both unseen and silent. Finally, when a ranger encounters a natural wild beast he may utilize this ability in an attempt to sooth and calm such an animal. A Scout may hunt for 1d4 hours and with a successful roll find enough food and water to feed himself and twice his level additional people and horses. To successfully use these abilities the player must roll 1d20 + any Wisdom ability modifiers and achieve a result greater than or equal to the target number on the Scout Abilities table.

Climb Sheer Surfaces (CSS): Scouts may climb incredibly sheer surfaces. As hardy adventurers, anyone may attempt to climb vertical surfaces but only the scout may ascend impossibly difficult surfaces or attempt unthinkable climbs. To successfully use this abilities the player must roll 1d20 + any Dexterity ability modifiers and achieve a result greater than or equal to the target number on the Scout Abilities table.

Scout Abilities Table

Level	W S	CS S	Open Locks	Disarm Traps	Move Silently	Hide in Shadows
1	9+	11+	17+	18+	16+	18+
2	9+	11+	16+	17+	15+	17+
3	8+	10+	15+	16+	14+	16+
4	8+	10+	14+	15+	13+	15+
5	7+	9+	13+	14+	12+	14+
6	7+	9+	12+	13+	11+	13+
7	6+	8+	11+	12+	10+	12+
8	6+	8+	10+	11+	9+	11+
9	5+	7+	9+	10+	8+	10+
10	5+	7+	8+	9+	7+	9+
11	4+	6+	7+	8+	6+	8+
12	4+	6+	6+	7+	5+	7+
13	3+	5+	5+	6+	4+	6+
14	2+	4+	3+	4+	3+	5+

Escape Trouble: Scouts tend to throw themselves in dangerous situations, but also develop the ability to escape them fast and unscathed. Scouts can retreat and flee from a combat (or other threatening circumstances) at twice their base normal speed for a number of rounds equal to 1d6 + their level. If they win the initiative, or if they lose initiative but succeed a Dexterity saving throw, scouts don't suffer any attack of opportunity (such as rear attacks for fleeing an opponent), when using this ability for flight. Scouts can use this ability once per combat/encounter.

Saving Throw: Scouts receive a +2 bonus to any saving throw made to reduce or avoid the effects of any trap, magical or mundane (unless the alternative "Saving Throw Matrix" is used).

Magic Use: Scouts may attempt to cast spells from scrolls. To successfully cast a spell from a scroll the scout must be able to read the language the scroll is written in and roll against his Use Magic score on a D20, adjusting the roll by both his INT bonus and the level of the spell being attempted (- spell level). If successful, the spell functions normally and fades from the scroll. If unsuccessful, the spell fades from the scroll and the scout loses 1d6+2 hit points.

Establish Stronghold: At ninth level, a scout who chooses to build (or otherwise obtains) a castle or fortified manor is considered to have reached the rank of "Baron" or "Baroness," bestowed by the local ruler or monarch. The character may choose to attract a body of men-at-arms, who will swear their fealty as loyal followers.

Experience Base: 2000

Scout Advancement Table

Level	Hit Points	Combat Bonus	Use Magic	Melee	Saves	XP
1	2d6	+2	12+	0	15	0
2	3d6	+2	12+	0	14	2000

14	9d6+1 2	+8	8+	0	6	256000 0

Paladins are representatives of one or more of the Lords of Law, deities who support the existence of reality and oppose its return to formless chaos. The character might be a s witch-hunter, an exorcist of demons, a shining knight of her faith, or a secret agent of some temple hierarchy. While many of a Paladin's abilities are oriented toward healing and protecting, they tend to play a support role during combat, they are able to stand shoulder-to-shoulder with the party's Fighters if need be—at least for a while. Prime Requisite: CHR. Requirements: must be lawful.

Weapon and Armor Restrictions: **In general, Paladins** may use any kind of armor or weapon and may use shields. Certain deities may have different weapon and armor restrictions.

Cleave: After a paladin kills an opponent in melee combat, he may immediately make another attack against any still-standing foe in range. The maximum number of attacks he can make in one round is equal to one-half of his level (round up).

Smite - A paladin may imbue his normal weapon with holy power allowing it to hit monsters that normally require silver or even magical weapons to hit. Spending 1 HP before making the attack roll will allow hitting monsters that require silver (or other special non-magical) weapons to hit. Spending 2 HP before making the attack roll will allow hitting monsters that require magical weapons to hit.

Law Powers: The paladin is protected at all times by a Protection from Chaos spell and can Detect Chaos (effects as the spell) at will by concentrating.

Prayers: Paladins may pray to gain divine help. This is considered a full round action, the player must roll the dice listed below (adding their Wisdom modifier). For a minor prayer, any roll over a DC of 1 succeeds. For a major prayer, any roll over a DC of 6 succeeds. For a greater prayer, any roll over a DC of 12 succeeds. Each subsequent prayer during the same day adds a cumulative +1 penalty to the DC. For example, if a character is praying for the third time that day, the player must roll over a 3 in order to continue receiving aid (assuming the third prayer request in a minor prayer, over 8 would be needed if it were a major prayer and over 14 would be needed if it were a greater prayer). A failure indicates that the prayer is unanswered, that no more aid will be granted for 1d6 hours (GM rolls in secret). At GM's discretion, praying for unjust causes or creatures will incur a penalty to the roll (maximum: -4), but praying for a just and urgent cause may grant a bonus to the roll (maximum: +4). Prayer rolls use a d6 at 1st and 2nd level, then a d8 at 3rd and 4th level, a 1d12 at 5th and 6th level, a d16 at 7th and 8th level, a d20 at 9th and 10th level and a d24 at 11th level and above.

If possible the GM should design 10-12 minor prayers specific to each cult (as well as 2-4 major prayers and 1-3 greater prayers). If this is not done, the following generic list of prayers may be used for any cult that does not have a special list:

Minor Prayers

Blessing: Beneficiary is granted a +4 bonus for a single particular task (one die roll), or the next saving throw against a particular threat or creature, within one day.

Counter Prayer: Cancels sound-associated magical effects (e.g. harpy songs) within 30 feet, so long as the character loudly prays.

Dispel Charm: Dispels a mind-affecting spell or effect if the character rolls 1d20 + level vs. 10 + caster's level (or creature's HD).

GRYPHONS & GRAMARYE BASIC (PLAYTEST 1.0)

Encouragement: All allies within 30 feet get a +1 bonus to attack rolls and saving throws vs. fear for 1 round per level of the Initiate or Acolyte. At 9th level, the bonus increases to +2.

Exorcism: Expels a malignant spirit from an unwilling host (use a Turn Undead roll, but after 30 minutes of loud prayers).

Guidance: Answers a question with a short vision, a few words, a coincidental sign, etc.

Healing Touch: Cures 1 BP/3 levels (round up), or grants a new save (at + the paladin's level) to cure a disease or neutralize poison.

Sanctuary: No creature can attack the character so long as he prays silently during that combat. Common creatures get no save, but supernatural foes get a save.

Turn Undead: Repels or even utterly destroys undead and sometimes demonic creatures (use the Turn Undead Table below).

Major Prayers

Cure Disease: Touch cures person of any diseases, including magical diseases.

Neutralize Poison: Touch immunizes subject against poison (10 minute duration) OR detoxifies venom in or on subject.

Remove Curse: Touch frees subject from a single curse.

Greater Prayers

Raise Dead: Restores life to subject who died as long as 4 days (plus 4 days per caster level over 8) ago.

Restoration: Restores one level lost to an energy drain attack or restores one limb destroyed or maimed.

Immunity to Disease: At 3rd level, a paladin is immune to all mundane diseases. At 5th level, a paladin is also immune to all magical diseases.

Saving Throw: Paladins receive a +2 bonus to any saving throw made to reduce or avoid the effects of black magic or chaos powers (unless the alternative "Saving Throw Matrix" is used).

Scroll Use: Paladins may attempt to cast spells from scrolls. To successfully cast a spell from a scroll the scout must be able to read the language the scroll is written in and roll against his Use Magic score on a D20, adjusting the roll by both his INT bonus and the level of the spell being attempted (- spell level). If successful, the spell functions normally and fades from the scroll. If unsuccessful, the spell fades from the scroll and the paladin loses 1d6+2 hit points. Attempts to cast any spell of black magic will always fail, even if the Paladin does not know the spell is black magic.

Establish Stronghold: At ninth level, a Paladin who chooses to build (or otherwise obtains) a fortified martial monastery (called a "priory") is considered to have reached the rank of "Prior" (equivalent to a "Baron"). So long as the cleric is in favor with his god, he may buy or build his priory at half the normal price due to divine intervention. Once a priory is established, the paladin's reputation will spread and he will attract 5d6x10 0th level soldiers armed with various weapons, plus another 1d6 paladins of 1st-3rd level of the same religion to serve the order. They are completely loyal (morale +4). While in the paladin's service, these soldiers and followers must be provided food and lodging, but need not be paid wages.

Turn Undead Table

16-19	-	-	-	11	9	7	5
20+	-	-	-	-	11	9	7

On the Turn Undead Table, there will be a dash, a "T", a "D", or a number corresponding to the HD of the undead and the level of the priest. A dash means that the priest has not attained high enough level to turn the undead type. A "T" means that the priest automatically turns the undead, and a "D" means that the undead will be destroyed (dispelled, returned to own plane, etc.) automatically. A number indicates that the player must roll that number or higher on 2d6 in order to turn the undead. If this roll is successful, or there is a "T" in the chart, the player rolls 2d6 again and the result equals the number of total hit dice of undead turned. A "D" in the chart requires the same roll to determine how many HD of undead are destroyed. No matter what the dice roll result, at least one monster will always be turned or destroyed, as appropriate, on a successful use of Turn Undead.

Experience Base: 2500

Paladin Advancement Table

Level	Hit Points	Combat Bonus	Scroll Use	Mem	Save	XP

14	9d6+12	+8	10+	0	6	1920000

Magicians (sometimes called white wizards or white witches) study arcane secrets and cast spells. Magicians focus on illusion and natural magic. While less spectacular than wizardry, experienced magicians are able to cast a great number of useful spells. Prime Requisite: WIS. Requirements: none.

Weapons and Armor: Magicians may only wear non-metallic light armor and may only use light weapons.

Minor Magic - Magicians can cast minor "everyday/non-combat" magic at will. Basically, any everyday thing someone could do mundanely, a magician can do with minor magic. Attempting something the GM considers abusive fails and causes the magic-users wand to explode (doing 1d6 backfire damage to the magic-user unless a WIL save is made). Usable once per round if no other action taken. Requires waving a handmade wand. Cost 1 HP per use.

Some examples: Light a candle or pipe with a flame from the wand tip. Dust things – at first level a minor magic spell might be needed for each shelf or piece of furniture, while at third level a single spell might dust a room and at sixth level the magic-user's the entire floor of a house or tower. Tie or untie a knot. Float coins from the magic-users coin purse to a merchant's hand. Open a cabinet. Mix drinks. Dress/undress.

Mnemonic Magic: Magicians memorize and can cast spells from the Magician spell list. At 2nd level, magicians can scribe quick scrolls of any spell they have in their spell book and are able to cast.

Scroll Use: Magicians may automatically cast spells from scrolls if the spell is on the Magician spell list, provided the spell is written in a language the Magician can understand. Magicians may also attempt to cast Wizardry spells from scrolls. To successfully cast a Wizardry spell from a scroll the Magician must be able to read the language the scroll is written in and roll against his Use Magic score on a D20, adjusting the roll by both his INT bonus and the level of the spell being attempted (- spell level). If successful, the spell functions normally and fades from the scroll. If unsuccessful, the spell fades from the scroll and the magician loses 1d6+2 hit points.

Magical Research: At 5th level, a magician is able to research spells, scribe true scrolls, and brew potions. When a magician reaches the 9th level, he is able to create magic items.

Stronghold: A magician may build a stronghold, often a great tower, when he reaches level 9. He will then attract magician apprentices (1d6), who will range from level 1-3.

Experience Base: 2500

Magician Advancement Table

Level	Hit Points	Combat Bonus	Scroll Use	Mem	Save	XP
1	1d6	+0	10+	1	16	0

13	9d6+4	+2	3+	17	7	1600000
14	9d6+5	+3	2+	20	6	1920000

Wizards (sometimes called Sorcerers) study arcane secrets and cast spells. While early in their career magic-users have only limited power, experienced magic-users are able to cast a great number of powerful spells. Prime Requisite: INT. Requirements: alignment may not be law.

Weapons and Armor: Wizards wear no armor and can only use daggers, slings, or staves as weapons.

Arcane Blast – A Wizard can shoot a dart of magic energy from the tip of their handmade wand once per round provided no other action is taken. They must roll to hit the target normally.

Range: short 60; medium 120; long 180. Usable once per round if no other action taken and does 1d4 damage if it hits. No saving throw is allowed. Requires pointing a handmade wand at the target and costs 1 HP per use. The visible effects can be whatever the Wizard desires; note that this does not affect damage, it only adds color to the ability.

Minor Magic - Wizards can cast minor "everyday/non-combat" magic at will. Basically, any everyday thing someone could do mundanely, a wizard can do with minor magic. Attempting something the GM considers abusive fails and causes the magic-users wand to explode (doing 1d6 backfire damage to the magic-user unless a WIL save is made). Usable once per round if no other action taken. Requires waving a handmade wand. Cost 1 HP per use.

Some examples: Light a candle or pipe with a flame from the wand tip. Dust things – at first level a minor magic spell might be needed for each shelf or piece of furniture, while at third level a single spell might dust a room and at sixth level the magic-user's the entire floor of a house or tower. Tie or untie a knot. Float coins from the magic-users coin purse to a merchant's hand. Open a cabinet. Mix drinks. Dress/undress.

Mnemonic Magic: Wizards can memorize and cast spells from the Wizard spell lists. At 2nd level, wizards can scribe quick scrolls of any spell they have in their spell book and are able to cast.

Scroll Use: Wizards may automatically cast spells from scrolls if the spell is on the Wizard spell list, provided the spell is written in a language the Wizard can understand. Wizards may also attempt to cast Magician spells from scrolls. To successfully cast a Magician spell from a scroll the Wizard must be able to read the language the scroll is written in and roll against his Scroll Use score on a D20, adjusting the roll by both his INT bonus and the level of the spell being attempted (- spell level). If successful, the spell functions normally and fades from the scroll. If unsuccessful, the spell fades from the scroll and the Wizard loses 1d6+2 hit points.

Magical Research: At 5th level, a Wizard is able to research spells, scribe true scrolls, and brew potions. When a Wizard reaches the 9th level, he is able to create magic items.

Stronghold: A Wizard may build a stronghold, often a great tower, when he reaches level 9. He will then attract Wizard apprentices (1d6), who will range from level 1-3.

Experience Base: 3000.

Wizard Advancement Table

Additional Character Class

Information

The following other information is available:

Determining Hit Points: Each class has an HP column on their Class Advancement Table. XdY means roll X dice of type Y and add the character's Constitution bonus to each die rolled. The minimum roll (after adding the Constitution stat bonus) is 1. After level nine, a few hit points (1, 2, or 3 are added at each level. Constitution stat bonuses are not added for levels greater than 9.

For example, a first level fighter has a Constitution of 15 for a CON stat bonus of +1. At first level, the player rolls 1d8 and adds +1 to determine his maximum hit points. At second level, the player would roll another 1d8+1 and add the result to his first level hit point maximum to get the character's second level hit points.

Max at First Level (Optional): Instead of rolling a die for first level characters, assume the die roll was the highest possible roll for the type of die. *This option is strongly recommended.*

Reroll All Dice at Every Level (Optional): Instead of just rolling a single die at every level and adding the result to the character's previous hit points, reroll all the dice every time the character gains a new level, using the higher of the new roll or the previous hit point total +1.

Weapons and Armor Limitations: As noted, many classes are limited in what weapons and armor they can utilize. Regardless of such class limitations, characters of any class may purchase, carry, and use any weapons or armor desired. However, characters who equip themselves with weapons and armor unusable by their class will fight as 0th level characters while so equipped. They also will receive no bonus on their attack rolls or armor class from ability scores or equipment, may not use any of their class powers, and do not gain XP.

Determining Experience Points Required to Advance: The XP column of each class table lists the minimum XP a character needs to reach a given level in a class for standard characters. This table will need to be recalculated from the Experience Base numbers of the class if any optional rules that modify the experience base are used for a character.

Experience Base: An Experience Base is listed for each class, for example, the Fighter's Experience Base is 2000. Optional rules may have Experience Base modifiers. If a character possesses an optional ability the experience Base modifier (+100, for example) is added to the listed Experience Base for the character's class. If a Fighter had the example optional ability, his final Experience Base would be: 2100.

Calculating Experience Points per Level: To calculate a character's custom XP advancement schedule, start the number from the character's final Experience Base (including his class base plus all modifiers from optional rules). That is the experience point total required to advance to 2nd level. The experience required to advance doubles each level thereafter until 9th level reached.

After 9th level, the amount of experience points required to advance no longer doubles. Instead of doubling, it increases by a flat amount each level: the total amount of experience needed to reach 9th level. For example if it takes 300,000 xp to reach 9th level, it would take 600,000 to reach 10th level, 900,000 to reach 11th level, etc..

The standard XP advancement charts listed for each class were calculated by this method and should serve as examples of this calculation.

Background

Characters should select, with the approval of the GM, a background that represents their race, culture, and their previous (non-adventuring) training/experience. The selection of a character's background is as important as the selection of a

class as a character's background gives the character a broad base of skills and knowledge.

The GM will consider the character's background just as he would the character's class when deciding if a character will succeed with an action. For example, a character with an "Human (Holy Panamon Imperium) Engineer" background should have a much better chance of damming a creek or building a bridge over it than a character with a "Courtier" background – and an even better chance if that creek is in the territory of the Holy Panamon Imperium where the character knows more about the terrain and likely has contacts who could help.

Races and cultures are generally limited to those the GM has defined for the campaign setting although most setting will at least have humans, elves, dwarves, and halflings available as races.

For the prior training/experience part of a character's background, anything that fits the campaign setting may be selected. For example: A few possibilities include: acrobat, alchemist, animal trainer, architect, aristocratic noble, assassin, chef, con-woman, desert nomad, goblin exterminator, hunted outlaw, knight errant, priest, refugee, scout, shaman, shepherd, soldier, spy, temple acolyte, thief, torturer, traveling martial arts pupil, tribal healer, tunnel scout, wandering minstrel, poet, and so on. This part of a character's background need not be related to the PCs class, e.g. a player who creates a deeply religious fighter skilled in the arts of vision interpretation, divination and oration might pick 'Prophet' as a background. Backgrounds may not duplicate a class.

Players should discuss their background ideas with their GM to both to be sure it will be a good fit for both the campaign setting and the group's play style as well as to be sure the player and the GM are both on the same general page as to what skills and knowledge the background provides the character. For example, if a player picked a "thief" background, the GM might be thinking "expert treasure finder" while the player is thinking "cat burglar."

Alignment

Basic Alignment: There are three basic alignments: Law, Chaos, and Neutral. Alignment is basically "which side would you fight for in the final battle over the fate of reality." Only intelligent beings have alignment and the vast majority of those tend to be neutral. Player Characters should select an alignment for their characters.

Law: Law aligned characters will fight for law and order against chaos. They may be good or evil, but they oppose chaos and all it stands for. All the sane deities are of this alignment.

Chaos: Chaos aligned characters will fight against law and order in the universe, desiring to return it to the randomness and disorder than surround and constantly attempt to reclaim it. They may be good or evil, but they oppose law and all that it stands for.

Neutral: The vast majority of intelligent beings are neutral in the cosmic battle between law and chaos. While they enjoy the benefits of the ordered universe and civilization, they believe that a total victory by either law or chaos would be bad for the average person. Some may strive for balance between law and chaos, but most just ignore the issue – leaving the battle between law and chaos to those they tend to see as fanatics.

Virtues and Vices (Optional): As in real life, each character has virtues (admirable character traits) and vices (not so admirable character traits). Players select six traits from the lists below before play starts – with no more than four traits from one list. Players can select virtues and vices not on the list with GM approval

Virtues	Vices
Academic	Arrogant
Austere	Bigoted

Bold	Capricious
Cheerful	Cowardly
Compassionate	Egoistical
Courageous	Fearful
Daring	Hateful
Determined	Hidebound
Fair	Impulsive
Faithful	Insensitive
Friendly	Lazy
Generous	Manipulative
Gregarious	Miserly
Honest	Petty
Hopeful	Power Hungry
Industrious	Rude
Just	Self-Centered
Kind	Spendthrift
Patriotic	Stubborn
Thoughtful	Thoughtless
Thrifty	Vengeful

Character Tagline (Optional)

Each character should have one fairly unique feature in his personality or background that sets him or her apart from other characters and npcs in the campaign (and from other characters the player may play or have played in the campaign. This feature should not be something that would give a mechanical bonus in play, but something interesting and unique in the character's personality, background, or history. The GM should work with the player to ensure the character's tagline is appropriate to the campaign setting. A tagline can also be a "catch phrase" that sums up the character in some way.

Some examples of a simple character taglines from history and literature would be "never tells a lie" for George Washington, "the lionheart" for Richard I of England, "demands his martinis be shaken not stirred" for James Bond, "cultivates a grandfather image but quietly manipulates others to achieve the greater good" for Dumbledore, and "I didn't do it, nobody saw me, you can't prove anything" for Bart Simpson.

STANDARD RULES

Skills

There are no skills in *Gryphons & Gramarye*. Instead players are expected to think like adventurers, tell the GM what they are doing and the GM decides if it will succeed in the situation, taking into account the characters' classes and backgrounds. If the GM decides a random success chance is truly needed he may resolve the situation with a throw or roll of his choice or he may call for one of the following skill throws from the table below:

Primary Class Throw: if the character is attempting something directly related to their class.

Secondary Class Throw: if the character is attempting something only loosely related to their class.

Primary Background Throw: if the character is attempting something that is not related to their class but is directly related to their background.

Secondary Background Throw: if the character is attempting something that is not related to their class but is at least loosely related to their background.

Unrelated Skill Throw: if the character is attempting something that anyone should be able to try with at least a small chance of success but is not really related to their class or background.

When the GM calls for a skill throw, he will declare the type of skill throw, which stat the skill throw falls under (add Stat bonus to throw), and any situational modifiers and the player will make a skill throw. The GM should make the throw in secret if seeing the result would give the player more information than his character should have.

Unless the GM rules otherwise, a natural roll of 20 always succeeds for a Primary Class, Secondary Class, or Primary Background Roll. The following situational modifiers are suggested for task difficulty: Easy: +1, Normal: 0, Difficult: -1, Hard: -2, Very Hard: -4, Legendary: -6, Unbelievable: -8.

If the skill throw is a success, the character's attempt to perform the task succeeds. Otherwise, the character's attempt to perform the task fails, meaning the character makes no progress toward the task's objective (or -- if the GM wishes -- makes progress but suffers a setback determined by the GM).

Skill Throw Table

Lv	Primary Class	Secondary Class	Primary Background	Secondary Background	Unre
1	10+	12+	14+	16+	19+
2	9+	11+	13+	15+	18+
3	9+	11+	13+	15+	18+
4	8+	10+	12+	14+	17+
5	7+	9+	11+	13+	17+
6	7+	9+	11+	13+	16+

8	5+	7+	9+	11+	15+
9	5+	7+	9+	11+	15+
10	4+	6+	8+	10+	14+
11	3+	5+	7+	9+	14+
12	3+	5+	7+	9+	13+
13	2+	4+	6+	8+	13+
14	1+	3+	5+	7+	12+

Basic Adventuring Skills: Unless a player specifies otherwise about a character at character creation, all characters are assumed to have basic practical adventuring skills such as maintaining weapons and armor, riding a horse, setting up a camp, swimming, climbing, cooking, first aid, etc., and have a rough idea of the value of common coins, trade goods, gems, and jewels. Success should simply be assumed unless there are unusual conditions. If there are such unusual conditions, basic adventuring skills should be considered loosely related to the character's class for the purpose of a skill throw.

Languages: All character races speak common. Other intelligent beings speak their own languages (20% chance of also speaking common). Beings with a INT over 10 may speak one additional language per point of INT over 10 (these are in addition to any languages known by race). If a roll is needed, a character's native language(s) should be considered directly related to the character's background and any other languages known should be considered loosely related to the character's background.

Saving Throws

When subject to an unusual or magical attack, characters generally get a saving throw to avoid or reduce the effect. To make a saving throw, roll 1d20, add modifiers based on the type of saving throw (and any circumstantial modifiers set by the GM). A natural roll of 1 automatically fails. A natural roll of 20 automatically succeeds. Otherwise, the saving throw is successful if the total of the roll and modifiers is greater than the saving throw listed for the character's level. Unless noted otherwise, monsters save as a Fighter of a level equal to one-half their hit dice, rounded up.

Saving Throw Modifiers: What a character is saving against modifies the saving throw die roll. In cases where multiple types apply, use the first one listed below:

Breath Weapons: Breath Weapons and other blast-like effects give a -1 modifier to the saving throw.

Poison: Dwarves get a +3 bonus.

Death Magic: This includes negative energy attacks. Clerics get +3 due to their link with the higher and lower planes.

Rod, Staff, Wand: All magical effects created by a rod, staff, or wand give +1 bonus.

Spells: +2 bonus for Magic-Users.

Special Saving Throw Modifiers: Where applicable, these modifiers are applied in addition to those listed above:

Charm and Illusion Magic: Add MIND stat bonus.

All Magical Effects: Dwarves and Halflings receive a +4 bonus to all saving throws against a magical effect.

Magic

Magic-using characters can cast any spell from their respective spell list with a spell level equal or below 1/2 their class level, rounded up. A Magic-Using character starts with Read Magic and 1d2 additional first levels spells in his spell book (which must be approved by the GM) and can add more spells by finding (or buying) them on scrolls or books and copying them into his spell book.

A magic-using character can memorize up to his memory limit ("Mem" on the appropriate Level Advancement Table) in spells at one time. A spell-caster requires his spell book and one hour of time to change the spells he has memorized.

Casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast:

Spell Level	1	2	3	4	5	6	7
HP Cost	3	5	7	9	11	13	15

Spell Difficulty Class: For purposes of things like dispelling, the Difficulty Class (DC) for all spells is: 10 + Caster Level + Caster's MIND bonus

Signature Spells: Select one 'signature' spell per spell level from first upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

Combat Casting: In combat, if a character is hit and takes damage (or other effect that could interfere with spell casting like paralysis) before casting a spell, the spell fizzles. This costs the caster 1 HP per level of the spell he was attempting to cast and the caster loses his action for the round. Characters casting spells in combat must remain stationary.

Quick Scrolls: Quick scrolls take one day per level of the spell being scribed to write and cost 100gp per spell level for supplies. Unlike true scrolls, the writing in a quick scroll fades in (1d8-4) + the scribe's level weeks (minimum: 1 week). There is no way to tell in advance how long before a quick scroll fades. A quick scroll can only be used by the caster who scribed it, it appears as complete gibberish to anyone else. Casting a spell via a quick scroll costs HP just as if the spell was being cast from memory and the spell fades from the quick scroll when cast.

Ritual Magic: A spell-caster can perform ritual magic to cast spells of any level available to his class (and other special rituals that might be found in old books or scrolls) provided the caster has a written copy of the spell or ritual, any needed materials (mainly required by special rituals), and the time and space needed to perform the ritual.

Ritual casting of a spell of a level the caster is able to cast normally takes 10 minutes and costs 1 HP per level of the spell being ritually cast. Ritual casting of a spell of a level the caster is not yet able to cast normally takes 10 minutes per level of the spell and costs twice as much in hit points as it would to cast directly. Ritual casting of a special ritual takes as long and costs as many HP as the ritual states (that is, the GM assigns these as

needed when he creates the special ritual). Multiple Magic-Users and/or Clerics may participate in a casting a special ritual with the HP cost of casting divided among them.

Optional Sacrifices: One or more beings with human or better intelligence may be sacrificed during ritual magic. Each sacrifice made adds 10 minutes to the ritual and provides 10 plus the being's level or hit dice in HP to power the ritual. This amount is tripled if the being is truly a willing sacrifice. Some special rituals may require the sacrifice of intelligent beings. The sacrifice of intelligent beings is normally against the law in civilized societies.

Hit Points and Healing

Hit Points: Hit Points are an abstract measure of the amount of damage a character can suffer before falling unconscious and taking severe injuries. If Hit Points reach 0, the character is unconscious and begins to take severe physical injury. Further damage, including any remaining points of damage the attack that reduced hit points to zero, directly reduces Body Points. Hit Points represent stamina, luck, minor cuts and scrapes, etc. Optional: To avoid confusion, "Hit Points" may be renamed "Fatigue Points."

Body Points (BP): All characters have 10 Body Points. If Body Points reach 0, the character is dead. Each point of body damage an Adventurer has suffered gives a -1 to all attack, success, saving, and similar rolls (also to strike speed).

Recovering Hit Points: All characters recover all hit points after six hours of total rest. If a character has lost Body Points due to wounds, only 50% of total hit points lost are recovered per six hours of rest.

Healing Body Point Damage: Body points lost recover at a rate equal to the character's STR Bonus (minimum of 1 point regained) per full day of rest. If a character with up to 50% Body Point damage (up to 5 points of BP damage if the standard 10 BP is used) performs more than very light activity or careful travel during a day, he has a 50% chance of losing an additional body point. If a character with more 50% of Body Point damaged (6 or more points of BP damage if the standard 10 BP is used) does anything other than rest quietly in bed during a day, he has a 50% chance of losing an additional body point.

Bleeding (optional): A character who has been reduced to 0 hit points by weapon or other trauma-related damage will eventually bleed out and die if their wounds are not bound. A bleeding character must make a STR Save every minute or suffer one body point of additional damage. Binding wounds takes 1 minute per point of body damage taken, but no further bleeding rolls are needed (including while the wounds are being bound). Any healing spell cast on a bleeding character will effectively stop the bleeding.

Healing Magic (Optional): Healing magic is not instantaneous, 1 body point will be cured per 10 minutes of rest after the spell is cast (up to the maximum the spell will cure), if the rest is interrupted any remaining points of healing are lost.

Second Wind (Optional): Once per day, characters may regain 20% of their total hit points (round up) by resting in a safe place for an hour while eating a meal. This amount is reduced by 2 hp per point of body damage (to a minimum of 0 hp recovered).

Monster Body Points (Optional): If the GM does not mind the added complexity, monsters may have Body Points as well. A monster's Body Points are equal to twice the number of hit dice the monster has. This option is not recommended.

Combat

Surprise: At the beginning of an encounter, roll 1d6 for each side. On a roll of 1-2 a side is surprised and may not act at all in the first round. If attacking from an undetected ambush, the ambush victims are surprised on a roll of 1-4. A side cannot be surprised if it is aware of the other.

Initiative: Each side rolls a d6 (reroll ties). High roll wins

initiative. The combat order is: 1) Side that lost initiative declares actions. 2) Side that won initiative declares actions. 3) Side that won initiative acts. 4) Side that lost initiative acts. 5) Any bookkeeping is done. This ends a combat round. If the combat continues, roll initiative again and repeat.

Fighting Classes: The Fighting Classes are Fighter, Scout, and Paladin.

Combat Stance: Any character able to act may select a combat stance. Any character who does not announce their combat stance when declaring their actions for the round is assumed to select the "Standard" Combat Stance. Combat Stances (and their effects) are *Full Defense* (Attack: no attack possible; AC: +2 bonus, +4 bonus with shield, +6 bonus with large shield), *Active Defense* (Attack: -2 penalty; AC: +1 bonus, +2 with shield), *Standard* (Attack: Normal; AC: Normal), *Active Attack* (Attack: +1 bonus; AC: -1 penalty), and *Full Attack* (Attack: +2 bonus; AC: -2 penalty). Spell casters casting a spell cannot select the Full Defense or Active Defense Stance.

Actions: Combat is very abstract. Each combat round lasts 10 seconds and includes a lot of jockeying for position, feints, etc. The "hit roll" determines if any damaging blows were delivered during the round. Everyone can do one thing each round; move, attack, cast a spell, etc. The GM may choose to allow some combined actions, like a charge attack, to be one thing. Drawing a weapon, speaking or similar activities are "free" and do not count as an action.

Attack Rolls: Add attack bonus to d20 roll. A natural roll of 1 always misses, otherwise if the result is higher than your opponent's Armor Class (AC), it's a hit. A natural 20 that would otherwise hit is automatically a critical hit doing maximum damage.

Melee attack bonus = STR bonus + Physical Combat Bonus
Missile attack bonus = DEX bonus + Physical Combat Bonus
Magic attack bonus = MIND bonus + Magical Combat Bonus

Armor Class (AC) = 10 + DEX bonus + Armor bonus. Basic Armor Bonuses: Light Armor (e.g. leather) +2, Medium Armor (e.g. Chainmail) +4, Heavy Armor (e.g. Plate) +6; a shield adds +1; a large shield adds +2.

Critical Hits: A natural 20 that would otherwise hit is automatically a critical hit doing maximum damage and doing a number of body points damage equal to the number of damage dice rolled (normally 1). Most monsters do not have body points, so a critical hit will do maximum damage plus a normal damage roll to them and cause them to lose their next attack.

Critical Hit Special Effects (optional): When a Fighting Class character (or a monster, at the GM's option) has selected the Active Attack or Full Attack combat stance for a round and scores a critical hit in melee combat during that round, one of the following special effects may be imposed at the attacker's option:

- *Trip:* Target is knocked prone.
- *Disarm:* Target's weapon or shield is knocked away in a random direction a number of feet equal to half the damage you dealt.
- *Reposition:* Force your target to move to a new location of your choice, up to a number of feet equal to half the damage you dealt (plus attacker's STR bonus). Attacker may move with target if attacker desires.
- *Shield Slam:* If wielding a shield, bludgeon your target with it, dealing damage as a shield bash. Target is then forced back from you a number of feet equal to half the damage dealt by the original attack (plus the attacker's STR bonus).
- *Disorient:* Blow leaves your opponent off-guard. Until the end of his next turn, target is confused.
- *Hinder:* Target is briefly slowed, reducing his speed to five feet until the end of his next turn.

If the movement effect of Reposition or Shield Slam would force

the target over a cliff, into a pool of dangerous liquid, or the like, the target gets a DEX save to stop safely at the edge.

Critical Miss Special Effects (optional): When a Fighting Class character (or a monster, at the GM's option) has selected the Active Defense or Full Defense combat stance for a round and an enemy attacking him during that round rolls a natural 1 on their attack roll, one of the following special effects may be imposed at the defender's option:

- **Counterattack:** You make a melee attack against your attacker. This is in addition to any other attacks you might make during the round.
- **Disengage:** You dart away from your attacker, moving up to your movement, but you cannot engage another by doing so.
- **Blind:** You spit, throw sand, or otherwise attack your enemy's eyes. Until the end of the next round, he is blinded.
- **Redirect Attack:** Your opponent's attack automatically strikes another creature of your choice within reach of your enemy's weapon.
- **Feint:** You quickly feign an attack against your foe. Until the end of his next turn, your enemy has a negative modifier equal to your level to all actions.
- **Steal:** You pluck a small unprotected item--usually no more cumbersome than a weighty coin purse--from your foe.

Light Weapons: Fighting classes can use DEX bonus + Physical Combat Bonus as Melee attack bonus instead of wielding a light weapon. Fighting classes can wield 2 light weapons and attack with both in a round (making one attack roll at -2). Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

Range Penalties: If the target is relatively close, there is no penalty to hit for range. If it's mid-range for the weapon you're using, take a -2. If it's farther out than that, the GM will assign a -4 to -10 penalty to hit, depending on his judgment of how far away the target is.

Cover: Characters behind an object gain +2 to +10 to their AC against ranged attacks, depending on the extent of the cover (light cover = +2 to nearly complete = +10). In some situations, the GM may allow half this AC bonus to apply to saves.

Damage: Light weapons do 1d4 damage. Medium weapons do 1d6 damage. Heavy weapons do 1d8 damage. Add STR bonus and any class damage bonus to Melee damage (x2 for two-handed weapons). **Option:** Weapons do the damage listed for the specific weapon on the equipment table.

Shield Special: A character with a shield may choose to have it completely absorb all the damage from any attack (including a critical hit). A non-magical shield shatters when it does so. A magical shield permanently loses one point of its magical AC bonus when it does so, becoming a non-magical shield if its magical AC bonus is reduced to zero.

Special Combat Situations:

Opportunity Attacks: Anyone not surprised and with a ready weapon who is not already involved in a melee combat gets a free attack on opponents trying to move past them – this attack is in addition to their normal attack for the round. If the attack is successful, the opponents take damage and can move no further that round.

Ranged Attack into Melee: Shooting or throwing into a crowded melee is not a good idea: there is a 50% chance you'll hit a friend instead of an opponent. Fighting classes may take -4 to hit to avoid hitting a friend.

Dodge: A character who is not making an Active or Full Attack may forgo his next attack at any time and dodge out of the way. Roll 1d20 + DEX bonus + Physical Combat Bonus (PCB). The total is the character's effective AC until his next attack. If it's

lower than his real AC, well, the character zipped when he should've zagged. The GM may modify the roll by +2 or -2 (or more) to reflect the terrain and cover of the area.

Aid Another: A character who can make a melee attack on an opponent engaging an ally in melee combat can help that character attack or defend by distracting or interfering with an opponent. Make an attack roll against AC 10. If successful, the ally gains either a +2 (Fighter Bonus +1 for fighting classes) bonus on his next attack roll against that opponent or a +2 (Fighter Bonus +1 for fighting classes) bonus to AC against that opponent's next attack (aiding character's choice), as long as that attack comes before the beginning of the aiding character's next turn. Multiple characters can aid the same ally.

Grapple: A character can make a grapple attack on an adjacent target. A successful attack roll means they are then grappled with their target. When grappled, both the attacker and the defender's AC becomes 10 and neither can make move actions. When grappled, the defender can't make normal actions and must make opposed rolls (1d20 + PCB) against the attacker to attempt to break free. As long as the defender is grappled the attacker can make automatic unarmed attacks on the defender.

Knockout Blow: A character can attempt an armed melee attack against an adjacent creature to stun them. On a successful hit the target is stunned one minute for every point the attacker rolled higher than their defense. Rogues add their level in minutes to this time.

Combat Tricks/Stunts: Declare what the trick/stunt attack is going to do. It could be anything from knocking a weapon from your opponent's hand to blowing his hat off or extinguishing a lantern. Other possibilities could be stapling the target to the wall through his clothing with a thrown weapon, tying him up with a bola, tripping him and so on.

The attack roll is made as normal, if the attack roll is a hit, the player rolls 1d6. If he rolls his Fighter Bonus or less on the D6, the combat trick works. If the combat trick roll fails, the character still hits for normal damage.

Characters with a Fighter Bonus of zero, however, will only succeed with a combat trick if they roll at least a 20 on their attack roll (and the roll would hit the target). If they fail to at least roll a 20 and hit the target, both the combat trick and the attack fail.

Morale: While a few monsters, such as mindless creatures, are fearless and will fight to the death, most monsters have a strong desire to survive and will not continue to fight when the battle is going against them. They will instead seek to retreat, to flee, or even to surrender. The GM decides when monsters abandon the battle and retreat, based on the situation and the monster's intelligence. Monsters are assigned a Morale Rating (from 2 to 12, with 2 being a complete coward and 12 being totally fearless) to help the GM make these decisions. If the GM wishes, he may simply roll 2d6 and have the monsters break off combat if the number rolled is greater than the monster's Morale Rating.

Energy Drain: Certain undead and demonic monsters can drain energy levels from characters. Each energy level drained reduces the character's level by one, the character may regain the level normally via experience.

Hirelings

Players may find it useful to have their characters hire bearers to carry light sources into ruins and dungeons (and to carry treasure out) and men-at-arms to aid in combat. In some areas there may be a guild where such people may be found and hired, in other areas characters may have to advertise. Pay must be negotiated and what will be asked will depend on the situation the hirelings think they may get into and the reputation of the characters hiring them.

Bearers have 2 hit points and generally will only fight if cornered and there is no other choice – even then their effective level (used in attack rolls) is -2. They will carry light sources and

baggage willingly so long as they are paid, fed, treated well, and not exposed to much mortal danger. Minimum pay: 1 SP/day.

Men-at-Arms will fight but consider being used as a bearer (except of treasure they get a share of) to be beneath them. Green Men-At-Arms have 4 hit points, an effective combat level (used in attack rolls) of 0 and can use whatever armor and weapons their employers provide. Minimum pay: 5 SP/day plus 1/20 of a share of any non-magical treasure found. Veteran Men-at-Arms have 7 hit points, an effective combat level (used in attack rolls) of 1 and can use whatever armor and weapons their employers provide. Minimum pay: 1 GP/day and 1/10 a share of any non-magical treasure found. Men-at-Arms will serve willingly as long as they are fed, paid, treated well, and not asked to take unusual risks that their employers are not taking with them.

Monsters

See the Microlite74 Monster List or use the monster descriptions in any Oe game (substituting d6 for hit dice and damage if needed). To create new monsters quickly: Pick a name, assign a level, hit dice = level, hit points = 1d6 per level, magic save = 10 + level, all attack bonuses = level, damage = 1d6 for ordinary claws, bites, and weapons, 2d6 for large maws, giant clubs, 3d6 for dragon bites and the like, AC = armor equivalent; pick special abilities as the level increases. Special attacks act like magic attacks against an appropriate defense. Intelligent monsters may have classes at the GM's option. If needed, assign stats to suit. Equip and add abilities as required.

Monster Reactions: Some monsters (like skeletons guarding a tomb) may always attack. In cases where the reaction of the monsters to the party is not obvious, the GM may opt to make a reaction roll for the monsters by rolling 2d6 and adding the MIND bonus (and any other appropriate modifiers) to the roll and consulting this table.

Adjusted Reaction Roll	Result
2 or less	Very Unfavorable
3-6	Unfavorable
7	Neutral/Uncertain
8-11	Favorable
12 or more	Very Favorable

Interpretation of the results is left to the GM, however, these general principles may prove helpful. Very Unfavorable means the monsters will most likely attack unless the odds are overwhelmingly against them. They will not help the characters. Unfavorable means the monsters are hostile and might attack unless they are given a good reason not to. They will not help the characters. Neutral means the monsters are unsure of the party. They are not likely to attack immediately, but are not friendly or helpful. Favorable means the monsters are willing to listen and are open to negotiation. They might be willing to be slightly helpful. Very Favorable means the monsters like the characters and are willing to be somewhat helpful and are open to working with the party to mutual advantage.

Mooks (optional): Sometimes a GM may want to use a large number of monsters but not want to carefully track each one. Mooks are "cannon fodder" monsters that have 1 hit point per hit die, never make a saving throw, and always run away or surrender if the battle is obviously going against them. Any hit from a Fighting Class character will likely kill a mook. Mooks cannot be told at a glance from non-mook monsters. Mooks make excellent minions for powerful leaders as they are very effective against normal people even if they cannot stand long against PCs and NPCs with class levels.

Optional Rules

The following rules are optional. The GM decides if they will be used.

Demi-Human Restrictions: If you do not like the level and class restrictions, Demi-Humans can instead have a higher Experience Base than Humans. Halflings have a +3 to Experience Base, Dwarves have a +5 to Experience Base and Elves have a +7. Elves can no longer switch between Magic-User

and Fighter classes, but retain the ability to use magic armor and all magic weapons no matter which class they select.

Encumbrance: Characters can carry twelve (plus STR bonus) items in addition to armor, primary weapon, and possibly a shield; six items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item.

Energy Drain: If the standard energy drain rule seems too harsh, try the following instead. Each energy level drained subtracts one from any roll to which the character would add his level (or his level/2). 1 point of energy drained is recovered every L days where L is equal to the hit dice of the monster that drained the energy level.

EXPERIENCE POINTS & LEVEL ADVANCEMENT

Experience Points (XP): Characters get Experience Points (XP) through adventuring, defeating monsters, spending money from treasure, etc.

XP from Defeating Monsters: Each monster defeated is worth a base XP equal to the monster's hit dice squared multiplied by 5. If a monster has both hit dice and a character level the higher is used as "hit dice" in this formula. Many monsters have special abilities which make them more dangerous than their hit dice indicate. For each such special ability, add 50% (round down) of the monster's base XP. Example: A party defeats 3 Hippogriffs. Hippogriff has 3 hit dice and one special ability (flight), so each hippogriff is worth 67 XP for a total of 201 XP.

At the end of an adventure, the total XP earned from defeating monsters is divided by the number of characters in the party. Henchmen/Retainers count as 1/2 person and hirelings count as 1/10 person (round up for PCs, round down for others). Example: A party of 5 player characters, 2 retainers, and 10 men-at-arms and other hirelings earns 1200 XP from defeating monsters. Each PC earns 172 XP from defeating monsters, each retainer earns 85 XP, and each hireling earns 17 XP. (Note that XP for hirelings is earned but usually not actually tracked.)

XP from Treasure Spent: Individual characters can also earn experience points from spending money found in treasures (or taken from monsters) in totally frivolous ways (e.g. wine, women, song, donations to a temple without getting anything in return, generic "training," etc.). A character earns XP equal to the treasure so spent in gp divided by his current level. Note that XP from treasure is an abstract method of rewarding the various adventuring actions like finding traps that allow one to get treasure. Example: A 2nd level Fighter spending 1000gp on wine, women, and song earns 500 XP.

XP from Exploration: The GM may reward exploration with XP by designing special points on the map as worthy of XP for reaching them. The GM should generally not inform players in advance as to what, if any, special locations on the map are worth XP. Example: reaching the top of the tallest mountain on the map for the first time might be worth 150 or 200 XP for each character making it to the top or entering a well-hidden sub-level of a dungeon might be worth 50 XP.

XP from other Activities: The GM may award XP for excellent roleplaying, other important actions in the game (successfully completing a quest, for example), etc. In general, the total award from this category for any one session should not be

more than 100 XP times the character's current level. No XP may be awarded in this category if the character refuses to even attempt to play his virtues and vices or other character limitations.

Prime Requisite Effects (Optional): Each class has one stat listed as its Prime Requisite. If a character's highest stat is not the Prime Requisite for his class, the character suffers a 10% penalty to all XP earned.

Level Advancement: At the end of every adventure (or, at the GM's option, at the end of every session of play), total up the XP earned and added them to your character's total XP. If a character's XP total is higher than that the *Minimum Experience Points Required* for the next level on the character's class chart. The character goes up a level and gains all the benefits thereof (increased HP, PCB, MCB, improved Saving Throw, etc.). Note that a character may only go up one level per session. Any additional XP earned in that session that would put the character above 50% in his new level are lost.

Each level adds a die roll or a fixed amount after 9th level to Hit Points and the character's Physical Combat Bonus, Magical Combat Bonus, Fighter Bonus, etc. may change as indicated in the Advancement table for the character's class.

Magicians and Wizards gain access to new spell levels at levels 3, 5, 7, 9, 11 and 13.

WEAPONS & EQUIPMENT

Money

Money takes the form of coins, with the gold piece being the standard unit. 1 platinum piece (pp) = 5 gold pieces; 1 gold piece (gp) = 10 silver pieces; 1 electrum piece (ep) = 5 silver pieces; 1 silver piece (sp) = 10 copper pieces (cp). Coins from different areas may look different and in some areas only coins from that area are acceptable, other coins will have to be exchanged for proper coins at a moneychanger who will take at least a 10% exchange fee.

To put the value of a gold piece into perspective, a single gold piece is enough for a peasant to subsist at a wretched quality of life for a month. Early in their career, adventurers will typically live on a few dozen gold pieces per month, enough to eat and sleep at an inn. A dragon's treasure hoard of 50,000gp might keep a village of peasants alive for decade, but merely cover a prince's monthly budget.

Equipment Packs

Suggested starting packs for new characters:

Pack A	Pack B	Pack C
normal clothing	normal clothing	normal clothing
backpack	backpack	backpack
bedroll	bedroll	bedroll
hooded lantern	10 torches	tent
10 oil flasks	10 oil flasks	10 torches
flint & steel	flint & steel	flint & steel
shovel	chalk	hammer
2 sets of caltrops	10 ft. pole	10 iron spikes
signal whistle	mirror	grappling hook
pen & paper	crowbar	50 ft. rope
water skin	water skin	water skin
iron rations for four days	iron rations for four days	iron rations for four days

Finally, add the following, based on your Class:

Fighter: Vial of holy water, medium armor (AC +4), a one handed weapon + shield, or a two handed weapon, and 5 gold pieces.

Scout: Lock picks, light armor (AC +2), a one handed weapon + shield, or a two handed weapon, and 5 gold pieces.

Paladin: Silver holy symbol, prayer book, medium armor (AC +4), a one handed weapon + shield, and 5 gold pieces

Magician: Spell book with all spells known, light armor (AC +2), a one handed weapon, and 5 gold pieces.

Wizard: Spell book with all spells known, a dagger, and 5 gold pieces.

Standard Equipment List

Players, with the permission of the GM, may elect to roll their starting wealth in gold pieces and buy equipment piece by piece from the equipment list below. If this is done, each character starts with 120 + (3d6 x 5) gold pieces. The GM is free to modify the equipment list to suit the starting location in his campaign.

Armor	Cost	AC
Clothing Only	-	10
Hide and Fur Armor	10gp	11
Leather Armor	20gp	12
Ring Mail or Scale Armor	30gp	13
Chain Mail Armor	40gp	14
Banded Plate or Lamellar Armor	50gp	15
Plate Armor	60gp	16
Shield	10gp	+1
Leather Barding	40gp	11
Scale Barding	75gp	12
Chain Barding	150gp	13
Lamellar Barding	300gp	14
Plate Barding	600gp	15

Weapons	Cost	Damage*
Axes:		
Battle Axe	7gp	1d6/1d8
Great Axe (two-handed)	10gp	1d10
Hand Axe	4gp	1d6
Bows and Crossbows:		
Arbalest	50gp	1d8
Crossbow	30gp	1d6
Case with 20 quarrels	2gp	
Composite Bow	40gp	1d6
Longbow	7gp	1d6
Shortbow	3gp	1d6
Quiver with 20 arrows	1gp	
1 silver-tipped arrow	5gp	
Catapults and Ballista:		
Ballista (1,800lb)	80gp	3d6

ADVENTURING

Old School Conventions

Almost any material you come across for 0e, B/X, or other early editions of the world's most popular roleplaying game can be used in Gryphons & Gramarye with little modification. However, there are some descriptive conventions that these early editions used that may need explanation.

Time Conventions: Early editions talks about time in terms of rounds (combat rounds) and turns. A round was 10 seconds and a turn was 10 minutes, so there were 60 rounds in a turn.

Movement/Distance Conventions: Early editions gave distances in inches. When underground or in buildings or the like, one inch equaled 10 feet. When outdoors, however, one inch was 10 yards. Yes, this meant spell and weapon ranges were greater outdoors than indoors. Normal human movement (when carefully exploring) was 12" per move, with two moves per turn. Carrying too much weight cut this down to 9" or even 6". Running movement was double the above.

Descending Armor Class: Early editions used a descending Armor Class system where an unarmored character was AC 9 (AC 10 in some editions) and better armor used lower numbers (e.g. AC 5 was Chain, AC 2 was plate). Magic armor could even have a negative armor class. Gryphons & Gramarye uses the ascending Armor Class system used in the OGL SRD. If you have old adventures using the original descending AC system and wish to use them, it is easy to convert descending ACs to ascending ACs.

Unarmored AC is 9: If the adventure is for 0e, B/X, or other edition where the unarmored AC is 9, subtract the descending AC listed in the adventure from 19 to get the ascending AC used by Gryphons & Gramarye.

Unarmored AC is 10: If the adventure is for 1e or 2e (where the unarmored AC is 10), subtract the descending AC listed in the adventure from 20 to obtain the ascending AC used by Gryphons & Gramarye.

Dungeon Exploration

Exploring dungeons is an iconic part of old school roleplaying games. The guidelines in this section will help the GM run adventures in dungeons, castles, caverns, and other "indoor" spaces.

Light: Humans and many other races require a light source (or magical ability) to see in the dark. Torches, lanterns, etc. will produce limited areas of light (generally 20 feet of bright light and a further 10 feet of dim light), but they also make it easy for monsters to see the party coming, making surprise impossible. Torches can be blown out by strong gusts of wind (d6 roll: blown out on a 1 or 2). Lanterns use flasks of oil as fuel, and a lantern can burn continuously on 1 flask of oil for 24 turns (4 hours). Torches burn continuously for 6 turns (1 hour) before burning out. Most monsters living in a dungeon have infravision or some other means of seeing in the dark; however these methods do not work in the presence of a light source.

Seeing Monsters: Unless surprised, characters will see monsters when they are 2d6 x 10 feet apart. Surprise distance is 1d3 x 10 feet.

Wandering Monsters: The GM should roll 1d6 every 2 turns for wandering monsters (more often if the party is making a lot of noise or otherwise attracting attention). On a roll of 1, wandering monsters stumble across the party from a random direction and distance.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow their

orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue if there is less than 120 feet between the two groups. Monsters will only pursue around a corner or through a door on roll of 1 or 2 on a d6 (1 if a secret door is used). Fire will deter many monsters. Food will distract many monsters: unintelligent monsters 90% of the time, semi-intelligent monsters 50% of the time, intelligent monsters 10% of the time. Treasure may also distract monsters: unintelligent monsters 10% of the time, semi-intelligent monsters 50% of the time, and intelligent monsters 90% of the time. All chances may be adjusted by the GM depending on circumstances. These same rules determine how monsters will pursue if the characters disengage and retreat (or rout) from a battle.

Rest: One turn in six must be sent in rest or all characters suffer a -1 to all d20 rolls and to damage rolls per rest missed. Time spent searching is not time spent resting.

Doors: Dungeons often have many doors, some secret and others obvious. Many are locked, and a thief will need to attempt to pick locks. However, characters can attempt to break a door down. In this case, the player rolls 1d6. A result of 2 or less means the door has been broken down. Strength adjustments apply, but no matter what the adjustment there must always be a chance of success or failure. Bonuses cannot take the success range above 5 or below 1 on 1d6.

Players will sometimes want their character to listen at a door to hear any noises beyond. Again, the GM rolls 1d6. A roll of 1 results in success, and a roll of 1 or 2 succeeds for demi-humans due to their keen hearing. A thief has specially trained for this task, and succeeds on a roll of 1-2 (Level 1-4), 1-3 (Level 5-8), 1-4 (Level 9-12), and 1-5 (Level 13+). This attempt may only be made one time at any door by a character. Note that some creatures, such as undead, do not make noise.

Traps and Trap Detection: A trap will usually spring on a d6 roll of 1 or 2 when a character passes over or by them or otherwise triggers them.

Characters of all classes can search for non-magical traps. All characters except dwarves and thieves can succeed in spotting a trap on a roll of 1 on 1d6. Dwarves succeed on a roll of 1 or 2 on 1d6. Thieves are specially trained for this task, and succeed on a roll of 1-2 (Level 1-4), 1-3 (Level 5-8), 1-4 (Level 9-12), and 1-5 (Level 13+). Players must declare that their characters are actively looking for traps, and they must be looking in the right place. This roll may only be made once in a particular location, and it takes 1 turn per effort made. Since the GM rolls the dice, the player never know if the roll failed or if there simply is no trap in the area searched.

Secret/Hidden Doors: Secret (and hidden) doors can only be spotted if characters are specifically looking for them. The GM rolls 1d6 when a player declares that his character is looking for secret doors. A result of 1 on 1d6 is a success, except that elves have better vision and succeed on a roll of 1 or 2 on 1d6. Thieves are specially trained for this task, and succeed on a roll of 1-2 (Level 1-6), 1-3 (Level 7-10), and 1-4 (Level 11+). A character can only attempt to look for secret doors once in any given area, and it takes 1 turn. A second attempt cannot be made in the same area. On a roll of 1 on 1d6 an Elf will notice a secret door even if he is not actively searching for secret doors. Since the GM rolls the dice, the player never know if the roll failed or if there simply is no door in the area searched.

Wilderness Exploration

Exploring the wilderness is an iconic part of old school roleplaying games. The guidelines in this section will help the GM run adventures in the great outdoors, whether exploring new lands or simply go from one place to another along well-travelled routes.

Time and Wilderness Movement: The wilderness is not cramped like in a dungeon, and characters can usually see

further ahead and not be as wary of obstacles. For this reason, movement is measured in yards rather than feet in the wilderness.

A character that could move 120' per turn in a dungeon can move 120 yards (360') per turn in the wilderness. Further, characters can move, per day, their movement rate divided by 5 in miles per day. So a character that moves at 120 (feet or yards, depending on environment) can move 24 miles in the wilderness per day. It's likely that not all characters will have the same movement, so if they wish to stay together they must move as fast as the slowest character. Also note that the number of miles characters can move in 1 day presented here assumes a clear trail and easy travel. Other conditions will reduce the distance traveled in a day by fractions, as detailed below.

Terrain	Movement Modifier
Desert, hills, wooded areas	-1/3
Thick jungle, swamps, mountains	-1/2
Road travel, clear wide trails	+1/2

For example, if characters can travel 24 miles normally, but are following roads, they can travel 36 miles a day (24 + 12). If they are traveling through swampy land, they travel 12 miles (24 – 12) per day. Furthermore, certain kinds of terrain can slow travel at the GM's discretion, such as if the characters have to cross canyons, large rivers, or other formations. In addition to these conditions that can influence travel rates, characters may engage in a forced march. A forced march is a day of hard, tiring travel, but increases travel speed by +1/2. However, the characters must rest for 24 hours after a forced march. Otherwise, during wilderness travel the characters have to rest one day per six days of travel. Weather can also affect travel rates or even prevent safe travel altogether.

Missile weapon and spell ranges are measured in yards in the wilderness also, but note that areas of effect remain the same for spells and other effects.

Unless there is an encounter, the GM will direct players through time in increments of days while traveling in the wilderness. When an encounter occurs, time is measured in rounds. Unlike in labyrinths, wilderness adventures do not often measure time in turns.

Seeing Monsters: Unless surprised, characters will see monsters when they are 4d6 x 10 yards apart. Surprise distance is 1d3 x 10 yards.

Wandering Monsters: The GM should roll 1d6 every day of travel for wandering monsters. If the party is camping, an additional roll should be made at night. If a wandering monster is indicated (roll varies by terrain, see terrain table below), wandering monsters stumble across the party from a random direction and distance. At night, the GM should randomly determine which watch is on duty when the attack is made.

Avoiding Monsters: Unintelligent monsters normally automatically attack. Intelligent monsters may follow orders, make a reaction check, automatically attack, etc. depending on circumstances. Unless surprised a party may try to flee to avoid a battle. Monsters will generally pursue so long as the party can be detected, there is a 50% chance monsters faster than the party will catch it (30% chance for monsters about as fast as the party) in each hex traveled through. Woods or swamp reduce the chance of being caught by 25%. Monsters will pursue into another hex on the map 50% of the time. The chase continues until combat occurs or the monsters break off. The party must rest for one-half day for each hex travelled during a pursuit. All chances may be adjusted by the GM depending on circumstances. These same rules determine how monsters will pursue if the characters disengage and retreat (or rout) from a battle.

Becoming Lost: A group travelling off a well-marked trail or road without an accurate map or a knowledgeable guide may become lost. The chance of becoming lost is rolled on a d6 and

depends on the type of terrain the party is in (see table below). If lost, the party actually moves in a random direction but believes they have moved in the direction intended.

Terrain Type	Chance Lost	Chance of Encounter
Plains	1	1
Woods	1-2	1-2
Forest	1-3	1-2
River	1	1-2
Swamp	1-3	1-3
Hills	1	1-2
Mountains	1-2	1-3
Desert	1-3	1-2

Strongholds: Characters may encounter a stronghold during their wilderness travels. If the GM decides the characters pass near a castle or other kind of stronghold, he can roll on the following table to randomly determine how any patrol that spots them might react. These rolls may be modified one way or another if the characters are acting suspicious, or if they are approaching peacefully and potentially with offerings.

Ruler			Reaction (1D6)		
Class	Level	Patrol Type	Ignore	Chase	Friendly
Cleric	6+1d8	Lt mounted, 2d6	1-2	3-4	5-6
Dwarf	8+1d4	Hvy infantry, 2d6	1-4	5	6
Elf	9 or 10	Lt mounted, 2d6	1-4	5	6
Fighter	8+1d6	Hvy mounted, 2d6	1-2	3-5	6
Halfling	6+1d2	Lt infantry, 2d6	1-3	3	4-6
MU	10+1d4	Hvy infantry, 2d6	1-4	5	6

Rations and Foraging: When adventuring in a dungeon, there may be very little available to eat. Characters must take rations with them to cover the extent of time they expect to be away from town. However, they may occasionally kill an edible monster.

When in the wilderness, characters can hunt or scavenge for food. Scavenging for food is an activity that can be accomplished without hindering travel by gathering fruit, nuts, or small animals. For each day of travel while scavenging, roll 1d6. A result of 1 indicates that sufficient food for 1d6 human sized beings has been acquired. Hunting follows the same roll, but succeeds on 1-2, and must be engaged as the sole activity for a day. No traveling is possible. In addition, there will be one Wandering Monster check, from the table appropriate for the terrain, while the group is hunting.

Characters that go without food and/or water will soon begin to suffer from the effects of starvation and/or dehydration:

Starvation: Characters generally need 2 pounds of food per day. After 2 days without food, a character takes 1d6 damage per additional day without food and no longer heals lost HP.

Dehydration: Characters generally need 1 gallon of water per day. Each day after the first without water, a character loses 25% of his full HP in damage (and can no longer heal).

Other Hazards

Falling: 1d6 damage per 10 feet fallen, save for half damage.

Spikes: add +1 point to falling damage per 10' fallen, max +10
Extreme Heat & Cold: If not wearing suitable protection, save once every 10 minutes (-1 per previous check), taking 1d6 damage on each failed save.

Ocean Exploration

On occasion, characters will need to travel by sea, whether to find a lost island full of riches, or simply to get from one coast to another. The rules in this section also cover travel on rivers. Characters might have to travel by river deep into impenetrable forest or jungle to reach a set of ruins.

Water Vessels: The characters might employ any number of watercraft. Some vessels are small, and they can steer them on their own, while others require a great number of people to operate. The Watercraft Table details different kinds of water vessels, as well as their speeds when rowed or sailed, their structural hit points and armor class, and maximum cargo load.

Hit points operate in the same manner as hit points do for monsters and characters. If a vessel is damaged to 0 or fewer hit points, it will no longer move and ship weapons no longer function. The ship has 1d10 rounds before it will sink.

Ship Weaponry: Galleys are capable of having a ram, but only a war galley automatically has one. Galleys that are not equipped with a ram can be purchased with a ram at +30% of the normal cost for the ship. All galleys and longships may be equipped with a catapult. Catapults must be equipped with shot, which weighs 200 pounds per 20 shot.

Water Conditions: When traveling on rivers, the listed distances various vessels can travel in a day can be modified if the current is particularly fast or if vessel is moving up stream. Adjust the average miles traveled each day up or down by 1d8 +4 miles, as appropriate. The Gamemaster might invoke other penalties, depending on what hardships a vessel encounters on a river. Shallow water, waterfalls, twisting waters, rapids, or sand bars might impact travel times.

When traveling at sea far from shore, smaller boats, including all galleys, are not appropriate and cannot handle the potential difficulties the open sea can offer. These vessels are restricted to water voyages in rivers, lakes, and near the shore at sea. There are many possible conditions at sea that might impact the average travel times listed for each vessel. The Gamemaster will check water conditions at the start of each day by rolling 2d6. A result of 12 indicates strong winds and storms, and a 2 means that the day is completely devoid of wind and a ship that is incapable of rowing cannot move all day. Any vessel with sails can attempt to move with the wind to avoid damage from strong winds. However, this may not carry the ship in the direction of preferred travel. The direction will be chosen by the Gamemaster. The vessel travels at the average speed x3. If the ship encounters land during this travel, it has a 25% chance of finding a safe place to hide along the shore. Otherwise, the ship is destroyed on the shore, by landing too fiercely or otherwise hitting shallow waters and rocks. In these windy, stormy conditions a galley has an 80% chance of being overrun with water and sinking. If it is near shore when the storm hits, a galley can find a safe harbor 100% of the time if the shore relatively clear of physical dangers. Otherwise, a galley will find a safe harbor on a roll of 1 or 2 on 1d6. Note that if the roll indicates no wind for the day, ships that can move by rowing can move their normal rowing speed for the day. Sailing ships are unable to move significantly under these conditions.

The system outlined above is a simple system for deciding conditions at sea. If the Gamemaster desires a more detailed set of guidelines, he should roll 2d6 at the start of each game day and consult the Wind Conditions table.

Wind Conditions Table

Roll Result	Movement Adj.	Wind Conditions
2-4	None	Normal
5	No sailing, -2/3 rowing	No wind
6	-2/3 all movement	Slightly unfavorable

Watercraft Table

	Required Crew	Sailing Feet per Round	Rowing Feet per Round	Sailing Miles per Day	Rowing Miles per Day	Cargo (lbs.)	Armor Class	Structural Hit Points
Boat, river	10	-	60	-	36	3,000	8	20 to 45
Boat, sailing	1	120	-	72	-	2,000	8	20 to 45
Canoe	1	-	60	-	18	600	9	5 to 10
Galley, large	250	120	90	72	18	4,000	7	95 to 120
Galley, small	100	150	90	90	18	2,000	8	75 to 100
Galley, war	400	120	60	72	12	6,000	7	125 to 150
Lifeboat	1	-	30	-	18	1,500	9	12 to 18
Longship	75	150	90	90	18	4,000	8	65 to 80
Raft	1	-	30	-	12	5 per sq. foot	9	5 per sq. foot
Sailing Ship, large	70	120	-	72	-	30,000	7	125 to 180
Sailing Ship, small	12	150	-	90	-	10,000	8	65 to 90
Sailing Ship, transport	12	120	-	72	-	30,000	7	125 to 180

7	-1/2 all movement	Unfavorable
8	-1/3 all movement	Greatly unfavorable
9	+1/3 all movement	Light favorable
10	+1/2 all movement	Medium favorable
11	All movement x2*	Extremely favorable
12	All movement x3**	Fierce wind

***All ships have a 10% probability of taking on water (20% for galleys), which will incur a penalty of -1/3 to movement. The ship will need to seek maintenance at a dock to remove the water.**

****The ship will travel in a random direction determined at the Gamemaster's discretion, as discussed previously.**

Encounters at Sea: Monsters can surprise a ship, but because monsters native to the water cannot generally be seen, or "sneaked up on," a ship may never surprise a monster. When the Gamemaster rolls for a random encounter, the distance the monster is from the group is the same as in other wilderness encounters (4d6 x10 yards).

Assuming weather conditions are normal, other ships can be seen when up to 300 yards away and land can be seen from up to 24 miles. These visibility distances could be reduced by 90% their normal distance when in harsh weather or dense fog, or some other penalty might be used depending on conditions.

Waterborne Chases: When two waterborne vessels, or a ship and a monster, encounter one another, one party may choose to flee. The distance between each of the groups is determined as a normal encounter. Success depends entirely on luck and the difference between the two groups speeds.

If the fleeing party is faster than the pursuer, the base chance of escape is 80%. The base is 50% if both parties have the same movement, and decreases by 10% for every 30' movement the escapee is slower than the pursuer (minimum of 10%). If the fleeing party is successful, the pursuing group cannot try to catch up with the fleeing party for 24 hours, and then only if a random encounter roll indicates an encounter. If a party fails their roll to flee, the pursuer will gain on the fleeing party at a rate of 10 yards per round if the pursuer is slower than the other party or if the pursuer's speed is no greater than 30' more than the fleeing party. If the pursuer's speed is more than 30' faster than the fleeing party, the pursuer will gain on the fleeing party at a rate equal to the pursuer's speed per round.

Waterborne Combat: Time and movement functions in the same way in water combat as it does in other encounters. However, one of the major differences to note is that attacks and damage may be directed at water vessels in addition to characters and monsters. Structural hit points (shp) belonging to vessels are slightly different than hit points (hp) belonging to characters and monsters. They translate at a rate of 1 to 5, or 1 shp = 5 hp. This is important to note, because some monster or spell descriptions list shp damage when directed at vessels.

Vessels and Damage: It takes 5 crewmembers 1 turn to repair 1 shp. This task requires full attention, so any crew involved in repair cannot take any other action during a turn repairing a vessel. Only half of all damage sustained to a ship can be repaired at sea by the crew, the remaining damage can only be repaired by facilities at dock.

Damage to a vessel also impacts vessel movement, due to taking on water and structural damage influencing how the ship passes through water. In 10% increments of damage to shp maximum, the ship's movement will be reduced by an equal percentage. For example, if a ship loses 20% of its shp, its movement will also be reduced by 20%. Movement is also affected in a similar manner when the number of rowers is reduced, such as when rowers are used to repair damage. For example, if 10% of the number of rowers are being used to

repair vessel damage, the ship can move at -10% of its normal speed.

Ship-to-Ship Combat: Combat between ships is usually fought by either catapults or rams, both of which are detailed below. Some ships may be equipped with these weapons, as indicated previously.

Catapult

Rate of fire: variable; 1/5 rounds with 4 crew; 1/8 rounds with 3 crew; 1/10 rounds with 2 crew

Range: 150-300 yards

Attacks as: Fighter level equal to crew number firing

Area effect: 10' square

Damage: 3d6 shp or 1d6 shp fire per turn

Catapults can be operated by a variable number of crew, and this will affect rate of fire and attack ability as indicated above. The standard 3d6 damage reflects firing a solid missile. Burning damage from combustible loads and pitch do the indicated fire damage. It takes a minimum of 5 crewmembers 3 turns to extinguish flames caused by a fire attack. For every five additional crewmembers, this time can be reduced by 1 turn to a minimum of 1 turn. A catapult cannot be used to attack a ship that is closer than the minimum range indicated.

Ram

Range: Touch

Attacks as: Monster of under 1 HD

Damage: (1d4 +4) x10 shp or 3d8 hp; (1d6+5) x10 shp or 6d6 hp

The different damages listed for a ram apply as follows. The first shp value listed applies to rams on small vessels when attacking another vessel. The first hp value listed applies to attacking large aquatic monsters. Similarly, the second damage values apply to rams on larger ships to other ships or large aquatic monsters, respectively.

Boarding Vessels: When the occupants of both side-by-side vessels wish to board one another, their mutual intent makes the action succeed with no chance of failure. If only one side wishes to board the other, then the side that wishes to board has a 35% chance (1-35 on d00) of being able to successfully maneuver the two ships to a boarding position and clamp them together with grappling hooks. Once crewmembers come into contact with one another, combat ensues following the standard combat rules. When characters are in the act of boarding another ship, they suffer a penalty of -2 to attack rolls and armor class.

Donate to the RetroRoleplaying Cancer Fund and Get Some PDF Goodies

Many gamers know that Randall Stuke, the author of Microlite74, Microlite78, Microlite81 and other M20-based old school games is trying to raise funds to pay the bills from [his wife's oral cancer](#) treatments and that he worked on the original Microlite74 as way to cope during her recovery from 6 weeks of radiation treatment in 2008. Randall and Donna are some of the 40 to 50 million people in the US who do not have health insurance nor did they qualify for government aid as they live in Texas and have no children. Donna (successful so far) cancer treatments have cost over \$110,000. While some of this has been absorbed by hospital foundations and the like, they still owe a lot of it. You can donate to the RetroRoleplaying Cancer Fund (via PayPal) and help them pay their bills.

Can You Help Pay the Cancer Bills?

Everyone who donates any amount at all get a password giving them access to a number of special downloads. *Some* of the currently available downloads include:

- Pdf copies of the two issues of The Grimoire Randall published in the late 1970s (which Randall blogged about here: The Grimoire #1 (<http://blog.retroroleplaying.com/2009/05/grimoire-1-spring-1978-d-fanzine.html>) and The Grimoire #2 (<http://blog.retroroleplaying.com/2009/05/grimoire-2-summer-1979-d-fanzine.html>)
- Pdf copy of The Second Grimoire of Pharesm the Bright-Eyed, a set of house rules for a BECM1 campaign Randall ran at a game shop in the mid-1980s.
- A copy of the Player's Introduction to the Fourth Campaign Arn (from about 1984)
- Microlite74 Extended 3.0 Special Edition – three PDFs designed to be printed in booklet format from Adobe Acrobat. Artwork is by Håkan Ackegård. This Special Edition incorporates Companion II: Treasure. The text has been reformatted into a single column in a large enough font to easily read.

To get access to these downloads and access to a private donor forum where you can get advance information on upcoming Microlite74 releases, help Randall pay the cancer bills by sending a donation in any amount -- small or large -- to the RetroRoleplaying Cancer Fund via Paypal at this link:

GRYPHONS & GRAMARYE SPELL LISTS

Wizardry Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Charm Person: Puts one living humanoid totally under your influence. R: 120 feet. D: until dispelled.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Hold Portal: Holds door/gate shut. R: 10 feet. D: 2d6 x 10 minutes.

Light: object lights circle with 30 ft. radius, not full daylight. R: 120 feet. D: 1 hour+10 min/level.

Magic Missile: Creates magic arrow which hits its target for 1d6 damage. An additional 2 missiles are created every 5 levels (e.g. total 3 at level 5, total 5 at level 10). R: 150 feet. D: instant.

Protection from Evil: +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters. R: shell around caster. D: 1 hour.

Read Languages: Read any written language. D: 1 or 2 readings.

Read Magic: Read scrolls, spellbooks, other magical writing. R: Caster Only. D: one reading (two scrolls or equivalent).

Shield: Improves caster's armor class to 17 versus missile attack and to 15 versus melee attacks. R: caster. D: 20 minutes.

Sleep: Puts 4d6 HD of beings into magical slumber. Creatures with more than 4 hit dice are not affected. Range: 240 feet. D: GM's discretion.

Ventriloquism: allows caster to "throw his voice" absolutely convincingly. R: 60 feet. D: 20 minutes.

2nd Level

Continual Light: object lights circle with 120 ft. radius until dispelled, not full daylight. R: 120 feet.

Darkness, 15' Radius: Magical darkness which even blocks infravision and darkvision. R: 120 feet. D: 1 hour.

Detect Evil: Reveals evil thoughts/intent or evil items. R: 60 feet. D: 20 minutes.

Detect Invisible: Detect invisible items and beings within 10 feet per caster level. D: 1 hour.

ESP: Allows Caster to read surface thoughts of target. R: 60 feet. D: 2 hours.

Invisibility: Subject is invisible until spell broken by caster, some outside force, or until it attacks. R: 240 feet.

Knock: Unlocks/Unbars all locked or magically sealed doors or other door-like barriers. R: 60 feet. D: instant.

Levitate: Caster floats up and down as he desires. Speed: 6 feet/minute. R: 20 feet up/down per level. D: 10 minute/level.

Locate Object: Senses direction toward an object (specific or type) D: level minutes. R: 60 + 10/level feet.

Magic Mouth: Mouth appears on target object and delivers up to 30 word message when conditions set by caster are met. R: touch. D: permanent until triggered or dispelled.

Mirror Image: Creates 1d6-1 exact images of the caster, all moving exactly like original. Attackers cannot tell images from original. Images hit disappear. R: around caster. D: 1 hour.

Phantasmal Forces: Vivid illusions of nearly anything the caster envisions, lasts as long as the caster concentrates. Damage caused is real if target believes illusion. R: 240 feet.

Pyrotechnics: Caster creates either fireworks or blinding smoke from a normal fire. R: 240 feet. D: 1 hour.

Strength: Adds 1d6+1 to a single Fighter's Strength or 1d6-1 to a single Magician's. Maximum Strength is 18. R: touch D: 8

hours.

Web: Sticky webs fill a 10x10x20 foot area. Burning through the webs takes 6+1d4 minutes. Large creatures push through in 14+1d6 minutes. Human-sized creatures take 20+3d6 minutes. R: 30 feet. D: 8 hours.

Wizard Lock: Locks door like Hold Portal. Permanent until dispelled. Knock opens without dispelling. Caster can pass through without lifting spell. R: 10 feet.

3rd Level

Clairaudience: Hear at a distance for 2 hours. R: 60 feet.

Clairvoyance: See at a distance for 2 hours. R: 60 feet.

Dispel Magic: Cancels magic effects and spells. (Magic Attack vs. Spell's DC for success) Duration: instant but effects permanent for spells or 10 minutes/level for items. Range: 120 feet.

Fire Ball: 1d6/level fire damage, 20 foot burst. R: 240 feet. D: instant.

Fly: Subject can fly at a speed of 120 feet per minute. R: Touch. D: 1d6 x 10 minutes plus 10 minutes/level. (GM rolls secretly.)

Haste Spell: Subjects (up 24 beings in a 60 foot radius of target) double in speed, taking two actions at a time. (Counters Slow) R: 240 feet. D: 30 minutes.

Hold Person: Paralyzes 1-4 targets. Cast at single target, save at -2 and double duration. R: 120 feet. D: 1 hour plus 10 minutes/level.

Infravision: See in the dark. R: touch. D: 1 day. Sight Range: 30 + (1d3 x 10) feet.

Invisibility, 10' radius: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until one attacks.

Lightning Bolt: 1d6/level electrical damage. R: 240 feet, bolt is 10 feet wide, 60 feet long. D: instant.

Monster Summoning I: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell duration is up. Sample monsters (1d6): 1-1d6 giant rats, 2-1d3 goblins, 3-1d3 hobgoblins, 4-1d6 kobolds, 5-1d3 orcs, 6-1d3 skeletons. D: 6 minutes.

Protection from Evil, 10' radius: +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters to all within 10 foot circle around subject. D: 2 hours.

Protection from Normal Missiles: Non-magical thrown and missile weapons automatically miss. R: 30 feet. D: 2 hours.

Rope Trick: Caster tosses rope into the air. It hangs there. Caster and up three others can climb rope into a hidden pocket dimension at top. Rope can be pulled up or left out. R: rope toss. D: 60 minutes + 10 minutes/level.

Slow Spell: Subjects (up 24 beings in a 60 foot radius of target) slowed by 50%. (Counters Haste) R: 240 feet. D: 30 minutes.

Suggestion: Caster makes 1-2 sentence hypnotic suggestion to target. If save failed, target will carry out suggestion for up to duration. Only 1% chance target will obey suggestion that obviously would result in target's death/extreme injury. R: 30 feet. D: 1 week.

Water Breathing: Subject can breathe water. R: 30 feet. D: 2 hours.

4th Level

Charm Monster: Makes one monster of 3+ hit dice (or 3d6 monsters of less than 3 hit dice) believe they are the caster's strong ally. Save again every level days or when asked to do something obviously against the being's interest. R: 60 feet.

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Dimension Door: Teleports subject a short distance (up to 360 feet). D: instant. R: 10 feet.

Fear: 240 ft. long cone of fear (120 ft. width at far end) extends from caster. Creatures within must save or flee in fear/horror for 1 hour. R: as above. D: 1 hour of fear.

Hallucinatory Terrain: Makes one type of terrain appear like another type until dispelled or area entered by an opponent. R: 240 feet.

Ice Storm: 30 foot cubic vortex of ice, snow, and hail appears doing 5d6 damage to all within. R: 120 feet. D: 1 minute.

Massmorph: Makes up to 100 humanoids appear to be trees until dispelled or negated by caster. Creatures may move and still appear to be trees. R: 240 feet.

Monster Summoning II: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain

or the spell duration is up. Sample monsters (1d6): 1-1d2 hobgoblins, 2-1d2 zombies, 3-1d2 gnolls, 4-1d2 bugbears, 5-1d6 orcs, 6-1d6 skeletons. D: 6 minutes.

Plant Growth: Plants in an area up to 30x30 yards become overgrown and nearly impassable. Lasts until dispelled or plants killed. R: 120 feet.

Polymorph Others: Change another into another being. Change is complete and includes gaining special abilities and mind of creature. R: 60 feet. D: until dispelled.

Polymorph Self: Change self to form of another being, does not get special powers but retains own intelligence. R: caster only. D: 60 + 60/level minutes.

Remove Curse: Frees subject from a curse. R: touch. D: instant but effects permanent.

Wall of Fire: Deals 2d4 fire damage out to 10 ft. and 1d4 out to 20 ft. Passing through wall deals 2d6 damage +1/level. Wall lasts as long as caster concentrates on it. R: 60 feet.

Wall of Ice: Creates wall of ice with 15 hp +1/level. Wall lasts as long as caster concentrates on it. R: 60 feet.

Wizard Eye: Allows sending an invisible eye up to 240 feet away which relays all it sees to the caster. Moves up to 12 feet each minute. D: 1 hour.

5th Level

Animal Growth: 1d6 normal animals grow to giant size. R: 120 feet. D: 2 hours.

Animate Dead: Create undead skeletons or zombies under control of caster from dead bodies, 1d6 per level over 8. R: GM discretion. D: permanent.

Cloudkill: creates a moving, poisonous cloud of vapor which is deadly to all creatures with less than five hit dice. 30 feet in diameter, moves with wind or 6 feet per minute. D: 1 hour.

Conjure Elemental: Conjures one 16 HD elemental who will serve the caster until dispelled/dismissed/caster no longer concentrates. Caster can only summon one of each type in a day. R: 240 feet.

Contact Higher Plane: Lets Caster ask yes/no question of other planar entity, 1 question per level. Chance of correct answer 5% per level, maximum 95%.

Feeblemind: Subject's MIND drops to 1. R: 240 feet. D: until dispelled.

Hold Monster: As Hold Person, but any creature. R: 120 feet. D: 1 hour plus 10 minutes/level.

Magic Jar: Moves caster's spirit/mind to a fixed object from which caster can try to possess others. Magic Attack vs. DC of (10 + MIND bonus + target level or hit dice). R: 30 feet. D: until dispelled, the target makes his save (a new saving throw is allowed every caster level days), or the caster ends spell.

Monster Summoning III: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell duration is up. Sample monsters (1d6): 1-1d4 bugbears, 2-1d2 harpies, 3-1d2 ochre jellies, 4-1d2 wererats, 5-1d2 wights, 6-1d2 wild boars. D: 6 minutes.

Pass-Wall: Creates a human-sized passage up to 10 feet long through a wood or stone wall. R: 30 feet. D: 30 minutes.

Rock-Mud: Transforms rock to mud or vice-versa, up a 300x300 foot area. R: 120 feet. D: 3d6 days.

Telekinesis: Moves object by mental power. Up to 20 pounds per level. R: 120. feet D: 1 hour.

Teleport: Instantly transports subject up to 100 miles/level. Caster must know target location exactly.

Wall of Iron: creates a wall of iron in any shape. 1000 square feet (3 inches thick). R: 60 feet. D: 2 hours.

Wall of Stone: Creates a wall of stone in any shape. 1000 square feet (2 inches thick). R: 60 feet. D: until destroyed or dispelled.

6th Level

Anti-Magic Shell: Shell surrounds caster blocking magic both ways. R: caster. D: 2 hours.

Control Weather: Caster can adjust weather. D: GM decision.

Death Spell: Kills 2D8 beings with less than 7 hit dice with a 60 foot radius. R: 240 feet. D: instant but effect permanent.

Disintegrate: Makes one creature or non-magical object vanish, turning it to fine dust. R: 60 feet. D: permanent.

Geas: Force a creature to obey one long-term order. R: 30 feet. D: until order completed.

Invisible Stalker: Summons an invisible stalker, an extra-

dimensional monster, under the control of the Magic-User who may give it a single mission which it will carry out until it is finished.

Legend Lore: A complex process taking 1d100 days allows caster to gain knowledge of a legendry person, place, or thing. Information is accurate but may be in a cryptic form. R: caster. *Lower Water:* Lowers bodies of water 50%. R: 240 feet. D: 10 turns.

Monster Summoning IV: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell duration is up. Sample monsters (1d6): 1-1 gargoyles, 2-1 ogre, 3-1 owlbear, 4-1 shadow, 5-1 werewolf, 6-1 wraith. D: 6 minutes.

Move Earth: Move small hills, dig ditches and moats, other surface features, etc. Land moves at 6 feet per minute. R: 240 feet. D: permanent.

Part Water: Parts bodies of water up to 10 feet deep. R: 240 feet. D: 1 hour.

Projected Image: Project an image of yourself that can sense and talk as if you were the image. Other spells cast come from image. R: 240 feet. D: 1 hour.

Reincarnation: Restores dead person to life in a random (usually humanoid) form. R: touch. D: instant.

Repulsion: Any being trying to move toward spell target finds itself moving away instead. R: 120 feet. D: 1 hour.

Stone-Flesh: Turns subject into a stone statue (or vice versa). R: 120 feet. D: permanent.

7th Level

Cacodemon: Summons a demon or other fiend (such as a devil) from the lower planes of existence. The spell provides no protection against the summoned creature, so the magic user should use other spells or items of protection. As the summoned creature is not forced to aid or obey the caster, that is a matter of negotiations and threats between the caster and the fiend. This spell may only be cast as a ritual. R: 10 feet. D: variable.

Charm Plants: Charms the equivalent of: 1 large oak, 6 medium sized bushes, 12 small shrubs, or 24 little plants. These charmed plants will do anything the caster demands as long as it is within their ability to comply. R: 120 feet. D: until dispelled.

Delayed Blast Fireball: 1d6/caster level fire damage, 20 foot burst. The actual blast can be delayed for up to 10 minutes as set by the caster. R: 240 feet. D: instant.

Limited Wish: An extremely weak version of the "wish" spell. It is not even powerful enough to create or bring treasure to the caster, and under some circumstances only a part of the wish might actually be fulfilled. The spell does have the power to reach for a limited period of time into the past or future as well as the present. R: variable. D: variable.

Mass Invisibility: Up to 6 dragon-sized objects or 300 men and horses are invisible until spell broken by caster, some outside force, or until one attacks. R: 240 feet

Monster Summoning V: Caster summons random monsters who appear 10 minutes after casting. They will then serve until slain or the spell expires. Sample monsters (1d6) – 1: 1 Cockatrice, 2: 1 Manticore, 3: 1 Minotaur, 4: 1 Ogre Mage, 5: 1 Salamander, 6: 1 Troll. D: 6 minutes.

