

Clarise Volkov

Hard Techno / Industrial Techno / Dj & producer

Clarise Volkov is a chemist, specialized in metaphysics.

During the 90's, after Tchernobyl's accident, Clarise is becoming in charge of the "ZDK Laboratory" - secret defense file - The Unit lead by Clarise aimed at synthesizing vortex in lab !

ZDK was attacked by extremist forces who wanted to steal the formula, and use it for futures terrorists attacks.

Clarise decided then to abort the project, close down the lab, and erase everything about the formula...

Now living in France as a political refugee clarise is warming up her skills again around a very new project : synthesizing vortex using audio waves....