Mind Blank: Makes the target immune to any form of detection by magic or psionics including ESP, Clairvoyance, Clairaudience, Crystal Ball gazing or any other form of scrying), Wishing, Commune, Contact Higher Plane, etc. R: 10 feet. D: 1 day.

Phase Door: Creates an invisible door that can only be opened by the caster. Similar to a Passwall but invisible and only the caster can open the door. R: 10 feet. D: 7 uses

Power Word Stun: A single powerful word that stuns those hearing it for 2d6 10-minute turns if the creature has up to 35 hit points or for 1d6 10-minute turns if the creature has between 36 and 70 hit points. The word has no effect on creatures who are currently over 70 hit points. R: 120 feet.

Reverse Gravity: Within a 30 foot cube gravity reverses itself. Those within the area fall upwards with the force of a normal fall, and then fall again when the spell expires. R: 90 feet. D: 1 minute.

Rune: Creates a magical trap in the shape of an arcane rune. The rune's magic is activated when any person or creature hostile to the caster reads it, or passes over, under, or past it. Various different runes are known, and others may be possible:

Rune of Death: Deals 80 hit points of damage

Rune of Discord: Causes all creatures in the hostile group to begin arguing, and possibly fighting amongst themselves with lethal intent.

Rune of Fear: Casts a Fear spell.

Rune of Insanity: Up to 100 HD of creatures are driven insane by a curse.

Rune of Sleep: Casts a Sleep spell affecting double the normal number of creatures and with double the normal duration.

Rune of Stunning: 150 hit dice (HD) of creatures are affected as by a Power Word, Stun.

Simulacrum: Creates a duplicate of himself or some other person. The basic form is created from snow and ice, and must then be animated (Animate Dead will work). A Limited Wish (along with the actual simulacrum spell) is then used to imbue the animated form with intelligence and knowledge of the person being simulated. The simulacrum gains 1d4+2 times 10% of the simulated creature's knowledge and experience. The simulacrum follows its creator's orders. A simulacrum is not a perfect copy of the original. Side by side, the differences are obvious, and the simulacrum is detectable with a Detect Magic spell. If the original of the simulacrum dies, the simulacrum begins to gain the knowledge and experience of the dead individual at a rate of 1% per week (to a maximum of 90%).

Magician Spells

For expanded spell descriptions see 0e or a 0e retro-clone. R: is range. D: is duration.

1st Level

Calm Animals: Soothes and quiets (2d4 + level) HD of normal animals, rendering them docile and harmless. R: 30 feet. D: 1 minute/caster level.

Change Self: Illusion makes the caster appear to be a different creature. The illusionary guise must share the same general size and shape as the Magician. R: caster. D: 10 x (1d6 + 10 + level) minutes.

Charm Animal: Like charm person, except that it affects one normal animal. R: 60 feet. D: until dispelled.

Detect Evil (Reversible): Reveals evil thoughts/intent or evil items. R: 120 feet. D: 1 hour.

Detect Illusion: Detects any illusion for what it is. R: 60 feet. D: 30 minutes.

Detect Invisible: Detect invisible items and beings within 10 feet per caster level. D: 1 hour.

Detect Magic: Caster can perceive, in places, people, or things, the presence of a magical spell or enchantment. R: 60 feet. D: 20 minutes.

Endure Elements: Target (and equipment) can exist comfortably in hot or cold environments (between -50 and 140 degrees F). R: touch. D: 24 hours.

Faerie Fire: Lines the target in a luminescent glow. R: 60 feet. D: 1 hour.

Light (Reversible): object lights circle with 20 ft. radius, full daylight. R: 60 feet. D: 2 hours.

Locate Animals: Senses direction toward an animal (specific or type) R: 60 +10/caster level feet. D: 1 minute/caster level.

Magic Fang: One natural weapon of target creature gets +1 on attack and damage rolls (and counts as a magic weapon). R: touch. D: 1 minute/caster level.

Mirror Image: Creates 1d6-1 exact images of the caster, all moving exactly like original. Attackers cannot tell images from original. Images hit disappear. R: around caster. D: 1 hour.

Phantasmal Forces: Vivid illusions of nearly anything the caster envisions, lasts as long as the caster concentrates. Damage caused is real if the target believes illusion. R: 240 feet.

Protection from Evil (Reversible): +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters. R: shell around caster. D: 2 hours.

Purify Food & Water (Reversible): Purifies food and water for up to 12 people. R: 10 feet. D: instant but effects permanent.

Read Magic: Read scrolls, spellbooks, other magical writing. R: Caster Only. D: one reading (two scrolls or equivalent).

2nd Level

Animal Messenger: Compels a small animal to go to a spot you designate, carrying a scroll or other small item, and allow others to take that item. R: touch. D: 1 day/caster level.

Augury: Tells, for the immediate future, whether the result of an action will be good or bad. R: caster. D: 1 minute trance.

Blindness: Causes the target to become blind (if save failed). R: 120 feet. D: until cancelled by caster or dispelled.

Blur: Caster's appearance is blurred, making -2 on being hit, and +2 on saves vs. magic. R: self. D: 10 times 1d4+4 minutes.

Deafness: Causes the target to become deaf (if save failed). R: 120 feet. D: until cancelled by caster or dispelled.

Delay Poison: Stops poison from harming subject for 1 hour/caster level. R: 30 feet.

Dispel Illusion: Automatically dispels any illusion caused by a non-Magician. Versus those created by Magicians, it functions like Dispel Magic. R: 120 feet.

Find Traps: Notice traps within 30 feet. R: caster. D: 20 minutes.

Hypnotism: Acts like a Charm person spell with a +2 chance of success, it is necessary for the subject to look the Magician in the eyes. R: 80 ft.

Hypnotic Pattern: A pattern that the Magician projects in front of him that will hold anyone looking at the pattern motionless. It can catch 4d6 1st level types, 3d6 2nd level types, 2d6 3rd or 4th level types, 1d6 5th or 6th level types. R: 120 feet. D: as long as caster concentrates plus 1d6+3 turns afterwards.

Improved Phantasmal Forces: As regular Phantasmal Forces but the caster can move while employing the spell and the illusion will last up to 30 minutes after the caster has stopped concentrating. R: 360 feet.

Invest: Allies gain +1 on attack rolls, saves against fear, and morale checks. Cannot be cast in combat. R: 10 feet. D: 1 hour.

Invisibility: Subject is invisible until spell broken by caster, some outside force, or until subject attacks. R: 240 feet.

Locate Plants: Senses direction toward a plant (specific or type) R: 60 +10/caster level feet. D: 1 minute/caster level.

Misdirection: cause a detect spell (Detect Good, Evil, Magic, etc.) to malfunction. (Magic Attack vs. Spell's DC for success) R: 120 feet. D: instant but effects permanent.

Obscurement: A misty vapor arises near the caster. It is stationary once created. The vapor obscures all sight beyond 5 feet. The cloud covers 100 cubic feet per caster level. R: 20 feet. D: 10 minutes/caster level.

Silence, 15' Radius:* Magical silence for 15 feet around target, moving with target. No sound within area can be heard from outside it. R: 180 feet. D: 2 hours.

Snake Charm: 1d6 snakes/level charmed and will obey caster's commands. R: 60 feet. D: 20 minutes + 1d4 x 10 minutes.

Speak with Animals: Can understand and speak with animals. R: 30 feet. D: 1 hour.

Wood Shape: Forms one existing piece of wood into any shape that suits your purpose. While it is possible to make crude coffers, doors, and so forth, fine detail isn't possible. R: touch. D: instant but effects permanent.

3rd Level

Bane: Gives saving throw penalty of 1 per ten levels of caster to enemies in 20x20 foot area. R: 30 feet. D: next melee round.

Continual Light (Reversible): Creates magical light equal top full daylight within a circle with 120 ft. radius until dispelled. R: 120 feet.

Dispel Exhaustion: This spell temporarily gives its recipient the illusion of being well rested and healthy, restoring the target to full hit points, but the target will be totally exhausted and unable to do anything for 8 hours when the spell expires. If the target has taken body damage, the target immediately suffers an additional 1d2 points of body damage. D: 4 hours

Dominate Animal: Enchant an animal and direct it with simple mental commands such as "Attack," "Run," and "Fetch." Suicidal or self-destructive commands (including an order to attack a creature considerably larger than the dominated animal) are simply ignored. R: 30 feet. D: 1 minute/caster level.

Fear: Causes creatures who fail their saving throw to flee fear. Affect 4d10 1st level types, 3d10 second level types, 2d10 3rd level types, 1d10 4th level types, 1d6 5th level types, 1d4 6th level types. R: 180 feet. D: 10 times 1d6+level minutes.

Hallucinatory Terrain: Makes one type of terrain appear like another type until dispelled or area entered by an opponent. R: 240 feet

Hold Animal: Paralyzes 1-4 animals. Cast at single target, save at -2 and double duration. R: 120 feet. D: 1 hour plus 10 minutes/caster level.

Illusory Script: Allows the caster to write in a script which can only be read by whom the caster sets it to be read by (like Magic Mouth), any others who attempt to read it must save vs. magic or be confused for 6d10 minutes. One spell is suitable for a full page per level of the caster of writing.

Invisibility 10' Range: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until one attacks.

Locate Object: Senses direction toward an object (specific or type) D: level minutes. R: 90 feet.

Non-Detection: Prevents Detection spells from working against the target using it and acts like an Amulet vs. ESP and Crystal Balls. R: touch. D: 20 minutes/caster level.

Paralyzation: Paralyzes twice as many hit dice as the caster's level. R: 180 feet. D: until dispelled or caster removes it.

Phantasmal Killer: Creates an illusory horrible beast formed from the target's own fears whose touch causes death. The beast is visible only to the target and is immune from all attacks and barriers as it exists only in the target's mind. Target must save vs. magic twice. If the target fails one save, he is unconscious for 1d6 hours. If both saves fail, the target is dead. Range: 60 feet.

Remove Curse (Reversible): Frees subject from a single curse. R: 10 feet. D: instant but effects permanent.

Speak with Dead: Ask three questions of a corpse. Age of corpse affected: Magician under level 8: 1d4 days, level 9-14: 1d4 months, level 15+: any age. R: 10 feet. D: 3 questions.

Spectral Forces: As Improved Phantasmal Forces, but includes sound, smell and temperature illusions. Spectral Forces are not destroyed by touch and they last up to 50 minutes after the caster has stopped concentrating. R: 360 feet.

Suggestion: Caster makes 1-2 sentence hypnotic suggestion to target. If save failed, target will carry out suggestion for up to duration. Only 1% chance target will obey suggestion that obviously would result in target's death/extreme injury. R: 30 feet. D: 1 week.

4th Level

Animal Summoning I: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the caster. R: 30 feet. D: 1 hour.

Confusion: Subjects (up to 2d6 hit dice, only 4+ HD get save) behave oddly/cannot act effectively. R: 120 feet. D: 2 hours.

Create Water: Creates water, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Control Temperature, 10' radius: Allows the caster to vary the temperature in a given area (10' radius) by +/- 50 degrees. R: 60 feet. D: 30 + 10/caster level minutes.

Emotions: Projects a selected emotion. The emotions that can be projected are: Fear (as the spell), Battle Lust (makes men fight as Berserkers, can be countered by Fear; if Fear is thrown first, Battle Lust does not counter it), Deprivation (lowers morale by 75%), Bravado (give immunity from Fear, Bravado which can counter Deprivation), Hate (interpretation by the subject is variable, roll d20: 1-4: hate any enemy around; 5-8: hate each other; 9-14: hate both enemy/each other; 15-16: hate selves, 17-20: hate caster. A person under the influence of a hate will attack whoever the die roll indicates). R: 180 feet. D: concentration.

Improved Invisibility: Subject and those within 10 feet of him are invisible until spell broken by caster, some outside force, or until 1d4+caster level minutes after the first attack is made by one under this spell.

Massmorph: Makes up to 100 humanoids appear to be trees until dispelled or negated by caster. Creatures may move and still appear to be trees. R: 240 feet.

Minor Creation: Allows the caster to create materials up to a hardness comparable to wood (much like a Djinn). The total amount of weight an Magician may create in a day equals 5

pounds times the caster's level. R: touch. D: 4 + level days (longer for softer materials).

Protection from Evil, 10' radius (Reversible): +2 to AC and saves, counter mind control, hedge out elementals and enchanted monsters to all within 10 foot circle around caster. R: caster. D: 2 hours.

Protection from Lightning: This spell negates the effects of electrical attacks upon the target. The spell ceases after such an attack. R: touch D: 1 hour + 10/caster level minutes.

Shadow Magic: This spell allows the Magician to cast semi-real offensive spells which mimic the following real offensive spells: Lightning Bolt/Fire Ball (1d6 damage per 4 caster levels) or Death Spell (Affects 1d8 creatures of 1 HD). R: as original spell D: instant but effects permanent.

Shadow Monsters: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 20% the number of HD of the original (Original HP X 0.2. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 9 [10], and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet: D: 1 minute/caster level.

Speak with Plants: Can understand and speak with plants. R: 30 feet. D: 1 hour.

Sticks to Snakes: Turns up to 2d8 sticks into serpents. 50% chance each serpent will be venomous. R: 120 feet. D: 1 hour.

5th Level

Animal Summoning II: Conjures 2 large animal (elephant, hippo, rhino, etc.), 6 medium sized animals (lions, tigers, bears, etc.) or 12 small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the caster. R: 30 feet. D: 1 hour.

Anti-Plant Shell: Similar to the magic-user spell Anti-Magic Shell but instead of protecting from spells, it protects against attacks from plants and living vegetables. R: caster. D: 2 hours.

Charm Plants: Charms the equivalent of: 1 large oak, 6 medium sized bushes, 12 small shrubs, or 24 little plants. These charmed plants will do anything the caster demands as long as it is within their ability to comply. R: 120 feet. D: until dispelled.

Chaos: This spell affects a 30 foot x 30 foot area. All those caught within the affected area will become confused until they leave the area. Fighters and Magicians over the caster's level are not affected by this spell. R: 120 feet. D: concentration.

Create Food: Creates food, enough for up to 24 people and their horses for one day. R: 10 feet. D: instant but effects permanent.

Dispel Evil (Reversible): Works like Dispel Magic, but affects any evil sending or evil spell. R: 30 feet. D: instant but effects permanent.

Insect Plague: Insect swarms (20 x 20x 20 feet) attack creatures. Creatures under 2 HD flee in terror. Can only be cast outdoors. R: 480 feet. D: 1 day.

Major Creation: Allows the caster to create materials up to a hardness comparable to iron (much like a Djinn). The total amount of weight an Magician may create in a day equals 15 pounds times the caster's level. R: touch. D: 4 + level days (for wood hardness, longer for softer materials, shorter for harder materials).

Projected Image: Project an image of yourself that can sense and talk as if you were the image. Other spells cast come from image. R: 240 feet. D: 1 hour.

Quest: Force a creature to obey one long-term order. R: 30 feet. D: until order completed.

Shadow Magic II: This spell allows the Magician to cast semi-real offensive spells which mimic the following real offensive spells: Lightning Bolt/Fire Ball (1d6 damage per 2 Magician levels) or Death Spell (Affects 1d8 creatures of up to 2 HD).

Shadow Monsters II: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 40% the number of HD of the original (Original HP X 0.4. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 11, and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to 1.5 times the caster's level may be created. Shadow Monsters take double

damage from silver weapons. R: 30 feet. D: 1 minute per level.

Summon Shadows: Similar to an Invisible Stalker spell, but summons Shadows instead. The number of Shadows summoned is equal to 1 + 1 per level over 5. D: until mission completed.

6th Level

Animal Summoning III: Conjures 4 large animal (elephant, hippo, rhino, etc.), 12 medium sized animals (lions, tigers, bears, etc.) or 24 small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the caster. R: 30 feet. D: 60 minutes.

Animate Object: "Brings to life" inanimate objects such as statues, chairs, carpets, and tables. The objects follow the caster's commands, attacking his foes or performing other actions on his behalf. GM determines the combat attributes of the objects, such as armor class, speed, hit dice, and hit bonuses as needed as no the object animated. A stone statue would be considerably more sturdy and dangerous than wooden furniture, for example. R: 60 feet. D: 1 hour.

Anti-Animal Shell: Same as the Anti-Plant Shell spell, but focuses on natural or giant animals. While affected by this spell, those inside the shell are protected from all animal attacks (excluding fantastic or magical creatures), but are unable to attack, be it by normal or magical means. R: 20 foot hemisphere. D: 30 + 10/caster level minutes.

Blade Barrier: Creates a barrier of whirling blades up to 30 feet in diameter which do from 7d10 points of damage upon anyone or anything which attempts to pass through it. R: 60 feet. D: 120 minutes.

Conjure Animals: Conjures 1 large animal (elephant, hippo, rhino, etc.), 3 medium sized animals (lions, tigers, bears, etc.) or six small ones (wolves, wild dogs, lynx, etc.) which will immediately appear. The animals conjured will obey the Magician. R: 30 feet. D: 100 minutes.

Find the Path: This spell shows the caster the fastest and safest way out of a trap maze, wilderness, underworld, etc. It will, for example, allow the caster to free himself from a Maze spell in a single turn after casting the spell. D: Indoors: 1 hour + 10 minutes/caster level; Outdoors: 1 day.

Mass Suggestion: Area version of the suggestion spell, affecting 1d8 creatures or 1 creature at -4 saving throw. The same suggestion must be made to all on whom it is cast. R: 30 feet. D: 1 week.

Permanent Illusion: As Spectral Forces, but lasts until dispelled. R: 360 feet. D: Until dispelled.

Programmed Illusion: As Spectral Forces, but illusion performs pre-set instructions without the caster's concentration. For example, a dragon flies to the camp, circles it for 30 minutes, roars every other pass, then flies off while the Magician escapes. R: 720 feet. D: 120 minutes.

Shadow Monsters III: This spell allows the caster to conjure semi-real monsters. Monsters summoned have 20% the number of HD of the original (Original HP X 0.6. Any score of less than .4 is rounded down, and any fraction of .4 or greater is rounded up to 1 hit point). Shadow monsters have an AC of 12, and do not possess any of the original monster's special abilities (unless the victim believes the shadow monster is real). A number of monsters whose combined original HD are equal to 2 times the caster's level may be created. Shadow Monsters take double damage from silver weapons. R: 30 feet. D: 1 minute per level

Speak with Monsters: Allows the target to speak with and understand any monster. R: 10 feet. D: 3d4 questions.

Transport via Plant: Allows the caster to pass from one plant to any other plant of similar species anywhere, as long as the caster has seen the plant at one time. Should the emergence fail, the caster will instead emerge from another plant which may be miles away. The caster may choose to remain inside a plant instead of transporting from it, and may remain so for up to 24 hours. While within a plant in this manner, the caster is completely aware of his surroundings. D: instant or up to 24 hours.

True Sight: Spell increases target's sight. A polymorphed creature or object will appear as it really is, superimposed with its present form. When looking at a person one may tell his class, level, and general intentions. One may also see invisible, displaced, ethereal and astral objects. R: touch. D: (level - 10) + 1d6 10 minute turns

Word of Recall: The Magician teleports without error back to his

previous prepared sanctuary. R: infinite. D: instant.

7th Level

Aerial Servant: Summons a servant from the elemental plane of air to fetch and return one thing (or creature) to the caster.

Only a creature with a Strength of 18 can fight its way from the servant's grasp, and even then the chance is not likely to be greater than 50%. The servant can carry up to 500 pounds in weight. An aerial servant has the following attributes: HD 16, AC 3 [16], Atk Bonus +17, Atk 1 (4d4), Move 240 ft. If the servant is frustrated in its efforts to bring the desired object to the caster, it will become insane, returning and attacking him. D: until task completed or insanity.

Alter Reality: Works like the Magic-User spell Limited Wish, but the caster must first cast an illusion of what is being wished for, then cast the Alter Reality spell on the illusion to turn it into reality. R: variable. D: variable.

Astral Spell: The caster projects his astral form into other places; the astral form is invisible to all creatures but those also on the astral plane. If the caster's physical body is moved beyond the range of the spell from its original location while the astral form is away, the link is sundered and the caster's soul becomes lost in the beyond. The spell range has no other effect. The astral form is capable of casting spells, but there is a 2% chance per spell level that the spell will fail. Additionally, there is a 1% chance per spell level of the attempted spell that the astral spell itself will falter as a result of the spell casting, and the astral form will return to the physical body. When astral traveling above the ground, the astral form may travel as fast as 100 miles per hour per level above 18th. If the form is traveling underground, its top speed is 120 feet per 10-minute turn. With special study, this spell can also be used to travel to other planes.

Earthquake: Causes a powerful earthquake in an area 60 feet x 60 feet plus an additional 10 feet (in both length and width) per three levels above 17th. The quake topples walls, causes rock-slides, and opens gaping fissures in the earth. Any creature caught in the quake has a 1 in 6 chance of falling into the depths of the earth and being killed. No effect beyond the spell's area of effect. R: GM discretion. D: instant but effects permanent.

Great Shout: A great shout affects all those within the range as follows: creatures of less than 5 hit dice are slain, creatures of 5 to 8 hit dice are stunned for 2d10 turns, and creatures with 9-12 hit dice are deafened for 1d6 turns. Creatures with 13+ hit dice are unaffected. R: 40 feet.

Maze: This spell puts its victim in an extra-dimensional maze. After the determined time has elapsed the creature will reappear at the spot where it disappeared. Creatures with intelligence of 12 or better will require 1d4 10 minute turns to escape, those with intelligence under 6 will require from 1d4+8 10 minute turns to escape, others require 1d4+4 10 minute turns to escape. R: 60 feet.

Part Water: Creates a gap through water, to a depth of 20 feet lasting for 2 hours. At 18th and every level thereafter, the Magician adds 10 feet to the depth of water parted, and 1 additional hour to the spell's duration. R: 240 feet. D: see above.

Symbol: Creates a magical trap in the shape of a holy rune. The rune's magic is activated when any person or creature hostile to the caster reads it, or passes over, under, or past it. Various different runes are known, and others may be possible but none may cause permanent harm to the target.

Symbol of Discord: Causes all creatures in the hostile group to begin arguing, and possibly fighting amongst themselves with lethal intent.

Symbol of Fear: Casts a Fear spell.

Symbol of Sleep: Casts a Sleep spell affecting double the normal number of creatures and with double the normal duration.

Symbol of Stunning: 150 hit dice (HD) of creatures are affected as by a Power Word, Stun.

Wind Walk: Allows the caster and one other person in contact with him become incorporeal and mist-like, able to travel through walls and other obstacles, traveling at 48 ft. per minute indoors (or in subterranean settings) and much faster outdoors. R: touch. D: 1 day or until dispelled.

Weather Summoning: The caster may call for any weather desired, limited by the current season and climate. Extreme weather conditions may only be summoned by an 11th level caster. The altered weather is not under the control of the caster. It takes 3 + 5d4 - caster level 10 minute turns for the altered weather to arrive, but will be noticeable after 30 minutes. The duration of this spell varies according to the climactic changes brought about by the caster. A tornado may last a few turns, while torrential rains might last a few hours or day (GM's choice). R: 5 mile radius. D: variable.

MONSTERS

AC=Armor; HD=Hit Dice; AT=Attacks; MR=Morale Rating;

S=Special Abilities

Undead Immunities=Immune to sleep, charm, fear, paralysis

ANT, GIANT: AC: 16 HD: 3d8 AT: bite +3 (1d6) MR: 12 S: acid (2d6).

HARPY: AC: 12 HD: 3d8 AT: 2 talons +3 (1d4) or weapon +3 MR: 7 S: flies, siren-song (Charm person).

HELL HOUND: AC: 15 HD: 5d8 AT: bite +5 (1d6) MR: 9 S: breathe fire (10 HP damage)

HIPPOGRIFF: AC: 14 HD: 3d8 AT: 2 claws +3 (1d6), bite +3 (1d10) MR: 8 S: flies.

HOBGOBLIN: AC: 14 HD: 1d8+1 AT: weapon +1 MR: 8

HORSE, RIDING: AC: 12 HD: 2d8 AT: bite +2 or kick +2 (1d4) MR: 7

HORSE, WAR: AC: 12 HD: 3d8 AT: bite +3 (1d6) or kick +3 (2d6) MR: 9

HUMAN, BANDIT/SOLDIER: AC: 12 HD: 1d8 AT: weapon +1 MR: 8

HUMAN, BERSERKER: AC: 12 HD: 1d6+2 AT: weapon +1 MR: 12 S: Berserking (+2 to hit)

HUMAN, COMMON MAN: AC: 10 HD: 1d8-2 AT: weapon +0 MR: 6

HUMAN, SERGEANT-AT-ARMS: AC: 14 HD: 3d8 AT: weapon +3 MR: 8

HYDRA: AC: 14 HD: 5-12d6 AT: 5-12 bites +HD (1d6) MR: 11 S: 1 HD per head, 20% chance fire-breathing or regenerating.

INVISIBLE STALKER: AC: 16 HD: 8d8 AT: 1 bash +8 (4d4) MR: 12 S: flies, invisible.
 KOBOLD: AC: 13 HD: 1d4 AT: weapon +0 (1d6) MR: 9
 LEPRECHAUN: AC: 11 HD: 1d4 AT: theft, magic MR: 7 S: invisible, polymorph non-living objects, illusions and ventriloquism at will; steal small valuable item (75% successful, 25% chance if dropping per turn chased), 80% magic resistant, never surprised.
 LICH: AC: 20 HD: 12-18d6 AT: touch +HD (1d10) or weapon +HD MR: 10 S: undead immunities, touch causes paralysis (no save), cause fear in creatures under 4th level/HD, Magic-User or cleric level equals hit dice.
 LIZARDMAN: AC: 14 HD: 2d8 AT: claws +2 (1d6) or weapon +2 MR: 11 S: breathe underwater.

LURKER RAY: AC: 13 HD: 10d8 AT: wing smother +10 (1d8) MR: 9 S: those hit take 1d8 damage/turn and smother in 1d6 turns.
 LYCANTHROPE, WEREBEAR: AC: 17 HD: 7d8 AT: 2 claws +7 (2d4), bite +7 (1d8) MR: 10 S: lycanthropy, extra 2d6 damage if both claws hit.
 LYCANTHROPE, WEREBOAR: AC: 15 HD: 4d8 AT: tusks +6 (2d6) MR: 9 S: lycanthropy, attack +6 instead of +4 because of rage.
 LYCANTHROPE, WERERAT: AC: 13 HD: 3d8 AT: bite (1d4) or weapon +3 MR: 8 S: lycanthropy, surprise foes on a 1-4.
 LYCANTHROPE, WERETIGER: AC: 16 HD: 5d8 AT: 2 claws +5 (1d6), bite +5 (2d6) S: lycanthropy, surprise foes on a 1-4.

LYCANTHROPE, WEREWOLF: AC: 14 HD: 4d8 AT: 2 claws +4 (1d4) bite +4 (2d4) MR: 8 S: lycanthropy.
 MANTICORE: AC: 15 HD: 6d8 AT: claws +6 (1d4) or bite +6 (2d4) MR: 9 S: flies, six tail spikes +6 (1d6) per round, 24 spikes in total.
 MEDUSA: AC: 14 HD: 6d8 AT: weapon +6 MR: 8 S: onlookers turn to stone, hair attacks at +3 (poison bite), averting eyes reduces to hit by 4 and grants +2 to medusa attacks.
 MERMAN: AC: 13 HD: 1d8 AT: weapon +1 MR: 8 S: breathe water, swim.
 MINOTAUR: AC: 13 HD: 6d8 AT: weapon +6 or bite +6 (1d6) or Head gore +6 (1d6) MR: 12 S: never lost in mazes.

MULE: AC: 12 HD: 2d8 AT: Kick +2 (1d4) MR: 8
 MUMMY: AC: 16 HD: 6d8 AT: touch +6 (2d6) MR: 12 S: mummy rot curse if hit (no more healing), undead immunities, hit only by magic weapons (for half damage), spells, and fire.
 NAGA, GUARDIAN: AC: 14 HD: 12d8 AT: bite +12 (1d4 + poison), spit +12 (30 range, poison), constrict +12 (1d8/rd until freed) MR: 9 S: spells as 6th level Cleric.
 NAGA, SPIRIT: AC: 14 HD: 10d8 AT: bite +10 (1d4 + poison) MR: 8 S: spells as 6th level Cleric and 7th level Magic-User, gaze (permanent charm).
 NAGA, WATER: AC: 14 HD: 8d8 AT: bite +10 (1d3 + poison) MR: 7 S: spells as 5th level Magic-User (no fire or lightning).

NIXIE: AC: 12 HD: 1d8 AT: weapon +1 (1d6) MR: 6 S: swims, charm.
 OCHRE JELLY: AC: 11 HD: 6d8 AT: acid strike +6 (2d6) MR: 6 S: a hit destroys organic material, lightning divides jelly into three jellies, each doing +2 (1d6) damage.
 OGRE: AC: 14 HD: 4d8 AT: weapon +4 (2d6) MR: 10
 OGRE MAGE: AC: 15 HD: 5d8 AT: weapon +5 (2d6) MR: 9 S: flies, magic use (turn invisible, darkness 10' radius, sleep, charm person, cone of frost).
 ORC: AC: 13 HD: 1d8 AT: weapon +1 MR: 8

OWLBEAR: AC: 14 HD: 5d8 AT: 2 claws or bite +5 (1d8) MR: 9 S: hug for additional 2d6 if both claws hit.
 PEGASUS: AC: 13 HD: 4d8 AT: 2 hooves +4 (1d6) MR: 8 S: flies.
 PHOENIX: AC: 17 HD: 9d8 AT: 2 claws +9 (1d6), bite +9 (2d6) MR: 10 S: +3 or better weapon to hit, immune to charm/hold/fire attacks, 3d6 fire damage to all within 10 feet.
 PIXIE: AC: 12 HD: 1d8 AT: weapon +1 (1d4) MR: 7 S: flies, charm, naturally invisible.
 PURPLE WORM: AC: 13 HD: 15d8 AT: bite +15 (2d8) or sting +15 (1d8) MR: 10 S: poison sting (1d6 STR), swallows whole on

roll 4 higher than needed to hit, swallowed creatures take 1d6 automatic damage every round.

RAT, GIANT: AC: 12 HD: 1d8 AT: bite +1 (1d3) MR: 8 S: 1 in 20 chance of disease from bite.
 RAT, MONSTROUS: AC: 13 HD: 3d8 AT: bite or claws +3 (1d6) MR: 7 S: 1 in 20 chance of disease from bite.
 ROC: AC: 15 HD: 12d8 AT: 2 claws +12 (1d8) or bite +12 (2d10) MR: 9 S: flies
 RAKSHASA: AC: 23 HD: 7d8 AT: claws, bite +7 (1d8) or weapon +7 MR: 8 S: spells as 1d3 level Magic-User and 1st level cleric, immune to non-magic weapons, below +3 weapons do 50% damage, blessed crossbow bolt kill instantly.
 RUST MONSTER: AC: 17 HD: 5d8 AT: touch +5 (special) MR: 7 S: touch of (or touching) the rust monster causes metal items to turn to rust.

SALAMANDER: AC: 15 HD: 7d8 AT: bite +8 (1d6) or constrict +8 (1d8) S: heat does 1d8 to nearby creatures, immune to fire.
 SCORPION, GIANT: AC: 17 HD: 4d8 AT: 2 claws +4 (1d10), sting +4 (1d4, poison) MR: 11 S: poison causes paralysis and loss of 1d4 hp per minute.
 SCORPIONMAN: AC: 17 HD: 8d8 AT: weapon +8 (1d10), sting +4 (1d4, poison) MR: 9 S: poison causes paralysis and loss of 1d4 hp per minute.
 SEA SERPENT: AC: 17 HD: 30d6 AT: bite +15 (4d6) MR: 9 S: swallows whole on roll 4 higher than needed to hit, swallowed creatures take 1d6 automatic damage every turn.
 SHADOW: AC: 12 HD: 3d8 AT: touch +3 (1d4, special) MR: 12 S: drains 1 STR per hit, hit only by magical weapons, surprise foes on a 1-5, creatures reduced to 0 STR will rise 24 hours later as a shadow. Not undead.

SHARK: AC: 15 HD: 4d8 AT: bite +4 (2d6) MR: 7
 SHARK, GIANT: AC: 16 HD: 10d8 AT: bite +10 (3d10) MR: 7
 SHRIEKER: AC: 11 HD: 3d8 AT: none MR: 12 S: large toadstool, if disturbed (light 60 feet/movement 30 feet) emits loud shriek for 1d3 minutes which stuns small (tat-sized) creatures.
 SKELETON: AC: 12 HD: 1d8 AT: weapon +1 MR: 12 S: undead immunities.
 SLUG, GIANT: AC: 11 HD: 12d8 AT: bite +12 (2d6) MR: 10 S: spits acid (2d6).

SNAKE, CONSTRICTOR: AC: 14 HD: 2d6, AT: constriction (1d3) MR: 7 S: On successful attack, automatic 1d3 damage thereafter until dead.
 SNAKE, GIANT CONSTRICTOR: AC: 14 HD: 6 AT: constriction +4 (1d6) M&: 7 S: On successful attack, automatic 1d6 damage thereafter until dead.
 SNAKE, GIANT VIPER: AC: 14 HD: 4d8 AT: bite +4 (1d3 + poison) MR: 7 S: Poison bite does 2d4 hp per minute.
 SNAKE, VIPER: AC: 14 HD: 1d8 AT: bite +1 (1hp + poison) MR: 7 S: Poison bite does 1d4 hp per minute.
 SPECTRE: AC: 17 HD: 7d8 AT: touch +7 (1d6) MR: 11 S: undead immunities, drains 2 levels per hit, creatures reduced to 0 levels will rise 24 hours later as a spectre.

SPHINX: AC: 19 HD: 12d8 AT: 2 claws +12 (3d6), bite +12 (2d8) MR: 10 S: Males are level 12 magic-users. Females are level 12 clerics. Roar (2/day) save or flee in terror
 SPIDER, GIANT: AC: 13 HD: 2d6+2 AT: bite +2 (1d6) MR: 8 S: bite causes paralysis via poison, surprise on 1-5.
 SPRITE: AC: 14 HD: 1d4 AT: none MR: 7 S: can curse (effects funny rather than dangerous, wears off after 1d20 hours)
 STIRGE: AC: 12 HD: 1d8 AT: sting +1 (1d4) MR: 9 S: attaches on a hit and will deal 1d4 automatically damage every round.
 TREANT: AC: 17 HD: 10d8 AT: branches +10 (3d6) MR: 9 S: Control trees and can make them move and attack.

TICK, GIANT: AC: 15 HD: 3d8 AT: bite+3 (1d6) MR: 7 S: attaches on a hit and will deal 1d6 damage automatically every round.
 TITAN: AC: 22 HD: 16d8 AT: weapon+15 (5d6) S: Spells.
 TOAD, GIANT: AC: 12 HD: 2d8 AT: bite +2 (1d6) MR: 6 S: surprise foes on a 1-3, swallows small creatures whole on a natural 20, swallowed creatures take 1d6 automatic damage every round, long tongue pulls victims in to bite making bite attack like pole arms.

TROLL: AC 15 HD: 6d8 AT: 2 claws +6 (1d6), bite +6 (1d10) MR: 10 S: regenerate 3 hp per round (except acid or fire damage).
UNICORN: AC: 17 HD: 5d8 AT: 2 hoofs +5 (1d8) or horn +5 (1d8) MR: 7 S: double damage for charge, 25% magic resistance, teleport, horn can cure damage or disease.

VAMPIRE: AC: 17 HD: 9d8 AT: bite +9 (1d6) or weapon +9 MR: 11 S: undead immunities, hit only by magical weapons, regenerate 3 hp per round, drains 2 levels per hit, gaseous form at will, shape change into bat, charm gaze, avoids garlic and mirrors, summons bats or wolves, immobilized and apparently dead if a stake is driven through its heart, drowns under water in one round, creatures reduced to 0 levels will rise 24 hours later as a vampire under the control of their creator.
WAR DOG: AC: 12 HD: 2d8 AT: bite +2 (1d6) MR: 9
WIGHT: AC: 14 HD: 3d8 AT: claw +3 (1d6) MR: 12 S: undead immunities, hit only by magical or silver weapons, drains a level per hit, creatures reduced to 0 levels will rise 24 hours later as a wight.
WILL-O-THE-WISP: AC: 27 HD: 9d8 AT: shock +9 (1d6+4) MR: 10 S: flies.
WOLF: AC: 12 HD: 2d8 AT: bite +2 (1d6) MR: 8

WORG: AC: 13 HD: 4d8 AT: bite +4 (2d6) MR: 8
WRAITH: AC: 16 HD: 4d8 AT: touch +4 (1d6) MR: 11 S: undead immunities, only hit by magic or silver weapons, arrows do a max 1 HP damage, drains a level per hit, creatures reduced to 0 levels will rise 24 hours later as a wraith.
WYVERN: AC: 16 HD: 8d8 AT: bite +8 (2d8) or sting +8 (1d6) MR: 9 S: poison sting (1d6 STR), flies.
YELLOW MOLD: AC: n/a HD: n/a AT: 1d6 if touched MR: n/a S: if struck, 50% releases spore cloud (choke to dead in 6 rounds unless cure disease), destroyed by fire.
ZOMBIE: AC: 11 HD: 2d8 AT: weapon +2 or claws +2 (1d8) MR: 12 S: undead immunities always lose initiative.

GRYPHONS & GRAMARYE TREASURE

Here is a list of sample treasure items appropriate to a *Microlite74* campaign. Maps to possible hoards of such treasures are also a common treasure item. Of course, any magic item you like from the SRD can be used, but higher powered items may be too powerful for most *Microlite74* games. This list is for GMs who want to select treasure themselves or generate their own lists of random treasure. See the *Microlite74* Random Treasure section at the end of this Companion volume for a sample random system of treasure generation using the magic treasures listed in this section.

Money: 1 gold piece (gp) = 10 silver pieces (sp); 1 silver piece = 5 copper pieces (cp).

Gems: Most range in value from 10gp to 1000gp, with 50% of gems being worth about 100gp.

Magic Items: Most magic items in a swords & sorcery setting will be potions and scrolls. Spell Wands and magic weapons and armor will also be somewhat common. The other items in the lists below will normally be very rare: perhaps even created by ancient or lost civilizations whose method of creation has been lost.

Mundane Items

The majority of most random treasures should be mundane, non-magical items. While coins, gems, and jewelry seem to make up the majority of mundane treasure in many published adventures, in reality many other types of treasure could and probably should be found. Here are some examples of other types of treasure items that should be common in many settings.

Art: paintings, tapestries, quilts, calligraphy, illustrated manuscripts, carvings (wood, bone, ivory, etc.), ceramics (pottery, statues, china, etc.), glasswork (decanter, goblets, bowls, window glass, stained glass, etc.), statues, metalwork, craft items, etc.

Clothing: from every day to exotic, from poor quality to clothing fit for royalty.

Furnishings: beds, wardrobes, benches, chairs, tables, desks, cupboards, etc. These can range from items that would be at home in a slum dwelling to items fit for a palace.

Trade Goods, Low Value: cotton, wool, flax, furs, hides, cloth, lumber, metal ingots (copper, iron, lead, tin), alcoholic beverages, grain, salt, sugar, spices, tobacco, foodstuffs, livestock, everyday items (wooden, pewter, bronze, copper, etc.), etc.

Trade Goods, High Value: armor, weapons, tea, exotic fruits and grains, silk, ingots (gold, silver, platinum, etc.), scrolls, books, narcotics, perfume, rare woods, religious items, everyday potions/medicines, poisons, laboratory equipment, crafting tools, magical components, exotic animals, luxury items, musical instruments, exotic animals, warhorses, etc.

Vehicles: carts, wagons, chariots, carriages, boats, ships, etc.

Magic Items

Potions

There is a 70% chance that a potion bottle holds 1 dose, otherwise 1d6 doses. A quick taste of a potion can be used to identify it without consuming a dose. There is a 5% that a potion has decayed with age and has become a potion of delusion (60% chance) or poison (40% chance). Useless otherwise noted, the effects of a dose will last 1d6+6 10 minute turns.

Most potions on the list below can be made by any arcane spellcaster (or non-spellcaster with the Alchemy advance from the *Microlite74 Companion I* Advantages and Disadvantages optional rule) who has the recipe for the potion and the materials and time, see the Potion Recipe scroll for more information. In addition to the potions listed here, those with the potion brewing talent can brew a large number of everyday potions (e.g. cures for specific diseases, antidotes for a specific natural poison, household cleaning potions, etc.). The brewer will know the specific formula for a specific everyday potion on a MIND-based skill roll. If he has the needed materials and brewing equipment, he may brew the everyday potion (succeeding on a MIND-based skill roll). The GM will set the time (generally ranging from a few hours to a week) and materials costs for everyday potions. Many everyday potions can be purchased at an apothecary.

Animal Control: The drinker may control one or more animals with a total hit dice of 3d6 or less. When the effect of the potion wears off, the animals will flee.

Antidote: The drinker becomes immune to all poisons of up to a specific strength for the duration of the potion. Poison from non-creature sources (e.g. a Potion of Poison) should be considered to be as if from a 7HD creature. The strength of the potion should be determined by rolling 1d10: 1-4 = Poison from 3HD creatures, 5-7 = Poison from 7HD creatures, 8-9 = Poison from 15HD creatures, 10 = All poison.

Blending: The drinker may change color to blend in with their surroundings. When hiding, the drinker will have a 90% chance to go unnoticed unless the viewer can see invisible creatures.

Bug Repellent: Any normal or giant bug (an insect, spider, scorpion, centipede, or other arthropod) will completely ignore the drinker unless magically controlled. If the bugs are magically controlled to attack the drinker, the drinker gets a

+4 bonus to any saving throws against the controlling effect that allow the damage done by the insects to be reduced.

Clairaudience: While concentrating, the drinker may listen as if at any point within 60' of their current location.

Clairvoyance: While concentrating, the drinker may see as if at any point within 60' of their current location.

Climbing: The drinker may walk on walls and ceilings as if a spider.

Defense: This potion only lasts 10 minutes. The drinker gets a bonus to their armor class based on the power of the potion. To determine the power of the potion, roll 1d10: 1-3 = +1, 4-5 = +2, 6-7 = +3, 8-9 = +4, 10 = +5.

Delusion: This potion will have no effect when drunk. However, if tasted, it will falsely give the taster the impression that it is another type of potion from this list. Multiple tasters will all get the same impression. A magical analysis of some type (spell or alchemical operation) will correctly identify this potion as one of Delusion rather than as the type it tastes like.

Diminution: The drinker shrinks down to 6" in height. While in this state they cannot hurt creatures larger than 1' tall with physical attacks, and have a 90% chance of being able to hide. If this potion is drunk while a Potion of Growth is in effect, they will simply cancel each other rather than making the drinker sick.

Dragon Control: The drinker of this potion can control up to three dragons of sub-adult or younger. The dragons do not get saving throws, but older dragons are not affected. Each potion of dragon control will only control one type of dragon. The controlled dragons will do anything that is commanded (other than suicidal commands) although they are not capable of casting spells. When the control ends, the dragons will become hostile to the drinker and will either flee or attack depending on their impression of the drinker's power. Roll 1d10 to see which type of dragon is affected: 1-2 = Black, 3-4 = Blue, 5-6 = Green, 7-8 = Red, 9-10 = White.

Dreamspeech: This potion only lasts for 10 minutes. The drinker can speak to one paralyzed, petrified or sleeping creature within 30' (only one creature can be spoken with per potion) and can hear the responses of the creature via ESP. The drinker will automatically understand the language of the target, but the target is under no compulsion to speak the truth (or even respond at all) if they do not wish to.

Elasticity: This potion only lasts for 10 minutes. The drinker may stretch and deform themselves and their equipment to fit through gaps as small as 1" and reach as far as 30'. The drinker cannot cast spells or attack while stretched, and items carried cannot be used or dropped unless they are in normal form. However, while stretched the drinker only takes half damage from blunt and bashing attacks.

ESP: This potion has the same effect as the spell of the same name.

Ethereality: This potion gives the drinker the ability to shift from the Prime Plane to the Ethereal Plane. The drinker may shift at any time before the potion's duration runs out, and may then spend up to 24 hours on the ethereal plane before shifting back. Once the drinker has shifted to the ethereal plane and back, the potion's duration immediately expires.

Fire Resistance: The drinker becomes immune to normal fire, gains a +2 bonus on all saving throws against fire or heat based attacks, and takes -1 point of damage per die (to a minimum of 1 point per die) from magical fire attacks.

Flying: This potion has the same effect as the Fly spell.

Freedom: The drinker is immune to paralysis and to all forms of Hold spell or effect.

Gaseous Form: The drinker's body transforms to a cloud of gas for up to 1 hour, causing all their equipment and carried items to fall to the floor. The drinker keeps control of their body, and can move through any non-airtight barrier. While in gaseous form, the drinker cannot attack, but has an armor class of -2 and can only be hit by magical weapons.

Giant Control: The user may control up to four giants of a certain type, but each one gets a saving throw. The giants will normally be hostile once control ends. To determine the type of giant affected, roll 1d6: 1 = Cloud, 2 = Fire, 3 = Frost, 4 = Hill, 5 = Stone, 6 = Storm.

Giant Strength: The drinker gains the strength of a giant, and can do double damage with melee weapons or throw large rocks (range: 60/130/200) for 3d6 damage. This potion does not stack with other strength enhancing items such as Gauntlets of Ogre Power.

Growth: The drinker grows to twice normal size, and be able to do double damage with melee attacks. If this potion is drunk while a Potion of Diminution is in effect, they will simply cancel each other rather than making the drinker sick.

Healing: This potion will either cure 1d3+1 body points of damage to the drinker or cure their paralysis. This potion has an instant effect, rather than a duration.

Heroism: The drinker will temporarily gain one or more levels as follows (roll 1d20):

Common Man (no class): +3 Fighter levels.

Fighting Classes: 1-8: +1 level, 9-14: +2 levels, 15-19: +3 levels, 20: +4 levels

Specialist Classes: 1-12: +1 level, 13-19: +2 levels, 20: +3 levels

Arcane Classes: 1-19: +1 level, 20: +2 levels

All damage (including energy drains) is taken from the extra levels and hit points first. Spellcasters do not gain additional spellcasting ability.

Human Control: The drinker may control up to 6 levels of humans, similar to a Charm Person spell. The targets can only be controlled while within 60' of the drinker, and the effect lasts only for the duration of the potion.

Invisibility: This potion has the same effect as the spell of the same name.

Invulnerability: The drinker gains a +2 bonus to armor class and all saving throws for the duration of the potion. If a second Potion of Invulnerability is drunk within a week, the only effect is sickness.

Levitation: This potion has the same effect as the spell of the same name.

Longevity: The drinker immediately becomes 10 years younger. The effect is an instant one rather than an ongoing one, and therefore cannot be dispelled. This potion will not reduce the age of the drinker below 15 years old.

Luck: This potion lasts only for 1 hour. The potion makes the drinker extremely lucky. The player of the drinking character may choose any one roll that they make on behalf of the drinking character within the duration and simply place the dice on the result of their choice rather than having to actually roll them.

Merging: This potion allows the drinker to merge other creatures into their own body. The drinker can merge up to seven other creatures, and both the drinker and the other creatures must be willing. Creatures simply step "into" the drinker and disappear along with their items and equipment. While merged with the drinker, the creatures do not take damage if the drinker is hit, and they cannot take any actions other than speaking. The merged creatures can step "out of" the drinker at any time.

Plant Control: The drinker may control all mundane plants and all plantlike creatures in a 30'x30' area up to 60' away. Mundane plants may entangle creatures in their area, but cannot otherwise attack.

Poison: This potion looks like any other, but it is poisonous. Anyone taking even a taste of the potion must save vs STR or die within 1d6 minutes. (Option: save vs Str or in a coma until poison is neutralized, lose 1d2 BP per day per day of coma.)

Polymorph Self: This potion has the same effect as the spell of the same name.

Sight: This potion lasts for 10 minutes. While this potion is in effect, the drinker can temporarily see despite any blindness conditions. Additionally, the drinker may see invisible things.

Speech: The drinker can understand all languages that they hear, and can respond in those same languages. This potion does not give the drinker the power to speak a language unless they first hear it spoken.

Speed: The drinker may move at double normal speed and attack twice per round.

Super Healing: This potion will either cure 2d3+3 body points of damage to the drinker. This potion has an instant effect, rather than a duration.

Treasure Finding: When the drinker concentrates, they can detect the distance and direction to the largest amount of treasure within 360'. The drinker gains no insight about the nature of the treasure or how to get to it.

Undead Control: The drinker can control up to 18HD in total of undead creatures of 9HD or less. The undead will be hostile when the duration ends.

Water Breathing: This potion lasts for four hours, and has the same effect as the spell of the same name.

Scrolls

Most scrolls contain spells and can only be used by arcane or divine casters although a few spell scrolls can be used by any intelligent being. Special scrolls (protection, etc.) can generally be used by anyone able to read them. Roll 1d20 to determine the type of scroll:

1-12: Spell Scroll (50% for Arcane Casters/50% chance for Divine casters); 13-15: Spell Scroll (Anyone); 16-20: Special.

Spell Scroll (Arcane Casters): These scrolls can only be used by arcane spellcasters. They contain 1d6 spells. Roll 1d20 to determine the level of each spell: 1-5: level 1; 6-10: level 2; 11-13: level 3; 14-16: level 4; 17-18: level 5; 19: level 6; 20: level 7 or higher. Each spell may be cast once (or copied into a spellcaster's spell book) then it fades from the scroll.

Spell Scroll (Divine Casters): These scrolls can only be used by divine casters. They contain 1d6 spells. Roll 1d20 to determine the level of each spell: 1-5: level 1; 6-9: level 2; 10-12: level 3; 13-15: level 4; 16-17: level 5; 18-19: level 6; 20: level 7 or higher. Each spell may be cast once (or copied into a spellcaster's spell book) then it fades from the scroll.

Protection from Demons: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Demons cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 20 minutes, or until someone inside the zone attacks a demon in hand-to-hand combat.

Protection from Drowning: All within a 10 foot radius of the reader gain the ability to breathe underwater (or similar non-harmful liquid) for 1 full day.

Protection from Elementals: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of

protection. Elementals cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 30 minutes, or until someone inside the zone attacks an elemental in hand-to-hand combat.

Protection from Lycanthropes: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Lycanthropes cannot enter the zone, but can use missile and spell attacks against those inside the zone. The zone lasts for 60 minutes, or until someone inside the zone attacks a lycanthrope in hand-to-hand combat.

Protection from Magic: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Mortal level magic (whether from spells or items) cannot enter or leave the zone. The zone lasts for 60 minutes, and can only be broken extremely powerful magic, like a wish.

Protection from Metal: Metal weapons or other items cannot harm or damage the reader for a period of 60 minutes.

Protection from Poison: Poison cannot harm the reader for a period of 6 hours, and any poison in already in his system is completely removed.

Protection from Undead: This scroll can only be used once. When read aloud, it produces a 10 foot radius zone of protection. Undead cannot enter the zone nor can they cause direct harm to those within the zone. The zone lasts for 60 minutes, or until someone inside the zone attacks an undead in hand-to-hand combat.

Curse: Anyone who reads this scroll and who fails a save is cursed (GM's choice of effects) until a Remove Curse is successfully cast.

Special Ritual: This scroll contains a special ritual (see Ritual Magic) of the GM's design. The more powerful the ritual the more expensive and complex the ritual should be. Many such rituals should be black magic and require especially gruesome sacrifices.

Potion Recipe: This scroll contains a recipe for one of the potions listed in the above list specifying the materials and brewing procedure/time. Any spellcaster (or any non-caster with the Alchemy advantage) can follow the directions and brew the potion with a successful INT roll.

Wands and Staves

Most wands and all staves are magical devices that contain spell-like enchantments.

Wands are normally thin sticks around 18" long. They can only be used by spellcasters (normally only arcane casters, but there are exceptions). A wand will hold 5d10 charges, and each time it is used one charge will be used up. Once all the charges are used up, a wand is simply a non-magical stick. Treat the effects produced a wand as if created by a 4th level caster.

Staves are the bigger cousins of wands. They are normally 5'-6' long, and made of wood. They can only be used by spellcasters (normally only arcane casters, but there are exceptions). Staves tend to be more versatile and powerful than wands, although they still use charges. A staff will have 10d10 charges when found, and each use of the staff may use one of more of these charges. Once all the charges are used up, a staff is simply a non-magical stick, even powers that do not use a charge fail. Treat the effects produced a staff as if created by a 5th level caster. A staff can be used in melee as if a quarterstaff.

Some wands, called spell wands, simply have a spell impressed on them. A spell caster able to cast the type of spell (arcane or divine) contained in the wand can use the wand to directly cast the spell it is impressed with regardless of the spell's level for the normal cost in HP

Most wands and staves can only be made if instructions for the specific special ritual needed are discovered. The more powerful the wand or staff the more costly in time and material the ritual. Certain wands and staves may only be available as relics of ancient or lost civilizations (GM option) as the method of creating them has been lost.

Spell Wand: A spell wand contains one spell that a spell caster using the wand can directly cast for the normal HP cost (and corruption point cost if the spell is black magic). Determine the level of spell and the spell impressed in the wand randomly.
Spell level: 1-6: level 1, 7-12: level 2, 13-17: level 3, 16-17: level 4, 18: level 5, 19: level 6, 20: higher level (GM choice).

Wand of Cold: Each time a charge is expended, this wand creates a cone of cold, 60' long and 30' wide at the end. All creatures within the cone must take 6d6 damage.

Wand of Enemy Detection: This wand is usable by any spellcaster. Each time a charge is expended, all creatures with hostile intent towards the user within 60' will glow as if on fire. This includes Invisible or hidden enemies; in which case the glow may give away their positions. The glow lasts for 10 minutes before fading.

Wand of Fear: Each time a charge is expended, this wand creates a cone of fear, 60' long and 30' wide at the end. All creatures within the cone must make a saving throw vs MIND or flee in terror for 5 minutes.

Wand of Fireballs: Each time a charge is expended, this wand creates a Fireball up to 240' away. Anyone in the area of effect takes 6d6 damage. Save for half damage.

Wand of Illusion: Each time a charge is expended, this wand creates a Phantasmal Force as the spell of the same name. The caster must concentrate to maintain the illusion.

Wand of Lightning Bolts: Each time a charge is expended, this wand creates a Lightning Bolt up to 240' away and then extending 60' from that point. Anyone in the path of the lightning takes 6d6 damage. Save for half damage.

Wand of Magic Detection: This wand is usable by any spellcaster. Each time a charge is expended, all magical items and active spells within a 20' radius will glow for 6 rounds (1 minute).

Wand of Metal Detection: Each time a charge is expended, the wand will point towards a type of metal named by the user if there is at least 1,000cn of it within 20'.

Wand of Negation: Each time a charge is expended, this wand will cancel the effects of another wand or staff. If the effect that is being negated is an effect with a duration, it will be negated for a single round.

Wand of Paralyzation: Each time a charge is expended, this wand creates a cone 60' long and 30' wide at the end. All creatures within the cone must make a saving throw or be paralyzed for 1 hour.

Wand of Polymorphing: Each time a charge is expended, this wand produces the effect of either a Polymorph Self on the user of the wand or a Polymorph Other on a target that the wand is pointed at. Unwilling targets may make a saving throw to avoid the effect.

Wand of Secret Door Detection: When this wand is activated, it will point the user towards all secret doors within 20'. This expends one charge per secret door revealed.

Wand of Wizardry: This wand holds a reservoir of hit points which the wielder can use to cast spells instead of (or in addition to) his own. This reservoir will hold 10d4 hit points. When the reservoir drops below 50% capacity, the wand will automatically use a charge and refill the next day (at dawn).

Wand of Trap Detection: When this wand is activated, it will point the user towards all traps within 20'. This expends one charge per trap revealed.

Staff of Cancellation: This staff may be used by any character, but may only be used once. When activated, it will permanently drain any magical item (except an artifact) that is touched by it of all power. The GM may require an attack roll to touch a magic item carried or worn by another creature, normally against armor class 10.

Staff of Dispelling: This staff is usable by any spellcaster. When the staff is used and a charge is expended, it will cast Dispel Magic as if by a 5th level caster, except with a range of only touch. The staff can be used to dispel magic items. When it is used against an item and a charge is expended it will automatically destroy any potion or scroll; and will cause any other magic item to temporarily cease working for 1d4 rounds. Note that magic weapons and armor still work as mundane weapons and armor even when their magical properties are temporarily suppressed.

Staff of Harming: This staff is usable by divine casters only. Whenever a creature is struck by the staff, the wielder may expend one charge to inflict an additional 1d6+1 damage to the creature in addition to the normal damage that the staff does. The wielder of the staff can also activate it as normal to use any of the following effects as if casting the reverse of the curing spells (using up a variable number of charges):
2 charges = Cause Blindness
2 charges = Cause Disease
3 charges = Cause Serious Wounds
4 charges = Create Poison

Staff of Healing: This staff is usable by divine casters only. The wielder may activate the staff to cure 1d2 body damage to a target. This does not use a charge, but each target can only be cured once per day by the staff. The staff can also be activated to cure other things, although this uses charges as follows:
1 charge = Cure Blindness
1 charge = Cure Disease
2 charges = Neutralize Poison
3 charges = Restoration

Staff of Power: This staff holds a reservoir of hit points which the wielder can use to cast spells instead of (or in addition to) his own. This reservoir will hold 10d10 hit points. When the reservoir drops below 50% capacity, the staff will automatically use a charge and refill the next day (at dawn).

Staff of Striking: Whenever a creature is struck by the staff, the wielder may expend one charge to inflict an additional 2d6 damage to the creature in addition to the normal damage that the staff does.

Staff of Withering: The wielder of the staff may activate the staff and expend a charge to touch a target and cause the target to make a saving throw or age 10 years. This staff does not work on undead.

Rings

Magical rings like those listed below are generally beyond the ability of current civilizations to create. They are the creations of ancient and/or lost civilizations.

A magical ring must be worn on a finger or thumb to operate, and a character can only wear one magical ring per hand. If a second ring is put on the same hand as an existing ring, neither ring will function (with the exception of a Ring of Weakness). Rings are usually either constant in effect or are activated by a "use item" action.

Animal Control: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Animal Control with the exception that the wearer only gets a single attempt to control creatures per use.

Delusion: This ring will appear to function as a different type of ring if an Analyze spell is used on it. Once the ring is worn, it will be completely nonfunctional, but cannot be removed without a Remove Curse being cast on it.

Djinn Summoning: Once per week, the wearer of this ring can summon a djinn, who will serve them for a day. If the djinn is killed, the ring loses its magical power.

Ear: Three times per day this ring can be removed from its wearer's finger and placed against any surface. Until the wearer recovers the ring, they will be able to hear everything that happens around the ring as if their ear were in the ring's location.

Elemental Adaption: To determine the exact type of ring found, roll 1d100: 01-21 = Air, 22-42 = Earth, 43-63 = Fire, 64-84 = Water, 85-91 = Air and Water, 92-98 = Earth and Fire, 99-00 = All Elements.

The wearer of the ring is protected from environmental hazards in the elemental plane that matches the elemental alignment of the ring, and is able to breathe in those planes despite lack of air.

Fire Resistance: This ring makes its wearer immune to natural fire, gives a +2 bonus to all saving throws against magical fire, and reduces all magical fire damage done to the wearer by one point per die (to a minimum of one point per die).

Human Control: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Human Control with the exception that the wearer only gets a single attempt to control people per use.

Invisibility: This ring may only be used once per turn. When activated it affects the wearer as if they had cast an Invisibility spell on themselves.

Life Protection: This ring will protect its wielder from 1d6 levels worth of energy drain. If overloaded (for example if it has only a single level of protection left and the wearer is drained two levels) then it will successfully protect the caster and then turn to dust. If it is exactly used up without being overloaded, it will become a Ring of Protection +1 once its levels of protection have been used up.

Memory: This ring can only be used by a spell caster. Once per day, the caster may activate it to recover one spell that they have cast within the previous ten minutes. That spell will be available for casting again as if freshly prepared.

Plant Control: This ring may be used once per turn. It acts as if the wearer had drunk a Potion of Plant Control with the exception that the wearer only gets a single attempt to control creatures per use.

Protection: This ring gives a bonus to its wearer's armor class and to all saving throws equal to its magical bonus. If a character wears a Ring of Protection on both hands, only the larger of the two bonuses applies.

Quickness: Once per day, the wearer of this ring can move at double speed and take two actions per combat round for ten minutes.

Regeneration: The wearer of this ring will recover 1 hit point per ten minutes, and can slowly re-grow lost body parts. A limb will re-grow over the course of a week, whereas a finger or ear would re-grow over the course of a single day. This ring will not stop working when the wearer is on 0 hit points, and will not prevent the wearer from dying. It will also not heal damage from fire or acid (although will re-grow limbs lost to fire or acid).

Remedies: Once per day, this ring will duplicate the effect of a Cure Blindness, Cure Disease, Remove Curse or Neutralize Poison spell as if cast by a 6th level divine caster. The spell

can be cast on the wearer or on a target that the wearer touches.

Safety: This ring acts like a Potion of Luck except that it has 1d4 charges and uses up a charge each time a die is placed instead of rolled. Once all the charges have been used up, this ring becomes non-magical.

Seeing: Once per day this ring enhances the character's sight for 30 minutes: a polymorphed creature or object will appear as it really is, superimposed with its present form. When looking at a person one may tell his alignment, class, level, and general intentions. One may also see invisible, displaced, ethereal and astral objects. Blindness is temporally "cured" when this ring is active.

Ring of Shooting Stars: Once per day, this ring can unleash 1d6 meteors that behave as the *Lightning Bolt* spell, but do 3d6 damage.

Spell Eating: This ring appears to Analyze spells to be a Ring of Spell Turning and operates as one. However, if the wearer of the ring casts a spell themselves, the ring immediately "eats" all the remaining prepared spells that the caster has. The ring can then no longer be removed except by the use of a Remove Curse cast by a 25th level caster. Once the curse has been activated, the wearer can prepare new spells as normal, but will lose them again when they next cast one.

Spell Storing: This ring will contain 1d6 different spells (determined randomly as if spells on a Spell Scroll) when found. The wearer of the ring can cast these spells once each, even if not a spell caster. The spells will always be cast as if by a caster of the minimum level needed to cast them, even if the wearer of the ring is a caster of higher level. Each spell can be recharged by having a spell caster cast it directly into the ring. The ring cannot "catch" spells generally cast at the wearer; the spells must be cast directly at the ring with the purpose of recharging it.

Spell Turning: Each day, this ring will reflect the first 2d6 spells (roll each day) cast at the wearer back at their casters. This only affects actual spells, not the spell-like powers of monsters or magic items. Once it has absorbed as many spells as it can, the ring has no other powers until the following day.

Survival: This ring will contain 1d100+100 charges when found. Each charge spent will allow the wearer to go for 24 hours without food and drink or for 1 hour without breathing. When the ring is down to its last five charges, it will turn black; and when it runs out of charges it will crumble to dust.

Telekinesis: This ring can be activated to produce an effect identical to the Telekinesis spell, capable of moving objects weighing up to 2,000cn.

Truth: Three times per day, this ring can be activated to telepathically warn its wearer whether a spoken statement that they have just heard is true in the opinion of the speaker. Note that there is a difference between the speaker being untruthful and the speaker merely being honestly wrong about something.

Truthfulness: This ring appears to be a Ring of Truth when examined with an Analyze spell, and will work as a Ring of Truth. However, once worn it cannot be removed except by a Remove Curse spell cast by a 26th level caster, and it compels its wearer to always speak the truth. The wearer may not knowingly lie while wearing the ring (but the ring doesn't prevent them from accidentally being wrong).

Truthlessness: This ring appears to be a Ring of Truth when examined with an Analyze spell, and will work as a Ring of Truth. However, once worn it cannot be removed except by a Remove Curse spell cast by a spellcaster of at least 12th level, and it compels its wearer to always speak lies. The wearer may not knowingly make any true statement while wearing the ring (but the ring does not prevent them from making a

statement that is accidentally true if they genuinely don't know that it is).

Water Walking: This ring allows its wearer to walk on the surface of any liquid without sinking.

Weakness: 1d6 rounds after this ring is worn, it will immediately lower its wearer's strength score to 3. The ring cannot be removed until it has had a Remove Curse spell cast on it.

Wishes: This ring will grant from one to four wishes (as the Wish spell) before crumbling into dust. To determine the number of wishes contained in the ring, roll 1d10: 1-4 = 1, 5-7 = 2, 8-9 = 3, 10 = 4.

X-Ray Vision: The wearer of this ring can see up to 30' through stone or up to 60' through wood. It cannot be used to see through metal. To use the ring, the wearer must stand still and concentrate and can view a 10'x10' area per use. It takes 10 minutes to scan such an area, and the ring can only be used once per hour.

Ancient and Wondrous Items

Rings of power were not the only magic items produced in ancient times by civilizations all-but-forgotten today. Many wonderful magic items existed then. Most of these items are very rare today even if they were fairly common ages ago. Some of these items may be one of a kind or have never existed outside of legends. Like magic rings, the methods used to create these items are generally lost to the mists of time.

Amulet of Scrying Protection: This item protects its wearer from being scried on via a Crystal Ball, and makes them immune to all types of ESP.

Bag of Devouring: This bag looks like a normal sack, but any non-living item placed entirely within it disappears from view and weighs nothing while in the bag. It will hold items up to 10,000cn in weight, providing the items fit wholly within it (i.e. they are 5'x1'x1' or smaller). Items placed within the bag can be found by touch by anyone reaching into the bag and can be withdrawn. However, any item left in the bag for more than two hours will vanish completely. This will not affect living creatures that are stuffed into the bag.

Bag of Holding: This bag looks like a normal sack, but any non-living item placed entirely within it disappears from view and weighs nothing while in the bag. It will hold items up to 10,000cn in weight, providing the items fit wholly within it (i.e. they are 5'x1'x1' or smaller). Items placed within the bag can be found by touch by anyone reaching into the bag and can be withdrawn. *Boat, Undersea:* This boat can be operated as a fully functional skiff. However, when a command word is given, it will dive under the water while simultaneously radiating a Water Breathing effect that protects all passengers who are touching the boat. The pilot of the boat can control its movement underwater as if on the surface.

Boat, Folding: This is an ordinary wooden rowboat or sailboat, but when it is not immersed in water, it can be collapsed into a 6-inch cube with a button on one side. If the button is pressed, the boat opens up instantly.

Boots of Dancing: These boots function as Boots of Speed until such time as the wearer is in combat or attempting to flee from same. At that point the wearer will be unable to do anything but dance, effectively reducing her speed by half.

Boots of Leaping: The wearer of these boots can make leaps of up to 10' vertically and up to 30' horizontally.

Boots of Levitation: The wearer of these boots may Levitate as per the spell of the same name. There is no limit to the duration of the levitation. *Boots of Speed:* When travelling overland, the wearer of these boots travels at the speed of a riding horse. However, the wearer can only move at this speed for a single day and then must rest for a day.

Boots of Speed: By speaking the command word, these boots double the wearer's speed, but they require the wearer to rest for twice as long as they were used.

Bowl of Water Elementals: Once per day, this bowl can be filled with water and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice water elemental. Conjuring the elemental takes 10 minutes.

Bracers of Armor: These leather bracers can be worn by anyone, regardless of their training in armor. While worn, they confer a bonus to AC. Roll 1d6 when found: 1-3: +1 AC, 4-5: +2 AC, 6: +3 AC.

Brazier of Fire Elementals: Once per day, this brazier can be lit and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice fire elemental. Conjuring the elemental takes 10 minutes.

Broom of Flying: This broom will carry its owner through the air at a speed of 80' per round. The owner of the broom must concentrate to move, and the broom will hover if the owner stops concentrating. The broom can also carry a passenger, but in this case its speed is reduced to 60' per round.

Cape of Escape: Three times per day, the wearer of this cape can, with a flourish, teleport up to 60 feet, leaving behind a bank of smoke in his wake similar to the *Obscurement* spell.

Censer of Air Elementals: Once per day, this censer can be filled with incense and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice air elemental. Conjuring the elemental takes 10 minutes.

Chime of Time: This simple metal chime can be commanded to keep track of time. It will sound every hour until commanded to stop, and can be clearly heard within a 60' radius. If the chime is in a Silence 15' Radius spell when it is time to chime, it will automatically dispel the spell as it chimes. The chime can also be used like a hourglass. If commanded, it will slowly change color from one end to the other taking exactly one hour to do so.

Crystal Ball: A crystal ball is a scrying device that can only be used by a spellcaster. The crystal ball can be used three times per day to see any place or object that they desire; and a current image of that place or object will appear and last for 10 minutes. The clarity of the image will be based on the familiarity that the user has with the object or area.

Crystal Ball of Suggestion: This Crystal Ball is being watched by a malevolent intelligence, which will show the user what it wants her to see rather than what she wants to see. It will finish by casting *Suggestion* on the user.

Crystal Ball with Clairaudience: This works just as a normal Crystal Ball, except that by concentrating the user can hear what is going on at the far end as if through the ears of any living creature shown in the ball. Only a spellcaster can use this item.

Crystal Ball with ESP: This works just as a normal Crystal Ball, except that by concentrating the user can read the thoughts of the main subject of the vision if it is a living creature. Only a spellcaster can use this item.

Decanter of Endless Water: On command, this glass bottle pours out one gallon of clean water, either fresh or salty according to the user's wishes. A rare few have a second function, producing a gushing torrent of water on command.

Deck of Illusions: When thrown down, this deck of cards creates illusions equal to the *Phantasmal Forces* spell. The face cards (Jack, Queen, King, and Ace) instead produce *Spectral Forces*. Each card only functions once, becoming a normal (if finely made) playing card forever after.

Deck of Many Things: This special deck of cards has only 20 cards, but each has an amazing power. The owner and anyone else present may draw as many times as they wants, but the deck shuffles after every draw. When all the cards have been drawn or everyone has agreed to stop drawing, they reassemble and vanish, leaving only the sound of mischievous laughter. Sample effects: Placed under a geas, granted one wish, instantly killed, gain one level instantly, add one point to a single stat.

Displacer Cloak: This item makes the wearer appear to be 5' from their actual position. This makes all attacks against the wearer take a -2 penalty to their to-hit rolls, and gives the wearer a +2 bonus to all saving throws.

Drums of Panic: These are a pair of large kettle drums. When played, they have no effect on creatures within 10' of them, but creatures from 10' to 240' from them must make a saving throw vs MIND or flee in terror for 30 minutes.

Dust of Disappearance: When this dust is sprinkled over a creature or object, it becomes invisible as if under the spell *Invisibility* for 1 turn.

Dust of Appearance, when sprinkled, reveals any invisible creature or object within 5 feet of where it settles.

Efreeti Bottle: This 3' tall heavy jug contains an efreeti. The stopper may be opened once per day, and the efreeti will come forth and serve the opener. If the efreeti is slain, the bottle becomes non-magical. The efreeti is reluctant to serve, and will do its best to use loopholes in the commands that it is given in order to cause harm to the owner of the bottle.

Egg of Wonder: This is a painted hollow eggshell. When dropped or throw (up to 60') it will break and an animal will emerge and grow to full size. For the next hour, the animal will obey the user of the egg to the best of its ability; and then it will disappear. To determine the type of animal that is summoned, roll 1d12: 1 = Ape (Rock Baboon), 2 = Bat (Giant), 3 = Bear (Black), 4 = Bear (Grizzly), 5 = Boar, 6 = Cat (Mountain Lion), 7 = Cat (Panther), 8 = Ferret (Giant), 9 = Lizard (Giant Gecko), 10 = Lizard (Giant Draco), 11 = Snake (Racer), 12 = Wolf.

Elven Boots: These boots give their wearer a Move Silently ability of 75%, like a thief.

Elven Cloak: This cloak is just like a Ring of Invisibility except that its invisibility is not perfect. When the wearer is in the presence of creatures that might notice them, their faint outline will be seen if a 1 is rolled on 1d6.

Figurine of Wonder: This is a small carved statuette of an animal. It works like an *Egg of Wonder*, but when time runs out (or if it dies), rather than disappearing it turns back into a figurine. It always produces the same kind of animal, and it can be used once per week.

Flask of the Alchemist: This flask can be filled with one pint of any ordinary liquid. Additionally, it can be used to produce a single dose of 1d4+1 randomly-selected potions. This latter ability only works as many times per week as the number of different potions it can make.

Flask of Curses: When the wax seal on this bottle is broken, the one who broke it will be affected by a random curse.

Flying Carpet: This carpet will carry one passenger at a speed of 100' per round, two at a speed of 80' per round, three at a speed of 60' per round, four at a speed of 40' per round, or five at a speed of 20' per round. The owner of the carpet must concentrate to make it move, and the carpet will hover in place if the owner stops concentrating.

Gauntlets of Ogre Power: The owner of these gauntlets has a strength of 18 while wearing the gauntlets, but taking them off return's the owner's strength back to its normal value.

Girdle of Giant Strength: Anyone who wears this girdle does double damage with whatever melee attacks they make.

Goggles of Infravision: While wearing these lenses, you can see in the dark as well as you can in light.

Hat of Disguise: Three times per day, the wearer of this hat can alter their appearance as *Change Self*, including their clothes.

Helm of Blindness: Anyone wearing this helmet is immediately made blind. The blindness cannot be cured until the helmet has been removed, and the helmet cannot be removed without a Remove Curse spell being cast on it.

Helm of Brilliance: At will, the wearer of this helm can cast *Light*. Three times per day, the wearer can cast *Wall of Fire*. Also, the wearer gains a +10 bonus to any saves against fire.

Helm of Reading: This helmet allows the wearer to read any language or cipher, and allows them to identify magical scrolls. However, it does not allow the wearer to use Spell Scrolls if they are not normally able to do so. This helmet is rather delicate, and has a 10% chance of being broken each time its wearer is struck in combat.

Helm of Telepathy: The wearer of this helmet can transmit their thoughts to any creature within 60'. The target creature will understand the thoughts of the wearer despite language differences. The wearer may also use the ESP spell to read the thoughts of others.

Helm of the Sea: While worn, this helmet allows the wearer to breathe and fight normally with any weapon she can use underwater, and grants her buoyancy enough to swim even if heavily armored.

Helm of Teleportation: This helm is only usable by arcane casters. The wearer of the helm may use the Teleport spell as often as they like to teleport themselves, with the normal chances of failure. The wearer may also use the helm to Teleport another creature (again, as if casting the spell). However, doing this discharges the helmet and it can no longer be used for any teleporting until it is recharged by having a Teleport spell cast into it.

Horn of Blasting: This horn can be blown once per ten minutes. When it is blown, it creates a cone of sound 100' long and 20' wide at the end. Everyone in the area must take 2d6 damage and make a saving throw vs STR or be deafened for ten minutes. Buildings and ships in the area of effect take 1d8 damage.

Horn of Valhalla: Once per day, this horn may be blown to summon the souls of 2d4 brave warriors, who fight alongside the one who blew it as Berserkers for one hour. Their weapons count as magical.

Horseshoes of Swiftness: Function as *Boots of Speed*, but can be attached to the feet of any horse, pony, donkey, or mule (including magical horse-like creatures such as pegasi). All four must be worn for it to work, but the horse will never throw a shoe while they are attached.

Hurricane Lamp: When this lamp is opened for the first time in a day, a hurricane of wind and rain emerge. Everyone within 30' of the lamp is knocked to the floor for three rounds, and must make a saving throw vs. DEX to avoid having all loose items or items held or carried by them (including weapons, but not including clothing) is scattered throughout the area. Once the hurricane has ended, the lamp may be used as a Lamp of Long Burning, although the hurricane will reset each day and must be triggered again before the lamp can be used.

Incense of Miracles: This incense can burn for up to four hours. A cleric or druid who prepares spells while the incense is lit does so as if she were two levels higher, up to and including having the next level of spells.

Ioun Stone: Mined from the core of a dead star, there are eight kinds of ioun stone, each with different effects. When activated, they can slowly orbit around their owner's body if she so desires. Roll 1d8 to determine type: 1-Red (+1 to STR) 2-Orange (Reduce all damage by 1) 3-Yellow (+1 to DEX) 4-Green (User does not need to eat, drink, sleep, or breathe unless they want to) 5-Blue (+1 to MIND) 6-Purple (+1 to CHA) 7-White (Regenerate 1 BP/turn) 8-Prismatic (+1 to all d20 rolls)

Item of Delusion: Roll randomly on the table again. Although this is in all other respects a perfectly normal example of a similar item, whoever touches it is cursed to believe it is the indicated item despite all logical evidence to the contrary. (For instance an ordinary broomstick might be mistaken for a *Broom of Flying*).

Lamp of Long Burning: This lamp must be filled with oil and lit like any other lantern, but it will burn forever without using any of the oil that it contains. The lamp can be put out and re-lit repeatedly like any other lamp. If the lamp is ever completely submerged in water while lit, it will immediately stop working and lose its magical properties.

Loadstone of Weight: Whoever touches this heavy rock is unable to discard it until the curse is removed. 20% of these loadstones are also *items of delusion* that lead the bearer to believe that it is actually an enormous and valuable gemstone.

Medallion of ESP: This medallion allows the wearer to use the ESP spell at will, with a range as given in the item listing (either 30' or 90'). However, each time it is used, there is a 1 in 6 chance that instead of letting its wearer read minds, it will broadcast its all of its wearer's thoughts out loud for the next ten minutes.

Mirror of Life Trapping: If the owner of this mirror presents it to a creature of human size or smaller and activates it, the creature must make a saving throw vs. MIND or be sucked into the mirror, complete with everything they are wearing and carrying. The mirror can hold up to 20 creatures, who exist in a state of suspended animation while in the mirror, not needing food, drink or air and completely unable to take any actions.

Anyone looking into the mirror can see the reflections of the faces of all those trapped inside, and can wake any of them up temporarily to talk with them. No special communication powers are granted, so the viewer and victim need to share a common language to talk in. If the mirror is broken, all the creatures inside are instantly freed. However, the only way to free a single creature without breaking the mirror is to is a Wish spell.

Muzzle of Training: This muzzle will automatically reshape and resize itself to fit any creature with a mouth. When put on a creature and locked with a command word, the creature is magically prevented from biting, talking and casting spells; but it can still eat, drink and breathe normally. The owner of the muzzle can unlock it with a second command word, but otherwise it is locked with the equivalent of a Wizard Lock cast by a 6th level caster.

Nail, Finger: This appears to be a Nail of Pointing if checked with an Analyze spell. However, when someone tries to use it as such it will disappear. The next time that person tries to be unnoticed (by disguise, Invisibility or hiding), an illusion of a large glowing hand will appear above their head pointing them out. After that first instance, there is a 25% chance each time the person tries to go un-noticed that the hand will re-appear. This will continue to happen until the victim has a Remove Curse spell cast on them.

Nail of Pointing: This appears to be a simple 6" iron nail. Once per day, it can be commanded to point to a mundane (not magical or living) object, and for the next ten minutes the nail

will point at the closest instance of that type of object (distance is irrelevant).

Ointment: This creamy white salve is normally found in small jars. To use the ointment, the whole jar must be applied to someone's skin. When the ointment is applied in this manner, it will have a random effect, rolled on 1d6: 1 = The user gets a +2 bonus to armor class and saving throws for the next ten minutes, 2 = The user is healed 2d6+2 points of damage, 3 = The user must make a saving throw vs. STR or die, 4 = The user takes 2d6 points of acid damage, 5 = The user is cured of all burn damage, whether magical or normal, 6 = The user's skin turns bright orange for the next 1d4 months.

Pouch of Security: If this large sack is stolen, it will shout "Help! I am being stolen!" in common repeatedly for the next hour. The sack's owner can command it to be quiet before the end of the duration.

Quill of Copying: When supplied with 1,000gp worth of rare inks, any spell user can command this quill to copy a Spell Scroll containing one or more spells of a type that they can cast onto a blank parchment. There is a 75% chance that the spells will be copied correctly, creating two identical Spell Scrolls, and a 25% chance that the quill will burst, becoming useless and depositing its ink over both parchments (both ruining the original and failing to make a copy).

Ring Gates: Anything that passes through one of these two silver hoops (assuming it can fit) comes out of the other gate, preserving its momentum as it does so. One gate is set with a sapphire, the other is set with a carnelian.

Rope of Climbing: On command, this 50' rope will wriggle along the ground like a snake, and even up walls and on ceilings. It can fasten itself onto any solid protrusion on a surface that it is climbing up, and will support up to 10,000cn of weight. A second command will cause the rope to loosen itself and re-coil.

Scarab of Protection: This charm has 2d6 charges. Each time a curse is placed on the wearer, it will immediately target the wearer with a Remove Curse as if by a 36th level caster. Each Remove Curse uses up one charge. Additionally, it will block any Finger of Death or Obliterate spell (the reverse of the Raise Dead and Raise Dead Fully spells) cast at the wearer; and this also uses up one charge. When the scarab has run out of charges, it crumbles to dust.

Ship, Flying: Anyone with skill at sailing can pilot this ship, which in the absence of wind (or when sailing into the wind) can magically prepare itself at around 15 miles per hour. Most flying ships are at Small Ships or Large Ships, but a few Galleys and Longships are known to exist.

Slate of Identification: This 3' square framed sheet of slate is used to identify magic items. The slate has ten charges per day, and is used by placing it on a horizontal surface and then placing a magic item on it. When activated, the slate will identify the magic item (if it has enough charges left to do so) and chalk writing will appear on the slate indicating type of magic item and what command words it has (if any). If asked to identify an artifact, the slate will shatter.

The slate is incapable of identifying cursed items, even those that fail to fool an Analyze spell (such as a Potion of Poison). If it is asked to identify a cursed item, the slate will identify it as being a random type of similar but useful item.

The number of charges needed to identify different types of item are: Potion = 2 charges, Scroll = 3 charges, Ammunition = 3 charges, Wand = 4 charges, Staff = 5 charges, Weapon = 6 charges, Armor or shield = 7 charges, Ring = 8 charges, Wondrous item = 9 charges.

Spoon of Sustenance: This wooden spoon, when placed in a bowl or pot and stirred three times, fills the container with

bland-tasting but highly nutritious gruel, which can be flavored with magic.

Stone of Earth Elementals: Once per day, this stone can be buried in the earth and used to cast a Conjure Elemental spell except that it will only conjure a 12 hit dice earth elemental. Conjuring the elemental takes 10 minutes.

Talisman of Travel: This talisman allows the wearer to cast either a Conjure Elemental or Summon Elemental spell in reverse. Instead of the spell summoning an elemental to the caster, the reversed spell will transport the caster to the elemental plane of their choice. While the caster continues to wear the talisman, they are protected from environmental damage on the elemental plane, such as choking or burning, and can breathe normally.

Tome of the Archwizard: 75% of Tomes of the Archwizard contain every Magic-User spell ever invented. The rest contain every Illusionist Spell ever invented. Additionally, the book seems to have infinite pages for note-taking. Unlike other spellbooks, whoever possesses it is capable of reading the spells within (whether or not she can cast them) after one week of study.

Tome of Training: By spending one day studying the insights recorded in this book, a member of the indicated class instantly gains one level. Each Tome of Training only works once per reader.

Wheel of Floating: When put on a cart or wagon, this wheel will allow the cart to be pulled on the surface of water rather than sinking. A single Wheel of Floating will hold up a vehicle of up to 10,000cn in weight, with every additional Wheel of Floating adding 5,000cn to that weight. Although these wheels will keep the vehicle above water, they do not effect whatever animal or animals are pulling the vehicle.

Wheel, Square: This wheel is the size of a wagon or cart wheel, but is square rather than round. It cannot be used on normal terrain, but when fitted to a wagon or cart it will allow the cart to travel over desert or mountain as if being pulled along a road.

Magic Weapons and Armor

Basic magic weapons and armor can be made by any master weapon smith or master armorer, provided he or she has enough meteoric iron and time. A +1 item will take a full year to create. A +2 item will take 4 more years (total of 5 years). A +3 item is a lifework, requiring first creating a +2 item and doing 20 years additional work on it -- for a total of 25 years. +4 and +5 items are possible in theory but would be the work of generations of craftsmen as a +4 item would require 125 years to create and a +5 item 600 years to create, with the original/current craftsman's specially trained apprentice taking over the task -- if the chain of master training replacement gets broken, the item can no longer be successfully improved. Weapons can have a damage bonus as well. It takes 50% of the time listed above to enchant a magic weapon damage bonus. If a weapon is to have both a damage and a hit bonus, the damage bonus must be added first then the hit bonus -- but the entire procedure must be one continuous enchantment operation.

Some magic weapons and armor have special powers such as the ability to shed light, better attack or damage certain types of creatures, magic effects similar to spells, etc. Learning to enchant such weapons takes years or research (or finding someone else's research notes and figuring them out). The exact powers that can be enchanted in this manner are up to the GM, but some of these rare abilities are listed below.

Cursed Weapons: Until the curse is broken by a *Remove Curse* spell, the wielder of a cursed weapon cannot discard the weapon and cannot draw any other weapon unless they are already holding the cursed one.

Dancing Weapon/Shield: Weapon fights on its own within 30 feet of owner, as a +1 weapon during first round of combat, a +2 weapon during second round of combat, and a +3 weapon during third round of combat. Afterwards, its owner must direct it to sheathe itself or attack a new opponent or else it acts as an otherwise ordinary (i.e. non-dancing) +1 weapon for 24 hours. Dancing shields work similarly, but defend instead of attack.

Ethereal Armor: Wearer is able to become incorporeal and can only be hit by other incorporeal creatures such as wraiths. This ability functions 50 times.

Fire Brand: Weapon is covered in licking flames, dealing 1d6 extra fire damage on a hit. The flames shed light in a 30' radius.

Fiery Armor: Any creature that makes a melee attack against the wearer takes 1d3 fire damage if they hit.

Frost Brand: Weapon is always as cold as ice, dealing 1d6 extra cold damage on a hit. Also keeps rations fresh for longer due to refrigeration.

Intelligent weapon: 10% chance of being able to cast a random spell of level 1d3 1/day. Can communicate with owner, 1 in 4 chance of being able to talk. Some are petulant and act as a cursed weapon unless they get their way.

Armor of Invulnerability: The character is immune to critical hits (except by Vorpal weapons) and only hit by magic weapons.

Possessed Armor: Contains the ghost of a previous wearer, who may or may not be able to take the armor for a joyride when it's not being worn and may or may not be willing to cooperate with the new owner.

Vorpal Weapon: Only weapons with some sort of bladed edge can be Vorpal. On a critical hit, a vorpal weapon slices off the head of its target, so long as it has a head. Unless the target has another head or is something that doesn't rely on its head to survive, it dies instantly.

NOTES ON "OLD SCHOOL" PLAY

While Microlite74 is designed using tried and true "D20" systems filtered through the Microlite20 rules, it is designed for a completely different style of play than many players who started to play in the last 20 years or so may be used to. This section will give a brief overview of "old school" play.

What is "Old School" Play?

There are two major styles of roleplaying games. The first (and older) style says "Here is the situation. Pretend you are there as your character, what do you want to do?" This style has been superseded over the years with a style that says "Here is the situation. Based on your character's stats, abilities, skills, etc. as listed on his character sheet and your knowledge of the many detailed rules of the game, what is the best way to use your character's skills and abilities and the rules to solve the situation?" Old school play strongly favors the first style and frowns on too much of the second.

Here are some major points where old school play is different:

Heroic, not Superheroic: Old school play, especially at low to mid levels, is about fairly normal people put in situations where they can be heroes, not about extraordinary people doing things that would make a four-color comic book superhero proud -- and at first level yet. Just like in the real world, the more a character

improves his abilities, the harder it is to improve them further, while new characters may advance rapidly, the higher their level the more effort and time (and XP) it takes to advance to the next level.

Achievement, not Advancement. Many modern games are often all about what special feats, extra classes and special game mechanics the players wish to obtain for their characters as they increase in level. In old school games, a character's abilities are generally predetermined by his character class, so old school games focus on the things that the characters wish to accomplish in the game world rather than on what game mechanics they want to acquire. Level advancement is often much slower than in modern fantasy RPGs which makes in campaign achievements even more important as a measure of character success.

No Skills: Unlike in most modern RPGs, there aren't any skills in Microlite74 -- not even the streamlined four skills of Microlite20. Players are intended to have their characters act like adventurers. So don't search your character sheet or the rules for the perfect solution in Microlite74. Instead, you just tell the GM what your character is trying to do. Note that you are assumed to be competent with all common activities associated with your class and background. If you need to keep a door open or shut, you might tell the GM your character is using a spike to keep the door open or closed. A ten foot pole is your friend for checking for traps. Searching a room means looking in and under objects, not rolling a skill check. While this may seem strange at first, you will quickly learn to appreciate the freedom it gives you. No longer are you limited to the skills and feats on your character sheet, you can try anything your character should be capable of trying. You might not succeed, but the rules generally will not stop you from trying.

Limited Magic Items: Modern fantasy RPGs often assume that magic items are easy to buy and/or to create. In most old school campaigns, magic items are relatively rare and hard to create. Only potions and scrolls are generally relatively easy to create or purchase. Other magic items are seldom found for sale (and are very high priced when they are found for sale) and are usually very expensive in money and time to try to create -- often requiring rare ingredients that the characters must quest to find. Therefore characters are usually limited to the magic items they find in treasures or take from defeated enemies on adventures.

No Assumption of "Game Balance": Old style game sessions aren't about carefully balanced characters (who are all able to shine equally at all times) who only run into situations carefully designed by the GM to be beatable by the characters presently in the party and to provide treasure that fits their current level. Instead, part of player skill is learning to evaluate situations so situations well over the party's current abilities or which will waste the party's resources for little gain can be avoided. Don't assume that you can beat every monster that you encounter, running away from monsters too tough to handle can mean the difference between character survival and character death. You can also get creative in how you defeat monsters. Perhaps those goblins you bypassed could be talked into (or tricked into) attacking that giant you know you can't beat, perhaps killing it for you or at least softening it up so your party has a chance of defeating it and living to tell the tale. Also remember that treasure can be turned into XP, even if you can't kill the monsters, perhaps you can still acquire some of their treasure. Part of the skill of playing "old school" style is coming up with creative solutions when a direct attack is likely to fail.

It's Not All About Combat: Many modern fantasy RPGs have made combat the star of the system, combats in these systems are time-consuming and very crunchy with rules for everything. Microlite20 avoids this by having a fast-playing abstract combat system. Microlite74 takes this one step further, combat isn't intended to be the main source of fun in the game. The game is as much about exploration and treasuring finding as it is about combat. Sure, you are going to have to fight things to explore and find treasure, but always remember that combat may not be the best or safest way to handle every situation. Think before

you rush into combat. After all, it's not the only way to earn a good pile of experience -- and monsters don't have to be killed to be defeated (and get XP for them).

Reality/Common Sense Trumps Rules: Old-school games use loose and simple rules that cover average cases and the GM and players are supposed to apply common sense and their knowledge of how reality works to cover the unusual and edge cases. "Reality/Common Sense" as interpreted by the GM always trumps the written rules if they conflict. For example, a character has a magic weapon and the rules for that weapon say it always causes its target to fall prone if hit. The character hits a gelatinous cube moving down the corridor toward them with the weapon. The rules say that the target should fall and be in a prone position. Reality, however, says otherwise. Gelatinous cubes don't have a top and bottom (so prone penalties make no sense) and a 10 foot cube can't fall when it is moving through a 10 foot corridor. In some modern games, the rules would be applied anyway and the cube would suffer the effects of falling prone no matter how little sense that makes. In an old school game, the GM ignores the rule because it makes no sense in the specific situation.

Forget "Rules Mastery": As some of the above differences have hinted, player skill in "old school" style games isn't about mastering the game rules so you can solve any problem by knowing the right combination of rules from 20 different rule books. Microlite20 is designed to be rules light and Microlite74 tries to stress this even more by encouraging GMs to make rulings on the spot taking into account specific circumstances instead of trying to hunt up special cases in the SRD or a stack of optional rule books. This is faster and helps players immerse themselves in their character and the game world instead of in rule books. GM rulings will be based on specific circumstances and common sense, not just on the written rules and prior rulings. Just because it requires a certain roll to jump one 10 foot pit does not mean all 10 foot wide pits will require the same roll. After all, all sorts of variables can affect the roll (terrain, weather, lighting, pressure to jump quickly, etc.). Players need to remember that these rules are merely a tool for the GM. They are just guidelines for the GM, not something written in stone that the GM must obey. If something herein does not work right in your campaign (or the GM just does not like a rule), the GM is well within his right to change it. Microlite74 is not a game for rules lawyers or for those who believe that the game designer always knows what is best.

No Script Immunity: In most old school games, player characters do not have any form of script immunity. Player characters can die, lose equipment, suffer strange magical effects and other often unpleasant consequences if they are not careful or are just very unlucky. On the other hand, there are no rules limiting their success. If they take on an adult red dragon as first level characters and miraculously manage to win, there are no rules about level appropriate wealth or level appropriate magic items to interfere with their becoming rich and probably flush with magic items from the dragon's hoard.

Not Mentioned does not mean Prohibited: Many people seem to read RPG rules and come away with the idea that anything not specifically mentioned in the rules as allowed is prohibited. While this really doesn't make much sense given that no set of rules could ever cover everything that characters might attempt to do in an adventure, it seems to be a very common way to view RPG rules. In an old school game like Microlite74, this is specifically not true: the millions of possible activities not mentioned in the rules are not prohibited, they are up to the GM to allow or disallow based on his knowledge of how reality works and how his specific campaign world differs from reality. Unless the rules specifically prohibit some action, players should ask their GM instead of simply assuming it is prohibited because the rules do not mention it.

Styles of "Old School" Play

If you read some "old school" blogs, forums, and web sites, you might get the impression that there is only one "old school" style of play: a style with expendable player characters who spend all their time in dungeons designed in the style of the old

"Tomb of Horrors" module where an adventuring party is only one slipup away from death. This style of play is often shown in early modules.

What most people forget is that these early modules were designed for tournament play where the party that lasted longest and made it deepest into the dungeon was the winner. While a few gaming groups did run their regular campaigns like this and enjoy it, most people did not enjoy such games and the GMs who ran them were often referred to as "Killer GMs" (who often found themselves without players). Instead most home campaigns were a mixture of the following four styles – some campaigns stressing one or two styles over the others.

Power-Gaming: Many players start out playing in this style. Most soon get bored with it and add more and more of other styles. A power-gaming campaign is all about character power. Characters are known by their class, level, special items, and amazing powers and deeds. ("I killed the Demon King with my 15th Level Fighter/Magic-User/Druid. It only took two hits from Thor's Hammer to knock him out. Then I cut off his head with my vorpal blade.") There is often a lot of player competition for the most powerful character in campaigns that stress power-gaming. A lot of people look down on this style, but it can be a lot of fun to play a pure power-game in a group of players who all like the style.

Wargaming: This is probably the style old school rules were originally written for. The wargaming style of play is a competition between the player group and the GM. The GM sets up tactical battles, puzzles, and the like and the players solve them for treasure and experience. Fudging die rolls and ignoring rules (either for or against the players) is frowned upon as it detracts from the challenge and fun of the adventure. Characters in pure wargaming campaigns often were expendable and had little personality or goals (beyond staying live and getting rich) as a character with such might be tempted to do things dysfunctional to survival. Published tournament dungeons like Tomb of Horrors could be considered examples of extreme forms of this style. Once the RPG hobby became known outside of the minis and board wargaming community, pure forms of the wargaming style quickly became uncommon.

Role-Playing: A pure role-playing campaign is almost the opposite of a pure wargaming campaign. Player skill, tactics, and rules aren't really important. What is important is the player's character and that character's life in the game. In a pure role-playing campaign, players create the personality of their characters in great detail and players generally have a large emotional investments made in them and do not consider their characters expendable. Players tend to have their characters act within their personalities and within the beliefs they're supposed to hold – even when doing so is not the best thing to do at the time within the game. The object is to live your character's life in the campaign world. You "win" by having your character achieve his goals, goals which may or may not have anything to do with the game's goals of exploring and accumulating treasure and experience points. The modern computer game *The Sims* is an example of this style of play.

Story-Telling: While all campaigns tell a story after-the-fact (that is, you can tell a story based on the characters actions in the game), in a story-telling campaign, the GM has worked out a story in advance and the player characters are the protagonists. The campaign world usually has a detailed background and back story behind it. Knowing this background may be more important than knowing the rules. Some pure story telling campaigns are little more than single-line railroads where the characters play their almost pre-scripted parts in the story. In other cases, things are more free-form with story flow and events created by interactions between the GM's basic outline of story events and the actions of individual characters during the campaign. Some people consider the more pure forms of story-telling campaigns boring straight-jackets while others love the idea of being a major part of a real story.

These four major styles of play appeared early in the history of role-playing games. They were first mentioned in a general

circulation publication in Glenn Blacow's article "Aspects of Adventure Gaming" in *Different Worlds* #10 (the October 1980 issue).

The important thing to take from this section isn't the four styles or their labels (as there are other systems for describing this with their own labels), but the idea that there were many different styles of "old school" play back in the "old school" days – not just the single style stressed in some "old school" blogs, forums, and web sites. Don't let those sites make you believe that you aren't playing old school right if your campaign isn't strongly in the wargaming camp. Most successful campaigns back in "old school" days were a mixture of all four major styles – and a heaping helping of minor styles.

Advice for the New Old School Game Master

If you are comfortable running a rules-light game like standard Microlite20, you'll probably have no trouble running Microlite74 as you have already learned to run a game without having hundreds of pages of rules detailing how to handle every situation that might possibly arise in the game. You've learned to just make a ruling that you think fits the situation and keep the game moving.

Running a Game Without Skills

The greatest change between Microlite20 and Microlite74 is the removal of all character skills. If you are used to just allowing players to just say "I'm searching the room. What do I find?" and make search skill roll or just say "I'll try to persuade the baron to loan us a catapult." and make a persuade skill roll, running without skill rolls is going to require as much change to your thinking as it will to your players' thinking.

First, you need to get your players to tell you what their characters are actually doing in the campaign world, instead of talking in terms of what skill they are using. Then you need to learn to listen to what they say and decide if there description of what they are doing a) would most likely solve the problem, b) wouldn't have a chance of solving the problem, c) might not immediately solve the problem but would provide more info that would help solve the problem, or d) would not definitely solve the problem but has a fair chance of doing so. Only option d would require a die roll.

Let's take checking a chest for traps as an example. Get the players to describe in general terms how they are going to check the chest for traps. Note general terms are enough, the idea is to see what the characters are doing, not to require them to describe every single muscle and eye movement they make. Having to "click on one exact pixel on the screen" to succeed is boring and frustrating in a computer game, the verbal equivalent of it is even more frustrating in a tabletop game. Don't fall into the trap of doing it as it turns players off fast.

Let's say a player says "I'll look the chest quickly over for obvious traps, paying special to the keyhole, clasp, and anything that looks out of the ordinary. I'm not touching it yet."

If the chest had a poison needle near the clasp or some holes for poison gas or needles to shoot out of, this should be enough for the character to notice it without a roll, even if he isn't a Rogue or the like. However, if the chest is set to explode (or shoot daggers out of the opening when opened, such a search is not going to discover the trap – again no matter what the character's class or background as such a trap isn't visible from the outside. If you are feeling generous, you might have a Rogue make roll and if she makes it tell her player that while she doesn't see a trap, something still doesn't seem right about the chest.

If the character had said he was then poking the chest with a pole instead of rushing to open it, he might hear something strange if the chest had the above-mentioned dagger trap. Of course, unless he is a Rogue or has some strange background, chances are he would not associate the noise with a trap, but

rather just that there was something loose in the chest. Again, you might give a Rogue a roll, especially an experienced Rogue.

As this example shows, it really isn't hard – unless you choose to make it hard. It's just different. After a few sessions both you and your players will find that it really isn't as hard as it looks.

Some players, however, really want die rolls. Because of previous bad experiences with poor GMs, they just can't trust the GM enough to handle some decisions being made without die rolls. If your players are like this, you can use "skill" rolls as a safety net. The players will still have to describe what their character does to solve the problem just as above. Once the player describes what his character is doing, the GM calls for a class/background based "skill" roll as described in the skills section of these rules. The results are determined by your opinion as GM of the action described and the skill roll. There are basically two situations:

In the first case, you feel that the player has a good plan that should likely succeed. Therefore it will succeed regardless of the result of the roll, but how well it succeeds is determined by the skill roll. A failed skill roll is a minimal success; the character succeeds, but just barely. A successful skill roll means the character's plan succeeds without any major hitches.

In the second case, either the player obviously knows less than his character does about the situation or just comes up with a bad idea that you feel is unlikely to work. You let the skill roll decide the result. A failed roll means the plan fails, while a successful roll means the plan somehow worked after all, but probably not perfectly.

Players who refuse to even try to come up with some type of rational statement about what their character is actually doing but just want to let the skill roll decide automatically fail.

Guidelines Not Rules

Finally, remember that these rules are a tool for the GM. If something herein does not work right in your campaign, change it. The object is to have fun, not be a slave to rules or to players who think being a rules-lawyer is the way to get ahead. In many roleplaying games, the Rules As Written (RAW) are often considered sacrosanct or at least somehow better than those a GM can come up with himself. This is not true of Microlite74 so please change anything you do not like.

Adventures and Settings

There are a large number of adventures and campaign settings available for TSR editions of the world's most popular fantasy RPG. Playing copies of most of original adventures from TSR can be found on eBay for very low prices. TSR era adventures can be used with any pre-WOTC edition or retroclone with only very minor conversion.

There are also a large number of free and low cost adventures available in PDF format on the web. A good place to start looking for free adventures is on the Dragonsfoot forum web site (see the link under Old School Internet Resources below).

The best settings and adventures, however, are those you create yourself for your campaign. They don't need to be nearly as elaborate as those produced for use by others, let alone as fancy as those written for professional publication. Many of the GM adventure location keys (including those of the game's original designers) were nothing but room/location numbers with something like "8 hobgoblins, leader has 20gp, trapdoor in floor hides skeleton with silver dagger (animates if dagger touched)" or "Small village, 27 families, 10 orc slaves, Headman: Mongar the Brown (Ftr 4th lvl, +1 sword) Mongar's wife, Rose is a 3rd lvl Cleric of Odin." You can do that.

Microlite20 Notes

Microlite20 is a trimmed down sub-miniature version of the OGL 3.5 SRD. In its most basic form, Microlite20 has only two pages of rules but can be used with most fantasy OGL and d20 adventures and supplements with little or no conversion. Since

M20 was published in 2006, many people who prefer rules-lite games have been using it for their d20 games and/or writing expansions, supplements and other material especially for M20. You can find out more about the original Microlite20 and find more variants like Microlite74 on the Microlite20 web site: <http://microlite20.net/>

RetroRoleplaying Web Site

The author of Microlite74 maintains a web site devoted to out of print and out of style tabletop roleplaying games. He is always willing to discuss and answer questions about Microlite74 in the Microlite74 board on the RetroRoleplaying forum.

Web Site: <http://www.retroroleplaying.com/>

Forum: <http://www.retroroleplaying.com/forum/>

Blog: <http://blog.retroroleplaying.com/>

WHAT WOULD YOU LIKE TO SEE?

If you are reading this first Playtest version, I'd like to know what you would like to see tried in future Playtest versions (and perhaps make it into the final game). While the game will remain true to old school roots (fast character generation and fast combat, player skill more important than character skill, etc., there are still a large number of directions the game can go and a number of different ways to do those things.

If you have something you'd like to see or something you would hate to see, please let me know. RetroRoleplaying Cancer Fund Donors have a dedicated forum where they can communicate directly with me and other donors, but anyone can send me an email or comment on one of my blog posts *about Gryphons & Gramarye*.

Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations; names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement.

2. The License: This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open

Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

Gryphons & Gramarye Basic Public Playtest 1.0

The goal of *Gryphons & Gramarye* is to recreate the style and feel of early fantasy roleplaying games (e.g. 0e, B/X, 1e) published back in the 1970s or very early 1980s without trying to duplicate the exact features of any of those games. *Gryphons & Gramarye* will try to do some new things with old school while retaining basic compatibility with adventures for 0e, B/X, and 1e.

This first public playtest version of *Gryphons & Gramarye* reimages the classes but otherwise mainly uses *Microlite74 Extended* rules. Public Playtest 1.0 has five classes: Fighter, Scout, Paladin, Magician, and Wizard. The Fighter is a very powerful warrior (better than a 0e fighter). The Scout is a less powerful warrior with outdoorsman and "thief" abilities. The Paladin is a holy warrior with the ability to pray for miracles. The Magician has limited warrior abilities but wields illusion and nature magic. The Wizard is next to useless as a warrior, but can wield powerful magic.

These rules assume that the GM understands the basic concepts of roleplaying games, but provides information for both the GM and the players on the various "old school" styles of play. *Gryphons & Gramarye* can easily use adventures and material from early editions of the world's most popular tabletop fantasy roleplaying game or modern clones. Note this is a set of playtest rules, the final version of *Gryphons & Gramarye* will likely be much different. Your feedback is welcome and will help shape the final version.

FOREWORDS

What is Microlite20?

Do you remember when the gaming table was full of pizza and soda, not rulebooks, miniatures and dungeon tiles? Do you yearn for a role-playing game that doesn't require weight training to carry all the books? Do you want to be able to hold all the rules in your head - or in your back pocket? And do you still want to use all those lovely monsters, adventures and game worlds too?

So do we!! – Greywulf

Microlite20 is a minimalist role-playing game designed to be usable with the majority of the OGL/d20 supplements, rules and adventures with little or no advance preparation. The basic rules for character generation, combat, magic and level advancement take up a single sheet of paper, meaning it is perfect for introducing role-playing to new players, gaming oneshot adventures or tailoring into your own game system.

History of Microlite20

Microlite20 was designed by Robin V. Stacey (aka Greywulf) in 2006. The purpose of the rules were to strip the OGL/D20 system down to its bare minimum so that the world's most popular fantasy system could be played quickly and without thousands of pages of rules, but still be usable with all the adventures, campaign settings, and supplements that had been published for the 3.x edition of the world's most popular fantasy RPG.

Amazing, one page of basic rules (coupled with the Fantasy SRD for spells and monsters) really did allow for fast-playing games with just about every adventure and supplement published for the 3.x edition. Microlite20 was an immediate hit with players who liked the 3.x edition of the world's most popular fantasy RPG but did not like the complex and time-consuming (both to GM for and to play out combats) beast it had become. Microlite20 was a rules-light way to play that brought fun back to many game tables.

The Microlite20 rules were entirely open game content. Only the names "Microlite20" and "Robin V. Stacey" were listed as product identity. Having the entire system open game content sparked a flurry of gamer creativity. Simple variant rules and basic expansions came first – for example, lists of limited spells and monsters so Microlite20 could be played without lugging the huge SRD around. However, customized rule sets and complete games based on Microlite20 soon followed.

In the spring of 2010, Robin sold the rights to Microlite20 to Seth Drebitko. Seth has big plans for the game but even without big plans, the Microlite20 community

is still going strong, still producing new material and complete new games based on Microlite20.

About Microlite20 Golden Edition

This edition wants to transform the minimalist idea of the original Microlite20 in a full and complete Rulebook. While the original “one page rulesheet” was mainly aimed to already experienced players, the Golden Edition wants to extend the original idea to both new and expert players, giving them a framework that permits to play quickly, freely and virtually everywhere having all the rules and manuals at hand.

MICROLITE PUREST ESSENCE	129
---------------------------------	------------

OPEN GAME LICENCE	134
--------------------------	------------

FIRST STEPS

If you are a novice, the best and quickest way to learn playing is to find an experienced group of players, but if you and your friends are absolute newbies, a good start is to try directly: give yourselves a few tries, pick up a low-level adventure and go for it. Even if there are few rules, try to focus on having fun: rules will follow.

Equipment needed

You will need paper sheets, pencils and dices. Many times during the game you will need to roll dices to check if you can do certain types of actions or tasks. There are many types of dices, with 4, 6, 8 or more faces. It will be asked you to roll “xdy” that simply means “x dices with y faces” (“2d6” is “two 6-sided dices, while “1d20” is “one 20-sided dice”).

What is a role-playing-game

A role-playing game (RPG) is a cooperative narration game in which players assume the roles of characters in a fictional setting, deciding freely which action let them do and acting as their fictional alter-ego. The *Game Master*, the main narrator of the game, describes the game world and its inhabitants. The other players describe the intended actions of their characters, and the GM describes the outcomes. Actions taken within the game succeed or fail according to a formal system of rules and guidelines.

GM: “You’re walking along a path in a small wood when you hear noises coming from behind a large bush of vegetation. A sparkle of light reveals something shiny...”

Now it’s your turn: are you a fearful adventurer that decides to run for his life or are you brave enough to search in the wood? Maybe you’re a warrior that grabs

his sword, sure that this is an ambush, or maybe you're a smart thief, that climbs silently on a tree to look what's behind the plants. Or maybe you're a powerful wizard that casts a spell to clearly see through obstacles. Now it's up to you!

Simplicity

When you'll begin playing with Microlite20, especially if you have played role games before, you will surely feel that certain stats and skills don't represent fully and realistically all the possibilities you will encounter during the game. But while complessity means more realism, it also means slowing down the game itself for the need of checking continuously rulebooks and tables. The aim of Microlite20 is to focus on gameplay instead, forgiving sometimes a more realistic approach in favor of fluidity and freedom of choice.

CHARACTERS

The first thing to do before beginning your quest is to create a character, your alter-ego in the world described by the Game Master.

Stats

Each character can be described using some values, called *stats*, as reference. There are 3 stats :

Strength (STR): represents the physical status of the character, his strength and his toughness, his physical resistance and how hard he can hit.

Dexterity (DEX): represents his coordination, precision, agility, reflexes, balance and movement involved skills.

Mind (MIND): represents his analytical thinking, his lore and wisdom, memory and everything related to knowledge and intelligence.

Optional **Charisma** (CHAR): measures a character's persuasiveness, personal magnetism, and ability to lead. It is not a reflection of physical attractiveness, although attractiveness certainly plays a role. The skill bonus can then be used in place of your MIND bonus for any interactions with intelligent creatures.

Roll 4d6, drop lowest dice and sum the remaining 3 dices. Allocate this value to one of the stats. Repeat for remaining stats.

This value represents how the character is "gifted" in his traits. If this value is particularly high (or low) he will receive a proportional bonus that may help (or obstruct) his actions involving these personal characteristics. Stat bonus can be calculated as follows:

$$\text{Stat-bonus} = (\text{STAT} - 10) / 2, \text{ rounded down.}$$

Health Points (HP) represent the health level of the character: anytime you get wounded this number drops. Your total HP is STR + 1d6/Level.

Armour Class (AC) is a value representing how difficult is to hit you. Its base value is $10 + \text{DEX bonus}$. Your AC can be improved using armours, spells or other magical artefacts.

Melee attack bonus is $\text{Level} + \text{STR bonus}$ and **Missile attack bonus** is $\text{Level} + \text{DEX bonus}$.

Races

Many different species inhabit a fantasy world. Each of them have its common traits and characteristics, but you are not forced to stick to them. However, due to their innate traits, each race applies some modifiers to base stats. Game masters can limit the choice to only few races, if this suits their scenario, or add other races to the list.

You can find some special abilities descriptions in the "Special Abilities" section of the Bestiary (Appendixes).

Human

Humans are usually the most common race, thanks to their ability in adapting to every kind of environment. Due to this they can live in a wide range of habitats and can easily learn lots of competencies. Skin color and body type varies heavily.

- +1 to all skill rolls.
- Move 30' / per round or 20' / round in heavy armor.

Elf

Smaller than humans, have more angular and defined facial traits, pointy ears, and an unnatural beauty and grace. They seem detached from the world around them, seen by some as introversion or xenophobia. Elves are deeply connected to magic and nature and can live up to 500 years.

- +2 MIND, +1 DEX, -1 STR.
- Move 30' / per round or 20' / round in heavy armour.
- Darkvision.
- Immunity to magic sleep effects and ghoul paralysis.
- +2 on Listen, Search, and Spot checks. An elf who passes within 5 feet of a secret or concealed door can to a Search check to notice it as if she were actively looking for it.

Dwarf

Dwarves are four feet tall, with squat, broad bodies, proud of their long and thick beards. Dwarves mistrust half-orcs, and fail to appreciate elves, whom they only ally with in their many battles against orcs, goblins, gnolls, bugbears and trolls.

- +2 STR, -1 CHAR.
- Move 20' /per round even in heavy armour.
- Darkvision.
- Stonecunning.
- +4 on checks to resist being bull rushed/tripped when standing on the ground
- +2 racial bonus on saves against poison, spells and spell-like effects.
- +2 racial bonus on Appraise and Craft checks related to stone or metal items.

Halfling

They have thin lean bodies, no more than three and a half feet tall, have pointed ears, brown eyes and straight black hair held in a topknot which is a source of pride. Halflings are intensely curious, rambling and speaking very quickly when excited. They are masters at the art of insulting people.

- +2 DEX, -1 STR.
- Small Creature.
- Move 20' /per round or 15' /round in heavy armor.
- +1 size bonus to Armor Class .
- +4 size bonus on Subterfuge checks to hide in outdoor environments.
- +2 morale bonus to saves against fear effects.
- +2 racial bonus on Climb, Jump, Listen, and Move Silently checks.
- +1 racial bonus on all saving throws.
- +1 racial bonus on attack rolls with thrown weapons and slings.

Gnome

Gnomes are 3-3½ feet tall, naturally friendly, highly social and fun loving people. They have a deep relationship with nature and in the eyes of a gnome, animals are people too. Gnomes can perform the spell-like abilities of dancing lights, ghost sound and prestidigitation, that play a large role in their games.

- +1 DEX, +1 MIND.
- Small creature.

- Move 20' /per round or 15' /round in heavy armor.
- +1 size bonus to Armor Class.
- +2 bonus to saving throws against illusions and +1 to DC for all saving throws against illusion spells cast by gnomes.
- +4 size bonus on Subterfuge checks to hide in underground environments.
- Once per day may speak with burrowing animals (duration 1 minute).
- Low-Light Vision.
- +2 racial bonus on Listen checks.
- +2 racial bonus on Craft (alchemy) checks.

Lizardmen

Primitive reptilian humanoids with scaly skin, normally dull, earthy colors such as green, brown, or gray. They use their tail for balance, which measures three to four feet long. There are several species of lizardmen, from small and skinny to tall and strong ones. Lizardfolk are usually neutral.

- 2 STR, +2 DEX, -2 MIND.
- Move 30' /per round or 20' /round in heavy armor.
- +5 natural armour bonus.
- Natural Weapons: 2 claws (1d4) and bite (1d4).
- A lizardfolk can hold its breath for 4xSTR rounds before it risks drowning.
- +4 racial bonus on Jump, Swim, and Balance checks because of their tails
- +1 on Fortitude rolls and +3 on Reflexes rolls

Half-Orc

Tall and strong, they see themselves gifted with strength and opportunities beyond those of either of their parent races. They tend toward a chaotic outlook drawing strength of character from the inequities they face. Half-orcs rarely have strong religious views.

- +3 STR, -1 MIND, -2 CHAR.
- Move 30' /per round.
- Darkvision.
- +4 racial bonus on intimidate checks.
- Orc Ferocity: Once per day, when brought below 0 hit points but not killed, he can fight on for one more round as if disabled. At the end of his next turn, unless brought to

above 0 hit points, he falls unconscious and begins dying.

- Rage: once a day can enrage and gain +2 to Strength and Fortitude. At the end becomes fatigued.
- Natural Weapons: bite (1d4).

Half-Elf

In them humans see the grace, the fair face and the pointy ears of elves while these see the opposite. A half-elf's skin is pale and their eyes have the bright green or blue hue common to elves. They have the curiosity and the ambitions of humans and the sense for magic and love for nature of elves.

- +1 MIND, +1 DEX, +1 Comm.
- Move 30' /per round or 20' /round in heavy armor.
- +1 to any 2 Skills.
- Immunity to magic sleep effects.
- Low-Light Vision.
- +1 racial bonus on Listen, Search, and Spot checks.
- +1 racial bonus to your Will defense.
- +2 racial bonus on Diplomacy and Gather Information checks.

Mul (Half-Dwarf)

They retain the height and cunning of humans, plus the durability, raw strength and constitution of dwarves. Born usually as slaves, they can perform heavy work for days and have gruff personality and violent reactions. Fair skinned, they have pale-colored eyes, no hair or beard. Muls are sterile.

- +2 STR, -1 MIND, -1 CHAR, +1 Physic.
- Move 30' /per round.
- Muls may be any chaotic alignment.
- Darkvision.
- +2 racial bonus on Intimidate checks.
- Muls are able to work longer and harder without rest than most other races. Regardless of the preceding type of exertion, eight hours of sleep will let a Mul become fully rested, ready to begin work again.

Thiefling

Their lineage can be traced back to to a fiend or demon. Tieflings have any of a number of features that reference (directly or indirectly) their fiendish lineage

including horns of various styles, pointed teeth, hooves, tails, and unusually colored eyes. They are not necessarily evil, but usually sneaky and subtle.

- +2 DEX, +1 MIND, -2 CHAR.
- Move 30' /per round or 20' /round in heavy armor.
- +2 racial bonus on Bluff and Hide checks.
- Darkvision out to 60 feet.
- Resistance to cold 5, electricity 5, and fire 5.
- Darkness: can use Darkness spell once per day.

Half-fiend

They born from fiends who have mated with a human. Often grotesque mockeries of humans, rarely one learns from and takes on characteristics of its non-fiendish parents, turning from its evil heritage. Never truly fitting into society, half-fiends are usually loners. They are outcasts, hated corrupters of the natural order.

- +3 MIND, -1 STR or -1 DEX, -2 CHAR
- Move 30' /per round or 20' /round in heavy armor.
- Darkvision out to 60 feet.
- Immunity to poison.
- Resistance to acid 10, cold 10, electricity 10, and fire 10.
- Darkness: can use Darkness spell once per day.
- Non-good alignment.
- Natural Weapons: claw (1d4) and bite (1d6)
- Bat wings: can fly at the base creature's base land speed.

Drow

Drows are black-skinned and pale haired relatives of elves, with sharp features, large eyes and pointed ears. Drows are silent and swift, highly resistant to magic and capable to use some innate magical abilities even if not spellcasters. They are described as chaotic or evil in alignment, and highly intelligent.

- +2 DEX, -2 STR, +2 MIND.
- Move 30' /per round or 20' /round in heavy armor.
- Immunity to magic sleep effects.
- +2 racial on Will saving throws against enchantment spells

or effects.

- Darkvision out to 120 feet.
- +2 on Listen, Search, and Spot checks. A drow who passes within 5 feet of a secret or concealed door can to a Search check to notice it as if she were actively looking for it.
- Spell-Like Abilities once per day: Dancing Lights, Darkness, Faerie Fire.
- Light Blindness: Abrupt exposure to bright light blinds drow for 1 round. On subsequent rounds, they are dazzled as long as they remain in the affected area.

Minotaur

Their bodies (around 7ft tall) are humanoid and covered in short fur, but their heads are bovine and their back legs end in cloven hooves. They are proud, noble, tenacious and bold, deeply spiritual and respectful of their elders. Generally kind and benevolent, they become furious, savage and brutal in combat.

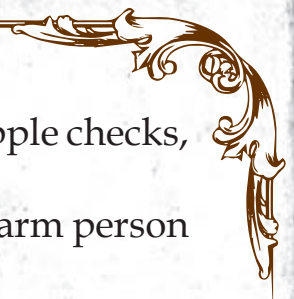

- +2 STR, +1 Physic, -2 MIND.
- Move 30' /per round.
- Large size: -1 to AC, -1 on attack rolls, -4 on Hide checks, +4 on grapple checks, double lifting and carrying limits.
- Darkvision: 60 feet.
- +2 racial bonus on Search, Spot, and Listen checks.
- +3 natural armor bonus.
- Natural Weapon: Gore (1d6+STR bonus if first attack, 1d6 if used as secondary).
- Powerful Charge: in addition to the normal benefits/hazards of a charge, allows the minotaur to make a single gore attack dealing 4d6 + STR bonus damages.
- Natural Cunning.
- Immune to Maze spell.
- Scent
- -2 on Balance, Escape Artist and Tumble skill checks.

Half-Giant

A cross between humans and giants (7/8 ft tall, weigh 250/400 pounds) usually held captive as warriors and laborers. As a result, nothing is more important to them than their freedom. Like humans they are curious, cooperative and communicative, with a general tendency toward kindness. They disdain religion.

- +2 STR, +2 Physic, -2 DEX.
- Move 30' /per round.

- 
- Large size: -1 to AC, -1 on attack rolls, -4 on Hide checks, +4 on grapple checks, double lifting and carrying limits.
 - Giant: not subject to spells or effects that affect only humanoids (charm person or dominate person).
 - Low-Light Vision.
 - +2 racial bonus on saving throws against all fire spells and effects.
 - Spell-Like Abilities once per day: Stomp - his foot stomp, precipitating a psychokinetic shock wave that travels along the ground, topples creatures (they become prone and take 1d4 non-lethal damages) and loose objects. Save DC is 10+half-giant STR modifier.

Alignment

The character's alignment is a guide to his basic moral and ethics used to provide a clear idea of how the character will handle moral dilemmas, but doesn't prevent a character from changing his beliefs, acting irrationally, or behaving out of character. Possible alignments are:

Lawful Good

An orderly, strong society with a well-organized government can work to make life better for the majority of the people. Lawful good characters strive for those things that will bring the greatest benefit to the most people and cause the least harm. Examples are an honest and hard-working serf, a kindly and wise king, or a stern but forthright minister of justice.

Lawful Neutral

Order and organization are of equal importance: they believe in a strong, well-ordered government, whether that government is a tyranny or benevolent democracy. The benefits of organization and regimentation outweigh any moral questions raised by their actions. Examples are an inquisitor determined to ferret out traitors at any cost or a soldier who never questions his orders.

Lawful Evil

They believe in using society and its laws to benefit themselves. Structure and organization elevate those who deserve to rule as well as define hierarchy between master and servant. They obey laws out of fear of punishment and are careful giving their word to not be forced to honour unfavorable oaths. They break their word only if they can find a way to do it legally.

Neutral Good

A balance of forces is important, but the concerns of law and chaos do not moderate the need for good. Since there are many creatures striving for different goals, a pursuit of good will counter-balance entropy. Social structure can be supported or thrown up: by itself it has no innate value to them. A baron who violates his king's order to destroy something he sees as evil is an example.

True Neutral

They believe in the ultimate balance of forces, and refuse to see actions as either good or evil. Since the majority of people in the world make judgments, true neutral characters are extremely rare. True neutrals do their best to avoid siding with the forces of either good or evil, law or chaos. It is their duty to see that all of these forces remain in balanced contention.

Neutral Evil

They are primarily concerned with themselves and their own advancement. If there is a quick and easy way to gain a profit, whether it be legal, questionable, or obviously illegal, they take advantage of it, even betraying friends and companions. They typically base their allegiance on power and money, like an unscrupulous mercenary, a common thief, and a double-crossing informer.

Chaotic Good

They are strong individualists marked by a streak of kindness and benevolence. They believe in all the virtues of goodness and right, but they have little use for laws and regulations. Their actions are guided by their own moral compass which, although good, may not always be in perfect agreement with the rest of society.

Chaotic Neutral

There is no order to anything, including their own actions: they tend to follow whatever whim strikes them at the moment. Good and evil are irrelevant when making a decision. Chaotic neutral characters are extremely difficult to deal with. They are almost totally unreliable. Lunatics and madmen tend toward chaotic neutral behavior.

Chaotic Evil

There's nothing wrong with taking whatever they want by whatever means possible. Laws and governments are the tools of weaklings. The strong have the right to take what they want, and the weak are there to be exploited. They band together only to oppose powerful enemies. Such a group can be held together only by a strong leader capable of bullying his underlings into obedience.

Other Characteristics

It's not fundamental, but often useful, to know other things about your character: age, sex, weight and height are the most useful to take note of, since they will influence heavily your gameplay. In choosing these traits, keep always in mind the chosen race and age. Other sub-traits are hair colour, eyes colour, right or left handed, voice, body shape and so on. Talk with the Game Master about these traits: he (or you both) could choose to apply additional modifiers to stats to represent them.

CLASSES

A class are what your character is trained at. A sort of job, if you prefer. The basic ones are Fighter, Rogue, Mage, Cleric, but you can choose (if your Game Master allows them) between many more or invent them. Keep in mind what your stats are in order to choose a right class for you character: a mage with a really low MIND stat simply doesn't make sense, usually. Characters begin at Level 1.

Fighter

Fighters are voted in the study of armed fighting. They are though people, strong, but not necessarily rude. Some prefer the brute force and aggressiveness of the berserker, other prefer a classical way of fight, and others see fighting also as a form of art, like *bladedancers*.

- Wear any kind of armour and use shields.
- +3 bonus to Physical and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on.
- Every 6 levels the fighter gains an additional attack (e.g., at 6th level the fighter may attack twice in one combat round).
- +1 attack bonus (AB) to all attack rolls, increasing by +1 per level

Cleave

When facing more enemies, they can hit and maintain momentum to attack other foes. If you kill a creature in a single blow, you get an immediate bonus melee attack against another creature within reach (no movement allowed).

DEX Bonus

Their body moves swiftly during combat. Can use DEX bonus + Level as Melee attack bonus if wielding a light weapon.

Double Weapon

Can use 2 light weapons and attack with both in a round but with a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you can not wield two rapiers at the same time.

Rogue

They live by subterfuges, but not all of them are thieves (even if most of them are). They have a lot of personal and physical skills that help them to get in and out of troubles effortlessly. The less they have to toil and struggle like everyone else the better they think they are.

- Can use light armour.
- +3 bonus to Subterfuge.
- Bonuses on climbing even on difficult circumstances.
- +1 attack bonus (AB) to all attack rolls, increasing by +1 every 4 levels.
- Any alignment except lawful good. If possible at least partially neutral.

Pick Pockets

Rogues are swift of hand. They can perform or try to steal small items (also from pockets, sleeves, backpacks, purses) sneaking unnoticed or distracting people. A failed roll means they didn't get the object, but not that they have been noticed (another roll is required).

Open Locks

They have bonuses to solve puzzle locks (locks with sliding panels, hidden releases, and concealed keyholes) and they can try to pick locks in general using thief's tools. They can use improvised ones (iron wire, a thin dirk, a stick, etc.) but with a penalty.

Find/Remove Traps

They can try to find concealed traps or alarms on objects or places they can examine. The GM rolls a check: if it fails the rogue didn't find any trap. This could mean both there's no trap or he didn't see it. If found, the rogue can work out how it works and try to disarm it (see Open Locks).

Move Silently

Their step is smooth and soundless. Declaring the will to move silently, the GM rolls to check if the movement is silent or not, while the rogue always thinks to be quiet. Movement rate is 1/3 normal. Penalties can be applied depending on the

surface (leaves, cobbles...) and equipment (noisy objects, armours...)

Hide in Shadows

Experts in hiding, if noone looks at them, they can completely disappear in the darkness or behind other kinds of concealments (bushes, curtains...) as long as they don't move. The GM rolls a check and keeps it secret, but the rogue will always think he is successfully hidden.

Read Languages

Hearing and communicating with many different people every day helps rogues in understanding writings in other languages. If a successful check roll is achieved, the rogue manages to guess some bits of information. Is possible to try only once per level for each single document.

Sneak Attack

If unnoticed a rogue can attack someone from behind with a light weapon: the attack deals an extra 1d6 damage at 1st level, and increases by an additional 1d6 damage for every two rogue levels thereafter. If the enemy notices the rogue, the backstab becomes a normal attack from behind. To sneak attack, the victim must have a definable back-side and be easily reachable.

Mage

Mages are devote to the study of magic. Due this they generally lack in physical abilities, but with few words and gestures they can manipulate the magic energy, called "mana", and use it as their weapon, armour or tool, from entertaining people to fight demons and dragons.

- Wear no armour. If wear light armour they can't cast spells since it limits the movement.
- Use only light weapons or staff (or others requiring little skill and strength)
- +1 attack bonus (AB) every 6 levels.
- They can cast arcane spells
- +1 bonus to MIND.

Grimoire

The grimoire is the collection of spells and knowledge a mage always carries with him. It can be one or more books, scrolls or whatever the GM allows. A mage has to read over and over his spells from his book in order to memorize them and make them ready to cast.

Number of spells

Even if the number of spells in the grimoire is limited only by the number of pages it has, a mage has a limit in memorizing spells ready to be casted depending on his level (see the following table). A mage cannot cast lot of magics, as it drains energy. See the "Magic" chapter for further details.

Wizard		Spell Level								
Level	1	2	3	4	5	6	7	8	9	
1	1	--	--	--	--	--	--	--	--	
2	2	--	--	--	--	--	--	--	--	
3	2	1	--	--	--	--	--	--	--	
4	3	2	--	--	--	--	--	--	--	
5	4	2	1	--	--	--	--	--	--	
6	4	2	2	--	--	--	--	--	--	
7	4	3	2	1	--	--	--	--	--	
8	4	3	3	2	--	--	--	--	--	
9	4	3	3	2	1	--	--	--	--	
10	4	4	3	2	2	--	--	--	--	
11	4	4	4	3	3	--	--	--	--	
12	4	4	4	4	4	1	--	--	--	
13	5	5	5	4	4	2	--	--	--	
14	5	5	5	4	4	2	1	--	--	
15	5	5	5	5	5	2	1	--	--	
16	5	5	5	5	5	3	2	1	--	
17	5	5	5	5	5	3	3	2	--	
18	5	5	5	5	5	3	3	2	1	
19	5	5	5	5	5	3	3	3	1	
20	5	5	5	5	5	4	3	3	2	

Cleric

They're not simple followers of a divinity, but also his faithful intercessors in the world, using the power the god gave them to spread the faith and defend their believes. They're not skilled in combat like warriors, but well trained to use weapons, and they can cast spells to to further their god's aims.

- Can wear light or medium armour.
- Cast divine spells
- +3 bonus to Communication.
- Turn Undead with a successful Magic Attack.
- +1 attack bonus (AB) every 4 levels.

Turn Undead

Clerics can invoke the power of their god to

turn undead creatures. This can be used (2 + Level + MIND Bonus) times per day or (2 + Level + CHAR Bonus) times if you use Charisma. The DC is determined by the Hit Points of the Undead. If the roll exceeds DC by 10 the undead is destroyed.

Clerics of an evil cult can bind undead creatures to their will instead.

Cleric spells

Clerics spells are a gift of the god they pray and serve, as a reward and as instrument to spread the cult. They should not abuse this power to not be punished or left without spells. A change in alignment or actions that go against ethics of the cult are another way to have their powers removed. The higher the cleric level, the greater the powers the god gives, as shown in the following table.

Cleric Level	Spell Level						
	1	2	3	4	5	6*	7**
1	1	--	--	--	--	--	--
2	2	--	--	--	--	--	--
3	2	1	--	--	--	--	--
4	3	2	--	--	--	--	--
5	3	3	1	--	--	--	--
6	3	3	2	--	--	--	--
7	3	3	2	1	--	--	--
8	3	3	3	2	--	--	--
9	4	4	3	2	1	--	--
10	4	4	3	3	2	--	--
11	5	4	4	3	2	1	--
12	6	5	5	3	2	2	--
13	6	6	6	4	2	2	--
14	6	6	6	5	3	2	1
15	6	6	6	6	4	2	1
16	7	7	7	6	4	3	1
17	7	7	7	7	5	3	2
18	8	8	8	8	6	4	2
19	9	9	8	8	6	4	2
20	9	9	9	8	7	5	2

Ethic

Weapons used and powers strictly depend on their cult. Some cults limit the use of certain weapons: some gods are associated with particular weapons (e.g. the god of blacksmiths will permit only hammers). In game terms, the beliefs should always guide all the character actions and behaviours.

Paladin

Paladins are proud and noble warriors, with high ideals, always pursuing the goodness and the law. They fight proudly and never use forms of fighting from distance, poisons, stealth or subterfuges. A paladin never lies and can cooperate fine only with lawful good people. The only money and treasures he keeps is enough to live modestly.

- Wear any kind of armor and use shields.
- +1 bonus to Physical
- +2 bonus to Communication.
- Immune to diseases and apply a +1 bonus to all saving throws (this increases by +1 at 5th level and every 5 levels on).
- Can detect evil within 60' at will
- Can heal up to 2hp per level per day by laying on hands.
- A character must be of Lawful Good alignment to be a Paladin.

Ethics

Paladins must follow a rigid code of rules and their alignment has always to be lawful good. If they inadvertently don't follow their ethic principles they will loose all special powers, temporarily or definitively. If deliberately, or if alignment changes, this loss is irrevocable.

Aura of protection

Paladins are surrounded by a special aura that protects them and others from being harmed by evil creatures. All evil creatures within a 10 foot radius suffer a -1 penalty on attack rolls. All creatures affected by this aura can easily find its source.

Paladin spells

Once level 9, a paladin is helped by his god himself and gains the ability to cast spells of combat, divination, healing and protection. Spell progression is listed in the following table.

Paladin Level	Casting Level	Priest Spell Level			
		1	2	3	4
9	1	1	--	--	--
10	2	2	--	--	--
11	3	2	1	--	--
12	4	2	2	--	--
13	5	2	2	1	--
14	6	3	2	1	--
15	7	3	2	1	1
16	8	3	3	2	1
17	9*	3	3	3	1
18	9*	3	3	3	1
19	9*	3	3	3	2
20*	9*	3	3	3	3

* Maximum spell ability

Ranger

Rangers are skilled hunters and woodsmen, they're unbeatable in tracking animals and other creatures. They all have a special bond with nature and animals, they're expert wanderers and often prefer to be and work alone. Lawful, neutral, or chaotic, rangers tend to be protectors of good.

- Can use light or medium armor and can use shields.
- +1 to hit and damage with ranged weapons
- Only incur in -1 to hit penalty when fighting with 2 weapons
- +3 bonus to Survival
- Can move silently and hide in shadows with light armors

Special enemy

At 2nd level a ranger must select a special enemy (GM have to confirm the choice): from there on, he will have a +4 bonus to hit that kind of enemy. It's hard to hide this enmity (-4 penalty on encounter reactions) and also during combat hated creatures are the preferred target unless there isn't greater danger.

Animal empathy

Approaching an animal, a ranger can try to modify its reactions (automatic if domestic or clearly non-hostile), in either friendly or aggressive way. Rangers can easily evaluate the characteristics of an animal (strongest horse in the corral, most loyal wolf in the pack...).

Natural lore

Rangers know nature, plants and animals in a deeper way many other people do. They can have a natural bonus on everything relate to nature knowledge, anatomy, woodworking, tracking, hunting, water finding and so on.

Druid

Protectors and worshippers of nature and its spirits, are far from implications of temporal world: even good and evil are part of the same cycle. Order and civility is all that concerns them. While they understand hunting, wood chopping and farming as part of a natural cycle, they can't tolerate them when unnecessary: they are known to be unforgiving, patient and subtle in their revenges.

- Only pure neutral alignment

- Wear any non-metal armor or shield.
- They cast Druid spells
- +2 to Knowledge and +2 to Survival.
- Immune to the spell-like effects of woodland fey.

Animal form

From 3rd level a druid can transform in a small animal once a day, and every three levels this number increases by one. Two uses can be used to transform in a medium-sized animal, three uses for a large-sized one.

Natural lore

Druids know wilderness in its deep nature. From the 3rd level they can identify plants, animals, and pure water with perfect accuracy, can learn the languages of woodland creatures and from 7th level they are completely immune to charm spells cast by woodland creatures.

Movement

Druids can move in overgrown areas with ease. They don't suffer normal speed penalty and from 3rd level they can move at normal movement rate leaving no trace behind.

Weapons and armors allowed

For armors they avoid using metal, preferring living or once-living materials -- padded, hide, or leather armor and wooden shields, including those with magical enhancements. Their weapons are limited to club, sickle, dart, spear, dagger, scimitar, sling, and staff.

Druidic Spells

Their bond with nature lets druids manipulate natural energies, allowing them to cast generic, animal, elemental, healing, plant, and weather spells with a minor access to the divination ones. The following table represents the spell progression.

Druid Level	1	2	3	4	5	6	7
1	1	--	--	--	--	--	--
2	2	--	--	--	--	--	--
3	2	1	--	--	--	--	--
4	3	2	--	--	--	--	--
5	3	3	1	--	--	--	--
6	3	3	2	--	--	--	--
7	3	3	2	1	--	--	--
8	3	3	3	2	--	--	--

9	4	4	3	2	1	--	--
10	4	4	3	3	2	--	--
11	5	4	4	3	2	1	--
12	6	5	5	3	2	2	--
13	6	6	6	4	2	2	--
14	6	6	6	5	3	2	1
15	6	6	6	6	4	2	1
16	7	7	7	6	4	3	1
17	7	7	7	7	5	3	2
18	8	8	8	8	6	4	2
19	9	9	8	8	6	4	2
20	9	9	9	8	7	5	2

Bard

Bards make their day with the help of their swift tongue, charm and talent. They wander learning and bringing legends, songs and many knowledges. Bards tend to use their skills more to entertain and impress than to fight. All bards are good singers and can play a musical instrument.

- Wear light armor and can use bucklers.
- +2 bonus to Communication, Subterfuge, and Knowledge.
- Can use his song to charm person or remove fear up to 3 times (total) per day.
- From 6th level, a Bard casts illusion spells (player's choice) of 5 levels lower.

Detect Noise

With their fine ear, bards have better chances of hearing and interpreting sounds or overhear parts of a conversation. To do so, the bard must not wear helmets and stay concentrate in silence for one minute. The GM makes a secret check roll and says what the bard is hearing.

Pick Pockets

Bards are swift of hand. They can perform or try to steal small items (also from pockets, sleeves, backpacks, purses) sneaking unnoticed or distracting people. A failed roll means they didn't got the object, but not that they have been noticed (another roll is required).

Read Languages

Hearing and communicating with many different people every day helps bards in understanding writings in other languages. If a successful check roll is achieved, the bard manages to guess some bits of information. Is possible to try only once per level for each single document.

Influence reactions

They can try to obtain a better reaction (or a worse one, if they want) from people and encounters simply performing: it can be a speech, a song or music, a tale, a joke... Targets must roll a save (against paralyzation) with a -1 for every three levels of the bard. If the save is successful the reaction is opposite.

Bardic powers

Bards can inspire allies that can hear them with their art, giving them a +1 bonus to attack rolls, or a +1 bonus to saving throws, or a +2 bonus to morale. Can have also other effects but only related to will and concentration. This requires at least 3 minutes and lasts one round per bard level. Cannot be renewed if allies are engaged in battle.

Magic-counter

They can counter effects of songs and poetry used as magical attacks within 30 feet of distance. They can't do anything than a slow walk (halved movement). If hit or if fail a saving throw the counter-effect is interrupted. To counter they make a save against spells (only once per encounter).

Bardic knowledge

Bards travel a lot and learn a lot. They have a 5% chance per level to know anything the GM thinks appropriate or identify the general nature of a magical item but not the exact function (only if it is possible to examine it closely).

Monk

Monks train in monasteries, often settled in regions hard to reach. There they alternate prayers with training in bare-handed fighting. In many cases, when finished the initial training period, monks have to travel around the world to improve their skills and then return to teach younger pupils. They empower their punches and kicks focusing their own energy.

- Monks use no armour
- Must be lawful
- +3 bonus to Physical
- can fight unarmed
- Their attacks count as magical after 3rd level.

Unarmed fighting

Monks fight unarmed, but with such skill and power their body can become a weapon itself (kicks, punches, etc) doing d6 damage (STR bonus to damage still

applies). Their unarmed damage increases every four levels starting at the fourth level as shown in the following table:

Level	1-3	4-7	8-11	12-15	16-19	20
Damage	1d6	1d8	1d10	2d6	2d8	2d10

Fighting style and multiple attacks

There are many kinds of fighting styles, each one focusing on different set of skills. According to GM, choose if your fighting style will grant you a DEX bonus or a STR bonus during combats. Monks make multiple attacks per round by taking -2 on the first attack, -4 on the second attack, and so on, as long as their melee attack bonus is positive.

Hard to hit

As monks increase in level, it becomes more and more difficult to hit them thanks to their expert movements. If wearing only normal loose clothing they gain an AC bonus equal to half their level (rounded up)

Ethic

Monks live accordingly with rigid sets of rules. Those rules may vary from monastery to monastery and should be decided accordingly with the GM, but they never should be broke them, or they loose temporarily or definitively all special powers derived from being a monk.

Background Story

It's the past of your character and will influence all your gameplay. It has to pass the final judgement of the GM (he may ask you to modify something to better suit the adventure you'll be playing or the scenario) but basically you have freedom to imagine what kind of personal history you character has. Why he decided to adventure? Why he choose to learn something he does? Why he is of a specific class? What does scares him by? What turns him angry? Keep in mind your alignment when doing so.

Think of three adjectives describing your character; these are his motivators – they keep him going on and summarize his personality. You can describe your character in more detail – you are encouraged to do so – but your character can only have three motivators nevertheless.

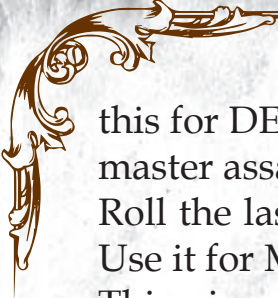

And remember: noone is perfect, so neither characters should be!

Character Creation Example

Let's create a thief! Name: Alex. Class: Rogue. Race: Human. Level: 1.

Roll 4d6: 5, 5, 2, 4. Drop 2 for a total of 14, above average: let's assign this to DEX.

Roll another 4d6: 5, 2, 5, 6. Drop 2 for a total of 16. Damn! Should have used

this for DEX. Doesn't matter, however. We'll use it for STR. This is going to be a master assassin!

Roll the last 4d6: 5, 5, 3, 3. Drop 3 for a total of 13. This must be my lucky day. Use it for MIND.

This gives us STR 16, DEX 14, MIND 13. STR bonus is +3, DEX bonus is +2, MIND bonus is +1 since we have to round down.

Skills are Level + 1 because we're human. And Sub is + 3 because we're a rogue. Thus: Phys 2, Sub 5, Know 2, Comm 2.

There's no magic to worry about. As for combat, we'll be wearing studded leather and a large weapon because we're so strong: A katana, which we could use as a two-handed weapon, if necessary!

Hitpoints is $STR + 1d6 (3) = 19$. Not bad for a rogue...

Armour Class is $10 + DEX \text{ bonus } (+2) + \text{armour bonus } (+3 \text{ for studded leather}) = 15$.

Melee attack bonus is $\text{Level} + STR \text{ bonus} = +4$.

Missile attack bonus is $\text{Level} + DEX \text{ bonus} = +3$.

Let's consider the katana like a bastard sword. Damage is thus $1d10 + STR \text{ bonus} = 1d10+3$.

If you come up with an average (or less) set of stats, don't think immediately to throw the character in the recycle bin: the difference between a powerful character and an hero is the way you role-play him. Try to work on the personality and you will end with a fun-to-play and unforgettable character!

SKILLS, CHECKS AND SAVES

Every time you do something there's a chance to succeed and a chance to fail. It depends on how much you are skilled in what you're doing, on how hard is the task and on a lot of things that can influence your performance. The same thing happens in game terms with *Check rolls*.

A check is one roll of a twenty-sided die where the result can be modified for different reasons. A check serves to determine whether an action is successful or not. In order to do that, the modified result of the die roll is compared to a number, the so called Difficulty Class (DC). If the modified result of the die roll is greater than or equal to the DC, the action is successful, else it failed.

The DC and modifiers for a check are set by the GM. As a general rule, a character receives a +2 bonus to a check for every beneficial circumstance or detail the player gives while describing the action the character tries to perform. Any hindering circumstance may incur a -2 penalty to the check (again, the GM decides whether a penalty applies). The following table gives a guideline on how to set check DCs.

2 A Simple task

5 An Easy task

10 A normal task, an average person has a good chance to succeed

15 A hard task, requires some time and the right tools for average people

20 A very hard task, only the skilled have a real chance to succeed

25 A heroic task, a lot of luck and skill is required

30 An epic task, only a true master, maybe with divine help can succede

Usually, when enough time is given, or the task is obviously easy, to speed up the game it's not necessary to make a check roll: the action can be considered automatically successful.

Skills

There are just 5 skills and their value is equal to your level + any bonus due to your class or race.

Physical: is used for everything related to strength, movement and all things related to pure physical attributes.

Subterfuge: covers a wide range of skills, including Hide, Move Silently, Listen, Open Lock, Search and Spot.

Knowledge: based on this skill are all the actions involving evaluations, logic thinking, memorization and the use of brain in general.

Communication: everything related to communication and empathy with others, people or creatures.

Survival: is used for things like tracking, foraging, setting or spotting snares, hunting, finding water or rare herbs, determining direction, and the like. Only Rangers and Druids are specialized with this skill.

As seen few lines ago, to see if you succeed in doing something you have to roll a check against a DC decided by the GM. If your roll is higher you succeed. Do as follows:

Skill roll = d20 + appropriate skill rank + appropriate stat bonus + situation modifiers

If you roll a 20 (defined "natural 20" or "critical") you automatically succeed, if you roll a 1 you automatically fail in the worst possible way, sometimes even hurting yourself.

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

To climb the character could use Phys+STR ("*I pull myself up*"), Phys+DEX ("*I nimbly climb the cliff face*"), Phys+MIND ("*I take my time, working out the best route and carefully testing each handhold*") or even Sub+STR ("*I climb, quietly*").

When presented with a dungeon door that's barred from the inside, the rough-and-tough Fighter could try to charge it. That's a Phys+STR check against the toughness of the door (DC15, say). The Rogue could try to slide his sword through a crack in the door to push the bar out of the way. That would be a Phys+DEX check at DC10, and probably the best solution. On the other hand, a wily Mage would try to use leverage to lift the door from it's hinges - a Phys+MIND check at DC20 - a difficult check, but far from impossible.

See *Appendix* for a list of suggested rolls for Standard Actions and common Checks.

High level players and skills

Higher level characters in Microlite20 tend to be very skilled even at things outside of their area of expertise. A+3 bonus to one skill at level 1 is a significant advantage. However, by level 20 (and beyond), that bonus is marginal.

To signify the different specialties of each class you can use the following system.

Clerical classes (clerics, druids...) are at (Level + 3 + Mind Modifier) for Communication, and (Half-Level + Ability Modifier) for all other skills. The GM may rule that a Cleric uses (Level + MIND) for Knowledge when used for all things related to dogma-related.

Fighters are at (Level + 3 + Strength Modifier) for Physical, and (Half-Level + Ability Modifier) for all other skills. The GM may rule that a Fighter uses (Level + MIND) for Knowledge when applicable to martial areas.

Magic users are at (Level + 3 + Mind Modifier) for Knowledge, and (Half-Level + Ability Modifier) for all otherskills. The GM may rule that a Magi uses (Level + MIND) for Communication when dealing with other spellcasters.

Rogues and similars (rogues, bards, rangers...) are at (Level + 3 + Dexterity Modifier) for Subterfuge and (Half-Level + Ability Modifier) for all other skills. The GM may rule that a Rogue uses (Level + MIND) for Knowledge when applicable to all things rogue-like.

Saves and Checks

Lot of times characters will face critical situations and they will have to see if their chance to resist to something or to notice something is successful or not. For this occasions the GM will ask to roll one of the following against a DC (like other skills).

Fortitude Save (Fort): chance to resist effects targeting the body's toughness (e.g. poison).

1D20 + LVL + STR modifier + race/class bonus

Reflex Save (Ref): chance to resist effects targeting the body's reflexes (e.g. avoiding an arrow).

1D20 + LVL + DEX modifier + race/class bonus

Willpower Save (Will): chance to resist effects targeting the mind (e.g. resist charm).

1D20 + LVL + CHAR modifier (or INT if you don't use Charisma) + race/class bonus.

Perception Check (Per): chance to notice something or being aware of

something.

1D20 + LVL + MIND modifier + race/class bonus

Feats (Optional)

Characters acquire 1 feat (or 2 if human) at 1st Level, and one more every third character level (1st, 3rd, 6th, 9th, 12th, 15th and 18th levels).

Fighter classes may take "Fighter" Feats, as Mages may take "Magi" feats, Monks may take "Monk" feats, Rogues-like classes may take "Rogue" Feats, and Clerical classes may take "Cleric" feats.

See *Appendix* for a small list of Feats.

Proficiencies (Optional)

A proficiency is a learned skill that isn't essential to the character's class, but enriches him. A character must train, study, and practice to learn a new proficiency. A character may have to wait for several days while his companions heal from an adventure and can decide to spend this time learning something new. Most skills are easier to learn if someone teaches the character. Furthermore, most teachers want payment. Or you can try to self-learn them.

If your GM decides not to use proficiencies, situations will arise in which you'll have to determine whether your character has certain skills. One way to answer this is to pretend that your character knows most of the things that you know: you can learn something outside the game and bring it into your adventure, but you probably have a lot of knowledge that is just not available to someone in a medieval world (even a fantasy medieval world). Likewise, there are things that a typical person in a medieval world would know that you, as a modern person, have never needed to learn. The GM must make it up during play.

See *Appendix* for a list of Proficiencies.

The GM can raise or lower a character's chance of success if the situation calls for it. Factors that can affect a proficiency check include availability and quality of tools, quality of raw material used, time spent doing the job, difficulty of the job, and how familiar the character is with the task.

When two proficient characters work together on the same task, the highest ability score is used (the one with the greatest chance of success). Furthermore, a +1 bonus is added for the other character's assistance. The bonus can never be more than +1, as having too many assistants is sometimes worse than having none.

Nonweapon proficiencies can also be improved beyond the ability score the character starts with. For every additional proficiency slot a character spends on a nonweapon proficiency, he gains a +1 bonus to those proficiency checks.

Heroism (Optional)

While Microlite20 simplifies your game by may decline the use of “Feats”, this could decrease Microlite20’s compatibility with some d20 adventures: Heroism is intended to relieve some of that disparity.

Heroism is a bonus equal to 1 times the characters level (1 at 1st, 2 at 2nd, etc) and may be applied once per day to up to three of the following:

1. Attack Bonus
2. Damage
3. Saving Throw
4. Skill Check
5. Spell DC

MAGIC

Characters can draw from the energy around them or petition their god, and then channel this power through their body and releasing it as a spell. This process is defined as “casting” a spell.

Magic users can cast arcane spells, while clerical classes divine spells: see the description of each class to know how many spells and of which level. Casting a spell of any kind requires the spell caster to spend his energies also. The spell cost has to be subtracted from Hit points and is: 1 + double the level of the spell being cast.

Magic attack bonus = Level + MIND bonus.

Magic defense = 10 + Level + appropriate stat bonus

The Difficulty Class (DC) to resist all spells = 10 + Caster Level + Caster's MIND bonus

This loss cannot be healed normally but is recovered after 8 hours rest.

Magic Points (Optional)

As an alternative to using hit points (hp) to fuel spells, give mages and clerics a magic point (mp) pool equal to their maximum hit point total. Use these to cast spells. Magic points regenerate after eight hours of rest. In an emergency, a mage or cleric can convert hit-points to magic-points at a rate of 2:1. The hit-points thus converted will regenerate after eight hours of rest, just like magic points. They cannot be healed any other way.

Casting spells

Mages must first memorize spells to cast them, and can keep in memory up to

MIND+Mage Level Spells. Memorization takes 10 minutes per spell and a spell book containing the spell to be memorized. Memorized spells can be dismissed at will to be replaced by other spells. Divine casters (clerics, for examples) have to pray their god instead of reading from books.

First level Magic User start with a spell book including all 0 level spells and two first level spells. New spells can be gained by other character's spell books or from scrolls, copying a spell requires use of the Read magic spell. Scrolls get used up in the copying process. First level Clerics can cast any 0 and 1st level spells, new spells are automatically gained on appropriate levels.

Just because a character can cast any spell, doesn't mean that they should. Choose spells that suit the character. All Mages and Clerics should select one 'signature' spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

Whenever "level" is part of a formula used to determine a spell's effects, always use the appropriate spell-casting class level and not character level (if using multi-class characters).

Counter magic

A spell-caster that decides to wait may use it's own spell points and knowledge to counter and nullify another spellcaster's spell instead of taking an action. The spell to be countered, Dispel Magic or Anti-Magic Field must be accessible to the countering spell-caster (of an accessible level for clerics, memorized as well for Magic-Users) who must spend a number of Hit Points equal to those necessary to cast a spell of the same level of the one to be countered.

Both spell-casters roll 1d20, add to this their Mind (or Charisma) bonus and their level: access to dispel magic adds +3 to the roll, while access to Anti-Magic Shell adds an extra +6. Higher roll wins: if the countering spell-caster wins the contest the spell is successfully countered, if the other caster wins it's spell goes off as planned.

Spell upgrades (Optional)

Each upgrade modifies a spell in a given way, and each doubles the casting time of the spell so modified (most spells become full round actions instead of standard actions, for example). Also, each requires an additional expenditure of hit or mana points, added to the standard cost of the spell at the time it is cast.

Extending - Makes a spell last twice as long as it normally would. An Extended spell costs an additional 2hp.

Empowering - Makes a spell do 50% more damage than it normally would. An Empowered spell costs an additional 4hp.

Widening - Makes a spell's area of effect twice as big as it would normally be. A Widened spell costs an additional 6hp.

COMBAT

To protect someone, to fight for your ideals or simply to save your life, sooner or later you will face the need of cross your sword in a real fight. But while realistically everyone moves and attacks at the same time, to better simplify a combat, this is turn-based. Individual characters and creatures take one turn each and after all members of the party and the enemy have had their turns, a new round begins. A combat round represents 6 seconds of time passing for the characters. During combat, distance is measured in squares. Use any size for a square you are comfortable with, though 5ft (1,5m) is recommended.

Basic combat structure

Everyone (GM included) rolls a d20 and adds DEX or initiative modifiers: this roll is called "initiative roll" and the result will give the order of action (lower results first). To simplify more, GM can choose to make a single roll for all the enemies together.

During his turn a character can perform each of the following actions once, in any order:

- **Move:** Move up to your SPD in squares or retrieve an item from your backpack.
- **Standard:** Make an attack or use an item.
- **Minor:** shout an order, activate an item, drop to the ground, stand up, etc..

Standard Modifiers to Initiative

Specific Situation	Modifier
Hasted	-2
Slowed	+2
On higher ground	-1
Set to receive a charge	-2

Wading or slippery footing	+2
Wading in deep water	+4
Foreign environment	+6
Hindered (tangled, climbing, held)	+3
Waiting for reactions	+1

Movement

Movement can be active or passive. Active movement is the movement you make during your turn with a move action, passive movement is any movement caused by special effects or generally spoken any forced movement.

SPD (Speed) is the number of squares a creature can move in a combat turn without making any other action. Is it possible to move for half movement rate and make an attack. The basic value is 6 for standard human sized creatures, but can be modified in various ways:

smaller creatures have a proportional malus and bigger ones a proportional bonus.

Races and creatures that move quickly can have a bonus.

Being heavily encumbered can apply a penalty

Difficult terrains require double the normal value of squares for movement (deep vegetation, spiky rocks and so on), but some classes and races can move freely even in those terrains.

You cannot move more than your max SPD, but passively moved squares are never counted against your SPD. A creature cannot end its movement in a square occupied by an enemy.

Attacking

To perform an attack, roll a D20 and add AB (Attack Bonus).

Melee attack bonus = STR bonus + Level

Missile attack bonus = DEX bonus + Level

Magic attack bonus = MIND bonus + Level

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon. Fighters, Rogues and Rangers can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time. If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

An attack roll is a check against the AC (Armor Class) of the target: if the result is higher the blow has landed. A natural 20 is an automatic hit doing the maximum damage. The AC of a character or of a creature is:

Armor Class (AC) = 10 + DEX bonus + Armour bonus (if any)

Damages

If the attack is successful, the attacker rolls for damage as indicated by the weapon he uses, and adds his damage bonus. Add STR bonus to Melee damage, x2 for 2-handed weapons. The creature targeted by the attack loses that much Health Points (HP). If HP reaches 0, the character or creature falls unconscious and near death; further damage directly reduces STR. If STR reaches 0 death occurs.

Non-Lethal damages (Optional)

Certain types of attacks or effects deal non-lethal damages, like bare-handed fights or suffocation, for example, that could leave you unconscious but that are easily recoverable if you rest enough.

Near your total HP you can sign a parallel number for non-lethal damages: all non-lethal damage suffered is then added to this total. When equals your HP, the character can only do simple actions. If exceeds your HP he falls unconscious.

You can heal nonlethal damage at the rate of 1 hit point per hour per character level.

You can deal non-lethal damages also with your weapon (with the flat of the blade, for example) but since it is an uncommon way of using it, the attack suffers a -4 of penalty.

When a spell or a magical power cures hit point damage, it also removes an equal amount of non-lethal damage.

Optional Rules

The following rules can be optionally used to add depth to the combat phase.

Feint

Make a SUB check against the opponent's Mind + SUB + Attack Bonus. If you win, on your next attack against him he doesn't get Dexterity bonuses.

Surprise

When a combat starts, if you are not aware of your opponents and they are aware of you, you're surprised.

Sometimes only part of all the combatants on a side are aware of their opponents. Determining awareness may call for listen Skill checks, spot Skill checks, or other checks. In the first round of combat, only not surprised characters and monsters can act and roll for initiative. If no one or everyone is surprised, no surprise round occurs.

Grapple

To start a grapple, you need to grab and hold your target making a successful melee touch attack roll (the defender does not count there armor bonus in his

Armor Class). Characters with multiple attacks can try to grapple multiple times (at successively lower base attack bonuses). If you succeed, you and your target are now grappling, and you deal damage to the target as if with an unarmed strike. If you lose, you simply fail to start the grapple. In case of a tie, the combatant with the higher Statistic modifier wins. If this is a tie, roll again to break the tie.

Trip

Make an unarmed melee touch attack against your target (the defender does not count there armor bonus in his Armor Class). If your attack succeeds, make a Strength check opposed by the defender's Dexterity or Strength (the one with the higher modifier). The defender gets a +4 bonus if he has more than two legs or is otherwise more stable than a normal humanoid. If you win, you trip the defender. A tripped character is prone. Some weapons can be used to make trip attacks. In this case, you make a melee touch attack with the weapon instead of an unarmed melee touch attack.

Opportunity Attack

All squares a character can attack with an equipped melee weapon are called the character's threat range. Whenever an enemy moves out of a character's threat range (actively or passively), that character gets to make a an attack against that enemy (opportunity attack). Any character can only perform one opportunity attack per round.

Fighting With two weapons

Characters wielding two weapons can make two attacks instead of one when taking a standard action. When making two attacks the character receives a -4 penalty to both attack rolls (-2 if one weapon is light).

Attack from behind

Attacker has an easier target to hit, plus the defending creature cannot use all his ability to parry. Attacker gets +2 modifier for rear attack and negate the target's shield and Dexterity bonuses.

Charging an Opponent

Charging a foe offers several advantages and disadvantages.

Advantages: movement rate by +50%, attack at the end of his movement, +2 bonus to attack roll from momentum. Certain weapons (such as a lance) inflict double the rolled damage in a charge.

Disadvantages: opponents gain a -2 bonus to their initiative rolls and if the defender is using a spear or polearm weapon and sets it against the charge (bracing the butt against a stone or his foot) inflicts double damage on a successful hit, plus the attacker gains no Dexterity bonuses to Armor Class and suffers an AC penalty of 1.

Fleeing

To flee from combat, a character simply turns and runs up to his full movement rate dropping his defenses. The enemy is allowed a free attack (or multiple attacks if the creature has several attacks per round) at the rear of the fleeing character. This attack is made the instant the character flees: It doesn't count against the number of attacks that opponent is allowed during the round, and initiative is irrelevant. The fleeing character can be pursued, unless a companion blocks the advance of the enemy.

Defence

In order to make himself harder to hit, a character can parry if forfeits all actions for the round, not attacking, moving or casting and focusing only on defense and gaining an AC bonus equal to half the level. Warriors or similar fighting classes gain an additional +1 bonus. This bonus is not effective against rear attacks, magic effects or missile attacks.

Overwhelming

When there is more than one person attacking the same target in the same round, each attacker beyond the first adds +1 to their attack rolls for each attacker before them. So, a second attack on the same target in the same round by a party member would be at +1, a third attack at +2, etc.

Death From Massive Damage

A character runs the risk of dying if hit with a considerable amount of damages due to the shock. A character who suffers 50 or more points of damage from a single attack must roll a successful Fortitude saving throw with DC 15, or he dies. For every 10 damage points exceeding 50, add a +2 to DC.

Special Moves

You can try to disarm, trip or other special moves rolling an attack at -8 (-4 if the weapon you're using is designed for that purpose) against d20+your opponent's to-hit bonus. If you roll higher, you succeed. If not, combat continues with no damages dealt.

Combat Modifiers

Different positions while fighting can help or can cause problems in hitting the foe.

Situation	Attack Roll Modifier
Attacker on higher ground	+1
Defender invisible	-4
Defender off-balance	+2

Defender sleeping or held	Automatic
Defender stunned or prone	+4
Defender surprised	+1
Missile fire, long range	-5
Missile fire, medium range	-2
Rear attack	+2

Morale (Optional)

Instinct tends to make you run for your life when in great danger instead of fight to the end. The Game Master decides when creatures flee the battle and retreat, based on the situation and the creature intelligence. When important for the gameplay, a morale check can be done with a WILL save against a DC decided by the GM.

Weapons and armours

Armour

Armour is protective kind of clothing used to decrease the amount of damages suffered when hit by an enemy giving a Defence Bonus. Armour come in various shapes and materials, offering greater or lesser protection and influencing the performances of the one wearing them causing a penalty to all attack, defence and magic rolls and to all checks related to physical activity such as climbing or sneaking. Following, a general list of armour types: for more accurate values of different types of armour see equipment list.

Type	Armour Bonus	Maximum Speed	Penalty
light armour	+2	unaffected	-2
medium armour	+5	5	-4
heavy armour	+8	4	-6
small shield	+1	unaffected	-1
large shield	+2	unaffected	-2

Armour Class (AC) = 10 + DEX bonus + Armour bonus.

Weapon Type vs. Armor Modifiers (Optional)

Different kinds of armour offer different levels of protection depending on the type of attack they have to absorb. Ringmails, for example, are really effective against cutting attacks, but due to their flexibility offer no protection against the blow of an hammer. You can find these values in the equipment list for armours (S slash, P pierce, B blunt).

Armor Type	Slash	Pierce	Bludgeon
------------	-------	--------	----------

Banded mail	+2	0	+1
Brigandine	+1	+1	0
Chain mail*	+2	0	-2
Field Plate	+3	+1	0
Full Plate	+4	+3	0
Leather armor**	0	-2	0
Plate mail	+3	0	0
Ring mail	+1	+1	0
Scale mail	0	+1	0
Splint mail	0	+1	+2
Studded leather	+2	+1	0

* Includes bronze plate mail

** Includes padded armor and hides

Weapon

Like in a real world exist an infinite number of different weapons, from the simpler sword to the most exotic ones. Moreover, in a fantasy setting this number can grow considerably. You can also invent your own weapon according to Game Master. A weapon determines the amount of damage the character deals with a successful attack. Weapons with a range of 1 square are called melee weapons. Weapons with a greater range are called ranged weapons. As basic rule, shields cannot be used while employing a two-handed weapon.

Following the basic damage and range values for weapons.

Type	Damage	Range
Unarmed	1d4	1
Light	1d6	1
Medium	1d8	1
Heavy	1d10	1
One-handed missile	1d6	15
Two-handed missile	1d6+2	30
Throwing	1d6+2	5

Missile Weapons

Range

Key element in ranged attacks is precision, that strictly depends on the weapon characteristics. Precision progressively drops with the growing of distance. Is possible to shoot to the double of specified range with a -2 penalty to attack roll or at triple distance at -5.

Firing into a Melee

When firing into a melee, the GM counts the number of fighters closely engaged. Small (S) figures count as ½, Medium as 1, Large as 2, Huge as 4, and Gargantuan as 6. The Game Master then rolls to see who will be the target of the shot.

Taking Cover

Concealed is when the target can be seen with difficulty and is not easy to exactly determine where it is (bushes, branches, smoke, curtains...).

Covered is when the target is behind something that can effectively block incoming missiles (trees, rocks, walls, furniture...).

Modifiers for concealment or cover depends on the degree of covering.

Combat Examples

Simple one-on-one example

Alex the thief (HP 19, Melee +4 for 1d10+3, AC 15) is sneaking up on an Orc wearing studded leather and wielding a falchion (HP 1d8+1=3, Melee +1 for 2d4+4, AC 13).

Alex tries to sneak up to the Orc: Roll 1d20+sub+DEX. 1+5+2 = 8. Not good. The Orc has to beat only 8 to spot him. He rolls 1d20+sub+MIND (1 from his 1 HD, 0 for MIND bonus) for 11+1 = 12, easily noticing Alex's attempt to be a shadow.

The Orc hits Alex: 1d20 (19) + 1 = 20 which is bigger than AC 15. Damage is 2d4 (3) + 4 = 7. Alex is now down to 12 HP.

Time for initiative rolls! Alex has 1d20 (10) + 2 = 12, the orc has 1d20 (5). Alex is first and attacks with 1d20 (9) + 4 = 14 which is higher than 13. He hits for 1d10 (7) + 3 = 10 points of damage. This kills the orc.

Four against an Ogre

Kyoshi, Fighter-3, 29hp, STR 16, DEX 12, MIND 8, AC 16, Masterwork Katana+8/+3 (1d10+7)

Myung, Rogue-3, 21hp, STR 12, DEX 18, MIND 9, AC 14, Wakizashi+7/+2 (1d6+1)

Yonkyu, Cleric-3, 23hp, STR 9, DEX 18, MIND 11, AC 14, Takujo+3 (1d6), Kyuu+7/+2 (1d8), Magic+3 ("The Archer")

Yasu Odong, Mage-3, 18hp, STR 5, DEX 11, MIND 14, Tanto+1 (1d4-2), Magic+5 vs.

Ogre, 29hp, AC 16, club+8 (2d8+7).

We're assuming no surprise, no ranged combat, no ambush, and to simplify attacks go in order of attack bonus. Since both the ogre and Kyoshi have +8, let's rule that the Ogre goes first, then the exact order of players doesn't matter for the rest of the round.

Ogre rolls 10+8, does 12 damage to Kyoshi - down to 17.

Kyoshi rolls 17+8, does 10 damage to Ogre - down to 19.

Kyoshi rolls 2+3, misses.

Myung tries to hide, rolls 4 + sub (7) + DEX bonus (4) = 15

Ogre tries to spot, rolls 3 + HD (4) = 7, fails.

Yonkyu casts Bull's Strength on Kyoshi (giving him STR 20), uses 5hp - down to 18.

Yasu Odong casts Sleep on Ogre, rolls 10 + Magic Attack Bonus (5) = 15, uses 3hp - down to 15

Ogre tries to resist, rolls 15 + HD (4) = 19, succeeds.

Ogre rolls 8+8, does 17 damage to Kyoshi – down to 0!

Myung attacks from the shadows, rolls 12+7, does 5+7 damage – down to 7.

Yonkyu sees that the ogre is badly hurt and rolls 18, does 3 damage – down to 4.

Yasu Odong casts Sleep on Ogre, rolls 9 + Magic Attack Bonus (5) = 14, uses 3hp – down to 12

Ogre tries to resist, rolls 6 + HD (4) = 10, fails, and will fall asleep next round!

Ogre rolls 15+8, does 20 damage to Myung – down to 1!

Myung rolls 9+7, does 5 damage to ogre – killing it before sleep takes effect.

Party wins!

Yonkyu casts Cure Light Wounds twice on Kyoshi & Myung, costing him 12 hp total, healing 2d8+6 for each: 15 for Kyoshi and 14 for Myung.

Mass Combat Made Easy

Sometimes may happen to have the need to resolve large scale combats, with two large groups involved. Combat Scale is a multiplier that shows the size of the group fighting and it is only applied to damage in combat between units of different size. Hit Points, AC and all other stats remain the same.

Number in Unit	Combat Scale
2-5	x3
6-10	x4
11-20	x5
21-40	x6
41-80	x7
81-160	x8
161-320	x9
321-640	x10
etc.	

For example, 20 Goblin warriors (CSx5) with HD1d8+1 (5hp), AC15, Morningstar +2 (1d6) or Javelin +3 (1d4) against 15 Elves (CSx5), combat is resolved normally as if it was one goblin against one elf.

If the two units are of a different size, CS acts as a multiplier for damage taken, and also divides any damage given, reducing the size of the Combat Scale as Hit Points as lost. For example, if the twenty Goblins above are reduced to 2hp, they have lost over half their unit, so are now CSx4. When down to just 1hp, they are CSx3 with just 5 goblins remaining.

Experience is gained from taking part in a battle equal to the HD of the opponent, +1 for each CS higher than your own. For example, a member of the 20-strong Grey Company (CSx5) will earn 3EL in a battle against 35 Gnolls (a 2HD creature, CSx6).

Orcs vs Elves

20 orcs enter a forest glade where they are beset upon by 15 elven archers: same CS, considered then like a straight single combat. The elven archers fire their longbows (+3, 1d8), hitting for 3 points of damage. The Orcish unit is down to 2hp: no change to CS, combat continues. The Orcs charge into the bushes. The elves fire another volley, hitting for more 4 more hp: orchish unit is annihilated.

Goblins vs Lone Warrior

Twenty goblins ambush a lone 5th level Fighter. Their CS is x5, so any damage dealt is multiplied by five before it's applied against his Hit Points. Similarly, any damage he does is divided by five. In the first round he hits for 10 damage. That's divided by 5: 2hp lost by the Goblin unit so they're down to 3hp - if they lose another hp they will drop down to CSx4 as they've lost more than half their hit points. In reply, the Goblins hit, attacking with their Morningstars en masse. The Fighter is hit for 4hp, x5 due to their numbers.

Knights vs Red Dragon

The 500-man Order of the Purple Flame fights a Red Dragon. They are CSx10, while the Dragon - a single critter - is just CSx1, though formidable.

500 Knights: HD2d8+4 (14hp), AC18, Lance +7 (1d10+4) or Longsword +6 (1d8+2), CSx10

Red Dragon: HD13x12+39 (123hp), AC21, Bite +20 (2d6+7) or Breath 10d10 DC24.

The Dragon flies high above and breathes flame across their phalanx for 46hp damage. The knights dive for cover beneath their shields (phys+DEX to dodge DC24. They roll 25, barely making it). They take $\frac{1}{2}$ damage - 23hp, divided by CSx10 for 2hp. The Knights are down to 12hp and the dragon lands.

They charge the dragon and hit (rolled $18+7 = 25$ vs. AC21), scoring 11 damage, CSx10 for a massive 110hp damage. The Dragon is down to 13hp against the small army: he bites and hits (rolled $6+20 = 26$ vs. AC18) for 17 damage, divided by 10 = 2hp. The Knights are down to 10hp.

Knights fail their attack ($6 + 8 = 14$, a miss). The Dragon turns to bite again, and rolls a Natural 20. It's a critical, so the Knights take 19hp damage, CSx10 so 2hp lost (down to 8hp). Their longswords hit ($18 + 6 = 24$ vs. AC21), for 6hp damage, CSx10 for a total of 60hp, enough to kill the dragon. 143 ($500 \times 4 / 14$) knights lost their lives in the battle.

EQUIPMENT

If not specified by the Game Master, the common monetary value is the gold piece (gp). A gold piece is worth 10 silver pieces (sp), and a silver piece is worth 10 copper pieces (cp). 10 golden pieces worth 1 platinum piece (pp).

Each character begins his adventure with a starting wealth based on the class, that can be used to purchase initial gear.

Class	Amount
Fighter	150 gp
Rogue	125 gp
Mage/Monk	75 gp
Cleric	120 gp

Fast Packs

Without reading the full equipment list, you can give a quick pre-compiled pack to your character or NPC containing basic tools at the price of 50 gp each. You can freely pick one or let a 1d6 dice choose fore you.

Finally, add the following, based on your Class:

Cleric: Silver Holy symbol & 5 Gold Pieces

Fighter: Vial of Holy Water & 5 Gold Pieces

Mage: Spellbook & 2 Spell Pouches & 5 Gold Pieces

Rogue: Thieves Tools

Pack A (1-2)

Backpack, Belt Pouch, Bedroll, Lantern (hooded), 10 Oil Flasks, Flint & Steel, Shovel, 2 sets of Caltrops, Signal Whistle, Waterskin, Iron Rations (4 days)

Pack B (3-4)

Backpack, Belt Pouch, Bedroll, 10 Torches, 4 Oil Flasks, Flint & Steel, 10 pieces of chalk, 10" Pole, Mirror, Crowbar, Waterskin, Iron Rations (4 days)

Pack C (5-6)

Backpack, Belt Pouch, Bedroll, Tent, 10 Torches, 5 Oil Flasks, Flint & Steel, 50. Rope, Grappling Hook, 10" Pole, Waterskin, Iron Rations (4 days).

Equipment Usage

Caltrops: A caltrop is a four-pronged iron spike crafted so that one prong always faces up in the hope that your enemies step on them or are at least forced to slow down to avoid them. One 2-pound bag of caltrops covers an area 5 feet square. Each time a creature moves into an area covered by caltrops (or spends a round fighting on it), it might step on one. The caltrops make an attack roll (attack bonus +0) against the creature. For this attack, the creature's shield, armor, and spell bonuses do not count. If the creature is wearing shoes or other footwear, it gets a +2 armor bonus to AC. If the caltrops succeed on the attack it deals 1 point of damage, and the creature's speed is reduced by one-half because its foot is wounded. This movement penalty lasts for 24 hours, or until the creature is successfully treated with a DC 15 Heal check, or until it receives at least 1 point of magical curing. A charging or running creature must immediately stop if it steps on a caltrop. Moving at half speed or slower can pick its way through a bed of caltrops with no trouble.

Candle: A candle dimly illuminates a 5-foot radius and burns for 1 hour.

Chain: Chain has hardness 10 and 5 HP. It can be burst with a DC 26 STR check.

Crowbar: A crowbar grants a +2 bonus on Strength checks made for such purposes. If used in combat, treat a crowbar as a club.

Flint and Steel: Lighting a torch or fire takes a round.

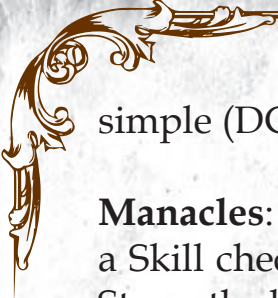

Grappling Hook: Throwing it successfully requires a Skill check (DEX + SUB, DC 10, +2 per 10 feet of distance thrown).

Hammer: If used in combat, treat it as a light hammer.

Ink: Other colors than black costs twice as much.

Lantern: A lantern provides clear illumination in a 60-foot cone and shadowy illumination in a 120-foot cone. It burns for 6 hours on a pint of oil. You can carry a lantern in one hand.

Lock: The DC to open a lock with a Skill check depends on the lock's quality;

simple (DC 20), average (DC 25), good (DC 30), or superior (DC 40).

Manacles: Manacles can bind a Medium creature. A manacled creature can use a Skill check to slip free (DEX + Sub, DC 30). Breaking the manacles requires a Strength check (DC 26). (Most manacles have locks; add the cost of the lock you want to the cost of the manacles.)

Oil: A pint of oil burns for 6 hours in a lantern. You can use a flask of oil as a splash weapon but it takes a full round to prepare a flask with a fuse. Once it is thrown, there is a 50% chance of the flask igniting successfully. A direct hit deals 1d6 points of fire damage. Every creature within 5 feet of the point where the flask hits takes 1 point of fire damage from the splash. On the round following a direct hit, the target takes an additional 1d6 points of damage. If desired, the target can use a turn in a round to attempt to extinguish the flames before taking this additional damage. Extinguishing the flames requires a Skill check PHY + DEX, DC 15. Rolling on the ground provides the target a +2 bonus on the Skill check. Leaping into a lake or magically extinguishing the flames automatically smothers the fire. You can pour a pint of oil on the ground to cover an area 5 feet square, provided that the surface is smooth. If lit, the oil burns for 2 rounds and deals 1d3 points of fire damage to each creature in the area.

Piton: A piton is a metal spike with an eye through which a rope may be passed.

Ram, Portable: This iron-shod wooden beam gives you a +2 bonus on Strength checks made to break open a door and it allows a second person to help you without having to roll, increasing your bonus by +2.

Rope, 50': This rope has 2 hit points and can be burst with a DC 23 Strength check.

Spyglass: Objects viewed through a spyglass are magnified to twice their size.

Torch: A torch burns for 1 hour, clearly illuminating a 20-foot radius and providing shadowy illumination out to a 40-foot radius. If a torch is used in combat, treat it as a one-handed improvised weapon that deals bludgeoning damage equal to that of a gauntlet of its size, plus 1 point of fire damage.

Vial of Holy Water: Holy water damages undead creatures and evil outsiders almost as if it were acid. A vial of holy water can be thrown as a splash weapon. Treat this attack as a ranged attack with a range increment of 10 feet. A vial breaks if thrown against the body of a corporeal creature, but to use it against an incorporeal creature you must be adjacent to it and pour the holy water out onto the target. Doing so is still a ranged attack. A direct hit by a vial of holy water deals 2d4 points of damage to an undead creature or an evil outsider. Each such creature within 5 feet of the point where the vial hits takes 1 point of damage from the splash. Temples to good deities sell holy water at cost (making no profit).

HEALING

There are many ways to recover Health Points. This value, however, can never be higher than the initial value.

Natural Healing

Characters heal naturally at a rate of 1HP and 1STR per day of rest, 3HP and STR bonus (minimum of 1 if no STR bonus) if complete bed rest (doing nothing for an entire day). For each complete week of bed rest, the character can add his STR. In both cases above, the character is assumed to be getting must have adequate food, water, and sleep.

HP lost due to spellcasting recover automatically after a night of rest.

Magical Healing

Healing spells, potions, and magical devices can speed the process of healing considerably.

By using magic, cuts and scratches and an equal amount of non-lethal damages. heal immediately., wounds close instantly and vigor is restored. The effects are immediate.

Herbalism & Healing Proficiencies

Characters can also gain minor healing benefits from those proficient in the arts of herbalism and healing. When aided by someone with healing ability, a character can recover 1HP and 1STR per day more than usual, or 1HP if aided by someone with herbalism (cumulative). The normal 1HP and 1 STR recover rate is possible even when travelling or engaging in nonstrenuous activity when under the care of an healer.

Diseases

A successful healing check allows do diagnose and treat a disease (Game Master may decide is not possible) to its mildest form and shortest duration. Herbalism helps with a +2 bonus to this roll.

Poison

Someone poisoned can be supported by someone with healing knowledge gaining a +2 to saving check. If the poison has been inhaled or swallowed, only an healer with herbalism knowledges can. The healer must help the victim the round after the contact with poison and forfeit all his action in order to help the victim for the next five rounds (the saving throw is delayed). If interrupted, no bonus is gained.

Disease

Diseases have various symptoms and are spread through a number of ways. Several typical diseases are summarized below. DC lists the phys+STR check against DC needed to prevent infection. Incubation lists the time before damage begins and Damage lists the ability damage the character takes after incubation and each day afterward.

Black Death: Injury or inhalation. DC 17, 1 day, 1d4 STR and 1 CHAR and target becomes fatigued.

Blinding Sickness; Spread in tainted water. Ingestion. DC 16, 1d3 days, 1d4 STR, if it causes more than 2 damages another save is required or the victim will be permanently blind.

Cackle Fever: high fever, disorientation, frequent bouts of hideous laughter. Inhaled, DC 16, 1 day, -1d6 MIND.

Demon Fever: Injury. DC 18, 1 day, -1d6 STR. -1STR if a second Fortitude save fails.

Devil Chills: Some demons and pit fiends spread it, injury. DC 14, 1d4 days, 1d4 STR. Requires 3 save throws to heal.

Filth Fever: Dire rats and otyughs spread it. Those injured while in filthy surroundings might also catch it. DC 15, 1d3 days, -1d3 STR and 1d3 DEX.

Mindfire; Feels like your brain is burning. Causes stupor. Inhaled, DC 12, 1 day, -1d4 MIND.

Red Ache: Skin turns red, bloated, and warm to the touch. Injury,

Shakes: Causes involuntary twitches, tremors, and fits. Contact, DC 13, 1 day, -1d8 DEX.

Slimy Doom: Victim turns into infectious goo from the inside out. Contact, DC 14, 1 day, -1d4 STR. permanent -1STR if fails a second Fortitude save.

Poison

Many kinds of poison exist, some of them deadly. It can happen due to a poisoned weapon, a naturally poisonous creature or plant, or consumed in food and drinks. See description of each of them for further details. Poisons, generally, don't damage HP, but directly Stat points. Ability damage is temporary unless marked with an asterisk(*), in which case the loss is permanent.

Make a PHYS+STR check against poison's DC to see if it takes effect. Damage is expressed as X/Y, where X is the initial damage taken if the check fails, Y the secondary damage if a second save, rolled after one minute, also fails.

Unconsciousness lasts 1d3 hours. Price lists the cost for one dose of the poison.

Death From Poison

A poisoned character who dies (as a result of poisoning or not) may still have active venom in his blood. It's impossible to calculate the time it remains active (different body types, no blood circulation...), so it will be for at least 2d6 hours. If resurrected, the character could still be poisoned.

Extreme Heat & Cold

If not wearing suitable protection, roll a Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Resurrection

The only way a dead character can return to life is with an appropriate spell (or similar divine power or device). See the description of these spells for more specific information.

Fatigue (Optional)

This rule adds a bit of consequence to taking lethal or non-lethal damages (either via combat or spell casting). Subtract your non-lethal damages to your actual HP. When the resulting value is 1/2 of the max HP the character is fatigued, when less than 1/4 is exhausted.

Fatigued - cannot run nor charge and takes a -2 penalty to STR and DEX.

Exhausted - moves at half speed and takes a -6 penalty to Strength and Dexterity.

MOVEMENT

Movement while adventuring has a fundamental importance. You will find yourself marching across plains, making your way in deep forests, climbing rocks and buildings, swim in deep waters. While generally having a general knowledge of simple movement basics is enough, sometimes you will need to analyse exactly how you can move in the scenario around you.

Walking

A creature in normal conditions can walk 10x"base movement" yards per minute. Can also jog, run or run faster, multiplying this distance by 1,5, 2 or 3.

A normal day's marching lasts for 10 hours, including reasonable stops for rest and meals. Under normal conditions, a character can walk twice his movement rate in miles in those 10 hours.

Force marching enables a character to travel 2 ½ times his movement rate in miles. At the end of each day of the march, the character or creature must roll a STR check. If the check fails, no more force marching attempts can be made until the characters have completely recovered from the ordeal. Recovery requires half a day per day of force marching. But even if the check fails, the character can continue overland movement at his normal rate. Each day of force marching results in a -1 penalty to all attack rolls. This modifier is cumulative.

Difficult Terrains

Walking or marching could be more difficult in certain terrains than in others. In the following table suggested modifiers to normal movement speed.

Terrain	Highway	Road or Trail	Trackless
Desert, sandy	×1	×½	×½
Flatlands	×1	×1	×¾
Forest	×1	×1	×½

Hills	×1	× ³ / ₄	× ¹ / ₂
Jungle	×1	× ³ / ₄	× ¹ / ₄
Moor	×1	×1	× ³ / ₄
Mountains	× ³ / ₄	× ³ / ₄	× ¹ / ₂
Swamp	×1	× ³ / ₄	× ¹ / ₂
Tundra, frozen	×1	× ³ / ₄	× ³ / ₄

Distances

Personal Movement

Speed	3	4	6	8
One Round	15 ft.	20 ft.	30 ft.	40 ft.
One Minute	150 ft.	200 ft.	300 ft.	400 ft.
One Hour	1½ mi.	2 mi	3 mi.	4 mi.
One Day	12 mi.	16 mi.	24 mi.	32 mi.

Mounted Movement

Mounts	Per Hour	Per Day
Light Horse or Warhorse	6	48
Heavy Horse or Warhorse	5	40
Pony or Warpony	4	32
Donkey or Mule	3	24
Dog, Riding	4	32

Vehicle Movement

Vehicles	Per Hour	Per Day
Cart or Wagon	2	16
Raft or Barge (poled or towed)	1	25
Keelboat (rowed)	1	10
Rowboat (rowed)	1 ½	15
Sailing Ship (sailed)	2	48
Warship (sailed and rowed)	2 ½	60
Longship (sailed and rowed)	3	72
Galley (rowed and sailed)	4	96

Rafts, barges, keelboats, and rowboats are used on lakes and rivers. If going downstream, add the speed of the current (typically 3 miles per hour) to the speed of the vehicle. In addition to 10 hours of being rowed, the vehicle can also float an additional 14 hours, if someone can guide it, so add an additional 42 miles to the daily distance traveled. These vehicles can't be rowed against any significant current, but they can be pulled upstream by draft animals on the shores.

Running (optional)

If necessary (in an important chase, for example) a STR check must be done after some time spent running: after STR turns if jogging, STR/2 if running, STR/4 if running faster respectively with no penalty, with -2 penalty and -4 penalty. If a check fails you can only keep jogging or, if were jogging, you have to stop and rest.

Swimming

Untrained swimmers, when unencumbered, can only manage to stay on the surface in calm waters.

All characters that can swim can cover half their current land movement rate in calm water if not wearing metal armor. Each half-hour spent swimming causes a cumulative penalty of -1 to all attack rolls and a temporary -1 STR.

If a swimming character fails a STR check, he must tread water for half an hour before he can continue swimming (this counts as time spent swimming, for purposes of STR point loss). A character drowns if his STR score drops to 0. Each day of rest recovers 1d6 ability points

Climbing

When climbing, a check roll is required every 10 feet. If not successful, the character cannot find a route to continue climbing and can only go back or let go the grip and fall. When deciding the DC for the roll (percentile) the GM has to consider not only the kind of surface to climb (frequency of handholds), but the race and class of the character. Players have to roll a value equal or less than the percentile requested by the Game Master to succeed.

Falling

Falling is a really dangerous action. A falling creature suffers 1d6 damage per 10 feet, halved if a Phys+DEX saving roll is successful, where DC is equal to depth fallen in feet. If the fall ends in an area with spikes or jagged rocks, add +1 hp of damage to falling damage per 10' fallen (with a maximum of +10 hp).

Encumbrance

To simplify inventory management, characters can carry twelve items in addition to armor, primary weapon, and possibly a shield; up to six small items can be readily available dangling from a belt or slung over the shoulders, but everything else goes into the backpack. Small collections of things (10 flasks, 20 arrows, 50 gems, 100 gold pieces) count as a single item. The Game Master can decide that heavy or large objects may count as 2 or 3 slots (he has to consider the size of a normal backpack).

Heavy encumbered characters may suffer a DEX and SPD penalty as decided by the GM.

LEVEL ADVANCEMENT

During their quests, wanderings, combats and a lot of different situations, characters gain experiences that help them to do better what they usually do or learn new things. In other words, advance their level. There are three ways to advance level: it's up to you and the Game Master to decide

Characters earn experience by completing adventures, defeating monsters and resolving puzzles, but GMs can also reward players with EXP points when they come up with clever thoughts, or when they follow the narration.

Even when a character has earned enough experience to attain the next level, the GM may not allow immediate advancement. He may require the character to receive training to advance. A GM can also rule that the circumstances are not appropriate for the character to advance in level, such as when the game session ends with the characters deep in an abandoned mine complex.

If the level divides by three (i.e. level 3, 6, 9, etc.) add 1 point to STR, DEX, MIND or CHAR.

Game Master decision based advancement

Is the Game Master that decides if and when a character gains a level or gains some traits of new level (a new hit dice, new skills and proficiencies...) basing it in his scenario plot.

Encounter Level based advancement

Encounter Level (EL) is equal to Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Experience Points based advancement

Game Masters assign a value, expressed in Experience Points (EXP), proportional to the difficulty of the task/combat/puzzle faced. Each time, players add this value to their total and when this total is equal or greater than the needed amount, your character can advance.

Level	XP	Level	XP	Level	XP
1st	0	8th	128000	15th	960000
2nd	2000	9th	240000	16th	1080000
3rd	4000	10th	360000	17th	1200000
4th	8000	11th	480000	18th	1320000
5th	16000	12th	600000	19th	1440000
6th	32000	13th	720000	20th	1560000
7th	64000	14th	840000		

Multiclassing

A character can decide, at one point, to begin following a new path, changing his class. Characters may have up to two classes (for example, Fighter/Cleric, or Ranger/Rogue). A multiclass character's Character Level is the sum of the levels in both her classes (a Fighter 2 / Cleric 1 is a level 3 character).

When a character earns the right to go up a level, the player chooses which class to advance or, if the character is single-classed, the player may choose a second class, which begins at level 1.

Advancement is determined by Character Level, but spell descriptions and abilities which reference "level" mean "specific class level".

All Spells have the following characteristics:

Range: determines how far away the target of the spell can be from the caster and still be affected by it. Ranges are: *Self* (affecting only the caster); *Touch* (Target must be touched); *Near* (within 10 yards); *Short* (up to 100 yards); *Far* (target must be in sight of the caster); *Special* (target can be affected by the spell wherever he is as long as the caster has some sort of physical connection to the target like blood, hair or personal item)

Duration: How long the spell lasts: *Instant* (only a moment, although it's effects could be permanent); *Concentration* (as long as the caster concentrates on the spell doing nothing else, usually no more then 20 minutes); *Short* (up to 1 Hour); *Hours* (up to 6 hours); *Day* (a whole day)

Week (a whole week); *Feat* (till a specific condition set by the spell or the caster is met).

Save: How saving against the spell works: *None* (No save possible); *Half* (Saving denies half effect); *Full* (Saving denies all effects)

Notes about SUMMON MONSTER spells.

- The summoning of a monster out of nothing to do your will lasts for 1 round/level.
- The monster has a number of HD equal the caster level that is required to cast the spell.
- The monster's AC equals $10 + (\text{monster's HD} / 2, \text{round up})$
- The monster inflicts damage equal to $1d8$ plus half it's HD (round down)
- Each spell allows the caster to summon, instead of 1 monster from that spell, $1d3$ monsters from the previous spell level or $1d4+1$ monsters from the level below that.
- The monster always looks like a creature that reflects the caster's philosophies, beliefs and associations. I.E. an evil caster's monsters may look like demons, a

naturalist caster's as a glowing animal and a pious caster's monsters appear as glowing balls of light.

Divine Spells

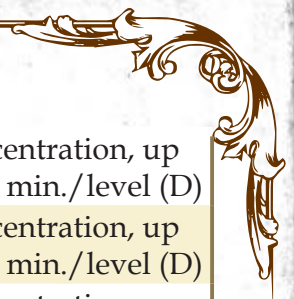

Divine spellcasters can choose between the following spells, but have to carefully consider if these suits with their alignment or cult restrictions.

Level 0

Create Water	Creates 2 gallons/level of pure water.	Instantaneous (D)
Cure Minor Wounds	Cures 1 point of damage.	Instantaneous (D)
Detect Magic	Detects spells and magic items within 60 ft.	Concentration, up to 1 min./level (D)
Detect Poison	Detects poison in one creature or small object.	Instantaneous (D)
Guidance	+1 on one attack roll, saving throw, or skill check.	1 minute or until discharged
Inflict Minor Wounds	Touch attack, 1 point of damage.	Instantaneous
Light	Object shines like a torch.	10 min./level (D)
Mending	Makes minor repairs on an object.	Instantaneous
Purify Food and Drink	Purifies 1 cu. ft./level of food or water.	Instantaneous (D)
Read Magic	Read scrolls and spellbooks.	10 min./level
Resistance	Subject gains +1 on saving throws.	1 minute (D)
Virtue	Subject gains 1 temporary hp.	1 min.

Level 1

Bane	Enemies take -1 on attack rolls and saves against fear.	1 min./level
Bless	Allies gain +1 on attack rolls and +1 on saves against fear.	1 min./level
Bless Water	Makes holy water.	Instantaneous
Cause Fear	One creature of 5 HD or less flees for 1d4 rounds.	1d4 rounds or 1 round; (D)
Command	One subject obeys selected command for 1 round.	1 round
Comprehend Languages	You understand all spoken and written languages.	10 min./level
Cure Light Wounds	Cures 1d8 damage +1/level (max +5).	Instantaneous (D)
Curse Water	Makes unholy water.	Instantaneous
Deathwatch	Reveals how near death subjects within 30 ft. are.	10 min./level
Detect Chaos	Reveals creatures, spells, or objects of selected alignment.	Concentration, up to 10 min./level (D)

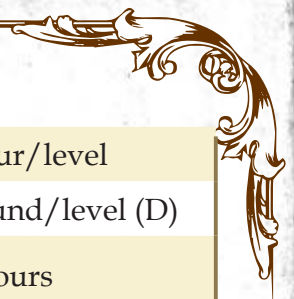

Detect Evil	Reveals creatures, spells, or objects of selected alignment.	Concentration, up to 10 min./level (D)
Detect Good	Reveals creatures, spells, or objects of selected alignment.	Concentration, up to 10 min./level (D)
Detect Law	Reveals creatures, spells, or objects of selected alignment.	Concentration, up to 10 min./level (D)
Detect Undead	Reveals undead within 60 ft.	Concentration, up to 1 minute/level (D)
Divine Favor	You gain +1 per three levels on attack and damage rolls.	1 minute
Doom	One subject takes -2 on attack rolls, damage rolls, saves, and checks.	1 min./level
Endure Elements	Exist comfortably in hot or cold environments.	24 hours (D)
Entropic Shield	Ranged attacks against you have 20% miss chance.	1 min./level (D)
Hide from Undead	Undead can't perceive one subject/level.	10 min./level (D)
Inflict Light Wounds	Touch attack, 1d8 damage +1/level (max +5).	Instantaneous
Magic Stone	Three stones gain +1 on attack rolls, deal 1d6+1 damage.	30 minutes or until discharged (D)
Magic Weapon	Weapon gains +1 bonus.	1 min./level
Obscuring Mist	Fog surrounds you.	1 min./level (D)
Protection from Chaos	+2 to AC and saves, counter mind control, hedge out elementals and outsiders.	1 min./level (D)
Protection from Evil	+2 to AC and saves, counter mind control, hedge out elementals and outsiders.	1 min./level (D)
Protection from Good	+2 to AC and saves, counter mind control, hedge out elementals and outsiders.	1 min./level (D)
Protection from Law	+2 to AC and saves, counter mind control, hedge out elementals and outsiders.	1 min./level (D)
Remove Fear	Suppresses fear or gives +4 on saves against fear for one subject + one per four levels.	10 minutes; (D)
Sanctuary	Opponents can't attack you, and you can't attack.	1 round/level
Shield of Faith	Aura grants +2 or higher deflection bonus.	1 min./level
Summon Monster I	Calls extraplanar creature to fight for you.	1 round/level (D)

Level 2

Aid	+1 on attack rolls, +1 against fear, 1d8 temporary hp +1/level (max +10).	1 min./level
Align Weapon	Weapon becomes good, evil, lawful, or chaotic.	1 min./level
Augury	Learns whether an action will be good or bad.	Instantaneous
Barkskin	Toughens a creature's skin. Grants +2 bonus to AC (+1 every 3 Levels starting from 6 th).	10 min./level (D)
Bear's Endurance	Subject gains +4 to Fort for 1 min./level.	1 min./level (D)
Bull's Strength	Subject gains +4 to Str for 1 min./level.	1 min./level (D)

Calm Emotions	Calms creatures, negating emotion effects.	Concentration, up to 1 round/level (D)
Consecrate	Fills area of 20' radius with positive energy, making undead weaker. They suffer a -1 to all rolls and the caster gains a +3 to turning rolls..	2 hours/level
Cure Moderate Wounds	Cures 2d8 damage +1/level (max +10).	Instantaneous
Darkness	20-ft. radius of supernatural shadow.	10 min./level (D)
Death Knell	Kill dying creature and gain 1d8 temporary hp, +2 to Str, and +1 caster level (empowers known spells but doesn't grant new spells).	Instantaneous/10 minutes per HD of subject.
Delay Poison	Stops poison from harming subject for 1 hour/level.	1 hour/level (D)
Desecrate	Fills area equal to a 25' + 5' / level with negative energy, making undead stronger. They gain +1 to all rolls.	2 hours/level
Eagle's Splendor	Subject gains +4 to Cha for 1 min./level.	1 min./level (D)
Enthrall	Captivates all within 100 ft. + 10 ft./level. Will save.	1 hour or less
Find Traps	Notice traps as a rogue does (MIND + subterfuge) with a bonus equal to half your level (round down).	1 min./level
Gentle Repose	Preserves one corpse.	One day/level
Hold Person	Paralyses one humanoid for 1 round/level. The held creature may attempt a STR + physical save every round.	1 round/level (D)
Inflict Moderate Wounds	Touch attack, 2d8 damage +1/level (max +10).	Instantaneous
Make Whole	Repairs an object.	Instantaneous
Owl's Wisdom	Subject gains +4 to Knowledge for 1 min./level.	1 min./level (D)
Remove Paralysis	Frees one or more creatures from paralysis or slow effect.	Instantaneous
Resist Energy	touched target ignores 20 points of damage/attack from specified energy type after save roll (acid, cold, electricity, fire, or sonic)	10 min./level (D)
Restoration, Lesser	Dispels magical ability penalty or repairs 1d4 ability damage.	Instantaneous
Shatter	Sonic vibration damages objects or crystalline creatures within 25' + 5' / level. Damage against crystalline creatures inflicts 1d6 damage per level (max 1d6, save halves damage).	Instantaneous
Shield Other	You take half of chosen subject's damage. Subject must remain within 25' + 5' / level to benefit and gains +1 to AC and all rolls.	1 hour/level (D)
Silence	Negates sound in 20-ft. radius.	1 min./level (D)
Sound Burst	Deals 1d8 sonic damage to subjects at a range of 25' + 5' / level and a 10' radius ; may stun them on a failed STR + physical roll.	Instantaneous
Spiritual Weapon	Magic weapon attacks on its own within a range of 100' + 10' / level for 1d8 + 1 / level damage for 1 round / level. It attacks as if wielded by caster but the caster can always do something else while "thinking" it to attack.	1 round/level (D)

Status	Monitors condition, position of allies.	1 hour/level
Summon Monster II	Calls extraplanar creature to fight for you.	1 round/level (D)
Undetectable Alignment	Conceals alignment for 24 hours.	24 hours
Zone of Truth	Subjects within range (25' + 5' / level) and radius (20') cannot lie.	1 min./level

Level 3

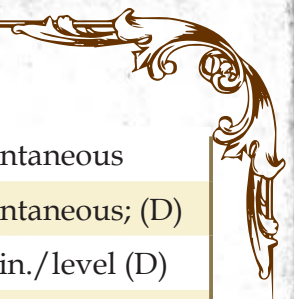

Animate Dead	Creates a number of un-dead skeletons and/or zombies with a HD total equal to twice your caster level. They obey all commands until destroyed.	Instantaneous
Bestow Curse	-6 to an ability score; -4 on attack rolls, saves, and checks; or 50% chance of losing each action.	Permanent
Blindness/Deafness	Makes subject blinded or deafened.	Permanent (D)
Contagion	Infects subject with chosen disease.	Instantaneous (D)
Continual Flame	Makes a permanent, heatless torch.	Permanent
Create Food and Water	Feeds three humans (or one horse)/level.	24 hours; (D)
Cure Serious Wounds	Cures 3d8 damage +1/level (max +15).	Instantaneous (D)
Daylight	60-ft. radius of bright light.	10 min./level (D)
Deeper Darkness	Object sheds supernatural shadow in 60-ft. radius.	One day/level (D)
Dispel Magic	Cancels magical spells and effects.	Instantaneous
Glyph of Warding	Inscription harms 1d8 damage / 2 levels to those who pass it without proper password.	Permanent until discharged (D)
Helping Hand	Ghostly hand leads subject if within 5 miles to you if it chooses.	1 hour/level
Inflict Serious Wounds	Touch attack, 3d8 damage +1/level (max +15).	Instantaneous
Invisibility Purge	Dispels invisibility within 5 ft./level.	1 min./level (D)
Locate Object	Senses direction toward object (specific or type).	1 min./level
Magic Circle Against Chaos	As protection spells, but 10-ft. radius and 10 min./level.	10 min./level
Magic Circle Against Evil	As protection spells, but 10-ft. radius and 10 min./level.	10 min./level
Magic Circle Against Good	As protection spells, but 10-ft. radius and 10 min./level.	10 min./level
Magic Circle Against Law	As protection spells, but 10-ft. radius and 10 min./level.	10 min./level
Magic Vestment	Armor or shield gains +1 enhancement per four levels.	1 hour/level
Meld into Stone	You and your gear merge with stone.	10 min./level (D)
Obscure Object	Masks object against scrying.	8 hours (D)
Prayer	Allies +1 bonus on most rolls, enemies -1 penalty.	1 round/level

Protection from Energy	Absorb 12 points/level of damage from one kind of energy.	10 min./level or until discharged (D)
Remove Blindness/Deafness	Cures normal or magical conditions.	Instantaneous (D)
Remove Curse	Frees object or person from curse.	Instantaneous
Remove Disease	Cures all diseases affecting subject.	Instantaneous (D)
Searing Light	Ray deals 1d8/two levels, more against undead.	Instantaneous
Speak with Dead	Corpse answers one question/two levels.	1 min./level
Stone Shape	Sculpts stone into any shape.	Instantaneous
Summon Monster III	Calls extraplanar creature to fight for you.	1 round/level (D)
Telepathic Bond, Lesser	As telepathic bond, but you and one other creature.	10 min./level
Water Breathing	Subjects can breathe underwater.	2 hours/level; (D)
Water Walk	Subject treads on water as if solid.	10 min./level (D)

Spider, Colossal	20	48d8+48	264	+3	bite +36 (4d6+12 &p); poison (DC35, 2d8 Str), web; vermin

Special Abilities

Babble

This spell-like ability denies the touched creature to speak or understand the language of any intelligent creature. Other creatures hear only babble. The subject is unable to cast magic with a Verbal component until the end of the effect.

Blindsense

Lets the creature notice things it cannot see, but without the precision of blindsight. The creature with blindsense usually does not need to make Spot or Listen checks to notice and locate creatures within range of its blindsense ability. A creature with blindsense is still denied its Dexterity bonus to Armor Class against attacks from creatures it cannot see.

Blindsight

Blindsight is the ability to use a nonvisual sense to operate effectively without vision, making invisibility and concealment irrelevant to the creature with this skill.

Breath Weapon

A creature expells something from its mouth. Most creatures with breath weapons

are limited to a number of uses per day or by a minimum length of time that must pass between uses. Using a breath weapon is typically a standard action. No attack roll is necessary. The breath simply fills its stated area.

Constrict

A creature with this special attack can crush an opponent, dealing bludgeoning damage, after making a successful grapple check. The amount of damage is given in the creature's entry. If the creature also has the improved grab ability it deals constriction damage in addition to damage dealt by the weapon used to grab.

Create Spawn

Targets killed by a creature with Create Spawn rise after 1d4 rounds as zombies/spectres/vampyres under the creature's control. They do not possess any of the abilities they had in life, obey to the creature who created them and definitely die when the creature dies.

Damage Reduction

Allows a creature to ignore a set amount of damage from most weapons (but not from energy attacks, spells, or spell-like abilities). The number in a creature's damage reduction is the amount of hit points of damage the creature ignores. The information after the slash indicates the type of weapon (such as magic, silver, or good) that overcomes the damage reduction.

Darkvision

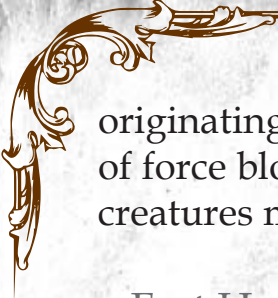

Can see in the dark up to 60 feet. Darkvision is black and white only, but it is otherwise like normal sight.

Enslave

The creature can telepathically force the subject to perform as he or she desires (within the limits of its abilities) knowing what the subject is experiencing, but not receiving direct sensory input. A subject forced to take an action against its nature receives a saving throw with a penalty of -10 to resist taking that particular action.

Etherealness

Ethereal creatures are not present on the Material Plane: are invisible, inaudible, insubstantial, and scentless to creatures on the Material Plane. Even most magical attacks have no effect on them. *See Invisibility* and *True Seeing* reveal ethereal creatures. An ethereal creature can see and hear into the Material Plane in a 60-foot radius, though material objects still block sight and sound. Things on the Material Plane, however, look gray, indistinct, and ghostly. A force effect

originating on the Material Plane extends onto the Ethereal Plane, so that a wall of force blocks an ethereal creature, and a magic missile can strike one. Ethereal creatures move in any direction and material objects don't block them.

Fast Healing

The creature regains hit points at an exceptional rate at the beginning of each of the creature's turns but unlike regeneration, it doesn't allow a creature to regrow or reattach lost body parts. Fast healing does not restore hit points lost from starvation, thirst, or suffocation.

Fiery Aura

Anyone within 20 feet must succeed on a DC12 Fortitude Save or take 1d6 points of heat damage per round from the intense heat.

Flight

A creature with this ability can cease or resume flight as a free action. If the ability is supernatural, it becomes ineffective in an antimagic field until this effect persists. can finish its movement in a square occupied by someone else.

Improved Grab

If the creature hits with a melee weapon (usually a claw or bite attack), it deals normal damage and attempts to start a grapple (opponents at least one size category smaller) as a free action without provoking an attack of opportunity. No initial touch attack is required. It can even move the opponent, provided it can drag the opponent's weight.

Incorporeality

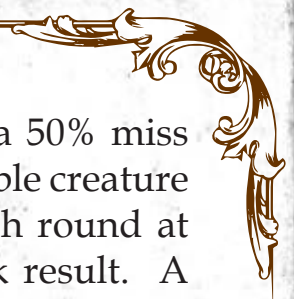

Some creatures (spectres, wraiths...) are insubstantial, can be harmed only by other incorporeal creatures, by magic weapons, or by spells, spell-like effects, or supernatural effects, and they cannot manipulate objects or exert physical force on objects. However, they have a tangible presence that sometimes seems like a physical attack against a corporeal creature.

If struck by magic or magic weapons, an incorporeal creature has a 50% chance to ignore any damage from a corporeal source — except for a force effect or damage dealt by a ghost touch weapon. The physical attacks of incorporeal creatures ignore material armor, even magic armor, unless it is made of force.

Incorporeal creatures do not leave footprints, have no scent, and make no noise unless they manifest, and even then they only make noise intentionally.

Invisibility

Visually undetectable. Gives a +2 bonus on attack rolls against sighted opponents, and ignores its opponents' Dexterity bonuses to AC (if any). Even if an attacker

correctly guesses the invisible creature's location, the attacker has a 50% miss chance in combat. Is possible to notice the presence of an active invisible creature within 30 feet with a DC 20 Spot check or with a Listen check each round at least equal to the invisible creature's Move Silently (or DEX) check result. A creature can blindly attack two adjacent 5-foot squares using a standard action. If an invisible target is in the designated area, there is a 50% miss chance.

Leader

+2 bonus to attack and damage rolls for all allied creatures within 50 ft (10 squares) from the leader.

Low-Light Vision

So sensitive to light that they can see twice as far as normal in dim light. Low-light vision is color vision. Characters with low-light vision can see outdoors on a moonlight night as well as they can during the day.

Mastery: Earth/water/fire/air

An earth/water elemental gains a +1 bonus on attack and damage rolls if both it and its foe are touching the ground/water. If an opponent is airborne (or waterborne/in the ground), the elemental takes a -4 penalty on attack and damage rolls. Airborne creatures suffer -1 on their rolls against air elementals.

Mindless

The creature cannot take logic decision and is driven only by basic instincts. +20 on Will saves. It cannot make attacks of opportunity.

Natural Cunning

Although not especially intelligent, the creature possesses innate cunning and logical ability. This prevents the creature from ever becoming lost, and enables it to track enemies. Further, it is never caught flat-footed.

Pounce

When a creature with this special attack makes a charge, it can follow with a full attack—including rake attacks if the creature also has the rake ability.

Powerful Charge

When a creature with this special attack makes a charge, its attack deals extra damage in addition to the normal benefits and hazards of a charge. The amount of damage from the attack is given in the creature's description.

Push

A creature can start a bull rush maneuver without provoking an attack of opportunity.

Rake

Gives one extra natural attack when grappling a foe, not subject to the usual -4 penalty for attacking with a natural weapon in a grapple. A creature must begin its turn grappling to use its rake.

Regeneration

Recover from wounds quickly and regrow or reattach severed body parts. Damage is treated as nonlethal but certain attacks (like fire and acid) deal normal damage. If unconscious (through nonlethal damage) can be killed with a coup de grace that doesn't convert to nonlethal damage.

Scent

The creature can detect approaching enemies, sniff out hidden foes, and track by sense of smell within 30 feet (if upwind 60 feet, if downwind 15 feet). Strong or weak scents can modify the range. Helps to detect another creature's presence and direction but not its specific location.

Snatch

The creature can choose to start a grapple when it hits with a claw or bite attack (if the target is three or more sizes smaller, it squeezes each round or automatic bite or claw damage). The creature can drop a creature it has snatched as a free action or use a standard action to fling it aside (travels $1d6 \times 10$ feet, and takes $1d6$ points of damage per 10 feet traveled).

Stonecunning

+2 bonus on Search checks to notice unusual stonework (or something disguised as stone), such as sliding walls, stonework traps, new construction, unsafe stone surfaces, shaky stone ceilings, and the like.

Swallow Whole

If a creature with this special attack begins its turn with an opponent held in its mouth (see Improved Grab), it can attempt a new grapple check. If it succeeds, it swallows its prey, and the opponent takes bite damage. A swallowed creature is considered to be grappled, while the creature that did the swallowing is not.

Torment

Targets are tormented by itching skin and burning eyes. -4 to AC and -2 on

attack rolls for 3 rounds. The save DC is Fortitude-based.

Trample

As a full-round action, a trampling creature can move up to twice its speed and run over any opponents at least one size category smaller than itself dealing bludgeoning damage (creature's slam damage + $1\frac{1}{2}$ Str modifier).

Trampled opponents can attempt attacks of opportunity (with -4 penalty) or attempt Reflex saves to take half damage (DC = $10 + \frac{1}{2}$ creature's HD + creature's Str modifier). A trampling creature can only deal trampling damage to each target once per round, no matter how many times its movement takes it over a target creature.

Tremorsense

A creature with tremorsense automatically senses the location of anything that is in contact with the ground and within range. As long as the other creatures are taking physical actions, including casting spells with somatic components, they're considered moving.

Creature Sizes and Modifiers

Size Category	Attack & AC Mod.	Special Attacks Modifier ¹	Hide Modifier	Height or Length ² (from/to)	Weight ³ (from/to)	Space ⁴	Natural Reach ⁴	
							Tall	Long
Fine	+8	-16	+16	6 in. or less	1/8 lb. or less	1/2 ft.	0 ft.	0 ft.
Diminutive	+4	-12	+12	6 in. 1 ft.	1/8 lb. 1 lb.	1 ft.	0 ft.	0 ft.
Tiny	+2	-8	+8	1 ft. 2 ft.	1 lb. 8 lb.	2-1/2 ft.	0 ft.	0 ft.
Small	+1	-4	+4	2 ft. 4 ft.	8 lb. 60 lb.	5 ft.	5 ft.	5 ft.
Medium	+0	+0	+0	4 ft. 8 ft.	60 lb. 500 lb.	5 ft.	5 ft.	5 ft.
Large	-1	+4	-4	8 ft. 16 ft.	500 lb. 2 tons	10 ft.	10 ft.	5 ft.
Huge	-2	+8	-8	16 ft. 32 ft.	2 tons 16 tons	15 ft.	15 ft.	10 ft.
Gargantuan	-4	+12	-12	32 ft. 64 ft.	16 tons 125 tons	20 ft.	20 ft.	15 ft.
Colossal and Colossal+	-8	+16	-16	64 ft. or more	125 tons or more	30 ft.	30 ft.	30 ft.

1. This modifier applies to the Bull Rush, Grapple, Overrun and Trip special attacks.
2. Biped's height, quadruped's body length (nose to base of tail)
3. Assumes a regular animal. A stone creature will weigh more, a gaseous one less.
4. These values are typical for creatures of the indicated size. Some exceptions exist.

Monster Creation

You can create your own monsters, using those already made or starting from scratch. Following some guidelines to adjust values and stats.

Creature Statistics (to be modified by the table below):

HP: any creature receives $1d6 + \text{modifier}$ HP per level.

AB & DB: add +1 per level

Resistances: level+3 for one resistance, level for the other resistances

SPD: double for quadrupedal creatures of small size or above.

Space: squares occupied if you are using a squared map with miniatures/tokens to represent the map

Size Category	Space	SPD	HP per level	AB / DB
Fine	0,125	1	$1d6-3$	+8
Diminutive	0,25	2	$1d6-2$	+4
Tiny	0,5	3	$1d6-1$	+2
Small	1	4	$1d6+0$	+1
Medium	1	6	$1d6+0$	+0
Large	2	8	$1d6+0$	-1
Huge	3	10	$1d6+1$	-2
Gargantuan	4	12	$1d6+2$	-4
Colossal	6	14	$1d6+3$	-8

Finally, add one (or more) special abilities from the list in previous pages or feel free to invent new ones.

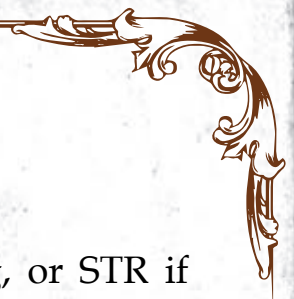

APPENDIXES

SKILL CHECKS

Following, suggested rolls for Standard Actions and typical Skill Checks. Don't forget to adapt checks at the most appropriate stat depending on situation.

Acrobatics - sub+DEX
Appraise - com+MIND
Arcana - know+MIND
Athletics - phys+STR
Balance - phys+DEX
Bluff - com+MIND
Boating - phys+DEX
Cartography - know+MIND
Charisma - com+MIND if you don't use the stat
Climb - phys+DEX or STR, whichever is highest
Concentration - doesn't apply. GM's fiat applies
Cultures - com+KNOW
Craft - know+DEX
Decipher Script - or com+MIND
Diplomacy - com+MIND
Disable Device - sub+MIND or sub+DEX
Disguise - sub+MIND
Endurance - phys+STR or surv+STR (in nature)
Escape Artist - sub+DEX or sub+STR, depending on what you're escaping out of
Etiquette - com+MIND or know+MIND
First Aid - know+MIND
Fly (Riding creature) - surv+DEX
Fly (Riding object) - phys+DEX
Forgery - com+DEX
Gather Information - com+MIND
Geography - know+MIND
Handle Animal - com+MIND or com+STR if the animal is bigger than you
Heal - know+MIND
Hide - sub+DEX
History - know+MIND
Insight - com+MIND
Intimidate - could be phys+STR, or sub+MIND or com+STR. You choose
Jump - phys+STR (long jump) or phys+DEX (high jump)
Knowledge - know+MIND
Languages - com+MIND
Lift - phys+STR
Listen - sub+MIND
Move Silently - sub+DEX

Nature - or surv+MIND
Notice - subt+MIND or surv+MIND (in nature)
Open Lock - sub+DEX
Perform - com+MIND, though it could be DEX if you're juggling, or STR if you're a weightlifter
Persuasion - com+MIND
Profession - com+MIND, usually
Psychology - or com+MIND (to restore sanity)
Read lips - subt+MIND
Resist fear: or com+MIND or surv+MIND
Ride - com+DEX
Search - sub+MIND
Sense Motive - com+MIND
Sleight of Hand - sub+DEX
Spellcraft - MIND only or know+MIND
Spot - sub+MIND
Surveillance - sub+MIND
Survival - or surv+MIND or know+STR or surv+STR
Swim - phys+STR
Tumble - phys+DEX
Use magic device - know+MIND
Use rope - Phys+DEX

POISONS

Damage is expressed as X/Y, where X is the initial damage taken if the check fails, Y the secondary damage if a second save, rolled after one minute, also fails. Paralysis lasts 2d6 minutes. Unconsciousness lasts 1d3 hours. An asterisk (*) indicates that the loss is permanent. Price lists the cost for one dose of the poison.

Arsenic: Ingested, DC 13, -1 STR/-1d8 STR, 120 gp.

Black adder venom: Injury, DC 11, 1d6 PHY / 1d6 PHY, 120 gp.

Black lotus extract: Contact, DC 20, 3d6 PHY / 3d6 PHY, 4,500 gp.

Bloodroot: Injury, DC 12, 0 / 1d4 PHY + 1d3 Mind, 100 gp.

Blue Whinnis: Injury, DC 14, -1 STR/ unconsciousness, 120 gp.

Burnt Othur Fumes: Inhaled, DC 18, -1 STR*/-3d6 STR, 2,100 gp.

Carrion crawler brain juice: Contact, DC 13, Paralysis / 0, 200 gp.

Dark reaver powder: Ingested, DC 18, 2d6 PHY / 1d6 PHY + 1d6 STR, 300 gp.

Deathblade: Injury, DC 20, -1d6 STR/-2d6 STR, 1,800 gp.

Dragon bile: Contact, DC 26, 3d6 STR / 0, 1,500 gp.

Giant wasp poison: Injury, DC 18, 1d6 DEX / 1d6 DEX, 210 gp.

Greenblood oil: Injury, DC 13, 1 PHY / 1d2 PHY, 100 gp.

Id moss: Ingested, DC 14, 1d4 Mind / 2d6 Mind, 125 gp.

Insanity Mist: Inhaled, DC 15, -1d4 MIND/-2d6 MIND, 1,500 gp.

Lich dust: Ingested, DC 17, 2d6 STR 1d6 / STR, 250 gp.

Malys Root Paste: Contact, DC 16, -1 DEX/-2d4 DEX, 500 gp.

Monstrous Scorpion (tiny): Injury, DC 12, -1 STR/-1 STR, 50 gp.

Monstrous Scorpion (small): Injury, DC 12, -1d2 STR/- 1d2 STR, 100 gp.

Monstrous Scorpion (large): Injury, DC 14, -1d4 STR/- 1d4 STR, 200 gp.

Monstrous Scorpion (huge): Injury, DC 18, -1d6 STR/- 1d6 STR, 400 gp.

Monstrous Spider (tiny): Injury, DC 10, -1d2 STR/-1d2 STR, 85 gp.

Monstrous Spider (small): Injury, DC 10, -1d3 STR/- 1d3 STR, 125 gp.

Monstrous Spider (large): Injury, DC 13, -1d6 STR/-1d6 STR, 250 gp.

Monstrous Spider (huge): Injury, DC 16, -1d8 STR/-1d8 STR, 500 gp.
Nitharit: Contact, DC 13, 0/-3d6 STR, 650 gp.
Oil of Taggit: Ingested, DC 15, 0/unconsciousness, 90 gp.
Purple worm poison: Injury, DC 24, 1d6 STR / 2d6 STR, 700 gp.
Sassone Leaf Residue: Contact, DC 16, -2d12 hp/-1d8 STR, 300 gp.
Shadow essence: Injury, DC 17, 1 STR* / 2d6 STR, 250 gp.
Sleep Poison: Injury, DC 13, unconsciousness/unconc. for 2d4 hours, 75 gp.
Small centipede poison: Injury, DC 11, 1d2 DEX / 1d2 DEX, 90 gp.
Snake (medium viper): Injury, DC 11, -1d6 STR/-1d6 STR, 120 gp.
Snake (large viper): Injury, DC 11, -1d6 STR/-1d6 STR, 120 gp.
Snake (huge viper): Injury, DC 14, -1d6 STR/-1d6 STR, 250 gp.
Striped toadstool: Ingested, DC 11, 1 Mind / 2d6 Mind, 180 gp.
Terinav root: Contact, DC 16, 1d6 DEX 2d6 / DEX, 750 gp.
Ungol dust: Inhaled, DC 15, 1 COM / 1d6 COM + 1 COM*, 1,000 gp.
Wyvern: Injury, DC 17, -2d6 STR/-2d6 STR, 3,000 gp.

FEATS

(A)=Any, (F)=Fighter, (R)=Rogue, (Mk)=Monks, (M)=Magi, (C)=Cleric, (Pre:)=Prerequisite Required for Feat.

Abjuration: (M/C) +2 to all Counter-spelling rolls. Also the character spends 1 HP less for spell countering actions.

Acrobatic: (A) +2 Bonus on Jump and Tumble Checks

Agile: (A) +2 Bonus on Balance and Escape Artist

Alertness: (A) +2 Spot and Listen Checks

Animal Affinity: (A) +2 Handle Animal

Athletic: (A) +2 Climb and Swim Checks

Blind Fight: (F/R/Mk) No penalty vs. invisible or in darkness

Brew Potion (M/C) (Pre: Must be 3rd class Level or above) May brew potion for personal effect spells (i.e. Bless, Resistance, Feather Fall, Mage Armor). Cost: Spell Level X Caster class Level X 50 gp. Any character may use potions. Potions require one day of work per dose.

Bull Rush: (F/C/Mk) (Pre: Str. 13, Power Attack) Push an opponent back 5'.

Circle magic: (M/C) A spell-caster may form a magical circle with spell-casters of same type and ethos having the Circle magic feat: all circle members must be within 5' of each other and can do nothing else while taking part to the circle for the circle to work.

Any distraction or attack that deals damage will break the circle. The highest level member is designed circle leader. No circle can contain more members than 4 plus the Circle leader Charisma bonus.

While the circle is active the leader will be able to cast and counter any spell known to any circle member and can use other member's Spell points to cast spells or use Counter-magic.

Forming a Circle requires a full action, nothing else can be done that round.

Create bonus item: (M/C) (Pre: Must be 6th class Level or above) May create an item granting a bonus. Armours and shields grant bonuses to AC, weapons grant bonuses to Attack and damage rolls. Cloaks, boots and rings can grant bonuses to AC, skills and attributes. Each item can grant a bonus to a single

thing, no item can grant a bonus higher than (maximum spell level usable by the character/2 rounded up), no character can receive a bonus on the same thing by different items.

Cost: bonus X item base cost X 300gp. Creating an item requires one week of work per +1 granted.

Bonus items are open to all classes.

Cleave: (F/C/Mk) (Pre: Str. 13, Power Attack) If you kill a creature and have a second opponent within 5', you may make a free attack.

Deceitful: (R) +2 to Forgery or Disguise

Dodge: (F/R/C/Mk) +1 AC against any opponent you choose.

Enchant charged item: (M/C) (Pre: Must be 9th class Level or above) May create a charged item of any spell you know, and Cast without loss of HP. Only M/C can use charged items, and only of same type.

Cost: Spell Level X Caster class Level X 100gp X Charge Or Spell Level X Caster class Level X 1000gp X Daily uses. Recharging an existing item costs half as much per charge.

Creating an item requires one week of work, recharging takes simply one day. Items open to all classes require twice the costs and times.

Frenzy: (F) can enrage a number of times per day equal to half its level round down. Temporarily gains a +4 Str, and a +2 on saves against mind-affecting magic, but -2 to Armor Class. Do not employ missile weapons but instead charge in melee the nearest eligible target.

The increase in Strength temporarily affects both attack and damage rolls and hit points. While raging, a character cannot use the Subterfuge, Knowledge and Communication skills (except for Escape Artist or Intimidate actions), or any abilities that require patience or concentration, nor can he cast spells or activate magic items that require a command word, a trigger (such as a wand), or spell completion (such as a scroll) to function.

He can use any feat he has except Improved Defense, item creation feats, and magic feats. Rage lasts for a number of rounds equal to 3 + the character's (newly improved) Strength modifier. A character may prematurely end his rage. At the end of the rage, the character loses the rage modifiers and restrictions and becomes fatigued (-2 Str, -2 Dex, can't charge or run) for the duration of the current encounter.

Great Cleave: (F/C/Mk) (Pre: Str. 13, Power Attack, Cleave) If you kill one creature, you can continue using Cleave as long as each successive attacks results in a kill.

Heavy Armour: (A) (Pre: Medium Armour) The character is trained in the use of Heavy armour.

Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Heroic Spirit: (A) The character gets 3 reserve points for free.

Improved Critical: (A) The character now gets a Critical Hit on any roll of 19 or-20, doing max damage.

Improved Defense: (A) May take a -4 to all attack rolls to add a +4 to AC. May not be used in conjunction with Power Attack.

Improved Initiative: (A) +4 to Initiative

Improved Turning: (C) Clerics can turn undead as if they were one level higher.

Investigator: (A) +2 to Gather Information and Search Checks

Lightning Reflexes: (F/R/C/Mk) +2 to Phys + STR or DEX bonus.

Light Armour: (A) The character is trained in the use of Light armour. Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Magical Aptitude: (M/C) Spells cost 1HP less, or 2HP less if casting signature spell.

Manyshot: (F/C/R) (Pre: Dex 17, Point Blank Shot, Rapid Shot) You may fire two arrows at any single opponent, at -4 Penalty to hit. Damage remains the same. Gain one additional arrow at same Penalty every time you take this Feat.

Marksman: (A) The character is trained in the use of marksman weapons. Using a weapon for which the character has no training inflicts a -4 to the attack roll.

Medium Armour: (A) (Pre: Light Armour) The character is trained in the use of Medium armour. Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Mounted Archery: (F) (Pre: Mounted Combat) Penalty for Ranged Weapon is halved, from -4 to -2.

Mounted Combat: (F) Once per round, of your mount is hit, you can negate the

hit if your Ride check is higher than opponent's Attack Roll.

Negotiator: (A) +2 to Diplomacy and Sense Motive Checks.

Nimble Fingers: (R) +2 to Open Locks and Disable Device

One handed weapons: (A) The character is trained in the use of one handed weapons.

Using a weapon for which the character has no training inflicts a -4 to the attack roll.

Personal Improvement: (A) The character may add 1 point to STR, DEX, CHA or MIND.

Persuasive: (A) +2 to Bluff and Intimidate

Point Blank Shot: (F/C/R) +1 Attack and Damage if target is within 30 Ft.

Power Attack: (F/C/Mk) (Pre: Str. 13) Subtract up to 4 from your "To Hit" Roll. Add this to your Damage, if you hit. May not be used in conjunction with Improved Defense.

Power Spell: (M/C) The character's spells are considered as two levels higher to determine saving throws difficulty. The spell-caster gets a +2 to the rolls for resisting counter-spells.

Quick Draw: (F/C/R/Mk) You can draw and strike in the same round.

Rapid Reload: (F/C/R) You can reload a crossbow and fire in a single round, instead of reload one round, and fire the next.

Rapid Shot: (F/C/R) (Pre: Dex 13, Point Blank Shot) One extra shot per round, second shot at -2 to hit.

Ride-By Attack: (F) (Pre: Mounted Combat) You can move, attack, and move again in a round.

Run: (A) You can outrun almost any opponent. Your run action allow you to move five times the base speed.

Scribe Scroll: (M/C) May create a scroll of any spell you know, and Cast without loss of HP. Cost: Spell Level X Caster Level X 25gp. Only M/C can use scrolls, and only of same type. Scrolls require one day of work per spell. Scrolls open to all classes require twice the costs and times.

Shield Training: (A) The character is trained in the use of Shields. Wearing armour and/or shield for which the character is not trained inflicts an Initiative and attack penalty equal to the armour's AC mod.

Stealthy: (A) +2 Bonus to Move Silently and Hide Skills.

Track: (F/R) You can Track creatures and characters across most terrain. Typical DC are Soft Ground 10, Firm Ground 15, Hard Ground 20. GMs may modify DC as conditions require. Things to consider: Size of target, time, weather, time of day.

Trample: (F) (Pre: Mounted Combat) When you overrun an opponent, it cannot avoid the attack. Mount may attack with hoof or paw, rider's next attack is at +4 as target is prone.

Tough: (A) You get 3 extra hit points.

Two handed weapons: (A) (Pre: One-handed weapons) The character is trained in the use of Two handed weapons. Using a weapon for which the character has no training inflicts a -4 to the attack roll.

Two-Weapon Fighting: (F/C/R/Mk) (Pre: Dex. 15) You get to attack with two weapons with no penalty for second weapon

Weapon of Choice: (F) (Pre: 5th Fighter Level) You get +1 to attack and +2 to damage when using a specific weapon of your choice.

PROFICIENCIES

Following are some abilities (some proficiencies need more than one slot to obtain):

Agriculture
Ancient History
Animal Handling
Animal Lore

TRAPS

The entries for traps include the following information:

Attack shows the traps attack bonus or type of effect.

Damage shows the amount and type of damage the trap deals.

Save DC lists the phys+DEX check DC needed to either avoid the trap entirely, or to take only ½ the listed damage (if this is possible).

Search DC lists the DC for the check needed to find the trap without triggering it.

Disable DC lists the DC for the sub+DEX check needed to disarm the trap safely.

EL1 Traps

Basic Arrow Trap: Atk +10 (1d6, arrow); Search DC 20, Disable sub+DEX DC 20.

Camouflaged Pit Trap: 10 ft. deep (1d6, fall); Save DC 15 to avoid; Search DC 24, Disable DC 20.

Poison Dart Trap: Atk +8 (1d4 plus poison, dart); Search DC 20, Disable DC 18.

EL2 Traps

Burning Hands Trap: spell effect (1d4, fire); Save DC 11 for ½ damage; Search DC 26, Disable DC 26.

Large Net Trap: Atk +5 (—); Save DC 14 to avoid; Search DC 20, Disable DC 25.

Pit Trap: 40 ft. deep (4d6, fall); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL3 Traps

Fire Trap: spell effect (1d4+3, fire); Save DC 13 for ½ damage; Search DC 27, Disable DC 27.

Pit Trap: 60 ft. deep (6d6, fall); Save DC 20 to avoid; Search DC 20, Disable DC 20.

Poisoned Arrow Trap: Atk +12 (1d8 plus poison, arrow); Search DC 19, Disable DC 15.

EL4 Traps

Lightning Bolt Trap: spell effect (5d6, electricity); Save DC 14 for ½ damage; Search DC 28, Disable DC 28.

Spiked Pit Trap: 60 ft. deep (6d6, fall), Atk +10 (1d4 each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

Wall Scythe Trap: Atk +20 (2d4+8, scythe); Search DC 21, Disable DC 18.

EL5 Traps

Falling Block Trap: Atk +15 (6d6, slam); Search DC 25, Disable DC 17.

Fireball Trap: spell effect (1d4+7, fire); Save DC 16 for ½ damage; Search DC 29, Disable DC 29.

Poisoned Wall Spikes: Atk +16 (1d8+4 plus poison, spikes); Search DC 17,

Disable DC 21.

EL6 Traps

Compacting Room Trap: walls move together (12d6, crush); Search DC 20, Disable DC 22.

Lightning Bolt Trap: spell effect (10d6, electricity); Save DC 14 for ½ damage; Search DC 28, Disable DC 28.

Spiked Pit Trap: 100 ft. deep (10d6, fall), Atk +10 (1d4+5 each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL7 Traps

Black Tentacles Trap: spell effect (tentacles) Atk +7 (1d6+4 each, 1d4+7 tentacles); Search DC 29, Disable DC 29.

Chain Lightning Trap: spell effect (11d6 to nearest target +5d6 each to up to 11 secondary targets, electricity); Save DC 19 for ½ damage; Search DC 31, Disable DC 31.

Well-camouflaged Pit Trap: 70 ft. deep (7d6, fall); Save DC 25 to avoid; Search DC 27, Disable DC 18.

EL8 Traps

Destruction Trap: spell effect (death); Save DC 20 (phys+STR) for 10d6 damage; Search DC 32, Disable DC 32.

Power Word Stun Trap: spell effect (stun 2d4 rounds); Search DC 32, Disable DC 32.

Well-camouflaged Pit Trap: 100 ft. deep (10d6, fall); Save DC 20 to avoid; Search DC 27, Disable DC 18.

EL9 Traps

Dropping Ceiling: ceiling moves down (12d6, crush); Search DC 20, Disable DC 16.

Incendiary Cloud Trap: spell effect (4d6/ round for 15 rounds, fire); Save DC 22 for ½ damage; Search DC 33, Disable DC 33.

Wide-mouthed Spiked Pit with Poisoned Spikes: 70 ft. deep (7d6, fall), Atk +10 (1d4+5 plus poison each, 1d4 spikes); Save DC 20 to avoid; Search DC 20, Disable DC 20.

EL10 Traps

Crushing Room: walls move together (16d6, crush); Search DC 22, Disable DC 20.

Crushing Wall Trap: Atk automatic (18d6, crush); Search DC 20, Disable DC 25.

Energy Drain Trap: Atk +8 (2d4 negative levels for 24 hours); Save DC 23 to avoid; Search DC 34, Disable DC 34.

*Glaives, guisarmes, lances, longspears, spiked chains, and whips are reach weapons. A reach weapon is a melee weapon that allows to strike at targets that aren't adjacent to him. Most reach weapons double the natural reach (10 feet), but not allow to attack a creature in an adjacent square. Spiked chains may make both reach and normal attacks.

Ranged Weapons

Weapon	Cost	Dmg	Range
Crossbow, hand	100gp	1d4	30ft.
Crossb., heavy	50gp	1d10	120ft.

GLOSSARY

1-9

[YdX] - This code represents a dice roll and can be translated like "roll *Y* dices, each die is an *X*-sided die". For example, 3d20 means "roll 3 20-sided dices" or "roll a 20-sided die 3 times". Sometimes this code is followed by a + or a - and a number. In this case the number has to be added/subtracted from the dice result: for example, "d20+4" means "roll a 20-sided die and add 4 to the result".

[d%] - Refers to a percentile die roll. You can roll two ten-sided dice, one for the tens and the other for the ones.

[X/Level] - Multiply *X* for the current character (or *NPC*) Level. For example, a level 2 character rolling "4+1d6/Level" will roll 2d6 and add 4 to the total.

A

AC - See *Armour Class*.

Adventure - A series of linked *scenes*, or *encounters* following a short *plot* (one or two playing *sessions*). A group of adventures linked together form a *campaign*.

Alignment - Basic moral and ethical tendency of a *character*, used to provide a clear idea of how the character will handle moral dilemmas. The alignment is individuated at the crossing of two lines: legality-chaos and good-evil.

Armour Class - (AC for short) Is a value representing how difficult is to hit a creature. AC value can be improved using armours, spells or other magical artefacts.

Attack of Opportunity - An attack (usually free) that can be done as a reaction to some event or action.

B

Background - The past story of a *PC* before the start of the *campaign* or the events leading up to the adventure *plot*.

Background Hook - See *Hooks*.

Battlemat - A map traced with squares or hexagons grid on which *encounters* are played out with *counters* or *miniatures*.

Bonus - A number added to your chance of success when making a die roll (opposite of *penalty*).

Boss - Powerful enemies who require many resources to defeat.

Boxed Text - Flavor text intended to be read (or paraphrased) aloud to the *players* during an *adventure*.

C

Called Shot - Attack made aiming a particular area on an opponent or object. A called shot will be harder to achieve, but usually gives some sort of *bonus* (increase damage, only way to hit a weak spot, other effects).

Campaign - A longer story made by many linked *adventures* aiming to a more epic ending. Usually a campaign allows to achieve one or more levels of character improvement.

Campaign Journal - A record of what happens during your gaming *sessions*. Can range from a simple list of events to prose-style accounts, used to keep track of what happens during your campaign.

Character - Everyone in the game is a character, both *PCs* and *NPCs*.

Character Sheet - Sheets of paper where players can record *stats*, abilities and everything else related to their *PCs*. *GMs* can also have character sheets for important *NPCs*.

Check - Die roll made to determine a character's success or failure at a task.

Class - The "main area of expertise", "role", or "job" for a player *character* that affects what skills and abilities the player character can learn or use.

Counter - A small piece of paper or another object representing a *character* or monster, used in a *battlemat*.

Critical - An exceptional result in a dice roll that deals extra damage or has additional effects on the target.

D

DC - See *Difficulty Class*

Downtime - The time between adventures, when *PCs* can rest, heal, train, resupply...

Difficulty Class - (*DC* for short) The number a character needs to roll to succeed at a task. Usually a success is rolled when dice result is equal or greater to *DC*.

E

EL - See *Encounter Level*.

Encounter - An event in which the *PCs* can do something of significance. Attending a royal ball would be an encounter, picking a lock would not. Many linked *encounters* can form an *adventure*.

Encounter Level - (*EL* for short) Quantifies the experience obtained in succeeding an encounter: the harder the task or the stronger the enemy, the higher the Encounter Level will be. After reaching a certain amount the player level increases, raising stats or achieving new skills.

Experience Points - (*XP* for short) A character will be awarded experience points for succeeding challenges, defeating monsters or playing well its role in the game. After reaching a certain amount the player level increases, raising stats or achieving new skills.

F

Fumble - A roll failed so badly that something exceptionally bad happens as a result.

G

Game Master - (*GM* for short) The player who guides the other players through *adventures*, describes the game world and plays all of the *NPCs*.

Game Time - Time within the game world, opposed to time in the real world.

GM - See *Game Master*.

H

Health Points - (*HP* for short) represent the health level of the character: anytime you get wounded this number drops.

HD - See *Hit Dice*.

Hit Dice (*HD* for short) In the singular form, a die rolled to generate hit points. In the plural form, a measure of relative power that is synonymous with character level for the sake of spells, magic items, and magical effects that affect a certain number of *Hit Dice* (*HD*) of creatures. To define *Hit points* of creatures, usually a d8 is rolled.

Hit Points - (*HP* for short) See *Health Points*.

Hook - Elements of a *PC* background that the GM can use to tie him into the game, or as fuel for adventures. Anything the GM describes to get the *PCs* involved in an adventure.

House Rule - Any game rule that is altered, added to or removed from the original rules.

HP - See *Health Points*.

I

In-character - Speech and actions performed as if spoken or done by a character, much like an actor in a play.

M

Marching Order - Order in which the *PCs* travel when in a confined space. It may be important to know who leads and who follows.

Miniature - Small figure representing *characters*, monsters or other elements in a *battlemat*.

Minion - A lowly dangerous creature whose only role is to be taken out by *PCs* during combat. Minions usually come in groups.

N

NPC - See *Non-player Character*.

Non-Player Character - (*NPC* in short) Any character who is not a *PC*, nearly always played by the *GM*.

O

One-shot - A short *adventure* designed to be played in a single *session*, and not as part of a *campaign*, often featuring *pre-generated PCs*.

Out-of-Character - Anything that a player says or does that is not spoken or done *in-character*.

P

Party - Group formed by *PCs*.

PC - See *Player Character*.

Penalty - A number subtracted to your chance of success when making a die roll (opposite of *bonus*).

Player - Everyone playing the game, even if usually means everyone playing the game but the *GM*.

Player Character - (*PC* for short) Any character that is played by a *player*, not the *GM*.

Plot - The story that unfolds during an *adventure*.

Plot Hook - See *Hooks*.

Pre-generated - A *PC* created by the *GM* (or found in a published *adventure*).

R

Random Encounter - An *encounter* not written into the *adventure*, but occurring randomly, often as a result of a roll.

Round - A discrete unit of *game time* of few seconds (usually 6).

S

Scene - A discrete event or sequence of events, like a chapter in a book, that has a definite beginning and end. An *encounter* is often (but not always) also a *scene*.

Screen - A three- or four-folding cardboard panel, often with printed tables to help the GM, to prevent the players from seeing GM notes, maps and die rolls.

Session - One day/afternoon/night of gaming.

Setting - The world or area in which the game takes place.

Side Quest - A short *adventure*, unrelated to the main *plot*. Usually it is used to give players chance to gain more *experience*.

Situational Bonus/Penalty - A *bonus* or a *penalty* to a roll dependent on circumstances (walking in mud gives a situational penalty to walking speed).

Solo / Solo Campaign - A game played with one *player* and one GM.

SPD - See *Speed*.

Speed - (*SPD* for short) is the number of squares a creature can move in a combat turn without making any other action.

Stats - Short for statistics, the attributes of a *character*, creature or item.

Subplot - A secondary *plot*, mainly designed to be eventually ignored (or missed) by the PCs.

T

Target Number - See *Difficulty Class*.

X

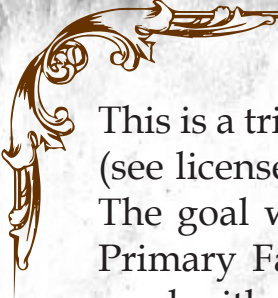

XP - Short for *Experience Points*.

MICROLITE

PUREST ESSENCE

This is a trimmed-down, subminiature version of the Primary Fantasy SRD rules (see license for more info) that has been designed to be quick and easy to play. The goal was to create a simpler game, but one where all of the resources of Primary Fantasy SRD (monsters, spells, adventures and equipment) could be used without conversion.

Stats

There are 3 stats : **Strength** (STR), **Dexterity** (DEX) and **Mind** (MIND).

Roll 4d6, drop lowest dice. Total remaining 3 dice and allocate to one of the stats. Repeat for remaining stats.

Stat bonus = (STAT-10)/2, round down.

Races

Humans get +1 to all skill rolls

Elves get +2 MIND

Dwarves get +2 STR

Halflings get +2 DEX

Classes

The classes are **Fighter**, **Rogue**, **Mage**, **Cleric**. Characters begin at **Level 1**.

Fighters

Wear any kind of armour and use shields. They have a +3 bonus to Physical and add +1 to all attack and damage rolls. This increases by +1 at 5th level and every five levels on

Rogues

Can use light armour. They have a +3 bonus to Subterfuge. If they successfully Sneak (usually sub+DEX, but depends on situation) up on a foe they can add their Subterfuge skill rank to the damage of their first attack

Magi

Wear no armour. They can cast arcane spells, and gain a +3 bonus to Knowledge

Clerics

Can wear light or medium armour. They cast divine spells and gain +3 bonus

to Communication. A Cleric can Turn Undead with a successful Magic Attack. DC is the current Hit Points of the Undead. If the DC is exceeded by 10 it is destroyed. This can be used (2 + Level + MIND Bonus) times per day.

Skills

There are just 4 skills: **Physical**, **Subterfuge**, **Knowledge** and **Communication**. Roll higher than the given Difficulty Class to succeed.

Skill rank = your level + any bonus due to your class or race.
Skill roll = d20 + skill rank + whatever stat bonus is most applicable to the use + situation modifiers

For example, Climbing would use Physical + STR bonus. Dodging a falling rock is Physical + DEX bonus. Finding a trap is Subterfuge + MIND bonus. Disabling a trap is Subterfuge + DEX bonus.

Note that there are no “**saving throws**” in this game; use Physical + STR or DEX bonus for Fortitude and Reflex saves. Saving against magic (Will save) is usually MIND bonus + your level.

Magic

Magi can cast any arcane spell, and Clerics any divine spell, with a spell level equal or below 1/2 their class level, rounded up. They have access to all arcane spells in the SRD spell list.

Casting a spell of any kind costs Hit Points. The cost is 1 + double the level of the spell being cast:

Spell Level	0	1	2	3	4	5	6	7	8	9
HP Cost	1	3	5	7	9	11	13	15	17	19

This loss cannot be healed normally but is recovered after 8 hours rest. There is no need to memorize spells in advance.

Just because a character can cast any spell, doesn’t mean that they should. Choose spells that suit the character. Select one ‘signature’ spell per spell level from 1st upward that they prefer to use over any other. These spells are easier to cast due to familiarity, costing 1 less HP to use.

The Difficulty Class (DC) for all spells is 10 + Caster Level + Caster’s MIND bonus

Combat

Hit Points = STR Stat + 1d6/Level. If HP reach 0, unconscious and near death. Further damage directly reduces STR. If that reaches 0, death.

Roll d20 + DEX bonus for **initiative order**. Everyone can do one thing each turn; move, attack, cast a spell, etc.

Melee attack bonus = STR bonus + Level

Missile attack bonus = DEX bonus + Level

Magic attack bonus = MIND bonus + Level

Add attack bonus to d20 roll. If higher than your opponent's Armour Class (AC), it's a hit. Natural 20 is automatically a critical doing maximum damage.

Fighters and Rogues can use DEX bonus + Level as Melee attack bonus instead if wielding a light weapon. Fighters and Rogues can wield 2 light weapons and attack with both in a round if they take a -2 penalty on all attack rolls that round. Rapiers count as light weapons, but you cannot wield two rapiers at the same time.

If the total bonus is +6 or more a second attack can be made with a -5 penalty. If the total bonus is +11 or more a third attack can be made at -10. For example, if the total bonus is +12, three attacks can be made at +12/+7/+2.

Add STR bonus to Melee damage, x2 for 2-handed weapons.

Armour Class (AC) = 10 + DEX bonus + Armour bonus.

Other Hazards

Falling : 1d6 damage per 10', half damage on Phys+DEX save. DC=depth fallen in feet

Spikes : add +1 point to falling damage per 10' fallen, max +10

Poison : Phys+STR save to avoid or for half, depending on poison. Effect varies with poison type.

Extreme Heat & Cold : If not wearing suitable protection, Phys+STR save once every 10 minutes (DC 15, +1 per previous check), taking 1d6 damage on each failed save.

Level Advancement

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. eg: 1 kobold = EL1. 2 kobolds = EL2. 4 kobolds = EL3, etc.

Add up the Encounter Levels (ELs) of every encounter you take part in. When the total = 10 x your current level, you've advanced to the next level. Reset the total to 0 after advancing.

Each level adds:

+1d6 to Hit Points

+1 to all attack rolls

+1 to all skills

If the level divides by three (i.e. level 3, 6, 9, etc.) add 1 point to STR, DEX or MIND.

Fighters gain +1 to their attack and damage rolls at levels 5,10,15,etc.

Clerics and Magi gain access to new spell levels at levels 3,5,7,9,etc.

Example

The 1st level adventurers have just completed a dungeon adventure, and defeated 5 EL1 encounters, an EL2 trap and the EL3 leader. That's a total of EL10, so they all advance to level 2. They need to defeat another 20 Encounter Levels to reach Level 3.

Microlite 20

Golden Edition

Do you remember when the gaming table was full of pizza and soda, not rulebooks, miniatures and dungeon tiles? Do you yearn for a role-playing game that doesn't require weight training to carry all the books? Do you want to be able to hold all the rules in your head - or in your back pocket? And do you still want to use all those lovely monsters, adventures and game worlds too?

So do we!! - Greywulf

Microlite20 is a minimalist role-playing game designed to be usable with the majority of the OGL/d20 supplements, rules and adventures with little or no advance preparation. The basic rules for character generation, combat, magic and level advancement take up a single sheet of paper, meaning it is perfect for introducing role-playing to new players, gaming oneshot adventures or tailoring into your own game system.

DUNGEONFINDER

Player's Guide

A Player's Guide to the *DUNGEONFINDER* role-playing game, a streamlined version of the Primary Fantasy SRD rules, for use by itself or in combination with other Primary Fantasy SRD compatible games.

Special thanks to;

Greywulf for creating Microlite20.

The authors of the Purest Essence rules.

The Microlite20 community for all their
enthusiasm and ideas.

Seth Drebitko for keeping the legacy alive.

*"The goal was to create a simpler game but
one where all the resources of the Primary
Fantasy SRD (monsters, spells, adventures and
equipment) could be used without conversion."*

- The authors of Microlite20 Purest Essence

On October 14th 2006 Greywulf (Robin V. Stacey) replied to a thread on the ENWorld forums and placed a link to his simplified version of the World's Most Popular Role-Playing Game. Two days later he started his own thread on those very forums, "Microlite20: The Smallest Thing in Gaming." This thread spanned 82 pages and 1,217 posts over a year and four months before it was closed and restarted due to the extreme length of the thread.

You could say Microlite20 met with some success.

On March 12th 2010 it was announced that Microlite20 was sold to Seth Drebitko and...

...the adventure's just begun.

What is the *DUNGEONFINDER* role-playing game?

To those new to role-playing games *Dungeonfinder* is a fantasy game where one person, called the Game Master, creates an adventure, controlling the people and monsters in it, while the other people play heroes they create who will explore the cities and castles and ruins in the adventure.

To the people with more experience with RPG's, *DUNGEONFINDER* is the Primary Fantasy SRD streamlined into a slimmer package and then having the Microlite20 rules dropped in on top to trim things down even further. A fast-paced game that may be easily used with adventures made for the *World's Most Popular Role-Playing Game* or the *World's Second Most Popular Role-Playing Game* based on the 3.5 edition rules.

Or, just use the *DUNGEONFINDER* Player's Guide, *DUNGEONFINDER* Game Master's Guide and *DUNGEONFINDER* Book of Monsters to create your own adventures. Everything you need is there, character creation and advancement, equipment, spells, monsters, treasure and magic-items, and a random adventure creator to help you along or for solo play.

So what changes have been made to create a slimmer, trimmer, even more streamlined game? Well, the major changes are; the inclusion of only the four major classes, the elimination of feats, a streamlined skill system, a reduction to the spell lists, efficient monster listings, and a treasure and magic-item section that instead of being 100 pages long has been nicely reduced to just 5 pages!

Read on, create your hero and prepare for epic fantasy!

"Written rules by themselves cannot make for great adventure. The game master must envision a fantastic world and the players breathe life into it and only then will everyone be lost in epic fantasy."

The Basics

The Core Mechanic

Whenever you attempt an action that has some chance of failure, you roll a twenty-sided die (d20). To determine if your character succeeds at a task you do this:

- Roll a d20.
- Add any relevant modifiers.
- Compare the result to a target number.

If the result equals (for a skill check) or exceeds (for an attack) the target number, your character succeeds. If the result is lower than the target number, you fail.

Dice – Dice rolls are described with expressions such as “3d4+3,” which means “roll three four-sided dice and add 3” (resulting in a number between 6 and 15). The first number tells you how many dice to roll (adding the results together). The number immediately after the “d” tells you the type of die to use. Any number after that indicates a quantity that is added or subtracted from the result.

d% - Percentile dice work a little differently. You generate a number between 1 and 100 by rolling two different ten-sided dice. One (designated before you roll) is the tens digit. The other is the ones digit. Two 0s represent 100.

Modifiers – A modifier is any bonus or penalty applying to a die roll. A positive modifier is a bonus, and a negative modifier is a penalty.

Player's Guide

The Player's Guide will provide you with all the information necessary to create and play your own character in Microlite20 games.

Classes

There are four classes in Microlite20; Fighter, Rogue, Wizard and Cleric that begin at level 1.

The Microlite20 Classes group together characters of like ability but these same characters may still vary greatly. For instance, a Fighter may be a well-armored, sword wielding knight, or a lightly-armored bowman or even a club-wielding barbarian. A Cleric might be a priest at a temple, or a shaman of a tribe or even a woods dwelling druid. Don't feel constrained by the Class options, let your imagination go and choose whichever Class is closest to what you have in mind.

Fighter – Fighters are masters of arms and martial abilities, usually of great strength.

- ❖ Fighters can wear any kind of armor, use all shields and wield any weapon.
- ❖ A Fighter's Class Skill is Physical and they receive +3 bonus to the Skill.
- ❖ Fighters also receive a +1 bonus to all attack and damage rolls. This bonus increases by +1 at level 5 and every five levels thereafter, i.e. levels 5, 10, 15, 20, etc.

Rogue – Rogues prefer a more subtle approach over strength using their quick wits and fast hands.

- ❖ Rogues can wear light armor and use any weapon.
- ❖ A Rogue's Class Skill is Subterfuge and they receive +3 bonus to the Skill.
- ❖ Backstab – If a Rogue "sneaks" up on an opponent by making a successful Skill check roll using the Subterfuge Skill and Dexterity Modifier the Rogue may then try to backstab (Melee or Missile) the opponent. If the backstab attack hits the Rogue may add their Subterfuge Skill score to the damage.

Wizard – Wizards have learned to absorb the energy around them and to release it as powerful spells.

- ❖ Wizards wear no armor but can use any weapon.
- ❖ A Wizard's Class Skill is Knowledge and they receive +3 bonus to the Skill.
- ❖ Wizards can cast spells from the Wizard spell list and gain a "Signature Spell" every Level. Signature Spells are explained in the "Magic" section.

Cleric – Clerics are people dedicated to a cause or purpose and spend their lives spreading this ideal or living entirely for it.

- ❖ Clerics can wear light or medium armor, any shield (except tower) and can use any weapon.

- ❖ A Cleric's Class Skill is Communication and they receive +3 bonus to the Skill.
- ❖ Clerics can cast spells from the Cleric spell list and gain a "Signature Spell" every Level. Signature Spells are explained in the "Magic" section.
- ❖ Turn Undead – Clerics may also "turn" or destroy the undead. The Difficulty Class (DC) is the current Hit Points (HP) of the undead. If a Turn Undead roll plus the Cleric's Magic score beats the DC the undead flee from the caster. If the DC is exceeded by 10 or more the undead are destroyed. This can be used 2 + Level + Mind Modifier times a day.

Races

There are six races in Microlite20; Human, Elf, Dwarf, Halfling, Half-Elven, and Half-Orcish.

Human – Humans come in all shapes, sizes and colors. They are usually 5'-6' tall, can be anywhere from very slim to very large, with fair to dark skin, hair and eyes. Traditionally Humans can be found anywhere and small groups of Humans can spring up in a desirable location and grow into a large city in a relatively short amount of time. They are a very adaptable race, able to survive in almost any part of the realms.

- ❖ Humans receive a +1 bonus to all Skill checks.

Elf – Elves are a slightly smaller and lither race than the Humans with sharp features and pointed ears. They generally have fair skin, light hair and light-colored eyes though there are Dark Elves who possess dark skin and sometimes black hair. There are many kinds of the fairer Elves including; Wood, High, Forest, and Aquatic. Elves traditionally live apart from the other races and often in more remote or inaccessible areas. Being a long-lived race Elves acquire a strong intelligence and wisdom over their many years.

- ❖ Elves receive a +2 bonus to their Mind score.

Dwarf – Dwarves are a short and sturdy race averaging about 4' tall, with their tallest folk close to 5' 5" tall, with thick arms and legs. They generally have fair to ruddy skin, darker hair and brown eyes. There are a few kinds of Dwarves including, Hill, Grey and Mountain. Traditionally Dwarves are found in hilly or mountainous regions in great underground complexes carved out by themselves. They tend to be fond of architecture and knowledgeable about things found below ground such as rocks, minerals and gems.

- ❖ Dwarves receive a +2 bonus to their Strength (STR) score.

Halfling – Halflings are the smallest race, about half the size of Humans, and like Humans may be rather slim or prone to too much relaxation. They generally have fair to ruddy skin and eyes and hair in a variety of browns. Traditionally Halflings tend to keep to themselves but do not go out of their way to avoid the other races. They just seem to have placed themselves where Humans, Dwarves and Elves don't go or don't care to be. Halflings usually live in "holes" in hilly spots or low houses in light woods. When they want to, or the need arises, Halflings are a fairly quick and spry race.

- ❖ Halflings receive a +2 bonus to their Dexterity (DEX) score.

Half-Elven – Half-Elves are the intermixing of a Human and Elven parent. A seemingly sad race, Half-Elves have a short-lived Human parent and a long-lived Elven parent. This leaves them somewhat apart from society and torn between two cultures. They can possess the features of either race or a combination of the two.

They are usually nomadic and wander between the Elven Nations and cities of man. Half-Elves gain the liveness and agility of their Elven heritage along with the adaptability of their Human parentage.

- ❖ Half-Elves receive a +1 Bonus to their Dexterity (DEX) score.
- ❖ Half Elves receive a bonus of +1 to any two Skills of their choice.

Half-Orcish – Half-Orcs are the unfortunate result of warfare and Human captivity. Half-Orcs are fairly large, often over 6' tall with dark hair, if they have any hair at all, and are fair to sickly-skinned in tone. Half-Orcs usually have no place in civilized cities except as laborers or mercenaries and often reside with their Orcish brethren. Orcs are normally brutish and combat-oriented except for that rare unique snowflake.

- ❖ Half-Orcs receive a bonus of +4 to their Strength (STR) score.
- ❖ Half-Orcs receive a -2 penalty to their Mind score.

Ability Scores

There are three Ability scores, in Microlite20; Strength, Dexterity, and Mind. These Stats are used to define the natural characteristics of your character.

Strength (STR) – Strength is a measure of strength and toughness and is often used with the Physical Skill for some Skill checks.

- ❖ Adds to Melee attack rolls.
- ❖ Adds to Melee damage rolls.
- ❖ Adds to starting Hit Points (HP).
- ❖ Adds to some Skill checks.

Dexterity (DEX) – Dexterity is a measure of your hand-eye coordination and quickness that is often used with the Subterfuge Skill for some Skill checks.

- ❖ Adds to Initiative.
- ❖ Adds to Missile attack rolls.
- ❖ Adds to Armor Class (AC).
- ❖ Adds to some Skill checks.

Mind – Mind is a measure of your character's intelligence and wisdom that is often used with the Communication Skill for some Skill checks.

- ❖ Adds to Magic Difficulty Class (attacks).
- ❖ Adds to Magic saving throws (defense).
- ❖ Adds to some Skill checks.

Each Stat is assigned a score from 3-18 that will determine a Stat Modifier. Anytime you use a Stat, such as Strength, its Modifier will be figured into your roll of the die or dice.

To determine your Stat score roll a six-sided die (d6) four times (4d6), drop the lowest die, and add up the other three dice and write this number down on a piece of paper. Repeat these steps three more times.

To figure the Stat Modifier for each of your three scores use the following;

$$(Stat-10)/2 = Stat\ Modifier\ (round\ down)$$

Or use this handy table instead.

Total	Modifier
3-4	-3
5-6	-2
7-8	-1
9-11	0
12-13	+1
14-15	+2
16-17	+3
18-19	+4

You may assign your Statistic scores as you like.

Skills

In Microlite20 there are four Skills; Physical, Subterfuge, Knowledge, and Communication.

Physical (PHY) – Physical covers any activity where the body plays a part in deciding the outcome such as jumping, bashing, swimming, etc.

Subterfuge (SUB) – Subterfuge is used for anything requiring stealth, deception, or thievery such as hiding, moving silently or picking a lock.

Knowledge (KNOW) – Knowledge is broad covering everything from geography and history to environment and can be used to identify monsters, recognize religious symbols or heal someone.

Communication (COM) – Communication is used for interacting with the GM's characters or monsters when you are trying to be diplomatic, convincing or proving a point.

Every Class has a Class Skill that is linked to their Class; Physical for Fighters, Subterfuge for Rogues, Knowledge for Wizards and Communication for Clerics. This skill is equal to the character's level +3. Another Skill, player's choice, is a secondary Skill and is equal to the character's level. All other Skills are equal to ½ a character's level rounded down.

Using Skills

When your character uses a skill, you make a skill check to see how well he or she does. The higher the result of the skill check, the better. Based on the circumstances, your result must match or beat a particular number (a DC or the result of an opposed skill check) for the check to be successful. The harder the task, the higher the number you need to roll.

Circumstances can affect your check. A character that is free to work without distractions can make a careful attempt and avoid simple mistakes. A character who has lots of time can try over and over again, thereby assuring the best outcome. If others help, the character may succeed where otherwise he or she would fail.

A skill check takes into account a character's training (Skill Ranks), natural talent (Stat modifier), and luck (the die roll). It may also take into account his or her race's knack for doing certain things (racial bonus).

To make a skill check, roll 1d20 and add your character's Skill Rank and the Stat modifier. Don't forget any race bonus if you have one. The higher the result the better.

A Skill check roll is;

***1d20 + Skill Rank + Stat Modifier
(+ any situational bonus/penalty)***

For example; If your character wanted to bash open a locked door you would make a Skill check using your Physical Skill score along with your Strength Statistic Modifier and add or subtract these numbers from a Skill check roll to try and equal or beat a Difficulty Class (DC) number, for bashing open the door, assigned by the GM.

Difficulty Class

Most checks are made against a Difficulty Class (DC). The DC is a number that you must score as a result on your skill check in order to succeed.

Difficulty	DC	Example (Skill Used)
Very easy	0	Notice something large in plain sight. (Knowledge+Mind)
Easy	5	Climb a knotted rope. (Physical+Strength)
Average	10	Hear an approaching guard. (Subterfuge+Mind)
Tough	15	Rig a wagon wheel to fall off. (Subterfuge+Dexterity)
Challenging	20	Swim in stormy water. (Physical+Strength)
Formidable	25	Open an average lock. (Subterfuge+Dexterity)
Heroic	30	Leap across a 30-foot chasm. (Physical+Strength)
Nearly impossible	40	Track a squad of orcs across hard ground after 24 hours of rainfall. (Knowledge+Mind)

Opposed Checks

An opposed check is a check whose success or failure is determined by comparing the check result to another character's check result. In an opposed check, the higher result succeeds, while the lower result fails. In case of a tie, the higher skill modifier wins. If these scores are the same, roll again to break the tie.

If you are ever unsure which Skill or Statistic should be used ask the Game Master (GM) and they will tell you which to use or discuss which seem the most appropriate according to the situation. You may also review the lengthy Skills check list in the Game Master's Guide for more information.

Favorable and Unfavorable Conditions

Some situations may make a skill easier or harder to use, resulting in a bonus or penalty to the skill modifier for a skill check or a change to the DC of the skill check.

Conditions that affect your character's ability to perform the skill change the skill modifier. Conditions that modify how well the character has to perform the skill to succeed change the DC. A bonus to the skill modifier and a reduction in the check's DC have the same result, they create a better chance of success. But they represent different circumstances, and sometimes that difference is important.

Your GM will tell you if there are any bonuses or penalties to the Skill rank or DC.

Trying Again

In general, you can try a skill check again if you fail, and you can keep trying indefinitely. Some skills, however, have consequences of failure that must be taken into account. A few skills are virtually useless once a check has failed on an attempt to accomplish a particular task. For most skills, when a character has succeeded once at a given task, additional successes are meaningless.

Magic

Both Wizards and Clerics can cast spells. Wizards cast spells by absorbing the energies around them and releasing it as a spell and Clerics by petitioning their god or drawing power from the environment around them.

Wizards can cast any Wizard spell available to them and Clerics can cast any Cleric spell available to them.

Wizards and Clerics may cast spells with a spell level equal or below 1/2 their class level, rounded up.

Spell Hit Point Cost

Casting a spell costs a spell caster Hit Points (HP). This is a reflection of the toll it takes on a caster to draw on the energy, power, and concentration necessary to cast the spell.

The Hit Point (HP) cost is;

1 + Double the Level of the Spell Cast.

Spell Level	HP Cost
0	1
1	3
2	5
3	7
4	9
5	11
6	13
7	15
8	17
9	19

This Hit Point (HP) loss must be healed normally, requiring eight hours of rest.

Spell Attacks and Defending

Casting spells and defending against them use the character's Magic bonus score. The Magic bonus score is;

Character's Level + Mind Modifier

A spell caster's spell has a Difficulty Class (DC) that the opponent must beat to defend against the spell or else suffer the spells effects. This is called a "Saving Throw."

The Difficulty Class (DC) for a spell is;

10 + Caster's Magic Bonus

A saving throw is a d20 roll plus a Statistic (Stat) score modifier and Skill rank. The spells description will list which Statistic and Skill to use, or your GM will tell you.

To defend against Magic is;

1d20 + Appropriate Stat modifier + Appropriate Skill Rank

This is only used when a caster is targeting an opponent and not when targeting themselves or a willing target.

Once you know which creatures (or objects or areas) are affected, and whether those creatures have made successful saving throws (if any were allowed), you can apply whatever results a spell entails.

Signature Spells

Wizards and Clerics also each have Signature Spells. A Wizard and Cleric choose one spell per spell level, or as the spell level becomes available to them, starting at spell level 1. These should be spells that the Wizard or Cleric prefers using over other spells and will cost 1 Hit Point (HP) less to cast due to the familiarity of the spell.

The complete Wizard and Cleric spell lists can be found in the "Spells" section.

Combat

Eventually any and all characters will find themselves standing toe-to-toe with some foul monster, after all, how else are you going to achieve fame and fortune? Before we get to swinging a sword or firing an arrow though we need to determine who goes first and in what order everyone else follows.

Initiative (INI)

Initiative is a way to determine who goes first in combat and in what order the other characters and opponents take their turns. Initiative is determined by rolling the twenty-sided die (d20) and adding a character's Dexterity Modifier to the roll result. The character or opponent with the highest Initiative acts first followed by the next highest, etc.

When the last character or opponent has taken a turn then a new round begins and you

start again with the highest Initiative (using your original Initiative roll not a new Initiative roll.) A round is generally considered about 6 seconds of time.

Actions

During a character's turn there are three types of actions a character can take; a Standard action, which is generally an attack, a Move action, where the character may move up to their Speed score, and a Free action which are simple things like yelling warning.

Attacking and Defending

Attacking in combat basically comes down to rolling the d20 and adding either your character's Melee or Missile score in an attempt to beat your opponent's Armor Class (AC).

Melee Attack Score

A character's Melee score will be used when they are attacking with a melee weapon, such as a sword or mace.

The Melee Bonus is;

**Level + Strength Modifier
(+ Fighter Class Bonus)**

Missile Attack Score

A character's Missile score will be used when they are attacking with a ranged weapon, such as a bow or crossbow. The Missile Bonus is;

**Level + Dexterity Modifier
(+ Fighter Class Bonus)**

If you successfully beat the opponents Armor Class (AC) then you do damage according to the type of weapon used.

Armor Class (AC)

A character's Armor Class (AC) represents how hard it is to hit the character with a melee or missile weapon. Armor Class (AC) is;

10 + Dexterity Modifier + Armor bonus

Weapon Damage (D)

On a successful hit with a melee or missile weapon damage is taken from the target's Hit Points (HP). The damage is based primarily on the weapon type used and its associated damage die, notated as D1d6, or D1d8, etc. See the "Weapons and Armor" section for weapon types and their damage.

Damage with a melee weapon is;

**Weapon type + Strength Modifier
(+ Fighter Class bonus)**

Damage with a missile weapon is;

**Weapon Type
(+ Fighter Class bonus)**

Critical

If a Natural 20 is rolled on an attack, a "20" on the d20 before Modifiers or bonuses, then you score an automatic hit doing maximum damage.

Hit Points (HP)

Hit Points are an abstract way of measuring the health of your character and how hard he or she is to defeat.

A character's Hit Points are;

Strength score + 1d6 per Level

If a character's Hit Points (HP) reach 0 they are unconscious and near death. Further damage reduces the character's Strength score and when Strength reaches 0, death. A character at 0 or negative Hit Points (HP) will lose 1 point of STR a round unless a Healing Skill check is made on the character or another form of restoring health, such as a spell, is used.

Multiple Attacks

When a character's Melee score is +6 or more a second attack may be made at a -5 penalty. If the total Melee score is +11 then a second attack may be made at +5 and a third at +1. See the table below for the progression of extra attacks.

Attack Bonus	Additional Attacks	
+6	+1	-
+7	+2	-
+8	+3	-
+9	+4	-
+10	+5	-
+11	+6	+1
+12	+7	+2
+13	+8	+3

Two-Handed Weapons

If a two-handed weapon is being wielded, when figuring damage, add the Strength Modifier x2.

Two-Weapon Combat

Fighters and Rogues can wield two light weapons and attack with both in a round if they take a -2 penalty to their Melee attack rolls that round.

Light Weapon Combat

Fighters and Rogues have the option of using their Dexterity Modifier + Level as their Melee score, instead of Strength + Level, if wielding a light weapon. Any damage on a successful hit still uses the STR Modifier for any bonus or penalty.

Surprise

When a combat starts, if you are not aware of your opponents and they are aware of you, you're surprised.

Sometimes all the combatants on a side are aware of their opponents, sometimes none are, and sometimes only some of them are. Sometimes a few combatants on each side are aware and the other combatants on each side are unaware.

Determining awareness may call for listen Skill checks, spot Skill checks, or other checks.

If some but not all of the combatants are aware of their opponents, a surprise round happens before regular rounds begin. Any combatants aware of the opponents can act in the surprise round, so they roll for initiative. In initiative order (highest to lowest), combatants who started the battle aware of their opponents each take an action during the

surprise round. If no one or everyone is surprised, no surprise round occurs.

Speed (Move)

Your speed tells you how far you can move in a round and still do something, such as attack or cast a spell. Your speed depends mostly on your race and what armor you're wearing.

Dwarves and Halflings have a speed of 20 feet (4 squares), or 15 feet (3 squares) when wearing medium or heavy armor (except for dwarves, who move 20 feet in any armor). Humans, Elves, Half-Elves, and Half-Orcs have a speed of 30 feet (6 squares), or 20 feet (4 squares) in medium or heavy armor.

If you spend your entire action moving you can move up to double your speed. If you spend the entire round to run all out, sacrificing your Shield and DEX bonus to Armor Class, you can move up to quadruple your speed (or triple if you are in heavy armor). You can also climb (up to one-quarter of your speed) or swim (up to one-quarter of your speed).

Special Attacks

Aid Another - In melee combat, you can help a friend attack or defend by distracting or interfering with an opponent. If you're in position to make a melee attack on an opponent that is engaging a friend in melee combat, you can attempt to aid your friend as a standard action. You make an attack roll against AC 10. If you succeed, your friend gains either a +2 bonus on his next attack roll against that opponent or a +2 bonus to AC against that opponent's next attack (your choice), as long as that attack comes before the beginning of your next turn. Multiple characters can aid the same friend, and similar bonuses stack.

You can also use this standard action to help a friend in other ways, such as when he is affected by a spell, or to assist another character's skill check.

Bull Rush - You can make a bull rush as a standard action (an attack) or as part of a charge. When you make a bull rush, you attempt to push an opponent straight back instead of damaging him.

First, you and the defender make opposed Strength checks. You each add a +4 bonus for each size category you are larger than Medium or a -4 penalty for each size category you are smaller than Medium. You get a +2 bonus if you are charging. The defender gets a +4 bonus if he has more than two legs or is otherwise exceptionally stable.

If you beat the defender's Strength check result, you push him back 5 feet. If you wish to move with the defender, you can push him back an additional 5 feet for each 5 points by which your check result is greater than the defender's check result. You can't, however, exceed your normal movement limit.

Charge - Charging is a special full-round action that allows you to move up to twice your speed and attack during the action.

You must move before your attack, not after. You must move at least 10 feet (2 squares) and may move up to double your speed directly toward the designated opponent.

You must have a clear path toward the opponent, and nothing can hinder your movement (such as difficult terrain or obstacles).

After moving, you may make a single melee attack. You get a +2 bonus on the attack roll and take a -2 penalty to your AC until the start of your next turn.

A charging character gets a +2 bonus on the Strength check made to bull rush an opponent.

Disarm - As a melee attack, you may attempt to disarm your opponent. If you do so with a weapon, you knock the opponent's weapon out of his hands and to the ground. If you attempt the disarm while unarmed, you end up with the weapon in your hand.

If you're attempting to disarm a melee weapon, follow the steps outlined here. If the item you are attempting to disarm isn't a melee weapon the defender may still oppose you with an attack roll, but takes a penalty.

You and the defender make opposed attack rolls with your respective weapons. The wielder of a two-handed weapon on a disarm attempt gets a +4 bonus on this roll, and the wielder of a light weapon takes a -4 penalty. (An unarmed strike is considered a light weapon) If the combatants are of different sizes, the larger combatant gets a bonus on the attack roll of +4 per difference in size category. If the targeted item isn't a melee weapon, the defender takes a -4 penalty on the roll.

If you beat the defender, the defender is disarmed. If you attempted the disarm action unarmed, you now have the weapon. If you were armed, the defender's weapon is on the ground in the defender's square.

Grapple - To start a grapple, you need to grab and hold your target.

Grab. You make a melee touch attack to grab the target. If you fail to hit the target, the grapple attempt fails.

Hold. Make an opposed grapple check. If you succeed, you and your target are now grappling, and you deal damage to the target as if with an unarmed strike.

A grapple check is like a melee attack roll. Your attack bonus on a grapple check is:

**Level/HD + Strength modifier
+ special size modifier**

The special size modifier for a grapple check is as follows: Colossal +16, Gargantuan +12, Huge +8, Large +4, Medium +0, Small -4, Tiny -8, Diminutive -12, Fine -16. Use this number in place of the normal size modifier you use when making an attack roll.

While you're grappling your ability to attack others and defend yourself is limited. You lose your Dexterity bonus to AC (if you have one) against opponents you aren't grappling.

You can make an attack with an unarmed strike, natural weapon, or light weapon against another character you are grappling. You take a -4 penalty on such attacks.

You can attempt to cast a spell while grappling. You must make a Concentration check (DC 20 + spell level) or lose the spell. You don't have to make a successful grapple check to cast the spell.

While grappling, you can deal damage to your opponent equivalent to an unarmed strike. Make an opposed grapple check in place of an attack. If you win, you deal nonlethal damage as

normal for your unarmed strike (1d3 points for Medium attackers or 1d2 points for Small attackers, plus Strength modifiers). If you want to deal lethal damage, you take a -4 penalty on your grapple check.

You can hold your opponent immobile (Pinned) for 1 round by winning an opposed grapple check (made in place of an attack).

Throw Splash Weapon - A splash weapon is a ranged weapon that breaks on impact, splashing or scattering its contents over its target and nearby creatures or objects. To attack with a splash weapon, make a ranged touch attack against the target. A hit deals direct hit damage to the target, and splash damage to all creatures within 5 feet of the target.

You can instead target a specific grid intersection. Treat this as a ranged attack against AC 5. However, if you target a grid intersection, creatures in all adjacent squares are dealt the splash damage, and the direct hit damage is not dealt to any creature.

If you miss the target (whether aiming at a creature or a grid intersection), roll 1d8. This determines the misdirection of the throw, with 1 being straight back at you and 2 through 8 counting clockwise around the grid intersection or target creature. Then, count a number of squares in the indicated direction equal to the range increment of the throw.

After you determine where the weapon landed, it deals splash damage to all creatures in adjacent squares.

Trip - You can try to trip an opponent as an unarmed melee attack. You can only trip an

opponent who is one size category larger than you, the same size, or smaller.

Make an unarmed melee touch attack against your target.

If your attack succeeds, make a Strength check opposed by the defender's Dexterity or Strength check (whichever ability score has the higher modifier). A combatant gets a +4 bonus for every size category he is larger than Medium or a -4 penalty for every size category he is smaller than Medium. The defender gets a +4 bonus on his check if he has more than two legs or is otherwise more stable than a normal humanoid. If you win, you trip the defender (who is now Prone).

Some weapons can be used to make trip attacks. In this case, you make a melee touch attack with the weapon instead of an unarmed melee touch attack.

Turn or Rebuke Undead - Clerics can channel positive energy, which can halt, drive off (rout), or destroy undead.

Regardless of the effect, the general term for the activity is "turning." When attempting to exercise their divine control over these creatures, characters make turning checks.

You must present your holy symbol to turn undead. Turning is considered an attack.

You may attempt to turn undead a number of times per day equal to 2 + Level + your Mind modifier.

You turn the closest turnable undead first, and you can't turn undead that are more than 60 feet away or that have total cover relative to

you. You don't need line of sight to a target, but you do need line of effect.

The first thing you do is roll a turning check to see how powerful an undead creature you can turn. This is a Magic attack check (1d20 + Level + Mind modifier). The Difficulty Class (DC) is the Hit Points of the undead. On any given turning attempt, you can turn no undead creature whose Hit Points exceed the result.

All undead with Hit Points equal to or less than your Magic attack, within 60 ft., are turned. If you exceed the DC by 10 or more then the undead is destroyed.

Turned undead flee from you by the best and fastest means available to them. They flee for 10 rounds (1 minute). If they cannot flee, they cower (giving any attack rolls against them a +2 bonus). If you approach within 10 feet of them, however, they overcome being turned and act normal.

Saving Throws

Generally, when you are subject to an unusual or magical attack, you get a saving throw to avoid or reduce the effect. Like a Skill check roll, a saving throw is a d20 roll plus an Ability score bonus and a Skill rank.

Fortitude Save – STR+PHY

Reflex Save – DEX+PHY

Will Save – MIND+level

The Game Master will tell you when and what type of Saving Throw needs to be made and the Difficulty Class (DC).

Level Advancement

In Microlite20 characters advance to higher levels by gaining Encounter Levels (EL's). Encounter Levels (EL's) are awarded to characters that defeat monsters and perform certain Skill checks successfully, such as disarming a trap.

When your character has accrued 10 x your current level in Encounter Levels you've advanced to the next level. Once you've advanced to the next level reset your Encounter Levels total back to 0.

Each time you gain a new Level you add;

- ❖ 1d6 to Hit Points (HP)
- ❖ +1 to all attack rolls
- ❖ Increase Skill ranks
- ❖ If the Level divides by 3, i.e. Levels 3, 6, 9, etc., add +1 point to Strength, Dexterity or Mind.

Fighters should remember they gain +1 to attack and damage rolls at Levels 5, 10, 15, etc.

Wizards and Clerics gain access to new spell levels at Levels 3, 5, 7, 9, etc.

For Example; A Level 1 party has just finished an adventure and defeated five Encounter Level (EL) 1 combats, an Encounter Level 3 leader and an Encounter Level 2 trap. That totals 10 Encounter Levels (EL's) so everyone in the party advances to Level 2. The party will need to defeat another 20 Encounter Levels (EL's), 10 x their current Level of 2, to reach Level 3.

The Game Master (GM) will tell you how many Encounter Levels (EL's) were gained after each encounter or Skill check, or at the end of the adventure.

Character Creation Summary

Character Creation Steps

1. Choose a Class.
2. Choose a Race.
3. Roll your character's Statistics (Stats), assign, and calculate bonuses.
4. Assign Skill scores.
5. Determine Melee Bonus, Hit Points (HP), Missile Bonus and Magic Bonus scores.
6. Buy weapons and equipment.
7. Figure Armor Class (AC).

Sample Characters

Hadsui, Wild Plains Warrior – Human Fighter 1

STR 16 (+3), DEX 14 (+2), MIND 12 (+1), CHA 10 (0), HP 19, AC 14 (Leather Armor), Spear +4 D1d8+4, PHY 5, SUB 1, all others @ 0.

Rosenfel the Fingersmith – Human Rogue 1

STR 10 (+0), DEX 18 (+4), MIND 12 (+1), CHA 14 (+2), HP 13, AC 16 (Leather Armor), Dagger +5 D1d4 10', SUB 5, PHY 1, all others @ 0.

Rimalisse, Spellbinder – Elf Wizard 1

STR 12 (+1), DEX 13 (+1), MIND 16 (+3), CHA 12 (+1), HP 15, AC 11 (Robes), Quarterstaff +2 D1d6+1, KNOW 4, PHY 1, all others @ 0.
Spells: All Level 0 and Level 1 arcane spells.

Lady Maydee, Spiritweaver – Human Cleric 1

STR 10 (+0), DEX +16 (+3), MIND 13 (+1), CHA 10 (0), HP 13, AC 18 (Chainmail), Mace +1 D1d8, COM 5, PHY 1, all others @ 0.
Spells: All Level 0 and Level 1 divine spells.

Bagaduce' the Battlerager – Halfling Fighter 1

STR 16 (+3), DEX 15 (+2), MIND 9 (+0), CHA 14 (+2), HP 19, AC 18 (Chainmail), Spiked Chain +5 D2d4+4, PHY 4, SUR 1, all others @ 0.

Equipment

Starting Wealth

Each character Class begins with a certain amount of acquired wealth.

Class	Amount
Fighter	150 gp
Rogue	125 gp
Wizard	75 gp
Cleric	120 gp

Coinage of the Realms

The most common coin is the silver piece (SP). A silver piece is worth 10 copper pieces (CP), 1/10 of a gold piece (GP) and 1/100 of a platinum piece (PP) which is the rarest of coins.

Exchange	CP	SP	GP	PP
CP	1	1/10	1/100	1/1,000
SP	10	1	1/10	1/100
GP	100	10	1	1/10
PP	1,000	100	10	1

Weapons

Weapons are divided up into groups of; Light Weapons, One-Handed Weapons, Two-Handed Weapons and Ranged Weapons. Each grouping includes a weapons cost, damage type die, and range if applicable.

Cost: This is the cost for purchasing the weapon. The cost also includes miscellaneous gear that goes with the weapon such as 20 arrows, bolts or sling stones for a bow, crossbow, or sling.

Damage: The damage column indicates the damage die used when a successful attack is made.

"Copper and silver are for the common folk while Gold is like a King, loved by all, but everyone knows the true power behind a King is his Queen...and the Queen is Platinum."

– Rosenfel the Fingersmith

Range Increment: Any attack at less than the range increment distance is not penalized for range. After the initial range increment a cumulative -2 penalty on the attack roll is applied to each additional range increment.

A thrown weapon will have a maximum of five range increments while a projectile weapon will fire out to ten range increments.

Light Weapons

Weapon	Cost	Damage	Range
Unarmed Strike	-	1d3	-
Axe, Throwing	8 gp	1d6	10 ft.
Dagger	2 gp	1d4	10 ft.
Hammer, Light	1 gp	1d6	20 ft
Handaxe	6 gp	1d6	-
Mace, Light	5 gp	1d6	-
Pick, Light	4 gp	1d4	-
Sap	1 gp	1d6	-
Sickle	6 gp	1d6	-
Shortsword	10 gp	1d6	-

One-Handed Weapons

Weapon	Cost	Damage	Range
Battleaxe	10 gp	1d8	-
Club	-	1d6	10 ft.
Flail	8 gp	1d8	-
Longsword	15 gp	1d8	-
Mace, Heavy	12 gp	1d8	-
Morningstar	8 gp	1d8	-
Pick, Heavy	8 gp	1d6	-
Rapier	20 gp	1d6	-
Scimitar	15 gp	1d6	-
Shortspear	1 gp	1d6	20 ft.
Sword, Bastard	35 gp	1d10	-
Trident	15 gp	1d8	10 ft.
Waraxe, Dwarven	30 gp	1d10	-
Warhammer	12 gp	1d8	-
Whip*	1 gp	1d3	-

Two-Handed Weapons

Weapon	Cost	Damage	Range
Chain, Spiked*	25 gp	2d4	-
Falchion	75 gp	2d4	-
Flail, Heavy	15 gp	1d10	-
Flamberge	50 gp	1d12	-
Glaive*	8 gp	1d10	-
Greataxe	20 gp	1d12	-
Greatclub	5 gp	1d10	-
Greatsword	50 gp	2d6	-
Guisarme*	9 gp	2d4	-
Halberd	10 gp	1d10	-
Lance*	10 gp	1d8	-
Longspear*	5 gp	1d8	-
Quarterstaff	-	1d6	-
Scythe	18 gp	2d4	-
Spear	2 gp	1d8	20 ft.

*Glaives, guisarmes, lances, longswords, spiked chains, and whips are reach weapons. A reach weapon is a melee weapon that allows its wielder to strike at targets that aren't adjacent to him. Most reach weapons double the wielder's natural reach, meaning that a typical wielder of such a weapon can attack a creature 10 feet away, but not a creature in an adjacent square. Spiked chains may make both reach and normal attacks.

Ranged Weapons

Weapon	Cost	Damage	Range
Crossbow, Hand	100 gp	1d4	30 ft.
Crossbow, Heavy	50 gp	1d10	120 ft.
Crossbow, Light	35 gp	1d8	80 ft.
Dart	5 gp	1d4	20 ft.
Javelin	1 gp	1d6	30 ft.
Longbow	75 gp	1d8	100 ft.
Net	20 gp	-	10 ft.
Shortbow	30 gp	1d6	60 ft.
Sling	-	1d4	50 ft.

Armor

Armor is divided up into groups of armor types, light, medium, or heavy and shields.

Cost: The cost for purchasing the armor or shield.

AC Bonus: This is the Armor Class (AC) bonus provided for wearing the armor.

Armor Types

Armor	Cost	AC Bonus
Padded	2 gp	+1
Leather	10 gp	+2
Studded Leather	25 gp	+3
Chain Shirt	100 gp	+4
Hide	15 gp	+3
Scale Mail	50 gp	+4
Chainmail	150 gp	+5
Breastplate	200 gp	+5
Splint Mail	200 gp	+6
Banded Mail	250 gp	+6
Half-Plate	600 gp	+7
Full Plate	1,500 gp	+8

Shields

Armor	Cost	AC Bonus
Buckler	15 gp	+1
Shield, Light Wooden	3 gp	+1
Shield, Light Steel	9 gp	+1
Shield, Heavy Wooden	7 gp	+2
Shield, Heavy Steel	20 gp	+2
Shield, Tower	30 gp	+4

Adventuring Gear

A level 1 character will have just enough starting wealth to get them self equipped with arms, armor and some adventuring gear.

Fast Packs

A quick way to get a character started, or for the Game Master (GM) to equip a Non-Player Character (NPC) or hireling, is to use a "Fast Pack." Fast Packs are pre-compiled sets of adventuring gear. Fast Packs are 50gp each.

Delver Pack

Backpack, Belt Pouch, Bedroll, Rations (4 Days), Waterskin, Lantern, Oil (3 Flasks), Flint and Steel, Pole (10'), Rope 50', Caltrops, Crowbar, Ram (Portable).

Explorer Pack

Backpack, Belt Pouch, Bedroll, Rations (4 Days), Waterskin, Tent, Torch (6), Flint and Steel, Rope 50', Grappling Hook, Pitons (3), Hammer.

Hunter Pack

Backpack, Belt Pouch, Bedroll, Rations (4 Days), Waterskin, Lantern, Oil (3 Flasks), Flint and Steel, Rope 50', Caltrops, Chain 10', Manacles, Lock (Good).

Each Fast Pack also comes with the following dependent on your character's Class;

- ❖ Fighter – Vial of Holy Water and 5 GP
- ❖ Rogue – Thieves Tools
- ❖ Cleric – Silver Holy Symbol and 5 GP
- ❖ Wizard – Spellbook and 5 GP

Adventuring Gear	Cost
Backpack	2 gp
Bedroll	1 sp
Caltrops	1 gp
Candle	1 cp
Case (scroll)	1 gp
Chain 10'	30 gp
Chalk	1 cp
Crowbar	2 gp
Grappling Hook	1 gp
Hammer	5 sp
Holy Symbol, Wooden	1 gp
Holy Symbol, Silver	25 gp
Ink	8 gp
Lantern	12 gp
Lock, Simple	20 gp
Lock, Average	40 gp
Lock, Good	80 gp
Lock, Amazing	25 gp
Manacles	150 gp
Oil (1 Pint Flask)	1 sp
Piton	1 sp
Pole (10 foot)	2 sp
Pouch, Belt	1 gp
Ram (portable)	10 gp
Rations, Trail (1 day)	5 sp
Rope, Hempen 50'	1 gp
Sack	1 sp
Spell book	15 gp
Spyglass	1000 gp
Tent	10 gp
Torch	1 cp
Thieves Tools	30 GP
Vial of Holy Water	25 gp
Waterskin	1 gp

Caltrops: A caltrop is a four-pronged iron spike crafted so that one prong faces up no matter how the caltrop comes to rest. You scatter caltrops on the ground in the hope that your enemies step on them or are at least forced to slow down to avoid them. One 2- pound bag of caltrops covers an area 5 feet square.

Each time a creature moves into an area covered by caltrops (or spends a round fighting while standing in such an area), it might step on one. The caltrops make an attack roll (attack bonus +0) against the creature. For this attack, the creature's shield, armor, and spell bonuses do not count. If the

creature is wearing shoes or other footwear, it gets a +2 armor bonus to AC. If the caltrops succeed on the attack, the creature has stepped on one. The caltrop deals 1 point of damage, and the creature's speed is reduced by one-half because its foot is wounded. This movement penalty lasts for 24 hours, or until the creature is successfully treated with a DC 15 Heal check, or until it receives at least 1 point of magical curing. A charging or running creature must immediately stop if it steps on a caltrop. Any creature moving at half speed or slower can pick its way through a bed of caltrops with no trouble.

Caltrops may not be effective against unusual opponents.

Candle: A candle dimly illuminates a 5-foot radius and burns for 1 hour.

Chain: Chain has hardness 10 and 5 hit points. It can be burst with a DC 26 Strength check.

Crowbar: A crowbar grants a +2 bonus on Strength checks made for such purposes. If used in combat, treat a crowbar as a one-handed weapon that deals bludgeoning damage equal to that of a club.

Flint and Steel: Lighting a torch with flint and steel takes a round and lighting any other fire with them takes at least that long.

Grappling Hook: Throwing a grappling hook successfully requires a Skill check (DEX + SUB, DC 10, +2 per 10 feet of distance thrown).

Hammer: If a hammer is used in combat, treat it as a one-handed weapon that deals bludgeoning damage equal to that of a light hammer.

Ink: This is black ink. You can buy ink in other colors, but it costs twice as much.

Lantern: A lantern provides clear illumination in a 60-foot cone and shadowy illumination in a 120-foot cone. It burns for 6 hours on a pint of oil. You can carry a lantern in one hand.

Lock: The DC to open a lock with a Skill check depends on the lock's quality: simple (DC 20), average (DC 25), good (DC 30), or superior (DC 40).

Manacles: Manacles can bind a Medium creature. A manacled creature can use a Skill check to slip free (DEX + SUB, DC 30). Breaking the manacles requires a Strength check (DC 26).

(Most manacles have locks; add the cost of the lock you want to the cost of the manacles.)

Oil: A pint of oil burns for 6 hours in a lantern. You can use a flask of oil as a splash weapon but it takes a full round to prepare a flask with a fuse. Once it is thrown, there is a 50% chance of the flask igniting

successfully. A direct hit deals 1d6 points of fire damage. Every creature within 5 feet of the point where the flask hits takes 1 point of fire damage from the splash. On the round following a direct hit, the target takes an additional 1d6 points of damage. If desired, the target can use a turn in a round to attempt to extinguish the flames before taking this additional damage. Extinguishing the flames requires a Skill check PHY + DEX, DC 15. Rolling on the ground provides the target a +2 bonus on the Skill check. Leaping into a lake or magically extinguishing the flames automatically smothers the fire.

You can pour a pint of oil on the ground to cover an area 5 feet square, provided that the surface is smooth. If lit, the oil burns for 2 rounds and deals 1d3 points of fire damage to each creature in the area.

Piton: A piton is a metal spike with an eye through which a rope may be passed.

Ram, Portable: This iron-shod wooden beam gives you a +2 bonus on Strength checks made to break open a door and it allows a second person to help you without having to roll, increasing your bonus by +2.

Rope, 50': This rope has 2 hit points and can be burst with a DC 23 Strength check.

Spyglass: Objects viewed through a spyglass are magnified to twice their size.

Torch: A torch burns for 1 hour, clearly illuminating a 20-foot radius and providing shadowy illumination out to a 40-foot radius. If a torch is used in combat, treat it as a one-handed improvised weapon that deals bludgeoning damage equal to that of a gauntlet of its size, plus 1 point of fire damage.

Vial of Holy Water: Holy water damages undead creatures and evil outsiders almost as if it were acid. A vial of holy water can be thrown as a splash weapon. Treat this attack as a ranged attack with a range increment of 10 feet. A vial breaks if thrown against the body of a corporeal creature, but to use it against an incorporeal creature you must be adjacent to it and pour the holy water out onto the target. Doing so is still a ranged attack. A direct hit by a vial of holy water deals 2d4 points of damage to an undead creature or an evil outsider. Each such creature within 5 feet of the point where the vial hits takes 1 point of damage from the splash.

Temples devoted to good deities sell holy water at cost (making no profit).

Grand house	5,000gp
Mansion	100,000gp
Tower	50,000gp
Keep	150,000gp
Castle	500,000gp
Huge Castle	1,000,000gp
Moat with bridge	50,000gp

Simple House - This one- to three-room house is made of wood and has a thatched roof.

Grand House - This four- to ten-room house is made of wood and has a thatched roof.

Mansion - This ten- to twenty-room residence has two or three stories and is made of wood and brick. It has a slate roof.

Tower - This round or square, three-level tower is made of stone.

Keep - This fortified stone building has fifteen to twenty-five rooms.

Castle - A castle is a keep surrounded by a 15-foot stone wall with four towers. The wall is 10 feet thick.

Huge Castle - A huge castle is a particularly large keep with numerous associated buildings (stables, forge, granaries, and so on) and an elaborate 20-foot-high wall that creates bailey and courtyard areas. The wall has six towers and is 10 feet thick.

Moat with Bridge - The moat is 15 feet deep and 30 feet wide. The bridge may be a wooden drawbridge or a permanent stone structure.

Spells

The spells in Microlite20 are divided up into two lists, arcane and divine and further divided up by the spell levels. Arcane spells are used by the Wizard Class and the divine spells are used by the Cleric Class.

Below are explanations of the headings for the spell lists.

Name

The first line of every spell description gives the name by which the spell is generally known.

Effect and Descriptive Text

This portion of the spell description details what the spell does and how it works. If one of the entries in the description included “see text,” this is where the explanation is found.

Range

A spell’s range indicates how far from you it can reach, as defined in the Range entry of the spell description. A spell’s range is the maximum distance from you that the spell’s effect can occur, as well as the maximum distance at which you can designate the spell’s point of origin. If any portion of the spell’s area would extend beyond this range, that area is wasted. Standard ranges include the following;

Personal – This spell affects only you.

Touch – You must touch a creature or object to affect it. A touch spell that deals damage can score a critical hit just as a weapon can. A touch spell threatens a critical hit on a natural roll of 20 and deals double damage on a successful critical hit. Some touch spells allow you to touch multiple targets. You can touch as many willing targets as you can reach as part of the casting, but all targets of the spell must be touched in the same round that you finish casting the spell.

Close – The spell reaches as far as 25 feet away from you. The maximum range increases by 5 feet for every two full caster levels.

Medium – The spell reaches as far as 100 feet + 10 feet per caster level.

Long – The spell reaches as far as 400 feet + 40 feet per caster level.

Unlimited – The spell reaches anywhere on the same plane of existence.

Range Expressed in Feet – Some spells have no standard range category, just a range expressed in feet.

Duration

A spell’s Duration entry tells you how long the magical energy of the spell lasts.

Timed Durations – Many durations are measured in rounds, minutes, hours, or some other increment. When the time is up, the magic goes away and the spell ends. If a spell’s duration is variable the duration is rolled secretly (the caster doesn’t know how long the spell will last).

Instantaneous (instant) – The spell energy comes and goes the instant the spell is cast, though the consequences might be long-lasting.

Permanent – The energy remains as long as the effect does. This means the spell is vulnerable to dispel magic.

Concentration (con.) – The spell lasts as long as you concentrate on it. Concentrating to maintain a spell is an action. Anything that could break your concentration when casting a spell can also break your concentration while you’re maintaining one, causing the spell to end.

You can't cast a spell while concentrating on another one. Sometimes a spell lasts for a short time after you cease concentrating.

Saving Throw

Usually a harmful spell allows a target to make a saving throw to avoid some or all of the effect. The Saving Throw entry in a spell description defines which type of saving throw the spell allows and describes how saving throws against the spell work.

Negates (neg.) – The spell has no effect on a subject that makes a successful saving throw.

Partial (par.) – The spell causes an effect on its subject. A successful saving throw means that some lesser effect occurs.

Half (1/2) – The spell deals damage, and a successful saving throw halves the damage taken (round down).

None – No saving throw is allowed.

Disbelief (dis.) – A successful save lets the subject ignore the effect.

Saving Throw Difficulty Class

A saving throw against a spell has a DC of 10 + the caster's level + the caster's MIND bonus.

Succeeding on a Saving Throw

A creature that successfully saves against a spell that has no obvious physical effects feels a hostile force or a tingle, but cannot deduce the exact nature of the attack. Likewise, if a creature's saving throw succeeds against a targeted spell you sense that the spell has failed. You do not sense when creatures succeed on saves against effect and area spells.

Automatic Failures and Successes

A natural 1 (the d20 comes up 1) on a saving throw is always a failure and a natural 20 (the d20 comes up 20) is always a success.

Spell Resistance

SR – Spell Resistance is a special defensive ability. If your spell is being resisted by a creature with spell resistance, you must make a caster level Skill check (1d20 + caster level + MIND bonus) at least equal to the creature's spell resistance for the spell to affect that creature. The defender's spell resistance is like an Armor Class against magical attacks. Include any adjustments to your caster level to this caster level check.

The spell resistance entry tells you whether spell resistance protects creatures from the spell.

Arcane Spells

Wizard

Level 0 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Arcane Mark	Inscribes a personal rune (visible or invisible).	0 ft.	Permanent	None	No
Dancing Lights	Figment torches or other lights.	Medium	1 minute	Will dis.	No
Detect Magic	Detects spells and magic items within 60 ft.	60 ft.	Concentration up to 1 minute/level	None	No
Ghost Sound	Figment sounds.	Close	1 round/level	Will dis.	No
Light	Object shines like a torch.	Touch	10 minutes/level	None	No
Mage Hand	5-pound telekinesis.	Close	Concentration	None	No
Prestidigitation	Performs minor tricks.	10 ft.	1 hour	See text	No
Ray of Frost	Ray deals 1d3 cold damage.	Close	Instantaneous	None	Yes
Read Magic	Read scrolls and spellbooks.	Personal	10 minutes/level	--	--

Level 1 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Burning Hands	1d4/level fire damage (max 5d4).	15 ft. cone	Instant	Reflex ½	Yes

Charm Person	This charm makes a humanoid creature regard you as its trusted friend and ally (treat the target's attitude as friendly). If the creature is currently being threatened or attacked by you or your allies, however, it receives a +5 bonus on its saving throw.	Close	1 hour/level	Will neg.	Yes
Enlarge Person	Increases creature's size category to the next larger one, +2 STR, -2 DEX, -1 on attack rolls and AC due to its increased size.	Close	1 minute/level	Fort. neg.	Yes
Feather Fall	Objects or creatures fall slowly.	Close	Until landing or 1 round/level	Will neg.	Yes
Floating Disk	Creates 3-ft.-diameter horizontal disk that holds 100 lb./level.	Close	1 hour/level	--	--
Hold Portal	This spell magically holds shut a door, gate, window, or shutter of wood, metal, or stone. A knock spell or a successful dispel magic spell can negate a hold portal spell. For a portal affected by this spell, add 5 to the normal DC for forcing open the portal.	Medium	1 minute/level	None	No
Mage Armor	Gives subject +4 armor bonus.	Touch	1 hour/level	Will neg.	Yes
Magic Missile	1d4+1 damage; +1 missile/two levels above 1st (max +5).	Medium	Instantaneous	None	Yes
Shocking Grasp	Touch delivers 1d8 +1/level electricity.	Touch	Until discharged	None	Yes
Sleep	Put 2d4 HD of creatures into comatose slumber.	Medium	1 minute/level	Will neg.	Yes

Level 2 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Acid Arrow	Ranged touch attack; 2d4 damage for 1 round +1 round/three levels.	Long	1 round +1 round/level	None	--
Detect Thoughts	You detect surface thoughts.	60 ft.	Concentration	Will neg.	No
Flaming Sphere	Rolling ball of fire, 30' per round, 2d6 damage, lasts 1 round/level. 1 target/level.	Medium	1 round/level	Reflex neg.	Yes
Fog Cloud	A bank of fog billows out from the point you designate. The fog obscures all sight, including darkvision, beyond 5 feet. A creature within 5 feet has concealment (attacks have a 20% miss chance). Creatures farther away have total concealment (50% miss chance.)	Medium	10 minute/level	None	No
Invisibility	Subject is invisible for 10 min./level or until it attacks.	Personal or touch	10 minutes/level	None or Will neg.	Y/N
Knock	Opens locked or magically sealed door.	Medium	Instantaneous	None	No

Levitate	Subject moves up and down at your direction.	Personal or close	10 minutes/level	None	No
Spider Climb	Grants ability to walk on walls and ceilings.	Touch	10 minutes/level	Will	Yes

Level 3 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Clairaudience/ Clairvoyance	Hear or see at a distance for 1 min./level.	See text	1 minute/level	None	No
Dispel Magic	Cancels magical spells and effects.	Medium	Instantaneous	None	No
Fireball	1d6 damage per level, 20-ft. radius.	Long	Instantaneous	Reflex ½	Yes
Fire Trap	Opened object deals 1d4 damage +1/level.	Touch	Permanent until discharged	Reflex ½	Yes
Fly	Subject flies at speed of 18.	Touch	10 minutes/level	None	Yes
Gaseous Form	The subject and all its gear become insubstantial, misty, and translucent with Speed 2.	Touch	2 minute/level	None	No
Haste	One creature/level moves faster, +1 on attack rolls, AC, and Reflex saves.	Close	1 round/level	Fort. neg.	Yes
Lightning Bolt	Electricity deals 1d6 damage/level.	Medium	Instantaneous	Reflex ½	Yes
Suggestion	You influence the actions of the target creature by suggesting a reasonable course of activity.	Close	1 hour/level	Will neg.	Yes
Vampiric Touch	Touch deals 1d6/two caster levels; caster gains damage as hp.	Touch	Instantaneous /1 hour	None	Yes

Level 4 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Animate Dead	Creates undead skeletons and zombies of HDx2/level.	Touch	Instant	None	No
Arcane Eye	Invisible floating eye moves 30 ft./round.	Un-limited	1 minute/level	None	No
Black Tentacles	10 ft. long tentacles grapple all within 20 ft. spread. Attack = caster level, STR 19.	Medium	1 round/level	None	No
Dimension Door	You instantly transfer yourself from your current location to any other spot within range. After using this spell, you can't take any other actions until your next turn.	Long	Instantaneous	None and Will neg.	Y/N
Fear	An invisible cone of terror causes each living creature in the area to become panicked unless it succeeds on a Will save. If cornered, a panicked creature begins cowering. If the Will save succeeds, the creature is shaken for 1	30 ft.	1 round/level	Will par.	Yes

	round.				
Invisibility, Greater	As invisibility, but subject can attack and stay invisible.	Personal	1 round/ level	Will neg.	Yes
Polymorph Other	Gives one subject a new form.	Medium	Permanent	Fort. neg.	Yes
Stoneskin	Stops blows, cuts, stabs, and slashes. Damage reduction 10/ adamantine.	Touch	10 minutes/level or until discharged	Will neg.	Yes

Level 5 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Cloudkill	Kills 3 HD or less; 4-6 HD save or die, 6+ save or lose 1d4 STR while in cloud.	Medium	1 minute/level	Fort.	Yes
Contact Other Plane	Ask question of extraplanar entity.	Personal	Concentration	--	--
Feeblemind	Subject's Mind drops to 1.	Medium	Instantaneous	Will neg.	Yes
Passwall	Breaches walls 1 ft. thick/level.	Close	1 hour/level	None	No
Permanency	Makes certain spells permanent, costs EL's. Caster must be +8 levels higher than the spell level. Cost in EL's is 4% of total character EL's required of the level to make spell permanent.	Depends	Permanent	None	No
Teleport	Instantly transports you anywhere.	Personal and touch	Instantaneous	None and Will neg.	Y/N

Level 6 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Antimagic Field	Negates magic within 10 ft.	10 ft.	10 minutes/level	None	No
Chain Lightning	1d6 damage/level, number of secondary bolts equal to caster level with half damage.	Long	Instantaneous	REFLEX 1/2	Yes
Contingency	Sets trigger condition for another spell.	Personal	1 day/level or until discharged	--	--
Disintegrate	A thin, green ray springs from your pointing finger. You must make a successful ranged touch attack to hit. Any creature struck by the ray takes 2d6/level. Any creature reduced to 0 or fewer hit points by this spell is entirely disintegrated, leaving behind only a trace of fine dust. A disintegrated creature's equipment is unaffected. When used against an object, the ray simply disintegrates as much as one 10-foot cube of nonliving matter. A	Medium	Instantaneous	Fort. par.	Yes

creature or object that makes a successful Fortitude save is partially affected, taking only 5d6 points of damage.

Geas/Quest	Commands any creature, binding it to a specific task.	Close	1 day/level or until discharged	None	Yes
True Seeing	See all things as they really are.	Touch	1 minute/level	Will neg.	Yes

Level 7 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Delayed Blast Fireball	1d6 fire damage/level; you can delay blast for 5 rounds.	Long	Up to 5 rounds	REFLEX 1/2	Yes
Ethereal Jaunt	You become ethereal for 1 round/level.	Personal	1 round/level	--	--
Finger of Death	Kills one subject or 3d6 +1/level.	Close	Instantaneous	Fort. par.	Yes
Plane Shift	Up to eight subjects travel to another plane.	Touch	Instantaneous	Will neg.	Yes
Power Word, Stun	Stuns creature with up to 150 hp.	Close	1d4 rounds	None	Yes
Spell Turning	Reflect 1d4+6 spell levels back at caster.	Personal	Until expended or 10 minutes/level	--	--

Level 8 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Clone	Duplicate awakens when original dies.	0 ft.	Instantaneous	None	No
Horrid Wilting	Deals 1d8 damage/level within 30 ft.	Long	Instantaneous	Fort. 1/2	Yes
Incendiary Cloud	Cloud deals 4d6 fire damage/round.	Medium	1 round/level	Reflex 1/2	Yes
Irresistible Dance	Forces subject to dance, -4 AC, -10 Reflex saves, no shield bonus.	Touch	1d4+1 rounds	None	Yes
Power Word, Blind	Blinds 200 hp worth of creatures.	Close	1d4 rounds	None	Yes
Trap the Soul	Imprisons subject within gem.	Close	Permanent	Will neg.	Yes

Level 9 Wizard Spells

Spell Name	Effect	Range	Duration	Save	SR
Astral Projection	Projects you and companions into Astral Plane.	Touch	See text	None	Yes
Etherealness	Travel to Ethereal Plane with companions, 1/3 levels	Touch	1 minute/level	None	Yes
Gate	Connects two planes for travel or summoning.	Medium	Instantaneous	None	No
Meteor Swarm	Meteor swarm is a very powerful and spectacular spell. When you	Long	Instantaneous	None or REFLEX 1/2	Yes

cast it, four 2-foot-diameter spheres spring from your outstretched hand and streak in straight lines to the spots you select. The meteor spheres leave a fiery trail of sparks.

If you aim a sphere at a specific creature, you may make a ranged touch attack to strike the target with the meteor. Any creature struck by one of these spheres takes 2d6 points of bludgeoning damage (no save) and receives no saving throw against the sphere's fire damage (see below). If a targeted sphere misses its target, it simply explodes at the nearest corner of the target's space. You may aim more than one meteor at the same target.

Once a sphere reaches its destination, it explodes in a 40-foot-radius spread, dealing 6d6 points of fire damage to each creature in the area. If a creature is within the area of more than one sphere, it must save separately against each.

Power Word, Kill	Kills one creature with 100 hp or less.	Close	Instantaneous	None	Yes
Soul Bind	Traps newly dead soul to prevent resurrection.	Close	Permanent	Will neg.	No

Divine Spells

Cleric Spells

Level 0 Cleric Spells (Orisons)

Spell Name	Effect	Range	Duration	Save	SR
Create Water	Creates 2 gallons/level of pure water.	Close	Instantaneous	None	No
Guidance	+1 on one roll, save, or check.	Touch	1 minute or until discharged	None	Yes
Light	Object shines like a torch.	Touch	10 minutes/level	None	No
Purify Food and Drink	Purifies 1 cu. ft./level of food or water.	10 ft.	Instantaneous	Will neg.	Yes
Resistance	Subject gains +1 on saving throws.	Touch	1 minute	Will neg.	Yes
Virtue	Subject gains 1 temporary hp.	Touch	1 minute	Yes	Yes

Level 1 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Bless	Allies gain +1 attack and +1 on saves against fear.	50 ft.	1 minute/level	None	Yes
Bless Water	Makes holy water.	Touch	Instantaneous	Will neg.	Yes
Cure Light Wounds	Cures 1d8+1/level damage (max+5)	Touch	Instantaneous	Will ½	Yes

Divine Favor	You gain attack, damage bonus, +1/3 levels.	Personal	1 minute	--	--
Entangle	Plants entangle everyone in 40-ft.-radius. DC 20 Strength check or Escape Artist check to break free.	Long	1 minute/level	Reflex	No
Inflict Light Wounds	You channel negative energy that deals 1d8 points of damage +1 point per caster level (maximum +5). Since undead are powered by negative energy, this spell cures such a creature of a like amount of damage, rather than harming it.	Touch	Instantaneous	Will ½	Yes
Magic Stone	Three stones gain +1 attack, deal 1d6+1 damage.	Touch	30 minutes or until discharged	Will neg.	Yes
Shield of Faith	Aura grants +2 or higher deflection bonus to AC, +1/6 levels.	Touch	1 minute/level	Will neg.	Yes

Level 2 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Aid	+1 attack, +1 on saves against fear, 1d8 temporary hit points.	Touch	1 minute/level	None	Yes
Cure Moderate Wounds	Cures 2d8 +1/level damage (max +10).	Touch	Instantaneous	Will 1/2	Yes
Darkness	20-ft. radius of supernatural shadow. All creatures in the area gain concealment (20% miss chance). Normal lights have no effect.	Touch	10 minutes/level	None	No
Delay Poison	Stops poison from harming subject for 1 hour/level.	Touch	1 hour/level	Fort. neg.	Yes
Gentle Repose	Preserves one corpse.	Touch	1 day/level	Will neg.	Yes
Remove Paralysis	Frees one or more creatures from paralysis, hold, or slow.	Close	Instantaneous	Will neg.	Yes
Resist Energy	Ignores 10 (or more) points of damage/attack from specified energy type; acid, cold, electricity, fire, or sonic. Energy resistance granted increases to 20 points at 7th level and to a maximum of 30 points at 11th level.	Touch	10 minutes/level	Fort. neg.	Yes

Level 3 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Bestow Curse	You place a curse on the subject. Choose one of the following three effects; -6 decrease to an ability score (minimum 1), -4 penalty on attack rolls,	Touch	Permanent	Will neg.	Yes

	and skill checks, or each turn, the target has a 50% chance to act normally; otherwise, it takes no action. You may also invent your own curse, but it should be no more powerful than those described above.				
Create Food and Water	Feeds three humans (or one horse)/level.	Close	24 hours	None	No
Cure Serious Wounds	Cures 3d8 +1/level damage (max +15).	Touch	Instantaneous	Will 1/2	Yes
Daylight	60-ft. radius of bright light.	Touch	10 minutes/level	None	No
Prayer	Allies gain +1 on rolls, and enemies suffer -1.	30 ft.	1 round/level	None	Yes
Remove Disease	Cures all diseases affecting subject.	Touch	Instantaneous	Fort. neg.	Yes
Searing Light	Ray deals 1d8/two levels, 1d6/level against undead.	Medium	Instantaneous	None	Yes
Speak with Dead	Corpse answers one question/two levels.	10 ft.	1 minute/level	Will neg.	No

Level 4 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Cure Critical Wounds	Cures 4d8 +1/level damage (max +20).	Close	Instantaneous	Will 1/2	Yes
Discern Lies	Reveals deliberate falsehoods.	Close	Concentration, up to 1 round/level	Will neg.	No
Freedom of Movement	Subject moves normally despite impediments.	Personal or touch	10 minutes/level	None	Y/N
Neutralize Poison	Detoxifies venom in or on subject.	Touch	Instantaneous	Will neg.	Yes
Restoration	Restores level and ability score drains.	Touch	Instantaneous	Will neg.	Yes
Tongues	Speak any language.	Touch	10 minutes/level	None	No

Level 5 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Atonement	Removes burden of misdeeds from subject.	Touch	Instantaneous	None	Yes
Commune	Deity answers one yes-or-no question/level.	Personal	1 round/level	--	--
Cure Light Wounds, Mass	Cures 1d8 damage +1/level for 1 creature/level within 30 ft.	Close	Instantaneous	Will ½	Yes
Flame Strike	Smites foes with divine fire (1d6/level).	Medium	Instantaneous	Reflex ½	Yes
Raise Dead	Restores life to subject who died up to 1 day/level ago.	Touch	Instantaneous	None	Yes
True Seeing	See all things as they really are.	Touch	1 minute/level	Will neg.	Yes

Level 6 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Banishment	Banishes 2HD/level extraplanar creatures.	Close	Instantaneous	Will neg.	Yes
Blade Barrier	Wall of whirling blades up to 20 ft. long/ level. Any creature passing through the wall takes damage 1d6/level.	Medium	1 minute/level	Reflex ½	Yes
Cure Moderate Wounds. Mass	Cures 2d8 damage +1/level for 1 creature/level within 30 ft.	Close	Instantaneous	Will ½	Yes
Harm	Subject loses all but 1d4 hp.	Touch	Instantaneous	None	Yes
Heal	Cures all damage, diseases, and mental conditions.	Touch	Instantaneous	None	Yes
Heroes' Feast	Food for one creature/level cures and blesses.	Close	1 hour + 12 hours	None	Yes
Geas/Quest	Commands any creature, binding it to a specific task.	Close	1 day/level or until discharged	None	Yes

Level 7 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Cure Moderate Wounds, Mass	Cures 3d8 damage +1/level for 1 creature/level within 30 ft.	Close	Instantaneous	Will ½	Yes
Destruction	Kills subject and destroys remains or 10d6 damage.	Close	Instantaneous	Fort. par.	Yes
Ethereal Jaunt	You become ethereal for 1 round/level.	Personal	1 round/level	--	--
Regenerate	Subject's severed limbs grow back, cures 4d8 damage +1/level (max +35).	Touch	Instantaneous	Fort. neg.	Yes
Restoration, Greater	As restoration, plus restores all levels and ability scores	Touch	Instantaneous	Will neg.	Yes
Resurrection	Fully restore dead subject.	Touch	Instantaneous	None	Yes

Level 8 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Antimagic Field	Negates magic within 10 ft.	10 ft.	10 minutes/level	None	Yes
Cure Moderate Wounds, Mass	Cures 4d8 damage +1/level for 1 creature/level within 30 ft.	Close	Instantaneous	Will ½	Yes
Dimensional Lock	Teleportation and interplanar travel blocked for one day/level, 20 ft. radius.	Medium	1 day/level	None	Yes
Discern Location	Exact location of creature or object.	Unlimited	Instantaneous	None	No
Fire Storm	Deals 1d6 fire damage/level.	Medium	Instantaneous	Reflex ½	Yes
Holy Aura	+4 AC, +4 resistance, and SR 25 against evil spells.	20 ft.	1 round/level	--	Yes

Level 9 Cleric Spells

Spell Name	Effect	Range	Duration	Save	SR
Astral Projection	Projects you and companions into Astral Plane.	Touch	Indefinitely	None	Yes
Etherealness	Travel to Ethereal Plane with companions, 1/3 levels	Touch	1 minute/level	None	Yes
Gate	Connects two planes for travel or summoning.	Medium	Instantaneous	None	No
Heal, Mass	It immediately ends: ability damage, blinded, confused, dazed, dazzled, deafened, diseased, exhausted, fatigued, feebleminded, insanity, nauseated, sickened, stunned, and poisoned. It also cures 10 hp/level max 250 hp within 30 ft.	Close	Instantaneous	--	--
Implosion	Kills one creature/round, max 4 rounds.	Close	Concentration	Fort. neg.	Yes
Soul Bind	Traps newly dead soul to prevent resurrection.	Close	Permanent	Will neg.	No

Conditions Summary Table

Below is a list of Conditions which a character may be subjected to while out adventuring.

Condition	Summary of Effects
Ability Damaged	Temporarily loss of 1 or more ability score points.
Ability Drained	Permanently loss of 1 or more ability score points.
Blinded	-2 AC, no DEX bonus to AC (if any), Move 1/2, -4 to STR/DEX Skill checks. All checks and activities that rely on vision automatically fail. All opponents are 50% miss chance to the blinded character.
Blown Away	Prone, blown 1d4x10' rnd, D1d4/10'
Confused	1-2, attack caster 3-4, act normally; 5-10, babble incoherently; 11-14, flee; 16-20, attack nearest creature.
Cowering	No Move, -2 AC, no DEX bonus AC
Dazed	No Move.
Dazzled	-1 attack, search/spot checks
Dead	The character's hit points and STR are reduced to 0.
Deafened	-4 INI, automatically fail skill checks where hearing is involved.
Disabled	0 HP, or -STR score but HP's. Action beyond a ½ move results in Stable condition.
Dying	Losing 1 point STR/round until healed or dead.
Energy Drained	Character loses 1 or more levels, along with the HP's, attack bonus, etc. gained with the level.
Entangled	½ move, -2 attacks, casting requires DC15 + spells level check or spell lost.
Exhausted	½ move, -6 STR and DEX
Fascinated	No actions, condition broken if attacked.
Fatigued	No run or charge, -2 STR and DEX.
Frightened	Flees, -2 all rolls.
Grappling	-DEX to AC against non-grappling opponents.
Helpless	Unable to move, at opponent's mercy, death blow possible.
Invisible	+2 attacks and no DEX AC bonus for target.
Knocked Down	Prone
Nauseated	Move action only.
Panicked	Drop items in hand, flee, -2 all rolls.
Paralyzed/Petrified	Helpless
Pinned	Held immobile (but not helpless) in a grapple suffering a -4 penalty to AC.
Prone	-4 attacks, +4 AC ranged, -4 AC melee.
Shaken	-2 all rolls
Sickened	-2 all rolls
Stable	No longer losing HP's or STR, unconscious.
Stunned	Drops items in hand, -2 AC, no DEX bonus AC.
Turned	Affected by a turn undead attempt. Turned undead flee for 10 rounds (1 minute) by the best and fastest means available to them. If they cannot flee, they cower.
Unconscious	Helpless.

Appendix A

Titles and Names by Class

Fighter Characters	Wizard/Cleric Characters	Rogue Characters
Adventurer	Abbot	Argonaut
Barbarian	Acolyte	Assassin
Brigand	Admiral	Bandit
Buccaneer	Archmage	Bard
Cavalier	Chronicler	Blackguard
Cavalrymen	Cleric	Corsair
Crusader	Conjurer	Cutthroat
Explorer	Crone	Guide
Footman	Curate	Hermit/Hermitess
Gladiator	Druid	Initiate
Guard	Enchanter/Enchantress	Journeyman
Holy Warrior	Friar	Knave
Knight	Hag	Longbowman
Man/Woman-at-Arms	Hedge Wizard	Minstrel
Mercenary	Heretic	Monk
Militiaman	Illusionist	Ninja
Nomad	Mage	Outlaw
Paladin	Martyr	Pathfinder
Patron	Missionary	Pirate
Privateer	Necromancer	Ranger/Rangeress
Raider	Pilgrim	Robber
Rebel	Priest/Priestess	Rogue
Renegade	Seer	Scout
Ronin	Shaman	Smuggler
Sailor	Sorcerer	Spy
Samurai	Spellbinder	Swashbuckler
Seaman	Thaumaturge	Thief
Soldier	Theurgist	Traveler
Squire	Warlock	Troubadour
Warmonger	Witch	Wayfarer

In *DUNGEONFINDER* some players may find having the same Class as other characters doesn't really give them a feeling of having a "special" character. Ask your GM about using the "Titles and Names" to add a little something to your character. You and the GM may decide having a title or name grants the character a special Skill or other ability too!

DUNGEONFINDER

Game Master's Guide

A Game Master's Guide to the *DUNGEONFINDER* role-playing game, a streamlined version of the Primary Fantasy SRD rules, for use by itself or in combination with other Primary Fantasy SRD compatible games.

M20
microlite 20

Revised by Chad E. Rose

table.

Special thanks to;

Robin V. Stacey for creating Microlite20.

Darrell King and Al Krombach for the Purest
Essence rules.

The Microlite20 community for all their
enthusiasm and ideas.

Seth Drebitko for keeping the legacy alive.

*"The goal was to create a simpler game but
one where all the resources of the Primary
Fantasy SRD (monsters, spells, adventures and
equipment) could be used without conversion."*

- The authors of Microlite20 Purest Essence.

On October 14th 2006 Greywulf (Robin V. Stacey) replied to a thread on the ENWorld forums and placed a link to his simplified version of the World's Most Popular Role-Playing Game. Two days later he started his own thread on those very forums, "Microlite20: The Smallest Thing in Gaming." This thread spanned 82 pages and 1,217 posts over a year and four months before it was closed and restarted due to the extreme length of the thread.

You could say Microlite20 met with some success.

On March 12th 2010 it was announced that Microlite20 was sold to Seth Drebitko and...

...the adventure's just begun.

What is the DUNGEONFINDER role-playing game?

To those new to role-playing games *DUNGEONFINDER* is a fantasy game where one person, called the Game Master, creates an adventure, controlling the people and monsters in it, while the other people play heroes they create who will explore the cities and castles and ruins in the adventure.

To the people with more experience with RPG's, *DUNGEONFINDER* is the Primary Fantasy SRD streamlined into a slimmer package and then having the Microlite20 rules dropped in on top to trim things down even further. A fast-paced game that may be easily used with adventures made for the *World's Most Popular Role-Playing Game* or the *World's Second Most Popular Role-Playing Game* based on the 3.5 edition rules.

Or, just use the *DUNGEONFINDER* Player's Guide, *DUNGEONFINDER* Game Master's Guide and *DUNGEONFINDER* Book of Monsters to create your own adventures. Everything you need is there, character creation and advancement, equipment, spells, monsters, treasure and magic-items, and a random adventure creator to help you along or for solo play.

So what changes have been made to create a slimmer, trimmer, even more streamlined game? Well, the major changes are; the inclusion of only the four major classes, the elimination of feats, a streamlined skill system, a reduction to the spell lists, efficient monster listings, and a treasure and magic-item section that instead of being 100 pages long has been nicely reduced to just 5 pages!

Read on, create your adventure and prepare for epic fantasy!

"Written rules by themselves cannot make for great adventure. The game master must envision a fantastic world and the players breathe life into it and only then will everyone be lost in epic fantasy."

The Basics

The Core Mechanic

Whenever you attempt an action that has some chance of failure, you roll a twenty-sided die (d20). To determine if your character succeeds at a task you do this:

- Roll a d20.
- Add any relevant modifiers.
- Compare the result to a target number.

If the result equals (for a skill check) or exceeds (for an attack) the target number, your character succeeds. If the result is lower than the target number, you fail.

Dice – Dice rolls are described with expressions such as “3d4+3,” which means “roll three four-sided dice and add 3” (resulting in a number between 6 and 15). The first number tells you how many dice to roll (adding the results together). The number immediately after the “d” tells you the type of die to use. Any number after that indicates a quantity that is added or subtracted from the result.

d% - Percentile dice work a little differently. You generate a number between 1 and 100 by rolling two different ten-sided dice. One (designated before you roll) is the tens digit. The other is the ones digit. Two 0s represent 100.

Modifiers – A modifier is any bonus or penalty applying to a die roll. A positive modifier is a bonus, and a negative modifier is a penalty.

Game Master's Guide

The Game Master's Guide will expand somewhat on the Player's Guide covering a few areas in more detail. It will also provide you with Combat rules, Monsters, Adventuring information and more so you can run your own games and create your own adventures and campaigns.

For Treasure it is recommended that you use the Treasure and Magic Items sections from the SRD.

Character Races

At some point in your gaming it's likely a player is going to ask about playing a character race not included in the Player's Guide. The final decision is up to you as Game Master but try to accommodate your player's wishes.

For any new race and its race bonus a good rule of thumb is +2 to any Statistic (Stat) or +2 to any two Skills. A new race could also have a +1 to one Stat and +2 to any one Skill. If the new race has a predominant feature that you feel should add a +4 to a Stat then do so but penalize another Stat -2.

Character Skills

Players will use their character's Skills to perform a multitude of actions. Most will probably be your usual jump, pick a lock, or to bash open a door Skill check. Every once in a while though a player may want to try something unusual. Don't let this alarm you, simply decide on how hard it would be to accomplish the task and pick what you think are the most applicable Statistic and Skill to perform the Skill check.

Below are a couple of tables that will help you to figure out the Difficulty Class of an action and

the Statistics and Skills involved in performing that action.

Difficulty Class Table 1

Difficulty Classes with likely-hood of success.

DC	Difficulty	Example
10	Average	50/50 chance of succeeding on first attempt.
15	Tough	Could succeed at after several attempts.
20	Challenge	Could only succeed with a high roll.
25	Formidable	Could succeed only with high Ability mod., Skill ranks and roll.
30	Heroic	High level characters maybe.
40	Nearly Impossible	Highest level characters.

Difficulty Class Table 2

Difficulty Classes with Skill check examples and the associated statistic and skill.

Difficulty (DC)	Example (Skill & Stat Used)
Very easy (0)	Track ten trolls through the snow. (Know+Mind)
Easy (5)	Hear Kobolds talking around the next corner. (Subterfuge+Mind)
Average (10)	Learn local rumors. (Communication+Mind)
Tough (15)	Leap over a 10' chasm. (Physical+STR)
Challenge (20)	Open a simple lock. (Subterfuge+DEX)
Formidable (25)	Bash open a locked, strong wooden door. (Physical+STR)
Heroic (30)	Discover a well-hidden secret door. (Subterfuge+Mind)
Nearly impossible (40)	Track a lone orc across hard ground after 24 hours of rainfall. (Know+Mind)

Opposed Checks

An opposed check is a check whose success or failure is determined by comparing the check result to another character's check result. In an opposed check, the higher result succeeds, while the lower result fails. In case of a tie, the higher skill modifier wins. If these scores are the same, roll again to break the tie.

Example Opposed Checks

Task	Stat & Skill	Opposing Stat & Skill
Con someone	COM+Mind	COM+Mind
Pretend to be someone else	SUB+Mind	SUB+Mind
Create a false map	SUB+Mind	SUB+Mind
Hide from someone	SUB+DEX	SUB+Mind
Intimidate someone	COM+PHY SUB+Mind	COM+Mind SUB+Mind
Sneak up on someone	SUB+DEX	SUB+Mind
Steal a coin pouch	SUB+DEX	SUB+Mind
Tie a prisoner securely	-	SUB+DEX

Favorable and Unfavorable Conditions

Some situations may make a skill easier or harder to use, resulting in a bonus or penalty to the skill modifier for a skill check or a change to the DC of the skill check.

The chance of success can be altered in four ways to take into account exceptional circumstances.

Give the skill user a +2 bonus to represent conditions that improve performance, such as having the perfect tool for the job, getting help from another character or possessing unusually accurate information.

Give the skill user a -2 penalty to represent conditions that hamper performance, such as being forced to use improvised tools or having misleading information.

Reduce the DC by -2 to represent circumstances that make the task easier, such as having a friendly audience or doing work that can be subpar.

Increase the DC by +2 to represent circumstances that make the task harder, such as having an uncooperative audience or doing work that must be flawless.

Conditions that affect a character's ability to perform the skill change the skill modifier. Conditions that modify how well the character has to perform the skill to succeed change the DC. A bonus to the skill modifier and a reduction in the check's DC have the same result: They create a better chance of success but they represent different circumstances, and sometimes that difference is important.

Characters Will Try Anything!

So let them try anything! Just take the most likely Statistic and Skill and figure out a DC for the action.

For example: The player of Bagaduce the Halfling Battlerager explains that they want Bagaduce to leap from the taverns balcony to the candleholder suspended from the ceiling in the middle of the room. Then, swing on it towards the board where Forn Lask is having a drink so Bagaduce can plant the underside of his little boot into Forn Lask's chin...whew.

Okay, so we need Ability and a Skill for the skill check to jump from the balcony, catch hold of the hanging candleholder, and swing towards Forn Lask. Our Abilities are STR, DEX, and MIND, sounds like a Dexterity action to me. Our Skills are Physical, Subterfuge, Knowledge, and Communication, and here Physical looks best.

Now for a Difficulty Class (DC). Looking over Difficulty Class Table 1 we see that a DC 15 is a “Tough” DC that an average joe “Could succeed at after several attempts.” I like it so we’ll use it.

So Bagaduce has leaped out into the air, caught the candleholder, and is swinging towards the devious Forn Lask. What about Bagaduce’s boot and Forn Lask’s chin? Bagaduce’s player just wants the Halfling to knock Forn Lask down to his Halfling size so we will have Bagaduce make a “Trip” attack roll to hit Forn Lask. We’re using the Trip attack because Bagaduce isn’t trying to damage Forn Lask but wants to knock him over. If Bagaduce is successful on his attack we will give him +2 on his STR+PHY Skill check to trip Forn Lask since the little guy is carrying a lot of momentum by swinging on the candleholder, a favorable condition. If he’s successful then down goes Forn Lask. If he’s not successful, well, let’s hope Bags hangs onto that candleholder because he won’t want to find himself prone at Forn Lask’s feet!

The following table gives some ranges for Difficulty Classes by character level and general difficulty; Easy, Moderate and Hard. You can use these guidelines when trying to gauge how difficult a Skill check should be.

Difficulty Class Values by Character Level

Level	Easy	Moderate	Hard
1-3	3-5	9-11	13-15
4-6	6-8	12-14	16-18
7-9	9-11	15-17	19-21
10-12	12-14	18-20	22-24
13-15	15-17	21-23	25-27
16-18	18-20	24-26	28-30
19-21	21-23	27-29	31-33

Some skill checks will become more difficult as character progress, however, some will not. Bagaduce’s swing on the candleholder should always use the level 1-3 row as it will not get

more difficult to do as he gains levels but easier. The 1-3 row is considered your average person.

Big List of Difficulty Classes (DC's)

DC	Action
5	Climb a knotted rope
6	Guide a party through some hills, map
8	Guide a party through some mountains, map
8	Spot quicksand before stepping in it
10	Guide a party through some hills, no map
10	Hear an approaching guard
10	Hold onto a branch/rope that is pulling you
10	Gather information, common, known by at least a substantial minority of the local population.
10	Leap across a 10-foot chasm
10+	Identify a monster's abilities and weaknesses (10+ monster's CR)
10	Take action with vigorous motion (moving mount, bouncy wagon ride, etc.)
10	Handle an animal
12	Appraise common or well-known items
12	Guide a party through mountains, no map
12	Move in correct direction with poor visibility
13	Bash open a stuck simple wooden door
15	Appraise rare or exotic item
15	Bash open a locked weak wooden door
15	Climb a chasm/cliff/tree
15+	Identify underground hazard (15+ hazard's CR)
15	Climb a cliff
15	First aid
15	Jump across a 15 ft. crevice
15	Diplomatically ask a crowd of people to move
15+	Identify auras while using detect magic (15+spell level)
15	Guide a party through a forest, no map
15	Hear people whispering
15	Identify spell being cast (+1 per spell level)
15	Pull a person out of quicksand
15+	Rear a wild animal (15+HD of animal)
15	Rig a wagon wheel to fall off
15	Send a simple message using body language
15	Swim in rough water
15	Take action with violent motion (galloping horse, rough wagon ride, tossing ship)
17	Break into a small chest
18	Bash open a good locked wooden door
18	Bash open a good stuck wooden door
19	Hear a cat stalking
20	Appraise rare and exotic item
20+	Decipher a scroll (+spell level)
20	Decipher simple message
20	Find a stashed or hidden item or treasure
20	Find secret door (+1 per dungeon level)
20	Gather information, uncommon but available, known by only a few people legends.
20	Intimidate a crowd of people to move
20	Leap across a 20-foot chasm
20	Move along the peak of a roof
20	Open a simple lock

DC	Action
20+	Decipher a scroll (20+spell level)
20	Send a complex message using body language
20	Steal a small object from a person
20	Swim in stormy water
20	Teach an animal a trick/train an animal for purpose
20+	Identify a spell effect that is in place (20+spell level)
20	Know location of nearest community or place of note
20	Recognize an obscure deity's symbol or clergy
20	Use a wand
21	Climb an upper-story wall/uneven surface
23	Break a rope/rope bonds
23	Break into a treasure chest
23	Break strong wooden door
24	Bend iron bars
25	Bash open a strong locked wooden door
25	Bash open a strong stuck wooden door
25	Climb a lower-story wall/rough surface
25	Decipher standard text
25	Hear the sound of a bow being drawn
25	Identify a potion
25	Gather information, obscure, known by few, hard to come by.
25	Open an average lock
25	"Push" an animal
25	Sense a burrowing creature beneath you
25	Train a Giant Owl as a mount
25	Use/activate magic item blindly
26	Break a chain/chain bonds
28	Bash open a locked/stuck iron door
28	Bash open a locked/stuck stone door
30	Climb a smooth wall
30	Decipher intricate, exotic or old writing
30	Hear an owl gliding in for the kill
30	Gather information, extremely obscure, known by very few, possibly forgotten by most who once knew it, possibly known only by those who don't understand the significance of the knowledge.
30	Leap across a 30-foot chasm
30	Open a good lock
35	Break a masonry wall (1ft. thick)
40	Open an amazing lock
40	Track a squad of orcs across hard ground after 24 hours of rainfall
50	Break hewn stone (3ft. thick)

Fantasy SRD Skills and their Microlite20 Equivalents

Here are the skills from the d20 SRD and their Microlite20 equivalents. In Microlite20 the four Statistics (Stats) are Strength (STR), Dexterity (DEX), Mind and Charisma (CHA). The four skills are Physical (PHY), Subterfuge (SUB), Knowledge (KNOW), and Communication (COM), so...

Fantasy SRD Skill	Microlite20
Appraise	Mind+COM
Balance	DEX+PHY
Bluff	Mind+SUB
Climb	DEX/STR+PHY
Concentration	Mind+PHY
Craft	DEX+KNOW
Decipher Script	Mind+KNOW/COM
Diplomacy	Mind+COM
Disable Device	DEX+SUB
Disguise	Mind+SUB
Escape Artist	DEX/STR+SUB/PHY depending on bonds
Forgery	Mind+SUB
Gather Information	Mind+COM
Handle Animal	Mind+COM or STR+COM if the animal is larger than you
Heal	Mind+KNOW
Hide	DEX+SUB
Intimidate	Could be STR+PHY, or Mind+SUB or STR+COM
Jump	STR+PHY (long jump) or DEX+PHY (high jump)
Knowledge	Mind+KNOW
Listen	Mind+SUB
Move Silently	DEX+SUB
Open Lock	DEX+SUB
Perform	Mind/STR/DEX+COM depending on action
Profession	Mind+COM, most of the time
Ride	DEX+COM
Search	Mind+SUB
Sense Motive	Mind+COM/SUB
Sleight of Hand	DEX+SUB
Speak Language	Mind+COM to communicate to a small degree
Spellcraft	Mind only.
Spot	Mind+SUB
Survival	STR+PHY
Swim	STR+PHY
Tumble	DEX+PHY
Use Magic Device	Mind+Level
Use Rope	DEX+PHY

Combat

As the Game Master, your creatures will operate much the same as a player's character does regarding attacking, defending, using magic, etc. You will determine what actions the creatures will take against the party of characters.

There are three additional aspects to combat covered here in the Game Master's Guide, Surprise, Line of Sight and Cover/Concealment.

Surprise

When a combat starts, if characters are not aware of their opponents and their opponents are aware of them, they are surprised.

Sometimes all the combatants on a side are aware of their opponents, sometimes none are, and sometimes only some of them are. Sometimes a few combatants on each side are aware and the other combatants on each side are unaware.

Determining awareness, for surprise, may call for listen Skill checks, spot Skill checks, or other checks.

If some but not all of the combatants are aware of their opponents, a surprise round happens before any regular rounds begin. Any combatants aware of the opponents can act in the surprise round, so they roll for initiative. In initiative order (highest to lowest), combatants who started the battle aware of their opponents each take an action during the surprise round. If no one or everyone is surprised, no surprise round occurs.

Line of Sight, Cover and Concealment

To determine if a character has line of sight, and therefore can make an attack on an opponent, imagine a line from the middle of the

character's square to the middle of the target's square. If the line is blocked by a non-movable terrain feature, such as a wall, tree, etc., then the character does not have line of sight and cannot attack that target. Line of sight may run along the edge of a square or squares or come in contact with the corner, or tip, of a square and still allow line of sight.

To determine whether a target has cover (Armor Class +4) from an attack, check line of sight for contact with any objects, characters or creatures. If line of sight runs along the edge of a square, or squares, or comes in contact with the corner, or tip, of a square than the target has cover. If the line passes through a square occupied by another creature then the target has cover. Lastly, a feature such as a table, chairs, etc., may provide cover if line of sight passes through a square with features. Use your best judgment to decide if any features would actually grant cover.

If line of sight passes though an area that obscures vision then a target has "Total Concealment". If line of sight passes through an area that hinders vision then the target has "Partial Concealment".

Note: When making a melee attack against an adjacent target, your target has cover if the line from your square to the target's square goes along a square or squares, or passes the corner, or tip, of a square. Cover in melee combat usually only happens when an attacker is using a weapon with reach, such as a long spear.

Cover and Concealment

Condition	Type	Example	Penalty
Cover	Soft	barrel	-4*
Cover	Hard	wall	-8*
Concealment	Partial	smoke	20%**
Concealment	Total	thick fog	50%**
* Penalty to attacker's attack roll.			
** Miss chance rolled by defender after successful attack.			

Adventures

Encounter Levels (EL's) as Experience

Encounter Level = Hit Dice of defeated monsters, or the given EL for the trap, situation, etc. Add +1 for each doubling of the number of foes. i.e.: 1 kobold = EL1, 2 kobolds = EL2, 4 kobolds = EL3, etc.

Add up the Encounter Levels (EL's) of every encounter the party takes part in. When the total = 10 x the character's current level, they've advanced to the next level. Reset the total to 0 after advancing.

If you have a group of monsters with varying Hit Dice then add up all the Hit Dice of the monsters in the group and then divide by the number of monsters and apply this figure to the EL formula.

Encounters

When you're putting together an adventure for your player's characters the main thing to take into consideration is the party's level. After all, you don't want a bunch of level 1 newbies running through your "Demons of Death" adventure for characters of levels 12-14.

So how do you balance an encounter for a party? It's pretty simple really. Use the EL formula above for your player's characters except replace Hit Dice (HD) with the character's levels. Four level 4 party members would be an EL 6 party. 1 character = EL 4, 2 characters = EL 5, 4 characters = EL 6. This is the Party Encounter Level or PEL.

Throughout your adventure scatter a few easy encounters, where the monster's Encounter Level (EL) is a quarter of the Party Encounter Level (PEL), a couple of equal encounters where the Party Encounter Level (PEL) is the same as the creatures Encounter Level (EL), and a big finale where the creatures Encounter Level is +3, +4, or +5 over the Party Encounter Level (PEL).

Don't stress too much over making the numbers come out perfect. Just use the Party Encounter Level (PEL), creature's Encounter Level (EL) and Challenge Rating (CR) to get as close as you can.

One last thing, what to do with a party of characters of different levels?

If you have a group of characters with varying Levels then add up all the Levels of the characters in the group and then divide by the number of characters and apply this figure to the EL formula.

Encounter Levels (EL's)

While the most common way for characters to gain EL's, of course, is through defeating enemies. Characters also gain EL's for any traps disabled by the party's Rogue. But, what other ways could characters gain EL's?

Well, how about through Skill checks? Now, characters shouldn't get EL's simply because they decided to climb every moderately challenging wall in sight. You may decide that Skill checks of a certain DC or higher will award

the character or party EL's for the Skill checks uncommon difficulty.

For example; you might decide to award one EL to the party of level 1 adventurers for every DC 17 or higher Skill check that they are successful at, such as hiding from the giant who is dragging his dinner, their horse, home to his cave.

Another approach is to set certain Skill checks in your adventure that award EL's while others do not award EL's. The Skill checks with an EL award should be something special that the characters accomplish or is relevant to the adventure and its story.

For example; your player's characters have discovered that a town local may have some information as to the whereabouts of several missing villagers. You have secretly set a DC 18 to any Skill check involving the characters getting the information out of the town local. The characters can try as many different approaches as they like, intimidation, bribery, etc. but each time they fail the DC goes up +1. If

they succeed you might award them all 1 EL or more depending on their character level.

The following table gives some ranges for Difficulty Classes by character level and general difficulty; Easy, Moderate and Hard. You can use these guidelines when trying to gauge how difficult a Skill check should be.

Difficulty Class Values by Character Level

Level	Easy	Moderate	Hard
1-3	3-5	9-11	13-15
4-6	6-8	12-14	16-18
7-9	9-11	15-17	19-21
10-12	12-14	18-20	22-24
13-15	15-17	21-23	25-27
16-18	18-20	24-26	28-30
19-21	21-23	27-29	31-33

A good award for a special Skill check should be 1 x Character Level. So a level 3 character or party, successfully completing a special Skill check would be awarded 3 EL's each.

Movement

Characters will eventually leave the comfort of their hometown and surrounding area for distant lands across the realms using various means of travel. Below are tables for movement by time and means.

Movement and Distance Tables

Personal

Movement in One Round

Speed	3	4	6	8
One Round (Tactical)*	15 ft.	20 ft.	30 ft.	40 ft.
Walk	15 ft.	20 ft.	30 ft.	40 ft.
Hustle	30 ft.	40 ft.	60 ft.	80 ft.
Run (Heavy Armor)	45 ft.	60 ft.	90 ft.	120 ft.
Run (Light or Med. Armor)	60 ft.	80 ft.	120 ft.	160 ft.

Movement in One Minute

Speed	3	4	6	8
Walk	150 ft.	200 ft.	300 ft.	400 ft.
Hustle	300 ft.	400 ft.	600 ft.	800 ft.
Run (Heavy Armor)	450 ft.	600 ft.	900 ft.	1,200 ft.
Run (Light or Med. Armor)	600 ft.	800 ft.	1,200 ft.	1,600 ft.

Movement in One Hour

Speed	3	4	6	8
Walk	1½ m.	2 m.	3 m.	4 m.
Hustle	3 m.	4 m.	6 m.	8 m.
Run	—	—	—	—

Movement in One Day

Speed	3	4	6	8
Walk	12 m.	16 m.	24 m.	32 m.
Hustle	—	—	—	—
Run	—	—	—	—

Mounts

Mounts Movement

Mounts	Per Hour	Per Day
Light Horse or Warhorse	6	48
Heavy Horse or Warhorse	5	40
Pony or Warpony	4	32
Donkey or Mule	3	24
Dog, Riding	4	32

Mount Movement with Barding

	Base Speed		
Barding	40'	50'	60'
Medium	30'	35'	40'
Heavy	30'*	35'*	40'*

*A mount wearing heavy armor moves at only triple its normal speed when running instead of quadruple.

Vehicles

Vehicle Movement

Vehicles	Per Hour	Per Day
Cart or Wagon	2	16
Raft or Barge (poled or towed)	1/2	5
Keelboat (rowed)	1	10
Rowboat (rowed)	1 1/2	15
Sailing Ship (sailed)	2	48
Warship (sailed and rowed)	2 1/2	60
Longship (sailed and rowed)	3	72
Galley (rowed and sailed)	4	96

Rafts, barges, keelboats, and rowboats are used on lakes and rivers.

If going downstream, add the speed of the current (typically 3 miles per hour) to the speed of the vehicle. In addition to 10 hours of being rowed, the vehicle can also float an additional 14 hours, if someone can guide it, so add an additional 42 miles to the daily distance traveled. These vehicles can't be rowed against any significant current, but they can be pulled upstream by draft animals on the shores.

Terrain

The terrain through which a character travels affects how much distance he or she can cover in an hour or a day (see the Terrain and Overland Movement Table). A highway is a straight, major, paved road. A road is typically a dirt track. A trail is like a road, except that it allows only single-file travel and does not benefit a party traveling with vehicles. Trackless terrain is a wild area with no paths. For terrain effects in combat see the Other Hazards section.

Terrain and Overland Movement Table

Terrain	Highway	Road or Trail	Trackless
Desert, sandy	×1	×½	×½
Flatlands	×1	×1	×¾
Forest	×1	×1	×½
Hills	×1	×¾	×½
Jungle	×1	×¾	×¼
Moor	×1	×1	×¾
Mountains	×¾	×¾	×½
Swamp	×1	×¾	×½
Tundra, frozen	×1	×¾	×¾

Traps

Whether inside a dungeon or a nobleman's manor house, adventurers can often be hurt, or even killed, without ever encountering a monster of any kind, as many dungeons are filled with debilitating or lethal traps set to keep wayward hands off of fantastic treasures. Several typical traps of varying *Encounter Levels* are summarized below.

The entries for traps include the following information; Trap, CR, Find, Disable, Save, Attack and Special.

Trap – Lists the trap.

CR – Lists the Challenge Rating of the trap similar to a Monsters Challenge Rating. Generally a party should face traps with a CR equal to half the Party Encounter Level (PEL) or less.

Find – Lists the DC for the KNOW+MIND check necessary to find the trap without triggering it.

Disable – Lists the DC for the SUB+DEX check necessary to disarm the trap safely.

Save – DC lists the PHY+DEX check DC needed to either avoid the trap entirely, or to take only ½ the listed damage (if this is possible).

Attack – Shows the traps attack bonus or type of effect.

Special – Lists any other information needed for the trap.

Traps EL 1

Trap	CR	Find	Disable	Save	Attack	Special
Basic Arrow Trap	1	20	20	-	arrow +10 (1d6)	-
Camouflaged Pit Trap	1	24	20	20	-	10 ft deep (1d6)
Deeper Pit Trap	1	20	23	15	-	2 squares, 20 ft deep (2d6)
Fusillade of Darts	1	14	20	-	1d4 darts +10 (1d4+1)	-
Poison Dart Trap	1	20	18	-	dart +8 (1d4 & poison)	poison (DC 12, 0/1d4 PHY + 1d3 Mind)
Poison Needle Trap	1	22	20	-	needle +8 (1 & poison)	poison (DC 13, 1/1d2 PHY)
Portcullis Trap	1	20	20	-	portcullis +10 (3d6)	blocks passageway
Razor-Wire Across Hallway	1	22	15	-	wire +10 (2d6)	2 squares
Rolling Rock Trap	1	20	22	-	rock +10 (2d6)	2 squares
Scything Blade Trap	1	21	20	-	blade +8 (1d8)	-
Spear Trap	1	20	20	-	spear +12 (1d8)	200-ft max range

Swinging Block Trap	1	20	20	-	block +5 (4d6)	-
Wall Blade Trap	1	22	22	-	blade +10 (2d4)	-

Traps EL 2

Trap	CR	Find	Disable	Save	Attacks	Special
Box of Brown Mold	2	22	16	-	-	5-ft aura (3d6 cold nonlethal)
Bricks from Ceiling	2	20	20	-	bricks +12 (2d6)	2 squares
Burning Hands Trap	2	26	26	11	-	spell, Mage1 (1d4 fire, save 1/2)
Camouflaged Pit Trap	2	24	19	20	-	2 squares, 20 ft. deep (2d6)
Inflict Light Wounds Trap	2	26	26	-	-	spell, Clr1 (1d8+1, Mind+KNOW DC 11 1/2)
Javelin Trap	2	20	18	-	javelin +16 (1d6+4)	-
Large Net Trap	2	20	25	14	net +5 (grapple STR 18)	10x10 ft area
Pit Trap	2	20	20	20	-	40 ft deep (4d6)
Poison Needle Trap	2	22	17	-	needle +17 (1 & poison)	poison (STR+PHY DC 14 neg.), 1 point STR/unconscious)
Spiked Pit Trap	2	18	15	20	1d4 spikes +10 (1d4+2)	2 squares, 20 ft deep (2d6)
Tripping Chain	2	15	18	-	chain +15 (trip), spikes +15 (2d4+2)	+4 spikes atk if prone
Well-Camouflaged Pit Trap	2	27	20	20	-	10 ft deep (1d6)

Traps EL 3

Trap	CR	Find	Disable	Save	Attacks	Special
Burning Hands Trap	3	26	26	11	-	spell, Mage5 (5d4 fire, save 1/2)
Camouflaged Pit Trap	3	24	18	20	-	2 squares, 30 ft deep (3d6)
Ceiling Pendulum	3	15	27	-	greataxe +15 (1d12+8)	-
Fire Trap	3	27	27	13	-	spell, Mage4 (1d4+3 fire, save 1/2)
Hail of Needles	3	22	22	-	needles +20 (2d4)	-
Acid Arrow	3	27	27	-	arrow +2 touch (2d4 acid for 2 rounds)	-
Pit Trap	3	20	20	20	-	60 ft deep (6d6)
Poisoned Arrow Trap	3	19	15	-	arrow +12 (1d8 & poison)	poison (STR+PHY DC 14 neg., 1d4/1d4 STR)

Spiked Pit Trap	3	21	20	20	1d4 spikes +10 (1d4+2)	2 squares, 20 ft deep (2d6)
Stone Blocks from Ceiling	3	25	20	-	blocks +10 (4d6)	-

Traps EL 4

Trap	CR	Find	Disable	Save	Attacks	Special
Bestow Curse Trap	4	28	28	-	-	spell, Clr 5 (DC 14 Mind+KNOW neg.)
Camouflaged Pit Trap	4	25	17	20	-	2 squares, 40 ft deep (4d6)
Collapsing Column	4	20	24	-	blocks +15 (6d6)	-
Lightning Bolt Trap	4	28	28	14	-	spell, Wiz 5 (5d6 electricity, save 1/2)
Pit Trap	4	20	20	20	-	80 ft deep (8d6)
Poisoned Dart Trap	4	21	22	-	dart +15 (1d4+4 & poison)	10x10 ft area, poison (STR+PHY DC 10 neg., 1d2 DEX/1d2 DEX)
Spiked Pit Trap	4	20	20	20	1d4 spikes +10 (1d4+5)	60 ft deep (6d6)
Wall Scythe Trap	4	21	18	-	scythe +20 (2d4+8)	-
Water-Filled Room Trap	4	17	23	-	-	10x10 ft room, 5 rounds delay
Wide-Mouth Spiked Pit Trap	4	18	25	20	1d4 spikes +10 (1d4+2)	2 squares, 20 ft deep (2d6)

Traps EL 5

Trap	CR	Find	Disable	Save	Attacks	Special
Camouflaged Pit Trap	5	25	17	20	-	2 squares, 50 ft deep (5d6)
Doorknob w/Contact Poison	5	25	19	-	-	poison (STR+PHY DC 13 neg., 0/3d6 STR)
Falling Block Trap	5	20	25	-	block +15 (6d6)	2 squares
Fire Trap	5	29	29	16	-	spell, Mage 7 (1d4+7 fire, save 1/2)
Fireball Trap	5	28	28	14	-	spell, Mage 8 (8d6 fire, save 1/2)
Flooding Room Trap	5	20	25	-	-	room floods in 4 rounds
Fusillade of Darts	5	25	18	-	1d8 darts +18 (1d4+1)	10x10 ft area
Moving Executioner Statue	5	25	18	-	greataxe +16 (1d12+8)	2 targets
Pit Trap	5	20	20	20	-	100 ft deep (10d6)
Poison Wall Spikes	5	17	21	-	spike +16 (1d8+4 & poison)	2 squares, poison (STR+PHY DC 12 neg., 1d4/1d4 STR)
Spiked Pit Trap	5	21	20	25	1d4 spikes +10 (1d4+4)	2 squares, 40 ft deep (4d6)
Spiked Pit Trap (80 ft)	5	20	20	20	1d4 spikes (1d4+5)	80 ft deep (8d6)
Ungol Dust Vapor Trap	5	20	16	-	-	10x10 ft room, 2 rnd delay, poison (DC 15, 1/1d6+1 CHA)

Traps EL 6

Trap	CR	Find	Disable	Save	Attacks	Special
Built-to-Collapse Wall	6	14	16	-	blocks +20 (8d6)	10x10 ft area
Compacting Room	6	20	22	-	-	10x10 ft room, 4 rounds delay, crush (12d6)
Flame Strike Trap	6	30	30	17	-	spell, Clr9 (9d6 fire, save 1/2)
Fusillade of Spears	6	26	20	-	1d6 spears +21 (1d8)	10x10 ft area
Lightning Bolt Trap	6	28	28	14	-	spell, Mage10 (10d6 electricity, save 1/2)
Spiked Blocks from Ceiling	6	24	20	-	spikes +20 (6d6)	10x10 ft area
Spiked Pit Trap (100 ft)	6	20	20	20	1d4 spikes (1d4+5)	100 ft deep (10d6)
Whirling Poison	6	20	20	-	dagger +10 (1d4+4)	3 squares, poison (DC 24,

Blades					& poison)	1d6/2d6 STR)
Wide-Mouth Pit Trap	6	26	25	25	-	10x10 ft area, 40 ft deep (4d6)
Wyvern Arrow Trap	6	20	16	-	arrow +14 (1d8 & poison)	poison (DC 17, 2d6/2d6 STR)

Traps EL 7

Trap	CR	Find	Disable	Save	Attacks	Special
Blade Barrier Trap	7	31	31	19	-	spell, Clr11 (11d6, save 1/2)
Burnt Othur Vapor Trap	7	21	21	-	-	10x10 ft room, 3 rnd delay, poison (DC 18, 1/3d6 STR)
Chain Lightning Trap	7	31	31	19	-	spell, M11 (1st target 11d6 elec, next 11 targets 5d6 elec, save 1/2)
Black Tentacles Trap	7	29	29	-	6 tentacles +7 (1d6+4)	spell, Mage7 (1d4+7 tentacles in 2 squares)
Fusillade of Poison Darts	7	25	25	-	1d8 darts +18 (1d4+1 & poison)	10x10 ft area, poison (DC 13, 1/1d2 STR)
Lock Covered in Dragon Bile	7	27	16	-	-	poison (DC 26, 3d6/0 STR)
Water-Filled Room	7	20	25	-	-	10x10 ft room, 3 rounds delay
Well-Camouflaged Pit Trap	7	27	18	25	-	2 squares, 70 ft deep (7d6)

Traps EL 8

Trap	CR	Find	Disable	Save	Attacks	Special
Deathblade Wall Scythe	8	24	19	-	scythe +16 (2d4+8 & poison)	poison (DC 20, 1d6/2d6 STR)
Destruction Trap	8	32	32	-	-	spell, Clr13 (STR+PHY DC 20 for 10d6)
Insanity Mist Vapor Trap	8	25	20	-	-	10x10 ft room, 1 rnd delay, poison (DC 15, 1d4/2d6 Mind)
Acid Arrow Trap	8	27	27	-	2 arrows +9 touch (2d4 acid for 7 rounds)	spell, Mage 18
Power Word Stun Trap	8	32	32	-	-	spell, Mage 13
Well-Camouflaged Pit Trap	8	27	18	20	-	100 ft deep (10d6)

Traps EL 9

Trap	CR	Find	Disable	Save	Attacks	Special
Drawer Handle w/Poison	9	18	26	-	-	poison (DC 20, 3d6/3d6 STR)
Dropping Ceiling	9	20	16	-	-	10x10 ft room, 1 round delay, crush (12d6)
Incendiary Cloud Trap	9	33	33	22	-	spell, Wiz15 (4d6 for 15 rounds, save 1/2)
Wide-Mouth Pit Trap	9	25	25	25	-	10x10 ft area, 100 ft deep (10d6)
Wide-Mouth Poison Spike Pit	9	20	20	20	1d4 spikes +10 (1d4+5 & poison)	10x10 ft area, 70 ft deep (7d6)

Traps EL 10

Trap	CR	Find	Trap	Save	Attacks	Special
Crushing Room	10	22	20	-	-	10x10 ft room, 2 rounds delay, crush (16d6)
Crushing Wall Trap	10	20	25	-	-	crush (18d6)
Energy Drain Trap	10	34	34	-	touch +8 (2d4 neg levels, STR+PHY DC 23)	(as the Monster Special Ability)
Summon Trap	10	32	32	-	-	Summons Hamatula
Poison Spike Pit Trap	10	16	25	20	1d4 spikes (1d4+5 & poison)	2 squares, 50 ft deep (5d6), poison (STR+PHY DC 24 neg., 1d6/2d6 STR)

Diseases

Disease Summary Table

Disease	Type	DC	Incubation	Damage
Blinding sickness	Ingested	16	1d3 days	1d4 STR††
Cackle fever	Inhaled	16	1 day	1d6 Mind
Demon fever	Injury	18	1 day	1d6 STR†
Devil chills*	Injury	14	1d4 days	1d4 STR
Filth fever	Injury	12	1d3 days	1d3 DEX, 1d3 STR
Mindfire	Inhaled	12	1 day	1d4 Mind
Mummy rot**	Contact	20	1 day	1d6 STR
Red ache	Injury	15	1d3 days	1d6 STR
Shakes	Contact	13	1 day	1d8 DEX
Slimy doom	Contact	14	1 day	1d4 STR†
Diseases allow an initial STR+PHY save to avoid infection. If failed, an incubation period is counted.				
After that, a STR+PHY save is made each day to avoid listed damage; 2 successes in a row ends the disease.				
* Requires three successful saves in a row to end the disease.				
** Successful saves do not end disease; only magical healing can.				
† When damaged, a second failed save indicates 1 point of damage is permanent.				
†† Any time 2 points are taken, a second failed save indicates permanent blindness.				

Healing a Disease

Use of a heal Skill check, Mind+KNOW, can help a diseased character. Every time a diseased character makes a saving throw against disease effects, the healer (Cleric or Paladin) makes a Skill check, Mind+KNOW. The diseased character can use the healer's result in place of his saving throw if the heal Skill check result is higher. The diseased character must be in the healer's care and must have spent the previous 8 hours resting.

Characters recover points lost to Statistic/Skill damage at a rate of 1 per day per Statistic/Skill, and this rule applies even while a disease is in progress. That means that a character with a minor disease might be able to withstand it without accumulating any damage.

Poison

When a character takes damage from an attack with a poisoned weapon, touches an item smeared with contact poison, consumes poisoned food or drink, or is otherwise poisoned, he must make a Fortitude saving throw. If he fails, he takes the poison's initial damage (usually ability damage). Even if he succeeds, he typically faces more damage 1 minute later, which he can also avoid with a successful Fortitude saving throw.

Poisons Table

Poison	Type	DC	Damage	Secondary Damage	Price
Small centipede poison	Injury	11	1d2 DEX	1d2 DEX	90
Greenblood oil	Injury	13	1 STR	1d2 STR	100

Insanity mist	Inhaled	15	1d4 Mind	2d6 MIND	1,500

Poisons force an immediate save for initial damage, and another 1 minute later for secondary damage.
Any application or attack with a poisoned weapon has a 1-in-20 chance of poisoning the user (DEX+PHY DC15 negates).

Paralysis lasts 2d6 minutes. Unconsciousness lasts 1d3 hours.

* Indicates permanent damage (instead of temporary).

** Lasts 2d6 minutes.

Other Hazards

Extreme Heat and Cold

If a character finds them self in an environment where the temperatures are unnatural cold or hot and even being appropriately dressed still leaves the character susceptible to the elements a saving throw will need to be made once every 10 minutes (STR+PHY DC15 +1 for each previous saving throw attempted) or suffer D1d6.

Falling

A character takes D1d6 for every 10' fallen, half on a DEX+PHY saving throw where the DC is equal to the depth fallen in feet.

Spikes

Add +1 point to falling damage per 10' fallen (max +10).

Ice

If a character is moving onto or across ice they use 2 squares of movement when walking. If the character is moving faster than a walk or in

combat a (DEX+PHY DC 15) saving throw must be made or the character falls, prone.

Sand, Mud and Shallow Water

If you have a sandy, muddy or shallow water area that characters are trying to maneuver in that you feel would inhibit them then have movement cost 2 squares per move if walking. If moving faster than a normal move, a (DEX+PHY DC15) saving throw must be made or no more than a normal move is possible and no other action, like an attack, is possible.

Darkness

If torches or lanterns are mysteriously blown out, or Light spells dispelled, characters can find themselves suddenly in the dark. Any characters without darkvision and no light source are considered *Blind* (see Conditions).

Starvation

A character can go without food for 3 days, in growing discomfort. After this time, the character must make a check each day (STR+PHY DC10, +1 for each previous check) or take 1d6 points of damage.

Treasure and Magic Items

Level 1-5	D%	Coins (1d4x)	Quantity of Art, Gems, Mundane, Magic found	Art	Gems	Mundane	Magic (+1)**

Level 16-20	D%	Coins (1d10)	Quantity of Art, Gems, Mundane, Magic found	Art	Gems	Mundane	Magic (+4)**
	00-05	--	1d8	80%-100%*	80%-100%*	--	80%-100%*
	06-68	10,000gp	*Start at 80% for 16 th level and add a +5% chance to each for every level, i.e. 17th level 85%, 18th 90%, etc.				
	69-00	1,000pp	**Magic – If a Magic Item is rolled make another D% roll to see if the item has a higher magic bonus, 10% (+5). Roll individually for each Power.				

To determine the treasure and magic items found for an encounter take the character's Party Encounter Level (PEL) and locate this level in the left-hand column. Next roll d% to find if any coins are present and what type. If coins are present, multiply the number of coins by the dice type result given under "Coins."

After coins, if present, have been determined look at the number or dice type under "Quantity of Art, Gems, Mundane, Magic found." If any Art items, Gems, Mundane items or Magic items are found, this will be the quantity found and how many times you will roll on the appropriate table.

Now, to find out if there are Art items, Gems, Mundane items or Magic items present find the percentage chance to discover these items (The percentage chance will be the same for all of them). Look at the note with the * to help determine the percentage chance. Once you know the percentage chance to discover these items roll for each one. Any roll equal to or less than the percentage chance means that item type is present. Find your quantity found under the "Quantity of Art, Gems, Mundane, Magic found" and roll that many times under the appropriate table found below.

If a Magic item or items are found they will have the bonus shown in the "Magic" heading unless it is determined that the item does not use a bonus, such as potions, rings, rods, scrolls, staffs and wands. Also, read the **note associated with Magic items regarding possible higher bonus' found.

Art Objects

d%	Value	Average	Examples
01-10	1d10 × 10 gp	55 gp	Silver ewer; carved bone or ivory statuette; finely wrought small gold bracelet
11-25	3d6 × 10 gp	105 gp	Cloth of gold vestments; black velvet mask with numerous citrines; silver chalice with lapis lazuli gems
26-40	1d6 × 100 gp	350 gp	Large well-done wool tapestry; brass mug with jade inlays
41-50	1d10 × 100 gp	550 gp	Silver comb with moonstones; silver-plated steel longsword with jet jewel in hilt
51-60	2d6 × 100 gp	700 gp	Carved harp of exotic wood with ivory inlay and zircon gems; solid gold idol (10 lb.)
61-70	3d6 × 100 gp	1,050 gp	Gold dragon comb with red garnet eye; gold and topaz bottle stopper cork; ceremonial electrum dagger with a star ruby in the pommel
71-80	4d6 × 100 gp	1,400 gp	Eye patch with mock eye of sapphire and moonstone; fire opal pendant on a fine gold chain; old masterpiece painting
81-85	5d6 × 100 gp	1,750 gp	Embroidered silk and velvet mantle with numerous moonstones; sapphire pendant on gold chain
86-90	1d4 × 1,000 gp	2,500 gp	Embroidered and bejeweled glove; jeweled anklet; gold music box
91-95	1d6 × 1,000 gp	3,500 gp	Golden circlet with four aquamarines; a string of small pink pearls (necklace)
96-99	2d4 × 1,000 gp	5,000 gp	Jeweled gold crown; jeweled electrum ring
100	2d6 × 1,000 gp	7,000 gp	Gold and ruby ring; gold cup set with emeralds

Gems

d%	Value	Average	Examples
01-25	4d4 gp	10 gp	Banded, eye, or moss agate; azurite; blue quartz; hematite; lapis lazuli; malachite; obsidian; rhodochrosite; tiger eye turquoise; freshwater (irregular) pearl
26-50	2d4 × 10 gp	50 gp	Bloodstone; carnelian; chalcedony; chrysoprase; citrine; iolite, jasper; moonstone; onyx; peridot; rock crystal (clear quartz); sard; sardonyx; rose, smoky, or star rose quartz; zircon
51-70	4d4 × 10 gp	100 gp	Amber; amethyst; chrysoberyl; coral; red or brown-green garnet; jade; jet; white, golden, pink, or silver pearl; red spinel, red-brown or deep green spinel; tourmaline
71-90	2d4 × 100 gp	500 gp	Alexandrite; aquamarine; violet garnet; black pearl; deep blue spinel; golden yellow topaz
91-99	4d4 × 100 gp	1,000 gp	Emerald; white, black, or fire opal; blue sapphire; fiery yellow or rich purple corundum; blue or black star sapphire; star ruby
100	2d4 × 1,000 gp	5,000 gp	Clearest bright green emerald; blue-white, canary, pink, brown, or blue diamond; jacinth

Mundane Items

d%	Mundane Item
01-17	Alchemical item
01-12	Alchemist's fire (1d4 flasks, 20 gp each)
13-24	Acid (2d4 flasks, 10 gp each)
25-36	Smokesticks (1d4 sticks, 20 gp each)
37-48	Holy water (1d4 flasks, 25 gp each)
49-62	Antitoxin (1d4 doses, 50 gp each)
63-74	Everburning torch
75-88	Tanglefoot bags (1d4 bags, 50 gp each)
89-00	Thunderstones (1d4 stones, 30 gp each)
18-50	Armor (roll d%: 01-10 = Small, 11-100 = Medium)
01-12	Chain shirt (100 gp)
13-18	Studded leather (25 gp)
19-26	Breastplate (200 gp)
27-34	Banded mail (250 gp)
35-54	Half-plate (600 gp)
55-80	Full plate (1,500 gp)
81-90	Darkwood
<u>01-50</u>	<u>Buckler (205 gp)</u>
<u>51-00</u>	<u>Shield (257 gp) (Roll on "Shield")</u>
91-00	Shield
<u>01-17</u>	<u>Buckler (15 gp)</u>
<u>18-40</u>	<u>Light wooden shield (3 gp)</u>
<u>41-60</u>	<u>Light steel shield (9 gp)</u>
<u>61-83</u>	<u>Heavy wooden shield (7 gp)</u>
<u>84-00</u>	<u>Heavy steel shield (20 gp)</u>
51-83	Weapons
01-50	Light melee weapon (10% Silver)
51-70	One-Handed weapon (10% Silver)
71-00	Ranged weapon (10% item or ammo (quantity 20) Silver)
84-00	Tools and gear
01-03	Backpack, empty (2 gp)
04-06	Crowbar (2 gp)
07-11	Lantern (12 gp)
12-16	Lock, simple (20 gp)
17-21	Lock, average (40 gp)
22-28	Lock, good (80 gp)
29-35	Lock, superior (150 gp)
36-40	Manacles, masterwork (50 gp)
41-43	Case, Scroll (1gp)
44-46	Rope, silk (50 ft.) (10 gp)
47-53	Spyglass (1,000 gp)
54-58	Chain, 10 ft. (30gp)
59-63	Grappling hook (1gp)
64-68	Ink (8gp)
69-73	Piton (1sp)
74-77	Holy symbol, silver (25 gp)
78-81	Pole, 10 ft. (2sp)
82-88	Candle (1cp)
89-95	Caltrops (1gp)
96-00	Thieves' tools (30 gp)

Alchemical Items

Acid - You can throw a flask of acid as a splash weapon. Treat this attack as a ranged touch attack with a range increment of 10 feet. A direct hit deals 1d6 points of acid damage. Every creature within 5 feet of the point where the acid hits takes 1 point of acid damage from the splash.

Alchemist's Fire - You can throw a flask of alchemist's fire as a splash weapon. Treat this attack as a ranged touch attack with a range increment of 10 feet.

A direct hit deals 1d6 points of fire damage. Every creature within 5 feet of the point where the flask hits takes 1 point of fire damage from the splash. On the round following a direct hit, the target takes an additional 1d6 points of damage. If desired, the target can use a full-round action to attempt to extinguish the flames before taking this additional damage. Extinguishing the flames requires a DC 15 Reflex save. Rolling on the ground provides the target a +2 bonus on the save. Leaping into a lake or magically extinguishing the flames automatically smothers the fire.

Antitoxin - If you drink antitoxin, you get a +5 alchemical bonus on Fortitude saving throws against poison for 1 hour.

Everburning Torch - This otherwise normal torch has a *continual flame* spell cast upon it. An everburning torch clearly illuminates a 20-foot radius.

Holy Water - Holy water damages undead creatures and evil outsiders almost as if it were acid. A flask of holy water can be thrown as a splash weapon.

Treat this attack as a ranged touch attack with a range increment of 10 feet. A direct hit by a flask of holy water deals 2d4 points of damage to an undead creature or an evil outsider. Each such creature within 5 feet of the point where the flask hits takes 1 point of damage from the splash.

Smokestick - This alchemically treated wooden stick instantly creates thick, opaque smoke when ignited. The smoke fills a 10-foot cube. Objects within 5' have concealment, further have total concealment). The stick is consumed after 1 round, and the smoke dissipates naturally.

Tanglefoot Bag - When you throw a tanglefoot bag at a creature (as a ranged touch attack with a range increment of 10 feet), the bag comes apart and the goo bursts out, entangling the target and then becoming tough and resilient upon exposure to air. An entangled creature takes a -2 penalty on attack rolls and a -4 penalty to Dexterity and must make a DC 15 Reflex save or be glued to the floor, unable to move. Even on a successful save, it can move only at half speed. Huge or larger creatures are unaffected by a tanglefoot bag. A flying creature is not stuck to the floor, but it must make a DC 15 Reflex save or be unable to fly (assuming it uses its wings to fly) and fall to the ground. A tanglefoot bag does not function underwater.

A creature that is glued to the floor (or unable to fly) can break free by making a DC 17 Strength check or by dealing 15 points of damage to the goo with a slashing weapon. A creature trying to scrape goo off itself, or another creature assisting, does not need to make an attack roll; hitting the goo is automatic, after which the creature that hit makes a damage roll to see how much of the goo was scraped off. Once free, the creature can move (including flying) at half speed. A character capable of spellcasting who is bound by the goo must make a DC 15 Concentration check to cast a spell. The goo becomes brittle and fragile after 2d4 rounds, cracking apart and losing its effectiveness. An application of universal solvent to a stuck creature dissolves the alchemical goo immediately.

Thunderstone - You can throw this stone as a ranged attack with a range increment of 20 feet. When it strikes a hard surface (or is struck hard), it creates a deafening bang that is treated as a sonic attack. Each creature within a 10-foot-radius spread must make a DC 15 Fortitude save or be deafened for 1 hour. A deafened creature, in addition to the obvious effects, takes a -4 penalty on initiative and has a 20% chance to miscast and lose any spell with a verbal component that it tries to cast.

Since you don't need to hit a specific target, you can simply aim at a particular 5-foot square. Treat the target square as AC 5.

Magic Items

Roll to determine type of magic item found.

Roll	Item Type
1-3	Armor*
4-6	Shield*
7-9	Weapon**
10-11	Potion****
12	Ring
13	Rod
14-15	Scroll****
16	Staff
17-18	Wand****
19-20	Wondrous Item***

Roll for the items power or powers.

Roll	Power
1-2	___ of Power =+1Str
3-4	___ of Speed =+1Dex
5-6	___ of Wisdom =+1Mind
7-8	___ of Endurance =+1Phys
9-10	___ of Shadow =+1 Sub
11-12	___ of Brilliance =+1Know
13-14	___ of Tongues =+1Com
15-16	___ of Life =+1HP (per level)
17-18	___ of Armor =+1AC
19	___ of _"spell name"_ =an item with 1d10 charges of whatever spell the GM decides
20	Roll again on table, and then roll once more.

Use the following tables to determine type of armor, shield or weapon.

Armor

Roll	Armor
1-2	Padded
3-4	Leather
5-6	Studded Leather
7-8	Chain Shirt
9-10	Hide
11-12	Scale Mail
13-14	Chainmail
15-16	Breastplate
17	Splint Mail
18	Banded Mail
19	Half-Plate
20	Full Plate

Shields

Roll	Shield
1-3	Buckler
4-8	Shield, Light Wooden
9-11	Shield, Light Steel
12-16	Shield, Heavy Wooden
17-19	Shield, Heavy Steel
20	Shield, Tower

Light Weapons

Roll	Light Weapons
1-2	Axe, Throwing
3-5	Dagger
6-7	Hammer, Light
8-9	Handaxe
10-11	Mace, Light
12-13	Pick, Light
14-15	Sap
16-17	Sickle
18-20	Shortsword

One-Handed Weapons

Roll	Weapon
1	Battleaxe
2-3	Club
4	Flail
5-6	Longsword
7-8	Mace, Heavy
9-10	Morningstar
11	Pick, Heavy
12-13	Rapier
14-15	Scimitar
16-17	Shortspear
18	Sword, Bastard
19	Trident
20	Waraxe

Two-Handed Weapons

Roll	Weapon
1	Chain, Spiked
2	Falchion
3-4	Flail, Heavy
5	Flamberge
6	Glaive
7	Greataxe
8-9	Greatclub
10-11	Greatsword
12	Guisarme
13	Halberd
14	Lance
15	Longspear
16-17	Quarterstaff
18	Scythe
19-20	Spear

Ranged Weapons

Roll	Weapon
1-2	Crossbow, Hand
3-4	Crossbow, Heavy
5-6	Crossbow, Light
7-8	Dart
9-10	Javelin
11-12	Longbow
13-14	Net
15-17	Shortbow
18-20	Sling

An items power bonus increases +1 every 5 levels. e.g. Levels 0-4 +1, 5-9 +2, etc, unless the Treasure Table indicates a higher bonus.

*Armor/Shield material has a chance to be (1-10) Mithral, (11-20) Dragonhide, (21-30) Adamantine or (31-00) normal metal.

Mithril heavy armors are treated as medium, and medium armors are treated as light, but light armors are still treated as light.

Dragonhide armor and its pieces have immunity to an energy type dependant on the type of Dragon the armor was made from; (1-20) Black Dragon (acid), (21-40) Blue Dragon (electricity), (41-60) Green Dragon (acid), (61-80) Red Dragon (fire), (81-100) White Dragon (cold).

Adamantine offers damage reduction of 1/- for light armor/shields, 2/- for medium armor and 3/- for heavy armor/shields.

** Weapon will be (1-25) Light Weapon, (26-50) One-Handed Weapon, (51-75) Two-Handed Weapon, (76-100) Ranged Weapon.

Weapon material has a chance to be (1-10) Silver, (11-20) Cold Iron, (21-30) Adamantine or (31-00) normal metal. (A ranged weapon will be ammo unless no ammo is used).

*** Wondrous Item – A Wondrous Item has a permanent power but may have limited uses in an encounter/day per the GM. Value to be determined by the GM.

**** Limited charges, roll 1d10.

Treasure and Magic Item Values/Cost

Every item on the treasure and magic items tables will have a value, assigned by the table, or a base cost which can be found in the equipment section.

Additional value or costs for special properties are listed below.

For Properties; __ of Power, __ of Speed, __ of Wisdom, __ of Life, __ of Armor*

Bonus	Additional Cost/Value
+1	1,000gp
+2	4,000gp
+3	9,000gp
+4	16,000gp
+5	25,000gp

* Non-armor items with a permanent (no charges) “__ of Armor” property are double the cost/value.

For Properties; __ of Endurance, __ of Shadow

Bonus	Additional Cost/Value
+1	500gp
+2	2,000gp
+3	4,500gp
+4	8,000gp
+5	12,500gp

For Properties; __ of Brilliance, __ of Tongues

Bonus	Additional Cost/Value
+1	250gp
+2	1,000gp
+3	2,250gp
+4	4,000gp
+5	6,250gp

Silver Items

Type	Additional Cost/Value
Ammunition	2gp
Light Weapon	20gp
One-Handed Weapon	90gp
Two-Handed Weapon	180gp

Mithril

Type	Additional Cost/Value
Light Armor	1,000gp
Medium Armor	4,000gp
Heavy Armor	9,000gp
Shield	1,000gp
Other Items	500gp/lb.

Cold Iron

Type	Additional Cost/Value
Any Item	x2 its Cost
Item Magical	2,000gp

Darkwood

Type	Additional Cost/Value
Any Wooden Item	10gp/lb.

Dragonhide

Type	Additional Cost/Value
Light Armor	2,500gp
Medium Armor	5,000gp
Heavy Armor	7,500gp
Shield	2,500gp

Adamantine

Type	Additional Cost/Value
Ammunition	60gp
Light Armor	5,000gp
Medium Armor	10,000gp
Heavy Armor	15,000gp
Weapon	3,000gp
Shield	2,000gp

Spells*

Level	Cost/Value	Level	Cost/Value
0	12gp	5	1,125gp
1	25gp	6	1,650gp
2	150gp	7	2,275gp
3	375gp	8	3,000gp
4	700gp	9	3,825gp

*Items with 1d10 charges.

Appendix A

Optional Rules

Heroism

The Microlite20 rules simplify the game by declining the use of “Feats” found in the SRD, however, sometimes this can decrease the compatibility with some D20 adventures in respect to power level. To alleviate some of that disparity we have the Heroism rule.

Heroism is a bonus equal to 1x the character’s level and may be applied to three of the following once per day.

1. Melee/Missile bonus
2. Damage
3. Saving Throw
4. Skill Check
5. Spell DC

Magic

Additionally, along with Heroism, we have three ways for spell casters to improve their spells. Each modifies a spell in a given way and each doubles the casting time of the spell so modified spells only allow the caster to cast the spell and take no other action, such as a move. Also, each requires an additional expenditure of hit points added to the cost of the spell at the time it is cast.

Extending – An extended spell lasts twice as long as it normally would. An extended spell costs an additional 2 hit points.

Empowering – An empowered spell does 50% more damage than it normally would. An empowered spell costs an additional 4 hit points.

Widening – A widened spell effects an area twice as big as it normally would. A widened spell costs an additional 6 hit points.

Appendix B

Miscellaneous Costs

Food, Drink and Lodging

Good or Services	Cost
Ale, mug	4cp
Inn stay (per day)	
Good	2gp
Common	5sp
Poor	2sp
Meals (per day)	
Good	5sp
Common	3sp
Poor	1sp
Wine, common, pitcher	2sp

Trade Goods

Item	Cost
One pound of wheat	1 cp
One pound of flour, or one chicken	2 cp
One pound of iron	1 sp
One pound of tobacco or copper	5 sp
One pound of cinnamon, or one goat	1 gp
One pound of ginger or pepper, or one sheep	2 gp
One pig	3 gp
One square yard of linen	4 gp
One pound of salt or silver	5 gp
One square yard of silk, or one cow	10 gp
One pound of saffron or cloves, or one ox	15 gp
One pound of gold	50 gp
One pound of platinum	500 gp

Selling Items

In general, a character can sell something for half its listed price, including weapons, armor, gear, and magic items.

Trade goods are the exception to the half-price rule. A trade good, in this sense, is a valuable good that can be easily exchanged almost as if it were cash itself.

Spellcasting and Services

Services	Cost
Coach cab	3cp per mile
Hireling, trained	3sp per day
Hireling, untrained	1sp per day
Messenger	2cp per mile
Road or gate toll	1cp
Ship's passage	1sp per mile
Spell, 0-level	Caster level x5gp
Spell, 1 st -level	Caster level x10gp
Spell, 2 nd -level	Caster level x20gp
Spell, 3 rd -level	Caster level x30gp
Spell, 4 th -level	Caster level x40gp
Spell, 5 th -level	Caster level x50gp
Spell, 6 th -level	Caster level x60gp
Spell, 7 th -level	Caster level x70gp
Spell, 8 th -level	Caster level x80gp
Spell, 9 th -level	Caster level x90gp

Appendix C

Mass Combat

Most combat is carried out on a one-on-one basis with each set of stats, combat bonuses, armor class, hit points, etc., applying to a single character or monster. When you are dealing with large groups of characters and monsters this can be extended by adding a combat scale.

Combat scale is a multiplier that shows a unit relative to the norm. It is only applied to damage in combat between groups of different sizes. It acts as a multiplier and divisor for damage given and also any damage taken. Armor class, hit points and all other stats remain the same.

Combat Scale

Number in Group	Combat Scale (CS)
2-5	x3
6-10	x4
11-20	x5
21-40	x6
41-80	x7
81-160	x8
161-320	x9
321-640	x10

For example; a group of 20 goblins will have a CS5 per the table. The combat stats are still HD1d8+1 (5HP), AC15, Morningstar +2 D1d6, or Javelin +3 D1d4. Against anything with the same combat scale, for example a group of 15 elves, combat is resolved normally as if it was one goblin against one elf.

However, if the battle started off with groups of different CS than use the combat scale and reduce the scale as hit points are lost.

First, determine the hit points for the members of each group by taking the hit points

for a single member of the group and dividing it by the total members in the group.

For example; the 20 goblins have 5 hit points so, $5/20=.25\text{HP}$ each. One goblin therefore has .25 hit points. This number of hit points for each goblin will stay the same for the duration of the battle.

For example; if the 20 goblins above are reduced to 2 hit points than they have lost over half their group and are now CS4, ($5\text{HP}/20\text{ goblins} = .25\text{HP}$ each and taking 3HP in damage kills 12 of the goblins, ($3\text{HP damage} / .25\text{HP per goblin} = 12$). When down to just 1HP the goblins are CS3 ($4\text{HP damage} / .25\text{HP per goblin} = 16$) with only 4 goblins left alive.

To determine how much damage one given group gives or takes, multiply the damage given by the attacking groups CS and then divide this number by the defending groups CS.

For example; the elves mentioned above have reduced the goblins numbers down to 8, CS4. In the next round the elves score another hit and a 1 is rolled for damage. $1\text{ damage} \times \text{elves CS5} = 5$. Now take the elves' 5 damage / goblins CS4 = 1.25 or 1. The goblins take 1 hit point of damage which equals 4 of the goblin's group members ($1\text{HP damage} / .25\text{HP per goblin} = 4$).

If the combat scale becomes the same for both groups than resolve combat normally or until the two groups once again have different CS's.

Calculating EL's

Experience gained from taking part in a battle is equal to the HD of the opponent, +1 for each CS higher than your own.

For example; a member of the 20-strong grey company (CS5) would earn 3 EL's in a battle against 35 gnolls (2HD and CS6).

Mass Combat Examples

Orcs vs. Elves

Twenty Orcs (CS5 and 5HP) enter a forest glade where they are beset upon by 15 Elves (CS5). As their CS is the same, it's treated as a straight one-on-one combat. The Elven archers fire their longbows and hit for 3 hit points of damage. The Orcish group is down to 2 hit points with 8 Orcs left and CS4. The CS's are now different for the two groups, CS4 for the Orcs and CS5 for the Elves. Now mass combat and the combat scale come into play.

The orcs rally and snarl, preparing to flush out the elves with their barbed falchions as they charge into the bushes. Unable to locate the hidden elves the orcs scream as another volley of arrows are fired into their midst. The elves hit for 2 hit points of damage. 2HP damage x the elves CS of 5 = 10HP damage. 10HP damage / the orcs CS of 4 = 2.5 or 3HP of damage. The orcs only have .25HP each or a total group HP of 2 left and silence falls in the clearing as Orcish blood soaks into the grass.

Knights vs. Red Dragon

The 500-strong Order of the Purple Flame stands ready against the Red Dragon. They are CS10 while the Red Dragon is CS1, though formidable.

500 Knights: HD2d8+4 (14HP), AC18, Lance +7 D1d10+4, Longsword +6 D1d8+2
Red Dragon: HD13x12+39 (123), AC21, Bite +20 D2d6+7, Breath 10d10 (DEX+PHY DC24 1/2)

The Red Dragon flies high above and breathes flame across the Order's phalanx for 46 hit points of damage. The Knights dive for cover beneath their shields (DEX+PHY DC24 1/2) and they roll a 25 taking only half damage, 23HP. 23HP damage / CS of 10 = 2.3 or 2HP damage. The Knights have .03HP each (14/500=.028 or .03). 2HP damage / .03HP per Knight = 66.6 or 67 Knights who perish in the flames leaving 433 to face the beast. The Knights are still CS10.

The Knights ready their horses to charge as the Red Dragon lands to the thunder of 2000 hooves coming towards him. The Knights hit scoring 11 damage, 11 damage x CS of 10 =110 damage. The Red Dragon is a CS1 so he takes the entire 110

damage leaving 13HP and bleeding from the impact of many lances.

The Red Dragon roars and lunges in anguish, biting savagely. It hits for 17 damage. 17 damage / the Knights CS of 10 = 1.7 or 2 damage. 2 damage / the Knights .03HP each =66.6 or 67 dead Knights. There are now a total of 134 rider-less horses leaving 366 Knights who manage to maintain their CS10.

The Knights draw their longswords and surround the downed Red but their weapons do little more than scratch it as they miss.

The dragon turns to bite again and rolls a natural 20, a critical, doing 19 points of damage. 19 damage / the Knights CS of 10 =1.9 or 2 damage. 2 damage / the Knights .03HP each =66.6 or 67 Knights who perish. There are 299 Knights left who now have a CS9 due to their diminished numbers with a total of 8HP remaining.

After watching a few more of their number gobbled up the Knights attack again and their longswords bite true for 6 damage. The Knights 6 damage x their CS of 9 =54 damage. The Red Dragon is down for good, finally.

Appendix D

Random Adventure Creation

Sometimes you are overflowing with ideas for plots and places for the characters in your adventures to explore, other times, you're not.

To alleviate some of the stress of adventure or campaign creation, or in the event your player's characters head off in an unexpected direction, we have for you Random Adventure Creation tables. This will cover you in almost all circumstances, wilderness, dungeon, or other regions the characters may wander off to.

Random Dungeon Generator

The following "micro-sized" random dungeon generator can be used for those times when you don't have an adventure prepared, you just feel like winging it or want to play a solo game.

To use the random dungeon generator you will at least need to come up with a starting point for the character(s). It could be a passage, a room, or a door. If you start your random dungeon and are immediately confronted with something like a dead end, reroll the result.

d20	**Passages	Behind a Door	Chamber & Rooms	Exits	*Exit Location	Stairs	Door	d20
1	Straight 30'	Passage straight	Square 20'x 20'	None	Same wall as entrance	Ramp up 1 level	Secret DC20	1
2	Straight 50'	Passage left				Ramp down 1 level	Unlocked & Unstuck	2
3	Door	Passage right	Square 30'x 30'		Left Wall	Stairs down 1 level		Stuck DC13
4		Passage left	Rectangle 20'x 40'				4	
5	Straight 20' door on left or right	Passage left, right and straight	Rectangle 30'x 40'	1	Right Wall			5
6							Circle 20'x 20'	6
7	Straight 20' passage on left or right	Room or Chamber (Even number room, odd number chamber)	Circle 40'x 40'	2	Opposite Wall	Stairs up 1 level		7
8							Special	8
9	Trap		3	Trapdoor up		9		
10	Treasure				10			
11	"T" intersection		Monster	Trapdoor down		11		
12	"Y" intersection				12			
13	Passage goes left		4	Shaft		13		
14	Passage goes right				14			
15	Chamber		Stairs	Exit outside	Hold Portal		15	
16	Room	16						
17	Stairs	Monster		17				
18	Straight 20' stairs on left or right	Monster		18				
19	Passage Ends	Trap		19				
20	Monster	Monster	Monster	Stairs		20		

Note: Some blocks will have two features that need to be determined, such as stairs and a passage.

* Exits from chambers are passages, exits from rooms are doors.

** A passage will continue for 30' before the feature indicated on the table unless a distance is noted.

Using the Random Dungeon Generator is fairly simple. Roll a d20 and reference the necessary features block column on the table.

Say you have the party at an old ruined monastery and they have discovered a passage under some rubble leading into darkness. You would roll a d20 and reference the Passages column. If you roll something like, "passage ends," that doesn't make sense, roll again. Okay, so you roll a d20 and get a 14. A roll of 14 on the Passages column indicates a Chamber is there. You may have noticed the ** note associated with Passages. A passage will continue for 30' before the feature indicated on the table unless a distance is noted. No distance is noted for a Chamber, so the Chamber will be located after 30' of passage. On your GM's map draw a straight 30' passage with an opening at the end for your chamber.

Now you need to know how big the chamber is. Did you notice the color in the background of the "Chambers" box? This color-code tells you what column to roll on and reference next. The light red color tells you to go to the "Chamber & Rooms" column. If you roll a d20 and get a 5 you would reference the "Chamber & Rooms" column and see that the chamber is "Rectangle 20' x 30'." Now you can draw in a rectangular 20' x 30' chamber on your map. The dark violet color of the "Rectangle 20' x 30'" box tells you to go to "Exits" next to determine how many exits out of the chamber there are.

This progression continues as you roll and create your dungeon. The roll results for a d20 are listed on both sides of the table to make it easier for you to find the block associated with your roll.

If a features block color references a color not found in the header row it means three possible things; further movement is no longer possible do to results of "Passage Ends," "None," or "Exit Outside," that you are in either a chamber or room and need to proceed to either the "Passages" column or "Door" column (chamber exits are passages and room exits are doors) or you ended with a result of "Monster", "Trap" or "Treasure."

For Monster or Trap results roll on the Random Monster Tables or the Random Trap Tables for the appropriate dungeon level to find what monster or trap lies ahead and then roll again on the previous column, ignoring any duplicate results, to determine the map content. If Monster is behind a door than ignore any result of Monster in the Chamber and Rooms column. An encounter with a Monster will also have Treasure.

For Treasure use the Treasure and Magic Items section. If any treasure is unguarded it will take a DC20 + dungeon level (SUB+Mind) Skill check to find it.

The "Special" found in the features block under Chamber & Rooms allows the GM to create something unique, such as a great hall, enormous cavern, etc., and the "Hold Portal" under the "Door" column is per the 1st level Wizard spell.

If a roll is made that would cause you to have to overrun areas of your dungeon already created either modify the result to fit your map or roll again.

Chamber, Room and Passage Dressing

d20	Room	Furnishings	Terrain	Miscellaneous	Personal
1	shrine, temple, chapel	basin, pews, lectern, shrine, pulpit	alter	decanter, robes, bag, bottle, bowl, censer, religious books	anklet, cassocks, decanter, bracer, book, candle snuffer
2	meditation	candelabrum, pedestal, mat, cushion, brazier	columns	chime, bell, drum, gong, horn, incense,	talisman, bandages, basket, bottle, bowl
3	gallery, game room, trophy room, common room	curtain, mosaic, loom, carpet	statue	animal (stuffed), candle, carving, horn, drum	armband, bracelet, scarab, coffer (jewelry),
4	privy	brazier, coat rack	sinkhole, fungus, mold	dust, dripping water, odor, bucket	box (jewelry), pendant, pin, cane, case
5	vault, treasury	chest, box	pillars	skull, trophy	brooch, medallion, cup, dipper, dish

11-12	Hill Giant	2-5
13-14	Iron Golem	1
15-16	Lich	1
17-18	Roper	1
19-20	Stone Golem	1

Level 10 Random Monsters (Outdoors)

d20	Monsters	# Encountered
1-2	Cloud Giant	1
3-4	Fire Giant	1-2
5-6	Frost Worm	1
7-8	Hill Giant	2-5
9-10	Hydra (12 heads)	1
11-12	Kraken (water)	1
13-14	Naga, Guardian	1-2
15-16	Rakshasa	1-2
17-18	Roc & Hill Giant	1 & 1
19-20	Storm Giant	1

Themed Monster Tables

You can also create your own Random Monster Table that has a monster “theme” to it. For example, you could create; “The Goblin Caves!”

“The Goblin Caves!”

d20	Goblin Caves!	# Encountered
1-2	Goblins	1-4
3-4	Goblin Guards	1-2
5-6	Goblin Javelin Guards	1-2
7-8	Goblins	1-3
9-10	Goblin Mage (Mage)	1
11-12	Bugbear Mercenary	1
13-14	Goblin Queen (add 1 HD) Roll again and add to encounter.	1-2
15-16	Goblin King (add 2 HD) Roll again and add to encounter.	1-2
17-18	Goblin Shaman (Cleric) Roll again and roll	1
19-20	once more and add to encounter.	-

17-18		
19-20		

Random Wilderness Generator

Eventually your players will leave the depths of the dungeons and look to travel across the realm for new adventures. For this we have a Random Wilderness Generator to establish the lands around the character's hometown. It will fill in terrain and add the opportunity to find new towns and other dungeons whose depths are waiting to be explored.

To use the Random Wilderness Generator take the terrain that you currently have your player's characters set in and roll on the Random Wilderness Table for the new location they plan to move into. Locate the party's current terrain in the header row, roll a d20, and then locate the result in the column on the left. That's the terrain of the area they have moved into. The size of these areas is up to you but an agreeable distance is commonly 3-6 miles per square or hex on your map.

Random Wilderness Table

Terrain	Badland	Canyon	Desert	Flatland	Forest	Hills	Mtn's	Swamp	Water
Badlands	1-8	1	1	1,2	1,2	1,2	1,2	1	1
Canyon	9	2-9	2	3	3	3	3	2	2
Desert	10	10	3-10	4	4	4	4	3	3
Flatlands	11,12	11,12	11,12	5-11	5,6	5,6	5,6	4,5	4,5
Forest	13,14	13,14	13,14	12,13	7-12	7,8	7,8	6,7	6,7
Hills	15,16	15,16	15,16	14,15	13,14	9-14	9,10	8,9	8,9
Mountain	17,18	17,18	17,18	16,17	15,16	15,16	11-17	9,10	9,10
Swamp	19	19	19	18	17	17	18	11-15	11,12
Water	20	20	20	19,20	18-20	18-20	19,20	16-20	13-20

Random Terrain Examples

For some variation to the terrain rolled on the Random Wilderness Table use the following table.

Terrain	Examples
Badlands	brush, brackens, bush, crags, rough, scrub, thickets, veldt
Canyon	basin, chasm, crevasse, dale, gap, gorge, gulch, hollow, notch, ravine, rift, vale, valley
Desert	barrens, dunes, flat, sands, snowfield, waste
Flatlands	downs, fields, flats, heath, meadow, moor, plain, prairie, savanna, steppe
Forest	copse, glade, glen, grove, jungle, woods
Hills	barrow, bluff, cairn, dunes, foothills, ridges
Mountain	cliffs, glacier, mesas, pass, peak, summit, tor
Swamp	bayou, bog, fen, marsh, mire, morass, slough, quagmire
Water	bay, bend, brook, creak, delta, falls, gulf, harbor, inlet, lake, ocean, pond, rapids, river, sea, stream, tributary

When character explore a new area using the Random Wilderness Table you may also want to make a d20 roll on the following table to determine if there are any dwellings or abandoned locations there.

Dwellings and Abandoned Locations Table

d20	Dwellings or Abandoned Locations	d20	Abandoned Locations
1	Homestead - house, inn, lodging, quarters	1-14	Homestead - den, haunt, house, inn, lodging, quarters
2	Village - crossroads, hamlet, thorp	15	Village - crossroads, hamlet, thorp
3	Town	16	Town
4	City - capital, port	17	City
5	Castle – barbican, citadel, fasthold, fortress, garrison, hold, keep, manor, palace, stronghold	18	Tower - obelisk, pillar
6	Abandoned (roll on Abandoned Locations to the right)	19	Castle – barbican, citadel, fasthold, fortress, garrison, hold, keep, manor, palace, stronghold
7-20	Uninhabited	20	Monastery - abbey, temple

It's up to the Game Master to decide if an abandoned location contains any monsters or underground dungeon complex. Also, if any rolls indicate something doesn't make sense simply roll again.

Random Weather

Random weather is another way to spice up your adventure. Instead of the characters waking up to the same old day, this time they could wake up to a heat wave, a driving snowstorm or worse! Even if the weather is calm and normal a quick description of the day helps paint a picture in your player's imaginations.

Roll on the Random Weather Table and reference the text under the climate the characters are currently in. You may want to roll twice in a day to show changing weather conditions, once in the morning and once in the afternoon, it's up to you. You may also want to consider a penalty for *unfavorable conditions*, see the Player Skills section, if extreme weather is rolled.

Random Weather Table

d20	Weather	Cold Climate	Temperate Climate*	Desert
1-13	Normal Weather	Cold, calm	Normal for season**	Hot, calm
14,15	Abnormal weather	Heat wave (1-6) or cold snap (7-20)	Heat wave (1-10) or cold snap (11-20)	Hot, windy
16,17	Inclement weather	Precipitation, snow	Precipitation, normal for season	Hot, windy
18,19	Storm	Snowstorm	Thunderstorm, snowstorm	Duststorm
20	Powerful storm	Blizzard	Windstorm, blizzard, hurricane, tornado	Downpour

* Temperate includes Flatlands, forest, hills, mountains, swamp and warm waters.
 ** Winter is cold, summer is warm, spring and autumn are temperate. A swamp is slightly warmer in winter.

DUNGEONFINDER

Book of Monsters

A Book of Monsters for the *DUNGEONFINDER* role-playing game, a streamlined version of the Primary Fantasy SRD rules, for use by itself or in combination with other Primary Fantasy SRD compatible games.

Revised by Chad E. Rose

Illustrations by Gustave Dore, Dorothy Hardy,
Dunker Tell, Viktor Vasnetsov, Joseph Wright

Additional help Bronwyn Davis

Special thanks to;

Greywulf for creating Microlite20.

The authors of the Purest Essence rules.

The Microlite20 community for all their
enthusiasm and ideas.

Seth Drebitko for keeping the legacy alive.

*"The goal was to create a simpler game but
one where all the resources of the Primary
Fantasy SRD (monsters, spells, adventures and
equipment) could be used without conversion."*

- The authors of Microlite20 Purest Essence.

On October 14th 2006 Greywulf (Robin V. Stacey) replied to a thread on the ENWorld forums and placed a link to his simplified version of the World's Most Popular Role-Playing Game. Two days later he started his own thread on those very forums, "Microlite20: The Smallest Thing in Gaming." This thread spanned 82 pages and 1,217 posts over a year and four months before it was closed and restarted due to the extreme length of the thread.

You could say Microlite20 met with some success.

On March 12th 2010 it was announced that Microlite20 was sold to Seth Drebitko and...

...the adventure's just begun.

What is the DUNGEONFINDER role-playing game?

To those new to role-playing games *DUNGEONFINDER* is a fantasy game where one person, called the Game Master, creates an adventure, controlling the people and monsters in it, while the other people play heroes they create who will explore the cities and castles and ruins in the adventure.

To the people with more experience with RPG's, *DUNGEONFINDER* is the Primary Fantasy SRD streamlined into a slimmer package and then having the Microlite20 rules dropped in on top to trim things down even further. A fast-paced game that may be easily used with adventures made for the *World's Most Popular Role-Playing Game* or the *World's Second Most Popular Role-Playing Game* based on the 3.5 edition rules.

Or, just use the *DUNGEONFINDER* Player's Guide, *DUNGEONFINDER* Game Master's Guide and *DUNGEONFINDER* Book of Monsters to create your own adventures. Everything you need is there, character creation and advancement, equipment, spells, monsters, treasure and magic-items, and a random adventure creator to help you along or for solo play.

So what changes have been made to create a slimmer, trimmer, even more streamlined game? Well, the major changes are; the inclusion of only the four major classes, the elimination of feats, a streamlined skill system, a reduction to the spell lists, efficient monster listings, and a treasure and magic-item section that instead of being 100 pages long has been nicely reduced to just 5 pages!

Read on, fill your adventure with monsters and prepare for epic fantasy!

"Written rules by themselves cannot make for great adventure. The game master must envision a fantastic world and the players breathe life into it and only then will everyone be lost in epic fantasy."

Monsters

Monsters in Microlite20 don't have levels like characters do but instead have what are called Hit Dice (HD). Hit Dice are a representation of how strong a monster is because the number of Hit Dice is the same number of times a die is rolled to determine the monster's Hit Points (HP).

The monsters in the tables below are grouped together by their Hit Dice, i.e. 1 Hit Die monsters are found in the Hit Die 1 table, 2 Hit Die in the Hit Die 2 table, etc.

Reading the Monster Entries

Each monster description is organized in the same general format, as outlined below.

Name, Size and Type – This is the name by which the creature is generally known. The descriptive text may provide other names. This line also describes the creature's size. A creature's size also determines how much space it occupies in a fight and how far it can reach to make a melee attack. A medium or smaller monster occupies a 5 ft. area and can attack anything within 5 ft., a large monster occupies a 10 ft. area and can attack anything up to 10 ft. away, Huge 15' area, and 15' attack, Gargantuan a 20 ft. area, and 20 ft. attack, and Colossal occupying a 30 ft. area and attacking up to 30 ft. away. Type determines how magic affects a creature.

Hit Dice – This line gives the creature's number and type of Hit Dice (the die rolled to generate hit points), and lists any bonus hit points. A parenthetical note gives the average hit points for a creature of the indicated number of Hit Dice. A creature's Hit Dice total is also treated as its level for determining how spells affect the creature and its maximum ranks in a skill.

Speed – This line gives the creature's tactical speed on land (the amount of distance it can cover in one move action). If the creature has other modes of movement, these are given after (or in place of) the land speed.

Armor Class – The Armor Class line gives the creature's AC for normal combat and includes a parenthetical mention of the modifiers contributing to it (usually size, Dexterity, and natural armor).

Attack/Damage – This line shows the single attack the creature makes with an attack action. The attack line provides the weapon used (natural or manufactured), attack bonus, and form of attack (melee or ranged). The attack

bonus given includes modifications for size and Strength (for melee attacks) or Dexterity (for ranged attacks). If the creature uses natural attacks, the natural weapon given here is the creature's primary natural weapon. If the creature has several different weapons at its disposal, the alternatives are shown, with each different attack separated by the word "or". The damage that each attack deals is noted parenthetically. Damage from an attack is always at least 1 point, even if a subtraction from a die roll reduces the result to 0 or lower.

Special Attacks and Special Qualities – Many creatures have unusual abilities. A monster entry breaks these abilities into special attacks and special qualities. The latter category includes defenses, vulnerabilities, and other special abilities that are not modes of attack. When a special ability allows a saving throw, the kind of save and the save DC is noted in the descriptive text.

Explanations of abilities not given here will be found in the, "Monsters Special Abilities," section found after the monster listings.

Abilities – This line lists the creature's ability scores, in the customary order: STR, DEX, and Mind.

Skills – This line gives the creatures Skill ranks.

Challenge Rating – This shows the average level of a party of four adventurers for which one creature would make an encounter of moderate difficulty.

Additional Notes

Monster Skills

All creatures have a bonus to all skills (*Physical, Subterfuge, Knowledge and Communication*) equal to their number of Hit Dice. If the creature is intelligent, add +3 to one skill. Add stat bonuses to suit and as logic dictates. This is intentionally kept open – if you

need a sneaky bugbear, assign the +3 bonus to Subterfuge; if a warrior, give +3 to Physical; for a spell-caster assign the +3 to Knowledge or Communication and give levels of Mage or Cleric (see below).

Monster Advancement

To make a tougher monster, add more Hit Dice; each additional HD adds one to their skill and combat bonuses. For each doubling of the Hit Dice, increase the dice size for attacks (e.g. d4->d6, d6->d8, etc).

Alternatively, add class levels to intelligent monsters. Start with the base Hit Dice and add levels of Fighter, Rogue, Mage or Cleric as required.

Create Your Own

Assign Hit Dice (d8 for most things, d12 for Dragons and Undead). Attack bonus and skill level = number of Hit Dice. If it's an intelligent critter, +3 bonus to one skill. Add stat bonuses to suit.

Monsters Hit Die 1

DARKMANTLE - Small Magical Beast

Hit Dice: 1d10+1 (6HP)

Speed: 4/6 (fly)

AC: 17 (+1 size, +6 natural)

Attack/Damage:

Slam +5 (1d4+4 & grab)

Special Attacks:

Grab – If slam attack hits may grapple and constrict

Constrict – 1d4+4

Darkness – 1x/day as spell caster level 5th

Special Qualities:

Blindsight 90 ft.

Abilities:

STR16(+3), DEX10, MIND 10

Skills: all @ 1

CR: 1

A Darkmantle is about 4' long and resembles an aerial squid with webbing between its tentacles that allow it to fly.

DIRE RAT - Small Animal

Hit Dice: 1d8+1 (5HP)

Speed: 8/4 (climb)

AC: 15 (+1 size, +3DEX, +1 natural)

Attack/Damage:

Bite +4 (1d4 & disease)

Disease – Filth Fever incubation 1d3 days 1d3 DEX/1d3 STR (Fort. DC11 neg.)

Special Attacks:

Disease – Filth Fever incubation 1d3 days 1d3 DEX/1d3 STR (Fort. DC11 neg.)

Special Qualities:

Low-light vision, scent

Abilities:

STR10, DEX17(+3), MIND 12 (+1)

Skills: all @ 1

CR: 1/3

This rat is the size of a small dog, about 4 feet long and 50 pounds, with a coat of coarse fur, a long a scabby tail and two glowing red eyes.

DROW - Medium Humanoid

Hit Dice: 1d8 (4HP)

Speed: 6

AC: 16 (+1DEX, +4 chain shirt, +1 light shield)

Attack/Damage:

Rapier +3 (1d6+1) or

Hand Crossbow +2 (1d4 & posion)

Poison – unconscious/ unconscious 2d4 hr. (Fort. DC13 neg.)

Special Attacks:

Spell-like Abilities – dancing lights/ darkness

Special Qualities:

Darkvision 120 ft., spell resistance 12, light blindness – such as sunlight or daylight spell causes blindness 1 round then dazzled

Abilities:

STR13(+1), DEX13 (+1), MIND 12 (+1)

Skills: all @ 1

CR: 1

White is the most common hair color among Drow, but almost any pale shade is possible. Drow tend to be smaller and thinner than other sorts of elves, and their eyes are often a vivid red.

DUERGER - Medium Humanoid

Hit Dice: 1d8+5 (9)

Speed: 4

AC: 17 (+5 chainmail, +2 heavy shield)

Attack/Damage:

Warhammer +2 (1d8+1) or

Light Crossbow +1 (1d8)

Special Attacks:

Spell-like Abilities – 1x/day enlarge person/ invisibility

Special Qualities:

Darkvision 120 ft., immunity paralysis/ phantoms/ poison, light sensitivity – dazzled in sunlight/ daylight spell

Abilities:

STR13(+1), DEX11, MIND 10

Skills: all @ 1

CR: 1

Sometimes called gray dwarves, these evil beings dwell in the underground. Most Duerger are bald (even the females), and they dress in drab clothing that is designed to blend into stone. In their lairs they may wear jewelry, but it is always kept dull. They war with other dwarves, even allying with other underground creatures from time to time.

DWARF – Medium Humanoid

Hit Dice: 1d8+2

Speed: 4

AC: 16 (+4 scale mail, +2 heavy shield)

Attack/Damage:

Dwarven waraxe +3 (1d10+1) or

Shortbow +1 (1d6)

Special Qualities:

Darkvision 60 ft.

Abilities:

STR13(+1), DEX11, MIND 10

Skills: all @ 1

CR: ½

Short and stocky men and woman from under the mountains with ruddy skin, dark hair and dark eyes.

ELF – Medium Humanoid

Hit Dice: 1d8 (4)

Speed: 6

AC: 15 (+1 DEX, +3 studded leather, +1 light shield)

Attack/Damage:

Longsword +2 (1d8+1) or
Longbow +3 (1d8)

Special Qualities:

Immunity sleep spells, low-light vision

Abilities:

STR13(+1), DEX13(+1), MIND 10

Skills: all @ 1

CR: ½

Elves average 5 feet tall and typically weigh just over 100 pounds. Elves prefer colorful clothes, usually with a green-and-gray cloak that blends well with the colors of the forest.

GNOME – Small Humanoid

Hit Dice: 1d8+2 (6)

Speed: 4

AC: 15 (+1 size, +4 chain shirt, +1 light shield)

Attack/Damage:

Longsword +2 (1d6) or

Light Crossbow +3 (1d6)

Special Qualities:

Low-light vision

Abilities:

STR11, DEX11, MIND10

Skills: all @ 1

CR: 1/2

Gnomes stand 3 to 3½ feet tall and weigh 40 to 45 pounds. Their skin color ranges from dark tan to woody brown, their hair is fair, and their eyes can be any shade of blue. Gnome males prefer short, carefully trimmed beards. Gnomes generally wear leather or earth tones, though they decorate their clothes with intricate stitching or fine jewelry.

GOBLIN – Small Humanoid

Hit Dice: 1d8+1 (5HP)

Speed: 6

AC: 15 (+1 size, +1 DEX, +2 leather armor, +1 light shield)

Attack/Damage:

Morningstar +2 (1d6) or

Javelin +3 (1d4)

Special Qualities:

Darkvision 60 ft.

Abilities:

STR11, DEX13(+1), MIND10

Skills: all @ 1

CR: 1/3

A goblin stands 3 to 3½ feet tall and weighs 40 to 45 pounds. Its eyes are usually dull and glazed, varying in color from red to yellow. A goblin's skin color ranges from yellow through any shade of orange to a deep red. Goblins wear clothing of dark leather, tending toward drab, soiled-looking colors.

HALFLING – Small Humanoid**Hit Dice:** 1d8+1 (5)**Speed:** 4**AC:** 15 (+1 size, +1 DEX, +3 studded leather, +1 light shield)**Attack/Damage:**Longsword +3 (1d6) or
Light Crossbow +3 (1d6)**Abilities:**

STR11, DEX13(+1), MIND10

Skills: all @ 1**CR:** ½*Halflings stand about 3 feet tall and usually weigh between 30 and 35 pounds. They have brown or black eyes. Halfling men often have long sideburns, but beards are rare among them and mustaches almost unseen.***HOBGOBLIN – Medium Humanoid****Hit Dice:** 1d8+2 (6HP)**Speed:** 6**AC:** 15 (+1 DEX, +3 studded leather, +1 light shield)**Attack/Damage:**Longsword +2 (1d8+1) or
Javelin +3 (1d6+1)**Special Qualities:**

Darkvision 60 ft.

Abilities:

STR13(+1), DEX13(+1), MIND10

Skills: all @ 1**CR:** ½*Hobgoblins are larger cousins of goblins. Hobgoblins' hair color ranges from dark reddish-brown to dark gray. They have dark orange or red-orange skin. Large males have blue or red noses. Hobgoblins' eyes are yellowish or dark brown, while their teeth are yellow. Their garments tend to be brightly colored, often blood red with black-tinted leather. Their weaponry is kept polished and in good repair.***KOBOLD – Small Humanoid****Hit Dice:** 1d8 (4HP)**Speed:** 6**AC:** 15 (+1 size, +1 DEX, +1 nat., +2 leather)**Attack/Damage:**

Spear +1 1d6-1)

Special Qualities:

Darkvision 60 ft., light sensitivity

Abilities:

STR9(+0), DEX13(+1), MIND10(+0)

Skills: all @ 1**CR:** ¼*Kobolds are short, reptilian humanoids with cowardly and sadistic tendencies. A kobold's scaly skin ranges from dark rusty brown to a rusty black color. It has glowing red eyes. Its tail is non-prehensile. Kobolds wear ragged clothing, favoring red and orange. A kobold is 2 to 2½ feet tall and weighs 35 to 45 pounds.***MERFOLK – Medium Humanoid****Hit Dice:** 1d8+2 (6)**Speed:** 1/10 (swim)**AC:** 15 (+1 DEX, +2 leather armor)**Attack/Damage:**Trident +2 (1d8+1) or
Heavy Crossbow +2 (1d10)**Special Qualities:**

Amphibious, low-light vision

Abilities:

STR13(+1), DEX13(+1), MIND10

Skills: all @ 1**CR:** ½*Slipping in and out of the crashing waves, this beautiful creature has the lower torso of a long, slender fish. A Merfolk is about 8 feet long from the top of the head to the end of the tail, and weighs about 400 pounds.***ORC – Medium Humanoid****Hit Dice:** 1d8+1 (5HP)**Speed:** 6**AC:** 13 (+3 studded leather)**Attack/Damage:**Falchion +4 (2d4+4) or
Javelin +1 (1d6+3)**Special Qualities:**Darkvision 60 ft., light sensitivity –
dazzled in daylight or by daylight spell**Abilities:**

STR17(+3), DEX11(+0), MIND8(-1)

Skills: all @ 1**CR:** ½*An Orc's hair usually is black. It has lupine ears, reddish eyes, a high forehead, and a prominent jaw with jutting teeth. Orcs prefer wearing vivid colors that many humans would consider unpleasant, such as blood red, mustard yellow, yellow-green, and deep purple. Their equipment is dirty and unkempt. An adult male Orc is a little over 6 feet tall and weighs about 210 pounds.***PIXIE - Small Fey****Hit Dice:** 1d6 (3HP)**Speed:** 4/12 (fly)**AC:** 16 (+1 size, +4 DEX, +1 nat.)**Attack/Damage:**Short sword +5 (1d4-2) or
Longbow +5 (1d6-2)**Special Attacks:**Spell-like Abilities – dancing lights/
dispel magic/ entangle (CL1)
Special arrows – memory loss arrow
(Will DC15 neg,) sleep arrow as Sleep
spell (Fort. DC15 neg.)**Special Qualities:**Damage reduction 10/cold iron, greater
invisibility as spell, low-light vision, spell
resistance 15**Abilities:**

STR7(-1), DEX18(+4), MIND 16(+3)

Skills: all @ 1**CR:** 4*A Pixie stands about 2½ feet tall and weighs about 30 pounds, with long, pointy ears and small wings. Pixies wear bright clothing, often including a cap and shoes with curled and pointed toes.***SKELETON – Medium Undead****Hit Dice:** 1d12 (6HP)**Speed:** 6**AC:** 15 (+1 DEX, +2 nat., +2 heavy steel shield)**Attack/Damage:**Scimitar +1 (1d6+1) or
2 Claws +1 (1d4+1)**Special Qualities:**Damage Reduction 5/bludgeoning,
darkvision 60 ft., immunity cold, undead
traits**Abilities:**

STR13(+1), DEX13(+1), MIND10

Skills: all @ 1**CR:** 1/3*Literally a creature of sinew and bone clad in various bits and pieces of armor and clothing with a dull glow in its empty eye sockets.***STIRGE – Tiny Magical Beast****Hit Dice:** 1d10 (5HP)**Speed:** 2/8 (fly)**AC:** 16 (+2 size, +4 DEX)**Attack/Damage:**

Touch +7 (attach)

Special Attacks:Attach – grapple and blood drain
Blood Drain - 1d4 STR (max 4)**Special Qualities:**

Darkvision 60 ft.

Abilities:

STR3(-4), DEX19(+4), MIND12(+1)

Skills: all @ 1**CR:** ½*A Stirge's hairy body is about 1 foot long, with a wingspan of about 2 feet and it weighs about 1 pound. It has eight clawed legs and a long stinger protruding from the front of its head.*

TIEFLING – Medium Outsider**Hit Dice:** 1d8+1 (5)**Speed:** 6**AC:** 15 (+1 DEX, +3 studded leather, +1 light shield)**Attack/Damage:**Rapier +3 (1d6+1) or
Light Crossbow +2 (1d8)**Special Attacks:**

Darkness – as spell 1x/day

Special Qualities:Darkvision 60 ft., resistance cold/
electricity/ fire 5**Abilities:**

STR13(+1), DEX13(+1), MIND12(+1)

Skills: all @ 1**CR:** ½

Planetouched is a general word to describe someone who can trace his or her bloodline back to an outsider, usually a fiend or celestial. This lanky man sneers as he draws his sword. Tiny horns and a barbed tail reveal that he is something more than human. The effects of having a supernatural being in one's heritage last for many generations.

Monsters Hit Die 2

GHOUL – Medium Undead**Hit Dice:** 2d10 (13HP)**Speed:** 6**AC:** 14 (+2 DEX, +2 nat.)**Attack/Damage:**Bite +2 (1d6+1 & paralysis & disease)
and
2 Claws +0 (1d3 & paralysis)**Special Attacks:**Paralysis – paralyzed 1d4 rnds (Fort.
DC12 neg.)
Disease – Ghoul Fever – incubation 1
day 1d3STR/ 1d3 DEX (Fort. DC12 neg.)
becomes Ghoul**Special Qualities:**Darkvision 60 ft., undead traits, +2 turn
resistance**Abilities:**

STR13(+1), DEX15 (+2), MIND 14 (+2)

Skills: all @ 2**CR:** 1

Drawn and rotting skin is pulled tight over this dead creatures bones while an eerie glow emanates from its eyes.

GNOLL – Medium Humanoid**Hit Dice:** 2d8+2 (11)**Speed:** 6**AC:** 14 (+1 natural, +2 leather armor, +2
heavy steel shield)**Attack/Damage:**Battleaxe +3 (1d8+2) or
Shortbow +1 (1d6)**Special Qualities:**

Darkvision 60 ft.

Abilities:

STR15(+2), DEX10, MIND 11

Skills: all @ 2**CR:** 1

Gnolls are tall, hyena-headed, evil humanoids with dirty yellow or reddish-brown fur that wander in loose tribes. A Gnoll is about 7½ feet tall and weighs 300 pounds.

GRICK – Medium Aberration**Hit Dice:** 2d8 (9)**Speed:** 6/4 (climb)**AC:** 16 (+2DEX, +4 natural)**Attack/Damage:**4 Tentacles +3 (1d4+2) and
Bite (1d3+1)**Special Qualities:**Damage reduction 10/ magic, darkvision
60 ft., scent**Abilities:**

STR14(+2), DEX14 (+2), MIND 14 (+2)

Skills: all @ 2**CR:** 3

An adult Grick is about 8 feet long from the tips of its tentacles to the end of its body and weighs some 200 pounds. Its body coloration is uniformly dark, its mouth a sickening tangle of tentacles and hooked jaws.

GRIMLOCK – Medium Monstrous Humanoid**Hit Dice:** 2d8+2 (11)**Speed:** 6**AC:** 15 (+1DEX, +4 natural)**Attack/Damage:**

Battleaxe +4 (1d8+3)

Special Qualities:Blindsight 40 ft., Immunity gaze attacks,
visual effects, illusions, and other attack
forms that rely on sight, scent**Abilities:**

STR15(+2), DEX13 (+1), MIND 10

Skills: all @ 2**CR:** 1

A muscular humanoid stares with dark, eyeless sockets using exceptional senses of smell and hearing to notice foes nearby. Brandishing a notched, stone battleaxe it emits a low growl.

KRENSHAR – Medium Magical Beast**Hit Dice:** 2d10 (11HP)**Speed:** 8**AC:** 15 (+2DEX, +3 nat.)**Attack/Damage:**Bite +2 (1d6) and
2 Claws +0 (1d4)**Special Attacks:**

Scare – sonic, frightened Will DC13 neg.

Special Qualities:

Darkvision 60 ft., low-light vision, scent

Abilities:

STR11, DEX14 (+2), MIND 12 (+1)

Skills: all @ 2**CR:** 1

The Krenshar is a strange, catlike carnivore with extremely flexible skin on its head. A typical Krenshar measures 4 or 5 feet in length with a long, narrow head. It weighs about 175 pounds.

LIZARDFOLK – Medium Humanoid**Hit Dice:** 2d8+2 (11)**Speed:** 6**AC:** 17 (+5 natural, +2 heavy shield)**Attack/Damage:**2 Claws +2 (1d4+1) and
Bite +0 (1d4) or
Club +2 (1d6+1) and
Bite +0 (1d4) or
Javelin +1 (1d6+1)**Special Qualities:**Hold Breath – A lizardfolk can hold its
breath for a number of rounds equal to
four times its STR score before it risks
drowning.**Abilities:**

STR13(+1), DEX10, MIND 10

Skills: all @ 2**CR:** 1

Lizardfolk resemble reptilian humans standing between 6' and 7' tall with brown, grey or green scales and a 3'-4' long tail, though some tribes dock their tails for religious beliefs.

PSEUDODRAGON – Tiny Dragon**Hit Dice:** 2d12+2 (15)**Speed:** 3/12 (fly)**AC:** 18 (+2 size, +2 DEX, +4 natural)**Attack/Damage:**Sting +6 (1d3-2 & poison) and
Bite +1 (1)**Special Attacks:**Poison – sleep 1 min/ sleep 3 hr. (Fort.
DC14 neg.)**Special Qualities:**Blindsight 60 ft., darkvision 60 ft.,
immunity sleep/ paralysis, low-light
vision, spell resistance 19, telepathy -
can communicate telepathically with
creatures that speak Common or Sylvan,
provided they are within 60 feet.**Abilities:**

STR6 (-2), DEX15(+2), MIND12(+1)

Skills: all @ 2**CR:** 1

This housecat-sized miniature dragon has fine scales, sharp horns, wicked little teeth, and a tail tipped with a barbed stinger. A Pseudodragon has a body about 1 foot long, with a 2-foot tail. It weighs about 7 pounds.

SHOCKER LIZARD – Small Magical Beast**Hit Dice:** 2d10+2 (13)**Speed:** 8/4/4 (climb/swim)**AC:** 16 (+1 size, +2 DEX, +3 natural)**Attack/Damage:**

Bite +3 (1d4)

Special Attacks:

Stunning Shock - 5 ft., (2d8 nonlethal damage Reflex DC12 ½)

Lethal Shock - Whenever two or more shocker lizards are within 20 feet of each other, they can work together to create a lethal shock. This effect has a radius of 20 feet, centered on any one contributing lizard. The shock deals 2d8 points of electricity damage for each lizard contributing to it, to a maximum of 12d8. A Reflex save (DC 10 + number of lizards contributing) reduces the damage by half.

Special Qualities:

Darkvision 60 ft., immune electricity, low-light vision

Abilities:

STR10, DEX15(+2), MIND12(+1)

Skills: all @ 2**CR:** 2

A Shocker Lizard has a pale gray or blue underside, shading to a darker hue on its back. It has blue-black markings along its back and tail. A Shocker Lizard is about 1 foot tall at the shoulder and weighs about 25 pounds.

SHRIEKER – Medium Plant**Hit Dice:** 2d8+2 (11)**Speed:** 0**AC:** 8 (-5 DEX, +3 natural)**Attack/Damage:**

-

Special Attacks:

Shriek - Movement or a light source within 10 feet of a Shrieker causes the fungus to emit a piercing sound that lasts for 1d3 rounds. The sound attracts nearby creatures that are disposed to investigate it. Some creatures that live near Shriekers come to learn that the fungus's noise means there is food nearby.

Special Qualities:

Low-light vision, plant traits

Abilities:

STRO(-5), DEX0(-5), MIND0(-5)

Skills: all @ 2**CR:** 1

A shrieker is a stationary fungus that emits a loud noise to attract prey or when disturbed. Shriekers live in dark, subterranean places, often in the company of violet fungi, whose poison they are immune to. Shriekers come in of shades of purple.

TROGLODYTE – Medium Humanoid**Hit Dice:** 2d8+4 (13)**Speed:** 6**AC:** 15 (-1 DEX, +6 natural)**Attack/Damage:**

Club +1 (1d6) and
Claw -1 (1d4) or
2 Claws +1 (1d4) and
Bite -1 (1d4) or
Javelin +1 (1d6)

Special Attacks:

Stench – 30 ft. sickened 10 rnds. (Fort. DC13 neg.)

Special Qualities:

Darkvision 90 ft.

Abilities:

STR10, DEX9(-1), MIND10

Skills: all @ 2**CR:** 1

A Troglodyte stands about 5 feet tall, weighs about 150 pounds and resembles Lizardfolk but are slightly smaller and even more reptilian looking.

VIOLET FUNGUS – Medium Plant**Hit Dice:** 2d8+6 (15)**Speed:** 2**AC:** 13 (-1 DEX, +4 natural)**Attack/Damage:**

4 Tentacles +3 (1d6+2 & poison)

Special Attacks:

Poison – 1d4STR/ 1d4 STR (Fort. DC 14 neg.)

Special Qualities:

Low-light vision, plant traits

Abilities:

STR14(+2), DEX8(-1), MIND11

Skills: all @ 2**CR:** 3

A Violet Fungi's coloration ranges from purple overall to dull gray or violet covered with purple spots. A violet fungus flails about with its tentacles at living creatures that come within its reach.

WOLF - Medium Animal**Hit Dice:** 2d8+4 (13HP)**Speed:** 10**AC:** 14 (+2DEX, +2 nat.)**Attack/Damage:**

Bite +3 (1d6+1 & trip)

Special Attacks:

Trip – If bite attack hits trip +1

Special Qualities:

Low-light vision, scent

Abilities:

STR13 (+1), DEX15 (+2), MIND 12 (+1)

Skills: all @ 2**CR:** 1

This powerful canine watches its prey with piercing yellow eyes, darting its tongue across sharp white teeth.

ZOMBIE - Medium Humanoid**Hit Dice:** 2d12+3 (16HP)**Speed:** 6 (can't run)**AC:** 11 (-1 DEX, +2 nat)**Attack/Damage:**

Slam +2 (1d6+1) or
Club +2 (1d6+1)

Special Qualities:

Single actions only, DR5/slashing, darkvision 60 ft., undead traits

Abilities:

STR12(+1), DEX8(-1), MIND10

Skills: all @ 2**CR:** ½

Literally a creature of sinew and bone clad in various bits and pieces of armor and clothing with a dull glow in its empty eye sockets.

Monsters Hit Die 3

ANKHEG – Large Magical Beast**Hit Dice:** 3d10+12 (28HP)**Speed:** 6/4 (burrow)**AC:** 18 (-1 size, +9 natural)**Attack/Damage:**

Bite +7 (2d6+7 & 1d4 acid & grab)

Special Attacks:

Spit Acid – 30 ft. line, 4d4 acid, (Reflex DC14 ½)
Grab – If hits with bite attack may grapple

Special Qualities:

Darkvision 60 ft., low-light vision, tremorsense 60 ft.

Abilities:

STR21 (+5), DEX10, MIND13(+1)

Skills: all @ 3**CR:** 3

The Ankheg is a segmented burrowing monster with a taste for fresh meat. An Ankheg has six clawed legs, mandibles, and some specimens are yellow rather than brown. It is about 10 feet long and weighs about 800 pounds.

BUGBEAR – Medium Humanoid**Hit Dice:** 3d8+3 (16HP)**Speed:** 6**AC:** 17 (+1 DEX, +3 natural, +2 leather, +1 light wooden shield)**Attack/Damage:**
Morningstar +5 (1d8+2) or
Javelin +3 (1d6+2)**Special Qualities:**
Darkvision 60 ft., scent**Abilities:**
STR15 (+2), DEX12(+1), MIND10**Skills:** all @ 3**CR:** 2*Taller than a man, a Bugbear's muscular body is covered in thick coarse fur and they have long, sharp fangs and claws.***CHOKER – Small Aberration****Hit Dice:** 3d10+3 (16HP)**Speed:** 4/2 (climb)**AC:** 17 (+1 size, +2 DEX, +4 natural)**Attack/Damage:**
2 Tentacles +6 (1d3+3 & grab)**Special Attacks:**
Grab – If hits with bite attack may grapple and constrict
Cosntrict – (1d3+3)**Special Qualities:**
Darkvision 60 ft., quickness – may make additional standard or move**Abilities:**
STR16 (+3), DEX14(+2), MIND13(+1)**Skills:** all @ 3**CR:** 2*These vicious little predators lurk underground, grabbing whatever prey happens by. The size of a human child its long-limbed hands and feet have spiny pads that help the choker grip almost any surface.***HIPPOGRIFF – Large Magical Beast****Hit Dice:** 3d10+9 (25)**Speed:** 10/20 (fly)**AC:** 15 (-1 size, +2 DEX, +4 natural)**Attack/Damage:**
2 Claws +6 (1d4+4) and
Bite +1 (1d8+2)**Special Qualities:**
Darkvision 60 ft., low-light vision, scent**Abilities:**
STR18(+4), DEX15(+2), MIND13(+1)**Skills:** all @ 3**CR:** 2*Hippogriffs are aggressive flying creatures with the torso and hind end of a horse and front legs, wings and head of a giant eagle.***SEA HAG – Medium Monstrous Humanoid****Hit Dice:** 3d8+6 (19)**Speed:** 6/8 (swim)**AC:** 14 (+1 DEX, +3 natural)**Attack/Damage:**
2 Claws +7 (1d4+4)**Special Attacks:**Horrific Appearance - The sight of a sea hag is so revolting that anyone who sets eyes upon one loses 2d6 STR (Fort. DC13 neg.) Will not drop targets STR below 0.
Evil Eye – 3x/day, a sea hag can cast its dire gaze upon any single creature within 30 ft, dazed 3 days (Will DC13 neg.)**Special Qualities:**
Amphibious, spell resistance 14, darkvision 60 ft.**Abilities:**
STR19 (+4), DEX12(+1), MIND13(+1)
Skills: all @ 3
CR: 4*A Sea Hag appears as a weatherworn old woman but the bent shape belies the maliciousness within.***SHADOW - Medium Undead****Hit Dice:** 3d12 (19)**Speed:** 8 (fly)**AC:** 13 (+2 DEX, +1 deflection)**Attack/Damage:**
Incorporeal Touch +3 (1d6 STR)**Special Attacks:**Strength Damage - The touch of a shadow deals 1d6 points of Strength damage to a living foe. A creature reduced to Strength 0 by a shadow dies. This is a negative energy effect.
Create Spawn - Any humanoid reduced to Strength 0 by a shadow becomes a shadow under the control of its killer within 1d4 rounds.**Special Qualities:**
Darkvision 60 ft., incorporeal traits, +2 turn resistance, undead traits**Abilities:**
STR0(-5), DEX14(+2), MIND12(+1)**Skills:** all @ 3**CR:** 3*A gloomy patch of moving darkness in roughly the shape of a human.***THOQUUA – Medium Elemental****Hit Dice:** 3d8+3 (16HP)**Speed:** 6/4 (burrow)**AC:** 18 (+1 DEX, +7 natural)**Attack/Damage:**
Slam +4 (1d6+3 & 2d6 fire (Burn))**Special Attacks:**Heat - 2d6 fire if touching or touched by
Burn - 1d4 rnds (Reflex DC12 avoid)**Special Qualities:**

Darkvision 60 ft., elemental traits, immunity fire, tremorsense, vulnerability cold

Abilities:

STR15 (+2), DEX13(+1), MIND12(+1)

Skills: all @ 3**CR:** 2*This creature's thick, serpentine body is protected by dense, horny plates. A visible haze of heat rises from its red-hot scales.***YETH HOUND – Medium Outsider****Hit Dice:** 3d8+6 (19HP)**Speed:** 8/12 (fly)**AC:** 20 (+2 DEX, +8 natural)**Attack/Damage:**
Bite +6 (1d8+4 & trip)**Special Attacks:**
Bay - sonic, panicked 2d4 rnds. (Will DC11 neg.)
Trip - +3 to trip Skill check**Special Qualities:**
DR10/silver, Darkvision 60 ft., scent**Abilities:**
STR17 (+3), DEX15(+2), MIND14(+2)**Skills:** all @ 3**CR:** 3*A Yeth Hound stands 5 feet tall at the shoulder and weighs about 400 pounds. This emaciated, hairless canine has a strange air of menace and cruelty about it.*

Monsters Hit Dice 4

AIR ELEMENTAL – Medium Elemental**Hit Dice:** 4d8+8 (26)**Speed:** 20 (fly)**AC:** 18 (+5 DEX, +3 natural)**Attack/Damage:**
Slam +8 (1d6+1)**Special Attacks:**
Air mastery - Airborne creatures take a -1 penalty on attack and damage rolls against an air elemental.
Whirlwind – 30 ft. tall (see Monster Special Abilities)**Special Qualities:**
Darkvision 60 ft., elemental traits**Abilities:**
STR12 (+1), DEX21(+5), MIND11**Skills:** all @ 4**CR:** 3*This cloud-like creature has dark hollows reminiscent of eyes and a mouth, and a howling wind whips it into ominous shapes.*

ASSASSIN VINE - Large Plant**Hit Dice:** 4d8+12 (30HP)**Speed:** 1**AC:** 15 (-1 size, +6 natural)**Attack/Damage:**

Slam +7 (1d6+7 & grab)

Special Attacks:

Grab – If slam attack hits may grapple causing constrict damage
 Constrict – 1d6+7
 Entangle – 30 ft. (Reflex DC13 avoid), otherwise DC 20 STR or Escape Artist check to break free.

Special Qualities:

Blindsight 30 ft., camouflage DC20 Spot check to notice, immunity electricity, plant traits, resistance cold/fire 10

Abilities:

STR20 (+5), DEX10, MIND 13 (+1)

Skills: all @ 4**CR:** 3

A vine about 20' long with smaller vines branching off that end in clusters of flat leaves with five finger-like shoots.

Skills: all @ 4**CR:** 3

In its natural form, the creature looks more or less humanoid, but slender and frail, with gangly limbs and half-formed features. The flesh is pale and hairless. Its large, bulging eyes are yellow with slit pupils.

DRYAD – Medium Fey**Hit Dice:** 4d6 (14)**Speed:** 6**AC:** 17 (+4 DEX, +3 natural)**Attack/Damage:**

Dagger +6 (1d4) or
 Longbow +7 (1d8)

Special Attacks:

Spell-like abilities entangle/ suggestion

Special Qualities:

Damage reduction 5/ cold iron

Abilities:

STR10, DEX19(+4), MIND 15 (+2)

Skills: all @ 4**CR:** 3

A Dryad's delicate features are much like a female elf's, though her flesh is like bark or fine wood, and her hair is like a canopy of leaves that changes color with the seasons.

EAGLE, GIANT – Large Magical Beast**Hit Dice:** 4d10+4 (26)**Speed:** 2/16 (fly)**AC:** 15 (-1 size, +3 DEX, +3 natural)**Attack/Damage:**

2 Claws +7 (1d6+4) and
 Bite +2 (1d8+2)

Special Qualities:

Low-light vision, evasion

Abilities:

STR18 (+4), DEX17(+3), MIND14

Skills: all @ 4**CR:** 3

A typical giant eagle stands about 10 feet tall, has a wingspan of up to 20 feet, and resembles its smaller cousins in nearly every way except size. It weighs about 500 pounds.

EARTH ELEMENTAL – Medium Elemental**Hit Dice:** 4d8+12 (30)**Speed:** 4**AC:** 18 (-1 DEX, +9 natural)**Attack/Damage:**

Slam +8 (1d8+7)

Special Attacks:

Earth mastery - An earth elemental gains a +1 bonus on attack and damage rolls if both it and its foe are touching the ground. If an opponent is airborne or waterborne, the elemental takes a -4 penalty on attack and damage rolls.
 Push – An earth elemental can start a

bull rush maneuver and the combat modifiers given in Earth Mastery, above, also apply to the elemental's opposed Strength checks.

Special Qualities:

Darkvision 60 ft., earth glide, elemental traits

Abilities:

STR21 (+5), DEX8(-1), MIND11

Skills: all @ 4**CR:** 3

This hulking, roughly humanoid creature of dirt and stone explodes up from the earth, faceless save for two glowing gemstone eyes.

GARGOYLE - Medium Monstrous Humanoid**Hit Dice:** 4d8+19 (37)**Speed:** 8/12 (fly)**AC:** 16 (+2 DEX, +4 natural)**Attack/Damage:**

2 Claws +6 (1d4+2) and
 Bite +4 (1d6+1) and
 Gore +4 (1d6+1)

Special Qualities:

Damage reduction 10/magic, darkvision 60 ft., freeze - A gargoyle can hold itself so still it appears to be a statue. An observer must succeed on a DC 20 Spot check to notice the gargoyle is really alive.

Abilities:

STR15(+2), DEX14(+2), MIND 11

Skills: all @ 4**CR:** 4

Gargoyles often appear to be winged stone statues, for they can perch indefinitely without moving and use this disguise to surprise their foes.

CENTAUR - Large Monstrous Humanoid**Hit Dice:** 4d8+8 (26)**Speed:** 10**AC:** 14 (-1 size, +2 DEX, +3 nat.)**Attack/Damage:**

Longsword +7 (2d6+6) and
 2 Hooves +3 (1d6+2) or
 Longbow +5 (2d6+4)

Special Qualities:

Darkvision 60 ft.

Abilities:

STR18(+4), DEX14(+2), MIND 13 (+1)

Skills: all @ 4**CR:** 3

A Centaur has the upper body of a human and the lower body of a heavy horse.

DOPPELGANGER - Medium Monstrous Humanoid**Hit Dice:** 4d8+4 (22)**Speed:** 6**AC:** 14 (+1 DEX, +4 natural)**Attack/Damage:**

Slam +5 (1d6+1)

Special Attacks:

Detect thoughts – as spell (Will DC13 neg.)

Special Qualities:

Change shape – any small or med. humanoid, darkvision 60 ft., immunity sleep/ charm

Abilities:

STR12(+1), DEX13(+1), MIND 14 (+2)

GELATINOUS CUBE - Large Ooze**Hit Dice:** 4d10+32 (54)**Speed:** 3**AC:** 4 (-1 size, -5 DEX)**Attack/Damage:**

Slam +2 (1d6 & 1d6 acid)

Special Attacks:

Acid – does not harm metal or stone.

Engulf - Although it moves slowly, a Gelatinous Cube can simply mow down large or smaller creatures as a standard action. It cannot make a slam attack during a round in which it engulfs. The gelatinous cube merely has to move over the opponents, affecting as many as it can cover. Opponents must succeed on a DC 13 Reflex save or be engulfed; on a success, they are pushed back or aside (opponent's choice) as the cube moves forward. Engulfed creatures are subject to the cube's paralysis and acid, and are considered to be grappled and trapped within its body.

Paralysis - A Gelatinous Cube secretes an anesthetizing slime. A target hit by a cube's melee or engulf attack must succeed on a DC 20 Fortitude save or be paralyzed for 3d6 rounds. The cube can automatically engulf a paralyzed opponent.

Special Qualities:

Blindsight 60 ft., immunity electricity, Ooze traits, transparent - Gelatinous cubes are hard to see, even under ideal conditions, and it takes a DC 15 Spot check to notice one. Creatures who fail to notice a cube and walk into it are automatically engulfed.

Abilities:

STR10, DEX1 (-5), MIND1(-5)

Skills: all @ 4**CR:** 3

The nearly transparent gelatinous cube travels slowly along dungeon corridors and cave floors, absorbing carrion, creatures, and trash. Inorganic material remains trapped and visible inside the cube's body. A typical gelatinous cube is 10 feet on a side and weighs about 15,000 pounds, though much larger specimens are not unknown.

GHAST - Medium Undead**Hit Dice:** 4d12+3 (29)**Speed:** 6**AC:** 17 (+3 DEX, +4 nat.)**Attack/Damage:**

Bite +2 (1d8+3 & paralysis & disease) and
2 Claws +3 (1d4+1 & paralysis)

Special Attacks:

Paralysis – paralyzed 1d4 rnds. (Fort. DC15 neg.)

Disease – Ghoul Fever – incubation 1 day 1d3STR/ 1d3 DEX (Fort. DC15 neg.)

becomes Ghoul

Stench – 10 ft. 1d6+4 min. (Fort. DC15 neg.)

Special Qualities:

Darkvision 60 ft., undead traits, +2 turn resistance

Abilities:

STR17(+3), DEX17 (+3), MIND 14 (+2)

Skills: all @ 4**CR:** 3

Eyes glow from deep within this creatures withered body as a sharp stench and toothy grin greets you.

GIBBERING MOUTHER - Medium Aberration**Hit Dice:** 4d8+24 (42)**Speed:** 2/4 (swim)**AC:** 17 (+1 DEX, +8 natural)**Attack/Damage:**

6 Bites +4 (1 & Grab) and
Spittle +4 30 ft. touch attack(1d4 acid & blindness(spittle))

Special Attacks:

Grab – if bite attack hits may Grapple
Spittle – blinded 1d4 rnds (Fort. DC18 neg.)

Gibbering – sonic 60 ft. confusion 1d2 rnds (Will DC13 neg.)

Swallow Whole - can attempt to swallow a grappled opponent of Medium or smaller size by making a successful grapple check.

Blood Drain - A swallowed opponent automatically takes 1d4 points of Strength damage each round.

Ground Manipulation - can cause stone and earth in all adjacent squares to become a morass akin to quicksand. Softening earth, sand, or the like takes 1 round, while stone takes 2 rounds. Anyone other than the moulder in that area must take a move-equivalent action to avoid becoming mired (treat as being pinned).

Special Qualities:

Amorphous, damage reduction 5/ bludgeoning, darkvision 60 ft.

Abilities:

STR10, DEX13 (+1), MIND 13 (+1)

Skills: all @ 4**CR:** 5

A Gibbering Moulder is a horrible creature seemingly drawn from a lunatic's nightmares with eyes and toothy mouths opening and closing all over the creature's doughy body.

OGRE - Large Giant**Hit Dice:** 4d8+11 (29)**Speed:** 6**AC:** 17 (-1 size, -1 DEX, +5 natural, +3 hide armor)**Attack/Damage:**

Greatclub +8 (2d8+7) or
Javelin +1 (1d8+5)

Special Qualities:

Darkvision 60 ft., low-light vision

Abilities:

STR21(+5), DEX8 (-1), MIND10

Skills: all @ 4**CR:** 3

Adult ogres stand 9 to 10 feet tall and weigh 600 to 650 pounds. Their skin color ranges from dull yellow to dull brown. Their clothing consists of poorly cured furs and hides, which add to their naturally repellent odor.

OWL, GIANT - Large Magical Beast**Hit Dice:** 4d10+4 (26)**Speed:** 2/14 (fly)**AC:** 15 (-1 size, +3 DEX, +3 natural)**Attack/Damage:**

2 Claws +7 (1d6+4) and
Bite +2 (1d8+2)

Special Qualities:

Low-light vision

Abilities:

STR18(+4), DEX17 (+3), MIND14(+2)

Skills: all @ 4**CR:** 3

Nocturnal birds of prey, feared for their ability to hunt and attack in near silence. They are intelligent, and though naturally suspicious, sometimes associate with good creatures. A typical giant owl stands about 9 feet tall, has a wingspan of up to 20 feet, and resembles its smaller cousins in nearly every way except size.

PEGASUS - Large magical Beast**Hit Dice:** 4d10+12 (34)**Speed:** 12/22 (fly)**AC:** 16 (-1 size, +2 DEX, +3 natural)**Attack/Damage:**

2 Hooves +7 (1d6+4) and
Bite +2 (1d3+2)

Special Qualities:

Darkvision 60 ft., low-light vision, scent

Abilities:

STR18(+4), DEX15(+2), MIND 13(+1)

Skills: all @ 4**CR:** 3

A magnificent winged horse highly prized as an aerial steed, Pegasi are wild and shy creatures not easily tamed. A typical Pegasus stands 6 feet high at the shoulder, weighs 1,500 pounds, and has a wingspan of 20 feet. Pegasi cannot speak, but they understand Common.

HELLHOUND - Medium Outsider
Hit Dice: 4d8+4 (22)
Speed: 8
AC: 16 (+1 DEX, +5 natural)
Attack/Damage: Bite +5 (1d8+1 & 1d6 fire)
Special Attacks: Breath Weapon – fire 10 ft. cone 1x/2d4 rnds. (2d6 fire) (Reflex DC13 ½)
Special Qualities: Darkvision 60 ft., immunity fire, scent, vulnerability cold
Abilities: STR13(+1), DEX13(+1), MIND 10
Skills: all @ 4
CR: 3
<i>A typical hell hound stands 4½ feet high at the shoulder and weighs 120 pounds with reddish fur and black markings and features, white claws, and burning, fiery red eyes.</i>

SHADOW MASTIFF – Medium Outsider
Hit Dice: 4d8+12 (30)
Speed: 10
AC: 14 (+1 DEX, +3 natural)
Attack/Damage: Bite +7 (1d6+4)
Special Attacks: Bay - When a shadow mastiff howls or barks, all creatures within a 300-foot spread must succeed on a DC 13 Will save or become panicked for 2d4 rounds. This is a sonic mind-affecting fear effect. Trip – can attempt trip +3 with successful bite attack
Special Qualities: Darkvision 60 ft., shadow blend - In any condition of illumination other than full daylight, a shadow mastiff can disappear into the shadows, giving total concealment. Artificial illumination, such as a light spell, does not negate this ability. A <i>daylight</i> spell, however, will, scent
Abilities: STR17(+3), DEX13(+1), MIND12(+1)
Skills: all @ 4
CR: 5
<i>This creature has the body of a large dog, with a smooth black coat and a mouth full of sharp teeth. A shadow mastiff is slightly more than 2 feet high at the shoulder and weighs about 200 pounds.</i>

SPIDER, LARGE – Large Spider
Hit Dice: 4d8+4 (22)
Speed: 6/4 (climb)
AC: 14 (-1 size, +3 DEX, +2 natural)
Attack/Damage: Bite +4 (1d8+3 & poison)
Special Attacks: Poison – 1d6STR/ 1d6STR (Fort. DC13 neg.) Web - This is similar to an attack with a

net but has a maximum range of 50 feet, with a range increment of 10 feet. An entangled creature can escape with a successful Escape Artist (DC13) check or burst it with a Strength check (DC17). The web has 12 hit points.
Special Qualities: Darkvision 60 ft., tremorsense 60 ft., vermin traits
Abilities: STR15(+2), DEX17(+3), MIND10
Skills: all @ 4
CR: 2
<i>All monstrous spiders are aggressive predators that use their poisonous bites to subdue or kill prey. Monstrous spiders come in two general types: hunters and web-spinners. Hunters rove about, while web-spinners usually attempt to trap prey. Hunting spiders can spin webs to use as lairs, but cannot use their webs as weapons the way web-spinners can.</i>

UNICORN – Large Magical Beast
Hit Dice: 4d10+20 (42)
Speed: 12
AC: 18 (-1 size, +3 DEX, +6 natural)
Attack/Damage: Horn +11 (1d8+8) and 2 Hooves +3 (1d4+2)
Special Qualities: Darkvision 60 ft., spell-like abilities – cure light wounds/ neutralize poison/ teleport, immunity poison/ charm, low-light vision, scent
Abilities: STR20 (+5), DEX17(+3), MIND21(+5)
Skills: all @ 4
CR: 3
<i>This magnificent beast looks like a white horse, 8 feet in length, stands 5 feet high at the shoulder, and weighs 1,200 pounds, but with a single long ivory horn on its forehead.</i>

VAMPIRE SPAWN – Medium Undead
Hit Dice: 4d12+3 (29)
Speed: 6
AC: 15 (+2 DEX, +3 natural)
Attack/Damage: Slam +5 (1d6+4 & energy drain)
Special Attacks: Energy Drain – one negative level and vampire gains 5hp (Fort. DC14 neg.) Domination - A vampire spawn can crush an opponent's will just by looking onto his or her eyes 30 ft. (Will DC14 neg.) or fall instantly under the vampire's influence. This is similar to a gaze attack, except that the vampire must take a standard action, and those merely looking at it are not affected. Blood Drain - A vampire spawn can suck blood from a living victim with its fangs by making a successful grapple check. If it pins the foe, it drains blood, dealing 1d4 points of STR drain each round. On each such successful drain attack, the vampire spawn gains 5 temporary hit

pints.
Special Qualities: +2 Turn Resistance, damage reduction 5/ silver, darkvision 60 ft., fast healing 2, gaseous form, resistance cold/ electricity 10, spider climb – as the spell Wiz2, undead traits
Abilities: STR16 (+3), DEX14(+2), MIND13(+1)
Skills: all @ 4
CR: 4
<i>Vampire spawn are undead creatures that come into being when vampires slay mortals. Like their creators, spawn remain bound to their coffins and to the soil of their graves. Vampire spawn appear much as they did in life, although their features are often hardened, with a predatory look.</i>

WATER ELEMENTAL – Medium Elemental
Hit Dice: 4d8+12 (30)
Speed: 4/18 (swim)
AC: 19 (+1 DEX, +8 natural)
Attack/Damage: Slam +6 (1d8+4)
Special Attacks: Water Mastery - A water elemental gains a +1 bonus on attack and damage rolls if both it and its opponent are touching water. If the opponent or the elemental is touching the ground, the elemental takes a -4 penalty on attack and damage rolls. An elemental can easily overturn small craft (5 feet of length per Hit Die of the elemental). Drench - The elemental's touch puts out torches, campfires, exposed lanterns, and other open flames of nonmagical origin. The creature can dispel magical fire it touches as dispel magic (caster level equals elemental's HD). Vortex – A whirlpool, 30 ft. tall, with same traits as a Whirlwind (see Monster Special Abilities)
Special Qualities: Darkvision 60 ft., elemental traits
Abilities: STR16 (+3), DEX12(+1), MIND11
Skills: all @ 4
CR: 3
<i>This translucent creature's shape shifts between a spinning column of water and a crashing wave.</i>

WIGHT – Medium Undead**Hit Dice:** 4d12 (26)**Speed:** 6**AC:** 15 (+1 DEX, +4 natural)**Attack/Damage:**

Slam +3 (1d4+1 & energy drain)

Special Attacks:

Energy Drain – one negative level and Wight gains Shp (Fort. DC14 neg.)
 Create Spawn - Any humanoid slain by a wight becomes a wight in 1d4 rounds. Spawn are under the command of the wight that created them and remain enslaved until its death.

Special Qualities:

Darkvision 60 ft., undead traits

Abilities:

STR12(+1), DEX12(+1), MIND13(+1)

Skills: all @ 4**CR:** 3

A Wight is about the height and weight of a human but the appearance is a weird and twisted reflection of the form it had in life compared to its debased self now.

WORG – Medium Magical Beast**Hit Dice:** 4d10+8 (30HP)**Speed:** 10**AC:** 14 (+2 DEX, +2 natural)**Attack/Damage:**

Bite +7 (1d6+4 & Trip)

Special Attacks:

Trip – If bite attack hits may trip +3

Special Qualities:

Darkvision 60 ft., low-light-vision, scent

Abilities:

STR17 (+3), DEX15(+2), MIND14(+2)

Skills: all @ 4**CR:** 2

More intelligent than their smaller cousins, the wolf, a Worg has gray or black fur, grows to 5 feet long and stands 3 feet tall at the shoulder. It weighs 300 pounds.

Monsters Hit Die 5

COCKATRICE - Small Magical Beast**Hit Dice:** 5d10 (27)**Speed:** 4/12 (fly)**AC:** 14 (+1 size, +3 DEX)**Attack/Damage:**

Bite +9 (1d4-2 & petrification)

Special Attacks:

Petrification – turn to stone (Fort. DC12 neg.)

Special Qualities:

Darkvision 60 ft., low-light vision

Abilities:

STR6(-2), DEX17(+3), MIND 13 (+1)

Skills: all @ 5**CR:** 3

A male cockatrice has wattles and a comb, just like a rooster and resembles one as such except for its bat-like wings and long reptilian tail. Females, much

rarer than males, differ only in that they have no wattles or comb. A cockatrice weighs about 25 pounds.

ETTERCAP - Medium Aberration**Hit Dice:** 5d8+5 (27)**Speed:** 6/6 (climb)**AC:** 14 (+3 DEX, +1 natural)**Attack/Damage:**Bite +5 (1d8+2 & poison) and
2 Claws +3 (1d3+1)**Special Attacks:**

Poison – 1d6DEX/ 2d6DEX (Fort. DC15 neg.)

Web – (see Monster Special Abilities)

Special Qualities:

Low-light vision

Abilities:

STR14(+2), DEX17(+3), MIND 15 (+2)

Skills: all @ 5**CR:** 5

An ettercap is a hideous purple creature that walks upright like a man, but its face is that of a spider, and its hands are sickle-shaped claws. It stands about 6 feet tall and weighs about 200 pounds.

OGRE MAGE – Large Giant**Hit Dice:** 5d8+15 (37)**Speed:** 8/ 8 (fly)**AC:** 15 (-1 size, +5 natural, +4 chain shirt)**Attack/Damage:**

Greatsword +7 (3d6+7) or

Longbow +2 (2d6)

Special Attacks:

Spell-like Abilities – darkness/ cone of cold/ gaseous form

Special Qualities:

Change shape - an ogre mage can assume the form of any Small, Medium, or Large humanoid or giant, darkvision 60 ft., low-light vision, regeneration 5 –, fire and acid deal normal damage, spell resistance 19, flight – can cease or resume flight as a free action

Abilities:

STR21 (+5), DEX10, MIND14(+2)

Skills: all @ 5**CR:** 8

An ogre mage stands about 10 feet tall and weighs up to 700 pounds. Its skin varies in color from light green to light blue, its hair is black or very dark brown and tusks glisten from between its lips. A pair of stunted horns grows from its head. Ogre mages favor loose, comfortable clothing and lightweight armor.

OWLBEAR – Large magical Beast**Hit Dice:** 5d10+25 (52)**Speed:** 6**AC:** 15 (-1 size, +1 DEX, +5 natural)**Attack/Damage:**

2 Claws +9 (1d6+5 & grab) and

Bite +4 (1d8+2)

Special Attacks:

Grab – if hits with claw may grapple

Special Qualities:

Scent

Abilities:

STR21 (+5), DEX12(+1), MIND12(+1)

Skills: all @ 5**CR:** 4

An amalgam of fur and feathers, an Owlbear's coat ranges in color from brown-black to yellowish brown, this bizarre half-bear, half-owl monstrosity can stand as tall as 8 feet and weigh up to 1,500 pounds with huge, ursine claws and its beak is a dull ivory color. Adventurers who have survived encounters with the creature often speak of the bestial madness they glimpsed in its red-rimmed eyes.

PHASE SPIDER - Large Magical Beast**Hit Dice:** 5d10+15 (42)**Speed:** 8/4 (climb)**AC:** 15 (-1 size, +3 DEX, +3 natural)**Attack/Damage:**

Bite +7 (1d6+4 & poison)

Special Attacks:

Poison – 1d8STR/ 1d8STR (Fort. DC17 neg.)

Special Qualities:

Darkvision 60 ft., ethereal jaunt - a phase spider can shift from the Ethereal Plane to the Material Plane as a free action, and shift back again as a move action (or during a move action), low-light vision

Abilities:

STR17(+3), DEX17(+3), MIND13(+1)

Skills: all @ 5**CR:** 5

This large spider-like monster has an eerie, humanoid face surrounded by a shaggy mane of fur. Phase spiders are aggressive predators that can move quickly from the Ethereal Plane to attack opponents on the Material Plane. A typical phase spider's body is 8 feet long. It weighs about 700 pounds.

RUST MONSTER - Medium Aberration**Hit Dice:** 5d8+5 (27)**Speed:** 8**AC:** 18 (+3 DEX, +5 natural)**Attack/Damage:**

Antennae touch (rust) and Bite -2 (1d3)

Special Attacks:

Rust - A rust monster that makes a successful touch attack with its antennae causes the target metal to corrode, falling to pieces and becoming useless immediately. The touch can destroy up to a 10-foot cube of metal instantly. Magic armor and weapons, and other magic items made of metal, must succeed on a DC 17 Reflex save or be dissolved.

Special Qualities:

Darkvision, scent

Abilities:

STR10, DEX17(+3), MIND13(+1)

Skills: all @ 5**CR:** 3

This insect-like monster has four legs, a bumpy almost shell like back, strange triangular-shaped protrusion at the end of its tail, and two long, feathery antennae. The hide of these creatures varies in color from a yellowish tan underside to a rust-red upper back. A rust monster's prehensile antennae can rust metals on contact. The typical Rust Monster is the size of a small horse.

SATYR - Medium Fey**Hit Dice:** 5d6+5 (22)**Speed:** 8**AC:** 15 (+1 DEX, +4 natural)**Attack/Damage:**

Head Butt +2 (1d6) and Dagger -3 (1d4) or Shortbow +3 (1d6)

Special Attacks:

Pipes - Satyrs can play a variety of magical tunes on their pan pipes. When it plays, all creatures within a 60-foot spread must succeed on a DC 13 Will save or be affected by *charm person*, *sleep*, or *fear*.

Special Qualities:

Damage reduction 5/ cold iron, low-light vision

Abilities:

STR10, DEX13(+1), MIND13(+1)

Skills: all @ 5**CR:** 4

This handsome, grinning man has the furry legs of a goat and a set of curling ram horns extending from his temples. A satyr's hair is red or chestnut brown, while its hooves and horns are jet black. A satyr is about as tall and heavy as a half-elf.

SCORPION, LARGE - Large Vermin**Hit Dice:** 5d8+10 (32)**Speed:** 10**AC:** 16 (-1 size, +7 natural)**Attack/Damage:**

2 Claws +6 (12d6+4 & grab) and Sting +1 (1d6+2 & poison)

Special Attacks:

Grab - if claw attack hits may grab and constrict
Constrict - on a successful grapple deals constrict damage (1d6+4)
Poison - 1d4STR/ 1d4STR (Fort. DC14 neg.)

Special Qualities:

Darkvision 60 ft., tremorsense 60 ft., vermin traits

Abilities:

STR19(+4), DEX10, MIND10

Skills: all @ 5**CR:** 3

Monstrous scorpions are likely to attack any creature that approaches, and they usually charge when attacking prey.

WRAITH - Medium Undead (incorporeal)**Hit Dice:** 5d12 (32HP)**Speed:** 12 (fly)**AC:** 15 (+3 DEX, +2 Deflection)**Attack/Damage:**

Incorporeal touch +5 (1d4 & drain)

Special Attacks:

Drain - Fort. 1d6 STR DC14 Wraith gains 5HP

Special Qualities:

Darkvision 60 ft., daylight powerlessness - Wraiths are utterly powerless in natural sunlight (not merely a *daylight* spell) and flee from it, incorporeal traits, +2 turn resistance, undead traits, unnatural aura

Abilities:

STR0 (-5), DEX16(+3), MIND14(+2)

Skills: all @ 5**CR:** 5

Wraiths are incorporeal creatures born of evil and darkness. In some cases, the grim silhouette of a wraith might appear armored or outfitted with weapons. This appearance reflects the shape it had in life. A wraith is about as tall as a human and is weightless.

XILL - Medium Elemental**Hit Dice:** 5d8+10 (32HP)**Speed:** 8**AC:** 20 (+3 DEX, +7 natural)**Attack/Damage:**

2 Short swords +7 (1d6+2) and 2 Claws +7 (1d4+2 & Grab) or 4 Claws +5 (1d4+2 & Grab) or 2 Longbows +4 (1d8)

Special Attacks:

Grab - (Grapple +2 (Bite 0d0 & par.))
Paralysis - 1d4 hr. (Fort. DC14 neg.)

Special Qualities:

Darkvision 60 ft., planewalk, SR21

Abilities:

STR15 (+2), DEX16(+3), MIND12(+1)

Skills: all @ 5**CR:** 6

This flame-red humanoid appears to be a strange mix of insect and reptile, with four arms and twitching, fanged mandibles.

Monsters Hit Die 6**BASILISK - Medium Magical Beast****Hit Dice:** 6d10+12 (45HP)**Speed:** 4**AC:** 16 (-1 DEX, +7 natural)**Attack/Damage:**

Bite +8 (1d8+3)

Special Attacks:

Petrifying Gaze - Turn to stone, 30 ft., Fort. DC13 neg.

Special Qualities:

Darkvision 60 ft., low-light vision

Abilities:

STR15 (+2), DEX8(-1), MIND12(+1)

Skills: all @ 6**CR:** 5

A basilisk is a reptilian monster that petrifies living creatures with a mere gaze. A basilisk usually has a dull brown body with a yellowish underbelly. Some specimens sport a short, curved horn atop the nose. An adult basilisk's body grows to about 6 feet long, not including its tail, which can reach an additional length of 5 to 7 feet. The creature weighs about 300 pounds.

CLOAKER - Large Aberration**Hit Dice:** 6d8+18 (45)**Speed:** 2/8 (fly)**AC:** 19 (-1 size, +3 DEX, +7 natural)**Attack/Damage:**

Tail slap +8 (1d6+5) and Bite +3 (1d4+2)

Special Attacks:

Moan - 30 ft. cone prone and nauseated 1d4+1 rnds (Fort. DC15 neg.)
Engulf - On successful grapple bites +4 and may still attack with tail

Special Qualities:

Darkvision 60 ft., shadow shift - concealment 1d4 rnds

Abilities:

STR21(+5), DEX16(+3), MIND 15 (+2)

Skills: all @ 6**CR:** 5

When resting or lying in wait, these creatures are almost impossible to distinguish from common black cloaks (the Cloaker's ivory claws look very much like bone clasps). Only when it unfurls does the horrific nature of the creature become apparent.

DIRE WOLF - Large Animal**Hit Dice:** 6d8+18 (45)**Speed:** 10**AC:** 14 (-1 size, +2 DEX, +3 natural)**Attack/Damage:**

Bite +11 (1d8+10 & trip)

Special Attacks:

Trip – if bite attack hits +11 to trip

Special Qualities:

Low-light vision, scent

Abilities:

STR25(+7), DEX15(+2), MIND 12 (+1)

Skills: all @ 6**CR:** 3

A huge wolf about the size of a horse with coarse fur and glowing eyes. Dire wolves are mottled gray or black, about 9 feet long and weighing some 800 pounds.

DRIDER – Large Aberration**Hit Dice:** 6d8+18 (45)**Speed:** 6/3 (climb)**AC:** 17 (-1 size, +2 DEX, +6 natural)**Attack/Damage:**2 Daggers +3 (1d6+2) and
Bite +1 (1d4+1 & poison) or
Shortbow +5 (1d8)**Special Attacks:**Poison – 1d6 STR/ 1d6 STR (Fort. DC16
neg.)Spells – as 6th Cleric/ WizardSpell-like Abilities darkness/ dispel
magic/ suggestion**Special Qualities:**

Darkvision 60 ft., spell resistance 17

Abilities:

STR15(+2), DEX15(+2), MIND 16 (+3)

Skills: all @ 6**CR:** 7

A Drider has the torso and head of a Drow and the lower body of a huge spider.

HOWLER - Large Outsider**Hit Dice:** 6d8+12 (39)**Speed:** 12**AC:** 17 (-1 size, +3 DEX, +5 natural)**Attack/Damage:**Bite +10 (2d8+5) and
1d4 quills +5 (1d6+2 & lodged)**Special Attacks:**Quills - each lodged quill gives -1
attacks, saves, checks (Reflex DC16 neg.)
DC20 heal check and 1d6 damage to
remove quill.**Special Qualities:**

Darkvision 60 ft.

Abilities:

STR21(+5), DEX17(+3), MIND 14 (+2)

Skills: all @ 6**CR:** 3

Howlers live on planes where chaos and evil hold sway. A howler is about 8 feet long and weighs about 2,000 pounds. This vile predator has a hide as thick and tough as leather. A howler's neck bristles with wicked ebony quills running from its head,

down its back, and to its tail.

HYDRA (5 heads) - Huge Magical Beast**Hit Dice:** 6d10+33 (66)**Speed:** 4/4 (swim)**AC:** 16 (-2 size, +1 DEX, +7 natural)**Attack/Damage:**

6 Bites +8 (1d10+3)

Special Qualities:Darkvision 60 ft., fast healing 16, low-
light vision, scent**Abilities:**

STR17(+4), DEX12(+1), MIND10

Skills: all @ 6**CR:** 5

Hydras are reptile-like monsters with multiple heads. A hydra is gray-brown to dark brown, with a light yellow or tan underbelly. The eyes are amber and the teeth are yellow-white. It is about 20 feet long and weighs about 4,000 pounds.

MANTICORE - Large Magical Beast**Hit Dice:** 6d10+24 (57)**Speed:** 6/10 (fly)**AC:** 17 (-1 size, +2 DEX, +6 natural)**Attack/Damage:**2 Claws +10 (2d4+5) and
Bite +8 (1d8+2) or
6 Spikes +8 (1d8+2)**Special Attacks:**Spikes - With a snap of its tail, a
manticore can loose a volley of six
spikes as a standard action (make an
attack roll for each spike). This attack
has a range of 180 feet with no range
increment. All targets must be within 30
feet of each other.**Special Qualities:**

Darkvision 60 ft., low-light vision, scent

Abilities:

STR20(+5), DEX15(+2), MIND 12 (+1)

Skills: all @ 6**CR:** 5

This creature has a vaguely humanoid head, the body of a lion, and the wings of a dragon. Its back has a row of spikes and its tail ends in long, sharp spikes.

MEDUSA – Medium Monstrous Humanoid**Hit Dice:** 6d8+6 (33)**Speed:** 6**AC:** 15 (+2 DEX, +3 natural)**Attack/Damage:**Shortbow +8/+3 (1d6) or
Dagger +8/+3 (1d4) and
Snakes +3 (1d4 & poison)**Special Attacks:**Poison – 1d6STR/ 2d6STR (Fort. DC15
neg.)Petrifying Gaze – 30 ft. turn to stone
(Fort. DC15 neg.)**Special Qualities:**

Darkvision 60 ft., immunity cold, low-

light vision, scent, vulnerability fire

Abilities:

STR18 (+4), DEX13(+1), MIND13(+1)

Skills: all @ 6**CR:** 5

This slender, attractive woman has strangely glowing eyes from a hideous face and a full head of writhing, hissing snakes for hair. A medusa tries to disguise its true nature until the intended victim is within range of its petrifying gaze, using subterfuge and bluffing games to convince the target that there is no danger. It uses normal weapons to attack those who avert their eyes or survive its gaze, while its poisonous snakes strike at adjacent opponents.

MINOTAUR – Large Monstrous Humanoid**Hit Dice:** 6d8+12 (39)**Speed:** 6**AC:** 14 (-1 size, +5 natural)**Attack/Damage:**Greataxe +9/+4 (3d6+6) and
Gore +4 (1d8+2)**Special Attacks:**Powerful Charge - A minotaur typically
begins a battle by charging at an
opponent, lowering its head to bring its
mighty horns into play. In addition to
the normal benefits and hazards of a
charge, this allows the beast to make a
single gore attack with a +9 attack
bonus that deals 4d6+6 points of
damage.**Special Qualities:**

Darkvision 60 ft., scent

Abilities:

STR19 (+4), DEX10, MIND10

Skills: all @ 6**CR:** 4

With the body of a powerfully built man covered in thick hair and the head of a snarling bull, this creature stomps its hooves and its eyes gleam as if preparing to charge.

NYMPH – Medium Fey
Hit Dice: 6d6+6 (27)
Speed: 6/4 (swim)
AC: 14 (+3 DEX, +4 deflection)
Attack/Damage: Dagger +6 (1d4)
Special Attacks: Blinding Beauty – This ability affects all humanoids within 30 feet of a nymph. Those who look directly at a nymph must succeed on a DC 17 Fortitude save or be blinded permanently as though by the blindness spell. A nymph can suppress or resume this ability as a free action. Spells – Cleric Spell-like Abilities – dimension door Stunning Glance – As a standard action, a wrathful nymph can stun a creature within 30 feet with a look. The target creature must succeed on a DC 17 Fortitude save or be stunned for 2d4 rounds.
Special Qualities: Damage reduction 10/ cold iron, low-light vision, unearthly grace - +4 to all saving throws
Abilities: STR10, DEX17(+3), MIND17(+3)
Skills: all @ 6
CR: 7
<i>A Nymph is about the height and weight of a delicate female elf that is both captivating and dangerous. She has long hair, large eyes and pointed, swept back ears.</i>

OTYUGH – Large Aberration
Hit Dice: 6d8+9 (36)
Speed: 4
AC: 17 (-1 size, +8 natural)
Attack/Damage: 2 Tentacles +4 (1d6 & grab) and Bite -2 (1d4 & disease)
Special Attacks: Grab – if hits with tentacle may grapple and constrict. Constrict – on successful grapple check deals automatic tentacle damage (1d6) Disease – Filth Fever, incubation 1d3 days, 1d3DEX/ 1d3STR (Fort. DC14 neg.)
Special Qualities: Darkvision 60 ft., scent
Abilities: STR11, DEX10, MIND12(+1)
Skills: all @ 6
CR: 4
<i>This three-legged creature is mostly mouth with rows of short sharp teeth. Three tentacles, two ending in round, flat hands with spiked barbs extend from its sides while the other one has eyes and extends from its rock-like back. A typical Otyugh has a body 8 feet in diameter and weighs about 500 pounds.</i>

TROLL – Large Giant
Hit Dice: 6d8+36 (63)
Speed: 6
AC: 15 (-1 size, +2 DEX, +5 natural)
Attack/Damage: 2 Claws +9 (1d6+6 & rend) and Bite +4 (1d6+3)
Special Attacks: Rend – if both claw attacks hit additional (2d6+9)
Special Qualities: Darkvision 90 ft., low-light vision, regeneration 5, scent
Abilities: STR23(+6), DEX14(+2), MIND9(-1)
Skills: all @ 6
CR: 5
<i>A typical adult troll is tall and thin standing about 9 feet tall and weighing 500 pounds. Females are slightly larger than males. A troll's rubbery hide is moss green, mottled green and gray, or putrid gray and their hair is usually greenish black or iron gray. Trolls walk upright but hunched forward with sagging shoulders. Their gait is uneven, and when they run, their arms dangle and clawed hands drag along the ground. For all this seeming awkwardness, trolls are very agile.</i>

WINTER WOLF – Large Magical Beast
Hit Dice: 6d10+18 (51HP)
Speed: 10
AC: 15 (-1 size, +1 DEX, +5 natural)
Attack/Damage: Bite +9 (1d8+6 & 1d6 cold & trip)
Special Attacks: Trip – If bite attack hits may trip +8 Breath Weapon – 15 ft. cone 4d6 cold, Reflex DC16 ½ .
Special Qualities: Darkvision 60 ft., immunity cold, low-light vision, scent, vulnerability fire
Abilities: STR18 (+4), DEX13(+1), MIND13(+1)
Skills: all @ 6
CR: 5
<i>This bear-sized wolf, about 8 feet long and 4 1/2 feet at the shoulder, has white fur and ice-frost around its muzzle that tinkles as it moves its head. Its eyes are pale blue, almost white in color, and an icy-cold air comes out of its mouth in freezing breaths.</i>

Monsters Hit Die 7

DJINNI – Large Outsider
Hit Dice: 7d8+14 (45)
Speed: 4/12 (fly)
AC: 16 (-1 size, +4 DEX, +3 natural)
Attack/Damage: 2 Slams +10 (1d8+4)
Special Attacks: Air mastery - Airborne creatures take a -1 penalty on attack and damage rolls against a Djinni. Spell-like Abilities – invisibility/ create food and water/ gaseous form

Whirlwind – 50 ft. tall, (see Monster Special Abilities)
Special Qualities: Darkvision 60 ft., immunity acid, plane shift, telepathy 100 ft.
Abilities: STR18 (+4), DEX19(+4), MIND15(+2)
Skills: all @ 7
CR: 5
<i>This creature stands nearly twice as tall as a human with darkish skin and its lower torso trails away in a smoky vortex.</i>

GRIFFON – Large Magical Beast
Hit Dice: 7d10+21 (59)
Speed: 6/16 (fly)
AC: 17 (-1 size, +2 DEX, +6 natural)
Attack/Damage: Bite +11 (2d6+4) and 2 Claws +8 (1d4+2)
Special Attacks: Pounce – If Griffon dives or charges foe may add two rake attacks. Rake – (1d6+2)
Special Qualities: Darkvision 60 ft., low-light vision, scent
Abilities: STR18 (+9), DEX15(+2), MIND13(+1)
Skills: all @ 7
CR: 4
<i>Griffons are powerful, majestic creatures with the characteristics of both a lion, the body, and an eagle, the head and forelegs. From nose to tail, an adult griffon can measure as much as 8 feet. Neither males nor females are endowed with a mane. A pair of broad, golden wings emerges from the creature's back and span 25 feet or more. A griffon weighs about 500 pounds.</i>

HARPY – Medium Monstrous Humanoid
Hit Dice: 7d8 (31)
Speed: 6/16 (fly)
AC: 13 (+2 DEX, +1 natural)
Attack/Damage: Club +7/+2 (1d6) and 2 Claws +2 (1d3)
Special Attacks: Captivating Song – 300 ft. sonic, mind-affecting charm as long as Harpy sings +1 rnd. victim takes no actions except to defend self (Will DC16 neg.)
Special Qualities: Darkvision 60 ft.
Abilities: STR10, DEX15(+2), MIND12(+1)
Skills: all @ 7
CR: 4
<i>Save for the tattered wings and taloned feet, this creature resembles a feral woman with a reptilian look about her. Harpies like to entrance hapless travelers with their magical songs and lead them to unspeakable torments. Only when a harpy has finished playing with its new "toys" will it release them from suffering by killing and consuming them.</i>

MIMIC – Large Aberration**Hit Dice:** 7d8+21 (52)**Speed:** 2**AC:** 15 (-1 size, +1 DEX, +5 natural)**Attack/Damage:**

2 Slams +9 (1d8+4)

Special Attacks:

Adhesive - A mimic exudes a thick slime that acts as a powerful adhesive, holding fast any creatures or items that touch it. An adhesive-covered mimic automatically grapples and crushes any creature it hits with its slam attack. Opponents so grappled cannot get free while the mimic is alive without removing the adhesive first. A weapon that strikes an adhesive-coated mimic is stuck fast unless the wielder succeeds on a DC 16 Reflex save. A successful DC 16 Strength check is needed to pry it off. Crush – on a successful grapple (1d8+4)

Special Qualities:

Darkvision 60 ft., immunity acid, mimic shape - A mimic can assume the general shape of any object that fills roughly 150 cubic feet (5 feet by 5 feet by 6 feet), such as a massive chest, a stout bed, or a wide door frame.

Abilities:

STR19 (+4), DEX12(+1), MIND13(+1)

Skills: all @ 7**CR:** 4

A mimic appears as a normal object, chest, chair, or table and can have almost any dimensions, but usually is not more than 10 feet long. A typical mimic has a volume of 150 cubic feet (5 feet by 5 feet by 6 feet) and weighs about 4,500 pounds. When prey comes close the mimic grows appendages and a large mouth with many sharp teeth appears.

RAKSHASA – Medium Outsider**Hit Dice:** 7d8+21 (52)**Speed:** 8**AC:** 21 (+2 DEX, +9 natural)**Attack/Damage:**2 Claws +8 (1d4+1) and
Bite +3 (1d6)**Special Attacks:**

Detect Thoughts - A Rakshasa can continuously use *detect thoughts* as the spell (Will DC 15 neg.).

Spells - Wizard

Special Qualities:

Change shape - A Rakshasa can assume any humanoid form, or revert to its own form, as a standard action. In humanoid form, a Rakshasa loses its claw and bite attacks (although it often equips itself with weapons and armor instead), damage reduction 15/ good and piercing, darkvision 60 ft., spell resistance 27

Abilities:

STR12 (+1), DEX14(+2), MIND13(+1)

Skills: all @ 7**CR:** 10

A Rakshasa is about the same height and weight as a human, has the features of a tiger and its palms and backwards-bending fingers are on the tops of its hands. It's bestial, snarling visage leave little doubt as to its fiendish nature.

REMORHAZ – Huge Magical Beast**Hit Dice:** 7d10+35 (73)**Speed:** 6/4 (borrow)**AC:** 20 (-2 size, +1 DEX, +11 natural)**Attack/Damage:**

Bite +13 (2d8+12 & grab)

Special Attacks:

Grab – if bite hits may grapple

Swallow Whole - When a Remorhaz begins its turn with a grappled opponent in its mouth, it can swallow that opponent with a successful grapple check. Once inside, the opponent takes 2d8+12 points of bludgeoning damage plus 8d6 points of fire damage per round from the Remorhaz's gizzard. A swallowed creature can cut its way out by using a light slashing or piercing weapon to deal 25 points of damage to the gizzard (AC 15).

Special Qualities:

Darkvision 60 ft., heat - an enraged Remorhaz generates heat so intense that anything touching its body takes 8d6 points of fire damage. Creatures striking a Remorhaz with natural attacks or unarmed attacks are subject to this damage, but creatures striking with melee weapons do not take damage from the Remorhaz's heat. This heat can melt or char weapons; any weapon that strikes a Remorhaz is allowed a DC 18 Fortitude save to avoid destruction, low-light vision, tremorsense 60 ft.

Abilities:

STR26 (+13), DEX13(+1), MIND12(+1)

Skills: all @ 7**CR:** 7

An immense centipede-like beast erupts from the snow, rows of chitinous plates on its back glowing red-hot. A Remorhaz is whitish-blue in color but pulses with a reddish glow from the heat its body produces. The creature is a little more than 20 feet long, with a body about 5 feet wide. It weighs about 10,000 pounds.

SPECTRE – Medium Undead**Hit Dice:** 7d12 (45)**Speed:** 8/16 (fly)**AC:** 15 (+3 DEX, +2 deflection)**Attack/Damage:**

Incorporeal Touch +6 (1d8 & energy drain)

Special Attacks:

Energy Drain – Spectre's touch deals two negative levels (Fort. DC15 neg.)

Create Spawn - Any humanoid slain by a spectre becomes a spectre in 1d4 rounds. Spawn are under the command

of the spectre that created them and remain enslaved until its death.

Special Qualities:

Darkvision 60 ft., incorporeal traits, +2 turn resistance, sunlight powerlessness - powerless in natural sunlight and flee from it. A spectre caught in sunlight cannot attack and can take only a single move action or standard action in a round, undead traits, unnatural aura – animals can sense the unnatural presence of a spectre at a distance of 30 feet. They do not willingly approach nearer than that and panic if forced to do so.

Abilities:

STR0, DEX16(+3), MIND15(+2)

Skills: all @ 7**CR:** 7

A Spectre looks much as it did in life and can be easily recognized by those who knew the individual or have seen the individual's face in a painting or a drawing. In many cases, the evidence of a violent death is visible on its body. A Spectre is roughly human-sized and is weightless.

TREANT – Huge Plant**Hit Dice:** 7d8+35 (66)**Speed:** 6**AC:** 20 (-2 size, -1 DEX, +13 natural)**Attack/Damage:**

2 Slams +12 (2d6+9)

Special Attacks:

Animate Trees - A Treant can animate trees within 180 feet at will, controlling up to two trees at a time. It takes 1 full round for a normal tree to uproot itself. Thereafter it moves at a speed of 10 feet and fights as a Treant in all respects. Animated trees lose their ability to move if the Treant that animated them is incapacitated or moves out of range.

Trample – 2d6+13 (Reflex DC22 ½)

Special Qualities:

Damage reduction 10/ slashing, low-light vision, plant traits, vulnerability fire

Abilities:

STR29(+9), DEX8(-1), MIND16(+3)

Skills: all @ 7**CR:** 8

This animated tree's bark is knotted into vaguely humanoid features, with branches for arms and roots for legs. A Treant is about 30 feet tall, with a "trunk" about 2 feet in diameter. It weighs about 4,500 pounds.

WYVERN – Large Dragon
Hit Dice: 7d12+14 (59HP)
Speed: 4/10 (fly)
AC: 18 (-1 size, -1 DEX, +8 nat.)
Attack/Damage: Sting +10 (1d6+4 & poison) and Bite +8 (2d8+4) and 2 Wings +8 (1d8+2) and 2 Talons +8 (2d6+4)
Special Attacks: Poison – 2d6 STR/ 2d6 STR (Fort. DC17 neg.) Talons – if both hit grapple attempt
Special Qualities: Darkvision 60 ft., immunity sleep/paralysis, low-light vision, scent
Abilities: STR19 (+4), DEX12(+1), MIND12(+1)
Skills: all @ 7
CR: 6
<i>A distant cousin to the true dragons, the wyvern is a huge flying lizard with a poisonous stinger in its tail. A wyvern's body is 15 feet long, and dark brown to gray; half that length is tail. Its wingspan is about 20 feet. A wyvern weighs about one ton.</i>

XORN - Medium Outsider
Hit Dice: 7d8+17 (48HP)
Speed: 4/4 (burrow)
AC: 24 (+14 nat.)
Attack/Damage: Bite +10 (4d6+3) and 3 Claws +8 (1d4+1)
Special Qualities: All-around vision, earth glide, DR5/bludgeoning, darkvision 60 ft., immunity cold/fire, resistance electricity 10, tremorsense 60 ft.
Abilities: STR17(+3), DEX10, MIND11
Skills: all @ 7
CR: 6
<i>This squat beast is as wide as it is tall. Strangely symmetrical, it has three arms, three legs, three eyes, and one huge mouth.</i>

Monsters Hit Die 8

AIR ELEMENTAL – Large Elemental
Hit Dice: 8d8+24 (60)
Speed: 20 (fly)
AC: 20 (-1 size, +7 DEX, +4 natural)
Attack/Damage: 2 Slams +12 (2d6+2)
Special Attacks: Air mastery - Airborne creatures take a -1 penalty on attack and damage rolls against an air elemental. Whirlwind – 40 ft. tall (see Monster Special Abilities)
Special Qualities: Damage reduction 5/-, darkvision 60 ft., elemental traits

Abilities: STR14 (+2), DEX25(+7), MIND11
Skills: all @ 8
CR: 5
<i>This cloud-like creature has dark hollows reminiscent of eyes and a mouth, and a howling wind whips it into ominous shapes.</i>

EARTH ELEMENTAL – Large Elemental
Hit Dice: 8d8+32 (68)
Speed: 4
AC: 18 (-1 size, -1 DEX, +10 natural)
Attack/Damage: 2 Slams +12 (2d8+7)
Special Attacks: Earth mastery - An earth elemental gains a +1 bonus on attack and damage rolls if both it and its foe are touching the ground. If an opponent is airborne or waterborne, the elemental takes a -4 penalty on attack and damage rolls. Push – An earth elemental can start a bull rush maneuver and the combat modifiers given in Earth Mastery, above, also apply to the elemental's opposed Strength checks.
Special Qualities: Damage reduction 5/-, darkvision 60 ft., earth glide, elemental traits
Abilities: STR25 (+7), DEX8(-1), MIND11
Skills: all @ 8
CR: 5
<i>This hulking, roughly humanoid creature of dirt and stone explodes up from the earth, faceless save for two glowing gemstone eyes.</i>

FIRE ELEMENTAL – Large Elemental
Hit Dice: 8d8+24 (60)
Speed: 10
AC: 18 (-1 size, +5 DEX, +4 natural)
Attack/Damage: 2 Slams +6 (2d6+2 & 2d6 fire (Burn))
Special Attacks: Burn - A fire elemental's slam attack deals bludgeoning damage plus fire damage from the elemental's flaming body. Those hit by a fire elemental's slam attack also must succeed on a Reflex save, DC17, or catch on fire. The flame burns for 1d4 rounds. A burning creature can take a move action to put out the flame.
Special Qualities: Damage reduction 5/-, darkvision 60 ft., elemental traits, immunity fire, vulnerability cold
Abilities: STR14 (+2), DEX21(+5), MIND11
Skills: all @ 8
CR: 5
<i>This creature looks like a living, mobile bonfire, tongues of flame reaching out in search of things to burn.</i>

GORGON – Large Magical Beast
Hit Dice: 8d10+40 (85)
Speed: 6
AC: 20 (-1 size, +11 natural)
Attack/Damage: Gore +12 (1d8+7)
Special Attacks: Breath Weapon – 60 ft. cone, 1x/1d4 rnds., turn to stone, (Fort. DC19 neg.) Trample – (Reflex DC19 ½) (see Monster Special Abilities)
Special Qualities: Darkvision 60 ft., low-light vision, scent
Abilities: STR21 (+5), DEX10, MIND12(+1)
Skills: all @ 8
CR: 8
<i>This bull-like creature seems to be made of interlocking metallic plates. Faint plumes of green smoke puff from its mouth. A typical gorgon stands over 6 feet tall at the shoulder and measures 8 feet from snout to tail. It weighs about 4,000 pounds.</i>

HYDRA (8 heads) – Huge Magical Beast
Hit Dice: 8d10+40 (85)
Speed: 4/ 4 (swim)
AC: 18 (-2 size, +1 DEX, +9 natural)
Attack/Damage: 8 Bites +11 (1d10+4)
Special Qualities: Darkvision 60 ft., fast healing 18, low-light vision, scent
Abilities: STR19 (+4), DEX12(+1), MIND10
Skills: all @ 8
CR: 7
<i>Hydras are reptile-like monsters with multiple heads. A hydra is gray-brown to dark brown, with a light yellow or tan underbelly. The eyes are amber and the teeth are yellow-white. It is about 20 feet long and weighs about 4,000 pounds.</i>

INVISIBLE STALKER – Large Elemental
Hit Dice: 8d8+16 (52)
Speed: 6/6 (fly)
AC: 17 (-1 size, +4 DEX, +4 natural)
Attack/Damage: 2 Slams +10 (2d6+4)
Special Qualities: Darkvision 60 ft., elemental traits, natural invisibility - this ability is constant, allowing a stalker to remain invisible even when attacking.
Abilities: STR18 (+4), DEX19(+2), MIND15(+2)
Skills: all @ 8
CR: 7
<i>A summoned invisible stalker undertakes whatever task the summoner commands, even if the task sends it hundreds or thousands of miles away. The creature follows a command until the task is completed and obeys only the summoner. However, it resents protracted missions or complex tasks and seeks to pervert its instructions accordingly. No true form can be detected, yet a sense of force and hulking malevolence is undeniable in this creature's presence.</i>

MUMMY – Medium Undead
Hit Dice: 8d12+3 (55)
Speed: 4
AC: 20 (+10 natural)
Attack/Damage: Slam +11 (1d6+10 & disease)
Special Attacks: Disease – Mummy Rot 1d6STR/ 1d6COM (Fort. DC16 neg.) (see Diseases) Despair - At the mere sight of a mummy, the viewer must succeed on a DC 16 Will save or be paralyzed with fear for 1d4 rounds. Whether or not the save is successful, that creature cannot be affected again by the same mummy's despair ability for 24 hours.
Special Qualities: Damage reduction 5/-, darkvision 60 ft., undead traits, vulnerability fire
Abilities: STR24 (+7), DEX10, MIND14(+2)
Skills: all @ 8
CR: 5
<i>Mummies are preserved corpses animated through the auspices of dark desert gods best forgotten and wrapped from head to toe in ancient strips of moldering linen, this humanoid moves with a shuffling gait.</i>

SHAMBLING MOUND - Large Plant
Hit Dice: 8d8+24 (60)
Speed: 4/4 (swim)
AC: 20 (-1 size, +11 natural)
Attack/Damage: 2 Slams +11 (2d6+7 & grab)
Special Attacks: Grab – if hits with both slams may grapple and constrict Constrict – a successful grapple deals (2d6+7)
Special Qualities: Darkvision 60 ft., immunity electricity, low-light vision, plant traits, resistance fire 10
Abilities: STR21(+5), DEX10, MIND10
Skills: all @ 8
CR: 6
<i>A mass of tangled vines and dripping slime rises on two trunk-like legs, reeking of rot and freshly turned earth. Shambling mounds, also called Shamblers, appear to be heaps of rotting vegetation. They are actually intelligent, carnivorous plants. A Shambler's body has an 8-foot girth and is about 6 feet tall when the creature stands erect. It weighs about 3,800 pounds.</i>

SPIDER, HUGE – Huge Vermin
Hit Dice: 8d8+16 (52)
Speed: 6/4 (climb)
AC: 16 (-2 size, +3 DEX, +5 natural)
Attack/Damage: Bite +9 (2d6+6 & poison)

Special Attacks:
Poison – 1d6STR/ 1d6STR (Fort. DC13 neg.) Web - This is similar to an attack with a net but has a maximum range of 50 feet, with a range increment of 10 feet. An entangled creature can escape with a successful Escape Artist (DC16) check or burst it with a Strength check (DC20). The web has 14 hit points.
Special Qualities:
Darkvision 60 ft., tremorsense 60 ft., vermin traits
Abilities:
STR19(+4), DEX17(+3), MIND10
Skills:
all @ 8
CR:
5
<i>This translucent creature's shape shifts between a spinning column of water and a crashing wave.</i>

WATER ELEMENTAL – Large Elemental
Hit Dice: 8d8+32 (68)
Speed: 4/18 (swim)
AC: 20 (-1 size, +2 DEX, +9 natural)
Attack/Damage: 2 Slams +10 (2d8+5)
Special Attacks: Water Mastery - A water elemental gains a +1 bonus on attack and damage rolls if both it and its opponent are touching water. If the opponent or the elemental is touching the ground, the elemental takes a -4 penalty on attack and damage rolls. An elemental can easily overturn small craft (5 feet of length per Hit Die of the elemental). Drench - The elemental's touch puts out torches, campfires, exposed lanterns, and other open flames of nonmagical origin. The creature can dispel magical fire it touches as dispel magic (caster level equals elemental's HD). Vortex – A whirlpool, 40 ft. tall, with same traits as a Whirlwind (see Monster Special Abilities)
Special Qualities:
Damage reduction 5/-, darkvision 60 ft., elemental traits
Abilities:
STR20 (+5), DEX14(+2), MIND11
Skills:
all @ 8
CR:
5
<i>This translucent creature's shape shifts between a spinning column of water and a crashing wave.</i>

Monsters Hit Die 9

BULETTE - Huge Magical Beast
Hit Dice: 9d10+45 (94)
Speed: 8/ 2 (burrow)
AC: 22 (-2 size, +2 DEX, +12 nat.)

Attack/Damage:
Bite +16 (2d8+8) and 2 Claws +10 (2d6+4)
Special Attacks:
Leap – may make 4 claw attacks
Special Qualities:
Darkvision 60 ft., low-light vision, scent, tremorsense 60 ft.
Abilities:
STR27(+8), DEX15(+2), MIND 13 (+1)
Skills:
all @ 9
CR:
7
<i>This armor-plated creature's toothy maw gapes wide as a fin-like dorsal plate rises between its shoulders. Also known as the landshark, the Bulette is a terrifying predator that lives only to eat.</i>

CHIMERA - Large Magical Beast
Hit Dice: 9d10+27 (76)
Speed: 6/10 (fly)
AC: 19 (-1 size, +1 DEX, +9 nat.)
Attack/Damage: Bite +12 (2d6+4) and Bite +12 (1d8+4) and Gore +12 (1d8+4) and 2 Claws +10 (1d6+2)
Special Attacks: Breath weapon – 40 ft. line acid 3d8 (Reflex DC17 ½)
Special Qualities:
Darkvision 60 ft., low-light vision, scent
Abilities:
STR19(+4), DEX13(+1), MIND 13 (+1)
Skills:
all @ 9
CR:
7
<i>This winged monster has the body of a lion, though two more heads flank its central feline one—a dragon and a horned goat. A Chimera is about 5 feet tall at the shoulder, nearly 10 feet long, and weighs about 4,000 pounds.</i>

FLESH GOLEM – Large Construct
Hit Dice: 9d10+30 (79)
Speed: 6
AC: 18 (-1 size, -1 DEX, +10 natural)
Attack/Damage: 2 Slams +10 (2d8+5)
Special Qualities:
Construct traits, damage reduction 5/ adamantine, darkvision 60 ft., immunity magic or spell-like abilities with spell resistance, low-light vision
Abilities:
STR25 (+7), DEX9, MIND11
Skills:
all @ 11
CR:
10
<i>A flesh golem is a ghoulish collection of stolen humanoid body parts, stitched together into a single composite form. No natural animal willingly tracks a flesh golem. The golem wears whatever clothing its creator desires, usually just a ragged pair of trousers. It has no possessions and no weapons. It stands 8 feet tall and weighs almost 500 pounds.</i>

GREEN HAG - Medium Monstrous Humanoid
Hit Dice: 9d8+9 (49)
Speed: 6/6 (swim)
AC: 22 (+1 DEX, +11 natural)
Attack/Damage: 2 Claws +13 (1d4+4)
Special Abilities: Spell-like Abilities – dancing lights/ disguise self Weakness - A green hag can weaken a foe by making a special touch attack, 2d4 STR (Fort. DC16 neg.) Mimicry - A green hag can imitate the sounds of almost any animal found near its lair.
Special Qualities: Darkvision 90 ft., spell resistance 18, water breathing
Abilities: STR19(+4), DEX12(+1), MIND 13(+1)
Skills: all @ 9
CR: 5
<i>Knots of dark, moldering hair spill over the features of this sickly, thin, green-skinned crone. Green hags are found in desolate swamps and dark forests. A green hag is about the same height and weight as a female human.</i>

SALAMANDER - Medium Outsider
Hit Dice: 9d8+18 (58)
Speed: 4
AC: 18 (+1 DEX, +7 natural)
Attack/Damage: Spear +11 (1d8+3 & 1d6 fire) and Tail Slap +9 (2d6+1 & 1d6 fire & grab)
Special Attacks: Grab – if tail slap attack hits may grapple and constrict. Constrict - A salamander deals automatic tail slap damage (including fire damage) with a successful grapple check.
Special Qualities: Damage reduction 10/ magic, darkvision 60 ft., immunity fire, vulnerability cold
Abilities: STR14(+2), DEX13(+1), MIND15(+2)
Skills: all @ 9
CR: 6
<i>This snake-bodied humanoid hisses with anger. Spines of crackling flame dance along the creature's blackened, fiery-red scales.</i>

WILL-O-WISP - Small Aberration
Hit Dice: 9d8 (40)
Speed: 10 (fly)
AC: 29 (+1 size, +9 DEX, +9 deflection)
Attack/Damage: Shock +16 touch (2d8 electricity)
Special Qualities: Darkvision 60 ft., immunity magic, natural invisibility - A startled or frightened will-o'-wisp can extinguish its

glow, effectively becoming invisible as the spell.
Abilities: STR1(-5), DEX29(+9), MIND 16(+3)
Skills: all @ 9
CR: 6
<i>Will-o'-wisps can be yellow, white, green, or blue. They are easily mistaken for lanterns, especially in the foggy marshes and swamps where they reside. A will-o'-wisp's body is a globe of spongy material about 1 foot across and weighing about 3 pounds, and its glowing body sheds as much light as a torch.</i>

Monsters Hit Die 10

BLACK PUDDING - Huge Ooze
Hit Dice: 10d10+60 (115)
Speed: 4/2 (climb)
AC: 3 (-2 size, -5 DEX)
Attack/Damage: Slam +8 (2d6+4 & 2d6 acid & grab)
Special Attacks: Acid - The creature secretes a digestive acid that dissolves organic material and metal quickly, but does not affect stone. Any melee hit or constrict attack deals acid damage, and the opponent's armor and clothing dissolve and become useless immediately unless they succeed on DC 21 Reflex saves. A metal or wooden weapon that strikes a black pudding also dissolves immediately unless it succeeds on a DC 21 Reflex save. Grab – if hits with slam may grapple and constrict Constrict - A black pudding deals automatic slam and acid damage with a successful grapple check. The opponent's clothing and armor take a -4 penalty on Reflex saves against the acid.
Special Qualities: Blindsight 60 ft., split - slashing and piercing weapons deal no damage to a black pudding. Instead the creature splits into two identical puddings, each with half of the original's current hit points (round down). A pudding with 10 hit points or less cannot be further split and dies if reduced to 0 hit points, Ooze traits
Abilities: STR17(+3), DEX1(-5), MIND 1(-4)
Skills: all @ 10
CR: 7
<i>This black, amorphous blob piles up on itself, a quivering mound of midnight sludge that glistens darkly before surging forward. The typical black pudding measures 15 feet across and 2 feet thick. It weighs about 18,000 pounds.</i>

ETTIN - Large Giant
Hit Dice: 10d8+20 (65)
Speed: 6
AC: 18 (-1 size, -1 DEX, +7 natural, +3

hide)
Attack/Damage: 2 Morningstars +12/+7 (2d6+6) or 2 Javelins +5 (1d8+6)
Special Qualities: Low-light vision
Abilities: STR23(+6), DEX8(-1), MIND 10
Skills: all @ 10
CR: 6
<i>Ettins, or two-headed giants, are vicious and unpredictable hunters that stalk the night. The filthy giant wears tattered remnants of leather armor and clutches a large morningstar in each fist. Adult ettins are about 13 feet tall and weigh 5,200 pounds.</i>

GRAY RENDER - Large Magical Beast
Hit Dice: 10d10+70 (125)
Speed: 6
AC: 19 (-1 size, +10 natural)
Attack/Damage: Bite +15 (2d6+6 & grab) and 2 Claws +10 (1d6+3)
Special Attacks: Grab – if bite attack hits may grapple and rend. Rend – if grapple successful rends target (2d6+9)
Special Qualities: Darkvision 60 ft., low-light vision, scent
Abilities: STR23(+6), DEX10, MIND 12 (+1)
Skills: all @ 10
CR: 8
<i>A gray render stands about 9 feet tall in spite of its hunched posture and is about 4 feet wide. This hulking beast has slick, gray, hairless skin. Its numerous yellow eyes and wide toothy maw are its only facial features. It weighs about 4,000 pounds.</i>

HYDRA (10 heads) - Huge Magical Beast
Hit Dice: 10d10+53 (108)
Speed: 4/4 (swim)
AC: 20 (-2 size, +1 DEX, +11 natural)
Attack/Damage: 10 Bites +14 (1d10+5)
Special Qualities: Darkvision 60 ft., fast healing 20, low-light vision, scent
Abilities: STR21(+5), DEX12(+1), MIND10
Skills: all @ 10
CR: 9
<i>Hydras are reptile-like monsters with multiple heads. A hydra is gray-brown to dark brown, with a light yellow or tan underbelly. The eyes are amber and the teeth are yellow-white. It is about 20 feet long and weighs about 4,000 pounds.</i>

ROPER - Large Magical Beast
Hit Dice: 10d10+30 (85)
Speed: 2
AC: 24 (-1 size, +1 DEX, +14 natural)
Attack/Damage: 6 Strands +11 ranged touch (drag & weakness) and Bite +13 (2d6+6)
Special Attacks: Drag - If a roper hits with a strand attack, the strand latches onto the opponent's body. This deals no damage but drags the stuck opponent 10 feet closer each subsequent round unless that creature breaks free, which requires a DC 23 Escape Artist check or a DC 19 Strength check. A roper can draw in a creature within 10 feet of itself and bite with a +4 attack bonus in the same round. A strand has 10 hit points. Strands - The creature can have up to six strands at once, and they can strike up to 50 feet away. If a strand is severed, the roper can extrude a new one on its next turn as a free action. Weakness - A roper's strands can sap an opponent's strength. Anyone grabbed by a strand must succeed on a DC 18 Fortitude save or take 2d8 points of Strength damage.
Special Qualities: Darkvision 60 ft., immunity electricity, low-light vision, resistance cold 10, spell resistance 30, vulnerability fire
Abilities: STR19(+4), DEX13(+1), MIND16(+3)
Skills: all @ 10
CR: 12
A huge eye opens in this conical creature's front, just above a toothy mouth. Long strands of fibrous material whip from its sides. A roper stands some 9 feet tall and tapers from 3 or 4 feet in diameter at the base to 1 foot across at the top. It weighs 2,200 pounds. A roper's coloration and temperature change to match the features of the surrounding cave.

SCORPION, HUGE – Huge Vermin
Hit Dice: 10d8+30 (75)
Speed: 10
AC: 20 (-2 size, +12 natural)
Attack/Damage: 2 Claws +11 (1d8+6) and Sting +6 (2d4+3 poison)
Special Attacks: Grab – if claw attack hits may grab and constrict Constrict – on a successful grapple deals constrict damage (1d8+6) Poison – 1d6STR/ 1d6STR (Fort. DC18 neg.)
Special Qualities: Darkvision 60 ft., tremorsense 60 ft., vermin traits

Abilities: STR23(+6), DEX10, MIND10
Skills: all @ 10
CR: 7
<i>Monstrous scorpions are likely to attack any creature that approaches, and they usually charge when attacking prey.</i>

Monsters Hit Dice 11

CLAY GOLEM – Large Construct
Hit Dice: 11d10+30 (90)
Speed: 4
AC: 22 (-1 size, -1 DEX, +14 natural)
Attack/Damage: 2 Slams +14 (2d10+7 & cursed wound)
Special Attacks: Cursed wound - The damage a clay golem deals doesn't heal naturally and resists healing spells. Casting a healing spell on a creature damaged by a clay golem must succeed on a DC 26 caster level check, or the spell has no effect.
Special Qualities: Construct traits, damage reduction 10/ adamantite and bludgeoning, darkvision 60 ft., haste 1x/day as the spell, immunity magic or spell-like abilities with spell resistance, low-light vision
Abilities: STR25 (+7), DEX9, MIND11
Skills: all @ 11
CR: 10
<i>This lumbering figure is sculpted from soft clay. It wears filthy rags and its face is only vaguely humanoid. A clay golem cannot speak or make any vocal noise. It walks and moves with a slow, clumsy gait. It weighs around 600 pounds.</i>

GUARDIAN NAGA – Large Aberration
Hit Dice: 11d8+44 (93)
Speed: 8
AC: 18 (-1 size, +2 DEX, +7 natural)
Attack/Damage: Bite +12 (2d6+7 & poison) or Spit +9 (poison)
Special Attacks: Poison – 1d10STR/ 1d10STR (Fort. DC19 neg.) Spit – 30' touch attack (poison) Spells – Cleric and Wizard
Special Qualities: Darkvision 60 ft.
Abilities: STR21 (+5), DEX14(+2), MIND19(+4)
Skills: all @ 11
CR: 10
<i>A contemplative humanoid face framed by a cobra-like hood adorns the body of this long, brightly colored serpent.</i>

LICH - Medium Undead
Hit Dice: 11d12 (66)

Speed: 6
AC: 23 (+2 DEX, +4 chain shirt, +5 natural, +2 deflection)
Attack/Damage: Touch +5 (1d8+5 negative energy & paralysis)
Special Attacks: Paralysis – permanent (Fort. DC18 neg.) Spells – Cleric, or, Wizard.
Special Qualities: Turn resistance +4, damage reduction 15/ bludgeoning or magic, immunity cold, electricity, polymorph and mind affecting attacks.
Abilities: STR10, DEX14(+2), MIND 22 (+6)
Skills: all @ 11
CR: 12
<i>A lich is an undead spellcaster, usually a wizard but sometimes a cleric, who has used its magical powers to unnaturally extend its life. A lich is a gaunt and skeletal humanoid with withered flesh stretched tight across horribly visible bones. Its eyes have long ago been lost to decay, but bright pinpoints of crimson light burn on in the empty sockets. Once fine robes hang in tatters from this withered corpse's frame.</i>

Monsters Hit Die 12

BARBED DEVIL (HAMATULA) – Medium Outsider
Hit Dice: 12d8+72 (126)
Speed: 6
AC: 29 (+6 DEX, +13 natural)
Attack/Damage: 2 Claws +18 (2d8+6 & fear & grab)
Special Attacks: Fear – on successful attack, as the spell, (Will DC20 neg.) Grab – on successful claw attack may grapple and impale Impale - A barbed devil deals 3d8+9 points of piercing damage to a grabbed opponent with a successful grapple check.
Special Qualities: Barbed defense - Any creature striking a barbed devil with handheld weapons or natural weapons takes 1d8+6 points of piercing and slashing damage from the devil's barbs. Note that weapons with exceptional reach, such as longswords, do not endanger their users in this way, damage reduction 10/ good, darkvision 60 ft., immunity fire/ poison, resistance acid/ cold 10, spell resistance 23, spell-like abilities – teleport, telepathy
Abilities: STR23 (+6), DEX23(+6), MIND14(+2)
Skills: all @ 12
CR: 11
<i>From the tip of its lashing tail to the serrated features of its fang-filled visage, this fiery-eyed sentinel bristles with barbs. A barbed devil is about 7 feet tall and weighs about 300 pounds.</i>

DIRE BEAR - Large Animal
Hit Dice: 12d8+51 (105)
Speed: 8
AC: 17 (-1 size, +1 DEX, +7 natural)
Attack/Damage: 2 Claws +19 (2d4+10 & grab) and Bite +13 (2d8+5)
Special Attacks: Grab – if hits with claw attack may grapple
Special Qualities: Low-light vision, scent
Abilities: STR31(+10), DEX13(+1), MIND 12(+1)
Skills: all @ 14
CR: 7
<i>Spittle drips from this feral bear's roaring maw, and its matted fur is broken in places by wicked, bony growths. The omnivorous dire bear usually does not bother creatures that try to avoid it, but will aggressively defend a kill or other source of food. It will not hesitate to rip apart anything that might contain something edible. A typical dire bear is 12 feet long and weighs as much as 8,000 pounds.</i>

HILL GIANT - Large Giant
Hit Dice: 12d8+48 (102)
Speed: 6
AC: 20 (-1 size, -1 DEX, +9 natural, +3 hide armor)
Attack/Damage: Greatclub +16/+11 (2d8+10) or 2 Slams +15 (1d4+7) or Rock +8 (2d6+7)
Special Attacks: Rock Throwing
Special Qualities: Low-light vision, rock catching
Abilities: STR25(+7), DEX8(-1), MIND 10
Skills: all @ 12
CR: 7
<i>This hunched giant exudes power and a crude, stupid anger, its filthy fur clothing bespeaking a brutish and backwoods lifestyle. Skin color among hill giants ranges from light tan to deep ruddy brown. Their hair is brown or black, with eyes the same color. Hill giants wear layers of crudely prepared hides with the fur left on. They seldom wash or repair their garments, preferring to simply add more hides as their old ones wear out. Adults are about 10½ feet tall and weigh about 1,100 pounds. Hill giants can live to be 200 years old.</i>

HYDRA (12 heads) - Huge Magical Hydra
Hit Dice: 12d10+63 (129)
Speed: 4/4 (swim)
AC: 22 (-2 size, +1 DEX, +13 natural)
Attack/Damage: 12 Bites +17 (2d8+6)
Special Qualities: Darkvision 60 ft., fast healing 22, low-light vision, scent
Abilities: STR23(+6), DEX12(+1), MIND10

Skills: all @ 12
CR: 11
<i>Hydras are reptile-like monsters with multiple heads. A hydra is gray-brown to dark brown, with a light yellow or tan underbelly. The eyes are amber and the teeth are yellow-white. It is about 20 feet long and weighs about 4,000 pounds.</i>

Monsters Hit Die 13

DRAGON, RED (Old) – Gargantuan Dragon
Hit Dice: 23d12+161 (310)
Speed: 8/50 (fly)
AC: 23 (-1 size, -1 DEX, +8 natural, +7 half-plate armor)
Attack/Damage: Bite +32 (4d6+19) and 2 Claws +32 (2d8+13) and 2 Wings +30 (2d6+6) and Tail Slap +30 (2d8+19)
Special Attacks: Breath Weapon – 60 ft. cone 18d10 fire (Reflex DC31 ½) Tail Sweep – 30 ft. (2d6+19)(Reflex DC31 ½)
Special Qualities: Immunity fire, low-light vision, rock catching, vulnerability cold
Abilities: STR31 (+10), DEX9, MIND11
Skills: all @ 16
CR: 10
<i>This lumbering giant has short stumpy legs and powerful, muscular arms. Its hair and beard seem to be made of fire. Some fire giants have bright orange hair. An adult male is 12 feet tall, has a chest that measures 9 feet around, and weighs about 7,000 pounds. Females are slightly shorter and lighter. Fire giants can live to be 350 years old. Fire giants wear sturdy cloth or leather garments colored red, orange, yellow, or black. Warriors wear helmets and half-plate armor of blackened steel.</i>

Monsters Hit Die 14

FROST GIANT - Large Giant
Hit Dice: 14d8+70 (133)
Speed: 8
AC: 21 (-1 size, -1 DEX, +9 natural, +4 chain shirt)
Attack/Damage: Greataxe +18/+13 (3d6+13) or 2 Slams +18 (1d4+9) or Rock +9 (2d6+9)
Special Attacks: Rock Throwing
Special Qualities: Immunity cold, low-light vision, rock catching vulnerability fire
Abilities: STR29(+9), DEX9, MIND 14 (+2)
Skills: all @ 14
CR: 9
<i>This giant looks like a thick, muscular human. It has</i>

frost-white skin and long, light blue hair that it wears braided. A frost giant's hair can be light blue or dirty yellow, and its eyes usually match its hair color. Frost giants dress in skins and pelts, along with any jewelry they own. Frost giant warriors add chain shirts and metal helmets decorated with horns or feathers. An adult male is about 15 feet tall and weighs about 2,800 pounds. Females are slightly shorter and lighter, but otherwise identical with males. Frost giants can live to be 250 years old.

FROST WORM – Huge Magical Beast
Hit Dice: 14d10+70 (147)
Speed: 6/2 (burrow)
AC: 18 (-2 size, +10 natural)
Attack/Damage: Bite +21 (2d8+12 & 1d8 cold)
Special Attacks: Cold - A frost worm's body generates intense cold, causing opponents to take an extra 1d8 points of cold damage every time the creature succeeds on a bite attack. Creatures attacking a frost worm unarmed take this same cold damage each time one of their attacks hits. Trill - This sonic mind-affect affects all creatures within a 100-foot radius. Creatures must succeed on a DC 17 Will save or be stunned for as long as the worm trills and for 1d4 rounds thereafter, even if they are attacked. However, if attacked or violently shaken (a full-round action), a victim is allowed another saving throw. Breath Weapon - 30-foot cone, 1x/hr., damage 15d6 cold, (Reflex DC22 ½). Opponents held motionless by the frost worm's trill get no saving throw.
Special Qualities: Darkvision 60 ft., immunity cold, low-light vision, vulnerability fire
Abilities: STR26 (+8), DEX10, MIND11
Skills: all @ 14
CR: 12
<i>This immense white worm has a single circular eye in the center of its head. Wisps of icy fog waft up from between its mandibles. A frost worm is about 40 feet long, 5 feet in diameter, and weighs about 8,000 pounds.</i>

STONE GIANT - Large Giant**Hit Dice:** 14d8+56 (119)**Speed:** 6**AC:** 25 (-1 size, +2 DEX, +11 natural, +3 hide)**Attack/Damage:**
Greatclub +17/+12 (2d8+12) or
2 Slams +17 (1d4+8) or
Rock +11 (2d8+12)**Special Attacks:**

Rock Throwing

Special Qualities:

Darkvision 60 ft., low-light vision, rock catching

Abilities:

STR27(+8), DEX15(+2), MIND 12 (+1)

Skills: all @ 14**CR:** 8*This giant has chiseled, muscular features and a flat, forward-sloping head, looking almost as if it were carved of stone. Stone giants prefer thick leather garments, dyed in shades of brown and gray to match the stone around them. Adults are about 12 feet tall and weigh about 1,500 pounds. Stone giants can live to be 800 years old.***STONE GOLEM - Large Construct****Hit Dice:** 14d10+30 (107)**Speed:** 4**AC:** 26 (-1 size, -1 DEX, +18 natural)**Attack/Damage:**
2 Slams +18 (2d10+9)**Special Attacks:**

Slow – 10 ft., as the spell, 1x/2 rnds., lasts 7 rnds., (Will DC17 neg.)

Special Qualities:

Construct traits, damage reduction 10/adamantine, darkvision 60 ft., immunity magic and spell-like abilities with spell resistance, low-light vision

Abilities:

STR29(+9), DEX9, MIND 11

Skills: all @ 14**CR:** 11*This towering stone automaton bears the likeness of an archaic, armored warrior. It moves with ponderous but inexorable steps. This golem has a humanoid body made from stone. A stone golem is 9 feet tall and weighs around 2,000 pounds. Its body is frequently stylized to suit its creator. For example, it might look like it is wearing armor, with a particular symbol carved on the breastplate, or have designs worked into the stone of its limbs.*

Monsters Hit Die 15

FIRE GIANT – Large Giant**Hit Dice:** 16d8+64 (136)**Speed:** 6**AC:** 23 (-1 size, -1 DEX, +8 natural, +7 half-plate armor)**Attack/Damage:**Greatsword +20/+15/+10 (3d6+15) or
2 Slams +20 (1d4+10) or
Rock +10 (2d6+10 & 2d6 fire)**Special Attacks:**

Rock Throwing

Special Qualities:

Immunity fire, low-light vision, rock catching, vulnerability cold

Abilities:

STR31 (+10), DEX9, MIND11

Skills: all @ 16**CR:** 10*This lumbering giant has short stumpy legs and powerful, muscular arms. Its hair and beard seem to be made of fire. Some fire giants have bright orange hair. An adult male is 12 feet tall, has a chest that measures 9 feet around, and weighs about 7,000 pounds. Females are slightly shorter and lighter. Fire giants can live to be 350 years old. Fire giants wear sturdy cloth or leather garments colored red, orange, yellow, or black. Warriors wear helmets and half-plate armor of blackened steel.*

Monsters Hit Die 16

AIR ELEMENTAL – Huge Elemental**Hit Dice:** 16d8+64 (136)**Speed:** 20 (fly)**AC:** 21 (-2 size, +9 DEX, +4 natural)**Attack/Damage:**

2 Slams +19 (2d8+4)

Special Attacks:

Air mastery - Airborne creatures take a -1 penalty on attack and damage rolls against an air elemental.

Whirlwind – 50 ft. tall (see Monster Special Abilities)

Special Qualities:

Damage reduction 5/-, darkvision 60 ft., elemental traits

Abilities:

STR18 (+5), DEX29(+9), MIND11

Skills: all @ 16**CR:** 7*This cloud-like creature has dark hollows reminiscent of eyes and a mouth, and a howling wind whips it into ominous shapes.***EARTH ELEMENTAL – Huge Elemental****Hit Dice:** 16d8+80 (152)**Speed:** 6**AC:** 18 (-2 size, -1 DEX, +11 natural)**Attack/Damage:**

2 Slams +19 (2d10+9)

Special Attacks:Earth mastery - An earth elemental gains a +1 bonus on attack and damage rolls if both it and its foe are touching the ground. If an opponent is airborne or waterborne, the elemental takes a -4 penalty on attack and damage rolls.
Push – An earth elemental can start a bull rush maneuver and the combat modifiers given in Earth Mastery, above, also apply to the elemental's opposed Strength checks.**Special Qualities:**

Damage reduction 5/-, darkvision 60 ft.,

earth glide, elemental traits

Abilities:

STR29 (+9), DEX8(-1), MIND11

Skills: all @ 16**CR:** 7*This hulking, roughly humanoid creature of dirt and stone explodes up from the earth, faceless save for two glowing gemstone eyes.***FIRE ELEMENTAL – Huge Elemental****Hit Dice:** 16d8+64 (136)**Speed:** 12**AC:** 19 (-2 size, +7 DEX, +4 natural)**Attack/Damage:**

2 Slams +17 (2d8+4 & 2d8 fire (Burn))

Special Attacks:

Burn - A fire elemental's slam attack deals bludgeoning damage plus fire damage from the elemental's flaming body. Those hit by a fire elemental's slam attack also must succeed on a Reflex save, DC22, or catch on fire. The flame burns for 1d4 rounds. A burning creature can take a move action to put out the flame.

Special Qualities:

Damage reduction 5/-, darkvision 60 ft., elemental traits, immunity fire, vulnerability cold

Abilities:

STR18 (+4), DEX17(+3), MIND11

Skills: all @ 16**CR:** 7*This creature looks like a living, mobile bonfire, tongues of flame reaching out in search of things to burn.*

PURPLE WORM – Gargantuan Magical Beast**Hit Dice:** 16d10+112 (200)**Speed:** 4/4/2 (borrow/swim)**AC:** 19 (-4 size, -2 DEX, +15 natural)**Attack/Damage:**Bite +25 (2d8+12 & grab) and
Sting +20 (2d6+6 & poison)**Special Attacks:**

Grab – if bite attacks hits may grapple
Swallow Whole - can try to swallow a grabbed opponent of a smaller size than itself by making a successful grapple check. Once inside, the opponent takes 2d8+12 points of crushing damage plus 8 points of acid damage per round from the worm's gizzard. A swallowed creature can cut its way out by using a light slashing or piercing weapon to deal 25 points of damage to the gizzard (AC 17).

Poison – 1d6STR/ 2d6STR (Fort. DC25 neg.)

Special Qualities:

Tremorsense 60 ft.

Abilities:

STR35 (+12), DEX6(-2), MIND8(-1)

Skills: all @ 16**CR:** 12

This enormous worm is covered with dark purple plates of chitinous armor. Its giant, tooth-filled mouth is the size of an ox. The body of a mature purple worm is 5 feet in diameter and 80 feet long, weighing about 40,000 pounds. The creature has a poisonous stinger in its tail.

WATER ELEMENTAL – Huge Elemental**Hit Dice:** 16d8+80 (152)**Speed:** 6/22 (swim)**AC:** 21 (-2 size, +4 DEX, +9 natural)**Attack/Damage:**

2 Slams +17 (2d10+7)

Special Attacks:

Water Mastery - A water elemental gains a +1 bonus on attack and damage rolls if both it and its opponent are touching water. If the opponent or the elemental is touching the ground, the elemental takes a -4 penalty on attack and damage rolls.

An elemental can easily overturn small craft (5 feet of length per Hit Die of the elemental).

Drench - The elemental's touch puts out torches, campfires, exposed lanterns, and other open flames of nonmagical origin. The creature can dispel magical fire it touches as dispel magic (caster level equals elemental's HD).

Vortex – A whirlpool, 50 ft. tall, with same traits as a Whirlwind (see Monster Special Abilities)

Special Qualities:

Damage reduction 5/–, darkvision 60 ft.,

elemental traits

Abilities:

STR24 (+7), DEX18(+4), MIND11

Skills: all @ 16**CR:** 7

This translucent creature's shape shifts between a spinning column of water and a crashing wave.

Monsters Hit Die 17

CLOUD GIANT – Huge Giant**Hit Dice:** 17d8+102 (178)**Speed:** 10**AC:** 25 (-2 size, +1 DEX, +12 natural, +4 chain shirt)**Attack/Damage:**Gargantuan Morningstar +22/+17/+12 (4d6+18) or
2 Slams +22 (1d6+12) or
Rock +12 (2d8+12)**Special Attacks:**

Rock throwing – (see Monster Special Abilities)

Spell-like Abilities – levitate/ fog cloud

Special Qualities:

Low-light vision, rock catching, scent

Abilities:

STR35 (+12), DEX13(+1), MIND16(+3)

Skills: all @ 17**CR:** 11

Cloud giants' skin ranges in color from milky white to light sky blue. Their hair is silvery white or brass, and their eyes are iridescent blue. Adult males are about 18 feet tall and weigh about 5,000 pounds. Females are slightly shorter and lighter. Cloud giants can live to be 400 years old. Cloud giants dress in the finest clothing available and wear jewelry. To many, appearance indicates station. The better the clothes and the finer the jewelry, the more important the wearer. They also appreciate music, and most can play one or more instruments (the harp is a favorite).

Monsters Hit Die 18

IRON GOLEM – Large Construct**Hit Dice:** 18d10+30 (129)**Speed:** 4**AC:** 30 (-1 size, -1 DEX, +22 natural)**Attack/Damage:**

2 Slams +23 (2d10+11)

Special Attacks:

Breath Weapon – 10 ft. cube poisonous gas, lasts 1 rnd., 1d4STR/ 3d4STR (Fort. DC19 neg.)

Special Qualities:

Construct traits, damage reduction 15/ adamantine, darkvision 60 ft., immunity magic and spell-like abilities with spell resistance, low-light vision

Abilities:

STR33 (+11), DEX9, MIND11

Skills: all @ 18**CR:** 13

This iron automaton stands twice as tall as a normal human. Its heavy footsteps shake the ground with

*bone-jarring force.***ROC – Gargantuan Animal****Hit Dice:** 18d8+126 (207)**Speed:** 4/16 (fly)**AC:** 17 (-4 size, +2 DEX, +9 natural)**Attack/Damage:**2 Talons +21 (2d6+12) and
Bite +19 (2d8+6)**Special Qualities:**

Low-light vision

Abilities:

STR34 (+12), DEX15(+2), MIND13(+1)

Skills: all @ 18**CR:** 9

This immense raptor unleashes a shrill cry as it bares its talons, each large enough to carry off a horse.

Monsters Hit Die 19

STORM GIANT – Huge Giant**Hit Dice:** 19d8+114 (199)**Speed:** 7/6 (swim)**AC:** 27 (-2 size, +2 DEX, +12 natural, +5 breastplate)**Attack/Damage:**Greatsword +26/+21/+16 (4d6+21) or
2 Slams +26 (1d6+14) or
Longbow +14/+9/+4 (3d6+14)**Special Attacks:**

Spell-like abilities – chain lightning/ levitate

Special Qualities:

Freedom of movement - Storm giants have a continuous freedom of movement ability as the spell, immunity electricity, low-light vision, rock catching, water breathing

Abilities:

STR39 (+14), DEX14(+2), MIND20(+5)

Skills: all @ 19**CR:** 13

This giant is a towering, muscular human of heroic proportions, with bronze skin, dark hair, and sparkling green eyes. Adults are about 21 feet tall and weigh about 12,000 pounds. Storm giants can live to be 600 years old. Storm giants' garb is usually a short, loose tunic belted at the waist, sandals or bare feet, and a headband. They wear a few pieces of simple but finely crafted jewelry, anklets (favored by barefoot giants), rings, or circlets being most common. They live quiet, reflective lives and spend their time musing about the world, composing and playing music, and tilling their land or gathering food.

Monsters Hit Die 20

BALOR – Large Outsider
Hit Dice: 20d8+200 (290)
Speed: 8/18 (fly)
AC: 35 (-1 size, +7 DEX, +19 natural)
Attack/Damage: +1 vorpal longsword +31/+26/+21/+16 (2d6+13) and +1 Flaming Whip +30/+25 (1d4+6 & 1d6 fire & entangle) or 2 Slams +31 (1d10+12)
Special Attacks: Entangle – A balor's +1 flaming whip entangles foes much like an attack with a net. The whip has 20 hit points. If it hits, the target and the Balor immediately make opposed Strength checks; if the balor wins, it drags the target against its flaming body (see below). The target remains anchored against the balor's body until it escapes the whip. Spell-Like Abilities – teleport/ un(Holy) Aura/ Implosion Vorpal Sword – On a natural 20 severs foes head.
Special Qualities: Damage reduction 15/ cold iron and good, darkvision 60 ft., flaming body - The body of a balor is wreathed in flame. Anyone grappling a Balor takes 6d6 points of fire damage each round, immunity electricity/ fire/ poison, resistance acid/ cold 10, spell resistance 28, telepathy, true seeing - Balors have a continuous <i>true seeing</i> ability, as the spell CL5.
Abilities: STR35 (+12), DEX25(+7), MIND24(+7)
Skills: all @ 20
CR: 20
This winged fiend's horned head and fanged visage present the perfection of the demonic form, about 12 feet tall and dark red skin with fire spurting from its flesh.

KRAKEN – Gargantuan Magical Beast (Aquatic)
Hit Dice: 20d10+180 (290)
Speed: 4 (swim)
AC: 20 (-4 size, +14 natural)
Attack/Damage: 2 Tentacles +28 (2d8+12 & grab) and 6 Arms +23 (1d6+6 & grab) and Bite +23 (4d6+6)
Special Attacks: Grab – if tentacles or arm attack hits may start grapple and constrict. Constrict – a Kraken deals automatic constrict damage (2d8+12 or 1d6+6) with a successful grapple check.
Special Qualities: Darkvision 60 ft., ink cloud - A kraken

can emit a cloud of jet-black ink in an 80-foot spread once per minute as a free action. The cloud provides total concealment and creatures within the cloud are considered to be in darkness, jet - A kraken can jet backward once per round as a full-round action, at a speed of 280 feet, spell-like abilities - resist energy

Abilities: STR34 (+12), DEX10(+1), MIND21(+5)
Skills: all @ 20
CR: 12
<i>This tremendous leviathan resembles a vast squid, yet the markings on its body are strangely unsettling to look upon. Six of the beast's tentacles are shorter arms about 30 feet long; the remaining two are nearly 60 feet long and covered with barbs. Its beaklike mouth is located where the tentacles meet the lower portion of its body.</i>

TITAN – Huge Outsider
Hit Dice: 20d8+280 (370)
Speed: 8
AC: 38 (-2 size, +19 natural, +11 +4 half-plate armor)
Attack/Damage: Gargantuan +3 adamantite warhammer +37/+32/+27/+22 (4d6+27) or Javelin +22 (2d6+19) or 2 Slams +34 (1d8+16)
Special Attacks: Spell-like abilities – chain lightning/ levitate/ meteor swarm
Special Qualities: Change shape – any small or med. humanoid, damage reduction 15/ good, darkvision 60 ft., spell resistance 32
Abilities: STR43(+16), DEX12(+1), MIND28(+9)
Skills: all @ 20
CR: 21
<i>This titanic humanoid wears gilt-edged armor of ancient make and carries an immense hammer made of gleaming metal. A Titan is about 25 feet tall and weighs about 14,000 pounds.</i>

Monsters Hit Die 24

AIR ELEMENTAL ELDER – Huge Elemental
Hit Dice: 24d8+96 (204)
Speed: 20 (fly)
AC: 27 (-2 size, +11 DEX, +8 natural)
Attack/Damage: 2 Slams +27 (2d6+6)
Special Attacks: Air mastery - Airborne creatures take a -1 penalty on attack and damage rolls against an air elemental. Whirlwind – 30 ft. tall (see Monster Special Abilities)
Special Qualities: Damage reduction 10/-, darkvision 60 ft., elemental traits

Abilities: STR22 (+6), DEX33(+11), MIND11
Skills: all @ 24
CR: 11
<i>This cloud-like creature has dark hollows reminiscent of eyes and a mouth, and a howling wind whips it into ominous shapes.</i>

EARTH ELEMENTAL – Huge Elemental
Hit Dice: 24d8+120 (228)
Speed: 6
AC: 22 (-2 size, -1 DEX, +15 natural)
Attack/Damage: 2 Slams +27 (2d10+11)
Special Attacks: Earth mastery - An earth elemental gains a +1 bonus on attack and damage rolls if both it and its foe are touching the ground. If an opponent is airborne or waterborne, the elemental takes a -4 penalty on attack and damage rolls. Push – An earth elemental can start a bull rush maneuver and the combat modifiers given in Earth Mastery, above, also apply to the elemental's opposed Strength checks.
Special Qualities: Damage reduction 10/-, darkvision 60 ft., earth glide, elemental traits
Abilities: STR33 (+11), DEX8(-1), MIND11
Skills: all @ 24
CR: 11
<i>This hulking, roughly humanoid creature of dirt and stone explodes up from the earth, faceless save for two glowing gemstone eyes.</i>

FIRE ELEMENTAL ELDER – Huge Elemental
Hit Dice: 24d8+96 (204)
Speed: 12
AC: 25 (-2 size, +9 DEX, +8 natural)
Attack/Damage: 2 Slams +26 (2d8+6 & 2d8 fire (Burn))
Special Attacks: Burn - A fire elemental's slam attack deals bludgeoning damage plus fire damage from the elemental's flaming body. Those hit by a fire elemental's slam attack also must succeed on a Reflex save, DC26, or catch on fire. The flame burns for 1d4 rounds. A burning creature can take a move action to put out the flame.
Special Qualities: Damage reduction 10/-, darkvision 60 ft., elemental traits, immunity fire, vulnerability cold
Abilities: STR22 (+6), DEX29(+9), MIND11
Skills: all @ 24
CR: 11
<i>This creature looks like a living, mobile bonfire, tongues of flame reaching out in search of things to burn.</i>

WATER ELEMENTAL ELDER – Huge Elemental

Hit Dice: 24d8+120 (228)

Speed: 6/22 (swim)

AC: 23 (-2 size, +6 DEX, +9 natural)

Attack/Damage:

2 Slams +25 (2d10+9)

Special Attacks:

Water Mastery - A water elemental gains a +1 bonus on attack and damage rolls if both it and its opponent are touching water. If the opponent or the elemental is touching the ground, the elemental takes a -4 penalty on attack and damage rolls.

An elemental can easily overturn small craft (5 feet of length per Hit Die of the elemental).

Drench - The elemental's touch puts out torches, campfires, exposed lanterns, and other open flames of nonmagical origin. The creature can dispel magical fire it touches as dispel magic (caster level equals elemental's HD).

Vortex - A whirlpool, 40 ft. tall, with same traits as a Whirlwind (see Monster Special Abilities)

Special Qualities:

Damage reduction 10/-, darkvision 60 ft., elemental traits

Abilities:

STR28 (+9), DEX22(+6), MIND11

Skills: all @ 24

CR: 11

This translucent creature's shape shifts between a spinning column of water and a crashing wave.

Monsters Hit Die 31

DRAGON, RED (Very Old) – Gargantuan Dragon

Hit Dice: 31d12+248 (449)

Speed: 8/40 (fly)

AC: 36 (-4 size, +30 natural)

Attack/Damage:

Bite +40 (4d6+19) and
2 Claws +35 (2d8+13) and
2 Wings +35 (2d6+6) and
Tail Slap +35 (2d8+19)

Special Attacks:

Breath Weapon - Cone of fire, 60 feet long, every 1d4 rounds; damage 18d10, Reflex half DC 33.

Frightful Presence - Dragons can unsettle foes with their mere presence. This ability takes effect automatically (radius 270 ft) whenever the dragon attacks, charges, or flies overhead. A potentially affected creature (one with less than 31 HD) that succeeds at a Will save (DC 31) remains immune to that

dragon's frightful presence for one day. On a failure, creatures with 4 or fewer HD become panicked for 4d6 rounds and those with more than 5 HD become shaken for 4d6 rounds.

Spells - Wiz

Special Qualities:

Damage reduction 15/magic, blindsense 60 ft., darkvision 120 ft., immunity fire/sleep/paralysis, vulnerability cold, spell resistance 26

Abilities:

STR37(+13), DEX10, MIND23(+6)

Skills: all @ 31

CR: 21

The small scales of a wyrmling Red Dragon are a bright glossy scarlet, making the dragon easily spotted by predators and hunters, so it stays underground and does not venture outside until it is more able to take care of itself. Toward the end of young age, the scales turn a deeper red, and the glossy texture is replaced by a smooth, dull finish. As the dragon grows older, the scales become large, thick, and as strong as metal. The neck frill and wings are an ash blue or purple-gray toward the edges, becoming darker with age. The pupils of a red dragon fade as it ages; the oldest red dragons have eyes that resemble molten lava orbs.

Monsters Hit Die 48

TERRASQUE – Colossal Magical Beast

Hit Dice: 48d10+594 (858)

Speed: 4

AC: 35 (-8 size, +3 DEX, +30 natural)

Attack/Damage:

Bite +57 (4d8+17 & grab) and
2 Horns +52 (1d10+8) and
2 Claws +52 (1d12+8) and
Tail Slap +52 (3d8+8)

Special Attacks:

Augmented critical - The Tarrasque's bite threatens a critical hit on a natural attack roll of 18-20, dealing triple damage on a successful critical hit.

Grab - if bite attack successful may grapple and swallow whole

Swallow Whole - The Tarrasque can try to swallow a grabbed opponent of Huge or smaller size by making a successful grapple check. Once inside, the opponent takes 2d8+8 points of crushing damage plus 2d8+6 points of acid damage per round from the Tarrasque's digestive juices. A swallowed creature can cut its way out by dealing 50 points of damage to the Tarrasque's digestive tract (AC 25).

Frightful Presence - can inspire terror by charging or attacking causing shaken condition (Will DC36 neg.) until 60 ft. away.

Rush - 1x/min. can move at Speed 30

Special Qualities:

Carapace - The Tarrasque's armor-like carapace is exceptionally tough and highly reflective, deflecting all rays,

lines, cones, and even *magic missile* spells. There is a 30% chance of reflecting any such effect back at the caster; otherwise, it is merely negated. Check for reflection before rolling to overcome the creature's spell resistance, damage reduction 15/-, immunity fire, poison, disease, energy drain and ability damage, regeneration 40, scent, spell resistance 32

Abilities:

STR45(+17), DEX16(+3), MIND14(+2)

Skills: all @ 48

CR: 20

This immense reptilian beast towers over the surroundings like a dinosaur, all teeth and horns and claws and thrashing spiked tail. The Tarrasque is 70 feet long and 50 feet tall, and it weighs about 130 tons.

Monster Special Attacks and Qualities

Ability Damage and Drain - Some attacks or special abilities cause ability damage or drain, reducing the designated ability score by the listed amount. While ability damage can be healed naturally, ability drain is permanent and can only be restored through magic.

All-Around Vision - The creature sees in all directions at once. It cannot be flanked.

Amorphous - The creature's body is malleable and shapeless. It is immune to precision damage (like sneak attacks) and critical hits.

Amphibious - Creatures with this special quality have the aquatic subtype, but they can survive indefinitely on land.

Alternate Form - A creature with this special quality has the ability to assume one or more specific alternate forms.

Antimagic - An antimagic field spell or effect cancels magic altogether.

Attach - The creature automatically latches onto its target when it successfully makes the listed attack. The creature is considered grappling, but the target is not.

Blindsense - Using non-visual senses, such as acute smell or hearing, a creature with blindsense notices things it cannot see.

Blindsight - This ability is similar to blindsense, but is far more discerning. Using non-visual senses, such as sensitivity to vibrations, keen smell, acute hearing, or echolocation, a creature with blindsight maneuvers and fights as well as a sighted creature.

Blood Drain - The creature drains blood at the end of its turn if it grapples a foe, inflicting Strength damage.

Breath Weapon - Some creatures can exhale a cone, line, or cloud of energy or other magical effects.

Burn - A creature with the burn special attack deals fire damage in addition to damage dealt on a successful hit in melee. A creature affected by the burn ability must also succeed on a Reflex save or catch fire, taking the listed damage at the start of its turn for an additional 1d4 rounds. A burning creature can attempt a new save as a full-round action. Dropping and rolling on the ground grants a +4 bonus on this save.

Burrow - A creature with a burrow speed can tunnel through dirt, but not through rock unless the descriptive text says otherwise

Change Shape - A creature with this special quality has the ability to assume the appearance of a specific creature or type of creature (usually a humanoid), but retains most of its own physical qualities.

Charm and Compulsion - A charm makes the subject a friend of the caster; a compulsion makes the subject obey the caster.

Climb - Such a creature retains its Dexterity bonus to Armor Class (if any) while climbing, and opponents get no special bonus to their attacks against it. It cannot, however, use the run action while climbing.

Constrict - A creature with this special attack can crush an opponent, dealing bludgeoning damage, when it makes a successful grapple check.

Construct Traits - Constructs are immune to death effects, disease, mind-affecting effects (charms, compulsions, phantasms, patterns, and morale effects), necromancy effects, paralysis, poison, sleep, stun, and any effect that requires a Fortitude save (unless the effect also works on objects, or is harmless). Constructs are not subject to nonlethal damage,

ability damage, ability drain, fatigue, exhaustion, or energy drain. Constructs are not at risk of death from massive damage.

Curse of Lycanthropy - A natural lycanthrope's bite attack in animal or hybrid form infects a humanoid target with lycanthropy (Fortitude DC 15 negates).

Damage Reduction (DR) - A creature with this special quality ignores damage from most weapons and natural attacks. The creature takes normal damage from spells. The entry indicates the amount of damage ignored (usually 5 to 15 points) and the type of weapon that negates the ability. When a damage reduction entry has a dash (—) after the slash, no weapon negates the damage reduction.

Darkvision - Darkvision is the extraordinary ability to see with no light source at all, out to a range specified for the creature.

Death Attacks - In most cases, a death attack allows the victim a Fortitude save to avoid the affect, but if the save fails, the character dies instantly.

Disease - A creature with this ability causes disease in those it contacts. The effects of the disease, including its save, frequency, and cure, are included in the creature's description

Earth Glide - When the creature burrows, it can pass through stone, dirt, or almost any other sort of earth except metal as easily as a fish swims through water.

Elemental Traits - Immunity to poison, sleep effects, paralysis, and stunning. Not subject to critical hits or flanking.

Energy Drain - This attack saps a living opponent's vital energy and happens automatically when a melee or ranged attack hits. Each successful energy drain bestows one or more negative levels. A draining creature

gains 5 temporary hit points for each negative level it bestows on an opponent.

Engulf - The creature can engulf creatures in its path as part of a standard action. Engulfed opponents gain the pinned condition, are in danger of suffocating, are trapped within the creature's body until they are no longer pinned, and may be subject to other special attacks from the creature.

Etherealness - Ethereal creatures are invisible, inaudible, insubstantial, and scentless to creatures on the Material Plane. Even most magical attacks have no effect on them. Invisibility and true seeing reveal ethereal creatures.

Even if a creature on the Material Plane can see an ethereal creature the ethereal creature is on another plane. Only force effects can affect the ethereal creatures. If, on the other hand, both creatures are ethereal, they can affect each other normally.

A force effect originating on the Material Plane extends onto the Ethereal Plane, so that a wall of force blocks an ethereal creature, and a magic missile can strike one (provided the spellcaster can see the ethereal target). Gaze effects and abjurations also extend from the Material Plane to the Ethereal Plane. None of these effects extend from the Ethereal Plane to the Material Plane.

Evasion and Improved Evasion - If subjected to an attack that allows a Reflex save for half damage, a character with evasion takes no damage on a successful save. Improved evasion is like evasion, except that even on a failed saving throw the character takes only half damage.

Fast Healing - A creature with fast healing regains hit points at an exceptional rate, usually 1 or more hit points per round, as given in the creature's entry

Fear - Fear attacks can have various effects, see below.

Fear Aura – A fear aura is an area effect. The descriptive text gives the size and kind of the area.

Fear Cone and Ray – These effects usually work like the fear spell. All fear attacks are mind-affecting fear effects.

Ferocity - A creature with ferocity remains conscious and can continue fighting even if its hit point total is below 0. The creature is still staggered and loses 1 hit point each round. The creature still dies when its hit point total reaches a negative amount equal to its STR score.

Flight - A creature with this ability can cease or resume flight as a free action.

Freeze - The creature can hold itself so still it appears to be an inanimate object of the appropriate shape (a statue, patch of fungus, and so on).

Frightful Presence - This special quality makes a creature's very presence unsettling to foes. Activating this ability is a free action that is usually part of an attack or charge. Opponents within range who witness the action may become frightened or shaken.

Gaseous Form - Some creatures have the supernatural or spell-like ability to take the form of a cloud of vapor or gas.

Creatures in gaseous form have damage reduction 10/magic. Spells, spell-like abilities, and supernatural abilities affect them normally. Creatures in gaseous form lose all benefit of material armor (including natural armor), though size, Dexterity, deflection bonuses, and armor bonuses from force armor still apply.

Discerning a creature in gaseous form from natural mist requires a DC 15 Spot check.

Creatures in gaseous form attempting to hide in an area with mist, smoke, or other gas gain a +20 bonus.

Gaze - A gaze attack takes effect when foes look at the attacking creature's eyes. Each opponent within range of a gaze attack must attempt a saving throw each round at the beginning of his or her turn in the initiative order. Opponents can avoid the need to make the saving throw by not looking at the creature.

Averting Eyes: The opponent avoids looking at the creature's face, instead looking at its body, watching its shadow, tracking it in a reflective surface, etc. Each round, the opponent has a 50% chance to avoid having to make a saving throw against the gaze attack. The creature with the gaze attack, however, gains concealment against that opponent.

Grab - If a creature with this special attack hits with the indicated attack it deals normal damage and attempts to start a grapple.

A successful hold does not deal any extra damage unless the creature also has the constrict special attack. If the creature does not constrict, each successful grapple check it makes during successive rounds automatically deals the damage indicated for the attack that established the hold. Otherwise, it deals constriction damage as well (the amount is given in the creature's descriptive text).

Creatures with grab receive a +4 bonus on combat maneuver checks made to start and maintain a grapple.

Heat - The creature generates so much heat that its mere touch deals additional fire damage. The creature's metallic melee weapons also conduct this heat.

Hold Breath - The creature can hold its breath for a number of minutes equal to 6 times its Constitution score before it risks drowning.

Immunity - A creature with immunities takes no damage from listed sources.

Incorporeal - An incorporeal creature has no physical body. It can be harmed only by other incorporeal creatures, magic weapons or spells. It is immune to all nonmagical attack forms.

An incorporeal creature's attacks pass through (ignore) natural armor, armor, and shields, although deflection bonuses and force effects (such as mage armor) work normally against it

An incorporeal creature moves silently and cannot be heard with Perception checks if it doesn't wish to be. It has no Strength score, so its Dexterity modifier applies to its melee attacks, ranged attacks. Nonvisual senses, such as scent and blindsight, are either ineffective or only partly effective with regard to incorporeal creatures.

Invisibility - Visually undetectable. An invisible creature gains a +2 bonus on attack rolls against sighted opponents, and ignores its opponents' Dexterity bonuses to AC (if any).

Jet - The creature can swim backward as a full-round action at the listed speed. It must move in a straight line while jetting.

Keen Scent - The creature can notice other creatures by scent in a 180-foot radius underwater and can detect blood in the water at ranges of up to a mile.

Lifesense - The creature notices and locates living creatures within 60 feet, just as if it possessed the blindsight ability.

Light Blindness - Creatures with light blindness are blinded for 1 round if exposed to bright light, such as sunlight or the daylight spell. Such creatures are dazzled as long as they remain in areas of bright light.

Light Sensitivity - Creatures with light sensitivity are dazzled in areas of bright sunlight or within the radius of a daylight spell.

Low-Light Vision - A creature with low-light vision can see twice as far as a human in starlight, moonlight, torchlight, and similar conditions of dim light. It retains the ability to distinguish color and detail under these conditions.

Lycanthropic Empath - In any form, natural lycanthropes can communicate and empathize with animals related to their animal form. They can use Diplomacy to alter such an animal's attitude, and when so doing gain a +4 racial bonus on the check. Afflicted lycanthropes only gain this ability in animal or hybrid form.

Natural Invisibility - This ability is constant—the creature remains invisible at all times, even when attacking. As this ability is inherent, it is not subject to the invisibility purge spell.

Negative Energy Affinity - The creature is alive, but reacts to positive and negative energy as if it were undead—positive energy harms it, negative energy heals it.

Paralysis - This special attack renders the victim immobile. Paralyzed creatures cannot move, speak, or take any physical actions.

Planewalk - These planar travelers like to slip between the folds of space to attack enemies as though from thin air. They can cross from the Ethereal Plane with a move action but take 2 rounds to cross back, during which time they are immobile.

Plant Traits - Plants are immune to all mind-affecting effects (charms, compulsions, morale effects, patterns, and phantasms), paralysis, poison, polymorph, sleep, and stun.

Poison - A creature with this ability can poison those it attacks. The effects of the poison,

including its save, frequency, and cure, are included in the creature's description.

Pounce - When a creature with this special attack makes a charge, it can make a full attack (including rake attacks if the creature also has the rake ability).

Polymorph - Magic can cause creatures and characters to change their shapes—sometimes against their will, but usually to gain an advantage. Polymorphed creatures retain their own minds but have new physical forms.

Powerful Charge - When a creature with this special attack makes a charge, its attack deals extra damage in addition to the normal benefits and hazards of a charge. The attack and amount of damage from the attack is given in the creature's description.

Rage - When the creature takes damage in combat, on its next turn it can fly into a rage as a free action. It gains +2 to the Physical Skill and +2 Strength, but takes a -2 penalty to its AC. The rage lasts as long as the battle or 1 minute, whichever is shorter. It cannot end its rage voluntarily.

Rake - A creature with this special attack gains extra natural attacks under certain conditions, typically when it grapples its foe. In addition to the options available to all grapplers, a monster with the rake ability gains two free claw attacks that it can use only against a grappled foe. The bonus and damage caused by these attacks is included in the creature's description. A monster with the rake ability must begin its turn already grappling to use its rake—it can't begin a grapple and rake in the same turn.

Rays - All ray attacks require the attacker to make a successful ranged touch attack against the target.

Regeneration - A creature with this ability is difficult to kill. creatures with regeneration heal damage at a fixed rate, as with fast healing, but

they cannot die as long as their regeneration is still functioning (although creatures with regeneration still fall unconscious when their hit points are below 0). Certain attack forms, typically fire and acid, cause a creature's regeneration to stop functioning on the round following the attack. During this round, the creature does not heal any damage and can die normally.

Rend - If it hits with two or more natural attacks in 1 round, a creature with the rend special attack can cause tremendous damage by latching onto the opponent's body and tearing flesh. This attack deals an additional amount of damage, but no more than once per round. The type of attacks that must hit and the additional damage are included in the creature's description.

Resistance - A creature with this special quality ignores some damage of the indicated type each time it takes damage of that kind (commonly acid, cold, electricity, or fire). The entry indicates the amount and type of damage ignored.

Rock Catching - The creature (which must be of at least Large size) can catch Small, Medium, or Large rocks (or projectiles of similar shape). Once per round, a creature that would normally be hit by a rock can make a Reflex save to catch it as a free action. The DC is 15 for a Small rock, 20 for a Medium one, and 25 for a Large one. (If the projectile provides a magical bonus on attack rolls, the DC increases by that amount.) The creature must be aware of the attack in order to make a rock catching attempt.

Rock Throwing - This creature is an accomplished rock thrower and has a +1 racial bonus on attack rolls with thrown rocks. The creature can hurl rocks up to two categories Smaller than its size; for example, a Large hill giant can hurl Small rocks. A "rock" is any large, bulky, and relatively regularly shaped object made of any material with a hardness of at least 5. The creature can hurl the rock up to five

range increments. The size of the range increment varies with the creature.

Scent - This special quality allows a creature to detect approaching enemies, sniff out hidden foes, and track by sense of smell. Creatures with the scent ability can identify familiar odors just as humans do familiar sights.

See in Darkness - Some devils can see perfectly in darkness of any kind, even that created by a deeper darkness spell.

Sonic Attacks - Once a sonic attack has taken effect, deafening the subject or stopping its ears does not end the effect. Stopping one's ears ahead of time allows opponents to avoid having to make saving throws.

Spell-Like Abilities - Spell-like abilities are magical and work just like spells. They are subject to spell resistance if the spell the ability is based on would be subject to spell resistance.

For creatures with spell-like abilities, a designated caster level defines how difficult it is to dispel their spell-like effects and to define any level-dependent variables (such as range and duration) the abilities might have. If no caster level is specified, the caster level is equal to the creature's Hit Dice.

Spell Resistance (SR) - A creature with spell resistance can avoid the effects of spells and spell-like abilities that directly affect it. To determine whether a spell or spell-like ability works against a creature with spell resistance, the caster must make a caster level check (1d20 + caster level). If the result equals or exceeds the creature's spell resistance, the spell works normally, although the creature is still allowed a saving throw if the spell would normally permit one.

Spells - Sometimes a creature can cast arcane or divine spells just as a member of a spellcasting class can (and can activate magic items accordingly). Such creatures are subject

to the same spellcasting rules that characters are.

Split - The creature splits into two identical copies of itself if subject to certain attacks or effects. Each copy has half the original's current hit points (rounded down). A creature reduced below the listed hit points cannot be further split and can be killed normally.

Stench - A creature with the stench special ability secretes an oily chemical that nearly every other creature finds offensive.

Summon - A creature with the summon ability can summon other specific creatures of its kind much as though casting a summon monster spell, but it usually has only a limited chance of success (as specified in the creature's entry).

Sunlight Powerlessness - If the creature is in sunlight (but not in an area of daylight or similar spells), it cannot attack and is staggered.

Swallow Whole - If a creature with this special attack begins its turn with an opponent grappled in its mouth (see Grab), it can attempt a new grapple check. If it succeeds, it swallows its prey, and the opponent takes bite damage. Being swallowed causes a creature to take damage each round. The amount and type of damage varies and is given in the creature's Statistics. A swallowed creature keeps the grappled condition, while the creature that did the swallowing does not. A swallowed creature can try to cut its way free with any light slashing or piercing weapon (the amount of cutting damage required to get free is equal to 1/10 the creature's total hit points), or it can just try to escape the grapple. If the swallowed creature escapes the grapple, success puts it back in the attacker's mouth, where it may be bitten or swallowed again.

Telepathy - The creature can mentally communicate with any other creature within a certain range (specified in the creature's entry, usually 100 feet) that has a language

Trample - As a full-round action, a creature with the trample ability can attempt to overrun any creature that is at least one size category smaller than itself. This works just like the overrun combat maneuver, but the trampling creature does not need to make a check, it merely has to move over opponents in its path. Targets can attempt to avoid the trampling creature and receive a Reflex save to take half damage. A trampling creature can only deal trampling damage to each target once per round, no matter how many times its movement takes it over a target creature.

Tremorsense - A creature with tremorsense is sensitive to vibrations in the ground and can automatically pinpoint the location of anything that is in contact with the ground.

Trip - A creature with the trip special attack can attempt to trip its opponent if it hits with the specified attack

Turn Resistance - A creature with this special quality (usually an undead) is less easily affected by channeled negative or positive energy. The creature adds the listed bonus to its hit dice, and therefore additional hit points, when resisting the effects of turn undead.

Undead Traits - Undead are immune to death effects, disease, mind-affecting effects (charms, compulsions, morale effects, phantasms, and patterns), paralysis, poison, sleep, stun, and any effect that requires a Fortitude save (unless the effect also works on objects or is harmless). Undead are not subject to ability drain, energy drain, or nonlethal damage. Undead are immune to damage or penalties to their physical ability scores (Strength, Dexterity, and Constitution), as well as to fatigue and exhaustion effects. Undead are not at risk of death from massive damage.

Unnatural Aura - Animals do not willingly approach the creature unless the animal's

master makes a DC 25 Handle Animal, Ride, or wild empathy check.

Vulnerabilities - A creature with vulnerabilities takes half again as much damage (+50%) from a specific energy type, regardless of whether a saving throw is allowed or if the save is a success or failure. Creatures with a vulnerability that is not an energy type instead take a -4 penalty on saves against spells and effects that cause or use the listed vulnerability (such as spells with the light descriptor).

Water Breathing - Creatures with this ability can breathe water as well as air.

Web - Creatures with the web ability can use webs to support themselves and up to one additional creature of the same size. In addition, such creatures can throw a web. This is similar to an attack with a net but has a maximum range of 50 feet, with a range increment of 10 feet, and is effective against targets up to one size category larger than the web spinner. An entangled creature can escape with a successful Escape Artist check or burst the web with a Strength check. Attempts to burst a web by those caught in it take a -4 penalty.

Each 5-foot-square section of web has a number of hit points equal to the Hit Dice of the creature that created it and DR 5/—.

A creature can move across its own web at its climb speed and can pinpoint the location of any creature touching its web.

Whirlwind - Some creatures can transform themselves into whirlwinds and remain in that form for up to 1 round for every 2 HD they have. If the creature has a fly speed, it can continue to fly at that same speed while in whirlwind form; otherwise it gains a fly speed equal to its base land speed while in whirlwind form.

The whirlwind is always 5 feet wide at its base, but its height and width at the top vary from creature to creature (minimum 10 feet high). A whirlwind's width at its peak is always equal to half its height. The creature controls the exact height, but it must be at least 10 feet high.

A creature might be caught in the whirlwind if it touches or enters the whirlwind, or if the whirlwind moves into or through a creature's space. A creature in whirlwind form cannot make its normal attacks and does not threaten the area around it.

A creature that comes in contact with the whirlwind must succeed on a Reflex save ($DC\ 10 + \frac{1}{2}\text{ the monster's HD} + \text{the monster's Strength modifier}$) or take damage as if it were hit by the whirlwind creature's slam attack. It must also succeed on a second Reflex save or be picked up bodily and held suspended in the powerful winds, automatically taking the indicated damage each round. A creature that can fly is allowed a Reflex save each round on its turn to escape the whirlwind. The creature still takes damage that round but can leave if the save is successful.

Creatures trapped in the whirlwind cannot move except to go where the whirlwind carries them or to escape the whirlwind. Trapped creatures can otherwise act normally, but must succeed on a concentration check ($DC\ 15 + \text{spell level}$) to cast a spell. Creatures caught in the whirlwind take a -4 penalty to Dexterity and a -2 penalty on attack rolls. The whirlwind can have only as many creatures trapped inside at one time as will fit inside the whirlwind's volume. As a free action, the whirlwind can eject any carried creatures whenever it wishes, depositing them in its space.

If the whirlwind's base touches the ground, it creates a swirling cloud of debris. This cloud is centered on the creature and has a diameter equal to half the whirlwind's height. The cloud obscures all vision, including darkvision, beyond 5 feet. Creatures 5 feet away have concealment, while those farther away have total concealment. Those caught in the cloud of debris must succeed on a concentration check ($DC\ 15 + \text{spell level}$) to cast a spell.

Monsters by Challenge Ratings

The monsters are listed here in their entirety by Challenge Rating (CR). This Challenge Rating shows the average level of a party of four adventurers for which one monster would make an encounter of moderate difficulty.

For encounters of more than one monster with the same Challenge Rating figure that each time you double the number of monsters you add 2 to the Challenge Rating.

To make an encounter with monsters of different Challenge Ratings choose one monster with a Challenge Rating one less than the character's Party Encounter Level (PEL) and then pick another monster whose CR is three less than the PEL.

Grimm Lite

A simple game of twisted fantasy

A MicroLITE d20 version of the fantastic Grimm d20 RPG in which kids from our world slip through a nightmare into a very dark world of cruel, twisted fairytales...

The Grimm Lands

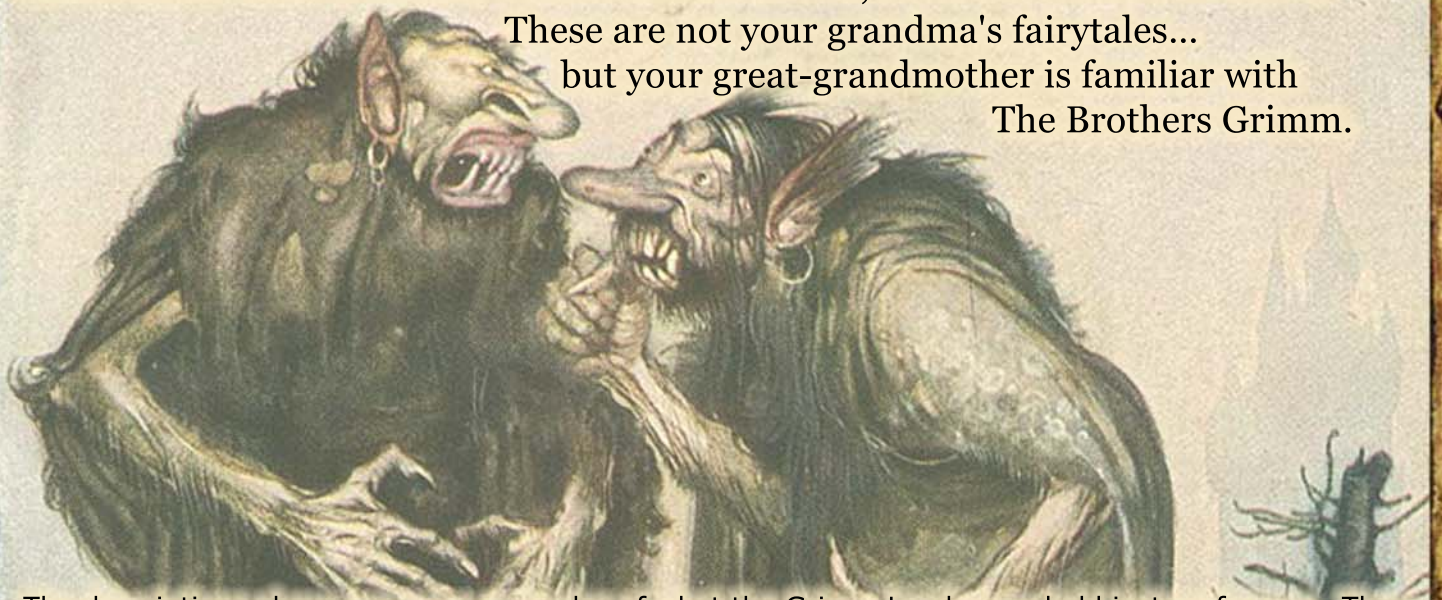

A patched together Humpty Dumpty is the dreaded Rotten King of the Big and Awful Forest and only his madness prevents him from conquering the Checkered Kingdom. Cinderella grew up to become a dictatorial, sadistic queen and Little Red Riding Hood is a cursed teenage vampire who travels the lands under a blood soaked cloak suggestively luring in her next victim. Hansel and Gretel are now the cannibalistic servants of the house made of sweets, since the witch is no more.

These are not your grandma's fairytales...

but your great-grandmother is familiar with

The Brothers Grimm.

The descriptions above are mere examples of what the Grimm Lands may hold in store for you. They are based on familiar fairy tales, folk lore, myth, nursery rhymes, or anything else that may have captivated you as a child. As we grow older we see how violent and awful the events in these stories are. We recognize the immoral acts and we notice the triviality of the human experience. The characters are sometimes forced to deal with awful entities to preserve their own lives. Make sure the players discuss and decide what sort of Grimm experience they would like before delving in. For some, it may be an opportunity to consider the implications of these deeper topics. For others, it may simply be a fun chance to pretend to be the bully they hated, the popular kid they envied, or to relive being the nerd or dreamer. Grimm could stretch into an extended campaign wherein the kids take over the Grimm Lands. Alternatively, the game could be short-lived where the characters are snuffed out one by one. Somewhere in between a Grimm campaign may take characters from 1st to 6th level culminating in a "skin of their teeth" escape to the real world. Regardless of your style; this game is all about fantastic imagination.

Take on the persona of a child who has slipped from reality into a nightmare of grotesque fantasy. The core system is MicroLITE d20 which is a simple yet robust version of D&D d20. While significant portions of the game have been adapted, you will find that most of it translates simply and concepts are easy to grasp. This streamlined core system makes the mechanics easier so that players are more free to focus on the story and characters; putting the Role Playing back in Role Playing Games!

The Story

You may be familiar with the structure of: Campaign > Adventures > Encounters > Challenges. A Campaign is the over arching story that ties together all of the Adventures with a clear beginning and end. Adventures typically have their own beginning and end; they are a culmination of several Encounters. These Encounters are comprised of different challenges; such as conflict, mysteries, puzzles, or other trials. Grimm Md20 uses the same construct but with different names: Story > Chapters > Scenes > Trials

There is an over arching Story with a clear beginning; usually starting with all of the kids ending up in the Grimm Lands. The Story also has a definitive end; this may be an escape back to reality by the skin of their teeth or perhaps some other epic achievement. All players, including the GM, need to have a discussion before the game on just what kind of story everyone wants. Is this going to be a long or short story? Do players want a gritty nightmare of grotesque tribulations or something more lighthearted, facniful yet epic? What are the expectations of players and the GM? After creating characters; players should again discuss with the GM their character's persona. What drives the characters? Do they have their own personal goals? What is their background and personality?

The GM can then tailor Chapters, Scenes, and Trials that the characters will take part in. While many elements of familiar stories can, and should, be used to create your story... make no mistake this is a whole new story limited only by imagination.

Get ready to partake in the greatest story not yet told!

Fairy Tale Elements

Fairy tales employ several staple elements. Here is a brief deconstruction to aid in creating your own stories.

Moral: The lesson or moral of the story. Feel free to twist it. For example "Too much of a good thing is bad!" but a Grimm twist could be "Too much of a bad thing is great!"

Characters: Heroes and villains. Make no mistake that the PCs are the true heroes. NPCs should never steal the spotlight. Grimm Land 'heroes' are often failed precursors who attempted the quest but fell to their own moral or physical failings. It's now up to the kids!

Motives: NPCs in the Grimm Lands have powerful motivations driving them: Hunger, Hate, Jealousy, Fear, Love, etc. Emotions and actions taken to reach their goals should be over the top. Personalities can be multidimensional and they are always driving to their goals.

Environment: Adventures are typically set in an environment. Paint them lavishly but with twisted or even creepy overtones and details. Everything in the Grimm Lands is created from imagination thus everything, even the environment itself, is alive and changing.

Call to Adventure: Often a herald is used to announce the call to adventure; a talking animal, old woman, or some temptation leading the children to danger.

Descent: Be it physical or psychological, descent is a great element. The kids are pushed past the threshold of security and must face danger. In order to reach the top they must start at the bottom.

Trials: Think beyond combat. Puzzles, riddles, mazes, and contests test the kids resolve.

Victory & Rewards: When objectives are achieved then rewards are deserved. New items, spells, treasure, information leading toward a long term goal, securing the hand of a princess for marriage, and much more await children who descend into danger, face their trials, and triumph!

Ability Scores

A kid has four stats:

- **Grit** (strength, physical toughness, fortitude),
- **Wit** (perception, intelligence, wisdom),
- **Quick** (dexterity, agility)
- **Pluck** (courage, willpower).

How to generate stats and modifiers:

Roll 4d6 and ignore the lowest die for Wit, Quick, and Pluck. For Grit you roll 2d8 because kids are small, fragile, and not as strong as adults... even if they are the heroes of the tale.

Ability Score Modifier: $(\text{Stat} - 10) / 2$ (round down)

It's called a modifier instead of a bonus because you can actually end up with negative numbers. That's not always a bad thing! Your character is far more than the sum of its ability scores or modifiers.

Skills

There are also seven skills:

- **Scamper** (athletics, acrobatics)
- **Country Club** (being polite, riding horses, playing music)
- **Naughty** (lying, picking pockets, sneaking)
- **Boy Scouts** (survival, first aid, ingenuity, reading a map, knowing direction)
- **Knowledge** (education, mathematics, writing, reading, 'book smarts')
- **Tore** (knowledge of fairytales, legends, and myths)
- **Rustic** (clean, cook, feed the chickens, draw water from the well, build a fence)

Skill Rank: (Level + any Archetype modifier)

All kids may also choose one skill at character creation to give an extra +1 to because of hobby, background, upbringing, or other reason outlined in their character persona.

Skill Roll: $(1d20 + \text{skill rank} + \text{Stat modifier})$

Use which ever stat seems most appropriate to the action which requires a skill check. Do not choose a stat modifier simply because it may be higher than another. Think about what best applies to the circumstances.

A GM may also ask a player to apply a situational modifier to their skill roll for any number of reasons. This should be disclosed to the player prior to a Skill Roll. The GM does not have to disclose modifiers applied to hidden GM rolls.

Archetypes

They are both race, class, and much more. Archetypes are iconic stereotypes on purpose. The Grimm Lands are a place of well-known stories and familiar figures. These archetypes not only define characters capabilities but they also provide useful guidelines for role-playing. Since a characters archetype is much more than their class but rather an integral aspect of their persona, it is thus not possible to multiclass.

As these characters are assumed to be children age 8 to 12 then most have a solid understanding of Right and Wrong; however they may lack a deeper understanding of ethical considerations or dilemmas. Consequently GrimmLITE does not use a traditional alignment system; again it's a clearly stereotypical premise... you are either: Good or Bad, Right or Wrong, Righteous or Evil. Actions speak louder than words; how your character behaves dictates more who they are than what they say.

Special Abilities:

Each Archetype has two special abilities. One it starts the game with, and one it gets access to upon reaching level 6. This new special ability represents the inevitable growth in power that comes with the story's big twist, climax, or life lesson.

Weakness:

Every Archetype also has a flaw. Just as their opponents have secret weaknesses, kids in the Grimm Lands have their own. This flaw is triggered by certain situations in game.

Bonuses:

All kids receive the following bonuses.

- Armor Class +1
- Attack +1

Advancement:

Grimm Md20 is a straight forward and simple game. Kids advance in their archetype after every Chapter they survive. A Chapter is an adventure in the Story which has it's own beginning and end yet progresses the over-arching Story.

- +1 to Armor Class (AC)
- +1 to all Attack Rolls (ATK)
- +1 to all Skills
- Bonus Hit Points (HP) according to archetype
- +1d6 Imagination points added to base total
- +1 to a single Ability Score (Stat) every three levels (4,7,10,13,16,19)
- New special ability at level six according to archetype.

Bully

I'm here to steal your lunch money and hand out wedgies. Being in charge is very important and second only to survival. I am the subject of fear and loathing in the eyes of other children. However being dropped into the Grimm Lands puts a new perspective on being a bully. While I may still push around the other kids; ultimately they are MY kids. If anyone else is going to intimidate or harm them they have to go through me first!

Features:

- +8 Base HP
- +1 Grit

Special Abilities:

• Taunt (Level 1)

• **Description:** Quickly ascertain someone's doubts, weaknesses, and misgivings then exploit them to your advantage.

• **Amount:** 1 Taunt per Level per day

• **Cost:** 1 Imagination point

• **Check:** Bully rolls (1d20 + Wit + Naughty) vs. Opponent (1d20 + Pluck + Rustic)

• **Effect:** Success causes the opponent to doubt themselves and they take a -2 on all rolls for the rest of the Scene. If the bully succeeds by 10 or more the opponent completely despairs and flees the Scene as quick as possible; if they can not flee then they cower in place.

• **Duration:** Instant

• Take One for the Team (Level 6)

• **Description:** The bully's life lesson is that the true meaning of being strong is not harming those weaker than yourself- it's protecting them!

• **Amount:** Unlimited (as long as the bully can see their friends)

• **Cost:** 1 Imagination point

• **Check:** None; but the bully must be able to see all of their friends

• **Effect:** Take all damage one friend was supposed to take that round

• **Duration:** 1 Round

Weakness:

• **Description:** Bullies only feel safe when they are sure of their superiority.

• **Trigger:** Facing an opponent either larger, stronger (Grit), mightier (Level), or scarier than the bully.

• **Effect:** Unable to use Taunts and -2 on all rolls against that opponent.

Dreamer

It's hard to be the dreamer... my mother nags me about paying more attention, my teachers have special meetings with my parents, some of the other kids pick on me, and everyone thinks I have ADHD. I spend more time in my own head or reading about fascinating alternate realities than I spend paying attention to the 'real world' and I love every minute of it. That time was not wasted now that I'm in the Grimm Lands. While the other kids struggle to understand how to manipulate this strange new world around them I have a natural control over my imagination and already I have an affinity with the Grimm Lands.

Features:

- +4 Base HP
- +1 Imagination at character creation

Special Abilities:

- **Daydream** (Level 1)
 - **Description:** Imagination is the cornerstone of the dreamer; enjoying idle daydreaming soothes and rejuvenates the dreamer.
 - **Amount:** 1 Daydream per day
 - **Cost:** 1 hour doing nothing but daydreaming.
 - **Check:** None
 - **Effect:** Regain maximum Imagination points for the character's current level.
 - **Duration:** 1 Day
- **Hero of Your Dreams** (Level 6)
 - **Description:** Superhero, knight in shining armor, guardian angel, a golden dragon... Your dreams manifest and you take on the form of an imaginary hero you've always imagined yourself to be!
 - **Amount:** 1 Dream Hero per day
 - **Cost:** 8 Imagination points
 - **Check:** None
 - **Effect:** +8 Grit, +4 Quick, +4 Pluck, and one unique special ability
(Work with your GM to figure out an appropriate special ability)

Weakness:

- **Description:** Believing in fiction has a drawback; it's hard to tell when someone isn't being honest with you or is trying to manipulate you. Dreamers are highly suggestible.
- **Trigger:** Illusions, charms, temptations, mind altering magic, bluffs, or lies.
- **Effect:** -2 on all checks, attempts to resist, or saves against the triggers listed.

Jock

I am able to lift more, run faster, jump higher, climb better, and throw farther than most kids; but sportsmanship is important too: I don't use my talent or ability to hurt my peers and winning takes teamwork. I spend my time playing sports and practicing; all that nerdy school stuff and boring daydreaming is a waste of time. The strangeness of the Grimm Lands is very queer to me but ignorance is bliss; I don't even want to know what half of this weird stuff is! We just need to stick together and figure out how to get out of here!

Features:

- +8 Base HP
- +3 Scamper

Special Abilities:

• Adrenaline Rush (Level 1)

- **Description:** Your heart begins to race, your eyes focus, and with an explosion of physical prowess you push yourself beyond your limitations.
- **Amount:** 1 Adrenaline Rush per Level per day
- **Cost:** 1 Imagination Point
- **Check:** None
- **Effect:** +2 Quick, +2 Grit, +2 on rolls to save against Fear and Despair.
- **Duration:** 1 round per Grit modifier

• Team Spirit (Level 6)

- **Description:** You show everyone what it really takes to win; working as a team!
- **Amount:** Unlimited (as long as you can take a standard action on your turn)
- **Cost:** 2 Imagination Points plus you must spend your entire turn Aiding Another
- **Check:** None
- **Effect:** Whoever you are aiding gains a +4 bonus on all rolls for their turn.
- **Duration:** 1 Round

Weakness:

- **Description:** Unfortunately you are lacking in sophistication and mental acuity.
- **Trigger:** Choose two of the following triggers: Knowledge, Lore, Country Club, Rustic
- **Effect:** -2 on all checks involving the two trigger skills you chose.

Nerd

I excel at math, science, geography, civics, English, history.. uh, what's that? Oh... Sports? Yes I love sports; chess and debate team! What? Those aren't "real" sports? Well I just never had the time for 'real' sports. Now here in the Grimm Lands I sure wish I could run a little faster and jump further! This world confounds me; it makes no sense and does not operate in accordance to any rational logic. Though magical incantations here do really intrigue me! I shall have to study them and figure some out.

Features:

- +4 Base HP
- +3 Knowledge

Special Abilities:

• Flash of Inspiration (Level 1)

- **Description:** Insight hits you like a bolt of lightning and often just when needed; an ineffable moment of epiphany!
- **Amount:** Unlimited (as long as you have Imagination Points to spend)
- **Cost:** As many Imagination Points as you wish.
- **Check:** None
- **Effect:** Ask the GM for a clue or bit of information. How clear and helpful this information is depends directly on how much Imagination you spend.
- **Duration:** Instant

• Make Sense (Level 6)

- **Description:** Only a nerd would use their imagination to enforce logic upon a world based entirely on fantasy; but it's not surprising!
- **Amount:** Unlimited (as long as you have Imagination Points to spend)
- **Cost:** 8 Imagination Points
- **Check:** None
- **Effect:** All opponents in this scene are unable to use any spell-like abilities or supernatural abilities for the duration of this scene.
- **Duration:** 1 Scene

Weakness:

- **Description:** Everyone knows you are pathetically under developed and simply not cool; but you would debate those points on the basis that their definitions of "developed" and "cool" are unenlightened and misguided.
- **Trigger:** Any checks involving Naughty or Scamper.
- **Effect:** -2 to all checks using Naughty or Scamper skills.

Normal Kid

I play sports but I'm not the star. I have friends, just not as many as that popular kid. I get good grades but I'm not a nerd. I'm just an ordinary kid who sits three rows back from you in English class. What? You don't remember that I'm even in your class?! Now that we are in the Grimm Lands together I hope you won't forget me. Seems like everything here in this crazy place is always looking at me, sizing me up, as if I'd be the first thing they would eat if we were all in their pot of stew... it's kind'a creepy...

Features:

- +6 Base HP
- +1 to any two skills you choose at character creation.

Special Abilities:

• Jack of All (Level 1)

- **Description:** As the old saying goes: Jack of all trades but master of none.
- **Amount:** Unlimited (As long as you have Imagination Points to spend)
- **Cost:** 3 Imagination Points
- **Check:** Use check from the special ability used from other Archetype.
- **Effect:** Use any Level 1 Special Ability from any other Archetype.
- **Duration:** Use duration of the special ability used from other Archetype.

• Unusual Heritage (Level 6)

- **Description:** Like all too many dramatic stories; the normal kid finds out later in the story that they are anything but normal.
- **Amount:** Unlimited (this is a permanent effect)
- **Cost:** None
- **Check:** None
- **Effect:** You should figure out what your characters unusual heritage is and then work with your GM to figure out what appropriate features will enhance your character. There should be some sort of cost (such as Imagination) or drawback to use your new features.
- **Duration:** Permanent

Weakness:

- **Description:** The red shirt, the heroes expendable side kick, the meat shield, the extra character on the away team that everyone knows will get greased first.
- **Trigger:** Any time the GM is supposed to pick a kid 'randomly' it always seems to be a normal kid in the group. When misfortune strikes it aims for the normal kid.
- **Effect:** Opponents always try to hit the normal kid first. If the GM is supposed to pick a kid at random for some ill fate they always choose the normal kid.

Outcast

Nobody understands what it's like to be me! I don't fit in anywhere it seems. Fine by me; who needs those supposedly 'cool' kids anyway? I can get along just fine by myself. Well that was until I ended up these sick Grimm Lands. I may just have to let some of these chumps tag along with me otherwise I don't think I'll ever get out of here.

Features:

- +6 Base HP
- ☞ 3 Naughty

Special Abilities:

• **Fight Dirty** (Level 1)

- **Description:** You know just when to let off that cheap shot or where to place a low blow and particularly like sneaking up first to really catch them off guard.
- **Amount:** Unlimited (As long as you sneak up on your target)
- **Cost:** Must successfully sneak up on target.
- **Check:** Roll 1d20 + Quick + Naughty vs opponent's 1d20 + Wit + Boy Scouts
- **Effect:** Add Naughty modifier to damage on successful sneak attack.
- **Duration:** 1 Turn

• **Escape Artist** (Level 6)

- **Description:** Sometimes it's good to be unnoticed. Gives you time to wiggle free, the guards forget you're there and fall asleep, or some other opportune oversight.
- **Amount:** Once per day
- **Cost:** 2 Imagination Points
- **Check:** Roll 1d20 + Wit + Naughty vs DC 10 + opponent's Wit.
- **Effect:** Depends on the situation. Perhaps the guard fell asleep, Maybe you snatch a key when nobody is looking, you're able to wiggle out of your bonds while nobody is paying attention to you.

Weakness:

- **Description:** You are pathologically shy and have a difficult time talking or interacting with anyone who isn't a kid.
- **Trigger:** Whenever attempting a visible, dynamic, action. Such as talking to an NPC directly, having to speak for the party or drawing an opponent's attention.
- **Effect:** Roll 1d20 + Pluck + Country Club vs. DC 10 + the number of people witnessing this action. If you fail your save then the action fails. Perhaps you look down and skulk away murmuring to yourself or you begin to stutter when trying to talk to an NPC and fail to properly communicate.

Popular

Everyone knows my name and they all like me. I'm THE most popular kid in school. Kids look to me for social rules and I'm happy to give them. My friends and I determine fashion, who's 'in' or who's 'out', and what's cool. Now here in the Grimm Lands I have only a few friends which is unnerving at best. However at least I'm not alone and I have a team to work with and help find a way out of here.

Features:

- +6 Base HP
-  3 Country Club

Special Abilities:

• **Chearleading** (Level 1)

- **Description:** Words of confidence from the popular kid can go a long ways to inspiring other people and motivating them to succeed.
- **Amount:** Unlimited (So long as you can speak and they can hear you)
- **Cost:** 1 Imagination Point plus you may take no other actions except chearleading
- **Check:** Roll 1d20 + Wit + Country Club vs. DC 20
- **Effect:** Success means your allies gain +2 on all rolls while you chearlead
- **Duration:** As long as you do nothing but chearlead they gain the bonus

• **Silver Tongue** (Level 6)

- **Description:** You have an uncanny ability to convince others of seeing things your way and doing what you ask them to do.
- **Amount:** Unlimited (As long as you have enough Imagination Points)
- **Cost:** 8 Imagination Points
- **Check:** Target rolls 1d20 + Pluck + Rustic vs. DC 40
- **Effect:** Target will obey a single command, answer a single question to the best of it's ability, or see a point of view that agrees with you.
- **Duration:** 1 round

Weakness:

- **Description:** Haughty and proud; it's hard for you to take advice from others, admit they are right when you thought they were wrong, or to obey orders.
- **Trigger:** Whenever someone tries to help you with out you asking them to.
- **Effect:** Spend 1 Imagination Point to receive their help else you turn them away.

The Role of Imagination

Description: The kids may be trapped in a nightmare but even a nightmare is, at its core, a bad dream. Dreams are created purely out of imagination and therefore the boundaries and behaviors of the Grimm Lands are more flexible than reality. Kids poses a powerful magic feared by all foul denizens; Imagination. They are able to manipulate the world around them, unlock their inner potential, and even cast magical incantations!

Imagination Points:

- **Description:** Children in the Grimm Lands quickly learn imagination has real power here; giving them the ability to edit the story they now find themselves in. These Imagination Points represent their capacity for manipulating the story and the Grimm Lands. Using Imagination Points to warp the world or change the story is called an 'imagining'. These points are also used to empower some special abilities.

- **Starting Points:** Each kid starts with (Pluck + 3) Imagination Points.

- **Using Imagination:** Kids can spend Imagination Points at any time during a round under any circumstance; only death can stop a child's imagination. Simply come up with the idea and then your character must believe in it. How strongly a kid believes in their imagination is determined by how many Imagination Points they spend on the imagining.

- **Two Rules of Imaginings:** Coming up with a bunch of convoluted rules and categories for circumstances and results of using ones imagination is way too complicated (and probably wouldn't be much fun!) There are instead only two hard rules of an imagining:

- 1) Imagination can not be used to directly damage or destroy anything.

- 2) Imaginings can not be used to replicate an archetype feature or special ability.

- **Increasing Points:** There are three ways to gain points.

- **Advancement:** Base Imagination Points increased by +1d6 every level.

- **Inspirational:** The GM may declare an exceptionally creative action to be Inspirational and award a small number of temporary Imagination Points to all who witnessed it. Since inspiration is fleeting these points last only an hour or so.

- **Self Exploration:** For acts or thoughts that are so creative, expressive, and selfless the GM may declare these to be acts of Self Exploration. Thus granting a permanent increase to that character's base Imagination Points.

- **Depleting Points:**

- **Using Points:** Typically Imagination Points are spent on imaginings, incantations, and special abilities.

- **Despair:** Imagination points can be lost from fear, despair, anger, loneliness, and other psychologically damaging situations. Being separated from friends or allies in unsafe circumstances particularly put kids in danger of despair. Details are found under the "Hazardous Story Elements" section

- **Zero Points:** If a kid ever reaches 0 Imagination Points they take a -4 to all rolls and become a beacon to villains who are eager to exploit their moment of weakness.

- **Replenishing Points:** Imagination is planted in the fertile soil of the idle mind and takes root in dreams. After six hours of uninterrupted sleep kids regain their imagination points up to their base total.

Adjudicating Imaginings

Guidelines & Examples:

• **Cost Reduction:** Ultimately the cost of an imagining is decided by the GM however players are encouraged to use rationalization in an effort to lower the cost. A guideline here would be that if you can come up with a logical rationale as to how the imagining occurred then the cost could be lowered by 1 point (example: It begins to rain from the dark grey clouds we noticed a while back). If you came up with a imaginative fairytale to explain the imagining then it may be lowered by 2 points (example: Rain sprinkles down heavily from the clouds above because a giant who lives in the clouds is watering his garden!).

• **Keep It Original:** Try not to use the same idea or imagining more than once. Keep the story fun, new, exciting, and full of imagination. It's not about exploiting the lax nature of these rules or trying to get the most bang out of your Imagination Points. You and your friends are participating in the greatest story that's never been told; make it fun and exciting... not boring and predictable.

• **Cost of Imaginings:** It's important to point out again that these are merely suggestions and guidelines. Each imagining must be adjudicated on a case by case basis between players and the GM to decide if it even happens, how it will happen, and what the cost is.

• **One Point Imagining:** Subtle, minor, change to the space around a character. These are usually fleeting adjustments and do not last long. A kid Finds a piece of candy in their pocket they must have forgotten about. A fruit tree just happens to be near by. The sun peeks out from a cloud shedding light on an area (translating in to a +1 bonus on a roll).

• **Two Point Imagining:** Noticeable changes to the scene; fortuitous happenings. Mild environmental changes that may effect other characters nearby. The children find a tool just in time to use it. They stumble upon a hidden passage. Someone left a donkey tied to a tree. Rain breaks out from dark clouds above. Fog rolls in off a nearby pond.

• **Four Point Imagining:** Obvious and specific changes may be imagined. Specific and useful items may appear. Children become capable of miraculous things. The key they just found opens a specific door. A kid becomes stronger, faster, smarter, more clever, or cooler then they ever were in the real world (+2 bonus). The raging river has a convenient ford around the next bend. The rope bridge snaps just as the last kid steps off it safely.

• **Six Point Imagining:** Powerful and drastic alterations to a scene. Changes to the weather or environment in a dramatic fashion. Manipulate other characters specifically. A snow storm kicks up in midsummer. Hurricane-force-winds die down to a still calm. The forest suddenly gives way to open plains. As they are running from a monstrous troll they spot a tiny cave too small for the troll to fit in.

• **Eight Point Imagining:** The children take the reigns of the story, if only for a short time, and may steer it as they wish. They may reasonably dictate a character's next action. Temporarily enchant an item with some special feature or quality. At a moment when all hope is lost and evil may triumph the tables are turned; the plot twists in the kids' favor. A kid notices obscured writing on the the sword found weeks ago; saying them aloud causes the sword to engulf in flames for an hour.

Magical Incantations

He'd been practicing this crazy dance and chant for days; I thought it was rather pointless if not comical. Then the other morning he was at it again but this time it worked! He pulled out a feather, began hopping about, flapping his arms, chanting and jeering... with a final stomp and shout he pointed at me and I began to float up into the air!

- **Description:** Magic is as much art as it is science and while it may not be so rapid, efficient, or easy to learn as other fantasy worlds it is available to any kid who learns to weave the strands of arcane power. Spells are called Incantations in the Grimm Lands.

- **Learning Incantations:** Kids come from the real world and thus have learned no incantations prior to landing in the Grimm Lands. They must study and learn or be taught.

- **Education:** A kid must spend days learning and practicing equal to 2 times the level of the incantation (spell level)

- **Casting Incantations:**

- **Specific Incantations:** Refer to the d20 SRD for spells (Incantations) and use the following adaptations: There are no 0-level spells; they are all at least 1st-level. Casting an Incantation does not provoke attacks of opportunity, do not require concentration checks (though they may require the ac to of concentration), can not be interrupted, and may still take a move action as part of the casting process (such as dancing around and leaping in circles as part of the incantation's somatic gestures). How Incantations are cast is also different but outlined in detail below.

- **Cost:** Casting costs Imagination Points equal to the Incantation's level.

- **Casting Time:** Casting an Incantation takes as many turns as the Incantation's level.

- **Check:** $1d20 + \text{Wit} + \text{Lore}$ vs DC (Incantation Level * 4). Success means the incantation is cast and failure means it fails (but no Imagination Points are spent).

- **Estrangement:** Casting takes a toll on kids mentally and physically. After each successful casting a kid must roll a save $1d20 + \text{Pluck} + \text{Lore}$ vs Incantation Level of the Incantation being cast. Failure means a kid suffers an Estrangement point. These Estrangement points manifest in odd ways as they start to accumulate; their eyes now glow, their ears grow pointy, a yearning to taste blood, or they laugh with a witch like cackle! After a kid's estrangement points equal their Level + Pluck they lose all vestige of humanity and are now a creature of the Grimm Lands for eternity.

- **NPCs & Incantations:** Creatures of the Grimm Lands are made of imagination; they simply use a part of themselves to cast incantations as spell like abilities. The cost of this

Combat

- **Hit Points:** $HP = \text{Grit} + \text{Archetype Base HP} * \text{Level}$

- **Archetype Base HP:**

- **Bully:** 8 HP
- **Rock:** 8 HP
- **Normal:** 6 HP
- **Outcast:** 6 HP
- **Popular:** 6 HP
- **Dreamer:** 4 HP
- **Nerd:** 4 HP

- **Armor Class:** $AC = 10 + \text{Quick} + \text{Armor}$

- **Attack Bonuses:**

- **Melee:** $\text{Grit} + \text{Level}$

Grit may also be added to melee ATK damage ($\text{Grit} * 2$ for two handed weapons).

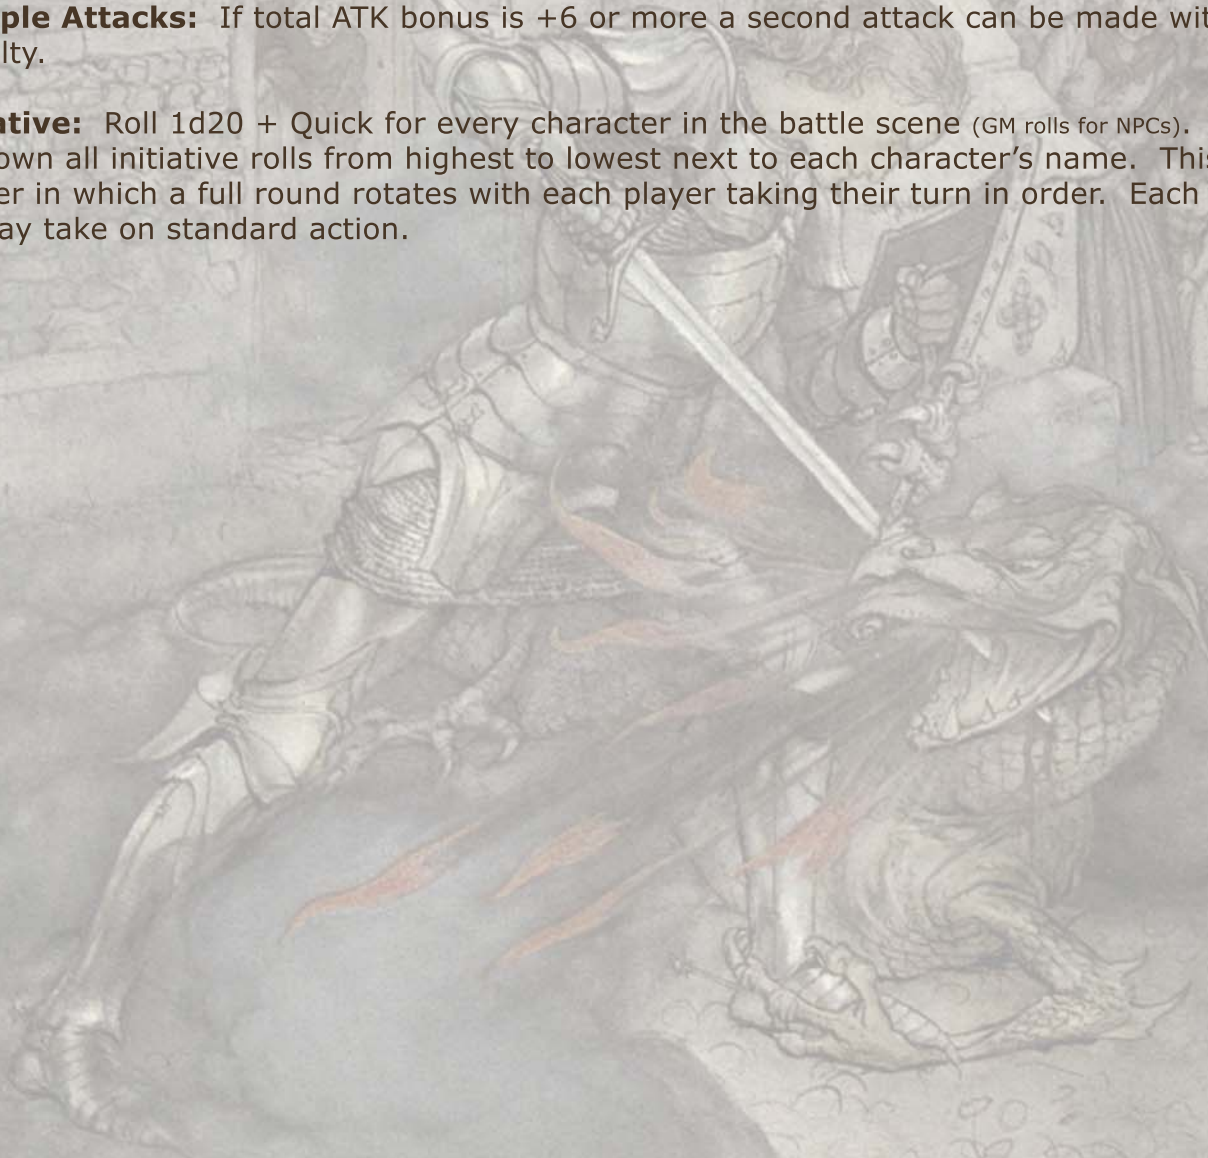

- **Ranged:** $\text{Quick} + \text{Level}$

- **Dual Wielding:** All kids may wield two weapons at once but they take a -2 ATK on their primary hand (first attack) and -4 on their secondary hand (second attack).

- **Multiple Attacks:** If total ATK bonus is +6 or more a second attack can be made with a -5 penalty.

- **Initiative:** Roll 1d20 + Quick for every character in the battle scene (GM rolls for NPCs).

Write down all initiative rolls from highest to lowest next to each character's name. This is the order in which a full round rotates with each player taking their turn in order. Each turn a kid may take on standard action.

Weapons, Armor, and Equipment

• Starting Equipment:

• **Items:** Kids start with only what they had on them or holding when they were warped to the Grimm Lands. This isn't an opportunity to take advantage of the ambiguity of these rules; pick items that make sense to your character's background story. A character's background story is a way of developing a fun and interesting character; not an excuse to try and get an unfair advantage or unbalance the game in your favor.

• **Keepsake:** Every kid has an item in which they have focused their imagination. Perhaps a favorite stuffed animal, a blanket grandma' gave them, that pocket knife dad gave you, your favorite piece of sports equipment, or even an invisible friend. A kid would never knowingly be separated from their keepsake. Now in the Grimm Lands this item holds great emotional significance and holds special power. Work with your GM to figure out your kid's keepsake and how exactly it works in the Grimm Lands.

• Equipment:

• **Using Equipment:** A kid may pick up and use any weapon, wear any armor, and use any tool so long as they are able to wield it, understand how it works, or it is the right size. In other words it should not be too heavy to wield with precision, too large or small to put on, or so exotic that it requires advanced training to use. Keep in mind kids are considered small creatures so medium sized equipment (such as an adult size suit of armor) is too large to be used effectively.

• **Melee Weapons:** Rather than lay out every single type of weapon and it's stats it would be easier to just break it down by size, it's DMG dice, and some examples. You may opt to use an equipment list from some other OGL d20 resource. (such as the original Grimm d20)

• **Tiny:** 1d2 DMG - Pencil, pocket knife, switchblade, sticks & stones.

• **Small:** 1d4 DMG - Dagger, hammer, hatchet, cleaver, heavy branch.

• **Medium:** 1d6 DMG - Hockey stick, baseball bat, shortspear, short sword, shovel.

• **Large:** 1d8 DMG - Longspear, bastard sword, long sword, ball & chain, battle axe,.

• **Two-handed:** 1d10 DMG - Greatclub, great sword, troll axe, polearm.

• **Ranged Weapons:** Handled much the same way as melee except they all require two hands to use and have a maximum distance which they are effective.

• **Tiny:** 1d2 DMG - Fist sized rock, dishes, .

• **Small:** 1d4 DMG - Sling, dart, blowgun.

• **Medium:** 1d6 DMG - Light crossbow, short bow, thrown short spear, javelin.

• **Large:** 1d8 DMG - Long bow, heavy crossbow, thrown long spear.

• **Armor:** As with weapons; it's much more simple to break it down by type. Again you are welcome to use an equipment list from some other OGL d20 resource.

• **Light:** +2 AC - Leather jerkin, studded leather, heavy winter coat, football pads.

• **Medium:** +4 AC - Thick hides, chainmail, noble's suit of armor,

• **Heavy:** +6 AC - Soldier's suit of armor, turtle shell, hard wood, plate armor.

• **Shields:** Same as armor.

• **Light:** +1 AC - Buckler, targe, serving platter, heavy pillow.

• **Medium:** +2 AC - Wood shield, sturdy barrel lid, bar stool,

• **Heavy:** +3 AC - Metal shield, heavy wood shield.

Arthur Rackham. 1910

Hazardous Story Elements

• **Temptation:**

• **Description:** Temptation is a key fairytale element used against the story's protagonists; in this case your characters. Being kids... it's hard to resist temptation!

• **Check:** $1d20 + \text{Pluck} + \text{A skill modifier vs DC}$. The skill modifier is up to the player and they should decide what best suits the situation and their character (Don't just choose a skill modifier because it's the highest number). The DC is decided by the GM based on the situation and the antagonist making the temptation.

• **Effect:** Success and the kid resists the temptation, sees through the adversary's motives, and is able to decide a better course of action. Failure and the child gives in to the temptation and falls right in to the antagonists plot.

• **Swallowed Whole:**

• **Description:** Being swallowed alive is a common theme in fairy tales, nursery rhymes, and mythology. Finding oneself in the belly of a beast, while unpleasant, does not necessarily mean the end of the road.

• **Check:** Opposed Grapple Checks: $1d20 + \text{Grit} + \text{Scamper vs } 1d20 + \text{Grit} + \text{Scamper}$

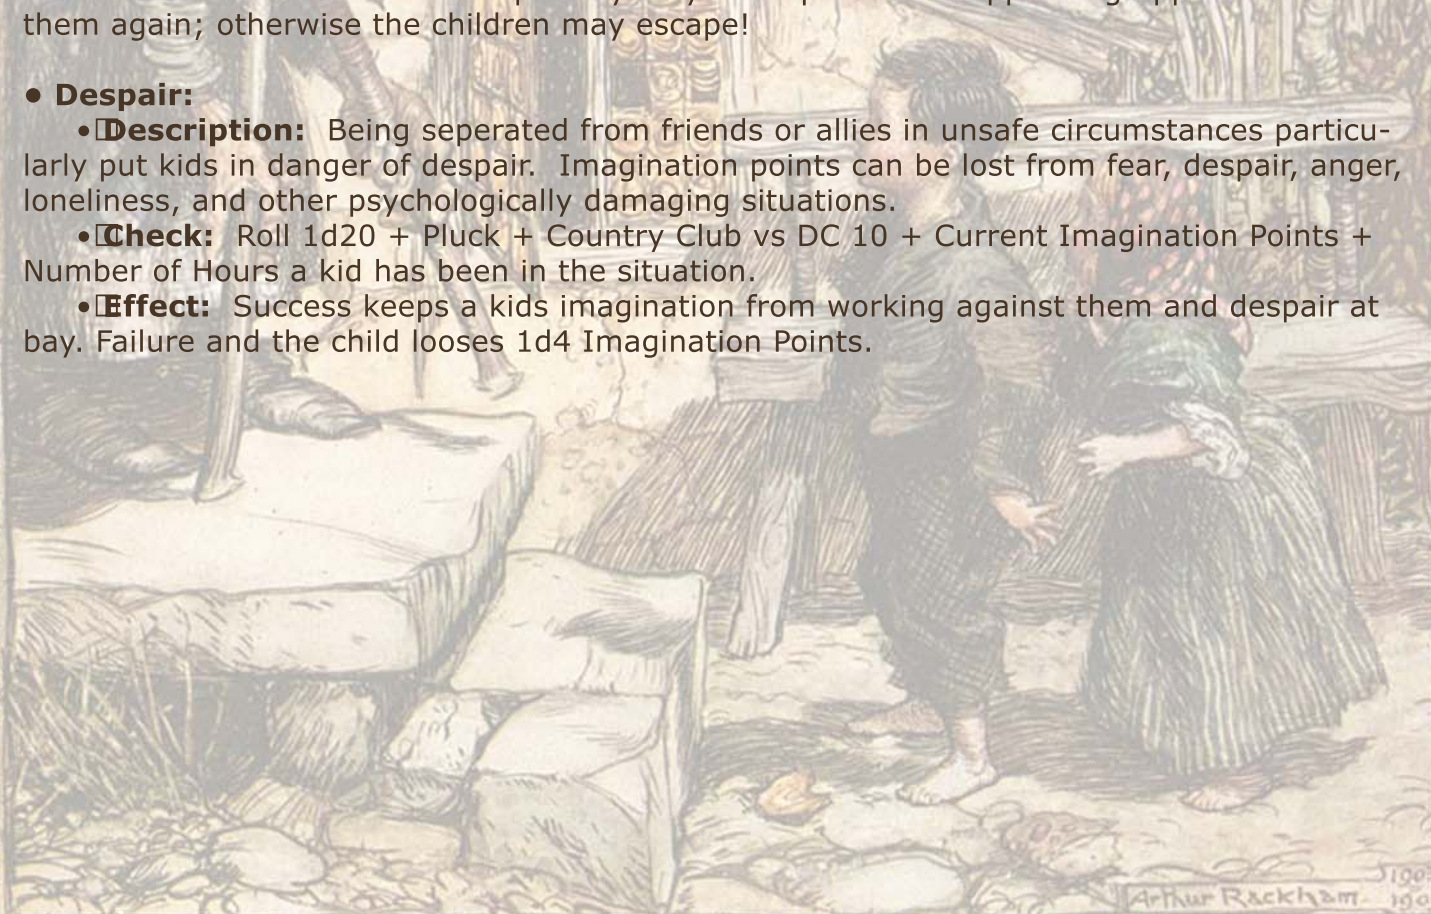

• **Effect:** Success and a kid manages to avoid being swallowed and breaks free of the grapple. Failure and the child is forced into the creature's mouth and down to their stomach. While in the stomach the GM may decide to start rolling DMG each round as the kid is digested or if the creature is vast enough in size they GM may rule that they are able to avoid being digested if they are careful and a whole different scene can take place within the creature's body! Characters are not without reprieve; they may attempt to escape using more opposed grapple checks to make their way back to the monstrous gullet. From there they can attempt to sneak or burst out the next time the creature opens its mouth. If the monster notices their escape they may attempt another opposed grapple to swallow them again; otherwise the children may escape!

• **Despair:**

• **Description:** Being separated from friends or allies in unsafe circumstances particularly put kids in danger of despair. Imagination points can be lost from fear, despair, anger, loneliness, and other psychologically damaging situations.

• **Check:** Roll $1d20 + \text{Pluck} + \text{Country Club vs DC } 10 + \text{Current Imagination Points} + \text{Number of Hours a kid has been in the situation}$.

• **Effect:** Success keeps a kid's imagination from working against them and despair at bay. Failure and the child loses $1d4$ Imagination Points.

Hazards of the Environment

• **Falling:**

- **Description:** Here are some guidelines for when a character fails that climb check or gets bull rushed over a ledge!

- **Damage:** DMG = 1d6 per 10' (20d6 max)

- **Other Hazards:** Icy spikes, jagged rocks, thorny vines, outcroppings, etc..
+1 DMG per 10' fallen (max. +10)

- **Save:** 1d20 + Pluck + Quick save for half DMG vs DC Depth Fallen (in feet)

• **Extreme Weather:**

- **Description:** Kids in the Grimm Lands may find themselves in all sorts of weather conditions. Usually characters that are properly equipped or sheltered do not take damage from foul weather.

- **Damage:** DMG = 1d6 per 10 minutes.

- **Other Hazards:** Lighting, thunder, large hail, extreme winds, etc
Add DMG dice as needed based on the ferocity of the weather.

- **Save:** 1d20 + Pluck + Grit save for half DMG vs DC Time in Minutes.

- **Types:** heat, cold, hail, sand storm, etc.

• **Swimming & Drowning:**

- **Description:** Here are some guidelines for characters that find themselves having to swim or other situation that may lead to drowning.

- **Swimming DCs:**

- Calm shallow water = DC 10

- Fast moving deep water = DC 15

- Dangerous cascades, rocks, or other treacherous water = DC 20

- **Swimming Check:** 1d20 + Grit + Boy Scouts. Failing a swim check forces the character to start holding their breath, begin sinking, and must succeed in another swim check in order to reach the surface to breath again. Success and a kid can swim at half their normal speed that round.

- **Hold Breath:** Rounds = Grit STAT + Grit Modifier

- **Drowning:** After a character has ran out of breath they begin to drown. First round they fall unconscious (0 HP), second round they are dying (0 Grit), and third round they have drown.

Disease & Poison

• Disease:

• **Description:** Diseases have various symptoms and are spread through a number of ways. Several typical diseases, types, and how they are spread are summarized below. A disease stat block contains the following: Name: Type, DC, incubation time, damage.

- **Type** lists the disease's method of delivery (contact, inhaled, or injury).
- **Save DC** lists the Fortitude save DC needed to prevent infection.
- **Incubation** lists the time before damage begins after failed save.
- **Damage** lists the ability damage the character takes after incubation and each day afterward.

• Pathogens:

- o **Virus**
- o **Bacteria**
- o **Fungus**
- o **Supernatural**

• Delivery Method:

- o **Contact** (inhale, engulf, spit, etc)
- o **Injury** (bite, sting, slash, pierce, inject, etc)
- o **Ingested / Digested** (ate, drank, forced ingestion, etc)

• Check: 1d20 + Grit + Boy Scouts vs DC

• Poison:

• **Description:** Characters can possibly take damage from a weapon that has been poisoned, be attacked by a creature whose natural attacks feature poison, consume poison hidden in food or drink, or be poisoned in some other way. A poison stat block contains the following: Name: Type, DC, damage, price.

- **Name of the poison:**
- **Type** lists the poison's method of delivery (contact, ingested, inhaled, or injury).
- **Save DC** is the DC for a Fortitude save to resist the poison's effect.
- **Damage / Effect** is expressed as "xdx/xdx" and a descriptive effect name. The first number is the initial damage, taken immediately upon failing the Fortitude save against the poison. The second number is the secondary damage, taken one minute after exposure to the poison if a second save is failed.
- **Price** lists the cost for one dose of the poison. It can usually only be obtained through less-than-reputable sources.

• Delivery Method:

- o **Contact** (inhale, engulf, spit, etc)
- o **Injury** (bite, sting, slash, pierce, inject, etc)
- o **Ingested / Digested** (ate, drank, forced ingestion, etc)
- o **Fungus**

• Effects:

- o **Damage:** Additional damage subtracted from HP.
- o **Ability Drain:** Damage subtracted from the stat listed. This effect is temporary unless marked with an asterisk *.
- o **Unconsciousness:** Some poisons actually render the victim unconscious.

• Check: 1d20 + Grit + Scamper vs DC

Grimm Lite

Converted By: Mr. Nobody
Design & Editing: Morgam M
Original Art: Aurthur Rackham

If you like Grimm Lite but wish it was more "crunchy" then please buy
the game which inspired this lite conversion. It's published by
Fantasy Flight Games and it's called "Grimm" by Robert J. Schwalb

The Microlite20 RPG Collection

2017 Edition

A **Free** Collection of Roleplaying Games based on Microlite20 including the original Microlite20, expansions, variants, and complete games using the Microlite20 system.

The Microlite20 RPG Collection is a compilation of Microlite20 based games – over 100 Microlite20 games, variants, and supplements – almost 2000 pages of games. This collection is available for **free** PDF download (and is available as a “Pay-What-You-Want” product on RPGNow/DriveThruRPG with a suggested price of \$0.00 for people who prefer that venue). Each individual game is copyrighted separately, is based on the Open Game License (because the original, Microlite20, is OGL), and is available for free. Each game is a separate entity with its own copyright and license. **The author of each individual game is solely responsible for his or her work -- no editing of individual games has been done.**

This is the third (2017) edition of The Microlite20 RPG Collection. Check the unofficial Microlite20 web site at <https://microlite20.org/> to see if there is a later edition available and for more information on Microlite20 and its variants.
